1. The tax rates reflect budget proposals and news releases to 15 January 2018. Where the tax is determined under the alternative minimum tax provisions (AMT), the above table is not applicable. AMT may be applicable where the tax otherwise payable is less than the tax determined by applying the relevant AMT rate to the individual's taxable income adjusted for certain preference items.

2. The tax determined by the table should be reduced by the applicable federal and provincial tax credits (see chart below), other than the basic personal tax credits, which have been reflected in the calculations.

3. The rates apply to the actual amount of taxable dividends received from taxable Canadian corporations. Eligible dividends are those paid by public corporations and private companies out of earnings that have been taxed at the general corporate tax rate (the dividend must be designated by the payor corporation as an eligible dividend). Where the dividend tax credit exceeds the federal and provincial tax otherwise payable on the dividends, the rates do not reflect the value of the excess credit that may be used to offset taxes payable from other sources of income. This assumption is consistent with prior year rates.

4. The rates apply to the actual amount of the capital gain. The capital gains exemption on qualified farm and fishing property and small business corporation shares may apply to eliminate the tax on those specific properties.

5. Individuals resident in New Brunswick on 31 December 2018 with taxable income up to \$16,758 pay no provincial income tax as a result of a low-income tax reduction. The low-income tax reduction is clawed back for income in excess of \$16,758 until the reduction is eliminated, resulting in an additional 3% of provincial tax on income between \$16,759 and \$38,425.
