

AI enabled legal due diligence

EY

Building a better
working world

Our **artificial intelligence (AI) enabled legal due diligence** service is delivered seamlessly with colleagues across EY to provide a holistic and comprehensive picture of any business.

Our approach is integrated and collaborative. Every project is underpinned with a true understanding of our clients' objectives, drivers and key concerns.

Multi-disciplinary

Our legal due diligence team works inclusively as part of the wider EY business, with other stakeholders and, most importantly, our client, to ensure we understand the key drivers and concerns when preparing for a new project. We believe this multi-disciplinary approach best helps our clients agree project terms and manage potential risk earlier in the project's lifecycle.

Globally connected

Our global network includes 2,100+ law professionals across 82 countries, giving our clients global legal access and advice which also takes into account local law differences. Few deals have no cross border aspects and our multi-disciplinary approach allows us to work closely with our global tax and finance colleagues.

Value added reporting

Our reports allow clients to quickly and thoroughly assess legal and commercial risks at a glance whilst still ensuring they have a clear understanding of the practical steps advisable to avoid or mitigate those risks.

Extensive experience

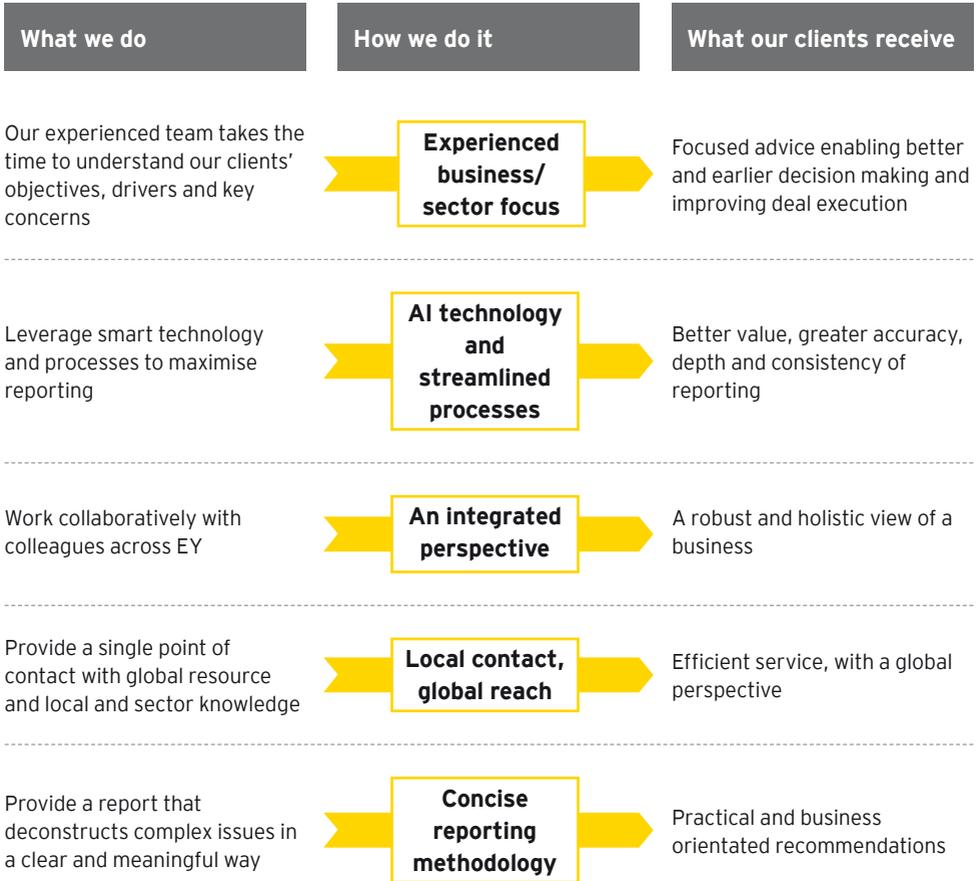

Our team is experienced in a wide range of diligence exercises in support of:

- ▶ Domestic and cross border M&A transactions and joint ventures
- ▶ Commercial agreements and review
- ▶ Regulatory compliance
- ▶ Corporate reconstructions and reorganisations

Centralised project management and process execution

A clear process and methodology, combined with robust project management and process execution, underpin our due diligence services.
