## Instructions

This checklist assists with the preparation of financial statements in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). It shows all the disclosures required by these standards, but does not explain other accounting requirements nor does it reflect the requirements for IFRS for Small and Medium-Sized Entities (SMEs) or the IFRS Practice Statement for Management Commentary. In some instances, to simplify use of the checklist, disclosure requirements have been paraphrased, so you may need to refer to the standards for full details.

In addition to the mandatory disclosure requirements, this checklist includes, in italics, the IASB's encouraged disclosure requirements under IFRS. In addition, comment boxes have been included that summarise and/or refer to relevant IFRS guidance regarding the scope and interpretation of certain disclosure requirements. Comparative amounts in the financial statement disclosures are always required, unless explicitly exempted by the IFRSs.

This checklist reflects all IFRS issued through 30 September 2011 and is effective for entities with year-ends on 31 December 2011 or thereafter. The following table lists IFRS that such an entity may be adopting for the first time since September 2010.

<sup>(1)</sup> If 'Yes', this guidance was issued since the March 2010 version of this checklist and is designated as 'New' beside the detailed question.

<sup>(2)</sup> The amendments in the 2010 *Improvements to IFRSs* are effective for annual periods beginning on or after 1 July 2010, except for the amendments to IFRS 1, IFRS 7, IAS 1, IAS 34 and IFRIC 13, which are effective for annual periods beginning on or after 1 January 2011.

<sup>(3)</sup> IFRS 9 *Financial Instruments*, as issued in November 2009, only addresses financial assets. The amended disclosure requirements are reflected towards the end of the checklist. They reflect the implications for (a) first-time adopters and (b) the IFRS 7 disclosures of all other entities. However, other consequential amendments (IFRS 3, IFRS 4, IAS 1, IAS 2, IAS 8, IAS 12, IAS 18, IAS 21, IAS 27, IAS 28, IAS 31, IAS 32, IAS 36, IAS 39, IFRIC 10 and IFRIC 12) have not been reflected, because these amendments only changed the terminology and classification and measurement requirements, and not the disclosure requirements.

<sup>(4)</sup> IFRS 9 *Financial Instruments*, as issued in October 2010, addresses financial assets and financial liabilities. The amended disclosure requirements are reflected towards the end of the checklist. They reflect the implications for (a) first-time adopters and (b) the IFRS 7 disclosures of all other entities. However, other consequential amendments (IFRS 3, IFRS 4, IFRS 5, IAS 1, IAS 2, IAS 8, IAS 12, IAS 18, IAS 20, IAS 21, IAS 27, IAS 28, IAS 31, IAS 32, IAS 36, IAS 37, IAS 39, IFRIC 2, IFRIC 5, IFRIC 10, IFRIC 12, IFRIC 19 and SIC 27) and the withdrawal of IFRIC 19 have not been reflected, because these amendments only changed the terminology and classification and measurement requirements, and not the disclosure requirements.

<sup>(5)</sup> An entity shall apply this IFRS for annual periods beginning on or after 1 January 2013. Earlier application is permitted. If an entity applies this IFRS earlier, it shall disclose that fact and apply IFRS 11, IFRS 12, IAS 27 *Separate Financial Statements* and IAS 28 (as amended in 2011) at the same time.

<sup>(6)</sup> An entity shall apply this IFRS for annual periods beginning on or after 1 January 2013. Earlier application is permitted. If an entity applies this IFRS earlier, it shall disclose that fact and apply IFRS 10, IFRS 12, IAS 27 (as amended in 2011) and IAS 28 (as amended in 2011) at the same time.

<sup>(7)</sup> An entity is encouraged to provide information required by this IFRS earlier than annual periods beginning on or after 1 January 2013. Providing some of the disclosures required by this IFRS does not compel the entity to comply with all the requirements of this IFRS or to apply IFRS 10, IFRS 11, IAS 27 (as amended in 2011) and IAS 28 (as amended in 2011) early.

<sup>(8)</sup> As a result of the new standards IFRS 10, IFRS 11 and IFRS 12, IAS 27 (as amended in 2011). Entities shall apply this revised standard for annual periods beginning on or after 1 January 2013. Earlier application of IFRS 10 and IFRS 11 is permitted. If an entity applies IFRS 10 and IFRS 11 earlier, it shall disclose that fact and apply IFRS 12, IAS 27 (as amended in 2011) and IAS 28 (as amended in 2011) at the same time.

<sup>(9)</sup> As a result of the new standards IFRS 10, IFRS 11 and IFRS 12, IAS 28 (as amended in 2011) was amended. Entities shall apply this revised standard for annual periods beginning on or after 1 January 2013. Earlier application of IFRS 10 and IFRS 11 is permitted. If an entity applies IFRS 10 and IFRS 11 earlier, it shall disclose that fact and apply IFRS 12, IAS 27 (as amended in 2011) and IAS 28 (as amended in 2011) at the same time.

This checklist is updated semi-annually, reflecting IFRS that are issued by the IASB during that period. Prior to completing this checklist, refer to the IASB website to ensure no other IFRS have been issued between the cut-off date of this checklist and the date the financial statements were authorised for issue.

Each item should be answered with a tick in the appropriate column:

Yes = Disclosure has been made. Reference should be made to the relevant note in which the requirement has been met.

No = Disclosure has not been made even though it is mandatory for the entity to make such a disclosure. Any item marked 'No' should be explained (for example, amount deemed immaterial) on the checklist or on a separate working paper, including the amounts or percentage involved, to help make an assessment of overall compliance with IFRS.

N/A = The question is not applicable to the entity or disclosure is not mandatory for the entity and has not been made.

		▶ If such an impact is not known or reasonably estimable, a statement to that effect		
IAS 8.31	If an IFRS is not applicable to the entity, the entity discloses this fact.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Key estimation assumptions</b>				
127 IAS 1.125	Does the entity disclose key assumptions about the future, and other sources of key estimation uncertainty, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 5.5B	Additional disclosures about non-current assets (or disposal groups) classified as held for sale or discontinued operations (beyond those required specifically by IFRS 5 or other IFRS) may be necessary to comply with this requirement.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
128 IAS 1.125	For the assets and liabilities in item 127., does the entity disclose:			
	a. Their nature	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b. Their carrying amount as at the end of the reporting period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IAS 1.129	An entity presents the disclosures under IAS 1.125 in a manner that helps users of financial statements to understand management's judgements about the future. The nature and extent of the disclosure varies according to the nature of the assumption and other circumstances. Examples of the types of disclosures made are: a. The nature of the assumption or other estimation uncertainty b. The sensitivity of carrying amounts to the methods, assumptions and estimates underlying their calculation, including the reasons for the sensitivity c. The expected resolution of an uncertainty and the range of reasonably possible outcomes within the next financial year for the carrying amounts of the assets and liabilities affected d. The changes made to past assumptions concerning those assets and liabilities, if the uncertainty remains unresolved Examples of key assumptions are: a. Future changes in salaries b. Future changes in prices affecting other costs c. Risk adjustments to cash flows d. Risk adjustments to discount rates			
IAS 1.133	Some key assumptions referred to in IAS 1.125 also require disclosures under other IFRS. For example, IAS 37 requires disclosure, in certain circumstances, of major assumptions concerning future events affecting classes of provisions. IAS 16 requires disclosure of significant assumptions in estimating fair values of revalued items of property, plant and equipment. In addition, IFRS 7 requires disclosure of significant assumptions applied in estimating fair values of financial assets and financial liabilities that are carried at fair value. It is not necessary to repeat these disclosures, even though they are repeated in this checklist.			
<b>Capital</b>				
129 IAS 1.134	Does the entity disclose information that enables users of its financial statements to evaluate the entity's objectives, policies and processes for managing capital.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
130 IAS 1.135	Does the entity disclose the following, based on the information provided internally to the entity's key management personnel:			
	a. Qualitative information about its objectives, policies and processes for managing capital, including (but not limited to):			
	▶ A description of what it manages as capital	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	▶ If the entity is subject to externally imposed capital requirements, the nature of those requirements and how those requirements are incorporated into the management of capital	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	▶ How it is meeting its objectives for managing capital	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b. Summary quantitative data about what it manages as capital. Some entities regard some financial liabilities (for example, some forms of subordinated debt) as part of capital. Other entities regard capital as excluding some components of equity (for example, components arising from cash flow hedges)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	c. Any changes in (a) and (b) from the previous period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

		Disclosure made		
		Yes	No	N/A
	e. If the entity did not comply with the externally imposed capital requirements to which it is subject, the consequences of such non-compliance	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IAS 1.136	The entity may manage capital in many ways and be subject to many different capital requirements. For example, a conglomerate may include entities that undertake insurance activities and banking activities, and those entities may operate in several jurisdictions. If an aggregate disclosure of capital requirements and how the entity manages capital does not provide useful information or distorts a financial statement user's understanding of an entity's capital resources, the entity discloses separate information for each capital requirement to which the entity is subject.			
IAS 1.135 (a)(ii)	Externally imposed capital requirements, referred to in IAS 1.135(a)(ii) only reflect capital requirements imposed by a regulator or a prudential supervisor. Capital requirements, as imposed by a bank or creditor are considered a contractual obligation and are therefore not in the scope of IAS 1.135(a)(ii).

Forward, option and other contracts to reacquire the transferred financial asset for which the contract price (or exercise price) is the fair value of the transferred financial asset</p> <p>c. An arrangement whereby an entity retains the contractual rights to receive the cash flows of a financial asset, but assumes a contractual obligation to pay the cash flows to one or more entities and the conditions in IAS 39.19(a)-(c) are met</p>

<b>Fair value</b>				

		Disclosure made		
		Yes	No	N/A
	<i>IFRS 7.29</i> <i>IFRS 4.App A</i>	<p>The entity is not required to disclose fair value:</p> <p>a. If the carrying amount is a reasonable approximation of fair value, for example, for financial instruments such as short-term trade receivables and payables</p> <p>b. For an investment in equity instruments that do not have a quoted price in an active market for an identical instrument (i.e., a Level 1 input), or derivatives linked to such equity instruments, that is measured at cost in accordance with IAS 39 because its fair value cannot be measured reliably</p> <p>Or</p> <p>c. For a contract containing a discretionary participation feature, if the fair values of that feature cannot be measured reliably.</p>		
218	<i>IFRS 7.25</i> <i>IFRS 7.29</i>	Does the entity disclose for each class of financial assets and financial liabilities the fair value of that class of assets and liabilities in a way that permits it to be compared with its carrying amount (except for those noted in IFRS 7.29).		
219	<i>IFRS 7.26</i>	In disclosing fair values, does the entity group financial assets and financial liabilities into classes, but offset them only to the extent that their carrying amounts are offset in the statement of financial position.		
	<i>IFRS 1.E3</i> <i>IFRS 7.44G</i>	First-time adopters are exempt from disclosing comparative information in items 222. - 223. and 235. (see item 32.).		
New	220	If an Entity early adopts IFRS 13, items 222. - 224. are not applicable and should apply the requirements of 585. - 588.		
221	<i>IFRS 7.27</i>	For each class of financial instrument, does the entity disclose:		
		a. The methods used in determining fair value		
		b. If a valuation technique is used to determine fair value, the assumptions applied in determining fair values of each class of financial assets or financial liabilities		
	<i>IFRS 7.27</i>	For example, the entity discloses the assumptions for prepayment rates, rates of estimated credit losses, interest rates and discount rates.		
		c. Any change in the valuation technique		
		d. The reasons for that change		
222	<i>IFRS 7.27A</i>	For the disclosures required by item 223., does the entity classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in the measurements, according to the following levels:		
		a. Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1)		
		b. Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)		
		c. Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3)		
	<i>IFRS 7.27A</i>	The entity determines the level in the fair value hierarchy based on the lowest level input that is significant to the fair value measurement in its entirety. The entity assesses the significance of an input against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.		
223	<i>IFRS 7.27B</i>	For fair value measurements recognised in the statement of financial position, does the entity disclose for each class of financial instruments in a tabular format unless another format is more appropriate:		
		a. The level in the fair value hierarchy into which the fair value measurements are categorised in their entirety, segregating fair value measurements based on the levels defined in item 222.		
		b. Any significant transfers between (into and out of) Level 1 and Level 2 of the fair value hierarchy and the reasons for those transfers, presented separately		
	<i>IFRS 7.27B</i>	Significance is judged with respect to profit or loss, and total assets or total liabilities.		
		c. For fair value measurements in Level 3 of the fair value hierarchy, a reconciliation from the beginning balances to the ending balances, disclosing separately changes during the reporting period attributable to the following:		
		▶ Total gains or losses for the reporting period recognised in profit or loss and a description of where they are presented in the statement of comprehensive income or the separate income statement (if presented)		
		▶ Total gains or losses recognised in other comprehensive income

<b>Qualitative disclosures</b>				
228	IFRS 7.33	For each type of risk arising from financial instruments, does the entity disclose:

	b. Its objectives, policies and processes for managing the risk and the methods used to measure the risk	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	c. Any changes in (a) or (b) from the previous period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Quantitative disclosures</b>				
229	IFRS 7.34 IAS 24.9	For each type of risk arising from financial instruments, does the entity disclose:		
	a. Summary quantitative data about its exposure to that risk at the end of the reporting period based on the information provided internally to key management personnel of the entity (as defined in IAS 24), for example, the entity's board of directors and chief executive officer	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.B7 IAS 8.10	If the entity uses several methods to manage a risk or an exposure, the entity discloses information using the method or methods that are most relevant and reliable. IAS 8.10 also discusses relevance and reliability.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b. The disclosures required by items 232. – 238. to the extent not provided in accordance with (a)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	c. Concentrations of risk if not apparent from the disclosures made in accordance with (a) and (b)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.B8 IFRS 7.IG18	Concentrations of risk arise from financial instruments that have similar characteristics and are affected similarly by changes in economic or other conditions. The identification of concentrations of risk requires judgement taking into account the circumstances of the entity (see IFRS 7.IG18).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
230	IFRS 7.B8	For concentrations of risk, does the entity disclose:		
	a. How management determines concentrations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b. The shared characteristic that identifies each concentration (for example, counterparty, geographical area, currency and/or market)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	c. The amount of the risk exposure associated with all financial instruments sharing that characteristic	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.IG19	In accordance with IFRS 7.B8, disclosures of concentrations of risk includes the shared characteristic that identifies each concentration. For example, the shared characteristic may refer to geographical distribution of counterparties by groups of countries, individual countries or regions within countries.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
231	IFRS 7.35	If the quantitative data disclosed as at the end of the reporting period are unrepresentative of the entity's exposure to risk during the period, does the entity provide further information that is representative.		
IFRS 7.IG20	To meet this requirement, the entity might disclose the highest, lowest and average amount of risk to which it was exposed during the reporting period. For example, if an entity typically has a large exposure to a particular currency, but at the end of the reporting period unwinds the position, the entity might disclose a graph that shows the exposure at various times during the reporting period, or disclose the highest, lowest and average exposures.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Credit risk</b>				
IFRS 7.B9-B10	IFRS 7.36(a) requires disclosure of the amount that best represents the entity's maximum exposure to credit risk. For a financial asset, this is typically the gross carrying amount, net of:			
	a. Any amounts offset in accordance with IAS 32			
	b. Any impairment losses recognised in accordance with IAS 39			
	Activities that give rise to credit risk and the associated maximum exposure to credit risk include, but are not limited to:			
	a. Granting loans and receivables to customers and placing deposits with other entities. In these cases, the maximum exposure to credit risk is the carrying amount of the related financial assets			
	b. Entering into derivative contracts such as foreign exchange contracts, interest rate swaps and credit derivatives. If the entity measures the resulting asset at fair value, the maximum exposure to credit risk at the end of the reporting period will equal the carrying amount			
	c. Granting financial guarantees. In this case, the maximum exposure to credit risk is the maximum amount the entity could have to pay if the guarantee is called on, which may be significantly greater than the amount recognised as a liability

		<p>d. Making a loan commitment that is irrevocable over the life of the facility or is revocable only in response to a material adverse change. If the issuer cannot settle the loan commitment net in cash or another financial instrument, the maximum credit exposure is the full amount of the commitment. This is because it is uncertain whether the amount of any undrawn portion may be drawn upon in the future. This may be significantly greater than the amount recognised as a liability</p>		
232	IFRS 7.36 IAS 32.42	Does the entity disclose by class of financial instrument:		
		a. The amount that best represents its maximum exposure to credit risk at the end of the reporting period without taking account of any collateral held or other credit enhancements (for example, netting agreements that do not qualify for offset in accordance with IAS 32.42), if the carrying amount does not represent the maximum exposure to credit risk		
	IFRS 7.36 IFRS 7.IG22	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. A description of collateral held as security and of other credit enhancements, and their financial effect (for example, a quantification of the extent to which collateral and other credit enhancements mitigate credit risk) for the amount that best represents the maximum exposure to credit risk (whether disclosed in accordance with (a) or represented by the carrying amount of a financial instrument)		
	IFRS 7.36 IFRS 7.IG23-25	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		c. The credit quality of financial assets that are neither past due nor impaired		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		<b>Financial assets that are either past due or impaired</b>		
233	IFRS 7.37	Does the entity disclose by class of financial asset:		
	IFRS 7.IG28	a. An analysis of the age of financial assets that are past due as at the end of the reporting period but not impaired		
	IFRS 7.IG29	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. An analysis of financial assets that are individually determined to be impaired as at the end of the reporting period, including the factors the entity considered in determining that they are impaired		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		<b>Collateral and other credit enhancements obtained</b>		
234	IFRS 7.38	If the entity obtains financial or non-financial assets during the period by taking possession of collateral it holds as security or calling on other credit enhancements (for example, guarantees), and such assets meet the recognition criteria in other IFRS, does the entity disclose for such assets held at the reporting date:		
		a. The nature and carrying amount of the assets obtained		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. If the assets are not readily convertible into cash, its policies for disposing of such assets or for using them in its operations		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		<b>Liquidity risk</b>		
235	IFRS 7.39	Does the entity disclose:		
		a. A maturity analysis for non-derivative financial liabilities (including issued financial guarantee contracts) that shows the remaining contractual maturities		
	IFRS 7.B10A IFRS 7.B11 IFRS 7.B11A	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	IFRS 7.B11C IFRS 7.B11D	<p>An entity discloses summary quantitative data about its exposure to liquidity risk on the basis of information provided internally to key management personnel. An entity explains how those data are determined.</p> <p>In preparing the maturity analyses, the entity uses its judgement to determine appropriate time bands, which are consistent with how the entity manages risk.</p> <p>In preparing the maturity analyses, the entity does not separate an embedded derivative from a hybrid (combined) financial instrument.</p> <p>If the counterparty has a choice of when an amount is paid, the liability is included on the earliest date on which the entity can be required to pay. For example, financial liabilities that an entity must repay on demand (such as demand deposits) are included in the earliest time band.</p> <p>If the entity is committed to make amounts available in instalments, each instalment is allocated to the earliest period in which the entity can be required to pay. For example, an undrawn loan commitment is included in the time band containing the earliest date it can be drawn down.</p> <p>For issued guarantee contracts, the maximum amount of the guarantee is allocated to the earliest period in which the guarantee could be called.</p> <p>The amounts in the maturity analysis are the contractual undiscounted cash flows.</p> <p>Such undiscounted cash flows differ from the amount included in the statement of financial position because the statement of financial position amount is based on discounted cash flows. If the amount payable is not fixed, the entity discloses the amount based on the conditions existing at the end of the reporting period. For example, if the amount payable varies with changes in an index, the amount disclosed may be based on the level of the index at the end of the reporting period.</p>

A maturity analysis for derivative financial liabilities, which includes the remaining contractual maturities for those derivative financial liabilities for which contractual maturities are essential for an understanding of the timing of the cash flows	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.B11B	For example: a. An interest rate swap with a remaining maturity of five years in a cash flow hedge of a variable rate financial asset or liability b. All loan commitments.			
	c. How it manages the liquidity risk inherent in (a) and (b)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.B11E IFRS 7.B11F	The entity discloses a maturity analysis of financial assets it holds for managing liquidity risk (for example, financial assets that are readily saleable or expected to generate cash inflows to meet cash outflows on financial liabilities), if that information is necessary to enable users of its financial statements to evaluate the nature and extent of liquidity risk. Other factors that the entity considers in item 235(c). include, but are not limited to, whether the entity has the following: a. Committed borrowing facilities (for example, commercial paper facilities) or other lines of credit (for example, stand-by credit facilities) that it can access to meet liquidity needs b. Deposits at central banks to meet liquidity needs c. Very diverse funding sources d. Significant concentrations of liquidity risk in either its assets or its funding sources e. Internal control processes and contingency plans for managing liquidity risk f. Instruments that include accelerated repayment terms (for example, upon the downgrade of the entity's credit rating) g. Instruments that could require the posting of collateral (for example, margin calls for derivatives) h. Instruments that allow the entity to choose whether it settles its financial liabilities by delivering cash (or another financial asset) or by delivering its own shares Or i. Instruments that are subject to master netting agreements.			
IFRS 7.B10A	d. Unless the information is included in the contractual maturity analysis required by item 235(a) or (b), does the entity state that fact and provide quantitative information that enables users of its financial statements to evaluate the extent of this risk if the outflow of cash (or another financial asset) could either: ▶ Occur significantly earlier than indicated in the data Or ▶ Be for significantly different amounts from those indicated in the data (for example, for a derivative that is included in the data on a net settlement basis, but for which, the counterparty has the option to require gross settlement)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	<b>Market risk</b>			
	<b>Sensitivity analysis</b>			
236 IFRS 7.40	Unless the entity complies with item 237., does the entity disclose:			
IFRS 7.IG33 IFRS 7.IG34	a. A sensitivity analysis for each type of market risk to which the entity is exposed at the end of the reporting period, showing how profit or loss and equity would have been affected by changes in the relevant risk variable that were reasonably possible at the end of the reporting period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b. The methods and assumptions used in preparing the sensitivity analysis	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	c. Changes from the previous period in the methods and assumptions used and reasons for such changes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.B17 - B21	In accordance with IFRS 7.B3, the entity decides how it aggregates information to display the overall picture without combining information with the different characteristics about exposures to risks from significantly different economic environments. If the entity is exposed to only one type of market risk in only one economic environment, it does not show disaggregated information. For this purpose: a. Entities disclose the effect on profit or loss and equity at the end of the reporting period, assuming that a reasonably possible change in the relevant risk variable had occurred at the end of the reporting period and had been applied to the risk exposures in existence at that date. For example, if an entity has a floating rate liability at the end of the year, the entity would disclose the effect on profit or loss (that is, interest expense) for the current year if interest rates had varied by reasonably possible amounts			

b. Entities are not required to disclose the effect on profit or loss and equity for each change within a range of reasonably possible changes of the relevant risk variable. Disclosure of the effects of the changes at the limits of the reasonably possible range are sufficient

In determining what a reasonably possible change in the relevant risk variable is, the entity considers the following:

a. The economic environments in which it operates. A reasonably possible change does not include remote or 'worst case' scenarios or 'stress tests'. Moreover, if the rate of change in the underlying risk variable is stable, the entity need not alter the chosen reasonably possible change in the risk variable. The entity discloses the effect on profit or loss and equity if interest rates were to change to 5% or 6%. The entity is not required to revise its assessment that interest rates might reasonably fluctuate, unless there is evidence that interest rates have become significantly more volatile

b. The time frame over which it is making the assessment. The sensitivity analysis shows the effects of changes that are considered reasonably possible over the period until the entity will next present these disclosures, which is usually its next annual reporting period.

237 IFRS 7.41

If the entity prepares a sensitivity analysis, such as a value-at-risk, that reflects interdependencies between risk variables (for example, interest rates and exchange rates) and uses it to manage financial risks, it may use that sensitivity analysis in place of the analysis in item 236. does the entity also explain:

a. The method used in preparing such a sensitivity analysis, and the main parameters and assumptions underlying the data

b. The objective of the method used and limitations that may result in the information not fully reflecting the fair value of the assets and liabilities involved

IFRS 7.B23 -B24

**Currency risk**

Currency risk does not arise from financial instruments that are non-monetary items or from financial instruments denominated in the functional currency.

An entity discloses a sensitivity analysis for each currency to which the entity has significant exposure.

IFRS 7.B25 -B28

**Other price risk**

Other price risk arises on financial instruments because of changes in, for example, commodity prices or equity prices. To comply with IFRS 7.40, the entity might disclose the effect of a decrease in a specified stock market index, commodity price, or other risk variable. For example, if an entity gives residual value guarantees that are financial instruments, the entity discloses an increase or decrease in the value of the assets to which the guarantee applies.

Two examples of financial instruments that give rise to equity price risk are a holding of equities in another entity and an investment in a trust, which in turn, holds investments in equity instruments. The fair values of such financial instruments are affected by changes in the market price of the underlying equity instruments.

Under IFRS 7.40(a), an entity discloses the sensitivity of profit or loss separately from the sensitivity of equity. For example, the sensitivity from instruments classified as at fair value through profit or loss and impairments of available-for-sale financial assets are disclosed separately from the sensitivity of instruments classified as available-for-sale or investments in equity instruments whose changes in fair value are presented in other comprehensive income.

Financial instruments that the entity classifies as equity instruments are not remeasured. Neither profit or loss or equity will be affected by the equity price risk of those instruments. Accordingly, no sensitivity analysis is required.

**Other market risk disclosures**

238 IFRS 7.42

If the sensitivity analyses in items 236. and 237. are unrepresentative of a risk inherent in a financial instrument (for example, because the exposure at the end of the reporting period does not reflect the exposure during the reporting period), does the entity disclose that fact and the reason it believes the sensitivity analyses are unrepresentative.

IFRS 7.IG37-IG40

The entity discloses additional information if the sensitivity analysis is unrepresentative of a risk inherent in a financial instrument. For example, this can occur if:

a. A financial instrument contains terms and conditions whose effects are not apparent from the sensitivity analysis. For example, options that remain out of (or in) the money for the chosen change in the risk variable

IFRS 7.IG39

b. Financial assets are illiquid. For example, if there is a low volume of transactions in similar assets and the entity finds it difficult to find a counterparty

### Income taxes

IAS 12.78

If the entity recognises exchange differences on deferred foreign tax liabilities or assets in the statement of comprehensive income, it may classify such differences as deferred tax expense (income), if that presentation is most useful to financial statement users.

IFRIC 4.12  
IFRIC 4.13

IFRIC 4 provides guidance for determining whether an arrangement that does not take the legal form of a lease but conveys a right to use an asset is, or contains, a lease that is accounted for under IAS 17. Under IAS 17, the entity separates payments from other consideration required by the arrangement. In some cases, it is impractical to separate the payments for the lease from payments for other elements in the arrangement reliably.

303 IFRIC 4.15  
IAS 17.35

If in an operating lease the entity is a purchaser and concludes that it is impractical to reliably separate the payments for the lease from payments for other elements in the arrangement, does the entity:

a. Treat all payments under the arrangement as lease payments to comply with the disclosure requirements of IAS 17, but:

▶ Discloses those payments separately from minimum lease payments of other arrangements that do not include payments for non-lease elements

And

▶ States that the disclosed payments also include payments for non-lease elements in the arrangement

### Non-current assets held for sale and discontinued operations

IFRS 5.31

A 'component' of an entity comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting, from the rest of the entity. In other words, a component of an entity was a cash-generating unit or a group of cash-generating units while being held for use.

IFRS 5.32

A *discontinued operation* is a component of an entity that either has been disposed of, or is classified as held for sale

And

a. Represents a separate major line of business or geographical area of operations

b. Is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations

Or

c. Is a subsidiary acquired exclusively with a view to resale

IFRS 5.36A

If an entity commits to a sale plan involving a loss of control of a subsidiary and the subsidiary is a disposal group that meets the definition of discontinued operation under IFRS 5.32, it discloses items 304.-306. for this subsidiary.

304 IFRS 5.30,  
IFRS 5.33

Does the entity present information that enables users of the financial statements to evaluate the financial effects of discontinued operations and disposals of non-current assets (or disposal groups) by disclosing:

a. A single amount in the statement of comprehensive income comprising the total of:

▶ The post-tax profit or loss of discontinued operations

▶ The post-tax gain or loss recognised on the measurement to fair value less costs to sell or on the disposal of the assets or disposal group(s) constituting the discontinued operation

b. An analysis of the single amount in (a) into the following:

▶ The revenue, expenses and pre-tax profit or loss of discontinued operations

▶ The related income tax expense

▶ The gain or loss recognised on the measurement to fair value less costs to sell or on the disposal of the assets or disposal group(s) constituting the discontinued operation

▶ The related income tax expense

IFRS 5.33  
IFRS 5.11

The entity may present the analysis in (b) in the notes or in the statement of comprehensive income (or income statement). If it is presented in the statement of comprehensive income, it is presented in a section relating to discontinued operations, separately from continuing operations. The analysis is not required for disposal groups that are newly acquired subsidiaries that meet the criteria to be classified as held for sale on acquisition.

c. The net cash flows attributable to the operating, investing and financing activities of discontinued operations

IFRS 5.33

The analysis in (c) may be presented either in the notes or in the financial statements. These disclosures are not required for disposal groups that are newly acquired subsidiaries that meet the criteria to be classified as held for sale on acquisition (see IFRS 5.11).

315	IFRS 8.25	Are the amounts in each segment item reported included in the measure of the segment's profit or loss, its assets, or its liabilities reported to the chief operating decision maker for allocating resources to the segment and assessing its performance		
	IFRS 8.25	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	The entity includes adjustments and eliminations in preparing an entity's financial statements and allocations of revenues, expenses and gains or losses in determining reported segment profit or loss only if they are included in the measure of the segment's profit or loss that is used by the chief operating decision maker. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by the chief operating decision maker are reported for that segment. If amounts are allocated to reported segment profit or loss, assets or liabilities, those amounts are allocated on a reasonable basis.			
316	IFRS 8.26	If the chief operating decision maker uses only one measure of an operating segment's profit or loss, its assets or its liabilities, is the segment information reported on those measures.

	If the chief operating decision maker uses more than one measure of an operating segment's profit or loss, its assets or its liabilities, is the segment information reported as determined based on the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.			
317	IFRS 8.27	Does the entity explain the measurements of segment profit or loss, segment assets and segment liabilities for each reportable segment. The entity discloses:

Those differences could include accounting policies and policies for allocation of centrally incurred costs that are necessary for an understanding of the reported segment information	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	c. The nature of any differences between the measurements of the reportable segments' assets and the entity's assets (if not apparent from the reconciliations described in item 318.), which could include accounting policies and policies for allocation of jointly used assets that are necessary for an understanding of the reported segment information	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	d. The nature of any differences between the measurements of the reportable segments' liabilities and the entity's liabilities (if not apparent from the reconciliations described in item 318.), which could include accounting policies and policies for allocation of jointly utilised liabilities that are necessary for an understanding of the reported segment information	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	e. The nature of any changes from prior periods in the measurement methods used to determine reported segment profit or loss and the effect, if any, of those changes on the measure of segment profit or loss	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	f. The nature and effect of any asymmetrical allocations to reportable segments. For example, an entity might allocate depreciation expense to a segment without allocating the related depreciable assets to that segment	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Reconciliations</b>				
318	IFRS 8.28	Does the entity reconcile:

	c. Total reportable segments' assets to the entity's assets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

319	<i>IFRS 8.28</i> Does the entity separately identify and disclose all material reconciling items	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	<i>IFRS 8.28</i> For example, the entity separately identifies and discloses the amount of each material adjustment needed to reconcile reportable segment profit or loss to the entity's profit or loss arising from different accounting policies.			
<b>Restatement of previously reported information</b>				
320	<i>IFRS 8.29</i> If the entity changed the structure of its internal organisation in a manner that causes the composition of its reportable segments to change, has the comparative information for earlier periods, including interim periods, been restated if it is available and the cost to develop it is not excessive. The determination of whether the information is not available and the cost to develop it is excessive is made for each individual item of disclosure. Following a change in the composition of its reportable segments, the entity discloses whether it restated the corresponding items of segment information for earlier periods	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
321	<i>IFRS 8.30</i> If the entity changes the structure of its internal organisation in a manner that causes the composition of its reportable segments to change and does not restate segment information for prior periods, including interim periods, for the change, does the entity disclose, in the reporting period in which the change occurs, segment information for the current period on both the old basis and the new basis of segmentation, unless the necessary information is not available and the cost to develop it would be excessive	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Entity-wide disclosures</b>				
	<i>IFRS 8.31</i> The entity-wide disclosures set out in items 322.-324. apply to all entities subject to IFRS 8, including those with a single reportable segment. The entity provides this information only to the extent that it is not already provided as part of the reportable operating segment information in items 309.-321.			
<b>Information about products and services</b>				
322	<i>IFRS 8.32</i> Does the entity report the revenues from external customers for each product and service, or each group of similar products and services, unless the necessary information is not available and the cost to develop it is excessive, in which case that fact is disclosed	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

IFRS 4.39	An insurer need not disclose the maturity analysis required by item 227. if it discloses the estimated timing of the net cash outflows resulting from recognised insurance liabilities instead. This may be an analysis of the amounts, by estimated timing, recognised in the statement of financial position.			
IFRS 4.39	If an insurer uses an alternative method to manage sensitivity to market conditions, such as an embedded value analysis, it may use that sensitivity analysis to meet the requirement in item 232.(a). Such an insurer also provides the disclosures required by item 237

387	IFRS 4.39A To comply with the requirements to disclose information about the sensitivity to insurance risk (see item 386.) does the entity disclose either:			
	a. Quantitative information about sensitivity, which comprises:

## Interim reporting

IAS 34.1	IAS 34 does not mandate whether, how frequently, or how soon after the end of an interim period, an entity publishes interim financial reports. However, IAS 34 applies if the entity publishes an interim financial report in accordance with IFRS.
IAS 34.9	If the entity publishes a complete set of financial statements in its interim financial report, the form and content of those statements conform to the requirements of IAS 1 for a complete set of financial statements.
IAS 34.18	Other IFRS specify required disclosures in financial statements. In that context, 'financial statements' means complete sets of financial statements of the type normally included in an annual financial report and sometimes included in other reports. The disclosures required by those other IFRS are not required if the entity's interim financial report includes only condensed financial statements and selected explanatory notes rather than a complete set of financial statements.  Therefore, this section of the checklist contains only those interim disclosures that are specifically required by IFRS for condensed financial statements. Consistent with IAS 34.6, any disclosures that would duplicate the disclosure contained in the most recent annual financial statements, such as details of accounts that have not changed significantly in amount since the end of the most recently completed fiscal year, may be omitted. However, consistent with the principles of the <i>Framework</i> and IAS 34.16, disclosure must be provided for events subsequent to the end of the most recent annual reporting period that have a material effect on the interim financial statements. For example, disclosures must address significant changes in accounting policies and methods, estimates used in the preparation of financial statements, status of long-term contracts, capitalisation (including significant new borrowings or modification of existing financing arrangements) and the reporting entity resulting from business combinations or dispositions.
IAS 34.19	The entity does not describe an interim financial report as complying with IFRS unless it complies with all of the requirements of each IFRS.
IAS 34.43	IAS 34.43 and IAS 34.44 provide guidance for reporting a change in accounting policy in interim financial reports.

For such entities, references to the 'date of transition to IFRSs' means, in the case of IFRS 9 (issued in 2009) and IFRS 7 only, the beginning of the first IFRS reporting period.			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

These classes are determined by the entity and as such, are distinct from the categories of financial instruments specified in IAS 39 or IFRS 9.  In determining classes of financial instruments, an entity, at minimum: a. Distinguishes between instruments measured at amortised cost from those measured at fair value b. It is necessary to balance between excessive detail and obscuring important information as a result of too much aggregation. For example, an entity must not obscure important information by including it among a large amount of insignificant detail. <b>Fair value</b>				
IFRS 7.29 IFRS 4.App A	The entity is not required to disclose fair value:			
	a. If the carrying amount is a reasonable approximation of fair value, for example, for financial instruments such as short-term trade receivables and payables			
	b. For derivatives linked to investments in equity instruments that do not have a quoted market price in an active market that are measured at cost in accordance with IAS 39 because their fair value cannot be measured reliably			

		Disclosure made		
		Yes	No	N/A
	Or			
	c. For a contract containing a discretionary participation feature, if the fair values of that feature cannot be measured reliably			
466	IFRS 7.25 IFRS 7.29	Does the entity disclose for each class of financial assets and financial liabilities, the fair value of that class of assets and liabilities in a way that permits it to be compared with its carrying amount (except for those noted in IFRS 7.29)		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
467	IFRS 7.26	In disclosing fair values, does the entity group financial assets and financial liabilities into classes, but offset them only to the extent that their carrying amounts are offset in the statement of financial position		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
468	IFRS 7.27	For each class of financial instrument, does the entity disclose:		
	a. The methods used in determining fair value	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b. If a valuation technique is used to determine fair value, the assumptions applied in determining fair values of each class of financial assets or financial liabilities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.27	For example, the entity discloses the assumptions for prepayment rates, rates of estimated credit losses, interest rates and discount rates.			
	c. Any change in the valuation technique	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	d. The reasons for that change	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 1.E3 IFRS 7.44G	First-time adopters are exempt from disclosing comparative information in items 469-470.			
469	IFRS 7.27A	For the disclosures required by item 470., does the entity classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in the measurements, according to the following levels:		
	a. Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b. Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	c. Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.27A	The entity determines the level in the fair value hierarchy based on the lowest level input that is significant to the fair value measurement in its entirety. The entity assesses the significance of an input against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.			
470	IFRS 7.27B	For fair value measurements recognised in the statement of financial position, does the entity disclose for each class of financial instruments in a tabular format unless another format is more appropriate:		
	a. The level in the fair value hierarchy into which the fair value measurements are categorised in their entirety, segregating fair value measurements based on the levels defined in item 469.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b. Any significant transfers between (into and out of) Level 1 and Level 2 of the fair value hierarchy and the reasons for those transfers, presented separately	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.27B	Significance is judged with respect to profit or loss, and total assets or total liabilities.			
	c. For fair value measurements in Level 3 of the fair value hierarchy, a reconciliation from the beginning balances to the ending balances, disclosing separately changes during the reporting period attributable to the following:			
	▶ Total gains or losses for the reporting period recognised in profit or loss, and a description of where they are presented in the statement of comprehensive income or the separate income statement (if presented)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	▶ Total gains or losses recognised in other comprehensive income	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	▶ Purchases, sales, issues and settlements (separately for each type of movement)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	▶ Transfers into or out of Level 3 (for example, transfers attributable to changes in observable market data) and the reasons for those transfers, presented separately	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	d. The amount of total gains or losses for the reporting period in (c) included in profit or loss that are attributable to gains or losses relating to those assets and liabilities held at the end of the reporting period and a description of where those gains or losses are presented in the statement of comprehensive income or the separate income statement (if presented)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

		Disclosure made		
		Yes	No	N/A
	e. For fair value measurements in Level 3, if changing one or more of the inputs to reasonably possible alternative assumptions changes fair value significantly, disclose:			
	▶ That fact	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	▶ The effect of those changes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	▶ How the effect of a change to a reasonably possible alternative assumption was calculated	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	<i>IFRS 7.27B(e)</i>	Significance is judged with respect to profit or loss, and total assets or total liabilities, or, when changes in fair value are recognised in other comprehensive income, total equity.		
471	<i>IFRS 7.28</i> <i>IAS 39.AG76A</i>	If there is a difference between the fair value (transaction price) at initial recognition and the amount that is determined at that date using a valuation technique, does the entity disclose, by class of financial instrument:		
	<i>IAS 39.AG76A</i>	a. Its accounting policy for recognising that difference in profit or loss for changes in factors (including time) that market participants would consider in setting a price		
	<i>IAS 39.AG76A</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		An entity subsequently measures a financial asset or financial liability and recognises gains and losses consistently with the requirements of IAS 39 or IFRS 9 (issued in 2009), as appropriate. The application of IAS 39.AG76 may result in no gain or loss being recognised on the initial recognition of a financial asset or financial liability. In such a case, IAS 39 requires that a gain or loss is recognised after initial recognition only to the extent that it arises from a change in a factor (including time) that market participants would consider in setting a price.		
		b. The aggregate difference yet to be recognised in profit or loss at the beginning and end of the reporting period and reconcile this difference		
472	<i>IFRS 7.29</i> <i>IFRS 7.30</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		In the cases described in IFRS 7.29(b) and (c), does the entity disclose information to help users of the financial statements make their own judgements about the extent of possible differences between the carrying amount of those contracts and their fair value, including:		
		a. The fact that the entity does not disclose fair value information for these instruments because their fair value cannot be measured reliably		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. A description of the financial instruments, their carrying amount and an explanation of why fair value cannot be measured reliably		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		c. Information about the market for the instruments		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		d. Information about whether and how the entity intends to dispose of the financial instruments		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		e. If financial instruments whose fair value previously could not be reliably measured are derecognised:		
		▶ That fact		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		▶ Their carrying amount at the time of derecognition		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		▶ The amount of gain or loss recognised		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		<b>Nature and extent of risk arising from financial instruments</b>		
	<i>IFRS 7.B6</i> <i>IFRS 7.32</i>	The disclosures required by items 227.-238. focus on the risks that arise from financial instruments and how they have been managed. These risks typically include, but are not limited to, credit risk, liquidity risk and market risk. The disclosures are either given in the financial statements or incorporated by cross-reference from the financial statements to some other statement, such as a management commentary or risk report, that is available to users of the financial statements on the same terms as the financial statements and at the same time. Without the information incorporated by cross-reference, the financial statements are incomplete.		
473	<i>IFRS 7.31</i>	Does the entity disclose information that enables users of its financial statements to evaluate the nature and extent of risks arising from financial instruments to which the entity is exposed at the end of the reporting period		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		Qualitative disclosures in combination with quantitative disclosures enable users to gain an understanding of the nature and extent of risks arising from financial instruments and evaluate the entity's exposure to risk.		
		<b>Transition requirements</b>		
474	<i>IFRS 7.44I</i>	When an entity first applies IFRS 9 (issued in 2009), for each class of financial assets at the date of initial application, does the entity disclose in tabular format unless another format is more appropriate:		
		a. The original measurement category and carrying amount determined in accordance with IAS 39		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. The new measurement category and carrying amount determined in accordance with IFRS 9		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

IFRS 1.E2(c) IAS 8.28	c. The information required by IAS 8.28(a)-(e) and (f)(i) (see item 124 a. – f. for the individual requirements) for any adjustment between the statement of financial position at the comparative period's reporting date and the statement of financial position at the start of the first IFRS reporting period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 1.E2(d) IAS 1.17(c)	d. Additional information in accordance with IAS 1.17(c) when compliance with the specific requirements in IFRSs is insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 1.E1	In its first IFRS financial statements, an entity that (a) adopts IFRSs for annual periods beginning before 1 January 2012 and (b) applies IFRS 9 (issued in 2010) presents at least one year of comparative information. However, this comparative information need not comply with IFRS 9 (issued in 2010) or IFRS 7, to the extent that the disclosures required by IFRS 7 relate to assets within the scope of IFRS 9 (issued in 2010). For such entities, references to the 'date of transition to IFRSs' means, in the case of IFRS 9 (issued in 2010) and IFRS 7 only, the beginning of the first IFRS reporting period.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Financial instruments</b>				
Items 481.-530. set out the disclosure requirements if the entity adopts IFRS 9 <i>Financial Instruments</i> (issued in 2010), i.e., for financial assets and financial liabilities. If the entity adopts IFRS 9 <i>Financial Instruments</i> (issued in 2009), i.e., for financial assets only, refer to items 428.-474. If the entity does not adopt IFRS 9 <i>Financial Instruments</i> , but rather applies IAS 39 <i>Financial Instruments: Recognition and Measurement</i> , refer to items 188.-238.				
New 481	IFRS 7.6	If disclosures are required by class of financial instrument, does the entity:		
	a. Group financial instruments into classes that are appropriate to the nature of the information disclosed and that take into account the characteristics of those financial instruments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b. Provide sufficient information to permit reconciliation to the relevant items in the statement of financial position	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.B1 - B3	IFRS 7.6 requires the entity to group financial instruments into classes that are appropriate to the nature of the information disclosed and that take into account the characteristics of those financial instruments. These classes are determined by the entity and as such, are distinct from the categories of financial instruments specified in IFRS 9 (issued in 2010).  In determining classes of financial instruments, an entity, at minimum: a. Distinguishes between instruments measured at amortised cost from those measured at fair value b. Treats those financial instruments as a separate class or classes outside the scope of this IFRS  The entity decides how much detail it provides to satisfy the requirements, how much emphasis it places on different aspects of the requirements and how it aggregates information to display the overall picture without combining information with different characteristics, in the light of its circumstances. It is necessary balance between excessive detail that may not assist users of financial statements and obscuring important information as a result of too much aggregation. For example, an entity must not obscure important information by including it among a large amount of insignificant detail. Similarly, an entity must not aggregate information so that it obscures important differences between individual transactions or associated risks.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
New 482	IFRS 7.7	Does the entity disclose information that enables users of its financial statements to evaluate the significance of financial instruments to its financial position and performance.

New 483	IFRS 7.8 IFRS 9.4.1 IFRS 9.4.2	Does the entity disclose either in the statement of financial position or in the notes the carrying amounts of each of the following:		
	a. Financial assets measured at fair value through profit or loss, showing separately:			
	▶ Those designated as such upon initial recognition	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	▶ Those mandatorily measured at fair value	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	b. Financial liabilities at fair value through profit or loss, showing separately:			
	▶ Those designated as such upon initial recognition	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	▶ Those that meet the definition of held for trading in IFRS 9 (issued in 2010)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	c. Financial assets measured at amortised cost	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	d. Financial liabilities measured at amortised cost	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

<b>Financial assets or financial liabilities at fair value through profit or loss</b>					
New	484	IFRS 7.9 IFRS 7.36(a)	If the entity designated a financial asset (or group of financial assets) as measured at fair value that would otherwise be measured at amortised cost, does it disclose:		
			a. The maximum exposure to credit risk of the financial asset (or group of financial assets) at the end of the reporting period		
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
			b. The amount by which any related credit derivatives or similar instruments mitigate that maximum exposure to credit risk		
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
			c. The change, during the reporting period and cumulatively, in the fair value of the financial asset (or group of financial assets) that is attributable to changes in the credit risk of the financial asset determined either:		
			▶ As the change in its fair value that is not attributable to changes in market conditions that give rise to market risk		
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
			Or		
			▶ Using an alternative method that the entity believes more faithfully represents the change in its fair value that is attributable to changes in credit risk of the asset		
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		IFRS 7.9	Changes in market conditions that give rise to market risk include changes in an interest rate, commodity price, foreign exchange rate or index of prices or rates.		
			d. The change in the fair value of any related credit derivatives or similar instruments that occurred during the reporting period and cumulatively since the financial asset was designated		
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		IFRS 9.5.7.7	An entity presents a gain or loss on a financial liability designated at fair value through profit or loss, as follows:		
		IFRS 9.B5.7.13 - B5.7.20	a. The change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income		
		IFRS 9.B5.7.5-7, 10-12	b. The remaining amount of change in the fair value of the liability is presented in profit or loss		
		IFRS 9.5.7.8	unless the treatment of the effects of changes in the liability's credit risk described in (a) would create or enlarge an accounting mismatch in profit or loss.		
			If these requirements would create or enlarge an accounting mismatch in profit or loss, an entity presents all gains and losses on that liability (including the effects of changes in the credit risk of that liability) in profit or loss.		
New	485	IFRS 7.10 IFRS 9.4.2.2 IFRS 9.5.7.7	If the entity (a) designated a financial liability as at fair value through profit or loss in accordance with IFRS 9.4.2.2 and (b) is required to present the effects of changes in that liability's credit risk in other comprehensive income (see IFRS 9.5.7.7) does it disclose:		
		IFRS 9.B5.7.13 - B5.7.20	a. The change, cumulatively, in the fair value of the financial liability that is attributable to changes in the credit risk of that liability		
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
			b. The difference between the financial liability's carrying amount and the amount the entity would be contractually required to pay at maturity to the holder of the obligation		
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
			c. Any transfers of the cumulative gain or loss within equity during the reporting period including the reason for such transfers

			d. If a liability is derecognised during the reporting period, the amount (if any) presented in other comprehensive income that was realised at derecognition		
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
New	486	IFRS 7.10A IFRS 9.4.2.2 IFRS 9.5.7.7 IFRS 9.5.7.8	If the entity (a) designated a financial liability as at fair value through profit or loss in accordance with IFRS 9.4.2.2 and (b) is required to present all changes in the fair value of that liability (including the effects of changes in the credit risk of the liability) in profit or loss (see IFRS 9.5.7.7-8) does it disclose:		
		IFRS 9.B5.7.13 - B5.7.20	a. The change, during the reporting period and cumulatively, in the fair value of the financial liability that is attributable to changes in the credit risk of that liability

	IFRS 9. B5.7.6	c. A detailed description of the methodology or methodologies used to determine whether presenting the effects of changes in a liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss.		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	IFRS 9. B5.7.6	d. If the entity is required to present the effects of changes in a liability's credit risk in profit or loss, include its disclosure to comply with (c), a detailed description of the economic relationship described in IFRS 9.B5.7.6		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	IFRS 9. B5.7.5	When an entity designates a financial liability as at fair value through profit or loss, it must determine whether presenting in other comprehensive income the effects of changes in the liability's credit risk would create or enlarge an accounting mismatch in profit or loss. An accounting mismatch would be created or enlarged if presenting the effects of changes in the liability's credit risk in other comprehensive income would result in a greater mismatch in profit or loss than if those amounts were presented in profit or loss.		
	IFRS 9. B5.7.6	To make that determination, an entity must assess whether it expects that the effects of changes in the liability's credit risk will be offset in profit or loss by a change in the fair value of another financial instrument measured at fair value through profit or loss. Such an expectation must be based on an economic relationship between the characteristics of the liability and the characteristics of the other financial instrument.

		IFRS 4.App A			
New	520	IFRS 7.25 IFRS 7.29	Does the entity disclose for each class of financial assets and financial liabilities, the fair value of that class of assets and liabilities in a way that permits it to be compared with its carrying amount (except for those noted in IFRS 7.29)

		b. Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

		IFRS 7.27A	The entity determines the level in the fair value hierarchy based on the lowest level input that is significant to the fair value measurement in its entirety. The entity assesses the significance of an input against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.		
New	524	IFRS 7.27B	For fair value measurements recognised in the statement of financial position, does the entity disclose for each class of financial instruments in a tabular format unless another format is more appropriate:

		c. For fair value measurements in Level 3 of the fair value hierarchy, a reconciliation from the beginning balances to the ending balances, disclosing separately changes during the reporting period attributable to the following:			
		▶ Total gains or losses for the reporting period recognised in profit or loss, and a description of where they are presented in the statement of comprehensive income or the separate income statement (if presented)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		▶ Total gains or losses recognised in other comprehensive income	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		▶ Purchases, sales, issues and settlements (separately for each type of movement)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		▶ Transfers into or out of Level 3 (for example, transfers attributable to changes in observable market data) and the reasons for those transfers, presented separately	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		d. The total gains or losses for the reporting period in (c) included in profit or loss that are attributable to gains or losses relating to those assets and liabilities held at the end of the reporting period and a description of where those gains or losses are presented in the statement of comprehensive income or the separate income statement (if presented)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		e. For fair value measurements in Level 3, if changing one or more of the inputs to reasonably possible alternative assumptions changes fair value significantly, disclose:			
		▶ That fact	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		▶ The effect of those changes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		▶ How the effect of a change to a reasonably possible alternative assumption was calculated	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

New 525	IFRS 7.28 IFRS 9.B5.4.8	If there is a difference between the transaction price at initial recognition and the single fair value amount at that date determined using a valuation technique that does not use data from observable markets, does the entity disclose, by class of financial instrument:			
	IFRS 9.B5.4.9	a. Its accounting policy for recognising that difference in profit or loss to reflect a change in factors (including time) that market participants would take into account when pricing the asset or liability	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	IFRS 9.B5.4.9	An entity subsequently measures a financial asset or financial liability and recognises gains and losses consistently with the requirements of IFRS 9 (issued in 2010). The application of IFRS 9.B5.4.8 may result in no gain or loss being recognised on the initial recognition of a financial asset or financial liability. In such a case, IFRS 9 (issued in 2010) requires that a gain or loss is recognised after initial recognition only to the extent that it arises from a change in a factor (including time) that market participants would take into account when pricing the asset or liability.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. The aggregate difference yet to be recognised in profit or loss at the beginning and end of the reporting period and reconcile this difference	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

New 526	IFRS 7.29 IFRS 7.30	In the cases described in IFRS 7.29(c), does the entity disclose information to help users of the financial statements make their own judgements about the extent of possible differences between the carrying amount of those contracts and their fair value, including:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		a. The fact that the entity does not disclose fair value information for these instruments because their fair value cannot be measured reliably	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. A description of the financial instruments, their carrying amount and an explanation of why fair value cannot be measured reliably	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		c. Information about the market for the instruments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		d. Information about whether and how the entity intends to dispose of the financial instruments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		e. If financial instruments whose fair value previously could not be reliably measured are derecognised:			
		▶ That fact	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		▶ Their carrying amount at the time of derecognition	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		▶ The gain or loss recognised	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
New 527		If an entity early adopts IFRS 13, has the entity applied the requirements of items 585.-588. instead 525.-526.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### Nature and extent of risk arising from financial instruments

IFRS 7.B6  
IFRS 7.32

The disclosures required by items 227.-238. focus on the risks that arise from financial instruments and how they have been managed. These risks typically include, but are not limited to, credit risk, liquidity risk and market risk. The disclosures are either given in the financial statements or incorporated by cross-reference from the financial statements to some other statement, such as a management commentary or risk report, that is available to users of the financial statements on the same terms as the financial statements and at the same time. Without the information incorporated by cross-reference, the financial statements are incomplete.

New 528 IFRS 7.31

Does the entity disclose information that enables users of its financial statements to evaluate the nature and extent of risks arising from financial instruments to which the entity is exposed at the end of the reporting period.

Qualitative disclosures in combination with quantitative disclosures enable users to gain an understanding of the nature and extent of risks arising from financial instruments and evaluate the entity's exposure to risk.

## Adoption of IFRS 10 Consolidated Financial Statements

New IFRS 10.C1

An entity will apply this IFRS for annual periods beginning on or after 1 January 2013. Earlier application is permitted. If an entity applies this IFRS earlier, it must also apply IFRS 11, IFRS 12, IAS 27 *Separate Financial Statements* and IAS 28 (as amended in 2011) at the same time.

New IFRS 10.C2

If an entity has early adopted IFRS 10, the entity has to apply this standard retrospectively in accordance with IAS 8, except as specified in the comment box below.

New IFRS 10.C3

If application of this standard results in:

New

(a) Entities that were previously consolidated continue to be consolidated

New

Or

New

(b) Entities that were previously unconsolidated continue to be unconsolidated

New

an entity is not required to do any adjustment in application of this standard

New IFRS 10.C4

When application of this IFRS for the first time results in an investor consolidating an investee that was not previously consolidated the investor will:

New

(a) If the investee is a business, apply IFRS 3 from the date when the investor obtained control of that investee on the basis of the requirements of this IFRS.

New

(b) If the investee is not a business, measure the assets, liabilities and non-controlling interests as if that investee had been consolidated (without recognising any goodwill for the investee) from the date when the investor obtained control of that investee on the basis of the requirements of this IFRS, and any difference between the amounts recognised and the previous carrying amount be recognized in the opening balance of equity.

New

(c) If application of (a) or (b) is impracticable, the investor will:

New		(i) If the investee is a business, consider the deemed acquisition date the beginning of the earliest period for which application of IFRS 3 is practicable, which may be the current period.			
New		(ii) If the investee is not a business, consider the deemed acquisition date the beginning of the earliest period for which the application of the acquisition method of IFRS 3 is practicable, which may be the current period.			
New	IFRS 10.C5	If first time application of this IFRS results in an investor no longer consolidating an investee that was consolidated, the investor will measure its retained interest in the investee on the date of initial application at the amount at which it would have been measured if the requirements of this IFRS had been effective when the investor became involved with, or lost control of, the investee. If measurement of the retained interest is impracticable, the investor will apply the requirements of this IFRS for accounting for a loss of control at the beginning of the earliest period for which application of this IFRS is practicable, which may be the current period. The investor will recognise any difference between the previously recognised amount of the assets, liabilities and non-controlling interest and the carrying amount of the investor's involvement with the investee as an adjustment to equity			
New	531 IFRS 10.C1	If the entity has early applied IFRS 10 and, consequently, IFRS 11, IFRS 12, IAS 27 (amended 2011) and IAS 28 (amended 2011), does the entity disclose that fact.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
New		<b>Adoption of IFRS 11 Joint Arrangements</b>			
New	IFRS 11.C1	An entity must apply this IFRS for annual periods beginning on or after 1 January 2013. Earlier application is permitted. If an entity applies this IFRS earlier, it must apply IFRS 10, IFRS 12, IAS 27 (as amended in 2011) and IAS 28 (as amended in 2011) at the same time.			
New	IFRS 11.C2	When changing from proportionate consolidation to the equity method, an entity must recognise its investment in the joint venture as at the beginning of the earliest period presented. That initial investment must be measured as the aggregate of the carrying amounts of the assets and liabilities that the entity had previously proportionately consolidated, including any goodwill arising from acquisition. If the goodwill previously belonged to a larger cash-generating unit, or to a group of cash-generating units, the entity shall allocate goodwill to the joint venture on the basis of the relative carrying amounts of the joint venture and the cash-generating unit or group of cash-generating units to which it belonged.			
New	IFRS 11.C4	If aggregating all previously proportionately consolidated assets and liabilities results in negative net assets, an entity shall assess whether it has legal or constructive obligations in relation to the negative net assets and, if so, the entity shall recognise the corresponding liability. If not, it must adjust retained earnings at the beginning of the earliest period presented. The entity must disclose this fact, along with its cumulative unrecognised share of losses of its joint ventures as at the beginning of the earliest period presented and at the date at which this IFRS is first applied.			
New	IFRS 11.C7	When changing from the equity method to accounting for assets and liabilities (joint operation), an entity must, at the beginning of the earliest period presented, derecognise the investment that was previously accounted for using the equity method and recognise its share of each of the assets and the liabilities in respect of its interest in the joint operation, including any goodwill that might have formed part of the carrying amount of the investment.			
New	IFRS 11.C9	Any difference arising from the investment previously accounted for using the equity method, and the net amount of the assets and liabilities, including any goodwill, recognised must be:			
New		(i) Offset against any goodwill relating to the investment with any remaining difference adjusted against retained earnings at the beginning of the earliest period presented, if the net amount of the assets and liabilities, including any goodwill, recognised is higher than the investment derecognised.			
New		(ii) Adjusted against retained earnings at the beginning of the earliest period presented, if the net amount of the assets and liabilities, including any goodwill, recognised is lower than the investment derecognised.			
New	532 IFRS 11.C1	If the entity has early applied IFRS 11 and, consequently, IFRS 10, IFRS 12, IAS 27 (amended 2011) and IAS28 (amended 2011), does the entity disclose that fact.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

The application date for this standard is for annual periods beginning on or after 1 January 2013, but early application is permitted. This standard encourages entities to provide the information required by the standard. If an entity early applies any of the disclosures in the standard, it does not require the entity to comply with the entire standard. If an entity early applies this standard, it is not necessary to also apply IFRS 10, IFRS 11, IAS 27 (amended 2011) and IAS 28 (amended 2011)			
New		Disclosure requirements included in this standard replace those included in IAS 27, IAS 28, IAS 31, SIC 12 and SIC 13. Disclosures detailed below could coincide with those detailed under the captions "Consolidated financial statements" (items 154. - 157.), "Investments in Associates" (items 290.-297.) and "Interests in Joint Ventures" (items 278-283) of this checklist. Below are presented all IFRS 12 disclosures in full even if they are the same that have been detailed in those already mentioned captions for the sake of clarity in the case any entity early adopts IFRS 10 and, consequently, IFRS 11, IAS 27 (amended 2011), IAS 28 (amended 2011) and IFRS 12.

New		b. The level of the fair value hierarchy within which the fair value measurement is categorised		
New	IFRS 13.94	Level of the fair value hierarchy is defined and addressed in detail in IFRS 13.72-90 and IFRS13.B35-36. These levels are based in the inputs that are used to determine the fair value and can be summarized in:		
New		Level 1 inputs: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date		
New		Level 2 inputs: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly		
New		Level 3 inputs: Unobservable inputs for the asset or liability		
New		The number of classes may need to be greater for fair value measurements categorised within Level 3 because those measurements have a greater degree of uncertainty and subjectivity. Determining the appropriate classes of assets and liabilities requires judgement and often may require more disaggregation than the line items presented in the statement of financial position.		
New	583 IFRS 13.94	Does the entity provide sufficient information to permit reconciliation between the classes of assets and liabilities and the line items presented in the statement of financial position		
New	584 IFRS 13.97	For each class of assets and liabilities not measured at fair value in the statement of financial position but for which fair value is disclosed does the entity disclose:

New		<b>Recurring fair value measurements of assets and liabilities disclosures</b>		
New	IFRS 13.93 (a)	Recurring fair value measurements of assets or liabilities are those that other IFRSs require or permit in the statement of financial position at the end of each reporting period. New	585 IFRS 13.91 IFRS 13.93	Does the entity disclose for assets and liabilities that are measured at fair value on a recurring basis in the statement of financial position after initial recognition:		
New		a. Fair value measurement at the end of the reporting period

New		g. For Level 3, a description of the valuation processes used by the entity		
New		h. For level 3:		
New		▶ A narrative description of the sensitivity if a change in an unobservable input to a different amount might result in a significantly higher or lower fair value measurement		

		Disclosure made		
		Yes	No	N/A
New		▶ For financial assets and financial liabilities, if changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would change fair value significantly, disclose the effect of those changes		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
New		i. If the highest and best use of a non-financial asset differs from its current use and why this has been used		
		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
New	IFRS 13. A	The highest and best use of a non-financial asset is the use by market participants that would maximise the value of the asset or the group of assets and liabilities (e.g., a business) within which the asset would be used.
