About EY

EY is a global leader in assurance, tax, transaction and advisory services. The insights and quality services we deliver help build trust and confidence in the capital markets and in economies the world over. We develop outstanding leaders who team to deliver on our promises to all of our stakeholders. In so doing, we play a critical role in building a better working world for our people, for our clients and for our communities.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. For more information about our organization, please visit ey.com.

Ernst & Young LLP is a client-serving member firm of Ernst & Young Global Limited operating in the US.

Certain services and tools may be restricted for EY audit clients and their affiliates to comply with applicable independence standards. Please ask your EY contact for further information.

**ES-Perform:
Environmental, Health
and Safety (EHS) and
Sustainability (ES)
Performance Services**

EY
Building a better
working world

ES-Perform

What is ES-Perform?

ES-Perform is a pragmatic business approach to improve EHS and sustainability performance by assessing and transforming business processes to lower risk, reduce cost and increase revenue.

Why now?

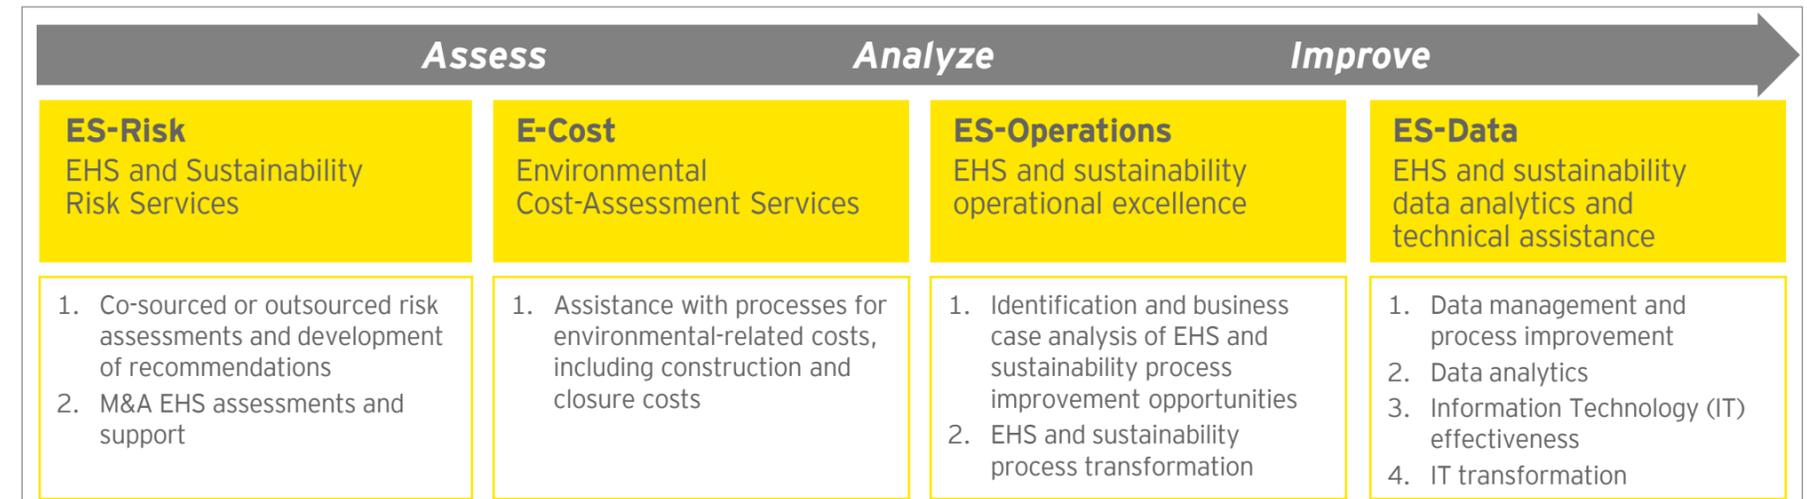

Organizations are trying to improve the performance of their EHS and sustainability functions to drive greater efficiencies, reduce risks and obtain more opportunities.

ES-Perform

We offer a balanced and customizable approach that can help you identify and focus on improving the areas that matter to your performance, including:

- ▶ **ES-Risk**
Improve risk management with streamlined compliance processes aligned with the business
- ▶ **E-Cost**
Identify, assess and improve the tracking of environmental costs
- ▶ **ES-Operations**
Build the business case for implementing more efficient operations that reduce waste and use less energy and water
- ▶ **ES-Data**
Manage EHS and sustainability data more effectively to reduce costs and make more-informed business decisions

ES-Perform methodology

Our methodology allows for a customizable approach that leverages our technical and industry knowledge to facilitate performance improvement.

ES-Risk

- ▶ Identify risks tied to evolving regulations, emerging risks (e.g., new regulations, natural resource access), noncompliance with policy and industry practices:
 - ▶ Assess effectiveness of programs used to identify and assess compliance with regulations, corporate policy, voluntary efforts and leading practices
 - ▶ Design risk-mitigation steps (including corrective and preventive actions) related to sustainability and EHS, which may include management systems and IT
- ▶ Assess EHS risks and opportunities that might otherwise be unidentified in an M&A transaction

E-Cost

- ▶ Identify, assess and improve the tracking of environmental costs:
 - ▶ Consider whether the estimating approach used by management's project managers or engineers is consistent with industry guidance or norms
 - ▶ Consider whether the processes and controls used to estimate environmental costs are reasonably designed and implemented

ES-Operations

- ▶ Program governance:
 - ▶ Transform EHS and sustainability program governance, linkage to business processes, risk management and metrics to enhance compliance and streamline operation
- ▶ Operations:
 - ▶ Conduct process efficiency analysis of operations to lean streams of waste, water, energy and cost efficiencies
 - ▶ Identify opportunities for operational process improvement and asset recovery

ES-Data
