Why EY?

EY has extensive knowledge on shaping the process of Integrated Reporting. We have supported multiple large scale reporting transformation projects for organizations world-wide and we have provided assurance based on the framework. By providing the <IR> training courses, our Integrated Reporting experts will teach participants how to achieve Integrated Thinking within an organization and how to set up an Integrated Report.

The IIRC and <IR> framework

The International Integrated Reporting Council ('IIRC') is a global coalition of regulators, investors, companies, standard setters, the accounting profession and NGOs. The coalition is promoting communication about value creation as the next step in the evolution of corporate reporting. The IIRC's mission is to establish integrated reporting and thinking within mainstream business practice as the norm in the public and private sectors.

<IR> is a process founded on Integrated Thinking that results in a periodic integrated report by an organization about value creation over time and related communications regarding aspects of value creation.
