International GAAP® Disclosure Checklist

Based on International Financial Reporting Standards in issue at 31 August 2016

Effective for entities with a year-end of 31 December 2016 or thereafter
International GAAP® Disclosure Checklist

Updated: August 2016

For the year ending 31 December 2016 and any interim period therein

Entity: ________________________ Prepared by: ________________________

Financial statement date: ________________________ Reviewed by: ________________________

Instructions

Two versions

In addition to this format, the checklist is also available in an interactive online version. EY’s online version of the checklist may be accessed, free of charge, by registering on www.ey.com/checklist. The scoping questions in the online version enable you to identify the questions that relate to your entity’s needs. It is essential that the scoping questions are carefully assessed. If not, you will have to run through a number of questions not relevant to your entity.

This version of the checklist may be shared with your EY audit team. An enhanced online version, available by subscription, contains additional features including links to the applicable standards.

IFRS as Issued by the IASB – complete and condensed financial statements

This checklist is designed to assist you in the preparation of financial statements in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB), and in compliance with the disclosure requirements of IFRS. Entities applying IFRS under a local endorsement mechanism must consider the relevant local effective dates.

The checklist is applicable to annual financial statements and interim financial statements. A separate section of the checklist applies to interim condensed financial statements prepared in accordance with IAS 34 Interim Financial Reporting.

The checklist does not explain other accounting requirements, nor does it reflect the requirements of IFRS for Small and Medium-Sized Entities (SMEs) or the IFRS Practice Statement for Management Commentary. In some instances, to simplify the use of the checklist, disclosure requirements have been paraphrased, so you may need to refer to the standards for full details.

Applicable to 31 December 2016 year ends

The checklist is prepared specifically for entities with a year end of 31 December 2016. Thus, for later year ends, it may not be applicable, depending on the relevant year end and whether standards and amendments that were not effective for 31 December 2016 year-end have become effective for the later year end.

The checklist is updated semi-annually, reflecting standards issued by the IASB since the previous version. Prior to completing this checklist, refer to the IASB’s website to ensure no other standards have been issued between the cut-off date of this checklist (31 August 2016) and the date when the financial statements are authorised for issue.

Materiality and judgement

The checklist does not address the appropriateness or clarity of the disclosures, for instance, the format and the structure of the notes and the tailoring of the information. These are matters of judgement based on the individual facts and circumstances of the entity.

IFRS sets out the minimum disclosure requirements. However, the minimum disclosure requirements only apply to the extent that the transaction, event or item to which the disclosure requirement applies, is material to the entity, as clarified in paragraph 31 of IAS 1 Presentation of Financial Statements. Therefore, in applying the checklist, the user should carefully assess the materiality of the information. The inclusion of disclosures of immaterial information may, in some circumstances, reduce the relevance of the financial statements. In such circumstances, it is appropriate to exclude the information.

For more guidance on how to improve disclosure effectiveness, please refer to our publication, Applying IFRS: Improving Disclosure Effectiveness (July 2014).

In addition to the mandatory disclosure requirements, the checklist includes (in italics) the IASB’s recommended disclosures.
Other sources of guidance

Comment boxes that summarise and/or refer to relevant IFRS guidance regarding the scope and interpretation of certain disclosure requirements are also included. However, the checklist alone is not sufficient to provide the user with a thorough understanding of the applicable IFRS. Therefore, the checklist should be read together with the standards and interpretations themselves, as well as other relevant guidance, such as International GAAP® 2016, Good Group (International) Limited - Illustrative financial statements (December 2016) and Good Group (International) Illustrative interim condensed consolidated financial statements (June 2016). Comparative amounts in the financial statement disclosures are always required, unless explicitly exempted by the applicable IFRS.

Identification of requirements that are applicable for the first time

To assist users of the checklist in identifying disclosure requirements that are new in the reporting period ending 31 December 2016 and thereafter, such requirements are marked ‘New’. New requirements include requirements that are mandatory for the first time in the current reporting period, as well as those with a later effective date, but which may be adopted early. For instance, for the reporting period 1 January 2016 – 31 December 2016, Amendments to IAS 1 - Disclosure Initiative is mandatory for the first time, and the disclosure requirements herein are marked ‘New’.

Similarly, in the ‘New pronouncements’ section, all new requirements are marked ‘New’, for instance, IFRS 15 Revenue from Contracts with Customers is marked ‘New’, even though it is not mandatory in the current period. To identify which disclosure requirements (among those marked ‘New’) are new to a particular entity, the checklist user must also consider whether mandatory and voluntary new requirements have been early-adopted in previous periods.

New disclosure requirements resulting from IFRS 15 Revenue from Contracts with Customers and IFRS 16 Leases are included in the ‘New pronouncements’ section. Consequential amendments are included in the relevant sections, rather than the ‘New pronouncements’ section.

Disclosure requirements in IFRS 7 Financial Instruments: Disclosures under IFRS 9 Financial Instruments (2010, 2013 and 2014) are included in the ‘New pronouncements’ section. Consequential amendments to IFRS 9 (2010, 2013 and 2014) are included in either the ‘New pronouncements’ section or the relevant sections.

A list of the new pronouncements that may introduce new requirements for entities with 31 December 2016 year-end reporting is provided below. This checklist reflects IFRS in issue at 31 August 2016 that are effective for entities with year-ends of 31 December 2016 and thereafter.

</tbody>
</table>

IFRS 9 (2014), as issued in July 2014, supersedes IFRS 9 (2009), IFRS 9 (2010), Amendments to IFRS 7 and IFRS 9 Mandatory Effective Date and Transition Disclosures and IFRS 9 (2013) (Hedge Accounting and amendments to IFRS 9, IFRS 7 and IAS 39). An entity must apply IFRS 9 (2014) for annual periods beginning on or after 1 January 2018. However, for annual periods beginning before 1 January 2018, an entity may elect to apply those earlier versions of IFRS 9 instead of applying IFRS 9 (2014) if, and only if, the entity's relevant date of initial application is before 1 February 2015.

In December 2015, the IASB postponed the effective date of Amendments to IFRS 10 and IAS 28 - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture indefinitely pending the outcome of its research project on the equity method of accounting.

**Ticking the right boxes**

Each item should be answered with a tick in the appropriate column:

Yes = Disclosure has been made. Reference should be made to the relevant note in which the requirement has been met.

No = Disclosure has not been made. Any item marked 'No' should be explained, giving the reason for the omission on the checklist or on a separate working paper, including disclosures that are omitted because they are deemed by management to be immaterial, and also including the amounts or percentages involved, to assist in the assessment of compliance with IFRS. If the engagement team concurs that the disclosure is immaterial and does not affect the fair presentation of the financial statements, the omission of such disclosure does not represent a misstatement that requires disclosure in the SAD.

N/A = The question is not applicable to the entity, for instance, because the transaction, event, or item referred to in the question does not apply to the entity.

**Compliance with International Financial Reporting Standards**

5. **IAS 1.15, IAS 1.17, IAS 1.112**
   - Does the entity provide additional disclosures if the requirements in IFRS are insufficient to enable users to understand the impact of particular transactions, other events, and conditions on the entity’s financial position and financial performance?
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   - For instance, additional disclosures about non-current assets (or disposal groups) classified as held for sale or discontinued operations (beyond those required specifically by IFRS 5 Non-current Assets Held for Sale and Discontinued Operations or other IFRS) may be necessary to comply with this requirement.

6. **IAS 1.16**
   - Does the entity disclose an explicit and unreserved statement of compliance with IFRS?
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   - The entity does not describe financial statements as complying with IFRS unless they comply with all the requirements of IFRS. In some jurisdictions, additional disclosure requirements apply, which, as long as they do not conflict with IFRS, would not disqualify a statement of compliance with IFRS. Similarly, in certain jurisdictions, the applicable standards may be the same as under IFRS, but may be the subject of a regulatory approval or endorsement mechanism before they become effective. Entities in these jurisdictions may only refer to compliance with IFRS as issued by the IASB if the applicable version of IFRS endorsed and complied with is consistent with IFRS. This is for instance the case in the EU, where entities comply with “IFRS as endorsed by the EU” and not “IFRS (as issued by the IASB)”.

7. **IAS 1.19, IAS 1.20**
   - In the extremely rare circumstances in which management concludes that compliance with a requirement in IFRS would be so misleading that it would conflict with the objective of financial statements set out in the Framework, and departs from that requirement (if the relevant regulatory framework requires or otherwise does not prohibit such a departure), does the entity disclose:

   a. That management concluded that the financial statements present fairly the entity’s financial position, financial performance and cash flows
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   b. That it complies with applicable IFRS, except that it departs from a requirement of IFRS to achieve a fair presentation
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   c. The title of the IFRS from which the entity departs
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   d. The nature of the departure
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   e. The treatment that the IFRS would require
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   f. The reason why that treatment would be so misleading in the circumstances that it would conflict with the objective of financial statements set out in the Framework
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   g. The treatment adopted
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   h. For each period presented, the financial impact of the departure on each item in the financial statements that would have been reported in complying with the requirement
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

8. **IAS 1.21, IAS 1.20**
   - If the entity departed from a requirement of IFRS in a prior period, and the departure affects the amounts recognised in the financial statements for the current reporting period, does the entity disclose:

   a. The title of the IFRS from which the entity has departed
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   b. The nature of the departure
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   c. The treatment that the IFRS would require
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   d. The reason why that treatment would be so misleading in the circumstances that it would conflict with the objective of financial statements set out in the Framework
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   e. The treatment adopted
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

   f. For each period presented, the financial impact of the departure on each item in the financial statements that would have been reported in complying with the requirement
   
   - Disclosure made: [ ] Yes, [ ] No, [ ] N/A
   - Comments: [ ]

9. **IAS 1.23**
   - In the extremely rare circumstances in which management concludes that compliance with a requirement in IFRS would be so misleading that it would conflict with the objective of financial statements set out in the Framework, but the relevant regulatory framework prohibits...
departure from the requirement, does the entity, to the maximum extent possible, reduce the perceived misleading aspects of compliance by disclosing all of the following:

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>a. The title of the IFRS in question</td>
<td></td>
<td>No</td>
</tr>
<tr>
<td>b. The nature of the requirement</td>
<td></td>
<td>No</td>
</tr>
<tr>
<td>c. The reason why management concluded that complying with that requirement is so misleading in the circumstances that it conflicts with the objective of financial statements set out in the Framework</td>
<td></td>
<td>No</td>
</tr>
<tr>
<td>d. For each period presented, the adjustments to each item in the financial statements that management concluded would be necessary to achieve a fair presentation</td>
<td></td>
<td>No</td>
</tr>
</tbody>
</table>

**Going concern**

The entity does not prepare its financial statements on a going concern basis if management determines after the reporting period (or earlier) either that it intends to liquidate the entity or to cease trading, or that it has no realistic alternative but to do so.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>IAS 1.25</td>
<td>Does the entity disclose material uncertainties related to events or conditions that may cast significant doubt upon the entity’s ability to continue as a going concern</td>
</tr>
<tr>
<td>11</td>
<td>IAS 1.25</td>
<td>If the financial statements are not prepared on a going concern basis, does the entity disclose:</td>
</tr>
<tr>
<td>a. The fact that the financial statements are not prepared on a going concern basis</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>b. The basis on which the financial statements are prepared</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>c. The reason why the entity is not regarded as a going concern</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

**Frequency of reporting**

If the end of the entity's reporting period changes and the annual financial statements are presented for a period longer or shorter than one year, does the entity disclose:

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>a. The reporting period covered by the financial statements</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>b. The reason for using longer or shorter periods</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>c. The fact that amounts presented in the financial statements are not entirely comparable</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

**Comparative information**

Does the entity present comparative information for the previous period for all amounts reported in the current period’s financial statements, unless an IFRS permits or requires otherwise.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>

<td></td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

When an entity voluntarily presents comparative information in addition to the minimum comparative financial statements required by IFRSs, does the entity present related note information for those additional statements?

<table>
<thead>
<tr>
<th>IAS 1.38C</th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

An entity may present comparative information in addition to the minimum comparative financial statements required by IFRSs, as long as that information is prepared in accordance with IFRSs. This comparative information may consist of one or more statements referred to in IAS 1.10, but need not comprise a complete set of financial statements.

For example, an entity may present a third statement of profit or loss and other comprehensive income (thereby presenting the current period, the preceding period and one additional comparative period). However, the entity is not required to present a third statement of financial position, a third statement of cash flows or a third statement of changes in equity (i.e., an additional financial statement comparative). The entity is required to present, in the notes to the financial statements, the comparative information related to that additional statement of profit or loss and other comprehensive income.

<table>
<thead>
<tr>
<th>IAS 1.38D</th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

In the circumstances described in IAS 1.40A, does an entity present three statements of financial position as at:

<table>
<thead>
<tr>
<th>IAS 1.40B</th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. The end of the current period</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>b. The end of the preceding period</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>c. The beginning of the preceding period</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

An entity must present a third statement of financial position as at the beginning of the preceding period in addition to the minimum comparative financial statements required by IAS 1.38A if:

<table>
<thead>
<tr>
<th>IAS 1.40A</th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. It applies an accounting policy retrospectively, makes a retrospective restatement of items in its financial statements or reclassifies items in its financial statements</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>b. The retrospective application, retrospective restatement or the reclassification has a material effect on the information in the statement of financial position at the beginning of the preceding period</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

When an entity is required to present an additional statement of financial position in accordance with IAS 1.40A, does the entity disclose the information required by IAS 1.41-44 and IAS 8?

<table>
<thead>
<tr>
<th>IAS 1.40C</th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

However, it need not present the related notes to the opening statement of financial position as at the beginning of the preceding period.

<table>
<thead>
<tr>
<th>IAS 1.40C</th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

When an entity presents an opening statement of financial position in accordance with IAS 1.40A, is the date of this statement the beginning of the preceding period even if additional comparative information is presented in terms of IAS 1.38C?

<table>
<thead>
<tr>
<th>IAS 1.40D</th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

Consistency of presentation

Does the entity retain in the financial statements from one period to the next:

<table>
<thead>
<tr>
<th>IAS 1.45</th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. The presentation of items</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>b. The classification of items</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

The entity presents and classifies items on the same basis in the financial statements from one reporting period to the next unless it is apparent, following a significant change in the nature of the entity's operations or a review of its financial statement, that another presentation or classification is more appropriate, or unless a change in presentation is required by IFRS.

Date of authorisation for issue

Does the entity disclose:

<table>
<thead>
<tr>
<th>IAS 10.17</th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. The date when the financial statements were authorised for issue</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>b. Who authorised the financial statements</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>c. The fact that the entity’s owners or others have the power to amend the financial statements after issue, if applicable</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>
First-time adoption

 Some of the terms are defined by IFRS 1:
- ‘Date of transition to IFRS’ – The beginning of the earliest period for which an entity presents full comparative information under IFRS in its first IFRS financial statements
- ‘Opening IFRS statement of financial position’ – An entity’s statement of financial position at the date of transition to IFRS
- ‘First IFRS financial statements’ – The first annual financial statements in which an entity adopts IFRS, by an explicit and unreserved statement of compliance with IFRS
- ‘Previous GAAP’ – The basis of accounting that a first-time adopter used immediately before adopting IFRS

Reconciliations

IFRS 1.27 IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors does not deal with changes in accounting policies that occur when an entity first adopts IFRS or to changes in those policies until after it presents its first IFRS financial statements. Therefore, IAS 8’s requirements for changes in accounting policies do not apply in the entity’s first IFRS financial statements.

IFRS 1.27A If, during the period covered by its first IFRS financial statements, an entity changes its accounting policies or its use of the exemptions contained in this IFRS, it must explain the changes between its first IFRS interim financial report and its first IFRS financial statements, in accordance with IFRS 1.23, and it shall update the reconciliations required by paragraph 24(a) and (b).

The requirements for entities that present interim financial reports under IAS 34 Interim Financial Reporting for part of the period covered by its first IFRS financial statements are included in the section on Interim Reporting, which contains all disclosure requirements related to interim reporting. That section does not need to be completed for annual financial statements.

24 IFRS 1.23 Does the entity explain how the transition from previous GAAP to IFRS affected its financial position, financial performance and cash flows

25 IFRS 1.24 Do the entity’s first IFRS financial statements include:
   a. Reconciliations of its equity reported under previous GAAP to its equity under IFRS (in sufficient detail to enable users to understand the material adjustments to the statement of financial position) for:
      - The date of transition to IFRS
      - The end of the latest period presented in the entity’s most recent annual financial statements under previous GAAP

   b. A reconciliation of the total comprehensive income or profit or loss reported under previous GAAP for the latest period in the entity’s most recent annual financial statements to its total comprehensive income under IFRS for the same period (in sufficient detail to enable users to understand the material adjustments to the statement of comprehensive income)

26 IFRS 1.24(c) If the entity recognised or reversed any impairment losses for the first time in preparing its opening IFRS statement of financial position, do the financial statements include the disclosures that IAS 36 Impairment of Assets would have required if the entity had recognised those impairment losses or reversals in the period beginning with the date of transition to IFRS

27 IFRS 1.26 If the entity is aware of errors under previous GAAP, do the reconciliations required by paragraph 24(a) and (b) of IFRS 1 distinguish between the corrections of errors and changes in accounting policies

28 IFRS 1.25 If the entity presented a statement of cash flows under its previous GAAP, does it explain the material adjustments to the statement of cash flows

29 IFRS 1.28 If the entity does not present financial statements for previous

<td>☐</td>
<td></td>
</tr>
</tbody>
</table>
deemed cost is their previous GAAP amounts
b. The aggregate deemed cost of those investments for which deemed cost is fair value
c. The aggregate adjustment to the carrying amounts reported under the previous GAAP

Comparatives

37 IFRS 1.21 In its first IFRS financial statements, does the entity present at least the following in accordance with IFRS, and in comparative format:
   a. Three statements of financial position (including opening IFRS statements of financial position at the date of transition to IFRS) ☐ ☐ ☐
   b. Two statements of profit or loss and comprehensive income, either in a single statement of comprehensive income, or in two separate statements showing components of profit or loss and other comprehensive income ☐ ☐ ☐
   c. Two statements of cash flows ☐ ☐ ☐
   d. Two statements of changes in equity ☐ ☐ ☐
   e. Related notes, including comparative information for all statements presented ☐ ☐ ☐

Non-IFRS comparative information and historical summaries

38 IFRS 1.22 For any information (historical summaries or comparative information) under previous GAAP that does not comply with the recognition and measurement provisions of IFRS, does the entity:
   a. Label the information prominently as not being prepared under IFRS ☐ ☐ ☐
   b. Disclose the nature of the main adjustments that would make it comply with IFRS, which need not be quantified ☐ ☐ ☐

Additional exemptions

39 IFRS 1.31A
    IFRS 1.08A(b)
   This exemption is applicable for entities that accounted for exploration and development costs of oil and gas properties in the development and production phase under previous GAAP using cost centres that include all properties in a large geographical area (referred to as full cost accounting).
40 IFRS 1.31B
    IFRS 1.08B
   If an entity (a) holds items of property, plant and equipment or intangible assets that are, or were previously, used in operations subject to rate regulations and (b) uses the previous GAAP carrying amount of such an item at the date of transition to IFRS as deemed cost, does the entity disclose:
   a. That fact ☐ ☐ ☐
   b. The basis on which carrying amounts were determined under previous GAAP ☐ ☐ ☐
41 IFRS 1.31C
   If an entity measures assets and liabilities at fair value and uses that fair value as the deemed cost in its opening IFRS statement of financial position because of severe hyperinflation, does the entity disclose how and why the entity had, and then ceased to have, a functional currency that has both of the characteristics of a currency subject to severe hyperinflation ☐ ☐ ☐

IFRS 1.026-D30
The currency of a hyperinflationary economy is subject to severe hyperinflation if it has both of the following characteristics:
   a. A reliable general price index is not available to all entities with transactions and balances in the currency
   b. Exchangeability between the currency and a relatively stable foreign currency does not exist
### Short-term exemption from comparative IFRS 7 disclosures for first-time adopters applying IFRS 9

If an entity adopts IFRS 9 early and chooses, in accordance with IFRS 1.1.E1, to present comparative information that does not comply with IFRS 7 and IFRS 9 in its first year of transition, does it:

a. Disclose this fact together with the basis used to prepare this information

b. Provide disclosures required by IAS 8.28(a)-(e) and (f)(i) for any adjustment between the statement of financial position at the comparative period’s reporting date and the statement of financial position at the start of the first IFRS reporting period

c. Provide additional disclosures under IAS 1.17(c) when compliance with the specific requirements in IFRSs is insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity’s financial position and financial performance

### First-time adopters applying IFRS 15

If an entity applies IFRS 15 early and decides to apply the transition provisions in IFRS 15.C5, does it make disclosures required by IFRS 15.C6

In IFRS 15.C5, the date of initial application should be interpreted as the beginning of the first IFRS reporting period.

### Financial review by management

Reports and statements presented outside financial statements are outside the scope of IFRS. The IASB issued the IFRS Practice Statement Management Commentary in December 2010. The practice statement provides guidance only and is not required to be used in the preparation of IFRS financial statements.

**Does the entity present, outside the financial statements, a financial review by management that describes and explains the main features of its financial performance and financial position and the principal uncertainties it faces, including:**

a. The main factors and influences determining performance, including:
   - Changes in the environment in which the entity operates
   - The entity’s response to those changes and their effect
   - The entity’s policy for investment to maintain and enhance financial performance, including its dividend policy

b. The entity’s sources of funding and its targeted ratio of liability to equity

c. The entity’s resources not recognised in the statement of financial position in accordance with IFRS

**Does the entity present reports and statements, outside the financial statements, such as environmental reports and value-added statements, particularly in industries in which environmental factors are significant and if employees are an important user group**

### Statement of financial position

**Does the entity present each material class of similar items separately in the statement of financial position**

**Does the entity present separately items of a dissimilar nature or function unless they are immaterial**

**Unless required or permitted by another IFRS, does the entity present separately, and not offset, assets and liabilities**

**Guidance on offsetting current and deferred tax assets and liabilities**

<td>Or</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>► Does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Terms of a liability that can be settled with equity instruments at the option of the counterparty, do not affect its classification</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>IAS 1.71</td>
<td>Other current liabilities are not settled as part of the normal operating cycle, but are due for settlement within 12 months after the reporting period or held primarily for trading. Examples are some financial liabilities classified as held for trading under IAS 39 or IFRS 9, bank overdrafts, and the current portion of non-current financial liabilities, dividends payable, income taxes and other non-trade payables.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>IAS 1.72</td>
<td>If the entity separately presents current and non-current liabilities in its statement of financial position, does the entity classify its financial liabilities as current, if they are due to be settled within 12 months after the reporting period, even if:</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>► The original term was for a period longer than 12 months</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>And</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>► An agreement to refinance, or to reschedule payments, on a long-term basis is completed after the reporting period and before the financial statements are authorised for issue</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>IAS 1.73</td>
<td>However, if the entity expects, and has the discretion to refinance or rollover an obligation for at least 12 months after the reporting period under an existing loan facility, a financial liability is classified as non-current.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
If the entity separately presents current and non-current liabilities in its statement of financial position, does the entity classify its long-term liability as current if the entity breaches a long-term loan agreement on or before the end of the reporting period with the effect that the liability becomes payable on demand, even if the lender agrees (after the reporting period and before the authorisation of the financial statements for issue) not to demand payment as a consequence of the breach?

However, an entity classifies a long-term loan arrangement as non-current if:

a. The lender agreed by the end of the reporting period to provide a period of grace ending at least 12 months after the reporting period, within which the entity can rectify the breach

And

b. During the grace period the lender cannot demand immediate repayment

Does the entity disclose the amount expected to be recovered or settled after more than 12 months for each asset and liability line item that combines amounts expected to be recovered or settled within twelve months and amounts expected to be recovered or settled more than 12 months after the reporting period?

If the entity distinguishes between current and non-current assets in its financial statements, does it present deferred tax assets as non-current assets?

If the entity distinguishes between current and non-current liabilities in its financial statements, does it present deferred tax liabilities as non-current liabilities?

For investments in associates or joint ventures, or any retained interest in such investments, that are not classified as held for sale under IFRS 5, does the entity classify these as non-current assets accounted for using the equity method?

Information presented in the statement of financial position

Does the entity include the following line items in its statement of financial position:

- Property, plant and equipment
- Investment property
- Intangible assets
- Financial assets (excluding amounts shown under (e), (h) and (i))
- Investments accounted for using the equity method
- Biological assets within the scope of IAS 41
- Inventories
- Trade and other receivables
- Cash and cash equivalents
- Trade and other payables
- Provisions
- Financial liabilities (excluding amounts shown under (j) and (k))
- Liabilities and assets for current tax
- Deferred tax liabilities and deferred tax assets
- Non-controlling interest, presented within equity
- Issued capital and reserves attributable to owners of the parent
- Liabilities and assets for current tax
- Non-controlling interest, presented within equity
- Issued capital and reserves attributable to owners of the parent
- Non-current assets classified as held for sale and assets included in disposal groups classified as held for sale in accordance with IFRS 5
- Liabilities included in disposal groups classified as held for sale in
accordance with IFRS 5

Does the entity present additional line items (including by disaggregating the line items listed in IAS 1.54), headings and subtotals in the statement of financial position if such presentation is relevant to an understanding of the entity's financial position?

For example:

a. Line items are included when the size, nature or function of an item or aggregation of similar items is such that separate presentation is relevant to an understanding of the entity's financial position; and

b. The descriptions used and the ordering of items or aggregation of similar items may be amended according to the nature of the entity and its transactions, to provide information that is relevant to an understanding of the entity's financial position. For example, a financial institution may amend the above descriptions to provide information that is relevant to the operations of a financial institution.

The Disclosure Initiative (Amendments to IAS 1) was released in December 2014 and amended paragraphs 10, 31, 54, 55, 82A, 85, 113-114, 117, 119 and 122, added paragraphs 30A, 55A and 85A-85B and deleted paragraphs 115 and 120. Entities are not required to disclose the information required by paragraphs 28 - 30 of IAS 8 in relation to these amendments.

When the entity presents subtotals under IAS 1.55, are those subtotals:

a. Comprised of line items made up of amounts recognised and measured under IFRS

b. Presented and labelled in a manner that makes the line items that constitute the subtotal clear and understandable

c. Consistent from period to period under IAS 1.45

d. Not displayed with more prominence than the subtotals and totals required in IFRS for the statement of financial position

Information presented either in the statement of financial position or in the notes

Does the entity disclose further sub-classifications of the line items presented, classified in a manner appropriate to the entity's operations

Does the entity disclose separately the major classes of assets and liabilities classified as held for sale, except if the disposal group is a newly acquired subsidiary that meets the criteria to be classified as held for sale on acquisition

Statement of profit or loss and other comprehensive income

The components of other comprehensive income include:

a. Changes in revaluation surplus (see IAS 16 Property, Plant and Equipment and IAS 38)
b. Remeasurements of defined benefit plans (see IAS 19 Employee Benefits)
c. Gains and losses arising from translating the financial statements of a foreign operation (see IAS 21)
d. Gains and losses on remeasuring available-for-sale financial assets (see IAS 39)
e. Gains and losses from investments in equity instruments measured at fair value through other comprehensive income in accordance with paragraph 5.7.5 of IFRS 9 if the entity adopts IFRS 9 early
f. Gains and losses on financial assets measured at fair value through other comprehensive income in accordance with 4.1.2A of IFRS 9 (2014), if the entity adopts IFRS 9 (2014) early

g. The effective portion of gains and losses on the hedging
h. The effective portion of gains and losses on hedging instruments in a cash flow hedge and the gains and losses on hedging instruments that hedge investments in equity instruments measured at fair value through other comprehensive income in accordance with IFRS 9.5.7.5, if the entity adopts IFRS 9 (2013) or (2014) early.

i. For particular liabilities designated as at fair value through profit or loss, the amount of the change in fair value that is attributable to changes in the liability’s credit risk (see IFRS 9 if the entity adopts IFRS 9 early).

j. Changes in the value of the time value of options when separating the intrinsic value and time value of an option contract and designating as the hedging instrument only the changes in the intrinsic value, if the entity adopts IFRS 9 (2013) or (2014) early.

k. Changes in the value of the forward elements of forward contracts when separating the forward element and spot element of a forward contract and designating as the hedging instrument only the changes in the spot element, and changes in the value of the foreign currency basis spread of a financial instrument when excluding it from the designation of that financial instrument as the hedging instrument, if the entity adopts IFRS 9 (2013) or (2014) early.

65 IAS 1.81A Does the entity present in the statement of profit or loss and other comprehensive income (statement of comprehensive income), in addition to the profit or loss and other comprehensive income sections:

   a. Profit or loss ☐ ☐ ☐
   b. Total other comprehensive income ☐ ☐ ☐
   c. Comprehensive income for the period, being the total of profit or loss and other comprehensive income ☐ ☐ ☐

66 IAS 1.81A If an entity presents a separate statement of profit or loss, does the statement presenting comprehensive income exclude the profit or loss section ☐ ☐ ☐

67 IAS 1.81B Does the entity present the following items, in addition to the profit or loss and other comprehensive income sections, as allocation of profit or loss and other comprehensive income for the period:

   a. Profit or loss for the period attributable to:
      ▶ Non-controlling interests ☐ ☐ ☐
      ▶ Owners of the parent ☐ ☐ ☐
   b. Comprehensive income for the period attributable to:
      ▶ Non-controlling interests ☐ ☐ ☐
      ▶ Owners of the parent ☐ ☐ ☐

68 IAS 1.81B If an entity presents profit or loss in a separate statement, does the entity present the allocation of profit or loss between non-controlling interests and owners of the parent in that statement ☐ ☐ ☐

69 IAS 1.29 Does the entity present each material class of similar items separately in the statement of comprehensive income ☐ ☐ ☐

70 IAS 1.29 Does the entity present separately items of a dissimilar nature or function unless they are immaterial ☐ ☐ ☐

71 IAS 1.32 Unless required or permitted by another IFRS, does the entity present separately, and not offset, income and expenses ☐ ☐ ☐

IAS 1.34 Examples of items that are or may be offset in the statement of comprehensive income include the following:

   a. Gains and losses on the disposal of non-current assets, including investments and operating assets, are reported by deducting from the proceeds (or the amount of consideration when an entity applies IFRS 15 early) on disposal the carrying amount of the asset and related selling expenses.

   b. Expenditure related to a provision that is recognised in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets and reimbursed under a contractual arrangement with a third party (for example, a supplier’s warranty agreement) may be netted against the related reimbursement.
c. Gains and losses arising from a group of similar transactions are reported on a net basis, for example, foreign exchange gains and losses or gains and losses arising on financial instruments held for trading. However, an entity presents such gains and losses separately if they are material.

Does the entity include all items of income and expense in a reporting period in profit or loss (unless an IFRS requires or permits otherwise)?

<table>
<thead>
<tr>
<th>IAS 1.88</th>
<th>Disclosure made</th>
</tr>
</thead>
<tbody>
<tr>
<td>No</td>
<td>Yes</td>
</tr>
</tbody>
</table>

IAS 8 specifies two circumstances in which the entity recognises items outside of profit or loss – corrections of errors and the effect of changes in accounting policies. Other IFRS require or permit an entity to exclude items of other comprehensive income that meet the Framework's definition of income or expense from profit or loss.

An entity may classify dividends recognised as an expense either with interest on other liabilities, or as a separate item in the statement(s) of profit or loss and other comprehensive income, Disclosure of interest and dividends is subject to the requirements of IAS 1 and IFRS 7. In some circumstances, because of significant differences between interest and dividends on matters such as tax deductibility, it is desirable to disclose them separately within the statement(s) of profit or loss and other comprehensive income. Disclosures of the tax effects are made in accordance with IAS 12 Income Taxes.

New 73 IAS 1.82

Does the entity present in addition to items required by other IFRS, in the profit or loss section or the statement of profit or loss, line items with the following amounts for the period:

a. Revenue (presenting separately interest revenue calculated using the effective interest method, if the entity adopts IFRS 9 (2014) early)

b. Gains and losses arising from the derecognition of financial assets measured at amortised cost (if the entity adopts IFRS 9 early)

c. Finance costs

d. Impairment losses (including reversals of impairment losses or impairment gains) determined under Section 5.5 of IFRS 9 (2014), if the entity adopts IFRS 9 (2014) early

e. Share of the profit or loss of associates and joint ventures accounted for using the equity method

f. If a financial asset is reclassified so that it is measured at fair value, any gain or loss arising from a difference between the previous carrying amount and its fair value at the reclassification date (as defined in IFRS 9, if the entity adopts IFRS 9 (2010) or (2013) early)

g. If a financial asset is reclassified out of the amortised cost measurement category so that it is measured at fair value through profit or loss, any gain or loss arising from a difference between the previous amortised cost of the financial asset and its fair value at the reclassification date (as defined in IFRS 9), if the entity adopts IFRS 9 (2014) early

h. If a financial asset is reclassified out of the fair value through other comprehensive income measurement category so that it is measured at fair value through profit or loss, any cumulative gain or loss previously recognised in other comprehensive income that is reclassified to profit or loss, if the entity adopts IFRS 9 (2014) early

i. Tax expense

j. A single amount for the total of discontinued operations (see IFRS 5)

New 74 IAS 1.82A

Does the entity present the line items in the other comprehensive income section for the amounts for the period of:

a. Items of other comprehensive income (excluding amounts in paragraph (b)), classified by nature and grouped into those that, in accordance with other IFRSs:
   (i) Will not be reclassified subsequently to profit or loss; and
   (ii) Will be reclassified subsequently to profit or loss when specific conditions are met

b. The share of the other comprehensive income of associates and joint ventures accounted for using the equity method, separated
into the share of items that, in accordance with other IFRSs:
(i) Will not be reclassified subsequently to profit or loss
(ii) Will be reclassified subsequently to profit or loss when specific conditions are met

The Disclosure Initiative (Amendments to IAS 1) was released in December 2014 and amended paragraphs 10, 31, 54, 55, 82A, 85, 113-114, 117, 119 and 122, added paragraphs 30A, 55A and 85A-85B and deleted paragraphs 115 and 120. Entities are not required to disclose the information required by paragraphs 28 - 30 of IAS 8 in relation to these amendments.

75 IFRIC 1.6(d) Does the entity disclose the change in the revaluation surplus arising from a change in the decommissioning, restoration and similar liability in other comprehensive income as a separate line item?

New 76 IAS 1.85 Does the entity present additional line items (including by disaggregating the line items listed in IAS 1.82), headings and subtotals in the statement of profit or loss and other comprehensive income if such presentation is relevant to an understanding of the entity’s financial performance?

77 IAS 1.85A When the entity presents subtotals under IAS 1.85, are those subtotals:
   a. Comprised of lien items made up of amounts recognised and measured under IFRS
   b. Presented and labelled in a manner that makes the line items that constitute the subtotal clear and understandable
   c. Consistent from period to period under IAS 1.45
   d. Not displayed with more prominence than the subtotals and totals required in IFRS for the statement(s) presenting profit or loss and other comprehensive income

New 78 IAS 1.85B Does the entity present the line items in the statement(s) presenting profit or loss and other comprehensive income that reconcile any subtotals presented under IAS 1.85 with the subtotals or totals required in IFRS for such statement(s)?

Information presented either in the statement of profit or loss and other comprehensive income or in the notes

79 IAS 1.97 If items of income and expense are material, does the entity disclose the following:
   a. The amount
   b. The nature of the item

IAS 1.98 Circumstances that may result in the separate disclosure of items of income and expense:
   a. Write-downs of inventories to net realisable value or of property, plant and equipment to recoverable amount, as well as reversals of such write-downs
   b. Restructurings of the activities of an entity and reversals of any provisions for the costs of restructuring
   c. Disposals of items of property, plant and equipment
   d. Disposals of investments
   e. Discontinued operations
   f. Litigation settlements
   g. Other reversals of provisions

80 IAS 1.99 Does the entity present or disclose an analysis of expenses recognised in profit or loss using a classification (whichever is reliable and more relevant) based on either:
   IAS 1.102 a. The nature of expenses
      Or
   IAS 1.103 b. The function of expenses within the entity (in which case the entity discloses, as a minimum, its cost of sales)

81 IAS 1.100 Does the entity present the analysis of expenses, as described in IAS 1.99, in its statement of profit or loss and other comprehensive income?
82  IAS 1.104  If the entity classifies expenses by function, does it disclose additional information on the nature of expenses, including:
   a. Depreciation and amortisation expense
   b. Employee benefits expense

83  IAS 1.90
   IAS 12.81  Does the entity disclose the income tax relating to each item of other comprehensive income, including reclassification adjustments

84  IAS 1.91  An entity may present items of other comprehensive income either net of related tax effects, or before related tax effects, with one amount shown for the aggregate amount of income tax relating to those components.

85  IAS 1.94  If an entity presents reclassification adjustments in the notes, are the items of other comprehensive income presented in the statement of profit or loss and other comprehensive income after any reclassification adjustments

85  IAS 1.92  Does the entity disclose reclassification adjustments relating to items of other comprehensive income

IAS 1.95  Examples of reclassification adjustments include:
   a. Disposal of a foreign operation (see IAS 21)
   b. Derecognition of available-for-sale financial assets (see IAS 39)
   c. When a hedged forecast cash flow affects profit or loss (see IAS 39 or IFRS 9 in relation to cash flow hedges)

IAS 1.96  Reclassification adjustments do not arise on changes in revaluation surplus recognised under IAS 16 Property, Plant and Equipment or IAS 38 Intangible Assets, or on remeasurements of defined benefit plans. These are not reclassified to profit or loss. Changes in revaluation surplus may be transferred to retained earnings in subsequent periods as the asset is used or when it is derecognised (see IAS 16.41 and IAS 38.87).

If the entity adopts IFRS 9 (2013) or (2014) early, reclassification adjustments do not arise if a cash flow hedge or the accounting for the time value of an option (or the forward element of a forward contract or the foreign currency basis spread of a financial instrument) result in amounts that are removed from the cash flow hedge reserve or a separate component of equity, respectively, and included directly in the initial cost or other carrying amount of an asset or a liability. These amounts are directly transferred to assets or liabilities.

Distributions of non-cash assets to owners (IFRIC 17)

86  IFRIC 17.14
   IFRIC 17.15  If the entity settles a dividend payable by distributing non-cash assets, does the entity present any difference between the carrying amount of the assets distributed and the carrying amount of the dividend payable as a separate line item in profit or loss

Earnings per share

IAS 33.2  The entity applies IAS 33 Earnings per Share if:
   a. The ordinary shares or potential ordinary shares of the entity are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets) Or
   b. The entity files, or is in the process of filing, its financial statements with a securities commission or other regulatory organisation for the purpose of issuing ordinary shares in a public market

IAS 33.3  If the entity discloses (voluntarily) earnings per share, the earnings per share disclosures must be in accordance with IAS 33.

87  IAS 33.4  If the entity presents both consolidated financial statements and separate financial statements prepared under IFRS 10 Consolidated Financial Statements and IAS 27 Separate Financial Statements, does it present the disclosures required by IAS 33 only on the basis of the consolidated information
88 IAS 33.4 If the entity chooses to disclose earnings per share based on its separate financial statements, does it present such earnings per share only in the statement of comprehensive income and not in the consolidated financial statements

89 IAS 33.64 If the number of ordinary or potential ordinary shares outstanding increase as a result of a capitalisation, bonus issue or share split, or decrease as a result of a reverse share split (even if these changes occur after the reporting period, but before the financial statements are authorised for issue), and therefore the calculation of basic and diluted earnings per share for all periods presented has been adjusted retrospectively, does the entity disclose the fact that per share calculations reflect such changes in the number of shares

90 IAS 33.66 Does the entity present in the statement of comprehensive income, basic and diluted earnings per share for:
   a. Profit or loss from continuing operations attributable to the ordinary equity holders of the parent entity
   b. Profit or loss attributable to the ordinary equity holders of the parent entity for the period for each class of ordinary shares that has a different right to share in profit for the period

91 IAS 33.67 If basic and diluted earnings per share are equal, dual presentation can be accomplished in one line on the statement of comprehensive income.

92 IAS 33.67A If the entity presents a separate statement of profit or loss as described in IAS 1.10A, does it disclose basic and diluted earnings per share only in that separate statement

93 IAS 33.68 If the entity reports a discontinued operation, does it disclose basic and diluted earnings per share for the discontinued operation either in the statement of comprehensive income or in the notes

94 IAS 33.68A If the entity presents a separate statement of profit or loss does it present basic and diluted earnings per share for the discontinued operation, as required in IAS 33.68, in that separate statement or in the notes

95 IAS 33.69 Does the entity present basic and diluted earnings per share, even if the amounts are negative (that is, a loss per share)

96 IAS 33.70 Does the entity disclose:
   a. The amounts used as the numerators in calculating basic and diluted earnings per share and reconcile those amounts to profit or loss attributable to the parent entity for the period (which includes the individual effect of each class of instruments that affects earnings per share)
   b. The weighted average number of ordinary shares used as the denominator in calculating basic and diluted earnings per share, and reconcile these denominators to each other (which includes the individual effect of each class of instruments that affects earnings per share)
   c. Instruments (including contingently issuable shares) that could potentially dilute basic earnings per share in the future, but were not included in the calculation of diluted earnings per share because they are anti-dilutive for the period(s) presented
   d. The ordinary share transactions or potential ordinary share transactions, other than increases as a result of a capitalisation, bonus issues or share splits or decreases as a result of a reverse share splits, that occur after the reporting period, but before the financial statements are authorised for issue, that would have changed significantly the number of ordinary shares or potential ordinary shares outstanding at the end of the period if those transactions had occurred before the end of the reporting period

IAS 33.71 Examples of transactions referred to in IAS 33.70(d) include:
   a. An issue of shares for cash
   b. An issue of shares, if the proceeds are used to repay debt or preference shares outstanding at the end of the reporting period
   c. The redemption of ordinary shares outstanding
<table>

97 IAS 33.72 Does the entity disclose the terms and conditions of financial instruments and other contracts generating potential ordinary shares that affect the measurement of basic and diluted earnings per share, if this disclosure is not already otherwise required (for example, by IFRS 7) □ □ □

98 IAS 33.73 If the entity discloses, in addition to basic and diluted earnings per share, amounts per share using a reported component of the statement of comprehensive income other than one required by IAS 33, does the entity disclose:

a. Basic and diluted amounts per share relating to such a component with equal prominence and presented in the notes to the financial statements □ □ □

b. The basis on which the numerator(s) is(are) determined, including whether amounts per share are before tax or after tax □ □ □

99 IAS 33.73 If the entity discloses, in addition to basic and diluted earnings per share, amounts per share using a component that is not reported as a line item in the statement of comprehensive income, does the entity reconcile between the component used and a line item that is reported in the statement of comprehensive income □ □ □

100 IAS 33.73A If the entity discloses, in addition to basic and diluted earnings per share, amounts per share using a reported item of profit or loss, other than one required by IAS 33, does the entity provide the disclosures in IAS 33.73 for the additional amounts per share □ □ □

**Statement of cash flows**

101 IAS 1.29 Does the entity present each material class of similar items separately in the statement of cash flows □ □ □

102 IAS 1.29 Does the entity present separately items of a dissimilar nature or function unless they are immaterial □ □ □

**Presentation**

103 IAS 7.10 Are the cash flows during the period classified by operating, investing and financing activities □ □ □

IAS 7.6 Definitions of different categories of cash flows are presented in IAS 7.6 and examples are presented in IAS 7.14-17.

104 IAS 7.14-17 Does the entity report cash flows from operating activities using either:

a. The direct method, disclosing major classes of gross cash receipts and gross cash payments (this method is encouraged) □ □ □

Or □ □ □

b. The indirect method, in which the entity adjusts profit or loss for the effects of transactions of a non-cash nature, any deferrals or accrued items of income or expense associated with investing or financing cash flows □ □ □

The starting point for the reconciliation of cash flows from operating activities in the statement of cash flows, prepared using the indirect method, is profit or loss, either before or after tax. □ □ □

105 IAS 7.21 Does the entity report major classes of gross cash receipts and gross cash payments arising from investing and financing activities separately, except as described in IAS 7.22 below □ □ □

106 IAS 7.22 Are cash flows arising from the following operating, investing or financing activities reported on a net basis:

a. Cash receipts and payments on behalf of customers, if the cash flows reflect the activities of the customer rather than those of the entity □ □ □

b. Cash receipts and payments for items in which the turnover is quick, the amounts are large and the maturities are short □ □ □
Cash flows arising from each of the following activities of a financial institution may be reported on a net basis:

a. Cash receipts and payments for the acceptance and repayment of deposits with a fixed maturity date
b. The placement of deposits with and withdrawal of deposits from other financial institutions
c. Cash advances and loans made to customers and the repayment of those advances and loans

Components of cash and cash equivalents

Bank borrowings are generally considered to be financing activities. However, in some countries, bank overdrafts that are repayable on demand form an integral part of the entity’s cash management. In these circumstances, bank overdrafts are included as a component of cash and cash equivalents. A characteristic of such banking arrangements is that the bank balance often fluctuates from being positive to overdrawn.

Acquisitions of subsidiaries and business units

Have the aggregate cash flows arising from obtaining control of subsidiaries or other businesses been presented separately and classified as investing activities in the statement of cash flows?

An entity classifies cash flows arising from change in ownership interests in a subsidiary that do not result in a loss of control (that is, transactions with owners) as financing activities, unless the subsidiary is held by an investment entity, as defined in IFRS 10, and is required to be measured at fair value through profit or loss.

Disposals of subsidiaries and business units

Have the aggregate cash flows arising from losing control of subsidiaries or other businesses been presented separately and classified as investing activities in the statement of cash flows?

An investment entity, as defined in IFRS 10, need not apply IAS 7.40(c) and 40(d) to an investment in a subsidiary that is required to be measured at fair value through profit or loss.
Other cash flow information

114 **IAS 7.31**

Does the entity separately disclose the following:

- a. Cash inflow from interest
- b. Cash outflow from interest
- c. Cash inflow from dividends
- d. Cash outflow from dividends

115 **IAS 7.35**

Cash flows arising from taxes on income must be separately disclosed and must be classified as cash flows from operating activities unless they can be specifically identified with financing and investing activities. If the entity allocates tax cash flows to more than one class of activity, does the entity disclose the total amount of taxes paid?

116 **IAS 7.43**

Are investing and financing transactions that do not require the use of cash or cash equivalents:

- a. Excluded from the statement of cash flows
- b. Disclosed elsewhere in the financial statements in a way that provides all the relevant information about these investing and financing activities

117 **IAS 7.48**

Does the entity disclose the following regarding significant cash and cash equivalent balances held, that are not available for use by the group:

- a. The amount
- b. A commentary by management

118 **IAS 7.50**

Does the entity disclose:

- a. The amount of undrawn borrowing facilities that may be available in the future for the operating activities and settling capital commitments, and indicate any restrictions on the use of these facilities
- b. The aggregate amount of cash flows that represent increases in operating capacity separately from those cash flows that are required to maintain operating capacity
- c. Cash flows of each reportable segment arising from:
  - Operating activities
  - Investing activities
  - Financing activities

Amendments to IAS 7 - Disclosure initiative

Changes in liabilities arising from financing activities

**Disclosure Initiative (Amendments to IAS 7)** was published in January 2016. An entity must apply those amendments for annual periods beginning on or after 1 January 2017. Earlier application is permitted. When the entity first applies those amendments, it is not required to provide comparative information for preceding periods.

New 119 **IAS 7.44B**

If the entity applies **Disclosure Initiative (Amendments to IAS 7)** early, to the extent necessary to satisfy the requirement in IAS 7.44A, does the entity disclose the following changes in liabilities arising from financing activities:

- a. Changes from financing cash flows
- b. Changes arising from obtaining or losing control of subsidiaries or other businesses
- c. The effect of changes in foreign exchange rates
- d. Changes in fair values
- e. Other changes

**IAS 7.44A**

An entity must provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes.

**IAS 7.44C**

IAS 7.44A also applies to changes in financial assets if cash flows from those financial assets were, or future cash flows will be, included in cash flows from financing activities.

New 120 **IAS 7.44D**

If the entity applies **Disclosure Initiative (Amendments to IAS 7)** early and discloses a reconciliation, does it provide sufficient information to...
enable users of the financial statements to link items included in the reconciliation to the statement of financial position and the statement of cash flows.

One way to fulfill the disclosure requirement in IAS 7.44A is by providing a reconciliation between the opening and closing balances in the statement of financial position for liabilities arising from financing activities, including the changes identified in IAS 7.44B.

If the entity applies Disclosure Initiative (Amendments to IAS 7) early and provides the disclosure required by IAS 7.44A in combination with disclosures of changes in other assets and liabilities, does it disclose the changes in liabilities arising from financing activities separately from changes in those other assets and liabilities?

**Statement of changes in equity**

122 IAS 1.29 Does the entity present each material class of similar items separately in the statement of changes in equity?

123 IAS 1.29 Does the entity present separately items of a dissimilar nature or function unless they are immaterial?

124 IAS 1.106 Does the statement of changes in equity include the following:

   a. Total comprehensive income for the period, showing separately the total amounts attributable to owners of the parent and to non-controlling interests

   b. For each component of equity, the effects of retrospective application or retrospective restatement recognised in accordance with IAS 8

   c. For each component of equity, a reconciliation between the carrying amount at the beginning and the end of the period, separately (as a minimum) disclosing changes resulting from:
      - Profit or loss
      - Other comprehensive income
      - Transactions with owners in their capacity as owners, showing separately contributions by and distributions to owners and changes in ownership interests in subsidiaries that do not result in a loss of control

For example, components of equity include each class of contributed equity, the accumulated balance of each class of other comprehensive income and retained earnings.

125 IAS 1.106A Does the entity disclose for each component of equity, either in the statement of changes in equity or in the notes, an analysis of other comprehensive income by item?

126 IAS 1.107 Does the entity disclose, either in the statement of changes in equity, or in the notes:

   a. The amount of dividends recognised as distributions to owners during the period

   b. The related amount of dividends per share

Interest, dividends, losses and gains relating to a financial instrument or a component that is a financial liability shall be recognised as income or expense in profit or loss. Distributions to holders of an equity instrument shall be recognised by the entity directly in equity. Transaction costs of an equity transaction shall be accounted for as a deduction from equity.

Income tax relating to distributions to holders of an equity instrument and to transaction costs of an equity transaction shall be accounted for in accordance with IAS 12.

127 IAS 32.39 IAS 1.109 Does the entity separately disclose the amount of transaction costs accounted for as a deduction from equity in the reporting period in the statement of changes in equity?

128 IAS 32.39 IAS 12.81 Does the entity include the amount of income taxes associated with transaction costs accounted for as a deduction from equity in the aggregate amount of current and deferred tax credited or charged directly to equity?
## Notes to the financial statements

**IAS 1.87**
The entity does not present any items of income or expense as extraordinary items in the statement(s) presenting profit or loss and other comprehensive income or in the notes.

**129 IAS 1.112**
Do the notes to the financial statements disclose:

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>

**The Disclosure Initiative (Amendments to IAS 1), released in December 2014 amended paragraph 113 and 114 and deleted paragraph 115. Entities are not required to disclose the information required by paragraphs 28 – 30 of IAS 8 in relation to these amendments.**

### Accounting policies, key measurement assumptions and capital

#### Summary of significant accounting policies

**New 132 IAS 1.117**
Does the entity disclose its significant accounting policies comprising:

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
</tr>
</thead>
</table>

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>

<tbody>
<tr>
<td>a. The measurement basis or bases (for example, historical cost, current cost, net realisable value, fair value or recoverable amount) used in preparing the financial statements</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. The other accounting policies used that are relevant to an</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
If an entity uses more than one measurement basis in the financial statements (for example, when particular classes of assets are revalued), it is sufficient to provide an indication of the categories of assets and liabilities to which each measurement basis is applied.

Does the entity disclose each significant accounting policy that is not specifically required by IFRS, but is selected and applied under IAS 8?

Does the entity disclose, along with its significant accounting policies or other notes, the judgements (apart from those involving estimations) by management that have the most significant effect on the amounts recognised in the financial statements?

Some of the disclosures required by IAS 1.122 are required by other IFRS. For example, IFRS 12 requires an entity to disclose the judgements it has made in determining whether it controls another entity.

Disclosure requirements relating to specific accounting policies are included in the subsequent sections of this checklist.

The entity changes an accounting policy only if the change:
- Is required by IFRS
- Results in the financial statements providing reliable and more relevant information about the effects of transactions, other events or conditions on the entity’s financial position, financial performance or cash flows

Applying a requirement is impracticable if the entity cannot apply it after making every reasonable effort to do so. It is impracticable to apply a change in an accounting policy retrospectively or to make a retrospective restatement to correct an error in the following circumstances:
- If the entity cannot determine the effects of retrospective application or retrospective restatement
- If determining the effect of (a) requires assumptions about what management’s intent would have been in that period
- If determining the effect of (a) requires significant estimates of amounts and it is impossible to distinguish objectively information about those estimates that provides evidence of circumstances that existed on the dates as at which those amounts are to be recognised, measured or disclosed and would have been available when the previous financial statements were authorised for issue from other information

If retrospective application is required, does the entity disclose the adjustment to the opening balance of each affected component of equity for the earliest prior period presented and the other comparative amounts for each prior period presented as if the entity had always applied the new accounting policy?

If the initial application of an IFRS has an effect on the current period or any prior period presented or might have an effect on future periods, unless it is impracticable to determine the amount of the adjustment, does the entity disclose:
- The title of the IFRS
- That the change in accounting policy is made in accordance with its transitional provisions, if applicable
- The nature of the change in accounting policy
- The transitional provisions, if applicable
- The transitional provisions that might have an effect on future periods, if applicable
- The amount of the adjustment for each financial statement line item affected and the basic and diluted earnings per share for the current period and each prior period presented, to the extent practicable (if IAS 33 applies to the entity)
- The amount of the adjustment relating to periods before those presented, to the extent practicable
- If retrospective application is impracticable for a particular prior

| Or | ☐   | ☐  | ☐   |          |
| - If such an impact is not known or reasonably estimable, a statement to that effect | ☐   | ☐  | ☐   |          |

**Key estimation assumptions**

Does the entity disclose key assumptions about the future, and other sources of key estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

| **IFRS 5.5B** |     |    |     |          |
| Additional disclosures beyond what is required by other standards may be necessary to comply with this requirement. For instance, additional disclosures about non-current assets (or disposal groups) classified as held for sale or discontinued operations (beyond those required specifically by IFRS 5 or other IFRS) may be necessary to comply with this requirement. | ☐   | ☐  | ☐   |          |

| **IAS 1.125** |     |    |     |          |
| For the assets and liabilities in IAS 1.125 above, does the entity disclose: | ☐   | ☐  | ☐   |          |
| a. Their nature | ☐   | ☐  | ☐   |          |
| b. Their carrying amount as at the end of the reporting period | ☐   | ☐  | ☐   |          |
An entity presents the disclosures under IAS 1.125 in a manner that helps users of financial statements to understand management's judgements about the future. The nature and extent of the disclosure varies according to the nature of the assumption and other circumstances.

Examples of the types of disclosures made are:

a. The nature of the assumption or other estimation uncertainty
b. The sensitivity of carrying amounts to the methods, assumptions and estimates underlying their calculation, including the reasons for the sensitivity
c. The expected resolution of an uncertainty and the range of reasonably possible outcomes within the next financial year for the carrying amounts of the assets and liabilities affected
d. The changes made to past assumptions concerning those assets and liabilities, if the uncertainty remains unresolved

Examples of key assumptions are:

a. Future changes in salaries
b. Future changes in prices affecting other costs
c. Risk adjustments to cash flows
d. Risk adjustments to discount rates

Some key assumptions referred to in IAS 1.125 also require disclosures under other IFRS. For example, IAS 37 requires disclosure, in certain circumstances, of major assumptions concerning future events affecting classes of provisions. IFRS 13 Fair Value Measurement requires disclosure of significant assumptions (including the valuation technique(s) and inputs) the entity uses when measuring the fair values of assets and liabilities that are carried at fair value.

Does the entity disclose information that enables users of its financial statements to evaluate the entity's objectives, policies and processes for managing capital?

Does the entity disclose the following, based on the information provided internally to the entity's key management personnel:

a. Qualitative information about its objectives, policies and processes for managing capital, including (but not limited to):
   ▶ A description of what it manages as capital
   ▶ If the entity is subject to externally imposed capital requirements, the nature of those requirements and how those requirements are incorporated into the management of capital
   ▶ How it is meeting its objectives for managing capital

b. Summary quantitative data about what it manages as capital

Some entities regard some financial liabilities (for example, some forms of subordinated debt) as part of capital. Other entities regard capital as excluding some components of equity (for example, components arising from cash flow hedges).

c. Any changes in (a) and (b) from the previous period

d. Whether during the period it complied with any externally imposed capital requirements to which it is subject

e. If the entity did not comply with the externally imposed capital requirements to which it is subject, the consequences of such non-compliance

The entity may manage capital in many ways and be subject to many different capital requirements. For example, a conglomerate may include entities that undertake insurance activities and banking activities, and those entities may operate in several jurisdictions. If an aggregate disclosure of capital requirements and how the entity manages capital would not provide useful information or distorts a financial statement user’s understanding of an entity's capital resources, the entity discloses separate information for each capital requirement to which the entity is subject.

Externally imposed capital requirements referred to in IAS 1.135(a)(ii) only reflect capital requirements imposed by a regulator or a prudential supervisor. Capital requirements, as imposed by a bank or creditor are considered a contractual obligation and are therefore not
Disclosure made
Yes No N/A Comments

in the scope of IAS 1.135(a)(ii).

**Business combinations**

**Acquisitions**

**IFRS 3.59**
The acquirer discloses information that enables the users of its financial statements to evaluate the nature and financial effect of a business combination.

**IFRS 3.63**
If the specific disclosures required by IFRS 3 Business Combinations and other IFRSs do not meet the objectives set out in IFRS 3.59 and 61, the acquirer shall disclose whatever additional information is necessary to meet those objectives.

**IFRS 3.B65**
For individually immaterial business combinations occurring during the reporting period that are material collectively, the acquirer discloses the information in IFRS 3.B64(e)-(q) in aggregate.

143

**IFRS 3.59**
For each business combination during the reporting period (or after the reporting period, but before the financial statements are authorised for issue), does the entity disclose:

- The name and a description of the acquiree
- The acquisition date
- The percentage of voting equity interests acquired
- The primary reasons for the business combination and how the acquirer obtained control of the acquiree
- A qualitative description of the factors that make up the goodwill recognised, such as expected synergies from combining operations of the acquiree and the acquirer, intangible assets that do not qualify for separate recognition or other factors

**IFRS 3.B64(f)**
For each business combination during the reporting period (or after the reporting period, but before the financial statements are authorised for issue), does the entity disclose the acquisition-date fair value of the total consideration transferred and the acquisition-date fair value of each major class of consideration, such as:

- Cash
- Other tangible or intangible assets, including a business or subsidiary of the acquirer
- Liabilities incurred, for example, a liability for contingent consideration
- Equity interests of the acquirer, including the number of instruments or interests issued or issuable and the method of measuring the fair value of those instruments or interests

**IFRS 3.App.A**
Contingent consideration is either:

- An obligation of the acquirer to transfer additional assets or equity interests to the former owners of an acquiree as part of the exchange transaction, if specified future events occur or conditions are met
- A right of the acquirer to receive previously transferred consideration, if specified future events occur or conditions are met.

145

**IFRS 3.59**
For each business combination during the reporting period (or after the reporting period end, but before the financial statements are authorised for issue), for contingent consideration arrangements and indemnification assets, does the entity disclose:

- The amount recognised as of the acquisition date
- A description of the arrangement and the basis for determining the payment
- An estimate of the range of outcomes (undiscounted) or, if a range cannot be estimated, that fact and the reasons why a range cannot be estimated. If the maximum amount of the payment is unlimited, the acquirer discloses that fact

146

**IFRS 3.59**
For each business combination during the reporting period (or after the reporting period, but before the financial statements are authorised for issue), for acquired receivables, does the entity disclose:
**Disclosure Checklist**

<table>
<thead>
<tr>
<th>Disclosure made</th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. The fair value of the receivables</td>

<td></td>
<td></td>
</tr>
<tr>
<td>c. The best estimate at the acquisition date of the contractual cash flows not expected to be collected</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The entity provides disclosures by major class of receivable, such as loans, direct finance leases and any other class of receivables.

147. **IFRS 3.59**  
**IFRS 3.866**  
For each business combination during the reporting period (or after the reporting period, but before the financial statements are authorised for issue) does the entity disclose the amounts recognised as of the acquisition date for each major class of assets acquired and liabilities assumed?

148. **IFRS 3.59**  
**IFRS 3.23**  
**IFRS 3.866**  
For each business combination during the reporting period (or after the reporting period, but before the financial statements are authorised for issue), for each contingent liability recognised under IFRS 3.23, does the entity make the disclosures in IAS 37.85?

149. **IFRS 3.59**  
**IFRS 3.23**  
**IFRS 3.866**  
If a contingent liability is not recognised because its fair value cannot be measured reliably, does the entity disclose:

a. The information required by IAS 37.86
b. The reasons why the liability cannot be measured reliably

150. **IFRS 3.59**  
**IFRS 3.866**  
For each business combination during the period (or after the reporting period, but before the financial statements are authorised for issue), does the entity disclose the goodwill that is expected to be deductible for tax purposes?

151. **IFRS 3.59**  
**IFRS 3.51**  
**IFRS 3.866**  
For each business combination during the reporting period (or after the reporting period, but before the financial statements are authorised for issue), for transactions that the entity recognises separately from the acquisition of assets and assumption of liabilities in the business combination in accordance with IFRS 3.5, does the entity disclose:

a. A description of each transaction
b. How the acquirer accounted for each transaction
c. The amounts recognised for each transaction and the line item in the financial statements in which each amount is recognised
d. If the transaction is the effective settlement of a pre-existing relationship, the method used to determine the settlement amount

152. **IFRS 3.59**  
**IFRS 3.866**  
For each business combination during the reporting period (or after the reporting period, but before the financial statements are authorised for issue), does the entity disclose for separately recognised transactions required by IFRS 3.864(k):

a. The total amount of acquisition related costs
b. The amount of acquisition related costs recognised as expense
c. The line item or items in the statement of comprehensive income in which the expenses are recognised
d. The amount of issue costs not recognised as an expense
e. The treatment of the issue costs not recognised as an expense

153. **IFRS 3.59**  
**IFRS 3.866**  
For each business combination during the reporting period (or after the reporting period, but before the financial statements are authorised for issue) in a bargain purchase, does the entity disclose:

a. The amount of any gain recognised as a bargain purchase
b. The line item in the statement of comprehensive income in which the entity recognised the gain
c. The reasons why the transaction resulted in a gain
For each business combination during the reporting period (or after the reporting period, but before the financial statements are authorised for issue), in which the acquirer holds less than 100% of the equity interests in the acquiree at the acquisition date, does the entity disclose:

a. The amount of the non-controlling interest in the acquiree recognised at the acquisition date and the measurement basis for that amount

b. For each non-controlling interest in an acquiree measured at fair value, the valuation techniques and significant inputs used to measure that value

<table>
<thead>

</tbody>
</table>

Non-controlling interest is defined as the equity in a subsidiary not attributable, directly or indirectly to a parent.

For each business combination achieved in stages during the reporting period (or after the reporting period, but before the financial statements are authorised for issue), does the entity disclose:

a. The acquisition-date fair value of the equity interest in the acquiree held by the acquirer immediately before the acquisition date

b. Any gain or loss recognised from remeasuring the equity interest in the acquiree held by the acquirer before the business combination to fair value, in accordance with IFRS 3.42, and the line item in the statement of comprehensive income in which that gain or loss is recognised

<table>
<thead>

combination is incomplete

b. The assets, liabilities, equity interests or items of consideration for which the initial accounting is incomplete

IFRS 3.49
c. The nature and amount of any measurement period adjustments recognised during the reporting period in accordance with IFRS 3.49

160 IFRS 3.867(b) For each reporting period after the acquisition date until the entity collect, sells or otherwise loses the right to a contingent consideration asset, or until the entity settles a contingent consideration liability or the liability is cancelled or expires, does the entity disclose:

a. Any changes in the recognised amounts, including any differences arising upon settlement

b. Any changes in the range of outcomes (undiscounted) and the reasons for those changes

c. The valuation techniques and key model inputs used to measure contingent consideration

161 IFRS 3.867(c) For contingent liabilities recognised in a business combination, does the entity disclose the information required by IAS 37.84 and 85 for each class of provision

162 IFRS 3.867(d) Does the entity reconcile the carrying amount of goodwill at the beginning and end of the reporting period showing separately:

a. The gross amount and accumulated impairment losses at the beginning of the reporting period

b. Additional goodwill recognised during the reporting period, except goodwill included in a disposal group that, on acquisition, meets the criteria to be classified as held for sale in accordance with IFRS 5

IFRS 3.67
c. Adjustments resulting from subsequent recognition of deferred tax assets during the reporting period in accordance with IFRS 3.67

IFRS 5.6
d. Goodwill included in a disposal group classified as held for sale in accordance with IFRS 5 and goodwill derecognised during the reporting period without having previously been included in a disposal group classified as held for sale

IAS 36.104
e. Impairment losses recognised during the reporting period in accordance with IAS 36 Impairment of Assets

f. Net exchange rate differences arising during the reporting period in accordance with IAS 21 The Effects of Changes in Foreign Exchange Rates

IAS 21.47
g. Any other changes in the carrying amount during the reporting period

h. The gross amount and accumulated impairment losses at the end of the reporting period

163 IFRS 3.867(e) Does the entity disclose the amount and explain any gain or loss recognised in the current reporting period that both:

a. Relates to the identifiable assets acquired or liabilities assumed in a business combination that was effected in the current or previous reporting period

b. Is of such a size or nature of incidence that disclosure is relevant to understanding the combined entity's financial statements

Borrowing costs

164 IAS 1.117 Does the entity disclose the accounting policy for the recognition of borrowing costs

165 IAS 23.26 If the entity capitalised borrowing costs during the reporting period, does it disclose:

a. The amount of borrowing costs capitalised during the period

b. The capitalisation rate used to determine the amount of borrowing costs eligible for capitalisation

Changes in accounting estimates

166 IAS 8.39 IAS 8.40 Does the entity disclose the following information for a change in accounting estimate that has an effect in the current period or is expected to have an effect in future periods:
Disclosure Checklist

In accordance with IAS 8, the entity discloses the nature and effect of a change in an accounting estimate that has an effect in the current period or is expected to have an effect in subsequent periods. Such disclosure may arise from changes in estimates in:

- a. Residual values
- b. The estimated costs of dismantling, removing or restoring items of property, plant and equipment
- c. Useful lives
- d. Depreciation/amortisation methods

Disclosure of interests in other entities

IFRS 12 IN1

IFRS 12 provides guidance for disclosures for the interests of an entity in subsidiaries, joint arrangements (joint ventures or joint operations), associates and unconsolidated structured entities.

Subsidiaries

167 IFRS 12.7

Does the entity disclose information about significant judgements and assumptions it has made (and changes to those judgements and assumptions) in determining that it has control of another entity, i.e., an investee?

☐ ☐ ☐

168 IFRS 12.8

Does the entity include under the significant judgements and assumptions disclosed in IFRS 12.7 above, those judgements and assumptions made by the entity when changes in facts and circumstances are such that the conclusion about whether it has control changes during the reporting period?

☐ ☐ ☐

169 IFRS 12.9

Does the entity disclose significant judgements and assumptions made in determining that:

- a. It does not control another entity even though it holds more than half of the voting rights of the other entity
- b. It controls another entity even though it holds less than half of the voting rights of the other entity
- c. It is an agent or a principal

☐ ☐ ☐

170 IFRS 12.10

Does the entity disclose enough information for a user of the financial statements to understand the composition of the group?

a. To understand:
   - The composition of the group
   - The interest that non-controlling interests have in the group’s activities and cash flows (IFRS 12.12)

☐ ☐ ☐

b. To evaluate:
   - The nature and extent of significant restrictions on its ability to access or use assets, and settle liabilities, of the group (IFRS 12.13)
   - The nature of, and changes in, the risks associated with its interests in consolidated structured entities (IFRS 12.14-17)
   - The consequences of changes in its ownership interest in a subsidiary that do not result in a loss of control (IFRS 12.18)
   - The consequences of losing control of a subsidiary during the

</tbody>
</table>
IFRS 12 provides guidance for disclosures relating to joint ventures. Disclosures relating to joint operations are the disclosures related to the assets and liabilities of the joint operation. Consideration needs to be given to each of the corresponding assets and liabilities captions of this checklist.

191 **IFRS 12.8** Does the entity include under significant judgements and assumptions mentioned in IFRS 12.7 above, those made by the entity when changes in facts and circumstances are such that the conclusion about whether it has joint control changes during the reporting period?

192 **IFRS 12.20** Does the entity disclose information that enables users of its financial statements to evaluate:

a. The nature, extent and financial effects of its interests in joint arrangements, including the nature and effects of its contractual relationship with the other investors with joint control of joint arrangements (IFRS 12.21 and 22)  
   - [ ] Yes  
   - [ ] No  
   - [ ] N/A  
   - [ ] Comments

b. The nature of, and changes in, the risks associated with its interests in joint ventures (IFRS 12.23)  
   - [ ] Yes  
   - [ ] No  
   - [ ] N/A  
   - [ ] Comments

193 **IFRS 12.21(a)** Does the entity disclose for each joint arrangement that is material to the reporting entity:

a. The name of the joint arrangement  
   - [ ] Yes  
   - [ ] No  
   - [ ] N/A  
   - [ ] Comments

b. The nature of the entity’s relationship with the joint arrangement (by, for example, describing the nature of the activities of the joint arrangement and whether they are strategic to the entity’s activities)  
   - [ ] Yes  
   - [ ] No  
   - [ ] N/A  
   - [ ] Comments

c. The principal place of business (and country of incorporation, if applicable and different from the principal place of business) of the joint arrangement  
   - [ ] Yes  
   - [ ] No  
   - [ ] N/A  
   - [ ] Comments

d. The proportion of ownership interest or participating share held by the entity and, if different, the proportion of voting rights held (if applicable)  
   - [ ] Yes  
   - [ ] No  
   - [ ] N/A  
   - [ ] Comments

**Financial information regarding joint ventures**

194 **IFRS 12.21(b)** Does the entity disclose for each joint venture that is material to the reporting entity:

a. Whether the investment in the joint venture is measured using the equity method or at fair value  
   - [ ] Yes  
   - [ ] No  
   - [ ] N/A  
   - [ ] Comments

b. The following financial information including:
   - Dividends received from the joint venture  
     - [ ] Yes  
     - [ ] No  
     - [ ] N/A  
     - [ ] Comments
   - Summarised financial information including, but not necessarily limited to:
     - Current assets  
       - [ ] Yes  
       - [ ] No  
       - [ ] N/A  
       - [ ] Comments
     - Non-current assets  
       - [ ] Yes  
       - [ ] No  
       - [ ] N/A  
       - [ ] Comments
     - Current liabilities  
       - [ ] Yes  
       - [ ] No  
       - [ ] N/A  
       - [ ] Comments
     - Non-current liabilities  
       - [ ] Yes  
       - [ ] No  
       - [ ] N/A  
       - [ ] Comments
     - Revenue  
       - [ ] Yes  
       - [ ] No  
       - [ ] N/A  
       - [ ] Comments
     - Profit or loss from continuing operations  
       - [ ] Yes  
       - [ ] No  
       - [ ] N/A  
       - [ ] Comments
     - Post-tax profit or loss from discontinued operations  
       - [ ] Yes  
       - [ ] No  
       - [ ] N/A  
       - [ ] Comments
     - Other comprehensive income  
       - [ ] Yes

### Commitments for joint ventures

| IFRS 12.23(a) | Does the entity disclose, separately from the amount of other commitments, the following unrecognised commitments that may give rise to a future outflow of cash or other resources: a. Unrecognised commitments to contribute funding or resources as a result of, for example: ▶ The constitution or acquisition agreements of a joint venture (that, for example, require an entity to contribute funds over a specific period) ▶ Capital-intensive projects undertaken by a joint venture ▶ Unconditional purchase obligations, comprising procurement of equipment, inventory or services that an entity is committed to purchasing from, or on behalf of, a joint venture ▶ Unrecognised commitments to provide loans or other financial support to a joint venture ▶ Unrecognised commitments to contribute resources to a joint venture, such as assets or services ▶ Other non-cancellable unrecognised commitments relating to a joint venture b. Unrecognised commitments to acquire another party’s ownership interest (or a portion of that ownership interest) in a joint venture if a particular event occurs or does not occur in the future |

| IFRS 12.B18 | An entity shall disclose total commitments it has made but not recognised at the reporting date (including its share of commitments made jointly with other investors with joint control of a joint venture) relating to its interests in joint ventures. Commitments are those that may give rise to a future outflow of cash or other resources. |
Disclosure made
Yes No N/A Comments

202 IFRS 12.23(b) Does the entity disclose contingent liabilities incurred relating to its interests in joint ventures (including its share of contingent liabilities incurred jointly with other investors with joint control of the joint ventures), separately from the amount of other contingent liabilities

203 IFRS 12.22 Does the entity disclose:
   a. The nature and extent of any significant restrictions (e.g., resulting from borrowing arrangements, regulatory requirements or contractual arrangements between investors with joint control of a joint venture) on the ability of joint ventures to transfer funds to the entity in the form of cash dividends, or to repay loans or advances made by the entity
   b. When the financial statements of a joint venture used in applying the equity method are as of a date or for a period that is different from that of the entity:
      ▶ The date of the end of the reporting period of the financial statements of that joint venture
      ▶ The reason for using a different date or period
   c. The unrecognised share of losses of a joint venture for the reporting period and cumulatively, if the entity has stopped recognising its share of losses of the joint venture when applying the equity method

204 IFRS 12.22 New
   Acquisition of an interest in a joint operation
   When an entity acquires an interest in a joint operation in which the activity of the joint operation constitutes a business, as defined in IFRS 3, does it disclose the information that is required in IFRS 3 and other IFRSs in relation to business combinations.

205 IFRS 12.7 Does the entity disclose information about significant judgements and assumptions it has made (and changes to those judgements and assumptions) in determining if it has significant influence over another entity

206 IFRS 12.8 Does the entity include under significant judgements and assumptions mentioned in IFRS 12.7 above, those made by the entity when changes in facts and circumstances are such that the conclusion about whether it has significant influence changes during the reporting period

207 IFRS 12.9 Does the entity disclose significant judgements and assumptions made in determining that:
   a. It does not have significant influence even though it holds 20 per cent or more of the voting rights of another entity
   b. It has significant influence even though it holds less than 20 per cent of the voting rights of another entity

208 IFRS 12.20 Does the entity disclose information that enables users of its financial statements to evaluate:
   a. The nature, extent and financial effects of its interests in associates, including the nature and effects of its contractual relationship with the other investors with significant influence over associates (IFRS 12.21 and 22)
   b. The nature of, and changes in, the risks associated with its interests in associates (IFRS 12.23)

209 IFRS 12.21(a) Does the entity disclose for each associate that is material to the reporting entity:
   a. The name of the associate
   b. The nature of the entity’s relationship with the associate (by, for example, describing the nature of the activities of the associate and whether they are strategic to the entity’s activities)
   c. The principal place of business (and country of incorporation, if applicable and different from the principal place of business) of the associate
d. The proportion of ownership interest or participating share held by the entity and, if different, the proportion of voting rights held (if applicable)

**IAS 27.17**

When a parent (other than a parent covered by paragraph 16-16A) or an investor with joint control of, or significant influence over, an investee prepares separate financial statements, the parent or investor shall identify the financial statements prepared in accordance with IFRS 10, IFRS 11 or IAS 28 (as amended in 2011) to which they relate, does the parent or investor disclose in its separate financial statements:

a. The fact that the statements are separate financial statements
b. The reasons why those statements are prepared if not required by law
c. A list of significant investments in subsidiaries, joint ventures and associates, including:
   - The names of those investees
   - The principal place of business (and country of incorporation, if different) of those investees
   - Its proportion of the ownership interest (and its proportion of the voting rights, if different) held in those investees
d. A description of the method used to account for the investments listed under (c)

**Separate financial statements (investment entities)**

An investment entity that prepares financial statements in which all of its subsidiaries are measured at fair value through profit or loss, in accordance with IFRS 10.31, must present the disclosures relating to investment entities required by IFRS 12.

**IAS 27.8A**

Does an investment entity that is required, throughout the current period and all comparative periods presented, to apply the exception to consolidation for all of its subsidiaries in accordance with IFRS 10.31 present separate financial statements as its only financial statements

**IAS 27.16A**

When an investment entity that is a parent (other than a parent under IAS 27.16) prepares, in accordance with IAS 27.8A, separate financial statements as its only financial statements, does the entity disclose that fact and present the disclosures relating to investment entities required by IFRS 12

**IAS 27.17**

When a parent (other than a parent covered by IAS 27.16-16A) or an investor with joint control of, or significant influence over, an investee prepares separate financial statements, the parent or investor must identify the financial statements prepared in accordance with IFRS 10, IFRS 11 or IAS 28 (as amended in 2011) to which they relate. Does the parent or investor also disclose in its separate financial statements:

a. The fact that the statements are separate financial statements
b. The reasons why those statements are prepared if not required by law
c. A list of significant investments in subsidiaries, joint ventures and associates, including:
   - The name of those investees
   - The principal place of business (and country of incorporation, if different) of those investees
   - Its proportion of the ownership interest (and its proportion of the voting rights, if different) held in those investees
d. A description of the method used to account for the investments
list the investments listed under (c) as fair value, the fair value measurement disclosures required by IFRS 13

Correction of errors

234 IAS 8.42 Does the entity report the amount of the correction of an error (unless this is impracticable) either:
   a. By restating the comparative amounts for the prior period(s) in which the error occurred
   Or
   b. If the error occurred before the earliest prior period presented, by restating the opening balances of assets, liabilities and retained equity for that period

235 IAS 8.43 If it is impracticable to determine the period-specific effects of an error on comparative information, does the entity restate the opening balance of assets, liabilities and equity for the earliest period for which retrospective restatement is practicable

236 IAS 8.43 If it is impracticable to determine the cumulative effect at the beginning of the current reporting period of an error on all prior reporting periods, does the entity restate the comparative information to correct the error prospectively from the earliest date practicable

The entity excludes the correction of a prior period error from profit or loss for the period in which it discovers the error. The entity restates any information presented about prior periods, including any historical summaries of financial data, as far back as practicable.

237 IAS 8.49 In applying IAS 8.42, does the entity disclose:
   a. The nature of the prior period error
   b. The amount of the correction for each prior period presented (to the extent practicable) for each financial statement line item affected
   c. The amount of the correction for each prior period presented (to the extent practicable) for basic and diluted earnings per share (if IAS 33 applies to the entity)
   d. The amount of the correction at the beginning of the earliest prior period presented
   e. If retrospective restatement is impracticable for a particular prior period, the circumstances that led to the existence of that condition and a description of how and from when the entity corrected the error

Financial statements of subsequent periods need not repeat these disclosures.

Dividends

238 IAS 1.137 Does the entity disclose:
   a. The amount of dividends proposed or declared before the financial statements were authorised for issue, but not recognised as a distribution to owners during the period
   b. The related amount per share
   c. The amount of any cumulative preference dividends not recognised

Distributions of non-cash assets to owners (IFRIC 17)

239 IFRIC 17.16 In a distribution of non-cash assets to owners, does the entity disclose:
   a. The carrying amount of the dividend payable at the beginning and end of the reporting period
   b. The increase or decrease in the carrying amount of the dividend payable recognised in the reporting period, because of a change in the fair value of the assets to be distributed

240 IFRS 13.5-7 For fair value measurements required by IFRS 17 Distributions of Non-cash Assets to Owners, does the entity provide the disclosures required by IFRS 13

241 IFRIC 17.17 If the entity declares a dividend to distribute a non-cash asset after the end of a reporting period, but before the financial statements are authorised for issue, does the entity disclose:
Disclosure made

Yes | No | N/A | Comments
--- | --- | --- | ---
a. The nature of the asset to be distributed
b. The carrying amount of the asset to be distributed as of the end of the reporting period
c. The fair value of the asset to be distributed as of the end of the reporting period, if it is different from the asset's carrying amount
d. If the fair value of the asset to be distributed is disclosed in accordance with (c) above, the following disclosures required by IFRS 13:

IFRS 13.99
► Quantitative disclosures required by IFRS 13 in a tabular format, unless another format is more appropriate

IFRS 13.93(b)
► The level of the fair value hierarchy within which the fair value measurements are categorised in their entirety (Level 1, 2 or 3)

IFRS 13.93(d)
► For fair value measurements categorised within Level 2 and Level 3 of the hierarchy:
  ▶ A description of the valuation technique(s) and the inputs used in the measurement
  ▶ If there has been a change in valuation technique, that change and the reason(s) for making it
  ▶ For fair value measurements categorised within Level 3 of the fair value hierarchy, quantitative information about the significant unobservable inputs used in the fair value measurement

An entity is not required to create quantitative information to comply with this disclosure requirement if significant unobservable inputs are not developed by the entity when measuring fair value (e.g., when an entity uses prices from prior transactions or third-party pricing information without adjustment). However, an entity cannot ignore quantitative unobservable inputs that are significant to the fair value measurement and are reasonably available to the entity.

IFRS 13.93(g)
► For fair value measurements categorised within Level 3 of the fair value hierarchy, a description of the valuation processes used by the entity (including, for example, how an entity decides its valuation policies and procedures and analyses changes in fair value measurements from period to period)

IFRS 13.93(i)
► If the highest and best use of a non-financial asset differs from its current use, that fact and why the non-financial asset is being used in a manner that differs from its highest and best use

Employee benefits

Although IAS 19 does not require specific disclosures about short-term employee benefits, other long-term employee benefits or termination benefits, other IFRS may require disclosures. For example, IAS 1 requires that the entity disclose employee benefits expense and IAS 24 Related Party Disclosures requires disclosures about employee benefits for key management personnel.

Multi-employer plans

242 IAS 19.33 (b)
If a multi-employer plan is a defined benefit plan and the entity accounts for the plan as a defined benefit plan, does the entity make the disclosures in 'Defined benefit plans' section below and IAS 19.148(a)-(c) below

243 IAS 19.148
If sufficient information is not available to use defined benefit accounting for a multi-employer plan that is a defined benefit plan, does the entity disclose:

a. A description of the funding arrangements, including the method used to determine the entity's rate of contributions and any minimum funding requirements
b. A description of the extent to which the entity can be liable to the plan for other entities' obligations under the terms and conditions of the multi-employer plan
c. A description of any agreed allocation of a deficit or surplus on:
  ▶ Wind-up of the plan
  Or
  ▶ The entity's withdrawal from the plan

## Defined benefit plans that share risks between various entities under common control

If the entity participates in a defined benefit plan that shares risks between various entities under common control, does the entity disclose the following:

a. The contractual agreement or stated policy for charging the net defined benefit cost or the fact that there is no such policy

b. The policy for determining the contribution to be paid by the entity

c. If the entity accounts for an allocation of the net defined benefit cost under paragraph 41, does the entity disclose all the information about the plan as a whole as required by IAS 19.135-147

This would occur when the risks of a defined benefit plan are shared between entities under common control and there is a contractual agreement or stated policy for allocating the net defined benefit cost.

Or

d. If the entity accounts for the contribution payable for the period as noted in IAS 19.41, the information about the plan as a whole required by IAS 19.135-137, 139, 142-144 and 147(a) and (b)

The information required by items c. and d. above can be disclosed by cross-reference to disclosures in another group entity's financial statements if:

- That group entity's financial statements separately identify and disclose the information required about the plan
- That group entity's financial statements are available to users of the financial statements on the same terms as the financial statements of the entity and at the same time as, or earlier than, the financial statements of the entity.

## Defined contribution plans

Does the entity disclose the amount recognised as an expense for defined contribution plans

Does the entity disclose contributions to defined contribution plans for key management personnel, when required by IAS 24

## Defined benefit plans

IAS 19 requires disclosure of information that:

a. Explains the characteristics of its defined benefit plans and risks associated with them

b. Identifies and explains the amounts in its financial statements arising from its defined benefit plans

c. Describes how its defined benefit plans may affect the amount, timing and uncertainty of the entity's future cash flows

To meet the objectives in IAS 19.135 above, an entity shall consider all the following:

- The level of detail necessary to satisfy the disclosure requirements
- How much emphasis to place on each of the various requirements
- How much aggregation or disaggregation to undertake
IAS 19.137

Whether users of financial statements need additional information to evaluate the quantitative information disclosed

Disclosure made
Yes ☐ No ☐ N/A ☐ Comments ☐

If the disclosures provided in accordance with the requirements in this standard and other IFRSs are insufficient to meet the objectives in IAS 19.135 above, an entity shall disclose additional information necessary to meet those objectives. For example, an entity may present an analysis of the present value of the defined benefit obligation that distinguishes the nature, characteristics and risks of the obligation. Such a disclosure could distinguish:

- Between amounts owing to active members, deferred members, and pensioners
- Between vested benefits and accrued but not vested benefits
- Between conditional benefits, amounts attributable to future salary increases and other benefits

IAS 19.138

An entity shall assess whether all or some disclosures should be disaggregated to distinguish plans or groups of plans with materially different risks. For example, an entity may disaggregate disclosure about plans showing one or more of the following features:

- Different geographical locations
- Different characteristics such as flat salary pension plans, final salary pension plans or post-employment medical plans
- Different regulatory environments
- Different reporting segments
- Different funding arrangements (eq wholly unfunded, wholly or partly funded).

Characteristics and risks associated with defined benefit plans

247 IAS 19.139

Does the entity disclose:

a. Information about the characteristics of its defined benefit plans, including:
   - The nature of the benefits provided by the plan (eg final salary defined benefit plan or contribution-based plan with guarantee)
   - A description of the regulatory framework in which the plan operates, for example, the level of any minimum funding requirements, and any effect of the regulatory framework on the plan, such as the asset ceiling
   - A description of any other entity's responsibilities for the governance of the plan, for example, responsibilities of trustees or of board members of the plan

b. A description of the risks to which the plan exposes the entity, focused on any unusual, entity-specific or plan-specific risks, and of any significant concentrations of risk. For example, if plan assets are invested primarily in one class of investments, e.g., property, the plan may expose the entity to a concentration of property market risk

c. A description of any plan amendments, curtailments and settlements

Explanations of the amounts in the financial statements

248 IAS 19.140

Does the entity provide a reconciliation from the opening balance to the closing balance for each of the following, if applicable:

a. The net defined benefit liability (asset), showing separate reconciliations for:
   - Plan assets
   - The present value of the defined benefit obligation
   - The effect of the asset ceiling

b. Any reimbursement rights, and a description of the relationship between any reimbursement right and the related obligation

249 IAS 19.141

Does each reconciliation listed in IAS 19.140 show each of the following, if applicable:

a. Current service cost
b. Interest income or expense
c. Remeasurements of the net defined benefit liability (asset), showing separately:
Disclosure made | Yes | No | N/A | Comments
--- | --- | --- | --- | ---
The return on plan assets, excluding amounts included in interest in (b) | | | | |
Actuarial gains and losses arising from changes in demographic assumptions | | | | |
IAS 19.76(a) Demographic assumptions deal with matters such as:
The return on plan assets, excluding amounts included in interest in (b) | | | | |
Actuarial gains and losses arising from changes in demographic assumptions | | | | |
Mortality | | | | |
Rates of employee turnover, disability and early retirement | | | | |
The proportion of plan members with dependants who will be eligible for benefits | | | | |
The proportion of plan members who will select each form of payment option available under the plan terms | | | | |
Claim rates under medical plans | | | | |
Actuarial gains and losses arising from changes in financial assumptions | | | | |
IAS 19.76(b) Financial assumptions deal with items such as:
The discount rate | | | | |
Benefit levels, excluding any cost of the benefits to be met by employees, and future salary | | | | |
In the case of medical benefits, future medical costs, including claim handling costs (i.e., the costs that will be incurred in processing and resolving claims, including legal and adjuster's fees) | | | | |
Taxes payable by the plan on contributions relating to service before the reporting date or on benefits resulting from that service | | | | |
Changes in the effect of limiting a net defined benefit asset to the asset ceiling, excluding amounts included in interest in (b), and how it determined the maximum economic benefit available, i.e., whether those benefits would be in the form of refunds, reductions in future contributions or a combination of both | | | | |
d. Past service cost and gains and losses arising from settlements | | | | |
Past service cost and gains and losses arising from settlements need not be distinguished if they occur together. | | | | |
e. The effect of changes in foreign exchange rates | | | | |
f. Contributions to the plan, showing separately those by the employer and by plan participants | | | | |
g. Payments from the plan, showing separately the amount paid in respect of any settlements | | | | |
h. The effects of business combinations and disposals | | | | |
250 IAS 19.142 Does the entity disaggregate the fair value of the plan assets into classes that distinguish the nature and risks of those assets, subdividing each class of plan asset into those that have a quoted market price in an active market as defined in IFRS 13 and those that do not, for example:
a. Cash and cash equivalents | | | | |
b. Equity instruments (segredated by industry type, company size, geography, etc.) | | | | |
c. Debt instruments (segredated by type of issuer, credit quality, geography, etc.) | | | | |
d. Real estate (segredated by geography, etc.) | | | | |
e. Derivatives (segredated by type of underlying risk in the contract, for example, interest rate contracts, foreign exchange contracts, equity contracts, credit contracts, longevity swaps, etc.) | | | | |
f. Investment funds (segredated by type of fund) | | | | |
g. Asset-backed securities | | | | |
h. Structured debt | | | | |
Please note that information disclosed under IAS 19.142 is intended to provide third parties with all of the required information to understand risks associated with defined benefit plan assets considering the level of detail of disclosure, aggregation and emphasis discussed in IAS 19.136 above.
In addition, the fair value of the plan assets is determined using IFRS 13, but the disclosure requirements of IFRS 13 do not apply.

- Members’ shares in co-operative entities and similar instruments (IFRIC 2)

- The contractual right of the holder of a financial instrument (including members’ shares in co-operative entities) to request redemption does not, in itself, require a financial instrument to be classified as a financial liability. Rather, the entity must consider all of the terms and conditions of the financial instrument in determining its classification as a financial liability or equity. Those terms and conditions include relevant local laws, regulations and the entity’s governing charter in effect at the date of classification that can impose various types of prohibitions on the redemption of members’ shares.

- N/A: ☐

- Comments

- IAS 10.19

- If non-adjusting events after the reporting period are material, and thus non-disclosure could influence the economic decisions of users taken on the basis of the financial statements, does the entity disclose the following for each material category of non-adjusting events after the reporting period (IAS 10.22 provides examples of such events):

- a. The nature of the event

- b. An estimate of its financial effect, or a statement that such an estimate cannot be made

- Disclosure made
- Yes: ☐
- No: ☐
- N/A: ☐

- Comments

- IAS 10.21
- IAS 10.22

- In addition, please note that disclosure might be required if applicable in other sections of this checklist as under IFRS 3.B66 (regarding post year-end acquisitions), IAS 33.64 (regarding post year-end earnings per share changes due to capitalisation, share split, bonus issue, reverse share split), and IFRS 5.12 (regarding non-current assets (or disposal groups) held for sale post year-end).

- Fair value measurement

- IFRS 13 specifies how to measure fair value, when fair value (and measures based on fair value, such as fair value less costs to sell) is required or permitted by another IFRS. Such fair value measurements may be recognised in the statement of financial position or disclosed in the notes to the financial statements (for example, the comparison of carrying value and fair value required by IFRS 7).

- IFRS 13 applies when another IFRS requires or permits measurement(s) or disclosure(s) of fair value, except for:

- a. Share-based payment transactions within the scope of IFRS 2 Share-based Payment

- b. Leasing transactions within the scope of IAS 17 Leases (or leasing...
transcations accounted for under IFRS 16 if an entity applies IFRS 16 early)
c. Measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 or value in use in IAS 36

IFRS 13 also requires disclosures about fair value measurements. If fair value is measured in accordance with IFRS 13 after initial recognition (whether recognised or only disclosed), the disclosure requirements in IFRS 13 will apply, unless IFRS 13 provides a specific exemption. The disclosures required by IFRS 13 are not required for the following:

a. Plan assets measured at fair value in accordance with IAS 19
b. Retirement benefit plan investments measured at fair value in accordance with IAS 26 Accounting and Reporting by Retirement Benefit Plans
c. Assets for which recoverable amount is fair value less costs of disposal in accordance with IAS 36

Disclosure objectives

Does the entity disclose information that helps users of its financial statements assess both of the following:

a. For assets and liabilities that are measured at fair value on a recurring or non-recurring basis in the statement of financial position after initial recognition, the valuation techniques and inputs used to develop those measurements
b. For recurring fair value measurements using significant unobservable inputs (Level 3), the effect of the measurements on profit or loss or other comprehensive income for the period

To meet the objectives of IFRS 13.91, an entity is required to consider all of the following:

► The level of detail necessary to satisfy the disclosure requirements
► How much emphasis to place on each of the various requirements
► How much aggregation or disaggregation to undertake
► Whether users of financial statements need additional information to evaluate the quantitative information disclosed

In addition, IFRS 13.93 establishes the minimum disclosure requirements for fair value measurements (and those based on fair value) that are recognised in the statement of financial position after initial recognition. The requirements vary depending on whether the fair value measurements are recurring or non-recurring and their categorisation within the fair value hierarchy (i.e., Level 1, 2 or 3).

In order to determine the appropriate categorisation of a fair value measurement (as a whole) within the hierarchy, an entity determines the categorisation of the inputs used to measure fair value and categorisation of the fair value measurement (as a whole)

(i) Categorisation of the inputs in the fair value hierarchy:

IFRS 13’s fair value hierarchy categorises inputs to valuation techniques into the following levels, based on their observability:

Level 1 inputs: Quoted prices (that are unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date

Level 2 inputs: Inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly

Level 3 inputs: Unobservable inputs for the asset or liability

(ii) Categorisation of the fair value measurement (as a whole) in the fair value hierarchy:

A fair value measurement (as a whole) is categorised within the fair value hierarchy, based on the lowest level input that is significant to the entire measurement (Level 1 inputs being the highest and Level 3 inputs, the lowest). For measures based on fair value (such as fair
<table>
<thead>
<tr>
<th>Disclosure made</th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
</table>

value less costs to sell), this determination does not consider the 'costs to sell'.
When measured based on quoted prices in an active market (that are unadjusted) for identical assets or liabilities, fair value measurement is categorised within Level 1.
When measured using valuation techniques for which the lowest level input that is significant to the fair value measurement is market directly or indirectly observable, the fair value measurement as a whole is categorised within Level 2.
When measured using valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable, the fair value measurement as a whole is categorised within Level 3.

**Accounting policies**

IFRS 13.95 requires that an entity determine (and consistently follow) its policy for determining when transfers between levels in the fair value hierarchy are deemed to have occurred. The policy for the timing of recongising transfers is required to be the same for transfers into and out of levels. Examples of policies include:
(a) The date of the event or change in circumstances that caused the transfer
(b) The beginning of the reporting period
(c) The end of the reporting period

Does the entity classify assets and liabilities under the scope of IFRS 13 based on both:

a. The nature, characteristics and risks of the asset or liability
b. The level of the fair value hierarchy within which the fair value measurement is categorised

The number of classes of assets and liabilities may need to be greater for fair value measurements categorised within Level 3 because those measurements have a greater degree of uncertainty and subjectivity. Determining the appropriate classes of assets and liabilities requires judgement and often may require more disaggregation than the line items presented in the statement of financial position.

Note: If another IFRS specifies the class for an asset or liability, an entity may use that class when providing the disclosures required by IFRS 13, provided that class meets IFRS 13's requirements for determining classes.

Does the entity provide sufficient information to permit reconciliation between the classes of assets and liabilities and the line items presented in the statement of financial position?
Fair value disclosures

General

271 IFRS 13.99 Does the entity present the quantitative disclosures required by IFRS 13 in tabular format, unless another format is more appropriate

Disclosure made
Yes  No  N/A  Comments

272 IFRS 13.98 For a liability measured at fair value and issued with an inseparable third-party credit enhancement, does the entity disclose the existence of that credit enhancement and whether it is reflected in the fair value measurement of the liability

Assets and liabilities not measured at fair value, but for which fair value is disclosed

273 IFRS 13.97 For each class of assets and liabilities not measured at fair value in the statement of financial position, but for which fair value is disclosed, does the entity disclose:

IFRS 13.97(b) a. The level of fair value hierarchy within which the fair value measurement(s) are categorised in their entirety

Disclosure made
Yes  No  N/A  Comments

IFRS 13.97(d) b. For fair value measurement(s) categorised within Levels 2 and 3 of the fair value hierarchy:
   ► A description of the valuation technique(s) and the inputs used in the measurement
   ► If there has been a change in valuation technique, that change and the reason(s) for making it

IFRS 13.92(i) c. If the highest and best use of a non-financial asset differs from its current use, that fact and why the non-financial asset is being used in a manner that differs from its highest and best use

Recurring fair value measurements of assets and liabilities

IFRS 13.93 Recurring fair value measurements of assets or liabilities are those that other IFRSs require or permit in the statement of financial position at the end of each reporting period.
Non-recurring fair value measurements of assets or liabilities are those that other IFRSs require or permit in the statement of financial position in particular circumstances (e.g., when an entity measures an asset held for sale at fair value less costs to sell in accordance with IFRS 5 because the asset’s fair value less costs to sell is lower than its carrying amount).

274 IFRS 13.93 For each class of assets and liabilities that are measured at fair value on a recurring basis in the statement of financial position after initial recognition, does the entity disclose:

IFRS 13.93(a) a. The fair value measurement at the end of the reporting period

Disclosure made
Yes  No  N/A  Comments

b. The level of the fair value hierarchy within which the fair value measurements are categorised in their entirety (Level 1, 2 or 3)

c. For assets and liabilities held at the end of the reporting period, the amount of any transfers between Level 1 and Level 2, separately disclosing transfers into each level from transfers out of each level, and the reasons for those transfers

d. For fair value measurements categorised within Level 2 and Level 3 of the hierarchy:
   ► A description of the valuation technique(s) and the inputs used in the measurement
   ► If there has been a change in valuation technique, that change and the reason(s) for making it
   ► For fair value measurements categorised within Level 3 of the fair value hierarchy, quantitative information about the significant unobservable inputs used in the fair value measurement

IFRS 13.93(d) e. An entity is not required to create quantitative information to comply with this disclosure requirement if significant unobservable inputs are not developed by the entity when measuring fair value (e.g., when an entity uses prices from prior transactions or third-party pricing information without adjustment). However, an entity cannot ignore quantitative unobservable inputs that are significant to the fair value measurement and are reasonably available to the entity.

Disclosing fair value measurements of assets and liabilities

275 IFRS 13.92 For each class of assets and liabilities that are measured at fair value on a recurring basis in the statement of financial position after initial recognition, does the entity disclose:

a. The fair value measurement at the end of the reporting period

Disclosure made
Yes  No  N/A  Comments

b. The level of the fair value hierarchy within which the fair value measurements are categorised in their entirety (Level 1, 2 or 3)

c. For assets and liabilities held at the end of the reporting period, the amount of any transfers between Level 1 and Level 2, separately disclosing transfers into each level from transfers out of each level, and the reasons for those transfers

d. For fair value measurements categorised within Level 2 and Level 3 of the hierarchy:
   ► A description of the valuation technique(s) and the inputs used in the measurement
   ► If there has been a change in valuation technique, that change and the reason(s) for making it
   ► For fair value measurements categorised within Level 3 of the fair value hierarchy, quantitative information about the significant unobservable inputs used in the fair value measurement

An entity is not required to create quantitative information to comply with this disclosure requirement if significant unobservable inputs are not developed by the entity when measuring fair value (e.g., when an entity uses prices from prior transactions or third-party pricing information without adjustment). However, an entity cannot ignore quantitative unobservable inputs that are significant to the fair value measurement and are reasonably available to the entity.

276 IFRS 13.93 For each class of assets and liabilities that are measured at fair value on a recurring basis in the statement of financial position after initial recognition, does the entity disclose:

- The level of the fair value hierarchy within which the fair value measurement(s) are categorised in their entirety
- A description of the valuation technique(s) and the inputs used in the measurement
- If there has been a change in valuation technique, that change and the reason(s) for making it
- For fair value measurements categorised within Level 3 of the fair value hierarchy, quantitative information about the significant unobservable inputs used in the fair value measurement
- An entity is not required to create quantitative information to comply with this disclosure requirement if significant unobservable inputs are not developed by the entity when measuring fair value (e.g., when an entity uses prices from prior transactions or third-party pricing information without adjustment). However, an entity cannot ignore quantitative unobservable inputs that are significant to the fair value measurement and are reasonably available to the entity.

closing balances disclosing separately changes during the period attributable to the following:

- Total gains and losses recognised during the period in profit or loss, and the line item(s) in profit or loss in which those gains or losses are recognised
- Total gains and losses recognised during the period in other comprehensive income, and the line item(s) in other comprehensive income in which those gains or losses are recognised
- Purchases, sales, issues and settlements (each disclosed separately)
- The amounts of any transfers into and out of Level 3 of the fair value hierarchy, separately disclosing transfers into Level 3 from transfers out of Level 3, and the reasons for those transfers

f. For total gains and losses recognised during the period in profit or loss in accordance with IFRS 13.93(e)(i) (see e. above), the amount that is attributable to the change in unrealised gains or losses relating to those assets and liabilities held at the end of the period, and the line item(s) in profit or loss in which those unrealised gains or losses are recognised

g. For fair value measurements categorised within Level 3 of the fair value hierarchy, a description of the valuation processes used by the entity (including, for example, how an entity decides its valuation policies and procedures and analyses changes in fair value measurements from period to period)

h. For fair value measurements categorised within Level 3 of the fair value hierarchy:
  - A narrative description of the sensitivity if a change in an unobservable input (including at a minimum those unobservable inputs disclosed in accordance with IFRS 13.93(d), see d. above) to a different amount might result in a significantly higher or lower fair value measurement
  - If there are interrelationships between significant unobservable inputs and other unobservable inputs used in the fair value measurement, a narrative description of those interrelationships and of how they might magnify or mitigate the effect of changes in the unobservable inputs on the fair value measurement
  - For financial assets and financial liabilities, if changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would change fair value significantly, that fact, the effect of those changes and how the effect of a change was calculated

i. If the highest and best use of a non-financial asset differs from its current use, that fact and why the non-financial asset is being used in a manner that differs from its highest and best use

Non-recurring fair value measurements of assets and liabilities

- Non-recurring fair value measurements of assets or liabilities are those that other IFRSs require or permit in the statement of financial position in particular circumstances (e.g., when an entity measures an asset held for sale at fair value less costs to sell in accordance with IFRS 5 because the asset's fair value less costs to sell is lower than its carrying amount).

Does the entity disclose for assets and liabilities that are measured at fair value on a non-recurring basis in the statement of financial

**Disclosure checklist**

**Position after initial recognition:**

a. The fair value measurement at the end of the reporting period
   - [ ] Yes
   - [ ] No
   - [ ] N/A

b. The reasons for the fair value measurement
   - [ ] Yes
   - [ ] No
   - [ ] N/A

c. The level of the fair value hierarchy within which the fair value measurements are categorised in their entirety (Level 1, 2 or 3)
   - [ ] Yes
   - [ ] No
   - [ ] N/A

d. For fair value measurements categorised within Level 2 and Level 3 of the hierarchy:
   - A description of the valuation technique(s) and the inputs used in the measurement
     - [ ] Yes
     - [ ] No
     - [ ] N/A
   - If there has been a change in valuation technique, that change and the reason(s) for making it
     - [ ] Yes
     - [ ] No
     - [ ] N/A
   - For fair value measurements categorised within Level 3 of the fair value hierarchy, quantitative information about the significant unobservable inputs used in the fair value measurement
     - [ ] Yes
     - [ ] No
     - [ ] N/A

**IFRS 13.93(d)**

An entity is not required to create quantitative information to comply with this disclosure requirement if significant unobservable inputs are not developed by the entity when measuring fair value (e.g., when an entity uses prices from prior transactions or third-party pricing information without adjustment). However, an entity cannot ignore quantitative unobservable inputs that are significant to the fair value measurement and are reasonably available to the entity.

**Financial guarantee contracts**

**IAS 39.9**

A financial guarantee contract is defined as a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

**276 IAS 1.117**

Does the entity disclose its accounting policy for financial guarantee contracts?

- [ ] Yes
- [ ] No
- [ ] N/A

**277 IFRS 7.39**

Does the entity disclose a maturity analysis for non-derivative financial liabilities (including issued financial guarantee contracts) that shows the remaining contractual maturities?

- [ ] Yes
- [ ] No
- [ ] N/A

**IFRS 7.B11(c)**

For issued financial guarantee contracts the maximum amount of the guarantee is allocated to the earliest period in which the guarantee could be called.

**278 IFRS 7.B10(c)**

Does the entity disclose maximum credit risk exposure relating to financial guarantee contracts at the maximum amount the entity could have to pay if the guarantee is called on (which may be significantly greater than the amount recognised as a liability)?

- [ ] Yes
- [ ] No
- [ ] N/A

**Financial instruments**

**IFRS 7.6**

If the entity adopted IFRS 9 Financial Instruments, refer to items set out in 'New pronouncements' section.

**Classes of financial instruments and level of disclosure**

**IFRS 7.6**

If disclosures are required by class of financial instrument, does the entity:

a. Group financial instruments into classes that are appropriate to the nature of the information disclosed and that take into account the characteristics of those financial instruments
   - [ ] Yes
   - [ ] No
   - [ ] N/A

b. Provide sufficient information to permit reconciliation to the relevant items presented in the statement of financial position
   - [ ] Yes
   - [ ] No
   - [ ] N/A

**IFRS 7.81 - B3**

IFRS 7.6 requires the entity to group financial instruments into classes that are appropriate to the nature of the information disclosed and that take into account the characteristics of those financial instruments.
In determining classes of financial instruments, an entity:

- Distinguishes between instruments measured at amortised cost and those measured at fair value.
- Treats those financial instruments as a separate class or classes.

The entity decides how much detail it provides to satisfy the requirements, how much emphasis it places on different aspects of the requirements and how it aggregates information to display the overall picture without combining information with different characteristics, in the light of its circumstances. It is necessary to strike a balance between overburdening financial statements with excessive detail that may not assist users of financial statements and obscuring important information as a result of too much aggregation. For example, an entity must not obscure important information by including it among a large amount of insignificant detail. Similarly, an entity must not aggregate information so that it obscures important differences between individual transactions or associated risks.

### Significance of financial instruments for financial position and performance

Does the entity disclose information that enables users of its financial statements to evaluate the significance of financial instruments to its financial position and performance?

### Statement of financial position — categories of financial assets and financial liabilities

Does the entity disclose the carrying amounts of each of the following categories, as defined in IAS 39.9:

- Financial assets at fair value through profit or loss, showing separately:
  - Those designated as such upon initial recognition
  - Those classified as held for trading
- Held-to-maturity investments
- Loans and receivables
- Available-for-sale financial assets
- Financial liabilities at fair value through profit or loss, showing separately:
  - Those designated as such upon initial recognition
  - Those classified as held for trading
- Financial liabilities measured at amortised cost

### Financial assets or financial liabilities at fair value through profit or loss

If the entity has designated a loan or receivable (or a group of loans or receivables) at fair value through profit or loss, does it disclose:

- The maximum exposure to credit risk of the loan or receivable (or group of loans or receivables) at the end of the reporting period.
- The amount by which any related credit derivatives or similar instruments mitigate that maximum exposure to credit risk.
- The amount of change, during the period and cumulatively, in the fair value of the loan or receivable (or group of loans or receivables) that is attributable to changes in the credit risk of the financial asset determined either:
  - As the change in its fair value that is not attributable to changes in market conditions that give rise to market risk
  - Using an alternative method that the entity believes more faithfully represents the change in its fair value that is attributable to changes in credit risk of the asset

Changes in market conditions that give rise to market risk include changes in an interest rate, commodity price, foreign exchange rate or index of prices or rates.

</tr>
</tbody>
</table>
The entity may reclassify a financial asset to which IAS 39.50(c) applies (except a financial asset as described in IAS 39.50D) out of the fair value through profit or loss category only in rare circumstances.

The entity may reclassify a financial asset to which IAS 39.50(c) applies that would have met the definition of loans and receivables (if the financial asset had not been required to be classified as held for trading at initial recognition) out of the fair value through profit or loss category if the entity has the intention and ability to hold the financial asset for the foreseeable future or until maturity.

The entity may reclassify a financial asset classified as available-for-sale that would have met the definition of loans and receivables (if it had not been designated as available-for-sale) out of the available-for-sale category to the loans and receivables category if the entity has the intention and ability to hold the financial asset for the foreseeable future or until maturity.

### Transfers of financial assets

**287 IFRS 7.42A** Does the entity present the disclosures required in IFRS 7.42B-42H in a single note in its financial statements

**288 IFRS 7.42B** Does the entity disclose information that enables users of its financial statements to:

- Understand the relationship between transferred financial assets that are not derecognised in their entirety and the associated liabilities
- Evaluate the nature of, and risks associated with, the entity's continuing involvement in derecognised financial assets

**IFRS 7.42A** IFRS 7.42B-42H supplements the other disclosure requirements of IFRS 7. The entity provides these disclosures for all transferred financial assets that are not derecognised and for any continuing involvement in a transferred asset, existing at the reporting date, irrespective of when the related transfer transaction occurred.

For these disclosure requirements, an entity transfers all or part of a financial asset (the transferred financial asset), only if it either:

- Transfers the contractual rights to receive the cash flows of that financial asset
- Or
- Retains the contractual rights to receive the cash flows of that financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients in an arrangement (commonly referred to as a ‘pass-through arrangement’)

Note: the meaning of ‘transfer’ in IFRS 7 differs from that in IAS 39 with respect to ‘pass-through arrangements’. In particular, for pass-through arrangements to qualify as transfers under IAS 39, all three conditions in IAS 39.19 (commonly referred to as the ‘pass through conditions’) need to be met. In contrast, pass-through conditions need not be met for pass-through arrangements to be within the scope of IFRS 7. Accordingly, an arrangement whereby a reporting entity (including any consolidated structured entity) issues notes payable to investors that are contractually referenced to specified assets, and are non-recourse to the group, falls within the scope of these disclosure requirements, irrespective of whether such an arrangement meets all the IAS 39 ‘pass-through’ conditions.

### Transferred financial assets that are not derecognised in their entirety

**289 IFRS 7.42D** To meet the objectives in IFRS 7.42B(a) above, does the entity disclose for each class of transferred financial assets that are not derecognised in their entirety (i.e. transfers that result in partial or no derecognition):

- The nature of the transferred assets
- The nature of the risks and rewards of ownership to which the entity remains exposed
- A description of the nature of the relationship between the transferred assets and the associated liabilities, including any restrictions arising from the transfer on the entity's use of the
<table>

<td>□ □ □</td>
<td></td>
</tr>
<tr>
<td>▶ The carrying amount of the associated liabilities</td>
<td>□ □ □</td>
<td></td>
</tr>
</tbody>
</table>

These disclosures are required at each reporting date at which the entity continues to recognise the transferred financial assets, regardless of when the transfers occurred.

**Transferred financial assets that are derecognised in their entirety**

Under IFRS 7.42E-42H, an entity has continuing involvement in a transferred financial asset if, as part of the transfer, the entity retains any of the contractual rights or obligations inherent in the transferred financial asset or obtains any new contractual rights or obligations relating to the transferred financial asset. However, the following do not constitute continuing involvement:

a. Normal representations and warranties relating to fraudulent transfer and concepts of reasonableness, good faith and fair dealings that could invalidate a transfer as a result of legal action
b. Forward, option and other contracts to re-acquire the transferred financial asset for which the contract price (or exercise price) is the fair value of the transferred financial asset
c. An arrangement whereby an entity retains the contractual rights to receive the cash flows of a financial asset, but assumes a contractual obligation to pay the cash flows to one or more entities and the conditions in IAS 39.19(a)–(c) are met

The assessment of continuing involvement in a transferred financial asset for the purposes of the disclosure requirements in IFRS 7.42E-42H is made at the level of the reporting entity.

IFRS 7.42E-42H require qualitative and quantitative disclosures for each type of continuing involvement in derecognised financial assets. An entity aggregates its continuing involvement into categories that are representative of the entity’s exposure to risks. For instance, by type of financial instrument (for example, guarantees or call options) or by type of transfer (for example, factoring of receivables, securitisations and secured lending).

To meet the objectives in IFRS 7.42B(b) above, when the entity derecognises transferred financial assets in their entirety, but has continuing involvement in them, does the entity disclose, as a minimum, for each type of continuing involvement at the reporting date:

a. The carrying amount of the assets and liabilities that are recognised in the entity’s statement of financial position and represent the entity’s continuing involvement in the derecognised financial assets, and the line items in which those assets and liabilities are recognised
b. The fair value of the assets and liabilities that represent the entity’s continuing involvement in the derecognised financial assets
c. The amount that best represents the entity’s maximum exposure to loss from its continuing involvement in the derecognised financial assets, and how the maximum exposure to loss is...

distributed throughout the reporting period (for example, if a substantial proportion of the total amount of transfer activity takes place in the closing days of a reporting period):

- When the greatest transfer activity took place within that reporting period (for example, the last five days before the end of the reporting period)
- The amount recognised (for example, related gains or losses) from transfer activity in that part of the reporting period
- The total amount of proceeds from transfer activity in that part of the reporting period

**Supplementary information**

292  IFRS 7.42H  IFRS 7.839

Does the entity disclose any additional information necessary to meet the disclosure objectives in IFRS 7.42B

**Collateral**

293  IFRS 7.14  IAS 39.37

Does the entity disclose:

- The carrying amount of financial assets pledged as collateral for liabilities or contingent liabilities, including amounts reclassified in accordance with IAS 39.37
- The terms and conditions relating to the pledge

**IAS 39.37**

If a transferor provides non-cash collateral (such as debt or equity instruments) to the transferee, the accounting for the collateral by the transferor and the transferee depends on whether the transferee has the right to sell or repledge the collateral and whether the transferor has defaulted. If the transferee has the right by contract or custom to sell or repledge the collateral, then the transferor reclassifies that asset in its statement of financial position (for example, as a loaned asset, pledged equity instruments or repurchase receivable) separately from other assets.

Some transactions involving the provision of non-cash financial collateral may be considered transfers that fall within the scope of IFRS 7.42D (e.g. non-cash collateral transferred in a repo). This would normally be the case when (a) the transferee’s rights to control the asset are not conditional on the transferor’s default. This is often evidenced by the transfer of legal ownership and/or the transferee’s ability to re-sell or re-pledge the financial asset; or (b) when the arrangement is considered a ‘pass-through’ arrangement.

Collateral pledged or received subject to a netting arrangement would also fall within the scope of the offsetting disclosures irrespective of whether or not the collateral met the offsetting criteria.

294  IFRS 7.15

If the entity holds collateral (of financial or non-financial assets) and may sell or repledge the collateral in the absence of default by the owner of the collateral, does the entity disclose:

- The fair value of the collateral held
- The fair value of any such collateral sold or repledged, and whether the entity has an obligation to return it
- The terms and conditions associated with its use of this collateral

**Allowance account for credit losses**

295  IFRS 7.16

If financial assets are impaired by credit losses and the entity records the impairment in a separate account (for example, an allowance account or similar account used to record a collective impairment of assets) rather than directly reducing the carrying amount of the asset, does the entity disclose a reconciliation of changes in that account during the period for each class of financial assets

**Compound financial instruments with multiple embedded derivatives**

296  IFRS 7.17

If the entity issued an instrument that contains both a liability and an equity component and the instrument has multiple embedded derivatives whose values are interdependent (such as a callable convertible debt instrument), does the entity disclose the existence of those features

**Defaults and breaches**

297  IFRS 7.18

For loans payable recognised at the end of the reporting period, does the entity disclose:

- Details of any defaults during the period of principal, interest,
Disclosure made

Yes  No  N/A  Comments

b. The carrying amount of the loans payable in default at the end of the reporting period

c. Whether the default was remedied, or the terms of the loans payable were renegotiated, before the financial statements were authorised for issue

If, during the reporting period, there are breaches of loan agreement terms other than those described in IFRS 7.18 above, does the entity disclose the same information as required by IFRS 7.18 if those breaches permit the lender to demand accelerated repayment (unless the breaches were remedied, or the terms of the loan were renegotiated on or before the end of the reporting period)

Statement of comprehensive income

Items of income, expense, gains and losses

Does the entity disclose the following items of income, expense, gains or losses:

a. Net gains or net losses on:
   ► Financial assets or financial liabilities at fair value through profit or loss, showing separately:
     ► Those on financial assets or financial liabilities designated as such upon initial recognition
     ► Those on financial assets or financial liabilities that are classified as held for trading in accordance with IAS 39
   ► Available-for-sale financial assets, showing separately:
     ► The gain or loss recognised in other comprehensive income during the reporting period
     ► The amount reclassified from equity to profit or loss as a reclassification adjustment for the reporting period
     ► Held-to-maturity investments
     ► Loans and receivables
     ► Financial liabilities measured at amortised cost

b. Total interest income and total interest expense (calculated using the effective interest method) for financial assets or financial liabilities that are not at fair value through profit or loss

For financial instruments that contain a discretionary participation feature, the entity shall disclose the total interest expense recognised in profit or loss as required under IFRS 7.20(b), but does not need to calculate such interest expense using the effective interest method.

c. Fee income and expense (other than amounts included in determining the effective interest rate) arising from:
   ► Financial assets or financial liabilities that are not at fair value through profit or loss
   ► Trust and other fiduciary activities that result in the holding or investing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions

IAS 39.AG93

d. Interest income on impaired financial assets accrued in accordance with IAS 39.AG93

e. Any impairment loss for each class of financial asset

Other disclosures

Accounting policies

Does the entity disclose its significant accounting policies comprising the measurement basis (or bases) used in preparing the financial statements and the other accounting policies that are relevant to an understanding of the financial statements in relation to financial instruments

Does the entity disclose for financial assets or financial liabilities designated as at fair value through profit or loss:

a. The nature of the financial assets or financial liabilities the entity has designated as at fair value through profit or loss

b. The criteria for so designating such financial assets or financial liabilities on initial recognition
c. How the entity has satisfied the conditions in IAS 39.9, IAS 39.11A or IAS 39.12 for such designation:
   ▶ For instruments designated in accordance with the definition of a financial asset or financial liability at fair value through profit or loss in IAS 39.9(b)(i), that disclosure includes the circumstances underlying the measurement or recognition inconsistency that would otherwise arise
   ▶ For instruments designated in accordance with the definition of a financial asset or financial liability at fair value through profit or loss in IAS 39.9(b)(ii), that disclosure includes how designation at fair value through profit or loss is consistent with the entity’s documented risk management or investment strategy

302 IFRS 7.85 Does the entity disclose:
   a. The criteria for designating financial assets as available-for-sale
   b. Whether regular way purchases and sales of financial assets are accounted for at trade date or at settlement date
   c. If the entity uses an allowance to reduce the carrying amount of financial assets impaired by credit losses:
      ▶ The criteria for determining when the carrying amount of impaired financial assets is reduced directly (or, in a reversal of a write-down, increased directly) and when the allowance account is used

303 IFRS 7.16
   ▶ The criteria for writing off amounts charged to the allowance account against the carrying amount of impaired financial assets

304 IFRS 7.22 Does the entity disclose the following separately for each type of hedge in IAS 39 (that is, fair value hedges, cash flow hedges and hedges of net investments in foreign operations):
   a. A description of each type of hedge
   b. A description of the financial instruments designated as hedging instruments
   c. Their fair values at the end of the reporting period
   d. The nature of the risks being hedged

305 IFRS 7.23 For cash flow hedges, does the entity disclose:
   a. The periods when the cash flows are expected to occur and when they are expected to affect profit or loss
   b. Any forecast transaction for which hedge accounting had previously been used but which is no longer expected to occur
   c. The amount recognised in other comprehensive income during the reporting period
   d. The amount that was reclassified from equity to profit or loss as a reclassification adjustment for the reporting period, showing the amount included in each line item in the statement of comprehensive income
   e. The amount that was removed from equity during the reporting period and included in the initial cost or other carrying amount of a non-financial asset or non-financial liability whose acquisition or incurrence was a hedged highly probable forecast transaction

306 IFRS 7.24 Does the entity disclose separately:
a. In fair value hedges, gains or losses:
   - On the hedging instrument
   - On the hedged item attributable to the hedged risk
b. The ineffectiveness recognised in profit or loss that arises from cash flow hedges
c. The ineffectiveness recognised in profit or loss that arises from hedges of net investment in foreign operations

### Nature and extent of risk arising from financial instruments

**IFRS 7.32**
The disclosures required by IFRS 7.33-42 focus on the risks that arise from financial instruments and how they have been managed. These risks typically include, but are not limited to, credit risk, liquidity risk and market risk.

**IFRS 7.86**
The disclosures are either given in the financial statements or incorporated by cross-reference in the financial statements to some other statement, such as a management commentary or risk report, that is available to users of the financial statements on the same terms as the financial statements and at the same time. Without the information incorporated by cross-reference, the financial statements are incomplete.

**IFRS 7.32A**
Qualitative disclosures in combination with quantitative disclosures enable users to gain an understanding of the nature and extent of risks arising from financial instruments and evaluate the entity’s exposure to risk.

### Qualitative disclosures

**IFRS 7.31**
Does the entity disclose information that enables users of its financial statements to evaluate the nature and extent of risks arising from financial instruments to which the entity is exposed at the end of the reporting period?

**Qualitative disclosures**

**IFRS 7.33**
For each type of risk arising from financial instruments, does the entity disclose:

- a. The exposures to risk and how they arise
- b. Its objectives, policies and processes for managing the risk and the methods used to measure the risk
- c. Any changes in (a) or (b) from the previous period

### Quantitative disclosures

**IFRS 7.34**
For each type of risk arising from financial instruments, does the entity disclose:

- a. Summary quantitative data about its exposure to that risk at the end of the reporting period based on the information provided internally to key management personnel of the entity (as defined in IAS 24), for example, the entity’s board of directors and chief executive officer
- b. The disclosures required by IFRS 7.36-42 to the extent not provided in accordance with (a)
- c. Concentrations of risk if not apparent from the disclosures made in accordance with (a) and (b)

**IFRS 7.87**
If the entity uses several methods to manage a risk or an exposure, the entity must disclose information using the method or methods that provide the most relevant and reliable information. IAS 8.10 also discusses relevance and reliability.

**IFRS 7.88**
For concentrations of risk, does the entity disclose:

- How management determines concentrations
- The shared characteristic that identifies each concentration (for example, counterparty, geographical area, currency and/or market)
- The amount of the risk exposure associated with all financial instruments sharing that characteristic

**Concentrations of risk arise from financial instruments that have similar characteristics and are affected similarly by changes in economic or other conditions. The identification of concentrations of risk requires judgement, taking into account the circumstances of the entity (see IFRS 7.IG18).**

In accordance with IFRS 7.88, disclosures of concentrations of risk includes the shared characteristic that identifies each concentration. For example, the shared characteristic may refer to geographical distribution of counterparties by groups of countries, individual...
IFRS 7.35
If the quantitative data disclosed as at the end of the reporting period are unrepresentative of the entity’s exposure to risk during the period, does the entity provide further information that is representative?

Disclosure made
Yes ☐ No ☐ N/A ☐ Comments ☐

IFRS 7.1G20
To meet this requirement, the entity might disclose the highest, lowest and average amount of risk to which it was exposed during the reporting period. For example, if an entity typically has a large exposure to a particular currency, but at the end of the reporting period unwinds the position, the entity might disclose a graph that shows the exposure at various times during the reporting period, or disclose the highest, lowest and average exposures.

Credit risk

IFRS 7.36
Does the entity disclose by class of financial instrument:

a. The amount that best represents its maximum exposure to credit risk at the end of the reporting period without taking account of any collateral held or other credit enhancements (for example, netting agreements that do not qualify for offset in accordance with IAS 32.42), if the carrying amount does not represent the maximum exposure to credit risk?

Disclosure made
Yes ☐ No ☐ N/A ☐ Comments ☐

b. A description of collateral held as security and of other credit enhancements, and their financial effect (for example, a quantification of the extent to which collateral and other credit enhancements mitigate credit risk) for the amount that best represents the maximum exposure to credit risk (whether disclosed in accordance with (a) or represented by the carrying amount of a financial instrument)

Disclosure made
Yes ☐ No ☐ N/A ☐ Comments ☐

c. The credit quality of financial assets that are neither past due nor impaired

Disclosure made
Yes ☐ No ☐ N/A ☐ Comments ☐

Financial assets that are either past due or impaired

IFRS 7.37
Does the entity disclose by class of financial asset:

a. An analysis of the age of financial assets that are past due as at the end of the reporting period but not impaired

Disclosure made
Yes ☐ No ☐ N/A ☐ Comments ☐

b. An analysis of financial assets that are individually determined to be impaired as at the end of the reporting period, including the factors the entity considered in determining that they are impaired

Disclosure made
Yes ☐ No ☐ N/A ☐ Comments ☐
### Collateral and other credit enhancements obtained

If the entity obtains financial or non-financial assets during the period by taking possession of collateral it holds as security or calling on other credit enhancements (for example, guarantees), and such assets meet the recognition criteria in other IFRS, does the entity disclose for such assets held at the reporting date:

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. The nature and carrying amount of the assets obtained</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. If the assets are not readily convertible into cash, its policies for disposing of such assets or for using them in its operations</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Liquidity risk

Does the entity disclose:

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. A maturity analysis for non-derivative financial liabilities (including issued financial guarantee contracts) that shows the remaining contractual maturities</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

In preparing the maturity analyses in (a) and (b), the entity uses its judgement to determine appropriate time bands.

In preparing the maturity analyses, the entity does not separate an embedded derivative from a hybrid (combined) financial instrument.

If the entity is committed to make amounts available in instalments, each instalment is allocated to the earliest period in which the entity can be required to pay. For example, an undrawn loan commitment is included in the time band containing the earliest date it can be drawn down.

For issued guarantee contracts, the maximum amount of the guarantee is allocated to the earliest period in which the guarantee could be called.

The amounts in the maturity analysis are the contractual undiscounted cash flows, for example: gross finance lease obligations (or gross lease liabilities if an entity applies IFRS 16 early) (before deducting finance charges), prices specified in forward agreements to purchase financial assets for cash, net amounts for pay-floating/receive-fixed interest rate swaps for which net cash flows are exchanged, contractual amounts to be exchanged in a derivative financial instrument (e.g., a currency swap) for which gross cash flows are exchanged and gross loan commitments.

Such undiscounted cash flows differ from the amount included in the statement of financial position because the statement of financial position amount is based on discounted cash flows. If the amount payable is not fixed, the entity discloses the amount based on the conditions existing at the end of the reporting period. For example, if the amount payable varies with changes in an index, the amount disclosed may be based on the level of the index at the end of the reporting period.

b. A maturity analysis for derivative financial liabilities, which includes the remaining contractual maturities for those derivative financial liabilities for which contractual maturities are essential for an understanding of the timing of the cash flows

For example: this would be the case for:

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. An interest rate swap with a remaining maturity of five years in a cash flow hedge of a variable rate financial asset or liability</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. All loan commitments</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>c. How it manages the liquidity risk inherent in (a) and (b)</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The entity discloses a maturity analysis of financial assets it holds for managing liquidity risk (for example, financial assets that are readily saleable or expected to generate cash inflows to meet cash outflows on financial liabilities), if that information is necessary to enable users of its financial statements to evaluate the nature and extent of liquidity risk.
Other factors that the entity considers in item IFRS 7.39 (c) include, but are not limited to, whether the entity has the following:

a. Committed borrowing facilities (for example, commercial paper facilities) or other lines of credit (for example, stand-by credit facilities) that it can access to meet liquidity needs
b. Deposits at central banks to meet liquidity needs
c. Very diverse funding sources
d. Significant concentrations of liquidity risk in either its assets or its funding sources
e. Internal control processes and contingency plans for managing liquidity risk
f. Instruments that include accelerated repayment terms (for example, upon the downgrade of the entity’s credit rating)
g. Instruments that could require the posting of collateral (for example, margin calls for derivatives)
h. Instruments that allow the entity to choose whether it settles its financial liabilities by delivering cash (or another financial asset) or by delivering its own shares
Or
i. Instruments that are subject to master netting agreements.

In accordance with IFRS 7.34(a), an entity discloses summary quantitative data about its exposure to liquidity risk on the basis of information provided internally to key management personnel.

Does the entity state that fact and provide quantitative information that enables users of its financial statements to evaluate the extent of this risk unless the information is included in the contractual maturity analysis required by IFRS 7.39(a) or IFRS 7.39(b)?

Market risk

Sensitivity analysis

An entity must provide sensitivity analyses for the whole of its business, but may provide different types of sensitivity analyses for different classes of financial instruments.

Interest rate risk
Interest rate risk arises on interest-bearing financial instruments recognised in the statement of financial position (e.g., debt instruments acquired or issued) and on some financial instruments not recognised in the statement of financial position (e.g., some loan commitments).

Currency risk
Currency risk does not arise from financial instruments that are non-monetary items or from financial instruments denominated in the functional currency. An entity discloses a sensitivity analysis for each currency to which it has significant exposure.

Other price risk
Other price risk arises on financial instruments because of changes in, for example, commodity prices or equity prices. To comply with IFRS 7.40, the entity might disclose the effect of a decrease in a specified stock market index, commodity price, or other risk variable. For example, if an entity gives residual value guarantees that are financial instruments, the entity discloses an increase or decrease in the value of the assets to which the guarantee applies.

Two examples of financial instruments that give rise to equity price risk are a holding of equities in another entity and an investment in a trust, which in turn, holds investments in equity instruments. The fair values of such financial instruments are affected by changes in the market price of the underlying equity instruments.
Under IFRS 7.40(a), an entity discloses the sensitivity of profit or loss separately from the sensitivity of equity. For example, the sensitivity from instruments classified as at fair value through profit or loss is disclosed separately from the sensitivity of instruments whose changes in fair value are presented in other comprehensive income. Financial instruments that the entity classifies as equity instruments are not remeasured. Neither profit or loss or equity will be affected by the equity price risk of those instruments. Accordingly, no sensitivity analysis is required.

Unless the entity complies with item IFRS 7.41, does the entity disclose:

a. A sensitivity analysis for each type of market risk to which the entity is exposed at the end of the reporting period, showing how profit or loss and equity would have been affected by changes in the relevant risk variable that were reasonably possible at the end of the reporting period

b. The methods and assumptions used in preparing the sensitivity analysis

c. Changes from the previous period in the methods and assumptions used and reasons for such changes

In accordance with IFRS 7.83, the entity decides how it aggregates information to display the overall picture without combining information with the different characteristics about exposures to risks from significantly different economic environments.

If the entity is exposed to only one type of market risk in only one economic environment, it does not show disaggregated information. For this purpose:

a. Entities disclose the effect on profit or loss and equity at the end of the reporting period, assuming that a reasonably possible change in the relevant risk variable that had occurred at the end of the reporting period and had been applied to the risk exposures in existence at that date. For example, if an entity has a floating rate liability at the end of the year, the entity would disclose the effect on profit or loss (that is, interest expense) for the current year if interest rates had varied by reasonably possible amounts.

b. Entities are not required to disclose the effect on profit or loss and equity for each change within a range of reasonably possible changes of the relevant risk variable. Disclosure of the effects of the changes at the limits of the reasonably possible range would be sufficient.

In determining what a reasonably possible change in the relevant risk variable is, the entity considers the following:

a. The economic environments in which it operates. A reasonably possible change does not include remote or ‘worst case’ scenarios or ‘stress tests’. Moreover, if the rate of change in the underlying risk variable is stable, the entity need not alter the chosen reasonably possible change in the risk variable. The entity discloses the effect on profit or loss and equity if interest rates were to change to 5% or 6%. The entity is not required to revise its assessment that interest rates might reasonably fluctuate, unless there is evidence that interest rates have become significantly more volatile.

b. The time frame over which it is making the assessment. The sensitivity analysis shows the effects of changes that are considered reasonably possible over the period until the entity will next present these disclosures, which is usually its next annual reporting period.

If the entity prepares a sensitivity analysis, such as a value-at-risk, that reflects interdependencies between risk variables (for example, interest rates and exchange rates) and uses it to manage financial risks, it may use that sensitivity analysis in place of the analysis in IFRS 7.40. If the entity uses such a sensitivity analysis does the entity also explain:

a. The method used in preparing such a sensitivity analysis, and the main parameters and assumptions underlying the data

b. The objective of the method used and limitations that may result in...
the information not fully reflecting the fair value of the assets and liabilities involved

IFRS 7.41 applies even if such methodology measures only the potential for loss and does not measure the potential for gain. Such an entity might comply with IFRS 7.41(a) by disclosing the type of value-at-risk model used (e.g., whether the model relies on Monte Carlo simulations), an explanation about how the model works and the main assumptions (e.g., the holding period and confidence level). Entities might also disclose the historical observation period and weightings applied to observations within that period, an explanation of how options are dealt with in the calculations, and which volatilities and correlations (or, alternatively, Monte Carlo probability distribution simulations) are used.

Other market risk disclosures

If the sensitivity analyses IFRS 7.40 or IFRS 7.41 above are unrepresentative of a risk inherent in a financial instrument (for example, because the exposure at the end of the reporting period does not reflect the exposure during the reporting period), does the entity disclose that fact and the reason it believes the sensitivity analyses are unrepresentative

An entity discloses additional information if the sensitivity analysis is unrepresentative of a risk inherent in a financial instrument. For example, this can occur if:

a. A financial instrument contains terms and conditions whose effects are not apparent from the sensitivity analysis. For example, options that remain out of (or in) the money for the chosen change in the risk variable

b. Financial assets are illiquid. For example, if there is a low volume of transactions in similar assets and the entity finds it difficult to find a counterparty

Or

c. The entity has a large holding of a financial asset that, if sold in its entirety, would be sold at a discount or premium to the quoted market price for a smaller holding

Puttable instruments and other similar instruments classified as equity

If the entity reclassifies:

a. A puttable financial instrument classified as an equity instrument

b. An instrument that imposes on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation, and is classified as an equity instrument between financial liabilities and equity, does it disclose:

► The amount reclassified into and out of each category (financial liabilities or equity)

► The timing of the reclassification

► The reason for the reclassification

For puttable financial instruments classified as equity instruments, does the entity disclose:

a. Summary quantitative data about the amount classified as equity

b. Its objectives, policies and processes for managing its obligation to repurchase or redeem the instruments if required to do so by the instrument holders, including any changes from the previous period

c. The expected cash outflow on redemption or repurchase of that class of financial instruments

d. Information about how the expected cash outflow on redemption or repurchase was determined
**Offset financial assets and financial liabilities**

**IAS 32.43**

When an entity has the right to receive or pay a single net amount and intends to do so, it has, in effect, only a single financial asset or financial liability. In other circumstances, financial assets and financial liabilities are presented separately from each other consistently with their characteristics as resources or obligations of the entity.

**IFRS 7.13A**

The disclosure requirements for offsetting financial assets and financial liabilities apply not only to all recognised financial instruments that are set off in accordance with IAS 32.42, but also to all recognised financial instruments that are subject to an enforceable master netting arrangement or similar agreement that covers similar financial instruments and transactions, irrespective of whether they are set off in accordance with IAS 32.42. Entities have to carefully analyse whether they have master netting arrangements or similar agreements in place. In particular, trade receivables and payables subject to some form of a netting arrangement (normally where an entity's customer is also a supplier, and vice versa) could fall within the scope of these disclosure requirements.

**IFRS 7.13B**

An entity must disclose information to enable users of its financial statements to evaluate the effect, or potential effect, of netting arrangements on the entity's financial position. This includes the effect, or potential effect, of rights of set-off associated with the entity's recognised financial assets and recognised financial liabilities that are within the scope of IFRS 7.13A.

**IFRS 7.13C**

Does the entity disclose, in a tabular format (unless another format is more appropriate), separately for recognised financial assets and recognised financial liabilities that have been set off in accordance with IAS 32.42 or that are subject to an enforceable master netting arrangement or similar agreement, the following quantitative information:

a. The gross amounts of those recognised financial assets and recognised financial liabilities
d. The amounts subject to an enforceable master netting arrangement or similar agreement that are not otherwise included in b. (for each instrument limited to the amount included in c. above), including:
   - Amounts related to recognised financial instruments that do not meet some or all of the offsetting criteria in IAS 32.42
   - Amounts related to financial collateral (including cash collateral)

e. The net amount after deducting the amounts in (d) from the amounts in (c) above

**IFRS 7.13D**

Does the entity disclose a description of the rights of set-off associated with the entity’s recognised financial assets and recognised financial liabilities subject to enforceable master netting arrangements and similar agreements that are disclosed in accordance with 13C(d) of IFRS 7 above, including the nature of those rights.

**IFRS 7.13E**

Does the entity disclose a description of the rights of set-off associated with the entity’s recognised financial assets and recognised financial liabilities subject to enforceable master netting arrangements and similar agreements that are disclosed in accordance with 13C(d) of IFRS 7 above, including the nature of those rights.

**IFRS 7.13F**

Does the entity cross-reference the information required by 13B-13E of IFRS 7 if it is disclosed in more than one note to the financial statements.

**Extinguishing financial liabilities with equity instruments (IFRIC 19)**

**IFRIC 19.11**

Does the entity disclose a gain or loss recognised in accordance with paragraphs 9 and 10 of IFRIC 19 as a separate line item in profit or loss or in the notes. IFRIC 19 provides guidance for the accounting when an entity renegotiates terms of a liability, with the result that a debtor extinguishes a financial liability fully or partially by issuing equity.
### Disclosure Checklist

<table>
<thead>
<tr>
<th>Instrument to the creditor.</th>
<th>Disclosure made</th>
<th>Comments</th>

</thead>
<tbody>
<tr>
<td></td>
<td>Yes</td>
<td>No</td>
</tr>
</tbody>
</table>

### Foreign currency

**IAS 21.51**

In a group, ‘functional currency’ refers to the functional currency of the parent.

**329 IAS 21.52**

Does the entity disclose the following information:

<table>
<thead>
<tr>
<th></th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. The amount of exchange differences recognised in profit or loss except for those arising on financial instruments measured at fair value through profit or loss</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. Net exchange differences recognised in other comprehensive income and accumulated in a separate component of equity, and a reconciliation of the amount of such exchange differences at the beginning and end of the period</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**330 IAS 21.53**

If the presentation currency is different from the functional currency, does the entity disclose:

<table>
<thead>
<tr>
<th></th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. That fact</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. The functional currency</td>
<td></td>
<td></td>
</tr>
<tr>
<td>c. The reason for using a different presentation currency</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**331 IAS 21.54**

If there is a change in the functional currency of either the reporting entity or a significant foreign operation, does the entity disclose:

<table>
<thead>
<tr>
<th></th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. That fact</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. The reason for the change in functional currency</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**332 IAS 21.55**

If the entity presents its financial statements in a currency that is different from its functional currency, does it describe the financial statements as complying with IFRS only if they comply with all the requirements of each applicable IFRS, including the translation method set out in IAS 21.39 and IAS 21.42.

**333 IAS 21.55**

When the entity presents its financial statements or other financial information in a currency that is different from either its functional currency or its presentation currency and the requirements of IAS 21.55 are not met, does the entity disclose:

<table>
<thead>
<tr>
<th></th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. That the information is supplementary information to distinguish it from the information that complies with IFRS</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. The currency in which the supplementary information is displayed</td>
<td></td>
<td></td>
</tr>
<tr>
<td>c. The functional currency and the method of translation used to determine the supplementary information</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Final interim period information

**IAS 34.26**

If an estimate of an amount reported in a previous interim period is changed significantly during the final interim period of the financial year, but a separate financial report is not published for that final interim period, has the following information been disclosed in a note to the annual financial statements for that financial year:

<table>
<thead>
<tr>
<th></th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. The nature of that change in estimate</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. The amount of that change in estimate</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Goodwill

**IFRS 3.867(d)**

Does the entity disclose the following information to enable users of its financial statements to evaluate changes in the carrying amount of goodwill during the reporting period:

<table>
<thead>
<tr>
<th></th>
<th>Disclosure made</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. The gross amount of goodwill and accumulated impairment losses at the beginning of the reporting period</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. Additional goodwill recognised during the reporting period, except goodwill included in a disposal group that, on acquisition, meets the criteria to be classified as held for sale in accordance with IFRS 5</td>
<td></td>
<td></td>
</tr>
<tr>
<td>c. Adjustments resulting from the subsequent recognition of deferred tax assets during the reporting period</td>
<td></td>
<td></td>
</tr>
<tr>
<td>d. Goodwill included in a disposal group classified as held for sale in accordance with IFRS 5 and goodwill derecognised during the period without having previously been included in a disposal group classified as held for sale</td>
<td></td>
<td></td>
</tr>
<tr>
<td>e. Impairment losses recognised during the reporting period in accordance with IAS 36</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Disclosure made
<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
</table>

f. Net exchange differences arising during the reporting period in accordance with IAS 21
  Disclosure made: Yes

g. Any other changes in the carrying amount during the reporting period
  Disclosure made: No

h. The gross amount of goodwill and accumulated impairment losses at the end of the reporting period
  Disclosure made: N/A

If any portion of the goodwill acquired in a business combination during the period has not been allocated to a cash generating unit (group of units) at the end of the reporting period, does the entity disclose:

a. The amount of the unallocated goodwill
  Disclosure made: No

b. The reasons why that amount remains unallocated
  Disclosure made: No

336 IAS 36.133

**Government grants**

Does the entity disclose the following information on government grants:

a. The accounting policy for government grants
  Disclosure made: No

b. The methods of presentation in the financial statements
  Disclosure made: No

c. The nature and extent of government grants recognised in the financial statements
  Disclosure made: No

d. An indication of other forms of government assistance from which the entity has directly benefited
  Disclosure made: No

e. Any unfulfilled conditions and other contingencies attaching to government assistance that has been recognised
  Disclosure made: No

337 IAS 20.39

**Hyperinflation**

Does the entity disclose:

a. That the financial statements and the corresponding figures for previous periods have been restated for the changes in the general purchasing power of the functional currency and, as a result, are stated in terms of the measuring unit current at the end of the reporting period
  Disclosure made: No

b. Whether the financial statements are based on a historical cost approach or a current cost approach
  Disclosure made: No

c. The identity and level of the price index at the end of the reporting period and the movement in the index during the current and the previous reporting period
  Disclosure made: No

338 IAS 29.39

Does the entity separately disclose the gain or loss on the net monetary position (which results from the application of IAS 29.27-28)?

340 IAS 29.40

The disclosures required by IAS 29 Financial Reporting in Hyperinflationary Economies are needed to make clear the basis for dealing with the effects of hyperinflation in the financial statements. They are also intended to provide other information necessary to understand that basis and the resulting amounts. Does the entity make all necessary disclosures

341 IAS 36.126

Does the entity disclose the following information for each class of assets:

a. The amount of impairment losses recognised in profit or loss during the period and the line item(s) of the statement of comprehensive income in which those impairment losses are included
  Disclosure made: No

b. The amount of reversals of impairment losses recognised in profit or loss during the period and the line item(s) of the statement of comprehensive income in which those impairment losses are reversed
  Disclosure made: No

c. The amount of impairment losses on revalued assets recognised in other comprehensive income during the reporting period
  Disclosure made: No

d. The amount of reversals of impairment losses on revalued assets recognised in other comprehensive income during the reporting period
  Disclosure made: No

342 IAS 36.129

If the entity reports segment information under IFRS 8 Operating Segments, does it disclose the following for each reportable segment:

a. The amount of impairment losses recognised in profit or loss and in
  Disclosure made: No
If an impairment loss for an individual asset, including goodwill, or a cash-generating unit is recognised or reversed during the period, does the entity disclose:

a. The events and circumstances that led to the recognition or reversal of the impairment loss

b. The amount of the impairment loss recognised or reversed

c. For an individual asset:
   - The nature of the asset
   - If the entity reports segment information under IFRS 8, the reportable segment to which the asset belongs

d. For a cash-generating unit:
   - A description of the cash-generating unit (such as whether it is a product line, a plant, a business operation, a geographical area, or a reportable segment as defined in IFRS 8)
   - The amount of the impairment loss recognised or reversed by class of assets and, if the entity reports segment information in accordance with IFRS 8, by reportable segment
   - If the aggregation of assets for identifying the cash-generating unit has changed since the previous estimate of the cash-generating unit’s recoverable amount (if any), a description of the current and former way of aggregating assets and the reasons for changing the way the cash-generating unit is identified

e. The recoverable amount of the asset (cash-generating unit) and whether the recoverable amount of the asset (cash-generating unit) is its fair value less costs of disposal or its value in use

f. If the recoverable amount is fair value less costs of disposal, does the entity disclose the following information:
   - The level of the fair value hierarchy (see IFRS 13) within which the fair value measurement of the asset (cash-generating unit) is categorised in its entirety (without taking into account whether the 'costs of disposal' are observable)
   - For fair value measurements categorised within Level 2 and Level 3 of the fair value hierarchy, a description of the valuation technique(s) used to measure fair value less costs of disposal. If there has been a change in valuation technique, the entity must disclose that change and the reason(s) for making it
   - For fair value measurements categorised within Level 2 and Level 3 of the fair value hierarchy, each key assumption on which management has based its determination of fair value less costs of disposal. Key assumptions are those to which the asset’s (cash-generating unit’s) recoverable amount is most sensitive. The entity must also disclose the discount rate(s) used in the current measurement and previous measurement if fair value less costs of disposal is measured using a present value technique

An entity is encouraged to disclose the assumptions used to determine the recoverable amount of assets (cash-generating units) during the period.

Does the entity disclose the following for the aggregate impairment losses and the aggregate reversals of impairment losses recognised for which no information is disclosed under IAS 36.130 above:

a. The main classes of assets affected by impairment losses and the main classes of assets affected by reversals of impairment losses

b. The main events and circumstances that led to the recognition of these impairment losses and reversals of impairment losses

Does the entity disclose the following for each cash-generating unit (group of units) for which the carrying amount of goodwill or
Disclosure made
Yes  No  N/A  Comments

intangible assets with indefinite useful lives allocated to that unit (group of units) is significant in comparison with the entity’s total carrying amount of goodwill or intangible assets with indefinite useful lives:

a. The carrying amount of goodwill allocated to the unit (group of units)  

b. The carrying amount of intangible assets with indefinite useful lives allocated to the unit (group of units)  

c. The basis on which the unit’s (group of units’) recoverable amount has been determined (i.e., value in use or fair value less costs of disposal)  

d. If the unit’s (group of units’) recoverable amount is based on value in use:
   ▶ Each key assumption on which management has based its cash flow projections for the period covered by the most recent budgets/forecasts. Key assumptions are those to which the unit’s (group of units’) recoverable amount is most sensitive  
   ▶ Description of management’s approach to determining the value(s) assigned to each key assumption, whether those value(s) reflect past experience or, if appropriate, are consistent with external sources of information, and, if not, how and why they differ from past experience or external sources of information  
   ▶ The period over which management has projected cash flows based on financial budgets/forecasts approved by management and, when a period greater than five years is used for a cash-generating unit (group of units), an explanation of why that longer period is justified  
   ▶ The growth rate used to extrapolate cash flow projections beyond the period covered by the most recent budgets/forecasts  
   ▶ The justification for using any growth rate that exceeds the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market to which the unit (group of units) is dedicated  
   ▶ The discount rate(s) applied to the cash flow projections  

e. If the unit’s (group of units’) recoverable amount is based on fair value less costs of disposal, disclose the valuation technique(s) used to measure fair value less costs of disposal. An entity is not required to provide the disclosures required by IFRS 13. If fair value less costs of disposal is not measured using a quoted price for an identical unit (group of units), does the entity disclose the following information:
   ▶ Each key assumption on which management has based its determination of fair value less costs of disposal. Key assumptions are those to which the unit’s (group of units’) recoverable amount is most sensitive  
   ▶ Description of management’s approach to determining the value(s) assigned to each key assumption, whether those value(s) reflect past experience or, if appropriate, are consistent with external sources of information, and, if not, how and why they differ from past experience or external sources of information  
   ▶ The level of the fair value hierarchy (see IFRS 13) within which the fair value measurement is categorised in its entirety (without giving regard to the observability of ‘costs of disposal’)  
   ▶ If there has been a change of valuation technique, the change and the reason(s) for making it  

f. If fair value less costs of disposal is measured using discounted cash flow projections, does the entity disclose the following information
   ▶ The period over which management has projected cash flows  
   ▶ The growth rate used to extrapolate cash flow projections  
   ▶ The discount rate(s) applied to the cash flow projections
g. If a reasonably possible change in a key assumption on which management has based its determination of the unit’s (group of units’) recoverable amount would cause the unit’s (group of units’) carrying amount to exceed its recoverable amount:
   - The amount by which the unit’s (group of units’) recoverable amount exceeds its carrying amount
   - The value assigned to the key assumption
   - The amount by which the value assigned to the key assumption must change, after incorporating any consequential effects of that change on the other variables used to measure recoverable amount, in order for the unit’s (group of units’) recoverable amount to be equal to its carrying amount

   Disclosure made
   Yes  No  N/A  Comments
   ☐  ☐  ☐  ☐  ☐  ☐  ☐

IAS 36.136
The most recent detailed calculation made in a preceding period of the recoverable amount of a cash-generating unit (group of units) may, in accordance with IAS 36. 24 or 99, be carried forward and used in the impairment test for that unit (group of units) in the current period provided specified criteria are met. When this is the case, the information for that unit (group of units), that is incorporated into the disclosures required by IAS 36.134 and 135, relates to the carried forward calculation of recoverable amount.

IASS 36.135
If some or all of the carrying amount of goodwill or intangible assets with indefinite useful lives is allocated across multiple cash-generating units (groups of units), and the amount so allocated to each unit (group of units) is not significant in comparison with the entity’s total carrying amount of goodwill or intangible assets with indefinite useful lives, does the entity disclose:

a. That fact
b. The aggregate carrying amount of goodwill or intangible assets with indefinite useful lives allocated to those units (groups of units)

c. If the recoverable amounts of any of those units (groups of units) are based on the same key assumption(s) and the aggregate carrying amount of goodwill or intangible assets with indefinite useful lives allocated to them is significant in comparison with the entity’s total carrying amount of goodwill or intangible assets with indefinite useful lives, does the entity disclose:

   a. That fact
   b. The aggregate carrying amount of goodwill allocated to those units (groups of units)
   c. The aggregate carrying amount of intangible assets with indefinite useful lives allocated to those units (groups of units)
   d. A description of the key assumption(s)
   e. A description of management’s approach to determining the value(s) assigned to the key assumption(s), whether those value(s) reflect past experience or, if appropriate, are consistent with external sources of information, and, if not, how and why they differ from past experience or external sources of information
   f. If a reasonably possible change in the key assumption(s) would cause the aggregate of the units’ (groups of units’) carrying amounts to exceed the aggregate of their recoverable amounts:
      - The amount by which the aggregate of the units’ (groups of units’) recoverable amounts exceeds the aggregate of their carrying amounts
      - The value(s) assigned to the key assumption(s)
      - The amount by which the value(s) assigned to the key assumption(s) must change, after incorporating any consequential effects of the change on the other variables used to measure recoverable amount, in order for the aggregate of the units’ (groups of units’) recoverable amounts to be equal to the aggregate of their carrying amounts

Income taxes
IAS 12.78
If the entity recognises exchange differences on deferred foreign tax liabilities or assets in the statement of comprehensive income, it may classify such differences as deferred tax expense (income), if that presentation is most useful to financial statement users.
Does the entity disclose separately:

| a. The current tax expense (income)       | Yes | No | N/A | Comments |
| b. Any adjustments recognised in the period for current tax of prior periods | Yes | No | N/A | Comments |
| c. The deferred tax expense (income) relating to the origination and reversal of temporary differences | Yes | No | N/A | Comments |
| d. The deferred tax expense (income) relating to changes in tax rates or the imposition of new taxes | Yes | No | N/A | Comments |
| e. The benefit arising from a previously unrecognised tax loss, tax credit or temporary difference of a prior period that is used to reduce current tax expense | Yes | No | N/A | Comments |
| f. The benefit from a previously unrecognised tax loss, tax credit or temporary difference of a prior period that is used to reduce deferred tax expense | Yes | No | N/A | Comments |
| g. Deferred tax expense arising from the write-down, or reversal of a previous write-down, of a deferred tax asset | Yes | No | N/A | Comments |
| h. The tax expense (income) relating to those changes in accounting policies and errors that are included in profit or loss in accordance with IAS 8 because they cannot be accounted for retrospectively | Yes | No | N/A | Comments |

Does the entity separately disclose the following information:

| a. The aggregate current and deferred tax relating to items that are charged or credited directly to equity (IAS 12.62A) | Yes | No | N/A | Comments |
| b. The amount of income tax relating to each component of other comprehensive income (IAS 12.62 and IAS 1) | Yes | No | N/A | Comments |
| c. The relationship between tax expense (income) and accounting profit or loss in either or both of the following forms: | Yes | No | N/A | Comments |
| ► A numerical reconciliation between tax expense (income) and the product of accounting profit multiplied by the applicable tax rate(s), disclosing also the basis on which the applicable tax rate(s) is (are) computed | Yes | No | N/A | Comments |
| Or | Yes | No | N/A | Comments |
| ► A numerical reconciliation between the average effective tax rate and the applicable tax rate, disclosing also the basis on which the applicable tax rate is computed | Yes | No | N/A | Comments |
| d. The changes in the applicable tax rate(s) compared to the previous accounting period | Yes | No | N/A | Comments |
| e. For deductible temporary differences, unused tax losses and unused tax credits for which no deferred tax asset is recognised in the statement of financial position: | Yes | No | N/A | Comments |
| ► The amount | Yes | No | N/A | Comments |
| ► Expiry date, if any | Yes | No | N/A | Comments |

An entity is encouraged to disclose the unrecognised deferred tax liabilities associated with investments in subsidiaries, branches and associates and interests in joint arrangements, if this disclosure is practicable.

f. The aggregate amount of temporary differences associated with investments in subsidiaries, branches and associates and interests in joint arrangements, for which deferred tax liabilities have not been recognised | Yes | No | N/A | Comments |

| g. For each type of temporary difference and for each type of unused tax losses and unused tax credits: | Yes | No | N/A | Comments |
| ► The amount of the deferred tax assets and liabilities recognised in the statement of financial position for each period presented | Yes | No | N/A | Comments |
| ► The amount of the deferred tax income or expense recognised in profit and loss if this is not apparent from the changes in the amounts recognised in the statement of financial position | Yes | No | N/A | Comments |
| h. For discontinued operations, the tax expense relating to: | Yes | No | N/A | Comments |
| ► The gain or loss on discontinuance | Yes | No | N/A | Comments |
| ► The profit or loss from the ordinary activities of the discontinued operation for the period, together with the corresponding amounts for each prior period presented | Yes | No | N/A | Comments |
| i. The amount of income tax consequences of dividends to shareholders of the entity that were proposed or declared before | Yes | No | N/A | Comments |
the financial statements were authorised for issue, but are not recognised as a liability in the financial statements

<tbody>
<tr>
<td>IAS 12.81</td>
<td><strong>Does the entity disclose:</strong></td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>IAS 12.67</td>
<td>a. If a business combination in which the entity is the acquirer causes a change in the amount recognised for its pre-acquisition deferred tax asset, the amount of that change</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>IAS 12.68</td>
<td>b. If the deferred tax benefits acquired in a business combination are not recognised at the acquisition date, but are recognised after the acquisition date, the event or change in circumstances that caused the deferred tax benefits to be recognised</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

If the entity recognises acquired deferred tax benefits in the measurement period based on new information about facts and circumstances that existed at the acquisition date, it recognises the adjustment as a reduction in goodwill related to that acquisition. If the carrying amount of goodwill is zero, it recognises all other acquired deferred tax benefits in profit or loss. All other acquired deferred tax benefits realised are recognised in profit or loss (or, if IAS 12 so requires, outside profit or loss).

351 IAS 12.82 | If (1) the utilisation of the deferred tax asset is dependent on future taxable profits in excess of the profits arising from the reversal of existing taxable temporary differences, and (2) the entity has suffered a loss in either the current or preceding period in the tax jurisdiction to which the deferred tax asset relates, does the entity disclose the following: | ☐ | ☐ | ☐ |
| | a. The amount of a deferred tax asset | ☐ | ☐ | ☐ |
| | b. The nature of the evidence supporting its recognition | ☐ | ☐ | ☐ |

352 IAS 12.82A | In the circumstances in IAS 12.52A, does the entity disclose: | ☐ | ☐ | ☐ |
| | ▶ The nature of the potential income tax consequences that would result from the payment of dividends to its shareholders, including the important features of the income tax systems and the factors that will affect the amount of the potential income tax consequences of dividends | ☐ | ☐ | ☐ |
| | ▶ The amounts of the potential income tax consequences practicably determinable | ☐ | ☐ | ☐ |
| | ▶ Whether there are any potential income tax consequences not practicably determinable | ☐ | ☐ | ☐ |

In some jurisdictions, income taxes are payable at a higher or lower rate if part or all of the net profit or retained earnings is paid out as a dividend to shareholders of the entity. In other jurisdictions, income taxes may be refundable or payable if part or all of the net profit or retained earnings is paid out as a dividend to shareholders of the entity.

353 IAS 12.87B | It may sometimes require undue cost or effort to compute the total amount of the potential income tax consequences that would result from the payment of dividends to shareholders. However, in such circumstances, it may be possible to compute some portions of the total, for example: | ☐ | ☐ | ☐ |
| | a. If in a consolidated group, a parent and some of its subsidiaries (1) have paid income taxes at a higher rate on undistributed profits, and (2) are aware of the amount that would be refunded on the payment of future dividends to shareholders from consolidated retained earnings, does the entity disclose the refundable amount | ☐ | ☐ | ☐ |
| | b. If applicable, does the entity disclose that there are additional potential income tax consequences that cannot be determined without undue cost or effort | ☐ | ☐ | ☐ |
| | c. Do the parent’s separate financial statements, if any, disclose the potential income tax consequences relating to the parent’s retained earnings | ☐ | ☐ | ☐ |

354 IAS 12.88 | Does the entity disclose any tax-related contingent liabilities and contingent assets in accordance with IAS 37. | ☐ | ☐ | ☐ |
| IAS 37.86 | Contingent liabilities and contingent assets may arise, for example, from unresolved disputes with the taxation authorities. | ☐ | ☐ | ☐ |
Intangible assets

General

Does the entity disclose the following for each class of intangible assets, distinguishing between internally generated intangible assets and other intangible assets:

a. Whether the useful lives are indefinite or finite and, if finite, the useful lives or the amortisation rates used

b. The amortisation methods used for intangible assets with finite useful lives

c. The gross carrying amount and the accumulated amortisation (aggregated with accumulated impairment losses):
   - At the beginning of the reporting period
   - At the end of the reporting period

d. The line item(s) of the statement of comprehensive income in which any amortisation of intangible assets is included

e. A reconciliation of the carrying amount at the beginning and end of the reporting period, showing:
   - Additions during the period, indicating separately those from internal development, those acquired separately, and those acquired through business combinations
   - Assets classified as held for sale or included in a disposal group classified as held for sale under IFRS 5 and other disposals
   - Increases or decreases during the reporting period resulting from revaluations under IAS 38, 75, IAS 38.B5 and IAS 38.86, and from impairment losses recognised or reversed in other comprehensive income under IAS 36, if any
   - Impairment losses recognised in profit or loss during the reporting period under IAS 36, if any
   - Impairment losses reversed in profit or loss during the reporting period under IAS 36, if any
   - Any amortisation recognised during the reporting period
   - Net exchange differences arising on the translation of the financial statements into the presentation currency, and on the translation of a foreign operation into the presentation currency of the reporting entity
   - Other changes in the carrying amount during the reporting period

A class of intangible assets is a grouping of assets of a similar nature and use in an entity’s operations.

Does the entity disclose:

a. For an intangible asset assessed as having an indefinite useful life, the carrying amount of that asset and reasons supporting the assessment of an indefinite useful life

b. In giving the reasons in (a), does the entity disclose the factor(s) that play a significant role in determining that the asset has an indefinite useful life

c. For any individual intangible asset that is material to the entity’s financial statements:
   - A description of that intangible asset
   - The carrying amount
   - Remaining amortisation period

d. For intangible assets acquired by way of a government grant and initially recognised at fair value:
   - The fair value initially recognised for these assets
   - Their carrying amount
   - Whether they are measured after recognition under the cost model or the revaluation model

e. The existence and carrying amounts of intangible assets whose title is restricted and the carrying amounts of intangible assets pledged as security for liabilities

f. The amount of contractual commitments for the acquisition of
intangible assets

**Revalued intangible assets**

357  **IAS 38.124**  If the entity accounts for intangible assets at revalued amounts, does the entity disclose:

a. By class of intangible assets:
   - The effective date of the revaluation
   - The carrying amount of revalued intangible assets
   - The carrying amount that would have been recognised had the revalued class of intangible assets been measured after recognition using the cost model in IAS 38.74

b. The amount of the revaluation surplus that relates to intangible assets at the beginning and end of the reporting period, indicating the changes during the reporting period and any restrictions on the distribution of the balance to shareholders

**Research and development**

358  **IAS 38.126**  Does the entity disclose the aggregate amount of research and development expenditure recognised as an expense during the reporting period

**Other information**

359  **IAS 38.128**  Does the entity disclose:

a. Any fully amortised intangible asset that is still in use

b. Significant intangible assets controlled by the entity but not recognised as assets because they do not meet the recognition criteria of IAS 38 or because they were acquired or generated before the version of IAS 38 issued in 1998 was effective

**Inventories**

360  **IAS 2.36**  Does the entity disclose:

a. The accounting policies for measuring inventories, including the cost formula used

b. The total carrying amount of inventories and the carrying amount in classifications appropriate to the entity

**Common classifications of inventories are merchandise, production supplies, materials, work in progress and finished goods. A service provider may describe inventories as work in progress. However, if an entity adopts IFRS 15 early, a service provider should apply IFRS 15 instead of IAS 2.37 to describe those inventories.**

c. The carrying amount of inventories carried at fair value less costs to sell

d. The amount of inventories recognised as an expense during the period

e. The amount of any write-down of inventories recognised as an expense in the period

f. The amount of any reversal of any write-down that is recognised as a reduction in the amount of inventories recognised as expense in the period

g. The circumstances or events that led to the reversal of a write-down of inventories

h. The carrying amount of inventories pledged as security for liabilities

**Investment property**

361  **IAS 40.74**  The disclosures set out in this section apply in addition to those in IAS 17 (or IFRS 16 if an entity applies IFRS 16 early). Under IAS 17 (or IFRS 16), an owner of an investment property provides lessor disclosures about leases into which it has entered. An entity (or a lessee) that holds an investment property under a finance lease or an operating lease (or as a right-of-use asset under IFRS 16) provides lessees’ disclosures for finance leases (or lessees’ disclosures as required by IFRS 16) and lessors’ disclosures (or lessor’s disclosures as required by IFRS 16) for any operating leases into which it has

b. Any other significant adjustments

In the exceptional cases in which the entity’s policy is to account for investment properties at fair value, but because of the lack of a reliable fair value, it measures investment property at cost less any accumulated depreciation and any accumulated impairment losses (or in accordance with IFRS 16 if the entity applies IFRS 16 early), does the entity disclose:

a. A reconciliation under IAS 40.76 - relating to that investment property separately - of the carrying amount at the beginning and end of the period

b. A description of the investment property

c. An explanation of why fair value cannot be measured reliably

d. If possible, the range of estimates within which fair value is highly likely to lie

e. On disposal of investment property not carried at fair value:
   ▶ The fact that the entity has disposed of investment property not carried at fair value
   ▶ The carrying amount of that investment property at the time of sale
   ▶ The amount of gain or loss recognised

Cost model

If the entity applies the cost model, does it disclose:

a. The depreciation methods used

b. The useful lives or the depreciation rates used

c. The gross carrying amount and the accumulated depreciation (aggregated with accumulated impairment losses) at the beginning and end of the period

d. A reconciliation of the carrying amount of investment property at the beginning and end of the period, showing the following:
   ▶ Additions, disclosing separately those additions resulting from acquisitions and those resulting from subsequent expenditure recognised as an asset
   ▶ Additions resulting from acquisitions through business combinations
   ▶ Assets classified as held for sale or included in a disposal group classified as held for sale in accordance with IFRS 5 and other disposals
   ▶ Depreciation
   ▶ The amount of impairment losses recognised, and the amount of impairment losses reversed, during the period in accordance with IAS 36
   ▶ The net exchange differences arising on the translation of the financial statements into a different presentation currency, and on translation of a foreign operation into the presentation currency of the reporting entity:
   ▶ Transfers to and from inventories and owner-occupied property
   ▶ Other changes

e. The fair value of investment property

f. In the exceptional cases in which the entity cannot measure the fair value of the investment property reliably, does the entity disclose:
   ▶ A description of the investment property
   ▶ An explanation of why fair value cannot be measured reliably
   ▶ If possible, the range of estimates within which fair value is highly likely to lie

Lease disclosures by lessees

If the entity adopted IFRS 16 Leases, please refer to the ‘New pronouncements: IFRS 16’ section.

Finance leases

The requirements for disclosure under the following IFRS also apply to lessees for assets leased under finance leases:
Disclosure made
Yes No N/A Comments

a. IAS 16 Property, Plant and Equipment
b. IAS 36 Impairment of Assets
c. IAS 38 Intangible Assets
d. IAS 40 Investment Property
e. IAS 41 Agriculture

Does the entity disclose the following information for finance leases (in which it is the lessee), in addition to meeting the requirements of IFRS 7:

a. For each class of asset, the net carrying amount at the end of the reporting period
b. A reconciliation between total future minimum lease payments at the end of the reporting period and their present value
c. The future minimum lease payments at the end of the reporting period and their present value for each of the following periods:
   - Not later than one year
   - Later than one year and not later than five years
   - Later than five years
d. The contingent rents recognised as an expense in the period
e. The future minimum sublease payments expected to be received under non-cancellable subleases at the end of the reporting period
f. The lessee’s material leasing arrangements including, but not limited to, the following:
   - The basis on which contingent rent payable is determined
   - The existence and terms of renewal or purchase options and escalation clauses
   - Restrictions imposed by lease arrangements, such as those concerning dividends, additional debt and further leasing

**Operating leases**

Does the entity disclose the following information for operating leases (in which it is the lessee):

a. The future minimum lease payments under non-cancellable operating leases for each of the following periods:
   - Not later than one year
   - Later than one year and not later than five years
   - Later than five years
b. The future minimum sublease payments expected to be received under non-cancellable subleases at the end of the reporting period
c. The lease and sublease payments recognised as an expense in the period, with separate amounts for:
   - Minimum lease payments
   - Contingent rents
   - Sublease payments
d. The lessee’s material leasing arrangements including, but not limited to, the following:
   - The basis on which contingent rent payable is determined
   - The existence and terms of renewal or purchase options and escalation clauses
   - Restrictions imposed by lease arrangements, such as those concerning dividends, additional debt and further leasing

**Sale and leaseback transactions**

Does the disclosure of material leasing arrangements include the unique or unusual provisions of the agreement or terms of the sale and leaseback transactions?

---

IAS 17.31

---

**Operating leases**

The disclosure requirements of IFRS 7 also apply to operating leases.

---

IAS 17.35

---

**Sale and leaseback transactions**

Sale and leaseback transactions may trigger the separate disclosure criteria in IAS 1, which require that an entity does not offset income and expense, unless required or permitted by an IFRS, and that the entity discloses material items of income or expense.
### Evaluating the substance of transactions involving the legal form of a lease

If the entity has arrangements that are leases in form but not in substance, does the entity disclose, separately for each arrangement or each class of arrangements, the following information:

<table>
<thead>
<tr>
<th>Disclosure made</th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>disclosure made</td>
<td>Yes</td>
<td>No</td>
<td>N/A</td>
<td></td>
</tr>
</tbody>
</table>

- **a.** A description of the arrangement including:
  - The underlying asset and any restrictions on its use
  - The life and other significant terms of the arrangement
  - The transactions that are linked together, including any options

- **b.** The accounting treatment applied to any fee received

- **c.** The amount of fees recognised as income in the period

- **d.** The line item of the statement of comprehensive income in which the fee income is included

### Determining whether an arrangement contains a lease (IFRIC 4)

**369 SIC 27.10**

If in an operating lease the entity is a purchaser and concludes that it is impracticable to reliably separate the payments for the lease from payments for other elements in the arrangement, does the entity:

- Treat all payments under the arrangement as lease payments to comply with the disclosure requirements of IAS 17, but:
  - Disclose those payments separately from minimum lease payments of other arrangements that do not include payments for non-lease elements
  - State that the disclosed payments also include payments for non-lease elements in the arrangement

### Non-current assets held for sale and discontinued operations

**369 SIC 27.11**

IFRS 5 specifies the disclosures required in respect of non-current assets (or disposal groups) classified as held for sale or discontinued operations. Disclosures in other IFRSs do not apply to such assets (or disposal groups) unless those IFRSs require:

- **a.** Specific disclosures in respect of non-current assets (or disposal groups) classified as held for sale or discontinued operations
  - Or
  - **b.** Disclosures about measurement of assets and liabilities within a disposal group that are not within the scope of the measurement requirement of IFRS 5 and such disclosures are not already provided in the other notes to the financial statements.

**IFRS 5.30**

A ‘component’ of an entity comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity. In other words, a component of an entity was a cash-generating unit or a group of cash-generating units while being held for use.

**IFRS 5.31**

A discontinued operation is a component of an entity that either has been disposed of, or is classified as held for sale, and:

- **a.** Represents a separate major line of business or geographical area of operations
  - Or
  - **b.** Is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations
  - Or
  - **c.** Is a subsidiary acquired exclusively with a view to resale

**369 SIC 27.12**

Does the entity present information that enables users of the financial statements to evaluate the financial effects of discontinued operations by disclosing:
Disclosure made

Yes ☐ No ☐ N/A ☐ Comments ☐

a. A single amount in the statement of comprehensive income comprising the total of:
   - The post-tax profit or loss of discontinued operations
   - The post-tax gain or loss recognised on the measurement to fair value less costs to sell or on the disposal of the assets or disposal group(s) constituting the discontinued operation

If the entity presents the items of profit or loss in a separate statement as described in IAS 11.10A, a section identified as relating to discontinued operations is presented in that statement.

b. An analysis of the single amount in (a) into the following:
   - The revenue, expenses and pre-tax profit or loss of discontinued operations and the related income tax expense
   - The gain or loss recognised on the measurement to fair value less costs to sell or on the disposal of the assets or disposal group(s) constituting the discontinued operation and the related income tax expense

The entity may present the analysis in (b) in the notes or in the statement of comprehensive income. If it is presented in the section identified as relating to discontinued operations, separately from continuing operations. The analysis is not required for disposal groups that are newly acquired subsidiaries that meet the criteria to be classified as held for sale on acquisition.

c. The net cash flows attributable to the operating, investing and financing activities of discontinued operations

The analysis in (c) may be presented either in the notes or in the financial statements. These disclosures are not required for disposal groups that are newly acquired subsidiaries that meet the criteria to be classified as held for sale on acquisition.

d. The income from continuing operations and from discontinued operations attributable to owners of the parent

The analysis in (d) may be presented either in the notes or in the statement of comprehensive income.

373 IFRS 5.34 Does the entity re-present the disclosures in IFRS 5.33 for prior periods presented in the financial statements so that the disclosures relate to all operations that are discontinued by the end of the current reporting period

374 IFRS 5.35 Does the entity classify separately in discontinued operations and disclose the nature and amount of adjustments that are made in the current period to amounts previously presented in discontinued operations that are directly related to the disposal of a discontinued operation in a prior period

Examples of circumstances in which these adjustments may arise include:

a. The resolution of uncertainties that arise from the terms of the disposal transaction, such as the resolution of purchase price adjustments and indemnification issues with the purchaser
b. The resolution of uncertainties that arise from and are directly related to the operations of the component before its disposal, such as environmental and product warranty obligations retained by the seller
c. The settlement of employee benefit plan obligations, if the settlement is directly related to the disposal transaction

375 IFRS 5.36 If the entity ceases to classify a component of the entity as held for sale, does the entity reclassify the results of operations of the component previously presented in discontinued operations under IFRS 5.33-35 and include them in income from continuing operations for all period presented

The amounts for prior periods must be described as having been represented.

376 IFRS 5.36A If an entity commits to a sale plan involving loss of control of a subsidiary and the subsidiary is a disposal group that meets the definition of a discontinued operation under IFRS 5.32, does it disclose the information required by IFRS 5.33-36 for this subsidiary

and gains or losses in determining reported segment profit or loss only if they are included in the measure of the segment's profit or loss that is used by the chief operating decision maker. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by the chief operating decision maker are reported for that segment. If amounts are allocated to reported segment profit or loss, assets or liabilities, those amounts are allocated on a reasonable basis.

391 **IFRS 8.26**
If the chief operating decision maker uses only one measure of an operating segment's profit or loss, its assets or its liabilities, is the segment information reported at those measures

[ ] Yes [ ] No [ ] N/A [ ]

Comments

392 **IFRS 8.27**
Does the entity explain the measurements of segment profit or loss, segment assets and segment liabilities for each reportable segment, by disclosing, at a minimum:

a. The basis of accounting for any transactions between reportable segments

[ ] Yes [ ] No [ ] N/A [ ]

b. The nature of any differences between the measurements of the reportable segments' profits or losses and the entity's profit or loss before income tax expense or income and discontinued operations (if not apparent from the reconciliations described in IFRS 8.28), which could include accounting policies and policies for allocation of centrally incurred costs that are necessary for an understanding of the reported segment information

[ ] Yes [ ] No [ ] N/A [ ]

c. The nature of any differences between the measurements of the reportable segments' assets and the entity's assets (if not apparent from the reconciliations described in IFRS 8.28), which could include accounting policies and policies for allocation of jointly used assets that are necessary for an understanding of the reported segment information

[ ] Yes [ ] No [ ] N/A [ ]

d. The nature of any differences between the measurements of the reportable segments' liabilities and the entity's liabilities (if not apparent from the reconciliations described in IFRS 8.28), which could include accounting policies and policies for allocation of jointly utilised liabilities that are necessary for an understanding of the reported segment information

[ ] Yes [ ] No [ ] N/A [ ]

e. The nature of any changes from prior periods in the measurement methods used to determine reported segment profit or loss and the effect, if any, of those changes on the measure of segment profit or loss

[ ] Yes [ ] No [ ] N/A [ ]

f. The nature and effect of any asymmetrical allocations to reportable segments. For example, an entity might allocate depreciation expense to a segment without allocating the related depreciable assets to that segment

[ ] Yes [ ] No [ ] N/A [ ]

**Reconciliations**

393 **IFRS 8.28**
Does the entity reconcile:

a. Total reportable segments' revenues to the entity's revenue

[ ] Yes [ ] No [ ] N/A [ ]

b. Total reportable segments' measures of profit or loss to the entity's profit or loss before tax expense (tax income) and discontinued operations

[ ] Yes [ ] No [ ] N/A [ ]

c. Total reportable segments' assets to the entity's assets if the segment assets are reported under IFRS 8.23

[ ] Yes [ ] No [ ] N/A [ ]

d. Total reportable segments' liabilities to the entity's liabilities if segment liabilities are reported under IFRS 8.23 above

[ ] Yes [ ] No [ ] N/A [ ]

e. Total reportable segments' amounts for every other material item of information disclosed to the corresponding amount for the entity

[ ] Yes [ ] No [ ] N/A [ ]

394 **IFRS 8.28**
Does the entity separately identify and describe all material reconciling items

[ ] Yes [ ] No [ ] N/A [ ]
Disclosure made  
Yes  No  N/A  Comments

**Restatement of previously reported information**

- If the entity changed the structure of its internal organisation in a manner that causes the composition of its reportable segments to change, has the comparative information for earlier periods, including interim periods, been restated if it is available and the cost to develop it is not excessive?

  - Disclosure made: Yes

- The determination of whether the information is not available and the cost to develop it is excessive is made for each individual item of disclosure. Following a change in the composition of its reportable segments, the entity discloses whether it restated the corresponding items of segment information for earlier periods.

  - Disclosure made: Yes

**Information about products and services**

- Does the entity report the revenues from external customers for each product and service, or each group of similar products and services, unless the necessary information is not available and the cost to develop it is excessive, in which case that fact is disclosed?

  - Disclosure made: Yes

- The revenues reported are based on the financial information used to produce the entity's financial statements.

- The entity-wide disclosures set out in IFRS 8.32-34 apply to all entities subject to IFRS 8, including those with a single reportable segment. The entity provides this information only to the extent that it is not already provided as part of the reportable operating segment information required by this IFRS.

**Information about geographical areas**

- Does the entity report the following geographical information, unless the necessary information is not available and the cost to develop it would be excessive:
  
  a. Revenues from external customers:
     - Attributed to the entity's country of domicile
     - Attributed to all foreign countries in total from which the entity derives revenues
     - Attributed to an individual foreign country, if material
     - The basis for attributing revenues from external customers to individual countries

  - Disclosure made: Yes

  b. Non-current assets other than financial instruments, deferred tax assets, post-employment benefit assets, and rights arising under insurance contracts:
     - Located in the entity's country of domicile
     - Located in all foreign countries in total in which the entity holds assets
     - Located in an individual foreign country, if material

  - Disclosure made: Yes

  c. If the necessary information is not available and the cost to develop it would be excessive, does the entity disclose that fact?

  - Disclosure made: No

- The amounts reported are based on the financial information that is used to produce the entity's financial statements. The entity may disclose subtotals of geographical information about groups of countries.

**Information about major customers**

- If revenues from transactions with a single external customer amount to 10% or more of the entity's revenues, does the entity disclose:
  
  a. This fact

  - Disclosure made: Yes
b. The revenues from each such customer

c. The identity of the segment or segments reporting the revenues

The entity need not disclose the identity of a major customer or the revenues that each segment reports from that customer. Under IFRS 8, a group of entities known to a reporting entity to be under common control are considered a single customer. However, judgement is required to assess whether a government (national, state, provincial, territorial, local or foreign) and entities known to the reporting entity to be under the control of that government are considered a single customer.

Property, plant and equipment

Does the entity disclose the effects of taxes on income, if any, resulting from the revaluation of property, plant and equipment in accordance with IAS 12?

For each class of property, plant and equipment, does the entity disclose:

a. The measurement bases used for determining the gross carrying amount

b. The depreciation methods used

c. The useful lives or the depreciation rates used
d. The gross carrying amount and the accumulated depreciation (aggregated with accumulated impairment losses) at the beginning and end of the period

e. A reconciliation of the carrying amount at the beginning and end of the period showing:
   ▶ Additions
   ▶ Assets classified as held for sale or included in a disposal group classified as ‘held for sale’ in accordance with IFRS 5 and other disposals
   ▶ Acquisitions through business combinations
   ▶ Increases or decreases resulting from revaluations and impairment losses recognised or reversed in other comprehensive income under IAS 36 during the reporting period
   ▶ Impairment losses recognised in profit or loss during the period under IAS 36
   ▶ Impairment losses reversed in profit or loss during the period under IAS 36
   ▶ Depreciation (whether recognised in profit or loss or as a part of the cost of other assets)
   ▶ The net exchange differences arising on the translation of the financial statements from the functional currency into a different presentation currency, including the translation of a foreign operation into the presentation currency of the reporting entity
   ▶ Other changes

A class of property, plant and equipment is a grouping of assets of a similar nature and use in an entity’s operations.

An entity discloses information on impaired property, plant and equipment under IAS 36 in addition to the information required by IAS 16.73(e)(iv)-(vi).

Does the entity disclose the following information:

a. The existence and amounts of restrictions on title, and property, plant and equipment pledged as security for liabilities

b. The amount of expenditures recognised in the carrying amount of an item of property, plant and equipment during its construction

c. The amount of contractual commitments for the acquisition of property, plant and equipment

d. If it is not disclosed separately in the statement of comprehensive income, the amount of compensation from third parties for items of property, plant and equipment that were impaired, lost or given up that is included in profit or loss

If items of property, plant and equipment are stated at revalued amounts under the revaluation model, does the entity disclose the

**New**

IAS 16.80B Does the entity disclose:

- The carrying amount of temporarily idle property, plant and equipment
- The gross carrying amount of any fully depreciated property, plant and equipment that is still in use
- The carrying amount of property, plant and equipment retired from active use and not classified as held for sale
- If the cost model is used, the fair value of property, plant and equipment, if this is materially different from the carrying amount

**405 IAS 16.80B** Does the entity present the quantitative information required by paragraph 28(f) of IAS 8 for Amendments to IAS 16 and IAS 41 Agriculture: Bearer Plants for each prior period presented?

**IAS 16.80B** In the reporting period when Amendments to IAS 16 and IAS 41 - Agriculture: Bearer Plants is first applied an entity need not disclose the quantitative information required by paragraph 28(f) of IAS 8 for the current period.

**Provisions, contingent liabilities and contingent assets**

**406 IAS 37.84** For each class of provision (comparative information is not required), does the entity disclose:

- The carrying amount at the beginning and end of the reporting period
- Additional provisions made in the reporting period, including increases to existing provisions
- Amounts used (that is, incurred and charged against the provision) during the reporting period
- Unused amounts reversed during the reporting period
- The increase during the reporting period in the discounted amount arising from the passage of time and the effect of any change in the discount rate

**407 IAS 37.85** For each class of provision, does the entity disclose:

- The nature of the obligation and the expected timing of any resulting outflows of economic benefits
- The uncertainties about the amount or timing of those outflows
- If necessary to provide adequate information, the major assumptions made concerning future events
- The amount of any expected reimbursement, stating the amount of any asset that has been recognised for that expected reimbursement

**408 IAS 37.86** Unless the possibility of any outflow in settlement is remote, does the entity disclose the following for each class of contingent liability at the end of the reporting period:

- The nature of the contingent liability
- An estimate of its financial effect, measured in accordance with the requirements for measuring provisions (under IAS 37.36-52)
- The uncertainties relating to the amount or timing of any outflow
- The possibility of any reimbursement
- If the entity does not disclose any of the information in (a)-(d), the

**Related parties**

**IAS 24.3** The disclosure requirements of IAS 24 Related Party Disclosures for related party transactions and outstanding balances, including commitments, apply for consolidated and separate financial statements of a parent or investors with joint control of, or significant influence over, an investee presented under IFRS 10 or IAS 27. The standard also applies to individual financial statements.

**IAS 24.4** An entity discloses related party transactions and outstanding balances with other entities in a group in the entity’s separate financial statements. Intra-group related party transactions and outstanding balances are eliminated in the preparation of consolidated financial statements of the group except for those between an investment entity and its subsidiaries measured at fair value through profit or loss.

**IAS 24.24** An entity may disclose items of a similar nature in aggregate except when separate disclosure is necessary for an understanding of the effects of related party transactions on the financial statements of the entity.

**IAS 24.12** Does the entity disclose relationships between parents and subsidiaries, irrespective of whether there are transactions between
The requirement to disclose related party relationships between a parent and its subsidiaries is in addition to the disclosure requirements in IAS 27 and IFRS 12 Disclosure of Interests in Other Entities.

Does the entity disclose:

- The name of the entity’s parent
- If different, the ultimate controlling party
- Or
- If neither the entity’s parent nor the ultimate controlling party produces consolidated financial statements available for public use, the name of the next most senior parent that does so

Does the entity disclose key management personnel compensation in total and for each of the following categories:

- Short-term employee benefits
- Post-employment benefits
- Other long-term benefits
- Termination benefits
- Share-based payments

If an entity obtains key management personnel services from another entity (the ‘management entity’), the entity is not required to apply IAS 24.17 to the compensation paid or payable by the management entity to the management entity’s employees or directors.

If there are related party transactions during the reporting period covered by the financial statements, does the entity disclose the following information:

- The nature of the related party relationship
- Information about the transactions and outstanding balances, including commitments, necessary for an understanding of the potential effect of the relationship on the financial statements, including the following disclosures:
  - The amount of the transactions
  - The amount of outstanding balances, including commitments
  - Their terms and conditions, including whether they are secured and the nature of the consideration to be provided in settlement
  - Details of any guarantees given or received
  - Provisions for doubtful debts related to the amount of outstanding balances
  - The expense recognised during the reporting period for bad or doubtful debts due from related parties

Does the entity disclose the information required by IAS 24.18 separately for each of the following categories:

- The parent
- Entities with joint control of or significant influence over the entity
- Subsidiaries
- Associates
- Joint ventures in which the entity is a venturer
- Key management personnel of the entity or its parent
- Other related parties

Does the entity disclose the amounts incurred by the entity for the provision of key management personnel services that are provided by a separate management entity

Does the entity disclose, for example, the following transactions if they are with a related party:

- Purchases or sales of goods (finished or unfinished)
- Purchases or sales of property and other assets
- Rendering or receiving of services
- Leases
- Transfer of research and development
f. Transfer under licence agreements  
g. Transfers under finance arrangements (including loans and equity contributions in cash or in kind)  
h. Provision of guarantees or collateral  
i. Commitments to do something if a particular event occurs or does not occur in the future, including executory contracts (recognised and unrecognised)  
j. Settlement of liabilities on behalf of the entity or by the entity on behalf of that related party

| Disclosures that related party transactions were made on terms equivalent to those that prevail in arm's length transactions are made only if such terms can be substantiated. |
|---|---|---|---|

If the entity applies the exemption in IAS 24.25, does the entity disclose the following about transactions and outstanding balances, including commitments:

| a. The name of the government and the nature of its relationship with the reporting entity (i.e., control, joint control or significant influence) |
|---|---|---|---|
| b. The following information in sufficient detail to enable users of the entity's financial statements to understand the effect of related party transactions on its financial statements: |
|   The nature and amount of each individually significant transaction |
|   For other transactions, which are collectively, but not individually significant, a qualitative or quantitative indication of their extent |

In using its judgement to determine the level of detail to be disclosed in accordance with the requirements in IAS 24.26(b) above, the reporting entity considers the closeness of the related party relationship and other factors relevant in establishing the level of significance of the transaction such as whether it is:

- Significant in terms of size
- Carried out on non-market terms
- Outside normal day-to-day business operations, such as the purchase and sale of businesses
- Disclosed to regulatory or supervisory authorities
- Reported to senior management
- Subject to shareholder approval

### Revenue

Does the entity disclose:

| a. The accounting policies for recognising revenue |
|---|---|---|---|
| b. The methods used to determine the stage of completion of transactions involving the rendering of services |
| c. The amount of each significant category of revenue recognised during the period including revenue arising from: |
|   The sale of goods |
|   The rendering of services |
|   Interest |
|   Royalties |
|   Dividends |
| d. The amount of revenue arising from exchanges of goods or services included in each significant category of revenue |

Does the entity disclose any contingent liabilities and contingent assets that may arise from items such as warranty costs, claims, penalties or possible losses in accordance with IAS 37

### Service concession arrangements (IFRIC 12)

The entity (as an Operator) may enter into an arrangement with another entity (the Grantor) to provide services that give the public access to major economic and social facilities. The entity considers all aspects of a service concession arrangement in determining the appropriate disclosures. If the entity is an Operator or a Grantor, does the entity disclose the following for each service concession
arrangement or in aggregate each class of service concession arrangements:

a. A description of the arrangement

b. Significant terms of the arrangement that may affect the amount, timing and certainty of future cash flows such as the period of the concession, re-pricing dates and the basis upon which re-pricing or re-negotiation is determined

c. The nature and extent (for example, quantity, period, or amount) of the following:
   ▶ Rights to use specified assets
   ▶ Obligations to provide or rights to expect provision of services
   ▶ Obligations to acquire or build items of property, plant and equipment
   ▶ Obligations to deliver or rights to receive specified assets at the end of the concession period
   ▶ Renewal and termination options
   ▶ Other rights and obligations

d. Changes in the arrangement occurring during the reporting period

e. How the service arrangement is classified

f. The revenue and profits or losses recognised in the reporting period on exchanging construction services for a financial asset or an intangible asset

**Share-based payment**

Does the entity disclose information that enables users of the financial statements to understand the nature and extent of a share-based payment arrangement in existence during the period by disclosing, as a minimum, the following:

a. A description of each type of share-based payment arrangement that existed at any time during the period including the general terms and conditions of each arrangement such as:
   ▶ The vesting requirements
   ▶ The maximum term of options granted
   ▶ The method of settlement (for example, whether in cash or equity)

b. The number and weighted average exercise prices of share options for each of the following groups of options:
   ▶ Outstanding at the beginning of the period
   ▶ Granted during the period
   ▶ Forfeited during the period
   ▶ Exercised during the period
   ▶ Expired during the period
   ▶ Outstanding at the end of the period
   ▶ Exercisable at the end of the period

c. For share options exercised during the reporting period, the weighted average share price at the date of exercise, or if options were exercised on a regular basis throughout the reporting period, the entity may instead disclose the weighted average share price during the reporting period

d. For share options outstanding at the end of the reporting period, the following information. Where the range of exercise prices is wide, the outstanding options should be divided into ranges that are meaningful for assessing the number and timing of additional shares that may be issued and the cash that may be received upon exercise of those options:
   ▶ The range of exercise prices
   ▶ The weighted average remaining contractual life

---

An entity with substantially similar types of share-based payment arrangements may aggregate the information in IFRS 2.45 above, unless separate disclosure of each arrangement is necessary to enable users of the financial statements to understand the nature and extent of share-based payment arrangements that existed during the reporting period.

429  
**IFRS 2.46**  
If the entity measured the fair value of goods or services received as consideration for equity instruments of the entity indirectly, by reference to the fair value of the equity instruments granted, does the entity disclose information that enables users of the financial statements to understand how the fair value of the equity instruments granted during the period was determined by disclosing at least the following:

a. For share options granted during the period, the weighted average fair value of those options at the measurement date and information on how that fair value was measured, including:

- The option pricing model used
- The inputs to that model, including:
  - The weighted average share price
  - Exercise price
  - Expected volatility
  - Option life
  - Expected dividends
  - The risk-free interest rate
  - Any other inputs to the model, including the method used and the assumptions made to incorporate the effects of expected early exercise
- How expected volatility was determined, including an explanation of the extent to which expected volatility was based on historical volatility
- Whether and how any other features of the option grant were incorporated into the measurement of fair value, such as market condition

430  
**IFRS 2.46**  
**IFRS 2.48**  
If the entity measured directly the fair value of goods or services received during the period, does the entity disclose information that enables users of the financial statements to understand how the fair value of the goods and services received during the period was determined (for example, whether fair value was measured at a market price for those goods or services)

431  
**IFRS 2.49**  
If the equity-settled share-based payment transactions involve parties other than employees, and the entity determines that it cannot estimate the fair value of the goods and services received reliably, does the entity disclose:

a. That fact
b. Why the entity rebutted the presumption

Please note that this fair value is measured in terms of IFRS 2 and not IFRS 13.
Does the entity disclose information that enables users of the financial statements to understand the effect of share-based payment transactions on the entity’s profit or loss for the period and on its financial position, by disclosing at least the following:

a. The total expense recognised for the period (relating to share-based payment transactions in which the goods or services received do not qualify for recognition as assets and hence are recognised immediately as an expense), including separate disclosure of that portion of the total expense that arises from transactions accounted for as equity-settled share-based payment transactions

b. For liabilities arising from share-based payment transactions:
   ▶ The total carrying amount at the end of the period
   ▶ The total intrinsic value at the end of the period of liabilities for which the counterparty’s right to cash or other assets had vested by the end of the period (for example, vested share appreciation rights)

If the entity applies Amendments to IFRS 2 – Classification and Measurement of Share-based Payment Transactions early and has classified any share-based payment transactions as equity-settled under IFRS 2.33F, does it disclose an estimate of the amount that it expects to transfer to the tax authority to settle the employee’s tax obligation when it is necessary to inform users about the future cash flow effects associated with the share-based payment arrangement

If not disclosed elsewhere in information published with the financial statements, does the entity describe:

a. The nature of its activities involving each group of biological assets
b. Non-financial measures or estimates of the physical quantities of:
   ▶ Each group of the entity’s biological assets at the end of the period
Does the entity provide the fair value measurement disclosures required by IFRS 13?

Yes No N/A Comments

Does the entity disclose:

- The existence and carrying amounts of biological assets whose title is restricted
- The carrying amounts of biological assets pledged as security for liabilities
- The amount of commitments for the development or acquisition of biological assets
- Financial risk management strategies related to agricultural activity

Does the entity provide a reconciliation of changes in the carrying amount of biological assets between the beginning and the end of the current period that includes at least:

- The gain or loss arising from changes in fair value less costs to sell
- Increases due to purchases
- Decreases due to sales and biological assets classified as held for sale (or included in a disposal group that is classified as held for sale) in accordance with IFRS 5
- Decreases due to harvest
- Increases resulting from business combinations
- Net exchange differences arising on the translation of financial statements into a different presentation currency and on translation of a foreign operation into the presentation currency of the reporting entity
- Other changes

Does the entity disclose the nature and amount of material items of income or expense that result from climatic, disease, or other natural risks?

Examples of such an event include an outbreak of a virulent disease, a flood, a severe drought or frost, and a plague of insects.

Does the entity elect to disclose, by group or otherwise, the amount of change in fair value less costs to sell included in profit or loss due to physical changes and due to price changes?

Biological transformation results in a number of types of physical change – growth, degeneration, production, and procreation, each of which is observable and measurable. Each of those physical changes has a direct relationship to future economic benefits. A change in fair value of a biological asset due to harvesting is also a physical change.

Disclosure when fair value cannot be measured reliably

There is a presumption that fair value can be measured reliably for a biological asset. However, that presumption can be rebutted only on initial recognition for a biological asset for which quoted market prices are not available and for which alternative fair value measurements are determined to be clearly unreliable. In such a case, that biological asset shall be measured at its cost less any accumulated depreciation and any accumulated impairment losses. Once the fair value of such a biological asset becomes reliably measurable, an entity shall measure it at its fair value less costs to sell. Once a non-current biological asset meets the criteria to be classified as held for sale (or is included in a disposal group that is classified as held for sale) in accordance with IFRS 5, it is presumed that fair value can be measured reliably.

If the entity measures biological assets at their cost less any accumulated depreciation and any accumulated impairment losses at the end of the period (because fair value cannot be measured reliably), does the entity disclose the following information for such biological assets:

- A description of the biological assets
- An explanation of why fair value cannot be measured reliably
- The range of estimates within which fair value is highly likely to lie, if possible
- The depreciation method used

</tbody>
</table>
IAS 11.44 The gross amount due to customers for contract work is the net amount of:
  ▶ Costs incurred plus recognised profits less:
  ▶ The sum of recognised losses and progress billings
for all contracts in progress for which progress billings exceed costs incurred plus recognised profits (less recognised losses)

450 IAS 11.39 Does the entity disclose:
  a. The amount of contract revenue recognised as revenue in the period
  b. The methods used to determine the contract revenue recognised in the period
  c. The methods used to determine the stage of completion of contracts in progress

451 IAS 11.40 Does the entity disclose the following for contracts in progress at the end of the reporting period:
  a. The aggregate amount of costs incurred and recognised profits (less recognised losses) to date
  b. The amount of advances received
  c. The amount of retentions

IAS 11.41 Retentions are amounts of progress billing that are not paid until the satisfaction of conditions specified in the contract for payment of such amounts or until defects have been rectified. Progress billings are amounts billed for work performed on a contract whether or not they have been paid by the customer. Advances are amounts received by the contractor before the related work is performed.

452 IAS 11.45 Does the entity disclose any contingent assets and contingent liabilities in connection with construction contracts under IAS 37

Agreements for the construction of real estate (IFRIC 15)

453 IFRIC 15.20 IAS 18.14 If the entity recognises revenue using the percentage of completion method for agreements that meet all the criteria in IAS 18.14 continuously as construction progresses, does the entity disclose:
  a. How it determines which agreements meet all the criteria in IAS 18.14 continuously as construction progresses
  b. The amount of revenue arising from such agreements in the period
  c. The methods used to determine the stage of completion of agreements in progress

454 IFRIC 15.21 For the agreements described in IFRIC 15.20 above that are in progress at the end of the reporting period, does the entity disclose:
  a. The aggregate amount of costs incurred and recognised profits (less recognised losses) to date
  b. The amount of advances received

Extractive industries

Exploration and evaluation expenditure

IFRS 6.1 The objective of IFRS 6 Exploration for and Evaluation of Mineral Resources is to specify the financial reporting for the exploration for and evaluation of mineral resources.

455 IFRS 6.15 Does the entity classify exploration and evaluation assets as tangible or intangible according to the nature of the assets acquired and apply the classification consistently

456 IFRS 6.17 Does the entity stop classifying exploration and evaluation assets as such when the technical feasibility and commercial viability of extracting a mineral resource are demonstrable

457 IFRS 6.18 IAS 36.126 Does the entity present and disclose any impairment loss relating to exploration and evaluation assets in accordance with IAS 36

458 IFRS 6.23 IFRS 6.24 Does the entity disclose the following information that identifies and explains the amounts recognised in its financial statements arising from the exploration for and evaluation of mineral resources:
  a. Its accounting policies for exploration and evaluation expenditures including the recognition of exploration and evaluation assets
  b. The following amounts arising from the exploration for and

| 460 IFRS 4.36 | | | | | Does the insurer identify and explain the amounts in its financial statements arising from insurance contracts, by disclosing: 
| | a. | | | | Its accounting policies for insurance contracts and related assets, liabilities, income and expense |
| | b. | | | | The recognised assets, liabilities, income and expense (and, if it presents its statement of cash flow using the direct method, cash flows) arising from insurance contracts |
| | c. | | | | If the insurer is a cedant: 
| | | | | Gains and losses recognised in profit or loss on buying reinsurance |
| | | | | If the cedant defers and amortises gains and losses arising on buying reinsurance, the amortisation for the period and the amounts remaining unamortised at the beginning and end of the period |
| | d. | | | | The process used to determine the assumptions that have the greatest effect on the measurement of the recognised amounts described in (b) and (c), including quantifying those assumptions, if practicable |
| | e. | | | | The effect of changes in assumptions used to measure insurance assets and insurance liabilities, showing separately the effect of each change that has a material effect on the financial statements |
| | f. | | | | Reconciliations of changes in insurance liabilities, reinsurance assets and, if any, related deferred acquisition costs |
| 461 IFRS 4.35 | The interest does not need to be calculated using the effective interest method. |
| 462 IFRS 4.38 | | | | | Does the insurer enable users of its financial statements to evaluate the nature and extent of risks arising from insurance contracts by disclosing: 
| | a. | | | | Its objectives, policies and processes for managing risks arising from insurance contracts and the methods used to manage those risks |
| | b. | | | | Information about insurance risk (both before and after risk mitigation by reinsurance), including information about: 
| | | | | The sensitivity to insurance risk (see IFRS 4.39A) |
| | | | | Concentrations of insurance risk, including how management determines concentrations and a description of the shared characteristic that identifies each concentration (for example, the type of insured event, geographical area, or currency) |
| | | | | Actual claims compared with previous estimates (i.e, claims development) |
| | | | | | The disclosure about claims development goes back to the period when the earliest material claim arose, for which there is still uncertainty about the amount and timing of the claims payments, but need not go back more than 10 years. An insurer need not disclose this information for claims for which uncertainty about the amount
and timing of claims payments is typically resolved within one year.

The entity need not disclose information about claims development that occurred earlier than five years before the end of the first financial year in which it applies this IFRS. Furthermore, if it is impracticable to prepare information about claims development that occurred before the beginning of the earliest reporting period for which an entity presents full comparative information that complies with this IFRS, the entity discloses that fact.

c. Information about credit risk, liquidity risk, and market risk that IFRS 7.31-42 would require if the insurance contracts were within the scope of IFRS 7

| IFRS 4.44       |     |    |     |          |

An insurer need not disclose the maturity analysis required by IFRS 7.39(a) and (b) if it discloses the estimated timing of the net cash outflows resulting from recognised insurance liabilities instead. This may be an analysis of the amounts, by estimated timing, recognised in the statement of financial position.

If an insurer uses an alternative method to manage sensitivity to market conditions, such as an embedded value analysis, it may use that sensitivity analysis to meet the requirement in IFRS 7.40(a). Such an insurer also provides the disclosures required by IFRS 7.41.

d. Information about exposures to market risk arising from embedded derivatives contained in a host insurance contract if the insurer is not required to, and does not, measure the embedded derivatives at fair value

To comply with the requirements to disclose information about the sensitivity to insurance risk does the entity disclose either:

a. Quantitative information about sensitivity, which comprises:
   - A sensitivity analysis that shows how profit or loss and equity would have been affected had changes in the relevant risk variable that were reasonably possible at the end of the reporting period occurred
   - The methods and assumptions used in preparing the sensitivity analysis
   - Any changes from the previous period in the methods and assumptions used

b. Qualitative information about sensitivity, and information about those terms and conditions of insurance contracts that have a material effect on the amount, timing and uncertainty of the insurer's future cash flows

Lease disclosures by lessors

If the entity adopted IFRS 16 Leases, please refer to the ‘New pronouncements: IFRS 16’ section.

Finance leases

The disclosure requirements of IFRS 7 also apply to finance leases.

Does the entity present assets held under a finance lease in the statement of financial position as a receivable at an amount equal to the net investment in the lease?

For finance leases, does the entity disclose:

a. A reconciliation between the gross investment in the lease at the end of the reporting period, and the present value of minimum lease payments receivable at the end of the reporting period

b. The gross investment in the lease and the present value of minimum lease payments receivable at the end of the reporting period, for each of the following periods:
   - Not later than one year
   - Later than one year and not later than five years
   - Later than five years

c. Unearned finance income

</tbody>
</table>

**IFRIC 4** provides guidance for determining whether an arrangement that does not take the legal form of a lease, but conveys a right to use an asset is, or contains, a lease that is accounted for in accordance...
with IAS 17. In applying IAS 17, the entity separates lease payments from other consideration required by the arrangement.

**Rate-regulated activities**

The scope of IFRS 14 is limited to first-time adopters that conduct rate-regulated activities and recognise regulatory deferral account balances in their financial statements in accordance with their previous GAAP, as defined in IFRS 1 First-time Adoption of International Financial Reporting Standards (i.e., the accounting basis used by a first-time adopter immediately before adopting IFRS). An entity which recognised regulatory deferral account balances by electing to apply IFRS 14 must apply IFRS 14 in its financial statements for subsequent periods.

**Presentation**

New 472 **IFRS 14.20** Does the entity present separate line items in the statement of financial position for

- The total of all regulatory deferral account debit balances
- The total of all regulatory deferral account credit balances

**IFRS 14.21** When an entity presents current and non-current assets, and current and non-current liabilities, as separate classifications in its statement of financial position, it shall not classify the totals of regulatory deferral account balances as current or non-current. Instead, the separate line items required by IFRS 14.20 shall be distinguished from the assets and liabilities that are presented in accordance with other standards by the use of sub-totals, which are drawn before the regulatory deferral account balances are presented.

New 473 **IFRS 14.22** Does the entity present, in the other comprehensive income section of the statement of profit or loss and other comprehensive income, the net movement in all regulatory deferral account balances for the reporting period that relate to items recognised in other comprehensive income

New 474 **IFRS 14.22** Does the entity use separate line items for the net movement, in accordance with other standards

- Related to the items that will not be reclassified subsequently to profit or loss
- Related to the items that will be reclassified subsequently to profit or loss when specific conditions are met

New 475 **IFRS 14.23** Does the entity present a separate line item in the profit or loss section of the statement of profit or loss and other comprehensive income, or in the separate statement of profit or loss, for the remaining net movement in all regulatory deferral account balances for the reporting period, excluding movements that are not reflected in profit or loss, such as amounts acquired

**IFRS 14.23** This separate line item above shall be distinguished from the income and expenses that are presented in accordance with other standards by the use of a sub-total, which is drawn before the net movement in regulatory deferral account balances.

New 476 **IFRS 14.24** When an entity recognises a deferred tax asset or a deferred tax liability as a result of recognising regulatory deferral account balances, does the entity present the resulting deferred tax asset (liability) and the related movement in that deferred tax asset (liability) with the related regulatory deferral account balances and movements in those balances, instead of within the total presented in accordance with IAS 12 for deferred tax assets (liabilities) and the tax expense (income) (see IFRS 14.B9–B12)

New 477 **IFRS 14.B11** Instead of applying IAS 12, does the entity present the deferred tax asset (liability) that arises as a result of recognising regulatory deferral account balances either:

- With the line items that are presented for the regulatory deferral account debit balances and credit balances
- Or
- As a separate line item alongside the related regulatory deferral account debit balances and credit balances
### Disclosure Checklist

#### New 478 IFRS 14.B12

Instead of applying IAS 12, does the entity present the movement in the deferred tax asset (liability) that arises as a result of recognising regulatory deferral account balances either:

a. With the line items that are presented in the statement(s) of profit or loss and other comprehensive income for the movements in regulatory deferral account balances

Or

b. As a separate line item alongside the related line items that are presented in the statement(s) of profit or loss and other comprehensive income for the movements in regulatory deferral account balances

#### New 479 IFRS 14.25

When an entity presents a discontinued operation or a disposal group in accordance with IFRS 5, does the entity present any related regulatory deferral account balances and the net movement in those balances, as applicable, with the regulatory deferral account balances and movements in those balances, instead of within the disposal groups or discontinued operations (see IFRS 14.B19–B22)

#### New 480 IFRS 14.B20

Instead of applying IFRS 5.33, does the entity present the movement in regulatory deferral account balances that arose from the rate-regulated activities of the discontinued operation either

a. Within the line item that is presented for movements in the regulatory deferral account balances related to profit or loss

Or

b. As a separate line item alongside the related line item that is presented for movements in the regulatory deferral account balances related to profit or loss

#### New 481 IFRS 14.B21

Instead of applying IFRS 5.38, does the entity present the total of the regulatory deferral account debit balances and credit balances that are part of the disposal group either

a. Within the line items that are presented for the regulatory deferral account debit balances and credit balances

Or

b. As separate line items alongside the other regulatory deferral account debit balances and credit balances

#### New 482 IFRS 14.B22

If the entity chooses to include the regulatory deferral account balances and movements in those balances that are related to the disposal group or discontinued operation within the related regulated deferral account line items, does the entity disclose them separately as part of the analysis of the regulated deferral account line items described by IFRS 14.33

#### New 483 IFRS 14.26

When an entity presents earnings per share in accordance with IAS 33 Earnings per Share, does the entity present additional basic and diluted earnings per share, which are calculated using the earnings amounts required by IAS 33 but excluding the movements in regulatory deferral account balances (IFRS 14.B13–B14)

#### New 484 IFRS 14.B14

For each earnings per share amount presented in accordance with IAS 33, does the entity apply IFRS 14 present additional basic and diluted earnings per share amounts that are calculated in the same way, except that those amounts shall exclude the net movement in the regulatory deferral account balances. Consistent with the requirement in IAS 33.73, does the entity present the earnings per share required by IFRS 14.26 with equal prominence to the earnings per share required by IAS 33 for all periods presented

#### New 485 IFRS 14.27

If the entity elects to apply IFRS 14, does it disclose information that enables users to assess:

a. The nature of, and the risks associated with, the rate regulation that establishes the price(s) that the entity can charge customers for the goods or services it provides

b. The effects of that rate regulation on its financial position, financial performance and cash flows

#### IFRS 14.29

To meet the disclosure objective in IFRS 14.27, the entity shall consider all of the following:

a. The level of detail that is necessary to satisfy the disclosure

**Explanation of activities subject to rate regulation**

*IFRS 14.28*

If any of the disclosures set out in IFRS 14.30–36 are not considered relevant to meet the objective in IFRS 14.27, they may be omitted from the financial statements.

**New 486** *IFRS 14.28*

If the disclosures provided in accordance with IFRS 14.30–36 are insufficient to meet the objective in IFRS 14.27, does the entity disclose additional information that is necessary to meet that objective?

- Box: No

**New 487** *IFRS 14.30*

To help users of the financial statements assess the nature of, and the risks associated with, the entity’s rate-regulated activities, does the entity disclose for each type of rate-regulated activity:

- A brief description of the nature and extent of the rate-regulated activity and the nature of the regulatory rate-setting process
- The identity of the rate regulator(s)
  - If the rate regulator is a related party (as defined in IAS 24 Related Party Disclosures), does the entity disclose that fact, together with an explanation of how it is related
- How the future recovery of each class (i.e., each type of cost or income) of regulatory deferral account debit balance or reversal of each class of regulatory deferral account credit balance is affected by risks and uncertainty, for example:
  - Demand risk (e.g., changes in consumer attitudes, the availability of alternative sources of supply or the level of competition)
  - Regulatory risk (e.g., the submission or approval of a rate-setting application or the entity’s assessment of the expected future regulatory actions)
  - Other risks (e.g., currency or other market risks)

**IFRS 14.31**

The disclosures required by IFRS 14.30 shall be given in the financial statements either directly in the notes or incorporated by cross-reference from the financial statements to some other statement, such as a management commentary or risk report, that is available to users of the financial statements on the same terms as the financial statements and at the same time. If the information is not included in the financial statements directly or incorporated by cross-reference, the financial statements are incomplete.

**Explanation of recognised amounts**

*New 488* *IFRS 14.32*

Does the entity disclose the basis on which regulatory deferral account balances are recognised and derecognised, and how they are measured initially and subsequently, including how regulatory deferral account balances are assessed for recoverability and how any impairment loss is allocated?

- Box: No

*New 489* *IFRS 14.33*

For each type of rate-regulated activity, does the entity disclose the following information for each class of regulatory deferral account balance:

- A reconciliation of the carrying amount at the beginning and the end of the period in a table, unless another format is more appropriate. The entity shall apply judgement in deciding the level of detail necessary (see IFRS 14.28–29), but the following components would usually be relevant:
  - The amounts that have been recognised in the current period in the statement of financial position as regulatory deferral account balances
  - The amounts that have been recognised in the statement(s) of profit or loss and other comprehensive income relating to balances that have been recovered (sometimes described as amortised) or reversed in the current period
  - Other amounts, separately identified, that affected the...

- Assets at the end of the period suitably classified
- The basis of valuation of assets
- Details of any single investment exceeding either 5% of the net assets available for benefits or 5% of any class or type of security
- Details of any investment in the employer
- Liabilities other than the actuarial present value of promised retirement benefits

b. A statement of changes in net assets available for benefits showing the following:
- Employer contributions
- Employee contributions
- Investment income such as interest and dividends
- Other income
- Benefits paid or payable (analysed, for example, as retirement, death and disability benefits and lump sum payments)
- Administrative expenses
- Other expenses
- Taxes on income
- Profits and losses on disposal of investments and changes in value of investments
- Transfers from and to other plans

c. A description of the funding policy

d. A summary of significant accounting policies

e. A description of the plan and the effect of any changes in the plan during the period

498 IAS 26.36

Does the entity disclose in the report of a retirement benefit plan either as part of the financial statements or in a separate report, a description of the plan, which may contain the following:

a. The names of the employers and the employee groups covered

b. The number of participants receiving benefits

c. The number of other participants, classified as appropriate

d. The type of plan - defined contribution

e. A note as to whether participants contribute to the plan

f. A description of the retirement benefits promised to participants

g. A description of any plan termination terms

h. Changes in items (a)-(g) during the period covered by the report

499 IAS 26.32

If plan investments are held for which an estimate of fair value is not possible, does the entity disclose the reason it does not use fair value

500 IAS 26.16

Do the financial statements of a defined contribution plan contain:

a. The significant activities for the period and the effect of any changes relating to the plan, and its membership and terms and conditions

b. Statements reporting on the transactions and investment performance for the period and the financial position of the plan at the end of the period

c. A description of the investment policies

Defined benefit plans

IAS 26.28

For defined benefit plans, information is presented in one of the following formats, which reflect different practices in the disclosure and presentation of actuarial information:

a. A statement is included in the financial statements of the plan that shows the net assets available for benefits, the actuarial present value of promised retirement benefits, and the resulting excess or deficit. The financial statements of the plan also contain statements of changes in net assets available for benefits and changes in the actuarial present value of promised retirement benefits. The financial statements of the plan may be accompanied by a separate actuary's report supporting the actuarial present
b. Financial statements of the plan include a statement of net assets available for benefits and a statement of changes in net assets available for benefits. An entity discloses the actuarial present value of promised retirement benefits. The financial statements of the plan may be accompanied by a report from an actuary supporting the actuarial present value of promised retirement benefits. And

c. Financial statements of the plan include a statement of net assets available for benefits and a statement of changes in net assets available for benefits with the actuarial present value of promised retirement benefits contained in a separate actuarial report.

Do the financial statements of the retirement benefit plan contain the following information:

a. A statement of net assets available for benefits disclosing:
   - Assets at the end of the period suitably classified
   - The basis of valuation of assets
   - Details of any single investment exceeding either 5% of the net assets available for benefits or 5% of any class or type of security
   - Details of any investment in the employer
   - Liabilities other than the actuarial present value of promised retirement benefits

b. A statement of changes in net assets available for benefits showing the following:
   - Employer contributions
   - Employee contributions
   - Investment income such as interest and dividends
   - Other income
   - Benefits paid or payable (analysed, for example, as retirement, death and disability benefits and lump sum payments)
   - Administrative expenses
   - Other expenses
   - Taxes on income
   - Profits and losses on disposal of investments and changes in value of investments
   - Transfers from and to other plans

c. A description of the funding policy

d. A summary of significant accounting policies

e. A description of the significant actuarial assumptions made to calculate the actuarial present value of promised retirement benefits

f. A description of the method used to calculate the actuarial present value of promised retirement benefits

g. The actuarial present value of promised retirement benefits (which may distinguish between vested benefits and non-vested benefits) based on the benefits promised under the terms of the plan, on service rendered to date, and which uses either current salary levels or projected salary levels

h. A description of the plan and the effect of any changes in the plan during the period

Does the entity disclose in the report of a retirement benefit plan either as part of the financial statements or in a separate report, a description of the plan, which may contain the following:

a. The names of the employers and the employee groups covered

b. The number of participants receiving benefits

c. The number of other participants, classified as appropriate

d. The type of plan – defined benefit

e. A note as to whether participants contribute to the plan

f. A description of the retirement benefits promised to participants

**Condensed interim reporting**

IAS 34 does not mandate whether, how frequently, or how soon after the end of an interim period, an entity publishes interim financial reports. However, IAS 34 applies if the entity publishes an interim financial report in accordance with IFRS.

**IAS 34.9**

If the entity publishes a complete set of financial statements in its interim financial report, the form and content of those statements conform to the requirements of IAS 1 for a complete set of financial statements. Other IFRS specify required disclosures in financial statements. In that context, “financial statements” means complete sets of financial statements of the type normally included in an annual financial report and sometimes included in other reports. The disclosures required by those other IFRS are not required if the entity's interim financial report includes only condensed financial statements and selected explanatory notes rather than a complete set of financial statements. Therefore, this section of the checklist contains only those interim disclosures that are specifically required by IFRS for condensed financial statements. Consistent with IAS 34.6, any disclosures that would duplicate the disclosure contained in the most recent annual
<table>
<thead>
<tr>
<th>Disclosure made</th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
</table>

Financial statements, such as details of accounts that have not changed significantly in amount since the end of the most recently completed fiscal year, may be omitted. However, consistent with the principles of the Conceptual Framework and IAS 34.15, disclosure must be provided for events subsequent to the end of the most recent annual reporting period that have a material effect on the interim financial statements. For example, disclosures must address significant changes in accounting policies and methods, estimates used in the preparation of financial statements, status of long-term contracts, capitalisation (including significant new borrowings or modification of existing financing arrangements) and the reporting entity resulting from business combinations or dispositions.

IAS 34.19
The entity does not describe an interim financial report as complying with IFRS unless it complies with all of the requirements of each IFRS.

IAS 34.43
IAS 34.43 and IAS 34.44 provide guidance for reporting a change in accounting policy in interim financial reports.

**Components of condensed interim financial statements**

510 IAS 34.19
If the entity's interim financial report complies with IAS 34, does the entity disclose that fact?

511 IAS 34.8
Do the interim financial statements include at least the following components:

a. A condensed statement of financial position
b. A condensed statement of profit or loss and other comprehensive income as either:
   - A condensed single statement
   - Or
   - A condensed separate statement of profit or loss and a condensed statement presenting comprehensive income

IAS 34.8A
If the entity presents items of profit or loss in a separate statement as described in IAS 1.10A, it shall present interim condensed information from that statement.

c. A condensed statement of changes in equity
d. A condensed statement of cash flows
e. Selected explanatory notes

512 IAS 34.10
The format of the condensed financial statements is consistent with the format presented in the annual accounts. Do the condensed financial statements include, at a minimum:

a. Each of the headings and subtotals that were included in its most recent annual financial statements
b. Additional line items or notes whose omission would make the condensed interim financial statements misleading

513 IAS 34.11
IAS 33.2
If the entity is within the scope of IAS 33 Earnings per Share, does the entity present basic and diluted earnings per share in the statement that presents profit or loss (which may be a separate income statement)?

IAS 34.11A
If the entity presents items of profit or loss in a separate statement as described in IAS 1.10A, it presents basic and diluted earnings per share in that statement.

**Periods to be included**

514 IAS 34.20
Does the entity include in interim financial reports (condensed or complete) the following statements:

a. A statement of financial position:
   - As of the end of the current interim period
   - As of the end of the immediately preceding financial year
b. A statement of profit or loss and other comprehensive income. As permitted by IAS 1, an interim report may present profit or loss and other comprehensive income in separate statements:
   - For the current interim period
   - For the same current interim period of the immediately preceding financial year
   - Cumulatively for the current financial year to date
   - For the same year to date current interim period of the
Disclosure made
Yes No N/A Comments

c. A statement showing changes in equity:
   ▶ Cumulatively for the current financial year to date
   ▶ For the comparable year-to-date period of the immediately preceding financial year

d. A statement of cash flows:
   ▶ Cumulatively for the current financial year to date
   ▶ For the comparable year-to-date period of the immediately preceding financial year

If the entity's business is highly seasonal, the entity is encouraged to disclose:

a. Financial information for the 12 months ending on the interim reporting period

b. Comparative information for the prior 12-month period

Does the entity also disclose any significant events or transactions of the current interim reporting period or financial year-to-date reporting period such as (Please note that the list below is not exhaustive):

a. The write-down of inventories to net realisable value and the reversal of such a write-down

b. Recognition of a loss from the impairment of financial assets, property, plant, and equipment, intangible assets, or other assets, and the reversal of such an impairment loss

c. The reversal of any provisions for the costs of restructuring

d. Acquisitions and disposals of items of property, plant, and equipment

e. Commitments for the purchase of property, plant, and equipment

f. Litigation settlements

g. Corrections of prior period errors

h. Changes in the business or economic circumstances that affect the fair value of the entity's financial assets and financial liabilities, whether those assets or liabilities are recognised at fair value or amortised cost

i. Any loan default or breach of a loan agreement that has not been remedied on or before the end of the reporting period

j. Related party transactions

k. Transfers between levels of the fair value hierarchy used in measuring the fair value of financial instruments

l. Changes in the classification of financial assets as a result of a change in the purpose or use of those assets

m. Changes in contingent liabilities or contingent assets

n. Recognition of a loss from the impairment of assets arising from contracts with customers if the entity adopts IFRS 15 early

An entity must include in its interim financial report, an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the entity since the end of the last annual reporting period. Information disclosed in relation to those events and transactions must update the relevant information presented in the most recent annual financial report.

Does the entity disclose its accounting policy for impairment losses in relation to goodwill recognised in an interim period

New

Does the entity disclose the following information in the notes to its interim financial statements or elsewhere in the interim financial report (the information is normally reported on a financial year-to-date basis):

The following disclosures shall be given either in the interim financial statements or incorporated by cross-reference from the interim financial statements to some other statement (such as management commentary or risk report) that is available to users of the financial statements on the same terms as the interim financial statements and at the same time. If users of the financial statements do not have
access to the information incorporated by cross-reference on the same terms and at the same time, the interim financial report is incomplete.

Disclosure made

Yes  No  N/A  Comments

a. The same accounting policies and methods of computation as were followed in the most recent annual financial statements or, if those policies or methods have been changed, the nature and effect of the change

b. The seasonality or cyclicity of interim operations

c. The nature and amount of items affecting assets, liabilities, equity, net income, or cash flows that are unusual because of their nature, size, or incidence

d. The nature and amount of changes in estimates of amounts reported in prior interim periods of the current financial year, or changes in estimates of amounts reported in prior financial years

e. The issues, repurchases, and repayments of debt and equity securities

f. The dividends paid (aggregate or per share) separately for ordinary shares and other shares

g. The following segment information:
   ▶ Revenues from external customers, if included in the measure of segment profit or loss reviewed by the chief operating decision maker or otherwise regularly provided to the chief operating decision maker
   ▶ Intersegment revenues, if included in the measure of segment profit or loss reviewed by the chief operating decision maker or otherwise regularly provided to the chief operating decision maker
   ▶ A measure of segment profit or loss
   ▶ A measure of total assets and liabilities for a particular reportable segment if such amounts are regularly provided to the chief operating decision maker and if there has been a material change from the amount disclosed in the last annual financial statements for that reportable segment
   ▶ A description of differences from the last annual financial statements in the basis of segmentation or in the basis of measurement of segment profit or loss
   ▶ A reconciliation of the total of the reportable segments’ measures of profit or loss to the entity’s profit or loss before tax expense (tax income) and discontinued operations. However, if an entity allocates to reportable segments items such as tax expense (tax income), the entity may reconcile the total of the segments’ measures of profit or loss to profit or loss after those items. Material reconciling items must be separately identified and described in that reconciliation

h. Events after the interim period that are not reflected in the financial statements for the interim period

i. The effect of changes in the composition of the entity during the interim period, including business combinations, obtaining or losing control of subsidiaries and long-term investments, restructurings and discontinued operations. In the case of business combinations, the entity discloses the information required by IFRS 3

j. For financial instruments, the disclosures about fair value required by IFRS 13.91-93(h), 94-96, 98 and 99 and IFRS 7.25, 26 and 28-30. Please refer below for detailed disclosure requirements (if the entity adopts IFRS 9 early, please refer to items set out in ‘New pronouncements: IFRS 9’ section, not to ‘IFRS 7 disclosures’ below)

k. For entities becoming, or ceasing to be, investment entities, as defined in IFRS 10, the disclosures in IFRS 12.98. Please refer below for detailed disclosure requirements

l. The disaggregation of revenue from contracts with customers required by IFRS 15.114-115 if the entity adopts IFRS 15 early

### IFRS 13 Disclosures

Please note that the 'IFRS 13 Disclosures' section applies only to financial instruments.

#### Disclosure objectives

**IFRS 13.91**

Does the entity disclose information that helps users of its financial statements assess both of the following:

a. For assets and liabilities that are measured at fair value on a recurring or non-recurring basis in the statement of financial position after initial recognition, the valuation techniques and inputs used to develop those measurements

b. For recurring fair value measurements using significant unobservable inputs (Level 3), the effect of the measurements on profit or loss or other comprehensive income for the period

**IFRS 13.92**

To meet the objectives in IFRS 13.91, an entity is required to consider all of the following:

- The level of detail necessary to satisfy the disclosure requirements
- How much emphasis to place on each of the various requirements
- How much aggregation or disaggregation to undertake
- Whether users of financial statements need additional information to evaluate the quantitative information disclosed

If the disclosures provided in accordance with IFRS 13 and other IFRSs are insufficient to meet the objectives in IFRS 13.91, does the entity disclose additional information in order to meet those objectives

**IFRS 13.93**

In addition, IFRS 13.93 establishes the minimum disclosure requirements for fair value measurements (and those based on fair value) that are recognised in the statement of financial position after initial recognition. The requirements vary depending on whether the fair value measurements are recurring or non-recurring and their categorisation within the fair value hierarchy (i.e., Level 1, 2, or 3).

In order to determine the appropriate categorisation of a fair value measurement (as a whole) within the hierarchy, an entity determines the categorisation of the inputs used to measure fair value and categorisation of the fair value measurement (as a whole).

(i) Categorisation of the inputs in the fair value hierarchy:

- **IFRS 13.73**
  - **IFRS 13.75**

(ii) Categorisation of the fair value measurement (as a whole) in the fair value hierarchy:

A fair value measurement (as a whole) is categorised within the fair value hierarchy, based on the lowest level input that is significant to the entire measurement (Level 1 inputs being the highest and Level 3, the lowest). For measures based on fair value (such as fair value less costs to sell), this determination does not consider the costs to sell.

When measured based on quoted prices in an active market (that are unadjusted) for identical assets or liabilities, fair value measurement is categorised within Level 1.

When measured using valuation techniques for which the lowest level input that is significant to the fair value measurement is market directly or indirectly observable, the fair value measurement as a whole is categorised within Level 2.

When measured using valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable, the fair value measurement as a whole is categorised within Level 3.

### Accounting policies

**IFRS 13.95**

Does the entity disclose its policy for determining when transfers between levels of the fair value hierarchy are deemed to have occurred

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
</table>
IFRS 13.93(e)(iv) 

IFRS 13.95 requires that an entity determines (and consistently follows) its policy for determining when transfers between levels in the fair value hierarchy are deemed to have occurred. The policy for the timing of recognising transfers is required to be the same for transfers into and out of levels. Examples of policies include:

a. The date of the event or change in circumstances that caused the transfer
b. The beginning of the reporting period
c. The end of the reporting period

522 IFRS 13.96

If an entity makes an accounting policy decision to use the exception in IFRS 13.48, does the entity disclose that policy, including its policy for allocating bid-ask spread adjustments and credit adjustments?

Yes No N/A Comments

IFRS 13.48-52

If an entity that holds a group of financial assets and financial liabilities is exposed to the market risks (as defined in IFRS 7) and the credit risk (as defined in IFRS 7) of each of the counterparties and manages that group of assets and liabilities on the basis of its net exposure, IFRS 13.48 permits the use of a measurement exception for measuring fair value, provided the criteria set out in IFRS 13.49 are met. Under this exception, an entity measures the fair value of the group of financial assets and liabilities consistently with how market participants would price the net risk exposure at the measurement date. Please note that the exception does not affect financial statement presentation requirements. In addition, the reference to financial assets and financial liabilities in IFRS 13.48 to 51 should be read as applying to all contracts within the scope of, and accounted for under IAS 39 or IFRS 9, regardless of whether they meet the definitions of financial assets or financial liabilities in IAS 32.

Class of assets and liabilities

523 IFRS 13.94

Does the entity classify assets and liabilities under the scope of IFRS 13 based on both:

a. The nature, characteristics and risks of the asset or liability
b. The level of the fair value hierarchy within which the fair value measurement is categorised

Yes No N/A Comments

The number of classes of assets and liabilities may need to be greater for fair value measurements categorised within Level 3 because those measurements have a greater degree of uncertainty and subjectivity. Determining the appropriate classes of assets and liabilities requires judgement and often may require more disaggregation than the line items presented in the statement of financial position.

Note: If another IFRS specifies the class for an asset or liability, an entity may use that class when providing the disclosures required by IFRS 13, provided that class meets the IFRS 13’s requirements for determining classes.

524 IFRS 13.94

Does the entity provide sufficient information to permit reconciliation between the classes of assets and liabilities and the line items presented in the statement of financial position?

Yes No N/A Comments

Fair value disclosures

525 IFRS 13.99

Does the entity present the quantitative disclosures required by IFRS 13 in tabular format, unless another format is more appropriate?

Yes No N/A Comments

526 IFRS 13.98

For a liability measured at fair value and issued with an inseparable third-party credit enhancement, does the entity disclose the existence of that credit enhancement and whether it is reflected in the fair value measurement of the liability?

Yes No N/A Comments

Recurring fair value measurements of assets and liabilities

527 IFRS 13.93(a)

Recurring fair value measurements of assets or liabilities are those that other IFRSs require or permit in the statement of financial position at the end of each reporting period. Non-recurring fair value measurements of assets or liabilities are those that other IFRS require or permit in the statement of financial position in particular circumstances (e.g., when an entity measures an asset held for sale at fair value less costs to sell in accordance with IFRS 5 because the asset’s fair value less costs to sell is lower than its carrying amount).

Yes No N/A Comments

For each class of assets and liabilities that are measured at fair value on a recurring basis in the statement of financial position after initial recognition, does the entity disclose:

**IFRS 13.93(h)**

For the sensitivity analysis for financial assets and financial liabilities, significance is judged with respect to profit or loss, and total assets or total liabilities, or, when changes in fair value are recognised in other comprehensive income, total equity.

**Non-recurring fair value measurements of assets and liabilities**

**IFRS 13.93(a)**

Non-recurring fair value measurements of assets or liabilities are those that other IFRSs require or permit in the statement of financial position in particular circumstances (e.g., when an entity measures an asset held for sale at fair value less costs to sell in accordance with IFRS 5 because the asset’s fair value less costs to sell is lower than its carrying amount).

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**IFRS 13.93(d)**

An entity is not required to create quantitative information to comply with these disclosure requirements if significant unobservable inputs are not developed by the entity when measuring fair value (e.g., when an entity uses prices from prior transactions or third-party pricing information without adjustment). However, an entity cannot ignore quantitative unobservable inputs that are significant to the fair value measurement and are reasonably available to the entity.

**IFRS 7 disclosures**

**IFRS 7.29**

The entity is not required to disclose fair value:

a. If the carrying amount is a reasonable approximation of fair value, for example, for financial instruments such as short-term trade receivables and payables

b. For an investment in equity instruments that do not have a quoted price in an active market for an identical instrument (i.e., a Level 1 input), or derivatives linked to such equity instruments, that is measured at cost in accordance with IAS 39 because its fair value cannot otherwise be measured reliably

c. For a contract containing a discretionary participation feature, if the fair values of that feature cannot be measured reliably.

d. Lease liabilities if the entity adopts IFRS 16 early

<table>

1.25 Disclose, in the entity’s first interim financial report, the following information or cross-reference to another published document that contains this information:

- Reconciliations of its equity reported under previous GAAP to its equity under IFRS for:
  - The date of transition to IFRS
  - The end of the latest period presented in the entity’s most recent annual financial statements under previous GAAP
- A reconciliation of the total comprehensive income (or, if the entity did not report such a total, profit or loss) reported under previous GAAP for the latest period in the entity’s most recent annual financial statements to its total comprehensive income under IFRS for the same period
- If the entity presented a statement of cash flows under its previous GAAP, explanation of the material adjustments to the statement of cash flows
  
1.26 ¶ in the reconciliations of equity, any errors made under previous GAAP and any changes in accounting policies

1.26 ¶ in the reconciliation of profit or loss, any errors made under previous GAAP and any changes in accounting policies

1.33 If the entity does not, in its most recent annual financial statements under previous GAAP, disclose information material to an understanding of the current interim period, does it disclose in its interim financial report that information or include a cross-reference to another published document that includes it

New pronouncements

Does the entity disclose items required by recent accounting pronouncements issued subsequent to the cut-off date of this checklist

IFRS 9 Financial Instruments (2010), disclosures for financial instruments IFRS 9 (2010) and IFRS 7

- IFRS 9 (2014) was issued in July 2014. An entity shall apply IFRS 9 Financial Instruments (2014), i.e., for financial assets and financial liabilities. If an entity adopts IFRS 9 Financial Instruments (2009), i.e., for financial assets only, refer to the previous version of this disclosure checklist. If the entity does not adopt IFRS 9 Financial Instruments, but rather applies IAS 39 Financial Instruments: Recognition and Measurement, refer to the Financial instruments section of this checklist.

- IFRS 9 (2014) for annual periods beginning on or after 1 January 2018. However, for annual periods beginning before 1 January 2018, the entity may elect to apply IFRS 9 (2009), IFRS 9 (2010) or IFRS 9 (2013) instead of applying IFRS 9 (2014) if, and only if, the entity’s relevant date of initial application is before 1 February 2015.

- If an entity elects to apply IFRS 9 (2010) and has not already applied IFRS 9 (2009), it must apply all of the requirements in IFRS 9 (2010) at the same time (but see IFRS 9.7.1.1A and 7.3.2).

- An entity shall apply IFRS 9 (2010) retrospectively, in accordance with

b. Financial liabilities at fair value through profit or loss, showing separately:
- Those designated as such upon initial recognition
- Those that meet the definition of held for trading in IFRS 9 (2010)

Financial assets or financial liabilities at fair value through profit or loss

If the entity has designated a financial asset (or group of financial assets) as measured at fair value that would otherwise be measured at amortised cost, does it disclose:

a. The maximum exposure to credit risk of the financial asset (or group of financial assets) at the end of the reporting period
b. The amount by which any related credit derivatives or similar instruments mitigate that maximum exposure to credit risk
c. The amount of change, during the period and cumulatively, in the fair value of the financial asset (or group of financial assets) that is attributable to changes in the credit risk of the asset determined either:
   - As the change in its fair value that is not attributable to changes in market conditions that give rise to market risk
   - Using an alternative method that the entity believes more faithfully represents the change in its fair value that is attributable to changes in credit risk of the asset

Changes in market conditions that give rise to market risk include changes in an interest rate, commodity price, foreign exchange rate or index of prices or rates.

d. The amount of the change in the fair value of any related credit derivatives or similar instruments that occurred during the reporting period and cumulatively since the financial asset was designated

An entity presents a gain or loss on a financial liability designated at fair value through profit or loss, as follows:

a. The change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income
b. The remaining amount of change in the fair value of the liability is presented in profit or loss unless the treatment of the effects of changes in the liability’s credit risk described in (a) would create or enlarge an accounting mismatch

New 546  
IFRS 7.10A  
IFRS 9.4.2.2  
IFRS 9.5.7.7  
IFRS 9.5.7.8  

If the entity (a) has designated a financial liability as at fair value through profit or loss in accordance with IFRS 9.4.2.2 and (b) is required to present all changes in the fair value of that liability (including the effects of changes in the credit risk of the liability) in profit or loss (see IFRS 9.5.7.7-8) does it disclose:

a. The amount of change, during the reporting period and cumulatively, in the fair value of the financial liability that is attributable to changes in the credit risk of that liability

b. The difference between the financial liability’s carrying amount and the amount the entity would be contractually required to pay at maturity to the holder of the obligation

New 547  
IFRS 7.11  

Does the entity disclose:

a. A detailed description of the methods used to comply with the requirements in IFRS 7.9(c), 10(a) and 10A(a) and IFRS 9.5.7.7(a) including an explanation of why the method is appropriate

b. If the entity believes that the disclosure it has given, either in the statement of financial position or in the notes, to comply with the requirements in items IFRS 7.9(c), 10(a) and 10A(a) or IFRS 9.5.7.7(a) does not faithfully represent the change in the fair value of the financial asset or financial liability attributable to changes in its credit risk:

► The reasons for reaching this conclusion

► The factors the entity believes are relevant

c. A detailed description of the methodology or methodologies used to determine whether presenting the effects of changes in a liability’s credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss

d. If the entity is required to present the effects of changes in a liability’s credit risk in profit or loss (to comply with c. above), the disclosure must include a detailed description of the economic relationship described in IFRS 9.B5.7.6

New 548  
IFRS 7.11A  
IFRS 9.5.7.5  

If an entity designated investments in equity instruments to be measured at fair value through other comprehensive income, does it disclose:

a. Which investments in equity instruments have been designated to be measured at fair value through other comprehensive income

b. The reasons for using this presentation alternative

c. The fair value of each such investment at the end of the reporting period

d. Dividends recognised during the period, showing separately:

► Those related to investments derecognised during the reporting period

► Those related to investments held at the end of the reporting period

e. Any transfers of the cumulative gain or loss within equity during the reporting period and the reason for such transfers

New 549  
IFRS 7.11B  

If an entity derecognises investments in equity instruments measured at fair value through other comprehensive income during the reporting period, does it disclose:

a. The reasons for disposing of the investments

b. The fair value of the investments at the date of derecognition

c. The cumulative gain or loss on disposal

Reclassification

New 550  
IFRS 7.12B  
IFRS 9.4.4.1  

If the entity, in the current or previous reporting periods, has reclassified any financial assets in accordance with paragraph 4.4.1 of
IFRS 9 (2010), for each such event, does the entity disclose:
   a. The date of reclassification
   b. A detailed explanation of the change in business model and a qualitative description of its effect on the entity’s financial statements
   c. The amount reclassified into and out of each category
   d. For any financial assets reclassified so they are measured at fair value, any gain or loss arising from a difference between the previous carrying amount and its fair value at the reclassification date

New 551 IFRS 7.12C IFRS 9.4.4.1
For each reporting period following reclassification until derecognition for assets reclassified so that they are measured at amortised cost in accordance with IFRS 9.4.4.1, does the entity disclose:
   a. The effective interest rate determined on the date of reclassification
   b. The interest income or expense recognised

New 552 IFRS 7.12D
If the entity has reclassified financial assets so that they are measured at amortised cost since its last annual reporting date, does it disclose:
   a. The fair value of the financial assets at the end of the reporting period
   b. The fair value gain or loss that would have been recognised in profit or loss during the reporting period if the financial assets had not been reclassified

New 553 IFRS 7.44U
If an entity treated the fair value of a financial asset or financial liability as its amortised cost at the date of initial application of IFRS 9 (2010), does the entity disclose for each reporting period following reclassification until derecognition:
   ➤ The effective interest rate determined on the date of reclassification
   ➤ The interest income or expense recognised

Transfers of financial assets

New 554 IFRS 7.42A
Does the entity present the disclosures required by IFRS 7.42B-42H in a single note in its financial statements

New 555 IFRS 7.42B
Does the entity disclose information that enables users of its financial statements:
   a. To understand the relationship between transferred financial assets that are not derecognised in their entirety and the associated liabilities
   b. To evaluate the nature of, and risks associated with, the entity’s continuing involvement in derecognised financial assets

IFRS 7.42A
The disclosures required by IFRS 7.42B-42H relating to transferred financial assets supplement the other disclosure requirements of IFRS 7. The entity provides these disclosures for all transferred financial assets that are not derecognised and for any continuing involvement in a transferred asset, existing at the reporting date, irrespective of when the related transfer transaction occurred.
For these disclosures, an entity transfers all or part of a financial asset (the transferred financial asset), if it either:
   a. Transfers the contractual rights to receive the cash flows of that financial asset
   Or
   b. Retains the contractual rights to receive the cash flows of that financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients in an arrangement (commonly referred to as a ‘pass-through arrangement’)

Note: the meaning of ‘transfer’ in IFRS 7 differs from that in IFRS 9 with respect to ‘pass-through arrangements’. In particular, for pass-through arrangements to qualify as transfers under IFRS 9, all three conditions in IFRS 9.3.2.5 (commonly referred to as the ‘pass-through conditions’) need to be met. In contrast, pass-through conditions need not be met for pass-through arrangements to be within the scope of IFRS 7. Accordingly, an arrangement whereby a reporting entity (including any consolidated structured entity) issues notes payable to investors that are contractually referenced to specified assets, and...
are non-recourse to the group, falls within the scope of these disclosure requirements, irrespective of whether such an arrangement meets all the IFRS 9 ‘pass-through’ conditions.

**Transferred financial assets that are not derecognised in their entirety**

To meet the objectives in IFRS 7.42B(a) above, does the entity disclose for each class of transferred financial assets that are not derecognised in their entirety:

<table>
<thead>
<tr>
<th>Disclosure made</th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
</table>

**IFRS 7.B32**

Those disclosures are required at each reporting date at which the entity continues to recognise the transferred financial asset, regardless of when the transfer occurred.

a. The nature of the transferred assets

b. The nature of the risks and rewards of ownership to which the entity remains exposed

c. A description of the nature of the relationship between the transferred assets and the associated liabilities, including any restrictions arising from the transfer on the entity’s use of the transferred assets

d. When the counterparty (counterparties) to the associated liabilities has (have) recourse only to the transferred assets, a schedule that sets out
   - The fair value of the transferred assets
   - The fair value of the associated liabilities
   - The net position

e. When the entity continues to recognise all of the transferred assets, the carrying amounts of the transferred assets and the associated liabilities

**IFRS 9.3.2.6(c)(ii)**

1. When the entity continues to recognise the assets to the extent of its continuing involvement:
   - The total carrying amount of the original assets before the transfer
   - The carrying amount of the assets that the entity continues to recognise
   - The carrying amount of the associated liabilities

**Transferred financial assets that are derecognised in their entirety**

For the disclosure requirements under IFRS 7.42E-42H, an entity has continuing involvement in a transferred financial asset if, as part of the transfer, the entity retains any of the contractual rights or obligations inherent in the transferred financial asset or obtains any new contractual rights or obligations relating to the transferred financial asset. However, the following do not constitute continuing involvement:

a. Normal representations and warranties relating to fraudulent transfer and concepts of reasonableness, good faith and fair dealings that could invalidate a transfer as a result of legal action

b. Forward, option and other contracts to reacquire the transferred financial asset for which the contract price (or exercise price) is the fair value of the transferred financial asset

c. An arrangement whereby an entity retains the contractual rights to receive the cash flows of a financial asset, but assumes a contractual obligation to pay the cash flows to one or more entities and the conditions in IFRS 9.3.2.5(a)–(c) are met

The assessment of continuing involvement in a transferred financial asset for the purpose of the disclosure requirements for IFRS 7.42E-42H is made at the level of the reporting entity.

IFRS 7.42E-42H requires qualitative and quantitative disclosures for each type of continuing involvement in derecognised financial assets. An entity aggregates its continuing involvement into types that are representative of the entity’s exposure to risks. For example, by type of financial instrument (e.g., guarantees or call options) or by type of transfer (e.g., factoring of receivables, securitisations and secured lending).
To meet the objectives in IFRS 7.42(b), when the entity derecognises transferred financial assets in their entirety, but has continuing involvement in them, does the entity disclose for each type of continuing involvement at the reporting date:

| a. | The carrying amount of the assets and liabilities that are recognised in the entity’s statement of financial position and represent the entity’s continuing involvement in the derecognised financial assets, and the line items in which those assets and liabilities are recognised | ☐ | ☐ | ☐ |
| b. | The fair value of the assets and liabilities that represent the entity’s continuing involvement in the derecognised financial assets | ☐ | ☐ | ☐ |
| c. | The amount that best represents the entity’s maximum exposure to loss from its continuing involvement in the derecognised financial assets, and how the maximum exposure to loss is determined | ☐ | ☐ | ☐ |
| d. | The undiscounted cash outflows that would or may be required to repurchase the derecognised financial assets or other amounts payable to the transferee for the transferred assets | ☐ | ☐ | ☐ |

Examples of cash outflows to repurchase the derecognised financial assets include the strike price in an option agreement or the repurchase price in a repurchase agreement. If the cash outflow is variable, then the amounts disclosed are based on the conditions that exist at each reporting date.

| e. | A maturity analysis of the undiscounted cash outflows that would or may be required to repurchase the derecognised financial assets or other amounts payable to the transferee in respect of the transferred assets, showing the remaining contractual maturities of the entity’s continuing involvement | ☐ | ☐ | ☐ |

The maturity analysis should distinguish cash flows that are required to be paid (e.g., forward contracts), cash flows that the entity may be required to pay (e.g., written put options) and cash flows that the entity might choose to pay (e.g., purchased call options).

| f. | An entity uses its judgement to determine an appropriate number of time bands in preparing the maturity analysis. | ☐ | ☐ | ☐ |

| g. | If there is a range of possible maturities, the cash flows are included on the basis of the earliest date on which the entity can be required or is permitted to pay. | ☐ | ☐ | ☐ |

| h. | Qualitative information that explains and supports the quantitative disclosures in (a)–(e), that includes a description of: | ☐ | ☐ | ☐ |

- The derecognised financial assets and the nature and purpose of the continuing involvement retained after transferring those assets
- The risks to which an entity is exposed, including:
  - A description of how the entity manages the risk inherent in its continuing involvement in the derecognised financial assets
  - Whether the entity is required to bear losses before other parties, and the ranking and amounts of losses borne by parties whose interests rank lower than the entity’s interest in the asset (i.e., its continuing involvement in the asset)
  - A description of any triggers associated with obligations to provide financial support or to repurchase a transferred financial asset

An entity may aggregate the information required by IFRS 7.42E above for a particular asset if the entity has more than one type of continuing involvement in that derecognised financial asset, and report it under one type of continuing involvement.

Does the entity disclose, for each reporting period for which a statement of comprehensive income is presented, for each type of continuing involvement:

| a. | The gain or loss recognised at the date of transfer of the assets, including: | ☐ | ☐ | ☐ |

- Whether that gain or loss on derecognition arose because the...
fair values of the components of the previously recognised asset (i.e., the interest in the asset derecognised and the interest retained by the entity) were different from the fair value of the previously recognised asset as a whole

- If that gain or loss on derecognition arose because the fair values of the components of the previously recognised asset were different from the fair value of the previously recognised asset as a whole, whether the fair value measurements included significant inputs that were not based on observable market data

b. Income and expenses recognised, both in the reporting period and cumulatively, from the entity’s continuing involvement (for example, fair value changes in derivative instruments)

c. If the total amount of proceeds from transfer activity (that qualifies for derecognition) in a reporting period is not evenly distributed throughout the reporting period (for example, if a substantial proportion of the total amount of transfer activity takes place in the closing days of a reporting period):

- When the greatest transfer activity took place within that reporting period (for example, the last five days before the end of the reporting period)
- The amount recognised (for example, related gains or losses) from transfer activity in that part of the reporting period
- The total amount of proceeds from transfer activity in that part of the reporting period

Supplementary information

New 559 IFRS 7.42H IFRS 7.839

Does the entity disclose any additional information that it considers necessary to meet the disclosure objectives in IFRS 7.42B above

Collateral

New 560 IFRS 7.14 IFRS 9.3.2.23 (a)

Does the entity disclose:

a. The carrying amount of financial assets pledged as collateral for liabilities or contingent liabilities, including amounts reclassified in accordance with IFRS 9.3.2.23(a)

b. The terms and conditions relating to the pledge

If a transferor provides non-cash collateral (such as debt or equity instruments) to the transferee, the accounting for the collateral by the transferor and the transferee depends on whether the transferee has the right to sell or repledge the collateral and on whether the transferor has defaulted. If the transferee has the right by contract or custom to sell or repledge the collateral, then the transferor reclassifies that asset in its statement of financial position (for example, as a loaned asset, pledged equity instrument or repurchase receivable) separately from other assets.

Some transactions involving the provision of non-cash financial collateral may be considered transfers that fall within the scope of IFRS 7.42D (e.g. non cash collateral transferred in a repo). This would normally be the case when (a) the transferee’s rights to control the asset are not conditional on the transferor’s default. This is often evidenced by the transfer of legal ownership and/or the transferee’s ability to re-sell or re-pledge the financial asset; or (b) when the arrangement is considered a ‘pass-through’ arrangement. Collateral pledged or received subject to a netting arrangement would also fall within the scope of the offsetting disclosures irrespective of whether or not the collateral met the offsetting criteria.

New 561 IFRS 7.15

If the entity holds collateral (of financial or non-financial assets) and may sell or repledge the collateral in the absence of default by the owner of the collateral, does the entity disclose:

a. The fair value of the collateral held

b. The fair value of any such collateral sold or repledged, and whether the entity has an obligation to return it

c. The terms and conditions associated with its use of this collateral

Allowance account for credit losses

562 IFRS 7.16

If financial assets are impaired by credit losses and the entity records the impairment in a separate account (for example, an allowance
account or similar account used to record a collective impairment of assets) rather than directly reducing the carrying amount of the asset, does the entity reconcile changes in that account during the period for each class of financial assets

**Compound financial instruments with multiple embedded derivatives**

563  
**IFRS 7.17**  
If the entity issued an instrument that contains both a liability and an equity component and the instrument has multiple embedded derivatives whose values are interdependent (such as a callable convertible debt instrument), does the entity disclose the existence of those features

**Defaults and breaches**

564  
**IFRS 7.18**  
For loans payable recognised at the end of the reporting period, does the entity disclose:

a. Details of any defaults during the period of principal, interest, sinking fund, or redemption terms of those loans payable

b. The carrying amount of the loans payable in default at the end of the reporting period

c. Whether the default was remedied, or the terms of the loans payable were renegotiated, before the financial statements were authorised for issue

565  
**IFRS 7.19**  
If, during the reporting period, there are breaches of loan agreement terms other than those described in IFRS 7.18, does the entity disclose the same information as required by IFRS 7.18 if those breaches permit the lender to demand accelerated repayment (unless the breaches were remedied, or the terms of the loan were renegotiated, on or before the end of the reporting period)

**Statement of comprehensive income**

**Items of income, expense, gains and losses**

New 566  
**IFRS 7.20(a)**  
Does the entity disclose the following items of income, expense, gains or losses, either in the statement of comprehensive income or in the notes:

Net gains or net losses on:

- Financial assets or financial liabilities measured at fair value through profit or loss, showing separately:
  - Those on financial assets or financial liabilities designated as such upon initial recognition
  - Those on financial assets or financial liabilities that are mandatorily measured at fair value in accordance with IFRS 9 (2010) (for example, financial liabilities that meet the definition of held for trading in IFRS 9 (2010))
  - For financial liabilities designated as at fair value through profit or loss, showing separately:
    - The amount of gain or loss recognised in other comprehensive income
    - The amount recognised in profit or loss
  - Financial assets measured at amortised cost
  - Financial liabilities measured at amortised cost
  - Financial assets measured at fair value through other comprehensive income

New 567  
**IFRS 7.20(b)**  
Does the entity disclose either in the statement of comprehensive income or in the notes, the fee income and expense (other than interest income and expense) on financial assets or financial liabilities that are measured at amortised cost or not at fair value through profit or loss:

a. Total interest income

b. Total interest expense

Both a) and b) are calculated using the effective interest method

**IFRS 4.35(d)**  
**IFRS 7.20(b)**  
The entity discloses the total interest expense recognised in profit or loss, but does not need to calculate such interest expense using the effective interest method as required under IFRS 7.20(b) for financial instruments that contain a discretionary participation feature.

New 568  
**IFRS 7.20(c)**  
Does the entity disclose either in the statement of comprehensive income or in the notes, the fee income and expense (other than
amounts included in determining the effective interest rate) arising from:

a. Financial assets measured at amortised cost or financial liabilities that are not at fair value through profit or loss
b. Trust and other fiduciary activities that result in the holding or investing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions

**Other disclosures**

**Accounting policies**

**New 572 IFRS 7.21 IAS 1.117**

Does the entity disclose its significant accounting policies comprising the measurement basis (or bases) used in preparing the financial statements and the other accounting policies that are relevant to an understanding of the financial statements in relation to financial instruments

**New 573 IFRS 7.85(a)**

Does the entity disclose, for financial liabilities designated as at fair value through profit or loss:

- a. The nature of the financial liabilities the entity has designated as at fair value through profit or loss
- b. The criteria for so designating such financial liabilities on initial recognition
- c. How the entity has satisfied the conditions in IFRS 9.4.2.2 for such designation

**New 574 IFRS 7.85(aa)**

For financial assets designated at fair value through profit or loss, does the entity disclose:

- a. The nature of the financial assets the entity has designated as measured at fair value through profit or loss
- b. How the entity has satisfied the criteria in paragraph 4.1.5 of IFRS 9 (2010) for such designation

**New 575 IFRS 7.85(c)**

Does the entity disclose:

- a. Whether regular way purchases and sales of financial assets are encountered for at trade date or at settlement date (IFRS 9.3.1.2).
- b. If an allowance account is used to reduce the carrying amount of financial assets impaired by credit losses:
  - The criteria for determining when the carrying amount of impaired financial assets is reduced directly (or, in the case of a reversal of a write-down, increased directly) and when the allowance account is used
  - The criteria for writing off amounts charged to the allowance account against the carrying amount of impaired financial assets (refer to IFRS 7.16)
- c. How net gains or net losses on each category of financial instrument are determined, for example, whether the net gains or net losses on items at fair value through profit or loss include interest or dividend income
- d. The criteria the entity uses to determine that there is objective evidence that an impairment loss has occurred
- e. If the terms of financial assets that would otherwise be past due or impaired have been renegotiated, the accounting policy for financial assets that are the subject of renegotiated terms

| New 580 | IFRS 7.29(d)  
IFRS 7.25  
IFRS 7.29 | Does the entity disclose for each class of financial assets and financial liabilities, the fair value of that class of assets and liabilities in a way that permits it to be compared with its carrying amount (except for those noted in IFRS 7.29) | Yes | No | N/A | Comments |
| New 581 | IFRS 7.26 | In disclosing fair values, does the entity group financial assets and financial liabilities into classes, but offset them only to the extent that their carrying amounts are offset in the statement of financial position | Yes | No | N/A | Comments |
| IFRS 13.5-7 | Please note that for fair value measurements (whether recognised or only disclosed), the entity should also provide the disclosures required by IFRS 13. | Yes | No | N/A | Comments |
| New 582 | IFRS 7.28 | In some cases, an entity does not recognise a gain or loss on initial recognition of a financial asset or financial liability because the fair value is neither evidenced by a quoted price in an active market for an identical asset or liability (i.e., a Level 1 input) nor based on a valuation technique that uses only data from observable markets (see IFRS 9.B5.1.2A). In such cases, does the entity disclose by class of financial asset or financial liability: | Yes | No | N/A | Comments |
| IFRS 9.B5.4.9 | a. Its accounting policy for recognising in profit or loss the difference between the fair value at initial recognition and the transaction | Yes | No | N/A | Comments |
Disclosure made
Yes No N/A Comments

a. The fact that the entity does not disclose fair value information for these instruments because their fair value cannot be measured reliably
b. A description of the financial instruments, their carrying amount and an explanation of why fair value cannot be measured reliably
c. Information about the market for the instruments
d. Information about whether and how the entity intends to dispose of the financial instruments
e. If financial instruments whose fair value previously could not be reliably measured are derecognised:
   ▶ That fact
   ▶ Their carrying amount at the time of derecognition
   ▶ The amount of gain or loss recognised

Nature and extent of risk arising from financial instruments

The disclosures required by IFRS 7.33-42 focus on the risks that arise from financial instruments and how they have been managed. These risks typically include, but are not limited to, credit risk, liquidity risk and market risk.

The disclosures are either given in the financial statements or incorporated by cross-reference from the financial statements to some other statement, such as a management commentary or risk report, that is available to users of the financial statements on the same terms as the financial statements and at the same time. Without the information incorporated by cross-reference, the financial statements are incomplete.

Qualitative disclosures in combination with quantitative disclosures enable users to gain an understanding of the nature and extent of risks arising from financial instruments and evaluate the entity's exposure to risk.

Does the entity disclose information that enables users of its financial statements to evaluate the nature and extent of risks arising from financial instruments to which the entity is exposed at the end of the reporting period

Qualitative disclosures

For each type of risk arising from financial instruments, does the entity disclose:
a. The exposures to risk and how they arise
b. Its objectives, policies and processes for managing the risk and the methods used to measure the risk
c. Any changes in (a) or (b) from the previous period

Quantitative disclosures

For each type of risk arising from financial instruments, does the entity disclose:
a. Summary quantitative data about its exposure to that risk at the end of the reporting period based on the information provided internally to key management personnel of the entity (as defined in IAS 24), for example, the entity's board of directors and chief executive officer
If the entity uses several methods to manage a risk or an exposure, the entity must disclose information using the method or methods that provide most relevant and reliable information. IAS 8.10 also discusses relevance and reliability.

b. The disclosures required by IFRS 7.36-42 below to the extent not provided in accordance with (a)

c. Concentrations of risk if not apparent from the disclosures made in accordance with (a) and (b)

For concentrations of risk, does the entity disclose:

- How management determines concentrations
- The shared characteristic that identifies each concentration (for example, counterparty, geographical area, currency and/or market)
- The amount of the risk exposure associated with all financial instruments sharing that characteristic

Concentrations of risk arise from financial instruments that have similar characteristics and are affected similarly by changes in economic or other conditions. The identification of concentrations of risk requires judgement taking into account the circumstances of the entity (see IFRS 7.IG18).

In accordance with IFRS 7.B8, disclosures of concentrations of risk includes the shared characteristic that identifies each concentration. For example, the shared characteristic may refer to geographical distribution of counterparties by groups of countries, individual countries or regions within countries.

If the quantitative data disclosed as at the end of the reporting period are unrepresentative of the entity’s exposure to risk during the period, does the entity provide further information that is representative

To meet this requirement, the entity might disclose the highest, lowest and average amount of risk to which it was exposed during the reporting period. For example, if an entity typically has a large exposure to a particular currency, but at the end of the reporting period unwinds the position, the entity might disclose a graph that shows the exposure at various times during the reporting period, or disclose the highest, lowest and average exposures.

Credit risk

Does the entity disclose by class of financial instrument:

a. The amount that best represents its maximum exposure to credit risk at the end of the reporting period without taking account of any collateral held or other credit enhancements (for example, netting agreements that do not qualify for offset in accordance with IAS 32.42), if the carrying amount does not represent the maximum exposure to credit risk

IFRS 7.36(a) requires disclosure of the amount that best represents the entity’s maximum exposure to credit risk. For a financial asset, this is typically the gross carrying amount, net of:

a. Any amounts offset in accordance with IAS 32
b. Any impairment losses recognised in accordance with IAS 39

Activities that give rise to credit risk and the associated maximum exposure to credit risk include, but are not limited to:

a. Granting loans and receivables to customers and placing deposits with other entities. In these cases, the maximum exposure to credit risk is the carrying amount of the related financial assets.

b. Entering into derivative contracts such as foreign exchange contracts, interest rate swaps and credit derivatives. If the entity measures the resulting asset at fair value, the maximum exposure to credit risk at the end of the reporting period will equal the carrying amount.

c. Granting financial guarantees. In this case, the maximum exposure to credit risk is the maximum amount the entity could have to pay if the guarantee is called on, which may be significantly greater than the amount recognised as a liability.
d. Making a loan commitment that is irrevocable over the life of the facility or is revocable only in response to a material adverse change. If the issuer cannot settle the loan commitment net in cash or another financial instrument, the maximum credit exposure is the full amount of the commitment. This is because it is uncertain whether the amount of any undrawn portion may be drawn upon in the future. This may be significantly greater than the amount recognised as a liability.

\[ \text{IFRS 7.G22} \]

b. A description of collateral held as security and of other credit enhancements, and their financial effect (for example, a quantification of the extent to which collateral and other credit enhancements mitigate credit risk) for the amount that best represents the maximum exposure to credit risk (whether disclosed in accordance with (a) or represented by the carrying amount of a financial instrument)

\[ \square \quad \square \quad \square \]

\[ \text{IFRS 7.36} \]

\[ \text{IFRS 7.G23-G25} \]

c. The credit quality of financial assets that are neither past due nor impaired

\[ \square \quad \square \quad \square \]

\[ \text{Financial assets that are either past due or impaired} \]

589 \[ \text{IFRS 7.37} \]

Does the entity disclose by class of financial asset:

\[ \text{IFRS 7.G28} \]

a. An analysis of the age of financial assets that are past due as at the end of the reporting period but not impaired

\[ \square \quad \square \quad \square \]

\[ \text{IFRS 7.G29} \]

b. An analysis of financial assets that are individually determined to be impaired as at the end of the reporting period, including the factors the entity considered in determining that they are impaired

\[ \square \quad \square \quad \square \]

\[ \text{Collateral and other credit enhancements obtained} \]

590 \[ \text{IFRS 7.38} \]

If the entity obtains financial or non-financial assets during the period by taking possession of collateral it holds as security or calling on other credit enhancements (for example, guarantees), and such assets meet the recognition criteria in other IFRS, does the entity disclose for such assets held at the reporting date:

\[ \text{IFRS 7.G2} \]

a. The nature and carrying amount of the assets obtained

\[ \square \quad \square \quad \square \]

\[ \text{IFRS 7.39} \]

b. If the assets are not readily convertible into cash, its policies for disposing of such assets or for using them in its operations

\[ \square \quad \square \quad \square \]

\[ \text{Liquidity risk} \]

591 \[ \text{IFRS 7.39} \]

Does the entity disclose:

\[ \text{IFRS 7.B.11} \]
a. A maturity analysis for non-derivative financial liabilities (including issued financial guarantee contracts) that shows the remaining contractual maturities

\[ \square \quad \square \quad \square \]

\[ \text{IFRS 7.B.11a} \]

In preparing the maturity analyses in IFRS 7.39(a) and (b), the entity uses its judgement to determine appropriate time bands.

\[ \text{IFRS 7.B.11c} \]

In preparing the maturity analyses, the entity does not separate an embedded derivative from a hybrid (combined) financial instrument. For such instruments, the entity shall apply IFRS 7.39(a).

\[ \text{IFRS 7.B.11c} \]

If the counterparty has a choice of when an amount is paid, the liability is included on the earliest date on which the entity can be required to pay. For example, financial liabilities that an entity must repay on demand (such as demand deposits) are included in the earliest time band.

\[ \text{IFRS 7.B.11d} \]

If the entity is committed to make amounts available in instalments, each instalment is allocated to the earliest period in which the entity can be required to pay. For example, an undrawn loan commitment is included in the time band containing the earliest date it can be drawn down.

\[ \text{IFRS 7.B.11e} \]

For issued guarantee contracts, the maximum amount of the guarantee is allocated to the earliest period in which the guarantee could be called.

\[ \text{IFRS 7.B.11f} \]

The amounts in the maturity analysis are the contractual undiscounted cash flows. Some relevant examples may be gross finance lease obligations (or gross lease liabilities if an entity applies IFRS 16 early) (before deducting finance charges), prices specified in forward agreements to purchase financial assets for cash, net amounts for pay-floating/receive-fixed interest rate swaps for which net cash flows are exchanged, and contractual amounts to be
Disclosure made
Yes No N/A Comments

exchanged in a derivative financial instrument (e.g. a currency swap) for which gross cash flows are exchanged and gross loan commitments.

Such undiscounted cash flows differ from the amount included in the statement of financial position because the statement of financial position amount is based on discounted cash flows. If the amount payable is not fixed, the entity discloses the amount based on the conditions existing at the end of the reporting period. For example, if the amount payable varies with changes in an index, the amount disclosed may be based on the level of the index at the end of the reporting period.

b. A maturity analysis for derivative financial liabilities, which includes the remaining contractual maturities for those derivative financial liabilities for which contractual maturities are essential for an understanding of the timing of the cash flows

For example, this would be the case for:

a. An interest rate swap with a remaining maturity of five years in a cash flow hedge of a variable rate financial asset or liability
b. All loan commitments

c. How it manages the liquidity risk inherent in (a) and (b)

The entity discloses a maturity analysis of financial assets it holds for managing liquidity risk (for example, financial assets that are readily saleable or expected to generate cash inflows to meet cash outflows on financial liabilities), if that information is necessary to enable users of its financial statements to evaluate the nature and extent of liquidity risk.

Other factors that the entity considers in IFRS 7.39(c) include, but are not limited to, whether the entity has the following:

a. Committed borrowing facilities (for example, commercial paper facilities) or other lines of credit (for example, stand-by credit facilities) that it can access to meet liquidity needs
b. Deposits at central banks to meet liquidity needs
c. Very diverse funding sources
d. Significant concentrations of liquidity risk in either its assets or its funding sources
e. Internal control processes and contingency plans for managing liquidity risk
f. Instruments that include accelerated repayment terms (for example, upon the downgrade of the entity’s credit rating)
g. Instruments that could require the posting of collateral (for example, margin calls for derivatives)
h. Instruments that allow the entity to choose whether it settles its financial liabilities by delivering cash (or another financial asset) or by delivering its own shares
Or
i. Instruments that are subject to master netting agreements.

In accordance with IFRS 7.34(a) an entity discloses summary quantitative data about its exposure to liquidity risk on the basis of information provided internally to key management personnel.

d. Does the entity explain how summary quantitative data about its exposure to liquidity risk are determined

In the data in (d) above could either:

► Occur significantly earlier than indicated in the data
Or

► Be for significantly different amounts from those indicated in the data (for example, for a derivative that is included in the data on a net settlement basis, but for which, the counterparty has the option to require gross settlement)

Does the entity state that fact and provide quantitative information that enables users of its financial statements to evaluate the extent of this risk, unless that information is included in the contractual maturity analysis required by IFRS 7.39(a) or 39(b) above
### Market risk

#### Sensitivity analysis

**IFRS 7.B21**
An entity must provide sensitivity analyses for the whole of its business, but may provide different types of sensitivity analyses for different classes of financial instruments.

**IFRS 7.B22**
Interest rate risk
Interest rate risk arises on interest-bearing financial instruments recognised in the statement of financial position (e.g., debt instruments acquired or issued) and on some financial instruments not recognised in the statement of financial position (e.g., some loan commitments).

**IFRS 7.B23-B24**
Currency risk
Currency risk does not arise from financial instruments that are non-monetary items or from financial instruments denominated in the functional currency. An entity discloses a sensitivity analysis for each currency to which it has significant exposure.

**IFRS 7.B25-B28**
Other price risk
Other price risk arises on financial instruments because of changes in, for example, commodity prices or equity prices. To comply with IFRS 7.40, the entity might disclose the effect of a decrease in a specified stock market index, commodity price, or other risk variable. For example, if an entity gives residual value guarantees that are financial instruments, the entity discloses an increase or decrease in the value of the assets to which the guarantee applies.

Two examples of financial instruments that give rise to equity price risk are a holding of equities in another entity and an investment in a trust, which in turn, holds investments in equity instruments. The fair values of such financial instruments are affected by changes in the market price of the underlying equity instruments.

Under IFRS 7.40(a), an entity discloses the sensitivity of profit or loss separately from the sensitivity of equity. For example, the sensitivity from instruments classified as at fair value through profit or loss is disclosed separately from the sensitivity of instruments whose changes in fair value are presented in other comprehensive income. Financial instruments that the entity classifies as equity instruments are not remeasured. Neither profit or loss or equity will be affected by the equity price risk of those instruments. Accordingly, no sensitivity analysis is required.

**IFRS 7.40**
Unless the entity complies with IFRS 7.41 below, does the entity disclose:

- A sensitivity analysis for each type of market risk to which the entity is exposed at the end of the reporting period, showing how profit or loss and equity would have been affected by changes in the relevant risk variable that were reasonably possible at the end of the reporting period
- The methods and assumptions used in preparing the sensitivity analysis
- Changes from the previous period in the methods and assumptions used and reasons for such changes

<table>
<thead>
<tr>
<th>Disclosure made</th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
</table>

**IFRS 7.B17**
In accordance with IFRS 7.B3, the entity decides how it aggregates information to display the overall picture without combining information with the different characteristics about exposures to risks from significantly different economic environments. If the entity is exposed to only one type of market risk in only one economic environment, it does not show disaggregated information.

For this purpose:

- Entities disclose the effect on profit or loss and equity at the end of the reporting period, assuming that a reasonably possible change in the relevant risk variable had occurred at the end of the reporting period and had been applied to the risk exposures in existence at that date. For example, if an entity has a floating rate liability at the end of the year, the entity would disclose the effect on profit or loss (that is, interest expense) for the current year if interest rates had varied by reasonably possible amounts.
b. Entities are not required to disclose the effect on profit or loss and equity for each change within a range of reasonably possible changes of the relevant risk variable. Disclosure of the effects of the changes at the limits of the reasonably possible range would be sufficient.

In determining what a reasonably possible change in the relevant risk variable is, the entity considers the following:

a. The economic environments in which it operates. A reasonably possible change does not include remote or ‘worst case’ scenarios or ‘stress tests’. Moreover, if the rate of change in the underlying risk variable is stable, the entity need not alter the chosen reasonably possible change in the risk variable. For example, assume that interest rates are 5% and an entity determines that a fluctuation in interest rates of ±50 basis points is reasonably possible. It would disclose the effect on profit or loss and equity if interest rates were to change to 4.5% or 5.5%. In the next period, interest rates have increased to 5.5%. The entity continues to believe that interest rates may fluctuate by ±50 basis points (i.e., that the rate of change in interest rates is stable). The entity discloses the effect on profit or loss and equity if interest rates were to change to 5% or 6%. The entity is not required to revise its assessment that interest rates might reasonably fluctuate, unless there is evidence that interest rates have become significantly more volatile.

b. The time frame over which it is making the assessment. The sensitivity analysis shows the effects of changes that are considered reasonably possible over the period until the entity will next present these disclosures, which is usually its next annual reporting period.

If the entity prepares a sensitivity analysis, such as a value-at-risk, that reflects interdependencies between risk variables (for example, interest rates and exchange rates) and uses it to manage financial risks, it may use that sensitivity analysis in place of the analysis in IFRS 7.40 above. If the entity uses such a sensitivity analysis does the entity also explain:

a. The method used in preparing such a sensitivity analysis, and the main parameters and assumptions underlying the data

b. The objective of the method used and limitations that may result in the information not fully reflecting the fair value of the assets and liabilities involved.

IFRS 7.41 applies even if such methodology measures only the potential for loss and does not measure the potential for gain. Such an entity might comply with IFRS 7.41(a) by disclosing the type of value-at-risk model used (e.g whether the model relies on Monte Carlo simulations), an explanation about how the model works and the main assumptions (e.g., the holding period and confidence level). Entities might also disclose the historical observation period and weightings applied to observations within that period, an explanation of how options are dealt with in the calculations, and which volatilities and correlations (or, alternatively, Monte Carlo probability distribution simulations) are used.

Other market risk disclosures

If the sensitivity analyses in IFRS 7.40 or 41 above are unrepresentative of a risk inherent in a financial instrument (for example, because the exposure at the end of the reporting period does not reflect the exposure during the reporting period), does the entity disclose that fact and the reason it believes the sensitivity analyses are unrepresentative.

The entity discloses additional information if the sensitivity analysis is unrepresentative of a risk inherent in a financial instrument. For example, this can occur if:

a. A financial instrument contains terms and conditions whose effects are not apparent from the sensitivity analysis. For example, options that remain out of (or in) the money for the chosen change in the risk variable

b. Financial assets are illiquid. For example, if there is a low volume of
transactions in similar assets and the entity finds it difficult to find a counterparty
Or
c. The entity has a large holding of a financial asset that, if sold in its entirety, would be sold at a discount or premium to the quoted market price for a smaller holding

### Disclosure made

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
</table>

#### Puttable instruments and other similar instruments classified as equity

If the entity reclassifies:

- A puttable financial instrument classified as an equity instrument
- An instrument that imposes on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation, and is classified as an equity instrument

between financial liabilities and equity, does it disclose:

- The amount reclassified into and out of each category (financial liabilities or equity)
- The timing of the reclassification
- The reason for the reclassification

#### Offset financial assets and financial liabilities

When an entity has the right to receive or pay a single net amount and intends to do so, it has, in effect, only a single financial asset or financial liability. In other circumstances, financial assets and financial liabilities are presented separately from each other consistently with their characteristics as resources or obligations of the entity.

Disclosures below also apply to recognised financial instruments that are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they qualify for off-setting in accordance with IAS 32.42.

An entity must disclose information to enable users of its financial statements to evaluate the effect, or potential effect, of netting arrangements on the entity’s financial position. This includes the effect, or potential effect, of rights of set-off associated with the entity’s recognised financial assets and recognised financial liabilities that are within the scope of IFRS 7.13A.

Does the entity disclose, in a tabular format (unless another format is more appropriate), separately for recognised financial assets and recognised financial liabilities that have been set-off in accordance with IAS 32.42 or that are subject to an enforceable master netting arrangement or similar agreement, the following quantitative information:

- The gross amounts of those recognised financial assets and recognised financial liabilities
- The amounts that are set off in accordance with the criteria in paragraph 42 of IAS 32 when determining the net amounts presented in the statement of financial position
- The net amounts presented in the statement of financial position
- The amounts subject to an enforceable master netting arrangement or similar agreement that are not otherwise included in b. above (for each instrument limited to the amount included in c. above), including:
  - Amounts related to recognised financial instruments that do not
Disclosure made

Yes  No  N/A  Comments

598 IFRS 7.13E Does the entity disclose a description of the rights of set-off associated with the entity’s recognised financial assets and recognised financial liabilities subject to enforceable master netting arrangements and similar agreements that are disclosed in accordance with IFRS 7.13C (d) above, including the nature of those rights

599 IFRS 7.13F Does the entity cross-reference the information of IFRS 7.13B-13E above if it is disclosed in more than one note to the financial statements

Extinguishing financial liabilities with equity instruments (IFRIC 19)

600 IFRIC 19.11 Does the entity disclose a gain or loss recognised in accordance with paragraphs 9 and 10 of IFRIC 19 as a separate line item in profit or loss or in the notes

IFRIC 19.2 IFRIC 19 provides guidance for the accounting when an entity renegotiates terms of a liability, with the result that a debtor extinguishes a financial liability fully or partially by issuing equity instruments to the creditor.

Transition requirements

New IFRS 9.7.2.1 Despite the requirements of IFRS 9.7.2.1 (retrospective application), an entity that adopts the classification and measurement requirements of IFRS 9 (2010) for reporting periods beginning on or after 1 January 2013 shall provide the disclosures set out in IFRS 7.44T - W below. The entity need not restate prior periods.

New 601 IFRS 7.44I When an entity first applies IFRS 9 (2010), does the entity disclose for each class of financial assets and financial liabilities at the date of initial application:

a. The original measurement category and carrying amount determined in accordance with IAS 39

b. The new measurement category and carrying amount determined in accordance with IFRS 9 (2010)

c. The amount of any financial assets and financial liabilities in the statement of financial position that were previously designated as measured at fair value through profit or loss, but are no longer so designated, distinguishing between those that IFRS 9 (2010) requires an entity to reclassify and those that an entity elects to reclassify

IFRS 7.44I The entity must present these quantitative disclosures in tabular format unless another format is more appropriate.

New 602 IFRS 7.44J When an entity first applies IFRS 9 (2010), does the entity disclose qualitative information to enable users to understand:

a. How it applied the classification requirements in IFRS 9 (2010) to those financial assets whose classification changed as a result of applying IFRS 9 (2010)

b. The reasons for any designation or de-designation of financial assets or financial liabilities as measured at fair value through profit or loss

New 603 IFRS 7.44T At the date of initial application of IFRS 9 (2010) (if required by IFRS 9.7.2.14, see IFRS 9.7.2.14 above) does the entity disclose the changes in the classifications of financial assets and financial liabilities, showing separately:

a. The changes in the carrying amounts on the basis of their measurement categories in accordance with IAS 39 (i.e., not resulting from a change in measurement attribute on transition to IFRS 9 (2010)

b. The changes in the carrying amounts arising from a change in measurement attribute on transition to IFRS 9 (2010)

IFRS 7.44T Disclosures required in IFRS 7.44T are only required by IFRS 9.7.2.14 in the annual period in which IFRS 9 (2010) is initially
In the reporting period in which IFRS 9 (2010) is initially applied, does the entity disclose the following information for financial assets and financial liabilities that have been reclassified so that they are measured at amortised cost as a result of the transition to IFRS 9 (2010):

a. The fair value of the financial assets and financial liabilities at the end of the reporting period
b. The fair value gain or loss that would have been recognised in profit or loss or other comprehensive income during the reporting period if the financial assets and financial liabilities had not been reclassified
c. The effective interest rate determined on the date of reclassification
d. The interest income or expense recognised

Disclosures required in IFRS 7.44U above are only required in the reporting period of the initial application of IFRS 9 (issued in 2010). However, if an entity treats the fair value of a financial asset or financial liability as its amortised cost at the date of initial application, the disclosures in IFRS 7.44U(c) and (d) shall be made for each reporting period following reclassification until derecognition.

If an entity presents the disclosures set out in IFRS 7.44S-44U above at the date of initial application of IFRS 9 (2010), do those disclosures, and the disclosures in IAS 8.28 during the reporting period containing the date of initial application, permit reconciliation between:

a. The measurement categories in accordance with IAS 39 and IFRS 9 (2010)
b. The line items presented in the statements of financial position

If an entity presents the disclosures set out in IFRS 7.44S-44U above at the date of initial application of IFRS 9 (2010), do those disclosures, and the disclosures in IFRS 7.25 during the reporting period containing the date of initial application, permit reconciliation of:

a. The measurement categories presented in accordance with IAS 39 and IFRS 9 (2010)
b. The class of financial instrument at the date of initial application

IFRS 9 Financial Instruments (2013), disclosures for financial instruments IFRS 9 (2013) and IFRS 7

Items in this section set out the disclosure requirements if the entity adopts IFRS 9 Financial Instruments (2013). If the entity adopts IFRS 9 Financial Instruments (2010), refer to the section ‘IFRS 9 Financial Instruments (2010), disclosures for financial instruments IFRS 9 (2010) and IFRS 7’ of this checklist. If the entity does not adopt IFRS 9 Financial Instruments, but continues to apply IAS 39 Financial Instruments: Recognition and Measurement, refer to the ‘Financial instruments’ section of this checklist.

IFRS 9 was issued in July 2014. An entity shall apply IFRS 9 (2014) for annual periods beginning on or after 1 January 2018. However, for annual periods beginning before 1 January 2018, the entity may elect to apply IFRS 9 (2009), IFRS 9 (2010) or IFRS 9 (2013) instead of applying IFRS 9 (2014) if, and only if, the entity’s relevant date of initial application is before 1 February 2015. If an entity elects to apply IFRS 9 (2013), it must apply all of the requirements in IFRS 9 (2013) at the same time (but see also IFRS 9.7.1.1A and 7.2.16).

An entity shall apply IFRS 9 (2013) retrospectively, in accordance with IAS 8, except as specified in IFRS 9.7.2.1, 9.7.2.14 and 9.7.2.15.

An entity prepares interim financial reports in accordance with IAS 34, the entity need not apply the requirements in IFRS 9 (2013) to interim periods prior to the date of initial application if it is impracticable (as defined in IAS 8).
| New | 607 | IFRS 9.7.1.1 | If the entity elects to apply IFRS 9 (2013), does the entity disclose that fact and, at the same time, apply the amendments in IFRS 9. Appendix C | Yes ☐ No ☐ N/A ☐ Comments ☐ |
| New | 608 | IFRS 9.7.1.2 | If an entity elects to apply only the requirement below, does the entity disclose that fact and provide on an ongoing basis the related disclosures set out in IFRS 7.10-11 (as amended by IFRS 9, issued in October 2010) | Yes ☐ No ☐ N/A ☐ Comments ☐ |

**Financial instruments**

Items in this section set out the disclosure requirements if the entity adopts IFRS 9 Financial Instruments (2013). If the entity adopts IFRS 9 Financial Instruments (2010), refer to the ‘IFRS 9 Financial Instruments (2010), disclosures for financial instruments IFRS 9 (2010) and IFRS 7’ section of this checklist. If the entity does not adopt IFRS 9 Financial Instruments, but continues to apply IAS 39 Financial Instruments: Recognition and Measurement, refer to the ‘Financial instruments’ section of this checklist.

| 609 | IFRS 7.6 | If disclosures are required by class of financial instrument, does the entity: a. Group financial instruments into classes that are appropriate to the nature of the information disclosed and that take into account the characteristics of those financial instruments | Yes ☐ No ☐ N/A ☐ Comments ☐ |
|     |         | b. Provide sufficient information to permit reconciliation to the relevant items in the statement of financial position | Yes ☐ No ☐ N/A ☐ Comments ☐ |

**IFRS 7.81-7.83**

IFRS 7.6 requires the entity to group financial instruments into classes that are appropriate to the nature of the information disclosed and that take into account the characteristics of those financial instruments. These classes are determined by the entity and, as such, are distinct from the categories of financial instruments specified in IFRS 9 (2013).

In determining classes of financial instruments, an entity, at minimum:

a. Distinguishes between instruments measured at amortised cost from those measured at fair value

b. Treats as a separate class or classes those financial instruments outside the scope of this IFRS

The entity decides how much detail it provides to satisfy the requirements, how much emphasis it places on different aspects of the requirements, and how it aggregates information to display the overall picture without combining information with different characteristics, in the light of its circumstances. It is necessary to balance between excessive detail and obscuring important information as a result of too much aggregation. For example, an entity must not obscure important information by including it among a large amount of insignificant detail. Similarly, an entity must not aggregate information so that it obscures important differences between individual transactions or associated risks.

| 610 | IFRS 7.7 | Does the entity disclose information that enables users of its financial statements to evaluate the significance of financial instruments to its financial position and performance | Yes ☐ No ☐ N/A ☐ Comments ☐ |
| New | 611 | IFRS 7.8 | Does the entity disclose, either in the statement of financial position or in the notes, the carrying amounts of each of the following:

a. Financial assets measured at fair value through profit or loss, showing separately:

   ▶ Those designated as such upon initial recognition or subsequently in accordance with IFRS 9.6.7.1
   ▶ Those mandatorily measured at fair value

b. Financial liabilities at fair value through profit or loss, showing separately:

New 614  
| IFRS 7.10A  
| IFRS 9.4.2.2  
| IFRS 9.5.7.7  
| IFRS 9.5.7.8  

If the entity (a) has designated a financial liability as at fair value through profit or loss in accordance with IFRS 9.4.2.2 and (b) is required to present all changes in the fair value of that liability (including the effects of changes in the credit risk of the liability) in profit or loss (see IFRS 9.5.7.7-B) does it disclose:

a. The amount of change, during the period and cumulatively, in the fair value of the financial liability that is attributable to changes in the credit risk of that liability

b. The difference between the financial liability’s carrying amount and the amount the entity would be contractually required to pay at maturity to the holder of the obligation

615  
| IFRS 7.11  
| IFRS 9.5.7.7  
| (a)  

Does the entity disclose:

a. A detailed description of the methods used to comply with the requirements in IFRS 7.9(c), 10(a) and 10A(a) and IFRS 9.5.7.7(a) including an explanation of why the method is appropriate.

b. If the entity believes that the disclosure it has given, either in the statement of financial position or in the notes, to comply with the requirements in IFRS 7.9(c), 10(a) and 10A(a) or IFRS 9.5.7.7(a) does not faithfully represent the change in the fair value of the financial asset or financial liability attributable to changes in its credit risk:

► The reasons for reaching this conclusion
► The factors the entity believes are relevant

616  
| IFRS 7.11A  
| IFRS 9.5.7.5  

If an entity designated investments in equity instruments to be measured at fair value through other comprehensive income, as permitted by IFRS 9.5.7.5, does it disclose:

a. Which investments in equity instruments have been designated to be measured at fair value through other comprehensive income

b. The reasons for using this presentation alternative

c. The fair value of each such investment at the end of the reporting period

d. Dividends recognised during the period, showing separately:

► Those related to investments derecognised during the reporting period
► Those related to investments held at the end of the reporting period

e. Any transfers of the cumulative gain or loss within equity during the reporting period and the reason for such transfers

617  
| IFRS 7.11B  

If an entity derecognises investments in equity instruments measured at fair value through other comprehensive income during the reporting period, does it disclose:

a. The reasons for disposing of the investments

b. The fair value of the investments at the date of derecognition

c. The cumulative gain or loss on disposal

Reclassification  

618  
| IFRS 7.12B  
| IFRS 9.4.4.1  

If the entity, in the current or previous reporting periods, has reclassified any financial assets in accordance with paragraph 4.4.1 of IFRS 9 (2013), for each such event, does the entity disclose:

a. The date of reclassification

b. A detailed explanation of the change in business model and a qualitative description of its effect on the entity’s financial statements
c. The amount reclassified into and out of each category

d. For any financial assets reclassified so they are measured at fair value, any gain or loss arising from a difference between the previous carrying amount and its fair value at the reclassification date

New 619 IFRS 7.12C

For each reporting period following reclassification until derecognition for assets reclassified so that they are measured at amortised cost in accordance with IFRS 9.4.4.1, does the entity disclose:

a. The effective interest rate determined on the date of reclassification

b. The interest income or expense recognised

New 620 IFRS 7.12D

If the entity has reclassified financial assets so that they are measured at amortised cost since its last annual reporting date, does it disclose:

a. The fair value of the financial assets at the end of the reporting period

b. The fair value gain or loss that would have been recognised in profit or loss during the reporting period if the financial assets had not been reclassified

621 IFRS 7.44U

If an entity treats the fair value of a financial asset or financial liability as its amortised cost at the date of initial application of IFRS 9 (2013), does the entity make the disclosures required under IFRS 7.44U(c) and 44U(d) below for each reporting period following reclassification until derecognition:

► The effective interest rate determined on the date of reclassification
► The interest income or expense recognised

Transfer of financial assets

New 622 IFRS 7.42A

Does the entity present the disclosures required by IFRS 7.42B-42H in a single note in its financial statements

New 623 IFRS 7.42B

Does the entity disclose information that enables users of its financial statements:

a. To understand the relationship between transferred financial assets that are not derecognised in their entirety and the associated liabilities

b. To evaluate the nature of, and risks associated with, the entity’s continuing involvement in derecognised financial assets

The disclosures required by IFRS 7.42B-42H relating to transferred financial assets supplement the other disclosure requirements of IFRS 7. The entity provides these disclosures for all transferred financial assets that are not derecognised and for any continuing involvement in a transferred asset, existing at the reporting date, irrespective of when the related transfer transaction occurred.

For these disclosures, an entity transfers all or part of a financial asset (the transferred financial asset), if it either:

a. Transfers the contractual rights to receive the cash flows of that financial asset

Or

b. Retains the contractual rights to receive the cash flows of that financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients in an arrangement (commonly referred to as a ‘pass-through arrangement’)

Note: the meaning of ‘transfer’ in IFRS 7 differs from that in IFRS 9 with respect to pass-through arrangements. In particular, for pass-through arrangements to qualify as transfers under IFRS 9, all three conditions in IFRS 9.3.2.5 (commonly referred to as the pass-through conditions) need to be met. In contrast, pass-through conditions need not be met for pass-through arrangements to be within the scope of IFRS 7. Accordingly, an arrangement whereby a reporting entity (including any consolidated structured entity) issues notes payable to investors that are contractually referenced to specified assets, and are non-recourse to the group, falls within the scope of these disclosure requirements, irrespective of whether such an arrangement meets all the IFRS 9 pass-through conditions.

IFRS 7.42E-42H requires qualitative and quantitative disclosures for each type of continuing involvement in derecognised financial assets.
Transferred financial assets that are not derecognised in their entirety

To meet the objectives in IFRS 7.42B(a) above, does the entity disclose for each class of transferred financial assets that are not derecognised in their entirety:

a. The nature of the transferred assets
b. The nature of the risks and rewards of ownership to which the entity remains exposed
c. A description of the nature of the relationship between the transferred assets and the associated liabilities, including any restrictions arising from the transfer on the entity’s use of the transferred assets
d. When the counterparty (counterparties) to the associated liabilities has (have) recourse only to the transferred assets, a schedule that sets out:
   i. The fair value of the transferred assets
   ii. The fair value of the associated liabilities
   iii. The net position

e. If the entity continues to recognise all of the transferred assets, the carrying amounts of the transferred assets and the associated liabilities

f. When the entity continues to recognise the assets to the extent of its continuing involvement:
   i. The total carrying amount of the original assets before the transfer
   ii. The carrying amount of the assets that the entity continues to recognise
   iii. The carrying amount of the associated liabilities

Those disclosures are required at each reporting date at which the entity continues to recognise the transferred financial asset, regardless of when the transfer occurred.

Transferred financial assets that are derecognised in their entirety

According to the disclosure requirements of IFRS 7.42E-42H, an entity has continuing involvement in a transferred financial asset if, as part of the transfer, the entity retains any of the contractual rights or obligations inherent in the transferred financial asset or obtains any new contractual rights or obligations relating to the transferred financial asset. However, the following do not constitute continuing involvement:

a. Normal representations and warranties relating to fraudulent transfer and concepts of reasonableness, good faith and fair dealings that could invalidate a transfer as a result of legal action
b. Forward, option and other contracts to reacquire the transferred financial asset for which the contract price (or exercise price) is the fair value of the transferred financial asset
c. An arrangement whereby an entity retains the contractual rights to receive the cash flows of a financial asset, but assumes a contractual obligation to pay the cash flows to one or more entities and the conditions in IFRS 9.3.2.5(a)–(c) are met

The assessment of continuing involvement in a transferred financial asset for the purpose of the disclosure requirements for IFRS 7.42E-42H is made at the level of the reporting entity.

IFRS 7.42E-42H requires qualitative and quantitative disclosures for each type of continuing involvement in derecognised financial assets. An entity aggregates its continuing involvement into types that are representative of the entity’s exposure to risks. For example, by type of financial instrument (e.g., guarantees or call options) or by type of transfer (e.g., factoring of receivables, securitisations and secured lending).

To meet the objectives in IFRS 7.42B(b), when the entity derecognises transferred financial assets in their entirety, but has continuing involvement in them, does the entity disclose for each type of continuing involvement at the reporting date:
 Disclosure made

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

(i) The carrying amount of the assets and liabilities that are recognised in the entity’s statement of financial position and represent the entity’s continuing involvement in the derecognised financial assets, and the line items in which those assets and liabilities are recognised

b. The fair value of the assets and liabilities that represent the entity’s continuing involvement in the derecognised financial assets

c. The amount that best represents the entity’s maximum exposure to loss from its continuing involvement in the derecognised financial assets, and how the maximum exposure to loss is determined

d. The undiscounted cash outflows that would or may be required to repurchase the derecognised financial assets or other amounts payable to the transferee for the transferred assets

Examples of cash outflows to repurchase the derecognised financial assets include the strike price in an option agreement or the repurchase price in a repurchase agreement. If the cash outflow is variable, then the amounts disclosed are based on the conditions that exist at each reporting date.

If the entity has more than one type of continuing involvement in that derecognised financial asset, and report it under one type of continuing involvement.

An entity may aggregate the information required by IFRS 7.42E above for a particular asset if the entity has more than one type of continuing involvement in that derecognised financial asset, and report it under one type of continuing involvement.

New 626 Does the entity disclose, for each reporting period for which a statement of comprehensive income is presented, for each type of continuing involvement:

a. The gain or loss recognised at the date of transfer of the assets, including:
   - Whether that gain or loss on derecognition arose because the fair values of the components of the previously recognised asset (i.e., the interest in the asset derecognised and the interest retained by the entity) were different from the fair value of the previously recognised asset as a whole
   - If that gain or loss on derecognition arose because the fair...
values of the components of the previously recognised asset were different from the fair value of the previously recognised asset as a whole, whether the fair value measurements included significant inputs that were not based on observable market data.

b. Income and expenses recognised, both in the reporting period and cumulatively, from the entity’s continuing involvement (for example, fair value changes in derivative instruments)

c. If the total amount of proceeds from transfer activity (that qualifies for derecognition) in a reporting period is not evenly distributed throughout the reporting period (for example, if a substantial proportion of the total amount of transfer activity takes place in the closing days of a reporting period):
   ▶ When the greatest transfer activity took place within that reporting period (for example, the last five days before the end of the reporting period)
   ▶ The amount recognised (for example, related gains or losses) from transfer activity in that part of the reporting period
   ▶ The total amount of proceeds from transfer activity in that part of the reporting period

Supplementary Information

Does the entity disclose any additional information that it considers necessary to meet the disclosure objectives of IFRS 7.42B above

Collateral

Does the entity disclose:

a. The carrying amount of financial assets pledged as collateral for liabilities or contingent liabilities, including amounts reclassified in accordance with IFRS 9.3.2.23(a)

b. The terms and conditions relating to the pledge

New 627 IFRS 7.42H IFRS 7.839

If a transferor provides non-cash collateral (such as debt or equity instruments) to the transferee, the accounting for the collateral by the transferor and the transferee depends on whether the transferee has the right to sell or repledge the collateral and whether the transferor has defaulted. If the transferee has the right by contract or custom to sell or repledge the collateral, then the transferor reclassifies that asset in its statement of financial position (for example, as a loaned asset, pledged equity instrument or repurchase receivable) separately from other assets.

Some transactions involving the provision of non-cash financial collateral may be considered transfers that fall within the scope of IFRS 7.42D (e.g., non cash collateral transferred in a repo). This would normally be the case when: (a) the transferee's rights to control the asset are not conditional on the transferor's default. This is often evidenced by the transfer of legal ownership and/or the transferee's ability to re-sell or re-pledge the financial asset; or (b) when the arrangement is considered a pass-through arrangement.

Collateral pledged or received subject to a netting arrangement would also fall within the scope of the offsetting disclosures irrespective of whether or not the collateral meets the offsetting criteria.

New 628 IFRS 7.14 IFRS 9.3.2.23 (a)

If the entity holds collateral (of financial or non-financial assets) and may sell or repledge the collateral in the absence of default by the owner of the collateral, does the entity disclose:

a. The fair value of the collateral held
b. The fair value of any such collateral sold or repledged, and whether the entity has an obligation to return it
c. The terms and conditions associated with its use of this collateral

Allowance account for credit losses

New 629 IFRS 7.15

630 IFRS 7.16

If financial assets are impaired by credit losses and the entity records the impairment in a separate account (for example, an allowance account or similar account used to record a collective impairment of assets) rather than directly reducing the carrying amount of the asset, does the entity reconcile changes in that account during the period for each class of financial assets

Compound financial instruments with multiple embedded derivatives

New 631 IFRS 7.17

If the entity issued an instrument that contains both a liability and an...
equity component and the instrument has multiple embedded derivatives whose values are interdependent (such as a callable convertible debt instrument), does the entity disclose the existence of those features?

**Defaults and breaches**

632  **IFRS 7.18**
For loans payable recognised at the end of the reporting period, does the entity disclose:

- a. Details of any defaults during the period of principal, interest, sinking fund, or redemption terms of those loans payable
- b. The carrying amount of the loans payable in default at the end of the reporting period
- c. Whether the default was remedied, or the terms of the loans payable were renegotiated, before the financial statements were authorised for issue

633  **IFRS 7.19**
If, during the reporting period, there are breaches of loan agreement terms other than those described in IFRS 7.18, does the entity disclose the same information as required by IFRS 7.18 if those breaches permit the lender to demand accelerated repayment (unless the breaches were remedied, or the terms of the loan were renegotiated, on or before the end of the reporting period)

**Statement of comprehensive income**

**Items of income, expense, gains and losses**

New  **IFRS 7.20(a)**
Does the entity disclose the following items of income, expense, gains or losses, either in the statement of comprehensive income or in the notes:

- Net gains or net losses on:
  - Financial assets or liabilities measured at fair value through profit or loss, showing separately:
    - Net gains or net losses on financial assets or financial liabilities designated as such upon initial recognition, or subsequently in accordance with IFRS 9.6.7.1
    - Net gains or net losses on financial assets or financial liabilities that are mandatorily measured at fair value in accordance with IFRS 9 (e.g., financial liabilities that meet the definition of held for trading in IFRS 9)
  - Financial liabilities designated as at fair value through profit or loss, showing separately:
    - The amount of gain or loss recognised in other comprehensive income
    - The amount of gain or loss recognised in profit or loss
    - Financial assets measured at amortised cost
    - Financial liabilities measured at amortised cost
    - Financial assets measured at fair value through other comprehensive income

Please note that this applies only if the liability was designated at fair value through profit or loss under the fair value option

New  **IFRS 7.20(b)**
Does the entity disclose either in the statement of comprehensive income or in the notes for financial assets that are measured at amortised cost or financial liabilities not at fair value through profit or loss:

- a. Total interest income
- b. Total interest expense

Both a) and b) are calculated using the effective interest method

**IFRS 4.35(d) IFRS 7.20(b)**
The entity discloses the total interest expense recognised in profit or loss, but does not need to calculate such interest expense using the effective interest method as required under IFRS 7.20(b) for financial instruments that contain a discretionary participation feature.

New  **IFRS 7.20(c)**
Does the entity disclose either in the statement of comprehensive income or in the notes, the fee income and expense (other than amounts included in determining the effective interest rate) arising from:

- a. Financial assets measured at amortised cost or financial liabilities
that are not at fair value through profit or loss
b. Trust and other fiduciary activities that result in the holding or investing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions

  d. The criteria the entity uses to determine that there is objective evidence that an impairment loss has occurred | ☐ | ☐ | ☐ | ☐ |
  e. If the terms of financial assets that would otherwise be past due or impaired have been renegotiated, the accounting policy for financial assets that are the subject of renegotiated terms | ☐ | ☐ | ☐ | ☐ |

New 644 | IFRS 7.85 | Does the entity disclose management’s judgements for financial instruments that have the most significant effect on the financial statements | ☐ | ☐ | ☐ | ☐ |
Hedge accounting

Does the entity apply the disclosure requirements in IFRS 7.21A-24F for those risk exposures that an entity hedges and for which it elects to apply hedge accounting. Hedge accounting disclosures must provide information about:

a. An entity’s risk management strategy and how it is applied to manage risk (see IFRS 7.22A-C) □ □ □
b. How the entity’s hedging activities may affect the amount, timing and uncertainty of its future cash flows (see IFRS 7.23A-F) □ □ □
c. The effect that hedge accounting has had on the entity’s statement of financial position, statement of comprehensive income and statement of changes in equity (see IFRS 7.24A-F) □ □ □

IFRS 7.21B

An entity must present the required disclosures in a single note or separate section in its financial statements. However, an entity need not duplicate information that is already presented elsewhere, provided that the information is incorporated by cross-reference from the financial statements to some other statement, such as a management commentary or risk report, that is available to users of the financial statements on the same terms as the financial statements and at the same time. Without the information incorporated by cross-reference, the financial statements are incomplete.

IFRS 7.21D

To meet the objectives of paragraph 21A, an entity must (except as otherwise specified below) determine how much detail to disclose, how much emphasis to place on different aspects of the disclosure requirements, the appropriate level of aggregation or disaggregation, and whether users of financial statements need additional explanations to evaluate the quantitative information disclosed. However, an entity must use the same level of aggregation or disaggregation that it uses for the disclosure requirements of related information in IFRS 9 and IFRS 13 Fair Value Measurement.

IFRS 7.21C

When paragraphs 22A-24F require the entity to separate by risk category the information disclosed, the entity must determine each risk category on the basis of the risk exposures an entity decides to hedge and for which hedge accounting is applied. An entity must determine risk categories consistently for all hedge accounting disclosures.

IFRS 7.22A

Does the entity explain its risk management strategy for each risk category of risk exposures that it decides to hedge and for which hedge accounting is applied. This explanation should enable users of financial statements to evaluate, for example:

a. How each risk arises □ □ □
b. How the entity manages each risk; this includes whether the entity hedges an item in its entirety for all risks or hedges a risk component (or components) of an item and why □ □ □
c. The extent of risk exposures that the entity manages □ □ □

IFRS 7.22B

To meet the requirements in IFRS 7.22A, does the entity provide information that includes (but is not limited to) a description of:

a. The hedging instruments that are used (and how they are used) to hedge risk exposures □ □ □
b. How the entity determines the economic relationship between the hedged item and the hedging instrument for the purpose of assessing hedge effectiveness □ □ □
c. How the entity establishes the hedge ratio and what the sources of hedge ineffectiveness are □ □ □

IFRS 7.22C

When an entity designates a specific risk component as a hedged item (see IFRS 9.6.3.7) does the entity provide, in addition to the disclosures required by IFRS 7.22A and 22B, qualitative or quantitative information about:

a. How the entity determined the risk component that is designated as the hedged item (including a description of the nature of the relationship between the risk component and the item as a whole) □ □ □
b. How the risk component relates to the item in its entirety (e.g., the designated risk component historically covered on average 80% of the changes in fair value of the item as a whole) □ □ □
| 649 | IFRS 7.23A | Unless exempted by IFRS 7.23C, does the entity disclose by risk category quantitative information to allow users of its financial statements to evaluate the terms and conditions of hedging instruments and how they affect the amount, timing and uncertainty of future cash flows of the entity | No | No | N/A | N/A |
| 650 | IFRS 7.23B | To meet the requirement in IFRS 7.23A, does the entity provide a breakdown that discloses: | No | No | N/A | N/A |
| a. | | A profile of the timing of the nominal amount of the hedging instrument; and | No | No | N/A | N/A |
| b. | | If applicable, the average price or rate (e.g., strike or forward prices, etc.) of the hedging instrument | No | No | N/A | N/A |
| 651 | IFRS 7.23C | In situations in which an entity frequently resets (i.e., discontinues and restarts) hedging relationships because both the hedging instrument and the hedged item frequently change (i.e., the entity uses a dynamic process in which both the exposure and the hedging instruments used to manage that exposure do not remain the same for long – such as in the example in IFRS 9.B6.5.24(b)) the entity is exempt from providing the disclosures required by IFRS 7.23A and 23B. In such a situation, does the entity disclose: | No | No | N/A | N/A |
| a. | | Information about the ultimate risk management strategy in relation to those hedging relationships | No | No | N/A | N/A |
| b. | | A description of how it reflects its risk management strategy by using hedge accounting and designating those particular hedging relationships | No | No | N/A | N/A |
| c. | | An indication of how frequently the hedging relationships are discontinued and restarted as part of the entity’s process in relation to those hedging relationships | No | No | N/A | N/A |
| 652 | IFRS 7.23D | Does the entity disclose by risk category a description of the sources of hedge ineffectiveness that are expected to affect the hedging relationship during its term | No | No | N/A | N/A |
| 653 | IFRS 7.23E | If other sources of hedge ineffectiveness emerge in a hedging relationship, does the entity disclose those sources by risk category and explain the resulting hedge ineffectiveness | No | No | N/A | N/A |
| 654 | IFRS 7.23F | For cash flow hedges, does the entity disclose a description of any forecast transaction for which hedge accounting had been used in the previous period, but which is no longer expected to occur | No | No | N/A | N/A |
| 655 | IFRS 7.24A | Does the entity disclose, in a tabular format, the following amounts related to items designated as hedging instruments separately by risk category for each type of hedge (fair value hedge, cash flow hedge or hedge of a net investment in a foreign operation): | No | No | N/A | N/A |
| a. | | The carrying amount of the hedging instruments (financial assets separately from financial liabilities) | No | No | N/A | N/A |
| b. | | The line item in the statement of financial position that includes the hedging instrument | No | No | N/A | N/A |
| c. | | The change in fair value of the hedging instrument used as the basis for recognising hedge ineffectiveness for the period | No | No | N/A | N/A |
| d. | | The nominal amounts (including quantities such as tonnes or cubic metres) of the hedging instruments | No | No | N/A | N/A |
| New 656 | IFRS 7.24B(a) | Does the entity disclose, in a tabular format, the following amounts related to hedged items separately by risk category for fair value hedges: | No | No | N/A | N/A |
| a. | | The carrying amount of the hedged item recognised in the statement of financial position (presenting assets separately from liabilities) | No | No | N/A | N/A |
| b. | | The accumulated amount of fair value hedge adjustments on the hedged item included in the carrying amount of the hedged item recognised in the statement of financial position (presenting assets separately from liabilities) | No | No | N/A | N/A |
| c. | | The line item in the statement of financial position that includes the hedged item | No | No | N/A | N/A |
| d. | | The change in value of the hedged item used as the basis for recognising hedge ineffectiveness for the period | No | No | N/A | N/A |
| e. | | The accumulated amount of fair value hedge adjustments remaining in the statement of financial position for any hedged | No | No | N/A | N/A |
Disclosure made
Yes No N/A Comments

657 IFRS 7.24(b)

Does the entity disclose, in a tabular format, the following amounts related to hedged items separately by risk category for cash flow hedges and hedges of a net investment in a foreign operation:

- a. The change in value of the hedged item used as the basis for recognising hedge ineffectiveness for the period (i.e., for cash flow hedges the change in value used to determine the recognised hedge ineffectiveness in accordance with IFRS 9.6.5.11(c))
- b. The balances in the cash flow hedge reserve and the foreign currency translation reserve for continuing hedges that are accounted for in accordance with IFRS 9.6.5.11 and 6.5.13(a)
- c. The balances remaining in the cash flow hedge reserve and the foreign currency translation reserve from any hedging relationships for which hedge accounting is no longer applied

658 IFRS 7.24(a)

Does the entity disclose, in a tabular format, the following amounts separately by risk category for fair value hedges:

- a. Hedge ineffectiveness – i.e., the difference between the hedging gains or losses of the hedging instrument and the hedged item – recognised in profit or loss (or other comprehensive income for hedges of an equity instrument for which an entity has elected to present changes in fair value in other comprehensive income in accordance with IFRS 9.5.7.5)
- b. The line item in the statement of comprehensive income that includes the recognised hedge ineffectiveness

659 IFRS 7.24(b)

Does the entity disclose, in a tabular format, the following amounts separately by risk category for cash flow and cash flow hedges and hedges of a net investment in a foreign operation:

- a. Hedging gains or losses of the reporting period that were recognised in other comprehensive income
- b. Hedge ineffectiveness recognised in profit or loss
- c. The line item in the statement of comprehensive income that includes the recognised hedge ineffectiveness
- d. The amount reclassified from the cash flow hedge reserve or the foreign currency translation reserve into profit or loss as a reclassification adjustment (see IAS 1) (differentiating between amounts for which hedge accounting had previously been used, but for which the hedged future cash flows are no longer expected to occur, and amounts that have been transferred because the hedged item has affected profit or loss)
- e. The line item in the statement of comprehensive income that includes the reclassification adjustment (see IAS 1)
- f. For hedges of net positions, the hedging gains or losses recognised in a separate line item in the statement of comprehensive income (see IFRS 9.6.6.4)

660 IFRS 7.24

When the volume of hedging relationships to which the exemption in IFRS 7.23C applies is unrepresentative of normal volumes during the period (i.e., the volume at the reporting date does not reflect the volumes during the period) does the entity disclose that fact and the reason it believes the volumes are unrepresentative

661 IFRS 7.24E

Does the entity provide a reconciliation of each component of equity and an analysis of other comprehensive income in accordance with IAS 1 that, taken together:

- a. Differentiates, at a minimum, between the amounts that relate to the disclosures in IFRS 7.24C(b)(ix) and (b)(x) as well as the amounts accounted for in accordance with IFRS 9.6.5.11(d)(i) and (d)(ii)
- b. Differentiates between:
  - The amounts associated with the time value of options that hedge transaction-related hedged items and
  - The amounts associated with the time value of options that hedge time-period related hedged items when an entity accounts for the time value of an option in accordance with IFRS 9.6.5.15

**Fair value**

The entity is not required to disclose fair value:

a. If the carrying amount is a reasonable approximation of fair value, for example, for financial instruments such as short-term trade receivables and payables

b. For a contract containing a discretionary participation feature, if the fair value of that feature cannot be measured reliably
c. For lease liabilities if the entity adopts IFRS 16 early

New | IFRS 7.29(d) | Does the entity disclose for each class of financial assets and financial liabilities, the fair value of that class of assets and liabilities in a way that permits it to be compared with its carrying amount (except for those noted in IFRS 7.29) | No | No | N/A |
| IFRS 7.25 | In disclosing fair values, does the entity group financial assets and financial liabilities into classes, but offset them only to the extent that their carrying amounts are offset in the statement of financial position | No | No | N/A |
| IFRS 7.26 | Please note that for fair value measurements (whether recognised or only disclosed), the entity should also provide the disclosures required by IFRS 13. | No | No | N/A |

New | IFRS 7.28 | In some cases, an entity does not recognise a gain or loss on initial recognition of a financial asset or financial liability because the fair value is neither evidenced by a quoted price in an active market for an identical asset or liability (i.e., a Level 1 input) nor based on a valuation technique that uses only data from observable markets (see IFRS 9.5.1.2A). In such cases, does the entity disclose by class of financial asset or financial liability: | No | No | N/A |
| IFRS 9. | a. Its accounting policy for recognising in profit or loss the difference between the fair value at initial recognition and the transaction price to reflect a change in factors (including time) that market participants would take into account when pricing the asset or liability (see IFRS 9.5.1.2A(b)) | No | No | N/A |
| 9. | b. The aggregate difference yet to be recognised in profit or loss at the beginning and end of the reporting period and reconciliation of changes in the balance of this difference | No | No | N/A |
| 5.1.2A | c. Why it has concluded that the transaction price was not the best evidence of fair value, including a description of the evidence that | No | No | N/A |
supports the fair value

In the cases described in IFRS 7.29 (c), does the entity disclose information to help users of the financial statements make their own judgements about the extent of possible differences between the carrying amount of those contracts and their fair value, including:

a. The fact that the entity does not disclose fair value information for these instruments because their fair value cannot be measured reliably

b. A description of the financial instruments, their carrying amount and an explanation of why fair value cannot be measured reliably

c. Information about the market for the instruments

d. Information about whether and how the entity intends to dispose of the financial instruments

e. If financial instruments whose fair value previously could not be reliably measured are derecognised:
   ▶ That fact
   ▶ Their carrying amount at the time of derecognition
   ▶ The amount of gain or loss recognised

**Nature and extent of risk arising from financial instruments**

IFRS 7.32

The disclosures required by IFRS 7.33-42 focus on the risks that arise from financial instruments and how they have been managed. These risks typically include, but are not limited to, credit risk, liquidity risk and market risk.

IFRS 7.B6

The disclosures are either given in the financial statements or incorporated by cross-reference from the financial statements to some other statement, such as a management commentary or risk report that is available to users of the financial statements on the same terms as the financial statements and at the same time. Without the information incorporated by cross-reference, the financial statements are incomplete.

IFRS 7.32A

Qualitative disclosures in combination with quantitative disclosures enable users to gain an understanding of the nature and extent of risks arising from financial instruments and evaluate the entity's exposure to risk.

IFRS 7.31

Does the entity disclose information that enables users of its financial statements to evaluate the nature and extent of risks arising from financial instruments to which the entity is exposed at the end of the reporting period?

**Qualitative disclosures**

IFRS 7.33

For each type of risk arising from financial instruments, does the entity disclose:

a. The exposures to risk and how they arise

b. Its objectives, policies and processes for managing the risk and the methods used to measure the risk

c. Any changes in (a) or (b) from the previous period

**Quantitative disclosures**

IFRS 7.34

For each type of risk arising from financial instruments, does the entity disclose:

a. Summary quantitative data about its exposure to that risk at the end of the reporting period based on the information provided internally to key management personnel of the entity (as defined in IAS 24), for example, the entity's board of directors and chief executive officer

b. The disclosures required by IFRS 7.36-42 below to the extent they are not provided in accordance with (a)

c. Concentrations of risk if not apparent from the disclosures made in accordance with (a) and (b)

<td>a. Granting loans and receivables to customers and placing deposits with other entities. In these cases, the maximum exposure to credit risk is the carrying amount of the related financial assets.</td>
<td>☐ ☐ ☐</td>
</tr>
<tr>
<td>b. Entering into derivative contracts such as foreign exchange contracts, interest rate swaps and credit derivatives. If the entity measures the resulting asset at fair value, the maximum exposure to credit risk at the end of the reporting period will equal the carrying amount.</td>
<td>☐ ☐ ☐</td>
</tr>
<tr>
<td>c. Granting financial guarantees. In this case, the maximum exposure to credit risk is the maximum amount the entity would have to pay if the guarantee is called on, which may be significantly greater than the amount recognised as a liability.</td>
<td>☐ ☐ ☐</td>
</tr>
<tr>
<td>d. Making a loan commitment that is irrevocable over the life of the facility or is revocable only in response to a material adverse change. If the issuer cannot settle the loan commitment net in cash or another financial instrument, the maximum credit exposure is the full amount of the commitment. This is because it is uncertain whether the amount of any undrawn portion may be drawn upon in the future. This may be significantly greater than the amount recognised as a liability.</td>
<td>☐ ☐ ☐</td>
</tr>
</tbody>
</table>

| IFRS 7.22 | b. Descriptions of collateral held as security and other credit enhancements, and their financial effect (e.g., a quantification | ☐ ☐ ☐ |
of the extent to which collateral and other credit enhancements mitigate credit risk) for the amount that best represents the maximum exposure to credit risk (whether disclosed in accordance with (a) or represented by the carrying amount of a financial instrument)

(ifRS 7.36)
(ifRS 7.62-63)

IG25

c. The credit quality of financial assets that are neither past due nor impaired

FINANCIAL ASSETS THAT ARE EITHER PAST DUE OR IMPAIRED

673    ifRS 7.37
Does the entity disclose by class of financial asset:

ifRS 7.62B

a. An analysis of the age of financial assets that are past due as at the end of the reporting period, but not impaired

ifRS 7.629

b. An analysis of financial assets that are individually determined to be impaired as at the end of the reporting period, including

the factors the entity considered in determining that they are impaired

COLLATERAL AND OTHER CREDIT ENHANCEMENTS OBTAINED

674    ifRS 7.38
If the entity obtains financial or non-financial assets during the period by taking possession of collateral it holds as security or calling on other credit enhancements (e.g., guarantees), and such assets meet the recognition criteria in other IFRS, does the entity disclose for such assets held at the reporting date:

a. The nature and carrying amount of the assets obtained

b. If the assets are not readily convertible into cash, its policies for disposing of such assets or for using them in its operations

LIQUIDITY RISK

675    ifRS 7.39
Does the entity disclose:

a. A maturity analysis for non-derivative financial liabilities (including issued financial guarantee contracts) that shows the remaining contractual maturities

In preparing the maturity analyses in IFRS 7.39(a) and (b), the entity uses its judgement to determine appropriate time bands.

In preparing the maturity analyses, the entity does not separate an embedded derivative from a hybrid (combined) financial instrument. For such an instrument, the entity shall apply IFRS 7.39(a).

If the counterparty has a choice of when an amount is paid, the liability is included on the earliest date on which the entity can be required to pay. For example, financial liabilities that an entity must repay on demand (such as demand deposits) are included in the earliest time band.

If the entity is committed to make amounts available in instalments, each instalment is allocated to the earliest period in which the entity can be required to pay. For example, an undrawn loan commitment is included in the time band containing the earliest date on which it can be drawn down.

For issued guarantee contracts, the maximum amount of the guarantee is allocated to the earliest period in which the guarantee could be called.

The amounts in the maturity analysis are the contractual undiscounted cash flows. Some relevant examples may be gross finance lease obligations (or gross lease liabilities if an entity applies IFRS 16 early) (before deducting finance charges), prices specified in forward agreements to purchase financial assets for cash, net amounts for pay-floating/receive-fixed interest rate swaps for which net cash flows are exchanged, and contractual amounts to be exchanged in a derivative financial instrument (e.g., a currency swap) for which gross cash flows are exchanged and gross loan commitments.

Such undiscounted cash flows differ from the amount included in the statement of financial position because the statement of financial position amount is based on discounted cash flows. If the amount payable is not fixed, the entity discloses the amount based on the conditions existing at the end of the reporting period. For example, if the amount payable varies with changes in an index, the amount disclosed may be based on the level of the index at the end of the reporting period.
b. A maturity analysis for derivative financial liabilities, which includes the remaining contractual maturities for those derivative financial liabilities for which contractual maturities are essential for an understanding of the timing of the cash flows

IFRS 7.B11B
For example, this would be the case for:

a. An interest rate swap with a remaining maturity of five years in a cash flow hedge of a variable rate financial asset or liability
b. All loan commitments

c. How it manages the liquidity risk inherent in (a) and (b)

IFRS 7.B11E
The entity discloses a maturity analysis of financial assets it holds for managing liquidity risk (e.g., financial assets that are readily saleable or expected to generate cash inflows to meet cash outflows on financial liabilities), if that information is necessary to enable users of its financial statements to evaluate the nature and extent of liquidity risk.

IFRS 7.B11F
Other factors that the entity considers in IFRS 7.39(c) include, but are not limited to, whether the entity has the following:

a. Committed borrowing facilities (e.g., commercial paper facilities) or other lines of credit (for example, stand-by credit facilities) that it can access to meet liquidity needs
b. Deposits at central banks to meet liquidity needs
c. Very diverse funding sources
d. Significant concentrations of liquidity risk in either its assets or its funding sources
e. Internal control processes and contingency plans for managing liquidity risk
f. Instruments that include accelerated repayment terms (e.g., upon the downgrade of the entity’s credit rating)
g. Instruments that could require the posting of collateral (e.g., margin calls for derivatives)
h. Instruments that allow the entity to choose whether it settles its financial liabilities by delivering cash (or another financial asset) or by delivering its own shares
Or i. Instruments that are subject to master netting agreements

d. Does the entity explain how summary quantitative data about its exposure to liquidity risk are determined

IFRS 7.34(a)
In accordance with IFRS 7.34(a), an entity discloses summary quantitative data about its exposure to liquidity risk on the basis of information provided internally to key management personnel.

e. If the outflow of cash (or another financial asset) included in the data in (d) above could either:

► Occur significantly earlier than indicated in the data
Or
► Be for significantly different amounts from those indicated in the data (e.g., for a derivative that is included in the data on a net settlement basis, but for which, the counterparty has the option to require gross settlement)

Does the entity state that fact and provide quantitative information that enables users of its financial statements to evaluate the extent of this risk unless that information is included in the contractual maturity analysis required by IFRS 7.39(a) or 39(b) above

Market risk

Sensitivity analysis

An entity must provide sensitivity analyses for the whole of its business, but may provide different types of sensitivity analyses for different classes of financial instruments.

Interest rate risk

Interest rate risk arises on interest-bearing financial instruments recognised in the statement of financial position (e.g., debt instruments acquired or issued) and on some financial instruments not recognised in the statement of financial position (e.g., some loan

Disclosure made

Yes No N/A Comments
Currency risk
Currency risk does not arise from financial instruments that are non-monetary items or from financial instruments denominated in the functional currency. An entity discloses a sensitivity analysis for each currency to which it has significant exposure.

Other price risk
Other price risk arises on financial instruments because of changes in, for example, commodity prices or equity prices. To comply with IFRS 7.40, the entity might disclose the effect of a decrease in a specified stock market index, commodity price, or other risk variable. For example, if an entity gives residual value guarantees that are financial instruments, the entity discloses an increase or decrease in the value of the assets to which the guarantee applies.

Two examples of financial instruments that give rise to equity price risk are a holding of equities in another entity and an investment in a trust, which, in turn, holds investments in equity instruments. The fair values of such financial instruments are affected by changes in the market price of the underlying equity instruments.

Under IFRS 7.40(a), an entity discloses the sensitivity of profit or loss separately from the sensitivity of equity. For example, the sensitivity from instruments classified as at fair value through profit or loss is disclosed separately from the sensitivity of instruments whose changes in fair value are presented in other comprehensive income. Financial instruments that the entity classifies as equity instruments are not remeasured. Neither profit or loss or equity will be affected by the equity price risk of those instruments. Accordingly, no sensitivity analysis is required.

Unless the entity complies with IFRS 7.41 below, does the entity disclose:

a. A sensitivity analysis for each type of market risk to which the entity is exposed at the end of the reporting period, showing how profit or loss and equity would have been affected by changes in the relevant risk variable that were reasonably possible at the end of the reporting period
b. The methods and assumptions used in preparing the sensitivity analysis
c. Changes from the previous period in the methods and assumptions used and reasons for such changes

In accordance with IFRS 7.B3, the entity decides how it aggregates information to display the overall picture without combining information with the different characteristics about exposures to risks from significantly different economic environments. If the entity is exposed to only one type of market risk in only one economic environment, it does not show disaggregated information.

For the purpose of this sensitivity analysis:

a. Entities disclose the effect on profit or loss and equity at the end of the reporting period, assuming that a reasonably possible change in the relevant risk variable had occurred at the end of the reporting period and had been applied to the risk exposures in existence at that date. For example, if an entity has a floating rate liability at the end of the year, the entity would disclose the effect on profit or loss (that is, interest expense) for the current year if interest rates had varied by reasonably possible amounts.

b. Entities are not required to disclose the effect on profit or loss and equity for each change within a range of reasonably possible changes of the relevant risk variable. Disclosure of the effects of the changes at the limits of the reasonably possible range would be sufficient.

In determining what a reasonably possible change in the relevant risk variable is, the entity considers the following:

a. The economic environments in which it operates. A reasonably possible change does not include remote or worst case scenarios or stress tests. Moreover, if the rate of change in the underlying risk variable is stable, the entity need not alter the chosen...
<table>
<thead>
<tr>
<th>Disclosure made</th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
</table>

reasonably possible change in the risk variable. For example, assume that interest rates are 5% and an entity determines that a fluctuation in interest rates of ±50 basis points is reasonably possible. It would disclose the effect on profit or loss and equity if interest rates were to change to 4.5% or 5.5%. In the next period, interest rates have increased to 5.5%. The entity continues to believe that interest rates may fluctuate by ±50 basis points (i.e., the rate of change in interest rates is stable). The entity discloses the effect on profit or loss and equity if interest rates were to change to 5% or 6%. The entity is not required to revise its assessment that interest rates might reasonably fluctuate, unless there is evidence that interest rates have become significantly more volatile.

b. The time frame over which it is making the assessment. The sensitivity analysis shows the effects of changes that are considered reasonably possible over the period until the entity will next present these disclosures, which is usually its next annual reporting period.

677 IFRS 7.41
If the entity prepares a sensitivity analysis, such as a value-at-risk, that reflects interdependencies between risk variables (e.g., interest rates and exchange rates) and uses it to manage financial risks, the entity may use that sensitivity analysis in place of the analysis in IFRS 7.40 above. If the entity uses such a sensitivity analysis, does the entity also explain:

a. The method used in preparing such a sensitivity analysis, and the main parameters and assumptions underlying the data
b. The objective of the method used and limitations that may result in the information not fully reflecting the fair value of the assets and liabilities involved

678 IFRS 7.42

IFRS 7.41 applies even if such methodology measures only the potential for loss and does not measure the potential for gain. Such an entity might comply with IFRS 7.41(a) by disclosing the type of value-at-risk model used (e.g., whether the model relies on Monte Carlo simulations), an explanation about how the model works and the main assumptions (e.g., the holding period and confidence level). Entities might also disclose the historical observation period and weightings applied to observations within that period, an explanation of how options are dealt with in the calculations, and which volatilities and correlations (or, alternatively, Monte Carlo probability distribution simulations) are used.

Other market risk disclosures

679 IFRS 7.43

If the sensitivity analyses in IFRS 7.40 or 41 above are unrepresentative of a risk inherent in a financial instrument (e.g., because the exposure at the end of the reporting period does not reflect the exposure during the reporting period), does the entity disclose that fact and the reason it believes the sensitivity analyses are unrepresentative

680 IFRS 7.44

The entity discloses additional information if the sensitivity analysis is unrepresentative of a risk inherent in a financial instrument. This can occur if:

a. A financial instrument contains terms and conditions whose effects are not apparent from the sensitivity analysis, e.g., options that remain out of (or in) the money for the chosen change in the risk variable.
b. Financial assets are illiquid, e.g., if there is a low volume of transactions in similar assets and the entity finds it difficult to find a counterparty

Or

c. The entity has a large holding of a financial asset that, if sold in its entirety, would be sold at a discount or premium to the quoted market price for a smaller holding

Puttable instruments and other similar instruments classified as equity

681 IAS 1.80

If the entity reclassifies:

a. A puttable financial instrument classified as an equity instrument

**Offset financial assets and financial liabilities**

When an entity has the right to receive or pay a single net amount and intends to do so, it has, in effect, only a single financial asset or financial liability. In other circumstances, financial assets and financial liabilities are presented separately from each other consistently with their characteristics as resources or obligations of the entity.

Disclosures below also apply to recognised financial instruments that are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are set off in accordance with IAS 32.42.

An entity must disclose information to enable users of its financial statements to evaluate the effect or potential effect of netting arrangements on the entity's financial position. This includes the effect, or potential effect, of rights of set-off associated with the entity’s recognised financial assets and recognised financial liabilities that are within the scope of IFRS 7.13A.

Does the entity separately disclose, in a tabular format (unless another format is more appropriate), recognised financial assets and recognised financial liabilities that have been set-off in accordance with IAS 32.42 or that are subject to an enforceable master netting arrangement or similar agreement, the following quantitative information:

| a. The gross amounts of those recognised financial assets and recognised financial liabilities | ☐ | ☐ | ☐ | ☐ |
| b. The amounts that are set off in accordance with the criteria in IAS 32.42 when determining the net amounts presented in the statement of financial position | ☐ | ☐ | ☐ | ☐ |
| c. The net amounts presented in the statement of financial position | ☐ | ☐ | ☐ | ☐ |
| d. The amounts subject to an enforceable master netting arrangement or similar agreement that are not otherwise included in b. above (for each instrument limited to the amount included in c. above), including: | ☐ | ☐ | ☐ | ☐ |
| ▶ Amounts related to recognised financial instruments that do not meet some or all of the offsetting criteria in IAS 32.42 | ☐ | ☐ | ☐ | ☐ |
| ▶ Amounts related to financial collateral (including cash collateral) | ☐ | ☐ | ☐ | ☐ |
| e. The net amount after deducting the amounts in (d) from the amounts in (c) above | ☐ | ☐ | ☐ | ☐ |

Does the entity disclose a description of the rights of set-off associated with the entity’s recognised financial assets and recognised financial liabilities subject to enforceable master netting arrangements and similar agreements that are disclosed in accordance with IFRS 7.13C (d) above, including the nature of | ☐ | ☐ | ☐ | ☐ |

iFRS 9 Financial Instruments (2014), disclosures for financial instruments IFRS 9 (2014) and IFRS 7

Items in this section set out the disclosure requirements if the entity adopts IFRS 9 Financial Instruments (2014). If an entity adopts IFRS 9 Financial Instruments (2009), i.e., for financial assets only, refer to the previous version of this disclosure checklist. If the entity adopts IFRS 9 Financial Instruments (2010 or 2013), refer to the section ‘IFRS 9 Financial Instruments (2010 or 2013), disclosures for financial instruments IFRS 9 (2010 or 2013) and IFRS 7’ in this checklist. If the entity does not adopt IFRS 9 Financial Instruments, but continues to apply IAS 39 Financial Instruments: Recognition and Measurement, refer to the ‘Financial instruments’ section of this checklist.

iFRS 9.7.1.1 | IFRS 9 (2014) was issued in July 2014. An entity shall apply IFRS 9 (2014) for annual periods beginning on or after 1 January 2018. Early application is permitted. If an entity elects to apply IFRS 9 (2014) early, it must apply all of the requirements in this standard at the same time (but see IFRS 9.7.1.2, 7.2.21 and 7.3.2). |
| iFRS 9.7.3.2 | For annual periods beginning before 1 January 2018, the entity may elect to apply IFRS 9 (2009), IFRS 9 (2010) or IFRS 9 (2013) instead of applying IFRS 9 (2014) if, and only if, the entity’s relevant date of initial application is before 1 February 2015. |
| iFRS 9.7.2.1 | An entity shall apply IFRS 9 (2014) retrospectively, in accordance with IAS 8, except as specified in IFRS 9.7.2.4 - IFRS 9.7.2.26 and 7.2.28. |
| iFRS 9.7.2.16 | If an entity prepares interim financial reports in accordance with IAS 34, the entity need not apply the requirements in IFRS 9 (2010) to interim periods prior to the date of initial application if it is impracticable (as defined in IAS 8). |

New 691 | If the entity elects to apply IFRS 9 (2014) early, does the entity disclose that fact and, at the same time, apply the amendments in IFRS 9, Appendix C |
| New 692 | If an entity elects to apply only the requirement below, does the entity disclose that fact and provide on an ongoing basis the related disclosures set out in IFRS 7.10-11 (as amended by IFRS 9, issued in October 2010) |

New 691 | If the entity elects to apply IFRS 9 (2014) early, does the entity disclose that fact and, at the same time, apply the amendments in IFRS 9, Appendix C |

New 692 | If an entity elects to apply only the requirement below, does the entity disclose that fact and provide on an ongoing basis the related disclosures set out in IFRS 7.10-11 (as amended by IFRS 9, issued in October 2010) |
requirements for the presentation of gains and losses on financial liabilities designated as at fair value through profit or loss in IFRS 9.5.7.1(c), 5.7.7-5.7.9, 7.2.14 and B5.7.5-B5.7.20 without applying the other requirements in this standard.

**Financial Instruments**

Items in this section set out the disclosure requirements if the entity adopts IFRS 9 Financial Instruments (2014). If an entity adopts IFRS 9 Financial Instruments (2009), i.e., for financial assets only, refer to the previous version of this disclosure checklist. If the entity adopts IFRS 9 Financial Instruments (2010 or 2013), refer to the section 'IFRS 9 Financial Instruments (2010 or 2013), disclosures for financial instruments IFRS 9 (2010 or 2013) and IFRS 7' in this checklist. If the entity does not adopt IFRS 9 Financial Instruments, but continues to apply IAS 39 Financial Instruments: Recognition and Measurement, refer to the 'Financial Instruments' section in this checklist.

693 **IFRS 7.6**

If disclosures are required by class of financial instrument, does the entity:

a. Group financial instruments into classes that are appropriate to the nature of the information disclosed and that take into account the characteristics of those financial instruments
b. Provide sufficient information to permit reconciliation to the relevant items in the statement of financial position

694 **IFRS 7.7**

Does the entity disclose information that enables users of its financial statements to evaluate the significance of financial instruments to its financial position and performance

**New 695**

**IFRS 7.8**

Does the entity disclose, either in the statement of financial position or in the notes, the carrying amounts of each of the following:

a. Financial assets measured at fair value through profit or loss, showing separately:
   - Those designated as such upon initial recognition or subsequently in accordance with IFRS 9.6.7.1
   - Those mandatorily measured at fair value through profit or loss in accordance with IFRS 9
b. Financial liabilities at fair value through profit or loss, showing separately:
   - Those designated as such upon initial recognition or subsequently in accordance with IFRS 9.6.7.1
   - Those that meet the definition of held for trading in IFRS 9
c. Financial assets measured at amortised cost
d. Financial liabilities measured at amortised cost
e. Financial assets measured at fair value through other

**Financial assets or financial liabilities at fair value through profit or loss**

If the entity has designated a financial asset (or group of financial assets) as measured at fair value through profit or loss that would otherwise be measured at fair value through other comprehensive income or amortised cost, does it disclose:

- Financial assets that are measured at fair value through other comprehensive income in accordance with IFRS 9.4.1.2A
- Investments in equity instruments designated as such upon initial recognition in accordance with IFRS 9.5.7.5

**New 696**

**IFRS 9.7**

If the entity has designated a financial asset (or group of financial assets) as measured at fair value through profit or loss, showing separately:

- The maximum exposure to credit risk (see IFRS 7.36(a)) of the financial asset (or group of financial assets) at the end of the reporting period
- The amount by which any related credit derivatives or similar instruments mitigate that maximum exposure to credit risk (see IFRS 7.36(b))
- The amount of change, during the period and cumulatively, in the fair value of the financial asset (or group of financial assets) that is attributable to changes in the credit risk of the financial asset determined either:
  - As the change in its fair value that is not attributable to changes in market conditions that give rise to market risk
  - Using an alternative method that the entity believes more faithfully represents the change in its fair value that is attributable to changes in credit risk of the asset

Changes in market conditions that give rise to market risk include changes in an interest rate, commodity price, foreign exchange rate or index of prices or rates.

**New 697**

**IFRS 9.10**

If the entity (a) has designated a financial liability as at fair value through profit or loss in accordance with IFRS 9.4.2.2 and (b) is required to present the effects of changes in that liability’s credit risk in other comprehensive income (see IFRS 9.5.7.7) does it disclose:

- The amount of change, cumulatively, in the fair value of the financial liability that is attributable to changes in the credit risk of that liability
- The difference between the financial liability’s carrying amount and the amount the entity would be contractually required to pay at maturity to the holder of the obligation
- Any transfers of the cumulative gain or loss within equity during the reporting period, including the reason for such transfers
- If a liability is derecognised during the reporting period, the amount (if any) presented in other comprehensive income that was realised at derecognition

An entity presents a gain or loss on a financial liability designated at fair value through profit or loss, as follows:

- The change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income
- The remaining amount of change in the fair value of the liability is presented in profit or loss unless the treatment of the effects of changes in the liability’s credit risk described in (a) would create or enlarge an accounting mismatch in profit or loss.

If these requirements were to create or enlarge an accounting mismatch in profit or loss, an entity must present all gains and losses on that liability (including the effects of changes in the credit risk of that liability) in profit or loss.

**Investments in equity instruments designated at fair value through other comprehensive income**

New 700 IFRS 7.11A IFRS 9.5.7.5

If an entity designated investments in equity instruments to be measured at fair value through other comprehensive income, as permitted by IFRS 9.5.7.5, does it disclose:

a. Which investments in equity instruments have been designated to be measured at fair value through other comprehensive income | ☐ | ☐ | ☐ |

b. The reasons for using this presentation alternative | ☐ | ☐ | ☐ |

c. The fair value of each such investment at the end of the reporting period | ☐ | ☐ | ☐ |

d. Dividends recognised during the period, showing separately:
   - Those related to investments derecognised during the reporting period | ☐ | ☐ | ☐ |
   - Those related to investments held at the end of the reporting period | ☐ | ☐ | ☐ |

e. Any transfers of the cumulative gain or loss within equity during the reporting period and the reason for such transfers | ☐ | ☐ | ☐ |

New 701 IFRS 7.11B

If an entity derecognises investments in equity instruments measured at fair value through other comprehensive income during the reporting period, does it disclose:

a. The reasons for disposing of the investments | ☐ | ☐ | ☐ |

b. The fair value of the investments at the date of derecognition | ☐ | ☐ | ☐ |

c. The cumulative gain or loss on disposal | ☐ | ☐ | ☐ |

**Reclassification**

New 702 IFRS 7.12B IFRS 9.4.4.1

If the entity, in the current or previous reporting periods, has reclassified any financial assets in accordance with paragraph 4.4.1 of IFRS 9 (2014), for each such event, does the entity disclose:

a. The date of reclassification | ☐ | ☐ | ☐ |

b. A detailed explanation of the change in business model and a qualitative description of its effect on the entity’s financial statements | ☐ | ☐ | ☐ |

c. The amount reclassified into and out of each category | ☐ | ☐ | ☐ |

d. For any financial assets reclassified out of the amortised cost measurement category so that they are measured at fair value through profit or loss, any gain or loss arising from a difference | ☐ | ☐ | ☐ |
between the previous amortised cost of the financial asset and its fair value at the reclassification date

For any financial asset is reclassified out of the fair value through other comprehensive income measurement category so that it is measured at fair value through profit or loss, any cumulative gain or loss previously recognised in other comprehensive income that is reclassified to profit or loss is:

a. The effective interest rate determined on the date of reclassification
b. The interest revenue recognised

If, since its last annual reporting date, the entity has reclassified financial assets out of the fair value through other comprehensive income category so that they are measured at amortised cost or fair value through profit or loss category so that they are measured at amortised cost or fair value through other comprehensive income, does it disclose:

a. The fair value of the financial assets at the end of the reporting period
b. The fair value gain or loss that would have been recognised in profit or loss or other comprehensive income during the reporting period if the financial assets had not been reclassified

If an entity treats the fair value of a financial asset or financial liability as its amortised cost at the date of initial application of IFRS 9 (2014), does the entity make the disclosures in IFRS 7.42N for each reporting period until derecognition:

Transfers of financial assets

Does the entity present the disclosures required by IFRS 7.42B-42H in a single note in its financial statements?

Does the entity disclose information that enables users of its financial statements:

a. To understand the relationship between transferred financial assets that are not derecognised in their entirety and the associated liabilities
b. To evaluate the nature of, and risks associated with, the entity's continuing involvement in derecognised financial assets

The disclosures required by IFRS 7.42B-42H relating to transferred financial assets supplement the other disclosure requirements of IFRS 7. The entity provides these disclosures for all transferred financial assets that are not derecognised and for any continuing involvement in a transferred asset, existing at the reporting date, irrespective of when the related transfer transaction occurred.

For these disclosures, an entity transfers all or part of a financial asset (the transferred financial asset), if it either:

a. Transfers the contractual rights to receive the cash flows of that financial asset
b. Retains the contractual rights to receive the cash flows of that financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients in an arrangement (commonly referred to as a ‘pass-through arrangement’)

Note: the meaning of ‘transfer’ in IFRS 7 differs from that in IFRS 9 with respect to pass-through arrangements. In particular, for pass-through arrangements to qualify as transfers under IFRS 9, all three conditions in IFRS 9.3.2.5 (commonly referred to as the pass-through conditions) need to be met. In contrast, pass-through conditions need not be met for pass-through arrangements to be within the scope of IFRS 7. Accordingly, an arrangement whereby a reporting entity (including any consolidated structured entity) issues notes payable to investors that are contractually referenced to specified assets, and are non-recourse to the group, falls within the scope of these disclosure requirements, irrespective of whether such an arrangement
Transferred financial assets that are not derecognised in their entirety

To meet the objectives in IFRS 7.42B(a) above, does the entity disclose for each class of transferred financial assets that are not derecognised in their entirety:

a. The nature of the transferred assets
b. The nature of the risks and rewards of ownership to which the entity remains exposed
c. A description of the nature of the relationship between the transferred assets and the associated liabilities, including any restrictions arising from the transfer on the entity’s use of the transferred assets
d. When the counterparty (counterparties) to the associated liabilities has (have) recourse only to the transferred assets, a schedule that sets out
   ▶ The fair value of the transferred assets
   ▶ The fair value of the associated liabilities
   ▶ The net position
e. When the entity continues to recognise all of the transferred assets, the carrying amounts of the transferred assets and the associated liabilities

f. When the entity continues to recognise the assets to the extent of its continuing involvement:
   ▶ The total carrying amount of the original assets before the transfer
   ▶ The carrying amount of the assets that the entity continues to recognise
   ▶ The carrying amount of the associated liabilities

These disclosures are required at each reporting date at which the entity continues to recognise the transferred financial asset, regardless of when the transfer occurred.

Transferred financial assets that are derecognised in their entirety

For the purpose of applying the disclosure requirements of IFRS 7.42E-42H, an entity has continuing involvement in a transferred financial asset if, as part of the transfer, the entity retains any of the contractual rights or obligations inherent in the transferred financial asset or obtains any new contractual rights or obligations relating to the transferred financial asset. The following do not constitute continuing involvement:

a. Normal representations and warranties relating to fraudulent transfer and concepts of reasonableness, good faith and fair dealings that could invalidate a transfer as a result of legal action
b. Forward, option and other contracts to reacquire the transferred financial asset for which the contract price (or exercise price) is the fair value of the transferred financial asset
c. An arrangement whereby an entity retains the contractual rights to receive the cash flows of a financial asset, but assumes a contractual obligation to pay the cash flows to one or more entities and the conditions in IFRS 9.3.2.5(a)-(c) are met

The assessment of continuing involvement in a transferred financial asset for the purpose of the disclosure requirements of IFRS 7.42E-42H is made at the level of the reporting entity.

IFRS 7.42E-42H requires qualitative and quantitative disclosures for each type of continuing involvement in derecognised financial assets. An entity aggregates its continuing involvement into types that are representative of the entity's exposure to risks. For example, by type of financial instrument (e.g., guarantees or call options) or by type of transfer (e.g., factoring of receivables, securitisations and secured lending).
To meet the objectives in IFRS 7.42B(b), when the entity derecognises transferred financial assets in their entirety, but has continuing involvement in them, does the entity disclose for each type of continuing involvement at the reporting date:

a. The carrying amount of the assets and liabilities that are recognised in the entity’s statement of financial position and represent the entity’s continuing involvement in the derecognised financial assets, and the line items in which those assets and liabilities are recognised

b. The fair value of the assets and liabilities that represent the entity’s continuing involvement in the derecognised financial assets

c. The amount that best represents the entity’s maximum exposure to loss from its continuing involvement in the derecognised financial assets, and how the maximum exposure to loss is determined

d. The undiscounted cash outflows that would or may be required to repurchase the derecognised financial assets or other amounts payable to the transferee for the transferred assets

Examples of cash outflows to repurchase the derecognised financial assets include the strike price in an option agreement or the repurchase price in a repurchase agreement. If the cash outflow is variable, then the amounts disclosed are based on the conditions that exist at each reporting date.

A maturity analysis of the undiscounted cash outflows that would or may be required to repurchase the derecognised financial assets or other amounts payable to the transferee in respect of the transferred assets, showing the remaining contractual maturities of the entity’s continuing involvement

The maturity analysis should distinguish cash flows that are required to be paid (e.g., forward contracts), cash flows that the entity may be required to pay (e.g., written put options) and cash flows that the entity might choose to pay (e.g., purchased call options).

An entity uses its judgement to determine an appropriate number of time bands in preparing the maturity analysis.

If there is a range of possible maturities, the cash flows are included on the basis of the earliest date on which the entity can be required or is permitted to pay.

Qualitative information that explains and supports the quantitative disclosures in (a)–(e), that includes a description of:

The derecognised financial assets and the nature and purpose of the continuing involvement retained after transferring those assets

The risks to which an entity is exposed, including:

A description of how the entity manages the risk inherent in its continuing involvement in the derecognised financial assets

Whether the entity is required to bear losses before other parties, and the ranking and amounts of losses borne by parties whose interests rank lower than the entity's interest in the asset (i.e., its continuing involvement in the asset)

A description of any triggers associated with obligations to provide financial support or to repurchase a transferred financial asset

An entity may aggregate the information required by IFRS 7.42E above for a particular asset if the entity has more than one type of continuing involvement in that derecognised financial asset, and report it under one type of continuing involvement.

Does the entity disclose, for each reporting period for which a statement of comprehensive income is presented, for each type of continuing involvement:

a. The gain or loss recognised at the date of transfer of the assets, including:

Whether that gain or loss on derecognition arose because the
fair values of the components of the previously recognised asset (i.e., the interest in the asset derecognised and the interest retained by the entity) were different from the fair value of the previously recognised asset as a whole

▶ If that gain or loss on derecognition arose because the fair values of the components of the previously recognised asset were different from the fair value of the previously recognised asset as a whole, whether the fair value measurements included significant inputs that were not based on observable market data

b. Income and expenses recognised, both in the reporting period and cumulatively, from the entity’s continuing involvement (for example, fair value changes in derivative instruments)

c. If the total amount of proceeds from transfer activity (that qualifies for derecognition) in a reporting period is not evenly distributed throughout the reporting period (for example, if a substantial proportion of the total amount of transfer activity takes place in the closing days of a reporting period):

▶ When the greatest transfer activity took place within that reporting period (for example, the last five days before the end of the reporting period)

▶ The amount recognised (for example, related gains or losses) from transfer activity in that part of the reporting period

▶ The total amount of proceeds from transfer activity in that part of the reporting period

Supplementary information

New 711 IFRS 7.42H

Does the entity disclose any additional information that it considers necessary to meet the disclosure objectives of IFRS 7.42B above

Collateral

New 712 IFRS 7.14

Does the entity disclose:

a. The carrying amount of financial assets pledged as collateral for liabilities or contingent liabilities, including amounts reclassified in accordance with IFRS 9.3.2.23(a)

b. The terms and conditions relating to the pledge

IFRS 9.3.2.23 (a)

If a transferor provides non-cash collateral (such as debt or equity instruments) to the transferee, the accounting for the collateral by the transferor and the transferee depends on whether the transferee has the right to sell or repledge the collateral and whether the transferor has defaulted. If the transferee has the right by contract or custom to sell or repledge the collateral, then the transferor reclassifies that asset in its statement of financial position (for example, as a loaned asset, pledged equity instrument or repurchase receivable) separately from other assets.

Some transactions involving the provision of non-cash financial collateral may be considered transfers that fall within the scope of IFRS 7.42D (e.g., non cash collateral transferred in a repo). This would normally be the case when: (a) the transferee’s rights to control the asset are not conditional on the transferor’s default. This is often evidenced by the transfer of legal ownership and/or the transferee’s ability to re-sell or re-pledge the financial asset; or (b) when the arrangement is considered a pass-through arrangement.

Collateral pledged or received subject to a netting arrangement would also fall within the scope of the offsetting disclosures irrespective of whether or not the collateral meets the offsetting criteria.

New 713 IFRS 7.15

If the entity holds collateral (of financial or non-financial assets) and may sell or repledge the collateral in the absence of default by the owner of the collateral, does the entity disclose:

a. The fair value of the collateral held

b. The fair value of any such collateral sold or repledged, and whether the entity has an obligation to return it

c. The terms and conditions associated with its use of this collateral

Allowance account for credit losses

New 714 IFRS 7.16A

Does the entity disclose the loss allowance for a debt instrument measured at fair value through other comprehensive income in the

Disclosure made

Yes  No  N/A  Comments
Disclosure made

Yes  No  N/A  Comments

**IFRS 7.16A**
The carrying amount of financial assets measured at fair value through other comprehensive income in accordance with IFRS 9.4.1.2A is not reduced by a loss allowance and an entity should not present the loss allowance separately in the statement of financial position as a reduction of the carrying amount of the financial asset.

**Compound financial instruments with multiple embedded derivatives**

If the entity issued an instrument that contains both a liability and an equity component and the instrument has multiple embedded derivatives whose values are interdependent (such as a callable convertible debt instrument), does the entity disclose the existence of those features?

**Defaults and breaches**

If, during the reporting period, there are breaches of loan agreement terms other than those described in IFRS 7.18, does the entity disclose the same information as required by IFRS 7.18 if those breaches permit the lender to demand accelerated repayment (unless the breaches were remedied, or the terms of the loan were renegotiated, on or before the end of the reporting period)?

**Statement of comprehensive income**

**Items of income, expense, gains and losses**

Does the entity disclose the following items of income, expense, gains or losses, either in the statement of comprehensive income or in the notes:

- Net gains or net losses on:
  - Financial assets or liabilities measured at fair value through profit or loss, showing separately:
    - Net gains or net losses on financial assets or financial liabilities designated as such upon initial recognition, or subsequently in accordance with IFRS 9.6.7.1
    - Net gains or net losses on financial assets or financial liabilities that are mandatorily measured at fair value through profit or loss in accordance with IFRS 9 (e.g., financial liabilities that meet the definition of held for trading in IFRS 9)
  - Financial liabilities designated as at fair value through profit or loss under the fair value option, showing separately:
    - The amount of gain or loss recognised in other comprehensive income
    - The amount of gain or loss recognised in profit or loss
  - Financial assets measured at amortised cost
  - Financial liabilities measured at amortised cost
  - Investments in equity instruments designated at fair value through other comprehensive income in accordance with IFRS 9.5.7.5
  - Financial assets measured at fair value through other comprehensive income in accordance with IFRS 9.4.1.2A, showing separately the amount of gain or loss recognised in other comprehensive income during the period and the amount reclassified upon derecognition from accumulated other comprehensive income to profit or loss for the period

Does the entity disclose either in the statement of comprehensive income or in the notes (calculated using the effective interest method) for financial assets that are measured at amortised cost or that are measured at fair value through other comprehensive income in
accordance with IFRS 9.4.1.2A (showing these amounts separately) or financial liabilities not at fair value through profit or loss:

- Total interest revenue
- Total interest expense

<td></td>
</tr>
</tbody>
</table>

The entity discloses the total interest expense recognised in profit or loss, but does not need to calculate such interest expense using the effective interest method as required under IFRS 7.20(b) for financial instruments that contain a discretionary participation feature.

New 720 IFRS 7.20(c) Does the entity disclose either in the statement of comprehensive income or in the notes, the fee income and expense (other than amounts included in determining the effective interest rate) arising from:

- Financial assets and financial liabilities that are not at fair value through profit or loss
- Trust and other fiduciary activities that result in the holding or investing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions

New 721 IFRS 7.20A If the entity derecognised a financial asset measured at amortised cost, does the entity disclose:

- An analysis of the gain or loss recognised in the statement of profit or loss and other comprehensive income arising from derecognition of those financial assets, showing separately gains and losses arising from derecognition
- The reasons for derecognising those financial assets

Other disclosures

Accounting policies

New 722 IFRS 7.21 IAS 1.117 Does the entity disclose its significant accounting policies comprising the measurement basis (or bases) used in preparing the financial statements and the other accounting policies that are relevant to an understanding of the financial statements in relation to financial instruments?

New 723 IFRS 7.85(a) Does the entity disclose, for financial liabilities designated as at fair value through profit or loss:

- The nature of the financial liabilities the entity has designated as at fair value through profit or loss
- The criteria for so designating such financial liabilities on initial recognition
- How the entity has satisfied the conditions in IFRS 9.4.2.2 for such designation

New 724 IFRS 7.85(aa) For financial assets designated at fair value through profit or loss, does the entity disclose:

- The nature of the financial assets the entity has designated as measured at fair value through profit or loss
- How the entity has satisfied the criteria in paragraph 4.1.5 of IFRS 9 for such designation

725 Does the entity disclose:

- Whether regular way purchases and sales of financial assets are accounted for at trade date or at settlement date (IFRS 9.3.1.2).
- How net gains or net losses on each category of financial instrument are determined, for example, whether the net gains or net losses on items at fair value through profit or loss include interest or dividend income

New 726 IFRS 7.85 IAS 1.122 Does the entity disclose management's judgements for financial instruments that have the most significant effect on the financial statements?

Hedge accounting

New 727 IFRS 7.21A Does the entity apply the disclosure requirements in IFRS 7.21B-24F for those risk exposures that an entity hedges and for which it elects to apply hedge accounting. Hedge accounting disclosures must provide information about:

- An entity’s risk management strategy and how it is applied to manage risk (see IFRS 7.22A-C)
b. How the entity’s hedging activities may affect the amount, timing and uncertainty of its future cash flows (see IFRS 7.23A-F)

c. The effect that hedge accounting has had on the entity’s statement of financial position, statement of comprehensive income and statement of changes in equity (see IFRS 7.24A-F)

**IFRS 7.21B**

An entity must present the required disclosures in a single note or separate section in its financial statements. However, an entity need not duplicate information that is already presented elsewhere, provided that the information is incorporated by cross-reference from the financial statements to some other statement, such as a management commentary or risk report that is available to users of the financial statements on the same terms as the financial statements and at the same time. Without the information incorporated by cross-reference, the financial statements are incomplete.

**IFRS 7.21D**

To meet the objectives of paragraph 21A, an entity must (except as otherwise specified below) determine how much detail to disclose, how much emphasis to place on different aspects of the disclosure requirements, the appropriate level of aggregation or disaggregation, and whether users of financial statements need additional explanations to evaluate the quantitative information disclosed. However, an entity must use the same level of aggregation or disaggregation that it uses for the disclosure requirements of related information in IFRS 9 and IFRS 13.

**IFRS 7.21C**

When paragraphs 22A-24F require the entity to separate by risk category the information disclosed, the entity must determine each risk category on the basis of the risk exposures an entity decides to hedge and for which hedge accounting is applied. An entity must determine risk categories consistently for all hedge accounting disclosures.

**New 728 IFRS 7.22A**

Does the entity explain its risk management strategy for each risk category of risk exposures that it decides to hedge and for which hedge accounting is applied. This explanation should enable users of financial statements to evaluate (for example):

a. How each risk arises

b. How the entity manages each risk; this includes whether the entity hedges an item in its entirety for all risks or hedges a risk component (or components) of an item and why

c. The extent of risk exposures that the entity manages

**New 729 IFRS 7.22B**

To meet the requirements in IFRS 7.22A, does the entity provide information that includes (but is not limited to) a description of:

a. The hedging instruments that are used (and how they are used) to hedge risk exposures

b. How the entity determines the economic relationship between the hedged item and the hedging instrument for the purpose of assessing hedge effectiveness

To meet the requirements in IFRS 7.22A, does the entity provide information that includes (but is not limited to) a description of:

a. The hedging instruments that are used (and how they are used) to hedge risk exposures

b. How the entity determines the economic relationship between the hedged item and the hedging instrument for the purpose of assessing hedge effectiveness

c. How the entity establishes the hedge ratio and what the sources of hedge ineffectiveness are

**New 730 IFRS 7.22C**

When an entity designates a specific risk component as a hedged item (see IFRS 9.6.3.7) does the entity provide, in addition to the disclosures required by IFRS 7.22A and 22B, qualitative or quantitative information about:

a. How the entity determined the risk component that is designated as the hedged item (including a description of the nature of the relationship between the risk component and the item as a whole)

b. How the risk component relates to the item in its entirety (e.g., the designated risk component historically covered on average 80% of the changes in fair value of the item as a whole)

**New 731 IFRS 7.23A**

Unless exempted by IFRS 7.23C, does the entity disclose, by risk category, quantitative information to allow users of its financial statements to evaluate the terms and conditions of hedging instruments and how they affect the amount, timing and uncertainty of future cash flows of the entity

</tbody>
</table>
when an entity accounts for those amounts in accordance with IFRS 9.6.5.16

New 744 IFRS 7.24f Does the entity disclose the information required in IFRS 7.24E separately by risk category. This disaggregation by risk may be provided in the notes to the financial statements

New 745 IFRS 7.24g If an entity designated a financial instrument, or a proportion of it, as measured at fair value through profit or loss because it uses a credit derivative to manage the credit risk of that financial instrument, does the entity disclose:

IFRS 9.6.7.1 a. For credit derivatives that have been used to manage the credit risk of financial instruments designated as measured at fair value through profit or loss in accordance with IFRS 9.6.7.1, a reconciliation of each of the nominal amount and the fair value at the beginning and at the end of the period

IFRS 9.6.7.1 b. The gain or loss recognised in profit or loss on designation of a financial instrument, or a proportion of it, as measured at fair value through profit or loss in accordance with IFRS 9.6.7.1

IFRS 9.6.7.4 c. On discontinuation of measuring a financial instrument, or a proportion of it, at fair value through profit or loss, that financial instrument’s fair value that has become the new carrying amount in accordance with IFRS 9.6.7.4 and the related nominal or principal amount (except for providing comparative information in accordance with IAS 1, an entity does not need to continue this disclosure in subsequent periods)

Fair value

IFRS 7.29 IFRS 4.App A The entity is not required to disclose fair value:

a. If the carrying amount is a reasonable approximation of fair value, for example, for financial instruments such as short-term trade receivables and payables

b. For a contract containing a discretionary participation feature, if the fair value of that feature cannot be measured reliably

c. For lease liabilities if the entity adopts IFRS 16 early

New IFRS 7.29(d) Does the entity disclose for each class of financial assets and financial liabilities, the fair value of that class of assets and liabilities in a way that permits it to be compared with its carrying amount (except for those noted in IFRS 7.29)

New 746 IFRS 7.25 IFRS 7.29 In disclosing fair values, does the entity group financial assets and financial liabilities into classes, but offset them only to the extent that their carrying amounts are offset in the statement of financial position

New 747 IFRS 7.26 Please note that for fair value measurements (whether recognised or only disclosed), the entity should also provide the disclosures required by IFRS 13.

New 748 IFRS 7.28 IFRS 9. BS.1.2A In some cases, an entity does not recognise a gain or loss on initial recognition of a financial asset or financial liability because the fair value is neither evidenced by a quoted price in an active market for an identical asset or liability (i.e., a Level 1 input) nor based on a valuation technique that uses only data from observable markets (see IFRS 9.BS.1.2A). In such cases, does the entity disclose by class of financial asset or financial liability:

IFRS 9. BS.1.2A (b) a. Its accounting policy for recognising in profit or loss the difference between the fair value at initial recognition and the transaction price to reflect a change in factors (including time) that market participants would take into account when pricing the asset or liability (see IFRS 9.BS.1.2A(b))

b. The aggregate difference yet to be recognised in profit or loss at the beginning and end of the reporting period and reconciliation of changes in the balance of this difference

c. Why it has concluded that the transaction price was not the best evidence of fair value, including a description of the evidence that supports the fair value

New 749 IFRS 7.30 IFRS 7.29(c) In the cases described in IFRS 7.29 (c), does the entity disclose information to help users of the financial statements make their own judgements about the extent of possible differences between the carrying amount of those contracts and their fair value, including:

a. The fact that the entity does not disclose fair value information for
Basic qualitative and quantitative disclosures are required for financial instruments. For each type of risk arising from financial instruments, the entity must disclose:

**Quality disclosures**
- The exposures to risk and how they arise
- Its objectives, policies and processes for managing the risk and the methods used to measure the risk
- Any changes in (a) or (b) from the previous period

**Quantitative disclosures**
- Summary quantitative data about its exposure to that risk at the end of the reporting period based on the information provided internally to key management personnel of the entity (as defined in IAS 24), for example, the entity's board of directors and chief executive officer
- If the entity uses several methods to manage a risk or an exposure, the entity must disclose information using the method or methods that provide most relevant and reliable information. IAS 8.10 also discusses relevance and reliability.
- The disclosures required by IFRS 7.35A-42 below to the extent they are not provided in accordance with (a)
- Concentrations of risk if not apparent from the disclosures made in accordance with (a) and (b)

For concentrations of risk, the entity may disclose:
- How management determines concentrations
- The shared characteristic that identifies each concentration (e.g. counterparty, geographical area, currency and/or market)
- The amount of the risk exposure associated with all financial instruments sharing that characteristic

The disclosures required by IFRS 7.33-42 focus on the risks that arise from financial instruments and how they have been managed. These risks typically include, but are not limited to, credit risk, liquidity risk and market risk.

The disclosures are either given in the financial statements or incorporated by cross-reference from the financial statements to some other statement, such as a management commentary or risk report that is available to users of the financial statements on the same terms as the financial statements and at the same time. Without the information incorporated by cross-reference, the financial statements are incomplete.

Qualitative disclosures in combination with quantitative disclosures enable users to gain an understanding of the nature and extent of risks arising from financial instruments and evaluate the entity's exposure to risk.

</tbody>
</table>
1. **Economic or other conditions.** The identification of concentrations of risk requires judgement taking into account the circumstances of the entity (see IFRS 7.1G18).

2. **In accordance with IFRS 7.B8,** disclosure of concentrations of risk includes the shared characteristic that identify each concentration. For example, the shared characteristic may refer to geographical distribution of counterparties by groups of countries, individual countries or regions within countries.

3. **If the quantitative data disclosed as at the end of the reporting period are unrepresentative of the entity’s exposure to risk during the period, does the entity provide further information that is representative?**

4. **To meet this requirement, the entity might disclose the highest, lowest and average amount of risk to which it was exposed during the reporting period.** For example, if an entity typically has a large exposure to a particular currency, but at the end of the reporting period unwinds the position, the entity might disclose a graph that shows the exposure at various times during the reporting period, or disclose the highest, lowest and average exposures.

### Credit risk

5. **An entity shall apply the disclosure requirements in IFRS 7.35F–35N to financial instruments to which the impairment requirements in IFRS 9 are applied.** However:

   a. For trade receivables, contract assets and lease receivables, IFRS 7.35J(a) applies to those trade receivables, contract assets or lease receivables on which lifetime expected credit losses are recognised in accordance with IFRS 9.5.5.15, if those financial assets are modified while more than 30 days past due;

   b. IFRS 7.35K(b) does not apply to lease receivables.

6. **The credit risk disclosures made in accordance with paragraphs 35F–35N shall enable users of financial statements to understand the effect of credit risk on the amount, timing and uncertainty of future cash flows.** To achieve this objective, credit risk disclosures shall provide:

   a. Information about an entity’s credit risk management practices and how they relate to the recognition and measurement of expected credit losses, including the methods, assumptions and information used to measure expected credit losses.

   b. Quantitative and qualitative information that allows users of financial statements to evaluate the amounts in the financial statements arising from expected credit losses, including changes in the amount of expected credit losses and the reasons for those changes.

   c. Information about an entity’s credit risk exposure (i.e., the credit risk inherent in an entity’s financial assets and commitments to extend credit) including significant credit risk concentrations.

   An entity need not duplicate information that is already presented elsewhere, provided that the information is incorporated by cross-reference from the financial statements to other statements, such as a management commentary or risk report that is available to users of the financial statements on the same terms as the financial statements and at the same time. Without the information incorporated by cross-reference, the financial statements are incomplete.

7. **To meet the objectives in paragraph 35B, an entity shall (except as otherwise specified) consider how much detail to disclose, how much emphasis to place on different aspects of the disclosure requirements, the appropriate level of aggregation or disaggregation, and whether users of financial statements need additional explanations to evaluate the quantitative information disclosed.**

8. **If the disclosures provided in accordance with IFRS 7.35F–35N are insufficient to meet the objectives in IFRS 7.35B, does the entity disclose additional information that is necessary to meet those objectives?**

### The credit risk management practices

9. **An entity must explain its credit risk management practices and how it manages credit risk.**
they relate to the recognition and measurement of expected credit losses. To meet this objective, does the entity disclose information that enables users of financial statements to understand and evaluate:

a. How an entity determined whether the credit risk of financial instruments has increased significantly since initial recognition, including, if and how:
   ▶ Financial instruments are considered to have low credit risk in accordance with IFRS 9.5.5.10, including the classes of financial instruments to which it applies
   ▶ The presumption in IFRS 9.5.5.11, that there have been significant increases in credit risk since initial recognition when financial assets are more than 30 days past due, has been rebutted

b. An entity’s definitions of default, including the reasons for selecting those definitions

   IFRS 7.B8A

   IFRS 7.35F(b) requires the disclosure of information about how an entity has defined default for different financial instruments and the reasons for selecting those definitions. In accordance with IFRS 9.5.5.9, the determination of whether lifetime expected credit losses should be recognised is based on the increase in the risk of a default occurring since initial recognition. Information about an entity’s definitions of default that will assist users of financial statements in understanding how an entity has applied the expected credit loss requirements in IFRS 9 may include:

   a. The qualitative and quantitative factors considered in defining default
   b. Whether different definitions have been applied to different types of financial instruments
   c. Assumptions about the cure rate (i.e., the number of financial assets that return to a performing status) after a default occurred on the financial asset
   d. How the instruments were grouped if expected credit losses were measured on a collective basis
   e. How an entity determined that financial assets are credit-impaired financial assets
   f. An entity’s write-off policy, including the indicators that there is no reasonable expectation of recovery and information about the policy for financial assets that are written-off but are still subject to enforcement activity
   g. How the requirements in IFRS 9.5.5.12 for the modification of contractual cash flows of financial assets have been applied, including how an entity:

      ▶ Determines whether the credit risk on a financial asset that has been modified while the loss allowance was measured at an amount equal to lifetime expected credit losses, has improved to the extent that the loss allowance reverts to being measured at an amount equal to 12-month expected credit losses in accordance with IFRS 9.5.5.5
      ▶ Monitors the extent to which the loss allowance on financial assets meeting the criteria in (i) is subsequently remeasured at an amount equal to lifetime expected credit losses in accordance with IFRS 9.5.5.3

   IFRS 7.B8B

   To assist users of financial statements in evaluating an entity’s restructuring and modification policies, IFRS 7.35F(f)(ii) requires the disclosure of information about how an entity monitors the extent to which the loss allowance on financial assets previously disclosed in accordance with IFRS 7.35F(f)(i) are subsequently measured at an amount equal to lifetime expected credit losses in accordance with IFRS 9.5.5.3.

   Quantitative information that will assist users in understanding the subsequent increase in credit risk of modified financial assets may include information about modified financial assets meeting the criteria in IFRS 7.35F(f)(i), for which the loss allowance has reverted to being measured at an amount equal to lifetime expected credit losses.
losses (i.e., a deterioration rate).

An entity must explain the inputs, assumptions and estimation techniques used to apply the requirements of IFRS 9.5.5. For this purpose, does the entity disclose:

a. The basis of inputs and assumptions and the estimation techniques used to:
   ▶ Measure the 12-month and lifetime expected credit losses    ☐ ☐ ☐
   ▶ Determine whether the credit risk of financial instruments has increased significantly since initial recognition ☐ ☐ ☐
   ▶ Determine whether a financial asset is a credit-impaired financial asset ☐ ☐ ☐

IFRS 7.35G(a) requires the disclosure of information about the basis of inputs and assumptions and the estimation techniques used to apply the impairment requirements in IFRS 9. An entity’s assumptions and inputs used to measure expected credit losses or determine the extent of increases in credit risk since initial recognition may include information obtained from internal historical information or rating reports and assumptions about the expected life of financial instruments and the timing of the sale of collateral.

b. How forward-looking information has been incorporated into the determination of expected credit losses, including the use of macroeconomic information ☐ ☐ ☐
c. Changes in the estimation techniques or significant assumptions made during the reporting period and the reasons for those changes ☐ ☐ ☐

Quantitative and qualitative information about amounts arising from expected credit losses

To explain the changes in the loss allowance and the reasons for those changes, does the entity provide, by class of financial instrument, a reconciliation from the opening balance to the closing balance of the loss allowance, in a table, showing separately the changes during the period for:

a. The loss allowance measured at an amount equal to 12-month expected credit losses ☐ ☐ ☐
b. The loss allowance measured at an amount equal to lifetime expected credit losses for:
   ▶ Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets ☐ ☐ ☐
   ▶ Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) ☐ ☐ ☐
   ▶ Trade receivables, contract assets or lease receivables for which the loss allowances are measured in accordance with IFRS 9.5.5.15 ☐ ☐ ☐
c. Financial assets that are purchased or originated credit-impaired.
   In addition to the reconciliation, an entity must disclose the total amount of undiscounted expected credit losses at initial recognition on financial assets initially recognised during the reporting period ☐ ☐ ☐

In accordance with IFRS 7.35H, an entity is required to explain the reasons for the changes in the loss allowance during the period. In addition to the reconciliation from the opening balance to the closing balance of the loss allowance, it may be necessary to provide a narrative explanation of the changes. This narrative explanation may include an analysis of the reasons for changes in the loss allowance during the period, including:

a. The portfolio composition ☐ ☐ ☐
b. The volume of financial instruments purchased or originated ☐ ☐ ☐
c. The severity of the expected credit losses ☐ ☐ ☐

For loan commitments and financial guarantee contracts, the loss allowance is recognised as a provision. Does the entity disclose information about the changes in the loss allowance for financial assets separately from those for loan commitments and financial guarantee contracts ☐ ☐ ☐
However, if a financial instrument includes both a loan (i.e., a financial asset) and an undrawn commitment (i.e., a loan commitment) component and the entity cannot separately identify the expected credit losses on the loan commitment component from those on the financial asset component, the expected credit losses on the loan commitment should be recognised together with the loss allowance for the financial asset. To the extent that the combined expected credit losses exceed the gross carrying amount of the financial asset, the expected credit losses should be recognised as a provision.

To enable users of financial statements to understand the changes in the loss allowance disclosed in accordance with IFRS 7.35H, does the entity provide an explanation of how significant changes in the gross carrying amount of financial instruments during the period contributed to changes in the loss allowance?

To enable users of financial statements to understand the nature and effect of modifications of contractual cash flows on financial assets that have not resulted in derecognition and the effect of such modifications on the measurement of expected credit losses, does the entity disclose:

a. The amortised cost before the modification and the net modification gain or loss recognised for financial assets for which the contractual cash flows have been modified during the reporting period while they had a loss allowance measured at an amount equal to lifetime expected credit losses

b. The gross carrying amount, at the end of the reporting period, of financial assets that have been modified since initial recognition at a time when the loss allowance was measured at an amount equal to lifetime expected credit losses and for which the loss allowance has changed during the reporting period to an amount equal to 12-month expected credit losses

To enable users of financial statements to understand the effect of collateral and other credit enhancements on the amounts arising from expected credit losses, does the entity disclose by class of financial instrument:

a. The amount that best represents its maximum exposure to credit risk at the end of the reporting period without taking account of any collateral held or other credit enhancements (e.g., netting agreements that do not qualify for offset in accordance with IAS 32)
contracts, interest rate swaps and credit derivatives. If the entity measures the resulting asset at fair value, the maximum exposure to credit risk at the end of the reporting period will equal the carrying amount

c. Granting financial guarantees. In this case, the maximum exposure to credit risk is the maximum amount the entity would have to pay if the guarantee is called on, which may be significantly greater than the amount recognised as a liability

d. Making a loan commitment that is irrevocable over the life of the facility or is revocable only in response to a material adverse change. If the issuer cannot settle the loan commitment net in cash or another financial instrument, the maximum credit exposure is the full amount of the commitment. This is because it is uncertain whether the amount of any undrawn portion may be drawn upon in the future. This may be significantly greater than the amount recognised as a liability

b. A narrative description of collateral held as security and other credit enhancements, including:
   ➤ A description of the nature and quality of the collateral held
   ➤ An explanation of any significant changes in the quality of that collateral or credit enhancements as a result of deterioration or changes in the collateral policies of the entity during the reporting period
   ➤ Information about financial instruments for which an entity has not recognised a loss allowance because of the collateral

Please note that IFRS 7.35K(b) does not apply to lease receivables

c. Quantitative information about the collateral held as security and other credit enhancements (for example, quantification of the extent to which collateral and other credit enhancements mitigate credit risk) for financial assets that are credit-impaired at the reporting date

IFRS 7.35K requires the disclosure of information that will enable users of financial statements to understand the effect of collateral and other credit enhancements on the amount of expected credit losses. An entity is neither required to disclose information about the fair value of collateral and other credit enhancements nor is it required to quantify the exact value of the collateral that was included in the calculation of expected credit losses (i.e., the loss given default).

A narrative description of collateral and its effect on amounts of expected credit losses might include information about:
   a. The main types of collateral held as security and other credit enhancements (examples of the latter being guarantees, credit derivatives and netting agreements that do not qualify for offset in accordance with IAS 32)
   b. The volume of collateral held and other credit enhancements and its significance in terms of the loss allowance
   c. The policies and processes for valuing and managing collateral and other credit enhancements
   d. The main types of counterparties to collateral and other credit enhancements and their creditworthiness
   e. Information about risk concentrations within the collateral and other credit enhancements

Does the entity disclose the contractual amount outstanding on financial assets that were written off during the reporting period and are still subject to enforcement activity

Credit risk exposure

To enable users of financial statements to assess an entity’s credit risk exposure and understand its significant credit risk concentrations, does the entity disclose, by credit risk rating grades:
   ➤ The gross carrying amount of financial assets
   ➤ The exposure to credit risk on loan commitments and financial guarantee contracts

This information must be provided separately for financial

<tr>
<td>IFRS 7.BBH IFRS 7.35M requires the disclosure of information about an entity’s credit risk exposure and significant concentrations of credit risk at the reporting date. A concentration of credit risk exists when a number of counterparties are located in a geographical region or are engaged in similar activities and have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. An entity should provide information that enables users of financial statements to understand whether there are groups or portfolios of financial instruments with particular features that could affect a large portion of that group of financial instruments such as concentration to particular risks. This could include, for example, loan-to-value groupings, geographical, industry or issuer-type concentrations.</td>

</table>
Activities that give rise to credit risk and the associated maximum exposure to credit risk include, but are not limited to:

a. Granting loans and receivables to customers and placing deposits with other entities. In these cases, the maximum exposure to credit risk is the carrying amount of the related financial assets.

b. Entering into derivative contracts such as foreign exchange contracts, interest rate swaps and credit derivatives. If the entity measures the resulting asset at fair value, the maximum exposure to credit risk at the end of the reporting period will equal the carrying amount.

c. Granting financial guarantees. In this case, the maximum exposure to credit risk is the maximum amount the entity would have to pay if the guarantee is called on, which may be significantly greater than the amount recognised as a liability.

d. Making a loan commitment that is irrevocable over the life of the facility or is revocable only in response to a material adverse change. If the issuer cannot settle the loan commitment net in cash or another financial instrument, the maximum credit exposure is the full amount of the commitment. This is because it is uncertain whether the amount of any undrawn portion may be drawn upon in the future. This may be significantly greater than the amount recognised as a liability.

b. A description of collateral held as security and other credit enhancements, and their financial effect (e.g., quantification of the extent to which collateral and other credit enhancements mitigate credit risk) in respect of the amount that best represents the maximum exposure to credit risk (whether disclosed in accordance with (a) or represented by the carrying amount of a financial instrument)

Collateral and other credit enhancements obtained

If the entity obtains financial or non-financial assets during the period by taking possession of collateral it holds as security or calling on other credit enhancements (e.g., guarantees), and such assets meet the recognition criteria in other IFRS, does the entity disclose for such assets held at the reporting date:

a. The nature and carrying amount of the assets obtained
b. If the assets are not readily convertible into cash, its policies for disposing of such assets or for using them in its operations

Liquidity risk

Does the entity disclose:

a. A maturity analysis for non-derivative financial liabilities (including issued financial guarantee contracts) that shows the remaining contractual maturities
amounts for pay-floating/receive-fixed interest rate swaps for which net cash flows are exchanged, and contractual amounts to be exchanged in a derivative financial instrument (e.g., a currency swap) for which gross cash flows are exchanged and gross loan commitments.

Such undiscounted cash flows differ from the amount included in the statement of financial position because the statement of financial position amount is based on discounted cash flows. If the amount payable is not fixed, the entity discloses the amount based on the conditions existing at the end of the reporting period. For example, if the amount disclosed may be based on the level of the index at the end of the reporting period.

b. A maturity analysis for derivative financial liabilities, which includes the remaining contractual maturities for those derivative financial liabilities for which contractual maturities are essential for an understanding of the timing of the cash flows

For example, this would be the case for:

a. An interest rate swap with a remaining maturity of five years in a cash flow hedge of a variable rate financial asset or liability
b. All loan commitments

c. How it manages the liquidity risk inherent in (a) and (b)

The entity discloses a maturity analysis of financial assets it holds for managing liquidity risk (e.g., financial assets that are readily saleable or expected to generate cash inflows to meet cash outflows on financial liabilities), if that information is necessary to enable users of its financial statements to evaluate the nature and extent of liquidity risk.

Other factors that the entity considers in IFRS 7.39(c) include, but are not limited to, whether the entity has the following:

a. Committed borrowing facilities (e.g., commercial paper facilities) or other lines of credit (for example, stand-by credit facilities) that it can access to meet liquidity needs
b. Deposits at central banks to meet liquidity needs
c. Very diverse funding sources
d. Significant concentrations of liquidity risk in either its assets or its funding sources
e. Internal control processes and contingency plans for managing liquidity risk
f. Instruments that include accelerated repayment terms (e.g., upon the downgrade of the entity’s credit rating)
g. Instruments that could require the posting of collateral (e.g., margin calls for derivatives)
h. Instruments that allow the entity to choose whether it settles its financial liabilities by delivering cash (or another financial asset) or by delivering its own shares

Or
i. Instruments that are subject to master netting agreements

d. Does the entity explain how summary quantitative data about its exposure to liquidity risk are determined

In accordance with IFRS 7.34(a), an entity discloses summary quantitative data about its exposure to liquidity risk on the basis of information provided internally to key management personnel.

e. If the outflow of cash (or another financial asset) included in the data in (d) above could either:
   - Occur significantly earlier than indicated in the data
   - Be for significantly different amounts from those indicated in the data (e.g., for a derivative that is included in the data on a net settlement basis, but for which, the counterparty has the option to require gross settlement)

Does the entity state that fact and provide quantitative information that enables users of its financial statements to evaluate the extent of

this risk unless the information is included in the contractual maturity analysis required by IFRS 7.39(a) or 39(b) above

**Market risk**

**Sensitivity analysis**

An entity must provide sensitivity analyses for the whole of its business, but may provide different types of sensitivity analyses for different classes of financial instruments.

**Interest rate risk**

Interest rate risk arises on interest-bearing financial instruments recognised in the statement of financial position (e.g., debt instruments acquired or issued) and on some financial instruments not recognised in the statement of financial position (e.g., some loan commitments).

**Currency risk**

Currency risk does not arise from financial instruments that are non-monetary items or from financial instruments denominated in the functional currency. An entity discloses a sensitivity analysis for each currency to which it has significant exposure.

**Other price risk**

Other price risk arises on financial instruments because of changes in, for example, commodity prices or equity prices. To comply with IFRS 7.40, the entity might disclose the effect of a decrease in a specified stock market index, commodity price, or other risk variable. For example, if an entity gives residual value guarantees that are financial instruments, the entity discloses an increase or decrease in the value of the assets to which the guarantee applies.

Two examples of financial instruments that give rise to equity price risk are a holding of equities in another entity and an investment in a trust, which, in turn, holds investments in equity instruments. The fair values of such financial instruments are affected by changes in the market price of the underlying equity instruments.

Under IFRS 7.40(a), an entity discloses the sensitivity of profit or loss separately from the sensitivity of equity. For example, the sensitivity from instruments classified as at fair value through profit or loss is disclosed separately from the sensitivity of instruments whose changes in fair value are presented in other comprehensive income.

Financial instruments that the entity classifies as equity instruments are not remeasured. Neither profit or loss or equity will be affected by the equity price risk of those instruments. Accordingly, no sensitivity analysis is required.

**Disclosure made**

**August 2016 Disclosure Checklist**

185
on profit or loss (i.e., interest expense) for the current year if interest rates had varied by reasonably possible amounts.

b. Entities are not required to disclose the effect on profit or loss and equity for each change within a range of reasonably possible changes of the relevant risk variable. Disclosure of the effects of the changes at the limits of the reasonably possible range are sufficient.

In determining what a reasonably possible change in the relevant risk variable is, the entity considers the following:

a. The economic environments in which it operates. A reasonably possible change does not include remote or worst case scenarios or stress tests. Moreover, if the rate of change in the underlying risk variable is stable, the entity need not alter the chosen reasonably possible change in the risk variable. For example, assume that interest rates are 5% and an entity determines that a fluctuation in interest rates of ±50 basis points is reasonably possible. It would disclose the effect on profit or loss and equity if interest rates were to change to 4.5% or 5.5%. In the next period, interest rates have increased to 5.5%. The entity continues to believe that interest rates may fluctuate by ±50 basis points (i.e., the rate of change in interest rates is stable). The entity discloses the effect on profit or loss and equity if interest rates were to change to 5% or 6%. The entity is not required to revise its assessment that interest rates might reasonably fluctuate, unless there is evidence that interest rates have become significantly more volatile.

b. The time frame over which it is making the assessment. The sensitivity analysis shows the effects of changes that are considered reasonably possible over the period until the entity will next present these disclosures, which is usually its next annual reporting period.

If the entity prepares a sensitivity analysis, such as a value-at-risk, that reflects interdependencies between risk variables (e.g., interest rates and exchange rates) and uses it to manage financial risks, the entity may use that sensitivity analysis in place of the analysis in IFRS 7.40 above. If the entity uses such a sensitivity analysis, does the entity also explain:

a. The method used in preparing such a sensitivity analysis, and the main parameters and assumptions underlying the data

b. The objective of the method used and limitations that may result in the information not fully reflecting the fair value of the assets and liabilities involved

IFRS 7.41 applies even if such methodology measures only the potential for loss and does not measure the potential for gain. Such an entity might comply with IFRS 7.41(a) by disclosing the type of value-at-risk model used (e.g., whether the model relies on Monte Carlo simulations), an explanation about how the model works and the main assumptions (e.g., the holding period and confidence level). Entities might also disclose the historical observation period and weightings applied to observations within that period, an explanation of how options are dealt with in the calculations, and which volatilities and correlations (or, alternatively, Monte Carlo probability distribution simulations) are used.

Other market risk disclosures

If the sensitivity analyses in IFRS 7.40 or 41 above are unrepresentative of a risk inherent in a financial instrument (e.g., because the exposure at the end of the reporting period does not reflect the exposure during the reporting period), does the entity disclose that fact and the reason it believes the sensitivity analyses are unrepresentative

The entity discloses additional information if the sensitivity analysis is unrepresentative of a risk inherent in a financial instrument. This can occur if:

a. A financial instrument contains terms and conditions whose effects are not apparent from the sensitivity analysis, e.g., options that remain out of (or in) the money for the chosen change in the risk variable.

b. Financial assets are illiquid, e.g., if there is a low volume of
transactions in similar assets and the entity finds it difficult to find a counterparty
Or

c. The entity has a large holding of a financial asset that, if sold in its entirety, would be sold at a discount or premium to the quoted market price for a smaller holding

Puttable instruments and other similar instruments classified as equity

770  
IAS 1.80A

If the entity reclassifies:

a. A puttable financial instrument classified as an equity instrument
Or

b. An instrument that imposes on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation, and is classified as an equity instrument
between financial liabilities and equity, does it disclose:

- The amount reclassified into and out of each category (financial liabilities or equity)
- The timing of the reclassification
- The reason for the reclassification

771  
IAS 1.136A

For puttable financial instruments classified as equity instruments, does the entity disclose:

a. Summary quantitative data about the amount classified as equity
b. Its objectives, policies and processes for managing its obligation to repurchase or redeem the instruments if required to do so by the instrument holders, including any changes from the previous period
c. The expected cash outflow on redemption or repurchase of that class of financial instruments
d. Information about how the expected cash outflow on redemption or repurchase was determined

Offset financial assets and financial liabilities

772  
IAS 32.43

When an entity has the right to receive or pay a single net amount and intends to do so, it has, in effect, only a single financial asset or financial liability. In other circumstances, financial assets and financial liabilities are presented separately from each other consistently with their characteristics as resources or obligations of the entity.

IFRS 7.13A

Disclosures below also apply to recognised financial instruments that are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are set off in accordance with IAS 32.42.

IFRS 7.13B

An entity must disclose information to enable users of its financial statements to evaluate the effect, or potential effect, of netting arrangements on the entity’s financial position. This includes the effect, or potential effect, of rights of set-off associated with the entity’s recognised financial assets and recognised financial liabilities that are within the scope of IFRS 7.13A.

773  
IFRS 7.13C

Does the entity separately disclose, in a tabular format (unless another format is more appropriate), recognised financial assets and recognised financial liabilities that have been set off in accordance with IAS 32.42 or that are subject to an enforceable master netting arrangement or similar agreement, the following quantitative information:

a. The gross amounts of those recognised financial assets and recognised financial liabilities
b. The amounts that are set off in accordance with the criteria in IAS 32.42 when determining the net amounts presented in the statement of financial position
c. The net amounts presented in the statement of financial position
d. The amounts subject to an enforceable master netting arrangement or similar agreement that are not otherwise included in b. above (for each instrument limited to the amount included in c. above), including:
- Amounts related to recognised financial instruments that do not
meet some or all of the offsetting criteria in IAS 32.42
  ▶ Amounts related to financial collateral (including cash collateral)

e. The net amount after deducting the amounts in d. from the amounts in c. above

773 IFRS 7.13E Does the entity disclose a description of the rights of set-off associated with the entity’s recognised financial assets and recognised financial liabilities subject to enforceable master netting arrangements and similar agreements that are disclosed in accordance with IFRS 7.13C (d) above, including the nature of those rights

774 IFRS 7.13F Does the entity cross-reference the information of IFRS 7.13B-13E above if it is disclosed in more than one note to the financial statements

775 IFRIC 19.11 Does the entity disclose a gain or loss recognised in accordance with paragraphs 9 and 10 of IFRIC 19 as a separate line item in profit or loss or in the notes

iFRIC 19.2 IFRIC 19 provides guidance for the accounting when an entity renegotiates terms of a liability, with the result that a debtor extinguishes a financial liability fully or partially by issuing equity instruments to the creditor.

Transition requirements

IFRS 9.7.2.1 Despite the requirements of IFRS 9.7.2.1, an entity that adopts the classification and measurement requirements of IFRS 9 (2014) must provide the disclosures set out in IFRS 7.42L - 420. The entity need not restate prior periods. The entity may restate prior periods if, and only if, it is possible without the use of hindsight.

IFRS 7.42O In the reporting period that includes the date of initial application of IFRS 9, an entity is not required to disclose the line item amounts that would have been reported in accordance with the classification and measurement requirements (which includes the requirements related to amortised cost measurement of financial assets and impairment in sections 5.4 and 5.5 of IFRS 9) of:
  a. IFRS 9 for prior periods
  b. IAS 39 for the current period

New 776 IFRS 7.42I In the reporting period that includes the date of initial application of IFRS 9, does the entity disclose the following information for each class of financial assets and financial liabilities as at the date of initial application:
  a. The original measurement category and carrying amount determined in accordance with IAS 39 or in accordance with a previous version of IFRS 9 (if the entity’s chosen approach to applying IFRS 9 involves more than one date of initial application for different requirements)
  b. The new measurement category and carrying amount determined in accordance with IFRS 9
  c. The amount of any financial assets and financial liabilities in the statement of financial position that were previously designated as measured at fair value through profit or loss, but are no longer so designated, distinguishing between those that IFRS 9 requires an entity to reclassify and those that an entity elects to reclassify at the date of initial application

IFRS 7.42I In accordance with IFRS 9.7.2.2, depending on the entity’s chosen approach to applying IFRS 9, the transition can involve more than one date of initial application. Therefore, this paragraph may result in disclosure on more than one date of initial application. The entity must present these quantitative disclosures in a table unless another format is more appropriate.

New 777 IFRS 7.42J In the reporting period that includes the date of initial application of IFRS 9, does the entity disclose qualitative information to enable users to understand:
  a. How it applied the classification requirements in IFRS 9 to those financial assets whose classification has changed as a result of applying IFRS 9
b. The reasons for any designation or de-designation of financial assets or financial liabilities as measured at fair value through profit or loss at the date of initial application

IFRS 7.42J

In accordance with IFRS 9.7.2.2, depending on the entity’s chosen approach to applying IFRS 9, the transition can involve more than one date of initial application. Therefore, this paragraph may result in disclosure on more than one date of initial application.

New

New

IFRS 7.42L

When required by IFRS 7.42K, does the entity disclose the changes in the classifications of financial assets and financial liabilities as at the date of initial application of IFRS 9, showing separately:

a. The changes in the carrying amounts on the basis of their measurement categories in accordance with IAS 39 (i.e., not resulting from a change in measurement attribute on transition to IFRS 9)

b. The changes in the carrying amounts arising from a change in measurement attribute on transition to IFRS 9

IFRS 7.42L

Please note that the disclosures in IFRS 7.42L need not be made after the annual reporting period in which the entity initially applies the classification and measurement requirements for financial assets in IFRS 9.

New

New

IFRS 7.42M

When required by IFRS 7.42K, does the entity disclose the following for financial assets and financial liabilities that have been reclassified so that they are measured at amortised cost and, in the case of financial assets, that have been reclassified out of fair value through profit or loss so that they are measured at fair value through other comprehensive income, as a result of the transition to IFRS 9:

a. The fair value of the financial assets or financial liabilities at the end of the reporting period

b. The fair value gain or loss that would have been recognised in profit or loss or other comprehensive income during the reporting period if the financial assets or financial liabilities had not been reclassified

IFRS 7.42M

Please note that the disclosures in IFRS 7.42M need not be made after the annual reporting period in which the entity initially applies the classification and measurement requirements for financial assets in IFRS 9.

New

New

IFRS 7.42N

When required by IFRS 7.42K, does the entity disclose the following for financial assets and financial liabilities that have been reclassified out of the fair value through profit or loss category as a result of the transition to IFRS 9:

a. The effective interest rate determined on the date of initial application

b. The interest revenue or expense recognised

IFRS 7.42N

Please note that the disclosures in IFRS 7.42N need not be made after the annual reporting period in which the entity initially applies the classification and measurement requirements for financial assets in IFRS 9. However, if an entity treats the fair value of a financial asset or financial liability as its amortised cost at the date of initial application, the disclosures in IFRS 7.44U(c) and (d) must be made for each reporting period following reclassification until derecognition.

New

New

IFRS 7.42O

When an entity presents the disclosures set out in IFRS 7.42K-42N, do those disclosures, and the disclosures in IFRS 7.25, permit reconciliation between:

a. The measurement categories presented in accordance with IAS 39 and IFRS 9

b. The class of financial instrument as at the date of initial application

New

IFRS 7.42P

On the date of initial application of section 5.5 of IFRS 9, does the entity disclose information that would permit the reconciliation of the ending impairment allowances, in accordance with IAS 39, and the provisions, in accordance with IAS 37, to the opening loss allowances determined in accordance with IFRS 9.

IFRS 7.42P

For financial assets, this disclosure must be provided by the related financial assets’ measurement categories, in accordance with IAS 39 and IFRS 9, and must show separately the effect of the changes in the measurement category on the loss allowance at that date.
Does the entity disclose the carrying amount at the reporting date of the financial assets whose contractual cash flow characteristics have been assessed based on the facts and circumstances that existed at the initial recognition of the financial asset without taking into account the requirements related to the modification of the time value of money element in IFRS 9.B4.1.9B-B4.1.9D until those financial assets are derecognised?

In accordance with IFRS 9.7.2.4, if it is impracticable (as defined in IAS 8) at the date of initial application of IFRS 9 for an entity to assess a modified time value of money element in accordance with IFRS 9.B4.1.9B-B4.1.9D based on the facts and circumstances that existed at the initial recognition of the financial asset, an entity shall assess the contractual cash flow characteristics of that financial asset based on the facts and circumstances that existed at the initial recognition of the financial asset without taking into account the requirements related to the modification of the time value of money element in IFRS 9.B4.1.9B-B4.1.9D.

Does the entity disclose the carrying amount at the reporting date of the financial assets whose contractual cash flow characteristics have been assessed based on the facts and circumstances that existed at the initial recognition of the financial asset without taking into account the exception for prepayment features in IFRS 9.B4.1.12 until those financial assets are derecognised?

In accordance with IFRS 9.7.2.5, if it is impracticable (as defined in IAS 8) at the date of initial application for an entity to assess whether the fair value of a prepayment feature was insignificant in accordance with IFRS 9.B4.1.12(d) based on the facts and circumstances that existed at the initial recognition of the financial asset, an entity shall assess the contractual cash flow characteristics of that financial asset based on the facts and circumstances that existed at the initial recognition of the financial asset without taking into account the exception for prepayment features in IFRS 9.B4.1.12.

**IFRS 15 Revenue from Contracts with Customers**

IFRS 15 Revenue from Contracts with Customers was issued in May 2014. It applies to all contracts with customers, with limited exceptions. IFRS 15 is effective for annual periods beginning on or after 1 January 2018. Earlier application is permitted. Clarifications to IFRS 15 Revenue from Contracts with Customers was issued in April 2016. An entity must apply those amendments for annual reporting periods beginning on or after 1 January 2018. Earlier application is permitted. If an entity applies those amendments for an earlier period, it must disclose that fact.

**Transition to IFRS 15**

An entity adopts IFRS 15 using one of the following two methods:

a. Retrospectively to each prior reporting period presented in accordance with IAS 8, subject to the expedients in IFRS 15.C5

Or

b. Retrospectively with the cumulative effect of initially applying IFRS 15 recognised at the date of initial application in accordance with IFRS 15.C7-C8

For the purposes of the transition requirements:

a. The date of initial application is the start of the reporting period in which an entity first applies IFRS 15

b. A completed contract is a contract for which the entity has transferred all of the goods or services identified in accordance with IAS 11 Construction Contracts, IAS 18 Revenue and related interpretations

If the entity applies IFRS 15 in its annual IFRS financial statements for a period that begins before 1 January 2018, does it disclose that fact?

Full retrospective approach

If IFRS 15 is applied retrospectively, in accordance with IFRS 15.C3(a), does the entity disclose the adjustment to the opening balance of each affected component of equity for the earliest prior period?
period presented and the other comparative amounts for each prior period presented as if the entity had always applied the new accounting policy

If the initial application of IFRS 15 has an effect on the current period or any prior period presented or might have an effect on future periods, unless it is impracticable to determine the amount of the adjustment, does the entity disclose:

a. The title of the IFRS  

b. That the change in accounting policy is in accordance with its transitional provisions, if applicable  

c. The nature of the change in accounting policy  

d. The description of transitional provisions, if applicable  

e. The transitional provisions that might have an effect on future periods, if applicable

f. The amount of the adjustment for each financial statement line item affected and the basic and diluted earnings per share for the annual period immediately preceding the first annual period for which IFRS 15 is applied, to the extent practicable (if IAS 33 applies to the entity)

g. The amount of the adjustment relating to periods before those presented, to the extent practicable  

h. If retrospective application is impracticable for a particular prior period, or for periods before those presented, the circumstances that led to the existence of that condition and a description of how and from when the change in accounting policy has been applied

Financial statements of subsequent periods need not repeat these disclosures.

Does the entity disclose all of the following for any of the practical expedients in IFRS 15.C5 that it uses:

a. The expedients that have been used  

b. To the extent reasonably possible, a qualitative assessment of the estimated effect of applying each of those expedients

An entity may use one or more of the following practical expedients when applying IFRS 15 retrospectively under IFRS 15.C3(a):

a. For completed contracts, an entity need not restate contracts that begin and end within the same annual reporting period.

If an entity adopts the amendments to IFRS 15 issued in April 2016 early, contracts that are completed contracts at the beginning of the earliest period presented need not be restated.

b. For completed contracts that have variable consideration, an entity may use the transaction price at the date the contract was completed rather than estimating variable consideration amounts in the comparative reporting periods.

c. For all reporting periods presented before the date of initial application, an entity need not disclose the amount of the transaction price allocated to the remaining performance obligations and an explanation of when the entity expects to recognise that amount as revenue. (see IFRS 15.120)

d. If an entity applies the amendments to IFRS 15 early, for contracts that were modified before the beginning of the earliest period presented, an entity need not retrospectively restate the contract for those contract modifications under IFRS 15.20-21. Instead, an entity must reflect the aggregate effect of all of the modifications that occur before the beginning of the earliest period presented when:

(i) Identifying the satisfied and unsatisfied performance
Modified retrospective approach

If IFRS 15 is applied retrospectively in accordance with IFRS 15.C3(b), for reporting periods that include the date of initial application does the entity provide both of the following:

a. The amount by which each financial statement line item is affected in the current reporting period by the application of IFRS 15 as compared to IAS 11, IAS 18 and related Interpretations that were in effect before the change

b. An explanation of the reasons for significant changes identified in IFRS 15.C8(a)

New 789 IFRS 15.C8

Clarifications to IFRS 15 (Amendments in April 2016)

If the entity applies the amendments to IFRS 15 early and uses the practical expedient under IFRS 15.C7A, does it disclose the information required by IFRS 15.C6

New 790 IFRS 15.C7A

Presentation

Does the entity present any unconditional rights to consideration separately as a receivable

New 791 IFRS 15.105

A receivable is an entity’s right to consideration that is unconditional. A right to consideration is unconditional if only the passage of time is required before payment of that consideration is due. For example, an entity would recognise a receivable if it has a present right to payment even though that amount may be subject to refund in the future. An entity must account for a receivable in accordance with IFRS 9 or IAS 39, as applicable.

New 792 IFRS 15.108

If the entity performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, does the entity present the contract as a contract asset, excluding any amounts presented as a receivable

New 793 IFRS 15.107
financial asset that is within the scope of IFRS 9 or IAS 39, as applicable (see also IFRS 15.113(b)).

<th>No</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>New 794 IFRS 15.106</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>If a customer pays consideration, or the entity has a right to an amount of consideration that is unconditional (i.e., a receivable), before the entity transfers a good or service to the customer, does the entity present the contract as a contract liability when the payment is made or the payment is due (whichever is earlier)</td>
</tr>
</tbody>
</table>

A contract liability is an entity's obligation to transfer goods or services to a customer for which the entity has received consideration (or an amount of consideration is due) from the customer.

| New 795 IFRS 15.109 | ☐ | ☐ | ☐ | If the entity uses an alternative description for a contract asset, does the entity provide sufficient information for a user of the financial statements to distinguish between receivables and contract assets |

IFRS 15 uses the terms 'contract asset' and 'contract liability', but does not prohibit an entity from using alternative descriptions in the statement of financial position for those items.

The existence of a significant financing component in the contract

| New 796 IFRS 15.65 | ☐ | ☐ | ☐ | Does the entity present the effects of financing (interest revenue or interest expense) separately from revenue from contracts with customers in the statement of comprehensive income |

Interest revenue or interest expense is recognised only to the extent that a contract asset (or receivable) or a contract liability is recognised in accounting for a contract with a customer.

Sale with a right of return

| New 797 IFRS 15.825 | ☐ | ☐ | ☐ | Does the entity present the asset for an entity's right to recover products from a customer on settling a refund liability separately from the refund liability |

An asset recognised for an entity's right to recover products from a customer on settling a refund liability shall initially be measured by reference to the former carrying amount of the product (for example, inventory) less any expected costs to recover those products (including potential decreases in the value to the entity of returned products). At the end of each reporting period, an entity must update the measurement of the asset arising from changes in expectations about products to be returned.

Disclosures

| IFRS 15.110 | ☐ | ☐ | ☐ | The objective of the disclosure requirements in IFRS 15 is for an entity to disclose sufficient information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. |

An entity must consider the level of detail necessary to satisfy the disclosure objective and how much emphasis to place on each of the various requirements. An entity must aggregate or disaggregate disclosures so that useful information is not obscured by either the inclusion of a large amount of insignificant detail or the aggregation of items that have substantially different characteristics.

| IFRS 15.112 | ☐ | ☐ | ☐ | An entity need not disclose information in accordance with IFRS 15 if it has provided the information in accordance with another standard. |

New 798 IFRS 15.110 | ☐ | ☐ | ☐ | To achieve the disclosure objective stated in IFRS 15.110, does the entity disclose qualitative and quantitative information about all of the following:

a. Its contracts with customers (see IFRS 15.113-122) |

b. The significant judgements, and changes in the judgements, made in applying IFRS 15 to those contracts (see IFRS 15.123-126) |

c. Any assets recognised from the costs to obtain or fulfil a contract with a customer in accordance with IFRS 15.91 or IFRS 15.95 (see IFRS 15.127-128) |

Contracts with customers

| New 799 IFRS 15.113 | ☐ | ☐ | ☐ | Does the entity disclose all of the following amounts for the reporting period unless those amounts are presented separately in the statement of comprehensive income in accordance with other standards: |
a. Revenue recognised from contracts with customers, which the entity must disclose separately from its other sources of revenue  

b. Any impairment losses recognised (in accordance with IFRS 9 or IAS 39, as applicable) on any receivables or contract assets arising from the entity’s contracts with customers, which the entity must disclose separately from impairment losses from other contracts

**Disaggregation of revenue**

New 800 IFRS 15.114 Does the entity disaggregate revenue recognised from contracts with customers into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors

IFRS 15.87 IFRS 15.114 requires an entity to disaggregate revenue from contracts with customers into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors. Consequently, the extent to which an entity’s revenue is disaggregated for the purposes of this disclosure depends on the facts and circumstances that pertain to the entity’s contracts with customers. Some entities may need to use more than one type of category to meet the objective in IFRS 15.114 for disaggregating revenue. Other entities may meet the objective by using only one type of category to disaggregate revenue.

IFRS 15.88 When selecting the type of category (or categories) to use to disaggregate revenue, an entity must consider how information about the entity’s revenue has been presented for other purposes, including all of the following:

a. Disclosures presented outside the financial statements (for example, in earnings releases, annual reports or investor presentations)

b. Information regularly reviewed by the chief operating decision maker for evaluating the financial performance of operating segments

c. Other information that is similar to the types of information identified in IFRS 15.88(a) and (b) and that is used by the entity or users of the entity’s financial statements to evaluate the entity’s financial performance or make resource allocation decisions

IFRS 15.89 Examples of categories that might be appropriate include, but are not limited to, all of the following:

- Type of good or service (for example, major product lines)
- Geographical region (for example, country or region)
- Market or type of customer (for example, government and non-government customers)
- Type of contract (for example, fixed-price and time-and-materials contracts)
- Contract duration (for example, short-term and long-term contracts)
- Timing of transfer of goods or services (for example, revenue from goods or services transferred to customers at a point in time and revenue from goods or services transferred over time)
- Sales channels (for example, goods sold directly to consumers and goods sold through intermediaries)

New 801 IFRS 15.115 If the entity applies IFRS 8, does the entity disclose sufficient information to enable users of financial statements to understand the relationship between the disclosure of disaggregated revenue (in accordance with IFRS 15.114) and revenue information that is disclosed for each reportable segment

**Contract balances**

New 802 IFRS 15.116 Does the entity disclose all of the following:

a. The opening and closing balances of receivables, contract assets and contract liabilities from contracts with customers, if not otherwise separately presented or disclosed

b. Revenue recognised in the reporting period that was included in the contract liability balance at the beginning of the period

c. Revenue recognised in the reporting period from performance obligations satisfied (or partially satisfied) in previous periods (for example, changes in transaction price)

New 803 IFRS 15.117 IFRS 15.119 Does the entity explain how the timing of satisfaction of its performance obligations (see IFRS 15.119(a)) relates to the typical
timing of payment (see IFRS 15.119(b)) and the effect that those factors have on the contract asset and contract liability balances; the explanation provided may use qualitative information.

Does the entity provide an explanation (with both qualitative and quantitative information) of the significant changes in the contract asset and contract liability balances during the reporting period?

Examples of changes in the entity’s balances of contract assets and contract liabilities include any of the following:

- Changes due to business combinations
- Cumulative catch-up adjustments to revenue that affect the corresponding contract asset or contract liability, including adjustments arising from a change in the measure of progress, a change in an estimate of the transaction price (including any changes in the assessment of whether an estimate of variable consideration is constrained) or a contract modification
- Impairment of a contract asset
- A change in the time frame for a right to consideration to become unconditional (i.e., for a contract asset to be reclassified to a receivable)
- A change in the time frame for a performance obligation to be satisfied (i.e., for the recognition of revenue arising from a contract liability)

**Performance obligations**

Does the entity disclose information about its performance obligations in contracts with customers, including a description of all of the following:

- When the entity typically satisfies its performance obligations (for example, upon shipment, upon delivery, as services are rendered or upon completion of service), including when performance obligations are satisfied in a bill-and-hold arrangement
- The significant payment terms
- The nature of the goods or services that the entity has promised to transfer, highlighting any performance obligations to arrange for another party to transfer goods or services (i.e., if the entity is acting as an agent)
- Obligations for returns, refunds and other similar obligations
- Types of warranties and related obligations

**Transaction price allocated to the remaining performance obligations**

Does the entity disclose all of the following information about its remaining performance obligations:

- The aggregate amount of the transaction price allocated to the performance obligations that are unsatisfied (or partially unsatisfied) as of the end of the reporting period
- An explanation of when the entity expects to recognise as revenue the amount disclosed in accordance with IFRS 15.120(a), which the entity discloses in either of the following ways:
  - On a quantitative basis using the time bands that would be most appropriate for the duration of the remaining performance obligations
  - By using qualitative information

As a practical expedient, an entity need not disclose the information in IFRS 15.120 for a performance obligation if either of the following conditions is met:

- The performance obligation is part of a contract that has an original expected duration of one year or less.
- The entity recognises revenue from the satisfaction of the performance obligation in accordance with IFRS 15.B16.

That is, if an entity has a right to consideration from a customer in an amount that corresponds directly with the value to the customer of...

### Disclosure checklist

**Costs and setup costs**

b. The amount of amortisation recognised in the reporting period

c. The amount of any impairment losses recognised in the reporting period

**Practical expedients**

- **New 814**  
  *IFRS 15.129*  
  If the entity elects to use the practical expedient in IFRS15.63 regarding the existence of a significant financing component, does the entity disclose that fact?

- **New 815**  
  *IFRS 15.129*  
  If the entity elects to use the practical expedient in IFRS15.94 regarding the incremental costs of obtaining a contract, does the entity disclose that fact?

- **New 818**  
  *IFRS 16.12*  
  If the entity (a lessee) elects to apply IFRS 16 in accordance with paragraph C5(b), does it disclose information about initial application required by IAS 8.28, except for the information specified in IAS 8.28(f)?

**IFRS 16 Leases**

IFRS 16 Leases was issued in January 2016. IFRS 16 is effective for annual periods beginning on or after 1 January 2019. Earlier application is permitted for entities that also apply IFRS 15.

### Transition

- **IAS 40.84B**  
  An entity applying IFRS 16 and its related amendments to IAS 40 for the first time must apply the transition requirements in IFRS 16 Appendix C to its investment property held as a right-of-use asset.

- **New 816**  
  *IFRS 16.1C1*  
  If the entity applies IFRS 16 in its annual IFRS financial statements for a period beginning before 1 January 2019, does it disclose that fact?

- **New 817**  
  *IFRS 16.1C4*  
  If the entity applies the practical expedient in IFRS 16.1C3, does it disclose that fact?

- **New 819**  
  *IFRS 16.1C12*  
  Instead of the information specified in IAS 8.28(f), does the entity (a lessee) disclose:

  a. The weighted average lessee’s incremental borrowing rate applied to lease liabilities recognised in the statement of financial position at the date of initial application

  b. An explanation of any difference between:

     ▶ Operating lease commitments disclosed under IAS 17 at the end of the annual reporting period immediately preceding the date of initial application, discounted using the incremental borrowing rate at the date of initial application as described in IFRS 16.C8(a); and

     ▶ Lease liabilities recognised in the statement of financial position at the date of initial application

- **New 820**  
  *IFRS 16.1C10*  
  If the entity (a lessee) elects not to apply the requirements in IFRS 16.1C8 to leases for which the lease term ends within 12 months...
Disclosure made

Yes No N/A Comments

New 821 IFRS 16.C13
If the entity (a lessee) uses one or more of the specified practical expedients in IFRS 16.C10, does it disclose that fact

New 822 IFRS 16.47(a)
Does the entity present in the statement of financial position (or disclose in the notes) right-of-use assets separately from other assets

IFRS 16.48
The requirement in IFRS 16.47(a) does not apply to right-of-use assets that meet the definition of investment property, which must be presented in the statement of financial position as investment property.

New 823 IFRS 16.47(a)
If the entity does not present right-of-use assets separately in the statement of financial position, does it:

a. Include right-of-use assets within the same line item as that within which the corresponding underlying assets would be presented if they were owned

b. Disclose which line items in the statement of financial position include those right-of-use assets

New 824 IFRS 16.47(b)
Does the entity:

► Present lease liabilities separately from other liabilities in the statement of financial position

Or

► If not, disclose which line items in the statement of financial position include those liabilities

New 825 IFRS 16.49
In the statement of profit or loss and other comprehensive income, does the entity present interest expense on the lease liability separately from the depreciation charge for the right-of-use asset

IFRS 16.49
Interest expense on the lease liability is a component of finance costs, which IAS 1.82(b) requires to be presented separately in the statement of profit or loss and other comprehensive income.

New 826 IFRS 16.50
In the statement of cash flows, does the entity classify:

a. Cash payments for the principal portion of the lease liability within financing activities

b. Cash payments for the interest portion of the lease liability applying the requirements in IAS 7 for interest paid

c. Short-term lease payments, payments for leases of low-value assets and variable lease payments not included in the measurement of the lease liability within operating activities

Disclosures

IFRS 16.51
The objective of the disclosures is for lessees to disclose information in the notes that, together with the information provided in the statement of financial position, statement of profit or loss and statement of cash flows, gives a basis for users of financial statements to assess the effect that leases have on the financial position, financial performance and cash flows of the lessee. IFRS 16.52–60 specifies requirements on how to meet this objective.

A lessee need not duplicate information that is already presented elsewhere in the financial statements, provided that the information is incorporated by cross-reference in the single note or separate section about leases.

New 827 IFRS 16.52
Does the entity disclose (or incorporate by way of cross-reference) information about its leases, for which it is a lessee, in a single note or separate section in its financial statements

New 828 IFRS 16.53
Does the entity disclose the following amounts for the reporting period:

a. Depreciation charge for right-of-use assets by class of underlying asset

b. Interest expense on lease liabilities

c. The expense relating to short-term leases accounted for under IFRS 16.6

This expense need not include the expense relating to leases with a lease term of one month or less.

### Presentation and disclosures by lessors

#### Presentation

New 835  **IFRS 16.67**
Does the entity present assets held under a finance lease in the statement of financial position as a receivable at an amount equal to the net investment in the lease  

New 836  **IFRS 16.88**
Does the entity present underlying assets subject to operating leases in its statement of financial position according to the nature of the underlying asset  

#### General disclosures

**IFRS 16.89**
The objective of the disclosures is for lessors to disclose information in the notes that, together with the information provided in the statement of financial position, statement of profit or loss and statement of cash flows, gives a basis for users of financial statements to assess the effect that leases have on the financial position, financial performance and cash flows of the lessor. IFRS 16.90-97 specifies the requirements for how to meet this objective.

New 837  **IFRS 16.90**
Does the entity disclose the following amounts for the reporting period:

a. For finance leases:
   - Selling profit or loss  
   - Finance income on the net investment in the lease  
   - Income relating to variable lease payments not included in the measurement of the net investment in the lease  

b. For operating leases, lease income, separately disclosing income relating to variable lease payments that do not depend on an index or a rate  

**IFRS 16.91**
An entity must provide the disclosures specified in IFRS 16.90 in a tabular format, unless another format is more appropriate.

New 838  **IFRS 16.92**
Does the entity disclose additional qualitative and quantitative information about its leasing activities necessary to meet the disclosure objective in IFRS 16.89 that includes, but is not limited to, information that helps users of financial statements to assess:

a. The nature of the entity’s (lessor’s) leasing activities  

b. How the entity (lessor) manages the risk associated with any rights it retains in underlying assets. In particular, the entity must disclose its risk management strategy for the rights it retains in underlying assets, including any means by which it reduces that risk

**IFRS 16.92**
Such means may include, for example, buy-back agreements, residual value guarantees or variable lease payments for use in excess of specified limits.

#### Finance leases

New 839  **IFRS 16.93**
Does the entity provide a qualitative and quantitative explanation of the significant changes in the carrying amount of the net investment in finance leases  

New 840  **IFRS 16.94**
Does the entity disclose a maturity analysis of the lease payments receivable, showing the undiscounted lease payments to be received on an annual basis for a minimum of each of the first five years and a total of the amounts for the remaining years  

New 841  **IFRS 16.94**
Does the entity reconcile the undiscounted lease payments to the net investment in the lease. The reconciliation must identify the unearned finance income relating to the lease payments receivable and any discounted unguaranteed residual value  

#### Operating leases

New 842  **IFRS 16.95**
For items of property, plant and equipment subject to an operating lease, does the entity apply the disclosure requirements of IAS 16  

**IFRS 16.95**
In applying the disclosure requirements in IAS 16, an entity must disaggregate each class of property, plant and equipment into assets subject to operating leases and assets not subject to operating leases. Accordingly, an entity must provide the disclosures required by IAS 16 for assets subject to an operating lease (by class of underlying asset) separately from owned assets held and used by the entity.

About EY
EY is a global leader in assurance, tax, transaction and advisory services. The insights and quality services we deliver help build trust and confidence in the capital markets and in economies the world over. We develop outstanding leaders who team to deliver on our promises to all of our stakeholders. In so doing, we play a critical role in building a better working world for our people, for our clients and for our communities.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. For more information about our organization, please visit ey.com.

About EY’s International Financial Reporting Standards Group
A global set of accounting standards provides the global economy with one measure to assess and compare the performance of companies. For companies applying or transitioning to International Financial Reporting Standards (IFRS), authoritative and timely guidance is essential as the standards continue to change. The impact stretches beyond accounting and reporting to the key business decisions you make. We have developed extensive global resources – people and knowledge – to support our clients applying IFRS and to help our client teams. Because we understand that you need a tailored service as much as consistent methodologies, we work to give you the benefit of our deep subject matter knowledge, our broad sector experience and the latest insights from our work worldwide.

Ernst & Young LLP
The UK firm Ernst & Young LLP is a limited liability partnership registered in England and Wales with registered number OC300001 and is a member firm of Ernst & Young Global Limited.
