- The tax rates include the provincial surtax and reflect budget proposals and news releases up to 15 December 2010. Where the tax is determined under the alternative minimum tax provisions (AMT), the above table is not applicable. AMT may be applicable where the tax otherwise payable is less than the tax determined by applying the relevant AMT rate to the individual's taxable income adjusted for certain preference items.
- The tax determined by the table should be reduced by the applicable federal and provincial tax credits (see chart below), other than the basic personal tax credits, which have been reflected in the calculations.
- The rates apply to the actual amount of taxable dividends received from taxable Canadian corporations. Eligible dividends are those paid by public corporations and private companies out of earnings that have been taxed at the general corporate tax rate (the dividend must be designated by the payor corporation as an eligible dividend).
- The rates apply to the actual amount of the capital gain. The capital gains exemption on qualified farm and fishing property and small business corporation shares may apply to eliminate the tax on those specific properties.
- Individuals resident in Prince Edward Island on 31 December 2010 with taxable income up to \$10,259, pay no provincial income tax as a result of a low-income tax reduction. The low-income tax reduction is clawed back for income in excess of \$15,000 until the reduction is eliminated, resulting in an additional 5% of provincial tax on income between \$15,000 and \$20,001.
