E. Miscellaneous matters

Foreign-exchange controls. The Latvian currency is the lats (LVL). No significant foreign-exchange controls are imposed in Latvia.

Transfer pricing. The Latvian law provides that the arm’s length principle must be followed in all related-party transactions. The Latvian tax authorities may redefine transactions between related parties and recalculate the tax base if the prices applied in related-party transactions are not arm’s length. Transfer-pricing methods, such as comparable uncontrolled prices, resale prices, cost-plus, profit-split and transactional net margin, may be used to assess the market price in transactions between related parties.

All taxpayers with annual net turnover exceeding LVL 1 million (€1,400,000) are required to prepare transfer-pricing documentation containing industry, company, functional and economic analysis. The documentation requirements apply to all related-party transactions with a value over LVL 10,000 (€14,000). The generally accepted practice for transfer-pricing issues is based on the Organization for Economic Cooperation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations.

Taxpayers can enter into an advance pricing agreement (APA) with the tax administration on the establishment of an arm’s length price (value) for a transaction conducted with a related foreign company if the transaction value exceeds LVL 1 million (€1,400,000) a year. If a taxpayer complies with an APA, the tax administration may not adjust in a tax audit the arm’s length price established for the transaction.

F. Treaty withholding tax rates

The following table lists the rates under Latvia’s tax treaties. The statutory rate applies if it is lower than the treaty rate.

</table>
(a) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends.

(b) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment.

(c) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting power of the payer of the dividends.

(d) The 0% rate applies if the recipient of the dividends is a company (or a partnership) that holds 25% of the capital and voting power of the payer of the dividends.

(e) For details, see footnote (c) in Section A.

(f) For details, see footnote (d) in Section A.

(g) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the voting power of the payer of the dividends.

(h) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the payer of the dividends.

(i) No withholding tax is imposed on dividends paid by Latvian entities to legal entities resident in the EU or the EEA or their permanent establishments if all of the following conditions are satisfied:
   * The company receiving the dividends has obtained an application confirming that it is a tax resident in an EU or EEA country.
   * The income of the company receiving the dividends is subject to corporate income tax in the company’s country of tax residence.
   * The company receiving the dividends is not treated as tax resident in a third country that is not a member of the EEA under a double tax treaty entered into with such third country.

(j) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the payer of the dividends.

(k) The 7% rate applies to royalties paid for the use of, or the right to use, cinematographic films and films or tapes for radio or television broadcasting, patents, trademarks, designs, and models, plans, secret formulas or processes. The 5% rate applies to other royalties.

(l) The 10% rate applies to royalties paid for the use of, or the right to use, cinematographic films or films or tapes for radio or television broadcasting. The 5% rate applies to other royalties.

(m) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends. The 10% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends and if the dividends are paid out of profits that are exempt from tax or subject to tax at a rate lower than the normal Israel tax rate under the Israel investment encouragement law.

(n) The 5% rate applies to interest paid by Israel-registered banks. The 10% rate applies to other interest payments.

(o) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes and other means of image or sound reproduction for radio or television broadcasting. The 10% rate applies to royalties paid for the following: The use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment
   * Information concerning industrial, commercial or scientific experience

(p) The 5% rate applies to interest paid on loans granted by banks.

(q) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the voting capital of the company paying the dividends.

(r) The 6% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.

(s) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 75% of the capital of the payer of the dividends. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies to all other dividends.

(t) The 0% rate applies to interest paid on loans granted by banks, or to the government, the central bank or any financial institution controlled by the government of Tajikistan.

(u) Latvia has ratified the tax treaty with Kuwait, which will enter into force when Latvia receives notification that Kuwait has also ratified the treaty.

(v) Latvia has ratified the tax treaty with the Russian Federation, which will enter into force when Latvia receives notification that the Russian Federation has also ratified the treaty.

(a) Applicable to both residents and nonresidents.
(b) Bank interest is subject to a 5% withholding tax.
(c) Applicable if the royalties are received by Lebanese holding companies (see Section B).
(d) Profits derived by branches operating in Lebanon are presumed to be distributed and consequently are subject to dividend withholding tax.

B. Taxes on corporate income and gains
Corporate income tax. Lebanese companies and branches of foreign companies carrying on business in Lebanon are subject to tax only on their income derived from Lebanon. A company is con-
sidered Lebanese if it is registered in Lebanon. The following are the two main conditions for registering a company in Lebanon:
- The company’s registered office is located in Lebanon.
- The majority of the company’s board of directors is of Lebanese nationality (unless the government authorizes the company to have less than a majority).

**Rates of corporate income tax.** In general, companies are subject to tax at a flat rate of 15%.

Profits derived in Lebanon by branches of foreign companies are presumed to be distributed and consequently are subject to the 10% dividend withholding tax.

Contractors on government projects are subject to tax at the regular corporate income tax rate on a deemed profit of 10% or 15% of actual gross receipts, depending on the type of project.

Lebanese holding companies and offshore companies are exempt from corporate income tax. However, special taxes apply to these companies (see Section D). A Lebanese holding company is a special type of company that is formed to hold investments in and outside Lebanon (“holding company” is not synonymous with “parent company”). An offshore company is a company that engages exclusively in business transactions outside Lebanon.

Insurance companies are subject to tax at the regular corporate income tax rate of 15% on a deemed profit of 8% of their premium income.

Lebanese air and sea transport companies are exempt from corporate income tax. Foreign air and sea transport companies are also exempt from corporate income tax if their home countries grant reciprocal relief to Lebanese companies. However, dividends distributed remain subject to movable capital tax.

Profits derived by industrial enterprises established in Lebanon after 1 January 1980 are exempt from income tax for up to 10 years from the date of commencement of production if such enterprises satisfy all of the following conditions:
- The factory is built in certain areas the government intends to develop.
- The object of the enterprise is to manufacture new goods and materials that were not manufactured in Lebanon before 1 January 1980.
- The total value of property, plant and equipment used in Lebanon by the new enterprise and allocated for the production of new goods and materials is at least LL 500 million.

Profits qualifying for this tax holiday may not exceed the original cost of the property, plant and equipment used by the enterprise on the date production begins.

**Capital gains.** Capital gains on the disposal of fixed assets are taxed at a rate of 10%.

If a company reinvests all or part of a capital gain subject to the 10% rate to construct permanent houses for its employees during a two-year period beginning with the year following the year in which the gain was realized, it may obtain a refund of the tax imposed on the reinvested gain.
**Administration.** The official tax year is the calendar year. Companies or branches may use a different tax year if they obtain the prior approval of the tax authorities.

Corporations with a financial year-end of 31 December must file their tax returns by 31 May of the year following the year in which the income is earned. Other corporations must file their returns within five months of their financial year-end. The tax authorities may grant a one-month extension at the request of the taxpayer if the taxpayer’s circumstances warrant the extension. Tax must be paid when the return is filed.

If a taxpayer does not submit timely returns, the tax authorities may levy tax on an amount of deemed profit and impose a fine of 5% of the tax due for each month or part of a month that the return is late. The minimum penalty is LL 750,000 for joint stock companies, LL 500,000 for limited liability companies, and LL 100,000 for other taxpayers. The maximum penalty is 100% of the tax due. For failure to pay tax by the due date, a penalty of 1.1% of the tax due is imposed for each month or part of a month that the tax remains unpaid.

**Dividends and interest.** In general, dividends and interest are subject only to a withholding tax of 10%.

Dividends received by a Lebanese corporation from another Lebanese corporation are exempt from corporate income tax. However, dividends redistributed by a parent company to its shareholders or partners are subject only to a withholding tax of 10%.

Dividends distributed by Lebanese holding companies and offshore companies are exempt from dividend withholding tax.

Dividends and interest income earned by banks and financial institutions are considered trading income and consequently are subject to tax at the regular corporate tax rate of 15%.

**Foreign tax relief.** Lebanon has entered into double tax treaties with several countries (see Section F).

**C. Determination of trading income**

**General.** The tax assessment is based on audited financial statements prepared according to generally accepted accounting principles, subject to certain adjustments.

Deductions are allowed for expenses incurred wholly and exclusively for business purposes. Branches, subsidiaries and affiliates of foreign companies may deduct the portion of foreign head office overhead charged to them if the auditors of the head office present to the tax authorities a certificate confirming that the overhead was fairly and equitably allocated to the various subsidiaries, associated companies and branches and that the amount of head office overhead charged back to the Lebanese entity is in accordance with the limits set by the Ministry of Finance. However, the deductible portion of the overhead charged back to the Lebanese entity is subject to a tax of 7.5% (see Section D).

**Inventories.** Inventories are normally valued at the lower of cost or net realizable value. Cost is usually determined using the first-in, first-out (FIFO) or weighted-average cost method.
Provisions. The following are the only provisions that are allowed for tax purposes:

- The actual amount due to employees on the balance sheet date for end-of-service indemnities.
- Doubtful debts owed by debtors that have been declared legally bankrupt.
- A provision for obsolete inventory if the following conditions are met:
  — The tax authorities are notified about the intention to destroy the obsolete stock.
  — The obsolete stock is destroyed in the presence of a representative from the tax authorities.
  — The tax authorities prepare formal minutes evidencing the destruction of the obsolete stock.

Banks and financial institutions may deduct provisions for doubtful debts before declaration of bankruptcy of the debtor if they obtain the approval of the Banking Control Commission of the Central Bank of Lebanon.

Tax depreciation. Depreciation must be calculated using the straight-line method. In Decision 839/1, dated 21 August 2007, the Ministry of Finance revised the minimum and maximum depreciation rates. A company may select appropriate rates within these limits for its activities. Companies must notify the relevant income tax authorities of the adopted depreciation policy before the declaration deadline. Otherwise the company is considered eligible for the minimum depreciation rates only.

### E. Miscellaneous matters

#### Foreign-exchange controls. Lebanon does not impose any foreign-exchange controls.

#### Antiavoidance legislation. Under the Lebanese tax law, criminal or tax penalties may be imposed for specified tax avoidance schemes.

#### Related-party transactions. Transactions with related entities must be on an arm’s length basis.

### F. Tax treaties

Lebanon has entered into double tax treaties with Algeria, Armenia, Bahrain, Belarus, Bulgaria, Canada, Cuba, Cyprus, the Czech Republic, Egypt, France, Gabon, Iran, Italy, Jordan, Kuwait, Malaysia, Malta, Morocco, Oman, Poland, Romania, the Russian Federation, Senegal, Sudan, Syria, Tunisia, Ukraine, United Arab Emirates and Yemen.

(a) For manufacturing companies, the rate is 10%. For companies that manufacture and export outside the Southern African Customs Union, the rate is 0%.
(b) These withholding taxes apply to payments to nonresidents only.
(c) Dividends paid by manufacturing companies subject to a concessional corporate tax rate are exempt from withholding tax.
(d) For interest, royalties and management charges paid by manufacturing companies subject to a concessional corporate tax rate, the rate is 15%.
(e) A 10% withholding tax is imposed on interest paid to residents.
(f) This tax is imposed on repatriated income. Repatriated income is the chargeable income of the branch less Lesotho income tax paid on the chargeable income and any profits reinvested in the branch.

B. Taxes on corporate income and gains

**Company tax.** Company tax is imposed on income from all sources located in and outside Lesotho.

**Rates of company tax.** The standard tax rate is 25%.

The rate is reduced to 10% for income from manufacturing operations and to 0% for companies that manufacture and export to countries outside the Southern African Customs Union. The special rate for manufacturing income does not apply to a Lesotho branch of a nonresident company.

**Capital gains.** Capital gains are treated as ordinary income and subject to tax at the regular corporate income tax rate.

**Administration.** The year of assessment runs from 1 April to 31 March. However, a company may select a year of assessment other than 1 April to 31 March, subject to the approval of the Commissioner of Income Tax.
Returns must be filed by the last day of the third month following the end of the year of assessment. If a return is not filed, the Commissioner may issue an estimated assessment.

Tax is payable in three installments, which are due on 30 September, 31 December and 31 March of each year of assessment. The fourth and final payment is due on submission of the return. For companies whose year-end is other than 31 March, the installments of tax are due on the last day of the sixth, ninth, and twelfth months of the year of assessment.

Withholding taxes are payable when the payee becomes legally entitled to the payment.

If tax levied under the Income Tax Act is not paid by the due date, additional tax of 3% compounded monthly is payable.

**Dividends.** Resident companies are exempt from tax on dividends received, but they may not deduct related expenses or dividends declared. A resident company is a company that satisfies one of the following conditions:

- It is incorporated and formed under the laws of Lesotho.
- Its management and control is located in Lesotho.
- It undertakes the majority of its operations in Lesotho.

Dividends paid to nonresidents are subject to a final withholding tax at a rate of 25%. Dividends paid by manufacturing companies subject to a concessionary corporate tax rate are exempt from withholding tax.

Resident companies that pay dividends are liable for advance corporation tax (ACT).

The following is the calculation for ACT:

\[
\frac{A \times 100}{100 - A}
\]

In the above calculation, A is the corporate tax rate for income other than manufacturing income.

Installment tax is set off against ACT; that is, installment tax paid settles the ACT due.

**Foreign tax relief.** In the absence of treaty relief provisions, unilateral relief is granted through a credit for foreign taxes paid on income earned abroad. The amount of the credit is the lesser of the foreign tax paid and the Lesotho tax on the foreign-source income.

**C. Determination of trading income**

**General.** Taxable income is financial statement income, adjusted as required by the Income Tax Act. To be eligible for deduction, expenses must be incurred in the production of income, and they must not be of a capital nature.

**Inventories.** Inventories are valued at the lower of cost or realizable value. Cost is determined using the first-in, first-out (FIFO) method.

**Provisions.** Specific provisions are allowable for tax purposes. General provisions are not allowed.
Depreciation. Depreciation is computed using the declining-balance method at the following rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Motor vehicles</td>
<td>25</td>
</tr>

<td>5</td>
</tr>
<tr>
<td>Mining</td>
<td>100</td>
</tr>
<tr>
<td>Other assets</td>
<td>10</td>
</tr>
</tbody>
</table>

Relief for losses. Assessed losses may be carried forward for an unlimited period. A carryback of losses is not allowed.

Groups of companies. Companies in a group may not share their tax losses with profitable companies in the group.

D. Value-added tax

Value-added tax is levied at the following rates:
- Specified basic commodities: 0%
- Electricity and telecommunications: 5%
- Liquor: 15%
- Other commodities: 14%

E. Tax treaties

Lesotho has entered into tax treaties with Mauritius, South Africa and the United Kingdom. The following are the withholding tax rates for dividends, interest and royalties under these treaties.

A. At a glance

Corporate Income Tax Rate (%) 20 (a)
Capital Gains Tax Rate (%) 20 (a)(b)
Branch Tax Rate (%) 20 (a)
Withholding Tax (%)
  Dividends 0
  Interest 5 (c)
  Royalties 0
  Branch Remittance Tax 0
Net Operating Losses (Years)
  Carryback 0
  Carryforward 5 (d)

(a) Corporate income tax is imposed at a flat rate of 20%. In addition, Jihad Tax at a rate of 4% is imposed on the profits of Libyan companies and branches. Oil companies are subject to a composite rate of 65% which includes income tax, Jihad Tax and a surtax.
(b) Capital gains are treated as trading income.
(c) This tax is imposed on bank interest paid to residents and nonresidents. The Libyan law does not provide for any other withholding taxes.
(d) Oil companies may carry forward losses 10 years.

B. Taxes on corporate income and gains

Corporate income tax. Libyan companies and foreign branches are subject to tax on their worldwide income. A national company or foreign branch is considered to be resident in Libya if it is registered with the Secretariat of Economy. A foreign company that does not register but engages in activities in Libya is deemed to immediately have de facto permanent establishment status in Libya and is subject to tax on its income.

Tax rates. Corporate income tax is imposed at a flat rate of 20% of profits.

In addition, Jihad Tax is payable at a rate of 4% of profits.
Oil companies are subject to a composite rate of 65% which includes income tax, Jihad Tax and a surtax.

Companies established under Law 9/2010 (Investment Law) or Law 7/2003 (Tourism Law) are exempt from corporate taxes for up to 5 years and a possible additional 3 years or 10 years, respectively, as well as from stamp duty and import duties.

**Capital gains.** Capital gains are included in ordinary income and are taxed at the regular corporate income tax rate.

**Administration.** The financial year is the calendar year, but, on application, the Tax Department may allow a different financial year.

An annual tax return must be filed within one month after approval of the company or branch accounts or four months after the year end, whichever is earlier. Consequently, for companies using the calendar year as their financial year, tax returns must be filed by 30 April.

Tax is payable in four quarterly installments beginning with the first quarterly due date after the issuance of an assessment. The quarterly due dates are 10 March, 10 June, 10 September and 10 December.

**Dividends.** Dividends are not subject to tax in Libya.

**Royalties.** Subject to the provisions of double tax treaties, royalties are treated as trading income.

**Foreign tax relief.** Libya does not grant any relief for foreign taxes unless a double tax treaty applies.

**C. Determination of trading income**

**General.** Taxable income is based on financial statements prepared in accordance with generally accepted accounting principles (GAAP), subject to certain adjustments. A detailed body of Libyan GAAP does not exist.

Business expenses are generally deductible if incurred for business purposes unless specifically disallowed by the tax law.

**Deemed profit basis of assessment.** Notwithstanding the law, in practice, tax is assessed on private Libyan and foreign companies (joint stock companies and branches) based on a percentage of turnover. This is known as the “deemed profit” basis of assessment. Consequently, tax is payable even if losses are declared.

The percentage of deemed profit based on turnover varies according to the type of business activity. These percentages include the following:

- Civil works and contracting: 10% to 15%
- Oil service: 15% to 25%
- Design and consulting engineers: 25% to 40%

Each case is reviewed individually and a percentage is determined within the above broad ranges. After the preliminary final assessments are issued, taxpayers have a period of 45 days in which to negotiate an agreed settlement or to appeal. Thereafter, appeals may be made to the First and Second Appeal Committees, the Court of Appeal and finally the Supreme Court.
The deemed profit percentage applied to any year is higher than the profit percentage declared in the annual tax return.

The deemed profit basis of assessment does not apply to Libyan public companies, which are assessed on an actual basis.

**Inventories.** Inventories are valued at cost.

**Provisions.** General provisions are not allowed.

**Tax depreciation.** Depreciation must be computed using the straight-line method. The following are some of the standard depreciation rates allowed in Libya.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Furniture and tools</td>
<td>10 to 20</td>
</tr>
<tr>

<tr>
<td>Passenger cars</td>
<td>20</td>
</tr>
<tr>
<td>Computer hardware</td>
<td>25</td>
</tr>
<tr>
<td>Computer software</td>
<td>50</td>
</tr>
</tbody>
</table>

Head office overhead charges are limited to 5% of expenses.

**Relief for losses.** In general, losses may be carried forward five years. However, oil companies may carry forward losses 10 years. Losses may not be carried back.

**Groups of companies.** Libyan law does not provide for the fiscal integration of related parties.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>

<tr>
<td>Service charge on the value of imports; imposed to fund the administration of the Customs Department</td>
<td>40</td>
</tr>
</tbody>
</table>

**E. Foreign-exchange controls**

The Libyan currency is the dinar (LD).

Libyan branches of foreign companies may be paid directly offshore (up to 100%).

Libyan joint stock companies with a foreign shareholding (which may be up to 49%, effective from mid-2012; previously, up to
65%) may be paid in foreign currency, but the payments must be made into accounts held at Libyan banks. As a result, no issue exists with respect to the remittance of profits.

F. Tax treaties
Libya has entered into a multilateral tax treaty with the other Mahgreb Union countries (Algeria, Mauritania, Morocco and Tunisia). It has also entered into double tax treaties with Egypt, France, India, Malta, Pakistan, the Slovak Republic and the United Kingdom.
Libya has signed double tax treaties with many other Asian and European countries, but these treaties have not yet been ratified.
Libya has entered into a treaty of “Friendship and Co-Operation” with Italy.
On 18 September 2012, the government of Liechtenstein presented to parliament a public consultation report on the amendment of the tax law. If parliament accepts the changes in the report, the changes are expected to apply, effective from 1 January 2013. Because of the expected changes to the tax law, readers should obtain updated information before engaging in transactions.

A. At a glance

(a) The minimum corporate income tax is CHF 1,200 (increased to CHF 1,800 according to the public consultation report) per year.
(b) This is the maximum rate. See Section B.
(c) Withholding tax at a rate of 4% (2% in 2011 and 2012) is levied on distributions of reserves existing on 31 December 2010. See Section B.

B. Taxes on corporate income and gains

Corporate income tax. The current Liechtenstein tax law entered into force on 1 January 2011. It no longer contains provisions regarding special tax status (domiciliary company or holding company status). Certain tax favorable situations may result by applying deemed deductions to taxable income (see Notional interest deduction and Patent box regime for intellectual property companies). For existing domiciliary companies, a grandfathering
of three years until 31 December 2013 applies. Consequently, such companies will temporarily benefit from tax exemption even though they may not meet the conditions for exemption under the new law.

Resident corporations carrying on activities in Liechtenstein are generally taxed on worldwide income other than income from foreign real estate. Income from permanent establishments abroad is exempt from income tax.

Branches of foreign corporations and nonresident companies owning real property in Liechtenstein are subject to tax on income attributable to the branch or real property.

**Rates of corporate tax.** Companies resident in Liechtenstein and foreign enterprises with permanent establishments in Liechtenstein are subject to income tax. The corporate income tax rate is 12.5%. The minimum corporate income tax is CHF 1,200 (increased to CHF 1,800 according to the public consultation report) per year.

**Notional interest deduction.** Deemed interest on the equity of the taxpaying entity may be deducted from the taxable income. The applicable interest rate, which is specified annually, is currently 4%.

According to the public consultation report, the interest rate for calculating notional interest (relevant for personal income taxes) will no longer be pegged to the interest rate used for the notional interest deduction. This would enable the parliament to determine the notional interest deduction annually, depending on the market development. As a result, for 2013, an interest rate of well below 2% can be expected, which would lead to a higher tax burden for entities. In addition, the notional interest deduction will no longer be able to generate or increase a tax loss and, accordingly, increase the loss carryforward for tax purposes.

**Patent box regime for intellectual property companies.** Intellectual property (IP) companies may reduce taxable income by a deemed deduction of 80% on qualifying income from intellectual property (referred to as patent income). As a result of this regime, an effective tax burden of less than 2.5% may be feasible.

**Capital gains.** Capital gains, except those derived from the sales or liquidations of investments in shares or similar equity instruments and from the sales of real property, are included in income and subject to tax at the regular rate.

Capital gains derived from sales or liquidation of investments in shares or similar equity instruments are not taxed in Liechtenstein.

Real estate profits tax applies to capital gains from the sale of real property. The tax rate depends on the amount of taxable profit. The maximum rate is 21%.

**Administration.** The tax year for a company is its fiscal year.

Companies with operations in Liechtenstein must file their tax return and financial statements within six weeks after the adoption of their financial statements at the annual shareholders’ meeting, but no later than 1 July of the year following the end of the
fiscal year. The tax authorities issue a tax assessment, generally in the second half of the calendar year, which must be paid within 30 days of receipt. If they obtain approval from the tax administration, companies may pay their tax in installments.

**Dividends.** Dividends are not included in the taxable income of companies subject to tax.

Distributions of stock corporations (and other companies with capital divided into shares) are generally not subject to a withholding tax (the so-called coupon tax was abolished, effective from 1 January 2011). However, existing reserves that were not distributed as of 31 December 2010 (old reserves) remain subject to coupon tax according to the first-in, first-out principle. For the first two years after the date of entry into force of the new tax law, a favorable mechanism applies. Old reserves distributed in 2011 and 2012 are taxed at a rate of 2% while distributions of old reserves after 2012 will be subject to the previous rate of 4%.

**C. Determination of trading income**

**General.** Taxable income is accounting income, subject to adjustments for tax purposes and excluding income from capital gains from sales of shares or similar equity instruments, dividends on investments in shares or similar equity instruments, foreign real property and income from permanent establishments located abroad.

Expenses related to the company’s business are generally deductible. Taxes are not deductible.

Nondeductible expenses include hidden distributions to shareholders or related persons and excessive depreciation.

**Inventories.** Inventories must be valued at the lower of cost or market value, with cost calculated using the first-in, first-out (FIFO) or average-cost method. Companies may establish a general inventory reserve of up to one-third of the inventory cost or market value at the balance sheet date if detailed inventory records are available for review by the tax authorities. The need for a reserve exceeding this amount must be documented to the satisfaction of the tax authorities.

**Depreciation.** Depreciation of fixed assets that is commercially justified and recorded in the statutory accounts may be deducted for tax purposes. The straight-line and declining-balance methods are acceptable. The following are acceptable declining-balance rates:

- 5% for industrial buildings
- 20% for office equipment and furnishings
- 30% for machinery, equipment, computers and vehicles other than automobiles
- 35% for automobiles

**Relief for losses.** Losses may be carried forward to offset income for an unlimited number of years following the year of the loss. Losses may not be carried back.

According to the public consultation report, the offsetting loss will be limited to 70% of taxable income (even if unused loss carry-
Consequently, at least 30% of the positive taxable income will be taxed. In addition, the notional interest deduction on equity will only be able to reduce taxable income to a minimum of CHF 0. This means that loss carryforwards will not be able to be generated as a result of the notional interest deduction.

**Groups of companies.** On request, associated companies (corporations) may form a group for tax purposes. Under group taxation, losses of group members may be credited against profits of other group members within the same year. To apply for group taxation, the following conditions, among others, must be met:

- The parent company must have its legal seat in Liechtenstein.
- The parent company must hold at least 50% of the voting rights and the capital of the subsidiaries as of the beginning of the respective year.

For purposes of group taxation, the subsidiaries in a group may be located in foreign countries.

B. Taxes on corporate income and gains

Profit tax. Under the Law on Profit Tax, Lithuanian companies are subject to profit tax on their worldwide income. Lithuanian (resident) companies are defined as enterprises with the rights of legal persons registered in Lithuania. For purposes of the profit tax, Lithuanian companies include companies formed in Lithuania and companies incorporated in foreign countries that are registered in Lithuania as branches or permanent establishments.

Profits of Lithuanian companies earned through permanent establishments in the EEA or in tax treaty countries are exempt in Lithuania if the profit from activities carried out through these permanent establishments is subject to corporate income tax or equivalent tax in such countries.

Foreign (nonresident) companies, which are defined as companies not incorporated in Lithuania, are subject to profit tax on their Lithuanian-source income only.

(a) This is the standard rate of profit tax. Reduced rates apply to small, agricultural, social or nonprofit companies and to companies registered and operating in free-economic zones that satisfy certain conditions.

(b) In general, capital gains are included in taxable profit and are subject to tax at the regular profit tax rate. A capital gain derived from the sale of shares of a company registered in a European Economic Area (EEA) country or in a tax treaty country is exempt from tax if either of the following conditions is satisfied:

- The shares have been held for at least two years and the holding represents more than 25% of shares of the company throughout that period.
- The shares were transferred in a reorganization (as stipulated in the Law on Profit Tax), the shares have been held for at least three years, and the holding represents more than 25% of the shares of the company throughout that period.

This rule does not apply if the shares are sold to the issuer of the shares.

(c) The withholding tax rates may be reduced by applicable tax treaties.

(d) The dividend withholding tax is a final tax. Under the participation exemption rule, the rate is 0% if the recipient is a company (not located in a tax haven) that holds at least 10% of the shares of the payer of the dividends for a period of at least 12 months.

(e) These withholding taxes apply to payments to nonresident companies.

(f) Interest paid to an entity registered in an EEA country or in a tax treaty country is exempt from tax. In other cases, a 10% withholding tax is applied.

(g) Royalties, payments for know-how and compensation for violations of copyrights or related rights are subject to a 0% withholding tax if the criteria stipulated in the Council Directive 2003/49/EC of 3 June 2003 on a common system of taxation applicable to interest and royalty payments made between associated companies of different member states are met. In other cases, the 10% withholding tax rate applies.

(h) Losses from disposals of securities and derivative financial instruments may be carried forward five years to offset gains derived from disposals of such items. Losses from the disposal of shares of companies registered in an EEA country or in another tax treaty country cannot be carried forward if the shares have been held for at least two years and if the holding represents at least 25% of shares of the company throughout that period. However, these losses can be offset against capital gains derived from disposals of securities and derivative financial instruments in the current year. Other losses may be carried forward for an unlimited period, unless the entity ceases to carry on the activity that resulted in the loss. Also, see Section C.
A foreign enterprise is deemed to have a permanent establishment in Lithuania if it satisfies any of the following conditions:

- It permanently carries out activities in Lithuania.
- It carries out its activities in Lithuania through a dependent representative (agent).
- It uses a building site or a construction, assembly or installation object in Lithuania.
- It uses installations or structures in Lithuania for prospecting or extracting natural resources, including wells or vessels used for that purpose.

International telecommunication income and 50% of income derived from transportation that begins in Lithuania and ends in a foreign country or that begins in a foreign country and ends in Lithuania are considered to be income received through a permanent establishment if such activities relate to the activities of a foreign enterprise through a permanent establishment in Lithuania.

**Tax rates.** The standard profit tax rate is 15%.

A 5% rate applies to small entities with annual income not exceeding LTL 1 million and an average number of employees that does not exceed 10 for the tax year.

A 5% rate applies to the taxable profit of agricultural entities. An entity is deemed to be an agricultural entity if more than 50% of its income is derived from agricultural activities.

Entities registered and operating in a free economic zone benefit from 100% exemption from profit tax for 6 years and a further 50% reduction in profit tax for an additional 10 years if they make investments in fixed assets of at least €1 million and if at least 75% of the entity’s income is derived from the following activities:

- Production
- Processing
- Storage
- Manufacturing of aircraft and spacecraft and related equipment
- Repair and maintenance of aircraft and spacecraft and services related to such activities
- Computer programming activities
- Computer consulting activities
- Management of computer equipment
- Other information technologies and computer services activities
- Data analytics
- Web servers (hosting) and related activities
- Call center activities
- Wholesale trade in goods stored in the zone and services related to such activities

Currently, free-economic zones are located in Kaunas, Klaipėda and Panevėžys. Free-economic zones in Akmenė, Kėdainiai, Marijampolė and Šiauliai are in the process of establishment.

Social enterprises, which have 40% or more employees included in target groups (for example, disabled individuals and long-term unemployed), are eligible for a 0% tax rate. In addition, the entity may not perform the activities included in the list of unsupported
activities (for example, hunting, and alcohol and tobacco production) of social enterprises.

Nonprofit entities are subject to profit tax if they engage in business activities. If the annual business income of a nonprofit entity does not exceed LTL 1 million, a 0% tax rate applies to the first LTL 25,000 of taxable profit. The remaining part of the taxable profit is subject to tax at a rate of 15%. Income received from activities carried out to satisfy public interests that is intended to be used for the funding of such activities is not considered income received from business activities of nonprofit entities.

Entities engaged in international transportation by ships or in a directly related activity can elect to be taxed on a special tax base related to the net tonnage of their fleet. The tax on such entities is calculated by applying the 15% corporation tax to the net tonnage instead of the taxable profit of the entities.

**Capital gains.** Capital gains are included in taxable profit and are subject to tax at the regular profit tax rate, except for gains and losses derived from disposals of securities and derivatives. Gains and losses on securities and derivatives are included in a separate tax base that is subject to tax at the regular profit tax rate. A capital gain derived from the sale of shares of a company registered in an EEA country or in a tax treaty country is exempt from tax if the shares have been held for an uninterrupted period of at least two years and if the holding represents more than 25% of the shares of the company throughout that period.

The exemption mentioned above does not apply if the shares are transferred to the issuer of the shares.

Capital gains derived from the transfer of shares in a reorganization or from another transfer specified in the law is exempt from tax if the shares have been held for an uninterrupted period of at least three years and if the holding represents more than 25% of the shares of the company throughout that period.

**Administration**

**Tax year.** The tax year is the calendar year. Companies may request permission to use a different 12-month tax year, which must be used continuously.

**Profit tax.** Companies must file profit tax returns with the tax inspectorate by the first day of the sixth month following the end of the tax year.

Companies must make quarterly advance payments of profit tax by the last day of the first three quarters and by the 25th day of the last quarter. The law specifies two methods that companies may choose to calculate their advance profit tax. The chosen method must be applied consistently throughout the year, but it can be changed once in the tax year. The following are the specified methods:

- The results of prior financial years. The advance payments for the first nine months are calculated based on the profit tax for the year before the preceding year. Each of these advance payments equals 25% of the profit tax for such year. For the 10th through 12th months of the tax year, the advance payment equals 25% of the profit tax calculated for the preceding tax year.
The forecasted profit tax of the current year. Each of the advance payments equals 25% of the forecasted profit tax for such year. However, the total of the advance profit tax payments made during the tax year must total at least 80% of annual profit tax.

If companies choose to pay the advance profit tax based on the results of prior financial years, they must file two profit tax advance payment returns. The first return covers the first nine months of the tax year and must be filed by the last day of the first month of the tax year. The second return covers the last 3 months of the tax year and must be filed by the last day of the 10th month of the tax year.

If the advance profit tax payment is based on the forecasted profit tax of the current year, the profit tax advance payment return must be filed by the last day of the first month of the tax year.

Newly registered enterprises in their first tax year and enterprises with taxable profit not exceeding LTL 1 million in the preceding tax year are not required to make advance payments of profit tax.

Any balance of tax due for a tax year must be paid by the 1st day of the 10th month following the tax year. If the total of the advance payments exceeds the tax due for the tax year, a company may obtain a refund or apply the excess to future taxes. Taxes must be paid in litas.

**Withholding taxes.** Withholding taxes together with returns for such taxes must be submitted to the tax inspectorate by the 15th day of the month following the month in which the taxes are withheld.

**Withholding taxes.** Withholding tax at a rate of 10% is imposed on the following types of payments to nonresident companies:

- Interest
- All types of royalties
- Compensation for violations of copyrights or related rights

Interest paid to an entity registered in an EEA country or in a tax treaty country is exempt from tax.

Royalties, payments for know-how and compensation for violations of copyrights or related rights are exempt from withholding tax if the criteria stipulated in the Council Directive 2003/49/EC of 3 June 2003 on a common system of taxation applicable to interest and royalty payments made between associated companies of different member states are met.

Withholding tax at a rate of 15% is imposed on the following types of payments to nonresident companies:

- Dividends (for further details, see Dividends)
- Payments with respect to the sale, rent or other transfer of immovable property located in Lithuania
- Payments for performance and sport activity in Lithuania
- Directors’ fees to members of the Supervisory Board

**Dividends.** Dividends received from Lithuanian and foreign companies are subject to corporate profit tax at a rate of 15%. The 15% tax on dividends paid by Lithuanian companies is withheld at source.
Lithuania  755

For dividends paid by Lithuanian companies to other Lithuanian companies, profit tax for the preceding tax year is reduced for the company receiving dividends by the withholding tax calculated on the dividends. However, the amount of the reduction may not exceed the amount of profit tax for the preceding tax year. The amount of the withholding tax not used to reduce the preceding year’s tax may be set off against other taxes or refunded by the tax authorities. Payers of dividends must pay the withholding tax on the dividends to the tax authorities by the 10th day of the month following the month of payment of the dividends.

Lithuanian resident companies receiving dividends from foreign companies must pay the tax on the dividends to the tax authorities by the 10th day of the month following the month of receipt of the dividends.

Under the participation exemption rule, dividends are not subject to profit tax if the recipient is a company (not located in a tax haven) that holds at least 10% of the shares of the payer of the dividends for a period of at least 12 months. The participation exemption does not apply to dividends distributed to individuals from the following types of profit:
- Profits that were subject to a 0% tax rate
- Profits that were reduced by investment relief
- Profits that were not taxed because of specific exemptions indicated in the law

Dividends paid by foreign companies to Lithuanian companies are not subject to tax if the company paying the dividends is registered in an EEA country and if the company’s profits were subject to corporate profit tax or an equivalent tax.

The participation exemption also applies to the following:
- Dividends that are attributed to the permanent establishment of a foreign company in Lithuania
- Cash payments made to reduce the company’s capital that was formed using the company’s earnings

Foreign tax relief. In general, a foreign tax credit may be claimed in an amount not exceeding the amount of Lithuanian profit tax payable on the foreign income. Special rules apply to particular types of income, unless a double tax treaty provides otherwise.

The exemption method is applied to profit from activities carried out through permanent establishments of Lithuanian entities in EEA countries or in tax treaty countries if profit from activities carried out through these permanent establishments is subject to corporate income tax or equivalent tax in such countries.

C. Determination of taxable income

General. Profit before tax equals gross revenue, minus expenses incurred in earning such revenue.

Taxable profit is calculated by taking the following actions:
- Subtracting nontaxable income (for example, after-tax dividends, revenues from the revaluation of fixed assets under certain circumstances and payments received from insurance companies up to the amount of incurred losses) from the accounting profit
- Taking into account nondeductible expenses and deductible expenses of a limited amount
Deductions are allowed if they are incurred during the usual business activity and are necessary to earn revenues or obtain economic benefits, provided that documentary evidence is presented.

Expenses incurred for the benefit of employees are allowable deductions if the benefit received by employees is subject to personal income tax.

Expenses that may be deducted up to certain limits include, among others, the following:

- Depreciation and amortization
- Business trip expenses
- Representation expenses
- Provisions for bad debts
- Natural losses

A double deduction is allowed for sponsorship payments (except payments in cash exceeding LTL 32,500 to a single sponsorship recipient), up to a maximum deduction equal to 40% of the taxable profit.

A triple deduction is allowed for research and development (R&D) costs if the scientific R&D activities are related to the usual or intended activities of the entity that generate or will generate income or economic benefits.

Nondeductible amounts include dividends and costs that are incurred outside the usual business operations, that are inappropriately documented or that are related to earning nontaxable income.

Payments to tax havens may be deducted only if the Lithuanian enterprise can prove that certain conditions evidencing the economic basis of the transaction were met.

Other taxes (for example, social insurance contributions and real estate tax) may be deducted from taxable income.

The income and expenses of enterprises must be converted to litas using the official rate of the Bank of Lithuania (Lietuvos Bankas).

**Inventories.** Inventories must be valued at actual cost, which is calculated using the first-in, first-out (FIFO) method. On approval of the tax authorities, a taxpayer may apply the average cost or last-in, first-out (LIFO) method.

**Tax depreciation.** To calculate tax depreciation, companies may select the straight-line method, double-declining value method or production method. The selected depreciation method must be applied for all assets of the same type. To change the depreciation method, companies must obtain the approval of the local tax authorities.

Under the straight-line method, depreciation is claimed each year in equal portions. Under the double-declining value method, the depreciation or amortization coefficient is calculated by multiplying the straight-line rate by two. For the purpose of calculating the amount of depreciation or amortization for the tax period during the first year, the acquisition price of long-term assets is multiplied by the depreciation coefficient. To calculate the depreciation or amortization of long-term assets during the other years, except for the last year, the residual value of long-term assets at
the beginning of the tax year is multiplied by the depreciation coefficient. Under the production method, depreciation is calculated based on the number of units produced over the asset’s useful life.

Accelerated depreciation may be claimed for assets used in R&D activities. The law sets the maximum depreciation rates. These rates determine the minimum number of years over which assets may be depreciated. The following are some of the minimum periods.

**Relief for research and development works.** In the calculation of profit tax, three times the amount of R&D expenses, except for depreciation or amortization costs of fixed assets, may be deducted from income in the corresponding tax year. Fixed assets that are used for R&D may be depreciated or amortized applying accelerated depreciation (amortization) rates.

**Relief for investment projects.** The taxable profit of a Lithuanian entity may be reduced by up to 50% by the amount of expenses that are incurred in the acquisition of fixed assets used in an “investment project.” For this purpose, an “investment project” is investment in certain categories of fixed assets (machinery, equipment, information technology hardware and software, and acquired intellectual property rights), required for the manufacturing or supply of new products (or services), increasing production volume, the implementation of a new process of production (or supply of services), essential changes to an existing process (or part of the process) and the implementation of new technologies that are protected by international patent law. This relief may be applied in the 2009 though 2013 tax years, and the balance of unused relief may be carried forward for four years.

**Relief for losses.** Losses, except losses resulting from disposals of securities and derivative financial instruments, may be carried forward for an unlimited period. The carryforward of such losses is no longer allowed if the activity that resulted in the loss ceases. Loss resulting from disposals of securities and/or derivative financial instruments may be carried forward for five years. However, such losses may be covered only by future gains from the disposal of securities and/or derivative financial instruments.

For a reorganization or transfer, the acquiring entity may carry forward the acquired losses, except for losses of entities (nonfinancial institutions) resulting from the disposal of securities and derivatives, incurred before the completion of the reorganization
or transfer if the acquiring entity continues to carry on the activity taken over or a part of such activity for a period of at least three years.

**Groups of enterprises.** Corporations are taxed separately in Lithuania. Consolidated returns are not allowed. The transfer between group entities of tax losses incurred in the 2010 tax year and subsequent tax years is allowed. Certain conditions apply.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Other significant taxes include excise duty, land and land lease tax, tax on the use of Lithuanian natural resources and pollution tax.

**E. Miscellaneous matters**

**Foreign-exchange controls.** The Lithuanian currency is the litas (LTL).

If agreed to by the parties, foreign currency may be used for bank payments between business entities, and the euro may be used for both bank and cash payments. Commercial operations involving foreign currency, such as purchasing, selling and exchanging, may be performed only by banks that have obtained a license from the Bank of Lithuania.

**Transfer pricing.** Entities operating in Lithuania that had revenues exceeding LTL 10 million for the tax year preceding the tax year during which transactions with related parties are undertaken are subject to the Lithuanian transfer-pricing rules. Under these rules, they must maintain supporting documentation establishing that all transactions with associated parties are carried out on an arm’s length basis. Lithuanian transfer-pricing rules are based on the Organization for Economic Cooperation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations.

Companies must file with the tax inspectorate a return reporting the transactions entered into with associated parties, together with their profit tax returns, if the total value of the transactions exceeds LTL 300,000.

**Controlled foreign companies.** Certain income of controlled entities located in countries or zones included in the special list
approved by the Minister of Finance is added to taxable income of Lithuanian entities and taxed at the standard profit tax rate.

**F. Treaty withholding tax rates**

The following table lists the maximum withholding rates under Lithuania’s tax treaties.

A. At a glance

Corporate Income Tax Rate (%) 21 (a)
Capital Gains Tax Rate (%) 21 (a)
Branch Tax Rate (%) 21 (a)
Withholding Tax (%)
Dividends 0/15 (b)
Interest 0/15 (c)
Royalties 0
Branch Remittance Tax 0
Net Operating Losses (Years)
Carryback 0
Carryforward Unlimited
(a) This is the maximum rate. In addition, a municipal business tax and an additional employment fund contribution (employment fund surcharge) are levied on income (see Section B). A new minimum tax regime is effective from 1 January 2013 (see Section B).

(b) A 15% dividend withholding tax is imposed on payments to resident and nonresidents. Under Luxembourg domestic law, a full withholding tax exemption applies to dividends if they are paid to qualifying entities established in European Union (EU)/European Economic Area (EEA) member states, Switzerland or a country with which Luxembourg has entered into a double tax treaty and if certain conditions are met (see Sections B and F).

(c) For details, see Interest in Section B.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their worldwide income. Companies whose registered office or central administration is in Luxembourg are considered resident companies.

Taxation in Luxembourg of foreign-source income is mitigated through several double tax treaties. In addition, if no tax treaty applies, a foreign tax credit is available under domestic law.

Nonresident companies whose registered office and place of management are located outside Luxembourg are subject to corporate income tax only on their income derived from Luxembourg sources.

Effective from 1 January 2013, a new minimum tax regime applies to all taxpayers subject to corporate income tax.

Tax rates. Corporate income tax rates range from 20% to 21%, depending on the income level. In addition, a surcharge of 7% is payable to the employment fund. A local income tax (municipal business tax) is also levied by the different municipalities. The rate varies depending on the municipality, with an average rate of 7.5%. The municipal business tax for Luxembourg City is 6.75% and the maximum effective overall tax rate for companies in Luxembourg City is 29.22%. The following is a sample 2013 tax calculation for a company in Luxembourg City.

A new general minimum tax for all taxpayers subject to corporate income tax (except certain holding companies; see next paragraph) is effective in Luxembourg from 1 January 2013. The tax ranges from €500 to €20,000 (plus contribution to the employment fund), depending on the balance-sheet total as of the closing date of the financial year. Assets that generate income (or are likely to generate income) for which the taxation right belongs to another country based on a double tax treaty concluded with Luxembourg (for example, immovable property, or assets allocated to a permanent establishment) must be excluded from the balance-sheet total for the purpose of determining the minimum
tax. As a result, the new minimum tax does not significantly affect, among others, Luxembourg real estate vehicles holding directly foreign real estate property. It is not possible to reduce the minimum tax by applying certain available domestic tax credits (see Tax Credits in Section C). The minimum tax applies only to corporate entities that have their statutory seat or place of central administration in Luxembourg. Consequently, nonresident corporate entities deriving Luxembourg-source income, such as foreign entities with a permanent establishment in Luxembourg or holding a real estate property in Luxembourg, are out of the scope of the minimum tax. Companies that are part of a tax-consolidation group suffer this minimum tax at the level of each entity, but the consolidated amount of minimum tax is capped at an amount of €20,000.

Effective from 1 January 2013, the minimum tax for certain holding companies is increased. All corporate entities having their statutory seat or central administration in Luxembourg are in the scope of the amended minimum tax regime and subject to a €3,000 minimum tax if the sum of fixed financial assets, transferable securities, cash, and receivables owed to affiliated companies exceeds 90% of their balance-sheet total. Consequently, a regulated entity (such as a venture capital company [société d’investissement en capital à risque, or SICAR] and a securitization vehicle) are in the scope of the minimum tax for holding companies to the extent that the above threshold requirements are met. The provision under prior law restricting the minimum tax regime to entities whose activities do not require a business license or the approval of a supervisory authority was abolished. The rules mentioned in the preceding paragraph with respect to tax consolidation (cap of €20,000) and the unavailability of domestic tax credits also apply.

**Luxembourg investment vehicles.** Luxembourg offers a large number of investment vehicles (companies and funds) that can be used for tax-efficient structuring.

Luxembourg Undertakings for Collective Investment in Transferable Securities (UCITs) are subject to an annual subscription tax (taxe d’abonnement) of 0.05%, levied on their total net asset value, unless a reduced rate or an exemption applies. For the rates of the subscription tax, see Section D. Distributions made by UCITs are not subject to withholding tax.

Investment vehicles offered in Luxembourg are described below.

**Specialized Investment Funds.** Specialized Investment Funds (SIFs) are lightly regulated investment funds for “informed investors.” In this context, an “informed investor” is one of the following:

- An institutional investor
- A professional investor
- Any other type of investor who has declared in writing that he or she is an “informed investor” and either invests a minimum of €125,000 or has an appraisal from a bank, an investment firm or a management company (all of these with a European passport), certifying that he or she has the appropriate expertise, experience and knowledge to adequately understand the investment made in the fund
SIFs are subject to significantly simplified rules for setting up fund structures such as hedge funds, real estate funds and private equity funds. Amendments to the SIF Law covering items, such as the authorization process, delegation, risk management, conflict of interest and cross investment between compartments of SIFs, are effective from 1 April 2012.

An exemption for corporate income tax, municipal business tax and net worth tax applies to investment funds in the form of an SIF. These funds are subject only to a subscription tax at an annual rate of 0.01% calculated on the quarterly net asset value of the fund, unless an exemption regime applies (for example, investments in funds already subject to the subscription tax, certain money market funds and pension pooling vehicle funds). Distributions by SIFs are not subject to withholding tax, except possibly on application of the EU Savings Directive.

Certain double tax treaties signed by Luxembourg apply to an SIF incorporated as an investment company with variable capital (société d’investissement à capital variable, or SICAV) or an investment company with fixed capital (société d’investissement à capital fixe, or SICAF). In general, an SIF constituted as a common fund (fonds commun de placement, or FCP) does not benefit from double tax treaties.

Venture capital companies. A venture capital company (société d’investissement en capital à risque, or SICAR) can be set up under a transparent tax regime as a limited partnership or under a nontransparent tax regime as a corporate company. SICARs are approved and supervised by the Commission for the Supervision of the Financial Sector, but they are subject to few restrictions. They may have a flexible investment policy with no diversification rules or leverage restrictions. SICARs in the form of a corporation benefit from a partial objective exemption regime for income from securities under which losses on disposals and value adjustments made against such investments are not deductible from taxable profits. In addition, SICARs are exempt from subscription tax and net worth tax. For corporations, a dividend withholding tax exemption regime applies. SICARs may be in scope of the minimum tax regime, effective from 1 January 2013, to the extent that the threshold requirements are met (see Tax rates).

Securitization companies. A securitization company can take the form of a regulated investment fund or a company (which, depending on its activities, may or may not be regulated). Securitization companies are available for securitization transactions in the broadest sense and are not subject to net worth tax. They are subject to corporate income tax and municipal business tax. However, commitments to investors (dividend and interest payments) are deductible from the tax base. Nevertheless, securitization companies may be in scope of the minimum tax regime, effective from 1 January 2013, to the extent that the threshold requirements are met (see Tax rates). Distributions of proceeds are qualified as interest payments for Luxembourg income tax purposes and are consequently not subject to withholding tax, except possibly on application of the EU Savings Directive if the securitization company is an FCP.

Private Asset Management Companies. The purpose of a Private Asset Management Company (Société de Gestion de Patrimoine
Familial, or SPF) is the management of private wealth of individuals without carrying out an economic activity. SPFs are subject to subscription tax levied at a rate of 0.25% with a minimum amount of €100 and a maximum amount of €125,000. An exemption for corporate income tax, municipal business tax and net worth tax applies.

SPFs may not benefit from double tax treaties entered into by Luxembourg or from the EU Parent-Subsidiary Directive. Dividend and interest income arising from financial assets may be subject to withholding tax in the state of source in accordance with the domestic tax law of that state. Until 31 December 2011, the favorable tax status for SPFs was lost for any year in which the vehicle received 5% or more of its dividend income from participations in unlisted and nonresident companies that were not subject to a tax similar to Luxembourg corporate income tax. Under the amended law, effective from 1 January 2012, this restriction is removed. Dividend distributions to shareholders are not subject to Luxembourg withholding tax. Interest payments are exempt from withholding tax unless the recipient is a Luxembourg resident individual or the EU Savings Directive applies (see Interest).

Holding companies. Holding companies (sociétés de participations financières, or SOPARFI) are fully taxable Luxembourg resident companies that take advantage of the participation exemption regime. They may benefit from double tax treaties signed by Luxembourg as well as the provisions of the EU Parent-Subsidiary Directive. For information regarding debt-to-equity rules, see Section E. A SOPARFI can be set up as a public company limited by shares (société anonyme), limited company (société à responsabilité limitée) or a partnership limited by shares (société en commandite par actions, or SCA). Loss-making qualifying holding companies are subject to a minimum tax of €3,000 plus employment fund (€1,500 plus employment fund until 31 December 2012; see Tax rates).

Capital gains. The capital gains taxation rules described below apply to a fully taxable resident company.

Capital gains are generally regarded as ordinary business income and are taxed at the standard rates. However, capital gains on the sale of shares may be exempt from tax if all of the following conditions apply:

- The recipient is one of the following:
  - A resident capital company or a qualifying entity fully subject to tax in Luxembourg.
  - A Luxembourg permanent establishment of an entity that is resident in another EU state and is covered by Article 2 of the EU Parent-Subsidiary Directive.
  - A Luxembourg permanent establishment of a capital company resident in a state with which Luxembourg has entered into a tax treaty.
  - A Luxembourg permanent establishment of a capital company or cooperative company resident in an EEA state other than an EU state.
- The shares have been held for 12 months or the shareholder commits itself to hold its remaining minimum shareholding in order to fulfill the minimum shareholding requirement for an uninterrupted period of at least 12 months.
• The holding represents at least 10% of the capital of the subsidiary throughout that period, or the acquisition cost is at least €6 million.
• The subsidiary is a resident capital company or other qualifying entity fully subject to tax, a nonresident capital company fully subject to a tax comparable to Luxembourg corporate income tax or an entity resident in an EU member state that is covered by Article 2 of the EU Parent-Subsidiary Directive.

However, capital gains qualifying for the above exemption are taxable to the extent that related expenses deducted in the current year and in prior years exceed the dividends received. These related expenses include interest on loans used to finance the purchase of such shares and write-offs.

**Administration.** In general, the tax year coincides with the calendar year unless otherwise provided in the articles of incorporation. Tax returns must be filed before 31 May in the year following the fiscal year. The date may be extended on request by the taxpayer. Late filing may be subject to a penalty of up to 10% of the tax due.

Taxes are payable within one month after receipt of the tax assessment notice. However, advance payments must be made quarterly by 10 March, 10 June, 10 September and 10 December for corporate income tax, and by 10 February, 10 May, 10 August and 10 November for municipal business tax and net worth tax. In general, every payment is equal to one-quarter of the tax assessed for the preceding year. If payments are not made within these time limits, an interest charge of 0.6% per month may be assessed.

Luxembourg has introduced a partial self-assessment procedure that is optional for the authorities. This procedure allows the authorities to release tax assessments without verifying the filed tax returns, while keeping a right of verification within a statute of limitations period of five years. In practice, the self-assessment primarily applies to companies having a holding activity.

**Dividends.** Dividends received by resident companies are generally taxable. However, dividends received from resident taxable companies are fully exempt from corporate income tax if the following conditions are fulfilled:

• The recipient is one of the following:
  — A resident capital company or a qualifying entity fully subject to tax in Luxembourg.
  — A Luxembourg permanent establishment of an entity that is resident in another EU state and is covered by Article 2 of the EU Parent-Subsidiary Directive.
  — A Luxembourg permanent establishment of a capital company resident in a state with which Luxembourg has entered into a tax treaty.
  — A Luxembourg permanent establishment of a capital company or cooperative company resident in an EEA state other than an EU state.

• The recipient owns at least 10% of the share capital of the distributing company or the acquisition cost of the shareholding is at least €1.2 million.

• The recipient holds the minimum participation in the distributing company for at least 12 months. The 12-month period does not need to be completed at the time of the distribution of the
dividends if the recipient commits itself to hold the minimum participation for the required period.

Dividends received from nonresident companies are fully exempt from tax if the above conditions are met and if either of the following applies:

- The distributing entity is a capital company subject to a tax comparable to Luxembourg corporate income tax of at least 10.5%.
- The distributing entity is resident in another EU member state and is covered by Article 2 of the EU Parent-Subsidiary Directive.

The exemption for dividends also applies to dividends on participations held through qualifying fiscally transparent entities.

Expenses (for example, interest expenses or write-downs with respect to participations that generate exempt income) that are directly economically related to exempt income (for example, dividends) are deductible only to the extent that they exceed the amount of exempt income.

If the minimum holding period or the minimum shareholding required for the dividend exemption granted under Luxembourg domestic law is not met, the recipient can still benefit from an exemption for 50% of the dividends under certain conditions.

On the distribution of dividends, as a general rule, 15% of the gross amount must be withheld at source; 17.65% of the net dividend must be withheld if the withholding tax is not charged to the recipient. No dividend withholding tax is due if one of the following conditions is met:

- The recipient holds directly, or through a qualifying fiscally transparent entity, for at least 12 months (the holding period requirement does not need to be completed at the time of the distribution if the recipient commits itself to eventually hold the minimum participation for the required 12-month period) at least 10% of the share capital of the payer, which must be a fully taxable resident capital company or other qualifying entity, or shares of the payer that had an acquisition cost of at least €1.2 million, and the recipient satisfies one of the following additional requirements:
  - It is a fully taxable resident capital entity.
  - It is an entity resident in another EU member state and is covered by Article 2 of the EU Parent-Subsidiary Directive.
  - It is a capital company resident in Switzerland that is fully subject to tax in Switzerland without the possibility of being exempt.
  - It is a Luxembourg permanent establishment of an entity that is resident in another EU member state and that is covered by Article 2 of the EU Parent-Subsidiary Directive.
  - It is a company resident in a state with which Luxembourg has entered into a tax treaty and is subject to a tax comparable to the Luxembourg corporate income tax of at least 10.5%, or it is a Luxembourg permanent establishment of such a company.
  - It is a company resident in an EEA member state and is subject to a tax comparable to the Luxembourg corporate income tax of at least 10.5%, or it is a Luxembourg permanent establishment of such a company.
• A more favorable rate is provided by a tax treaty.
• The distributing company is an investment fund, an SIF, an SPF, an SICAR or a securitization company.

**Interest.** Except for the cases discussed below, no withholding tax is imposed on interest payments. For interest linked to a profit-sharing investment, dividend withholding tax may apply.

According to the EU Savings Directive as implemented in the law, interest payments made by Luxembourg payers to beneficial owners who are individuals resident in other EU member states or to certain residual entities (defined as paying agents on receipt in the directive) are subject to withholding tax, unless the recipient elects that information regarding the interest payment be exchanged with the tax authorities of his or her state of residence. The withholding tax rate is 35%.

Withholding tax at a rate of 10% is imposed on interest payments made by Luxembourg paying agents to individuals resident in Luxembourg. The withholding tax is final if the interest income is derived from assets held as part of the private wealth of the individual. The 10% final tax has been extended to interest payments made by paying agents residing in other EU and EEA countries.

**Foreign tax relief.** A tax credit is available to Luxembourg resident companies for foreign-source income that has been subject to an equivalent income tax abroad. The maximum tax credit corresponds to the Luxembourg corporate income tax that is payable on the net foreign-source income.

**C. Determination of trading income**

**General.** The taxable income of corporations is based on the annual financial statements prepared in accordance with generally accepted accounting principles. Profits disclosed are adjusted for exempt profits, nondeductible expenses, special deductions and loss carryforwards.

Expenses incurred exclusively for the purposes of the business are deductible. Expenses incurred with respect to exempt income are disallowed (see Section B for a description of the tax treatment of expenses related to tax-exempt dividends).

**Accounting rules.** International Financial Reporting Standards (IFRS), as adopted by the EU, were introduced in Luxembourg in 2010. Undertakings may apply the IFRS provisions to financial years that remained open on the date of entry into force of this law. However, a tax balance sheet is required to avoid the taxation of unrealized gains.

A new chart of accounts and an electronic filing requirement for the trial balance for statistical purposes became mandatory in Luxembourg for certain entities for fiscal years beginning after December 2010.

The Luxembourg Central Bank issued regulations on the collection of statistical information for Luxembourg finance companies. The first reports were due to be transmitted in October 2011.

**Inventories.** Inventory must be valued at the lower of acquisition (or production) cost or fair market value. The cost may be calculated either on the basis of weighted-average prices, first-in, first-out
Luxembourg

(FIFO), last-in, first-out (LIFO) or a similar method, provided the business situation justifies such a method. The method chosen should be applied consistently.

**Provisions.** Provisions for losses and uncertain liabilities may be deductible for tax purposes if they are based on objective facts and if the corresponding charge is deductible and economically connected to the relevant tax year.

**Tax depreciation.** The straight-line depreciation method and, under certain conditions, the declining-balance method (except for buildings) are allowed.

Commercial buildings are depreciated at straight-line rates ranging from 1.5% to 4%. The straight-line rate for industrial buildings is 4%. Land may not be depreciated.

The depreciation rates under the straight-line method are 10% for plant and machinery, 20% for office equipment and 25% for motor vehicles. The declining-balance depreciation rates may be as high as 3 times the straight-line depreciation rate without exceeding 30% (4 times and 40% for equipment exclusively used for research and development).

Depreciable assets with a useful life of one year or less and those with a value not exceeding €870 may be deducted in full from business income in the year of acquisition.

**Special tax depreciation for investments in clean technology.** Businesses making eligible investments aimed at protecting the environment and providing for rational use of energy may elect an accelerated tax amortization of 80% of the depreciation base.

**Intellectual property.** Income, royalties and capital gains derived by resident corporate entities or Luxembourg permanent establishments of nonresident companies from certain intellectual property (IP) rights acquired or developed after 31 December 2007, except those acquired from an associated company, benefit from a partial tax exemption of 80% of the net income arising from the use of, or the right to use, the IP rights. A loss remains fully deductible for tax purposes but it is recaptured in the year in which a gain is derived on the sale of IP. A notional deduction of 80% for the use of a self-developed patent by a company for its own activity is also granted. Capital gains derived from the disposal of qualifying IP rights also benefit from the exemption regime. In addition to the partial exemption from income taxes, qualifying IP rights also benefit from a full net worth tax exemption in Luxembourg.

**Tax credits**

**General investment tax credit.** A tax credit of 12% is granted for additional investments in qualifying assets. Qualifying assets consist of depreciable tangible fixed assets other than buildings physically used in EU member states, Iceland, Liechtenstein and Norway (EEA). Certain assets are excluded from the additional tax credit in the year of their acquisition, such as motor vehicles, assets that have a useful life of less than three years and second-hand assets. In addition, a 7% credit is granted for qualifying new investments up to €150,000, and a 2% credit is granted for investments over that amount. If investments are made to create jobs for
disabled persons, these rates are increased to 8% and 4%, respectively. Investments may qualify for both credits.

**Tax credit for ecological equipment.** The rates for the general investment tax credit (see General investment tax credit) are increased from 7% to 8% and from 2% to 4% for certain investments intended to protect the environment.

The above credits reduce corporate income tax and may be carried forward for 10 years.

**Tax credit for professional training.** Ten percent of training costs can be offset against corporate income tax under certain conditions.

**Tax credit for hiring of unemployed.** Fifteen percent of the annual gross salary paid to persons who were unemployed can be offset against corporate income tax under certain conditions. This regime is extended until 31 December 2014.

**Tax credit for audiovisual or venture capital investments.** Eligible projects may qualify for a corporate income tax credit of 30% of the nominal amount of so-called audiovisual or venture capital certificates, limited to a maximum credit of 30% of taxable income. The benefit from both regimes cannot be cumulated. The regime for audiovisual investment certificates, which is in effect until 2015, is granted to Luxembourg resident corporations and cooperative companies and applies to projects realized in the EU.

**Relief for losses.** Trading losses, adjusted for tax purposes, incurred in or after 1991 may be carried forward without a time limitation. Losses may not be carried back.

**Groups of companies.** A Luxembourg company and its wholly owned (at least 95% of the capital, which may be reduced to 75% in exceptional situations) Luxembourg subsidiaries may form a “fiscal unity.” The fiscal unity allows the affiliated subsidiaries to combine their respective tax results with the tax result of the parent company of the consolidated group. To qualify for tax consolidation, both the parent and its wholly owned subsidiaries must be resident capital companies that are fully subject to tax. A permanent establishment of a nonresident capital company fully subject to a tax comparable to Luxembourg corporate income tax also qualifies as a parent company of the group. The tax consolidation rules also allow consolidation between a Luxembourg parent company and its indirectly held Luxembourg subsidiary through a nonresident qualifying company or a tax-transparent entity.

Companies that are part of a tax-consolidation group suffer the minimum tax at the level of each entity, but the consolidated amount of minimum tax is capped at the amount of €20,000 (see Tax rates in Section B). The net worth tax reduction is not granted up to the amount of minimum corporate income tax due from corporate entities, either on a stand-alone basis or within a tax-consolidation group (see Section D).

**D. Other significant taxes**

The following table summarizes other significant taxes.
Nature of tax | Rate (%)
---|---
Value-added tax, on the supply of goods and services within Luxembourg and on the import of goods and services into Luxembourg
   General rate | 15
   Other rates | 3/6/12
Net worth tax, on net asset value as of 1 January, reduced by the value of qualifying participations (at least 10% of the capital of qualifying domestic or foreign subsidiaries) that are held directly or through a qualifying fiscally transparent entity; net worth tax may be reduced up to the amount of corporate income tax (including the contribution to the employment fund and before deduction of tax credits) by creation of a net worth tax reserve that must be maintained for five years in the accounts; this net worth tax reduction is not granted up to the amount of minimum corporate income tax due from corporate entities, either on a stand-alone basis or within a tax-consolidation group | 0.5
Subscription tax (*taxe d’abonnement*), annual tax on the value of a company’s shares; rate depends on type of company
   Société de Gestion de Patrimoine Familial (SPFs) | 0.25
   Investment funds
      Certain funds of funds, certain institutional monetary funds, Pension Fund Pooling Vehicles (PFPVs), microfinance UCIs and Exchange Traded Funds | 0
      Specialized Investment Funds (SIFs), dedicated funds (funds owned exclusively by institutional investors), institutional compartments of funds, monetary funds and cash funds, on the condition that the exemption regime does not apply | 0.01
   Other funds | 0.05
Social security contributions on salaries (2013 rates); paid by
   Employer (including health at work contribution and accident insurance but excluding mutual insurance) | 12.26
   Employee (including care insurance) | 12.45
Payroll taxes, for accident insurance; paid by employer (2013 rate) | 1.10
Health at work contribution, on salaries; paid by employer (2013 rate) | 0.11
Care insurance on gross employment income; paid by employee (2013 rates) | 1.4
Mutual insurance (2013 rates); paid by employer | 0.42 to 2.64

**E. Miscellaneous matters**

**Foreign-exchange controls.** Luxembourg does not impose transfer restrictions. The Banque Centrale de Luxembourg (BCL) and the Service Central de la Statistique et des Etudes Économiques (the national statistical institute of Luxembourg) monitor the transfer.
of funds. Effective from 1 January 2012, this obligation is transferred to the companies themselves on a monthly basis. The new reporting obligation also applies to selected companies in the nonfinancial sector that, based on previous activity, are expected to realize large volumes of transactions, mainly services, with foreign counterparts.

**Debt-to-equity rules.** The Luxembourg tax law does not contain any specific thin-capitalization rules. In principle, borrowed money that is necessary for financing an operation is not limited to a percentage of paid-in capital. However, based on the abuse-of-law doctrine, the authorities tend to challenge debt-to-equity ratios of companies engaged in holding activities that are greater than 85:15. Under the abuse-of-law doctrine, the tax authorities may challenge fictitious or abnormal transactions and schemes that are entered into for the sole purpose of avoiding taxes.

**Antiavoidance legislation.** No specific antiavoidance rules are contained in the law. However, the tax authorities can substitute an arm’s length price if transactions with a related party are entered into at an artificial price or if transactions are entered into in an abnormal manner and are solely tax-motivated. Since 2011, guidance formalizing transfer-pricing rules for intragroup financing activities applies in Luxembourg. To obtain a binding tax clearance from the authorities, it is now required that such companies have a minimum equity of at least 1% of the loans granted, with a cap of €2 million, and that they have available a transfer-pricing study incorporating Organization for Economic Cooperation and Development (OECD) standards. The companies must further meet the required substance criteria in Luxembourg. A grandfather period to comply with this guidance ended on 31 December 2011.

**Chamber of Commerce fee.** Membership in the Chamber of Commerce, which requires an annual membership fee, is mandatory for all commercial companies having their legal seat in Luxembourg and for Luxembourg branches of foreign companies. Effective from 2010, the fee ranges from 0.025% to 0.20%, depending on the taxable profit of the company, before loss carry-forwards, as provided by the Luxembourg income tax law. The fee is assessed on the basis of the taxable profit realized two years before the year the contribution is due. For companies in a loss situation, partnerships and limited companies (société à responsabilité limitée) must make a minimum contribution of €70, while other corporations must make a minimum annual contribution of €140. Companies that mainly perform a holding activity and that are listed as such in the Statistical Classification of Economic Activities in the European Community (Nomenclature statistique des activités économiques dans la communauté européenne, or NACE) Code must pay a lump-sum fee of €350.

**Special tax regime for expatriate highly skilled employees.** The provisions of the beneficial income tax regime for expatriates apply to assignments or recruitments made after 1 January 2011. If the employer meets certain conditions, the tax regime can apply to employees who are sent to work temporarily in Luxembourg on an assignment between intragroup entities and to employees who are directly recruited abroad by a Luxembourg company to work temporarily in Luxembourg. Under the tax regime, tax relief is
provided for certain costs related to expatriation if several conditions are met.

**Limitation of corporate tax deductibility of “golden handshakes.”** To limit excessive “golden handshakes” to departing employees, voluntary departure indemnities or dismissal indemnities above €300,000 are not tax-deductible for employers. Tax rules at the level of the employee remain fully applicable. A fractioned payment that is made over several years is deemed to be a single payment.

**Islamic finance.** The Luxembourg tax administration provides guidance covering the Luxembourg tax treatment of some contracts and transactions with respect to Islamic finance. This clarifies the revenue repatriation mechanism of Luxembourg’s Sharia-compliant financing instruments as well as structuring capacities.

**VAT free zone.** In 2011, Luxembourg introduced a temporary exemption regime for VAT purposes. This regime provides a VAT suspension system for transactions concerning goods stored in specific locations.

**F. Treaty withholding tax rates**

The rates reflect the lower of the treaty rate and the rate under Luxembourg domestic tax law. Dividend distributions to companies resident in a treaty country are covered by the Luxembourg participation exemption regime. As a result, a full exemption from Luxembourg dividend withholding tax may apply if certain conditions are met (see Section B).

</tbody>
</table>

(a) The 5% rate (Netherlands, 2.5%; Indonesia, Korea (South), and Morocco, 10%) applies if the recipient company holds at least 25% of the payer of the dividends.

(b) The 0% rate applies if the recipient of the dividends is a company that, on the date of payment of the dividends, has owned directly at least 25% of the voting shares of the payer for an uninterrupted period of at least two years and if such dividends are derived from an industrial or commercial activity effectively operated in Luxembourg. The 5% rate applies if the recipient of the dividends is a company that owns directly at least 10% of the voting shares of the payer. The 15% rate applies to other dividends.

(c) The 10% rate applies if, from the beginning of the accounting year in which the recipient company receives the dividends, it owns at least 25% of the payer's share capital or if the price paid by the recipient company for its direct holding was at least €6,197,338.

(d) Under an EU directive, withholding tax is not imposed on dividends distributed to a parent company resident in another EU state if the recipient of the dividends holds directly at least 10% of the payer or shares in the payer that it acquired for a price of at least €1,200,000 for at least one year. This holding period does not need to be completed at the time of the distribution if the recipient commits itself to eventually holding the participation for the required period.
Luxembourg honors the Czechoslovakia treaty with respect to the Czech and Slovak Republics.

The 0% rate applies if, at the time of the distribution, the recipient has held at least 25% of the share capital of the payer for an uninterrupted period of at least two years. The 5% rate applies if the recipient owns at least 25% of the share capital of the payer. The 15% rate applies to other dividends.

The lower rate applies if the recipient company holds at least 10% of the payer.

The 5% rate applies if the beneficial owner owns at least 25% of the voting power of the payer of the dividends. The 15% rate applies to other dividends.

The 5% rate applies if the beneficial owner of the dividends is a company that meets either of the following conditions:

- It holds directly or indirectly at least 50% of the capital of the payer.
- It has invested in the payer more than US$10 million or the equivalent in Luxembourg or Vietnamese currency. The 10% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 25%, but less than 50%, of the capital of the payer and if such beneficial owner's investment in the payer does not exceed US$10 million or the equivalent in Luxembourg or Vietnamese currency. The 15% rate applies to other dividends.

The lower rate applies if the recipient company holds at least 30% of the payer or if the value of its investment in the payer is at least ECU 75,000 or its equivalent in other currencies. In November 2011, Luxembourg and the Russian Federation signed an amending protocol to the existing double tax treaty between the countries. After the protocol enters into force, the withholding tax rate will be reduced to 5% for qualifying dividends if the receiving company holds at least 10% of the capital and if it has invested €80,000 (or equivalent in rubles) in the distributing company.

Interest payments may be subject to withholding tax in certain circumstances. For details, see Section B.

The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 30% of the paying company's capital and if the value of its investment in the paying company is at least US$300,000 at the payment date.

The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer and that has invested more than €2 million or its equivalent in Georgian lari. The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the capital of the payer and that has invested more than €100,000 or its equivalent in the currency of Georgia. The 10% rate applies to other dividends.

The 0% rate applies if the recipient company holds at least 10% of the payer for a continuous period of 12 months before the decision to distribute the dividend. The 15% rate applies to other dividends.

The lower rate applies if the recipient of the dividends holds directly at least 10% of the shares in the payer or if it acquired the shares in the payer for a price of at least €1.2 million.

Withholding tax is not imposed on dividends distributed to a parent company if the recipient of the dividends holds directly at least 10% of the payer or if it acquired the shares in the payer for a price of at least €1.2 million and has held these shares for at least one year. The 5% rate applies if the recipient company holds at least 10% of the payer of the dividends. The 15% rate applies to other dividends.

The 5% rate applies if the recipient company holds at least 10% of the payer. The 15% rate applies to other dividends.

The 5% rate applies if the recipient company holds at least 20% of the payer. The 15% rate applies to other dividends.

The 5% rate applies if the recipient company holds at least 10% of the payer. The 10% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and if the payer company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate lower than the normal rate of Israeli company tax.
(v) The 5% rate applies if the recipient company holds at least 25% of the payer of the dividends during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.

(w) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the shares.

(x) The 10% rate applies if the recipient company holds at least 25% of the capital in the distributing company. After the new double tax treaty signed in April 2012 enters into force, it will reduce the withholding tax on qualifying dividends to 5% if the beneficial owner is a company holding at least 10% of the capital in the distributing company. In other cases, the 15% rate applies, including dividends arising from real estate companies that benefit from a full or partial tax exemption or that treat distributions as tax deductible. SICAVs, SICAFs, SICARs and qualifying FCPs will be in the scope of the new DTT and may benefit from the withholding tax regime.

(y) In June 2012, Luxembourg and Poland signed an amending protocol to the existing double tax treaty between the countries. After the protocol enters into force, withholding tax rates of 0% or 15% will apply. The 0% rate will apply if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends for an uninterrupted period of 24 months. The 15% rate will apply to other dividends.

Luxembourg has signed tax treaties with Albania, Germany, Kazakhstan, Kuwait, Macedonia, Seychelles, Tajikistan and Ukraine, but these treaties have not yet entered into force.

Following treaty negotiations, treaty drafts have been initialled with Cyprus, Kyrgyzstan, Oman, Saudi Arabia and Sri Lanka.

Tax treaty negotiations with Croatia, Egypt, Hungary, Lebanon, Montenegro, New Zealand, Pakistan, Serbia, Syria, the United Kingdom and Uruguay are under way.

As of 1 January 2013, amendments to tax treaties with Canada, Belgium, Korea (South), Italy, Kazakhstan, Malta, Poland, Portugal, Romania, the Russian Federation and the United States have been signed and are subject to ratification.

Since 2009, Luxembourg has signed numerous new treaties or treaty amendments with other countries. As a result, Luxembourg complies with OECD standards with respect to information exchange between tax authorities and reinforces international fiscal cooperation against tax fraud.

(a) Complementary tax is imposed on income at progressive rates ranging from 9% to 12%. See Section B.
(b) For details regarding the taxation of capital gains, see Section B.
(c) Macau law does not contain any specific measures imposing withholding taxes except for service fees paid to individuals. Under certain circumstances, interest or royalties received by nonresidents from Macau may be regarded as income from commercial or industrial activities in Macau and taxed at the normal corporate income tax rates.
(d) Dividends are not taxable if they are distributed by entities that have paid corporate income tax at the corporate level on the distributed income.

B. Taxes on corporate income and gains

Corporate income tax. Companies and individuals carrying on commercial or industrial activities in Macau are subject to complementary tax in Macau. An entity established in Macau is regarded as carrying on business in Macau, and its profits are subject to complementary tax. Non-Macau entities that derive profits from commercial or industrial activities in Macau are also subject to complementary tax.

Rates of corporate income tax. The same complementary tax rates apply to companies and individuals. Taxable profits over MOP 200,000 are taxed at progressive rates ranging from 9% to 12%. The following are the complementary tax rates.
### Taxable profits and rates

</tr>
</tbody>
</table>

**Offshore companies.** Macau Offshore Companies (MOCs) are exempt from Macau complementary tax. A company qualifies as an MOC if it is established under Macau’s offshore law and if it meets certain criteria. In general, MOCs must use non-Macau currencies in its activities, target only non-Macau residents as customers and concentrate only on non-Macau markets. Newly established MOCs may engage only in the eight categories of services contained in a list published by the government.

**Capital gains.** The Macau Complementary Tax Law does not distinguish between a “capital gain” and “revenue profit.” Companies carrying on commercial or industrial activities in Macau are subject to complementary tax on their capital gains derived in Macau.

**Administration.** The tax year is the calendar year.

For tax purposes, companies are divided into Groups A and B. These groups are described below.

**Group A.** Group A companies are companies with capital of over MOP 1 million (US$125,000) or average annual taxable profits over the preceding three years of more than MOP 500,000 (US$62,500). Other companies maintaining appropriate accounting books and records may also elect to be assessed in this category by filing an application with the Macau Finance Services Bureau before the end of the tax year.

Income of Group A companies is assessed based on their financial accounts submitted for tax purposes. These companies are required to file between April and June of each year complementary tax returns with respect to the preceding year. The tax returns must be certified by local accountants or auditors registered with the Macau Finance Services Bureau.

Group A companies may carry forward losses to offset taxable profits in the following three years.

**Group B.** All companies that are not Group A companies are classified as Group B taxpayers.

For Group B companies, tax is levied on a deemed profit basis. Financial information in tax returns submitted by Group B companies normally serves only as a reference for tax assessment. Group B companies are normally deemed to earn profits for each year of assessment, regardless of whether the taxpayers have earned no income or incurred losses for the year.

Group B companies are required to file annual tax return forms for the preceding year between February and March. Certification of the tax return forms by registered accountants or auditors is not required.

Group B companies may not carry forward tax losses.
Dividends. Dividends are normally paid out of after-tax profits. Consequently, no tax is imposed on dividends.

Group A companies (see Administration) may claim deductions for dividends declared out of current-year profits. Under such circumstances, the recipients of the dividends are subject to complementary tax on the dividends.

Foreign tax relief. Macau does not grant relief for foreign taxes paid.

C. Determination of trading income

General. As discussed in Section B, companies are divided for tax purposes into Groups A and B. For Group A companies, taxable profits are based on the profits shown in the signed complementary tax return, subject to adjustments required by the tax law. Group B companies are taxed on a deemed profit basis.

To be deductible, expenses must be incurred in the production of taxable profits. Certain specific expenses are not allowed, such as life insurance and fines. The deduction of provisions is restricted.

Inventories. Inventories are normally valued at the lower of cost or net realizable value. Cost can be determined using the weighted average or first-in, first-out (FIFO) methods.

Provisions. The following are the rules for the tax-deductibility of provisions in Macau:
- Provision for bad debts: deductible up to 2% of trade debtor’s year-end balance
- Provision for inventory loss: deductible up to 3% of the value of the closing inventory at the end of the year
- Provision for taxes: not deductible
- Other provisions: subject to approval by the tax authorities

Tax depreciation. Tax depreciation allowances are granted for capital expenditure incurred in producing taxable profits. These allowances are calculated based on the actual cost of purchase or construction, or, if the amount of the cost is not available, the book value accepted by the Macau Finance Services Bureau. The following are the maximum straight-line depreciation rates in Macau.

E. Miscellaneous matters

Foreign-exchange controls. The currency in Macau is the pataca (MOP). Since 1977, the pataca has been closely aligned with the Hong Kong dollar (HK$), moving within a narrow band around an exchange rate of MOP 103 to HK$100. Because the Hong Kong dollar is officially pegged to the U.S. dollar, the value of the pataca is closely associated with the value of the U.S. dollar. The current exchange rate is approximately MOP 8:US$1.

Macau does not impose foreign-exchange controls.

Debt-to-equity rules. Except for the banking and financial services sector, no statutory debt-to-equity requirements or capitalization rules are imposed in Macau.

F. Tax treaties

Macau has entered into double tax treaties with Mainland China, Mozambique and Portugal. Macau has also signed tax treaties with Belgium and Cape Verde, but these treaties are not yet in force.

* Resident companies and permanent establishments of nonresident companies are not subject to tax on their income. They are subject only to tax at a rate of 10% on dividends and certain other payments made by them. For further details, see Section B.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies and permanent establishments of nonresident companies registered with the Macedonian authorities are not subject to tax on their income. They are subject to tax on the following items only:

- Dividends paid to foreign legal entities or to resident or nonresident individuals.
- Fringe benefits.
- Gifts.
• Distribution of profits in any form (for example, overpricing by related parties on supplies of goods or services).
• Expenses not recognized for tax purposes, such as transfer-pricing and thin-capitalization adjustments, provisions and other add-backs, reduced by the amount of annual tax deductions. The amount of nondeductible expenses is subject to tax after deduction of the amounts that qualified for tax deduction (non-tax-deductible balance of accounting depreciation brought forward from the previous year and provisions that have materialized in the current year).

Nonresident companies without a registered permanent establishment in Macedonia are subject to tax on their business income derived from local sources.

Rate of corporate income tax. The corporate income tax rate is 10%.

Companies are exempt from income tax for the first 10 years of their activities in a technological industrial development zone, subject to the conditions and procedures established in the Law on Technological Industrial Development Zones.

Capital gains and losses. Capital gains derived by resident companies and permanent establishments of nonresident companies registered with the Macedonian authorities are exempt from tax until they are distributed. In all other cases, capital gains are not subject to tax.

Administration. The tax year is the calendar year.

Companies must make advance monthly payments of corporate income tax by the 15th day of each month. The tax base for the monthly payments equals \( \frac{1}{12} \) of the nondeductible expenses (payments subject to income tax) incurred in the preceding year adjusted by the percentage of the cumulative growth of retail prices in the country in the preceding year.

Companies must file annual tax returns by 28 February of the year following the tax year. Filing of monthly tax returns is not required. If the tax determined in an annual tax return is more than the amount of advance tax paid, the company must pay the difference within 30 days after the filing due date. Any overpaid amount must be refunded within 30 days following the request of the taxpayer.

On the distribution of profits, companies must file a tax return calculating the tax on the distributed profits. The tax on distributed profits is paid at the same time as the distribution of profits.

Dividends. Like other income, dividends received are exempt from tax until they are distributed to either a foreign legal entity or to resident or nonresident individuals. Dividends paid to foreign companies are subject to withholding tax at a rate of 10% on the net amount of the distributed dividends (that is, after deduction of the 10% corporate tax), unless tax treaty relief applies.

Dividends distributed to resident companies are exempt from profit tax.

Foreign tax relief. Resident companies may claim a tax credit for foreign income tax paid, but the amount of the credit may not
exceed the 10% profit tax imposed in Macedonia on the foreign-source income. Foreign income tax is credited against the annual Macedonian tax imposed on any profit adjustments made in the same year, even though the tax base is different. Any tax credit balance cannot be carried forward. Exceptionally, foreign tax on dividends and permanent establishments’ profits is credited against domestic tax on profit distributions. Macedonian companies holding at least 25% of the capital of foreign companies uninterruptedly for one year are also eligible for a tax credit equal to the underlying corporate tax.

C. Determination of trading income

**General.** Companies pay income tax on payments made that are considered nondeductible expenses and on profit distributions.

**Inventories.** Inventories are valued at cost, but the value for tax purposes may not exceed the sales value on the date when taxable income is determined.

**Provisions.** Effective from April 2011, provisions booked for current liabilities are deductible for tax purposes. Provisions taxed in prior years as nondeductible expenses may be deducted in the year in which such liability materializes. The amount is deducted from the total amount of expenses that are not deductible for tax purposes in the year in which the liability becomes definite. Any credit balance remaining is carried forward to the following five consecutive years and is deducted from nondeductible expenses for such years.

Write-offs of receivables for which no final court decision on their noncollectibility has been issued are not deductible for tax purposes. Written-off receivables taxed in prior years as nondeductible expenses are deducted from the total amount of expenses that are not deductible for tax purposes in the year in which the receivables are collected or in which the final court decision of their noncollectibility is published. Any credit balance remaining is carried forward to the following five consecutive years and deducted from the nondeductible expenses for such years.

**Tax depreciation.** Effective from April 2011, tax depreciation follows the accounting depreciation of tangible and intangible assets. The excess amount of the accounting depreciation not recognized for tax purposes taxed in prior years is deductible from the nondeductible expenses in the following years in which such differences become deductible for tax purposes. Depreciation not recognized for tax purposes in prior years is carried forward to be deducted from expenses that are not deductible for tax purposes in 2011 and in the following five financial years.

**Relief for losses.** Losses may not be carried forward or carried back.

**Groups of companies.** Group registration is not permitted under the Macedonian Profit Tax Code.

D. Other significant taxes

The following table summarizes other significant taxes.
Nature of tax

Value-added tax; imposed on goods sold and services rendered in the RM, on sales of real property in the RM and on imports; certain items are exempt, such as banking, insurance and other financial activities

Standard rate

Reduced rate (for food products for human use, drinking water from public water supply systems, books, brochures and newspapers, certain materials and fixed assets for agriculture, drugs and medicine products for human use, computers, printers and accessories, software, equipment that is used for the production of solar electricity and passenger transport)

Exports

Excise tax on sales in the RM and on imports of various items; tax is imposed at ad valorem rates, which are applied to the sales or import price, or at specific rates, which are expressed in Macedonian denars per unit of goods; for petrol, Diesel D-1 and gas, the rates are subject to change every two weeks

Petrol

MKD 21.692 to MKD 24.396 per liter

Diesel D-1 (petrol for use in motor cars)

MKD 12.264 per liter

Heating oil

MKD 3.230 per liter

Fuel oil

MKD 0.10 per kilogram

Alcoholic beverages

MKD 300 per liter of pure alcohol

Beer

MKD 3 per percentage of alcohol in a liter

Cigars and cigarillos

MKD 1.35 per piece

Cigarettes

MKD 0.10 per piece plus 35% of the retail price

Other tobacco products

MKD 1,350 per kilogram

Taxes contained in Property Tax Law

Property tax; annual tax on owners of immovable property, including nonrural land, residential buildings or apartments, industrial, business and administrative buildings, and garages and other structures; tax base is the market value of the real estate or movable property; tax return must be filed by 31 January (only if changes have occurred since the previous period)

0.1% to 0.2%

Tax on sales and other transfers of real estate and rights to real estate; tax base is the market value of the real estate or right at the time of the sale; for exchanges, the tax base is the difference between the market values of the items being exchanged; tax payable by transferor; tax return must be filed within 15 days after the transfer of the property

2% to 4%
Nature of tax

Inheritance and endowment tax, on the inheritance or endowment of real estate or rights to real estate; tax applies regardless of whether inheritance or endowment is granted in a will or is acquired under the inheritance law or under an endowment agreement; tax base is the market value of the inheritance and endowment, reduced by debts and expenses; tax is paid by resident and nonresident recipients, including companies; tax return must be filed within 15 days after the transfer of the property

| Individuals in first line of heritage | 0% |
| Individuals in second line of heritage | 2% to 3% |
| All others | 4% to 5% |

E. Miscellaneous matters

Foreign-exchange controls. The currency in Macedonia is the denar (MKD). All transactions in Macedonia must be made in denars.

The National Bank of the Republic of Macedonia, which is the central bank, is exempt from income tax.

Residents and nonresidents may maintain foreign-currency accounts at commercial banks.

Registration with the central bank is required for the following transactions:
- Obtaining or granting loans
- Paying or receiving cash
- Opening bank accounts abroad

Transfer pricing. Macedonia has transfer-pricing rules. Under these rules, the tax authorities may adjust the taxable income of taxpayers derived from transactions with related companies if they deem prices paid (or charged) to related companies for various types of items to be excessive. In such circumstances, the difference between prices stated in financial statements and arm’s length prices is subject to tax.

Debt-to-equity ratios. Under thin-capitalization rules, interest on loans received from shareholders owning at least 25% of the capital of the borrower or on loans guaranteed by such shareholders is subject to tax to the extent that such interest corresponds to the excess of the loan balance over three times the shareholders’ share in the equity of the borrower.

Effective from April 2011, the thin-capitalization restrictions apply only to loans provided by direct shareholders that are nonresidents. In addition, the 25% participation threshold is alternatively measured by reference to voting rights. Loans provided from financial institutions are excluded from the thin-capitalization restrictions. Newly established entities are excluded in their first three years of operations.

</table>

(a) The lower rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 25% of the equity of the payer of the dividends.

(b) The 0% rate applies if the beneficial owner of the interest is the government or the central bank.

(c) The 0% rate applies if the beneficial owner of the interest is the government, a municipality, the central bank or an agency fully owned and controlled by the government or a municipality (debts indirectly financed by the government, a local authority or the central bank).

(d) The 0% rate applies if the recipient of the dividend is a company that holds directly or indirectly at least 10% of the equity of the payer of the dividends.

(e) The 0% rate applies if the beneficial owner of the interest is the government, municipalities, the central bank, other financial institutions fully owned by the government or municipalities, or other legal entities that are directly financed by the government, the central bank or municipalities.

(f) The 0% rate applies if the beneficial owner of the dividends is a pension fund or other similar institution providing pension schemes in which individuals...
may participate to secure retirement benefits. The 5% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 25% of the equity of the payer of the dividends and if such holding is maintained for an uninterrupted period of at least one year and the dividends are declared within that period.

(g) The 0% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the voting power of the payer of the dividends.

(h) The 0% rate applies if the beneficial owner of the interest is the State of Finland, Bank of Finland, Finnish Fund for Industrial Co-operation or if the interest is from loans supported by the government of Finland.

(i) The 0% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the equity of the payer of the dividends.

(j) The 0% rate applies if the beneficial owner of the interest is the government, municipalities or their fully owned entities or if the interest payments arise from loans of other agencies or instrumentalities (including financial institutions) based on agreements between the governments.

(k) The 0% rate applies if the beneficial owner of the interest is the government including municipalities, the central bank and financial institutions controlled by the government or if the interest is derived from loans guaranteed by the government.

(l) The 0% rate applies if the beneficial owner of the interest is the government including municipalities, agencies or banks of the government or municipalities or if the interest is derived from loans warranted, insured or financed by the government.

(m) The 0% rate applies if any of the following circumstances exist:
   • The beneficial owner of the interest is the state, a statutory body or the central bank.
   • The interest is paid on loans approved by the government of the country of the interest payer.
   • The interest is paid on loans granted by the SWEDCORP, Swedfund International AB, the Swedish Export Credits Guarantee Board or any other public institution with the objective of promoting exports or development.
   • The interest is paid on bank loans.

(n) The 0% rate applies if the beneficial owner obtained the interest with respect to sales on credit of industrial, commercial or scientific equipment or with respect to sales on credit of merchandise between enterprises or if the interest is paid on bank loans.

(o) The 0% rate applies if the beneficial owner of the interest is the government, municipalities or the central bank.

(p) The 0% rate applies if the beneficial owner obtained the interest with respect to sales on credit of industrial, commercial or scientific equipment or with respect to sales on credit of merchandise between enterprises or if the interest is paid on long-term bank loans (over five years).

(q) The lower rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the equity of the payer of the dividends.

(r) The 0% rate applies if the beneficial owner of the dividends owns at least 25% of the equity of the payer of the dividends for the entire 12-month period ending on the date of payment of the dividend or if the beneficial owner of the dividends is a pension scheme. The 5% rate applies if the beneficial owner of the dividends is a company that holds at least 10% of the voting power of the payer of the dividends.

(s) The 0% rate applies to interest paid with respect to a loan granted or credit extended by an enterprise to another enterprise and to interest paid to political subdivisions, local authorities or public entities.

(t) The 0% rate applies to interest paid with respect to a loan granted or credit extended for the sale of industrial, commercial or scientific equipment (unless the sale or loan is between related persons), and to interest paid to the government including local authorities, the central bank and financial institutions wholly owned by the government.

(u) The higher rate applies to royalties paid for the use of, or the right to use, movies or tapes for radio and television broadcasting.

(v) The 0% rate applies if the beneficial owner of the dividends owns at least 25% of the equity of the payer of the dividends for the entire 12-month period ending on the date of payment of the dividend or if the beneficial owner of the dividends is a pension scheme. The 5% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the equity of the payer of the dividends.

(w) This treaty is not yet in force.
(x) The 0% rate applies if the beneficial owner of the dividends is the Central Bank of Norway, the government pension plan of Norway or Norfund or, in case of Macedonia, the Central Bank of Macedonia. The 10% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 25% of the equity of the payer of the dividends.

(y) The 0% rate applies to the following:
- Interest paid to the government of a contracting state, a political subdivision or local authority thereof, the central bank of a contracting state or an institution wholly owned by the government of a contracting state
- Interest paid on a loan insured or guaranteed by a governmental institution for the purpose of promoting exports
- Interest paid with respect to the sale on credit of industrial, commercial or scientific equipment

(z) The 0% rate applies to the following:
- Interest paid with respect to the sale of commercial or scientific equipment on credit
- Interest paid with respect to the sale of goods by an enterprise to another enterprise on credit
- Interest paid on a loan guaranteed by the Federal Republic of Germany with respect to the export of foreign direct investment
- Interest paid to the government of the Federal Republic of Germany, the Deutsche Bundesbank, the Kreditanstalt fur Wiederaufba, the Deutsche Investitions-und Entwicklungsgesellschaft or the Macedonian government.

(aa) The 0% rate applies if the recipient of the dividend is a company that holds directly at least 25% of the equity of the payer of the dividends.

(a) The withholding tax on dividends was repealed in 2008. However, withholding tax on dividends continues to apply to certain entities (see Section B).
(b) This withholding tax applies to resident and nonresident companies and individuals.
(c) This withholding tax applies to nonresident companies.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies deriving taxable income from activities carried out in Madagascar are subject to corporate income tax. Resident companies are companies incorporated in Madagascar, which include subsidiaries and branches of foreign companies.

Tax rates. The standard corporate income tax rate is 20%.

In general, the minimum tax is MGA 100,000 plus 0.5% of annual turnover (including capital gains) for companies carrying out the following activities:
- Agricultural
- Craft
- Mining
- Industrial
- Tourism
- Transport
This minimum tax equals 0.1% of annual turnover for fuel station filling companies. For companies engaged in other activities, the minimum tax is MGA 320,000 plus 0.5% of annual turnover.

The minimum tax applies if the company incurs a loss or if the corporate income tax calculated using the 20% rate is less than the minimum tax to be paid as stated above.

Free zones’ companies. Free zones’ companies are exempt from corporate income tax for the first five years of their activities and are subject to corporate income tax at a rate of 10% for subsequent years.

Large mining investments. Mining companies making investments over US$25 million can benefit from legal and tax incentives if they are eligible under a special law called Loi sur les Grands Investissements Miniers (LGIM). They are exempt from minimum tax for five years from the beginning of exploitation. The corporate income tax rates are 10% for owners of mining permits and 25% for the transformation entities.

Capital gains. Capital gains are included in taxable income and subject to the corporate income tax rate of 20%.

Administration. The standard tax year is the calendar year. However, companies may select a tax year running from 1 July to 30 June or another tax year.

Companies using the standard tax year must file financial statements and the corporate income tax return with the Malagasy tax authorities by 15 May of the year following the tax year. For companies choosing a tax year-end other than the standard tax year-end, the filing must be made by the 15th day of the fourth month following the year-end. Companies must make six installments of corporate income tax for each tax year. Each payment must equal one-sixth of the preceding year’s tax amount. The installments are payable by 15 February, 15 April, 15 June, 15 August, 15 October and 15 December.

Before engaging in activities in Madagascar, an entity must apply for tax registration by completing a specified form during the company creation procedure. The tax registration for wholesalers requires the filing of a specific declaration. A tax identification card is issued to a new taxpayer on the completion of registration. The tax identification card must be renewed every year at the time of submission of the corporate income tax return.

Taxpayers that compute taxable income under the actual or simplified actual regime must open a bank account in their name.

Financial statements provided to private or public entities require the visa or certification of the tax administration.

Nonresident entities must file a declaration that details all goods and services purchased during a financial year (annual third-party declaration).

Dividends. The withholding tax on dividends was repealed in 2008. However, a 21% withholding tax continues to apply to dividends paid by companies that are subject to special tax rules.
Dividends received by companies are subject to corporate income tax.

Withholding income tax. All payments made to nonresident service suppliers are subject to withholding income tax at a rate of 10%, regardless of whether the service is rendered inside or outside Madagascar. This is a final tax.

Nonresident entities not registered with the tax administration that import goods into Madagascar are subject to a withholding income tax at a rate of 5% on the Cost, Insurance, Freight value of the goods imported.

C. Determination of trading income

General. Taxable income is based on financial statements prepared according to the Chart of Account or the Plan Comptable Général (PCG 2005), which conforms to the International Financial Reporting Standards (IFRS’ 2003 version) and International Accounting Standards (IAS).

Business operating expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Interest paid on shareholder loans in excess of the interest rate determined for the interest applicant by the central bank plus two percentage points on an amount not exceeding two times the authorized capital. None of the interest on shareholder loans is deductible if the capital is not fully paid up.
- Certain specified charges and subsidies.
- Taxes, penalties and most liberalities (payments that do not produce a compensatory benefit to the company).

Inventories. Inventory is normally valued at the lower of cost or market value. For goods that are not identifiable, cost must be determined through the use of the weighted-average cost-price method or the first-in, first-out method.

Provisions. Provisions are generally deductible for tax purposes if they are established for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Depreciation. Land is not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates generally used in the industry. The following are some of the applicable straight-line rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial and industrial buildings</td>
<td>5</td>
</tr>
<tr>
<td>Office equipment</td>
<td>10</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>15</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10</td>
</tr>
</tbody>
</table>

In certain circumstances, plant and machinery and other assets may be depreciated using the declining-balance method or an accelerated method.

Tax credit. The 2012 Finance Act introduced a tax credit equal to 50% of the amount invested by entities engaged in renewable energy production and distribution activities. The 2013 Finance
Act extends this incentive to other specified investments by entities in the tourism, industrial or construction sectors (the document listing eligible investments will be released during the first quarter of 2013). The credit is annually capped to 50% of the amount of corporate income tax. The excess amount may be carried forward without time limitation, subject to the above limit of 50%.

Relief for losses. Losses may be carried forward for five years. Losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. Malagasy law does not provide for consolidated tax filings.

E. Foreign-exchange controls

The currency in Madagascar is the ariary (MGA).
Exchange-control regulations exist in Madagascar. For foreign-exchange control purposes, the two kinds of operations are current operations and capital operations.

Current operations include transfers abroad of profits after payments of taxes, dividends, earned income, expatriate allowances and savings. Current operations require only a transfer declaration to a local bank.

Capital operations include operations relating to stock transfers, shares of liquidation bonuses, sales of businesses or assets and compensation for expropriations. Capital operations involving transfers abroad require an authorization from the Ministry of Finance.

Madagascar is a member of the South African Development Community (SADC) and the Common Market for Eastern and Southern Africa (COMESA).

(a) For other rates, see Section B.
(b) See Section B.
(c) See Section B for an extended list of withholding taxes and for further details regarding these taxes.
(d) This withholding tax is imposed on dividends paid to residents and non-residents.
This withholding tax is imposed on residents and on nonresidents with a permanent establishment in Malawi. A 15% rate applies to payments to non-residents without a permanent establishment in Malawi.

See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Locally incorporated companies and branches of foreign companies are subject to corporate income tax on their income deemed to be from a source in Malawi. Income is deemed to be from a source within Malawi if it is derived from the carrying on in Malawi of a “trade.” For this purpose, “trade” covers any employment, profession, business, calling, occupation, or venture, including the leasing of property. Foreign-source income is exempt from corporate income tax.

Rates of corporate income tax. Locally incorporated companies are subject to corporate income tax at a rate of 30%. Branches of foreign companies are subject to tax at a rate of 35%.

Income tax is imposed on income from life business at a rate of 21%. Life insurance companies are now subject to tax on their investment income, including income from the leasing of property, in accordance with the general provisions of the Taxation Act.

Minimum tax on turnover. Minimum tax based on turnover was abolished, effective from 1 July 2012.

Capital gains and losses. Pending enactment of the Capital Gains Tax Act, capital gains derived by companies are included in taxable income and are subject to tax at the applicable corporate income tax rate.

For assets qualifying for capital allowances, capital gains and losses equal the difference between the sales proceeds and the written-down tax value of the assets. For assets not qualifying for capital allowances, capital gains equal the difference between sales proceeds and the cost of the asset or open market price of the asset at the time of acquisition. The basis of a capital asset may be determined under either of the following methods:

- Applying the consumer price index published by the National Statistical Office at the date of disposal of the asset that is applicable to the year in which the purchase or the construction of the asset was effected or completed
- Using the value of the asset as of 1 April 1992 that was submitted to and accepted by the Commissioner of Taxes, adjusted by the consumer price index published by the National Statistical Office at the date of disposal of the asset

Capital gains are not subject to tax if they are used within 18 months to purchase a qualifying asset similar to or related in service or use to the asset that was sold.

Capital losses on assets not qualifying for capital allowances can be offset only against current or future capital gains. However, such capital losses may be set off against other income in the year in which a company ceases to exist. Capital losses with respect to assets on which capital allowances have been granted are fully deductible from taxable income.
**Administration.** The tax year runs from 1 July to 30 June. The year of assessment for income tax is any period of 12 months with respect to which tax is chargeable. Financial years ending on or before 31 August are normally treated as relating to the tax year ended in June of that calendar year.

Companies must file an income tax return with the Commissioner General of the Malawi Revenue Authority within 180 days after the end of the year of assessment.

At the beginning of each year of assessment, the company must estimate the tax payable in that year. This estimated tax, which is known as provisional tax, must be paid quarterly by the 25th day of the month following the end of each quarter. The total installments must equal at least 90% of the actual tax liability for the year of assessment.

If the amount of tax unpaid as a percentage of the total tax liability exceeds 10% but does not exceed 50%, a penalty equal to 25% of the unpaid tax is imposed. If the percentage of unpaid tax exceeds 50%, a penalty equal to 30% of the unpaid tax is imposed.

Interest on unpaid tax is levied at the rate of 0.75% for the first month and 0.25% for each additional month or part thereof.

Under a self-assessment system, taxpayers are responsible for calculating their tax liability and submitting tax returns together with any outstanding tax due. The Malawi Revenue Authority accepts the return as filed and does not issue any administrative assessments. If it is not satisfied, it will undertake to verify the correctness of the information contained in the return.

**Dividends.** A final withholding tax at a rate of 10% is imposed on dividends distributed to resident and nonresident companies and individuals. Dividends are not subject to another 10% withholding tax if they are redistributed.

**Withholding taxes.** Certain payments are subject to withholding tax. The tax is withheld by the payer and remitted to the Malawi Revenue Authority on a monthly basis by the 14th day of the following month. Recipients of the payments treat the withholding tax as an advance payment of tax that offsets income tax subsequently assessed.

Withholding Tax Exemption Certificates may be issued to qualifying taxpayers whose affairs are up to date (that is, companies that have no outstanding tax liabilities or who have made satisfactory arrangements to settle any outstanding tax liabilities). Under the Income Tax Act, no exemption from withholding tax is granted for bank interest, rent, royalties, fees, commission, payments for casual labor and payments to contractors and subcontractors. The Commissioner General may exempt from withholding tax the receipts of certain persons or organizations that are exempt from tax under the Income Tax Act. The following table provides withholding tax rates for payments to residents and to nonresidents with a permanent establishment in Malawi. For tax purposes, resident companies are companies incorporated in Malawi.

The income of nonresidents arising or deemed to arise from a source within Malawi that is not attributable to a permanent establishment of the nonresident in Malawi is subject to a final withholding tax at the rate of 15% of the gross amount of such income unless the income is specifically exempt from tax under a double tax treaty or tax law.

A withholding tax is also imposed on dividends (see Dividends).

**Foreign tax relief.** If foreign income that has been taxed in a foreign country is included in taxable income in Malawi, a tax credit is available to reduce the tax payable in Malawi. To qualify for this relief, the company must prove to the Commissioner General that it has paid the tax on the income in the foreign country. On receipt of this proof, the Commissioner General grants the relief.

**C. Determination of trading income**

**General.** Taxable income is the income reported in the companies’ financial statements, subject to certain adjustments.

Amounts received for the right of use or occupation of land and buildings or plant and machinery or for the use of patents, designs, trademarks or copyrights or other property, which in the opinion of the Commissioner General is of a similar nature, is included in taxable income.

Certain income is specifically exempt from tax under the Taxation Act, including foreign-source income.

Realized foreign-exchange gains and losses are assessable. Unrealized foreign-exchange gains and losses are not taxable or deductible.

Expenditure that is not of a capital nature and losses, wholly and exclusively and necessarily incurred for the purposes of trade or in the production of income, are allowable as deductions in determining the taxable income of a company. For tax purposes, certain expenses are not allowed as deductions, including the following:

- Losses or expenses that are recoverable under insurance contracts or indemnities
- Tax on the income of the taxpayer or interest payable on such tax
• Income carried to any reserve fund or capitalized
• An expense relating to income that is not included in taxable income
• Contributions by an employer to any pension, sickness, accident or unemployment fund that has not been approved by the Commissioner General
• An expense for which a subsidy has been or will be received
• Rent or cost of repairs to premises not occupied for purposes of trade
• Fringe benefits tax and any penalty chargeable on the fringe benefits tax

Expenditure incurred within 18 months before the start of a manufacturing business is allowable as a deduction if it would normally be allowable in the course of business.

Deductions of employer pension contributions are limited to 15% of the employees’ annual salary.

If land is sold and if timber that is intended for sale is growing on the land, the market value of the timber is included in the seller’s taxable income. However, a deduction is allowed. If the land was acquired by the taxpayer for valuable consideration, the Commissioner General apportions a reasonable portion of that consideration to the timber and this amount may be deducted. If no valuable consideration was given for the land, the Commissioner General sets a reasonable value for the standing timber, which may be deducted.

In determining taxable income derived from farming, expenses with respect to the following are allowed as deductions:
• The stamping, leveling and clearing of land
• Works for the prevention of soil erosion
• Boreholes
• Wells
• Aerial and geophysical surveys
• Water control work with respect to the cultivation and growing of rice, sugar or other crops approved by the Minister of Finance and water conservation work (reservoir, weir, dam or embankment constructed for the impounding of water)

Inventories. Trading stock and work in progress must be valued on the basis of cost or market sales price.

Livestock may be valued for tax purposes at either cost or estimated market value.

Capital allowances

Investment allowance. An investment allowance is granted at a rate of 100% of the cost of new or unused industrial buildings and plant or machinery that is used by the company for manufacturing. The rate is 40% if these items are used.

For purposes of investment allowance, plant and machinery does not include motor vehicles intended or adapted for use on roads.

Staff housing does not qualify for the investment allowance.

The investment allowance reduces the value of the asset for purposes of calculating the annual allowance in subsequent years of assessment.
Initial allowance. The initial allowance is granted with respect to capital expenditure incurred during the year of assessment on certain assets that are used for the purposes of the company’s trade or business or for farming purposes. The following are the rates for the initial allowance.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Farm improvements, industrial buildings and railway lines</td>
<td>10</td>
</tr>
<tr>
<td>Articles (includes working instruments), implements, machinery and utensils (private passenger vehicles are excluded)</td>
<td>20</td>
</tr>
<tr>
<td>Farm fencing</td>
<td>33⅓</td>
</tr>
</tbody>
</table>

Annual allowances. Annual allowances are claimed on cost in the first year and subsequently on written-down values. For newly constructed commercial buildings, other than industrial buildings, with a cost of at least K 100 million, the rate is 2.5%. For farm improvements, industrial buildings and railway lines, the rate of the annual allowance is 5%. For farm fencing, the rate is 10%. For other assets, the allowances granted are determined by the Commissioner General. The rates vary between 10% and 40%, depending on the type of asset.

Mining allowance. An allowance equal to 100% of expenditure incurred by mining companies may be claimed. The export allowance and transport allowance (see Special allowances) may not be claimed by mining companies.

Balancing charge or allowance. If an asset for which capital allowances have been claimed and allowed is disposed of during the year of assessment, the proceeds of disposal, if any, are set off against the written-down tax value of the asset, and either a balancing charge or allowance arises.

Special allowances. Malawi offers special tax allowances, which are described below.

Export allowance. An allowance equal to 25% of taxable income from export proceeds is granted with respect to sales of goods that are classified as nontraditional exports. The Commissioner General has issued a directive providing that the export allowance should be calculated on “taxable” export proceeds less export-related expenses. This remains an area of controversy with much debate surrounding the interpretation of the meaning of “taxable income.” Tea, tobacco, sugar and coffee do not qualify for this allowance.

International transport allowance. An allowance equal to 25% of the international transport costs with respect to nontraditional exports may be claimed. Tea, tobacco, sugar and coffee do not qualify for this allowance.

Research expenditure. Expenditure not of a capital nature that is incurred by a company on experiments and research with respect to the company’s business are allowed as a deduction from taxable income. Similar deductions apply to contributions, bursaries (broadly, scholarships) and donations to research institutions for the purposes of industrial research or scientific experimental work or education connected with the business of the company.
Relief for losses. In general, losses incurred in trading operations may be carried forward and offset against profits in the following six years. However, losses incurred in manufacturing, agricultural and mining operations may be carried forward indefinitely. Loss carrybacks are not allowed.

Groups of companies. Malawi does not allow consolidated returns or provide other types of relief for groups of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

</tbody>
</table>

E. Miscellaneous matters

Foreign-exchange controls. The currency in Malawi is the kwacha (K).

The Reserve Bank of Malawi is responsible for enforcing foreign-exchange control regulations in Malawi, which include the following:

- Approval for foreign equity investments in Malawian companies must be obtained from the Reserve Bank of Malawi.
Foreign currency denominated loans to Malawian entities must be approved by the Reserve Bank of Malawi.

**Tax clearance certificate.** The following transactions require a tax clearance certificate from the Commissioner General:
- Transfer of land and buildings
- Renewal of certificate of fitness for commercial vehicles
- Renewal of Business Residence Permit
- Renewal of professional business licenses and permits of medical practitioners, dentists, legal practitioners (lawyers), engineers and architects who are engaged in a private practice or in partnership with another private practitioner
- Renewal of a certificate of registration under the National Construction Industry Act
- Transfer of a company as a going concern
- Externalization of funds to nonresident service providers whose source is deemed to be Malawi
- Renewal of temporary employment permits, business licenses, tourism licenses, telecommunications licenses and energy licenses
- Renewal, extension or transfer of mining licenses, or transfers of mineral rights by the ministry responsible for energy and natural resources
- Change of ownership of company
- Renewal of registration of public transport conveyances by the Road Traffic Directorate

**Transfer pricing.** Under the Taxation Act, if a person not resident in Malawi carries on business with a person resident in Malawi and if in the course of such business it is arranged that the business of the person resident in Malawi produces either no profits or less profit than might be expected had no such relationship existed, the profits of the resident person from that business are deemed to be the amount that might have been expected to accrue if the business had been conducted by independent persons.

**F. Tax treaties**

Malawi has entered into double tax treaties with Denmark, France, Kenya, the Netherlands, Norway, South Africa, Sweden, Switzerland and the United Kingdom. The treaties with Denmark and Kenya are not operational. The treaties vary in the definition of "exempt income."

(a) Resident companies that have paid-up ordinary capital of RM 2,500,000 or less and that satisfy specified conditions are taxed at a rate of 20% on their first RM 500,000 of chargeable income. The balance is taxed at 25%. These rates do not apply to petroleum companies, which are taxed at a rate of 38%.

(b) Real property gains tax is imposed on gains derived from disposals of real property or shares in real property companies (see Section B).

(c) This is a final tax applicable only to payments to nonresidents.

(d) Interest on approved loans is exempt from tax (see footnote [b] to Section F). Bank interest paid to nonresidents without a place of business in Malaysia is exempt from tax. Interest paid to nonresident companies on government securities and on Islamic securities is exempt from tax.

(e) This withholding tax is imposed on exempt income distributed to nonresident corporate unit holders by Real Estate Investment Trusts (REITs) and Property Trust Funds (PTFs). Distributions made to individuals, trust bodies and other noncorporate unit holders are subject to withholding tax at a rate of 10%.

(f) This withholding tax is treated as a prepayment of tax on account of the final tax liability.

(g) This is a final tax applicable to payments to nonresidents for specified services rendered in Malaysia and to payments for the use of movable property excluding payments made by Malaysian shipping companies for the use of ships under voyage charter, time charter or bare-boat charter. The rate is reduced under certain tax treaties.

(h) Withholding tax is imposed on “other income,” which includes, among other payments, commissions and guarantee fees.

(i) See Section C.

B. Taxes on corporate income and gains

**Corporate income tax.** Resident and nonresident companies are taxed only on income accruing in or derived from Malaysia. Resident companies engaged in banking, insurance, shipping or air transport are taxable on their worldwide income. A company is resident in Malaysia if its management and control is exercised in Malaysia; the place of incorporation is irrelevant.

**Rates of corporate tax.** Resident and nonresident companies are subject to income tax at a rate of 25%. Resident companies that have paid-up ordinary capital of RM 2,500,000 or less are taxed at a rate of 20% on the first RM 500,000 of chargeable income. The balance is taxed at 25%. This concessionary tax rate does not apply if the company controls or is controlled directly or indirectly by another company that has paid-up ordinary capital of more than RM 2,500,000.

Special rates apply to nonresident companies on income from interest (15%) and from royalties, specified services rendered in Malaysia and payments for the use of movable property (10%). Rental payments for ships made by Malaysian shipping companies for voyage charter, time charter or bare-boat charter are exempt from withholding tax. Withholding tax (10%) is imposed on “other income” derived by nonresident companies from Malaysia, which includes, among other payments, commissions and guarantee fees, to the extent that these payments are not business income to the recipient. For treaty withholding tax rates applicable to interest and royalties, see Section F.

For resident and nonresident companies carrying on petroleum operations, petroleum income tax is charged at a rate of 38% instead of the above rates.
**Tax incentives.** Malaysia offers a wide range of incentives such as tax holidays or investment allowances, which are granted to promote investments in selected industry sectors and/or promoted areas. Currently, the focus is on the service sectors.

**Labuan international business and financial center.** In 1990, the Malaysian government enacted legislation that created a business and financial center on the island of Labuan with a separate and distinct tax and regulatory regime.

Except for companies intending to engage in banking, insurance or the provision of fund management services, government approval is not required to establish a Labuan company. A Labuan company is required to have one director that may be a foreign corporation and at least one secretary who must be an officer of a Labuan trust company.

Labuan companies may transact business with Malaysian residents and may hold shares, debt obligations or other securities in domestic companies.

Labuan companies are subject to tax at a rate of 3% on their net audited profits derived from their trading activities in Labuan.

Labuan trading activities include banking, insurance, trading, management, licensing and shipping operations. Instead of paying tax at the 3% rate, Labuan companies may elect to pay a fixed annual tax of RM 20,000. Income derived from nontrading activities, such as dividends, interest and rent, is exempt from tax.

Labuan companies may alternatively elect to be taxed under the Income Tax Act, 1967 (ITA). If they make such election, the rules described above in *Corporate income tax* and *Rates of corporate tax* apply. Labuan companies are exempt from the obligation to withhold tax on payments made to nonresidents.

Labuan companies may open and maintain bank accounts in foreign currency in Malaysia or abroad. No restrictions are imposed on the movement of funds through these accounts.

**Real property gains tax.** Real property gains tax is levied on capital gains derived from disposals of real property located in Malaysia and shares in closely controlled companies with substantial real property interests. The tax applies to gains derived by residents and nonresidents. The following are the rates, effective from 1 January 2013.

<table>
<thead>
<tr>
<th>Time of disposal</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disposal within 2 years after the acquisition date</td>
<td>15</td>
</tr>
<tr>
<td>Disposal in the 3rd, 4th or 5th year after the acquisition date</td>
<td>10</td>
</tr>
<tr>
<td>Disposal in the 6th or subsequent year after the acquisition date</td>
<td>0</td>
</tr>
</tbody>
</table>

Purchasers of real property located in Malaysia or shares in real property companies must withhold tax at a rate of 2% of the purchase price. Losses incurred on disposals of real property and shares in real property companies may be carried forward indefinitely to offset future real property gains.
The year of assessment is the calendar year, but companies may adopt their accounting year as the basis period for a year of assessment. Income tax is chargeable in the year of assessment on the income earned in the basis period for that year of assessment.

Malaysia has a self-assessment regime under which companies must file their tax returns within seven months after the end of their accounting period. A tax return is deemed to be an assessment made on the date of filing the return.

Companies must provide an estimate of their tax payable no later than 30 days before the beginning of their accounting period. The estimated tax is payable in 12 equal monthly installments by the 10th day of each month beginning in the second month of the accounting period. Companies that have paid-up ordinary capital of RM 2,500,000 or less and that begin their operations during a year of assessment are exempt from the requirement to pay their tax by installments in the year in which they commence business and in the following year. They are required only to settle the tax due when they file their income tax returns. All companies may revise their estimate of tax payable in the sixth and ninth months of their accounting period.

Companies must pay any balance of tax due by the tax filing deadline.

Effective from the 2008 year of assessment, a single-tier system of taxation replaces the full imputation system. Under the single-tier system, dividends paid, credited or distributed by a company are exempt from tax in the hands of the shareholders. However, a six-year transitional rule provides that companies may continue to pay franked dividends to their shareholders up to 31 December 2013 under the prior imputation system by using corporate income tax that has been paid or deemed paid up to 31 December 2007. Any balance remaining in the dividend franking account after 31 December 2013 will be disregarded. However, at any time during the transitional period, a company may make an irrevocable election to proceed to the single-tier system and forego the dividend franking credit balance.

Companies are allowed only to pay franked dividends in cash and with respect to “ordinary shares” during the transitional period. For this purpose, an “ordinary share” is a share other than one that carries a dividend right of a fixed amount or a dividend right at a fixed percentage of the nominal value of the share or of the profits of the company. If a dividend is paid to an ordinary shareholder, an amount equal to the tax due on the dividend is drawn from the dividend franking account and imputed to the shareholder. Dividends received by the shareholder are taxed but a tax credit is allowed in calculating the tax payable by the shareholder.

As long as the company does not overdraw its dividend franking account, no payment is due from the company to the government as a result of paying a dividend. However, if the Malaysian corporation has no balance in the dividend franking account, the company is required to make an actual payment of tax to the Malaysian tax authorities when it makes a franked dividend distribution to its shareholders.
Foreign tax relief. Malaysian law allows both bilateral and unilateral foreign tax relief. However, because Malaysia generally does not tax foreign-source income, foreign tax relief is usually not applicable, except for companies engaged in banking, insurance, shipping or air transport. These companies are taxed on their worldwide income and may claim foreign tax relief with respect to foreign taxes imposed on their foreign-source income.

C. Determination of trading income

General. The assessment is based on the audited financial statements, subject to certain adjustments. In practice, a nonresident company trading in Malaysia prepares the financial statements of its Malaysian branch in accordance with the Malaysian Companies Act. This act sets out disclosure requirements for financial statements, but does not prescribe the accounting treatment for specific transactions. Malaysian Financial Reporting Standards, which are based on the International Financial Reporting Standards (IFRS), govern the accounting treatment for transactions.

Deductions are allowed for expenses incurred wholly and exclusively in the production of income and for bad debts. No deduction is allowed for the book depreciation of fixed assets, but statutory depreciation (capital allowances) is granted. In general, the cost of leave passages is not deductible. The deductibility of entertainment expenses is generally limited to 50% of the costs incurred. However, a full deduction for entertainment expenses may be claimed in specified circumstances. Double deductions are available with respect to certain expenses relating to the following:

- Participation at approved trade fairs, exhibitions or trade missions
- Maintenance of overseas trade offices
- Research and development

Inventory. Trading inventory is valued at the lower of cost or net realizable value. Cost must be determined under the first-in, first-out (FIFO) method; the last-in, first-out (LIFO) method is not accepted.

Provisions. General provisions and reserves for anticipated losses or contingent liabilities are not deductible.

Capital allowances

Plant and machinery. Depreciation allowances are given on capital expenditure incurred on the acquisition of plant and machinery used for the purposes of trade or business. An initial allowance of 20% and an annual allowance ranging from 10% to 20% are granted for qualifying expenditure.

Industrial buildings. An initial allowance of 10% and an annual allowance of 3% are granted for qualifying expenditure on the construction or purchase of industrial buildings. As a result of these allowances, qualifying expenditure on industrial buildings is fully written off in the 30th year after the year of construction or purchase. For purposes of the allowances, industrial buildings include hotels.

Child care centers. An annual allowance of 10% is granted for expenditure incurred for the construction or purchase of buildings used as child care facilities for employees.
Employee housing. An annual allowance of 10% is granted for expenditure incurred by manufacturers and certain approved service companies for the purchase or construction of buildings for the accommodation of employees. Buildings occupied by management or administrative staff do not qualify for this allowance.

Educational institutions. An annual allowance of 10% is granted for expenditure on the construction or purchase of buildings used as schools or educational institutions or for industrial, technical or vocational training.

Motor vehicles. Capital expenditure incurred on motor vehicles qualifies for an annual allowance of 20%. Qualifying capital expenditure on noncommercial vehicles is restricted to RM 100,000 per vehicle if the vehicle is new and if the total cost of the vehicle does not exceed RM 150,000. Qualifying capital expenditure is restricted to RM 50,000 per vehicle if the vehicle costs more than RM 150,000.

Office equipment. An initial allowance of 20% and an annual allowance of 10% are granted for capital expenditure on office equipment.

Computer equipment. An initial allowance of 20% and an annual allowance of 80% are granted for capital expenditure on computer hardware and software.

Small value asset. For assets with a value not exceeding RM 1,000, a 100% allowance is given in the year the asset is acquired. However, the total allowance granted for such assets is capped at RM 10,000.

Agriculture. Annual allowances are given on capital expenditure incurred on new planting (50%), roads or bridges (50%), farm buildings (10%) and buildings for accommodation of farm workers (20%). Accelerated allowances may be allowed at the discretion of the Minister of Finance.

Forestry. Annual allowances are given on capital expenditure incurred for purposes of extraction of timber from a forest. The rates are 10% for a road or building and 20% for a building for accommodation of employees.

Other matters. Capital allowances are generally subject to recapture on the sale of an asset to the extent the sales proceeds exceed the tax value after depreciation. To the extent sales proceeds are less than the tax-depreciated value, an additional allowance is given.

Relief for trading losses. Trading losses may offset all other chargeable income of the same year. Unused losses may be carried forward indefinitely for offset against chargeable income from business sources. Excess capital allowances may not be offset against other chargeable income of the same year, but may be carried forward indefinitely for offset against income from the trade that generated the capital allowances.

The carryforward of losses and excess capital allowances is subject to the shareholders remaining substantially (50% or more) the same at the end of the year in which the losses or capital allowances arose and on the first day of the year of assessment in
which relief is claimed. If the shareholder of the loss company is another company, the loss company is deemed to be held by the shareholders of that other company. Under an administrative concession, the tax authorities have decided not to enforce the shareholding test except in the case of dormant companies. As a result, unused losses may continue to be carried forward indefinitely even if a substantial change in shareholders occurs.

Losses arising in the 2009 or 2010 years of assessment may be carried back for offset against the defined aggregate income of the immediately preceding year. The losses allowed to be carried back are capped at RM 100,000 or the defined aggregate income of the immediately preceding year, whichever is less.

**Groups of companies.** Under group relief provisions, 70% of current-year adjusted losses may be transferred by one company to another company in a group. A group consists of a Malaysian-incorporated parent company and all of its Malaysian-incorporated subsidiaries. Two Malaysian-incorporated companies are members of the same group if one is at least 70% owned by the other, or both are at least 70% owned by a third Malaysian-incorporated company. To obtain group relief, the recipient of the losses and the transferor of the losses must have the same accounting period and each must have paid-up capital exceeding RM 2,500,000.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sales tax; imposed on certain taxable goods imported into Malaysia for home consumption and on certain goods manufactured locally when sold, disposed of or used by the manufacturer; general rates (specific rates apply to certain petroleum products)</td>
<td>5/10</td>
</tr>
<tr>
<td>Service tax; imposed on the provision of certain prescribed taxable services by prescribed taxable persons</td>
<td>6</td>
</tr>
</tbody>
</table>

**E. Miscellaneous matters**

**Foreign-exchange controls.** Over the years, the foreign exchange administration policies have been progressively liberalized and simplified. Nonresidents are now free to make direct or portfolio investments in Malaysia in either ringgits or foreign currency. No restrictions are imposed on the repatriation of capital, profits or income earned in Malaysia.

However, the ringggit may not be traded overseas, and payments outside Malaysia should be made in foreign currency.

Nonresidents may obtain any amount of foreign currency credit facilities from licensed onshore banks and from nonbank residents that do not have domestic credit facilities.

Nonresidents may lend in foreign currency to residents if the resident’s total foreign currency borrowings are within permitted limits. However, no limits are imposed on loans in foreign currency by nonresident parent companies to resident companies or on loans in foreign currency by nonresident suppliers to resident companies to finance purchases from the nonresident suppliers.
Foreign-equity restrictions. Foreign-equity restrictions have recently been liberalized. As a result, no restrictions are imposed on the ownership of most companies except those in certain regulated industries.

Antiavoidance legislation. Legislation permits the Revenue Authority to disregard or vary any transaction that is believed to have the effect of tax avoidance.

Transfer pricing. The tax authorities have issued transfer-pricing legislation, rules and guidelines requiring taxpayers to determine and apply an arm’s length price in their intercompany transactions. The transfer-pricing rules also require the preparation of contemporaneous transfer-pricing documentation to substantiate the arm’s length contention.

The guidelines provide a detailed list of information, documentation and records with respect to related-party transactions that need to be compiled to meet the contemporaneous documentation requirement. The guidelines are based on the arm’s length principle set forth in the Organization for Economic Cooperation and Development (OECD) transfer-pricing guidelines and provide several methods for determining an arm’s length price. However, the prevailing rules and guidelines contain significant departures in the tax authorities’ interpretation of the arm’s length standard from the practices set out in the OECD transfer-pricing guidelines.

In addition, companies carrying out cross-border transactions with associated persons may apply for an advance pricing arrangement (APA) from the tax authorities subject to conditions. Specific measures in the tax law also address thin-capitalization adjustments.

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

</table>
(a) No dividend withholding tax is imposed in Malaysia. However, for dividends paid under the transitional imputation system, tax would have been deducted at source at the prevailing corporate tax rate for that year of assessment (see Section B).

(b) Interest on approved loans is exempt from Malaysian tax. An approved loan is a loan or credit made by a nonresident to the government, state government, local authority or a statutory body, or guaranteed by the government or state government.

(c) These treaties have not yet been ratified.

(d) Approved royalties are exempt from Malaysian tax.

(e) Approved royalties are taxed at half the domestic rate, that is, 5%.

(f) Malaysia is honoring the USSR treaty with respect to the republics of the former USSR, including the Baltic states.

(g) This is the income tax treaty between the Taipei Economic and Cultural Office (TECO) in Malaysia and the Malaysian Friendship and Trade Centre (MFTC) in Taipei.

Malaysia has also entered into limited agreements covering only aircraft and ship transportation with Argentina and the United States.
Maldives

* The 10% withholding tax is imposed on payments made to persons not resident in the Maldives. These payments include the following:
  * Management fees
  * Fees for technical services
  * Fees for the use of computer software
  * Payments for performances by public entertainers
  * Rents paid for the viewing of cinematographic films in the Maldives
  * Royalties and rents paid for the use of plant, machinery, equipment or property
  * Payments for carrying on research and development
  * Other commissions or fees

B. Taxes on corporate income and gains

Although a tax specifically applicable to corporate profits does not currently apply, a tax of 15% is imposed on the business profits of any “person” deemed to be carrying on a business. A “person” includes, but is not limited to, corporations, partnerships and individuals. The taxable profits or losses of a partnership for a year are computed as if it were a body corporate.

Also, resident and nonresident banks are subject to a tax of 25% on taxable profits.

Proposed legislation to change the current tax regime has been presented to parliament. This legislation contains a Corporate Profit Tax bill and Personal Income Tax bill. After enactment of the proposed tax legislation, the existing Business Profits Tax Act is expected to be repealed.

C. Other significant taxes

The following table summarizes other significant taxes.
Nature of tax | Rate (%)  
--- | ---  
Goods and Services Tax; the tax is expected to be passed on to the end consumer | 6  
Stamp duty; imposed on all imports and exports | 0.1  
Customs duties; imposed on imports; rates vary according to the type of import | Various  

D. Foreign-exchange controls

The Maldivian currency is the rufiyaa (MVR).

The Maldives does not impose any strict foreign-exchange controls. Businesses may remit all of their net profits after payment of business profits tax.
Malta

A. At a glance

Corporate Income Tax Rate (%) 35
Capital Gains Tax Rate (%) 35 (a)
Branch Tax Rate (%) 35
Withholding Tax (%) 0 (b)
Net Operating Losses (Years)
  Carryback 0
  Carryforward Unlimited

(a) See Section B.
(b) See Section F.

B. Taxes on corporate income and gains

Corporate income tax. Companies that are considered to be ordinarily resident and domiciled in Malta are subject to income tax on their worldwide income. Companies registered in Malta are considered resident in Malta. In addition, companies registered outside Malta are considered to be resident in Malta if management and control is exercised in Malta.
Rates of corporate tax. Income tax is the only tax imposed on the profits of companies. The standard rate of income tax is 35%.

Tax incentives. Tax incentives are offered in the Malta Enterprise Act and in regulations to the act, as well as in the Income Tax Act. The Malta Enterprise Act has introduced a new set of incentives for the promotion and expansion of business, covering a wide range of sectors and activities. The incentives available under the act may be divided into six categories, which are described in the following six subsections. Other tax incentives available in Malta are discussed in the subsequent subsections.

Access to finance. Companies may be assisted through loan guarantees, soft loans (loans granted by the Malta Enterprise Corporation at low-interest rates to qualifying companies involved in activities that may contribute towards the development of the economy; the loans may not exceed 75% of the qualifying expenditure), loan interest subsidies or royalty financing in the case of highly innovative projects.

Investment aid. Companies engaged in specified activities can benefit from tax credits regarding capital expenditure, job creation or reinvestment of profits derived from trade or business in an approved project.

Small and medium-sized business development. Grants are available for the creation and development of innovative start-ups and the development of forward-looking small and medium-sized businesses carrying on or intending to carry out an activity that may contribute to the economic development of Malta, provided that certain conditions are fulfilled. The Malta Enterprise Corporation also provides assistance regarding the hiring of experts and the use of information communications technology or e-business (the conduct of business through information technology systems).

Research and development and innovation programs. Fiscal incentives and cash grants are offered to stimulate innovative enterprises to engage in research and development.

Enterprise support. Assistance is offered to businesses to support them in developing their international competitiveness, improving their processes and networking with other businesses.

Employment and training. The Employment and Training Corporation (ETC) is taking over and administering the employment and training incentives. Enterprises are supported in recruiting new employees and training their staff. These incentives help generate more employment opportunities and training activities.

Shipping. Maltese shipping law is modeled on British legal sources by incorporating measures containing a system of mortgages that provide excellent security. However, Maltese law also includes measures offering attractive fiscal packages to the shipping industry.

An organization qualifies as a shipping organization if it engages in one or more specified activities and if it obtains a license from
the Registrar-General to enable it to carry on such activities. The following are the specified activities:

- The ownership, operation (under charter or otherwise), administration and management of a ship or ships registered as a Maltese ship under the Merchant Shipping Act and the carrying on of related financial, security and commercial activities
- The ownership, operation (under charter or otherwise), administration and management of a ship or ships registered under the flag of another state and the carrying on of related financial, security and commercial activities
- The holding of shares or other equity interests in Maltese or foreign entities that are established for any of the purposes stated in the law and the carrying on of related financial, security and commercial activities
- The raising of capital through loans, the issuance of guarantees or the issuance of securities by a company if the purpose of such activity is to achieve the objectives of the shipping organization itself or for other shipping organizations within the same group
- The carrying on of such other activities within the maritime sector that are prescribed in regulations

A shipping organization may be established as a limited liability company (public or private), a foreign corporate body that has established a place of business in Malta or another type of entity specified in the law.

If the activities of a shipping organization are restricted to the activities and related activities described above, the following favorable tax treatment applies:

- No income tax is imposed on the income derived from the shipping activities of a licensed shipping organization.
- No income tax is imposed on gains arising on the liquidation, redemption, cancellation or any other disposal of shares, securities or other interests, including goodwill, held in a licensed shipping organization owning, operating, administering or managing a tonnage-tax ship while the ship is a tonnage-tax ship.
- No income tax is imposed on interest or other income paid to a person with respect to the financing of the operations of licensed shipping organizations.

Income derived by a ship manager from ship management activities is deemed to be income derived from “shipping activities” and is exempt from income tax under the Income Tax Act if the following conditions are satisfied:

- The company maintains proper accounts relating to its shipping activities.
- The ship manager pays an annual tonnage tax to the Registrar-General.

For these purposes, “shipping activity” is the international carriage of goods or passengers by sea or the provision of other services to or by a ship as may be ancillary to such activities or associated with such activities, including the ownership, chartering or other operation of a ship engaged in all or any of the above activities or as otherwise may be prescribed.

Income derived by a licensed shipping organization from the sale or transfer of a tonnage-tax ship or from the disposal of a right to a ship, which when delivered or completed would qualify as a tonnage-tax ship, is exempt from tax.
Collective Investment Schemes or Funds. Collective Investment Schemes or Funds must be licensed under the Investment Services Act, 1994. Collective Investment Schemes usually take the form of corporate funds, including open-ended (SICAVs) and close-ended funds, or noncorporate funds, such as unit trusts.

The income of Collective Investment Schemes (other than income from immovable property located in Malta and investment income) is exempt from tax. In addition, resident prescribed funds are subject to withholding tax on their local investment income. These funds are subject to a 15% final withholding tax on bank interest received and to a 10% final withholding tax on other investment income received, such as interest on bonds and government stocks (units issued by the government to which the general public is invited to subscribe). Under regulations issued by the Inland Revenue Department, prescribed funds are funds whose assets in Malta amount to 85% or more of their total assets. Capital gains derived by funds from disposals of investments and assets are also exempt from tax.

Capital gains derived by unit holders on disposals of their units in prescribed funds listed on the Malta Stock Exchange are exempt from tax. Unit holders in unlisted prescribed funds are subject to tax on their gains. Tax at 15% is withheld on the capital gains realized by resident investors on the disposal of listed shares in accumulator nonprescribed funds. For nonresident Collective Investment Schemes, the withholding tax provisions apply only if the disposal of the shares is effected through an authorized financial intermediary. If the disposal of shares in nonresident nonprescribed funds is not effected through an authorized financial intermediary, no withholding tax is due and any capital gains must be disclosed by the resident investor in the individual’s tax return and taxed at the normal rates of income tax, up to a maximum of 35%.

Aviation income. Income derived from the ownership, lease or operation of aircraft and aircraft engines used in the international transport of passengers or goods (aviation income) is deemed to arise outside Malta regardless of whether the aircraft is operated from Malta. Consequently, a company that is incorporated outside Malta but managed and controlled in Malta (resident but not domiciled for income tax purposes, or a “non-dom co”) must pay tax on income derived from its aviation income on a remittance basis. Aviation income that is not received in Malta is not taxed in Malta. This implies that a non-dom co may control its Maltese tax liability through its remittances and that a non-dom co deriving aviation income that is not received in Malta is exempt from tax on its aviation income.

Capital gains. Income tax is imposed on capital gains derived from the transfer of ownership of the following assets only:

- Immovable property. However, transfers of immovable property or rights over immovable property that are subject to the new Property Transfers Tax (see Property Transfers Tax) are exempt from income tax.

- Securities (company shares that do not provide for a fixed rate of return, units in Collective Investment Schemes and units relating to linked long-term business of insurance [life insurance contracts under which benefits are wholly or partially determined by reference to the value of, or income from, property]).
Goodwill, business permits, copyrights, patents, trademarks and trade names.
Beneficial interests in trusts.
Full or partial interests in partnerships

In certain cases, value shifting and degrouping result in taxable capital gains.

If a person acquires or increases a partnership share, a transfer of an interest in the partnership to that partner from the other partners is deemed to occur, and is accordingly subject to tax.

For purposes of the capital gains rules, “transfer” has a broad definition that is not restricted to sale. It also includes any assignment or cession of any rights, reduction of share capital, liquidation or cancellation of units or shares in Collective Investment Schemes and other types of transactions. The definition does not include inheritance.

Transfers that are exempt from tax include the following:

- Donations to philanthropic institutions
- “Emphyteutical” grants for periods of less than 50 years (the Civil Code defines “emphyteusis” as a contract under which one of the contracting parties grants to the other, in perpetuity or for a time, a tenement for a stated annual rent or ground rent, which the grantee agrees to pay to the grantor, either in money or in kind, as an acknowledgment of the tenure)
- Transfers of chargeable assets between companies belonging to the same group of companies
- Transfers by nonresidents of securities in Maltese companies that are not primarily engaged in holding immovable property in Malta
- Transfers of securities listed on the Malta Stock Exchange as well as transfers of units relating to linked long-term business of insurance if the benefits derived by the units are wholly determined by reference to the value of, or income from, securities listed on the Malta Stock Exchange
- Transfers by nonresidents of units in Collective Investment Schemes

Rollover relief for assets used in business is also available if the asset has been used in the business for at least three years and if it is replaced within one year by an asset used only for a similar purpose.

Taxable capital gains are included in chargeable income and are subject to income tax at the normal income tax rates. Capital losses may be set off only against capital gains. Trading losses may be carried forward to offset capital gains in future years.

Provisional tax of 7% of the consideration or of the value of the donation must be paid by a seller on the transfer of property if the transaction is subject to the capital gains regime. The Commissioner of Inland Revenue may authorize a reduction in the rate of provisional tax if it can be proved that the capital gain derived from the transaction is less than 20% of the consideration. Provisional tax paid is allowed as a credit against the income tax charge.
If a company transfers property to its shareholders, or to an individual related to a shareholder, in the course of a winding up or distribution of assets, who own all of the share capital of the company transferring the property, the transfer is exempt from tax if certain conditions are satisfied.

**Property Transfers Tax.** In 2006, Article 5A, which regulates the Property Transfers Tax, was added to the Income Tax Act. This tax is a final tax that is imposed at a rate of 12% on the value of the consideration for transfers of immovable property and rights over immovable property. In general, the Property Transfers Tax is imposed instead of the income tax on capital gains. However, in certain circumstances, taxpayers may elect to be taxed on transfers of immovable property under the income tax measures instead of under the 12% tax regime.

**Securitization.** The total income or gains of a securitization vehicle is realized or deemed to arise during the year in which such income or gains are recognized for accounting purposes. For purposes of calculating the chargeable income or gains of the securitization vehicle for income tax purposes, the following expenses are deductible:

- Relevant expenses provided under Article 14 of the Income Tax Act
- Amounts payable by the securitization vehicle to the originator or assignor
- Premiums, interest or discounts with respect to financial instruments issued or funds borrowed by the securitization vehicle
- Expenses incurred by the securitization vehicle with respect to the day-to-day administration of the securitization vehicle

Tax is chargeable on any remaining total income of the securitization vehicle, and a further deduction of an amount equal to the remaining total income may be claimed at the option of the securitization vehicle, subject to certain provisos and antiabuse provisions.

**Administration.** The year of assessment is the calendar year. Income tax for a year of assessment is chargeable on income earned in the corresponding basis year, which is generally the preceding calendar year. A company may adopt an accounting period other than the calendar year, subject to approval by the Inland Revenue Department.

Companies with a January to June accounting year-end must file their income tax returns by 31 March (30 April if an electronic submission is made) of the year of assessment. Companies with other accounting year-ends must file their income tax returns within 9 months after the end of their accounting year (10 months if an electronic submission is made).

A self-assessment system applies in Malta. The Inland Revenue Department issues an assessment only if it determines that a greater amount of income should have been declared or that the company omitted chargeable income from its tax return.

Companies must make three provisional payments of tax, generally on 30 April, 31 August and 21 December. The provisional payments are equal to specified percentages of the tax due as reported in the last income tax return filed with the Commissioner of Inland Revenue on or before 1 January of the year in which
the first provisional tax payment is due. The percentages are 20% for the first payment, 30% for the second and 50% for the third. Companies must pay any balance of tax payable on the due date for submission of the income tax return for that year of assessment.

Penalties are imposed for omissions of income, and interest is charged for late payments of tax. The Inland Revenue Department pays interest on certain late refunds.

**Advance Revenue Rulings.** Advance Revenue Rulings may be obtained from the Inland Revenue Department on certain transactions, activities and structures. Rulings survive any change in legislation for a period of two years. In all other circumstances, rulings are binding for five years. Renewals may be requested.

**Allocation and distribution of profits.** The distributable profits of a company are allocated to five tax accounts in the following order:

- Final Tax Account
- Immovable Property Account
- Foreign Income Account
- Maltese Taxed Account
- Untaxed Account

The Final Tax Account contains distributable profits that have been subject to a final tax. The Immovable Property Account contains profits connected with immovable property located in Malta. The Foreign Income Account contains, broadly, foreign-source passive income. The Maltese Taxed Account contains profits that are not included in the Final Tax Account, Immovable Property Account or Foreign Income Account. The Untaxed Account contains an amount of profits or losses that is calculated by deducting the total sum of amounts allocated to the other accounts from the total amount of profits shown in the profit-and-loss account for that year.

The Full Imputation System applies to distributions from the Immovable Property Account, Foreign Income Account and Maltese Taxed Account. Under this system, the tax paid by the company is imputed as a credit to the shareholder receiving the dividends. Profits allocated to the Foreign Income Account and the Maltese Taxed Account result in tax refunds under the Refundable Tax Credit System (see *Refundable Tax Credit System*).

**Refundable Tax Credit System.** In 2007, the Maltese House of Representatives passed a law that implemented an agreement with the European Union (EU) relating to a refundable tax system for all companies distributing dividends to shareholders. The imputation system under which the tax paid by a company is essentially treated as a prepayment of tax on behalf of the shareholder has been retained but a new refund system is introduced. The new refundable tax system applies both to profits allocated to a company’s Maltese Taxed Account and to profits allocated to its Foreign Income Account and is available both to residents and nonresidents.

A person receiving a dividend from a company registered in Malta from profits allocated to its Maltese Taxed Account or its Foreign Income Account that do not consist of passive interest or royalties may claim a refund of six-sevenths of the tax paid by the
distributing company on the profits out of which the dividends were paid. As a result of the introduction of the new system, the dividend recipient receives a full imputation credit plus a refund of six-sevenths of the tax paid by the distributing company.

Distributions of profits derived from passive interest or royalties or profits derived from a participating holding in a body of persons that does not satisfy the antiabuse provision (see Participation exemption and participating holding system) do not qualify for the six-sevenths refund. Instead, they qualify for a refund of five-sevenths of the tax paid by the company.

The six-sevenths and five-sevenths refunds apply to distributions made by companies that do not claim any form of double tax relief. Dividends paid out of profits allocated to the Foreign Income Account with respect to profits for which the distributing company has claimed any form of double tax relief (double tax treaty relief, unilateral relief or the flat-rate foreign tax credit; see Foreign tax relief) are entitled to a refund equal to two-thirds of the tax that was suffered by the distributing company gross of any double tax relief. However, for the purposes of this calculation, the amount of tax suffered by the company is limited to the actual tax paid in Malta by the distributing company.

The refundable tax system is extended to shareholders of foreign companies that have Maltese branches. Tax paid in Malta by branches on profits attributable to activities performed in Malta is refunded when such profits are distributed.

Persons must register with the Commissioner of Inland Revenue to benefit from the tax refunds described above.

**Participation exemption and participating holding system.** Before 1 January 2007, profits derived from a participating holding were taxed at the rate of 35%. On distribution of such profits to non-resident shareholders, such shareholders were entitled to receive a full refund of the tax paid by the company. Effective from 1 January 2007, the Maltese income tax system exempts from tax income and capital gains derived by a company registered in Malta from a participating holding or from the disposal of such holding. This exemption is referred to as the participation exemption. At the option of the shareholders, a full refund may still be obtained.

Under the recent tax reform, a holding in another company is considered to be a participating holding if any of the following circumstances exist:

- A company holds directly at least 10% of the equity shares of a company whose capital is wholly or partly divided into shares, and such holding confers an entitlement to at least 10% of any two of the following:
  - Right to vote.
  - Profits available for distribution.
  - Assets available for distribution on a winding up.

The Commissioner of Inland Revenue may determine that the above provisions are satisfied if the minimum level of entitlement exists in the circumstances referred to in the proviso to the definition of “equity holding.” See below for the definition of “equity holding.”
• A company is an equity shareholder in another company, and the equity shareholder company may at its option call for and acquire the entire balance of the equity shares not held by that equity shareholder company to the extent permitted by the law of the country in which the equity shares are held.

• A company is an equity shareholder in a company, and the equity shareholder company is entitled to first refusal in the event of a proposed disposal, redemption or cancellation of all of the equity shares of that company not held by that equity shareholder company.

• A company is an equity shareholder in a company and is entitled to either sit on the board or appoint a person to sit on the board of that company as a director.

• A company is an equity shareholder that holds an investment representing a total value, as of the date or dates on which it was acquired, of a minimum of €1,164,000 (or the equivalent sum in a foreign currency) in a company and that holding in the company is held for an uninterrupted period of not less than 183 days.

• A company is an equity shareholder in a company, the holding of such shares is for the furtherance of the equity shareholder’s own business, and the holding is not held as trading stock for the purpose of a trade.

A holding of a company in a body of persons or a collective-investment vehicle that provides for limited liability of investors constituted, incorporated or registered outside Malta, that is not resident in Malta and that is of a nature similar to a partnership en commandite (limited partnership) and whose capital is not divided into shares constituted under the Companies Act, is deemed to constitute a participating holding if it satisfies the provisions of any of the six bullets above.

For the purposes of the above rules, an “equity holding” is a holding of the share capital in a company that is not a property company if the shareholding entitles the shareholder to at least any two of the following rights (equity holding rights):

• Right to vote
• Right to profits available for distribution to shareholders
• Right to assets available for distribution on a winding up of the company

The terms “equity shares,” “equity shareholder” and “equity holding” are construed in accordance with the above definition.

The Commissioner of Inland Revenue may determine that an equity holding exists even if such holding is not a holding of the share capital in a company or does not consist solely of such a holding of share capital, provided that it can be demonstrated that at any time an entitlement to at least two of the equity holding rights exists in substance.

A “property company” is a company that owns immovable property located in Malta or any rights over such property, or a company that holds, directly or indirectly, shares or interests in a body of persons owning immovable property located in Malta or any rights over such property.
A company or body of persons carrying on a trade or business that owns immovable property located in Malta or rights over such property is treated as not owning the immovable property or rights over such property if all of the following conditions are satisfied:

- The property consists only of a factory, warehouse or office used solely for the purpose of carrying on such trade or business.
- Not more than 50% of its assets consist of immovable property located in Malta.
- It does not carry on an activity from which income is derived directly or indirectly from immovable property located in Malta.

The application of the participation exemption is subject to an anti-abuse provision. The participation exemption applies to participating holdings if the body of persons in which the participating holding is held satisfies any one of the following three conditions:

- It is resident or incorporated in a country or territory that forms part of the EU.
- It is subject to a foreign tax of at least 15%.
- It does not derive more than 50% of its income from passive interest or royalties.

If none of the above conditions is satisfied, both of the following two conditions must be fulfilled:

- The equity holding by the company registered in Malta in the body of persons not resident in Malta is not a portfolio investment. For this purpose, the holding of shares by a company registered in Malta in a company or partnership not resident in Malta that derives more than 50% of its income from portfolio investments is deemed to be a portfolio investment.
- The body of persons not resident in Malta or its passive interest or royalties has been subject to a foreign tax of at least 5%.

The participation exemption applies only to gains or profits derived from transfers of holdings in companies resident in Malta. For this purpose, transfers encompass a wide scope of transactions, including, among others, assignment, sale, emphyteusis (a contract under which one of the contracting parties grants to the other a tenement in land for stated rent), sub-emphyteusis, partition, donation and transfer of assets by a company to its shareholders, in the course of winding up of the company or in the course of a distribution of assets to its shareholders in accordance with a scheme of distribution.

**Foreign tax relief.** Under tax treaty provisions and the domestic law, a tax credit against Maltese tax is granted for foreign tax suffered. The amount of the credit is the lower of Maltese tax on the foreign income and the foreign tax paid.

Maltese companies may also reduce their tax payable in Malta by claiming double tax relief with respect to British Commonwealth income tax.

Unilateral tax relief, which is another form of double tax relief, applies if treaty relief is not available and if the taxpayer has proof of the foreign tax suffered. The unilateral relief is also available for underlying tax.
Another form of double tax relief is a flat-rate foreign tax credit (FRFTC), which may be claimed by companies that have a special empowerment clause in their Memorandum and Articles of Association. The empowerment clause requirement applies to companies resident in Malta before 1 January 2007 and is effective from 1 January 2011. Companies, other than companies subject to the empowerment clause requirement, can currently claim the FRFTC. A company resident in Malta before 1 January 2007 could claim the FRFTC without an empowerment clause until 1 January 2011. The FRFTC, which is equivalent to 25% of the net income received (before any allowable expenses), applies to all foreign-source income that may be allocated to the Foreign Income Account. An auditor’s certificate stating that the relevant income is foreign-source income is sufficient evidence that profits may be allocated to the Foreign Income Account. The FRFTC is added to chargeable income and credited against the Maltese tax charge. The credit is limited to 85% of the Maltese tax due before deducting the credit.

The interaction of the four types of double tax relief not only ensures that tax is not paid twice on the same income; it also reduces the overall effective rate of the Maltese tax.

C. Determination of trading income

General. Chargeable income is the net profit reported in the companies' audited financial statements, subject to certain adjustments. Expenses incurred wholly and exclusively in the production of income are deductible.

Expenses that are not deductible include the following:

- Amortization of goodwill
- All types of provisions
- Voluntary payments
- Expenses recoverable under insurance
- Pretrading expenses (except for expenditure incurred with respect to staff training, salaries or wages and advertising within the 18 months preceding the date on which the company begins to carry on its trading activities)
- Unrealized exchange differences
- Other expenses that are not incurred in the production of income

Inventories. Inventories are normally valued at the lower of cost or net realizable value in accordance with generally accepted accounting principles.

Tax depreciation (capital allowances). Tax depreciation allowances include initial allowances and annual wear-and-tear allowances.

Initial allowances are granted at a rate of 10% with respect to new industrial buildings and structures.

Wear-and-tear allowances for plant and machinery are calculated using the straight-line method. Industrial buildings and structures are also depreciated using the straight-line method.

The following are the minimum number of years over which the principal categories of plant and machinery may be depreciated.
The annual straight-line rate for industrial buildings and structures, including hotels, is 2%. Commercial buildings may not be depreciated.

Capital allowances are generally subject to recapture on the sale of an asset to the extent the sale proceeds exceed the tax value after depreciation. Any amounts recaptured are added to taxable income for the year of sale or are used to reduce the cost of a replacement asset. To the extent sales proceeds are less than the asset's depreciated value, an additional allowance is granted. Capital allowances on assets for which investment allowances have been granted are not recaptured, and no additional allowances described in the preceding sentence are granted.

Groups of companies. A company that is part of a group of companies may surrender losses to another member of the group. Two companies are deemed to be members of a group of companies for tax purposes if they are resident in Malta and not resident in any other country for tax purposes, and if one of the companies is a 51% subsidiary of the other or both are 51% subsidiaries of a third company that is resident in Malta. A company is considered to be a 51% subsidiary of another company if all of the following conditions exist:

- More than 50% of the subsidiary’s ordinary shares and more than 50% of its voting rights are owned directly or indirectly by the parent company.
- The parent company is beneficially entitled to receive directly or indirectly more than 50% of profits available for distribution to the ordinary shareholders of the subsidiary.
- The parent company is beneficially entitled to receive directly or indirectly more than 50% of the assets of the subsidiary available for distribution to the ordinary shareholders of the subsidiary in the event of a liquidation.

The group company surrendering the losses and the group company receiving the losses must have accounting periods that begin and end on the same dates, except for newly incorporated companies and companies in the process of liquidation.

Relief for losses. Tax losses incurred in a trade or business may be carried forward indefinitely to offset all future income. Unabsorbed tax depreciation may also be carried forward indefinitely, but may offset only income derived from the same source. A carry-back of losses is not allowed.

D. Other significant taxes

The following table summarizes other significant taxes.
Nature of tax Rate (%)
Value-added tax; standard rate 18
Stamp duty on various documents and transfers of ownership
Sales of real property 5
Transfers of marketable securities 2
Life insurance policies 0.1
Other insurance policies 10
Excise duty, on various commodities including cigarettes, soft drinks and beer; although levied on producers or importers when they distribute the products for general consumption, the duty is ultimately borne by consumers because it is included in the price of the products Various

E. Miscellaneous matters

Foreign-exchange controls. When Malta became a member of the EU, it abolished foreign-exchange controls and introduced some reporting obligations under the External Transactions Act.

Antiavoidance legislation. Maltese law includes no specific transfer-pricing rules. However, it does contain general antiavoidance provisions to prevent the avoidance of tax through arrangements that are solely tax-motivated. Under these provisions, the Inland Revenue Department may ignore an arrangement and add an amount to chargeable income if it establishes that a transaction has the effect of avoiding or postponing tax liability.

Debt-to-equity rules. Malta does not impose any debt-to-equity requirements.

F. Treaty withholding tax rates
Under Maltese domestic tax law, dividends, interest, discounts, premiums and royalties paid to nonresidents are not subject to withholding tax. Interest and royalties paid to nonresidents are exempt from income tax in Malta if they are not effectively connected with a permanent establishment in Malta through which the nonresidents engage in a trade or business.

Under Malta’s tax treaties, the maximum tax rates applicable to dividends paid by Maltese companies to persons resident in the other treaty countries do not exceed the tax rate payable by the recipient companies in Malta.

The following table provides the maximum withholding tax rates for dividends, interest and royalties under Malta’s tax treaties.

(a) Not applicable.
(b) These are the general rates, but other rates may apply in specified circumstances.

Malta has signed tax treaties with Belgium and Norway (to replace existing treaties), Guernsey, Israel, Mexico, Turkey and Uruguay, but these tax treaties are not yet in force. Malta has also signed amendments to its tax treaties with Luxembourg and South Africa, but these amendments have not yet entered into force.
Please direct all inquiries regarding Mauritania to Raky Gueye of the Dakar, Senegal office (telephone: +221 (33) 849-2219; fax: +221 (33) 823-8032; email: raky.gueye@sn.ey.com).

(a) The minimum tax is 2.5% of annual turnover. However, the tax may not be less than MRO 750,000.
(b) The tax may be deferred (see Section B).
(c) Applicable to payments by residents to nonresidents. A tax treaty may reduce the rate applicable to nonresidents.
(d) See Section B.

B. Taxes on corporate income and gains

Corporate income tax. Mauritanian companies are taxed on the territoriality principle. As a result, Mauritanian companies carrying on a trade or business outside Mauritania are not taxed in Mauritania on the related profits. Foreign companies with activities in Mauritania are subject to Mauritanian corporate tax on Mauritanian-source profits only.

Tax rates. The regular corporate income tax rate is 25%. The minimum tax (Impôt Minimum Forfaitaire, or IMF) is 2.5% of turnover. However, the tax may not be less than MRO 750,000.

Profits realized in Mauritania by branches of foreign companies are deemed to be distributed and, consequently, are subject to a branch withholding tax of 10% on after-tax income.

The new investment code provides only for one preferential tax regime, which is available to companies producing goods or services for export exclusively and companies working exclusively for them.

Capital gains. Capital gains are taxed at the regular corporate income tax rate. However, the tax may be deferred if the proceeds are used to acquire new fixed assets in Mauritania in the following three fiscal years.

Administration. The fiscal year is the calendar year. Tax returns must be filed by 31 March of the year following the fiscal year.
Companies must pay the IMF (see Tax rates) in two equal installments, which are due on 31 March and 30 June of the year following the tax year. Companies must pay any balance of tax due by 30 April.

**Dividends.** Dividends are subject to a 10% withholding tax, which may be a deductible expense if the recipient is subject to corporate income tax.

**Foreign tax relief.** Foreign tax credits are not allowed. Income subject to foreign tax that is not exempt from Mauritanian tax under the territoriality principle is taxable net of the foreign tax.

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the National General Accounting Plan.

Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Interest paid on loans from shareholders to the extent that the rate exceeds the current rate of the central bank and all of the interest on shareholder loans if the capital of the company is not fully paid
- Corporate income tax and IMF (see Section B)
- Certain specified charges
- Taxes, penalties, gifts and most liberalities (payments exceeding 0.5% of trading income that do not produce a compensatory benefit)

**Inventories.** Inventory is normally valued at the lower of cost or market value.

**Provisions.** In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

**Capital allowances.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at maximum rates specified by the tax law. The following are some of the applicable straight-line rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial buildings</td>
<td>4</td>
</tr>
<tr>
<td>Industrial buildings</td>
<td>5</td>

<tr>
<td>Office equipment</td>
<td>10</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>25</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>20</td>
</tr>
</tbody>
</table>

Certain industrial assets may be depreciated using the declining-balance method. The Mauritanian tax law does not allow accelerated depreciation methods.

**Relief for tax losses.** Losses may be carried forward for five years. Losses may not be carried back.
Groups of companies. Fiscal integration of Mauritanian companies equivalent to a consolidated filing position is not allowed.

E. Foreign-exchange controls

The Mauritanian currency is the ouguiya (MRO).

Exchange-control regulations exist in Mauritania for foreign financial transactions.

F. Tax treaties

Mauritania has entered into double tax treaties with France, the Maghreb Arab Union, Senegal and Tunisia.

(a) See Section B.
(b) This withholding tax applies to interest paid to a nonresident by a person, other than a Mauritian bank or a person authorized to carry on deposit-taking business in Mauritius. This rate may be reduced if the recipient is a tax resident of a treaty-partner country.
(c) The withholding tax rate is 10% for royalties paid to residents. For nonresidents, the rate is 15% unless the recipient is resident in a treaty country and the applicable treaty provides for a lower rate. The withholding tax rate does not apply if the payer is a corporation holding a Category 1 Global Business License under the Financial Services Act 2007 and if it pays the interest out of its foreign-source income.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in Mauritius are subject to income tax on their worldwide income. Resident companies are companies incorporated in Mauritius and companies with their central management and control in Mauritius. If a nonresident company has a branch carrying on business in Mauritius, the nonresident company is subject to tax on the income of the branch.

Rates of corporate income tax. The corporate income tax rate is 15% of the annual taxable net profits.

A requirement to establish a Corporate Social Responsibility (CSR) fund applies to companies, effective from 1 July 2009. Companies must set up a CSR fund equal to 2% of chargeable income for the preceding year if they intend to take any of the following actions:
- Implement an approved program
• Implement an approved program under the National Empowerment Foundation
• Finance an approved Non-Government Organization

A committee has been set up for the purposes of the approval process. This committee is chaired by the Minister of Finance and Economic Empowerment. The committee provides that the CSR activities must focus on the following areas:
• Socioeconomic development
• Health
• Education and training
• Environment
• Catastrophic intervention and support

If the contribution is less than the 2% minimum, the difference must be paid to the Mauritius Revenue Authority (MRA) when the company submits its annual tax return. Certain companies, such as Global Business Corporations set up under the Financial Services Act 2007 and companies that hold an Integrated Resort certificate referred to in the Investment Promotion (Real Estate Development Scheme) Regulations, 2007, are excluded from the purview of the CSR rules. Effective from the 2013 year of assessment, CSR fund companies may spend up to 20% more than their statutory CSR obligation in any year but not more than two consecutive years and the excess CSR spending may then be offset in five equal consecutive annual installments against its future CSR liability. Subject to the approval of the CSR committee, up to 20% of the CSR liability may be carried forward to the following year.

A special levy is imposed on banks. The levy does not apply if, in the preceding year, the bank had incurred a loss or if its book profit did not exceed 5% of its operating income. The levy equals the sum of 1.7% (3.4% for six years of assessment, which are the 2014, 2013, 2012, 2011 and 2010 years of assessment and the preceding year of assessment) of the book profit and 0.5% (1% for six years of assessment, which are the 2014, 2013, 2012, 2011 and 2010 years of assessment and the preceding year of assessment) of operating income. For purposes of the levy, the operating income is the sum of the net interest income and other income before deducting any noninterest expenses.

“Telephony service providers,” defined as a provider of public fixed or mobile telecommunication networks and services, are subject to a solidarity levy for the 2009-2010, 2010, 2011, 2012, 2013 and 2014 years of assessment. The levy equals the sum of 5% of book profit and 1.5% of turnover. The levy does not apply if, in the preceding year, the service provider incurred a loss or if its book profit did not exceed 5% of its income. The 2012 budget proposals provide that the solidarity levy also applies for the 2013 year of assessment.

**Tax advantages for certain companies.** Freeport companies, Information and Communication Technology companies, companies engaged in offshore activities and companies engaged in spinning, weaving, dyeing or knitting may qualify for tax advantages.

**Freeport companies.** A Freeport operator is exempt from tax on sales made to persons outside Mauritius for an indefinite time period. A private freeport developer is exempt from corporate income tax up to the year ending 31 December 2013.
Information and Communication Technology companies. Information and Communication Technology (ICT) companies are classified as tax-incentive companies. If the investment certificate of an ICT company is issued before 30 September 2006 and if the ICT company is engaged in business-process outsourcing and back-office operations or in the operation of call centers or contact centers, the ICT company may elect within 60 days of the date of the issuance of its investment certificate to have two-thirds of its net income exempted from tax up to and including the income year ended 30 June 2012. This reduces the effective tax rate to 5% of taxable income. Income derived by other ICT companies from nonresidents is exempt from tax through the income year ended 30 June 2012. Income derived from residents is taxable at the incentive rate of 15%. Losses incurred during the exemption period may be carried forward to years following the expiration of the exemption period.

Companies engaging in offshore activities. Offshore business activities may be conducted through GBL1 Companies or GBL2 Companies. GBL2 companies must conduct their activities with nonresidents of Mauritius or GBL1 companies. Under the amendment contained in the Finance (Miscellaneous Provisions) Act 2010, GBL1 companies may conduct business within Mauritius. Under the amendment contained in the Economic and Financial Measures (Miscellaneous Provisions) Act 2012, GBL1 companies must seek the approval of the Financial Services Commission with respect to the following:
   • Conduct of their business in Mauritius
   • Dealings with GBL2 companies and Mauritian resident persons
   • Holding of shares or other interests in Mauritian resident corporations

Mauritian residents, including GBL1 companies, are eligible for a foreign tax credit on their foreign-source income. The foreign tax credit is generally the lower of the Mauritian tax and the foreign tax. If the shareholding in the foreign company is 5% or more, an underlying tax credit can be claimed. A tax-sparing credit can also be claimed. A GBL1 company can claim a presumed foreign tax credit equal to 80% of the Mauritian tax chargeable on foreign-source income (including local-source income derived in the course of its global business) if no written evidence is produced in support of the payment of foreign tax. This reduces the effective tax rate to 3% of the chargeable income on the foreign-source income. Dividends paid to residents and nonresidents and royalties paid by GBL1 Companies out of their foreign-source income to nonresidents are exempt from tax. Interest paid by GBL1 Companies to nonresidents that do not have a place of business in Mauritius is exempt from tax to the extent that the interest is paid out of foreign-source income. GBL1 Companies may be considered residents of Mauritius for purposes of double tax treaties.

GBL2 Companies are regulated by the Companies Act, 2001 and the Financial Services Act, 2007. To qualify as a GBL2 Company, the company must be beneficially owned by nonresidents, operate exclusively outside Mauritius and meet certain other requirements. GBL2 Companies are exempt from corporate income tax. Dividends paid by GBL2 Companies are exempt from income tax. Interest, royalties and other payments made by GBL2 Companies
to nonresidents are exempt from income tax. GBL2 Companies are subject to a more flexible regime than GBL1 Companies, but they do not benefit from double tax treaties.

Companies engaged in qualifying activities. Companies engaged in dyeing, knitting, spinning, or weaving activities that began their operations before 30 June 2006 are exempt from income tax for a period of up to 10 income years. If a company began operations during the period of 1 July 2006 through 30 June 2008, its income is exempt from income tax up to and including the income year ending 30 June 2016. Losses incurred during the exemption period may be carried forward to years following the expiration of the exemption period.

A company that subscribes to the stated capital of a spinning company on or before 30 June 2008 for an amount of Rs. 60 million or more is granted a tax credit equal to 60% of the investment in share capital over a period of either four or six income years. This tax credit is also granted to a company subscribing to the stated capital of a company engaged in dyeing, knitting and weaving activities on or before 30 June 2008 for an amount of Rs. 10 million or more. The credit is available beginning in the income year preceding the income year in which the shares are acquired and is spread equally over the four- or six-year period. Any unused portion of the tax credit may be carried forward to subsequent income years, subject to a maximum period of five consecutive income years beginning with the income year of the investment.

Alternative minimum tax. The alternative minimum tax (AMT) applies if a company either declares a dividend or distributes any shares instead of dividends and if the tax payable is less than 7.5% of the book profit. The AMT equals the lower of 7.5% of the book profit or 10% of the sum of any dividends declared and amounts distributed instead of dividends. The tax payable by the company is the higher of the AMT or the tax payable under the normal rules.

For purposes of the AMT calculation, capital gains (losses) or revaluation of fixed assets, dividends received from companies resident in Mauritius and trading profits (losses) from the sale or revaluation of securities are excluded in the computation of the book profit. In addition, a foreign tax credit is not subtracted in computing the tax payable.

The AMT does not apply to companies that are exempt from tax and GBL1 Companies.

For the 2013 and 2014 income years, manufacturing companies and companies operating hotels are outside the scope of AMT.

Capital gains. Capital gains are not subject to income tax. The Finance (Miscellaneous Provisions) Act 2010 (FMPA 2010) introduced a capital gains tax regime for transactions in immovable properties or interests in immovable properties; however, it was repealed by the Finance (Miscellaneous Provisions) Act 2011, effective from 5 November 2011.

Withholding taxes. Withholding taxes apply to certain payments. The tax withheld at source is an interim tax payment that may or may not be the final tax liability. Amounts deducted are credited to the final tax liability of the taxpayer for the relevant tax year.
The following are the withholding tax rates.

<table>

</tr>
</tbody>
</table>

(a) This withholding tax applies to interest paid by any person, other than by a bank or nonbank deposit-taking institution under the Banking Act, to a non-resident.

(b) This withholding tax is imposed on residents and nonresidents. The withholding tax rate is 10% for residents and 15% for nonresidents. For a recipient of royalties that is resident in a treaty country, the treaty rate applies if it is lower than 15%. The treaty rate does not apply if the payer is a GBL1 Company.

If a recipient of a payment proves to the Director-General of the MRA that the recipient is not liable for tax, the Director-General may, by written notice to the payer, direct that no tax be withheld from the payment to the recipient.

**Administration.** The income year is 1 January to 31 December of the year preceding the year of assessment. Companies may choose a financial year-end other than 31 December for tax purposes. The income year-end was previously 30 June.
Companies are required to file their tax returns within six months of their year-end.

Any tax payable in accordance with the annual return must be paid at the time of filing the return. The Advance Payment System (APS), which is effective from 1 July 2009 for all companies, requires companies to pay tax on a quarterly basis. For purposes of the APS, companies can either use the taxable profits of the preceding tax year or the results of the relevant quarter. Under the 2013 budget, a company with annual turnover of Rs. 4 million or less is not required to pay tax under the APS.

If a payment is late or an incorrect return is filed, a penalty of 5% of the tax payable is imposed. Interest at a rate of 1% for each month or part of a month the tax remains unpaid also applies. In addition, a penalty of Rs. 2,000 is imposed for each month or part of a month that the annual tax return is late. The penalty is limited to a maximum amount of Rs. 20,000.

After the MRA issues a notice of assessment, the taxpayer may object to the assessment. For an objection to be valid, 30% of the total tax claimed must be paid to the MRA.

A Voluntary Disclosure of Income Arrangement (VDIA) provides the opportunity to taxpayers to make a voluntary disclosure of their undeclared income for any years of assessment preceding the 2013 year of assessment and pay tax on such income at a rate of 15% without any interest and penalties. The VDIA also applies to cases pending as of 30 September 2012 at the level of the objection unit, Assessment Review Committee, Supreme Court and the Judicial Committee of the Privy Council. The MRA operates the VDIA during the nine months ending 30 September 2013. Any tax paid after 30 September 2013 will bear interest at a rate of 1% per month.

For tax arrears, a Tax Arrears Settlement Scheme (TASS) operates up to 30 September 2013. Under the TASS, all of the collecting penalties are waived and 75% of the assessing penalties are waived.

For objections that were not entertained by the MRA on the basis of nonpayment of the 30% tax (see above), the Expeditious Dispute Resolution of Tax (EDRT) scheme introduced by the Financial (Miscellaneous Provisions) Act 2011 is extended to the nine months ending 30 September 2013. The EDRT scheme is designed to review the assessments raised. Under the EDRT, all penalties are waived.

**Dividends.** Dividends paid to residents and nonresidents are exempt from tax.

**Foreign tax relief.** Residents of Mauritius may claim a foreign tax credit (FTC), regardless of whether they may claim other tax credits. The FTC equals the lower of the Mauritian tax liability and the amount of the foreign taxes. In computing the FTC, all foreign-source income may be pooled. An underlying FTC is also available if the residents, including individuals and trusts, own directly or indirectly at least 5% of the share capital of the foreign company. The underlying FTC is extended to all previous tiers. The FTC takes into account any tax sparing credits granted to the payer of the dividends.
C. Determination of trading income

General. Taxable income of resident companies and foreign branches comprises gross income less cost of goods sold and expenses incurred exclusively in the production of income, unless specifically excluded by law. Income and expenses are determined in accordance with generally accepted accounting principles.

Inventories. Inventories may be valued according to accounting standards. However, the income tax rules provide that the last-in, first-out (LIFO) method of valuation may not be used.

Provisions. No provisions are allowed for tax purposes.

Tax depreciation. No deduction is allowed for book depreciation of fixed assets, but statutory depreciation (capital allowances) is granted. Mauritian law provides for investment allowances and annual allowances. However, the investment allowance and the additional investment allowances have been repealed and are now available only in limited cases under transitional rules.

Under the transitional rules, a company whose application has been approved under the Investment Promotion Act, or whose proposed activity has been approved under any other enactment, may elect by irrevocable notice in writing to the Director-General to claim annual allowances for capital expenditure incurred on or before 30 June 2009 at the rates prevailing on 30 June 2006. Manufacturing companies may claim additional investment allowances on state-of-the-art technological equipment for acquisitions made in the years ended 30 June 2007 and 30 June 2008. ICT companies may claim additional investment allowances on computer equipment and plant and machinery for acquisitions made on or before 30 June 2008.

The following investment allowances are provided.

<table>
<thead>
<tr>
<th>Allowance</th>
<th>Rate (%)</th>
</tr>

<tr>
<td>Plant and machinery costing Rs. 30,000 or less</td>
<td>100</td>
</tr>
<tr>
<td>Aircraft and aircraft simulators leased by aircraft leasing companies</td>
<td>100</td>
</tr>
</tbody>
</table>

The following are the rates of annual allowances for capital expenditure incurred during the 2013 and 2014 income years.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial premises dedicated to manufacturing</td>
<td>30</td>
</tr>
<tr>
<td>Plant and machinery costing Rs. 50,000 or less</td>

<td>50</td>
</tr>
<tr>
<td>Scientific research</td>
<td>50</td>
</tr>
<tr>
<td>Renovation-works expenditure by hotels, restaurants and retail outlets</td>
<td>33</td>
</tr>
</tbody>
</table>

Except for the annual allowance rates on industrial premises, the above rates will be applied on a straight-line basis.

To qualify as capital expenditure on green technology, it must be incurred on the following:

- Renewable energy
- Energy-efficient equipment or noise-control devices
- Water-efficient plant and machinery and rainwater harvesting equipment and systems
- Pollution-control equipment or devices, including wastewater recycling equipment
- Effective chemical hazard control devices
- Desalination plant
- Composting equipment
- Equipment for shredding, sorting and compacting plastic and paper for recycling

Any unused annual allowances that arise as a result of the above increased rates can be carried forward indefinitely. Expenditure on passenger cars will not be eligible for increased annual allowances.

Capital allowances are subject to recapture on the sale of an asset to the extent the sales price exceeds the tax value after depreciation. Amounts recaptured are included in ordinary income and are subject to tax at the normal tax rate. To the extent that the sales price is lower than the depreciated value, an additional allowance is granted.

Under an amendment contained in the Finance (Miscellaneous Provisions) Act 2010, the total annual allowances on a motor car
cannot exceed Rs. 3 million. The Rs. 3 million cap does not apply to persons engaged in the business of tour operation and car rental.

**Relief for losses.** Losses can be offset against future corporate income in the following five income years. Losses attributable to annual allowances can be carried forward indefinitely. Losses may not be carried back.

If a company takes over a company engaged in manufacturing activities or if two or more companies engaged in manufacturing activities merge into one company, any unrelieved losses of the acquired company or merging companies may be transferred to the acquirer or to the company resulting from the merger in the income year of the takeover or merger, subject to certain conditions relating to the safeguarding of employment that may be established by the Minister of Finance. The loss transferred is withdrawn if, within three years from the date of the takeover or merger, more than 50% of the employees are made redundant.

**D. Other significant taxes**

**E. Miscellaneous matters**

**Foreign-exchange controls.** The Exchange Control Act was suspended in 1993. Consequently, approval of the Bank of Mauritius is no longer required for transactions involving foreign exchange.

**Antiavoidance legislation.** Antiavoidance provisions apply to interest on debentures issued by reference to shares, excessive remuneration to shareholders or directors, benefits to shareholders, excessive management expenses, leases with inadequate rent, rights over income retained and other transactions designed to avoid tax liability. Certain of these items are discussed below.
Interest on debentures issued by reference to shares. If a company issues debentures in the proportion of shares held by each shareholder, the interest on the debentures is treated as a dividend and is therefore not an allowable deduction for the company. The 2004 Finance Act provides that such interest on the debentures is not treated as a dividend for the shareholder.

Benefits to shareholders. If a benefit of any nature, whether in money or money’s worth, is granted by a company to a shareholder or a party related to the shareholder, the value of the benefit is deemed to be a taxable benefit in the hands of the shareholder or the related party.

Rights over income retained. If a person transfers property or any right to income to a related party and retains or obtains power to enjoy income from the property or the right, the income is deemed to be derived by the transferor.

F. Treaty withholding tax rates

Under Mauritian domestic law, dividends paid to residents and nonresidents and royalties paid by GBL1 Companies (see Section B) to nonresidents are exempt from tax. Interest payments are exempt from tax if they are paid by Mauritian banks to nonresident banks or if they are paid by GBL1 Companies to nonresidents that do not have a place of business in Mauritius. The following table lists the tax rates for dividends, interest and royalties under the tax treaties entered into by Mauritius. However, Mauritian domestic law prevails if it exempts the payments from tax.

</table>

(a) Applicable if the recipient has a direct shareholding of at least 10% of the capital of the Mauritian company; otherwise, the rate is 15%.

(b) Applicable if the recipient has a direct shareholding of at least 25% of the capital of the Mauritian company; otherwise, the rate is 15%.

(c) Applicable if the recipient has a direct or indirect shareholding of at least 10% of the capital of the Mauritian company; otherwise, the rate is 15%.

(d) The reduced rate applies only if the royalties are subject to tax in the United Kingdom.

(e) Applicable if the recipient controls directly or indirectly 25% of the voting power of the Mauritian company; otherwise, the rate is 20%.

(f) The rate is 0% if the interest is paid to a bank resident in the treaty country (subject to additional conditions) and, under the France treaty, if the loan is made or guaranteed by the Banque Française du Commerce Extérieur.

(g) The rate is 0% for literary, artistic or scientific copyright royalties and for royalties for the use of motion picture films or works recorded for broadcasting or television.

(h) Applicable if the recipient is the beneficial owner of the dividends and if the payer of the dividends is a venture capital company; otherwise, the rate is 10%.

(i) Applicable if the recipient has a direct or indirect shareholding of at least 10% of the capital of the Mauritian company; otherwise, the rate is 10%.

(j) Applicable if the recipient has a direct or indirect shareholding of at least 25% of the capital of the Mauritian company; otherwise, the rate is 10%.

(k) Applicable if the recipient has invested at least US$500,000 in the authorized capital of the payer of the dividends; otherwise, the rate is 10%.

(l) This treaty has been signed, but it has not yet been ratified.

(m) Interest paid by GBL1 Companies to nonresidents or by Mauritian banks to nonresident banks is exempt. Interest paid by other resident companies to nonresidents is taxed at a rate of 15%.

(n) Royalties paid by GBL1 Companies to nonresidents are exempt from tax. Royalties paid by other companies to nonresident companies are subject to tax at a rate of 15%.

(o) The 5% rate applies if the recipient of the dividends holds directly at least 15% of the capital of the payer. The 10% rate applies if the recipient of the dividends holds directly at least 10%, but less than 15%, of the capital of the payer. The 15% rate applies to other dividends.

(p) The 10% rate applies if the recipient of the interest is a financial institution or an insurance company. The 15% rate applies to other interest payments.

(q) The 5% rate applies if the recipient is a company that owns at least 25% of the share capital of the paying company. Otherwise, the rate is 15%.

(r) The 5% rate applies if the recipient is a company with a shareholding of at least 10%. Otherwise, the rate is 15%.

Treaties with Gabon, Ghana, Malawi and Monaco await signature. Mauritius is negotiating tax treaties with Algeria, Burkina Faso, Canada, the Czech Republic, Greece, Iran, Portugal, St. Kitts and Nevis, Saudi Arabia, Tanzania, Vietnam and Yemen.

Net Operating Losses (Years)
Carryback 0
Carryforward 10

(a) This rate is expected to be reduced to 29% for 2013 and to 28% for 2014 and future years.
(b) This is a final tax applicable to nonresidents. Payments to tax havens are generally subject to a 40% withholding tax.
(c) This rate can be reduced to 4.9% if certain requirements are met.
(d) A reduced rate of 4.9% is granted each year to banks resident in treaty countries.

B. Taxes on corporate income and gains

Corporate income tax. Corporations resident in Mexico are taxable on their worldwide income from all sources, including profits from business and property. A nonresident corporation in Mexico is subject to profits tax on income earned from carrying on business in Mexico. Corporations are considered residents of Mexico if they are established under Mexican law or if their principal place of management is located in Mexico.

Corporations are taxed in Mexico only by the federal government. Mexico has a general system for taxing corporate income, ensuring that all of a corporation’s earnings are taxed only once, in the fiscal year in which the profits are obtained.

The income tax law recognizes the effects of inflation on the following items and transactions:
• Depreciation of fixed assets
• Cost on sales of fixed assets
• Sales of capital stock (shares)
• Monetary gains and losses
• Tax loss carryforwards

Investment in capital stock may be indexed at the time of capital stock reductions or liquidation. Taxes are also indexed for inflation in certain circumstances.

Tax rate. Corporations are subject to federal corporate income tax at a rate of 30%. The rate is expected to be reduced to 29% for 2013, and to 28% for 2014 and future years.

Flat Rate Business Tax. Flat Rate Business Tax (IETU) was introduced as a minimum tax to replace the Minimum Tax on Assets. The rate of IETU is 17.5% for 2012. This tax is levied on broader taxable income and on a cash basis rather than an accrual basis. The tax applies only to Mexican residents and to nonresidents that have a permanent establishment in Mexico.

IETU is levied on the difference between cash collections from the sales of goods, rendering of services and rental of property
and cash payments for the acquisition of goods, services and rentals. Income tax paid can be credited against the IETU. Certain types of income are not taxable and certain types of expenses are not deductible. Other types of expenses are not deductible but may be credited against the tax calculated. IETU paid in excess of income tax for any tax year cannot be carried over.

Capital gains. Mexican tax law treats capital gains as normal income and taxes them at regular corporate tax rates. However, to determine the deductible basis for sales of real estate, fixed assets and shares, the law allows for indexation of the original cost for inflation.

Administration. The tax period always ends on 31 December and cannot exceed 12 months. The tax return must be filed by the end of the third month following the tax year-end. Monthly tax installments must be paid during the corporation’s tax year.

Dividends. Dividends received by resident and nonresident shareholders from a Mexican corporation are not subject to corporate income tax if the earnings were already subject to corporate income tax and if the distributing corporation has sufficient accumulation in its “net tax profit” (CUFIN) account to cover the dividend. If the accumulated amount is not sufficient, the dividends are taxed at the corporate level at a rate of 30% (expected rates of 29% for 2013 and 28% for 2014 and future years). The following is an illustration of how to compute the net tax profit for the CUFIN account.

\[
\begin{array}{|l|}
\hline
\text{MXN} \\
\text{Corporate taxable income} & 1,000 \\
\text{Income tax (30%)} & (300) \\
\text{Nondeductible profit sharing to employees (estimated)} & (150) \\
\text{Nondeductible expenses} & (50) \\
\text{Net tax profit (not subject to corporate income tax on distribution)} & 500 \\
\hline
\end{array}
\]

Income tax paid on distributed profits may be credited against corporate income tax in the following three years.

Similar rules apply to remittances abroad by branches of foreign corporations.

C. Determination of trading income

General. Taxable profits are computed in accordance with generally accepted accounting principles, with the following exceptions:
- Nondeductibility of penalties and unauthorized donations
- Nondeductibility of increases to reserves for bad debts, obsolescence, contingencies, indemnities and so forth
- Monetary gain on debts, and monetary loss on credits, to recognize the effect of inflation

Employee profit-sharing (see Section D) is effectively deductible.

Inventories. Instead of deducting the normal cost of sales, inventory purchases, labor costs and overhead expenses are deductible each fiscal year. However, beginning in 2005, the cost of goods sold is deductible instead of inventory purchases. Complex rules apply with respect to this measure.
Depreciation. The straight-line method is used to depreciate tangible fixed assets and to amortize intangible assets. Depreciation must be computed using the annual percentages set by law. The depreciation of new assets must be computed on a proportional basis relating to the months in which the assets are used. Depreciation is computed on original cost of fixed assets, with the amount of depreciation indexed for inflation as measured by price indices.

The following are the maximum annual depreciation rates for certain types of assets.

<table>

</tr>
</tbody>
</table>

Companies may elect to claim an immediate deduction equal to a percentage of their original investments in assets rather than calculate depreciation based on the useful lives of the assets. However, this option is not available for certain assets and in certain geographical areas.

Relief for losses. Business losses may be carried forward for 10 years.

Groups of companies. A Mexican holding company has the option of filing a consolidated return including the tax results of its Mexican subsidiaries. This option is subject to several rules and limitations.

D. Other significant taxes

The following table summarizes other significant taxes.

</tr>
</tbody>
</table>
E. Miscellaneous matters

**Foreign-exchange controls.** Mexico has no foreign-exchange controls.

**Transfer pricing.** Mexico has transfer-pricing rules. Acceptable transfer-pricing methods include the comparable uncontrolled price method, the resale price method, the cost-plus method, the profit-split method, the residual profit-split method and the transactional net-margin method. In certain cases, specific appraisals are used. Transactions between related parties are subject to greater scrutiny. It may be possible to reach transfer-pricing agreements in advance with the tax authorities. These agreements may apply for a period of up to five years.

**Debt-to-equity rules.** Interest deductions may be disallowed if the debt-to-equity ratio exceeds 3 to 1.

</table>

(a) The lower rate applies if the recipient is a corporation owning at least 25% (20% under the Brazil treaty) of the shares of the payer. Under the treaty, the lower rate applies if the recipient owns at least 25% of the shares of the payer.

(b) These treaties have a most favorable nation (MFN) clause with respect to interest and/or royalties. Under the MFN clause in the Chile treaty, the withholding tax rate for interest may be reduced to 5% for banks or 10% for other recipients and the withholding tax rate for royalties may be reduced to 10%, if Chile enters into a tax treaty with another country that provides for a lower withholding tax rate than 15% for such payments. Under the MFN clause in the France treaty, the withholding tax rate for interest and royalties is reduced if Mexico enters into a tax treaty with an Organization for Economic Cooperation and Development (OECD) member that provides for withholding tax rates that are lower than the rates under the Mexico-France treaty. However, the rate may not be lower than 10% if the OECD member country is not a member of the European Union (EU). Under the treaty, the MFN clause applies only to interest. It may reduce the withholding tax rate for interest to as low as 10% only if Mexico enters into a treaty with an EU country that provides for a withholding tax rate for interest of less than 15%. Under the MFN clause in the Spain treaty, the withholding tax rates for interest and royalties may be reduced if Mexico enters into a tax treaty with an EU country that provides for withholding tax rates that are lower than the rates under the Mexico-Spain treaty. Under the Brazil treaty, if this country agrees with another country regarding a lower rate for dividends, interest or royalties, such rate will apply. For interest and royalties, the applicable rate may not be lower than 4.9% and 10%, respectively. Under the New Zealand treaty, if this country agrees with another country regarding a lower rate for dividends, such rate will apply. The standard rate for interest and for patent and know-how royalties under all of the above treaties is generally 15%. However, as a result of the operation of the MFN clause, the lower rates listed in the table may apply in certain circumstances.

(c) The 0% rate applies if the recipient of the dividends is the effective beneficiary of the dividends. The 5% rate applies if the recipient is a company that is resident in France and if more than 50% of such recipient is owned by residents of countries other than France or Mexico.

(d) The 5% rate applies if the recipient is a corporation owning at least 10% of the shares of the payer. Under the U.S. treaty, the 0% rate applies if the recipient owns 80% of the voting shares and if other requirements are met. Under the Switzerland treaty, the 0% rate applies if the recipient is a corporation owning at least 10% of the shares of the payer or if the beneficiary of the dividend is a pension fund.

(e) The 10% rate applies to interest derived from loans granted by banks and insurance companies. Under the Germany treaty, the 10% rate also applies to interest paid to pension funds. Under the Australia and Japan treaties, the 10% rate also applies to interest paid on bonds or with respect to sales by suppliers of machinery and equipment. Under the Poland treaty, the 10% rate also applies to interest paid on publicly traded securities.

(f) The 5% rate applies if the recipient is a corporation that owns at least 10% of the shares of the payer and if the tax levied in Israel is not less than the corporate tax rate.

(g) The effective beneficiary of royalties is subject to withholding tax on the gross payments. Royalties on cultural works (literature, music and artistic works other than films for movies or television) are not subject to withholding tax if they are taxed in the recipient’s country.
(h) A 10% rate applies to interest paid on bank loans or publicly traded bonds, as well as to interest paid with respect to sales by suppliers of machinery and equipment.

(i) See Section A and the applicable footnotes in the section.

(j) The 5% rate applies if the beneficial owner of the interest is a bank or insurance company or if the interest is derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies to interest paid by a bank or by a purchaser with respect to a sale on credit of machinery if the seller is the beneficial owner of the interest. The 15% rate applies to other interest.

(k) The 0% rate applies if the recipient is a corporation owning at least 10% of the shares of the payer.

(l) Dividends are not subject to withholding tax under Mexican domestic law.

(m) Beginning in the sixth year the treaty is in effect, the 15% rate is reduced to 10% if the beneficial owner of the interest is a bank. For the first five years, however, the 15% rate applies to such interest.

(n) The lower rate applies if the beneficial owner of the interest is a bank.

(o) The 5% rate applies if the recipient is a corporation owning at least 25% of the shares of the payer. The 0% rate applies if the condition described in the preceding sentence is satisfied and if both of the following conditions are satisfied:
   - The recipient’s shares are regularly traded on a recognized stock exchange.
   - More than 50% of the recipient’s shares are owned by one or any combination of the following:
     — The state of residence of the recipient.
     — Individuals resident in the state of residence of the recipient.
     — Corporations resident in the state of residence of the recipient if their shares are traded on a recognized stock exchange or if more than 50% of their shares are owned by individuals resident in the state of residence of the recipient.

(p) The 5% rate applies if the interest is derived from loans granted by banks or insurance companies or if the interest is derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies to other interest.

(q) The 10% rate applies to interest derived from loans granted by banks.

(r) The 4.9% rate applies if the beneficial owner of the interest is a bank or insurance company or if the interest is derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies to other interest.

(s) Under a protocol to the treaty with the Netherlands, the 5% rate is reduced to 0% if the dividends are paid on a shareholding that qualifies for the participation exemption under the corporate tax law of the Netherlands.

(t) The 10% rate applies if the beneficial owner of the interest is a bank.

(u) The 5% rate applies if the recipient is a corporation owning at least 20% of the shares of the payer.

(v) The treaty does not limit the withholding tax rate on this income.

(a) See Section B.
(b) In general, a 6% withholding tax applies to dividends paid to nonresidents and residents. A 15% rate applies to dividends related to the 2008 through 2011 fiscal years.
(c) Interest on deposits and securities of individuals is not taxable until 2015. Interest on bank deposits or corporate bonds of legal entities is not taxable until 2015, if the deposits are made for a period of more than three years or if the bonds are issued for a period of more than three years. Interest on state securities is not taxable until 1 January 2015.
(d) A 12% withholding tax rate applies to royalties paid to nonresidents and to resident individuals.
(e) The 12% rate applies to services rendered by nonresidents. The 10% rate applies to rent paid to individuals, except for rent paid for agricultural land, and to amounts paid to individuals with respect to advertising campaigns. The 7% rate applies to certain payments made to resident individuals.
B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their worldwide income. Resident companies are companies with activities managed or organized in Moldova (an activity is organized in Moldova if it is carried out by a company that is registered in Moldova as a legal entity) and companies that carry out their business activities primarily in Moldova.

Permanent establishments of nonresident companies in Moldova are subject to tax on their income from Moldovan sources. For tax purposes, permanent establishments are considered to be resident entities.

Rate of corporate income tax. The rates of corporate income tax in Moldova are described below.

Standard corporate income tax rate. The standard corporate income tax rate in Moldova is 12%.

Small and medium-sized companies (except for farmers and individual entrepreneurs) that are not registered as value-added taxpayers. The following are the tax rates applicable to small and medium-sized companies (except for farmers and individual entrepreneurs) that are not registered as value-added tax (VAT) payers:

- If, for the previous fiscal reporting period (ending 31 December), the company obtained income from operational activities in an amount up to MDL 100,000, it must apply a 3% tax rate to the operational activity income obtained in the current reporting period.
- If, for the previous fiscal reporting period (ending 31 December), the company obtains income from operational activities in an amount from MDL 100,000 to MDL 600,000 and if it voluntarily registers as a value-added tax (VAT) payer, it can choose to be taxed at a 3% tax rate applied to operational activity income obtained in the current reporting period or at the standard corporate income tax rate of 12%.

Farmers. The income tax rate for farmers is 7%.

Individual entrepreneurs. For individual entrepreneurs, the income tax rates are 7% of annual taxable income that does not exceed MDL 26,700 and 18% of annual taxable income that exceeds MDL 26,700.

Tax incentives. Tax incentives available in Moldova are described below.

Free-economic zones. Residents of free-economic zones benefit from the following incentives:

- A 50% reduction of the standard corporate profits tax rate on income derived from the exportation outside Moldova of goods originating in the free-economic zone
- A 75% reduction of the standard corporate profits tax rate on income other than the income indicated in the preceding bullet
A three-year exemption from corporate profits tax on income derived from the exportation of goods originating in a free-economic zone, beginning with the quarter following the quarter in which investments made in fixed assets or in the development of the free-economic zone infrastructure are at least of US$1 million

A five-year exemption from corporate profits tax on income derived from the exportation of goods originating in a free-economic zone, beginning with the quarter following the quarter in which investments made in fixed assets or in the development of the free-economic zone infrastructure are at least of US$5 million

**Commercial banks.** Commercial banks providing loans that finance capital investments in specified activities (see next paragraph) benefit from the following incentives:

- Exemption from corporate income tax on income earned from loans granted for more than three years
- A 50% reduction of corporate income tax on income earned from loans granted for a period of two to three years

The corporate income tax incentives mentioned in the preceding paragraph are granted to commercial banks financing capital investments in the following activities:

- Acquisition of fixed assets for use in a business activity, contractor’s works and engineering services
- Acquisition and processing of agricultural products
- Designing, development, mastering and implementation of new techniques and technologies
- Restructuring of production process technologies
- Planting and renewal of perennial plantations
- Alcoholic aging of cognacs, raw material wine used to produce classic wines saturated with carbon dioxide and high-quality wines

**Capital gains.** Capital gains and losses on sales, exchanges or other transfers of capital assets are equal to the difference between amounts received and the cost bases of the assets. The amount of capital gains subject to income tax in a tax year equals 50% of the excess of capital gains over capital losses. Net capital losses may be carried forward to offset capital gains in the following three years.

**Administration.** The tax year is the calendar year. A company may not elect a different tax year.

The corporate income tax return must be filed by 31 March of the year following the tax year.

An amended tax return can be filed to correct errors contained in the original tax return if no tax audit was announced or performed by the tax authorities for the respective fiscal period.

Under the Moldovan Tax Code, companies may either obtain a refund of an overpayment of tax or offset the overpayment against existing or future tax liabilities.

All taxes in Moldova must be paid in Moldovan lei (MDL). To calculate the tax on income realized in foreign currency, the income must be converted into lei using the official exchange rate on the payment date.
Dividends. In general, a 6% withholding tax is imposed on dividends paid to nonresidents and residents. A 15% withholding tax continues to be imposed on dividends related to the 2008 through 2011 fiscal years.

Foreign tax relief. Companies may claim a credit against corporate income tax for foreign tax paid on income that is subject to tax in Moldova. The foreign tax credit is granted for the year in which the relevant income is subject to tax in Moldova.

C. Determination of trading income

General. Taxable income includes income earned from all sources, less deductible expenses and allowances provided for by the tax law. In general, companies may deduct ordinary and necessary expenses accrued during the tax year with respect to its business activities. However, they may not deduct the following items:

- Personal and family expenses of the company founders and employees
- Amounts paid for the acquisition of depreciable property
- Losses resulting from sales or exchanges of property, performance of works and provisions of services between related parties
- Unjustified expenses paid to related parties, including compensation, interest and rent
- Amounts paid to the holders of business patents
- Expenses related to exempt income
- Provisions for bad debts

Inventories. Assets valuation income is nontaxable. Assets valuation losses are nondeductible.

Provisions. If a court decision confirms that a debt owed to a company will not be recovered, the company may deduct for tax purposes the amount of the debt. Provisions for bad debts are not deductible for tax purposes.

Tax depreciation. Fixed assets used in business activities may be depreciated using the declining-balance method. To calculate depreciation, fixed assets are classified into five categories. The following are the categories and the applicable depreciation rates.

<table>
<thead>
<tr>
<th>Category</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>5</td>
</tr>
<tr>
<td>2</td>
<td>8</td>
</tr>
<tr>
<td>3</td>
<td>12.5</td>
</tr>
<tr>
<td>4</td>
<td>20</td>
</tr>
<tr>
<td>5</td>
<td>30</td>
</tr>
</tbody>
</table>

The allocation of the fixed assets to the above categories is based on the Catalogue of Fixed Assets approved by the government of Moldova.

The assets in Category 1 (real estate) are depreciated individually. The assets in the other categories are depreciated as groups.

Relief for losses. Companies incurring a tax loss may deduct one-third of the loss in each of the three subsequent tax years. Losses may not be carried back.
Groups of companies. The Moldovan tax law does not contain any measures regarding groups of companies in Moldova. Consequently, the filing of consolidated returns or the granting of relief for losses on a group basis is not permitted.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>

<td>0.1</td>
</tr>
</tbody>
</table>

E. Foreign-exchange controls

The Moldovan leu (MDL) is the only currency that may be used to make payments in Moldova. The National Bank of Moldova (NBM) establishes the official exchange rate for the leu in relation to other foreign currencies. Both resident and nonresident companies may open leu or foreign currency accounts in authorized banks of Moldova.

Resident companies are not required to convert proceeds received in foreign currency into lei (plural of leu). However, they may not transfer foreign currency from their accounts to the accounts of other residents of Moldova, except for authorized banks.

Nonresidents may transfer abroad currency if the currency was registered in their account or if the funds were previously held in a leu deposit account with a Moldovan authorized bank.

Payments in currency by resident companies to nonresidents may be made only from foreign-currency accounts at authorized Moldovan banks (or at foreign banks that are authorized by NBM), and these payments may be made by bank transfer only.
For a distribution of profits during the year, a company should be ready to present to interested bodies the statutory act of the company that indicates the amount of the distribution. For a distribution of profits at the end of the fiscal year, the company should have ready for inspection a copy of the filed annual tax return and the statutory act of the company that indicates the amount of the distribution.

F. Treaty withholding tax rates

A These are the general dividend withholding tax rates.
B In general, the rates apply if the beneficiary of the dividends is a company that holds directly at least 25% of the share capital of the payer.
(a) This rate applies if the effective beneficiary of the dividends is a company that has invested foreign capital of at least US$250,000 in the payer of the dividends.
(b) This rate applies if the beneficiary of the dividends is a company holding directly at least 10% of the capital of the payer.
(c) The 3% rate applies to royalties paid for the use of, or the right to use, patents, computer software, designs or models, plans, and secret formulas or processes, or for information concerning industrial, commercial or scientific experience. The 7% rate applies to other royalties.
(d) This rate applies if the beneficiary of the dividends is a company holding directly at least 10% of the payer of the dividends.
(e) This rate applies if the effective beneficiary of the dividends is a company (other than a society) that has invested more than US$300,000 in the capital of the payer of the dividends.
(f) Royalties received for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes for radio or television broadcasting, are exempt from tax.
(g) No tax is withheld if the effective beneficiary of the interest is a financial institution.
(h) No tax is withheld if the effective beneficiary of the dividends is a company that directly holds at least 50% of the capital of the payer of the dividends and that has invested US$300,000 or an equivalent amount of national currency of a European Union (EU) member state in the capital of the payer of the dividends.
(i) The 10% rate applies to royalties paid for the use of patents, trademarks, drawings or patterns, plans, secret formulas or manufacturing procedures as well as for industrial, commercial or scientific information. The 15% rate applies to other royalties.
(j) No tax is withheld if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 50% of the capital of the payer of the dividends.
(k) No withholding tax is imposed on interest paid on bank loans or on interest paid with respect to the following:
   • Sales on credit of industrial, commercial or scientific equipment
   • Sales of goods between enterprises
(l) No tax is withheld if either of the following conditions is satisfied:
   • The beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the company paying the dividends and that has invested at least £1 million (or the equivalent amount in another currency) in the capital of the company paying the dividends at the date of payment of the dividends.
   • The beneficial owner of the dividends is a pension scheme.
(m) In general, the withholding tax rate for dividends is 6%. For dividends related to the 2008-2011 fiscal years, the withholding tax rate is 15%.
(n) Interest on deposits and securities of resident individuals is not taxable until 2015. Interest on bank deposits or corporative bonds of legal entities is not taxable until 2015, if the deposits are made for a period of more than three years or if the bonds are issued for a period of more than three years. Interest on state securities is not taxable until 1 January 2015.
(o) This treaty has been signed, but it is not yet in effect.

(a) The corporate tax system is progressive with annual taxable income of up to MNT 3 billion subject to tax at a rate of 10% and taxable profits in excess of this amount taxed at a rate of 25%.
(b) Gains derived from the sale of immovable property are subject to tax at a rate of 2%.
(c) These withholding tax rates apply to payments to nonresidents.
(d) This is a technical tax because the Investment Law of Mongolia generally requires foreign companies to carry on business through a Mongolian limited liability company (LLC).
(e) The general rule is that losses can be carried forward for two years, and the use of such losses is limited to 50% of taxable income in any year. For companies in the mining and infrastructure sector, losses can be carried forward for four to eight years, depending on the investment amount, and no restriction is imposed on the use of losses.

B. Taxes on corporate income and gains

Corporate income tax. Permanent residents of Mongolia are taxed on their worldwide income. A company is regarded as a permanent resident of Mongolia in either of the following circumstances:
- It is incorporated in Mongolia.
- It is a foreign entity that has its head office located in Mongolia.
Permanent residents may qualify for a tax credit with respect to income generated from the production and planting of specified products (see Tax Incentives).

Nonresidents of Mongolia are taxed on Mongolian-source income only. The term nonresident is broadly defined to include foreign corporate entities that conduct business in Mongolia through a representative office and foreign entities operating in Mongolia that do not qualify as permanent residents.

Rates of corporate tax. The corporate tax system is progressive with annual taxable income of up to MNT 3 billion subject to tax at a rate of 10% and taxable profits in excess of this amount taxed at a rate of 25%.

Certain types of income received by residents are taxed at different tax rates, as indicated in the following table.

<table>
<thead>
<tr>
<th>Income</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>10</td>

<td>30</td>
</tr>
<tr>
<td>Gambling and lottery income</td>
<td>40</td>
</tr>
<tr>
<td>Sale of immovable property</td>
<td>2</td>
</tr>
</tbody>
</table>

Tax incentives. A 50% tax credit is available to taxpayers that generate income from the production and planting of the following:
- Cereal, potatoes and vegetables
- Milk
- Fruits and berries
- Fodder plants

Double tax treaties offer additional tax credits for corporate entities taxed in foreign countries.

An exemption from corporate tax is available to nonresident investors that operate in the oil industry in Mongolia under a product-sharing contract with the Mongolian government.

Foreign investors investing certain amounts in Mongolia may apply for stability agreements to govern their investments and accordingly benefit from stable tax conditions for a fixed term. An investment project of more than US$20 million may apply for a 10-year term, and an investment project of more than US$50 million may apply for a 15-year term. In the mining sector, if the investment for the first 5 years exceeds certain amounts, the following fixed terms are allowed:
- US$50 million: 10 years
- US$100 million: 15 years
- US$300 million: 30 years

Capital gains. Capital gains and losses are treated in the same manner as other taxable income and losses. Gains are subject to the progressive Mongolian corporate tax rates of 10% and 25%. The exception to this rule is that gains derived from the sale of immovable property are subject to tax at a rate of 2%. Gains derived by nonresidents on the disposal of Mongolian assets may be exempt from tax if structured to be sourced offshore.

Administration. The tax year in Mongolia is the calendar year.
Tax is calculated by the taxpayer on an accrual basis. The tax authorities deliver monthly and quarterly tax schedules to taxpayers that must pay tax before the 25th day of each month.

Taxpayers must also file quarterly returns within 20 days after the end of each quarter. An annual return is due on 10 February following the end of the tax year and the taxpayer must settle all outstanding liabilities by that date.

If it is necessary to withhold tax on dividends, royalties, sales of rights, transfers of profits overseas by representative offices of foreign companies and Mongolian-source income earned by non-resident taxpayers, the withholding tax must be paid over to the state within seven working days. Withholding tax on income received from the sale of immovable property must be paid over to the state within 10 working days after the sale of the property. All withholding tax statements must be submitted within 20 days after the end of the quarter, and an annual statement must be filed by 10 February following the end of the tax year.

On submission of the tax returns, the Mongolian tax authorities conduct an administrative check of the returns to ensure all requirements have been met for filing. At a later stage, the tax authorities can conduct a more detailed review of the returns through a tax audit.

Dividends. Dividends paid between permanent residents of Mongolia are taxed at a rate of 10%. Dividend income received by a nonresident from a permanent resident is subject to withholding tax at a rate of 20%. This rate may be reduced under an applicable double tax treaty.

Foreign tax relief. The domestic law states that a foreign tax credit is available only if the foreign tax is paid in a country with which Mongolia has a double tax treaty.

C. Determination of trading income

General. Taxable income is broadly defined as total revenue less the following:
- Deductible expenses
- Exempt income
- Tax losses

Taxable revenue falls under the following three categories:
- Operation income. This is primarily income generated from business activity. However, it also includes, among other items, income from the sale of shares and securities, income from the sale of licenses, income from the sale of intangible assets and gains on foreign-currency exchange rates.
- Property income. This includes rental income, royalties, dividends and interest income.
- Income from the sale of property. This includes the sale of movable and immovable property (with the exception of shares and securities).

Different sources of taxable income are taxed at different rates (see Section B).

The following types of income are exempt from tax:
- Interest earned on government bonds.
• Income and dividends earned by nonresident taxpayers trading in the oil industry in Mongolia under a product-sharing contract and derived from the sale of its share of product. If the nonresident taxpayer transfers this income abroad, no tax is levied.
• Income earned by cooperatives from sales of their members’ products through intermediary means.

The tax law provides a list of deductible expenses. Any items that are not listed as deductible in the tax law must be added back when computing taxable profits.

The following expenses are nondeductible expenses:
• Expenses incurred in earning exempt income
• Expenses not documented by the taxpayer
• Payments from which tax has not been withheld correctly
• Rental payments under finance leases
• Fines and penalties imposed by the tax authorities

Specific restrictions apply to the deductibility of the following:
• Regular maintenance expenses
• Voluntary insurance premium fees
• Reserves accumulated in the risk funds of banks and other non-banking financial institutions
• Per-diem expenses
• Natural disaster restoration fees
• Depreciation of inventory

Third-party interest payments on loans to finance the company’s primary and auxiliary production, operations, services and purchases of properties are deductible for tax purposes, subject to thin-capitalization rules.

Nonresidents carrying out trading in Mongolia through a representative office may deduct its business expenses in accordance with the rules applicable to permanent residents. However, expenses incurred outside of Mongolia and management and administrative expenses not related to the generation of business income are not deductible for tax purposes.

**Tax depreciation.** Tax depreciation of noncurrent assets is calculated using the straight-line method. The following are the useful economic lives of various noncurrent assets.

<table>
<thead>
<tr>
<th>Noncurrent assets</th>
<th>Useful economic life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Building and construction</td>
<td>40</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>10</td>
</tr>
<tr>
<td>Computers, computer parts, software</td>
<td>3</td>
</tr>
<tr>
<td>Intangible asset with indefinite useful life</td>
<td>10</td>
</tr>
<tr>
<td>Intangible asset with definite useful life (includes licenses for mineral exploration and extraction)</td>
<td>Validity period</td>
</tr>
<tr>
<td>Other noncurrent assets</td>
<td>10</td>
</tr>
</tbody>
</table>

The depreciation value for a mineral exploration and extraction license is the sum of its purchase price and fees paid for ownership and transference of such license.

If an asset is only partially used in generating taxable profits, the tax depreciation claimed is accordingly prorated. If the taxpayer
ceases to use its own depreciable assets to generate taxable prof-
its, the asset is deemed sold and tax is levied on the higher of the
book value or the market value of the asset. Land and inventory
are nondepreciable assets.

**Relief for losses.** Tax losses can be carried forward for up to two
years and the use of such losses is restricted to 50% of taxable
profits in any tax year. For companies in the mining and infra-
structure sector, losses can be carried forward for four to eight
years, depending on the investment amount, and no restriction is
imposed on the use of losses.

No carryback is possible.

**Groups of companies.** Tax grouping is not allowed in Mongolia.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Royalties; paid on the sale of mining products; the two types of royalties are standard flat rate royalties and surtax royalties; the rates of the standard flat rate royalties depend on the type of minerals and whether they are sold within Mongolia; the rates of the surtax royalties vary depending on the type of minerals, their market prices and their degree of processing; surtax royalties are not imposed on minerals below a certain market price</td>

<td>Various</td>
</tr>
<tr>
<td>Employers</td>
<td>11 to 13</td>
</tr>
<tr>
<td>Employees</td>
<td>10</td>
</tr>
</tbody>
</table>

E. Miscellaneous matters

**Foreign-exchange controls.** The Mongolian currency is the togrog (MNT).

Foreign revenue and expenses must be converted into togrogs on the date of the transaction.

Realized foreign-exchange gains and losses are taxable and deductible, respectively.

**Transfer pricing.** Transactions between the taxpayer and a related party must follow arm’s length principles. If these principles are not followed, the tax authorities may seek to adjust the transaction.
to fair market value. The Ministry of Finance has released guidelines setting out the pricing methodologies that can be used by taxpayers and the documentation requirements for related-party transactions.

**Debt-to-equity rules.** Interest paid to dependent parties is subject to a debt-to-equity ratio of 3:1.

### F. Treaty withholding tax rates

The table below provides Mongolian withholding tax rates for dividends, interest and royalties paid from Mongolia to residents of various treaty countries. The rates reflect the lower of the treaty rate and the rate under domestic law. The table below is for general guidance only. The government of Mongolia has released draft legislation threatening to cancel various treaties as a result of perceived tax abuse. This list below is evolving and advice should be obtained to ensure that the treaty rates are still current.

</table>

(a) The 5% rate applies if the recipient of the dividends is a company (excluding partnerships) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to all other dividends.

(b) The 5% rate applies to royalties paid for patents, trademarks, designs or models, plans, secret formulas or processes, or information concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films.
(c) This treaty is not yet in force.
(d) The 0% rate applies if the loan is provided to the government or the central bank. The 10% rate applies in all other cases.
(e) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the capital of the company paying the dividends. The 15% rate applies to all other dividends.
(f) The following types of interest are exempt from tax in the contracting state in which the interest arises:
   • Interest on commercial debt claims
   • Interest paid with respect to loans made, guaranteed or insured by public entities or credits extended, guaranteed or insured by public entities, the purpose of which is to promote exports
   • Interest on loans granted by banking enterprises
   • Interest on deposits and interest paid to the other contracting state, or a political subdivision or local authority thereof
(g) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the company paying the dividends (except in the case of dividends paid by a nonresident-owned investment corporation that is a resident of Canada). The 15% rate applies to other dividends.
(h) The 0% rate applies to interest paid on loans made to the government or a political subdivision. The 10% rate applies in all other cases.
(i) The 5% rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting) and royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience (but not including royalties paid with respect to rental or franchise agreements). The 10% rate applies in all other cases.
(j) The 0% rate applies to interest paid to (or by) the government (or specified institutions), subject to further conditions.
(k) The 5% rate applies if the recipient of the dividends is a company (other than a partnership) that owns directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to other dividends. Silent partnership income is taxed at the domestic rate of 25%.
(l) The 0% rate applies to interest arising in Germany that is paid to the Mongolian government or a Mongolian bank.
(m) The 5% rate applies if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends. The 15% rate applies to other dividends.
(n) The 0% rate applies to interest paid on loans to the government, the central bank, a political subdivision or a local authority. The 10% rate applies in all other cases.
(o) The 0% rate applies to interest paid on loans to the government, the central bank, a political subdivision or a local authority, the Trade and Development Bank in Mongolia or the Industrial Development Bank of India or another recipient approved by the government. The 15% rate applies in all other cases.
(p) The 0% rate applies to interest paid on loans to the government or central bank. The 10% rate applies in all other cases.
(q) In November 2012, domestic legislation was passed to terminate this treaty, effective from 1 April 2015.
(r) The 0% rate applies if the recipient company holds at least 25% of the payer for a continuous period of 12 months preceding the date of the dividend. The 5% rate applies if the beneficial owner of the dividends is a company (other than a group of persons) that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies to all other dividends.
(s) The 0% rate applies if the beneficial owner of the dividends satisfies all of the following conditions:
   • It is a company, the capital of which is wholly or partly divided into shares.
   • It is a resident of the other contracting state.
   • It holds directly at least 10% of the capital of the company paying the dividend.
(t) The 0% rate applies to interest arising in the contracting state and derived by the government of the other contracting state or a political subdivision, local authority or the central bank thereof or a financial institution wholly owned by that government or by a resident of the other contracting state, with respect to a debt claim indirectly financed by the government of that contracting state, a local authority or the central bank thereof or a financial institution wholly owned by the government.
(u) Royalties may be taxed in the contracting state in which they arise and according to the laws of that state.
(v) The 0% rate applies to dividends paid by a company that is resident in a contracting state to the government of the other contracting state. The 5% rate applies if the beneficial owner of the dividends is a company that holds directly 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.

(w) The 5% rate applies to interest received by banks or similar financial institutions. The 10% rate applies in all other cases. Interest is exempt from tax under certain circumstances.

(x) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly 25% of the capital of the company paying the dividends. The 15% rate applies to all other dividends.

(y) The 10% rate applies if the interest is received by a financial institution (including an insurance company). The 15% rate applies in all other cases.

(z) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works. The 15% rate applies in all other cases.

(aa) The 0% rate applies to interest paid with respect to bonds, debentures or similar obligations of the government, political subdivisions, local authorities or the central bank. The 10% rate applies in all other cases.

(bb) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the company paying the dividends. The 15% rate applies to other dividends.

(cc) The 7% rate applies to interest paid to banks and other financial institutions. The 10% rate applies in all other cases.

(dd) Please consult treaty for further details.

(ee) In November 2012, domestic legislation was passed to terminate this treaty, effective from 1 January 2014.

(ff) In November 2012, domestic legislation was passed to terminate this treaty, effective from 1 January 2015.
Montenegro, Republic of

Please direct all inquiries regarding the Republic of Montenegro to Ivan Rakic (office telephone: +381 (11) 209-5794; mobile telephone: +381 (63) 635-690; fax: +381 (11) 209-5891; email: ivan.rakic@rs.ey.com) of the Belgrade, Serbia office.

The Union of Serbia and Montenegro ceased to exist on 25 May 2006. The following chapter provides information on taxation in the Republic of Montenegro only.

A. At a glance

Corporate Income Tax Rate (%) 9
Capital Gains Tax Rate (%) 9
Branch Tax Rate (%) 9
Withholding Tax (%)
  Dividends 9 (a)
  Interest 9 (b)
  Royalties from Patents, Know-how, etc. 9 (b)
  Capital Gains and Leasing Fees 9 (c)
  Consultancy, Market Research and Audit Fees 9 (c)
Net Operating Losses (Years)
  Carryback 0
  Carryforward 5

(a) This tax applies to resident and nonresident legal entities and individuals.
(b) This tax applies to nonresident legal entities and resident individuals. Interest paid to nonresident individuals is taxed under the Personal Income Tax Law at a rate of 5%. Royalties paid to resident and nonresident individuals are taxed under the Personal Income Tax Law at a rate of 9%.
(c) This tax applies to nonresident legal entities. Individuals are taxed under the Personal Income Tax Law at a rate of 9%.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in the Republic of Montenegro (RM) are subject to tax on their worldwide income. A company is resident in the RM if it is incorporated in the RM or if its central management and control is actually exercised in the RM. Nonresident companies are subject to tax only on their income derived from the RM. Nonresident companies are companies registered in other countries that have a permanent place of business in the RM.

Rate of corporate income tax. The rate of corporate income tax in the RM is 9%.

Tax incentives. Newly established companies in undeveloped municipalities, engaging in production activities, are exempt from corporate profit tax for a three-year period from the date of the commencement of their business activities.

The corporate profit tax liability of companies that have business units established in undeveloped municipalities that engage in production activities may be reduced proportionally based on the percentage of the business unit’s profit in the total profit of the
company. This tax relief can be claimed for a three-year period from the date of the incorporation of the business unit.

**Capital gains.** Capital gains derived from the disposal of real estate, industrial property rights, capital participations and shares and other securities (except certain bonds issued by government bodies or by the national bank) are included in taxable income and are subject to tax at the regular corporate income tax rate.

Capital gains may be offset by capital losses incurred in the same year, and net capital losses may be carried forward to offset capital gains in the following five years.

**Administration.** The tax year is the calendar year, except in the case of liquidation or the beginning of business activities during the year. A company may not elect a different tax year. Companies must file annual tax returns and pay tax due by 31 March of the year following the tax year.

**Dividends.** Resident companies include dividends received from its nonresident affiliates in taxable income.

Corporate and dividend taxes paid abroad may be claimed as a tax credit up to the amount of domestic tax payable on the dividends. Any unused amount of the tax credit for dividend taxes paid abroad can be carried forward to offset corporate income tax in the following five years. This tax credit applies only to dividends received by companies with a shareholding of 10% or more in the payer for at least one year before the date of submission of the tax return.

A 9% withholding tax is imposed on dividends paid to nonresidents.

An applicable double tax treaty may provide a reduced withholding tax rate for dividends (see Section F). To benefit from a double tax treaty, a nonresident must verify its tax residency status and prove that it is the true beneficiary of the income.

**Foreign tax relief.** Companies resident in the RM that perform business activities through permanent establishments outside the RM may claim a tax credit for corporate income tax paid in other jurisdictions. The credit is equal to the lower of the foreign tax and the Montenegrin tax paid on the foreign-source income.

C. Determination of trading income

**General.** The assessment is based on the profit or loss shown in the financial statements prepared in accordance with Montenegrin accounting regulations, subject to certain adjustments for tax purposes.

Taxable income is the positive difference between income and expenses. Dividend income of taxpayers is not included in the tax base if the payer of the dividend is a taxpayer according to the Montenegrin Corporate Profit Tax Law.

Tax-deductible expenses include expenses incurred in performing business activities. Expenses must be documented. Certain expenses, such as depreciation (see *Tax depreciation*) and donations, are deductible up to specified limits.
Inventories. Inventories must be valued using average prices or the first-in, first-out (FIFO) method.

Provisions. Legal entities may claim deductions for adjustments or write-offs of particular claims if such actions are in conformity with the law on accounting. This conformity exists if the following conditions are satisfied:
- It can be proved that the amounts were included previously in a taxpayer’s revenues.
- The claim is written off from the taxpayer’s accounting books as uncollectible.
- It can be proved that the claims could not be settled.

Long-term provisions made for renewal of the natural resources, possible costs payable in a guarantee period and expected losses on the basis of court disputes are recognized as expenses in accordance with the local accounting regulations. In addition, long-term provisions made by the banks are recognized as expenses up to the amount determined in the relevant banking regulations.

Severance payments that are calculated but not paid are deductible up to the amount determined in the Labor Law.

Tax depreciation. Intangible and fixed assets are divided into five groups, with depreciation and amortization rates prescribed for each group. A ruling classifies assets into the groups. Group I includes real estate.

The straight-line method must be used for Group I, while the declining-balance method must be used for the assets in the other groups.

The following are the depreciation and amortization rates.

<table>
<thead>
<tr>

<tr>
<td>III</td>
<td>20</td>
</tr>
<tr>
<td>IV</td>
<td>25</td>
</tr>
<tr>
<td>V</td>
<td>30</td>
</tr>
</tbody>
</table>

Relief for losses. Tax losses incurred in business operations may be carried forward for five years.

Loss carrybacks are not allowed.

Groups of companies. Under group relief provisions, companies in a group that consists only of companies resident in the RM may offset profits and losses for tax purposes. The group relief provisions are available if a parent company holds directly or indirectly at least 75% of the shares of subsidiaries. To obtain group relief, a group must file a request with the tax authorities. If group relief is allowed, the group companies must apply the group relief rules for five years. Each group company files its own annual income tax return and the parent company files a consolidated tax return based on the subsidiaries’ tax returns. Any tax liability after consolidation is paid by the group companies with taxable profits on a proportional basis.

D. Other significant taxes

The following table summarizes other significant taxes.
### Nature of tax

**Value-added tax (VAT),** on supplies of goods and services in the RM and on imports of goods; certain tax exemptions with or without the right to deduct input VAT are granted; VAT taxpayers are legal entities and entrepreneurs who had turnover of goods and services in excess of €18,000 in the preceding 12 months or who expect to have annual turnover greater than the threshold

<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard rate</td>
<td>17</td>
</tr>
<tr>
<td>Lower rate</td>
<td>7</td>
</tr>
</tbody>
</table>

**Property tax,** on rights in immovable property in the RM, including residential and business buildings, apartments, garages, buildings and rooms for resting and recreation, and other buildings; certain immovable property is exempt; tax credits are available for the dwellings of owners and their immediate families; the amount of tax due is determined by a tax authority’s Resolution, which should be issued by 31 May of the year for which the tax is rendered; the tax is payable in two installments, which are due on 30 June and 30 November; tax rate varies depending on the municipality in which the immovable property is located

- Transfer tax; imposed on the transfer of the immovable property located in Montenegro; the tax base equals the market value of the transferred property at the time of acquisition; the acquirer of the property is the taxpayer; the tax is due within 15 days after the date on which the tax authority’s Resolution determining the amount of tax due is issued
- Standard rate: 0.1 to 1

**Payroll taxes,** on monthly gross salaries

- Tax on income; paid by employee: 9
- Surtax on salary tax; paid by employer: 13/15
- Social security contributions (for health and pension/disability funds); paid by
  - Employer: 9.3
  - Employee: 23.5

### E. Miscellaneous matters

**Foreign-exchange controls.** The official currency in the RM is the euro (€).

Capital transactions (investments), current foreign-exchange transactions and transfers of property to and from the RM are generally free. The only limitation refers to the amount that could be physically brought into or out of the RM (€10,000). Resident legal entities must maintain evidence of their capital and current transactions with nonresident entities and inform the central bank of such transactions during a year by 15 March of the following year.

**Transfer pricing.** Under general principles, transactions between related parties must be made on an arm’s length basis. The difference
between the price determined by the arm’s length principle and the taxpayer’s transfer price is included in the tax base.

### F. Treaty withholding tax rates

Montenegro became an independent state in June 2006. The government has rendered a decision that it will recognize tax treaties signed by the former Union of Serbia and Montenegro and both former Yugoslavias until new tax treaties are signed. The following table lists the withholding tax rates under the treaties of the former Union of Serbia and Montenegro and under the treaties of the former Yugoslavias that remain in force. It is suggested that taxpayers check with the tax authorities before relying on a particular tax treaty.

</table>
(a) The application of the treaty with India is currently suspended in Montenegro as a result of India not recognizing the application of the treaty.

(b) This treaty enters into force on 1 January 2013.

Montenegro has signed a tax treaty with Austria, which is expected to be ratified by the end of 2012 and enter into force on 1 January 2013. It is negotiating tax treaties with Azerbaijan and Qatar.

(a) The corporate income tax rate is 37% for banks, financial institutions and insurance companies. A reduced rate of 15% applies to small companies with turnover under MAD 3 million, excluding VAT. A 10% rate applies to such companies with income under MAD 200,000. The Casablanca Finance City regime provides a 10% rate for regional or international head offices.

(b) See Section B.

(c) The dividend withholding tax is a final tax for nonresidents. Withholding tax does not apply to dividends paid to Moroccan companies subject to Moroccan corporate tax if a property attestation (a certificate containing the company’s tax number and attesting that the company is the owner of the shares) is delivered by the beneficiary company.

(d) The 10% rate applies to interest paid to nonresidents on loans or other fixed-interest claims. The 10% tax is a final tax. The 20% rate applies to interest paid to resident companies and interest paid to resident self-employed individuals in connection with a business conducted by the recipient. The 20% tax may be credited by recipients against their total income tax. The 30% rate applies to interest payments made to resident individuals if the payments are unrelated to a business conducted by the recipient. The 30% tax is a final withholding tax.

(e) This is a final tax applicable only to nonresidents. Effective from 1 January 2011, rental and maintenance of aircraft used for international transport are exempt from this withholding tax.
(f) This withholding tax applies only to payments to persons who are not salaried employees and do not hold a special function in the company paying the indemnities. The rate is 17% for teachers.

B. Taxes on corporate income and gains

Corporate income tax. The following companies are subject to corporate income tax:

- Resident companies (those incorporated in Morocco)
- Nonresident companies deriving taxable income from activities carried out in Morocco
- Nonresident companies deriving capital gains from sales of unlisted shares and bonds in Morocco (unless a double tax treaty between Morocco and the residence country of the beneficiary provides otherwise)
- Branches of foreign companies carrying on business activities independent of those performed by their head office

In general, only Moroccan-source income is subject to tax unless a provision of a double tax treaty provides otherwise.

Rates of tax. The regular corporate tax rate is 30% of taxable income. Banks, financial institutions and insurance companies are subject to tax at a rate of 37%. A reduced rate of 15% applies to small companies with turnover under MAD 3 million, excluding VAT. A 10% rate applies to such companies with income under MAD 200,000. The Casablanca Finance City regime provides a 10% rate for regional or international head offices.

In general, the minimum tax is the greater of MAD 1,500 or 0.5% of the total of the following items:

- Turnover from sales of delivered goods and services rendered
- Other exploitation income (for example, directors’ fees received when the company acts as an administrator of another company, revenues from buildings that are not used in the company’s activities and profits and transfers of losses with respect to shared operations)
- Financial income (excluding financial reversals and transfers of financial expenses)
- Subsidies received from the state and third parties

However, the rate of minimum tax is reduced to 0.25% for sales of petroleum goods, gasoline, butter, oil, sugar, flour, water and electricity. The minimum tax is imposed if it exceeds the corporate income tax calculated using the 30% rate or if the company incurs a loss. New companies are exempt from minimum tax for 36 months after the commencement of business activities.

For regional or international head offices benefiting from the Casablanca Finance City regime, the minimum tax is 5% of the total operating expenses.

Nonresident contractors may elect an optional method of taxation for engineering, construction or assembly work or for work on industrial or technical installations. Under the optional method, an 8% tax is applied to the total contract price including the cost of materials, but excluding value-added tax (VAT).

If the remittance of branch profits can be directed by the head office, a 10% withholding tax is imposed on branch profits after deduction of corporate income tax.
Morocco offers the same tax incentives to domestic and foreign investors. Various types of companies benefit from tax exemptions and tax reductions, which are summarized below.

Permanent exemptions. Permanent tax exemptions are available to cattle-farming enterprises (until 2013), and cooperatives with annual turnover of less than MAD 5 million, excluding VAT. However, these organizations do not benefit from the 100% rebate for dividends and are not exempt for profits on transfers of shares.

Capital risk companies are exempt from corporate income tax on profits derived within the scope of their activities (these are profits related to purchases of companies’ shares that support such companies’ development and the sales of such shares thereafter).

Total exemption followed by permanent reduction. Export companies are exempt from corporate income tax on their profits related to their export turnover during the first five years following their first export transaction. These companies benefit from a reduced rate of 17.5% in subsequent years. This exemption no longer applies to exporters of recovery metals. For service exportation, the related turnover must be generated in foreign currency that is properly repatriated.

Hotel companies benefit from a tax exemption and a tax reduction with respect to their profits corresponding to their foreign currency revenues that are generated by their hotels and are remitted to Morocco either directly or through travel agencies. Hotel companies are fully exempt from tax on such profits for the first five years following their first foreign currency sale operation, and they benefit from a reduced rate of 17.5% on such profits in subsequent years. Management companies of “real estate residences for tourism promotion” also benefit from this measure, under the same conditions. A “real estate residence for tourism promotion” is a residence assimilated to a hotel in which the housing units belong to one or more owners and of which a minimum percentage of the housing units (fixed by regulations at 70%) is managed by a licensed management company for at least 9 years.

The Casablanca Finance City regime provides to service provider companies a 5-year tax exemption and an 8.75% tax rate after the fifth year for a period of 20 years.

Permanent reductions. Mining companies, including those that sell products to export companies, benefit from a reduced corporate income tax rate of 17.5%.

A 15% rate is granted to companies that have turnover of MAD 3 million or less, excluding VAT.

A 10% rate applies to regional or international head offices that benefit from the Casablanca Finance City regime.

Companies established in the area of Tangier benefit from a reduced corporate income tax rate of 17.5% and a 50% reduction in professional tax and local services tax (for details regarding the last two taxes, see Section D). This regime cannot be combined with any other tax benefits.

Effective from 1 January 2011, the corporate income tax rate applicable to companies established in the Tangier area will increase.
by 2.5% each year until the 2015 fiscal year when the applicable rate will be 30%.

**Total exemption followed by temporary reduction.** Export companies established in Moroccan free zones (zones franches) are exempt from corporate income tax for the first 5 years of activity and are subject to corporate income tax at a rate of 8.75% for the following 20 years.

**Temporary exemption.** Agricultural enterprises are exempt from all taxes until 2013.

Companies holding a hydrocarbon exploration and exploitation permit are exempt from corporate income tax for 10 years from the beginning of hydrocarbon regular production.

Subject to certain conditions, real estate developers benefit from a total exemption from corporate income tax and other taxes with respect to construction programs for social housing under agreements entered into with the government. This temporary regime applies from 1 January 2010 through 31 December 2020.

**Temporary reduction.** Companies, other than permanent establishments of foreign companies, banks and insurance companies, benefit from a reduced corporate income tax rate of 17.5% for the first five years of operations if they are located in economic areas that are specified by decree as being in a developmental stage. After the five-year period, the standard corporate income tax rate (currently, 30%) applies. The following are the specified areas:

- Al Hoceima
- Berkane
- Boujdour
- Chefchaouen
- Guelmim
- Jerada
- Laâyoune
- Larache
- Nador
- Oued-ed-Dahab
- Oujda-Angad
- Smara
- Tan-Tan
- Taounate
- Taourirt
- Tata
- Taza
- Tétouan

Effective from 1 January 2011, the corporate income tax rate applicable to companies established in the above areas will increase by 2.5% each year until the 2015 fiscal year when the applicable rate will be 30%.

Handicraft companies, private schools and educational institutes benefit from a reduced corporate income tax rate of 17.5% for their first five years of operations.

Banks and holding companies located in offshore zones benefit from a reduction in corporate income tax for the first 15 years of operation. Banks may elect to pay a minimum corporate income
tax of US$25,000 or pay tax at a reduced rate of 10%. Holding companies pay a flat tax of US$5,000 per year.

**Capital gains.** Capital gains on the sale of fixed assets are taxed at regular corporate tax rates.

Nonresident companies are taxed on profits derived from sales of unlisted shares of Moroccan companies at a rate of 30%, unless a double tax treaty between Morocco and the residence country of the beneficiary provides otherwise. In addition, they must file an income declaration before the end of the month following the month in which the sales occurred.

Special rules apply to mergers and liquidations of companies (see Section E).

**Administration.** Within three months after the end of their financial year, companies must file a corporate income tax return with the inspector of direct taxes for the district in which their company headquarters are located. The companies’ financial statements must be enclosed with the return.

Companies must make advance payments of corporate income tax. For companies with a 31 December year-end, the payments must be made by 31 March, 30 June, 30 September and 31 December. Each payment must be equal to 25% of the previous year’s tax.

If the minimum tax does not exceed MAD 1,500, it is fully payable in one installment. Payment of the minimum tax exceeding this amount is made in accordance with the rules applicable to the corporate income tax.

**Dividends.** Dividends are generally subject to a 10% withholding tax. However, withholding tax does not apply to dividends paid to Moroccan companies subject to Moroccan corporate tax if a property attestation is delivered by the beneficiary company. Such companies are also exempt from corporate income tax on the dividends.

**Foreign tax relief.** Foreign tax relief is granted in accordance with the provisions of Morocco’s double tax treaties and the Moroccan Tax Code.

**C. Determination of trading income**

**General.** The computation of taxable income is based on financial statements prepared according to generally accepted accounting principles, subject to modifications provided in the Moroccan Tax Code.

Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Interest paid on shareholders’ loans in excess of the interest rate determined annually by the Ministry of Finance or on the portion of a shareholder’s loan exceeding the amount of capital stock that is fully paid up. No interest on shareholders’ loans is deductible if the capital stock is not fully paid up.
- Certain specified charges, gifts, subsidies and penalties.

The tax base for coordination centers (centers de coordination) is equal to the sum of the following:
Ten percent of their operating expenses

Their income derived from noncurrent operations, such as sales of goods and services, and investments in securities

**Inventories.** Inventory is normally valued at the lower of cost or market value. For non-identifiable goods, cost must be determined by a weighted-average cost-price method or the first-in, first-out (FIFO) method.

**Provisions.** Provisions included in the financial statements are generally deductible for tax purposes if they are established for clearly specified losses or expenses that are probably going to occur.

Provisions on bad debts are deductible if a court action is instituted against the debtor within 12 months after the booking of the provision.

**Depreciation.** Land may be amortized only if it contributes to production (for example, mining lands). Other fixed assets may be depreciated using the following two methods:

- The straight-line method at rates generally used in the sector of the activity.
- A declining-balance method with depreciation computed on the residual value by applying a declining coefficient that ranges from 1.5 to 3 and that is linked to the term of use. The declining-balance method may not be used for cars and buildings.

The following are some of the applicable straight-line rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial and industrial buildings</td>
<td>4 or 5</td>
</tr>
<tr>
<td>Office equipment</td>
<td>10 to 15</td>
</tr>
<tr>
<td>Motor vehicles (for vehicles used in tourism, the maximum depreciable value is MAD 300,000 including VAT)</td>
<td>20 to 25</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10 to 15</td>
</tr>
</tbody>
</table>

Certain intangible assets, such as goodwill, do not depreciate over time or by use and, consequently, are not amortizable.

**Relief for tax losses.** Losses may be carried forward for four years; losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

**Groups of companies.** Moroccan law does not provide for the financial integration of Moroccan companies equivalent to a consolidated filing position.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>

Professional tax, on gross rental value of the business premises 10 to 30
Local services tax; annual tax on the rental value for professional tax purposes 6.5/10.5
Registration duties, on transfers of real property or businesses 1 to 6
Professional training tax, on gross salaries including fringe benefits 1.6
Social security contributions, paid by employer For family allowances, on gross monthly remuneration (no maximum limit of remuneration applies) 6.4
For illness and pregnancy, on gross monthly remuneration, up to a maximum remuneration of MAD 6,000 a month 8.6
For required medical care 3.5
Contribution to support social cohesion (la contribution pour l’appui à la cohésion sociale); effective for fiscal years beginning on or after 1 January 2013; payable by companies, public institutions, associations and other similar organizations, funds liable to corporation tax, coordination centers and other legal entities; contribution calculated on the basis of net income (profit after tax); amount of the contribution is deductible in calculating taxable income; the tax return for the contribution together with the payment of the contribution must be submitted within three months after the end of the fiscal year
Amount of net income between MAD 15 million and MAD 25 million 0.5
Amount of net income between MAD 25 million and MAD 50 million 1
Amount of net income between MAD 50 million and MAD 100 million 1.5
Amount of net income over MAD 100 million 2

E. Miscellaneous matters

Foreign-exchange controls. Remittances of capital and related income to nonresidents are guaranteed. No limitations are imposed on the time or amount of profit remittances. The remittance of net profits on liquidation, up to the amount of capital contributions, is guaranteed through transfers of convertible currency to the Bank of Morocco.

As a result of the liberalization of foreign-exchange controls, foreign loans generally do not require an authorization from the exchange authorities. However, to obtain a guarantee for the remittance of principal and interest, notes are commonly filed at the exchange office, either through the bank or directly by the borrower. In general, if the loan’s conditions are equivalent to those prevailing in foreign markets, the exchange office approves the loan agreement. The loan agreement must be filed with the exchange office as soon as it is established.
To promote exporting, Moroccan law allows exporters of goods or services to hold convertible dirhams amounting to 50% of repatriated currency. Exporters must spend these convertible dirhams on professional expenses incurred abroad. Such expenses must be paid through bank accounts of convertible dirhams, called “Convertible Accounts for the Promotion of Export” (Comptes Convertibles de Promotion des Exportations).

Mergers and liquidations. The Moroccan Tax Code provides two types of taxation for mergers, which are the common tax regime and the specific regime.

Under the common tax regime, the absorbed company is subject to tax on all profits and capital gains relating to the merger and on the profits realized between the beginning of the fiscal year and the effective date of the merger.

The specific regime allows deferred taxation of profit related to goodwill and land if certain conditions are met.

The 2010 Finance Bill instituted a temporary regime, which applies from January 2010 through December 2012 (under the draft 2013 Finance Bill, this regime will be extended until December 2016). In addition to the incentives provided by the specific regime, the temporary regime provides other incentives such as an exemption for profits derived from share transfers at the level of the shareholders. The temporary regime also applies to total scissions of companies.

Liquidations of companies trigger immediate taxation in accordance with the tax rules described above and, if applicable, a 10% withholding tax on liquidation profit called “Boni de liquidation.” The “Boni de liquidation” is the balance of assets that remains for shareholders on the liquidation of a company after settlement of all liabilities, and the reimbursement of the share capital and reserves aged more than 10 years.

(a) No withholding tax is imposed in France if the recipient is subject to tax on the dividend in Morocco.
(b) Tax is payable in the country in which the recipient is domiciled.
(c) The 7% rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 25% of the capital of the payer of the dividends. The higher rate applies to other dividends.
(d) The Maghreb Arab Union countries are Algeria, Libya, Mauritania, Morocco and Tunisia.
(e) Under Moroccan domestic law, the withholding tax rate for dividends and interest is 10%. Consequently, for dividends and interest paid from Morocco, the treaty rates exceeding 10% do not apply.
(f) The 5% rate applies if the beneficiary of the dividends holds more than US$500,000 of the capital of the payer of the dividends. The 10% rate applies to other dividends.
(g) The 5% rate applies if the beneficiary of the dividends holds directly at least 10% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
(h) The 5% rate applies if the beneficiary of the dividends is a company that holds directly at least 10% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
(i) The 5% rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
(j) The 6.5% rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies to other dividends.

Morocco has signed tax treaties with Côte d’Ivoire, Gabon, Greece, Indonesia, Jordan, Latvia, Oman, Pakistan, Singapore, Syria, Vietnam and Yemen, but these treaties have not yet been ratified.

A. At a glance

- Corporate Income Tax Rate (%): 32
- Capital Gains Tax Rate (%): 32
- Branch Tax Rate (%): 32 (a)
- Withholding Tax (%): 10/20 (b)
  - Dividends: 10/20 (b)
  - Interest: 20
  - Royalties: 20
  - Technical Services: 10/20 (c)
- Net Operating Losses (Years):
  - Carryback: 0
  - Carryforward: 5

(a) Income earned by nonresident companies or other entities without a head office, effective management control or a permanent establishment in Mozambique is generally subject to withholding tax at a rate of 20% (see Section B).
(b) The 10% rate applies to dividends paid on shares listed on the Mozambique Stock Exchange.
(c) The 10% rate applies to fees paid with respect to the rendering of telecommunication or international transport services and the chartering of fishing vessels and vessels used in coasting activities.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax (IRPC) is levied on resident and nonresident entities.

Resident entities. Resident entities are companies and other entities with their head office or effective management and control in Mozambique. Resident companies, including unincorporated entities, whose main activity is commercial, industrial or agricultural, are subject to IRPC on their worldwide income, but a foreign tax credit may reduce the amount of IRPC payable.

Nonresident entities. Companies and other entities operating in Mozambique through a permanent establishment are subject to IRPC on the profits attributable to the permanent establishment.

Companies and other entities without a permanent establishment in Mozambique are subject to IRPC on income deemed to be obtained in Mozambique.

Tax rates. The standard corporate income tax rate is 32%.
Income earned by nonresident companies or other entities without a head office, effective management control or a permanent establishment in Mozambique is generally subject to withholding tax at a rate of 20%. However, the rate is reduced to 10% for income derived from the rendering of telecommunication or international transport services, the assembling and installation of equipment and the chartering of fishing vessels and vessels used in coasting activities. Income that is subject to a 20% withholding tax includes, but is not limited to, the following:

- Income derived from the use of intellectual or industrial property and the providing of information in the industrial, commercial or scientific sectors
- Income derived from the use of, or the assignment of, rights to industrial, commercial or scientific equipment
- Income from the application of capital
- Income from the rendering of any services realized or used in Mozambique

**Tax incentives.** Mozambique offers various tax incentives to investors, which are summarized below.

The tax incentives described in the following three paragraphs are available for five tax years beginning with the tax year in which the company commences activities within the scope of an investment project approved by the Investment Promotion Centre.

Companies implementing investment projects benefit from the following main incentives:

- Tax credit for investment that ranges from 5% to 10%, depending on the location of the project
- Tax deductions ranging from 5% to 10% of the taxable income for investments with acquisition of state-of-the-art technology and training of Mozambican employees
- Tax deductions of up to 110% of investments for the construction and rehabilitation of public infrastructure
- Accelerated depreciation of buildings and equipment by increasing the normal rates by 50%

Companies implementing investment projects are also exempt from import duties and value-added tax on the importation of equipment classified as Class K in the Customs Manual.

Special tax incentives may be granted to the following projects:

- Projects in agriculture and tourism
- Projects with respect to basic infrastructure
- Projects located in Special Economic Zones
- Projects located in Industrial Free Zones
- Manufacturing

Special tax rules apply to manufacturing units that intend to operate under an Industrial Free Zone (IFZ) regime or in a Special Economic Zone. The main requirements for the IFZ regime are that at least 70% of production is exported and that a minimum of 250 workplaces are created. The government establishes the Special Economic Zones, which provide benefits similar to those of IFZs.

**Administration.** The tax year is the calendar year. However, companies may apply to the tax authorities for a different year-end.
Companies must make two types of provisional payments of corporate income tax. The two types are known as advance payments and special advance payments. The advance payments are made in three equal monthly installments in May, July and September of the tax year to which the tax relates. The total amount of these payments equals 80% of the tax assessed in the preceding year. The special advance payments are made in three equal monthly installments, in June, August and October. They equal the difference between 0.5% of the company’s turnover and the total of advance payments made in the preceding tax year. The minimum amount of the special advance payments is MT 30,000, while the maximum amount of such payments is MT 100,000. Companies that have adopted a tax year other than the calendar year make advance payments in the 5th, 7th and 9th months of the tax year and make special advance payments in the 6th, 8th and 10th months of the tax year.

**Dividends.** Dividends are subject to a 20% withholding tax, except for dividends on shares listed on the Mozambique Stock Exchange, which are subject to a 10% final withholding tax.

**Foreign tax relief.** Foreign-source income derived by resident entities is taxable in Mozambique. However, foreign tax may be credited against the Mozambican tax liability up to the amount of IRPC allocated to the income taxed abroad. Foreign tax credits may be carried forward for five years.

**C. Determination of trading income**

**General.** Taxable income is determined according to the following rules:

- For companies with a head office or effective management control in Mozambique that are mainly engaged in commercial, agricultural or industrial activities, taxable income is the net accounting profit calculated in accordance with Mozambican generally accepted accounting principles, adjusted according to the tax norms.
- For companies with a head office or effective management control in Mozambique that do not mainly engage in commercial, industrial or agricultural activities, taxable income is the net total of revenues from various categories of income as described in the Individual Income Tax (IRPS) Code, less expenses.

Expenses that are considered essential for the generation of profits or the maintenance of the production source are deductible for tax purposes. Nondeductible expenses include, but are not limited to, the following:

- Undocumented expenses (taxed separately at a rate of 35%)
- 50% of the rent paid by a lessee that is intended to be applied towards the purchase price of the leased asset

Premiums paid for health, accident and life insurance and contributions to pension funds and other complementary social security schemes are deductible for tax purposes up to 10% of the salary fund. If the employees do not have the right to social security pensions, this limit can be increased to 20%.

**Inventories.** Inventories must be valued consistently by any of the following criteria:

- Cost of acquisition or production
• Standard costs in accordance with adequate technical and accounting principles
• Cost of sales less the normal profit margin
• Any other special valuation that receives the prior authorization of the tax authorities

Changes in the method of valuation must be justifiable and acceptable to the tax authorities. Any profits resulting from such a change are taxable.

Provisions. Provisions for the following items are deductible up to amounts considered reasonable by the tax authorities:
• Doubtful accounts as a percentage of accounts receivable
• Inventory losses
• Obligations and expenses that are subject to a judicial process
• Other provisions imposed by the central bank or General Insurance Inspection (the body that inspects insurance activities) for specific activities

Depreciation. In general, depreciation is calculated using the straight-line method. Maximum depreciation rates are fixed by law for general purposes and for certain specific industries. If rates below 50% of the official rates are used, the company cannot claim total allowable depreciation over the life of the asset. The following are some of the maximum straight-line depreciation rates fixed by law.

<table>
<thead>
<tr>

E. Foreign-exchange controls
The central bank controls all transfers of capital (including direct investments) and payments into and out of Mozambique. An
authorization from the central bank is required for the maintenance of local foreign-currency bank accounts. Service agreements with nonresident entities are subject to registration with the central bank.

In general, the repatriation of profits, dividends and proceeds from the sale or liquidation of an investment is permitted for approved foreign-investment projects if the investment has been registered and compliance with other requirements exists.

(a) These rates apply to an effective beneficiary of the income that does not have a permanent establishment in Mozambique.

(b) The 8% (10% under the Botswana treaty) rate applies if the effective beneficiary of the dividends is a company that holds at least 25% of the share capital of the company distributing the dividends. The 10% (12% under the Botswana treaty) rate applies if the effective beneficiary of the dividends is a company that holds less than 25% of the share capital of the company distributing the dividends. The 15% rate applies to other dividends.

(a) This is a final tax applicable to nonresidents. Dividends paid to nonresidents are subject to a final 10% withholding tax if the recipient of the dividend is a company that holds at least 25% of the capital of the company paying the dividend and if it is the beneficial owner of the shares. For all other cases, the dividend withholding tax rate is 20%. Dividends paid out of oil and gas profits are exempt from withholding tax.

(b) This withholding tax applies to interest paid to all persons, excluding Namibian companies, by Namibian banking institutions and Namibian unit trust schemes.

(c) This withholding tax applies to nonresidents. The rate is determined by applying the regular corporate tax rate of 34% to a deemed taxable profit of 30% of gross royalties.

(d) In the absence of treaty protection, the 10% dividend withholding tax may be imposed on branch profits when the parent company declares a dividend.

(e) The withholding tax on services applies to amounts paid by Namibian residents to nonresidents directly or indirectly for the following:
  - Management, administrative, technical or consulting services
  - Directors’ fees
  - Fees paid for entertainment including payments for cabaret, motion picture, radio, television, theatre artists, musicians and sportspersons

B. Taxes on corporate income and gains

Corporate income tax. Companies subject to tax include companies registered in Namibia and branches of foreign companies in
Namibia deriving income from a Namibian source. Other associations (such as close corporations) registered or incorporated outside Namibia that carry on business or have an office in Namibia are taxed as companies. Corporate income tax is levied primarily on income from Namibian sources.

Rates of tax. The rate of tax for companies, other than those companies that have been awarded manufacturing status, is 34%. The tax rate for companies that have been awarded manufacturing status is 18% for their first ten years of registration as a manufacturer and 34% thereafter. The Receiver of Revenue, in consultation with the Ministry of Trade and Industry, reviews and approves applications to register as manufacturers. Approval is granted only if the company is engaged in manufacturing and if its activities economically benefit Namibia or its inhabitants (see Section C for information regarding special deductions available to registered manufacturers).

Mining companies are taxed at a rate of 37.5% for hard-rock mining and 55% for diamond mining. Companies that render hard-rock mining services are taxed at a rate of 37.5%, effective from 1 January 2008. Companies that render diamond mining services are taxed at a rate of 55%. Petroleum exploration and production companies are taxed at a rate of 35% or according to a special formula in certain cases.

Under the Export Processing Zone Act, an export processing zone has been established in Walvis Bay. Companies operating in the zone are exempt from corporate income tax. Value-added tax, transfer duty and stamp duty are not imposed in the zone.

Capital gains. Capital gains tax is not imposed in Namibia.

Administration. Annual financial statements must be prepared as of the last day of February, unless another date is agreed to by the tax authorities. In practice, permission to use the company’s financial year-end is always granted. A company’s tax year generally coincides with its financial year.

A company is required to make two provisional tax payments, the first payment six months after the start of the financial year and the second at the end of the year. Payments must be based on an estimate of the current year’s taxable income and must be accurate to within 80% of the actual tax liability for the year for which the payment is due. A penalty for underestimation of the first or second provisional tax payment is imposed if the respective payments are less than the minimum payment required.

Companies must file an annual return within seven months after the tax year-end unless an extension is obtained. If the total provisional tax payments are less than the tax liability shown on the return, the balance of tax due must be paid within seven months after the end of the tax year, regardless of whether a company has obtained an extension to file its tax return. Interest accrues at a rate of 20% per year on any unpaid tax liability.

Dividends. Dividends received by a company are exempt from the regular company tax, and expenses incurred in the production of dividend income are not deductible in the determination of the company’s taxable income. Dividends paid to nonresidents are
subject to a final 10% withholding tax if the recipient of the dividend is a company that holds at least 25% of the capital of the company paying the dividend and if it is the beneficial owner of the shares. For all other cases, the dividend withholding tax rate is 20%. Dividends paid out of oil and gas profits or long-term insurance business profits are not subject to dividend withholding tax. A tax treaty may reduce the rate of dividend withholding tax.

**Foreign tax relief.** In the absence of treaty provisions, a unilateral tax credit is available for foreign direct and withholding taxes paid on dividends and royalties. The credit may not exceed the Namibian tax attributable to such income. The credit is denied to the extent that a refund of the foreign tax is possible.

**C. Determination of trading income**

**General.** Taxable income includes both trade and nontrade income (interest) not of a capital nature. Revenue amounts and realized foreign-exchange gains are subject to tax. Taxable income rarely coincides with profit calculated in accordance with accepted accounting practice.

To be eligible for deduction, expenditures must be incurred in the production of taxable income in Namibia, must be for purposes of trade and must not be of a capital nature. However, realized foreign-exchange losses are deductible even if they are of a capital nature.

Scientific research expenditures are deductible if the research is undertaken for the development of business or is contributed to an institution approved by the Council for Scientific and Industrial Research.

**Special deductions.** The following special deductions are available to registered manufacturers:

- An additional deduction of 25% of the wages paid to their manufacturing staffs
- An additional deduction of 25% of approved training expenses for their manufacturing staffs
- An additional deduction of 25% of export marketing expenses
- An additional deduction of 25% of expenses incurred to transport by road or rail raw materials and equipment used in the manufacturing activity for the first 10 tax years as a manufacturer

Losses resulting from these special deductions may not be used to offset other income.

Taxable income derived from exports of manufactured goods, excluding fish and meat products, is reduced by 80% if the goods are manufactured in Namibia. This allowance is available to trading houses and manufacturers. For manufacturers, this allowance applies in addition to the special deductions listed above. For the first 10 years of operation, the tax rate for registered manufacturers that export all goods manufactured is 3.6%. After the 10-year period, the rate increases to 6.8%.

**Inventories.** Trading stock includes all goods, materials or property acquired for manufacture or sale, including packaging but excluding consumables and machinery parts. The value of stock is based on original cost plus the costs of preparing stock for sale.
The last-in, first-out (LIFO) method of stock valuation may be applied on approval by the Minister of Finance, subject to various conditions.

**Provisions.** Deductible expenses must be actually incurred, and consequently, provisions are not deductible. However, an allowance for doubtful accounts may be established equal to 25% of the debts that the Minister of Finance is satisfied are doubtful. The amount of irrecoverable debts written off is allowed as a deduction if the debts were once included as taxable income or if the write-off can be construed as an operating loss incurred in the production of income (for example, the write-off of casual loans to staff members who are unable to repay).

**Tax depreciation (capital allowances)**

*Machinery, equipment and vehicles.* The cost of machinery, motor vehicles, utensils, articles, ships and aircraft may be deducted in three equal annual amounts, beginning in the year of acquisition. No amount may be deducted in the year of disposal of the asset.

*Buildings.* An initial allowance of 20% of construction cost is permitted for commercial buildings in the year the buildings are first used. An allowance of 4% is permitted in each of the following 20 years. For industrial buildings of a registered manufacturer, an initial allowance of 20% and an annual allowance of 8% are allowed. No allowance is granted for employee housing.

*Patents, designs, trademarks and copyrights.* If used in the production of income, the cost of developing, purchasing or registering patents, designs, trademarks, copyrights and similar property is allowed in full if such cost is not more than N$200, or the cost can be amortized over the estimated useful life if more than N$200. The period of write-off may not exceed 25 years.

*Mining including oil and gas.* Prospecting and development expenses incurred in mining operations are not subject to the tax depreciation rules described above. In general, prospecting expenses may be deducted in the year production begins. Costs incurred on infrastructure may be deducted over three years, beginning in the year production begins.

**Recapture.** Capital allowances are generally subject to recapture to the extent the sales proceeds exceed the tax value after depreciation. In addition, capital allowances are recaptured if assets are withdrawn from a business or removed from Namibia, regardless of whether the assets are sold. The market value of the assets is used to determine the amount recaptured if no proceeds are received.

**Relief for trading losses.** Companies may carry forward unused losses indefinitely to offset taxable income in future years if they carry out a trade. Losses may not be carried back. Companies that carry on mining operations may offset current-year and prior-year trading losses from mining against other trade income and vice versa. However, such losses must be apportioned on a pro rata basis between mining and other trade income to determine taxable income from each source in the current year. Oil and gas companies may not offset losses from oil and gas activities against other trade income, or vice versa, in any year.
Groups of companies. A group of companies is not taxed as a single entity in Namibia, and an assessed loss of one company cannot be offset against the taxable income of another company in the group. An assessed loss of a branch of a foreign company may be transferred to a Namibian subsidiary under certain circumstances.

D. Value-added tax

Value-added tax (VAT) is levied on supplies of goods or services, other than exempt supplies, made in Namibia and on imports of goods and certain services.

The standard VAT rate is 15%. The following items are zero-rated:
• Exports of goods
• Certain services rendered to nonresidents who are not registered for VAT
• Disposals of going concerns
• Local supplies of fuel levy goods (petrol and diesel)
• Maize meal, fresh or dried beans, sunflower cooking oil, fried animal fat used for the preparation of food, bread and bread or cake flour, if these items are not served as cooked or prepared food, fresh milk and white or brown sugar

Local public passenger transport, medical services, services supplied by registered hospitals, educational services and long-term residential rentals are exempt from VAT.

E. Miscellaneous matters

Exchange controls. Namibia is a member of the Common Monetary Area, which also includes Lesotho, South Africa and Swaziland. Consequently, it is subject to the exchange control regulations promulgated by the Reserve Bank of South Africa. If Namibia withdraws from the Common Monetary Area, it is likely to introduce its own exchange control restrictions along similar lines.

Exchange controls are administered by the Bank of Namibia, which has appointed various commercial banks to act as authorized foreign-exchange dealers.

The Namibian dollar (N$) is the Namibian currency. The Namibian dollar (N$) and the South African rand (R) are convertible one for one (that is, R1=N$1), and this rate does not fluctuate.

Debt-to-equity rules. The tax law includes measures that counter thin capitalization by adjusting both the interest rate and the amount of the loan based on arm’s length principles. Although no guidelines have been published in this area, a debt-to-equity ratio of up to 3:1 is generally acceptable.

Transfer pricing. The Namibian Income Tax Act includes transfer-pricing measures, which are designed to prevent the manipulation of prices for goods and services, including financial services (loans), in cross-border transactions between related parties.

Antiavoidance legislation. Namibian legislation contains a general antiavoidance provision to attack arrangements that are primarily tax-motivated and, in certain respects, abnormal when considered in the context of surrounding circumstances. In general, the Bank of Namibia requires a debt-to-equity ratio of 3:1 when approving foreign investment into Namibia. Another antiavoidance provision
deals with transactions involving companies (including changes in shareholdings) that are designed to use a company’s assessed loss, usually by diverting income to, or generating income in, that company.

F. Treaty withholding tax rates

Namibia has entered into double tax treaties with Botswana, France, Germany, India, Malaysia, Mauritius, Romania, the Russian Federation, South Africa and Sweden. In addition, it has a treaty with the United Kingdom, which is the 1962 treaty between the United Kingdom and South Africa as extended to Namibia.

The treaties provide for withholding tax rates on dividends, interest and royalties paid to residents of the other treaty countries as indicated in the following table.

</table>

(a) The 5% rate applies if the recipient is a company that owns at least 10% of the payer of the dividends. The 15% rate applies to other dividends.

(b) The 10% rate applies if the recipient is a company that owns at least 10% of the payer of the dividends. The 15% rate applies to other dividends.

(c) The 5% rate applies if the recipient owns at least 25% of the payer of the dividends. The 10% rate applies to other dividends.

(d) The 5% rate applies if the recipient is a company that owns at least 25% of the payer of the dividends and has invested at least US$100,000 in the share capital of the payer. The 10% rate applies to other dividends.

(e) The 5% rate applies to royalties paid for patents, secret formulas or information relating to industrial or scientific experience. The 15% rate applies to other royalties.

(f) The 5% rate applies if the recipient is a company that controls directly or indirectly more than 50% of the voting power of the payer of the dividends. The 15% rate applies to other dividends.

(g) A 10% withholding tax is imposed on interest paid to all persons, excluding Namibian companies, by Namibian banking institutions, Namibian unit trust schemes and the Namibia Post Office Savings Bank.

(h) The 15% rate applies to payments for administrative, technical, managerial or consultancy services performed outside Namibia.

(i) The 10% rate applies to technical, managerial or consultancy fees paid by Namibian residents.

(j) The 5% rate applies to technical, managerial or consultancy fees paid by Namibian residents.

Namibia has a signed tax treaty with Canada, but the treaty has not yet been ratified. Namibia is negotiating tax treaties with Lesotho, Seychelles, Spain, Zambia and Zimbabwe.

(a) A tax rate of 20% applies to the first €200,000 of taxable income. An effective tax rate of 5% is available for income related to certain intellectual property (Innovation Box). For details regarding the Innovation Box, see Section B.
(b) This rate may be reduced to 0% if the recipient is a parent company established in a European Union (EU) member state or European Economic Area (EEA) state. In addition, this rate is typically reduced under the extensive Dutch tax treaty network (see Section F), to as low as 0%. Under Dutch domestic law, dividends paid by a Dutch Cooperative, which is a specific legal entity, are not subject to Dutch dividend withholding tax, provided that certain antiabuse requirements are met. A Dutch Cooperative is similar to a Dutch private limited liability company (besloten vennootschap met beperkte aansprakelijkheid, or BV) but, among other advantages, it may offer more flexibility from a legal perspective. For further details, see Section B.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax is levied on resident and nonresident companies. Resident companies are those incorporated under Dutch civil law, including subsidiaries of foreign companies, European Companies (Societas Europaea, or SEs) and European Co-operative Societies (Societas Cooperativa Europaea, or SCEs) established in the Netherlands, even if their management and statutory seat are located abroad. In addition, companies are resident if incorporated under foreign civil law, but effectively managed and controlled in the Netherlands. Resident companies are subject to tax on their worldwide income. Nonresident companies, primarily branch offices of foreign companies doing business in the Netherlands, are taxable only on specific income items, such as real estate and business profits generated in the Netherlands.

Tax rates. For 2013, the standard corporate tax rate is 25%. A tax rate of 20% applies to the first €200,000 of taxable income. An effective tax rate of 5% is available for income related to certain intellectual property (IP). For details regarding this IP regime, see Innovation Box.

Innovation Box. If certain conditions are met, a taxpayer can elect to apply the Innovation Box. The aim of this box is to encourage innovation and investment in research and development (R&D), including software development. The Innovation Box is the successor of the Patent Box. The Patent Box, which applied from 1 January 2007, was converted into the Innovation Box, as of 1 January 2010.
In the Innovation Box, net income from qualifying intellectual property is effectively taxed at a rate of 5%. The 5% rate applies only to the extent that the net earnings derived from the self-developed intangible assets exceed the development costs. The development costs are deductible at the statutory tax rate of 25% (see Section A) and form the so-called threshold. The Innovation Box regime can be elected with respect to a particular intangible asset; it is not required to include all intangibles. The Innovation Box does not impose a limit on the amount of income from intangible assets that can be taxed at the effective 5% rate (that is, no cap exists).

An important condition for application of the Innovation Box is that the taxpayer must have been granted a patent, a breeder’s right (this right is granted for newly invented seeds) or an R&D declaration from the Ministry of Economic Affairs, Agriculture and Innovation for an intangible asset created by or for risk and account of the taxpayer. Trademarks, logos, and similar assets do not qualify. Contract R&D arrangements for qualifying intangible assets are allowed. Advance Tax Rulings (ATRs) and Advance Pricing Agreements (APAs) are available (see Administration).

Foreign royalty withholding tax can normally be credited against Dutch corporate income tax, but the amount of the credit is limited to the Dutch corporate income tax attributable to the relevant net royalty income.

**Research and development allowance.** A taxpayer subject to the regular corporate income tax rate may deduct immediately from taxable income the costs of developing intangible assets. As a result, such costs do not need to be capitalized. An additional deemed notional deduction of 54% (for 2013) is available for expenses (excluding wages that can qualify for a research and development [R&D] wage tax incentive) incurred for, and investments related to, R&D work for which an R&D Declaration has been obtained from the Ministry of Economic Affairs, Agriculture and Innovation. At the standard tax rate of 25% (see Section A), this results in a net benefit of 13.5% for 2013.

**Capital gains.** No distinction is made between capital gains and other income. In certain cases, capital gains are exempt (for example, if the participation exemption described in Section C applies) or a rollover is available based on case law or under the reinvestment reserve (see the discussion in Provisions in Section C).

**Administration.** The standard tax year is the financial year (as indicated in the articles of association of a taxpayer).

An annual tax return must be filed with the tax authorities within 5 months after the end of the tax year, unless the company applies for an extension (normally, an additional 10 months based on an agreement between the tax advisers and the tax authorities).

Companies must make partial advance payments of corporate income tax during the year, which are known as preliminary assessments. The preliminary assessments are based on the expected final assessment. For 2013, assuming the tax year is the calendar year, the assessments are levied according to the following schedule:
The first preliminary assessment is due on 31 January 2013. The tax administration may estimate the profits by applying a percentage to the average fiscal profit of the previous two years. If the taxpayer can plausibly show that the expected final assessment will be a lower amount, the preliminary assessment is based on that amount.

The second preliminary assessment is due at the end of the eighth month of 2013. This preliminary assessment is derived from an estimate made by the taxpayer.

These preliminary assessments may be paid in as many monthly installments as there are months remaining in the year.

The final assessment is made within three years (plus any extensions granted) from the time the tax liability arose. If a higher tax liability is established than that shown in the tax return, interest is charged. If less tax is payable than already paid on preliminary assessments, interest is paid at the same rate on the refund.

The tax authorities may impose ex officio assessments if the taxpayer fails to file a return or fails to meet the deadline to file a return. Penalties may apply.

Additional assessments may be imposed if, as a result of deliberate actions by the taxpayer, insufficient tax has been levied. A penalty of 100% of the additional tax due may be levied. Depending on the degree of wrongdoing, this penalty is normally reduced to 25% or 50%.

Rulings. Rulings are agreements concluded with the tax authorities with respect to the Dutch tax consequences of transactions or situations involving Dutch taxpayers. Rulings are based on Dutch tax laws that apply at the time of the request.

For certainty in advance regarding general transfer-pricing matters (see Section E), an Advance Pricing Agreement (APA) can be concluded with the tax authorities. APAs provide taxpayers with upfront certainty about the arm’s length nature of transfer prices. APAs can be entered into on a unilateral, bilateral or multilateral basis (that is, with several tax administrations). APAs may cover all or part of transactions with related parties, including transactions involving permanent establishments. The Dutch APA program also allows the use of adjustments for the application of the agreed transfer-pricing methodology on a retrospective basis.

For most other matters, such as the applicability of the participation exemption, the tax consequences of hybrid finance structures or the existence or nonexistence of a permanent establishment in the Netherlands or abroad, an Advance Tax Ruling (ATR) can be concluded.

The benefit of an APA or ATR is that companies have certainty in advance regarding their Dutch tax position, before the investment is made.

The ruling process with the tax authorities may require a prefiling meeting. In general, rulings are concluded for a period of four or five years, but facts and circumstances may allow for a longer or indefinite term. If the facts on which the APA or ATR was based do not change, in principle, the APA or ATR can be renewed indefinitely. No fees are required to be paid when filing an APA or ATR request with the Dutch tax authorities.
The time required for the total process from initiation of the ruling process to conclusion of the ruling depends on the circumstances. However, in general, it takes between 6 to 10 weeks from the date of the filing of the ruling request to obtain the ruling. It is often possible to expedite the process if required from a commercial perspective (for example, merger and acquisition transactions).

**Dividend withholding tax.** The standard withholding tax rate for dividends is 15%. However, several exemptions and reductions, as described below, can apply. Under the extensive Dutch treaty network (see Section F), the Dutch dividend withholding tax rate is typically reduced to a rate as low as 0%. Under the participation exemption (see Section C) or within a Dutch fiscal unity (see Section C), dividends paid by resident companies to other resident companies are usually exempt from dividend withholding tax.

Under influence of case law by the European Court of Justice (ECJ), the conditions for application of the dividend withholding tax exemption on dividends paid to EU member state resident investors have been relaxed. Effective from 1 January 2010, the withholding tax exemption is available to EU/EEA member state resident investors (and who are not treated as a resident outside the EU/EEA under a tax treaty between the EU/EEA state and a third state) holding an interest in a Dutch dividend distributing entity that would qualify for participation exemption benefits. For this purpose, the EEA is limited to the countries of Iceland, Liechtenstein and Norway. The withholding tax exemption does not apply if the foreign shareholder fulfills a similar function as a Netherlands fiscal investment company or tax-exempt investment company.

Under Dutch domestic law, members in a Dutch Cooperative are not subject to Dutch dividend withholding tax, provided certain antiabuse requirements are met. A Dutch Cooperative is similar to a Dutch BV but, among other advantages, can offer more flexibility from a legal perspective. On 1 October 2012, a new Dutch corporate law for Dutch BVs entered into force. This has resulted in further simplification and flexibility of the corporate law.

**Measures to combat dividend stripping.** The Dividend Tax Act provides measures to combat dividend stripping. Under these measures, a reduction of dividend withholding tax is available only if the recipient of the dividends is regarded as the beneficial owner of the dividends. The measures provide that a recipient of dividends is generally not regarded as the beneficial owner if the following circumstances exist:

- The dividend recipient entered into a transaction in return for the payment of the dividends as part of a series of transactions.
- It is likely that the payment of the dividends benefits a person who would have been entitled to a lesser (or no) reduction, exemption or refund of dividend tax than the recipient.
- The person benefiting from the dividends directly or indirectly maintains or acquires an interest in the share capital of the payer of the dividends that is comparable to the person’s position in the share capital before the series of transactions.

**Share repurchases.** Publicly listed companies are not required to withhold dividends tax when they repurchase their own shares if certain requirements are met. One of these requirements is that
the company must not have increased its share capital in the four years preceding the repurchase. This requirement does not apply if the share capital was increased for bona fide business reasons.

Credit for dividend withholding tax. A Dutch intermediate company may credit a portion of the foreign dividend withholding tax imposed on dividends received against any Dutch withholding tax due on its dividend distributions if certain conditions are satisfied. The credit is generally 3% of the gross amount of qualifying dividends received. However, if the dividends received are not passed on in full by the Dutch intermediate company, the credit is 3% of the dividend distribution made by the Dutch intermediate company.

Foreign tax relief. Under unilateral provisions in the corporate income tax act, the Netherlands exempts foreign business profits derived through a permanent establishment, profits from real estate located abroad and certain other types of foreign income from corporate income tax. If the income is derived from a tax treaty country, the exemption applies with consideration of the relevant treaty provisions. If such foreign (operational) income is derived from a nontreaty country, no “subject to tax” requirement applies. To the extent that the foreign business income is negative, this amount does not reduce Dutch taxable income unless the foreign business is terminated (object exemption/territorial system). A credit is available for profits allocable to low-taxed portfolio investment/passive branches.

C. Determination of taxable income

General. The fiscal profit is not necessarily calculated on the basis of the annual financial statements. In the Netherlands, all commercial accounting methods have to be reviewed to confirm that they are acceptable under fiscal law. The primary feature of tax accounting is the legal concept of “sound business practice.”

Expenses incurred in connection with the conduct of a business are, in principle, deductible. However, certain expenses are not deductible, such as fines and penalties, and expenses incurred with respect to a crime. For companies that do not have shareholders with substantial interests, no other restrictions exist, except with respect to the deductibility of related-party interest expense. For other companies, certain expenses are partially deductible, such as meals, drinks, and conferences. If expenses exceed normal arm’s length charges and are incurred directly or indirectly for the benefit of shareholders or related parties, the excess is considered a nondeductible expense (a deemed dividend or informal capital contribution). Restrictions are imposed on the deductibility of certain related-party interest expense (see Section E).

Functional currency. Taxpayers must calculate their taxable income in euros. On request, Dutch corporate tax returns may be calculated in the functional currency of the taxpayer, provided the financial statements of the relevant financial year are prepared in that currency. The financial statements may be expressed in a foreign currency if it is justified by the company’s business or the international nature of the company’s group. If this regime is applied, in principle, the functional currency must be used for at least 10 years.
Inventories. Inventories are generally valued at the lower of cost or market value, but the last-in, first-out (LIFO) and the base stock methods of valuation are acceptable if certain conditions are fulfilled. Both of these make it possible to defer taxation of inventory profits. Valuation under the replacement-cost method is not accepted for tax purposes.

Provisions. Dutch law permits the creation of tax-free equalization and reinvestment reserves.

The equalization reserve may be established in anticipation of certain future expenditure that might otherwise vary considerably from year to year, such as ship maintenance, overhauling, pension payments or warranty costs.

If certain conditions are met, the tax book profit arising from the disposal of a tangible or intangible business asset may be carried forward and offset against the acquisition cost of a reinvestment asset. This is known as a reinvestment reserve. The reinvestment asset must be purchased within three years after the year in which the reinvestment reserve was established. If a reinvestment asset is not purchased within three years after the establishment of the reinvestment reserve, the amount in the reinvestment reserve is included in taxable income for corporate income tax purposes in the third year following the year in which the reinvestment reserve was established. The offset of the book profit may not reduce the book value of the reinvestment asset below the book value of the asset that was sold. An amount that cannot be offset as a result of the rule described in the preceding sentence may continue to be carried forward if the condition of the same economic function for the reinvestment does not apply (see below). If the depreciation period for the reinvestment asset is more than 10 years or if the reinvestment asset is not depreciable, the reinvestment asset must fulfill the same economic function as the asset that was sold. The condition of the same economic function for the reinvestment does not apply to reinvestment assets with a depreciation period of 10 years or less.

Participation exemption. All corporations located in the Netherlands (except qualified investment companies that are subject to a corporate income tax rate of 0%), including holding companies, are in principle exempt from Dutch corporation tax on all benefits connected with certain qualifying shareholdings (participations). Benefits include cash dividends, dividends-in-kind, bonus shares, “hidden” profit distributions and capital gains realized on disposal of the shareholding. A capital loss that might result from the disposal of the shareholding is similarly nondeductible (but a liquidation loss of a subsidiary company is, in principle, deductible).

The participation exemption applies to all (rights to) interests of 5% or more in the nominal paid-up capital of the subsidiary, unless the participation is a “portfolio investment” (determined through the motive test; see below). A less than 5% direct shareholding may be a qualifying participation if a related company owns an interest of at least 5% in the same subsidiary. If the shareholding is reduced to less than 5% (for example, as a result of a dilution or another event), the participation exemption may still apply for a period of three years from the date the 5% threshold
is no longer met. A condition for applying the participation exemption during the three-year period is that the shareholding must have been owned by the Dutch shareholder for more than one year during which the Dutch shareholder was able to fully benefit from the Dutch participation exemption. If the participation can be considered a “portfolio investment” on a particular date, the Dutch shareholder may no longer benefit from the participation exemption as of such date.

The motive test is applied to determine whether a participation is a “portfolio investment.” In general, the motive test is met if the shares in the subsidiary are not merely held for the return that can be expected from normal asset management. In a limited number of specific situations, the participation is deemed to be held as a portfolio investment, which is generally determined based on the function and assets of the subsidiary. However, even if the non-portfolio investment requirement is not met, the Dutch taxpayer may still benefit from the participation exemption if the reasonable tax test or the asset test is met.

The reasonable tax test is satisfied if the direct subsidiary is subject to a profit tax that results in a reasonable levy of profit tax in accordance with Dutch tax standards. Based on the parliamentary history, in principle, the local tax system needs to be compared with the Dutch tax system. The primary elements that are taken into account for this assessment are the tax base and the local statutory corporate income tax rate. In general, a statutory profit tax rate of at least 10% qualifies as a reasonable levy if no significant deviations exist between the local tax system and the Dutch tax system. Such significant deviations include, among others, a tax holiday, a cost-plus tax base with a limited cost base and the absence of limitation provisions with respect to the interest deduction.

The asset test is satisfied if less than half of the assets of the direct subsidiary usually consist of, directly or indirectly, low-taxed “free” portfolio investments on an aggregated basis. The portfolio investments are considered “free” if the investments are not used in the course of the business of the company. Real estate and rights directly or indirectly related to real estate are excluded from the definition of a portfolio investment. As a result, the participation exemption normally applies to benefits from real estate participations.

Subject to prior approval of the Dutch tax authorities, a taxpayer can apply the participation exemption to the foreign-exchange results relating to financial instruments that hedge the foreign-exchange exposure on qualifying participations.

Hybrid loans. The participation exemption is generally also available for benefits derived from so-called hybrid loans. These are legal debt instruments that are deemed to function as equity for Dutch tax purposes.

Tax depreciation. In principle, depreciation is based on historical cost, the service life of the asset and the residual value. Effective from 1 January 2007, depreciation is limited on buildings, goodwill and other assets.
Buildings. Effective from 1 January 2007, buildings (including the land and surroundings on which they were erected) can be depreciated only for as long as the tax book value does not drop below the threshold value. Buildings may not be depreciated to a tax book value lower than the threshold value. The threshold value of buildings held as a portfolio investment equals the value provided in the Law on Valuation of Real Estate (Wet Waardering Onroerende Zaken), known as the WOZ value. The threshold value of buildings used in the taxpayer’s business or a related party’s business equals 50% of the WOZ value. In principle, the WOZ value approximates the fair market value of the real estate. The local municipality determines annually the WOZ value. If the threshold value increases, tax depreciation that had been previously claimed is not recaptured.

Goodwill and other assets. Goodwill must be depreciated over a period of at least 10 years. As a result, the maximum annual depreciation rate is 10%. If the goodwill is useful for a longer period, this period must be taken into account. For other assets such as inventory, cars and computers, the depreciation is limited to an annual rate of 20% of historical cost.

Groups of companies. Under the Dutch fiscal unity regime, a group of companies can be treated as one taxpayer for Dutch tax purposes. The fiscal unity regime has the following characteristics:

- To elect a fiscal unity, among other requirements, a parent company must own at least 95% of the shares of a subsidiary.
- Both Dutch and foreign companies may be included in a fiscal unity if their place of effective management is located in the Netherlands, and if the foreign company is comparable to a Dutch BV or naamloze vennootschap (NV).
- A permanent establishment in the Netherlands of a company with its effective management abroad may be included in, or can be the parent of, a fiscal unity.
- A subsidiary may be included in the fiscal unity from the date of acquisition.

Advantages of such group treatment include the following:

- Losses of one subsidiary may be offset against profits of other members of the group.
- Reorganizations, including transfers of assets with hidden reserves from one company to another, have no direct fiscal consequences.
- Intercompany profits between members of a Dutch fiscal unity may be fully deferred.

Acquisition interest limitation. Effective from 1 January 2012, the deduction of interest expense related to the acquisitions of a Dutch company that is subsequently included in a fiscal unity with its Dutch acquirer (or merged) is restricted. In such a transaction, the interest expense incurred by the Dutch acquirer with respect to the acquisition is tax deductible without limitation only if the acquirer has “stand alone” taxable income. If the acquirer does not have sufficient “stand alone” taxable income, limitations to the amount of deductible acquisition interest expense may apply. This is the case if the acquisition interest exceeds an amount of €1 million and if the fiscal unity has “excess liabilities.” To determine whether the fiscal unity has “excess liabilities,” the amount of outstanding liabilities related to an acquisition, expressed as a
percentage of the initial purchase price, is reviewed annually. In the first year, “excess liabilities” are recognized only if more than 60% of the purchase price is financed with (any) debt, and the deductibility of interest expenses is limited to the amount of the “excess liabilities.” This percentage is reduced by 5% per year. Taxpayers should consult their Dutch tax advisers to discuss these rules in more detail. The new restriction is introduced with a grandfathering provision. Under this provision, if the target is included in a fiscal unity with the acquirer before 15 November 2011, or if it was merged before that date, the limitations do not apply.

Relief for losses. Losses of a company may be carried back one year and carried forward nine years.

Restrictions on loss relief apply to holding and financing companies. The restrictions apply to a company if holding activities and direct or indirect financing of related parties account for at least 90% of the company’s activities during at least 90% of the financial year.

A company meeting the above condition may offset losses from a financial year against profits earned in another financial year only if its activities in both financial years consist of (or almost exclusively consist of) holding activities and the direct or indirect financing of related parties. This rule is designed to prevent companies from offsetting losses incurred in years in which they primarily engaged in holding and financing activities against profits of other activities that are subsequently commenced or acquired.

A second restriction provides that the balance of the related-party receivables and the related-party payables of the company during the financial year in which the profits are realized may not exceed this balance in the financial year in which the losses were incurred. This rule is designed to prevent companies from using losses by increasing the profitable finance activities. However, the company may make a case that the balance of the receivables and payables has increased for business reasons and not only for the purpose of using the loss carryforwards. If a taxpayer has at least 25 employees engaged in activities other than holding or financing, this ring-fencing rule does not apply.

The Corporate Income Tax Act contains specific rules to combat the trade in so-called “loss companies.” If 30% or more of the ultimate interests in a Dutch taxpayer changes among ultimate shareholders or is transferred to new shareholders, in principle, the losses of the company may not be offset against future profits. However, many exceptions to this rule exist (for example, the going-concern exception). The company has the burden of proof with respect to the applicability of the exemptions. A similar rule applies to companies with a reinvestment reserve and other attributes (such as tax credit carryforwards).

D. Value-added tax

Value-added tax (VAT) is imposed on goods delivered and services rendered in the Netherlands other than exempt goods and services. Effective from 1 October 2012, the general rate is 21% (before 1 October 2012, the general VAT rate was 19%). Other rates are 0% and 6%.
E. Miscellaneous matters

Dutch intermediate companies. The Netherlands may be used as a base for intermediate companies. These are primarily holding companies, finance companies, licensing companies and leasing companies. Companies that perform these activities within a group must bear a certain level of risk with respect to these activities. A safe-harbor test involving a requirement with respect to minimum equity at risk determines whether sufficient risk is involved.

The Netherlands does not impose withholding tax on interest and royalties (see Section A). In addition, dividend withholding tax is typically reduced to 0% (see Section B). Because of the participation exemption (see Section C), a Dutch intermediate company is usually exempt from Dutch corporate tax on dividends from, and capital gains connected with, a foreign shareholding.

Foreign-exchange controls. No real restrictions are imposed on the movement of funds into and out of the Netherlands.

Debt-to-equity rules and other restrictions on deductibility of interest

Statutory thin-capitalization rules. Effective from 1 January 2013, the statutory thin-capitalization rules are abolished.

Other anti-base erosion provisions. The deduction of interest paid, including related costs and currency exchange results, by a Dutch company on a related-party loan is disallowed to the extent that the loan relates to one of the following transactions:

- Dividend distributions or repayments of capital by the taxpayer or by a related Dutch company to a related company or a related individual resident in the Netherlands
- Capital contributions by the taxpayer, by a related Dutch company or by a related individual resident in the Netherlands into a related company
- The acquisition or extension of an interest by the taxpayer, by a related Dutch company or by a related individual resident in the Netherlands in a company that is related to the taxpayer after this acquisition or extension

This interest deduction limitation does not apply if either of the following conditions is satisfied:

- The loan and the related transaction are primarily based on business considerations.
- At the level of the creditor, the interest on the loan is subject to a tax on income or profits that results in a levy of at least 10% on a tax base determined under Dutch standards, disregarding the Innovation Box (see Section B). In addition, such interest income may not be set off against losses incurred in prior years or benefit from other forms or types of relief that were available when the loan was obtained. In addition, the loan may not be obtained in anticipation of losses or other types of relief that arise in the year in which the loan was granted or in the near future. Effective from 1 January 2008, even if the income is subject to a levy of at least 10% on a tax base determined under Dutch standards at the level of the creditor, interest payments are not deductible if the tax authorities can demonstrate it to be likely that the loan or the related transaction is not primarily based on business considerations. The measure described in the preceding sentence applies to loans that were in existence on 1 January 2008, with no grandfathering.
Hybrid loans. Interest expense incurred on loans that are (deemed) to function as equity for Dutch tax purposes is not deductible and may be subject to Dutch dividend withholding tax.

Participation interest limitation. The participation interest limitation applies to fiscal years beginning on or after 1 January 2013. It seeks to limit the deduction of “excessive interest” paid by a Dutch corporate taxpayer with respect to “participation debt,” which is debt (deemed to be) used to finance assets generating income that is exempt under the Dutch participation exemption. Such assets primarily include participations (such as share interests of at least 5%). The new rule applies only if the interest exceeds €750,000 (only the excess above €750,000 would potentially be limited).

Under the proposed rule, “participation debt” exists if the average cost price (that is, the combined amount of the purchase prices of the subsidiaries held by the Dutch taxpayer) of a Dutch taxpayer’s participations exceeds the taxpayer’s equity for Dutch tax purposes. Excess interest is calculated using the following formula:

\[
\text{Excess interest} = \left( \frac{\text{Total interest and costs at the level of the taxpayer}}{\text{Total amount of debt}} \right) \times \text{Participation debt}
\]

Certain exceptions exist. The cost price of a subsidiary is not taken into account for purposes of calculating the participation debt (that is, a purchase price is excluded from the combined amount of purchase prices of the subsidiaries held by the Dutch taxpayer) if and to the extent that the interest held in an operational subsidiary can be considered an expansion of the operational activities of the group (expansion investment escape). This exception does not apply in certain situations that the legislation deems abusive. Taxpayers should consult Dutch tax advisors to discuss these rules in more detail.

A grandfathering rule applies for subsidiaries held by the Dutch taxpayer on or before 1 January 2006. These subsidiaries are deemed to be an expansion investment for 90%. The Dutch taxpayer can still substantiate that the subsidiary should be considered an expansion investment for 100%.

Another exception is made for active financing activities. When calculating the excess interest, the interest and costs relating to payables held with respect to active financing are excluded from the total amount of interest and costs. In addition, payables that relate to active financing lower the average total debt that is needed to calculate the excessive amount of interest. For this active financing rule to apply, a taxpayer must demonstrate that the payables as well as the receivables connected thereto are held with respect to the active financing activities. This is subject to specific criteria.

Transfer pricing. The Dutch tax law includes the arm’s length principle (codified in the Corporate Income Tax Act) and contains specific transfer-pricing documentation requirements. Transactions between associated enterprises (controlled transactions) must be documented. Such documentation should include a description of the terms of the controlled transactions, the entities (and permanent establishments) involved and a thorough analysis of the so-called five comparability factors (both from the perspective of the
controlled transactions and companies and uncontrolled transactions and companies), of which the functional analysis is the most important. The documentation must establish how transfer prices were determined and provide a basis for determining whether the terms of the intercompany transactions would have been adopted if the parties were unrelated. If such information is not available on request in the case of an audit or litigation, the burden of proof with respect to the arm’s length nature of the transfer prices shifts to the taxpayer. As a result, the taxpayer is exposed to possible noncompliance penalty charges. Taxpayers can use the Dutch transfer-pricing decrees for guidance. These decrees provide the Dutch interpretation of the Organization for Economic Cooperation and Development (OECD) transfer-pricing guidelines.

APAs can be concluded with the Dutch tax authorities with respect to transfer pricing (see Section B).

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under Dutch domestic law.

(a) The dividend withholding tax rates in this table are based on the lowest available treaty rates.
(b) The treaty withholding rate is increased to 15% (or other rate as indicated below) if the recipient is not a corporation owning at least 25% of the distributing corporation.

| Czech Rep. | 10%  |
| Pakistan | 20%  |
| Greece | 15/35%  |
| Slovak Rep. | 10%  |
| Turkey | 10/15/20%  |
| Japan | 10/15%  |
| Spain | 10/15%  |
| Venezuela | 10%  |
| Morocco | 25%  |
| Suriname | 15/20%  |
| Zimbabwe | 20%  |

(c) The treaty withholding rate is increased to 15% (or other rate as indicated below) if the recipient is not a corporation owning at least 10% of the distributing corporation.

| Bahrain | 10%  |
| Oman | 10%  |
| Tunisia | 20%  |
| Ghana | 10%  |
| Saudi Arabia | 10%  |
| United Arab Emirates | 10%  |
| Japan | 10%  |
| South Africa | 10%  |
| United Kingdom | 10/15%  |
| Kuwait | 10%  |

(d) The treaty withholding rate is increased to 15% if the recipient is not a corporation owning at least 20% of the distributing company.
(e) The treaty withholding rate is increased to 15% if the recipient is not a corporation owning at least 5% of the distributing company.
(f) The treaty withholding rate is increased to 10% if the recipient is not a corporation owning at least 7.5% of the distributing company.

(g) A dividend withholding tax exemption is available to EU/EEA member state resident investors (who are not treated as a resident outside the EU/EEA under a tax treaty between the EU/EEA state and a third state) holding an interest in a Dutch dividend distributing entity that would qualify for participation exemption benefits. For this purpose, the EEA is limited to the countries of Iceland, Liechtenstein and Norway. The withholding tax exemption does not apply if the foreign shareholder fulfills a similar function as a Netherlands fiscal investment company or tax exempt investment company. No minimum holding period applies.

(h) The 0% rate applies if the recipient of the dividends satisfies all of the following conditions:
   • It is a corporation resident in the BES-Islands.
   • It has capital wholly or partly divided into shares.
   • It holds at least 10% of the capital of the payer resident in the European part of the Netherlands.

(i) The former USSR tax treaty continues to apply to Kyrgyzstan, Tajikistan and Turkmenistan.
(j) The former Yugoslavia tax treaty continues to apply to Bosnia-Herzegovina, Kosovo, Montenegro and Serbia.
(k) Dividends paid by a resident of the Netherlands to a resident of Aruba, Curaçao or Sint Maarten are subject to Dutch dividend withholding tax at a rate of 15%. A reduced rate of 8.3% is available if certain requirements are met.
(l) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer or has invested in the payer more than US$10 million. The 10% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 25% but less than 50% of the capital of the payer.

(m) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 15% of the capital of the payer and if certain other conditions are met. Please consult your Dutch tax advisor for further details.
(n) The 0% rate applies if the recipient is a corporation that owns at least 50% of the shares of the payer and has invested ECU 250,000 in the share capital of the payer or if the recipient is a corporation owning at least 25% of the shares of the payer and the capital of the payer is guaranteed or insured by the government.
The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the payer and certain other conditions are met. Please consult your Dutch tax advisor for further details.

The 0% rate applies if the recipient of the dividends owns at least 50% of the capital of the payer. The 0% rate also applies if either of the following conditions is satisfied:

- The recipient has invested at least US$300,000 in the payer.
- The investment is guaranteed or insured by the government or government bodies of the other contracting state.

The 5% rate applies if the recipient owns at least 25% of the capital of the payer.

The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer and if the recipient has invested at least $200,000 in the payer.

The 0% rate applies if the recipient is a company that owns at least 50% of the capital of the payer of the dividends and has invested more than US$2 million in the capital of the payer of the dividends. The 5% rate applies if the recipient is a company that owns at least 10% of the capital of the payer of the dividends.

The 0% rate applies if the recipient is a company that directly owns shares representing 80% or more of the voting power in the payer of the dividends and if other conditions are met. The 5% rate applies if the recipient is a company that holds directly at least 10% of the voting power of the payer of the dividends.

The 0% rate applies if the recipient is a company owning at least 50% of the distributing company with respect to investments made, including increases of investments, after the entry into force of this treaty on 10 September 2006. The 5% rate applies if the recipient is a company that owns less than 50% of the distributing company. The 15% rate applies to other dividends. The competent authorities of the contracting states regulate in an agreement the application of the reduced rates of 0%, 5% and 15%.

The Netherlands is in continuous negotiations with other countries to conclude new tax treaties, or amend existing ones. During 2012, the Netherlands continued discussions with Australia, Belgium, China, Costa Rica, Ethiopia, France, Germany, India, Indonesia, Iraq, Ireland, Mongolia, New Zealand and Norway. In addition, in 2012, the Netherlands contacted Angola, Brazil, Chile, Colombia, Cyprus, the Czech Republic, Poland, Singapore, the Slovak Republic, Spain and Turkey to begin tax treaty negotiations or renegotiate existing treaties.

A. At a glance

Corporate Income Tax Rate (%) 28
Capital Gains Tax Rate (%) 0
Branch Tax Rate (%) 28
Withholding Tax (%)

Nonresidents
Dividends 30 (a)
Interest 15 (b)
Royalties from Patents, Know-how, etc. 15 (c)
Payments to Contractors 15
Branch Remittance Tax 0

Residents
Dividends 33 (d)
Interest 33 (e)

Net Operating Losses (Years)
Carryback 0
Carryforward Unlimited

(a) This is a final tax. If dividends are fully imputed (see Section B), the rate is reduced to 15% (for cash dividends) or to 0% (for noncash dividends and, effective from 1 February 2010, for cash or noncash dividends if nonresident recipients have direct voting interests of at least 10% or if a tax treaty reduces the New Zealand tax rate below 15%). The rate is also reduced to 15% to the extent that the dividends are fully credited under the dividend withholding payment system or under the conduit tax relief system (both of these systems are being phased out) or to the extent that imputation credits are passed on to foreign investors through the payment of supplementary dividends under the foreign investor tax credit regime.

(b) This is a final tax if the recipient is not associated with the payer. For an associated person, this is a minimum tax (the recipient must report the income on its annual tax return, but it may not obtain a refund if the tax withheld exceeds the tax that would otherwise be payable on its taxable income).

Under the Income Tax Act, associated persons include the following:

• Any two companies in which the same persons have a voting interest of at least 50% and, in certain circumstances, a market value interest of at least 50% in each of the companies
• Two companies that are under the control of the same persons
• Any company and any other person (other than a company) that has a voting interest of at least 25% and, in certain circumstances, a market value interest of at least 25% in the company

Interest paid by an approved issuer on a registered security to a nonassociated person is subject only to an approved issuer levy (AIL) of 2% of the interest payable. An AIL rate of 0% applies to interest paid on or after 7 May 2012 to nonresidents on certain widely offered and widely held corporate bonds that are denominated in New Zealand currency.

(c) This is a final tax on royalties relating to literary, dramatic, musical or artistic works. For other royalties, this is a minimum tax.

(d) See Section B.

(e) Effective from 1 October 2010, the 33% rate is a default rate if recipients’ tax file numbers are not supplied. Individuals may elect rates of 10.5% (if their expected annual income does not exceed NZ$14,000), 17.5%, 30% or 33%. Effective from 1 April 2011, the basic rate for interest paid to companies is 28%, but companies may elect a 33% rate.

B. Taxes on corporate income and gains

Income tax. Resident companies are subject to income tax on worldwide taxable income. Nonresident companies carrying on business through a branch pay tax only on New Zealand-source income.
A company is resident in New Zealand if it is incorporated in New Zealand, if it has its head office or center of management in New Zealand or if director control is exercised in New Zealand.

**Rate of income tax.** Resident and nonresident companies are subject to tax at a rate of 28%.

**Capital gains.** No capital gains tax is levied in New Zealand. However, residents may be taxed on capital gains derived from many types of financial arrangements and from certain real and personal property transactions. These gains are subject to tax at the standard corporate tax rate.

**Administration.** The income year is from 1 April to 31 March. A company with an accounting period that ends on a date other than 31 March may apply to the Commissioner of Inland Revenue for permission to adopt an income year that corresponds to its accounting period. If the Commissioner approves an alternative income year, income derived during that year is deemed to have been derived during the year ending on the nearest 31 March. For this purpose, year-ends up to 30 September are deemed to be nearest the preceding 31 March, and year-ends after 30 September are deemed to be nearest the following 31 March.

Companies with year-ends from 1 April to 30 September must file tax returns by the seventh day of the fourth month following the end of their income year. All other companies must file their returns by 7 July following the end of their income year.

Provisional tax payments for the 2008-09 and subsequent income years must generally be made in the fifth, ninth and thirteenth months after the beginning of the company's income year. The first installment equals one-third of the provisional tax payable; the second installment equals two-thirds of the provisional tax payable, less the amount of the first installment; and the balance of the provisional tax is payable in the third installment. In general, the provisional tax payable in a year equals 105% of the income tax payable in the preceding year. For the 2008-09 and subsequent income years, companies that are registered for Goods and Services Tax (GST; see Section D) that meet certain criteria may elect to calculate their provisional tax under a GST ratio method and pay the provisional tax in installments when they file their GST returns, generally every two months.

Companies with year-ends from October to January must pay terminal tax by the seventh day of the eleventh month following the end of the income year. Companies with a February year-end must pay terminal tax by the fifteenth day of the following January. All other companies must pay terminal tax by the seventh day of February following the end of their income year. The date for payment of terminal tax may be extended by two months if the company has a tax agent.

Several measures impose interest and penalties on late payments of income tax. For late payments or underpayments, the basic penalty equals 5% of the unpaid tax. This penalty is reduced to 1% if the tax is paid within a week after the due date. An additional penalty of 1% of the unpaid balance, compounding monthly, is also imposed. Interest may be payable if provisional tax paid at each installment date is less than the relevant proportion (generally,
one-third for the first installment date, two-thirds for the second installment date and three-thirds for the third installment date) of the final income tax payable for the year. Conversely, interest may be credited on overpaid provisional tax.

Interest charges and the risk of penalties with respect to provisional tax may be reduced if provisional tax is paid under a tax-pooling arrangement through a Revenue-approved intermediary.

For the 2008-09 and subsequent income years, the risk of interest and penalties will be minimized for companies that use the GST ratio method for calculating and paying their provisional tax.

Dividends

Exempt income. Dividends received by New Zealand resident companies from other New Zealand resident companies are taxable. However, dividends received from wholly owned subsidiaries resident in New Zealand are exempt. Dividends received by New Zealand resident companies from nonresident companies are generally exempt. However, as a result of changes applying for taxpayers’ income years beginning on or after 1 July 2009, certain dividends received by New Zealand resident companies from nonresident companies are taxable, including the following:

- Dividends that are directly or indirectly deductible overseas
- Dividends on certain fixed-rate shares
- For income years beginning on or after 1 July 2011, dividends derived by Portfolio Investment Entities (PIEs; see Section E; previously limited to multirate PIEs)
- Dividends relating to certain portfolio (less than 10%) investments that are exempt from income attribution under the foreign investment fund regime (see Section E)

Imputation system. New Zealand’s dividend imputation system enables a resident company to allocate to dividends paid to shareholders a credit for tax paid by the company. The allocation of credits is not obligatory. However, if a credit is allocated, the maximum credit is based on the current corporate income tax rate. On the reduction of the corporate income tax rate to 28%, the maximum credit is 28/72, meaning that a dividend of NZ$72 may have an imputation credit attached of up to NZ$28. The credit is less than the previous maximum credit (applying for the 2008-09 through 2010-11 income years) of 30/70. Transitional provisions allow companies to continue to apply credits that have arisen from tax paid at the 30% (or previous 33%) rate, up to a maximum ratio of 30/70 until 31 March 2013.

The imputation credits described above may not be used to offset nonresident withholding tax on dividends paid to nonresidents. However, effective from 1 February 2010, they may allow nonresident withholding tax to be reduced to 0% if nonresident recipients hold direct voting interests of at least 10% or if a tax treaty reduces the tax rate below 15%. A New Zealand company may pass on the benefit of such credits to other nonresident investors through payments of supplementary dividends. The aim of this mechanism is to allow nonresident investors to claim a full tax credit in their home countries for New Zealand nonresident withholding tax. The New Zealand company may also claim a partial refund or credit with respect to its own New Zealand company
tax liability. Effective from 1 February 2010, payment of supplementary dividends can generally be made only to certain holding companies (until 31 March 2011) and to nonresident companies and individuals who hold direct voting interests of less than 10% and who are subject to a tax rate of at least 15% after any tax treaty relief.

Australian resident companies may also elect to maintain a New Zealand imputation credit account and collect imputation credits for income tax paid in New Zealand. New Zealand shareholders in an Australian resident company that maintains such an imputation credit account and attaches imputation credits to dividends can receive a proportion of the New Zealand imputation credits equal to their proportion of shareholding in the Australian company. Imputation credits must be allocated proportionately to all shareholders.

In general, the carryforward of excess credits for subsequent distribution must satisfy a 66% continuity-of-shareholding test. Interests held by companies or nominees are generally traced through to the ultimate shareholders. Listed, widely held companies and limited attribution foreign companies are entitled to special treatment. In effect, they are treated as the ultimate shareholder if their voting interest in other companies is less than 50% or if the actual ultimate shareholders would each have voting interests of less than 10% in the underlying company. The definition of a listed company includes companies listed on any exchange in the world that is recognized by the Commissioner of Inland Revenue. For carryforward purposes, direct voting or market value interests of less than 10% may be considered to be held by a single notional person, unless such an interest is held by a company associated with the company that has the carryforward.

**Foreign dividend payments.** The foreign dividend payment system was previously called the dividend withholding payment system. Under the foreign dividend payment system, dividends received by a resident company from a nonresident up to the end of their 2008-09 or 2009-10 income year (depending on their year-end date) were subject to a 30% (33% until the end of the 2007-08 income year) foreign dividend payment to be made by the recipient to the Inland Revenue Department.

Companies with foreign dividend payment credits may pass the benefit of the payments to the shareholder by way of a credit attaching to dividends paid by the company. The credit may be available under either the imputation system or the foreign dividend payment system. The unused portion of a foreign dividend payment credit can be refunded to the shareholder, but an excess imputation credit is not refundable.

If a resident company had elected to be a conduit tax relief company, a foreign dividend payment on dividends received from a nonresident could be reduced to the extent that the resident company had nonresident shareholders. The benefit of this conduit tax relief was passed on to the nonresident shareholders through the payment of dividends and the attachment of conduit tax relief credits.

In accordance with changes enacted in October 2009, the foreign dividend payment system and conduit tax relief provisions are
being phased out. New Zealand resident companies are not required to make foreign dividend payments to the Inland Revenue Department on dividends received during income years beginning on or after 1 July 2009. Companies were able to continue attaching credits to dividends paid to pass on the benefit of previous foreign dividend payments and conduit tax relief. The ability to pass on the benefit of conduit tax relief ceased for dividends paid from the beginning of a company’s first income year that began on or after 1 July 2011.

Resident withholding tax. For dividends paid to a resident company by another resident company that is not in a tax group with the recipient, the payer must deduct a withholding tax equal to 33%, having first allowed for any imputation credits attached to the dividend, unless the recipient holds an exemption certificate. This rate has not been reduced to align with the reduced corporate income tax rate of 28% or 30% but any excess tax can be used as tax credits during or refunded through the annual income tax return process.

Foreign tax relief. In general, any tax paid outside New Zealand by a New Zealand resident taxpayer can be claimed as a credit against the tax payable in New Zealand. The credit is limited to the amount of New Zealand tax payable on that income.

C. Determination of trading income

General. Assessable income consists of all profits or gains derived from any business activity, including the sale of goods and services, commissions, rents, royalties, interest and dividends.

A gross approach applies to the calculation of taxable income. Under this approach, a company calculates its gross assessable income and then subtracts its allowable deductions to determine its net income or loss. If the company has net income, it subtracts any loss carryforwards or group losses to determine its taxable income.

To be deductible, expenses must be incurred in deriving gross income or necessarily incurred in carrying on a business for the purpose of deriving gross income. Interest is now generally deductible for most New Zealand resident companies, subject only to the thin-capitalization rules (see Section E). Effective from taxpayers’ income years beginning on or after 1 July 2009, interest paid on certain debts that are stapled to shares on or after 25 February 2008 may be treated as nondeductible dividends. Deductions for certain business entertainment expenses are limited to 50% of the expenses incurred. Capital expenditures are generally not deductible.

Exempt income. The only major categories of exempt income are dividends received from a wholly owned subsidiary resident in New Zealand, certain dividends received from nonresident companies and dividends paid out of capital gains derived from arm’s length sales of fixed assets and investments on winding up.

A specific exemption applies until 31 December 2014 for income derived by nonresident companies from certain oil and gas drilling and related seismic survey vessel activities in New Zealand’s offshore permit areas.
Inventories. Stock in trade must generally be valued at cost. Market selling value may be used (but not for shares or “excepted financial arrangements”) if it is lower than cost. Cost is determined by reference to generally accepted accounting principles, adjusted for variances between budgeted and actual costs incurred. Simplified rules apply to “small taxpayers,” which are those with annual turnover of NZ$3 million or less. A further concession applies to taxpayers with annual turnover of NZ$1,300,000 or less and closing inventory of less than NZ$10,000.

Depreciation. The depreciation regime generally allows a deduction for depreciation of property, including certain intangible property, used in the production of assessable income. Depreciation cannot be claimed for income tax purposes on buildings with useful lives estimated by the Commissioner of Inland Revenue to be at least 50 years, effective from taxpayers’ 2011-12 income years. Depreciation may continue to be claimed on commercial building fit-outs, certain depreciable land improvements and structures other than 50-year buildings. Most assets can be depreciated using the straight-line or the declining-balance methods. For assets valued at less than NZ$2,000, a taxpayer may elect to pool the assets and apply the pool-depreciation method. Under the pool-depreciation method, the lowest rate applicable to any asset in the pool is used to depreciate all assets in the pool. A taxpayer may have more than one pool of assets. Assets in a pool must be used for business purposes only or be subject to Fringe Benefit Tax (see Section D) to the extent the assets are not used for business purposes. Buildings may not be pooled. Property costing NZ$500 or less may generally be written off immediately.

Assets, other than intangible property, acquired before 1 April 1993 are depreciated at the rates provided under the prior depreciation regime.

A transitional system applies to assets, including certain intangible property, acquired from 1 April 1993 through the end of the taxpayer’s 1994-95 income year (the income year ending nearest to 31 March 1995). Under the transitional system, a taxpayer could elect to use the depreciation rates under the prior regime or the economic depreciation rates set by the Commissioner of Inland Revenue, which are based on the effective useful life of an asset.

Assets acquired in a taxpayer’s 1995-96 or subsequent income year must be depreciated using economic depreciation rates. In general, most of these assets, other than buildings and used imported motor cars, qualified for a 20% loading on the applicable depreciation rates for the 1995-96 and subsequent income years, if the assets were not previously used in New Zealand and if they were acquired by 20 May 2010. In certain circumstances, a taxpayer may apply for a special depreciation rate. The formula for setting depreciation rates has changed for the 2005-06 income year and subsequent years, resulting in increased rates for most plant and equipment acquired on or after 1 April 2005, and reduced rates for buildings acquired on or after 19 May 2005. The following table provides some of the general straight-line and declining-balance depreciation rates applicable to assets acquired between the 1995-96 and 2004-05 income years and assets acquired in the 2005-06 and subsequent income years, before the addition of any loading.

* Effective from taxpayers’ 2011-12 income years, no tax depreciation can be claimed on buildings with useful lives estimated by the Commissioner to be at least 50 years, regardless of the date of acquisition of the building.

The rates for plant and machinery vary depending on the particular industry and type of plant and machinery.

Tax depreciation is generally subject to recapture on the sale of an asset to the extent the sales proceeds exceed the tax value after depreciation. Amounts recaptured are generally included in assessable income in the earliest year in which the disposal consideration can be reasonably estimated. If sales proceeds are less than the tax value after depreciation, the difference may generally be deducted as a loss in the year of disposal. However, such losses on buildings are deductible only if they occur as a result of natural disasters or other events outside the taxpayer’s control. Specific rules have been introduced to provide some deferral and rollover relief with respect to irreparable damage arising from the 2010-11 Canterbury earthquakes, and related insurance recoveries and replacements.

**Special deductions.** A few special deductions designed to achieve specific government objectives are available, such as certain deductions relating to petroleum, mining, forestry and agricultural activities.

**Trading losses.** Trading losses may be carried forward and offset against future taxable income if, at all times from the beginning of the year of loss to the end of the year of offset, a group of persons held aggregate minimum voting interests in the company and, in certain circumstances, minimum market value interests of at least 49%.

**Group losses.** Losses incurred within a group of companies may be offset against other group company profits either by election or subvention payments.

Subvention payments are intercorporate payments specifically made to effect the transfer of company losses. They are treated as deductions to the paying (profit) company and as taxable income to the recipient (loss) company. The loss company and the profit-making company must be in the same group of companies throughout the relevant period. The required common ownership is 66%.

Wholly owned corporate groups may elect income tax consolidation.
Elective regime for closely held companies. Look-through companies with five or fewer shareholders may elect to be taxed similarly to partnerships. However, reforms enacted following the May 2010 budget restrict shareholders’ ability to claim losses, effective from their 2011-12 income years.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Goods and Services Tax (GST), similar to a value-added tax, levied on the supply of goods and services and on imports</td>
<td>15</td>
</tr>
<tr>
<td>Fringe Benefit Tax (FBT); paid by the employer on the value of fringe benefits provided to employees and on noncash dividends distributed to shareholder-employees</td>
<td>49.25</td>
</tr>
</tbody>
</table>

(If benefits are attributable to particular employees, employers may elect to calculate FBT on the attributable benefits at a range of rates between 11.73% and 49.25%. The rates vary depending on the employee’s cash remuneration inclusive of the fringe benefits. Unattributed benefits provided to such employees are subject to FBT at a rate of 42.86% [49.25% if provided to major shareholder-employees]. As a further alternative, employers may pay FBT at a rate of 49.25% on attributed benefits and 42.86% on unattributed benefits [49.25% if provided to major shareholder-employees].)

Accident compensation levy, on gross salaries and wages, paid by Employer; rate (before residual and health and safety elements) varies according to industry class and may be reduced if the employer meets certain work safety criteria; certain employers may take direct responsibility under full self-cover or partnership discount plans 0.03 to 6.46

Employee 1.70

Self-employed; rate (before residual and health and safety elements) varies according to industry class, incorporating income and non-income benefit portions (the calculation of which depends on the individual’s earnings) and according to age and abatement factors if a guaranteed amount of weekly compensation is purchased 0.03 to 6.46

E. Miscellaneous matters

Antiavoidance legislation. Legislation permits the Inland Revenue Department to void any arrangement made or entered into if tax avoidance is one of the purposes or effects of the arrangement and is not merely incidental.

Branch-equivalent system. Under the branch-equivalent system of taxation, New Zealand residents that have interests in the income of a controlled foreign company (CFC) are taxed on attributed
income as if the CFC is a branch of a New Zealand resident company. A CFC is a foreign company under the control of five or fewer New Zealand residents or a group of New Zealand resident directors. In general, for the purposes of the CFC rules, control is more than 50% ownership. A New Zealand resident with an income interest greater than 10% is required to calculate and include in income the attributed foreign income or loss of the CFC. Branch-equivalent losses are quarantined. The branch-equivalent system previously did not apply to interests in a CFC that was resident in a “grey list country” (Australia, Canada, Germany, Japan, Norway, Spain [from the 2006-07 income year], the United Kingdom or the United States), unless branch profits of the CFC benefited from a foreign tax exemption or certain other specified relief.

For taxpayers’ income years beginning on or after 1 July 2009, the CFC “grey list” exemption is abolished, except with respect to Australian CFCs, and has been replaced by an active income exemption which may apply to CFCs in any overseas jurisdiction. No attribution is required under the CFC rules if passive income is less than 5% of the CFC’s or a relevant group’s income. If the 5% threshold is exceeded, any attribution is limited to passive income. The rules defining passive income and calculating the percentage of a CFC’s passive income in relation to total income are complex.

**Foreign investment fund system.** New Zealand has a foreign investment fund (FIF) system that aims to change in value of a New Zealand resident’s interest in the FIF over an income year. The change in value may include income, capital growth and any exchange fluctuation.

The FIF regime generally applies to all offshore investments that are not CFC interests, including interests in foreign companies, foreign unit trusts, foreign life insurance, and foreign savings and superannuation funds.

The FIF rules do not apply to individuals owning FIF interests that cost less than NZ$50,000 or to certain FIF interests of more than 10% in grey list country companies (other than life insurance and superannuation funds for income years beginning before 1 July 2011). Exemptions are also provided for certain employment-related foreign superannuation schemes and foreign private annuities and pensions as well as for the first four years that individuals who become resident in New Zealand hold interests in foreign life insurance funds and superannuation schemes, if the individuals held these interests before they became resident in New Zealand. Proposals are currently being considered to remove superannuation scheme interests from the FIF regime but, at the time of writing, no specific legislation has been introduced.

As a result of reforms to the FIF rules, which generally apply for the 2007-08 and subsequent income years, a general exclusion of interests in grey list country companies no longer exists. Interests in certain Australian listed companies and unit trusts, certain venture capital investments in grey list country companies and shares held under certain employee share schemes may be excluded from the FIF rules if statutory criteria are met.
Initially, the four permissible methods for calculating FIF income were a branch-equivalent method, a deemed rate of return method, a comparison of opening and closing values, and a method based on accounting profits. Effective from the 2007-08 income year, two other alternatives could generally be used if the FIF interest held was less than 10%. These two methods were the 5% fair dividend rate method and the cost method.

An “active business” and “active income” exemption for FIF interests in companies of at least 10% replaces the grey list country exemption for income years beginning on or after 1 July 2011. An exemption is retained for FIF interests of at least 10% in Australian companies. Application of the outbound thin-capitalization rules (see Debt-to-equity ratios) is extended to residents with interests of at least 10% in FIFs that are exempt from attribution of FIF income under the Australian FIF exemption and to cases in which the “active income” method is used. The branch-equivalent and accounting profits methods are no longer available for taxpayers’ income years beginning on or after 1 July 2011, and use of the deemed rate of return method is more restricted. The 5% fair dividend rate method is the general default method if taxpayers with FIF interests of at least 10% do not have sufficient information, or do not want, to use the “active income” method to determine exempt or nonexempt status or to calculate any attributable FIF income.

**Portfolio investment entities.** Certain collective-investment entities that elect the Portfolio Investment Entity (PIE) regime are not taxable on gains on the disposal of New Zealand and certain Australian shares. In addition, their income may generally be taxed at the corporate tax rate or at rates approximating their individual investors’ marginal tax rates (which may be 0% for non-resident investors in certain types of PIEs that invest wholly or partly in assets outside New Zealand).

**Conduit tax relief.** Previously New Zealand resident companies could be relieved from tax on attributed foreign income arising under the CFC regime and on FIF income calculated under the branch-equivalent or accounting profits methods to the extent that they had nonresident shareholders. Interest allocation rules limited conduit relief if companies allocated an excessive amount of interest expense to their New Zealand operations in comparison to the amount of interest expense allocated to foreign investments that were granted relief under these rules.

The phase-out of the conduit tax relief regime (initiated in conjunction with the reform of the branch-equivalent system for CFC interests, effective from taxpayers’ income years beginning on or after 1 July 2009) was completed by the time taxpayers entered their first income years beginning on or after 1 July 2011 (for example, by 1 January 2012 for taxpayers with 31 December balance dates).

**Transfer pricing.** The transfer-pricing regime in New Zealand is aimed primarily at cross-border arrangements between associated parties. Taxpayers are able to adopt the method that produces the most reliable measure of arm’s length consideration. The allowable methods are the comparable uncontrolled price method, the resale price method, the cost-plus method, the profit-split method and the comparable profits method. Binding rulings with respect
to transfer-pricing issues are available from the Commissioner of Inland Revenue. New Zealand and countries with which New Zealand has concluded tax treaties may enter into multilateral advance pricing agreements under the transfer-pricing regime.

**Debt-to-equity ratios.** In conjunction with the transfer-pricing regime (see *Transfer pricing*), a thin-capitalization regime applies to New Zealand entities that are at least 50% owned or controlled by a single nonresident (however, interests held by persons associated with a nonresident may be included for the purpose of determining the nonresident’s level of control). This regime generally denies interest deductions to the extent that the New Zealand entity’s level of interest-bearing debt exceeds both a safe harbor debt to total assets ratio of 60% (effective from taxpayers’ 2011-12 income years; previously, the ratio was 75%), and 110% of the ratio of interest-bearing debt to total assets of the entity’s worldwide group. A netting rule excludes borrowings that are in turn loaned to the following:

- Nonresidents that are not carrying on business in New Zealand through a fixed establishment
- Nonassociated persons
- Associates that are subject to the thin-capitalization regime but are not in the lender’s New Zealand group

Specific rules and thresholds apply to registered banks.

As a result of changes enacted in October 2009, for thin-capitalization purposes, certain stapled debt securities and fixed-rate shares are included as debt, while investments in CFCs may be excluded from assets.

For income years beginning on or after 1 July 2009, dividend amounts paid on certain fixed-rate shares may also be added back when interest deductions are limited under the thin-capitalization rules.

Similar thin-capitalization rules are extended to New Zealand residents with income interests in CFCs, effective from their income years beginning on or after 1 July 2009. Under safe harbor rules, thin-capitalization rules will not limit interest deductions on outbound investment if the New Zealand group debt percentage does not exceed 75% and 110% of the worldwide group debt percentage. Additional exemptions with respect to outbound investment may apply in certain circumstances, including situations in which New Zealand group assets (generally excluding CFC investments) are at least 90% of the worldwide group assets. An exemption based on external interest (and related foreign-exchange variation) deductions for the New Zealand group not exceeding NZ$250,000 per year has been repealed for taxpayers’ income years beginning on or after 1 July 2011. The apportionment calculation with respect to outbound investment reduces any adjustment, on a tapering basis, if annual finance costs are between NZ$1 million and NZ$2 million and eliminate any adjustment if annual finance costs are below NZ$1 million.

For income years beginning on or after 1 July 2011, the above rules are extended to New Zealand residents with interests in FIFs that are at least 10% and that are subject to the new “active income” method or Australian exemptions from FIF income attribution.
### F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

(a) Interest paid to a contracting state or subdivision, to certain state financial institutions or with respect to certain state-guaranteed loans is exempt.

(b) No article of the treaty limits the rate applicable to interest or royalties, and neither is included in the treaty definition of business profits. The 15% rate provided by the principal tax act is therefore shown in the table.

(c) The rate is reduced to 10% for bank interest. Interest paid to certain government bodies or central banks may be exempt.

(d) See applicable footnotes to Section A.

(e) The rate is 10% for interest paid to banks and insurance companies.

(f) The rate is 10% for interest paid to financial institutions, including insurance companies, or if the interest relates to arm’s length sales on credit of equipment, merchandise or services. Interest paid to certain institutions of the government or the central bank is exempt.

(g) The 10% rate applies to payments for the use of copyrights, industrial, scientific or commercial equipment, films, tapes or other broadcast matter. The 15% rate applies to other royalties.
In August 2011, this rate was reduced from 10% with retrospective effect from 1 May 2010.

The rate may be reduced to 5% or 0% for company shareholders, depending on their level of ownership and certain other criteria.

No tax applies to interest paid to government bodies or to unrelated financial institutions in certain circumstances.

The rate may be reduced to 5% or 0% for company shareholders, depending on their level of ownership and certain other criteria. Dividends paid to certain government institutions are exempt.

The rate may be reduced to 5% for dividends paid to companies that have an interest of at least 10% in the payer.

Interest paid to certain government institutions is exempt.

A new treaty was signed with Canada on 3 May 2012, but it is not yet in force. It reduces the tax rates applicable to dividends (0% for certain government bodies if the competent authorities so agree; 5% if paid to companies holding at least 10% of the voting power; otherwise, 15%), interest (0% for loans made by certain export development bodies or unrelated financial institutions; otherwise, 10%) and royalties (5% on certain copyright, cultural, software and patent royalties; otherwise, 10%).

The rate may be reduced to 5% if the dividends are paid to companies that have an interest of at least 25% in the payer and if the dividends are exempt in the recipient's country.

The rate may be reduced to 5% or 0% for company shareholders, depending on their level of ownership and certain other criteria. The reduced rates were announced in August 2011 and apply retrospectively, effective from 1 May 2010.

(a) This withholding tax applies to residents and nonresidents.
(b) For income derived from real estate property, the tax base equals the net income after applying a deduction of 30% of the gross income.
(c) This withholding tax is creditable against income for residents and final for nonresidents.

B. Taxes on corporate income and gains
Corporate income tax. The Nicaraguan tax system is based on an extended territorial principle. The following items are subject to tax:
• Compensation of employees
• Income from economic activities
• Income from capital income, capital gains and capital losses

Corporate income tax rates. The standard corporate tax rate is 30% of taxable income for both resident and nonresident companies.
Companies operating under certain special incentive regimes, such as Free Trade Zone companies, are exempt from income tax.

After the third year of operations, companies are subject to tax on their Nicaraguan-source income, which equals the higher of the following:

- 30% of net taxable income
- 1% of immovable and movable. gross taxable income (income subject to withholding at source is not included in the tax base)

Certain exceptions may be stated in the law.

**Capital gains.** Capital gains are realized gains resulting from the transfer of immovable and movable assets, goods and rights of the taxpayer. The following are the capital gain tax rates:

- Transfer of assets entrusted: 5%
- Other capital gains derived by residents and nonresidents: 10%

An advance payment is required on the transfer of property subject to public registration. This payment ranges from 1% to 4% of the transfer value. It is creditable against the capital gains tax.

**Administration.** The statutory tax year runs from 1 January through 31 December. However, taxpayers may request a special fiscal year.

Annual income tax returns must be filed within three months after the end of the tax year.

Companies must make monthly advance payments for purposes of income tax equal to 1% of their monthly gross income. The advance payments are applied to the annual income tax liability. In addition, for large collectors of the excise tax and financial institutions supervised by the Superintendency of Banks and Other Financial Institutions, the minimum monthly payment is the greater of 30% of monthly profits and 1% of gross monthly income. The advance payments are applied to the annual income tax liability.

**Dividends.** A 10% withholding tax is imposed on dividends paid to resident and nonresident individuals and business entities.

**Foreign tax relief.** Nicaragua taxes only income derived from Nicaraguan sources. Consequently, the domestic income tax law does not grant any relief for foreign taxes paid.

**C. Determination of trading income**

**General.** Taxable income is calculated in accordance with generally accepted accounting principles (GAAP) or International Financial Reporting Standards (IFRS), subject to adjustments required by the Nicaraguan income tax law.

In general, taxable income includes Nicaraguan-source income derived from goods, services, assets, rights and any other economic activity in Nicaragua, even if such income is accrued or realized abroad, and regardless of whether the taxpayer has physical presence in the country.

Allowable deductions generally include all expenses necessary to generate taxable income.
Expenses paid or credited by a resident taxpayer or a permanent establishment of a nonresident to a person or entity resident in a tax haven are subject to a final withholding tax rate of 17%.

**Inventories.** If inventories are a significant element in the determination of a company’s taxable income, the company must value each item based on the lower of the acquisition cost or market price. The law allows companies to use the weighted-average cost, first-in, first-out (FIFO) or last-in, first-out (LIFO) methods to determine the cost of merchandise sold. The tax administration may authorize other methods.

**Provisions.** In general, companies may deduct 2% of the balance of accounts receivable from customers.

Banks may deduct increases in minimum reserves for debtors in accordance with the standards of the Superintendent of Banks in Nicaragua.

**Tax depreciation.** Regulations under the income tax law allow the use of the straight-line method to calculate depreciation. However, the tax authorities may authorize certain exporters to use accelerated depreciation methods. The regulations containing the applicable straight-line rates are pending.

**Relief for losses.** Companies may carry forward their net operating losses for three years to offset all types of income. Net operating losses may not be carried back.

**Groups of companies.** Nicaraguan law does not allow the filing of consolidated income tax returns or provide any other tax relief to consolidated groups of companies.

**D. Other significant taxes**

The following table summarizes other significant taxes.

**E. Foreign-exchange controls**

The Nicaraguan currency is the córdoba (C$). As of 31 December 2012, the exchange rate for the córdoba against the U.S. dollar was C$24.1255 = US$1.

No restrictions apply to foreign-trade operations or to foreign-currency transactions.

**F. Tax treaties**

Nicaragua has not entered into any income tax treaties with other foreign countries.

(a) Applicable to residents and nonresidents.
(b) For nonresidents, these are final taxes. For resident companies, only the withholding tax on dividends is a final tax.
(c) Certain dividends are exempt (see Section B).
(d) Certain interest is exempt (see Section C).

B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to tax on their worldwide profits. Nonresident companies are taxed on the profits of their operations in Nigeria only. However, if a nonresident company performs a contract for survey, deliveries, installation or construction, the entire contract price is taxable in Nigeria, regardless of whether a portion of the contract is performed outside Nigeria. Assessable profits from all sources accruing in the accounting period are aggregated for tax purposes. Total profit on which tax is assessed is calculated by deducting capital allowances (tax depreciation) from the aggregate of assessable profits.

A company is resident in Nigeria if it is incorporated in Nigeria. A foreign company that intends to carry on a trade or business in Nigeria is required by the Companies and Allied Matters Act to incorporate a Nigerian company.

**Rates of corporate tax**

*Corporate income tax.* The corporate income tax rate is 30%. However, tax is assessed at a reduced rate of 20% for a Nigerian company’s first five tax years if it is engaged in manufacturing or agricultural production or in the mining of solid materials, and if its turnover (gross sales) is under NGN 1 million.

*Tax holidays.* Limited liability companies registered in Nigeria may apply for pioneer status, which is granted to companies in industries that are considered vital to Nigeria’s economic development. A company with pioneer status is granted a tax holiday of up to three years, with a possible extension for two years.

Approved enterprises operating in export free-trade zones are exempt from all federal, state and local government taxes, levies and rates. New export-oriented companies located outside free-
trade zones may qualify for a three-year tax holiday if they satisfy certain conditions. Under the Companies Income Tax (Amendment) Act of 2007, the exempt profit list also includes the profit of a company established in an Export-Processing Zone (EPZ) or Free-Trade Zone (FTZ) that exports 100% of its production.

New companies engaged in the mining of solid minerals also benefit from a tax holiday during their first three years of operations. Under the Mining and Minerals Act 2007, the tax holiday can be extended for two years.

Oil and gas companies. Companies engaged in the marketing and distribution of gas for domestic and industrial use are subject to the Companies Income Tax Act.

Beginning on the date they begin production, companies engaged in the marketing and distribution of gas for domestic and industrial use and companies engaged in industrial projects that use gas benefit from an initial three-year tax holiday, which is renewable for an additional two years after the tax holiday expires if they are performing satisfactorily. For expenditure on plant and machinery, the companies benefit from an annual allowance of 90% in the year of expenditure and 9% in the second year. In addition, they may claim a 15% investment allowance, which does not reduce the cost of the asset for the purposes of calculating the annual allowance.

All expenditure necessarily incurred to separate gas from the reservoir (underground rock formation containing crude oil or gas), to convert it into usable product and to deliver gas to points of use is considered part of the capital investment for oil-field development, which may be charged against profits.

A gas-flaring penalty is imposed on oil companies for wasteful disposals of gases through burning in oil fields and refineries.

Companies engaged in gas exploration are subject to the Companies Income Tax Act.

Petroleum- and gas-producing companies are subject to Petroleum Profit Tax at a rate of 85%. However, a concessionary rate of 65.75% applies if certain conditions are met.

Minimum tax. Companies are required to pay minimum corporate tax if the minimum tax is greater than their actual tax liability. The minimum tax is computed by first determining the highest of the following:

- 0.5% of gross profit
- 0.5% of net assets
- 0.25% of paid-up capital
- 0.25% of turnover, up to NGN 500,000

The company then adds 0.125% of turnover exceeding NGN 500,000 to this figure to determine the minimum tax.

The minimum tax does not apply to companies until the fifth year after the commencement of business. Companies engaged in an agricultural trade or business and companies with at least 25% imported equity capital are exempt from the minimum tax requirement.
If minimum tax is payable, capital allowances calculated for the year, together with capital allowances brought forward, are reduced by the taxable profit for the year.

**Withholding tax.** The withholding tax rate on dividends and interest for residents and for recipients in nontreaty countries is generally 10%. However, certain dividends are exempt from tax (see Dividends). Taxable interest income includes interest on all time deposits with banks and on savings passbook accounts of NGN 50,000 and above. Certain types of interest income are exempt from tax (see Section C). Tax withheld from dividends and interest accruing to nonresident companies is regarded as a final tax. For resident companies, the withholding tax from dividends is also regarded as a final tax, but they must account for other investment income in their tax returns and claim credit for tax withheld. Both resident and nonresident companies must include in their tax returns earned income subject to withholding and claim the tax withheld as a credit.

**Capital gains.** Capital gains tax is chargeable on the gains accruing from the disposal of all types of assets, including the following:

- Land and buildings
- Options, debts and other property rights
- Any currency other than Nigerian currency
- Any form of property created by the person disposing of it or otherwise coming to be owned without being acquired
- Movable assets (motor vehicles)

For resident companies, disposals of assets located outside Nigeria are taxable regardless of whether gains accruing from such disposals are received in Nigeria. For nonresident companies, only gains accruing in Nigeria are taxable.

Taxable gain is the difference between the consideration accruing on the disposal of an asset and its original cost together with expenses incurred on its disposal.

Any loss incurred on a disposal may not be offset against the gains accruing from the disposal of another asset unless the two disposals result from a single transaction. Taxable gains are assessed in the year of disposal of an asset. The capital gains tax rate is 10%.

A company may claim an exemption if the proceeds from the disposal of an asset used in a trade or business are applied within a year before or after the disposal toward the acquisition of a similar asset to be used in the same trade or business.

**Dividends.** Dividends are generally subject to a final 10% withholding tax.

Dividends distributed from pioneer profit (see Rates of corporate tax) or from after-tax petroleum profit are exempt from tax.

**Administration**

**Tax authority:** The Federal Inland Revenue Service (Establishment) Act, which was enacted in 2007, established the Federal Inland Revenue Service (FIRS). The FIRS is responsible for assessing, collecting and accounting for tax revenue accruable to the federal government of Nigeria.
Filing and tax payment. The FIRS is responsible for administering and collecting companies’ income tax, petroleum profits tax (see Section D) and capital gains tax imposed on companies.

The tax year is from 1 January to 31 December. Under the self-assessment regime modified by the government in December 2011, all companies subject to tax must compute their tax liability, make payment and file their tax return with the FIRS on or before the due date. The due date for filing of the company income tax return is six months after the end of its accounting year or within 18 months after its date of incorporation. A penalty of NGN 25,000 is imposed for the first month of lateness in filing a return and NGN 5,000 for each subsequent month.

A taxpayer must apply to the tax authority for the making of installment payments. The final installment must be paid not later than the due date. The tax authority may grant approval for three installment payments beginning from the due date such that the last installment is paid not later than two months after the due date. Companies that do not comply with the requirement to file self-assessment forms are assessed tax based on their tax returns filed with the FIRS. These companies may be required to pay their tax liability within two months after the date the assessment notice is served.

A 10% penalty and interest at the prevailing bank lending rate are imposed for late payment of assessed tax.

Tax refunds. The reforms to the tax system in Nigeria included the introduction of a tax refund system. After auditing a company’s documents, the FIRS determines whether an overpayment was made.

Advance tax on dividends. A company planning to distribute dividends must first pay tax on the taxable profits at the corporate income tax rate to ensure that the dividends are paid with after-tax profits. This tax on dividends is considered an advance tax payment. If dividends are distributed from profit that is not subject to tax, the tax paid on dividends is not regarded as an advance payment of tax, and it is not refundable.

Foreign tax relief. Foreign tax on the profits or capital gains of a Nigerian company may be credited against the company’s income tax or capital gains tax on the same profit or gains. If a company receives a dividend from a foreign company in which it has at least 10% of the voting power, it may also obtain relief for the underlying foreign tax on the profits out of which the dividend is paid. Foreign tax relief may not exceed the Nigerian tax levied on the profit or gains.

C. Determination of trading profit

General. Taxable income is based on financial statements prepared on commercial principles (that is, local generally accepted accounting principles [GAAP] or International Financial Reporting Standards [IFRS]). Trading profit is adjusted for deductions not allowed for tax purposes and for profits or gains not subject to tax.
Investment income earned abroad is tax-exempt if it is brought into Nigeria through the Central Bank of Nigeria or through any bank or other corporate body appointed by the Minister of Finance as an authorized dealer.

Interest received by banks on loans with a moratorium of at least 18 months is exempt from tax if the loans are granted to agricultural trades or businesses, to companies or individuals engaged in the manufacturing of plant and machinery in Nigeria or for working capital for certain cottage industries established under the family economic development program.

Interest on bank loans granted for the manufacturing of goods for export and interest on foreign loans are tax-exempt in accordance with the following percentages.

<table>
<thead>
<tr>

<td>0</td>
</tr>
</tbody>
</table>

Interest earned by a nonresident company on a deposit account consisting entirely of foreign-currency transfers is exempt from tax. In addition, interest on foreign-currency accounts maintained or operated in Nigeria is exempt from tax.

Expenses must be reasonable and incurred wholly, exclusively, necessarily and reasonably for the purpose of the trade or business.

Deductions are not allowed for the following:
- Losses reimbursable under an insurance contract or a contract of indemnity
- Donations made to public bodies and institutions not approved by the government
- Subscriptions to social organizations

Limitations apply to the deductibility of the following:
- Entertainment expenses
- Donations to approved bodies and institutions
- Management fees
- Contributions to the National Pension Fund Scheme

**Inventory.** The tax law does not prescribe any basis for the valuation of inventory, provided a method is used consistently from year to year. However, subject to certain exceptions stated in the Statement of Accounting Standards issued by the Financial Reporting Council (formerly Nigerian Accounting Standards Board), stocks must be valued at the lower of cost or net realizable value. The last-in, first-out (LIFO) method is discouraged.

**Tax depreciation (capital allowances)**

*Initial and annual allowances.* Annual allowances are granted under the straight-line method. The company deducts the initial allowance from the asset’s cost once in the life of an asset and then applies the annual allowance rate to the balance. The following are rates of initial and annual allowances.
<table>
<thead>
<tr>
<th>Qualifying expenditure</th>

<td>25</td>
<td>20</td>
</tr>
</tbody>
</table>

**Investment allowances.** An investment allowance at a rate of 10% is granted for expenditure incurred on plant and equipment. If the expenditure is for replacement of obsolete industrial plant and equipment, the rate is increased to 15%. The investment allowance is not deducted from the cost of assets. It is granted in addition to the initial allowance. An investment allowance may be carried forward if it is not completely used to offset income in the year of the acquisition of the asset.

Initial and annual allowances are recaptured on the sale of an asset if the sales price exceeds the written-down tax value. The amount recaptured may not exceed the initial and capital allowances granted. Amounts recaptured are taxed as ordinary income at the regular corporate tax rates.

**Investment tax relief.** Investment tax relief is similar to the rural investment allowance. It is granted for expenditures on certain infrastructural facilities by companies established at least 20 kilometers (12.4 miles) from such facilities. The following are the types of facilities and the applicable percentages of the relief:

- Electricity: 50%
- Water: 30%
- Tarred road: 15%

The investment tax relief may be claimed for three years. A company that has enjoyed or is enjoying pioneer status (see Section B) may not claim the relief. A company may claim both the investment tax relief and the rural investment allowance (see Tax depreciation [capital allowances]) at the same time.

Companies engaged in research and development activities may claim a tax credit of 20% of their qualifying capital expenditure.
Relief for losses. Trade and business losses may be carried forward to offset profits of the same trade or business for an unlimited number of years. Losses may not be carried back.

Groups of companies. Each company must file a separate tax return. No provisions exist for filing consolidated returns or offsetting losses and capital allowances against profits within a group of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>

</tr>
<tr>
<td>Information technology levy; imposed on before-tax profits of specified companies and enterprises with annual turnover of NGN 100 million or more</td>
<td>1</td>
</tr>
</tbody>
</table>

E. Miscellaneous matters

Foreign-exchange controls. Foreign investors that intend to set up businesses in Nigeria must register with the Nigeria Investment Promotion Commission and obtain a Certificate of Capital Importation from authorized foreign-exchange dealers through whom foreign currency is imported. This certificate, which serves as documentary evidence of the importation of the currency, guarantees the unconditional transferability of dividends and interest and the repatriation of capital through authorized dealers. Companies are free to determine the amount of dividends distributed. Borrowing funds to remit dividends is not allowed. The application to remit dividends must be submitted with the Certificate of Capital Importation and a tax clearance certificate, which establishes that tax was paid or that no tax is due with respect to the dividends to be remitted. If the appropriate amount of tax is withheld from dividends and interest paid to nonresidents, no additional tax clearance is required.

Remittances of royalties and fees require the approval of the underlying agreements by the National Office for Technology Acquisition and Promotion. Permission is granted if the royalties and fees are within certain prescribed limits.
Importation and exportation of the naira (NGN), the Nigerian currency, are prohibited.

Exporters of non-oil products must open a local bank account marked “Export Proceeds” and must credit their foreign-currency export earnings to this account.

**Antiavoidance provisions.** If the Chairman of the FIRS sends a written request to a bank for information pertaining to its customers, the bank must comply with the request. A government ministry, government agency or bank entering into a transaction with any company is required to demand a tax clearance certificate from such company. The certificate must provide evidence of tax payment or tax exemption during the preceding three years.

**Transfer pricing.** Under the tax law, if the tax authority determines that transactions between two related companies are artificial and fictitious and are carried out to purposely reduce the tax liability of either of the companies, the tax authority may direct appropriate adjustments to ensure that the proper amount of tax is paid.

**Debt-to-equity rules.** No tax-related thin-capitalization rules apply in Nigeria.

A. At a glance

Corporate Income Tax Rate (%) 35 (a)
Capital Gains Tax Rate (%) 35 (a)
Branch Income Tax Rate (%) 35 (a)
Withholding Tax (%)
Dividends 30 (a)(b)
Interest 30 (a)(b)(c)
Royalties from Patents, Know-how, etc. 30 (a)(b)
Branch Profits Tax 30 (a)(d)
Net Operating Losses (Years)
Carryback 2
Carryforward 20 (e)

(a) Income tax on income sourced within the Northern Marianas that exceeds gross revenue tax on the same income is subject to a rebate. For details, see Section B.
(b) Imposed on payments to nonresidents. See Section E.
(c) Bank deposit interest not effectively connected with a trade or business in the Northern Marianas and interest on certain portfolio debt obligations are exempt from withholding tax.
(d) This is the branch profits tax, imposed on the earnings of a foreign corporation attributable to its branch, reduced by earnings reinvested in the branch and increased by reinvested earnings withdrawn.
(e) No deduction is available for net operating losses arising before 1 January 1985.

B. Taxes on corporate income and gains

Corporate income tax. Corporations are subject to a gross revenue tax. In addition, the Commonwealth of the Northern Mariana Islands (CNMI) has adopted the U.S. Internal Revenue Code as its income tax law. For a description of the income taxation of resident corporations doing business in CNMI, refer to the chapter
in this book on the United States and substitute “CNMI” for each reference to the “United States.”

To avoid double taxation, a credit against income tax is given for gross revenue tax paid or accrued on income earned within the Northern Marianas. If income tax on Northern Marianas income exceeds the gross revenue tax, the company is entitled to a rebate of specified percentages of the excess. The following are the rebate percentages:

- 90% of the excess up to $20,000
- 70% of the next $80,000
- 50% of the excess over $100,000

Income earned by residents from foreign sources is subject to the full amount of tax under the Internal Revenue Code (I.R.C.). A special rule prevents U.S. residents from taking advantage of the rebate by changing their residence to report gains on the sale of U.S. property or stock in U.S. companies on their Northern Marianas tax return.

**Gross revenue tax.** A gross revenue tax is imposed on the gross income of businesses from their activities and investments in the CNMI. The gross revenue tax rates are shown in the following table.

<table>
<thead>
<tr>
<th>Gross revenue exceeding total gross income</th>
<th>Rate on total gross income %</th>
</tr>
</thead>
<tbody>
<tr>
<td>$0 – 5,000</td>
<td>0</td>
</tr>
<tr>
<td>5,000 – 50,000</td>
<td>1.5</td>
</tr>
<tr>
<td>50,000 – 100,000</td>
<td>2</td>
</tr>
<tr>
<td>100,000 – 250,000</td>
<td>2.5</td>
</tr>
<tr>
<td>250,000 – 500,000</td>
<td>3</td>
</tr>
<tr>
<td>500,000 – 750,000</td>
<td>4</td>
</tr>
<tr>
<td>750,000 –</td>
<td>5</td>
</tr>
</tbody>
</table>

These rates apply to total gross income and are not progressive.

**Tax incentives.** The CNMI, through the Commonwealth Development Authority, is authorized by law to grant tax rebates to qualified investors. The Commonwealth Development Authority grants Qualifying Certificates (QCs) for tax incentives to businesses engaged in activities that are deemed to be beneficial to the development of the CNMI economy. The incentives are aimed primarily at franchise restaurants, water parks, aquariums, cultural centers, theme parks, resort hotels, golf courses, convention centers, dinner theaters, special events, CNMI-based airlines, manufacturing of high-technology products and Internet-related businesses. In general, QCs can provide rebates of up to 100% of income tax paid for up to 25 years.

**Basis of qualified fresh-start assets.** Under the Northern Marianas Territorial Income Tax, effective 1 January 1985, income from pre-1985 appreciation of Northern Marianas property is not subject to income tax. For the purposes of determining gain and allowances for depreciation and amortization, the basis of the Northern Marianas real and personal property is the greater of the basis determined under the I.R.C. or the fair-market value as of 1 January 1985. Fair-market value can be established either by independent appraisal or by discounting the ultimate sales price back to 1 January 1985, using the discount factors specified by regulation. Currently, rates published by the U.S. Internal Revenue Service are used.
Administration. Income taxes are paid to the government of the Northern Marianas, which administers its tax system. In general, the administration of the Northern Marianas tax is the same as in the United States, but estimated taxes are due on the last day of the month following the end of each quarter of the tax year. The income tax rebate is not available to reduce estimated tax payments.

Foreign tax relief. Foreign tax credits are available in the Northern Marianas to reduce income tax in the same manner as foreign tax credits in the United States. The credits do not reduce gross revenue tax, which is imposed on CNMI-source income only.

C. Other significant taxes

The following table summarizes other significant taxes.

</tr>
</tbody>
</table>

D. Miscellaneous matters

Foreign-exchange controls. CNMI does not impose foreign-exchange controls, but large currency transfers must be reported to the U.S. Treasury Department.

Transfer pricing. The U.S. transfer-pricing rules apply in CNMI.

Debt-to-equity rules. The U.S. thin-capitalization rules apply in CNMI.

E. Treaties and withholding taxes

CNMI does not participate in the U.S. income tax treaties and has not entered into any treaties with other countries. The withholding tax rate for dividend, interest and royalty payments to nonresidents is 30%, but the rebate discussed in Section B is available if a recipient files a CNMI income tax return. In general, no withholding tax is imposed on payments between CNMI and the United States or Guam, unless the recipient exceeds certain foreign ownership and income limitations.

Unless otherwise indicated, the rates and thresholds stated in the chapter apply to 2012 income. Certain proposed tax measures for 2013 are also mentioned in the chapter. Changes with respect to the taxation of 2013 income may be introduced with retroactive effect until 31 December 2013.

A. At a glance

Corporate Income Tax Rate (%) 28
Capital Gains Tax Rate (%) 28
Branch Tax Rate (%) 28
Withholding Tax (%)
  Dividends 25 (a)
  Interest 0
  Royalties from Patents, Know-how, etc. 0
  Branch Remittance Tax 0
Net Operating Losses (Years)
  Carryback 0 (b)
  Carryforward Unlimited

(a) This tax applies to dividends paid to nonresident shareholders. Dividends paid to corporate shareholders resident and really established in member states of the European Economic Area (EEA) agreement (including the European Union [EU], Iceland and Liechtenstein) are exempt from withholding tax.

(b) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. In general, resident companies are subject to corporate income tax on worldwide income. However, profits and losses on upstream petroleum activities in other jurisdictions are exempt from Norwegian taxation. Nonresident companies are subject to corporate income tax on income attributable to Norwegian business operations.

A company is tax resident in Norway if it is legally incorporated in Norway or if its central management and control are effectively exercised in Norway.

Rates of corporate tax. For 2012, the corporate tax rate is 28%. It is proposed that the rate remain the same for 2013.

In addition to the general income tax of 28%, a special petroleum tax of 50% applies to income from oil and gas production and from pipeline transportation.

Qualifying shipping companies may elect a special shipping tax regime instead of the ordinary tax regime. Under the shipping tax regime, profits derived from shipping activities are exempt from income tax. However, companies electing the shipping tax regime must pay an insignificant tonnage excise tax. Financial income is taxed at a rate of 28%.

Capital gains. In general, capital gains derived from the disposal of business assets and shares are subject to normal corporate taxes. However, for corporate shareholders, capital gains derived from the sale of shares in limited liability companies, partnerships and certain other enterprises that are qualifying companies under the tax exemption system are exempt from tax. This tax exemption applies regardless of whether the exempted capital gain is derived from a Norwegian or a qualifying non-Norwegian company. In general, life insurance companies and pension funds are not covered by the tax exemption regime.
The exemption applies regardless of the ownership participation or holding period if the shares are in a company resident in another EEA member state. (The EEA includes the EU, Iceland, Liechtenstein and Norway.) However, if the EEA country is regarded as a low-tax jurisdiction, a condition for the exemption is that the EEA resident company is really established in its home country. The exemption does not apply to capital gains on the alienation of shares in the following companies:

- Companies resident outside the EEA in low-tax jurisdictions, as defined in the Norwegian tax law regarding controlled foreign companies (CFCs; see Section E)
- Companies resident outside the EEA if the corporate shareholder has not held at least 10% of the capital and the votes in the company for more than two years preceding the alienation

The right of companies to deduct capital losses on shares is basically eliminated to the same extent that a gain would be exempt from tax.

The exit from Norwegian tax jurisdiction of goods, merchandise, intellectual property, business assets and other items triggers capital gains taxation as if such items were sold at the fair market price on the date of exit.

**Administration.** The annual tax return is due 31 March for accounting years ending in the preceding calendar year. The deadline is extended to 31 May if the tax return is submitted electronically. Assessments are made in the fourth quarter of the year in which the return is submitted (normally October). Tax is paid in three installments. The first two are paid on 15 February and 15 April, respectively, each based on ½ of the tax due from the previous assessment. The last installment represents the difference between the tax paid and the tax due, and is payable three weeks after the issuance of the assessment. Interest is charged on residual tax.

**Dividends.** An exemption regime with respect to dividends on shares is available to companies. However, the 100% tax exemption is limited to 97% if the recipient of the dividends does not hold more than 90% of the shares in the distributing company and a corresponding part of the votes that may be given at the general meeting (that is, the companies do not constitute a tax group of companies). In such cases, the remaining 3% of the dividends is subject to 28% taxation, which results in an effective tax rate of 0.84%.

The tax exemption applies regardless of the ownership participation or holding period if the payer of the dividends is a resident in an EEA member state. However, if the EEA country is regarded as a low-tax jurisdiction, a condition for the exemption is that the EEA resident company be really established in its home country and that Norway and the EEA country have a treaty containing exchange-of-information provisions.

The exemption does not apply to dividends paid by the following companies:

- Companies resident outside the EEA in low-tax jurisdictions as defined in the Norwegian tax law regarding CFCs (see Section E)
- Other companies resident outside the EEA if the recipient of the dividends has not held at least 10% of the capital and the votes of the payer for a period of more than two years that includes the distribution date
Dividends paid to nonresident shareholders are subject to a 25% withholding tax. The withholding tax rate may be reduced by tax treaties. Dividends distributed by Norwegian companies to corporate shareholders resident in EEA member states are exempt from withholding tax. This exemption applies regardless of the ownership participation or holding period. However, a condition for the exemption is that the EEA resident company be really established in its home country.

The so-called correction income tax system was abolished, effective from 2012.

**Foreign tax relief.** A tax credit is allowed for foreign tax paid by Norwegian companies, but it is limited to the proportion of the Norwegian tax that is levied on foreign-source income. Separate limitations must be calculated according to the Norwegian tax treatment of the following two different categories of foreign-source income:

- Income derived from low-tax jurisdictions and income taxable under the CFC rules
- Other foreign-source income

For dividend income taxable in Norway, Norwegian companies holding at least 10% of the share capital and the voting rights of a foreign company for a period of more than two years that includes the distribution date may also claim a tax credit for the underlying foreign corporate tax paid by the foreign company, provided the Norwegian company includes an amount equal to the tax credit in taxable income. In addition, the credit is also available for tax paid by a second-tier subsidiary, provided that the Norwegian parent indirectly holds at least 25% of the second-tier subsidiary and that the second-tier subsidiary is a resident of the same country as the first-tier subsidiary. The regime also applies to dividends paid out of profits that have been retained by the first- or second-tier subsidiary for up to four years after the year the profits were earned. The tax credit applies only to tax paid to the country where the first- and second-tier subsidiaries are resident.

**C. Determination of taxable income**

**General.** Although taxable income is based on book income shown in the annual financial statements (which must be prepared in accordance with generally accepted accounting principles), the timing of income taxation is based on the realization principle. Consequently, the basic rules are that an income is taxable in the year in which the recipient has obtained an unconditional right to receive the income, and an expense is deductible in the year in which the payer has incurred an unconditional obligation to pay the expense. In general, all expenses, except gifts and entertainment expenses, are deductible.

**Inventory.** Inventory is valued at cost, which must be determined on a first-in, first-out (FIFO) basis.

**Depreciation.** Depreciation on fixed assets must be calculated using the declining-balance method at any rate up to a given maximum. Fixed assets (with a cost of more than NOK 15,000 and with a useful life of at least 3 years) are allocated to one of the following 10 different groups.
Group | Maximum depreciation rates (%)
-------|--------------------------
A Office equipment and similar items | 30
B Acquired goodwill | 20
C Trailers, trucks, buses, taxis and vehicles for the transportation of disabled persons | 20
D Cars, tractors, other movable machines, other machines, equipment, instruments, furniture, fixtures and similar items | 20
E Ships, vessels, drilling rigs and similar items | 14
F Aircraft and helicopters | 12
G Installations for transmission and distribution of electric power, electronic equipment in power stations and such production equipment used in other industries | 5
H Industrial buildings and industrial installations, hotels, rooming houses, restaurants and certain other structures
   Useful life of 20 years or more | 4
   Useful life of less than 20 years | 10
I Office buildings | 2
J Technical installations in buildings | 10

Assets in groups A, B, C and D are depreciated as whole units, while assets in groups E, F, G, H, I and J are depreciated individually.

If fixed assets in groups A, B, C and D are sold, the proceeds reduce the balance of the group of assets and consequently the basis for depreciation. If a negative balance results within groups A, C or D, part of the negative balance must be included in income. In general, the amount included in income is determined by multiplying the negative balance by the depreciation rate for the group. However, if the negative balance is less than NOK 15,000, the entire negative balance must be included in taxable income.

A negative balance in one of the other groups (B, E, F, G, H, I and J) must be included in a gains and losses account. Twenty percent of a positive balance in this account must be included annually in taxable income.

Relief for losses. A company holding more than 90% of the shares in a subsidiary may form a group for tax purposes. Intragroup contributions to set off profits in one company against losses in another may be made if included in the statutory accounts. Alternatively, losses may be carried forward indefinitely. Losses can only be carried back when a business is terminated and then only against profits of the preceding two years.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax, on any supply of goods and services, other than an exempt supply, in Norway</td>
<td>25</td>
</tr>
<tr>
<td>General rate</td>
<td>25</td>
</tr>
<tr>
<td>Articles of food</td>
<td>15</td>
</tr>
<tr>
<td>Passenger transportation</td>
<td>8</td>
</tr>
</tbody>
</table>
Nature of tax

Social security contributions, on all taxable salaries, wages and allowances, and on certain fringe benefits; paid by
- Employer (general rates; lower in some municipalities and for employees age 62 and over) 14.1
- Employee (expatriates liable unless exempt under a social security convention) 7.8
- Professional income 11
- Pensioners and persons under 17 years old 3

E. Miscellaneous matters

Antiavoidance legislation. Based on general antiavoidance principles, substance prevails over form. The tax authorities may disregard transactions or structures if the dominant motive is to save taxes and if the tax effects of entering into the transaction or structure is regarded as disloyal to the tax system.

Foreign-exchange controls. Norway does not impose foreign-exchange controls. However, foreign-exchange transactions must be carried out by approved foreign-exchange banks.

Debt-to-equity rules. Norway does not have statutory thin-capitalization rules. Based on general antiavoidance principles, the tax authorities may deny an interest deduction on a case-by-case basis if they find that the equity of the company is not sufficient (for example, the Norwegian debtor company is not able to meet its debt obligations). Effective from 1 January 2007, thin-capitalization rules within the petroleum tax sector were replaced by an allocation rule that regulates the deductibility of interest expenses for income subject to petroleum tax.

Controlled foreign companies. Norwegian shareholders in controlled foreign companies (CFCs) resident in low-tax jurisdictions are subject to tax on their allocable shares of the profits of the CFCs, regardless of whether the profits are distributed as dividends. A CFC is a company of which 50% or more of its shares is owned directly or indirectly by Norwegian residents. A low-tax jurisdiction is a jurisdiction with a corporate tax rate that is less than two-thirds of the Norwegian tax rate (that is, less than 18.66%). The CFC rules do not apply to the following CFCs:
- A CFC resident in a country with which Norway has entered into a tax treaty if the income of the CFC is not of a predominantly passive nature
- A CFC resident in an EEA member country if such CFC is really established in its home country and if Norway and the home country have entered into a treaty containing exchange-of-information provisions

The losses of a CFC may not offset the non-CFC income of an owner of the CFC, but they may be carried forward to offset future profits of the CFC.

Transfer pricing. Norwegian law allows the tax authorities to impute arm’s length prices if transactions between related parties are not considered to be at arm’s length.
As an attachment to the annual tax return, Norwegian companies and Norwegian permanent establishments must report summary information about transactions with affiliated companies.

Norwegian companies and Norwegian permanent establishments must prepare and maintain written documentation describing certain transactions with related parties. To avoid a deemed tax assessment, such documentation must be presented to the tax authorities no later than 45 days after it has been requested. The statutory limitation for providing such documentation is 10 years.

Companies belonging to a group of companies with less than 250 employees may be exempted from the documentation requirement if the group has sales revenue of less than NOK 400 million or a balance sheet total of less than NOK 350 million. The exemption does not apply if the Norwegian entity has transactions with related parties located in countries from which Norwegian tax authorities cannot claim exchange of information under a treaty. The exemption also does not apply to companies subject to tax under the Norwegian Petroleum Tax Act.

F. Treaty withholding tax rates

Interest and royalties paid to foreign recipients are not subject to withholding tax under Norwegian domestic law. Consequently, the following table provides treaty withholding tax rates for dividends only.

<table>
<thead>
<tr>
<th>Dividends (a)</th>
<th>Normal rate</th>

</table>

(a) Dividends paid to corporate residents of EEA member states are exempt from withholding tax if the EEA resident company is really established in its home country.

(b) A revision of this treaty is currently being negotiated.

(c) The treaty withholding rate is increased if the recipient is not a company owning at least 25% of the distributing company.

(d) The treaty withholding rate is increased if the recipient is not a company owning at least 10% of the distributing company.

(e) Norway honors the Czechoslovakia treaty with respect to the Slovak Republic. Norway has entered into a tax treaty with the Czech Republic. The withholding tax rates under the Czech Republic treaty are shown in the above table.

(f) Norway honors the suspended Yugoslavia treaty with respect to Bosnia-Herzegovina (effective from 2009), Croatia, and Serbia. Norway had honored the suspended Yugoslavia treaty with respect to the Union of Serbia and Montenegro based on an exchange of notes. However, when the Union of Serbia and Montenegro was dissolved on 3 June 2006, the Norwegian Ministry of Foreign Affairs considered Serbia to be the successor state. Accordingly, the tax treaty applied to Serbia only. Based on an exchange of notes on 31 October 2011, the Yugoslavia tax treaty also applies to Montenegro, effective from 3 June 2006.

(g) The treaty withholding rate is increased if the recipient is not a company holding at least 50% of the voting power of the distributing corporation.

(h) The 5% rate applies if the recipient is a company owning at least 25% of the distributing company. The rate is increased to 10% if the recipient is a company owning at least 10%, but less than 25%, of the distributing company. For other dividends, the rate is 15%.

(i) The treaty withholding rate is increased to 15% if the recipient is not a corporation owning at least 25% of the distributing company. However, the rate is 5% if the recipient is a French corporation owning at least 10%, but less than 25%, of the distributing company.

(j) The 5% rate applies if the recipient of the dividends owns at least 70% of the capital of the Norwegian payer. The rate is increased to 10% if the recipient owns at least 25%, but less than 70%, of the Norwegian payer. For other dividends, the rate is 15%.

(k) The treaty withholding rate is increased to 15% if the recipient is not a company that satisfies both of the following conditions:
   • It owns at least 30% of the capital of the distributing company.
   • It has invested more than US$100,000 in the payer.

(l) Norway has not entered into a double tax treaty with Liechtenstein. However, because Liechtenstein is a member of the EEA, under domestic Norwegian tax law, the reduced rate applies to dividends paid to companies. In other cases the rate is 25%.

(m) The 0% rate applies if the recipient is a company that owns at least 20% of the distributing company.

(n) Hong Kong and Macau are not covered by the China treaty.

(o) The rate is 0% if the corporate recipient of the dividends owns at least 80% of the voting power in the distributing company and if certain other criteria are met.

(p) The 0% rate applies if the recipient is a company.

(q) The treaty withholding rate is increased if the recipient is not a company owning at least 20% of the distributing company.
(r) The treaty withholding rate is increased if the recipient is not a company owning at least 15% of the distributing company.

(s) When the revised treaty enters into force, the rate is reduced to 0% for dividend payments from Norway if the recipient directly owns at least 10% of the distributing company and owns the shares for a minimum of 24 months, including the time of the dividend distribution.

(t) The treaty withholding tax rate is increased if the recipient is not a company directly owning at least 10% of the distributing company for the last 12 months. If the distributing company has existed for less than 12 months, the recipient must satisfy the 10% condition since the date on which the distributing company was established.

Norway is currently negotiating or renegotiating tax treaties with Austria, Barbados, Belgium, Cyprus, Egypt, Germany, Iran, Italy, Latvia, Malawi, Malaysia, Malta, the Netherlands, Singapore, South Africa, the United Kingdom and the United States.

Norway has entered into exchange-of-information tax treaties with Andorra, Anguilla, Antigua and Barbuda, Aruba, Bahamas, Belize, Bermuda, the British Virgin Islands, the Cayman Islands, Dominica, Gibraltar, Grenada, Guernsey, the Isle of Man, Jersey, the Marshall Islands, Monaco, St. Christopher (St. Kitts) and Nevis, St. Vincent and the Grenadines, San Marino and the Turks and Caicos Islands. In addition, Norway is currently negotiating such treaties with Bahrain, Botswana, Brunei Darussalam, the Cook Islands, Costa Rica, Dominica, Grenada, Guatemala, Liberia, Liechtenstein, the Macau SAR, Mauritius, Montserrat, St. Lucia, Samoa, Seychelles, Uruguay and Vanuatu.
A new Income Tax Law (ITL), which is effective from the tax year beginning on 1 January 2010, was published in the Official Gazette on 1 June 2009. The Executive Regulations (ERs), which provide clarifications to certain provisions of the ITL, were issued on 28 January 2012 through Ministerial Decision (MD) 30/2012.

A. At a glance

Corporate Income Tax Rate (%) 12 (a)
Capital Gains Tax Rate (%) 12
Branch Tax Rate (%) 12
Withholding Tax (%) 10 (b)
Net Operating Losses (Years)
  Carryback 0
  Carryforward 5 (c)

(a) See Section B.
(b) This tax is imposed on certain payments to foreign persons that do not have a permanent establishment in Oman. Companies or permanent establishments in Oman that pay these items must deduct tax at source and remit it to the Secretary General of Taxation (for a listing of these items, see Section B).
(c) See Section C.
B. Taxes on corporate income and gains

Corporate income tax. Companies, which include Omani companies, partnerships, joint ventures and sole proprietorships, and permanent establishments of foreign companies are subject to Omani income tax. A permanent establishment is defined in the law. In addition, a permanent establishment is created for a foreign person providing consultancy or other services in Oman through employees or designated agents visiting Oman for at least 90 days in any 12-month period.

Omani companies and Omani sole proprietorships are subject to tax on overseas income (income accrued from a source outside Oman). However, a foreign tax credit limited to Oman’s tax rate of 12% is available against the tax payable in Oman.

Rates of corporate income tax. Companies registered in Oman, regardless of the extent of foreign participation, and permanent establishments of foreign companies are subject to tax at a rate of 0% on their first RO 30,000 of taxable income, and at a rate of 12% on their taxable income in excess of RO 30,000.

Oil exploration and production companies are taxed at a rate of 55% and are usually covered by special rules contained in concession agreements. Exploration and production sharing agreements (EPSAs) signed between the government of Oman and concession partners provide detailed procedures for computing taxable income and settlement of tax due. Under an EPSA, the government of Oman settles tax due on behalf of the concession partner out of the government’s share of production.

Foreign shipping and aviation companies are exempt from tax in Oman if the Omani shipping and aviation companies enjoy similar reciprocal treatment in the respective foreign countries. Omani companies and sole proprietorships engaged in shipping are exempt from tax.

Income derived by investment funds established in Oman and by funds established outside Oman dealing in Omani securities listed in the Muscat Securities Market (MSM) is exempt from tax. These exemptions are for indefinite periods.

Tax holidays are available to companies engaged in manufacturing, mining, exports, operating of hotels and tourist villages, farm and animal products processing, fishing and fish processing, higher education, private schools and nurseries, private hospitals, teaching and training institutions in education and medical care fields. The exemption for these categories of companies is available for five years but may be renewed for a maximum period of an additional five years.

No income can be exempt from tax unless provided by a law or Royal Decree.

Capital gains. No special rules apply to capital gains. Capital gains are taxed as part of regular business income at the rates set out in Rates of corporate income tax.

The tax law provides that profits and gains derived from disposals of all assets, including disposals of goodwill, trade names or trademarks with respect to all or part of a business, are included as deemed income.
Gains derived from the sale of investments and securities listed on the MSM are exempt from tax.

**Withholding tax.** Withholding tax at a rate of 10% of gross payments is imposed on certain gross payments made to foreign companies, including the following:

- Royalties (see below)
- Consideration for research and development
- Management fees
- Consideration for the use of or right to use computer software

Entities in Oman, including permanent establishments, are responsible for deducting and remitting tax to the government. The tax is final. Foreign persons do not have any further filing or other obligations with respect to such income.

If a foreign company has a permanent establishment in Oman, but the permanent establishment in Oman is unconnected to the receipt of income that is subject to withholding tax, withholding tax applies to such payments.

Royalties include payments for the use of or right to use software, intellectual property rights, patents, trademarks, drawings, equipment rentals, consideration for information concerning industrial, commercial or scientific experience, and concessions involving minerals.

**Administration**

**General.** A taxpayer is required to register with the tax department by filing a Form for Declaration of Business Particulars within a period of 3 months after the date of incorporation or commencement of activities. Any changes to the registration information must be communicated within two months. The accounting period begins on the date of commencement of business for joint ventures and permanent establishments. For companies, the start date is the date of registration or incorporation. The first accounting period may be less than 12 months but cannot exceed 18 months. The accounting period may be changed with the approval of the Secretary General for Taxation.

The books of account are required to be maintained for a period of 10 years. Permission is required for maintaining books of accounts in a foreign currency. In such a case, income must be converted at exchange rates prevailing on the last day of the accounting year. The accrual method of accounting must be used.

The term “Principal Officer” is defined for various entities. If a permanent establishment carries on an activity in Oman through a dependent agent, the agent is treated as Principal Officer. If a sole proprietor or owner of a permanent establishment is outside Oman, the individual or permanent establishment must designate a Principal Officer to comply with the obligations under the law. Such Principal Officer may not be absent from Oman for more than 90 days in a tax year.

Partners of joint ventures are jointly and severally liable for taxes of the joint venture.

**Returns.** Provisional returns of income must be filed within three months after the year-end. A final return of income, together with audited financial statements, must be filed within six months after the end of the accounting year.
**Assessments.** Assessments must be issued within five years from the end of the year in which tax returns are filed. If no assessment is issued within a period of five years, such assessments are deemed to have been issued (that is, tax returns are accepted as filed).

Corrections of assessments as a result of obvious errors are allowed. Such corrections must be made within five years after the year of issuance of the original assessment.

If a tax return is not submitted for a tax year, the time limit for making an assessment is 10 years from the end of the tax year for which the tax return is due.

Assessed tax, reduced by tax already paid, must be paid within 30 days from the date of issuance of the assessment. A delay results in a delay fine of 1% per month on taxes due for the period of delay. If a refund is assessed, the refund must be claimed within five years after the date of assessment.

Assessments are made with respect to withholding tax.

**Statutory periods of limitation.** For the period of limitation related to assessments, see *Assessments*.

The government’s right to collect taxes expires after seven years from the date taxes became due and payable, unless the tax authority initiates action to recover taxes.

**Appellate processes.** An objection against the assessment order must be filed with the Secretary General for Taxation. Other appellate procedures are an appeal with the Tax Committee, a tax suit filed in the primary court, an appeal to the appellate court, and finally a case before the Supreme Court.

The objection against an assessment must be filed within 45 days from the date of serving of the assessment order. An appeal must be submitted within 45 days from the date of the decision on the objection or the date of expiration of the specified period for deciding on the objection if no decision is issued.

The time limit for consideration of the objection is increased from three to five months, with an extension of an additional five months (previously three months). If no decision is issued, an implied rejection of the objection is deemed to occur.

A taxpayer can seek extension of time for the payment of disputed tax. However, the undisputed tax must be paid within 30 days after the date of assessment.

**Dividends.** Dividends received by Omani companies, permanent establishments of foreign companies or Omani sole proprietors from Omani companies are exempt from tax.

**Foreign tax relief.** A foreign tax credit limited to Oman’s tax rate of 12% is available against the tax payable in Oman on overseas income of Omani companies and sole proprietors.

**C. Determination of trading income**

**General.** Tax is levied on the taxable income earned by Omani companies, permanent establishments of foreign companies and Omani sole proprietors. Financial accounts must be prepared using the accrual basis of accounting.
Gains on the disposal of goodwill and trademarks are deemed to be taxable income.

Income arising before registration or incorporation is considered to be taxable income in the first year after registration. The market value of assets received in exchange for other assets is considered to be the disposal value, suggesting that mergers may give rise to a taxable event.

Other types of income such as payments on insurance claims, debts recovered in subsequent periods, balancing charges and reversals of liabilities, are treated as income subject to tax.

Expenses are deductible only if they are incurred wholly and exclusively for the purpose of production of gross income. If only a portion of the expense is incurred for the purpose of income generation, the proportionate expense attributable to the income generated is allowed as a deduction. Expenses incurred before registration, incorporation or the commencement of business are deemed to be incurred on the day on which business commences and are deductible in the first year of commencement of operations.

Expenses that are incurred in generating tax-exempt income are not allowed as deductions.

Special rules apply to allowances, such as depreciation, bad debts, donations, remuneration of shareholders, proprietors and directors, rent, head-office overhead allocated to branches and sponsorship fees. Exchange differences relating to head-office or related-party balances are normally disregarded.

Foreign taxes are not deductible for tax purposes. However, foreign taxes can be set off against taxes due on the same income in Oman (see Section B).

**Inventories.** The tax law does not stipulate a required method of accounting for inventories. In general, inventories are valued at the lower of cost or net realizable value, with cost determined using the weighted-average or first-in, first-out (FIFO) method. Provisions to reduce the value to net realizable value are not allowed for tax purposes.

**Provisions.** In general, provisions are not allowed as deductible expenses when created. However, they are allowed as deductions when they are written off or utilized. Exceptions to this rule include the following:

- Provisions for loan losses are deductible for tax purposes for banks and other financial companies regulated by the central bank.
- Provisions for unexpired risks, unsettled claims and contributions to contingency funds are deductible for tax purposes for insurance companies.

**Tax depreciation.** Depreciation of assets other than buildings must be calculated using the pooling (or block) of assets method. Each pool’s asset base is calculated with reference to the written-down value plus additions minus sale proceeds from disposals.

The straight-line depreciation method applies to buildings.
The following annual depreciation rates are set out under the tax law.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Permanent buildings (selected materials)</td>
<td>4</td>
</tr>
<tr>
<td>Building (other than selected materials)</td>

</tr>
<tr>
<td>Hospital buildings and educational establishments</td>
<td>100</td>
</tr>
</tbody>
</table>

The rate for intangible assets is determined by the Secretary General of Taxation.

**Relief for losses.** Losses may be carried forward for five years. The losses of an earlier year must be set off first before using losses of a later year.

Companies that are exempt from tax because they are carrying on the activities set out in Section B may carry forward net losses incurred during the first five years of exemption for an indefinite period.

No carryback of losses is permitted.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Social security contributions, on basic salary of Omani employees only</td>
<td></td>
</tr>
<tr>

</tr>
<tr>
<td>Occupational injuries and diseases; payable by employer</td>
<td>1%</td>
</tr>
<tr>
<td>Vocational training levy for each non-Omani employee; paid biennially by employer</td>
<td>RO 200</td>
</tr>
</tbody>
</table>

**E. Miscellaneous matters**

**Antiavoidance legislation.** If a company carries out a transaction with a related party that is intended to reduce the company’s taxable income, the income arising from the transaction is deemed to be the income that would have arisen had the parties been dealing at arm’s length.

For transactions between related parties that are not at arm’s length, certain arrangements and terms may be ignored by the tax authorities if such arrangements or terms result in lower taxable income or greater losses.

The tax authorities may make adjustments if the principal purpose of a transaction is to avoid taxation even if the transaction is between unrelated parties.
Thin-capitalization rules. Under the ITL, interest payable by Omani companies other than banks and insurance companies may be deducted from taxable income, subject to the satisfaction of certain conditions prescribed by the ERs.

The ERs provide that interest on loans from related parties paid by Omani companies other than banks and insurance companies may be deductible if total loans do not exceed twice the value of the shareholder’s equity.

The above provision introduces the concept of thin capitalization requiring Omani companies to comply with a minimum capital requirement, which is that loans may not exceed a debt-to-equity ratio of 2 to 1.

Transfer pricing. The tax law has introduced the concept of transfer pricing. It seeks to restrict any measures that may be taken by related parties for the avoidance of tax through transactions entered into between them.

Head office overhead. Allocations of overhead by the head office to a branch are capped at the lower of 3% of revenue or actual charges. If the head office has only a supervisory role with respect to a branch, no overhead deduction is allowed.

Others. Oman does not have any rules relating to foreign-exchange controls or controlled foreign companies.

F. Tax treaties

Oman has entered into double tax treaties with Algeria, Belarus, Belgium, Brunei Darussalam, Canada, China, France, India, Italy, Korea (South), Lebanon, Mauritius, Moldova, Netherlands, Pakistan, Seychelles, Singapore, South Africa, Sudan, Syria, Thailand, Tunisia, Turkey, the United Kingdom, Uzbekistan, Vietnam and Yemen.

Oman has signed double tax treaties with Croatia, Egypt, Iran, Morocco and the Russian Federation, but these treaties are not yet in force; it has signed double tax treaties with Bangladesh, Germany, Kazakhstan and Malta, but these treaties have not yet been ratified.

Oman has also entered into treaties with several countries with respect to the avoidance of double taxation on income generated from international air transport.

Oman has a free trade agreement with the United States. The Gulf Cooperation Council (GCC) countries have entered into a free trade agreement with Singapore, but this agreement has not yet been ratified by Oman.

Under Omani domestic law, withholding tax is not imposed on dividends or interest. Under the France and Mauritius treaties, no withholding tax is imposed on royalties paid to companies resident in those countries, subject to the satisfaction of certain conditions.

Few of the double tax treaties include the benefit of reduced withholding tax rates on royalties. The applicability of reduced tax rates under the provisions of a double tax treaty is not automatic. With the issuance of the ERs, the tax department is now requiring companies to provide supporting documents before allowing reduced tax rates.

A. At a glance

Corporate Income Tax Rate (%) 35
Capital Gains Tax Rate (%) 8/10/35 (a)
Branch Tax Rate (%) 35
Withholding Tax (%) (b)
  Dividends 7.5/10/20 (c)
  Interest 10 (d)
  Royalties from Patents, Know-how, etc. 15/20 (e)
  Fees for Technical Services 6/15 (f)
  Branch Remittance Tax 10 (g)
Net Operating Losses (Years)
  Carryback 0
  Carryforward 6

(a) Capital gains on listed securities are taxable at reduced rates, effective from 1 July 2010 (see Section B).
(b) See Section B for a listing of additional withholding taxes.
(c) The 10% rate is the general rate of tax on dividends. The 7.5% rate applies to dividends paid by companies engaged in power generation or by purchasers...
of power projects privatized by the Water and Power Development Authority. The withholding tax is imposed on the gross amount of the dividend. It is considered to be an advance payment of tax by corporate taxpayers and may be credited against the final tax liability. The 20% rate applies to dividends received by banking companies from their asset management companies.

(d) The withholding tax on interest is considered to be an advance payment of tax, which may be credited against the final tax liability for the year. Interest paid on loans and overdrafts to resident banks and Pakistani branches of nonresident banks and financial institutions is not subject to withholding tax. The withholding tax rate is 10% of the gross amount of interest paid to resident persons and to nonresident persons without a permanent establishment (PE) in Pakistan. The rate is 20% for nonresidents with a PE in Pakistan.

(e) The general withholding tax rate for royalties is 15%. This tax is considered to be a final tax for nonresident recipients of royalties. However, if royalties are derived with respect to properties or rights effectively connected with a PE of a nonresident, a 20% withholding tax rate is imposed, unless a nondeduction certificate is obtained by the PE. The 20% withholding tax is credited against the final tax liability.

(f) Fees for technical services do not include consideration for construction, assembly or similar projects of the recipient (such consideration is subject to a 6% withholding tax) or consideration that is taxable as salary. The general withholding tax rate is 15% of the gross amount of the payment. This withholding tax is considered to be a final tax for nonresident recipients. However, if technical services are rendered through a PE in Pakistan, the 6% rate applies. The 6% tax is considered to be an advance payment of tax by the nonresident recipient of such technical service fees and may be credited against the eventual tax liability.

(g) Remittances of after-tax profits by branches of nonresident petroleum exploration and production companies are not taxable.

B. Taxes on corporate income and gains

Corporate income tax. Companies that are resident in Pakistan are subject to corporation tax on their worldwide income. Tax is levied on the total amount of income earned from all sources in the company’s accounting period, including dividends and taxable capital gains. Branches of foreign companies and nonresident companies are taxed only on Pakistan-source income. A company is resident in Pakistan if it is incorporated in Pakistan or if its control and management are exercised wholly or almost wholly in Pakistan during the tax year. Company is defined to include the following:

- A company as defined in the Companies Ordinance, 1984
- A body corporate formed by or under any law in force in Pakistan
- An entity incorporated by or under the corporation law of a country other than Pakistan
- The government of a province
- A local authority
- A foreign association that the Central Board of Revenue declares to be a company
- A modaraba, trust, cooperative society or a finance society established under or created by any law currently in force

Tax rates. The standard corporate income tax rate is 35%.

Small companies are subject to tax at a rate of 25%.

Small companies are companies that meet the following conditions:

- They have paid-up capital and undistributed reserves of not exceeding PKR 25 million.
- They have no more than 250 employees at any time during the year.
- They have annual turnover not exceeding PKR 250 million.
• They were not formed as a result of a restructuring involving the splitting up or reorganization of an already existing business.

The gross revenue of nonresidents’ air transportation and shipping businesses is taxed at 3% and 8%, respectively. This income is not subject to any other tax.

Certain types of income are subject to final withholding taxes. For information regarding these taxes, see Section A and Withholding taxes.

**Tax incentives.** Some of the significant tax incentives available in Pakistan are described in the following paragraphs.

Private sector projects engaged in the generation of electricity are exempt from tax. However, this exemption is not available to oil-fired electricity generation plants set up during the period of 22 October 2002 through 30 June 2006.

Income derived by nonresidents not operating in Pakistan from the foreign-currency account scheme held at authorized banks in Pakistan or from certificates of investment issued by investment banks in accordance with the foreign-currency account scheme introduced by the State Bank of Pakistan is exempt from tax.

Income derived from instruments of redeemable capital, as defined in the Companies Ordinance, 1984, by the National Investment (Unit) Trust of Pakistan established by the National Investment Trust Limited or by mutual funds, investment companies or collective-investment schemes approved by the Securities and Exchange Commission is exempt from tax if such enterprises distribute at least 90% of their profits to their unit holders.

Income derived by a collective-investment scheme or real estate investment trust scheme is distributed among the unit or certificate holders or shareholders if it is not less than 90% of the scheme’s accounting income of that year, as reduced by realized and unrealized capital gains.

Income derived from the export of computer software developed in Pakistan and related services is exempt from tax until 30 June 2016.

A tax credit of 10% of the amount invested by a company in the purchase of plant and machinery for the purposes of extension, expansion, balancing, modernization and replacement in an industrial undertaking set up in Pakistan and owned by the company may be claimed against the tax payable if the plant and machinery is purchased and installed between 1 July 2010 and 30 June 2015. Any unused tax credit may be carried forward to the following two tax years.

A tax credit of 15% of the tax payable is allowed in the tax year in which a company becomes listed on a registered stock exchange in Pakistan.

A tax credit equal to 100% of the tax payable on taxable income for a period of five years is granted to a company if the following conditions are satisfied:

• The company is incorporated and an industrial undertaking is set up during the period of 1 July 2011 through 30 June 2016.

• The investment is made entirely out of equity.
A tax credit is allowed to a company that is set up in Pakistan before 1 July 2011 if it invests any amount with 100% new equity raised through issuance of new shares in the purchase and installation of plant and machinery for a new industrial undertaking or the expansion of plant or machinery already installed in an industrial undertaking. The credit is allowed against the tax payable for a period of five years. The credit is calculated by applying the proportion of new equity to total equity including new equity against the tax payable.

A tax credit equal to 20% of the amount of investment is allowed to a company set up in Pakistan before 1 July 2011 that makes an investment during the period of 1 July 2011 through 30 June 2016 with new equity raised through the issuance of new shares, for the purpose of balancing, modernization and replacement of plant and machinery already installed in a industrial undertaking owned by a company. The tax credit may be carried forward up to five years.

Capital gains. Effective from 1 July 2010, capital gains on shares of public companies, vouchers of the Pakistan Telecommunication Corporation, Modaraba Certificates, instruments of redeemable capital and derivative products are taxable. The tax rates vary according to the holding period of the securities. If the holding period for such securities is more than one year, the tax rate is 0%. The following tables provide the tax rates if the holding period is less than one year.

**Holding period of less than six months**

<table>

Capital gains on other assets (including non-public securities) are taxable at the corporate rate of 35%. However, only 75% of capital gains derived from transfers of capital assets, excluding immovable properties and assets on which tax depreciation or amortization is claimed, is taxed if the assets were held for more than 12 months.

Effective from 24 April 2012, capital gains on the disposal of listed securities and the tax payable on the gains are computed, determined, collected and deposited on behalf of a taxpayer by the National Clearing Company of Pakistan Limited (NCCPL), which is licensed as a clearing house by the Securities and Exchange Commission of Pakistan. However, the NCCPL does not collect tax from the following categories of the taxpayers:

- Mutual funds
- Banking companies, nonbanking finance companies and insurance companies
Modarabas
Foreign institutional investors that are registered with the NCCP as foreign institutional investors
Other persons or classes of persons notified by the Federal Board of Revenue

The investors listed above are required to self-pay their capital gain tax obligation on a quarterly basis at a rate of 1.5% or 2% of the amount of gain, depending on the amount of gain. They must file a statement of advance tax and pay the tax within 21 days after the end of each quarter.

Capital gains arising on immovable property held for a period of up to two years by a person are subject to tax at the following rates:
- Immovable property held for a period of up to one year: 10%
- Immovable property held for a period of more than one year but up to two years: 5%

Capital losses can be offset only against capital gains. Capital losses can be carried forward for six years. However, capital losses on disposals of securities (shares of public companies, vouchers of the Pakistan Telecommunication Corporation, Modaraba Certificates, instruments of redeemable capital and derivative products) can be set off only against capital gains on disposal of securities for subsequent years.

Administration

Filing requirements. The tax year commences on 1 July and ends on 30 June. Companies are required to end their fiscal years on 30 June. Special permission is required from the Commissioner of Income Tax to use a different year-end. The Federal Board of Revenue has specified 30 September as the year-end for certain industries, such as sugar and textiles, and 31 December as the year-end for insurance companies.

An income tax return must be filed by 30 September of the following year if the company's year-end is from 1 July through 31 December and by the following 31 December if the year-end is from 1 January through 30 June. Any balance due after deducting advance payments and withholding taxes must be paid when the tax return is filed.

Advance tax payments. In general, advance tax is payable quarterly based on the tax to turnover ratio of the latest tax year. However, banking companies must pay advance tax on a monthly basis. If the tax liability is estimated to be more or less than the tax charged for the prior tax year, an estimate of tax liability can be filed and advance tax liability can be paid in accordance with such estimate, subject to certain conditions. For taxpayers other than banking companies, the due dates for the advance tax payments are 25 September, 25 December, 25 March and 15 June. Banking companies must pay advance tax by the 15th day of each month.

Adjustable quarterly advance tax on capital gains from sale of securities is payable on the capital gains derived during the quarter at a rate of 2% if the holding period is less than 6 months and 1.5% if the holding period is between 6 and 12 months.
**Minimum tax.** Resident companies and nonresident banking companies are subject to a minimum income tax equal to 0.5% of gross receipts from sales of goods, services rendered and the execution of contracts, if the corporate tax liability is less than the amount of the minimum tax. The excess of the minimum tax over the corporate tax liability may be carried forward and used to offset the corporate tax liability of the following five tax years.

**Withholding taxes.** Withholding tax is an interim tax payment that may or may not be the final tax liability. Amounts withheld that are not final taxes are credited to the final tax liability of the taxpayer for the relevant year.

In addition to the withholding taxes listed in Section A, payments by corporations are subject to the following withholding taxes.

<table>

(a) This tax is a final tax.
(b) This tax is a fixed tax on gross rentals. The rate depends on the amount of rent received during a tax year and the status of the recipient.
(c) This tax applies to residents and to PEs of nonresidents in Pakistan. It is a final tax for resident companies (other than listed companies) engaged in trading.
(d) This tax is a final tax for entities engaged in the trading of imported goods.
(e) Nonresident contractors may irrevocably elect to treat the withholding tax as a final tax. The withholding tax is a final tax for all resident contractors other than listed companies.
(f) For corporate taxpayers, including permanent establishments of nonresident companies, the tax is considered an advance payment of tax, which is credited against the final tax liability for the year.
(g) This tax is imposed on residents and nonresidents.
(h) The applicable rate depends on the income earned by the employee for the year.

(i) The 0.01% rate applies to the traded value (sales price) of shares traded on the stock exchange that relate to the commission earned by the members on the purchase and sale of shares for its clients and investors. The 0.01% tax is considered to be an advance payment of tax, which is credited against the final tax liability of the member of the stock exchange for the year.

(j) The 0.2% rate applies to all withdrawals exceeding PKR 50,000 except for withdrawals by the following:
  - The federal government or provincial governments
  - Foreign diplomats
  - Diplomatic missions in Pakistan
  - Persons who produce a certificate from the Commissioner of Income Tax that the person's income is exempt from tax

The withholding tax is imposed on the entire sum if the aggregate of sums withdrawn during a day exceeds PKR 50,000.

(k) The tax is collected by the manufacturer at the time of sale of the goods. The tax collected is an advance tax for distributors, dealers and wholesalers.

(l) A person responsible for registering or attesting the transfer of immovable property must collect the tax from the person selling or transferring the property. The tax collected is an advance tax.

In general, for payments not listed in the above tables or in Section A, withholding tax is imposed at a rate of 20% on payments to nonresidents subject to tax in Pakistan.

**Interest and penalties.** For a failure to file an income tax return by the due date, a penalty equal to 0.1% of the gross tax payable for each day of default is imposed, subject to a minimum of PKR 5,000 and a maximum of 25% of the gross tax payable.

In addition, interest and penalties are imposed in the following circumstances:
  - Interest at a rate equal to the Karachi InterBank Offered Rate (KIBOR) plus 3% per quarter is charged if tax payments, including advance tax payments, are not made or are partially paid.
  - A penalty of up to 100% may be levied for nonpayment of tax due.
  - If income is concealed, a penalty equal to the amount of tax sought to be evaded is levied in addition to the normal tax payable.

The income tax department is required to pay compensation at the rate of KIBOR per year on refunds due that have not been paid within three months of the due date, from the expiration of the three months until the date on which the refund is paid.

**Dividends.** Dividends, including remittances of profits by a Pakistan branch to its head office (other than remittances of profits by a Pakistan branch engaged in exploration and production of petroleum), are subject to withholding tax at the general rate of 10%. The withholding tax is considered to be an advance payment of tax for a corporate recipient of dividends and is credited against the final tax liability, which is calculated at a rate of 10% after deduction of allowable expenses. A 7.5% rate is imposed on certain dividends (see footnote [c] to Section A). Intercorporate dividends paid within a wholly owned group are exempt from tax.

**Foreign tax relief.** A foreign tax credit is granted to resident companies with respect to foreign-source income at the average rate of Pakistani income tax or the actual foreign tax paid, whichever is less. If foreign income is derived under different heads (categories) of income, the amount of the allowable credit is applied
separately to each head of income. However, income derived under a particular head of income from different locations is pooled together. A credit is allowed only if the foreign income tax is paid within two years after the end of the tax year in which the foreign-source income is derived.

C. Determination of trading income

General. The determination of taxable income is generally based on the audited financial statements, subject to certain adjustments. Any income accruing or arising, whether directly or indirectly, through or from a PE or any other business connection in Pakistan, through or from any asset, property or source of income in Pakistan, or through the transfer of a capital asset located in Pakistan, is subject to tax.

Expenses incurred to derive income from business that is subject to tax are allowed as deductions to arrive at taxable income. For branches of foreign companies, allocated head-office expenses may be deducted, up to an amount calculated by applying the ratio of Pakistani turnover to worldwide turnover.

Inventories. Inventory for a tax year is valued at the lower of cost or net realizable value of the inventory on hand at the end of the year. If a particular item of inventory is not readily identifiable, the first-in, first-out (FIFO) or weighted-average methods may be used. The valuation method should be applied consistently from year to year, but the method may be changed with the prior approval of the tax authorities.

Provisions. General provisions for bad debts are not allowed as deductions from income. However, a charge for specific bad debts may be allowed if the debt is accepted by the income tax officer as irrecoverable.

Nonbanking finance companies and the House Building Finance Corporation may claim a deduction equal to 3% of the income from consumer loans for the maintenance of a reserve for bad debts resulting from such loans. In this context, a consumer loan is a loan obtained for personal, family or household purposes and includes debts resulting from the use of a credit card or insurance premium financing.

For advances and off-balance sheet items, banking companies are allowed a provision not exceeding 1% of their total advances. This percentage is increased to 5% with respect to consumers and small and medium-sized enterprises. The provision is allowed if a certificate from the external auditor is furnished by the banking company to the effect that such provisions are based on and are in line with the Prudential Regulations issued by the State Bank of Pakistan. The amount in a provision in excess of the allowable percentage may be carried over to succeeding years.

Tax depreciation. Depreciation recorded in the financial statements is not allowed for tax purposes. Tax depreciation allowances are given on assets, such as buildings, plant and machinery, computers and furniture owned by the company and used for business purposes. A depreciation allowance for a full year is allowed in the year the asset is placed in service, but no depreciation allowance is allowed in the year of disposal of the asset.
Depreciation is calculated using the declining-balance method. The following depreciation rates are generally used.

<table>
<thead>

<td>20</td>
</tr>
</tbody>
</table>

To promote industrial development in Pakistan, certain other allowances relating to capital expenditure have been introduced. These allowances are summarized below.

**Initial allowance.** An initial depreciation allowance at a rate of 25% for buildings and at a rate of 50% for other categories of eligible depreciable assets is granted for such assets placed in service in Pakistan. The allowance is granted in the tax year in which the assets are first placed in service in Pakistan and used in the taxpayer's business for the first time, or in the tax year in which commercial production begins, whichever is later.

**First-year allowances.** A first-year depreciation allowance at a rate of 90% is granted for plant machinery and equipment installed by an industrial undertaking established in specified rural and underdeveloped areas. This allowance is granted instead of the initial allowance.

A first-year depreciation allowance at a rate of 90% is granted for plant machinery and equipment installed for generation of alternate energy. This allowance is available to an industrial undertaking set up anywhere in Pakistan and owned and managed by a company. The allowance is granted instead of the initial allowance.

**Amortization of intangibles.** Amortization of intangibles is allowed over the normal useful life of intangibles. If an intangible does not have an ascertainable useful life or if the normal useful life is more than ten years, for purposes of calculating annual amortization, the normal useful life is considered to be 10 years for the purposes of calculating amortization.

**Amortization of expenses incurred before the commencement of business.** The amortization of expenses incurred before the commencement of business is allowed on a straight-line basis at an annual rate of 20%.

**Relief for losses.** Business losses, other than capital losses and losses arising out of speculative transactions, may be carried forward to offset profit in subsequent years for a period not exceeding six years. Unabsorbed depreciation may be carried forward indefinitely.
Groups of companies. A group of companies comprising holding companies and subsidiaries in a 100%-owned group can file its tax returns as one fiscal unit, subject to the satisfaction of certain conditions.

In addition, on the satisfaction of certain conditions, group companies can surrender their assessed losses (excluding capital losses and losses brought forward) for the tax year to other group companies.

D. Other significant taxes

The following table summarizes other significant taxes.

</tbody>
</table>

E. Miscellaneous matters

Foreign-exchange controls. In general, remittances in foreign currency are regulated, and all remittances are subject to clearance by the State Bank of Pakistan. However, foreign currency may be remitted through the secondary market.

Debt-to-equity rules. Under the thin-capitalization rules, if the foreign debt-to-equity ratio of a foreign-controlled company (other than a financial institution or a banking company) exceeds 3:1, interest paid on foreign debt in excess of the 3:1 ratio is not deductible.

The State Bank of Pakistan prescribes that borrowers from financial institutions have a debt-to-equity ratio of 60:40. This may be increased for small projects costing up to PKR 50 million or by special government permission.

Loans and overdrafts to companies (other than banking companies), controlled directly or indirectly by persons resident outside
Pakistan, and to branches of foreign companies are generally restricted to certain specified percentages of the entities’ paid-up capital, reserves or head-office investment in Pakistan. The percentage varies, depending on whether the entities are manufacturing companies, semimaneufacturing companies, trading companies or branches of foreign companies operating in Pakistan. No limits apply, however, to companies exporting at least 50% of their products.

To meet their working capital requirements, foreign controlled companies and branches of foreign companies may contract working capital loans in foreign currency that can be repatriated. The State Bank of Pakistan also permits foreign controlled companies to take out additional matching loans and overdrafts in rupees equal to the amount of the loans that may be repatriated. Other loans in rupees are permitted in special circumstances. Certain guarantees issued on behalf of foreign controlled companies are treated as debt for purposes of the company’s borrowing entitlement.

**F. Treaty withholding tax rates**

The maximum withholding rates provided in the treaties are shown in the following table.

(a) Treaty-determined percentage holding required.
(b) Interest paid to the government or, in certain circumstances, to a financial institution owned or controlled by the government is exempt.
(c) Fifteen percent for industrial, commercial or scientific know-how.
(d) Treaty-determined percentage holding required, and payer must be engaged in an industrial undertaking; otherwise, higher rate or normal rate applies.
(e) Royalties are exempt from withholding tax to the extent they represent a fair and reasonable consideration.
(f) Certain approved loans are exempt.
(g) Normal rates apply.
(h) Treaty-determined percentage holding by a public company required and the profits out of which the dividends are paid must be derived from an industrial undertaking; otherwise, normal rates apply.
(i) Ten percent if the recipient is a financial institution.
(j) Lower amount for literary, artistic or scientific royalties.
(k) Fifteen percent if payer is an enterprise engaged in preferred activities.
(l) Rate reduced to 10% if recipient is a bank or financial institution or if certain types of contracts apply. Rate reduced to 15% if recipient holds 25% of the capital of the paying company.
(m) Copyright royalties and other similar payments for literary, dramatic, musical or artistic work are exempt.
(n) Fifteen percent if the recipient is a company. Further reduced to 10% if the treaty-determined percentage is held by the recipient and the industrial undertaking is set up in Pakistan after 8 December 1987. Twenty percent in other cases.
(o) Lower rate applies if the recipient is a company that controls, directly or indirectly, 10% of the voting power in the company paying the dividend.
(p) Lower rate applies if recipient is a company that owns directly at least 25% of the capital of the paying company.
(q) The 15% rate applies to dividends paid to companies. The 30% rate applies to other dividends.
The 15% rate applies if the recipient is a company that owns directly at least 25% of the capital of the payer and is engaged in an industrial undertaking.

The 12% rate applies if the recipient is a company that owns directly at least 25% of the capital of the payer; the 15% rate applies to dividends paid to other companies; and the 20% rate applies to other dividends.

Interest paid to the government or to an agency of or an instrumentality owned by the government is exempt from tax.

The 10% rate applies if the payer is engaged in an industrial undertaking and if the recipient is a company; the 12.5% rate applies if the recipient is a company; the 15% rate applies in all other cases.

The lower rate applies if the beneficial owner of the dividends is a company that owns at least 20% of the shares of the payer.

The 10% rate applies to royalties for cinematographic films and to tapes for television or radio broadcasting. The 15% rate applies to royalties for literary, artistic or scientific works.

The treaty rate applies to the extent the amount represents a fair and reasonable consideration.

Interest paid to the government or to the central bank is exempt.

See Section A.

Pakistan has also entered into treaties that cover only shipping and air transport. These treaties are not included in the above table.

Corporate Income Tax Rate (%) 20 (a)
Capital Gains Tax Rate (%) 20 (a)
Branch Tax Rate (%) 20 (a)(b)
Withholding Tax (%) (c)
Dividends
Interest 5 (d)
Royalties from Patents, Know-how, etc. 5
Payments for Services and Goods 10 (e)
Other Payments to Nonresidents 10
Branch Remittance Tax 0
Net Operating Losses (Years)
Carryback 0
Carryforward 5

(a) This is the maximum rate, see Section B.
(b) Foreign branches operating in Palestine are taxed like Palestinian companies.
(c) In general, the withholding taxes may be credited against income tax due.
(d) This withholding tax is imposed on interest paid by banks to depositors
(excluding interest paid on local interbank deposits). The withholding tax is
considered to be a payment on account for resident companies and a final tax
for individuals and nonresident companies.
(e) This withholding tax applies to resident and nonresident companies. It
applies to payments of higher than NIS 2,500 if the vendor does not provide
a deduction-at-source certificate.

B. Taxes on corporate income and gains

Corporate income tax. Palestinian companies and branches of foreign companies carrying on business in Palestine are subject to
corporate income tax. A company is considered Palestinian if it is registered in Palestine. A branch of a foreign company registered in Palestine is treated like a Palestinian company.

**Rates of corporate income tax.** Corporate income tax is imposed at a rate of 15% on income up to NIS 125,000, and at a rate of 20% on the amount above NIS 125,000. The tax rate on life insurance companies is 5% of the total life insurance premiums owed to the company.

Under the Law for Encouragement of Investments, as amended in 2011, approved companies may benefit from a full income tax exemption of 7 to 11 years, depending on the amount invested. An application must be filed with the Palestinian Investment Promotion Agency to obtain approval for these tax benefits.

**Capital gains.** Capital gains are taxable except for 25% of the gains arising from the sale of shares and bonds. Capital losses are deductible. Capital gains are aggregated with other income and are subject to tax at the standard corporate tax rate.

**Administration.** Companies must file a corporate tax return by the end of the fourth month after their year-end. All companies must use the calendar year as their tax year, unless the tax authorities approve a different tax year. As a result, tax returns are generally due on 30 April. Any balance of tax due must be paid by the due date of filing the annual tax return.

Payment of income tax on account must be made in accordance with instructions issued by the Minister of Finance. The tax regulations provide incentives for advance tax payments made during the tax year. The incentive rates are announced at the beginning of the tax year.

Special incentives are granted for companies who file and pay within a certain period after the tax year-end. For filing and paying during the first and second months after the year-end, the discount is 4%. The discount is 2% for the third month.

**Dividends.** Dividends distributed by companies resident in Palestine are exempt from tax. Twenty percent (subject to change) of dividend income must be added back to income as disallowed expenses.

**Interest.** Interest paid by banks to depositors, except for interest on local interbank deposits, is subject to a 5% withholding tax. The withholding tax is considered to be a payment on account for resident companies and a final tax for individuals and nonresident companies.

**C. Determination of trading income**

**General.** Taxable income is the income reported in the companies’ financial statements, subject to certain adjustments.

All types of income are taxable, unless otherwise stated in the law. Income derived from agriculture by individual farmers is exempt from tax.

All business expenses incurred to generate income may be deducted, with limitations on certain items, such as entertainment and donations. A certain percentage of entertainment expenses is
deductible. Head-office charges are limited to 2% of branch net taxable income.

**Inventories.** The tax law does not specify a particular method for determining the cost of inventory.

**Provisions.** In general, provisions are not deductible for tax purposes, except for banks and insurance companies. Banks can deduct bad debt provisions, and insurance companies can deduct part of its unexpired risks’ and outstanding claims’ provisions.

**Depreciation.** The Palestinian tax law provides straight-line tax depreciation rates for various types of assets. These rates are applied to the purchase prices for the assets. If the rates for accounting purposes are greater than the tax depreciation rates, the excess is disallowed but may be used for tax purposes at a later date. The following are the straight-line rates for certain assets.

E. Foreign-exchange controls

The Palestinian Authority does not have a currency. Major currencies used in Palestine include the Israeli shekel (NIS), Jordanian dinar (JD) and the U.S. dollar (US$).

F. Tax treaties

The Palestinian Authority has entered into double tax treaties with Oman, Sri Lanka, Sudan, Syria, the United Arab Emirates and Vietnam. Palestine is negotiating a double tax treaty with Jordan.

The Palestinian Authority has also entered into tax treaties related to customs with the European Union, Japan, Turkey, the United States and certain Arab countries. Under these treaties, goods imported from the treaty countries have either full or limited customs exemption, depending on the type of goods imported.

(a) See Section B for details concerning deemed dividend tax.
(b) The withholding taxes apply only to nonresidents. Nonresident companies are entities not incorporated in Panama.
(c) Certain interest is exempt from tax. See Section B.
(d) For details, see Section C.

B. Taxes on corporate income and gains

Corporate income tax. Corporations, partnerships, branches of foreign corporations, limited liability companies and any other entity considered a legal entity by law are subject to income tax on any profits or income generated in or derived from Panama. Income that does not arise in Panama or is not derived from Panama is not subject to tax in Panama. However, dividends arising from foreign income that are distributed by Panamanian companies holding a Notice of Operation (formerly Commercial License) are subject to tax (for further details, see Dividends).

Corporate income tax rates. Income tax is assessed at a flat rate of 25% on net taxable income. For details regarding net taxable income, see Section C.
Financial entities regulated by Law 42 of 2001 and entities that are mainly engaged in the generation and distribution of electricity, telecommunications services, the administration of gaming and casino activities, insurance and reinsurance, mining, fabrication of cement and banking services are subject to the following income tax rates.

<table>

Taxpayers with annual taxable income greater than B/. 1,500,000 are required by law to calculate the tax using two methods and pay the higher of the amounts calculated under these methods. This calculation must be included in their annual income tax return. The following are the two methods:

- Applying the corresponding tax rate to the net taxable income
- Applying the corresponding tax rate to 4.67% of the total income

**Headquarters Law.** The Headquarters Law created a special tax-incentive system for multinational companies that establish their headquarters in Panama (Multinational Company Headquarters [Sede de Empresas Multinacionales, or SEM] regime).

Under the Headquarters Law, a headquarters is the office that renders services, such as management services, to operations based in a geographically limited area or to the global operation as a whole. Under the law, a headquarters may provide only specified services, including the following:

- Technical assistance
- Financial and accounting services
- Logistics or warehousing services to the multinational group
- Marketing and publicity
- Plot or construction design

These services must be part of the ordinary course of business of the parent company or its affiliates.

Under the Headquarters Law, the headquarters must belong to a multinational company with either regional or international operations or significant operations in the country of origin. To operate under the Headquarters Law, a license granted by the Commission of Licenses of the Multinational Companies of the Ministry of Commerce and Industry must be obtained. Companies granted a license are exempt from income tax for services rendered to entities domiciled abroad that do not generate taxable income in Panama. However, if the services rendered by the company affect the production or conservation of Panamanian income and if the price or value of the services provided is considered to be a deductible expense by the services recipient, the income related to those services is considered to be Panamanian-source income. In this case, the recipient of the services must withhold 25% of 50% of the amount paid to the company under the Headquarters Law regime (effective tax rate of 12.5%).

Companies granted a license to operate under this regime, are exempt from value-added tax (VAT). However, the VAT exemption applies only to the export of services. The VAT exemption does not apply to imports made by the headquarters or the sale or purchase of goods or services rendered in Panama.
In addition, the Headquarters Law creates a special immigration regime for foreign employees working for the beneficiary company in Panama. Permanent visas can be obtained for expatriates with an employment contract. After five years, they can obtain permanent residency. These employees are exempt from income tax and social taxes if they receive all of their compensation directly from the head office outside of Panama and not through the local payroll.

Foreigners who have special temporary visas are not subject to income tax if they satisfy the following conditions:

- From an office established in Panama, they direct transactions that take place or produce effects abroad.
- They receive their income directly from the home office established abroad.

Contributions to the social security regime are not required for such foreigners.

**Capital gains**

*Shares and quotas.* Under Section 701(e) of the Panamanian Tax Code, capital gains derived from the transfers of shares or quotas are subject to capital gains tax if the shares or quotas were issued by a company that has operations or assets located in Panama. The tax applies regardless of the place where the transaction takes place. Law No. 18 of 19 June 2006 amended Section 701(e) of the Tax Code. However, regulations for the new law have not yet been enacted. The following are significant rules contained in Law No. 18, as amended:

- Capital gains derived from transfers of shares in Panama that constitute taxable income are subject to income tax at a reduced rate of 10%.
- The buyer must withhold 5% from the purchase price as an advance income tax payment and remit the withholding tax to the tax authorities within 10 days following the date on which the payment was made according to the transaction documents. Failure to comply with this obligation transfers the liability to the seller of the shares.
- If the 5% tax withheld by the buyer is higher than the 10% income tax on the capital gain, the taxpayer may claim a cash refund or credit the excess against other tax liabilities. The tax credit may also be transferred to another taxpayer.
- Income derived from capital gains is not included in the seller’s ordinary income for the fiscal year, because the tax due is paid through withholding.

*Movable assets.* Capital gains derived from transfers of movable assets are subject to income tax at a reduced rate of 10%.

*Real estate transfer tax.* Under Section 1 of Law No. 6 of 2005, transfer tax at a rate of 2% is imposed on the higher of the following:

- Sales price set forth in the public deed of transfer
- The cadastral value of the property on the date of the acquisition, plus any increase in value derived from improvements, plus 5% per year computed on the sum of the cadastral value and the improvements
The 2% transfer tax can be credited against the capital gains tax that may be derived from the transfer of the same real estate if the sale of real estate constitutes the taxpayer's ordinary trade or business. The 2% transfer tax cannot be credited against other taxes. To execute the deed of transfer before a Notary Public, the seller of real estate must submit evidence to demonstrate that the corresponding transfer tax and capital gains tax have been paid.

**Sales of homes and business premises by taxpayers engaged in real estate business.** Effective from 1 January 2012, for home sales by taxpayers in the real estate business, the following rates are applied to the higher of the total value of the transfer or the land value.

<table>
<thead>
<tr>
<th>Higher of</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>transfer or land value</td>
<td>%</td>
</tr>
<tr>
<td>B/. 0 to B/. 35,000</td>
<td>0.5</td>
</tr>
<tr>
<td>Over B/. 35,000 to B/. 80,000</td>
<td>1.50</td>
</tr>
<tr>
<td>Over B/. 80,000</td>
<td>2.5</td>
</tr>
</tbody>
</table>

The rate imposed on taxpayers in the real estate business for sales of new business premises is 4.5%.

The above rates apply if building permits are issued on or after 1 January 2010.

**Ordinary taxpayers that are not engaged in the trade or business of the purchase and sale of real estate.** For ordinary taxpayers that are not engaged in the trade or business of the purchase and sale of real estate, tax is calculated at a rate of 10% on taxable income. This income is not taken into account in determining the taxpayer's taxable income, and the taxpayer may not deduct the transfer tax or transfer fees incurred.

Advance income tax of 3% must be paid on the greater of the total value of the transfer or land value.

The above tax can be considered as final payment or the surplus can be reimbursed if the amount of the tax exceeds 10% of taxable income.

**Administration.** The calendar year is the fiscal year. However, under certain circumstances, a special fiscal year may be requested from the General Director of Internal Revenue. Businesses earning income subject to Panamanian tax must file annual income tax returns even if the net result for the period is a loss. Corporations having no Panamanian taxable income or loss are not required to file income tax returns. Tax returns are due 90 days after the end of the fiscal year. The regulations provide for an extension of time of up to one month to file an income tax return if the corporation pays the estimated tax due. If an extension is obtained, any tax that is due when the return is filed is subject to interest at a rate of approximately 1%. Tax returns are filed using forms provided by the Ministry of Finance and Treasury.

The taxpayer must file an estimated tax return for the following year together with the income tax return. The total amount of estimated tax for the following year, which cannot be lower than the income declared in the current-year return, must be paid in full or in three equal installments by 30 June, 30 September and 31 December.
Dividends. All companies that have a Notice of Operations or Commercial License (the prior name of the Notice of Operations) or that generate taxable income in Panama must pay dividend tax at a fixed rate of 10% for nominative shares and 20% for bearer shares. Dividends distributed from foreign-source income, export operations, and certain types of exempt income are subject to a final 5% withholding tax. Subsequent distributions of these dividends are not taxed if they arise from dividends that already have been subject to the above-mentioned withholding.

Dividends distributed by entities in free-trade zones from local-source income, foreign-source income, export activities and certain types of exempt income are subject to a final 5% withholding tax.

The following are exempt dividends:
- Dividends distributed by Panamanian companies that do not require a Notice of Operations or Commercial License or that do not produce any taxable income in Panama
- Dividends distributed by entities under the tax-incentive system for multinational companies that establish headquarters in Panama (SEM regime; see Headquarters Law)
- Dividends distributed by entities under the Panama-Pacifico Special Economic Area (Howard Regime) from activities that are exempt under such regime

If a tax treaty applies, the treaty measures prevail over the domestic rules.

Withholding taxes. A 13.75% withholding tax is imposed on commissions, financial charges and taxable interest (see below for details concerning exempt interest) derived by banks or financial institutions. In all other cases, the withholding tax rate is 12.5% for interest. The withholding tax rate is also 12.5% for royalties paid to nonresident companies. Lease payments made abroad by companies are subject to withholding tax at the corporate rate. Payments for professional services rendered in Panama or from abroad are subject to a 12.5% withholding tax. The tax must be withheld by the enterprise that receives the benefits of the loans, leases or professional services, and must be remitted to the government within 10 days after the tax is withheld or the account is credited, whichever occurs first.

Interest income derived from the following investments is exempt from withholding tax:
- Savings and time deposits held in Panamanian banks
- Panamanian government securities
- Securities issued by companies registered with the National Securities Commission, if the securities were acquired through a securities exchange established to operate in Panama
- Interest and commissions paid by banking institutions in Panama to international banks or financial institutions established abroad, in connection with loans, bankers’ acceptances and other debt instruments
- Interest paid to official or semiofficial institutions of international bodies or foreign governments
- Interest paid to foreign investors, if the capital on which such interest is paid is exclusively intended for housing projects for people of low income
For a loan granted by a domestic bank or related Panamanian party, no withholding tax is applicable, because the financial services payment is taxed in the lender’s annual income tax return.

If a local company does not take a deduction for an expense, no withholding tax applies.

Foreign tax relief. Because Panama taxes only income sourced in Panama, regardless of where payment is received or the residence of the taxpayer, no credit or deduction is available for any foreign taxes paid.

C. Determination of trading income

General. Taxable income or revenue includes all income derived from business activities in Panama less expenses incurred wholly and exclusively in the production of taxable income or the conservation of its source.

Net taxable income is the difference or balance that results on deducting the following from gross income or general earnings:

- Foreign income
- Exempt income
- Deductible costs and expenses

Revenues must be recognized in the year in which they are earned. Construction companies may recognize long-term contract revenues either by the percentage-of-completion method or by the completed-contract method, unless the cash basis of accounting is being used. The installment-sales method of recognizing revenue is not permitted by the Panamanian Fiscal Code.

Earnings derived from the following activities are not considered to be Panamanian source:

- Invoicing by an office established in Panama for sales of merchandise or goods for amounts greater than cost, provided the merchandise never enters Panama
- Directing by an office established in Panama of transactions that are completed, consummated or take effect outside Panama
- Distributing dividends or profits derived from income not generated in Panama, including income derived from the two activities noted above, to the extent that the company distributing dividends does not hold a Notice of Operation

All expenses incurred wholly and exclusively in the production of taxable income or in the conservation of its source are allowed as deductions for income tax purposes, regardless of where the expense is incurred. Expenses of one tax year may not be deducted the following year, except those which, by their nature, cannot be determined precisely in the current tax year.

Interest is a deductible expense if it is incurred on loans or credits necessary for the production of taxable income. If nontaxable interest income from savings accounts or certificates of deposit is earned, the only interest deductible is the excess of the interest expense over the nontaxable interest income. Royalties are deductible, except for those paid abroad by free-zone companies.

Inventories. Inventories may be valued by using the first-in, first-out (FIFO), last-in, first-out (LIFO) or average-cost methods.
Other methods may be allowed by the Director General of Internal Revenue. After a system of valuation is adopted, it may not be changed for five years.

**Provisions.** The only deductible reserves are those for depreciation, bad debts (1% of credit sales, up to 10% of total receivables) of entities other than banks and financial institutions and certain fringe benefits. Reserves for personal insurance and contingencies are not deductible.

**Tax depreciation and amortization allowances.** Depreciation allowances are permitted for capital expenditures incurred in the production of taxable income. Depreciation may be computed by using the straight-line, declining-balance or sum-of-the-years’ digits methods. Depreciation is computed over the useful life of an asset. The minimum useful lives are 3 years for movable assets and 30 years for buildings.

Start-up expenses may be amortized over a period of five years. Improvements to leased properties must be amortized over the period of the lease. Purchasers of intangible assets, such as patents and goodwill, may claim straight-line amortization deductions for such assets when they derive income from such assets.

**Relief for losses.** Tax-loss carrybacks are not recognized under Panamanian law. Carryforwards of net operating losses are allowed. Taxpayers can deduct net operating losses over a period of five years following the year in which the loss is incurred. The maximum annual deduction is 20% of the relevant loss, but the amount of the deduction may not exceed 50% of the taxable income for the year.

**D. Other significant taxes**

E. Miscellaneous matters

Foreign-exchange controls. Panama does not impose foreign-exchange controls.

Transfer pricing. Panama’s transfer-pricing law applies to arrangements between related parties. The obligations contained in Panama’s transfer-pricing law are effective from the 2012 fiscal year.

F. Tax treaties

Panama has entered into tax treaties with Barbados, France, Korea (South), Luxembourg, Mexico, the Netherlands, Portugal, Qatar, Singapore and Spain. It has signed tax treaties with the Czech Republic, Ireland and Italy, but these treaties are not yet in effect. Panama has concluded treaty negotiations with Bahrain, Belgium, Israel and the United Arab Emirates.
Papua New Guinea

Please direct all requests regarding Papua New Guinea to the following persons in the Brisbane, Australia office:

- Brent Ducker (office telephone: +61 (7) 3243-3723; email: brent.ducker@au.ey.com)
- Michael Hennessey (office telephone: +61 (7) 3243-3691; email: michael.hennessey@au.ey.com)
- Esther Kendino (office telephone: +61 (7) 3011-3534; email: esther.kendino@au.ey.com)

The fax number is +61 (7) 3011-3190.

(a) See Section B.
(b) For payments to nonassociates, the amount of tax equals the lesser of 10% of assessable income or 48% of taxable income. Assessable income is the amount assessable under the provisions of the Income Tax Act. Taxable income is the amount remaining after deducting from assessable income all allowable deductions.
(c) Resource (mining, oil and gas) and primary production taxpayers may carry forward losses for an unlimited number of years.

B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to income tax on worldwide assessable income. Nonresident companies carrying on business through a branch pay tax only on Papua New Guinea (PNG)-source income. A resident company is a company incorporated in PNG. A company not incorporated in PNG is considered a resident company if it carries on business in PNG and if it has either its central management and control in PNG or its voting power controlled by shareholders who are residents of PNG.

**Tax rates.** Resident companies are subject to tax at a rate of 30%. Branches of nonresident companies (other than those engaged in mining operations) are subject to tax at a rate of 48%. Nonresident companies deriving “prescribed income” are subject to the foreign contractor provisions (see Foreign Contractor Withholding Tax).
The following table lists the tax rates for companies engaged in mining, petroleum and gas operations.

<table>
<thead>

</tr>
<tr>
<td>Mining operations</td>
<td>30</td>
<td>40</td>
</tr>
</tbody>
</table>

In addition to any tax liability determined in accordance with the above rates, an Additional Profits Tax may be levied with respect to gas projects in certain circumstances.

**Foreign Contractor Withholding Tax.** Most activities conducted by nonresidents in PNG (including PNG branches), other than individuals deriving employment income, fall under the foreign contractor and management fee (see *Management Fee Withholding Tax*) provisions of the domestic law. The Foreign Contractor Withholding Tax (FCWT) applies if income is derived by nonresidents (usually referred to as “foreign contractors”) from contracts for “prescribed purposes,” including installation and construction projects, consultancy services, lease of equipment and charter payments.

FCWT is calculated by reference to the gross contract income. In broad terms, the PNG Income Tax Act provides that if a foreign contractor derives income from a prescribed contract, the person is deemed to have derived taxable income of 25% of the gross contract income. This taxable income is subject to tax at the nonresident corporate tax rate of 48%, resulting in an effective PNG tax rate of 12% on the gross contract payment. The local contracting party must withhold the tax and remit it to the Internal Revenue Commission (IRC) within 21 days after the end of the month in which the payment is made.

As an alternative to paying FCWT, the foreign contractor can elect to file an income tax return and pay tax on actual taxable income at the nonresident corporate tax rate of 48%. This election must be made by written request to the Commissioner of Internal Revenue before the commencement of work under the contract. The FCWT is considered the default tax regime. Requests to be assessed on a net profit basis are subject to the discretion of the Commissioner General.

If the foreign contractor elects to be assessed on a net profit basis, a deduction is available for all costs directly attributable to the derivation of the PNG-source income, including depreciation of equipment. A deduction is also available for any indirect costs related to the income (that is, head office, general administration and management expenses). The deduction for allowed indirect costs is limited to the lesser of the following:

- 5% of the gross income from the prescribed contract
- An amount calculated by applying to the head office expenses (other than expenses incurred directly in deriving the contract income) the ratio of the gross income from the prescribed contract to the worldwide income of the taxpayer.
Management Fee Withholding Tax. Subject to the availability of treaty relief, Management Fee Withholding Tax (MFWT) at a rate of 17% must be withheld from management fees paid or credited to nonresidents.

The definition of “management fee” is very broad and includes “a payment of any kind to any person, other than to an employee of the person making the payment and other than in the way of royalty, in consideration for any services of a technical or managerial nature and includes payment for consultancy services, to the extent the Commissioner is satisfied those consultancy services are of a managerial nature.”

In practice, MFWT generally applies to services rendered outside PNG, and FCWT (see Foreign Contractor Withholding Tax) applies to fees for services rendered in PNG.

The deduction for management fees paid by a PNG resident company to a nonresident associate cannot exceed the greater of 2% of assessable income derived from PNG sources or 2% of allowable deductions excluding management fees paid. However, a full deduction is allowed if the management fee can be supported as an arm’s length transaction. The above limit does not apply with respect to payments made to nonassociates.

Incentives. Several specific incentives are available with respect to taxpayers operating in certain industries, including resource taxpayers (mining, oil and gas) and taxpayers engaged in primary production. These incentives range from general concessions with respect to the calculation of taxable income to concessions with respect to specific types of expenditure. Although some investors have been able to negotiate specific incentives for particular projects, the government now aims to include all tax concessions in the domestic legislation and make any concessions available on an industry basis with the goal of developing a more neutral and equitable treatment of projects.

Capital gains. Capital gains are not subject to tax in PNG. The disposal of a capital asset may be subject to tax to the extent the disposal takes place as part of a profit-making scheme or is part of the ordinary business activities of a taxpayer.

Although capital gains on the disposal of depreciable plant and equipment are generally not subject to tax, a calculation of any gain or loss on disposal must be performed. If the amount received exceeds the tax written-down value, an amount of income may be derived (up to the amount of depreciation deductions previously claimed). Alternatively, if the amount received on disposal is less than the tax written-down value, the taxpayer may be able to claim a deduction.

Administration. The PNG tax year is the calendar year. However, for most companies, a substituted accounting period is permitted on written request to the Commissioner General of Internal Revenue. Tax for any fiscal year is payable in three equal installments on a provisional tax assessment basis according to the following schedule:
- First installment by 30 April
- Second installment by 31 July
- Third installment by 31 October
Provisional tax is generally assessed by the Commissioner based on the income tax return of the preceding year. Accordingly, provisional tax does not generally become payable until after a taxpayer has filed its first tax return.

Any balance must be paid within 30 days after the assessment is issued and served on the taxpayer. Any overpayment of provisional tax is refundable to the taxpayer. The Commissioner General of Internal Revenue does not pay interest on overpaid tax. Penalties apply for underestimation of provisional tax.

Companies are required to file tax returns within three months after the end of the fiscal year (that is, by the end of February of the following year), but extensions of an additional three, six or eight months are possible, depending on the level of taxable income. The income and expenses of taxpayers must be expressed in Papua New Guinea currency, unless permission is granted by the Commissioner General of Internal Revenue to report in a currency other than Papua New Guinea currency.

Companies carrying on business in PNG, or deriving income in PNG, must appoint a public officer to act as the representative of the company in all dealings with the IRC. The public officer need not be an employee or shareholder of the company but must be tax resident in PNG.

**Dividends.** Dividends received by resident companies from other resident companies are fully rebatable; that is, although dividends received by corporate taxpayers from other PNG corporations are fully assessable, the taxpayers may claim a credit of 30% (corporate tax rate), thereby reducing the effective tax rate to nil. Dividends are exempt if they are either paid out of profits derived by petroleum or gas operations or paid out of profits arising from the sale or revaluation of assets that were acquired for purposes other than resale at a profit.

Dividends paid or credited by resident companies to nonresident shareholders are generally subject to a final 17% dividend withholding tax (unless the rate is reduced by a tax treaty), which is deducted at source from the gross amount of the dividend.

**Foreign tax relief.** A resident deriving foreign-source income that has been subject to foreign tax is entitled to a credit equal to the lesser of the following:

- The foreign tax paid
- The amount of PNG tax payable on that income

For purposes of the foreign tax credit, no distinction is made between income derived from treaty and nontreaty countries.

**C. Determination of trading income**

**General.** Income is defined as the aggregate of all sources of income, including annual net profit from a trade, commercial, financial or of other business. Expenses are deductible to the extent that they are incurred in producing assessable income, and are not capital or of a capital nature or incurred in producing exempt income. Deductions are allowable for certain capital expenditures incurred in the agriculture and fishing industries.
**Foreign-exchange gains and losses.** Realized exchange gains and losses from debts incurred or borrowings made in a foreign currency are generally assessable and deductible, respectively, as are any gains or losses made on amounts of income or deductions. Unrealized gains are not assessable, and unrealized losses are not deductible.

**Inventories.** A taxpayer must elect to value trading stock either at cost, market selling price or any other approved value in the first year of income. Thereafter, trading stock must be valued at the end of an income year either at cost, market selling price, or replacement price. Any change in the method of valuing trading stock must be approved by the Commissioner General of Internal Revenue. The Commissioner has the discretion to make adjustments if the trading stock is sold or otherwise disposed of other than at market value.

**Provisions.** Provisions are not deductible until payments are made or, in the case of doubtful debts, until the debts are considered totally irrecoverable and are written off.

**Tax depreciation.** Depreciation of fixed assets that are used in the production of taxable income is calculated using either the prime-cost (straight-line) method or the diminishing-value method. The taxpayer must elect the depreciation method in the first year of income. Any change in the method of depreciation must be approved by the Commissioner General of Internal Revenue.

The IRC publishes depreciation rates for certain items of plant and equipment. The following are some of the applicable rates published by the IRC.

</tbody>
</table>

The annual depreciation rate for allowable exploration expenditure incurred by resource taxpayers is determined using the diminishing-value method. The rate is determined by dividing the expenditure by the lesser of the number of years in the remaining life of the project or four.

Depreciation for short-life allowable capital expenditure (ACE; effective life of less than 10 years) incurred by resource taxpayers must be calculated at a rate of 25% under the diminishing-value method. For long-life ACE (effective life of 10 years or more) incurred by resource taxpayers, depreciation must be calculated at a rate of 10% under the straight-line method.

**Environmental protection and clean-up costs.** Effective from the income year beginning 1 January 2011, a specific deduction is available to taxpayers for certain expenditure incurred with respect to environmental-protection activities and clean-up costs incurred when pollution occurs. This measure is available to taxpayers in all industries. It was introduced to encourage taxpayers to safeguard the environment.

Several specific exclusions exist, including capital expenditure incurred to acquire land and buildings. Expenditure incurred for environmental impact studies is deductible under a separate measure (see Environmental impact studies).

Depreciation deductions are also available for plant and equipment used in environmental-protection activities.

**Environmental impact studies.** Effective from the income year beginning 1 January 2011, a deduction is allowed for environmental impact studies. For this purpose, an environmental impact
study is the study of the environmental impact of an assessable income-producing activity or business that is carried on or proposed to be carried on in PNG by the taxpayer.

The expenditure incurred is apportioned over the life of the project or 10 years, whichever is less. If the taxpayer is in the resources industry, the cost of the environmental impact is not allowable under this measure, but is available under the specific resources taxation provisions.

Depreciation deductions are also available for plant and equipment used for environmental impact studies.

**Rehabilitation costs of resource taxpayers.** For resource projects that begin on or after 1 January 2012, at the end of a project, a resource taxpayer may transfer losses incurred on environmental rehabilitation to other projects owned by it. PNG uses ring-fencing provisions and calculates the profits of resource projects on a project-by-project basis. Historically, losses incurred were effectively lost if no further income was produced.

**Research and development.** A 150% deduction is available for “prescribed” research and development (R&D) expenditure. To claim the R&D concession, taxpayers need to complete and submit an application annually to the Research and Development Expenses Approval Committee (within the PNG IRC) for approval before the start of the fiscal year.

The following payments and expenditure incurred by a taxpayer carrying on business for the purpose of obtaining assessable income may be allowable R&D deductions:

- Payments to an approved research institute for scientific research related to the business of the taxpayer and payments to an approved research institute for the purpose of undertaking research related to the business of the taxpayer
- Capital expenditure on scientific research related to the business of the taxpayer (except expenditure on plant, machinery, land or buildings, or alterations, additions or extensions to buildings)

For purposes of the R&D concession, scientific research includes any activities in the fields of natural or applied science for the extension of knowledge.

**Relief for losses.** Losses incurred may generally be carried forward for 20 years. However, losses incurred by resource taxpayers and primary production taxpayers can be carried forward indefinitely. Losses are allowed as a deduction only if the taxpayer passes either the continuity of ownership test or the same business test.

For entities in the resources sector, losses may also be quarantined on a project basis.

Losses may not be carried back.

No provisions exist for grouping losses with associated companies (with the specific exception of certain company amalgamations).

**Groups of companies.** No provisions exist in PNG for the grouping of income or losses of associated companies or for other group relief. Companies are assessed on an individual basis.

**D. Other significant taxes**
The following table summarizes other significant taxes.
Nature of tax | Rate (%)
--- | ---
Goods and services tax (GST); imposed on virtually all goods and services unless the goods or services are exempt (for example, financial services and gambling) or the recipient or supplier is zero-rated (for example, resource companies); any entity undertaking taxable activity in PNG must register and charge GST if taxable supplies exceed, or are expected to exceed, K 250,000 in any 12-month period (the registration threshold before 1 January 2012 was K100,000); entities that are registered must account for GST collected (output tax) and GST paid (input tax) during each month with any excess of GST collected to be remitted to the IRC by the 21st day of the following month; entities may generally claim a refund for most GST input tax paid on importations or local purchases of goods and services | 10
Training levy; imposed on all businesses with an annual payroll exceeding K 200,000; the amount payable is reduced by training expenses incurred by the employer for the benefit of PNG citizen employees; expenses incurred to train noncitizens are not qualifying training expenses for the purpose of the training levy | 2
Customs and excise duty; imposed on all goods imported into PNG, unless the goods are duty-free or exempt from duty; duty is imposed on the total value including cost, insurance and freight; the rate of duty depends on the nature of the goods; a zero rate often applies to goods imported into PNG if the goods are not available in PNG, but a specific analysis must be undertaken in each instance | Various
Stamp duty; imposed on dutiable instruments such as deeds, share transfers and a wide range of other documents at varying rates; may also apply to documents executed outside PNG under provisions that impose an obligation to file documents for assessment for stamp duty with respect to property or activities in PNG | Various

E. Miscellaneous matters

Foreign-exchange controls. The currency in PNG is the kina (K).

A tax-clearance certificate is required if certain cumulative remittances of foreign currency exceed K 200,000 in a calendar year. For a remittance to a tax haven, a tax clearance is always required, regardless of the amount being remitted.

PNG resident companies are generally not permitted to receive payment for goods or services in a foreign currency. Consequently, if a contract is entered into between two PNG resident companies in a foreign currency (for example, U.S. dollars), the
settlement of the invoice must be made in Papua New Guinea currency. For exchange-control purposes, a resident includes a foreign company operating actively in PNG as a branch.

Approval is also required from the Bank of Papua New Guinea (central bank) to open and operate either a kina or foreign-currency account outside PNG.

**Debt-to-equity ratios.** The Bank of Papua New Guinea was previously responsible for enforcing thin-capitalization rules. In September 2007, the Bank of Papua New Guinea liberalized the foreign-exchange rules. As a result, Bank of Papua New Guinea approval is no longer required to obtain foreign loans. However, potential transfer-pricing issues may arise if excess gearing exists (that is, the level of debt cannot be supported by the entity on a stand-alone basis).

Thin-capitalization rules apply to taxpayers operating in the resources sector.

**Antiavoidance legislation.** Contracts, agreements or arrangements that have the effect of avoiding any tax may be rendered void by the tax authorities.

**Transfer pricing.** Related-party transactions are accepted by the tax authorities if they are carried out at arm’s length. However, a taxpayer’s taxable income can be adjusted if transactions are not conducted on an arm’s length basis (that is, if the transaction would not have been conducted on the same basis between independent parties). Specific provisions also exist with respect to management or technical fees paid to international related parties.

**Controlled foreign companies.** The PNG tax legislation does not currently contain any controlled foreign company (CFC) rules. Consequently, any income derived by foreign subsidiaries of a PNG entity is typically taxed on a receipts basis only.

**F. Treaty withholding tax rates**

Taxpayers self-assess any treaty reductions of withholding taxes.

The following table lists the treaty withholding tax rates for dividends, interest, royalties, management fees and payments to foreign contractors with respect to prescribed services.

</tbody>
</table>
(a) For the purposes of this table, management fees include technical fees.

(b) Management services, including services of a technical nature rendered from sources outside of PNG for a resident of PNG are subject to MFWT at a rate of 17%. For services provided by a resident of a country with which PNG has entered into a double tax treaty that does not have a specific technical services article, the payment is not subject to withholding tax in PNG if all of the services were performed outside PNG.

(c) Nonresident entities deriving income from “prescribed contracts” are subject to FCWT at a rate of 12% of the gross receipts. The income of residents of countries with which PNG has entered into a double tax treaty is subject to the FCWT provisions if the nonresident is conducting business in PNG through a permanent establishment.

(d) A reduced FCWT rate may apply to foreign contractors from these countries in accordance with the nondiscrimination article in the relevant treaty.

(e) The rate is 30% for payments to associates. For payments to nonassociates, the amount of the tax equals the lesser of 10% of assessable income or 48% of taxable income.

* The 5% rate applies to dividends paid to residents and to nonresidents in Paraguay.
The 15% rate applies to dividends paid abroad to nonresidents.

B. Taxes on corporate income and gains

Corporate income tax. Tax is levied on Paraguay-source income of corporations and commercial enterprises. Income is consid-
ered to be from a source in Paraguay if it is derived from capital,
property or rights in Paraguay or from a business in Paraguay.
Residence is not relevant. Under Law 2421/04, for companies
domiciled in Paraguay, income derived from capital invested abroad is considered Paraguayan-source income and, accordingly, subject to corporate income tax.

**Rate of corporate income tax.** Under Law 2421/04, the corporate income tax rate is 10%. Branches are also subject to dividend withholding tax at a rate of 5% and to a 15% withholding tax on remittances to their home offices.

The Paraguay incentive tax law provides an exemption from the 15% withholding tax mentioned above if the investment is greater than US$5 million.

**Capital gains.** Capital gains are taxed at the corporate income tax rate.

**Administration.** The tax year is the calendar year. Returns must be filed within four months after the end of the financial year. Penalties are imposed for failure to comply with these rules.

**Dividends.** A 5% withholding tax is imposed on dividends paid to residents and to nonresidents in Paraguay. A 15% withholding tax is imposed on dividends paid abroad to nonresidents.

### C. Determination of trading income

**General.** Taxable income is based on profits from the financial statements after tax adjustments. Expenses are generally deductible if they are incurred for the purposes of the business and in the production of taxable income.

**Inventories.** Inventory is valued at the cost of production or acquisition. The cost may be calculated under the average-cost or first-in, first-out (FIFO) methods. After choosing a method, a corporation may not change it without prior authorization.

**Tax depreciation.** Depreciation must be calculated using the straight-line method.

**Relief for losses.** Under Law 2421/04, effective from 2005, loss carryforwards are not allowed.

**Groups of companies.** Paraguayan law does not contain any measures for filing consolidated returns or for relieving losses within a group.

### D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax; imposed on goods sold, including imports, and services rendered in Paraguay; exports are exempt; in certain circumstances, payments of royalties are subject to the tax</td>
<td>10</td>
</tr>
<tr>
<td>Standard rate</td>
<td></td>
</tr>
<tr>
<td>Basic consumer food items, financial intermediation (loans and credits), pharmaceutical products and the leasing and sale of real estate</td>
<td>5</td>
</tr>
</tbody>
</table>
E. Foreign-exchange controls

The central bank does not control the foreign-exchange market. A free-market rate of exchange prevails.

F. Tax treaties

Paraguay has entered into double tax treaties with Chile and Taiwan. It has also entered into a tax treaty on international freight with Argentina and tax treaties on international air freight with Belgium, Germany and Uruguay.

(a) Effective from October 2011, mining companies are subject to an additional Special Mining Tax or to “voluntary” payments. For further details, see Section B.
(b) Capital gains derived by nonresident entities are subject to income tax at a rate of 5% if the transfer is made in Peru. Otherwise, the rate is 30%. For further details regarding the applicable tax rate, see Capital gains in Section B. Capital gains derived by resident entities are subject to income tax at a rate of 30%.
(c) The Dividend Tax, which is imposed at a rate of 4.1% and is generally withheld at source, is imposed on profits distributed to nonresidents and individuals. For further details regarding the Dividends Tax, see Section B.
(d) This tax applies to payments to nonresidents.
(e) A reduced rate of 4.99% applies to certain interest payments. For further details, see Section B.
(f) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to income tax on their worldwide taxable income. Resident companies are those incorporated in Peru. Branches and permanent establishments of foreign companies that are located in Peru and nonresident entities are taxed on income from Peruvian sources only.

Tax rates. The corporate income tax rate is 30%.

A Dividend Tax at a rate of 4.1% is imposed on distributions of profits to nonresidents and individuals by resident companies and by branches, permanent establishments and agencies of foreign companies. This tax is generally withheld at source. However, in certain circumstances, the company must pay the tax directly. For details regarding the Dividends Tax, see Dividends.

Mining tax. Effective from October 2011, mining companies are subject to an additional Special Mining Tax based on a sliding scale, with progressive marginal rates ranging from 2% to 8.4%. The tax is imposed on operating profits derived from sales of metallic mineral resources, regardless of whether the mineral producer owns or leases the mining concession.
In addition, mining companies that have signed stability agreements with the state are subject to “voluntary” payments, which are calculated based on a sliding scale with progressive marginal rates ranging from 4% to 13.12%. These rates are applied to operating profits derived from sales of metallic mineral resources, regardless of whether the mineral producer owns or leases the mining concession. Higher tax rates apply to higher amounts of operating profits.

**Tax incentives.** Various significant tax incentives are available for investments in the following:

- Mining enterprises
- Oil and gas licenses and services contracts
- Certain agricultural activities

They are also available for investments in manufacturing industries located in the jungle, in designated tax-free zones and in borderline areas of the country.

**Capital gains.** Capital gains derived by nonresident entities are subject to income tax at a rate of 5% if the transfer is made in Peru. Otherwise, the rate is 30%. The regulations provide that a transaction is made in Peru if the securities are transferred through the Peruvian stock exchange. The transaction takes place abroad if securities are not registered with the Peruvian stock exchange or if registered securities are not transferred through the Peruvian stock exchange.

A special procedure has been introduced to determine the tax basis of listed securities acquired before 1 January 2010. The general rule is that the tax basis for these securities is the value of such securities at the closing of 31 December 2009, if this value is not lower than the price paid for the acquisition of the securities. The purpose of this rule is to impose capital gains tax only on the capital gain resulting from the appreciation of securities from 1 January 2010 (time when the exemption was repealed) and onwards.

Capital gains derived from the disposal of bonds issued by the government as well as by Peruvian corporations before 10 March 2007, through public offerings, are exempt from Peruvian income tax.

Effective from November 2011, CAVALI (Peruvian clearing house) withholds capital gains in transactions concluded on the Lima Stock Exchange. As a result, nonresidents are not required to pay their income tax liability to the Peruvian Tax Administration.

Indirect transfers of Peruvian shares are also subject to a 30% Peruvian capital gains tax. For this purpose, an indirect transfer of Peruvian shares is deemed to occur if the following conditions are met:

- At any time during the 12 months before the transaction, at least 50% of the value of the foreign company derives from one or more companies.
- More than 10% of the shares of the foreign company had been transferred during the 12-month period before the transaction.

Temporary provisions established a special procedure to determine the tax basis of shares acquired before 16 February 2011.
Under this procedure, the tax basis is the higher of the price paid on acquisition or the market value on 15 February 2011.

**Administration.** The mandatory closing date for business enterprises is 31 December. Tax returns must be filed by 31 March.

Companies must make advance payments of income tax. Before August 2012, as a general rule, these advance payments were based on the monthly net income multiplied by a fraction, the numerator of which was the income tax of the preceding fiscal year before tax credits and the denominator of which was, in general, the net income for the preceding fiscal year (coefficient system).

Companies in a start-up process or in a net operating loss position made monthly advance payments equal to a percentage of monthly net income (percentage system). Effective from August 2012, the percentage under this system is reduced from 2% to 1.5%.

The amended law establishes that a taxpayer must pay the higher amount that results from a comparison of the coefficient and percentage systems. Accordingly, the amended law essentially requires a minimum advance income tax prepayment of 1.5% of the net income. The payment corresponding to May and to the following months may be calculated with a different percentage based on the financial statements for April and July.

Monthly advance payments are due on the 9th to the 15th business day, according to a schedule. Taxes and related penalties not paid by due dates are subject to interest charges, which are not deductible for tax purposes.

**Dividends.** A Dividend Tax at a rate of 4.1% applies to profits distributed to nonresidents and individuals, if a distribution agreement is adopted by the relevant corporate body on or after 1 January 2003. All profits distributed thereafter, including those corresponding to prior years, are subject to this tax. The Dividend Tax applies to distributions by Peruvian companies, as well as to distributions by Peruvian branches, permanent establishments and agencies of foreign companies. The income tax law specifies various transactions that are considered profits distributions by resident entities for purposes of the Dividend Tax. These transactions include the distribution of cash or assets, other than shares of the distributing company, and, under certain circumstances, a capital reduction or a liquidation of the company. For permanent establishments, branches, and agencies of foreign companies, a distribution of profits is deemed to occur on the deadline for filing their annual corporate income tax return (usually at the end of March of the year following the tax year).

The law also provides that if a resident company, or a branch, permanent establishment or agency of a foreign company, pays expenses that are not subject to further tax control, the amount of the payment or income is subject to the Dividend Tax. Dividend Tax for these items is paid directly by the resident entity or the branch or permanent establishment. The capitalization of equity accounts, such as profits and reserves, is not subject to the Dividend Tax.
Interest. Interest paid to nonresidents is generally subject to withholding tax at a rate of 30%. For interest paid to unaffiliated foreign lenders, the rate is reduced to 4.99% if all of the following conditions are satisfied:

- For loans in cash, the proceeds of the loan are brought into Peru as foreign currency through local banks or are used to finance the import of goods.
- The proceeds of the loan are used for business purposes in Peru.
- The participation of the foreign bank is not primarily intended to avoid the measures on transactions between related parties (back-to-back loans).
- The interest rate does not exceed the LIBOR (London interbank offer rate) plus seven points. For this purpose, interest includes expenses, commissions, premiums and any other amounts in addition to the interest paid.

If the first three conditions described above are satisfied and the interest rate exceeds the LIBOR plus seven points, only the excess interest is subject to withholding tax at the regular rate of 30%.

Effective from 2011, interest arising from loans granted by international banks to Peruvian banks and financial institutions is subject to a 4.99% withholding tax.

In general, interest derived from bonds and other debt instruments is also subject to a withholding tax rate of 4.99%, unless the holder of the bonds or other debt instruments is related to the issuer or its participation is primarily intended to avoid transactions between related parties (back-to-back transactions).

Interest earned on bonds issued by the government is exempt from tax. Effective from 1 January 2010, interest on bonds issued by Peruvian corporations before 11 March 2007, in general through public offerings, is exempt from tax. Interest from deposits in Peruvian banks is subject to a 4.99% withholding tax if the beneficiary is an entity.

Other withholding taxes. Payments for technical assistance used in Peru are subject to withholding tax at an effective rate of 15%, regardless of whether the technical assistance is effectively provided. If the consideration for a service exceeds 140 Tax Units (approximately US$198,000), the resident company must obtain a certification from an international audit firm that the services were provided.

Payments for digital services that are provided through the Internet and used in Peru are subject to withholding tax at an effective rate of 30%.

Payments for nontechnical services provided in Peru are subject to withholding tax at a rate of 30%.

Foreign tax relief. Tax credits are permitted, within certain limits, for taxes paid abroad on foreign-source income. Under domestic legislation, a direct tax credit is allowed. Under certain treaties, an indirect tax credit is allowed.

C. Determination of trading income

General. Taxable income of business enterprises is generally computed by reducing gross revenue by the cost of goods sold and all
expenses necessary to produce the income or to maintain the source of income. However, certain types of revenue must be computed as specified in the tax law, and some expenses are not fully deductible for tax purposes. Business transactions must be recorded in legally authorized accounting records that are in full compliance with International Financial Reporting Standards (IFRS). The accounting records must be maintained in Spanish and must be expressed in Peruvian currency. However, under certain circumstances, foreign investors who invest in foreign currency may sign an agreement with the state or with state-owned corporations that allows them to maintain their accounting books in foreign currency.

Research and development expenses. The deduction of scientific and technological research and innovation expenses incurred by a company is limited to 10% of the annual net income, with a maximum annual limitation of 300 Tax Units (approximately US$415,000).

In addition, to be tax-deductible, the expenses must meet specific requirements.

Inflation adjustments. For tax and accounting purposes, inflation adjustments apply only until 31 December 2004. Consequently, beginning 1 January 2005, transactions are recognized and recorded in local books at their historical value.

Special activities. Nonresident corporations, including their branches and agencies, engaged in certain specified activities are subject to tax on only a percentage of their gross income derived from such activities. This tax is withheld at source. The following are the applicable percentages for some of these specified activities.

<table>
<thead>
<tr>
<th>Activity</th>
<th>Applicable percentage (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Air transportation</td>
<td>1 (a)(b)</td>
</tr>
<tr>
<td>Marine transportation</td>
<td>2 (a)(b)</td>
</tr>
<tr>
<td>Leasing of aircraft</td>
<td>60 (c)</td>
</tr>
<tr>
<td>Leasing of ships</td>
<td>80 (c)</td>
</tr>
<tr>
<td>International news agencies</td>
<td>10 (a)</td>
</tr>
</tbody>
</table>

(a) The withholding tax rate is 30%. As a result, the effective tax rates are 0.3% for air transportation, 0.6% for marine transportation and 3% for international news agencies.

(b) This percentage applies to services rendered partly in Peru and partly abroad.

(c) The withholding tax rate is 10%. As a result, the effective tax rates are 6% for leasing of aircraft and 8% for leasing of ships.

Inventories. Inventories must be carried at cost. Cost may be determined specifically or by the first-in, first-out (FIFO), average, retail or basic inventory method. The last-in, first-out (LIFO) method is not permitted.

Provisions. Provisions for bad debts, bonuses, vacations, employees’ severance indemnities and other expenses are allowed if made in accordance with certain tax regulations.

Tax depreciation. Depreciation rates are applied to the acquisition cost of fixed assets. The following are some of the maximum annual depreciation rates allowed by law.
**Maximum Asset rate (%)**

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and structures</td>
<td>5*</td>
</tr>
<tr>
<td>Cattle and fishing nets</td>
<td>25</td>
</tr>
<tr>
<td>Vehicles</td>
<td>20</td>
</tr>
<tr>
<td>Machinery and equipment for construction,</td>
<td>20</td>
</tr>
<tr>
<td>mining and oil activities</td>
<td></td>
</tr>
<tr>
<td>Machinery and equipment for other activities</td>
<td>10</td>
</tr>
<tr>
<td>Data processing equipment</td>
<td>25</td>
</tr>
<tr>
<td>Other fixed assets</td>
<td>10</td>
</tr>
</tbody>
</table>

* This is a fixed rate rather than a maximum rate.

Taxpayers may apply any depreciation method for its fixed assets other than buildings and structures, taking into account the characteristics of the business as long as the resulting depreciation rate does not exceed the maximum rates stated above.

In general, except for buildings and structures, tax depreciation must match financial depreciation.

**Relief for losses.** Taxpayers may select from the following two systems to obtain relief for their losses:

- Carrying forward losses to the four consecutive years beginning with the year following the year in which the loss is generated
- Carrying forward losses indefinitely, subject to an annual deductible limit equal to 50% of the taxpayer’s taxable income in each year

Loss carrybacks are not allowed.

**D. Other significant taxes**

The following table summarizes other significant taxes.

</tbody>
</table>

### E. Miscellaneous matters

**Foreign-exchange controls.** Peru does not impose foreign-currency controls. Exchange rates are determined by supply and demand.

**Means of payment.** Any payment in excess of PEN 3,000 or US$1,000 must be made through the Peruvian banking system using the so-called “Means of Payment,” which include bank deposits, wire transfers, pay orders, credit and debit cards and non-negotiable checks. Noncompliance with this measure results in the disallowance of the corresponding expense or cost for income tax purposes. In addition, any sales tax (see Section D) related to the acquisition of goods and services is not creditable.

**Related-party transactions.** Expenses incurred abroad by a non-resident parent company, affiliates or the home office of a Peruvian subsidiary or branch (or prorated allocations of administrative expenses incurred by those entities) are deemed by law to be related to the generation of foreign revenue and, accordingly, non-deductible, unless the taxpayer can prove the contrary.

**Transfer pricing.** Peru has introduced transfer-pricing rules, which are consistent with the Organization for Economic Cooperation and Development (OECD) guidelines. Intercompany charges must be determined at arm’s length. Regardless of the relationship between the parties involved, the fair market value (FMV) must be used in various types of transactions, such as the following:

- Sales
- Contributions of property
- Transfers of property
- Provision of services

For the sale of merchandise (inventory), the FMV is the price typically charged to third parties in profit-making transactions. For frequent transactions involving fixed assets, the FMV is the value used in such frequent transactions by other taxpayers or parties. For sporadic transactions involving fixed assets, the FMV is the appraisal value.

In the event that the transactions are performed without using the FMV, the tax authorities make the appropriate adjustments for the parties to the transaction.

The FMV of transactions between related parties is the value used by the taxpayer in identical or similar transactions with unrelated parties. The tax authorities may apply the most appropriate of the
following transfer pricing methods to reflect the economic reality of the transactions:

- Comparable uncontrolled price method
- Cost-plus method
- Resale price method
- Profit-based method

Effective from January 2013, specific rules are introduced for applying the comparable uncontrolled price method to the exportation and importation of commodities and other products, with prices set by reference to commodity prices.

The transfer-pricing rules provide for advance price agreements between taxpayers and the Peruvian tax authorities.

Domiciled taxpayers must file an information return if either of the following circumstances exists:

- The total amount of the operations (revenues and expenses) with related parties is higher than PEN 200,000 (approximately US$77,520).
- They have entered into at least one transaction with a resident in a low-tax jurisdiction (tax haven).

Taxpayers that must file information returns must file them in June of the following fiscal year in accordance with the Tax Administration’s schedule.

Domiciled taxpayers must prepare a transfer-pricing study if either of the following circumstances exists:

- Gross revenues are higher than PEN 6 million (approximately US$2,326,000) and the total amount of operations with related parties is higher than PEN 1 million (US$388,000).
- They have entered into at least one transaction with a resident in a low-tax jurisdiction (tax haven).

The tax authorities may request the submission of the transfer-pricing study after the end of the fiscal year.

**Debt-to-equity rules.** Interest on loans from related parties in excess of a 3:1 debt-to-equity ratio is not deductible.

**Transactions with residents in low-tax jurisdictions (tax havens).** Expenses incurred in transactions with residents in low-tax jurisdictions (tax havens) are not deductible for tax purposes, except for the following:

- Toll payments for the right to pass across the Panama Channel
- Expenses related to credit operations, insurance or reinsurance, leasing of ships or aircraft and freight services to and from Peru

The following are considered low-tax jurisdictions.

- Alderney
- Andorra
- Anguilla
- Antigua and Barbuda
- Aruba
- Bahamas
- Bahrain
- Barbados
- Belize
- Dominica
- Gibraltar
- Granada
- Guernsey
- Hong Kong SAR
- Isle of Man
- Jersey
- Labuan
- Liberia
- Liechtenstein
- Nauru
- Netherlands
- Antilles
- Niue
- Panama
- St. Kitts and Nevis
- St. Lucia
- St. Vincent and the Grenadines
- Seychelles
Bermuda  Luxembourg  Tonga
British Virgin Islands  Madeira  Turks and Caicos Islands
Cayman Islands  Maldives  U.S. Virgin Islands
Cook Islands  Marshall Islands  Vanuatu
Cyprus  Monaco  Western Samoa

In addition to the jurisdictions mentioned above, other jurisdictions are considered low-tax jurisdictions if the effective rate of income tax in the jurisdiction is 0% or if the effective rate that would apply to the relevant income is at least 50% less than the rate that would apply under the general income tax regime in Peru, and if one of the following additional conditions is met:

• The jurisdiction does not provide information regarding the taxation of companies in the jurisdiction.
• A tax benefit regime in the jurisdiction applies to nonresidents only.
• Beneficiaries of tax benefits in the jurisdiction may not carry out business activities in the jurisdiction.
• The jurisdiction promotes itself as a jurisdiction that can assist companies in the reduction of their taxation in their home countries.

**Controlled foreign corporations.** Recent amendments to the Peruvian Income Tax Law introduced the International Fiscal Transparency System, which applies to Peruvian residents who own a controlled foreign corporation (CFC). These amendments established the requirements for a foreign company to be qualified as a CFC. For these purposes, the ownership threshold is set at more than 50% of the equity, economic value or voting rights of a non-resident entity.

In addition, to be considered a CFC, a nonresident entity must be resident of either of the following:

• A tax-haven jurisdiction
• A country in which passive income is either not subject to income tax or subject to an income tax that is equal to or less than 75% of the income tax that would have applied in Peru

The amendments also provide a list of the types of passive income that must be recognized by the Peruvian resident (such as dividends, interest, royalties and capital gains).

The revenues are allocated based on the participation that the Peruvian entity owns in a CFC as of 31 December.

**General antiavoidance rule.** Under a general antiavoidance rule, which is effective from 19 July 2012, to determine the true nature of a taxable event, the Peruvian Tax Administration takes into account the events, situations and economic relationships that are actually carried out by the taxpayers.

If the Peruvian Tax Administration identifies a tax avoidance case, it may demand payment of the omitted tax debt or decrease the amount of any credits, net operating losses or other tax benefits obtained by the taxpayer.

In addition, the rule establishes specific requirements to determine whether a taxpayer intended to avoid all or part of a taxable event or reduce the tax base or tax liability.
Also, if the Peruvian tax authorities determine that the taxpayer executed sham transactions, it applies the appropriate tax rules to such acts.

**Domestic reorganizations.** Under the existing Income Tax Law, domestic reorganizations are subject to a tax-free regime, to the extent that the basis of the assets included in the reorganization is kept at historical value. A new law, which is effective from 1 January 2013, maintains this regime but establishes a minimum holding period in cases of spin-off reorganizations. The law states that the shareholders of the company being spun off that receive shares in the company to which the assets are contributed must keep the shares of the latter company until the closing of the next fiscal year following the reorganization. If the shares are transferred before that time, the underlying assets are deemed to be transferred by the acquiring company at market value. The tax is determined by the difference between the historic tax basis and the market value. In addition, the shareholder selling the shares is subject to the ordinary capital gains tax.

**F. Tax treaties**

Peru has entered into double tax treaties with Brazil, Canada and Chile. It has also signed an agreement to avoid double taxation with the other members of the Andean Community (Bolivia, Colombia and Ecuador) under which the exclusive right to tax is granted to the source country.

Peru has signed double tax treaties with Korea (South), Mexico, Spain and Switzerland, but these treaties have not been ratified by the Peruvian Congress and consequently are not yet effective. The following is a table of treaty withholding tax rates.

(a) See Section B.
(b) These rates apply to capital gains on shares in domestic corporations not traded on a local stock exchange. See Section B for further details and for the rates applicable to gains derived from sales of shares traded on a local stock exchange.
(c) Certain types of Philippine-source income of foreign corporations are taxed at preferential rates (see Section B).
(d) Under domestic law, dividends paid to domestic corporations or resident foreign corporations are not subject to tax. Dividends paid to nonresident foreign corporations are generally subject to a final withholding tax of 30%. However, this rate may be reduced to 15% if certain conditions are met (see Section B).
(e) The withholding tax rate for interest on peso deposits derived by domestic and resident foreign corporations is 20%. For preferential rates under tax treaties for nonresident foreign corporations, see Section F. For preferential rates on interest derived from foreign currency deposits, see Section B.
(f) Under domestic law, if the recipient is a nonresident foreign corporation, the final withholding tax rate is 30%. For reduced rates under tax treaties for nonresident foreign corporations, see Section F.
(g) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Domestic corporations are taxed on their worldwide net taxable income. Domestic corporations are corporations incorporated under the laws of the Philippines. Resident foreign corporations are taxed on net taxable income derived from the Philippines, and nonresident foreign corporations are taxed on gross income derived from the Philippines. A resident foreign corporation (a branch) is one created under foreign laws and engaged in trade or business in the Philippines. Any other foreign corporation is considered a nonresident.

Rates of corporate tax. Domestic and foreign corporations are subject to tax at a rate of 30%.

Subject to certain exceptions, a 2% Minimum Corporate Income Tax (MCIT) may be imposed on domestic and resident foreign corporations beginning with the fourth tax year following the year of commencement of business operations. The MCIT must be paid if the corporation has zero or negative taxable income or if the MCIT is greater than the regular corporate income tax liability.

Philippine-source income of foreign corporations taxed at preferential rates includes the following.
<table>
<thead>
<tr>
<th>Type of income</th>

</tr>
</tbody>
</table>

Domestic and foreign enterprises registered with the Board of Investments under the 1987 Omnibus Investments Code may be granted an income tax holiday and exemption from certain other taxes and duties. Enterprises located in special-economic zones that are registered with the Philippine Economic Zone Authority (PEZA) or the special-economic zones may be granted an income tax holiday or a special tax regime under which a 5% tax is imposed on gross income instead of all national and local taxes.
Profits remitted by a branch to its head office are subject to a 15% tax. This tax is imposed on the total profits remitted, or earmarked for remittance, without deduction of tax. The tax does not apply to profits from activities registered with the PEZA. Dividends, interest, royalties, rent and similar income received by a foreign corporation from sources in the Philippines are not treated as branch profits unless they are effectively connected with the conduct of a trade or business in the Philippines.

Capital gains. A 6% tax is imposed on capital gains presumed to have been derived from the sale, exchange or disposition of land or buildings classified as capital assets. The tax is applied to the gross selling price or the fair market value, whichever is higher.

Gains derived from the sale of shares of domestic corporations not traded on the stock exchange are subject to tax at a rate of 5% of the net capital gain not exceeding P 100,000 and at a rate of 10% on the excess. If the shares are listed and traded through the facilities of the Philippine Stock Exchange, the tax is 0.5% of the gross selling price. A tax is also imposed on the sale, barter, exchange or other disposition through an initial public offering of shares of stock in a closely held corporation at a rate of 1%, 2% or 4% of the gross sales price of the shares.

Administration. A corporation may use the calendar year or a fiscal year as its tax year.

Corporations must file quarterly returns within 60 days from the close of each of the first three quarters of the tax year, and a final or adjusted return on or before the 15th day of the fourth month following the close of the tax year. The corresponding tax is paid at the time the return is filed.

Dividends. Dividends received by a domestic or resident foreign corporation from a domestic corporation are not subject to tax. If the recipient is a nonresident foreign corporation, the 30% tax may be reduced to 15% if any of the following circumstances exists:

- The country of domicile of the recipient does not impose any tax on offshore or foreign-source income.
- The country of domicile of the recipient allows a credit for taxes deemed paid in the Philippines equal to 15%, which represents the difference between the regular corporate income tax rate of 30% and the 15% preferential tax on dividends.
- The dividend is not taxed in the recipient’s country of domicile.

Foreign tax relief. For domestic corporations, tax credits are allowed for income taxes paid or accrued to any foreign country, subject to certain limitations. Alternatively, such income taxes may be claimed as a deduction from taxable income. Resident foreign corporations are not allowed to credit tax paid to foreign countries against Philippine income.

C. Determination of trading income

General. The computation of income for income tax purposes must be in accordance with the accounting method regularly employed in maintaining the taxpayer’s books of account, provided that method clearly reflects income.
Other allowable deductions include the usual, ordinary and necessary business expenses, such as interest, taxes, losses, bad debts, charitable and other contributions, and contributions to a pension trust. All of these expenses are required to be directly attributable to the development, management, operation or conduct of a trade or business in the Philippines.

The deduction for interest expense is reduced by an amount equal to 33% of interest income that has been subject to final tax. Interest incurred to acquire property used in a trade or business may be claimed as a deduction or treated as a capital expenditure.

Research and development expenses that are paid or incurred during the tax year in connection with a trade or business and that are not chargeable to a capital account or treated as deferred expenses may be claimed as deductible expenses.

Inventories. Inventory valuation must conform as nearly as possible to the best accounting practice in the trade or business and must clearly reflect income. The most commonly used methods of inventory valuation are cost and the lower of cost or market.

Tax depreciation. Taxpayers may deduct a reasonable allowance for exhaustion and wear and tear (including obsolescence) of property used in a trade or business. The depreciation method used must be reasonable and generally accepted in the particular industry. Depreciation methods that are generally acceptable include the straight-line method, declining-balance method, the sum-of-the-years' digits method or any other method that may be prescribed by the Secretary of Finance. Resident foreign corporations may claim depreciation only on property located in the Philippines.

Relief for losses. Net operating losses may be carried forward three years to offset future income in those years. A net operating loss is defined as the excess of allowable deductions over gross income in a tax year. Net losses may not be carried forward if the losses are incurred in a year in which a corporation is exempt from income tax or if a substantial change of ownership occurs.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax (VAT); imposed on all persons who, in the course of their trade or business, sell, barter, exchange or lease goods or properties (including intangible personal properties and real properties), render services or import goods; services rendered in the Philippines by nonresident foreign persons are deemed to be rendered in the course of trade or business; specific goods and transactions are exempt; in general, exports of goods and services are subject to a 0% rate</td>
<td>12%</td>
</tr>
<tr>
<td>Improperly accumulated earnings tax; levied on accumulated income of corporations if the income was accumulated to avoid tax with respect to the shareholders of the corporation or other corporations; a corporation serving as</td>
<td></td>
</tr>
</tbody>
</table>
Nature of tax

A holding company or investment company is prima facie evidence of a purpose to avoid tax with respect to shareholders; publicly held companies, banks and nonbank financial intermediaries, and insurance companies are exempt.

Fringe benefit tax; applied to the grossed-up monetary value of fringe benefits received by managerial and supervisory employees; the grossed-up monetary value is determined by dividing the monetary value of the benefit by 68%; the employer must withhold the tax and pay it to the tax authorities; the tax does not apply if the benefit is required for or is necessary to the trade or business of the employer or if the benefit is granted for the convenience of the employer; this tax is considered to be a final tax.

General rate 32%

Benefits paid to nonresident alien individuals who are not engaged in a trade or business in the Philippines (monetary value of benefit is divided by 75%) 25%

Benefits paid to certain other individuals, including aliens working for specified entities (monetary value of benefit is divided by 85%) 15%

Documentary stamp tax

Original issue of all debt instruments; imposed on issue price P 1 per P 200

Stock certificates, on the par value or the consideration if no par value

Original issue P 1 per P 200

Transfer that is not made through a local stock exchange

Bills of exchange or drafts; imposed on the face value

Other specified transactions and documents Various

E. Miscellaneous matters

Foreign-exchange controls. The Philippines has adopted liberal foreign-exchange policies. In general, no restrictions are imposed on the repatriation of capital, profits or income earned in the Philippines. Foreign loans and foreign investments may be registered with the Philippine Central Bank (the Bangko Sentral ng Pilipinas, or BSP). Only loans registered with the BSP are eligible for servicing through the use of foreign exchange purchased from the banking system. However, the registration of a foreign investment is required only if the foreign exchange needed to service the repatriation of capital and the remittance of dividends, profits and earnings is sourced in the banking system.

Transfer pricing. The method used by a corporation to fix prices must be consistent worldwide.

The Philippines has yet to adopt formal transfer-pricing regulations (draft regulations have been circulated and are currently being evaluated by the tax authorities). However, existing tax rules...
set the parameters for determining the “true” taxable income of related taxpayers in specific transactions such as intercompany loans and advances, cost sharing, resale and agency agreements, and the supply of goods and services between related parties.

The draft regulations are based on the Organization for Economic Cooperation and Development (OECD) transfer-pricing guidelines and provide for several methods of arriving at an arm’s-length price. Before the formal issuance of transfer-pricing regulations, the Bureau of Internal Revenue (BIR) has mandated that the OECD transfer-pricing guidelines must be applied as the interim transfer-pricing guidelines.

**Related-party transactions.** Related-party transactions must comply with the arm’s-length standard. Under certain conditions, a deduction may not be claimed for losses on sales or exchanges of properties or for interest incurred on transactions between related parties. The BIR Commissioner may reallocate gross income or deductions among related entities to prevent manipulation of reported income.

**F. Treaty withholding tax rates**

The table below lists the maximum withholding rates for dividends, interest and royalties provided under the treaties. Most of the treaties require that the recipient be the beneficial owner of the income for the preferential rates to apply. A tax treaty relief application must be submitted before a tax exemption or beneficial treaty rate under a tax treaty may be claimed.

</tbody>
</table>

(a) The rate is 15% if a rebate or credit is granted to the recipient.
(b) The rate is 10% if the interest is paid with respect to public issues of bonds, debentures or similar obligations (under the United States treaty, with respect to public issues of bonded indebtedness). Under the Austria, Japan and Korea treaties, the 10% rate also applies to interest paid by a Board of Investments (BOI)-registered preferred pioneer enterprise. Under the India treaty, the 10% rate also applies to interest paid to financial institutions, including insurance companies.
(c) The rate is 10% (Austria, Japan, Korea, Netherlands and Spain) or 15% (Australia, Finland, Indonesia, Italy, Malaysia, New Zealand, Pakistan, Singapore, Thailand, the United Kingdom and the United States) for royalties paid by a BOI-registered preferred enterprise (under the Austria, Japan and Korea treaties, the enterprise must be a pioneer enterprise). The 15% rate also applies to royalties paid with respect to cinematographic films or tapes for television or broadcasting under the treaties with Finland, Italy, Japan, Malaysia, Singapore, Thailand and the United Kingdom. Under the Spain treaty, the rate is 20% for such royalties. Under the Finland treaty, the rate is also 15% for royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works.
(d) The rate is 10% (Canada, Japan, Norway, and the United Kingdom, 15%) if the recipient holds 10% (Romania, 25%) of the voting shares of the payer corporation. Under the treaties with Austria and Japan, the rate is also 10% if the payer holds 10% (Japan, 25%) of the total shares issued by the payer during the six months immediately preceding the dividend payment date. Under the Japan treaty, the rate is also 10% if the dividends are paid by a BOI-registered pioneer enterprise. Under the Romania and Spain treaties, the 10% rate does not apply to partnerships. Under the treaty with Romania, the shares must have been owned for at least two years preceding the date of the dividend payment.
(e) This rate is subject to the “most-favored-nation” provision of the treaty.
(f) The rate is 10% if the recipient of the dividends holds directly at least 10% of the capital of the payer. Under the treaties with Bahrain, Israel, Switzerland and the United Arab Emirates, partnerships do not qualify for the 10% rate. Under the treaty with the United Arab Emirates, the dividends are exempt from tax if the beneficial owner of the dividends is the government of a contracting state, a local government, a political subdivision, a local authority or any of their governmental institutions or entities.
(g) The 25% rate applies to royalties paid for the use of, or the right to use, trademarks, cinematographic films, or films or tapes for television or radio broadcasting. A 15% rate applies to other royalties.
(h) This rate applies if the interest payments or royalties are taxable in Canada.
(i) A 15% rate applies if the recipient is a company (under the Brazil treaty, a partnership also qualifies). The 25% rate applies in all other cases. Under the Malaysia treaty, the recipient must be subject to tax in Malaysia.
(j) The rate is 15% for royalties paid with respect to cinematographic films and tapes for television or broadcasting. The rate is 10% if the payer is registered with the BOI as a preferred pioneer enterprise.
(k) The rate is 15% (Hungary, Indonesia, 15%) if the recipient holds directly at least 25% of the capital of the payer. Under the treaties with Bangladesh, Denmark, Germany, Korea, Poland, Sweden and Vietnam, a partnership does not qualify for the 10% rate. Under the Korea treaty, the 10% rate also applies if the dividends are paid by a BOI-registered preferred pioneer enterprise.
The rate is 10% for interest paid with respect to sales on credit of industrial, commercial or scientific equipment or with respect to public issues of bonds, debentures or similar obligations. Under the Germany and Netherlands treaties, the 10% rate also applies to interest on bank loans.

This rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting. The rate is 10% for royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

The rate is 15% if the recipient held 25% of the capital of the payer during the two tax years preceding the year of the dividend payment. Partnerships do not qualify for the 15% rate.

The rate is 15% if the beneficiary of the dividends owns at least 10% of the shares of the payer.

The rate is 10% (India, 15%) if the Philippine payer is registered with the BOI (under the Norway treaty, the enterprise must be a preferred pioneer enterprise). Under the Norway treaty, the rate is 7.5% for payments for the use of containers.

Under the treaty with Romania, the rate is 10% for interest paid with respect to sales on credit of industrial, commercial or scientific machines or equipment, bank loans or public issues of bonds, debentures or similar obligations. Under the treaty with the United Arab Emirates, interest is exempt from tax if it is derived with respect to a loan made, guaranteed, or insured by the government of the other contracting state or a political subdivision, local authority or local government, including financial institutions wholly owned by the government or any other instrumentality, as agreed by the contracting states.

The 15% rate (France, 10%; United States, 20%) applies if the recipient holds at least 10% (Thailand and Singapore, 15%) of the voting shares of the payer. Under the Finland and France treaties, partnerships do not qualify for the 10% rate. Under the Singapore and United States treaties, the shares must have been owned for at least two tax years preceding the year of the dividend payment.

The 15% rate applies to royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting. A 10% rate applies to royalties paid for the following:
- The use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes
- The use of, or the right to use, industrial, commercial, or scientific equipment
- Information concerning industrial, commercial or scientific experience

This rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting. The rate is 10% for other royalties.

The 15% rate applies to royalties paid for the use of, or the right to use, copyrights of cinematographic films, and films or tapes for television or radio broadcasting. A 10% rate applies to royalties paid for the following:
- The use of, or the right to use, copyrights of literary, artistic or scientific works, with certain exceptions
- The use of, or the right to use, patents, trademarks, designs or models, plans, or secret formulas or processes
- The use of, or the right to use, industrial, commercial or scientific equipment
- Information concerning industrial, commercial or scientific experience

A preferential rate of 15% under the National Internal Revenue Code may apply if the recipient’s country of domicile allows a credit for taxes deemed paid in the Philippines equal to 15%. This credit represents the difference between the regular corporate income tax rate of 30% and the 15% preferential rate. The 15% rate also applies if the dividend is not taxed in the recipient’s country of domicile.

Under Philippine domestic law, interest on foreign-currency deposits of non-residents is exempt from tax.

Poland joined the European Union (EU) on 1 May 2004. This has significantly affected the Polish tax system, particularly with respect to value-added tax (VAT). It has also affected the corporate tax treatment of cross-border transactions such as dividend payments and restructurings (mergers and divisions). Poland was granted a transitional period for its implementation of the EU Directive on Interest and Royalties (see Section B). Because of the rapidly changing regulatory framework in Poland, readers should obtain updated information before engaging in transactions.

(a) This tax is imposed on dividends paid to residents and nonresidents.
(b) This rate may be reduced by a tax treaty, or under domestic law, if certain conditions are met (see Section B).
(c) This rate applies only to interest and royalties paid to nonresidents.
(d) The tax rate may be reduced by a tax treaty or under domestic law if certain conditions are met (see Section B).
(e) This withholding tax applies only to service payments made to nonresidents. In general, a foreign-service provider based in a treaty country is exempt from this tax if it submits a certificate of residency to the service recipient.
(f) No more than 50% of the original loss can be deducted in one year.

### B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies (including companies in the process of incorporating or registering) are subject to corporate tax on their worldwide income and capital gains. Non-resident companies are taxed only on income earned in Poland. A company is resident in Poland for tax purposes if it is incorporated in Poland or managed in Poland. For this purpose, the concept of management is broadly equivalent to the effective management test in many treaties and is typically deemed to be exercised where the board of directors (or equivalent) meets. A branch of a non-resident company is generally taxed according to the same rules as a Polish company, but only on its Polish-source income. Partnerships are tax transparent except for foreign partnerships that are treated in their countries as taxpayers subject to corporate income tax. Under proposed amendments to the corporate income tax, Polish limited joint-stock partnerships will be treated as corporate income taxpayers. However, at the time of writing, the form and date of entry into force of the respective corporate income tax amendments were not yet known.

Under most tax treaties, income from an overseas representative office or permanent establishment of a Polish resident company
is exempt from tax. Alternatively, certain tax treaties grant a tax credit for the foreign tax imposed on foreign-source income.

**Tax rates.** The general corporate income tax rate is 19%.

Withholding tax is not imposed on transfers of profits from a branch to its head office because from a legal perspective, a branch is regarded as an organizational unit of the foreign enterprise.

**Capital gains.** Capital gains, including those derived from the sale of publicly traded shares and state bonds, are treated as part of a company’s profits and are taxed at the regular corporate tax rate. Capital losses are deductible from normal business income.

In general, capital gains are calculated by subtracting the cost of the asset (or its net value for tax purposes) and sales expenses from the sales proceeds. If the sales price differs substantially from market value, the tax office may apply an independent expert valuation.

Capital gains derived by nonresidents from sales and other disposals of state bonds issued on foreign markets may be effectively exempt from tax in Poland under domestic regulations if certain conditions are satisfied.

**Administration.** The Polish tax year must last 12 consecutive months, and it is usually the calendar year. However, a company can choose a different period of 12 consecutive months as its tax year by notifying the relevant tax office by certain deadlines. The first tax year after a change must extend for at least 12 months, but no longer than 23 months. If a company incorporated in the first half of a calendar year chooses the calendar year as its tax year, its first tax year is shorter than 12 months. A company incorporated in the second half of a calendar year may elect a period of up to 18 months for its first tax year (that is, a period covering the second half of the year of incorporation and the subsequent year). In the event of a liquidation, a merger or division of a company, the tax year may be shorter than 12 months.

In general, companies must pay monthly advances based on preliminary income statements. Monthly declarations do not need to be filed. In certain circumstances, a company may benefit from a simplified advance tax payment procedure.

Companies must file an annual income tax return within three months after the end of the company’s tax year. They must pay any balance of tax due at that time.

An overpayment declared in an annual tax return is refunded within three months. However, before the overpayment is refunded, it is credited against any past and current tax liability of the company. If the company has no tax liability, it may request that the tax office credit the overpayment against future tax liabilities or refund the overpayment in cash. Overpayments earn interest at the same rate that is charged on late payments. Under the tax code, the rate of penalty interest on unpaid taxes varies according to the fluctuation of the Lombard credit rate. The interest rate on tax arrears is 200% of the Lombard credit rate, plus 2%. It cannot be lower than 8%. The penalty interest rate was 14% on 8 November 2012.
Dividends. A 19% withholding tax is imposed on dividends and other profit distributions paid to residents and nonresidents. Resident recipients do not aggregate dividends received with their taxable income subject to the regular rate. For nonresident recipients, the withholding tax is considered a final tax and, accordingly, the recipient is not subject to any further tax on the dividend received. A treaty may reduce the tax rate for distributions to nonresidents if the recipient who is the beneficial owner of the dividend provides the required certificate indicating that the recipient’s tax residence is located in the other treaty country.

Polish companies, other European Economic Area (EEA; the EEA consists of the EU countries and Iceland, Liechtenstein and Norway) companies and Swiss companies are exempt from tax on dividends and other profit distributions received from Polish subsidiaries if they satisfy all of the following conditions:

- They are subject to income tax in Poland, an EU/EEA member state or Switzerland on their total income, regardless of the source of the income (the exemption applies also to dividends or other profit distributions paid to permanent establishments, located in EU/EEA member states or in Switzerland, of such companies).
- They do not benefit from income tax exemption on their total income (which should be documented with their written statement).
- For at least two years, they hold directly at least 10% (25% for Swiss recipients) of the capital of the company paying the dividend. The two-year holding period can be met after payment is made. If the two-year holding period is eventually not met (for example, the shareholder disposes of the shares before the two-year holding requirement is met), the shareholder must pay the withholding tax and penalty interest. Broadly, except for some specific cases, full ownership of the shares is required.
- The Polish payer documents the tax residency of the recipient with a certificate of residency issued by the competent foreign tax authorities (if payments are received by a permanent establishment, some other documents may be needed).
- A legal basis exists for a tax authority to request information from the tax administration of the country where the taxpayer is established, under a double tax treaty or other ratified international treaty to which Poland is a party.
- The dividend payer is provided with a written statement confirming that the recipient of the dividend does not benefit from exemption from income tax on its worldwide income, regardless of the source from which such income is derived.

Interest, royalties and service fees. Under the domestic tax law in Poland, a 20% withholding tax is imposed on interest, royalties and fees for certain services paid to nonresidents. This withholding tax may be eliminated or reduced if the following conditions are satisfied:

- The payer can document the tax residency of the recipient (beneficial owner) of the payment or the service provider with a certificate indicating that the recipient or service provider’s tax residence is in a country that has concluded a double tax treaty with Poland.
- The relevant treaty allocates taxing rights to the country of the service provider or recipient, or provides a different rate.
Under most of Poland’s tax treaties, the withholding tax on fees for services may not be imposed in Poland.

Poland has been granted a transitional period for the implementation of the EU Interest and Royalties Directive (2003/49/EC). Under the transitional rules, Poland must incorporate the directive provisions into its domestic law, but it still may impose withholding tax at reduced rates. Until 30 June 2013, withholding tax may be imposed at a maximum rate of 5%. These regulations apply if the following conditions are met:

- The payer is a company that is a Polish corporate income taxpayer with a place of management or registered office in Poland (the exemption applies also to payments made by permanent establishments located in Poland of entities subject to income tax in the EU on their total income, regardless of the source of the income, provided that such payments qualify as tax-deductible costs in computing the taxable income subject to tax in Poland).
- The entity earning the income is a recipient of such income and is a company subject to income tax in an EU/EEA member state (other than Poland) on its total income, regardless of the source of the income (the exemption applies also to payments made to permanent establishments of such companies if the income earned as a result of such a payment is subject to income tax in the EU member state in which the permanent establishment is located). In addition, the company must not benefit from income tax exemption on its total income.
- For at least two years, the recipient of the payments holds directly at least 25% of the share capital of the payer or the payer holds directly at least 25% of the share capital of the recipient of the payments. This condition is also met if the same entity holds directly at least 25% of both the share capital of the payer and the share capital of the recipient of the payments and such entity is subject to income tax in an EU/EEA member state on its total income, regardless of the source of the income. The two-year holding period can be met after payment is made. If the two-year holding period is eventually not met (for example, the shareholder disposes of the shares before the two-year holding requirement is met), the shareholder must pay the withholding tax together with the penalty interest. Full ownership of the shares is required.
- The Polish payer documents the tax residency of the recipients of the payments with a certificate of tax residency issued by the competent foreign tax authorities (if payments are received by a permanent establishment, some other documents may be needed).
- A legal basis exists for a tax authority to request information from the tax administration of the country where the taxpayer is established, under a double tax treaty or other ratified international treaty to which Poland is a party.
- The recipient of the payments provides a written statement confirming that it does not benefit from exemption from income tax on its total income, regardless of the source of the income.

Effective from 1 July 2013, interest and royalties paid to qualifying entities mentioned above will be exempt from withholding tax in Poland if the conditions are met. Certain types of income are excluded from the exemption.
Foreign tax relief. Under its tax treaties, Poland exempts foreign-source income from tax or grants a tax credit (usually with respect to dividends, interest and royalties). Broadly, foreign taxes are creditable against Polish tax only up to the amount of Polish tax attributable to the foreign income.

In addition to a credit for tax on dividends (that is, a deduction of withholding tax; direct tax credit), Polish companies (or Polish permanent establishments of EU/EEA resident companies) may also claim a credit for the tax on profits generated by their subsidiaries in other treaty countries (indirect tax credit). A Polish company receiving a dividend from a subsidiary that is not resident in the EU, EEA or Switzerland may deduct from its tax the amount of income tax paid by the subsidiary on that part of the profit from which the dividend was paid if the Polish parent company has held directly at least 75% of the foreign subsidiary’s shares for an uninterrupted period of at least 2 years. The total deduction is limited to the amount of Polish tax attributable to the foreign income.

Foreign-source dividends are added to other profits of a Polish taxpayer taxed at the standard 19% rate. Dividends from companies resident in EU/EEA states or in Switzerland may be exempt in Poland if the Polish recipient holds directly at least 10% (25% in the case of Switzerland) of the share capital of the foreign subsidiary for an uninterrupted period of at least 2 years. The shareholding period requirement does not have to be met as of the payment date.

The above exemption does not apply if income from the participation, including redemption proceeds, is received as a result of the liquidation of the legal entity making the payments.

The domestic exemption or tax credit can be applied if a legal basis exists for a tax authority to request information from the tax administration of the country from which the income was derived, under a double tax treaty or other ratified international treaty to which Poland is a party.

Broadly, except for some specific cases, full ownership of the shares is required to claim the credits and exemptions discussed above.

C. Determination of trading income

General. Taxable income equals the difference between revenues subject to tax and tax-deductible expenses. Accounts prepared in accordance with Polish accounting standards are the basic source of information for determining taxable income. In practice, taxable income is arrived at by adjusting accounting results for tax purposes. Taxpayers must maintain accounting records in a manner that allows the tax base and the amount of tax payable to be determined. Otherwise, taxable income may be assessed by the tax authorities.

In general, taxable revenues of corporate entities carrying out business activities are recognized on an accrual basis. Revenues are generally recognized on the date of disposal of goods or property rights or the date on which services are supplied (or supplied in part), but no later than the following:

- Date of issuance of the invoice
- Date of receipt of payment
If the parties agree that services of a continuous nature are accounted for over more than one reporting period, revenue is recognized on the last day of the reporting period set out in the contract or on the invoice (however, not less frequently than once a year).

The definition of revenues includes free and partially free benefits.

Expenses are generally allowed as deductions if they relate to taxable revenues derived in Poland, but certain expenses are specifically disallowed.

Branches and permanent establishments of foreign companies are taxed on income determined on the basis of the accounting records, which must be kept in Polish currency. However, regulations provide coefficients for specific revenue categories, which may be applied if the tax base for foreign companies cannot be determined from the accounting records.

Depreciation. For tax purposes, depreciation calculated in accordance with the statutory rates is deductible. Depreciation is computed using the straight-line method. However, in certain circumstances, the reducing-balance method may be allowed. The following are some of the applicable annual straight-line rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>1.5 to 10*</td>
</tr>
<tr>
<td>Office equipment</td>
<td>14</td>
</tr>
<tr>
<td>Office furniture</td>
<td>20</td>
</tr>
<tr>
<td>Computers</td>
<td>30</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>20</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>4.5 to 20</td>
</tr>
</tbody>
</table>

* For used buildings, an individual depreciation rate may be applied (the minimum depreciation period is calculated as a difference between 40 years and the time of use of the building).

For certain types of assets, depreciation rates may be increased. Companies may also apply reduced depreciation rates.

Intangibles are amortized over a minimum period, which usually ranges from 12 months (for example, development costs) to 60 months (for example, goodwill).

Relief for losses. Losses from one source of profits may offset income from other sources in the same tax year. Losses may be carried forward to the following five tax years to offset profits from all sources that are derived in those years. Up to 50% of the original loss may offset profits in any of the five tax years. Losses may not be carried back.

Groups of companies. Groups of related companies may report combined taxable income and pay one combined tax for all companies belonging to the group. To qualify as a tax group, related companies must satisfy several conditions, including the following:

- The parent company in the tax group must directly own 95% of the shares of the subsidiary companies.
- The agreement on setting up a tax group must be concluded for a period of at least three years. It must be concluded in front of a notary public and registered with the tax office.
The taxable income of the group companies in each tax year must amount to at least 3% of the gross taxable revenues of the group companies. The members of the group may not benefit from any corporate income tax exemptions based on laws other than the Corporate Income Tax Law.

In practice, the applicability of the rules for tax groups is very limited, primarily as a result of the profitability requirement.

D. Value-added tax

Value-added tax (VAT) is imposed on goods sold and services rendered in Poland, exports, imports, and acquisitions and supplies of goods within the EU. Poland has adopted most of the EU VAT rules.

Effective from 1 January 2011, the standard rate of VAT is 23%. Lower rates may apply to specified goods and services. The 0% rate applies to exports and supplies of goods within the EU. Certain goods and services are exempt.

E. Miscellaneous matters

Foreign-exchange controls. Polish-based companies may open foreign-exchange accounts. All export proceeds received in convertible currencies and receipts from most foreign sources may be deposited in these accounts. Businesses may open foreign currency accounts abroad. However, restrictions apply to the opening of accounts in countries that are not members of the EU, EEA or the Organization for Economic Cooperation and Development (OECD). No permit is required for most loans obtained by Polish-based companies from abroad, including loans from foreign shareholders. Reporting requirements are imposed for certain loans and credits granted from abroad.

Antiavoidance legislation. In applying the tax law, the tax authorities refer to the substance of a transaction in addition to its form.

If under the name (legal form) of the transaction, the parties have hidden some other transaction, the tax authorities may disregard the name (legal form) used by the parties and determine the tax implications of the transaction on the basis of actual intent of the parties.

If the tax authorities have doubts about the existence or the substance of the legal relationship between the parties, they refer the case to the common court to establish the type of the actual legal relationship.

Debt-to-equity rules. Under thin-capitalization rules, if debts owed to specified related parties exceed three times the share capital of the borrower, interest paid on debts exceeding the limit is not deductible for tax purposes. For the purposes of these rules, share capital consists of paid-in capital only; it does not include debt converted into capital or contributed intangibles that are not depreciated for tax purposes (for example, goodwill under certain circumstances). The thin-capitalization rules apply to interest on loans granted by Polish and foreign qualified entities. They cover the following loans:
Loans granted by a shareholder that holds at least 25% of the voting rights in the borrower
Loans granted by shareholders that jointly hold at least 25% of the voting rights in the borrower
Loans granted by one company to another company if the same shareholder or shareholders hold at least 25% of the voting rights in both the lender and the borrower

The definition of loans covers any form of debt financing, including the issuance of bonds, and bank and nonbank deposits.

Under draft changes to the Polish Corporate Income Tax Act, the thin-capitalization rules will restrict deductibility of interest on a broader range of loans than under the existing law. However, at the time of writing, the date of entry into force of the proposed measures and the final wording of the measures were not yet known.

Transfer pricing. The Polish tax law includes specific rules on transfer pricing. The fundamental rules, which are based on the OECD guidelines, are contained in the Corporate Income Tax Law and the Personal Income Tax Law.

Under the Corporate Income Tax Law, the following are related parties:

- A domestic entity (a legal or natural person having its registered office [place of management] or residence in Poland) and a foreign entity (a legal or natural person having its registered office [place of management] or residence abroad), if any of the following circumstances exist:
  - The domestic entity participates, directly or indirectly, in the management, control or capital of the foreign entity.
  - The foreign entity participates, directly or indirectly, in the management, control or capital of the domestic entity.
  - The same legal or natural persons participate, directly or indirectly, in the management, control or capital of both the domestic entity and the foreign entity.

- Two domestic entities, if the following circumstances exist:
  - The domestic entity participates, directly or indirectly, in the management, control or capital of the other domestic entity.
  - The same legal or natural persons participate, directly or indirectly, in the management, control or capital of the domestic entities.
  - Family, capital, property or employment relations exist between the entities or the management, supervision or control personnel of the entities, or the same persons carry out management, supervision or control functions in the entities.

Polish tax law enumerates transfer-pricing methods that must be followed by the tax authorities in testing the prices applied in intercompany transactions (taxpayers do not have to apply these methods). The tax law provides for the following traditional transfer-pricing methods:

- The comparable uncontrolled price method (preferable one)
- The resale-price method
- The cost-plus method

If the above methods are inapplicable, the transactional methods (profit-split method and transactional net margin method) can be considered.
Under the tax law, on the request of the tax authorities, taxpayers conducting transactions with related parties exceeding certain statutory thresholds (of a relatively low value) must prepare specific tax documentation regarding these transactions and present it to the tax authorities or tax inspection authorities within seven days after the date of the request. The documentation must be in Polish and must contain the following:

- A description of the functions of the parties to the transaction (including assets engaged and risks assumed)
- All expected costs of the transaction and the method and terms of payment
- The method for calculating profits and a description of the transaction price
- A description of the business strategy and any other related activity if this strategy affects the transaction value
- An indication of any other factors that were taken into account in determining the transaction value
- A description of the benefits that the entity required to prepare the documentation expects to obtain from the purchase of intangible assets or services, such as advisory or financial services, granting of licenses or purchase of intellectual property

The documentation requirements also apply to entities that enter into transactions involving payments to tax havens if the total value of the transactions exceeds €20,000 during the tax year.

If the tax authorities assess additional income to a taxpayer and if a taxpayer does not provide the transfer-pricing documentation required by the law, additional income that is assessed in connection with intercompany transactions that are not covered with the documentation is taxed at a penalty tax rate of 50%.

Effective from 1 January 2007, the transfer-pricing documentation requirements applicable to Polish entities also apply to PEs of foreign residents located in Poland. In addition, if income earned by the PE of a foreign resident is assessed in Poland and if no transfer-pricing documentation is submitted by the statutory deadline, a corporate income tax rate of 50% can be applied to any excess over the fair market amount.

Taxpayers must report foreign related-party transactions if the total amount of the transactions exceeds €300,000 in a tax year. If the foreign entity has a representative office or a permanent establishment in Poland, the reporting obligation applies to single transactions exceeding €5,000.

The required information must be submitted to the tax office by the end of the third month following the end of the tax year.

The Advanced Pricing Agreement (APA) regulations entered into force on 1 January 2006. An APA concluded for a particular transaction is binding on the tax authorities with respect to the method selected by the taxpayer. APAs may apply to transactions that have not yet been executed or transactions that are in progress when the taxpayer submits an application for an APA.

In June 2006, Poland ratified the EU convention on the elimination of double taxation in connection with the adjustment of profits of associated enterprises (90/436/EEC).
F. Treaty withholding tax rates

The standard withholding tax rates are 19% for dividends and 20% for interest and royalties. The rate may be reduced under a double tax treaty on presentation of a certificate of tax residence or, in some cases, under domestic regulations. The following table shows the withholding tax rates under Polish double tax treaties.

</table>

(a) The lower rate applies if the recipient of the dividends is a company that owns at least 10% of the payer.
(b) The lower rate applies if the recipient of the dividends is a company that owns at least 15% of the payer.
(c) The lower rate applies if the recipient of the dividends is a company that owns at least 20% of the payer.
(d) The lower rate applies if the recipient of the dividends is a company that owns at least 25% of the payer.
(e) The lower rate applies if the recipient of the dividends is a company that owns more than 30% of the payer.
(f) The lower rate applies to royalties paid for copyrights, among other items; the higher rate applies to royalties for patents, trademarks and industrial, commercial or scientific equipment or information.
(g) The lower rate applies if the recipient of the dividends is a company that owns at least 10% of the voting shares of the payer.
(h) The lower rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.
(i) The lower rate applies to cultural royalties.
(j) This rate applies if the recipient of the dividends is a company that owns at least one-third of the payer.
(k) The 0% rate applies to among other items, interest paid to government units, local authorities and central banks. In the case of certain countries, the rate also applies to banks (the list of exempt or preferred recipients varies by country). The relevant treaty should be consulted in all cases.
(l) The 0% rate applies to royalties paid for, among other items, copyrights. The 10% rate applies to royalties paid for patents, trademarks and for industrial, commercial or scientific equipment or information.

(m) The 20% rate applies if the recipient of the interest is not a financial or insurance institution or government unit.

(n) The lower rate applies to know-how; the higher rate applies to copyrights, patents and trademarks.

(o) The 10% rate applies if, on the date of the payment of dividends, the recipient of the dividends has owned at least 25% of the share capital of the payer for an uninterrupted period of at least two years. The 15% rate applies to other dividends.

(p) The lower rate applies to royalties paid for the following:
   • Copyrights
   • The use of or the right to use industrial, commercial and scientific equipment
   • Services comprising scientific or technical studies
   • Research and advisory, supervisory or management services
   The treaty should be checked in all cases.

(q) The lower rate applies to know-how, patents and trademarks.

(r) The lower rate applies to certain dividends paid to government units or companies.

(s) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer of the dividends for at least one year and if the dividends are declared within such holding period. The 5% rate applies to dividends paid to pension funds or other similar institutions operating in the field of pension systems. The 15% rate applies to other dividends.

(t) Because the rate under the domestic law of Poland is 19%, the treaty rate of 20% does not apply.

(u) The treaty with the former Federal Republic of Yugoslavia that applied to the Union of Serbia and Montenegro should apply to the Republics of Montenegro and Serbia.

(v) The lower rate applies to fees for technical services.

(w) The 10% rate also applies to fees for technical services.

(x) The 20% rate also applies to certain services (for example advisory, accounting, market research, legal assistance, advertising, management and control, data processing, search and selection services, guarantees and pledges and similar services).

(y) The 5% rate applies if the beneficial owner is a company (other than a partnership) that controls directly at least 25% of the capital of the company paying the dividends.

(z) The lower rate applies if the owner of the dividends is the government or a government institution.

(aa) The 10% rate applies to interest paid to banks and insurance companies and to interest on bonds that are regularly and substantially traded.

(bb) Because the rate under the domestic law in Poland is 20%, the treaty rate of 22.5% does not apply.

(cc) The lower rate applies if the recipient of the dividends is a company that owns either of the following:
   • At least 25% of the payer
   • At least 10% of the payer, provided the value of the investment amounts to at least €500,000 or its equivalent

(dd) The treaty rate is 15% for all types of interest. However, under a most-favored-nation clause in a protocol to the treaty, the 15% rate is replaced by any more beneficial rate agreed to by Chile in a treaty entered into with another jurisdiction. For example, under Chile’s tax treaty with Spain, a 5% rate applies to certain types of interest payments, including interest paid to banks or insurance companies or interest derived from bonds or securities that are regularly and substantially traded on a recognized securities market.

(ee) The general treaty rate for royalties is 15%. However, under a most-favored-nation clause in a protocol to the treaty, the 15% rate is replaced by any more beneficial rate agreed to by Chile in a treaty entered into with another jurisdiction. For example, under Chile’s tax treaty with Spain, the general withholding tax rate for royalties is 10%.

(ff) The 0% rate applies if the beneficial owner of the dividends is a company that holds at least 10% of the share capital of the payer of the dividends for an uninterrupted period of at least two years.

(gg) The treaty has not yet entered into force.

(hh) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends on the date on which the dividends are paid and has held the capital or will hold the capital for an uninterrupted 24-month period that includes the date of payment of the dividends.
(ii) The rate is 10% if Switzerland imposes a withholding tax on royalties paid to nonresidents.

(jj) The lower rate applies if the recipient of the dividends is a company (other than a partnership) that owns directly at least 10% of the payer. Certain limitations to the application of the preferential rates may apply.

(kk) The lower rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting power of the payer. Under the Ireland treaty, if Ireland levies tax at source on dividends, the 0% rate is replaced by a rate of 5%.

(ll) The 0% rate applies to dividends paid to a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends on the date the dividends are paid and has done so or will have done so for an uninterrupted 24-month period in which that date falls. The 0% rate may also apply to dividends paid to certain pension funds.

(mm) The 10% rate applies to interest paid before 1 July 2013. For interest paid on or after 1 July 2013, the 5% rate applies unless an exemption applies. The 0% rate applies to such interest if any of the following conditions is satisfied:

- The beneficial owner of the interest is a company (other than a partnership) that holds directly at least 25% of the share capital of the payer of the interest.
- The payer of the interest holds directly at least 25% of the share capital of the beneficial owner of the interest.
- An EU/EEA company holds directly at least 25% of the share capital of both the beneficial owner of the interest and the payer of the interest.

(nn) For royalties paid before 1 July 2013, the 10% rate applies if Switzerland imposes in its local provisions a withholding tax on royalties paid to non-residents. Otherwise, a 0% rate applies. For royalties paid on or after 1 July 2013, a 5% rate applies unless an exemption applies. The 0% rate applies to such royalties if any of the following conditions is satisfied:

- The beneficial owner of the royalties is a company (other than a partnership) that holds directly at least 25% of the share capital of the payer of the royalties.
- The payer of the royalties holds directly at least 25% of the share capital of the beneficial owner of the royalties.
- An EU/EEA company holds directly at least 25% of the share capital of both the beneficial owner of the royalties and the payer of the royalties.

Furthermore, if Poland enters into an agreement with an EU or EEA country that allows it to apply a rate that is lower than 5%, such lower rate will also apply to royalties paid between Poland and Switzerland.

(oo) The lower rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends for an uninterrupted period of 24 months.

(a) Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or I.R.C.) applies to resident companies and nonresident companies with permanent establishments in Portugal. See Section B for details of other rates.
(b) A municipal surcharge of 1.5% is generally imposed on the taxable profit determined for I.R.C. purposes. Certain municipalities do not levy the surcharge. For further details, see Section B.

(c) A state surcharge of 3% is imposed on the taxable profit determined for I.R.C. purposes between €1,500,000 and €7,500,000. If the taxable profit for I.R.C. purposes exceeds €7,500,000, the state surcharge is levied at a rate of 5% on the excess.

(d) See Section B.

(e) Income must be declared and is subject to the normal tax rates. Amounts withheld may be credited against the I.R.C. due. See Section B.

(f) Investment income paid to tax-haven entities is subject to a 35% withholding tax. The same tax applies if the beneficial owner of the income is not properly disclosed.

(g) The rates may be reduced by tax treaties or by European Union (EU) Directives. Under the EU Parent-Subsidiary Directive (also applicable to dividends paid to Swiss parent companies), the rate on dividends may be reduced to 0%. Under the EU Interest and Royalties Directive, the rate on interest or royalties may be reduced to 5% (applicable until 30 June 2013) or 0% (applicable thereafter) if the interest or royalties are paid between EU associated companies.

(h) Applicable to interest from private and public company bonds.

(i) Applies to interest on bonds issued after 15 October 1994. A 25% withholding tax applies to interest on bonds issued on or before that date.

(j) Interest on certain bonds traded on the stock exchange and paid to nonresidents not operating in Portugal through a permanent establishment may in certain circumstances be exempt from tax. The same exemption may also apply to capital gains derived from disposals of such bonds. The exemption does not apply to entities that are more than 20% held, directly or indirectly, by Portuguese residents and to entities resident in tax havens (except central banks and other government agencies).

(k) The 25% rate applies to most services and commissions. The 25% rate applies to services performed by artists and sportspersons and to fees paid to board members. This tax does not apply to communication, financial and transportation services. The tax is eliminated by most tax treaties, but this may not be the case for income derived from the performance of artists and sportspersons.

(l) For tax losses computed before 2010, the prior six-year carryforward period applies. For tax losses computed in 2010, a four-year carryforward period applies. For tax losses used from 1 January 2012, the amount deductible each year is capped by 75% of the taxable profit for the year.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or I.R.C.) is levied on resident and nonresident entities.

Resident entities. Companies and other entities, including nonlegal entities, whose principal activity is commercial, industrial or agricultural, are subject to I.R.C. on worldwide profits, but a foreign tax credit may reduce the amount of I.R.C. payable (see Foreign tax relief).

Companies and other entities, including nonlegal entities, that do not carry out commercial, industrial or agricultural activities, are generally subject to tax on their worldwide income (for details regarding the calculation of the taxable profit of these entities, see Section C).

Nonresident entities. Companies or other entities that operate in Portugal through a permanent establishment are subject to I.R.C. on the profits attributable to the permanent establishments.

Companies or other entities without a permanent establishment in Portugal are subject to I.R.C. on income deemed to be obtained in Portugal.

For tax purposes, companies or other entities are considered to have a permanent establishment in Portugal if they have a fixed
installation or a permanent representation in Portugal through which they engage in a commercial, industrial or agricultural activity. Under rules that generally conform to the Organization for Economic Cooperation and Development (OECD) model convention, a permanent establishment may arise from a building site or installation project that lasts for more than six months or from the existence of a dependent agent. Under these rules, commissionaire structures, dependent agents and services rendered in Portugal are more likely to result in a permanent establishment for I.R.C. purposes.

Double tax treaties may further limit the scope of a permanent establishment in Portugal.

**Tax rates.** For 2013, I.R.C. is levied at the following rates.

<table>
<thead>
<tr>
<th>Type of enterprise</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Companies or other entities with a head office or effective management control in Portugal, whose principal activity is commercial, industrial or agricultural</td>
<td>25</td>

<td>25*</td>
</tr>
<tr>
<td>Investment income paid to tax-haven entities</td>
<td>35</td>
</tr>
</tbody>
</table>

* This tax does not apply to communications, financial and transportation services. It is eliminated under most tax treaties.
Applicable double tax treaties, EU directives or the agreement entered into between the EU and Switzerland may reduce the above withholding tax rates.

A 35% final withholding tax rate applies if income is paid or made available in a bank account and if the beneficial owner is not identified. A 35% final withholding tax rate also applies to investment income obtained by an entity located in a tax haven.

A municipal surcharge (derrama municipal) is imposed on resident companies and nonresident companies with a permanent establishment in Portugal. The rate of the municipal surcharge, which may be up to 1.5%, is set by the respective municipalities. The rate is applied to the taxable profit determined for I.R.C. purposes. Consequently, the maximum combined rate of the I.R.C. and the municipal surcharge on companies is 26.5%.

A state surcharge (derrama estadual) is also imposed on resident companies and nonresident companies with a permanent establishment in Portugal. The rate of the state surcharge, which is 3%, is applied to the taxable profit determined for I.R.C. purposes between €1,500,000 and €7,500,000. For taxable profits exceeding €7,500,000, a 5% rate of state surcharge is levied on the excess. Consequently, the maximum combined rate of the I.R.C. and the surcharges on companies is 31.5%.

Companies established in the free zones of Madeira and the Azores enjoyed a tax holiday until 2011. The more important of the two, Madeira, is internationally known as the Madeira Free Zone (Zona Franca da Madeira). A new regime has been approved for companies licensed between 2007 and 2013. Under the new regime, the reduced rate is 5% for 2013 through 2020. This rate applies to taxable income, subject to a cap, which is generally based on the existing number of jobs. New requirements and limitations apply to the issuance of licenses for the Madeira Free Zone. The new regime is also available for companies licensed before 2007. However, it was subject to a formal option that should have been elected on or before 30 December 2011.

Significant incentives are also available for qualifying new investment projects established before 31 December 2020. To qualify for the incentives, the projects must satisfy the following requirements:

- They must have a value exceeding €5 million.
- They must develop sectors considered to be of strategic importance to the Portuguese economy.
- They must be designed to reduce regional economic imbalances, create jobs and stimulate technological innovation and scientific research in Portugal.

Qualifying projects may enjoy the following tax benefits for up to 10 years:

- A tax credit of 10% to 20% of amounts invested in plant, equipment and intangibles used in the project. However, buildings and furniture qualify only if they are directly connected to the development of the activity.
- An exemption from, or a reduction of, the municipal real estate holding tax for buildings used in the project.
- An exemption from, or a reduction of, the property transfer tax (see Section D) for buildings used in the project.
• An exemption from, or a reduction of, the stamp duty for acts and contracts necessary to complete the project, including finance agreements.

Incentives consisting of a tax credit of 10% to 20% and a participation exemption on dividends received from abroad are also available for up to 5 years with respect to qualifying investment projects abroad exceeding €250,000.

Portuguese tax law also provides for tax credits and deductions concerning research and development (R&D) investments, fixed asset investments and creation of jobs.

Small and medium-sized companies held by individuals, venture capital companies and business angels (see Capital gains) can benefit for a three-year period from a notional interest deduction of 3% on the amount of cash contributions by shareholders to share capital made during the period of 2011 through 2013.

**Capital gains.** Capital gains derived from the sale of fixed assets and from the sale of financial assets are included in taxable income subject to I.R.C. The capital gain on fixed assets is equal to the difference between the sales value and the acquisition value, adjusted by depreciation and by an official index. The tax authorities may determine the sales value for real estate to be an amount other than the amount provided in the sales contract.

Capital losses from shares and other participations are deductible for tax purposes only in certain circumstances.

Fifty percent of the capital gains derived from disposals of tangible fixed assets held for more than one year may be exempt if the sales proceeds are invested in similar assets during the period beginning one year before the year of the disposal and ending two years after the year of the disposal. A statement of the intention to reinvest the gains must be included in the annual tax return for the year of disposal. The remaining 50% of the net gains derived from the disposal is subject to tax in the year of the disposal. The above rules also apply to shares and other participations, but certain limitations apply.

If only a portion of the proceeds is reinvested, the exemption is reduced proportionally. If by the end of the second year following the disposal no reinvestment is made, the net capital gains remaining untaxed (50%) are added to taxable profit for that year, increased by 15%.

Pure holding companies (sociedade gestora de participações sociais, or SGPS), venture capital companies (sociedade de capital de risco, or SCR) and business angels (investidores de capital de risco, or ICR) may benefit from special rules. Under these rules, capital gains may be fully exempt, while capital losses and interest expenses associated with the acquisition of shares and other participations are deductible for tax purposes only in certain circumstances. Tax credits may also be available for SCRs as a result of investments made in certain types of companies.

Nonresident companies that do not have a head office, effective management control or a permanent establishment in Portugal are subject to I.R.C. on capital gains derived from the sales of corporate participations, securities and financial instruments if any of the following apply:
More than 25% of the nonresident entities are held, directly or indirectly, by resident entities. The nonresident entities are resident in territories listed on a blacklist issued by a Ministerial Order of the Finance Minister. The capital gains arise from the transfer of shares held in a property company in which more than 50% of the assets comprise Portuguese real estate or in a holding company that controls such a company.

Nonresident companies that do not have a head office, effective management control or a permanent establishment in Portugal are taxed at a 25% rate on taxable capital gains derived from disposals of real estate, shares and other securities. For this purpose, nonresident entities must file a tax return.

**Exit taxes.** The I.R.C. Code provides that the transfer abroad of the legal seat and place of effective management of a Portuguese company, without the company being liquidated, results in a taxable gain or loss equal to the difference between the market value of the assets and the tax basis of assets as of the date of the deemed closing of the activity. This rule does not apply to assets and liabilities remaining in Portugal as part of the property of a Portuguese permanent establishment of the transferor company if certain requirements are met.

The exit tax also applies to a permanent establishment of a nonresident company on the closing of an activity in Portugal or on the transfer of the company’s assets abroad.

In addition, the shareholders of a Portuguese company that transfers its legal seat and place of effective management abroad are subject to tax on the difference between the market value of the company’s net assets at the time of transfer and the acquisition cost of the participation.

Following the European Court of Justice decision in Case C-38/10, it is expected that Portuguese tax law will be amended to eliminate the existing discrimination when residence is moved to an EU or EEA country. Accordingly, it is expected that taxation may be deferred until the disposal of the assets of rights, but the taxpayer may opt to pay the tax immediately on transfer of residence.

**Administration.** Companies with a head office, effective management control or a permanent establishment in Portugal are required to make estimated payments with respect to the current financial year. The payments are due in July, September and December. For companies with turnover of up to €500,000, the total of the estimated payments must equal at least 80% of the preceding year’s tax. For companies with turnover exceeding €500,000, the total of the estimated payments must equal at least 95% of the preceding year’s tax. The first payment is mandatory. However, the obligation to pay the other installments depends on the tax situation of the company. For example, a company may be excused from making the third installment if it establishes by adequate evidence that it is suffering losses in the current year. However, if a company ceases making installment payments and if the balance due exceeds by 20% or more the tax due for that year under normal conditions, compensatory interest is charged. Companies must file a tax return by 31 May of the following year.
Companies must pay any balance due when they file their annual tax return.

Companies with a head office, effective management control or a permanent establishment in Portugal that have adopted a financial year other than the calendar year must make estimated payments as outlined above, but in the seventh, ninth and twelfth months of their financial year. They must file a tax return by the end of the fifth month following the end of that year.

In addition, companies must make a Special Payment on Account (SPA) in the third month of the financial year, or they can elect to pay the amount in the third and tenth months. The SPA is equal to the difference between the following amounts:

- 1% of turnover of the preceding year, with a minimum limit of €1,000, or, if the minimum limit is exceeded, €1,000 plus 20% of the excess with a maximum limit of €70,000
- The ordinary payments on account made in the preceding year

The SPA may be subtracted from the tax liability in the following four years, or refunded if, on the occurrence of certain events (for example, the closing of activity), a petition is filed.

A nonresident company without a permanent establishment in Portugal must appoint an individual or company, resident in Portugal, to represent it concerning any tax liabilities. The representative must sign and file the tax return using the general tax return form. I.R.C. on capital gains derived from the sale of real estate must be paid within 30 days from the date of sale. I.R.C. on rents from leasing buildings must be paid by 31 May of the following year.

**Binding rulings.** A general time frame of 150 days exists in the tax law to obtain a binding ruling. This period can be reduced to 120 days if the taxpayer pays a fee between €2,550 and €25,500 and if the ruling petition with respect to an already executed transaction contains the proposed tax treatment of the transaction as understood by the taxpayer. This tax treatment is deemed to be tacitly accepted by the tax authorities if an answer is not given within the 120-day period.

**Dividends.** Dividends paid by companies to residents and nonresidents are generally subject to withholding tax at a rate of 25%.

On distributions to resident parent companies, the 25% withholding tax is treated as a payment on account of the final I.R.C. due.

A resident company subject to I.R.C. may deduct 100% of dividends received from another resident company if all of the following conditions apply:

- The recipient company owns directly at least 10% of the capital of the payer.
- The recipient company holds the interest described above for an uninterrupted period of at least one year that includes the date of distribution of the dividends, or it makes a commitment to hold the interest until the one-year holding period is complete.
- The payer of the dividends is a Portuguese resident company that is also subject to, and not exempt from, I.R.C. or Game Tax (tax imposed on income from gambling derived by entities such as casinos).
A 100% dividends-received deduction is granted for dividends paid by entities from EU member countries to Portuguese entities (or Portuguese permanent establishments of EU entities) if the above conditions are satisfied and if both the payer and recipient of the dividends qualify under the EU Parent-Subsidiary Directive. The same regime is also available for dividends received from European Economic Area (EEA) subsidiaries.

Dividends paid out of income not subject to effective taxation do not qualify for the participation exemption.

If a recipient qualifies for the 100% deduction, the payer of the dividends does not need to withhold tax. This requires the satisfaction of a one-year holding period requirement before distribution.

A 100% participation exemption is also available for dividends received from subsidiaries resident in African countries in which Portuguese is the official language or East Timor if the following conditions are satisfied:

- Direct 25% holding
- Two-year minimum holding period
- The engagement of the subsidiary in active business activities subject to an effective tax rate of at least 10%

A withholding tax exemption applies to dividends distributed to EU and EEA parent companies owning at least 10% of a Portuguese subsidiary for more than one year. A full or partial refund of the withholding tax may be available under certain conditions. A withholding tax exemption is also available for dividends paid to a Swiss parent company, but the minimum holding requirements are increased to 25% and two years.

**Foreign tax relief.** Foreign-source income is taxable in Portugal. However, direct foreign tax may be credited against the Portuguese tax liability up to the amount of I.R.C. attributable to the net foreign-source income.

**C. Determination of trading income**

**General.** Taxable profit is determined according to the following rules:

- For companies with a head office or effective management control in Portugal that are principally engaged in commercial, agricultural or industrial activities, the taxable profit is the net accounting profit calculated in accordance with Portuguese generally accepted accounting principles (GAAP), as adjusted by the I.R.C. Code.
- For companies with a head office or effective management control in Portugal that do not principally engage in commercial, industrial or agricultural activities, the taxable profit is the net total of revenues from various categories of income as described in the Personal Tax (I.R.S.) Code, less expenses.
- For permanent establishments, the taxable profit is determined as outlined in the first item. In calculating taxable profit, general administrative expenses that are attributable to the permanent establishment may be deducted as a cost if justified and acceptable to the fiscal authorities.

Effective from 2010, Portuguese GAAP is similar to International Financial Reporting Standards (IFRS). In addition, the tax law has been adapted to the new GAAP, but several adjustments are still required between net accounting profit and taxable profit.
Expenses that are considered essential for the generation or maintenance of profits are deductible. However, certain expenses are not deductible including, but not limited to, the following:

- The tax depreciation of private cars, on the amount of the acquisition price exceeding €25,000 but not exceeding €50,000 (depending on the acquisition date and type of vehicle), as well as all expenses concerning pleasure boats and tourism airplanes, except for those allocated to public transportation companies or used for rental purposes as part of the company’s normal activities.

- Daily allowances and compensation for costs incurred in traveling in the employees’ own vehicles at the service of the employer that are not charged to clients if the company does not maintain a control map of the expenses, allowing it to identify the place, length and purpose of the displacements, except for the amounts on which the beneficiary is subject to I.R.S.

- Expenses shown on documents issued by entities without a valid taxpayer number.

- Improperly documented expenses.

- I.R.C. and surcharges (see Section B).

- Penalties and interest charges.

- Contribution on banking sector (see Section D).

Assets under financial leases are deemed to be owned by the lessee, and consequently the lessee may deduct only applicable tax depreciation and any interest included in the rent payments. Special rules apply to sale and leaseback transactions.

Although representation expenses and expenses related to private cars are deductible, they are subject to a special stand-alone tax at a rate of 5% or 10%. This rate is increased to 20% for expenses related to private cars if the acquisition price of the car exceeded an amount between €25,000 and €50,000, depending on the acquisition date and type of vehicle.

The 5% tax also applies to tax-deductible daily allowances and compensation for costs incurred in traveling in the employees’ own vehicles at the service of the employer that is not charged to clients and not subject to I.R.S. The tax also applies if such expenses are not tax deductible as a result of the lack of proper documentation and if the taxpayer incurs a tax loss in the financial year.

Undocumented expenses are not deductible. In addition, these expenses are subject to a special stand-alone rate of 50% (70% with respect to entities partially or totally exempt from I.R.C., not principally engaged in commercial, industrial or agricultural activities or subject to the Game Tax). The tax authorities may classify an expense as undocumented if insufficient supporting documentation exists.

Certain indemnities and compensation paid to board members and managers (including “golden parachutes”) are subject to a special stand-alone tax at a rate of 35%.

A special stand-alone tax at a rate of 35% applies to bonuses and other variable compensation paid to board members and managers, if such compensation exceeds 25% of the annual remuneration and €27,500. This tax does not apply if at least 50% of the payment is deferred over a period of at least three years and
conditioned on the positive performance of the company during such period.

A “Robin Hood” tax is levied on both oil production and distribution companies and is charged based on the rise in value of the oil stocks held. For tax purposes, the first-in, first-out (FIFO) method or the weighted average cost method is deemed to be used for the valuation of oil stocks. The positive difference between the gross margin determined based on these methods and the gross margin determined under the accounting method used by the company is subject to a stand-alone tax at a flat rate of 25%. This tax is not deductible for I.R.C. purposes and cannot be reflected in the purchase price paid by the final consumer.

The above stand-alone taxes are imposed regardless of whether the company earns a taxable profit or suffers a tax loss in the year in which it incurs the expenses. In addition, all stand-alone rates are increased by 10 percentage points if the taxpayer incurs a tax loss in the relevant year.

**Inventories.** Inventories must be consistently valued by any of the following criteria:
- Effective cost of acquisition or production
- Standard costs in accordance with adequate technical and accounting principles
- Cost of sales less the normal profit margin
- Cost of sales of products cropped from biological assets, which is determined at the time of cropping, less the estimated costs at the point of sale, excluding transportation and other costs required to place the products in the market
- Any other special valuation considered basic or normal, provided that it has the prior approval of the tax authorities

Changes in the method of valuation must be justifiable and acceptable to the tax authorities.

**Provisions.** The following provisions, among others, are deductible:
- Bad and doubtful debts, based on a judicial claim or on an analysis of the accounts receivable
- Inventory losses (inventory values in excess of market value)
- Warranty expenditures
- Technical provisions imposed by the Bank of Portugal or the Portuguese Insurance Institute

**Depreciation.** In general, depreciation is calculated using the straight-line method. The declining-balance method may be used for new tangible fixed assets other than buildings, office furniture and automobiles not used for public transport or rental. Maximum depreciation rates are established by law for general purposes and for certain specific industries. If rates that are less than 50% of the official rates are used, total depreciation will not be achieved over the life of the asset. The following are the principal official straight-line rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial buildings</td>
<td>2</td>
</tr>
<tr>
<td>Industrial buildings</td>
<td>5</td>
</tr>
<tr>
<td>Office equipment</td>
<td>12.5 to 25</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>12.5 to 25</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>5 to 33.33</td>
</tr>
</tbody>
</table>
Companies may request the prior approval of the tax authorities for the use of depreciation methods other than straight-line or declining-balance or rates up to double the official rates. Approval is granted only if the request is justified by the company’s business activities.

For tax purposes, the maximum depreciable cost of private motor cars is between €25,000 and €50,000, depending on the acquisition date and type of vehicle.

**Relief for losses.** Tax losses may be carried forward for five years (six years if the losses were computed before 2010 and four years if the losses were computed in 2010). For tax losses used from 1 January 2012, the amount deductible each year is capped by 75% of the taxable profit of the year. Loss carrybacks are not allowed. Tax losses existing at the time of the occurrence of certain changes may not be carried forward. The following are the changes:

- A change in the business purpose
- A substantial change in the company’s activities from those carried on previously
- A change of at least 50% of the shareholders or voting rights

**Groups of companies.** Resident groups of companies may elect to be taxed on their consolidated profit. To qualify for tax consolidation, a group must satisfy certain conditions, including the following:

- The parent company must hold, directly or indirectly, at least 90% of the subsidiaries’ registered capital, provided that the holding accounts for more than 50% of the voting rights.
- The parent company may not be deemed to be dominated by the other resident company.
- All companies belonging to the group must have their head office and place of effective management in Portugal.
- The parent company must hold the participation in the subsidiary for more than one year beginning from the date the regime begins to be applied.
- All group companies must be subject to I.R.C. at the standard rate of 25%.

Applications for consolidated reporting must be filed with the Ministry of Finance before the end of the third month of the year for which the application is intended to take effect.

Losses of individual group companies may be offset against taxable profit within the consolidated group, in accordance with the following rules:

- Losses of individual group companies incurred in years before the consolidation can only be offset up to the amount of the taxable profit derived by the company that incurred such losses.
- Consolidated losses may be offset against consolidated profits only.
- Consolidated losses may not be offset against profits generated by companies after they leave the group.
- The consolidated group may not deduct losses incurred by companies after they leave the group.

The cap of 75% of the taxable profit with respect to deductible losses also applies for tax group purposes.
The consolidated taxable profit equals the sum of the group’s companies’ taxable profits or losses, as shown in each of the respective tax returns.

E. Miscellaneous matters

Foreign-exchange controls. Portugal does not impose foreign-exchange controls. No restrictions are imposed on inbound or outbound investments.

Mergers and reorganizations. Mergers and other types of corporate reorganizations may be tax-neutral in Portugal if certain conditions are met.

Controlled foreign entities. The rules described below apply to controlled foreign entities (CFEs).

A Portuguese resident owning, directly or indirectly, at least 25% in the capital, voting rights or rights to income or estate of a CFE is subject to tax on its allocable share of the CFE’s net profit or income. However, if at least 50% of the CFE’s capital or rights is owned by Portuguese residents, the percentage described in the preceding sentence is reduced to 10%. For computing the 25% or 10% threshold, the capital and rights owned, directly or indirectly, by related parties are also considered.

An entity is deemed to be subject to a clearly more favorable tax regime if the entity is not subject to corporate income tax or is subject to tax at an effective rate of tax equal to or lower than 60% of the I.R.C. standard rate of 25% (this effective rate is currently 15%) or if its place of business is included in a black list of tax-haven territories provided in a Ministerial Order of the Finance Minister.

Depending on whether the activities of the CFE include transactions with Portuguese residents or whether they are predominantly addressed to the market of the CFE territory, the imputation of profits or income may not apply.

The income of the CFE is allocated to the first company subject to the regular I.R.C. rate. This prevents the imposition of a Madeira Free Zone company, which may be exempt from tax or subject to a reduced rate but is considered to be resident in Portugal for tax purposes, between a CFE and a Portuguese resident company.

The CFE rules do not apply to entities resident in the EU or EEA if in the latter case a cooperation agreement on tax matters exists and if the taxpayer proves that the incorporation and functioning of the nonresident entity is based on valid economic reasons and that the entity carries out an agricultural, commercial, industrial or service activity.

In general, payments made by Portuguese residents to nonresidents subject to a clearly more favorable tax regime are not deductible for tax purposes, and the payers are subject to a stand-alone tax rate of 35% (55% for entities partially or fully exempt from I.R.C. or not principally engaged in commercial, industrial or agricultural activities). However, these payments may be deducted and...
are not subject to stand-alone taxation if the payer establishes the following:

- The payments were made in real transactions.
- The payments are normal.
- The amounts of the payments are not unreasonable.

The nondeductibility of payments to nonresidents subject to a clearly more favorable tax regime also applies if the payments are made indirectly to those entities; that is, the payer knew or should have known of the final destination of such payments. This is deemed to occur if special relations exist between the payer and the nonresident entity subject to a clearly more favorable tax regime or between the payer and the intermediary that makes the payment to the nonresident entity subject to a clearly more favorable tax regime.

Related-party transactions. For related-party transactions (transactions between parties with a special relationship), the tax authorities may make adjustments to taxable profit that are necessary to reflect transactions on an arm’s length basis. The I.R.C. Code contains transfer-pricing rules, which are applied on the basis of the Organization for Economic Cooperation and Development (OECD) guidelines. In addition, recent legislation had provided details regarding these rules.

A special relationship is deemed to exist if one entity has the capacity, directly or indirectly, to influence in a decisive manner the management decisions of another entity. This capacity is deemed to exist in the following relationships:

- Between one entity and its shareholders, or their spouses, ascendants or descendants, if they possess, directly or indirectly, 10% of the capital or voting rights of the entity
- Between one entity and the members of its board, administration, management or fiscal bodies, as well as the members’ spouses, ascendants and descendants
- Between any entities bound by group relations
- Between any entities bound by dominance relations
- Between one entity and the other if the first entity’s business activities depend on the other entity as a result of a commercial, financial, professional or legal relationship
- Between a resident entity and an entity located in a blacklisted territory

The I.R.C. Code now provides for Advanced Pricing Agreements.

Debt-to-equity rules. The previous thin-capitalization rules contained in the I.R.C. Code are abolished, effective from 2013.

A new limitation to the deduction of interest expenses (net of interest revenues) applies, effective from 2013. The tax deduction for net financial expenses is capped by the higher of the following amounts:

- €3 million
- 70% of the earnings before interest, taxes, depreciation and amortization (EBITDA)

The 70% threshold will be reduced by 10 percentage points annually until it reaches 30% in 2017. The nondeductible excess, as well as the unused fraction of the 30% threshold, may be carried forward to the following five years.
**Tax-planning disclosure.** Certain tax planning (use of low-tax entities, use of partially or fully exempt entities, use of hybrid instruments or entities, use of tax losses or the existence of a limitation or exclusion from responsibility clause for the promoter) must be disclosed to the tax authorities by the entity promoting the planning or by the respective user (in the absence of a locally registered promoter). Significant penalties apply for the lack of reporting.

(a) The 10% rate applies if the recipient holds directly more than 50% of the capital of the payer. For other royalties, the rate is 5%.
(b) See Section B for details regarding a 0% rate for distributions to parent companies in EU member states.
(c) The 10% rate applies if the recipient holds directly at least 25% of the capital of the payer. The 15% rate applies to other dividends.
(d) The 10% rate applies if, at the date of payment of the dividend, the recipient has owned directly at least 25% of the payer for an uninterrupted period of at least two years. The 15% rate applies to other dividends.
(e) The 10% rate applies to interest on loans considered to be of economic or social interest by the Portuguese government. The 15% rate applies to other interest.
(f) The rate is 10% for technical assistance fees.
(g) The 10% rate applies to interest on bonds issued in France after 1965. The 12% rate applies to other interest payments.
(h) The 10% rate applies to interest paid by an enterprise of a contracting state if a financial establishment resident in the other contracting state may deduct such interest. The 15% rate applies to other interest payments.
(i) If the beneficial owner of the dividends is a company that owns 25% or more of the capital of the payer, and if, at the date of the distribution of the dividends, the participation has been held for at least two years, the withholding tax rate is 5%. For other dividends, the rate is 15%.
(j) The 5% rate applies if the recipient holds directly at least 25% of the capital of the payer. The higher rate applies to other dividends.
(k) The 10% rate applies to interest on loans with a duration of more than two years. The 15% rate applies in all other cases.
(l) The 10% rate applies to dividends paid by a company resident in Israel if the beneficial owner is a company that holds directly at least 25% of the capital of the payer of the dividends and if the dividends are paid out of profits that are subject to tax in Israel at a rate lower than the normal rate of Israeli company tax.
(m) See Sections A and B for details.
(n) The 5% rate applies to interest on bonds and other titles regularly and substantially traded on a recognized market. The 10% rate applies to interest on loans granted by banks and insurance companies as well as to interest from credit sales of machinery and equipment. The 15% rate applies in all other cases.
(o) The 5% rate applies to the leases of equipment. The 10% rate applies in all other cases.
(p) The 5% rate applies if the recipient holds directly at least 10% of the capital of the payer. The higher rate applies to other dividends.
(q) The 10% rate applies if the recipient holds directly at least 10% of the capital of the payer. The higher rate applies to other dividends.

Portugal has also signed double tax treaties with Barbados, Colombia, East Timor, Guinea, Japan, Kuwait, Qatar and Uruguay, but these treaties are not yet in force.

A. At a glance

Corporate Income Tax Rate (%) 30 (a)
Capital Gains Tax Rate (%) 15
Branch Income Tax Rate (%) 30 (a)
Withholding Tax (%)
Dividends 10
Interest 0 (b)
Royalties 2 to 29
Branch Remittance Tax 10
Net Operating Losses (Years)
Carryback 0
Carryforward 7/10 (c)

(a) This is the maximum tax rate (see Section B). An alternative minimum tax (AMT) may apply instead of the regular tax. The AMT is the greater of the regular AMT at a rate of 20% or 1% of the purchases of personal property from related persons made by a business that has gross revenues in excess of $50 million for the three consecutive preceding years.

(b) A 29% withholding tax is imposed on interest paid to foreign corporations on related-party loans.

(c) Net operating losses incurred during tax years beginning after 31 December 2004 and before 31 December 2012 may be carried forward for 10 years. For all other years, the carryforward period is seven years.

B. Taxes on corporate income and gains

Corporate income tax. Companies organized in Puerto Rico are subject to Puerto Rican tax on worldwide income. Foreign companies engaged in trade or business in Puerto Rico are taxable on income earned in Puerto Rico or effectively connected with the Puerto Rican operation. Partnerships are treated as pass-through
entities. Accordingly, their partners are taxed on their distributive shares of the income and expenses of the partnership. Elections for Special Partnerships, which engage only in specified activities and are also treated as pass-through entities, are not available after 31 December 2010.

Limited liability companies are subject to tax in the same manner as regular corporations. However, they can elect to be taxed as partnerships or pass-through entities under certain conditions. If a limited liability company is treated as a partnership or a pass-through entity for federal tax purposes or in a foreign jurisdiction, it is treated as a partnership for Puerto Rico tax purposes. However, a limited liability company that is treated as a partnership for federal tax purposes or in a foreign jurisdiction is not treated as a partnership for Puerto Rico tax purposes if the entity was operating under any of the tax incentive laws or filed an application for a tax grant before 1 January 2011.

Rates of corporate income tax. The corporate income tax rates range from 20% to 30%. Special rules may apply to controlled group corporations in determining the net income subject to additional tax. Corporations and partnerships can make an irrevocable election to compute their tax liability based on the provisions of the previous Puerto Rico Internal Revenue Code of 1994, for the 2011 tax year and the four subsequent years. This election needs to be made with the 2011 tax return. After the election is made, it is effective for the complete five-year period.

Certain companies currently doing business in Puerto Rico are operating under the benefits of industrial tax exemption under various industrial incentives acts enacted by the government in 1963, 1978, 1987 and 1998. Under these acts, the period of tax exemption (10 to 25 years) is determined based on the degree of industrialization of the area or zone where the business is located. Under the 1963, 1978 and 1987 acts, businesses qualifying for industrial tax exemption are exempt from income taxes and property taxes at a rate of 90% and from municipal license taxes at a rate of 60% during the entire period of tax exemption. In addition, these corporations are not subject to alternative minimum tax (see Alternative minimum tax) on their industrial development income (IDI), and they benefit from favorable withholding tax rates on profit remittances. Activities qualifying for exemption under the various tax incentives acts include manufacturing, tourism, agriculture and export of services.

Under the Puerto Rico Tax Incentives Act of 1998, which expired on 30 June 2008, exempt businesses are subject to a flat tax rate ranging from 2% to 7% on their IDI. Dividends are not subject to withholding tax. Royalties are subject to a withholding tax rate ranging from 2% to 15%.

The Economic Incentives for the Development of Puerto Rico Act of 2008 (the 2008 Act) took effect on 1 July 2008. The exemption period under the 2008 Act is 15 years, regardless of the location of the exempt business.

The 2008 Act applies to the following:

- Eligible businesses engaged in the manufacturing or production of articles in Puerto Rico
• Entities that intend to perform on a commercial scale in Puerto Rico services destined for foreign markets
• Entities that provide services subcontracted in Puerto Rico or that provide key supplier services rendered in Puerto Rico at a commercial scale and on a continuous basis to exempt manufacturing businesses
• Entities engaged in the manufacturing of high-technology industrial units for the production of energy for use in Puerto Rico, other than fossil fuels, and in the assembly of equipment for the generation of such energy
• Entities engaged in the construction of social-interest homes (affordable or low-interest housing)
• Entities dedicated to recycling activities
• Entities operating at a commercial scale that are engaged in the development of licensed or patented software
• Certain strategic projects, and entities devoted to the research, development, manufacture, transport, launch and operation of satellites from Puerto Rico
• Entities engaged in the development of service centers for processing or warehousing of data
• Value-added activities for the operation of ports

The 2008 Act provides for a 4% flat tax rate on IDI derived by companies that obtain exemption grants. An additional 0.5% reduction in the tax rate on IDI is available to exempt businesses operating in a zone of low or intermediate industrial development. For companies with pioneer status, the flat tax rate ranges from 0% to 1%. The 2008 Act provides a 100% tax exemption for IDI derived from businesses located in the municipalities of Culebra and Vieques for the first 10 years. The 2008 Act provides for no withholding tax on dividends and a 12% withholding tax on royalties paid by exempt businesses to entities not engaged in trade or business in Puerto Rico. Exempt businesses may benefit from a 100% exemption from excise taxes and sales and use tax on raw materials, machinery and equipment. As provided in previous tax incentives acts, the 2008 Act provides a 90% property tax exemption and a 60% municipal license tax exemption. It grants certain special deductions and credits with respect to the following:
• Job creation
• Energy costs
• Use of intangible property
• Strategic projects
• Research and development
• Net operating losses
• Investments in buildings, structures, machinery and equipment
• Purchases of locally manufactured products

The Export Services Act took effect on 17 January 2012. The exemption period under this act is 20 years.

The Export Services Act applies to eligible businesses. These are entities that have bona fide offices located in Puerto Rico and that have the main purpose of providing services to clients outside Puerto Rico. These services include but are not limited to the following:
The Export Act provides for a 4% flat tax rate on export income received from services provided by eligible businesses. An additional 1% reduction in the tax rate on export income is available to exempt businesses that derive 90% of their gross income from export services that are considered strategic services, subject to certain requirements.

The Export Act provides a 90% or 100% property tax exemption for certain eligible activities and a 60% municipal license tax exemption.

Other Puerto Rican legislation grants tax exemptions to enterprises engaged in specified economic activities. For example, under the Puerto Rico Tourist Development Act of 1993, as amended, or under the Puerto Rico Tourist Development Act of 2010, qualified tourist activities may enjoy exemption from income tax (90% to 100%), municipal license tax (90% to 100%), excise tax (100%) and real and personal property taxes (90%). In addition, under the Agricultural Tax Incentives Act of 1995, as amended, bona fide farmers may enjoy exemption from income tax (90%), municipal license tax (100%), excise tax (100%) and real and personal property taxes (100%).

Alternative minimum tax. The alternative minimum tax (AMT) is designed to prevent corporations with substantial economic income from using preferential deductions, exclusions and credits to substantially reduce or eliminate their tax liability. The AMT is the greater of the regular AMT at a rate of 20% or 1% of the purchases of personal property from related persons made by a business (subject to certain exceptions) that has gross revenues in excess of $50 million for the three consecutive preceding years. The AMT applies to the extent that the AMT exceeds the regular tax liability.

For purposes of the AMT, personal property refers to tangible property used in a trade or business in Puerto Rico except for raw materials or intermediate products used in manufacturing and alcoholic beverages.

A related person is a member of a controlled group having 50% ownership.

Alternative minimum taxable income is determined by adding back certain tax preferential deductions to the taxable income computed for regular income tax purposes. For purposes of the AMT calculation, the deduction for payments with respect to intercompany services incurred outside Puerto Rico must be added back, unless these payments are subject to income tax in Puerto Rico.
In addition, 50% of adjusted financial statement income in excess of adjusted taxable income is included in determining the amount subject to tax.

Any AMT paid may be recovered in subsequent years as a credit to the regular tax when the regular tax is in excess of that year’s AMT.

**Capital gains.** Long-term capital gains for investment and other business assets held over six months are taxed at a maximum rate of 15%.

Business assets that are not part of inventory are generally accorded capital gain treatment in the case of a gain and ordinary loss treatment in the case of a loss.

Capital losses can be carried forward for five years to offset capital gains.

**Administration.** Corporate tax returns are due on the fifteenth day of the fourth month after the close of the taxable year. Extensions are available for up to three months; however, the tax must be fully paid by the original due date. Estimated tax payments, generally totaling 90% of the final liability or 100% of the preceding year’s tax, are required on a quarterly basis.

Tax returns of partnerships, Special Partnerships and limited liability companies that elected to be treated as partnerships and corporations of individuals, among others, are due on the fifteenth day of the third month after the close of the tax year. Extensions are also available for up to three months. However, the tax must be fully paid by the original due date.

**Dividends.** Corporations engaged in a trade or business in Puerto Rico may deduct 85% of the dividends they receive from domestic (Puerto Rican) corporations, subject to limitations. Dividends received by domestic corporations or partnerships from controlled domestic corporations or partnerships are 100% deductible.

Dividends paid to nonresident corporations are subject to a 10% withholding tax.

**Foreign tax relief.** A tax credit is allowed for foreign taxes incurred, but is limited to the equivalent Puerto Rican tax on the foreign-source portion of taxable income. A foreign tax credit is also allowable under the AMT system.

**C. Determination of trading income**

**General.** Income for tax purposes is computed in accordance with generally accepted accounting principles, as adjusted for certain statutory provisions. Consequently, taxable income frequently does not equal income for financial reporting purposes.

Interest income derived from certain instruments issued by the governments of the United States or Puerto Rico is exempt from tax. Expenses related to the generation of this type of income are not deductible.

For expenses to be deductible, they must be incurred wholly and exclusively for the production of income. Statutory provisions limit the amounts of certain deductible expenses. Only 50% of travel and entertainment expenses is deductible. Deductions for
charitable contributions may not exceed 10% of taxable income before deduction of charitable contributions.

**Inventories.** Inventory is valued for tax purposes at either cost or the lower of cost or market value. In determining the cost of goods sold, the two most commonly used methods are first-in, first-out (FIFO) and last-in, first-out (LIFO). The method chosen must be applied consistently, except that an election to change from FIFO to LIFO may be made without prior permission.

**Tax depreciation.** A depreciation deduction is available for most property (except land) used in a trade or business. The time period over which an asset is depreciated is based on the asset classification. The following three depreciation methods are allowed in Puerto Rico:
- Straight-line
- A method similar to the U.S. ACRS method
- Flexible depreciation

Deductions for ACRS depreciation are allowed only for assets acquired in tax years beginning on or after 1 July 1995. Deductions for flexible depreciation are allowed only for assets acquired in tax years beginning before 1 July 1995. The flexible method is limited to the following types of businesses:
- Construction
- Agriculture
- Selling or leasing of buildings
- Manufacturing
- Tourism
- Shipping

Businesses enjoying tax exemption (see Section B) may not use the flexible depreciation method. The amount of the flexible depreciation deduction is limited to a percentage of taxable income.

The depreciation expense deduction applicable to automobiles has been replaced with a limited mileage-based deduction, except, under certain circumstances, for lease business (operating leases) and taxi or limousine transportation business.

Depreciation computed under the straight-line depreciation method is not recaptured on the sale of an asset, but depreciation computed under the flexible depreciation and ACRS methods is subject to recapture.

Intangible property (other than goodwill) acquired by purchase or developed after 1 September 2010 is depreciated using the straight-line method over the lesser of 15 years or the useful life of the property.

**Groups of companies.** Affiliated corporations doing business in Puerto Rico may not elect to file a single income tax return on a consolidated basis.

**D. Other significant taxes**

The following table summarizes other significant taxes.
<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Special excise tax; imposed on the acquisition from a related party of personal property manufactured in Puerto Rico and related services by a nonresident foreign corporation or partnership; if the provider has gross receipts in excess of $75 million for any of the three preceding taxable years and if certain other requirements are met; 2013 rate (the rate will decrease annually until it reaches 1% in 2016 when it expires)</td>

Financial institutions  0.5 to 1.5  
Other businesses  0.2 to 0.5  

Property taxes (if volume exceeds $3 million for tax years beginning on or after 1 August 2008 [$1 million for tax years beginning before that date], a financial statement audited by a CPA licensed in Puerto Rico must accompany the return); rate varies by municipality  

Personal property  5.80 to 8.83  
Real property  8.08 to 10.83  

E. Miscellaneous matters

Financial statements requirements. All entities engaged in trade or business in Puerto Rico must submit specified financial statements with their income tax returns.

Audited financial statements are required if the volume of business is equal to or greater than $3 million. Not-for-profit corporations and entities with a volume of business of less than $3 million are not required to file audited financial statements.

Financial statements must be prepared in accordance with U.S. generally accepted accounting principles (GAAP) and issued by a certified public accountant (CPA) licensed to practice in Puerto Rico. Other detailed rules apply to the preparation of financial statements, including rules regarding foreign corporations and related entities.

Entities engaged in a trade or business in Puerto Rico that have a volume of business in excess of $3 million must submit, together with their property and volume of business declaration tax returns, audited financial statements certified by a CPA licensed to practice in Puerto Rico. In addition, audited financial statements are required to be attached to the annual report filed with the Secretary of State in the case of a corporation with a volume of business in excess of $3 million for tax years beginning on or after 1 August 2008. For corporations with a volume of business of $3 million or less, a balance sheet with relevant footnotes, prepared by a person with general knowledge in accounting, must accompany the annual report filed with the Secretary of State.

For a group of related entities, the business volume is determined by adding the business volume of each of the entities included in the group. If the total exceeds $3 million, each of the entities must submit audited financial statements with their income tax return. Special additional rules may apply to a group of related entities.

If foreign corporations do not keep available books of account and supporting documents in Puerto Rico, all of their tax deductions may be denied. A foreign corporation is deemed to be in compliance with this requirement if it can physically produce its books and records in Puerto Rico within 30 days. An extension of 15 days may be granted.
Foreign-exchange controls. Puerto Rico does not impose foreign-exchange controls, but large currency transfers must be reported to the U.S. Treasury Department.

Debt-to-equity rules. Puerto Rican law does not include any specific thin-capitalization provisions, but U.S. provisions in this area may be persuasive.

Transfer pricing. Under the income tax law, the tax authorities may redistribute or reallocate income, deductions, credits and other items between related taxpayers to prevent tax evasion. The law does not prescribe transfer-pricing methods. However, regulations identify methods that may be used by the Secretary of Treasury to determine the actual net income derived from sales of tangible property between related taxpayers. In addition, these regulations provide guidance on other types of transactions between related taxpayers, such as intercompany loans, rendering of services and transfers of intangible property.

F. Tax treaties

Puerto Rico does not participate in U.S. income tax treaties and has not entered into any treaties with other jurisdictions.

Branch Tax Rate (%) 10
Withholding Tax (%) 5/7
Net Operating Losses (Years)
  Carryback 0
  Carryforward 3

B. Taxes on corporate income and gains

Corporate income tax. Foreign companies, including partnerships and joint ventures, carrying on business activities in Qatar are subject to tax. Tax is imposed on a foreign entity operating in Qatar, regardless of whether it operates through a branch, a joint venture with a locally registered company or through a wholly owned subsidiary. However, Qatar tax resident companies wholly owned by Qatari citizens and residents of the other Gulf Cooperation Council (GCC) countries (Bahrain, Kuwait, Oman, Saudi Arabia and United Arab Emirates) are exempt from tax. Qatar tax resident companies that are not wholly owned by Qatars and other GCC citizens are taxable up to the level of profits ultimately attributable to the non-GCC national shareholders and to GCC national shareholders who are not tax residents in Qatar. Other GCC nationals are treated in the same manner as Qatari citizens for Qatar tax purposes.

Tax resident companies and permanent establishments (PES) that are wholly owned by Qatari and other GCC nationals and that are exempt from corporate income tax must submit tax returns and audited financial statements to the Public Revenues and Taxes Department (PRTD) if their capital is QR 2 million or more or if their annual revenue is QR 10 million or more.

A company is considered to be a Qatar tax resident if it meets any of the following conditions:

- It is incorporated under the laws of Qatar.
- Its head office is located in Qatar.
- Its place of effective management is located in Qatar.

A PE is a fixed place of business through which the business of a taxpayer is wholly or partly carried on, including, among others, a branch, office, factory, workshop, mine, oil or gas well, quarry, building site, assembly project, or place of exploration, extraction or exploitation of natural resources. A PE also includes an activity carried on by the taxpayer through a person acting on behalf of the taxpayer or in its interest, other than an independent agent.

Rates of corporate income tax. Income is subject to tax at a standard rate of 10% of profits, as adjusted for tax purposes.

Petroleum companies engaged in oil operations are taxed at the rates specified in their agreements, provided that the tax rate is not less than 35% on their taxable income. Taxable income is determined in accordance with the provisions of the underlying production-sharing contract or development and fiscal agreement. Petroleum operations are defined by law as the exploration for
petroleum, improving oil fields, drilling, well repair and completion, the production, processing and refining of petroleum, and the storage, transport loading and shipping of crude oil and natural gas.

Foreign international shipping and aviation companies are exempt from tax in Qatar if Qatari shipping and aviation companies enjoy similar reciprocal treatment in the respective foreign countries.

Not-for-profit entities that are registered in Qatar or in another country are not covered by the provisions of the Qatar Income Tax Law and are accordingly exempt from tax. However, they must withhold tax if applicable.

The income of businesses operating in the Qatar Financial Centre (QFC) is subject to a standard rate of tax of 10%. Activities that may be carried on at the QFC include the following:

- International banking
- Insurance and reinsurance
- Fund management
- Brokerage and dealer operations
- Treasury management
- Funds administration and pension funds
- Financial advice and back office operations
- Professional services in the areas of classification and investment grading
- Audit, legal and taxation advisory
- Holding company and headquarter hosting
- Ship brokering and agency services

Companies engaged in captive insurance or reinsurance services are subject to tax at a special 0% tax rate. Collective-investment schemes and special-purpose entities in the QFC are exempt from tax.

Under Law No. 20 of 2008, the shares of non-Qatari investors in the profits of public companies listed on the Qatar Exchange (the local stock exchange) are exempt from tax. This incentive is designed to promote increased foreign investment in the stock exchange. The shares of profits of Qatari investors remain exempt under the provisions of the Qatar Income Tax Law.

**Tax incentives.** Tax exemptions may be granted for periods of three to six years for certain companies, regardless of the nationality of the owners. A committee evaluates applications for tax exemptions. It considers factors such as the following in reviewing the applications:

- Whether the company provides social or economic benefits to Qatar
- Whether the company falls within the planned development and economic objectives of the government and has the approval of the appropriate government department
- The extent to which the company contributes to the national economy
- Whether the company uses modern technology
- Whether the company creates employment opportunities for citizens
The income of businesses operating at the Qatar Science and Technology Park (QSTP) is exempt from tax. Activities that may be carried out at the QSTP include the following:

- Research and development of new products
- Technology development and development of new processes
- Low volume, high value added specialist manufacturing
- Technology-related consulting services, technology training and promotion of academic developments in the technology fields
- Incubating new businesses with advanced learning

**Capital gains.** Capital gains are aggregated with other income and are subject to tax at the regular corporate income tax rate. The sale by a nonresident of shares in a Qatar tax resident company is taxable at a rate of 10%.

**Administration.** Within 30 days after beginning a taxable activity in Qatar or registering with the Ministry of Business and Trade, a taxpayer must register with the PRTD and obtain a tax card.

The tax year runs from 1 January to 31 December, and a taxpayer must use this accounting period unless approval is obtained for a different year-end. Approval to use an alternative accounting period is granted in exceptional cases only.

In general, all companies, including tax-exempted companies, must file tax declarations within four months after the end of the accounting period. The due date may be extended at the discretion of the PRTD, but the length of the extension may not exceed four months.

Audited financial statements must be submitted together with the tax declaration if any of the following circumstances exist:

- The capital of the taxpayer exceeds QR 100,000.
- The taxpayer’s total taxable income exceeds QR 100,000.
- The head office of the taxpayer is located outside Qatar.

The tax declaration must be certified by an accountant in practice in Qatar who is registered with the Ministry of Economy and Finance. If this requirement is not satisfied, the PRTD rejects the tax declaration. The tax declaration and supporting audited financial statements must be denominated in Qatari riyals.

Tax is payable on the due date for filing the tax declaration. The due date for payment of taxes may be extended if the filing date is extended and if the taxpayer provides reasons acceptable to the PRTD. Alternatively, the PRTD may allow taxes to be paid in installments during the extension period. Tax is payable in Qatari riyals.

Penalties for late filing are levied at a rate of QR 100 per day, subject to a maximum of QR 36,000. The penalty for late payment equals 1.5% of the tax due for each month or part of a month for which the payment is late, up to the amount of the tax due.

The PRTD may issue tax assessments based on a presumptive basis or reassess by applying market prices to certain related-party transactions in certain circumstances. The tax law provides for a structured appeals process with respect to such tax assessments. The appeals procedure consists of the following three stages:
• Correspondence and negotiations with the PRTD
• Formal appeal to an Appeal Committee
• The commencement of a case in the judicial courts

The PRTD may inspect a taxpayer’s books and records, which should be maintained in Qatar. The books and records are not required to be maintained in Arabic. The accounting books and records must be maintained for 10 years following the year to which the books, registers and documents are related.

**Withholding taxes.** Qatar Tax Law No. 21 of 2009, which is effective from 1 January 2010, introduced withholding taxes on payments to nonresident entities for activities not connected with a PE (essentially, those without a Commercial Registration and Tax Card issued by the PRTD), and to entities registered in the Commercial Register with the registration linked to a specific project for a period of less than one year. The following are the payments subject to withholding tax and the applicable rates:

- Royalties and technical fees: 5%
- Interest payments (subject to specified exceptions), directors’ fees, attendance fees, brokerage, commissions and other payments with respect to contracts for services conducted wholly or partially in Qatar: 7%

Companies or PEs in Qatar that make the above payments must deduct tax at source and remit it to the PRTD by the 15th day of the month following the month in which the payment is made.

**Dividends.** Dividends paid by a Qatar tax resident company are not subject to withholding tax. Income distributed from profits that have already been subject to Qatar taxation are not subject to further taxation in the hands of the recipient. Dividends paid by an entity that has a tax exemption are exempt from tax.

**Foreign tax relief.** A deduction is allowed for income taxes incurred by the taxpayer abroad if the revenues related to the foreign taxes are taxable in Qatar, subject to other deductibility requirements. In addition, foreign tax relief is available under the tax treaties with the countries listed in Section E.

**C. Determination of trading income**

**General.** The following are some of the items that are included in taxable income:

- Interest and returns realized outside Qatar from amounts generated by taxable activity carried on in Qatar
- Revenues earned from an activity performed in Qatar including trading, contracting and the provision of services
- Revenues earned from the partial or total performance of a contract in Qatar
- Service fee income received by head offices, branches or related companies
- Certain dividend income and capital gains on real estate located in Qatar
- Interest on loans obtained in Qatar

Normal business expenses are allowable and must be determined under the accrual method of accounting. Branches are limited in the deduction of head office expenses (see *Head office overhead*).
Self-employed individuals engaged in a professional activity may choose to deduct a notional expense equal to 30% of their total income instead of all of the expenses and costs that are allowed to be deducted. Expenses for entertainment, hospitality, meals, holidays, club subscriptions and client gifts are subject to restrictions. Guidance contained in supporting executive regulations specifies that these expenses are subject to an allowable ceiling of 2% of net income, up to a maximum of QR 200,000.

**Inventories.** Inventories must be valued using international accounting standards.

**Provisions.** General provisions, such as bad debts and stock obsolescence, are generally not allowed. Specific bad debts that are written off are deductible to the extent that they satisfy conditions set by the PRTD. Deductions by banks for loan-loss provisions are the subject of periodic instructions from the Qatar Central Bank and, in general, provisions are allowable up to a ceiling of 10% of net profits.

**Head office overhead.** In general, charges of a general or administrative nature imposed by a head office on its Qatar branch are allowed as deductions, provided that they do not exceed 3% of turnover less subcontract costs. However, for banks, the limit is 1%. If a project derives income from both Qatari and foreign sources, the limit is 3% of the total revenues of the project, less subcontract costs, revenues from the supply of machinery and equipment overseas, revenues derived from services performed overseas, value of paid reinsurance premiums and other income not related to activities in Qatar.

**Tax depreciation.** Under the executive regulations relating to the Qatar Income Tax Law, assets must be classified into two groups for tax depreciation purposes. The first group is for high-value assets and consists primarily of buildings, ships, airplanes, drilling instruments and intangible assets. These assets should be depreciated on a straight-line basis using the following annual depreciation rates:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and constructions, including roads, bridges, pipelines, storage tanks and port ducts inside the establishment, excluding ready-made light constructions</td>
<td>5</td>
</tr>
<tr>
<td>Ships and boats</td>
<td>10</td>
</tr>
<tr>
<td>Airplanes and helicopters</td>
<td>20</td>
</tr>
<tr>
<td>Drilling instruments</td>
<td>15</td>
</tr>
<tr>
<td>Intangible assets</td>
<td></td>
</tr>
<tr>
<td>Pre-establishment expenses</td>
<td>50</td>
</tr>
<tr>
<td>Trademarks, patents and similar items</td>
<td>Amortized over the expected life of the asset, with a maximum annual amortization allowance of 15%</td>
</tr>
</tbody>
</table>

For the second group, which relates to low-value assets, tax depreciation is calculated using the reducing-balance method. The following are the annual depreciation rates for these assets.
<table>
<thead>
<tr>
<th>Subgroup</th>
<th>Assets</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>First</td>
<td>Computer hardware and software and annexes thereof</td>
<td>33.33</td>
</tr>
<tr>
<td>Second</td>
<td>Machinery, plant, equipment, electrical devices and means of transportation of goods and persons, including cars, vehicles, trucks and cranes</td>
<td>20</td>
</tr>
<tr>
<td>Third</td>
<td>Office furniture, fixtures and fittings and other assets</td>
<td>15</td>
</tr>
</tbody>
</table>

The above depreciation rates must be applied to the written-down tax value of the assets, increased by the cost of current-year additions and decreased by the sales proceeds from current-year disposals. Under the Qatar Income Tax Law, the gain or loss resulting from disposal of low-value fixed assets is no longer considered for income tax purposes. Instead, the sales proceeds are deducted from the tax value of the assets as mentioned above.

Approval of the Minister of Finance is required for departure from the tax depreciation rates noted above. Departures from these rates are normally allowed only for new start-up projects if the project owner requests permission to adopt different depreciation rates based on the presentation of appropriate justifications to the Minister.

**Relief for losses.** Losses may be carried forward for up to three years. Carryback of losses is not allowed.

**Groups of companies.** No tax regulations cover groups of companies.

**D. Miscellaneous matters**

**Foreign-exchange controls.** Qatar does not impose foreign-exchange controls. Equity capital, loan capital, interest, dividends, branch profits, royalties and management fees are freely remittable.

**Transfer pricing and antiavoidance legislation.** The Qatar Income Tax Law contains anti-avoidance provisions. The PRTD may nullify or alter the tax consequences of any transaction that it has reasonable cause to believe was entered into to avoid or reduce a tax liability.

If a company carries out a transaction with a related party that was intended to reduce the company’s taxable income, the income arising from the transaction is deemed to be the income that would have arisen had the parties been dealing at arm’s length.

In determining the arm’s length value, the PRTD requires use of the comparable uncontrolled price (CUP) method. Under this method, the price of the service or goods is deemed to be the price that would have been applied if the transaction had been between unrelated parties. If the information required to apply the CUP method is not available, an application to apply a different transfer-pricing method approved by the Organization for Economic Cooperation and Development (OECD) must be submitted to the PRTD.

**Supply and installation contracts.** Profits from “supply only” operations in Qatar are exempt from tax because the supplier trades “with” but not “in” Qatar. If a contract includes work elements
that are performed partially outside Qatar and partially in Qatar, and if these activities are clearly separated in the contract, only the revenues from the activity performed in Qatar are taxable in Qatar.

Similarly, with respect to an engineering, procurement and construction contract for a project in Qatar, the obligation to perform construction work in Qatar may bring the revenues arising outside Qatar into the Qatar tax net unless the contract clearly includes a split of revenue between work done in Qatar and work done outside Qatar.

**Contract retention.** All ministries, government departments, public and semipublic establishments and other payers must retain final contract payments or 3% of the contract value (after deducting the value of supplies and work done abroad), whichever is greater, due to foreign branches that are registered and that have a registration linked to a specific project with a duration of at least one year. The contract retention payable to the contractor or subcontractor must be retained until the contractor or subcontractor presents a tax clearance from the PRTD confirming that all tax liabilities have been settled.

**Contract reporting.** Ministries and other government bodies, public corporations and establishments, and companies are required to report to the PRTD on contracts concluded with nonresidents without a PE in Qatar, regardless of their value. In addition, contracts concluded with residents or with nonresidents that have a PE in Qatar must also be reported to the PRTD if the contract value amounts to QR 200,000 for service contracts, or to QR 500,000 for contracting, supply, and supply and service contracts. Copies of the contracts must also be submitted together with the statement, except for contracts concluded with nonresidents with no PE in Qatar that have a contract value not exceeding QR 100,000.

**E. Tax treaty withholding tax rates**

The table provided below is intended purely for orientation purposes. It does not reflect the various special provisions of individual treaties or the withholding tax regulations in domestic law. The following is a table of treaty withholding tax rates.

(a) Some treaties provide for an exemption for certain types of interest, such as interest paid to public bodies and institutions. Such exemptions are not considered in this column.
(b) Income may be taxed in the residence state at the rate provided under its domestic law.
(c) Income is taxable only in the residence state at the rate provided under its domestic law.
(d) The 5% rate applies if the beneficial owner has invested capital of more than US$100,000.
(e) The 5% rate applies if the beneficial owner holds at least 25% of the capital of the company paying the dividends.
(f) Dividends, interest and royalties are taxable only in the residence state at the rates provided under its domestic law if the recipient is the beneficial owner of the income.
(g) Royalties are taxable only in the residence state at the rates provided under its domestic law if the recipient is the beneficial owner of the income.
(h) This rate applies if the beneficial owner holds at least 10% of the capital of the company paying the dividends.
(i) The 5% rate applies if the beneficial owner has owned directly or indirectly at least 25% of the capital of the company paying the dividends for a period of at least 12 months preceding the date on which the dividends are declared.
Qatar has entered into treaties with Austria and Hungary, which are expected to be effective from 1 January 2013. In addition, Qatar is in the process of negotiating, signing and ratifying treaties with Albania, Barbados, Belgium, Bermuda, Bosnia-Herzegovina, Brunei Darussalam, Egypt, Eritrea, Fiji, Finland, Germany, Guernsey, Iceland, Iran, Ireland, Isle of Man, Jersey, Kazakhstan, Kyrgyzstan, Libya, Lithuania, Mauritania, Mexico, Montenegro, Portugal, San Marino, Spain, Turkmenistan, Ukraine and Uzbekistan.

Branch Remittance Tax 0
Net Operating Losses (Years)
  Carryback 0
  Carryforward 7 (g)

(a) See Section B.
(b) These withholding tax rates are standard and final. They can be reduced under double tax treaties or European Union (EU) directives.
(c) This tax may be reduced to nil for dividends paid to a legal entity residing in another EU member state or in a European Free Trade Association (EFTA; consisting of Iceland, Liechtenstein and Norway) member state or to a permanent establishment of an entity residing in an EU or EFTA member state, if certain conditions relating to the dividend recipient and dividend payer are satisfied. These conditions are described in Dividends in Section B. Dividends paid by Romanian legal entities to pension funds resident in an EU or EFTA member state, as defined by the law of such state, are exempt from withholding tax in Romania.
(d) This withholding tax applies only if the income is not attributable to a permanent establishment in Romania.
(e) The following types of interest derived by nonresidents are not subject to withholding tax:
  - Interest from public debt instruments in national and foreign currency
  - Interest related to instruments issued by the National Bank of Romania to carry out monetary policy
  - Interest paid by Romanian legal entities to pension funds resident in an EU or EFTA member state, as defined by the law of such state
(f) The withholding tax rate is 0% for interest and royalties if certain conditions are satisfied, including the following principal conditions:
  - The beneficial owner of the interest or royalties is a legal person resident in an EU or EFTA member state or a permanent establishment of an entity resident in such a state.
  - The beneficial owner of the interest or royalties holds at least 25% of the value or number of participation titles in the Romanian entity for an uninterrupted period of at least two years that ends on the date of payment of the interest or royalties.
Annual tax losses incurred in 2009 and subsequent years may be carried forward for seven years (five years for losses incurred before 2009) and are not adjusted for inflation.

B. Taxes on corporate income and gains

Corporate income tax. Resident entities are subject to tax on their worldwide income. An entity is resident in Romania if it satisfies any of the following conditions:
- It is incorporated in Romania.
- Its place of effective management and control is located in Romania.
- It is a legal entity that has its headquarters in Romania and that is incorporated in accordance with the European legislation.

Associations or consortia, which are not considered separate legal persons in Romania, are tax transparent. For such associations between Romanian legal entities and individuals or foreign entities, the tax is calculated and paid by the Romanian legal entities on behalf of the partners.

Nonresident companies that do not have an effective place of management in Romania are subject to tax on their Romanian-source income only, including capital gains derived from specified transactions (see Capital gains).

Rates of corporate income tax. The standard rate of income tax for Romanian companies is 16%, regardless of whether the companies have foreign participation. Income derived by companies from night bars, nightclubs, discos and casinos directly or in association is also normally taxable at a rate of 16%, but the amount of the tax payable may not be less than 5% of the gross income derived from such activities.

Nonresident companies that do not have their place of effective management in Romania are taxed in Romania at the standard rate of 16% on earnings derived from their operations in Romania through branches, permanent establishments or certain consortia. A permanent establishment of a foreign company in Romania may be constituted in certain forms, including the following:
- An office
- A branch
- An agency
- A factory
- A mine
- A place of extraction for gas or oil
- A building site that exists for a period exceeding six months
- The place in which an activity continues to be carried out with the assets and liabilities of a Romanian legal person subject to a cross-border reorganization

Foreign companies are also normally taxable in Romania at the standard corporate income tax rate on profits derived in Romania from real estate located in Romania and the exploitation of natural resources, as well as on certain capital gains (see Capital gains).

Representative offices are subject to an annual tax equal to the equivalent in Romanian lei of €4,000, payable in two installments.

Tax incentives. Romania offers certain tax incentives, which are summarized below.
**Corporate income tax.** The Fiscal Code contains measures allowing companies to claim accelerated depreciation in certain circumstances.

The Fiscal Code allows “sponsorship” expenses to be claimed as a credit against corporate income tax due, subject to certain limitations. Under the Sponsorship Law, “sponsorship” is defined as “the juridical deed by which two persons agree upon the transfer of the ownership right upon certain material goods or financial means, in order to support the activity without lucrative scope, carried out by one of them.” The tax credit for sponsorship expenses is limited to the lower of the following:

- 0.3% of the company’s turnover
- 20% of the corporate income tax due

Beginning in 2009, dividends reinvested for the purpose of securing and creating new jobs for the business development of Romanian legal entities distributing the dividends are exempt from dividend tax. Dividends invested in the share capital of another Romanian legal entity to create new jobs or to develop its activities are exempt from dividend tax.

**Research and development costs.** Taxpayers can benefit from an additional allowance equal to 20% of eligible costs for research and development (R&D) activities.

**Companies in disfavored economic zones.** Certain incentives are available to companies and their employees engaged in activities in disfavored economic zones (DEZs), which are designated by the government. The following are the incentives:

- Exemption from corporate income tax for new investments made by companies that received before 1 July 2003 a certificate of permanent investor in the disfavored zone (the incentive applies during the existence of the disfavored zone)
- Personal income tax exemption for one-off relocation allowances received by the employees of the company who establish their domicile in disfavored zones in which they are carrying out employment activities

**Industrial parks.** Companies administering industrial parks (administrator companies) may benefit from the following incentives:

- Exemption from taxes due on conversion of agricultural land to be used for industrial parks
- Buildings, constructions and land located inside industrial parks are exempt from building tax and land tax
- Other incentives, which may be granted by the local authorities

**Petroleum companies.** Incentives are available to titleholders of oil and gas concessions. Titleholders are granted the concessions by the government in exchange for the payment of a royalty. The following are the incentives:

- For rehabilitation projects, a deductible provision equal to 10% of the annual exploitation profits derived by titleholders of oil and gas licenses that relate to offshore areas with water deeper than 100 meters (328 feet)
- Exemption from payment of tax on oil and natural gas (consumption tax imposed on the value of oil and gas delivered) for the production extracted and directly exported by producers

**Free-trade zones.** The following tax benefits are available to companies performing activities in free-trade zones:
• Value-added tax (VAT) exemption applies to supplies of non-Community goods to be placed in a free-trade zone and to supplies of the respective goods performed in a free-trade zone.
• Non-Community goods introduced into free-trade zones for storage purposes are not subject to customs duties.
• State aid is available for investments performed in free-trade zones.

Property taxes. Local councils may grant building and land tax exemptions to legal entities, subject to the state-aid regulations.

Capital gains. Capital gains are included in taxable income and taxed at the normal corporate income tax rate. Capital gains derived by nonresident companies are also subject to the standard 16% tax rate if they are derived from the disposal of the following:
• Immovable property located in Romania
• Participation titles (shares) in a Romanian company, or a company with fixed assets that primarily consist of, directly or indirectly, immovable property located in Romania

Certain exemptions apply to income derived by nonresident collective placement bodies without corporate status (for example, Romanian entities that attract financial resources for investment, according to specific legislation) from the transfer of value titles (securities participation titles in open funds, and other financial instruments, such as derivatives) and participation titles held directly or indirectly in Romanian companies, as well as to income derived by nonresidents from the transfer on a foreign capital market of participation titles held in a Romanian company and of value titles.

Administration. In general, the tax year is the calendar year.

Under the corporate income tax law, payers of corporate income tax (for example, companies, branches and permanent establishments) must file tax returns and pay corporate income tax quarterly (computed based on actual numbers) by the 25th day of the first month following the first, second and third quarters.

As an exception to the general rule, the payments made by banks are advance payments based on the corporate income tax for the preceding year, adjusted by the inflation rate. This rule does not apply to newly established banks and banks that recorded a tax loss in the preceding year. These banks apply the 16% rate to the accounting profit of the current quarter.

Beginning on 1 January 2013, all other companies may opt for reporting and paying the annual corporate income tax through advance payments made on a quarterly basis.

The annual corporate income tax return must be filed and any balance of annual corporate income tax must be paid by 25 March of the following year. However, certain taxpayers must submit the annual corporate income tax return and pay the related tax by 25 February of the following year, such as nonprofit organizations or taxpayers deriving most of their revenues from cereals and technical plants.

Companies ceasing to exist must submit a final tax return and pay the corporate income tax based on special rules.
The annual financial statements must be submitted within specified time periods after the year-end. The following are the time periods:

- Companies (in general), national companies and research and development institutes: 150 days
- Certain specified legal persons, individuals and bodies: 120 days
- Companies not performing any activities after their formation: 60 days

The failure of a company to file tax returns by the deadline may result in a fine ranging usually from RON 1,000 to RON 5,000. Companies are liable for the payment of the fines for late filing of returns even if they pay the tax due. For the late payment of tax liabilities, the following late payment interest and late payment penalties are due (except where otherwise provided):

- Late payment interest, computed at 0.04% per day of delay
- Late payment penalties for outstanding tax liabilities of more than 30 days, 5% for outstanding tax liabilities paid within the next 60 days and 15% for outstanding tax liabilities remaining unpaid thereafter

**Dividends.** Dividends paid by Romanian companies to resident companies are subject to a 16% withholding tax. The 16% tax is considered a final tax and, accordingly, the dividends are not included in the taxable income of the recipient. However, as a result of Romania’s accession to the EU, no tax is imposed on dividends paid by a Romanian resident company to resident companies that held at least 10% of the shares of the payer for an uninterrupted period of at least two years that ended on the date of payment of the dividend.

Dividends paid by Romanian companies and legal entities having their social headquarters in Romania (that is, *societas europea* registered with the Romanian Trade Registry and set up according to European law) to resident individuals and nonresident companies and individuals are generally subject to a 16% withholding tax. However, dividends paid by a Romanian legal entity to a legal entity resident in another EU member state or in an EFTA member state (see footnote [c] in Section A) or to a permanent establishment of an entity residing in an EU or EFTA member state are not subject to withholding tax if certain conditions relating to the legal entity receiving the dividends and to the Romanian income payer are satisfied. These conditions are described below.

The following conditions must be satisfied with respect to the legal entity receiving the dividends:

- The legal entity receiving the dividends must be established in one of the legal forms provided by the law and must be resident in the respective EU or EFTA member state and, according to the double tax treaties entered into with third countries, may not be resident outside the EU or EFTA from a tax perspective.
- The legal entity receiving the dividends must be liable to pay corporate income tax or other similar tax under the tax law in its state of residence without the possibility of exemption or choice of the fiscal treatment.
- The beneficiary of the dividends must own at least 10% of the participation titles in the Romanian legal entity for an uninterrupted period of at least two years ending on the date of the payment of the dividends.
The Romanian entity paying the dividends must satisfy the following conditions:
• It must be a joint stock company, limited partnership or limited liability company.
• It must be liable to pay corporate income tax without the possibility of exemption or choice of the fiscal treatment.

Effective from 2010, dividends paid by Romanian legal entities to pension funds, as defined by the law of the respective EU or EFTA member state, are exempt from withholding tax in Romania.

The deadline for payment of dividend withholding tax is the 25th day of the month following the month in which the dividends are paid. However, if the dividends are distributed but not paid to shareholders by the end of the year in which the annual financial statements are approved, the tax is due on 25 January of the following year.

Foreign tax relief. Foreign taxes may be credited against Romanian taxes based on the provisions of a double tax treaty between Romania and the foreign state.

C. Determination of trading income

General. In general, all income that is booked as revenue is included in taxable income. However, the following items, among others, are not included in taxable income:
• Dividends received by a Romanian company from another Romanian company. Dividends received by a Romanian company from an EU resident subsidiary and dividends received by Romanian permanent establishments of EU companies are also not taxable if certain conditions are satisfied.
• Increases in the value of shares held in other companies, resulting from the incorporation of reserves, premiums, profits and similar items.
• Revenues from the reversal of expenses and provisions that were previously considered to be nondeductible.

In general, only expenses related to the earning of taxable income are deductible for tax purposes. However, the following items are deductible within specified limits:
• Protocol and entertainment expenses (for example, gifts to clients and business lunches), up to 2% of the adjusted accounting profit before tax
• Employee-related expenses (social expenses), up to 2% of the total salary cost
• Contributions to the legal reserve fund, generally up to 5% of the accounting profit before tax, until the reserve fund reaches 20% of share capital
• Expenses with respect to perishable goods (goods on which a company might incur losses for various reasons, such as from damage suffered during the transport of the goods), which are deductible within the limits set by a government decision
• Expenses incurred with respect to the daily allowance (amounts granted to employees traveling for business purposes for meals and other expenses) that are within 2.5 times the legal limits established for state institutions
• Provisions (see Provisions)
• Interest expenses and foreign-exchange losses related to loans subject to the debt-to-equity limitation, if the debt-to-equity ratio is not exceeded (see Section E)
• Depreciation expenses (see *Tax depreciation*)
• Expenses incurred on behalf of an employee with respect to optional occupational pension and private health insurance schemes, within certain thresholds

The following expenses are not deductible for tax purposes:
• Service expenses, including management, assistance and consultancy expenses, if the taxpayer cannot justify their necessity and no contracts and other documents justifying the expenses are available.
• Expenses relating to insurance, other than insurance relating to risks of work-related accidents and insurance relating to assets owned by the company.
• Interest on loans that are not from financial institutions, to the extent that the interest exceeds the following limits:
  — For loans denominated in lei (RON), the level of the reference interest rate published by the National Bank of Romania (NBR) for the last month of the quarter.
  — For loans denominated in foreign currencies, an annual interest rate of 6% (beginning in 2010).
• Penalties and fines paid to Romanian or foreign authorities.
• Expenses relating to insurance, other than insurance relating to risks of work-related accidents and insurance relating to assets owned by the company.
• Salary expenses that are not taxed at the level of the individual, unless the law provides otherwise.
• Expenses related to nontaxable income.

Effective from 1 July 2012, the deductibility of car expenses not falling under the full deductibility criteria provided under the Romanian tax law is limited to 50% for certain cars not exclusively used for business purposes.

Sponsorship expenses are also nondeductible, but they may be claimed as a credit against corporate income tax due, subject to certain limitations (see Section B).

**Taxpayers applying the international financial reporting standards.**
Beginning in 2012, taxpayers applying international financial reporting standards (IFRS), such as banks, must take specific tax rules into consideration in determining the corporate income tax.

**Inventories.** Under Romanian law, inventories of raw materials and merchandise are valued at purchase cost, while inventories of finished goods and work-in-progress are valued at production cost. On the write-off of the inventories, the valuation is calculated using the first-in, first-out (FIFO), weighted-average or last-in, first-out (LIFO) methods.

**Provisions.** Under Romanian law, the following provisions are deductible for corporate income tax purposes:
Bad debt provisions under specified conditions
Provisions for performance guarantees granted to clients
Mandatory credit risk provisions, if established by banks, credit institutions or nonbanking financial institutions (leasing companies)
Special provisions for titleholders of oil and gas concessions

**Tax depreciation.** The following are the permissible depreciation methods:
- Buildings: straight-line depreciation
- Equipment: straight-line, reduced-balance or accelerated depreciation
- Other depreciable assets: straight-line or reduced-balance depreciation

The depreciation method must be applied consistently. Land may not be depreciated.

Under the accelerated depreciation method, the assets are depreciated at a maximum rate of 50% in the year of purchase, and the balance of the value is deducted using the straight-line method during the remaining useful life of the asset.

Patents, licenses, know-how, manufacturers’ brands, trademarks and service marks, as well as other similar industrial and commercial property rights, are depreciated during the contract period or during the period in which the purchaser intends to use the rights.

Expenses for the production or purchase of software programs are deductible on a straight-line basis over three years. The reduced-balance and accelerated depreciation methods may be used for patents.

Goodwill and set-up costs cannot be depreciated for tax purposes.

For tax depreciation purposes, useful lives are prescribed by law. The following are the useful lives that are generally applicable to major categories of assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and constructions (for example, roads and fences)</td>
<td>8 to 60</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>2 to 24</td>
</tr>
<tr>
<td>Furniture and fittings</td>
<td>2 to 15</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>3 to 9</td>
</tr>
</tbody>
</table>

Revaluations of the book value of land and fixed assets carried out before 31 December 2003 are taken into account for tax purposes. Revaluations carried out after 1 January 2007, as well as the part remaining undepreciated as of 31 December 2006 with respect to revaluations carried out between 1 January 2004 and 31 December 2006, are also taken into consideration for tax purposes.

Reserves from the revaluation of fixed assets, carried out after 1 January 2004, which are deducted as tax depreciation or expenses when assets are sold or written off are taxed simultaneously with the deduction of the tax depreciation or expenses (that is, when the assets are sold or written off).

**Relief for losses.** Annual tax losses incurred in 2009 and subsequent years may be carried forward for seven years (five years for losses incurred before 2009) and are not adjusted for inflation.
Losses of entities ceasing to exist as a result of a spin-off or merger are recovered by the taxpayers taking over the patrimony of the absorbed or spun-off company, proportionally to the value of the assets and liabilities transferred to the beneficial legal entity.

Losses recorded by taxpayers that do not cease to exist as a result of an operation consisting of the spin-off of a part of their patrimony transferred as a whole are recovered by such taxpayers and by the taxpayers taking over the patrimony of the transferring company, proportionally to the assets and liabilities transferred to the beneficial legal persons, according to the spin-off project, respectively with those maintained by the transferring legal entity.

Losses may not be carried back.

**Groups of companies.** Although the Romanian law provides financial accounting rules for the consolidation of companies, the tax law treats each group company individually for tax purposes. Under certain circumstances, a group of taxable persons established in Romania may be treated as a single taxable person for VAT reporting purposes.

**D. Other significant taxes**

The following table summarizes other significant taxes.

**E. Miscellaneous matters**

**Foreign-exchange controls.** The Romanian currency is the leu (RON). Regulation 4/2005, as amended, governs the foreign-exchange regime in Romania.
In Romania, transactions between resident companies or between resident companies and resident individuals must be made in local currency, with certain exceptions. Transactions between residents and nonresidents can be made in domestic as well as in foreign currency. In the free-trade zones (see Section B), transactions between residents can also be performed in foreign currency.

Residents and nonresidents may open foreign-currency accounts in Romanian banks or foreign banks authorized to operate in Romania. Residents are allowed to open accounts in banks located abroad. Romanian legal entities may hold and use hard currency deposited with authorized banks.

Romanian legal entities may make payments in foreign currency to nonresidents without prior approval. Current-account transactions include, among others, imports of goods and services, payments of dividends and repatriation of profits.

Romanian and foreign entities may freely buy and sell hard currency on the interbank foreign-exchange market, but specified documentation is usually required.

Transfer pricing. Under the provisions of the Romanian Fiscal Code, for transactions between related parties, the tax authorities may adjust the amount of income or expenses of either party to reflect the market value of the goods or services provided in the transaction. Such reassessment affects only the tax position of the Romanian entity. It does not affect the entity’s financial statements.

The law indicates that in applying the domestic transfer-pricing measures, the Romanian tax authorities must also take into account the Organization for Economic Cooperation and Development (OECD) Transfer-Pricing Guidelines.

On request, Romanian entities performing transactions with nonresident related parties must make available to the tax authorities a file containing specified transfer-pricing documentation.

Debt-to-equity rules. Interest expenses are fully deductible if the debt-to-equity ratio is positive and does not exceed 3:1. Only loans granted for a period of greater than one year are included in the debt-to-equity computation. If the 3:1 threshold is exceeded, interest expenses on such loans and net losses from foreign-exchange differences related to such loans are not deductible, but they may be carried forward to the following tax years until they are fully deducted.

Interest expenses and net foreign-exchange losses are not subject to the debt-to-equity rules if the loans satisfy any of the following conditions:

- They are granted by international development banks or similar organizations, Romanian or foreign credit institutions, nonbanking financial institutions or legal persons granting credits according to the law.
- They relate to bonds traded on a regulated market.
- They are guaranteed by the state.

F. Treaty withholding tax rates

</table>

(a) The lower rate applies if the beneficiary of dividends is a company owning at least 25% of the capital of the payer.
(b) The lower rate applies if the beneficiary of dividends is a company owning at least 10% of the capital of the payer.
(c) The rate is 0% if the indebtedness on which the interest is paid is guaranteed, insured, or financed by the other state or by a financial institution that is a resident of the other state.
(d) The 0% rate applies if the beneficial owner of the dividends is one of the following:
   • The government of a contracting state
   • The governmental institution or entity of a contracting state
   • A company that is resident in a contracting state and that has at least 25% of its capital owned directly or indirectly by the government or governmental institutions of either contracting state
(e) The 5% rate applies to royalties paid for patents, brands, designs and models and know-how.
(f) The 2.5% rate applies to royalties relating to computer software or industrial equipment.
(g) The 0% applies to interest paid to the German government, Deutsche Bundesbank Kreditanstalt für Wiederaufbau or Deutsche Investitions und Entwicklungsgesellschaft (DEG) and to interest paid on a loan guaranteed by Hermes-Deckung. The 0% rate also applies to interest paid to the Romanian government if it is derived and beneficially owned by certain types of institutions.
(for example, the Romanian government, an administrative-territorial unit, a local authority, or an agency, bank unit or institution of the Romanian govern-
ment) or if the debt claims of Romanian residents are warranted, insured or
financed by a financial institution wholly owned by the Romanian govern-
ment. In addition, as long as Germany does not impose taxes on interest,
Romania may not tax interest. The protocol to the treaty provides that the
following types of interest are taxed only in the state where the interest arises
and according to the law of that state, provided that they are deductible in the
determination of profits of the interest payer:

- Interest derived from rights or debt claims carrying a right to participate in
  profits
- Interest linked to the borrower’s profits
- Interest derived from profit-sharing bonds

(h) The lower rate applies to dividends paid by companies resident in Romania.
(i) The lower rate applies to cultural royalties.
(j) The lower rate applies if the beneficiary of dividends is a company owning at
  least 40% of the capital of the payer.
(k) The lower rate applies to payments received for the use of, or the right to use,
  patents, trademarks, designs or models, plans, secret formulas and processes,
  or industrial, commercial or scientific equipment, and for information con-
  cerning industrial, commercial or scientific experience.

(l) The 0% rate applies to the following types of interest:
- Interest paid in connection with sales on credit of industrial, commercial or
  scientific equipment
- Interest on loans granted by banks or other financial institutions (including
  insurance companies)
- Interest on loans with a term greater than two years
- Interest on debt-claims guaranteed, insured or directly or indirectly
  financed by or on behalf of the government of either contracting state

(m) The 0% rate applies to interest arising in one contracting state with respect to
  debentures, public funds or similar instruments of the government that is paid
to residents of the other contracting state and to interest on loans granted or
  guaranteed by the National Bank of Romania or by the Bank of Israel. The
  5% rate applies to interest paid with respect to sales on credit of merchandise
  or industrial, commercial or scientific equipment and to interest on loans
  granted by banks. The 10% rate applies to other interest.

(n) As long as Austria, under its national law, does not levy withholding tax on
  interest paid to Romanian residents, the withholding tax rate is 0%.

(o) The 0% rate applies to dividends paid by a company resident in Malaysia to
  a Romanian resident; the 10% rate applies to dividends paid by a company
  resident in Romania to a Malaysian resident.

(p) The 0% rate applies to interest paid to Romanian residents on long-term
  loans.

(q) The 0% rate applies to industrial royalties received from Malaysia by
  Romanian residents.

(r) The 5% rate applies to the following:
- Copyright royalties and similar payments with respect to the production or
  reproduction of literary, dramatic, musical or other artistic works (but not
  including royalties with respect to motion picture films or works on film or
  videotape or other means of reproduction for use in connection with televi-
  sion broadcasting)
- Royalties for the use of, or the right to use, computer software, patents or
  information concerning industrial, commercial or scientific experience (but
  not including royalties paid with respect to a rental or franchise agreement)

(s) The 0% rate applies if the beneficiary of the dividends is a company owning
  at least 25% of the capital of the payer. The 5% rate applies if the beneficiary
  of the dividends is a company owning at least 10% of the capital of the payer.
The 15% rate applies to other dividends.

(t) Romania will not impose withholding tax on interest and royalties paid to
  Dutch residents as long as Dutch domestic law does not impose withholding
tax on these types of payments.

(u) The lower rate applies to interest related to sales on credit of equipment, loans
  granted by a bank or to public issues of bonds and debentures.

(v) The 10% rate applies to royalties paid by a company that is registered as a
  foreign investor and is engaged in an activity in a priority economic field. The
  15% rate applies to royalties related to film or television production. The 25% rate
  applies to other royalties.

(w) The 10% rate applies if the beneficiary of dividends is a company owning at
  least 25% of the capital of the payer for an uninterrupted period of two years.

(x) The 0% rate applies to interest related to sales on credit of industrial and
  scientific equipment.
Romania will not impose withholding tax on royalties paid to Swiss residents as long as Swiss domestic law does not impose withholding tax on royalties.

The 10% rate applies if the beneficiary of the interest is a financial company, including an insurance company. The 20% rate applies to interest with respect to sales on credit. The 25% rate applies to other interest payments.

The 0% rate applies to industrial royalties.

This treaty is currently applied only to Bosnia-Herzegovina.

The 0% rate applies to the following types of interest:
- Interest related to public debt instruments or to instruments issued by the National Bank of Romania with the purposes of reaching monetary policy objectives
- Interest paid to EU/EEFTA pension funds

The 16% rate applies to other interest payments.

The treaty is not yet effective.

The 0% rate applies if the beneficiary of the dividends is a company owning at least 50% of the capital of the payer. The 5% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer. The 10% rate applies to all other dividends.

The treaty is currently applied only to Bosnia-Herzegovina.

The 0% rate applies if the beneficiary of the dividends is a company owning at least 50% of the capital of the payer. The 5% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer. The 10% rate applies to all other dividends.

The withholding tax rate is 0% for interest and royalties if both of the following conditions are satisfied:
- The beneficial owner of the interest or royalties is a legal person resident in an EU or EFTA member state or a permanent establishment of an entity resident in such a state.
- The beneficial owner of the interest or royalties holds at least 25% of the value or number of participation titles in the Romanian entity for an uninterrupted period of at least two years that ends on the date of payment of the interest or royalties.

The withholding tax rate is 16% if the conditions mentioned in the preceding bullet are not satisfied.

The 0% rate applies if the beneficial owner of the dividends is one of the following:
- The government of a contracting state
- A governmental institution or entity of a contracting state

The 0% rate applies if any of the following circumstances exists:
- The payer of the income from debt-claims is the government of a contracting state or an administrative-territorial unit or an administrative subdivision or a local authority thereof.
- The income from debt-claims is paid to the government of the other contracting state or administrative-territorial unit, or an administrative subdivision or local authority thereof, or an agency or instrumentality (including a financial institution) wholly owned by the other contracting state or administrative-territorial unit, or an administrative subdivision or local authority thereof.
- The income from debt-claims is paid on loans granted, insured or guaranteed by a public institution for purposes of promoting exports.

A withholding tax exemption for dividends applies if either of the following circumstances exists:
- The dividends are paid to a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
- The beneficial owner of the dividends is the government of the contracting state or a governmental institution or entity of a contracting state.

The interest is paid to related parties (that is, direct parent or sister companies) that have a shareholding of 25% or more.
- The loan is secured by a governmental institution.

(a) The basic corporate profits tax rate consists of a 2% rate payable to the central government and rates ranging from 13.5% to 18% payable to the regional governments. The regional governments set the rates applicable to their respective regions.

(b) The 0% rate applies to profits of companies performing educational and medical activities. Also, see Section B.

(c) The 0% rate applies to capital gains realized by Russian companies on the disposal of certain shares or participation interests acquired after 1 January 2011 and held for at least five years. Also, see Section B. The 0% rate also applies to capital gains realized by foreign companies that do not have a permanent establishment in the Russian Federation with respect to the disposal of the following shares:
   - Shares in Russian companies in which the value of immovable property does not exceed 50% of the company’s total assets
   - Shares in Russian companies that are traded on an organized securities market.

(d) The 9% rate applies to dividends received by Russian entities or by individuals who are residents of the Russian Federation. The 15% rate applies if the recipient of the dividends is a foreign legal entity. The 0% rate applies to dividends received by Russian companies if the recipient has held at least 50% of the payer’s capital for more than 365 days.

(e) This tax applies to payments to foreign legal entities that are not attributable to a permanent establishment in the Russian Federation. The tax is considered final.

(f) The time limit does not apply to taxpayers with the status of “resident of an industrial special economic zone.” Also, see Section C.

B. Taxes on corporate income and gains

Corporate profits tax. Russian enterprises and foreign legal entities operating through a permanent establishment are subject to tax. The definition of “permanent establishment” is similar to the definition of the same term in the model treaty of the Organization for Economic Cooperation and Development. Russian legal entities are subject to tax on their worldwide income. Russian legal entities are those registered in the Russian Federation. Foreign legal entities are subject to tax on their profits earned through a permanent establishment.
Foreign investment is permitted in various forms, including investment through 100% subsidiaries, share participation in joint stock companies and other types of Russian legal entities, branches and representative offices.

**Tax rates.** For both Russian legal entities and foreign legal entities, the basic corporate profits tax rate consists of a 2% rate payable to the central government and rates ranging from 13.5% to 18% payable to the regional governments. The regional governments set the rates applicable to their respective regions. As a result, the basic corporate profits tax rate varies from 15.5% to 20%, depending on the rate set by the regional government. A 0% tax rate applies to profits of Russian companies performing educational activities and medical activities if they satisfy certain criteria. These criteria include the holding of a license for carrying out the corresponding activities and the receipt of not less than 90% of taxable income from educational, medical or research and development (R&D) activities. The 0% tax rate applies from 1 January 2011 to 1 January 2020.

**Capital gains.** Capital gains are included in taxable income and taxed at the regular rates, except for capital gains realized by Russian companies on the disposal of certain shares or participation interests in Russian companies acquired after 1 January 2011 and held for at least five years. The disposal of shares or participation interests is subject to a 0% rate if shares or participation interests satisfy either of the following conditions:
- They are not circulated on the organized securities market.
- They qualify as shares in a company in the high-technology (innovation) sector.

Losses on sales of fixed assets and other property are generally deductible, subject to certain restrictions. The deductibility of losses on sales of securities is limited.

**Administration.** The tax year is the calendar year. All taxpayers, except foreign legal entities, are required to make advance tax payments monthly. Each payment must equal one-third of the total advance payments for the preceding quarter. Alternatively, taxpayers may choose to pay tax by the 28th day of each month based on profits actually earned in the preceding month. Foreign legal entities must make quarterly tax payments. The final return for the year and the tax liability are based on actual results. Taxpayers’ final returns are due on 28 March following the end of the tax year. Significant penalties are imposed for failure to file returns by this deadline, which cannot be extended.

Taxpayers may apply to have excess payments of tax offset against future tax liabilities or refunded by the tax authorities. Offsets are performed within 10 days and refunds are granted within one month after the written application is received by the tax authorities. However, in practice, refunds may be difficult to obtain.

Taxpayers must register with the tax authorities at the following locations:
- The location where they were organized
- The location of any economically autonomous subdivisions
- The location of any immovable property or means of transport owned by them
**Dividends.** Dividends received are subject to withholding tax and are excluded from taxable profits. Dividends received by Russian entities or by individuals who are residents of the Russian Federation are subject to withholding tax at a rate of 9%. Dividends received by a foreign entity from a Russian entity are taxable at a rate of 15%. Tax withheld from dividends received by a Russian legal entity from another Russian legal entity may be offset against the tax that would normally be withheld from dividends paid to Russian legal entities by the recipient.

Dividends received by Russian legal entities on strategic shareholdings are exempt from tax. Under this regime, dividends are considered to be received from strategic shareholdings if the recipient has held at least 50% of the payer’s capital for more than 365 days.

**Foreign tax relief.** Foreign withholding taxes may be credited against Russian tax imposed on the same income, up to the amount of Russian tax on the income.

**C. Determination of trading income**

**General.** Taxable profit is determined by computing the profit or loss from business activities and nonselling operations, such as leasing income and capital gains, but excluding dividends received from Russian enterprises. Income received in foreign currency is translated into rubles according to the relevant daily exchange rate determined by the Central Bank.

The Tax Code provides an open list of expenses that are deductible for tax purposes.

Interest on debts is deductible if the amount of interest does not deviate by more than 20% from the average level of interest charged on debts issued in the same quarter under comparable conditions. Alternatively, at the taxpayer’s option, the maximum deductible interest on ruble loans may be calculated using the official Central Bank of Russia refinancing rate increased by a factor of 1.1 (for 2010 to 2012, the factor is increased to 1.8) and the maximum deductible interest on debts in foreign currency is calculated using a rate of 15% (the official Central Bank of Russia refinancing rate decreased by the factor of 0.8 in 2011 and 2012). In certain circumstances, the deductibility of interest on intercompany loans is restricted by thin-capitalization measures.

For details on tax depreciation, see *Tax depreciation*.

Certain costs related to research and development (R&D) are deductible in the amount of actual documented costs increased by a factor of 1.5.

Foreign legal entities doing business in the Russian Federation through a permanent establishment are taxed on actual profits. The taxable profit equals income received as a result of carrying out activities in the territory of the Russian Federation through a permanent establishment, minus the amount of expenses incurred by the permanent establishment. General and administration expenses allocated by a foreign legal entity’s head office to a Russian permanent establishment are deductible only if this is specifically allowed by an applicable double tax treaty. If a permanent establishment of a foreign entity provides services of a preparatory or auxiliary nature to third parties for no charge, the
taxable profit derived from such activities is deemed to be 20% of the amount of the expenses incurred by the permanent establishment in such activities.

**Tax depreciation.** All depreciable assets must be allocated to their relevant depreciation group and depreciated over their useful lives. The taxpayer determines the relevant depreciation group by using the “Classifier of Fixed Assets” issued by the Russian government. The “Classifier of Fixed Assets” provides for 10 depreciation groups and useful lives of 1 to more than 30 years for the depreciable assets in the groups. Based on the useful lives, the taxpayer calculates the depreciation deductible for profits tax purposes. Depreciation may be calculated using either the reducing-balance or straight-line methods. The straight-line method is required for assets with a designated useful life of over 20 years.

The reducing-balance method may be applied. Under this method, depreciation must be determined for each depreciation group as a whole. Depreciation must be calculated based on the total balance of each depreciation group. This balance equals the total book value brought forward for all depreciable assets included in the group to which the reducing-balance method applies.

The depreciation method can be changed once in a five-year period.

Enterprises may deduct 10% (30% with respect to fixed assets with a designated useful life of over 3 years and up to 20 years) of the initial book value of newly purchased fixed assets and capital investments in existing fixed assets as current-year expenses (capital investment allowance). If fixed assets are sold within five years after the date of the purchase, the deducted capital investment allowance is recaptured.

**Relief for losses.** Enterprises may carry forward unrelieved operating losses to the following 10 years. This time limit does not apply to the taxpayers with the status of “resident of industrial special economic zone.”

**Groups of enterprises.** Related enterprises may not offset profits and losses among members of a group.

**D. Other significant taxes**

The following table summarizes other significant taxes.

effective tax rate varies depending on the amount of gross income received by the employee
All annual payments to employee of less than or equal to RUR 512,000 (approximately US$16,500) 30

All annual payments to employee in excess of RUR 512,000
Supplementary contributions for workplace accidents; rate varies by industry 0.2 to 8.5
Income tax withholding by employers
Residents 13
Nonresidents 30
Mineral extraction tax; imposed on the value or volume of extracted commercial minerals Various
Transport tax Various

E. Miscellaneous matters

Foreign-exchange controls. Most foreign-exchange restrictions were abolished in 2006. Russian enterprises’ foreign-currency receipts must be deposited in bank accounts in the Russian Federation.

Transfer pricing. The transfer-pricing rules, which are largely based on the arm’s-length principle stipulated by the transfer-pricing guidelines of the Organization for Economic Cooperation and Development (OECD), apply to controlled transactions performed after 1 January 2012. Controlled transactions include the following:
• Cross-border transactions with related parties
• Domestic transactions with related parties exceeding certain thresholds
• Cross-border transactions involving certain types of commodities (for example, crude oil, oil products, fertilizers and metals)
• Transactions with independent companies located in certain jurisdictions providing beneficial tax regimes

The Tax Code contains a specific definition of related parties and transfer-pricing documentation requirements. Interest penalties and fines of 40% (20% for 2014 and 2015) of underpaid tax apply if the price in the controlled transaction is proved to be outside a range of market prices. No fines apply if the transfer-pricing adjustment relates to 2012 or 2013 or if the taxpayer submits transfer-pricing documentation to the tax authorities within 30 days after the date on which the tax authorities request such documentation. Corresponding transfer-pricing adjustments are available for a Russian party to the transaction if the other party paid additional tax to the tax authorities based on the results of a transfer-pricing audit. Major Russian taxpayers can enter into advance pricing agreements.

F. Treaty withholding tax rates

Russian legislation currently states that the double tax treaties of the former USSR are still valid. The withholding rates under the USSR’s treaties and the Russian Federation’s treaties are listed in the following table. Like most double tax treaties, the treaty rates do not apply if domestic withholding tax rates (see Section A) are lower.

(a) The 5% rate applies if the recipient of the dividends has invested at least US$40,000 or the equivalent in local currency in the payer’s charter capital. The 10% rate applies to other dividends.

(b) The 5% rate applies if the beneficial owner of the dividends (except for a partnership) holds directly at least 10% of the capital of the payer of the dividends and if the participation exceeds US$100,000. The 15% rate applies to other dividends.

(c) The 10% rate applies if the beneficial owner of the dividends owns at least 10% of the voting shares of the payer or, in the case of a Russian payer that has not issued voting shares, at least 10% of the statutory capital. The 15% rate applies to other dividends.

(d) The 0% rate applies to royalties for the following:
   - Copyrights of cultural works (excluding films and television rights)
   - The use of computer software
   - The use of patents or information concerning industrial, commercial or scientific experience, if the payer and the beneficiary are not related persons

   The 10% rate applies to other royalties.

(e) The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer and have invested in the payer more than US$100,000 or the equivalent amount in local currency. The 10% rate applies to other dividends.

(f) The 5% rate applies to dividends paid to shareholders that have invested in the payer at least US$100,000 or the equivalent amount in local currency. The 10% rate applies to other dividends.

(g) The 0% rate applies if the recipient of the interest is the other contracting state or a bank that is more than 51%-owned by the other contracting state. The 15% rate applies to other interest payments.

(h) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 30% of the capital of the payer of the dividends and if the foreign capital invested exceeds US$100,000 or its equivalent in the national currencies of the contracting states at the moment when the dividends become due and payable. The 12% rate applies to other dividends.
The 5% rate applies if the recipient of the dividend has invested in the payer at least FF 500,000 (€76,225) or the equivalent amount in other currency and if the beneficiary of the dividends is a company that is exempt from tax of dividends in its state of residence. The 10% rate applies if only one of these conditions is met. The 15% rate applies to other dividends.

The 5% rate applies to dividends paid to corporations that hold a 10% or greater interest in the capital of the payer and have invested in the payer at least €80,000 or the equivalent amount in rubles. The 15% rate applies to other dividends.

The 0% rate applies if the recipient of the interest is the government of the other contracting state, including local authorities thereof, a political subdivision or the central bank. The 15% rate applies to other interest payments.

The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer and have invested in the payer at least US$100,000 or the equivalent amount in other currency. The 10% rate applies to other dividends.

The rate is 0% for royalties for copyrights of cultural works.

The 10% rate applies if the recipient of the dividends holds at least 30% of the capital of the payer and has invested in the payer more than €75,000 or the equivalent amount in local currency. The 15% rate applies to other dividends.

The 10% rate applies to royalties for copyrights, including film and radio broadcasts. The 10% rate applies to other royalties.

Royalties are subject to tax in the country of the payer in accordance with that country’s law.

The 5% rate applies if the beneficial owner of the dividends owns at least US$500,000 of the shares of the payer. The 10% rate applies to other dividends.

The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer and have invested at least ECU 75,000 or an equivalent amount in local currency. The 15% rate applies to other dividends.

The 0% rate applies if the recipient of the interest is the government of the other contracting state including local authorities thereof, an instrumentality of that state that is not subject to tax in that state or the central bank. The 10% rate applies to other interest payments.

The 10% rate applies if the beneficial owner is a company that, for an uninterrupted period of two years before the payment of the dividends, owned directly at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends.

The 0% rate applies if the interest is derived and beneficially owned by the other contracting state, a political or administrative subdivision or a local authority thereof or any institution specified and agreed to in an exchange of notes between the competent authorities of the contracting states in connection with any credit granted or guaranteed by them under an agreement between the governments of the contracting states. The 10% rate applies to other interest payments.

The 10% rate applies if the beneficial owner of the dividends owns at least 30% of the charter capital of the payer and has directly invested at least US$100,000 in the charter capital of the payer. The 15% rate applies to other dividends.

The 5% rate applies to dividends paid to corporations that hold at least 30% of the capital of the payer and have invested in the payer at least US$100,000 or the equivalent amount in local currency. The 10% rate applies to other dividends.

The 5% rate applies if the beneficial owner of the dividends (except for a partnership) has invested at least ECU 100,000 in the charter capital of the payer and if the country of residence of the beneficial owner of the dividends does not impose taxes on the dividends. The 10% rate applies if one of these conditions is met. The 15% rate applies to other dividends.

The treaty does not provide relief for Spanish companies receiving dividends, interest or royalties from Russian sources if more than 50% of the Spanish company is owned (directly or indirectly) by non-Spanish residents.

The 10% rate applies if the beneficial owner of the dividends owns at least 25% of the charter capital of the payer. The 15% rate applies to other dividends.

The 5% rate applies to corporations that hold 100% (at least 30% if the recipient corporation is a part of a joint venture) of the payer and that have invested in the payer at least US$100,000 or the equivalent amount in local currency. The 15% rate applies to other dividends.
The 5% rate applies if the recipient of the dividends is a corporation that holds at least 20% of the capital of the payer and if, at the time the dividends become due, the amount of the recipient’s investment exceeds CHF 200,000. The 15% rate applies to other dividends.

The 5% rate applies to loan interest paid by one bank to another bank. The 10% rate applies to other interest.

The 5% rate applies to dividends paid to corporations that have invested in the payer at least US$50,000 or the equivalent amount in local currency. The 15% rate applies to other dividends.

The 5% rate applies to loan interest paid by one bank to another bank. The 10% rate applies to other interest.

The 5% rate applies to dividends paid to corporations that have invested in the payer at least US$50,000 or the equivalent amount in local currency. The 15% rate applies to other dividends.

The 5% rate applies to dividends paid to shareholders that have invested at least the equivalent of US$10 million in the payer. The 15% rate applies to other dividends.

The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer and have invested in the payer at least US$100,000 or an equivalent amount in local currency. The 15% rate applies to other dividends.

The 15% rate applies to interest on certain types of state and municipal securities; the 20% rate applies to other interest.

The 5% rate applies to corporations that hold at least 25% of the capital of the payer. The 10% rate applies to other dividends.

The 5% rate applies to corporations that hold at least 25% of the capital of the payer. The 10% rate applies to other dividends.

The 4.5% rate applies to royalties paid to entities for copyrights of cinematographic films, programs and recordings for radio and television broadcasting. The 13.5% rate applies to royalties paid to entities for copyrights of works of literature, art or science. The 18% rate applies to royalties paid to entities for patents, trademarks, designs or models, plans, secret formulas or processes and computer software, as well as for information relating to industrial, commercial or scientific experience.

The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer. The 10% rate applies to other dividends.

The 5% rate applies to dividends paid to corporations that have invested in the payer at least A$700,000 or an equivalent amount in local currency and if dividends paid by a Russian company are exempt from tax in Australia. The 15% rate applies to other dividends.

The 0% rate applies if the following circumstances exist:
- The interest is derived and beneficially owned by the other contracting state, a political or administrative subdivision or a local authority thereof.
- The interest is derived and beneficially owned by the central bank or a similar institution specified and agreed to in an exchange of notes between the competent authorities of the contracting states.
- The interest is derived with respect to the deferral of payment under commercial credits.

The 10% rate applies to other interest payments.

The 5% rate applies to royalties paid for the right to use industrial, commercial or scientific equipment. The 10% rate applies to other royalties.

The 0% rate applies if the interest is paid on a long-term loan (seven or more years) issued by a bank or other credit institution or if the recipient of the interest is the government of the other contracting state, a political subdivision or a local authority.

The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

The 5% rate applies to dividends paid to corporations that hold at least 10% of the capital of the payer and that have invested in the payer at least US$100,000 or the equivalent amount in local currency. The 10% rate applies to other dividends.

The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer.

The 0% rate applies if any of the following circumstances exist:
- The beneficial owner is a contracting state, a political subdivision or the central bank of a contracting state.
- The interest is paid by any of the entities mentioned in the preceding bullet.
The interest arises in the Russian Federation and is paid with respect to a loan for a period of not less than three years that is granted, guaranteed or insured, or a credit for such period that is granted, guaranteed or insured, or Banco de México, S.N.C., Banco Nacional de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C. or Banco Nacional de Obras y Servicios Públicos, S.N.C., or interest is derived by any other institution, as may be agreed from time to time between the competent authorities of the contracting states.

The interest arises in Mexico and is paid with respect to a loan for a period of not less than three years that is granted, guaranteed or insured, or a credit for such period that is granted, guaranteed or insured, by The Bank for Foreign Trade (Vneshtorgbank) or The Bank for Foreign Economic Relations of the USSR (Vnesheconombank), or the interest is derived by any other institution, as may be agreed from time to time between the competent authorities of the contracting states.

(vv) The 10% rate applies if the beneficial owner of the dividends holds directly at least 20% of the capital of the payer of the dividends. The 15% rate applies to other dividends.

(ww) The 5% rate applies if the beneficial owner of the dividends is the government of the contracting state or if the beneficial owner of the dividends holds directly at least 15% of the capital of the payer of the dividends and has invested in the payer at least US$100,000. The 10% rate applies to other dividends.

(xx) The 10% rate applies if interest is received by an institution that has a license to carry on banking operations (Russian Federation) or a financial institution including an insurance company (Thailand).

(yy) The 10% rate applies if the beneficial owner of the dividends (except for a partnership) holds directly at least 10% of the capital of the payer of the dividends and if the participation exceeds US$100,000. The 15% rate applies to other dividends.

(zz) The 5% rate applies to interest on bank loans. The 10% rate applies to other interest.

(aaa) The 10% rate applies to fees for technical assistance. The 15% rate applies to royalties.

(bbb) The 5% rate applies if the beneficial owner of the dividends (except for a partnership) holds directly at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends.

(ccc) The 10% rate applies if the beneficial owner of the dividends holds directly at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends.

(ddd) The 0% rate applies if the recipient of the interest is the government of the other contracting state or the central bank. The 15% rate applies to other interest.

(eee) The 5% rate applies if the beneficial owner of the dividends holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies to other dividends.

(fff) The 5% rate applies to royalties paid for the right to use industrial, commercial or scientific equipment. The 10% rate applies to other royalties.

(ggg) The 5% rate applies if the beneficial owner of the dividends (except for a partnership) directly owns at least 25% of the capital of the payer and has invested more than US$75,000 in the capital of the payer. The 10% rate applies to other dividends.

The tax treaty with Laos passed all hearings in parliament, but the President rejected its ratification.

The Russian Federation has signed but not yet ratified tax treaties with Estonia, Ethiopia, Georgia, Malta, Mauritius and Oman.

The Russian Federation is negotiating tax treaties with Bahrain, Bangladesh, Madagascar, Nigeria, Taiwan and Tunisia.

(a) This tax is a final tax.
(b) This is a recoverable advance tax that applies to taxpayers without a tax clearance certificate issued by the Rwanda Revenue Authority.
(c) This is a recoverable advance tax that applies to suppliers of goods and services to public institutions.
(d) This applies only to construction projects.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax is payable by companies, cooperative societies, foreign companies or their branches, autonomous public enterprises, associations and any other business entities that engage in for-profit business activities. Resident entities are subject to corporate income tax on worldwide income. Nonresident entities are subject to corporate income tax on income derived through a permanent establishment. Nonresident entities without a permanent establishment in Rwanda are not subject to corporate income tax, but they may be subject to other taxes in Rwanda.
An entity is considered to be resident in Rwanda during a tax year if it satisfies any of the following conditions:

- It is a company or an association established according to Rwandan laws.
- It has its place of effective management in Rwanda at any time during the tax year.
- It is a Rwandan government company.

**Rates of corporate tax.** The corporate tax rate is 30%.

**Capital gains.** Rwanda introduced a separate tax on capital gains arising from the disposal of immovable commercial property in the last quarter of 2010. Gains derived from disposals of other business assets are aggregated with other income and are taxed at the normal corporate income tax rate. Gains from disposal of shares listed on the Rwanda Stock Exchange are exempt from tax.

**Administration.** A company’s year of assessment (tax year) is the calendar year. A company wishing to maintain a tax year other than the calendar year must obtain prior approval from the Minister of Finance.

Companies must make installment payments, which are each equal to 25% of the tax due for the preceding tax year. The payment dates are 30 June, 30 September and 31 December. The installment payments are subtracted from tax due at the end of the financial year. Any overpayment is generally treated as a prepayment of future income tax liabilities or other tax liabilities. However, a company may seek a refund of the overpayment by a written request to the Commissioner General of Rwanda Revenue Authority.

Companies must file a final tax return accompanied by proof of payment of tax provided by the tax administration within three months after the end of the tax year (31 March for calendar-year taxpayers). The company calculates the tax payable on the tax return form. The tax due equals the tax payable minus installments and recoverable withholding tax paid. Any tax due must be paid with the return.

**Dividends.** Dividends are subject to a final withholding tax at a rate of 15%.

**Foreign tax relief.** Relief for foreign taxes paid is granted in accordance with tax treaties with other countries. If foreign tax is paid to a country that does not have a tax treaty with Rwanda, the tax paid may be subtracted from tax payable in Rwanda, subject to certain restrictions.

**C. Determination of trading income**

**General.** Taxable income is accounting income adjusted for non-taxable income and for nondeductible expenses. Expenses are deductible if they are incurred wholly and exclusively in the production of income.

**Provisions.** General and specific provisions, which are reflected in the computation of financial accounting income, are generally not deductible for tax purposes. However, banks and financial institutions may deduct specific provisions for bad and doubtful debts in accordance with the prudential guidelines issued by Rwanda’s central bank.
**Tax depreciation.** Depreciation charged in the financial statements is deductible for tax purposes, subject to limits that are set forth in the tax law or are determined by the Minister of Finance from time to time. The following are the current allowable depreciation rates:

<table>
<thead>
<tr>
<th>Asset class</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings (excluding land) including built-in equipment and plant</td>
<td>5</td>
</tr>
<tr>
<td>Intangible assets</td>
<td>10</td>
</tr>
<tr>
<td>Computer equipment and accessories</td>
<td>50</td>
</tr>
<tr>
<td>All other business assets</td>
<td>25</td>
</tr>
</tbody>
</table>

**Groups of companies.** The income tax law does not allow the filing of consolidated returns, the combining of profits and losses of affiliated companies or the transfer of losses from loss companies to profitable members of the same group of companies.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax, on the supply of goods and services in Rwanda and on imports of goods and services</td>
<td>18%</td>
</tr>
<tr>
<td>Social security contributions; paid by Employer</td>
<td>5%</td>
</tr>
<tr>
<td>Employee</td>
<td>3%</td>
</tr>
<tr>
<td>Trade licenses; varies by nature and location of business; maximum amount</td>
<td>Frw 240,000</td>
</tr>
</tbody>
</table>

**E. Miscellaneous matters**

**Foreign-exchange controls.** The currency in Rwanda is the Rwandese franc (Frw). Rwanda does not impose foreign-exchange controls.

**Debt-to-equity rules.** Interest paid on related-party loans exceeding four times equity does not qualify as a deductible expense for companies other than commercial banks and insurance companies.

**F. Tax treaties**

Rwanda has entered into double tax treaties with Belgium, Mauritius and South Africa.

(a) For further details, see Section B.
B. Taxes on corporate income and gains

**Income tax.** Income tax is assessed on profits of the following:

- A resident capital company (only on profits attributable to shares owned by non-Saudi or non-Gulf Cooperation Council [GCC] shareholders; see below)
- A resident non-Saudi or non-GCC natural person who carries on a business in Saudi Arabia
- A nonresident company that carries on business in Saudi Arabia through a permanent establishment
- A person engaged in the field of natural gas investment
- A person engaged in the production of oil and hydrocarbon materials
- A nonresident that derives income subject to tax from sources in Saudi Arabia (tax is assessed through withholding tax)

Partners in personal companies (that is, general partnerships, unincorporated joint ventures and limited partnerships) are subject to tax rather than the personal companies themselves.

For income tax purposes, non-Saudis do not include citizens (nationals) of countries that are the members of the Gulf Cooperation Council (GCC). Members of the GCC are Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates. The share of profits attributable to interests owned by GCC nationals in a company is subject to zakat (see Section D). The share of profits attributable to interests owned by non-GCC nationals in that company is subject to income tax.

**Rates of tax.** Natural Gas Investment Tax (NGIT) applies to natural or legal persons (including GCC nationals and entities) engaged in natural gas, natural gas liquids and gas condensates investment activities in Saudi Arabia. NGIT does not apply to a company engaged in the production of oil and other hydrocarbons.

The NGIT rate ranges from 30% to 85% and is determined on the basis of the internal rate of return on cumulative annual cash flows. The NGIT rate includes income tax of 30%.

Companies engaged in the production of oil and other hydrocarbons are subject to tax at a rate of 85%.

Companies not subject to NGIT or the 85% tax are taxed at a rate of 20%.

The tax holidays that were available under the previous Foreign Capital Investment Regulations have been withdrawn. However, projects that were granted tax holidays under the previous regulations continue to benefit from the tax holidays for the approved period.

**Withholding tax.** A Saudi resident entity is required to withhold tax from payments made to nonresidents that do not have a legal registration or a permanent establishment in Saudi Arabia with respect to income earned from a source in Saudi Arabia. This rule applies regardless of whether the payer is considered to be a taxpayer under the regulations and whether such payments are treated as a tax-deductible expense in the Saudi resident entity’s tax
declaration. Nonresident GCC nationals and entities are also subject to withholding tax rather than the zakat withholding tax, which applied under the previous rules.

The following are the withholding tax rates.

<table>
<thead>
<tr>
<th>Type of payment</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rent, payments made for technical and consulting services, payments for air tickets, payments for freight or marine shipping, payments for international phone calls, dividends, interest, and insurance or reinsurance premiums</td>
<td>5</td>
</tr>
<tr>
<td>Royalties and payments made to head office or an affiliated company for services</td>
<td>15</td>
</tr>
<tr>
<td>Management fees</td>
<td>20</td>
</tr>
<tr>
<td>Payments for other services</td>
<td>15</td>
</tr>
</tbody>
</table>

The party withholding the tax must register with the Department of Zakat and Income Tax (DZIT) before the settlement of the first tax payment. The party withholding the tax must settle the tax withheld with the DZIT within the first 10 days of the month following the month in which the taxable payment is made and issue a certificate to the nonresident party. A delay fine of 1% for each 30 days of delay is computed beginning 30 days from the due date of tax until the date the tax is paid. An annual withholding tax return must be filed within 120 days following the end of the tax year.

**Capital gains.** In general, capital gains are treated as ordinary income and taxed at the regular corporate rates. Capital gains realized by nonresident shareholders on the disposal of shares in a Saudi Arabian company are subject to tax at a rate of 20%.

However, capital gains arising on the sale by non-Saudi shareholders of shares in a Saudi joint stock company traded on the Saudi stock exchange are exempt from tax if the shares (investments) were acquired after the effective date of the new tax regulations (30 July 2004).

Gains on the disposal of property other than assets used in a business activity are also exempt from tax.

**Administration.** All persons subject to tax (excluding nonresidents who derive income from a source in Saudi Arabia and are subject to final withholding tax) are required to register with the DZIT before the end of their first fiscal year. Failure to register with the DZIT results in the imposition of a fine ranging from SR 1,000 to SR 10,000.

A taxable entity that has a permanent establishment or commercial registration in Saudi Arabia must file its annual tax declaration with the DZIT based on its accounting books and records within 120 days following the end of the tax year and pay the income tax due with the tax declaration. However, the DZIT may and generally does request audited financial statements before issuing the final tax assessments.

The Saudi Arabian Income Tax Regulations require certification of annual tax declarations reporting taxable revenue in excess of SR 1 million. A locally licensed chartered accountant is required to certify the validity of the information contained in the taxpayer’s return and also certify the following:
The information contained in the declaration is taken from the taxpayer’s books and records (maintained in Arabic and in Saudi Arabia) and is in accordance with such records.

The return is prepared according to the standards, requirements and provisions of the Saudi Arabian Income Tax Regulations.

The partners of a personal company are subject to tax rather than the personal company itself. However, a personal company is required to file an information declaration within 60 days following the end of the tax year.

Fines for nonsubmission of tax declarations by the due date may be imposed at a rate of 1% of the total revenue, with a maximum fine of SR 20,000. A fine is also calculated based on percentages of the underpaid tax. Such a fine is payable if it exceeds the amount of the fine based on total revenue. The following are the percentages applied to underpaid tax:

- 5% of the underpaid tax if the delay is up to 30 days from the due date
- 10% of the underpaid tax if the delay is more than 30 and not more than 90 days from the due date
- 20% of the underpaid tax if the delay is more than 90 and not more than 365 days from the due date
- 25% of the underpaid tax if the delay is more than 365 days from the due date

An advance payment on account of tax for the year is payable in three installments. The installments are due by the end of the sixth, ninth and twelfth months of the tax year. Each installment of advance payment of tax is calculated in accordance with the following formula:

\[ 25\% \times (A - B) \]

For the purposes of the above calculation, A equals the taxpayer’s liability as per the tax declaration for the preceding year and B equals tax withheld at source for the taxpayer in the preceding year.

A taxpayer is not required to make advance tax payments in a year if the tax liability for the preceding year was less than SR 2 million.

A delay fine of 1% for each 30 days of delay is computed beginning 30 days from the due date of tax until the date the tax is paid.

Dividends. Dividends paid to nonresident shareholders are subject to withholding tax at a rate of 5% (see Withholding tax).

Foreign tax relief. Relief is not provided for foreign taxes paid (unless covered by a double tax treaty).

C. Determination of tax payable

Taxable profits. Tax liabilities are assessed by the DZIT on the basis of the audited financial statements, as adjusted for tax purposes. In certain cases (for example, foreign airlines and foreign freight and land and marine transport companies operating in Saudi Arabia), tax may be assessed under the “presumptive basis.” Under the presumptive basis, no financial statements are presented, and the tax liability is assessed on deemed profit calculated at rates specified in the tax regulations.
Nondeductible expenses. Certain expenses are not deductible in calculating taxable profit, including the following:

- Expenses not connected with the earning of income subject to tax
- Payments or benefits to a shareholder, a partner or their relatives if they constitute salaries, wages, bonuses or similar items or if they do not represent an arm’s length payment for property or services
- Entertainment expenses
- Expenses of a natural person for personal consumption
- Income tax paid in Saudi Arabia or another country
- Financial penalties and fines paid or payable to any party in Saudi Arabia except those paid for breach of contractual terms and obligations
- Payments of bribes and similar payments, which are considered criminal offenses under the laws of Saudi Arabia, even if paid abroad

Allocation of overhead and indirect expenses. A branch of a non-resident company cannot claim deductions for head office costs that are allocated to the branch on an estimated or allocation basis. However, certain certifiable direct costs incurred abroad are deductible.

Technical costs. For tax purposes, in general, technical costs are expenses that relate to engineering, chemical, geological or industrial work and research even if incurred wholly abroad by the main office or other offices. These costs are generally allowed as deductions if they can be substantiated by certain documents, such as technical services agreements, head office auditors’ certificates and invoices.

Under the tax regulations, payments for technical and consultancy services rendered by third parties (including foreign shareholders, regardless of whether they are enjoying a tax holiday) are subject to withholding tax at a rate of 5%, regardless of the place of performance of services (for details regarding withholding taxes, see Section B).

Agency fees. In a meeting on 30 July 2001, the Council of Ministers cancelled the law governing the relationship between a foreign contractor and a Saudi service agent. A foreign contractor may now operate in Saudi Arabia and contract with government agencies without appointing a Saudi service agent. In some cases, the DZIT has contested deductions for agency fees paid to Saudi agents with respect to contracts entered into with government bodies after 30 July 2001 on the basis that they are no longer a necessary cost of doing business in Saudi Arabia.

Contributions to foreign social insurance, pension and savings plans. Any charge with respect to payments for foreign social insurance, employee pension plans and savings plans, and contributions to Saudi social insurance with respect to an employee’s share are not deductible from Saudi-source revenue.

Provisions and reserves. Provisions for doubtful debts, termination benefits and other similar items are not deductible. Specific write-offs and actual employment termination benefit payments that comply with Saudi Arabian labor laws are deductible. Provisions for doubtful debts are allowed as deductible expenses
Interest deductibility. Deductions may be claimed for loan fees (interest expenses and commissions) incurred with respect to the earning of income subject to tax. However, the maximum deduction for loan fees is restricted to the lower of the following:

- Loan fees paid during the year
- Total of loan income plus 50% of tax-adjusted profits (excluding loan fees and loan income)

Loan fees exceeding this restriction are disallowed as a deduction and may not be carried forward to future years. Banks are excluded from the above limitation.

Saudi Arabian tax law does not contain any specific provisions on thin capitalization other than the limit on the interest deduction described above.

Depreciation. Depreciation is calculated for each group of fixed assets by applying the prescribed depreciation rate to the remaining value of each group at the fiscal year-end.

The remaining value for each group at the fiscal year-end is calculated as follows:

\[
\text{Remaining value for the group} = \text{Remaining value for the group at the end of the preceding fiscal year} \times X - \text{The depreciation charge for the preceding year} \times (X) + 50\% \text{ of the cost of assets added during the current year and the preceding year} \times X - 50\% \text{ of the proceeds from assets disposed of during the current year and the preceding year, provided that the balance is not negative} \times (X) = \text{Remaining value for the group} \times X
\]

The tax law provides the following depreciation rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Land (nondepreciable)</td>
<td>0</td>
</tr>
<tr>
<td>Fixed buildings</td>
<td>5</td>
</tr>
<tr>
<td>Industrial and agricultural movable buildings</td>
<td>10</td>
</tr>
<tr>
<td>Factories, plant, machinery, computer hardware and application programs (computer software) and equipment, including cars and cargo vehicles</td>
<td>25</td>
</tr>
<tr>
<td>Expenses for geological surveying, drilling, exploration expenses and other preliminary work to extract natural resources and develop their fields</td>
<td>20</td>
</tr>
<tr>
<td>All other tangible and intangible depreciable assets that are not included in the above groups, such as furniture, aircraft, ships, trains and goodwill</td>
<td>10</td>
</tr>
</tbody>
</table>

Assets acquired under build-operate-transfer (BOT) or build-operate-own-transfer (BOOT) contracts must be depreciated over the period of contract or the remaining period of contract.

Cost of repairs or improvements of fixed assets are deductible, but the deductible expense for each year may not exceed 4% of the remaining value of the related asset group at year-end. Excess
amounts must be added to the remaining value of the asset group and depreciated.

**Relief for losses.** Losses may be carried forward indefinitely. However, the maximum loss that can be offset against a year's profit is 25% of the tax-adjusted profits for that year. Saudi tax regulations do not provide for the carryback of losses.

If a change of 50% or more occurs in the underlying ownership or control of a capital company, no deduction is allowed for the non-Saudi share of the losses incurred before the change in the tax years following the change.

**D. Zakat**

_Zakat_ is a religious levy imposed on the shareholders in Saudi Arabian companies that are Saudi or GCC nationals. In practice, _zakat_ is calculated and paid by a Saudi Arabian resident capital company on behalf of its individual or corporate shareholders. _Zakat_ is levied on the _zakat_ base of a resident capital company at a rate of 2.5%. The _zakat_ base is broadly calculated as capital employed (for example, share capital and retained earnings) that is not invested in fixed assets, long-term investments and deferred costs, as adjusted by net results of operations for the year that is attributable to Saudi or GCC shareholders. Complex rules apply to the calculation of _zakat_ liabilities, and it is therefore suggested that _zakat_ payers seek specific advice suited to their circumstances.

**E. Miscellaneous matters**

**Foreign-exchange controls.** Saudi Arabia does not impose foreign-exchange controls.

**Supply and erection contracts.** Profits from “supply only” operations to Saudi Arabia are exempt from income tax (whether the contract is made inside or outside Saudi Arabia) because the supplier trades “with” but not “in” Saudi Arabia. The net profits of operations that include supply, erection or maintenance are subject to tax, and the contractors are required to register with the DZIT and submit a tax declaration in accordance with the tax regulations.

The following information must generally be submitted in support of the cost of imported materials and equipment:

- Invoices from the foreign supplier
- Customs clearance document
- If the supplying entity is the head office of the Saudi Arabian branch, a certificate from the external auditor of the head office confirming that the cost claimed is equal to the international market value of the equipment supplied (usually the contracted selling price)

In general, no profit results in the Saudi Arabian books on materials and equipment supplied, because the revenue from the sale of equipment equals the cost based on the sales value declared for customs.

**Subcontractors.** Payments to subcontractors, reported by a taxpayer in its tax return, are subject to close scrutiny by the DZIT. The taxpayer is expected to withhold tax due on payments to nonresident subcontractors and to deposit it with the DZIT, unless the taxpayer can provide a tax file number or tax clearance
certificate as evidence that such subcontractor is settling its tax liability.

Tax is not required to be withheld from payments to subcontractors resident in Saudi Arabia. However, government procurement regulations provide for the retention of 10% of the contract value until the completion of the statutory formalities including the submission of the certificate from the DZIT.

Imports from head office and affiliates. A Saudi mixed company is expected to deal on an arm’s length basis with its foreign shareholders or any company affiliated with its foreign shareholders. The company may be required to submit to the DZIT a certificate from the seller’s auditors confirming that the materials and goods supplied to the Saudi Arabian company were sold at the international market price prevailing at the date of dispatch. This requirement also applies to foreign branches importing materials and goods from the head office for the fulfillment of their Saudi contracts.

F. Tax treaties

Saudi Arabia has entered into double tax treaties with Austria, Bangladesh, Belarus, China, France, Greece, India, Italy, Japan, Korea (South), Malaysia, the Netherlands, Pakistan, the Russian Federation, Singapore, South Africa, Spain, Syria, Tunisia, Turkey, the United Kingdom, Uzbekistan and Vietnam. These tax treaties are in effect.

It has also signed double tax treaties with Cuba, Ireland, Kazakhstan, Malta, Poland and Romania. These tax treaties are expected to enter into force in the future.

Saudi Arabia has also entered into limited tax treaties with the United Kingdom, the United States and certain other countries for the reciprocal exemption from tax on income derived from the international operation of aircraft and ships.

The Ministry of Finance has announced its prescribed method for the availing of tax treaty benefits such as reduced withholding tax rates or exemptions with respect to payments to residents in a country with which Saudi Arabia has entered into a double tax treaty. Circular 3328/19 requires that tax is withheld on all payments to nonresidents at the rates required under domestic tax law (without recourse to the double tax treaty). To benefit from a reduced withholding tax rate or exemption, the Saudi Arabian resident taxpayer (that is, the withholder) must submit a request for refund of “overpaid” tax to the DZIT together with supporting materials (for example, the tax residency certificate of the nonresident). The date on which the revised procedures begin to apply is not clear.

The table below shows the maximum withholding rates for dividends, interest and royalties provided under Saudi Arabia’s double tax treaties that were available at the date of writing. To benefit from the advantageous rates under the double tax treaties, additional conditions may be required (for example, the recipient is required to be the beneficial owner of the related gain). Readers should obtain detailed information regarding the treaties before engaging in transactions.

(a) A 0% rate generally applies to payments to Austrian government bodies.
(b) These rates do not apply if the income is effectively attached to activities carried on by the recipient in Saudi Arabia.
(c) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The higher rate applies to other royalties.
(d) The 0% rate applies if the Spanish company receiving the dividends owns at least 25% of the share interests in the Saudi Arabian company.

(a) The minimum tax is XOF 500,000 (XOF 750,000 if annual turnover exceeds XOF 250 million a year and XOF 1 million if annual turnover exceeds XOF 500 million a year).
(b) In certain circumstances the tax is deferred or reduced (see Section B).
(c) See Section B for special rules applicable to certain dividends, and see Section C for a list of nondeductible expenses.
(d) The 6% rate applies to interest on long-term bonds. The 8% rate applies to bank interest. The 20% rate applies to interest on deposit receipts. The 16% rate applies to other interest payments.
(e) This tax is imposed on technical assistance fees and certain other payments to nonresident companies and nonresident individuals that do not carry on a trade or business in Senegal. The rate is 15% for payments to French individuals or corporations.
(f) This rate may be modified by a tax treaty. See Section B.

B. Taxes on corporate income and gains

Corporate income tax. Senegalese companies are taxed on the territoriality principle. As a result, companies carrying on a trade or business outside Senegal are not taxed in Senegal on the related profits. Foreign companies with activities in Senegal are subject to Senegalese corporate tax on Senegalese-source profits only.

Tax rates. The corporate income tax rate is 25%, and the minimum tax (impôt minimum forfaitaire, or IMF) payable is XOF 500,000 (XOF 750,000 if annual turnover exceeds XOF 250 million a year and XOF 1 million if annual turnover exceeds XOF 500 million).
The profits realized in Senegal by branches of foreign companies that have not been reinvested in Senegal are deemed to be distributed and are therefore subject to a 10% withholding tax. This system is subject to treaty modification.

Corporations may apply for various categories of priority status and corresponding tax exemptions. The priority status varies depending on the nature of the project and the level of investments (including free industrial zone facilities).

**Capital gains.** Capital gains are generally taxed at the regular corporate rate. The tax, however, can be deferred if the proceeds are used to acquire new fixed assets in Senegal within three years or in the event of a merger (or other corporate acquisition).

If the business is totally or partially transferred or discontinued, only one-half of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business, and only one-third of the gain is taxed if the event occurs five years or more after the business was begun or purchased.

Capital gains on sales or transfers of land and buildings are also subject to land tax (see Section D).

**Administration.** The tax year is the calendar year. Companies must file their tax returns by 30 April of the year following the tax year.

Corporate tax must be paid in two installments (each equal to one-third of the previous year’s tax) by 15 February and 30 April. The 15 February installment may not be less than XOF 500,000 (XOF 750,000 or XOF 1 million, if applicable). The balance must be paid by 15 June.

Late payments are subject to interest at a rate of 4% of the tax due.

**Dividends.** Dividends paid are subject to a 10% withholding tax.

A parent corporation may exclude the net dividends received from a subsidiary if all of the following apply:

- The parent corporation and the subsidiary are either joint stock companies or limited liability companies.
- The parent corporation has its registered office in Senegal and is subject to corporate income tax.
- The parent corporation holds at least 20% of the shares of the subsidiary.
- The shares of the subsidiary are subscribed to or allocated when the subsidiary is created, and they are registered in the name of the parent company, or, alternatively, the parent company commits to holding the shares for two consecutive years in registered form.

Dividends distributed by a Senegalese parent company that consist of dividends received from a Senegalese subsidiary that is at least 20% owned are not subject to dividend withholding tax on the second distribution.

**Foreign tax relief.** In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from Senegalese tax under the territoriality principle is taxable net of the foreign tax. However, the tax treaty with France provides a tax credit for French tax paid on dividends.
C. Determination of trading income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the Accounting Plan of the Organization for the Harmonisation of Business Law in Africa (Organisation pour l’Harmonisation en Afrique du Droit des Affaires, or OHADA).

Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Foreign head-office overhead, limited to 20% of Senegalese taxable profits before deduction of foreign head-office overhead (unless otherwise provided for by tax treaties)
- The amount of interest paid to shareholders in excess of two percentage points above a standard annual rate set by the central bank and the amount of interest on loans in excess of the capital stock amount
- Certain specific charges over specified limits
- Taxes, penalties, gifts and most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director)

Inventories. Inventory is normally valued at the lower of cost or market value.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or for expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Capital allowances. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated. The straight-line method is generally allowed. The following are some of the applicable straight-line rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial and industrial buildings</td>
<td>3 to 5</td>
</tr>
<tr>
<td>Office equipment</td>
<td>10 to 15</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>20 to 25</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10 to 20</td>
</tr>
</tbody>
</table>

In certain circumstances, plant and machinery as well as other assets may be depreciated using the declining-balance method or an accelerated method.

Relief for tax losses. Losses may be carried forward three years; losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. There is no fiscal integration system equivalent to a consolidated filing position in Senegal.

D. Other significant taxes

The following table summarizes other significant taxes.
Nature of tax

Internal turnover tax, a value-added tax, on goods sold and services rendered .............................................. 18
Business activity tax (patente), based on the business rental value of tangible assets and equipment and the number of employees ................................................................. Various
Registration duties, on transfers of real property or businesses ................................................................. 1 to 15

paid by
Employer ...................................................................................................................................................... 3.6
Employee ...................................................................................................................................................... 2.4

E. Foreign-exchange controls

Exchange control regulations exist in Senegal for financial transfers outside the West African Economic and Monetary Union (Union Economique et Monétaire Ouest Africaine, or UEMOA).

F. Treaty withholding tax rates

Senegal has signed a multilateral tax treaty with the other members of the UEMOA, which are Benin, Bissau Guinea, Burkina Faso, Côte d’Ivoire, Mali, Niger, Senegal and Togo. The principal provisions of this tax treaty are effective from 1 January 2010. Senegal has entered into bilateral tax treaties with Belgium, Canada, France, Italy, Mauritania, Morocco, Norway, Qatar and Tunisia.

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

(a) The 20% rate applies to interest on deposit receipts. The 16% rate applies to other interest payments.
(b) For details, see footnote (d) to Section A.

Senegal has signed tax treaties with China, Lebanon and Taiwan, but these treaties have not yet been ratified.
The Union of Serbia and Montenegro ceased to exist on 25 May 2006. The following chapter provides information on taxation in the Republic of Serbia only.

(a) This tax applies to nonresident companies. Under the Personal Income Tax Law, dividends and interest paid to resident and nonresident individuals are taxed at a rate of 10%.

(b) This tax applies to nonresident companies. Under the Personal Income Tax Law, royalties paid to resident and nonresident individuals are taxed at a rate of 20%.

(c) This tax applies to nonresident companies. Under the Personal Income Tax Law, individuals are taxed at a rate of 20% on rent fees and at a rate of 10% on capital gains.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in the Republic of Serbia (RS) are subject to tax on their worldwide income. A
company is resident in the RS if it is incorporated in the RS or if its central management and control is actually exercised in the RS. Nonresident companies are subject to tax only on their income derived from the RS. Nonresident companies are companies registered in other countries that have a permanent place of business in the RS. Foreign representative offices may not derive profits from their activities in the RS. However, if they do derive such profits, the profits are subject to tax in the RS.

Rate of corporate income tax. The rate of corporate income tax in the RS is 10%.

Tax incentives. A company investing in fixed assets (except for passenger cars, furniture, works of art and decorative goods for furnishing the company premises, mobile phones, surveillance equipment and assets previously used in the country) within the scope of its registered business may decrease its calculated tax by an amount equal to 20% of these investments, but the tax credit may not exceed 33% of the calculated tax for the year of the investment. For small enterprises, the percentage of the tax credit is increased to 40%, but the tax credit may not exceed 70% of the calculated tax. The amount of the tax reduction that is not allowed as a result of this limitation may be carried forward and used as a tax credit, subject to the limitation, in the following 10 years.

A company qualifies for a 10-year tax exemption if it invests RSD 1 billion (approximately €9 million) in its own fixed assets and if it employs at least 200 new workers in the period of investment.

Under the Personal Income Tax Law, companies may be exempted from paying salary tax and employer social security contributions for a period of two to three years for the following newly employed individuals:
- Registered unemployed individuals who are under age 30
- Disabled individuals
- Individuals over age 45

Capital gains. Capital gains derived from the disposal of the following are included in taxable income and are subject to tax at the regular corporate income tax rate:
- Real estate that the taxpayer used as a fixed asset in its business activities
- Industrial property rights that are used by the taxpayer in its business activities
- Capital participations and shares and other securities that are, according to International Financial Reporting Standards (IFRS) and International Accounting Standards (IAS), long-term financial investments (except certain bonds issued by government bodies or by the national bank)

Capital gains may be offset by capital losses incurred in the same year, and net capital losses may be carried forward to offset capital gains in the following five years. In addition, capital gains realized in Serbia by nonresidents are subject to the tax on capital gains at a rate of 20%.

Administration. The tax year is the calendar year. Exceptionally, at the taxpayer’s request, the tax period may be set within any 12 months, subject to the tax authorities’ approval.
Companies must file annual tax returns within 180 days after the expiration of the period for which the tax liability is determined (usually by 30 June of the year following the tax year), except in cases of statutory changes, liquidation and bankruptcy, when companies must file returns by the 15th day after the date prescribed for submission of financial statements.

Companies must make monthly advance payments of tax by the 15th day of the month following the month for which the payment is due. Companies determine advance payments based on their tax return for the preceding year. Under a self-assessment system, companies must correctly assess their tax liabilities to avoid the imposition of significant penalties.

Companies may submit an interim tax return during the tax year to increase or decrease their monthly advance payments of tax if significantly changed circumstances exist, such as changes to the company’s activities or to the tax rules.

At the time of submission of the annual tax return, companies must pay any positive difference between the tax liability calculated by the company and the total of the advance payments. They may receive a refund of any overpayment, or the overpayment may be treated as a prepayment of future monthly payments.

Dividends. Resident companies include dividends received from its nonresident affiliates in taxable income.

Corporate and dividend taxes paid abroad may be claimed as a tax credit up to the amount of domestic tax payable on the dividends. Any unused amount can be carried forward for offset against corporate profit tax in the following five years. This tax credit applies only to dividends received by companies with a shareholding of 25% or more in the payer for at least one year before the tax return is submitted.

A 20% withholding tax is imposed on dividends paid to non-residents.

An applicable double tax treaty may provide a reduced withholding tax rate for dividends (see Section F). To benefit from a double tax treaty, a nonresident must verify its tax residency status and prove that it is the true beneficiary of the income.

Foreign tax relief. Companies resident in the RS that perform business activities through permanent establishments outside the RS may claim a tax credit for corporate income tax paid in other jurisdictions, as well as a tax credit for tax on interest income or royalty income withheld and paid in other jurisdictions by their overseas subsidiaries. The credit is equal to the lower of the foreign tax and the Serbian tax paid on the foreign-source income.

C. Determination of trading income

General. The assessment is based on the profit or loss shown in the financial statements prepared in accordance with International Accounting Standards and domestic accounting regulations, subject to certain adjustments for tax purposes.

Taxable income is the positive difference between income and expenses. For tax purposes, income consists of income from the following:
Sales of products, goods and services
Financial income
Capital gains
Income resulting from transfer-pricing adjustments

Tax-deductible expenses include expenses incurred in performing business activities. Expenses must be documented. Certain expenses, such as depreciation (see Tax depreciation) and donations, are deductible up to specified limits. Reductions in value of assets may not be deducted unless the assets were damaged due to force majeure.

Inventories. Inventories must be valued using average prices or the first-in, first-out (FIFO) method.

Provisions. Legal entities may deduct as expenses adjustments or write-offs of particular claims if such actions are in conformity with the law on accounting. This conformity exists if the following conditions are satisfied:
- It can be proved that the amounts were included previously in a taxpayer’s revenues.
- The claim is written off from the taxpayer’s accounting books as uncollectible.
- It can be proved that the taxpayer has sued the debtor or claimed the debt in the liquidation or bankruptcy of the debtor, or that the taxpayer conducted an extrajudicial procedure of settlements of claims secured by a mortgage, according to the mortgage regulations.

If a debt is payable by a legal entity to the person who owed the debt that was adjusted or written off, the legal entity is subject to tax on the debt owed to it. In addition, legal entities may not deduct provisions made for long-term capital maintenance of fixed assets. However, long-term provisions made for renewal of natural resources, possible costs payable in a guarantee period and retained indemnitities or deposits can be deducted. Adjustments can be made for claims if at least 60 days have elapsed since the due date for the payment of the claims. Banks may deduct the net increase in the amount of the general bad debt provision during the tax year, in conformity with the regulations of the National Bank.

Severance payments that are calculated are deductible for tax purposes only in the period in which they are actually paid.

Tax depreciation. Intangible and fixed assets are divided into five groups, with depreciation and amortization rates prescribed for each group. The straight-line method must be used for the first group, while the declining-balance method must be used for the assets in the other groups.

The following are the depreciation and amortization rates.

<table>
<thead>
<tr>
<th>Group of assets</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>2.5</td>
</tr>
<tr>
<td>II</td>
<td>10</td>
</tr>
<tr>
<td>III</td>
<td>15</td>
</tr>
<tr>
<td>IV</td>
<td>20</td>
</tr>
<tr>
<td>V</td>
<td>30</td>
</tr>
</tbody>
</table>

A ruling classifies assets into the above groups. Group I includes real estate.
In addition, if the assets are purchased from a related entity, their depreciation base is the smaller of the following two amounts:
- Purchase price for the transfer of the fixed assets
- Acquisition price of fixed assets determined by applying the arm’s length principle

**Relief for losses.** Tax losses incurred in business operations may be carried forward for five years. Loss carrybacks are not allowed.

**Groups of companies.** Under group relief provisions, companies in a group that consists only of companies resident in the RS may offset profits and losses for tax purposes. The group relief provisions are available if a parent company holds directly or indirectly at least 75% of the shares of subsidiaries. To obtain group relief, a group must file a request with the tax authorities. If group relief is allowed, the group companies must apply the group relief rules for five years. Each group company files its own annual income tax return and the parent company files a consolidated tax return based on the subsidiaries’ tax returns. Any tax liability after consolidation is paid by the group companies with taxable profits on a proportional basis.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>

E. Miscellaneous matters

Foreign-exchange controls. In the RS, the local currency is the dinar (RSD).

In the RS, all payments, collections and transfers must generally be effected in dinars, but a “currency clause” may allow conversion from hard currency on the date of payment. In addition, the following transactions may be effected using foreign currencies:

- Sale and rental of flats, office space and other real estate
- Debt servicing of foreign-currency loans in the RS
- Collection of premiums and transfers based on life insurance contracts
- Purchase and sale of national securities denominated in foreign currency
- Payments into the guarantee fund of a member of a center for the registration, deposit and clearance of securities
- Donations for charitable, cultural and scientific purposes in accordance with the donation legislation
- Bank guarantees, provided that the guarantee is a condition for the execution of a transaction that may be paid in Serbia in foreign currency
- Allowances for business trips abroad
- Salary payments to employees employed at diplomatic and consular missions, United Nations organizations and international financial institutions in Serbia
- Certain other payments defined by applicable specific legislation such as legislation dealing with the stock exchange and trading in securities

Residents and nonresidents may open foreign-currency accounts in RS banks or in foreign banks authorized to operate in the RS. Foreign currency may be held in such accounts and used for payments out of the RS, such as dividends and payments for purchases of imports, as well as for authorized foreign-currency payments in the RS.

Transfer pricing. Under general principles, transactions between related parties must be made on an arm’s-length basis. The difference between the price determined by the arm’s-length principle and the taxpayer’s transfer price is included in the tax base.
Thin-capitalization rules. Tax deductions for loan interest and related expenses payable to related entities are limited to the amount payable with respect to intercompany debt equal to four times the value of the taxpayer's own capital.

F. Treaty withholding tax rates

The following table lists the withholding tax rates under the treaties of the former Union of Serbia and Montenegro and under the treaties of the former Federal Republic of Yugoslavia and the former Yugoslavia that remain in force. It is suggested that taxpayers check with the tax authorities before relying on a particular tax treaty.

B. Taxes on corporate income and gains

Corporate income tax. Under the Business Tax Act, resident and nonresident corporate and noncorporate businesses are subject to business tax on their income derived from the Seychelles.

A company is a resident of the Seychelles if it is incorporated there. In addition, a company not incorporated in the Seychelles that carries on business in the Seychelles is a resident if its central management and control are located in the Seychelles or if its voting power is controlled by shareholders who are residents of the Seychelles.

Rates of corporate income tax. Corporations and trustees are subject to business tax at a rate of 25% on the first SR 1 million of taxable income and at a rate of 33% on the balance.

The Tourism Investment Act 2003 offers various tax incentives to encourage investment in the Seychelles. These incentives include reduced rates of business tax, tax credits, special deductions and accelerated depreciation.

Capital gains. Capital gains are not taxable in the Seychelles.
**Administration.** The tax year is the calendar year.

Annual tax returns are due on 31 March.

The tax shown on the annual tax return is payable on submission of the return.

Companies must make monthly provisional tax payments during the tax year, based on the income for the preceding year. The payments are due by the 15th day of the month following the month for which a payment is due. At the beginning of each tax year, the Revenue Commissioner issues a provisional tax assessment, which sets out the required provisional payments.

**Dividends.** Withholding tax is not imposed on dividends paid to resident persons. Dividends paid to nonresidents are subject to withholding tax at a rate of 15%. Dividends received from non-resident companies are not taxable.

**Foreign tax relief.** Seychelles does not grant relief for foreign taxes paid.

**C. Determination of trading income**

**General.** Taxable income is the income reported in companies’ financial statements, subject to adjustments required by the tax law.

Expenses incurred to earn taxable income are deductible, unless they do not pertain to the business of the taxpayer.

**Inventories.** For tax purposes, inventory may be valued at the lower of cost or market value, or at replacement cost.

**Provisions.** Provisions are not deductible for tax purposes.

**Tax depreciation.** Under the Business Tax Act, hotels are depreciated at a rate of 20% for the first year and 10% for the following eight years. Other buildings are depreciated at a straight-line rate of 4%. For other assets, normal depreciation is calculated using the following straight-line rates.

<table>
<thead>

<td>20%</td>
</tr>
<tr>
<td>Vehicles</td>
<td>20%</td>
</tr>
<tr>
<td>Computers</td>
<td>35%, and 33% thereafter</td>
</tr>
</tbody>
</table>

Capital expenditure of up to SR 10,000 on the assets described above is fully deductible in the year of expenditure.

**Relief for losses.** Business tax losses may be carried forward for five years for relief against future income of the same trade. Tax losses may not be carried back.

**Groups of companies.** Consolidated returns are not allowed. Each company must submit its own tax return.

**D. Other significant taxes**

The following table summarizes other significant taxes.
Nature of tax  
| Goods and services tax | Rate (%)  
|------------------------|-----------  
| Locally manufactured goods listed in Schedules 1 and 2 of the regulations | 12  
| Imported goods; imposed in addition to customs duty | 15  
| Local service providers listed in Schedule 3 of the regulations and tourism-related service providers listed in Schedule 4 of the regulations | 12 to 15  
| Contributions to Seychelles Pension Fund, on monthly salaries and allowances paid to employees; paid by Employer | 1.5  
| Employee | 1.5  
| Trades Tax (customs duty), on imported goods | Various  

E. Miscellaneous matters

Foreign-exchange controls. The Seychelles currency is the Seychelles rupee (SR).

Seychelles does not impose exchange controls. However, under the Foreign Exchange Act, a person, other than an authorized dealer, may not as a business buy foreign currency from or sell foreign currency to any person other than an authorized dealer.

Payments to, receipts from and transfers to and from a person outside Seychelles with respect to international transactions must be made through authorized dealers.

Debt-to-equity rules. Seychelles does not impose any thin-capitalization rules.

Transfer pricing. Seychelles does not have transfer-pricing regulations. However, the Business Tax Act requires transactions between related parties to be conducted using internationally approved transfer-pricing guidelines.

(a) Various tax exemptions and reductions are available (see Section B).
(b) See Section F.
(c) See Section B.
(d) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Income tax is imposed on all income derived from sources in Singapore, and on income from sources outside Singapore if received in Singapore. However, a nonresident company that is not operating in or from Singapore is generally not taxed on foreign-source income received in Singapore. A company is resident in Singapore if the control and management of its business is exercised in Singapore; the place of incorporation is not relevant.

Remittances of foreign income in the form of dividends, branch profits and services income (specified foreign income) into Singapore by companies resident in Singapore are exempt from tax if prescribed conditions are met. For remittances of specified foreign income that does not meet the prescribed conditions, companies may be granted tax exemption under specific scenarios or circumstances on an approval basis.

Rates of corporate income tax. The standard corporate income tax rate is 17%. Seventy-five percent of the first S$10,000 of normal chargeable income is exempt from tax, and 50% of the next S$290,000 is exempt from tax. The balance of chargeable income is fully taxable at the standard rate of 17%.

Tax incentives, exemptions and reductions. The following tax incentives, exemptions and tax reductions are available in Singapore.
Pioneer companies and pioneer service companies. The incentive for pioneer companies and pioneer service companies is aimed at encouraging companies to undertake activities that have the effect of promoting economic or technological development in Singapore. A pioneer enterprise is exempt from income tax on its qualifying profits for a period of up to 15 years.

Development and Expansion Incentive. The Development and Expansion Incentive (DEI) is available to companies that engage in high value-added operations in Singapore but do not qualify for pioneer incentive status and to companies whose pioneer incentive status has expired. DEI companies enjoy a concessory tax rate of not less than 5% on their incremental income derived from the performance of qualifying activities. The maximum initial relief period is 10 years, with possible extensions not exceeding 5 years at a time, subject to a maximum total incentive period of 20 years. However, if the DEI company engages in one or more qualifying activities, and oversees, manages or controls the conduct of any activity on a regional or global basis, its total incentive period may on approval be extended beyond 20 years, with possible extensions not exceeding 10 years at a time, subject to a maximum incentive period of 40 years.

Investment allowances. On approval, investment allowances are available to companies that engage in qualifying projects. Such allowances are granted in addition to the normal tax depreciation allowances, and are based on a specified percentage (up to 100%) of expenditure incurred on productive equipment.

Approved royalties, technical assistance fees, and contributions to research and development costs. Approved royalties, technical assistance fees, and contributions to research and development (R&D) costs paid to nonresidents may be exempted from withholding tax.

All the above incentives are also available under the Headquarters Programme (see Headquarters Programme).

Tax exemption scheme for new companies. Subject to certain conditions, a newly incorporated and tax-resident Singapore company or a Singapore company limited by guarantee may qualify for a full tax exemption on the first S$100,000 of chargeable income and 50% tax exemption on the next S$200,000 of chargeable income. The exemption applies only to the qualifying company’s first three consecutive tax years.

Payments for software, information and digitized goods. Subject to certain conditions, exemption from withholding tax applies to the following payments to nonresidents during the period from 28 February 2003 to 27 February 2013:

- Payments for shrink-wrap software, site licenses, software downloaded from the Internet by end-users and software bundled with computer hardware
- Payments made by end-users for the purchase of information and digitized goods

Payments for use of submarine cable capacity. Payments for the use of capacity on (including the Indefeasible Right of Use, or IRU) an international telecommunication submarine cable operated by nonresidents are exempt from withholding tax during the
period from 28 February 2003 to 27 February 2013, subject to certain conditions.

Productivity and Innovation Credit. Businesses that incur qualifying expenditure on the following six activities qualify for an enhanced deduction or allowance, known as a Productivity and Innovation Credit (PIC), from the 2011 tax year to the 2015 tax year:

- R&D
- Eligible design activities
- Acquisition of intellectual property rights
- Registration of patents, trademarks, designs and plant varieties
- Acquisition or leasing of PIC automation equipment
- External training and qualifying in-house training

All businesses can claim a deduction or allowance of 400% of the first S$400,000 of their expenditures per tax year on each of the above activities from their taxable income, subject to the following caps:

- For the 2011 and 2012 tax years: a combined cap of S$800,000 of eligible expenditure for each activity
- For the 2013 to the 2015 tax years: a combined cap of S$1,200,000 of eligible expenditure for each activity

Qualifying persons with at least three local employees have the option to convert up to S$100,000 of eligible expenditure for each tax year into a nontaxable cash grant. The conversion rate is 60% for the 2013 to 2015 tax years (30% for the 2011 and 2012 tax years).

R&D incentives. Liberalized R&D deductions are available from the 2009 tax year through the 2015 tax year. A tax deduction can be claimed for undertaking R&D in any area (that is, the R&D is no longer required to be related to the trade or business carried on by the company), and an additional 50% tax deduction is allowed for certain qualifying R&D expenditure. If the companies outsource their R&D activities to an R&D organization in Singapore, the tax deduction available is at least 130% of the amount of R&D expenses incurred. Businesses that incur qualifying R&D expenditure may qualify under the PIC scheme (see Productivity and Innovation Credit above).

Tax certainty on gains on disposal of equity investments. To provide upfront tax certainty, and with certain exceptions, gains derived from the disposal of ordinary shares by companies during the period of 1 June 2012 through 31 May 2017 are not taxed if the qualifying divesting company had legally and beneficially owned at least 20% of the ordinary shares in the investee company for a continuous period of at least 24 months before the disposal of the shares.

Headquarters Programme. The Headquarters Programme consists of an International Headquarters (IHQ) Award and a Regional Headquarters (RHQ) Award. The Headquarters Programme applies to entities incorporated or registered in Singapore that provide headquarters services to their network companies on a regional or global basis. Under the IHQ and RHQ Awards, companies may enjoy incentive rates of 0% to 15% for a specified period on qualifying income, depending on the amount of commitment
to Singapore. This commitment is demonstrated by various factors, including headcount, business spending and quality of people hired.

Finance and treasury center incentive. The finance and treasury center (FTC) incentive is aimed at encouraging companies to use Singapore as a base for conducting treasury management activities for related companies in the region. Income derived from the provision of qualifying services to approved network companies and from the carrying on of qualifying activities on its own account is subject to tax at a rate of 10% or other concessionary rate for a period of up to 10 years, with possible extensions of up to 10 years at a time. Approved network companies are offices and associated companies of the company granted the tax incentive that have been approved by the relevant authority for purposes of the incentive.

A sunset clause of 31 March 2016 has been introduced for the FTC scheme.

Financial sector incentive. The financial sector incentive (FSI) is designed to encourage the development of high-growth and high value-added financial activities in Singapore. A 5% or 12% concessionary tax rate applies to income derived from carrying on qualifying activities by approved FSI companies in Singapore.

Shipping incentives. All existing tax incentives for the maritime sector have been streamlined and consolidated under the new Maritime Sector Incentive (MSI), effective from 1 June 2011. Ship operators, maritime lessors and providers of certain supporting shipping services may enjoy tax incentives under the MSI, which consists of the following three broad categories:
- International shipping enterprise
- Maritime (ship or container) leasing
- Supporting shipping services

The tax benefits include tax exemptions or concessionary tax rates of 5% and 10%.

Shipping companies that either own or operate a fleet of vessels can apply for the MSI-Approved International Shipping Enterprise (MSI-AIS) award. Successful applicants are granted either MSI-AIS status or the MSI-AIS (Entry Player) [MSI-AIS (Entry)] status, depending on the company’s scale of operations. Under this scheme, income derived from the operation of Singapore-flagged and non-Singapore flagged vessels plying in international waters and other qualifying income are exempt from tax. An MSI-AIS award may be granted for a renewable period of 10 years (extendible up to 30 years), while MSI-AIS (Entry) status may be granted for a nonrenewable period of 5 years, with the option of graduating to the MSI-AIS status if qualifying conditions are met. Applications for MSI-AIS (Entry) can be made from 1 June 2011 to 31 May 2016.

Under the MSI-Maritime Leasing (Ship) award, approved shipping investment enterprises (Singapore-incorporated ship leasing companies, shipping funds, business trusts or partnerships) may enjoy tax exemption on their qualifying income, which includes income from the chartering or finance leasing of seagoing ships to qualifying persons for use outside the port limits of Singapore.
Approved shipping investment managers may also enjoy a 10% concessionary tax rate on income derived from the management of an approved shipping investment enterprise, and prescribed services and activities. Applications can be made from 1 June 2011 to 31 May 2016, and successful applicants are granted the status for a period of five years.

Under the MSI-Maritime Leasing (Container) award, approved container investment enterprises (Singapore-incorporated companies, business trusts or partnerships) may enjoy a concessionary tax rate of 5% or 10% on their qualifying income, which includes income from the operating or finance leasing of sea containers that are used for the international transportation of goods. Approved container investment managers may also enjoy a 10% concessionary tax rate on income derived from the management of an approved container investment enterprise and prescribed services and activities. Applications can be made from 1 June 2011 to 31 May 2016, and successful applicants are granted the status for a period of 5 years.

The MSI-Supporting Shipping Services (MSI-SSS) award aims to promote the growth of ancillary shipping service providers and encourage shipping conglomerates to set up their corporate services functions in Singapore. An approved MSI-SSS company enjoys a 10% concessionary tax rate on incremental income derived from the provision of approved supporting shipping services, such as ship broking, forward freight agreement trading, ship management, ship agency, freight forwarding and logistics services. Applications can be made from 1 June 2011 to 31 May 2016, and successful applicants are granted the MSI-SSS award for a period of five years.

Global Trader Programme. The Global Trader Programme (GTP) is aimed at encouraging international companies to establish and manage regional or global trading activities with Singapore as their base. Under the GTP, approved companies enjoy a concessionary tax rate of 5% or 10% on qualifying transactions conducted in qualifying commodities and products (including energy, agricultural, building, industrial, electrical and consumer products, and carbon credits), qualifying transactions in derivative instruments and qualifying structured commodity financing activities. In addition, the 5% concessionary tax rate applies to income derived from qualifying transactions in liquefied natural gas, as specified by the relevant authority. A sunset clause of 31 March 2021 has been introduced for the GTP scheme.

Approved cyber trader incentive. The approved cyber trader incentive aims to develop Singapore into a regional electronic commerce hub. Approved companies in Singapore are taxed at a rate of 10% or other concessionary rate on their incremental income derived from qualifying electronic commerce transactions. The incentive is granted for a period of up to five years.

Venture capital funds incentive. The venture capital funds incentive aims to encourage a thriving venture capital industry in Singapore. Gains derived from the disposal of approved investments, interest from approved convertible loan stocks and dividends derived from approved overseas investments are exempt from tax or taxed at a concessionary rate of not more than 10% for a period of up to 10 years. Extension periods of up to five years
each may be available, but the maximum total incentive period is 15 years.

**Capital gains.** Capital gains are not taxed in Singapore. However, in certain circumstances, the Singapore Revenue considers transactions involving the acquisition and disposal of real estate, stocks or shares to be the carrying on of a trade, and, as a result, gains arising from such transactions are taxable. The determination of whether such gains are taxable is based on a consideration of the facts and circumstances of each case.

**Administration.** The tax year, known as a year of assessment, runs from 1 January to 31 December. The period for which profits are identified for assessment is called the basis year. Therefore, income earned during the 2012 basis year is assessed to tax in the 2013 year of assessment. For companies engaged in business in Singapore that adopt an accounting period other than the calendar year, the assessable profits are those for the 12-month accounting period ending in the year preceding the year of assessment.

An estimate of the chargeable income (ECI) of a company must be filed within three months after the end of its accounting year. For financial years ending in or after October 2012, companies are not required to file an ECI if their annual revenue is not more than S$1 million for the financial year and if their ECI is nil.

The statutory deadline for filing the income tax return is 30 November. No extension of time to file the return is allowed.

Income tax is due within one month after the date of issuance of the notice of assessment. In certain circumstances, companies may pay tax in monthly installments on the ECI, up to a maximum of 10, with the first installment payable one month after the end of the accounting period. No installments are allowed if the ECI is submitted more than three months after the end of the relevant accounting period.

A late payment penalty of 5% of the tax due is imposed if the tax is not paid by the due date. If the tax is not paid within 60 days of the imposition of the 5% penalty, an additional penalty of 1% of the tax is levied for each complete month that the tax remains outstanding, up to a maximum of 12%.

The tax law provides that it is an offense for a person chargeable to tax in Singapore not to file an income tax return with the tax authority. On conviction of such offense, a penalty of up to S$1,000 is imposed for late filing of tax returns. In default of payment, the person may be liable to imprisonment for a term not exceeding six months. On conviction, a further penalty of S$50 per day is imposed for each day that the tax return remains unfilled. If a person fails or neglects without reasonable excuse to file a tax return for a tax year for two years or more, a higher penalty of double the amount of tax assessed for the relevant tax year and a fine of not exceeding S$1,000 is imposed on conviction. In default of payment, the person may be liable to imprisonment for a term not exceeding six months. The Singapore Revenue may compound any of these offenses.

**Dividends.** Under the one-tier system, dividends paid by a Singapore tax-resident company are exempt from income tax in the
hands of shareholders, regardless of whether the dividends are paid out of taxed income or tax-free gains.

**Foreign tax relief.** Singapore has entered into comprehensive double tax treaties with more than 60 countries, but notably not with the United States. Under Singapore rules, a foreign tax credit is limited to the lower of the foreign tax paid and the Singapore tax payable on that income. The foreign tax credit (FTC) is granted on a country-by-country, source-by-source basis unless the resident taxpayer elects to claim FTC under the pooling method, subject to meeting certain conditions.

A unilateral tax credit system, similar to treaty relief, is also available for income derived from countries that have not entered into tax treaties with Singapore.

**C. Determination of taxable income**

**General.** In general, book profits reported in the audited financial statements prepared under generally accepted accounting principles are adjusted in accordance with the Singapore tax rules to arrive at taxable income.

If a company maintains its financial accounts in a functional currency other than Singapore dollars, as required under the financial reporting standards in Singapore, it must furnish tax computations to the Singapore Revenue denominated in that functional currency in a manner as prescribed by the law.

For expenses to be deductible, they must meet all of the following conditions:

- They must be incurred wholly and exclusively in the production of income.
- They must be revenue in nature.
- They must not be specifically prohibited under the Singapore tax law.

To facilitate business start-ups, it is specifically provided that businesses may deduct revenue expenses incurred in the accounting year immediately preceding the accounting year in which they earn their first dollar of trade receipts.

Special rules govern the deductibility of expenses for investment holding companies.

Expenses attributable to foreign-source income are not deductible unless the foreign-source income is received in Singapore and subject to tax in Singapore. In general, offshore losses may not be offset against Singapore-source income.

No deduction is allowed for the book depreciation of fixed assets, but tax depreciation (capital allowances) is granted according to statutory rates (see Capital allowances [tax depreciation]).

**Double deductions.** Double deductions are available for certain expenses relating to approved trade fairs, exhibitions or trade missions, maintenance of overseas trade offices, overseas investment development, logistics activities, research and development and recruitment of overseas talent.

**Renovation or refurbishment deduction.** A tax deduction is allowable on due claim, for qualifying renovation or refurbishment
(R&R) expenditure incurred for the purposes of a trade, profession or business. The allowable R&R costs are capped at S$300,000 (the cap was S$150,000 before the 2013 tax year) for every three-year period, beginning with the basis period in which the deduction is first allowed. Any unused R&R deduction is allowed for group relief (see Groups of companies).

**Inventories.** Trading inventory is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out (FIFO) basis; the last-in, first-out (LIFO) basis is not accepted.

**Provisions.** Impairment losses for debts computed in accordance with Singapore financial reporting standards may be deducted, but only to the extent that the debts arose from the trade carried on by the taxpayer.

**Capital allowances (tax depreciation)**

*Plant and machinery.* Tax depreciation or capital allowances are given for capital expenditures incurred on the acquisition of plant and machinery used for the purposes of a trade or business. Qualifying plant and machinery are normally written off in equal amounts over three years when claimed. Alternatively, expenditures on such assets may be claimed in one year if each item costs no more than S$5,000 (the amount was S$1,000 before the 2013 tax year). However, the total claim for all such assets may not exceed S$30,000 for a tax year.

The cost of the following may be written off in the year of acquisition:

- Computers or other prescribed automation equipment
- Generators
- Robots
- Certain efficient pollution-control equipment
- Certified energy-efficient equipment or approved energy-saving equipment
- Certain industrial noise- and chemical hazards-control equipment

Businesses that incur qualifying expenditure on the acquisition of prescribed automation equipment may qualify under the PIC scheme (see Section B).

Expenditures on automobiles, other than commercial vehicles, generally do not qualify for capital allowances.

*Industrial buildings.* An initial allowance of 25% plus an annual straight-line allowance of 3% are granted for industrial buildings or structures used for specified purposes. No such allowances are granted for commercial buildings or hotels other than hotels on the island of Sentosa that were approved before 1 September 2007.

The industrial building allowance (IBA) was phased out after 22 February 2010. Qualifying capital expenditure incurred by businesses on or before 22 February 2010 on the construction or purchase of industrial buildings or structures continues to qualify for IBA, subject to existing IBA rules. As a result of the phase-out, IBA is not allowed with respect to capital expenditure incurred after 22 February 2010 on the construction or purchase of industrial buildings or structures except in specified scenarios, subject to meeting the conditions imposed.
Land intensification allowance incentive. The new land intensification allowance (LIA) incentive grants an initial allowance of 25% and an annual allowance of 5% on qualifying capital expenditure incurred on or after 23 February 2010 by businesses on the construction or renovation of qualifying buildings or structures if certain conditions are met. The user of the building or structure must carry out one of the specified qualifying activities as its principal activity in the building or structure. The LIA incentive is available for five years, and approvals are granted from 1 July 2010 to 30 June 2015.

Intellectual properties. Writing-down allowances (WDAs) are granted for capital expenditure incurred on the acquisition of specified categories of intellectual property (IP) on or before the last day of the basis period for the 2015 tax year if the legal and economic ownership of the IP lies with Singapore companies. The allowances are calculated on a straight-line basis over five years. The legal ownership requirement may be waived for IP rights acquired on or after 17 February 2006. On approval, WDAs for IP acquisition are granted to the economic owners of IP if a Singapore company has substantial economic rights over the IP, but a foreign parent holds the legal title.

On approval, an accelerated WDA over two years is granted to an approved media and digital entertainment (MDE) company with respect to the acquisition of approved IP rights for MDE content (pertaining to films, television programs, digital animations or games, or other MDE content) on or before the last day of the basis period for the 2015 tax year.

Businesses that incur qualifying expenditure on the acquisition of IP rights may qualify under the PIC scheme (see Section B).

Submarine cable systems. Acquisitions of IRUs for international telecommunications submarine cable systems qualify for WDAs over the period of use.

Disposal of plant and equipment and industrial buildings. Allowances are generally subject to recapture on the sale of qualifying plant and equipment and industrial buildings if the sales proceeds exceed the tax-depreciated value. If sales proceeds are less than the tax-depreciated value, an additional corresponding allowance is given.

Relief for trading losses. Trading losses may be offset against all other chargeable income of the same year. Unused losses may be carried forward indefinitely, subject to the shareholding test (see below). Excess capital allowances can also be offset against other chargeable income of the same year and carried forward indefinitely subject to the shareholding test and to the requirement that the trade giving rise to the capital allowances continues to be carried on (same trade test).

A one-year carryback of up to an aggregate amount of S$100,000 of current year unused capital allowances and trade losses (collectively referred to as “qualifying deductions”) may be allowed, subject to the meeting of certain conditions and compliance with specified administrative procedures.

The carryforward and carryback of losses and capital allowances are subject to the shareholders remaining substantially (50% or
more) the same at the relevant comparison dates (shareholding test). If the shareholder of the loss company is itself another company, look-through provisions apply through the corporate chain to the final beneficial shareholder.

The carryback of capital allowances is subject to the same trade test that is applicable to the carryforward of unused capital allowances.

The Singapore Revenue has the authority to allow companies to deduct their unused tax losses and capital allowances, notwithstanding a substantial change in ownership at the relevant dates, if the change is not motivated by tax considerations (for example, if the change is caused by the nationalization or privatization of industries or if the shareholding of the company or its parent changes substantially as a result of the shares being widely traded on recognized exchanges). If allowed, these losses and capital allowances may be offset only against profits from the same business.

Groups of companies. Under group relief measures, current-year unused losses, capital allowances and donations may be transferred by one company to another within a group, subject to meeting certain qualifying conditions. A group generally consists of a Singapore-incorporated parent company and all of its Singapore-incorporated subsidiaries. Two Singapore-incorporated companies are members of the same group if one is 75% owned by the other, or both are 75% owned by a third Singapore-incorporated company.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Goods and Services Tax (GST) on any supply of goods and services, except an exempt supply, made in Singapore by a taxable person (a business is taxable if its annual supplies exceed S$1 million) in the course of or furtherance of business and on imports of goods into Singapore unless the imports qualify for import reliefs</td>
<td>0/7</td>
</tr>
<tr>
<td>Social security contributions (Central Provident Fund [CPF]); foreigners holding work passes are exempt</td>
<td></td>
</tr>
<tr>
<td>For employees up to age 50, on monthly ordinary wages (lower rates apply if employee is older than age 50); the monthly salary ceiling for contributions is S$5,000 for ordinary wages; contributions paid by Employer (limited to S$800 a month)</td>
<td>16</td>
</tr>
<tr>
<td>Employee (limited to S$1,000 a month)</td>
<td>20</td>
</tr>
<tr>
<td>Contributions on additional wages, such as bonuses and nonregular payments (limited to S$85,000 less the total ordinary wages subject to CPF contributions in the year); paid by Employer</td>
<td>16</td>
</tr>
<tr>
<td>Employee</td>
<td>20</td>
</tr>
</tbody>
</table>
Nature of tax
(For both contributions on ordinary wages and contributions on additional wages, the employer’s contribution rate for workers aged from above 50 to 55 is 14%; lower contribution rates apply to individuals older than age 55. The employee’s contribution rate for workers aged from above 50 to 55 is 18.5%; lower contribution rates apply to individuals older than age 55. For employees who earn total wages of S$1,500 or less per month, different rates apply.)

Skills development levy; payable by employer for all employees; based on the first S$4,500 of monthly gross remuneration; subject to a minimum of S$2 0.25

E. Miscellaneous matters

Foreign-exchange controls. Singapore does not impose any restrictions on the remittance or repatriation of funds in or out of Singapore.

Debt-to-equity ratios. Singapore does not impose any specific debt-to-equity restrictions.

Antiavoidance legislation. The tax legislation allows the Singapore Revenue to disregard or vary any arrangement that has the purpose or effect of altering the incidence of taxation or reducing or avoiding Singapore tax liability. The Singapore Revenue also may tax profits of a nonresident in the name of a resident as if the latter is an agent of the nonresident, if the profits of the resident from business dealings with the nonresident are viewed as lower than expected as a result of the close connection between the two parties.

Transfer pricing. Specific legislation governs the arm’s length principle to be applied to related-party transactions. The Singapore Revenue may make adjustments to profits for income tax purposes in cases in which the terms of commercial relations or financial relations between two related parties are not at arm’s length. The Singapore Revenue has also issued circulars on certain transfer pricing (TP) matters, which are summarized below.

TP Guidelines. The TP Guidelines are designed to assist companies in Singapore with the management or elimination of the risk of double taxation. The Guidelines are consistent with the arm’s length principle outlined in the Organization for Economic Cooperation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and provides general methods for determining an arm’s length price. The Singapore Revenue expects companies to assess their TP risk and prepare sufficient TP documentation to support their TP.

TP consultation process. The TP consultation process involves the Singapore Revenue inviting selected taxpayers to complete an extensive questionnaire. The objectives of the TP consultation are to assess the taxpayers’ level of compliance with the TP Guidelines and to identify potential areas in which the Singapore Revenue can further facilitate and advise taxpayers on good practices in TP.
Supplementary administrative procedures relating to Advanced Pricing Agreements. The circular on supplementary administrative procedures relating to Advanced Pricing Agreements (APAs) outlines procedures relating to requests for APAs.

TP guidelines for related-party loans and related-party services. The Singapore Revenue has issued a circular setting out the guidelines for related-party loans and services.

Reorganizations

Amalgamations of companies. For corporate amalgamations, a tax framework is available. This framework seeks to minimize the tax consequences arising from qualifying amalgamations and align it with the consequences provided in the Companies Act. On election, the tax treatment applies to two or more amalgamating companies and an amalgamated company in a qualifying amalgamation. Under the framework, the amalgamated company is treated as continuing the existing businesses of the amalgamating companies (and, accordingly, an acquisition of new businesses by the amalgamated company is not deemed to occur) for tax purposes.

Deduction for acquisitions of shares of companies. A Singapore company may claim a deduction if it and/or any one or more acquiring subsidiaries incur capital expenditure during the period of 1 April 2010 to 31 March 2015 (both dates inclusive) in acquiring the ordinary shares in another company, subject to specified conditions. The amount of the deduction granted is 5% of the capital expenditure, to be written off over five years. For this purpose, the capital expenditure is capped at S$100 million for all qualifying acquisitions that have acquisition dates within one basis period. A 200% tax deduction is granted for the transaction costs incurred on the qualifying acquisition, subject to an expenditure cap of S$100,000 per relevant tax year.

F. Domestic and treaty withholding tax rates

In general, withholding tax at a rate of 15% is imposed on interest and other payments with respect to loans or indebtedness paid to nonresidents. However, interest paid by approved banks in Singapore on deposits held by nonresidents, other than individuals or permanent establishments in Singapore, is exempt from tax if the nonresidents do not have a permanent establishment in Singapore and do not carry on business in Singapore by themselves or in association with others or do not use the funds from the operation of a permanent establishment in Singapore to make the deposit. In addition, interest paid on qualifying debt securities issued before 31 December 2013 to nonresidents who do not have a permanent establishment in Singapore is exempt from tax. This exemption also applies to nonresidents who have a permanent establishment in Singapore, but do not use the funds obtained from the operations of the permanent establishment to acquire the debt securities. Payments for arrangements, management or services relating to loans or indebtedness performed by nonresidents outside Singapore or guarantees with respect to loans or indebtedness provided by nonresident guarantors are not subject to withholding tax. Interest and qualifying payments made by banks, finance companies and certain approved entities to nonresident persons are also exempt from withholding tax if the payments are made for the purpose of their trade or business and not with the intent of avoiding tax in Singapore.
A 10% withholding tax is imposed on the following types of payments to nonresidents:

- Royalties for the use of, or the right to use, intangible property
- Payments for the use of, or the right to use, scientific, technical, industrial or commercial knowledge or information

A 15% withholding tax is imposed on rent and other payments to nonresidents for the use of movable property. Effective from 17 February 2012, payments made to nonresidents (excluding permanent establishments in Singapore) for the charter hire of ships are exempt from tax.

Payments made to nonresident professionals for services performed in Singapore are subject to a final withholding tax of 15% on their gross income, unless the nonresident professionals elect to be taxed at 20% of net income.

For payments made to nonresident public entertainers, the withholding tax rate is reduced from 15% to 10% for payments from 22 February 2010 to 31 March 2015 (both dates inclusive).

In general, a 17% withholding tax is imposed on payments to nonresident companies for assistance or services rendered in connection with the application or use of scientific, technical, industrial or commercial knowledge or information, and for management or assistance in the management of any trade, business or profession. If services are performed outside Singapore, such services are not subject to withholding tax.

Tax treaties may override the above withholding tax rules. However, if the rate under the domestic tax law is lower than the treaty rate (see below), the domestic tax rate applies.

Singapore does not levy a withholding tax on dividends (see Section B).

The rates of withholding tax on interest and royalties may be reduced under the terms of a double tax treaty, and details of the rates applicable to treaty countries are set out below.

</table>

(a) Exempt under certain specified circumstances.
(b) The rate is 7% for interest paid to banks or financial institutions.
(c) The 10% rate applies to interest paid to financial institutions. The 15% rate applies to other interest.
(d) The rate is 5% for interest paid to banks.
(e) The rate is 8% for interest paid to banks or financial institutions.
(f) The rate is 10% for interest paid by industrial undertakings to financial institutions in Sweden.
(g) Payments received as consideration for the use of, or the right to use, industrial, commercial or scientific equipment constitute business profits (that is, not royalties).
(h) The rate is 7.5% for interest paid to financial institutions.
(i) In certain circumstances, the reduced rates do not apply to royalties for copyrights of literary or artistic works, including cinematographic films and films or tapes for radio or television broadcasting. Reference should be made to the applicable tax treaty.
(j) The 10% rate applies to payments relating to patents, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment or experience. The 15% rate applies in all other cases.
(k) Royalties approved under the Economic Expansion Incentives (Relief from Income Tax) Act are exempt.
(l) This rate does not apply to royalties with respect to the operation of mines or quarries or the exploitation of natural resources. A contracting state may exempt or reduce the tax on industrial royalties in accordance with its domestic laws.
(m) The 5% rate applies if the interest is received by a bank or similar financial institution.
(n) The treaty between Singapore and Taiwan does not contain an interest article.
(o) The 5% rate applies to payments relating to patents, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment or experience.
(p) The lower rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.
(q) The tax rate on royalties in the recipient's country is limited to 20%.
(r) The 10% rate applies to interest arising in the Philippines with respect to the public issuance of bonds, debentures or similar obligations.
(s) In the case of the Philippines, the 15% rate applies to royalties paid by enterprises registered with the Philippine Board of Investments (BOI) and engaged in preferred activities. It also applies to royalties paid with respect to cinematographic films or tapes for television or broadcasting. The 25% rate applies in all other cases, except for those covered by footnote (k).
(t) The 15% rate applies to payments relating to copyrights of scientific works, patents, trademarks, designs or models, plans, secret formulas or processes, industrial, commercial or scientific equipment or experience or information concerning industrial or scientific experience. The 20% rate applies to copyrights of literary or artistic works, including cinematographic films or tapes for television or broadcasting.
(u) The 0% withholding tax rate does not apply to persons incorporated under the International Companies Act if their income or profits are not taxed at the normal rate of corporate income tax in Mauritius or any income tax comparable thereto.
(v) The 10% rate applies to interest paid to financial institutions. The 25% rate applies to other interest.
(w) The treaty entered into force on 2 February 2012, and is effective from 1 January 2013.
(x) The treaty was revised and entered into force on 1 August 2012, and is effective from 1 January 2013.
(y) The treaty was revised and entered into force on 27 December 2012, and is effective from 1 January 2013 (in Singapore).

On 10 October 2010, the country Netherlands Antilles, which consisted of five island territories in the Caribbean Sea (Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten), was dissolved. On dissolution of the Netherlands Antilles, the islands of Bonaire, Sint Eustatius and Saba (BES-Islands) became part of the Netherlands as extraordinary overseas municipalities. Curaçao and Sint Maarten have both become autonomous countries within the Kingdom of the Netherlands. The former Netherlands Antilles tax laws remain applicable to Sint Maarten, with the understanding that references in the laws to “the Netherlands Antilles” should now read “Sint Maarten.” This chapter provides information on taxation in Sint Maarten only. Chapters on the BES-Islands and Curaçao also appear in this guide.

* Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in a business in the shipping or aviation industry may be carried forward indefinitely. Companies under the Sint Maarten offshore tax regime may carry forward tax losses for five years.
B. Taxes on corporate income and gains

**Corporate income tax.** Corporate income tax is levied on resident and nonresident entities. Resident entities are those incorporated under former Netherlands Antilles or current Sint Maarten law, even if their management is located abroad, as well as entities incorporated under foreign law, but effectively managed in Sint Maarten. For resident entities, corporate income tax is, in principle, levied on the aggregate amount of net profits earned from all sources during the entity’s accounting period. Nonresident entities are subject to tax on specific Sint Maarten income items, such as profits earned through a permanent establishment and income related to real estate property in Sint Maarten, including interest derived from a mortgage on such real estate property.

**Tax rates.** The net profits earned by resident and nonresident entities, including branches of foreign entities, are taxed at a standard rate of 34.5%. However, other rates may apply to companies qualifying for tax holidays, E-zone companies, offshore companies and tax-exempt companies.

Withholding taxes are not imposed on remittances of profits by branches to their foreign head offices.

**Tax incentives.** Reduced tax rates and other tax incentives (tax holidays) are available to new business enterprises that engage in certain activities, including tourism and land development.

**Offshore companies.** The offshore tax regime was abolished in 2001. However, under grandfathering rules, special incentives are available for qualifying offshore companies in existence before 1 January 2002. Offshore companies are resident companies owned by nonresidents that perform their business activities abroad; that is, they earn mostly foreign-source income. Income derived by offshore companies (for example, royalty, financing, holding, portfolio investment, mutual fund, real estate and service activities) is taxed at corporate income tax rates of 2.4% to 3%. For trading and service companies, offshore status may result in reduced rates. Capital gains on securities, loans, intellectual property and immovable property are exempt from corporate income tax. In addition, advance tax rulings can be obtained for determining the offshore tax status and method of calculating the taxable basis of offshore companies. Profits derived from real estate located outside Sint Maarten are exempt from corporate income tax. The offshore tax rates are guaranteed through 2019.

**Tax-exempt companies.** Tax-exempt companies (TECs) are exempt from Sint Maarten corporate income tax. Only private limited liability companies incorporated under former Netherlands Antilles or current Sint Maarten law may qualify as TECs. TECs are allowed to solely or practically solely (more than 90%) engage in the extending of loans, investing in securities and deposits and licensing of intellectual and industrial property rights and similar property rights. To qualify as a TEC, a written request must be submitted to the Tax Inspector and certain conditions must be satisfied. TECs are not eligible for benefits under the Tax Regulation for the Kingdom of the Netherlands or for benefits under any other double tax treaty of the former Netherlands Antilles or Sint Maarten. However, exchange-of-information provisions in this tax regulation, tax treaties and tax information exchange agreements
apply to TECs. If a TEC loses its tax-exempt status, it is treated as a regularly taxed company subject to tax on its worldwide income, and it receives a tax-free step-up in basis.

**Ruling policy.** Sint Maarten has an extensive advance tax ruling practice. These rulings include the following:
- Cost-plus rulings for intercompany support activities
- Minimum gross margin rulings for finance activities
- Participation exemption rulings for holding activities
- Informal capital (or cost-plus) rulings for intercompany trading activities

These rulings are usually valid for a three-year period, with the option for extension every five years.

**Other incentives.** Sint Maarten also offers other incentives for specific activities, such as the international use of aircraft and ships and the insurance of risks outside Sint Maarten.

**Capital gains.** Under the current corporate income tax rules, in general, except for offshore companies, no distinction is made between the taxation of capital gains and the taxation of other income. All income is taxed at the applicable corporate income tax rate (34.5%). Taxation of capital gains on qualifying share interests (participation exemption) is discussed in Section C.

**Administration.** The standard tax year is the calendar year. However, on request and under certain conditions, a company may use a different financial accounting year as its tax year.

Companies must file a provisional tax return within three months after the end of the financial year. In principle, this return must show a taxable profit that is at least equal to the taxable profit shown on the most recently filed final tax return. Any tax due must be paid at the time of filing of the provisional tax return. An extension of time to file the return and pay the tax is not granted. On request of the company, the Tax Inspector may consent to the reporting of a lower taxable profit than the taxable profit shown on the most recently filed final tax return.

The final tax return must be filed within six months after the end of the financial year. Any difference between the tax due based on the provisional return and the tax due based on the final return must be settled at the time of the filing of the final return. An extension for filing the final tax return on a later date can be obtained.

To ensure compliance with the rules described above, penalties may be imposed. The tax authorities may impose arbitrary assessments if the taxpayer fails to file a tax return. Additional assessments, including a penalty, may be imposed if insufficient tax is levied. A penalty of 100% of the additional tax due may be levied. Depending on the degree of wrongdoing, this penalty is normally 25% or 50%.

In general, offshore companies must file their tax returns within six months following the end of the financial year. In practice, the tax authorities do not strictly enforce this deadline for offshore companies.

**Dividends.** Sint Maarten does not levy dividend withholding tax on dividend distributions.
Foreign tax relief. A 100% exemption from Sint Maarten corporate income tax is available for foreign business profits. For this purpose, foreign profits are profits earned in another country through a permanent establishment or a permanent representative in the other country, or profits earned from immovable property located in a foreign country, including the rights related to the property that is part of the business activities of the taxpayer but is deemed to be part of the foreign business. If the foreign profits are derived from a business that can be considered a low-taxed portfolio investment, a reduced exemption of 70% applies.

C. Determination of taxable income

General. Taxable profit must be calculated in accordance with “sound business practices.”

All expenses incurred with respect to conducting a business are, in principle, deductible. However, if expenses exceed normal arm’s length charges and are incurred directly or indirectly for the benefit of shareholders or related companies, the excess is considered to be a nondeductible profit distribution (dividend). In addition, certain expenses, such as fines, penalties and expenses incurred with respect to crimes, are not deductible. Only 80% of representation expenses, as well as expenses incurred on meals, beverages, gifts, courses and seminars, is deductible.

In principle, interest expenses are deductible for tax purposes if the interest rate is determined on an arm’s length basis. However, certain restrictions apply to the deduction of interest on loans connected to certain tax-driven transactions and intragroup reorganizations. Under thin-capitalization rules, the deductibility of interest accrued or paid directly or indirectly to an affiliated TEC may be restricted.

Participation exemption. In principle, a 100% participation exemption applies for all qualifying share interests held by Sint Maarten corporate taxpayers.

In general, a shareholding qualifies for the participation exemption if it represents at least 5% of the share capital or voting power in a company or if the amount paid for the shareholding amounts to at least US$500,000. In addition, any member of a cooperative association can apply for the participation exemption.

For dividend income, additional requirements are imposed for a participation to be considered a qualifying participation. To apply the 100% exemption on dividends, either of the following conditions must be met:

- The qualifying participation is subject to a (nominal) profit tax rate of 10% (subject-to-tax clause).
- Dividends, interest or royalties received from other sources than the business of the participation do not account for 50% or more of the gross income of the participation (nonportfolio-investment clause).

The above conditions may be met on a consolidated basis. If neither of the above conditions is met, a lower participation exemption of 70% applies to dividends. The subject-to-tax clause and the nonportfolio-investment clause do not apply to the 100% participation exemption on capital gains and income received from
participations that exclusively or almost exclusively hold immovable property.

Expenses that are connected with the participation, including financing expenses, are not deductible if the income is 100% tax-exempt.

**Tax depreciation.** In general, assets are depreciated using the straight-line method, with the residual value taken into consideration. The following are some of the applicable rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
<th>Residual value (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2 to 2.5</td>
<td>10</td>
</tr>
<tr>
<td>Office equipment</td>
<td>10 to 50</td>
<td>Nil</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>10 to 33</td>
<td>15</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10</td>
<td>10</td>
</tr>
</tbody>
</table>

The rates listed above provide a general overview of the depreciation rates. The actual depreciation rate depends on the type of asset used by the company.

Fixed company assets acquired by companies operating in Sint Maarten may qualify for accelerated depreciation at a one-time maximum annual rate of 33⅓% of the acquisition costs of the assets.

An investment allowance deduction of 8% (12% for new buildings or restorations of buildings) is granted for acquisitions of fixed assets exceeding approximately US$2,800. The allowance is deducted from taxable income in the year of the investment and in the following year. The investment allowance deduction is recaptured in the year of sale and the subsequent year if the asset is sold within 6 years (15 years for buildings) of the date of the investment.

**Groups of companies.** On written request, Sint Maarten resident companies may form a fiscal unity (tax-consolidated group) for corporate income tax purposes. To qualify for a fiscal unity, the parent company must own at least 99% of the shares in the subsidiary. A fiscal unity may include, among others, a company incorporated under Dutch law that has its place of effective management in Sint Maarten. The whole group is taxed for corporate income tax purposes as if it were one company and, as a result, the subsidiaries in the fiscal unity are no longer individually subject to corporate income tax.

Advantages for corporate income tax purposes of fiscal unity treatment include the following:
- Losses of one subsidiary may be offset against profits of other members of the fiscal unity.
- Reorganizations, including movements of assets with hidden reserves from one company to another, have no direct tax consequences for corporate income tax purposes.
- Intercompany profits may be fully deferred.

The fiscal unity does not apply for revenue tax purposes.

**Relief for losses.** Losses in a tax year may be carried forward for 10 years. No carryback is available. Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in a business in the
Companies under the Sint Maarten offshore tax regime can carry forward tax losses for five years.

D. Other significant taxes

The following table summarizes other significant taxes.

</tr>
</tbody>
</table>

E. Miscellaneous matters

Foreign-exchange controls. The currency in Sint Maarten is the Antillean guilder (ANG).

For foreign investors that obtain a foreign-exchange license from the Central Bank of Curaçao and Sint Maarten, no restrictions are imposed on the movement of funds into and out of Curaçao and Sint Maarten. In general, the Sint Maarten Central Bank automatically grants foreign-exchange licenses for remittances abroad. Residents are subject to several foreign-exchange regulations imposed by the Sint Maarten Central Bank. However, residents may be granted nonresident status for foreign-exchange control purposes. Some reporting requirements exist for statistical purposes.

Transfer pricing. In general, intercompany charges should be determined on an arm’s length basis.

F. Tax treaties

Provisions for double tax relief are contained in the tax treaty with Norway and in the Tax Regulation for the Kingdom of the Netherlands (consisting of Aruba, Curaçao, the Netherlands, and Sint Maarten). Under a measure in the Tax Regulation for the Kingdom of the Netherlands, dividend distributions by a qualifying Dutch subsidiary to its Sint Maarten parent company are effectively subject to an 8.3% Dutch dividend withholding tax. Negotiations are underway to reintroduce a 5% Dutch dividend withholding tax on distributions by such Dutch subsidiaries to qualifying Sint Maarten companies. Sint Maarten does not impose withholding tax on payments from Sint Maarten to residents of other countries.

The Netherlands Antilles entered into tax information exchange agreements with Antigua, Australia, Bermuda, British Virgin Islands, Canada, Cayman Islands, Denmark, Faroe Islands, Finland, France, Germany, Greenland, Iceland, Italy, Mexico, New Zealand, Saint Lucia, Spain, Sweden and the United States. As a result of the constitutional reform of the Kingdom of the Netherlands, the tax treaties entered into by the Netherlands Antilles became automatically applicable to the surviving countries, which are the legal successors of the Netherlands Antilles. Negotiations are ongoing with the United Kingdom.

Under the latest published Organization for Economic Cooperation and Development (OECD) list, Sint Maarten qualifies as a white-listed jurisdiction.
The government of the former Netherlands Antilles entered into bilateral agreements with the European Union (EU) member states with respect to the application of the EU Council Directive on taxation of savings income. The Sint Maarten (former Netherlands Antilles) law to implement the directive took effect in July 2006.

The Kingdom of the Netherlands has entered into many bilateral investment treaties that also apply to Sint Maarten.
The chapter below is based on the existing law in the Slovak Republic as of 1 January 2013. Because further changes to the 2013 tax rules are possible, including changes to the tax depreciation of fixed assets and social and health contributions, readers should obtain updated information before engaging in transactions.

(a) The rates may be reduced by an applicable double tax treaty.
(b) See Section B.
(c) This tax applies to nonresidents only. For resident companies, royalties are included in taxable income subject to corporate tax.
(d) This tax applies to income received by authors (individuals) for contributions to newspapers, radio and television. It is possible for the author and the payer of the income to agree that no withholding tax be applied; in such case the income is taxed through the tax return of the author.
(e) The carryforward period is five years for losses incurred before 2010.

B. Taxes on corporate income and gains

Corporate income tax. Slovak (resident) companies are subject to corporate income tax on their worldwide income. Slovak companies are those incorporated or having their place of management in the Slovak Republic. Foreign (nonresident) companies are subject to corporate income tax only on their Slovak-source income, such as income attributable to a permanent establishment.

Under Slovak law, a permanent establishment is a fixed place or facility for nonresidents to carry out activities in the Slovak Republic. A permanent establishment includes an administrative location, branch, office, workshop, sales location, technical facility or location for research and extraction of natural resources. The fixed place or the facility is considered to be permanent if the activities are carried out continuously or repeatedly. In the case of one-off activities, the place or facility is considered to be permanent if the duration of the activities exceeds six months, either continuously or divided into 2 or more periods in the course of 12 consecutive calendar months. A building site, construction site or assembly works site (as described in the Commentary to Article 5, Paragraph 3 of the Organization for Economic Cooperation and Development [OECD] Model Tax Treaty) is regarded as a permanent establishment only if the duration of the activities exceeds six months. A permanent establishment also includes the activity of an agent who negotiates or enters into agreements on behalf of a nonresident company under a power of attorney.

Rates of corporate tax. The corporate income tax rate is 23% except for withholding tax (see Section A).

Incentives. To promote investments, the Slovak government provides potential local and foreign investors with investment incentives that are proportionate to their activities in the Slovak Republic. The maximum limits for state aid are determined by the European Union (EU) regulations and are driven by the relative development of the country or region in which an investment project is located and the unemployment rate in that region. The
limits are set as a percentage of eligible costs of an investment project.

The Slovak Republic provides the following indirect forms of incentives:

- **Tax relief**
- **Transfer of immovable assets owned by the state or municipality at a price lower than the market price**

The Slovak Republic provides the following direct forms of incentives:

- **Cash grants on acquisitions of fixed assets**
- **Cash grants on newly created jobs**
- **Cash grants on training**

**Tax relief.** Under the Investment Aid Act, companies may apply for a 100% tax reduction (full tax relief) for 10 consecutive tax years. The tax relief can be provided for newly established companies (new production) and also for existing companies (extension of existing production).

**Transfers of immovable assets owned by the state or municipality at a price lower than the market price.** In exceptional circumstances, as part of regional aid, the government may award a financial grant or discount from the market price with respect to a transfer of immovable assets (usually land and buildings) to investors by the state or municipalities.

**Cash grants for the acquisition of fixed assets.** Cash grants can be made for the acquisition of tangible fixed assets (for example, land, buildings, and plant and machinery) and intangible fixed assets (for example, patents, licenses, know-how or unpatented technical knowledge).

**Cash grants for newly created jobs.** Cash grants for newly created jobs are made based on the anticipated wage costs related to newly created jobs and the regional location of the project (taking into account the regional unemployment rate).

**Cash grants on training.** The amounts of cash grants for training are expressed as a percentage of eligible training costs and vary according to region (grants for the Bratislava region are lower than grants for the rest of the country) and type of training (general or specific).

**General conditions.** To qualify for investment aid, applicants must meet the general and specific conditions under the Slovak Investment Aid Act and the European legislation. The following are the general conditions:

- An applicant must submit its investment intention (plan) before the start of the projected works.
- An applicant must prove its ability to cofinance the project costs (at least 25%) through its own resources or external financing (free of any investment aid or subsidy).
- The project must be completed within three years.
- The project must comply with all conditions attached to the approval of the investment aid within three years after the issuance of the approval.
- All subsidized job positions must be filled within three years after the completion of the projects and maintained for a period of five years.
The project operation must be maintained for a minimum period of five years from its completion without change of its location.

Specific conditions. The specific conditions vary according to the type of project.

The following are the specific conditions for manufacturing projects:
• Fixed assets with a total value of at least €14 million (lower thresholds apply in regions with high unemployment) must be acquired, and at least 50% of the value of the assets must be covered by the applicant’s own resources.
• New machinery for production purposes must be acquired, and the machinery costs must represent at least 60% of the overall costs of the acquired assets. The machinery must be bought on arm’s-length conditions, must not have been depreciated before the acquisition and must not be older than three years.
• At least 80% of revenues will be generated by the business activities stated in the investment aid intent.

The following are the specific conditions for technology centers:
• Fixed assets with a total value of at least €500,000 must be acquired, and at least 50% of the value of the assets must be covered by the applicant’s own resources.
• At least 60% of the total number of employees must have a university degree.

The following are the specific conditions for shared-service centers:
• Fixed assets with a total value of at least €400,000 must be acquired, and at least 50% of the assets must be covered by the applicant’s own resources.
• At least 30% of the total number of employees must have a university degree.

Approval of the aid. No legal entitlement to any investment aid exists. An applicant must submit an investment aid intent to the relevant authorities (that is, the Ministry of the Economy and other relevant aid providers), which review compliance with both the general and specific conditions under the Investment Aid Act. If the conditions are met, the Ministry of the Economy issues an official offer to the applicant and, as of the date of issuance of the offer, the applicant may officially begin the project. Following receipt of the official offer, the investor must submit an investment aid application. The investment aid application is submitted to the Slovak government for approval. If the project capital expenditures exceed €50 million, approval of the European Commission is also required.

Other national and local incentives. The Slovak Republic is entitled to draw support from the Structural Funds and Cohesion Fund during the period of 2007 through 2013. It has €11,361,000 available. Most of the funds will be drawn by public institutions (for example, municipalities, cities, nonprofit-making companies), while only a minor part will be available for businesses. The incentives available for companies are mainly focused on tourism, enhancing research and development (R&D) and employee training.

Investors may benefit from infrastructure (for example, electricity, water, gas and sewage) fully or partially financed by the state and/
or municipality. The municipality may also offer minor tax exemptions (real estate tax and other local taxes). In general, most of this support qualifies as regional state aid.

Municipalities are entitled to use state budget funding for the development of industrial parks. At the predevelopment stage, investors are typically requested to sign a letter of intent with the relevant municipality. Benefiting from advantages offered by industrial parks does not, in general, qualify as state aid.

**Capital gains.** Capital gains are subject to income tax at a rate of 23%.

**Administration.** The tax year is usually the calendar year. However, if a company informs the tax authorities in advance, it may use its accounting year as the tax year.

Tax returns for each tax year must be filed within three months after the end of the tax year. The filing period may be extended by a maximum of three months based on a written announcement filed with the tax authority before the expiration of the regular filing deadline. Another extension of an additional three months may be granted by the tax authority if the company received income from foreign sources.

In general, monthly or quarterly prepayments of tax are required, depending on the amount of tax liability for the preceding year.

**Dividends.** Profits distributed by companies to their shareholders are not subject to tax in the Slovak Republic. Special rules apply to dividends distributed out of profits realized before 2004.

**Interest and royalties.** Under Slovak law, interest and royalty payments satisfying the conditions contained in Council Directive No. 2003/49/EC are exempt from Slovak withholding tax.

**Foreign tax relief.** Under applicable double tax treaties, a foreign tax relief is available to Slovak residents for foreign tax paid on income earned abroad.

### C. Determination of trading income

**General.** Corporate tax is based on the statutory accounting profit as adjusted for certain items prescribed by the tax law.

Dividends are not included in the tax base.

Items that are specifically deductible for tax purposes include, among others, tax depreciation (see *Tax depreciation*) and certain expenses relating to health and safety at work and environmental protection.

Nondeductible items include the following:

- Entertainment and travel allowances in excess of the statutory limits
- Penalties and fines, except for contractual penalties that have been paid
- Additional fines for damage to the environment
- Taxes paid on behalf of other taxpayers
- Damages exceeding compensation received, unless the damage arose as a result of natural disaster, or it was caused by a person or persons unknown and this is confirmed by the police
• Most accruals and provisions (see Provisions)
• Write-offs of debts, unless specific conditions are met

**Inventories.** Inventories may be valued using the first-in, first-out (FIFO) or average-cost methods. Costs include all costs necessary to convert the inventory to its current condition and to transport it to its current location. Shortages and damages are not tax deductible, unless the damage resulted from a natural disaster, or it was caused by a person or persons unknown and this is confirmed by the police.

**Provisions.** Accruals and provisions are generally not deductible, with certain exceptions specified by law (for example, accruals for untaken vacations and for preparation of financial statements and tax returns, and provisions with respect to receivables in bankruptcy proceedings).

Special rules apply to banks and insurance companies.

**Tax depreciation.** Under the Income Tax Act, tangible assets are divided into four categories, each of which specifies a period (a specified number of years, which range from 4 to 20) over which all assets in the category are depreciated. Intangible assets are depreciated over their actual useful life.

It is possible to split assets and depreciate separable parts of the assets. Each separable part must have an acquisition price higher than €1,700, and separate evidence must be maintained. Only parts of assets specified by the Corporate Income Tax Act can be depreciated based on separate parts (for example, specific buildings and machinery).

Tax depreciation may be calculated by using either the straight-line method or the accelerated method. A company chooses the method on an asset-by-asset basis and, after the method is chosen, it cannot be changed during the depreciation period.

**Relief for losses.** Companies may carry forward losses and offset them against income in the seven tax years following the tax year of the loss. If the tax period is shorter than 12 months (for example, if the company is liquidated or changes its financial year), the tax loss that would normally be deductible is fully deductible in that tax period.

A special tax regime (carryforward of losses for five years) applies to losses incurred before 2010.

**Groups of companies.** Slovak law does not contain any provisions regarding the corporate taxation of groups in the Slovak Republic.

**D. Other significant taxes**

Employee | 13.4

Local taxes (tax on land, tax on buildings and apartments, and motor vehicle tax); rates vary depending on location | Various

E. Miscellaneous matters

Transfer pricing. If the price agreed between related parties differs from the usual market price and if this difference cannot be satisfactorily justified, the tax authorities may adjust the tax base to reflect the usual market price.

The transfer-pricing rules apply to personally or economically related persons, as well as to other related persons.

Persons are economically or personally related if one person participates in the ownership, control, or administration of another person, if such persons are under the control or administration of the same person, or if the same person has a direct or indirect equity interest in the persons. Participation in ownership or control exists if the direct or indirect participation in the basic capital of, or voting rights in, one company by another company is higher than 25%. Participation in the administration is a relationship between members of statutory bodies or supervisory boards of the companies. Other relationships are defined as relationships created for the purpose of decreasing the tax base or increasing the tax loss.

Under the Slovak transfer-pricing measures, an advance ruling on the transfer-pricing method may be obtained through an agreement with the tax authorities. The Slovak transfer-pricing measures specify the acceptable transfer-pricing methods, which conform to the methods included in the Organization for Economic Cooperation and Development (OECD) Transfer-Pricing Guidelines.

Taxpayers must provide transfer-pricing documentation within 60 days after an official request by the tax authorities. The Slovak Ministry of Finance issued guidance regarding the transfer-pricing documentation requirements in 2009.

Tax regime for business combinations. Effective from 2010, the Slovak Corporate Income Tax Act addresses in more detail the taxation of the sale of all or part of an enterprise, the taxation of nonmonetary contributions to registered capital and the taxation of mergers and divisions of companies.

F. Treaty withholding tax rates

The Slovak Republic honors the bilateral tax treaties that were concluded by the former Czechoslovakia. The withholding rates under these treaties, and the treaties entered into by the Slovak Republic are listed in the following table.

In general, treaty rates apply if the recipient is the beneficial owner of the income. To obtain the benefit of the reduced treaty rates, the beneficial owner must be in a position to provide a tax residency certificate.

Dividends are exempt from tax. Consequently, the treaty rates do not apply to dividends paid by Slovak companies.

</table>

(a) The 5% rate applies to dividends paid to a company that owns more than 10% of the capital of the payer of the dividends.
(b) The lower rate applies if the beneficial owner is a company that controls at least 10% of the voting power of the payer.
(c) The lower rate applies to interest on government loans.
(d) The lower rate applies if the recipient is a company that directly holds at least 25% of the capital of the payer of the dividends.
(e) If the corporate tax rate in a contracting state on distributed profits is 20% lower than the corporate tax rate on undistributed profits, the withholding tax rate may be increased to 25%.
(f) This rate also applies to fees for technical services.
(g) The 10% rate applies if the recipient is a company that owns at least 25% of the voting shares of the payer during the six-month period immediately preceding the date of payment of the dividends.
(h) The 15% rate applies to dividends paid by Slovak companies to Sri Lankan recipients. The 0% rate applies to dividends paid by Sri Lankan companies to Slovakian recipients, except for Sri Lankan income tax and additional tax under Sri Lanka’s tax law. A maximum tax rate of 6% applies to the additional tax.
(i) The 0% rate applies to royalties relating to copyrights and films derived from sources within one of the contracting states.
(j) The 0% rate applies the following:
- Interest paid on bank loans
- Interest paid on loans for the purchase of goods or industrial, trade and scientific equipment
- Other interest paid if, for a period of at least two years before the interest payment, the payer and recipient of the interest are mutually connected by a direct share of at least 25% in ownership or if a third entity has a direct share of at least 25% in both the payer and recipient for a period of at least two years before the interest payment
- The 5% rate applies to other interest payments.
(k) The 10% rate applies if the recipient is the beneficial owner of the interest and if the interest is paid on a loan granted by a bank for a period of at least 10 years in connection with the sale of industrial equipment or the installation or furnishing of scientific units or public works.
(l) The lower rate applies to cultural royalties, which are defined as the right to use copyrights of literary, artistic or scientific works, including cinematographic films.
(m) The higher rate also applies to payments for the right to use transport vehicles.
(n) The lower rate applies if the recipient is a company (other than a general partnership) directly holding at least 20% of the capital of the payer.
(o) The 0% rate applies to interest paid to banking institutions, interest paid on government loans and interest paid by the government or other state institutions.
(p) The 25% rate applies to royalties paid for trademarks.
(q) The 5% rate applies if the royalties are taxable in Spain. Otherwise, the rate is determined in accordance with the law of the source country. The 0% rate applies to cultural royalties, except for royalties for films.
(r) The lower rate applies to industrial royalties.
The lower rate applies to the following types of interest:

- Interest paid on commercial debt claims (including debt claims represented by commercial paper) that result from deferred payments for goods, merchandise or services supplied by an enterprise
- Interest paid on loans made, guaranteed or insured by public entities that are intended to promote exports
- Interest paid on current accounts or loans that are not represented by bearer instruments between banks or public credit institutions of the contracting states
- Interest paid to the other contracting state, public subdivision or local authority

The 2% rate applies to interest on government loans. The 5% rate applies to interest paid to financial institutions.

The tax in Malta on dividends may not exceed the tax on the profits out of which the dividends are paid.

The 5% rate applies to dividends paid to a company that owns more than 25% of the voting power of the payer of the dividends.

The 1% rate applies to payments under a financial lease of equipment. The 5% rate applies to payments under an operating lease of equipment, as well as to payments for the right to use cinematographic films and software for personal computers.

Dividends may be taxed in both contracting states in accordance with the domestic laws in the states.

The 0% rate applies to interest on government loans and on loans for the purchase of goods or industrial, trade and scientific equipment.

These rates are based on a multilateral treaty, which the former Czechoslovakia entered into with the other members of the Council for Mutual Economic Assistance (Comecon or CMEA).

See Section B.

This treaty has been signed, but it is not yet in effect.

The lower rate applies if the recipient is a company that holds directly at least 30% of the capital of the payer of the dividends.

The 5% rate applies if the recipient is a company that holds directly at least 70% of the capital of the payer of the dividends.

The 5% rate applies to royalties paid for patents. The 10% rate applies to royalties paid for trademarks. The 15% rate applies in all other cases.

The 0% rate applies to the following types of interest:

- Interest paid to the other contracting state, public subdivisions or local authorities with respect to loans, debt-claims or credits
- Interest paid on loans made, guaranteed or insured by public entities that are intended to promote exports

The lower rate applies if the recipient is a company that directly holds at least 10% of the capital of the payer of the dividends.

The 0% rate applies to cultural royalties, which are defined as the right to use copyrights of literary, artistic or scientific works, including cinematographic films. The 0% rate also applies to other royalties if, for a period of at least two years before the royalty payment, the payer and recipient of the royalty are mutually connected by a direct share of at least 25% in ownership or if a third entity has a direct share of at least 25% in both the payer and recipient for a period of at least two years before the royalty payment.

   Interest  15 (a)
Royalties from Patents, Know-how, etc.  15 (a)
Net Operating Losses (Years)
   Carryback  0
   Carryforward  Unlimited (b)

(a) This tax applies to payments to residents and nonresidents.
(b) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. In general, all companies resident in Slovenia are subject to tax on their worldwide income (but see Foreign tax relief). A company is resident in Slovenia if it has its legal seat or effective place of management in Slovenia. Nonresident companies are subject to tax on their Slovenian-source income only
(income derived from or through a permanent establishment and other Slovenian-source income subject to withholding tax).

Rates of corporate income tax. For 2013, the standard corporate income tax rate is 17%. It will be reduced one percentage point each year until it reaches 15% in 2015.

The corporate income tax rate for qualified venture capital companies is 0%, subject to specific conditions.

Investment funds that distribute 90% of their operating profits for the preceding tax year by 30 November of the current tax year are taxed at a rate of 0%.

Pension funds established in accordance with the Pension and Disability Insurance Act are taxed at a rate of 0%.

Insurance undertakings that are authorized to implement the pension scheme in accordance with the act regulating pension and disability insurance must pay tax with respect to the activities relating to such implementation at a rate of 0% of the tax base if a separate tax calculation is compiled only for this pension scheme.

Capital gains. Fifty percent of a capital gain from the disposal of shares is exempt from tax if certain conditions are met. The other 50% is treated as ordinary business income and is subject to tax at the regular corporate rate. However, in such circumstances, the expenses of a taxpayer are decreased by 5% of the exempt amount of capital gains. The same principle applies to capital losses (only 50% of a capital loss is deductible for tax purposes).

If a capital gain is realized from disposal of shares acquired with respect to venture capital investments in a venture capital company that is established in accordance with the act regulating venture capital companies, the total amount of such gain may be exempt from tax if the company had the status of a venture capital company for the entire tax period and if the company had the status of venture capital company for the entire period of the holding of the shares by the taxpayer. Losses incurred on the transfer of shares acquired under a venture capital scheme are not deductible for tax purposes.

Administration. The tax year is the calendar year. However, a company may select its financial year as its tax year if the selected year does not exceed a period of 12 months and if it informs the tax authorities regarding its selection of the tax year. The selected tax year may not be changed for a period of three years.

Annual tax returns must be filed within three months after the end of the tax year.

Companies must make advance payments of corporate income tax. Monthly advance payments of corporate income tax are required if the total amount of the advance payments exceeds €400, based on the tax calculated in the tax return for the preceding tax year. Companies must make quarterly advance payments if the total amount of the advance payments is less than €400, based on the
tax calculated in the tax return for the preceding tax year. Advance payments of corporate income tax are due on the 10th day of the month following the period to which the advance tax payment relates. The balance of tax due must be paid within 30 days after the annual tax return is filed with the tax authorities. If the total amount of advance payments of corporate income tax exceeds the amount of tax due for the year, the company may request a refund.

**Dividends.** In principle, dividends paid to residents and nonresidents are subject to withholding tax at a rate of 15%. The tax does not apply to dividends paid to a resident or to a permanent establishment of a nonresident if the dividend recipient informs the dividend payer of its tax number.

Measures implementing the European Union (EU) Parent-Subsidiary Directive are in effect in Slovenia. Under these measures, dividend distributions are exempt from withholding tax if all of the following conditions are satisfied:

- The recipient of the dividends owns at least 10% of the equity capital or voting power of the payer of the dividends.
- The duration of the recipient’s ownership in the payer is at least two years.
- The recipient of dividends is a taxable company that has one of the prescribed legal forms, is a resident of an EU member state and is a taxpayer for one of the taxes for which the common system of taxation applies.

If, at the time of payment of a dividend, the duration of ownership of the recipient is shorter than two years and all other requirements are met, a withholding tax exemption is still possible if the payer or its agent provides an appropriate bank guarantee to the tax authorities.

Dividends paid to EU/European Economic Area (EEA) residents are exempt from withholding tax if a tax credit is not available in the country of residence of the recipient.

Dividends and interest paid to EU/EEA resident pension funds, investment funds and insurance companies performing pension plans are exempt from withholding tax if a tax credit is not available in the country of residence of the recipient and if the recipient of such income is not a Slovenian branch of such persons.

Dividends received by Slovenian taxable persons are generally subject to a full participation exemption.

**Foreign tax relief.** Income tax paid abroad can be credited against the final tax liability of a company if the income on which the tax has been paid abroad is included in the tax base. The foreign tax credit may not exceed the lower of the amount of foreign tax on foreign income that was paid or the amount of tax that would have been paid under Slovenian law on the foreign income if the credit had not been granted. To claim the tax credit, the taxpayer must submit appropriate documentation together with the tax return.

**C. Determination of trading income**

**General.** Taxable income is based on the profits reported in the annual financial statements prepared in accordance with International Financial Reporting Standards (IFRS) or Slovenian
accounting standards, which generally follow IFRS. For tax purposes, profits are adjusted, primarily for nondeductible expenses.

In general, only those expenses that are directly required for the generation of taxable revenues are allowed as deductible expenses.

The law specifies that certain expenses are not deductible, including the following:

- Incentives paid to the management board and to the board of directors
- Pecuniary penalties (fines paid to government agencies)
- Donations
- Bribes

Only 50% of entertainment expenses and fees paid to the supervisory board is deductible for tax purposes.

Interest on loans to related entities is deductible up to the amount computed by applying the acknowledged interest rate at the time of the loan approval. The Ministry of Finance publishes the acknowledged interest rate. It is possible for a taxable person to prove that a contractual interest rate exceeding the acknowledged interest rate is an arm's length rate. The measure described in the preceding sentence applies to interest accrued after 7 June 2008 and to loan agreements entered into after January 2007.

A deduction for bad debts can be claimed if specified conditions are met.

**Inventories.** Inventories may be valued using any of the methods prescribed by the applicable accounting standards. Permissible methods include first-in, first-out (FIFO), average cost and other methods. The last-in, first-out (LIFO) method is not allowed. Inventories are measured at the lower of cost or net realizable value.

**Provisions.** The following provisions are deductible for tax purposes up to an amount equal to 50% of the provisions established in accordance with the accounting standards:

- Provisions for warranties
- Provisions for restructurings
- Provisions for expected losses from onerous contracts
- Provisions for pensions
- Provisions for termination benefits with respect to employees
- Provisions for jubilee benefits

Other provisions established based on applicable accounting standards are 100% tax deductible when they are set aside.

Specific provisions established by a bank for specific risks are deductible up to the amount prescribed by the Banking Act. Technical provisions that insurance companies are required to establish under the law are deductible up to the amount prescribed by the Insurance Companies Act. Special provisions that are required for stockbrokerage companies are deductible up to the amount prescribed by the Securities Market Act.

**Revaluation expenses.** In general, subject to special conditions and limitations, revaluations of the following items are deductible for tax purposes:

- Receivables
- Financial assets and financial instruments measured at fair value through profit or loss
• Goodwill

• Debts, receivables, investments and cash receivables, provided that the revaluations are based on changes in the exchange rate

**Tax depreciation.** Depreciation calculated using the straight-line method is deductible for tax purposes. The tax law sets the maximum depreciation rates. The following are some of the prescribed maximum straight-line depreciation rates.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Rate (%)</th>
</tr>
</thead>

</tr>
</tbody>
</table>

**Tax relief for investments.** A taxable person may claim a reduction of the tax base in the amount of 40% of the amount invested in equipment and intangible assets (subject to certain limitations). The reduction may not exceed the amount of the tax base, and the unused portion of the tax relief can be carried forward to the next five tax periods.

For 2010 through 2015, a special regulation applies in the region of Pomurje. Taxable persons may claim a reduction of the tax base in the amount of 70% of salaries paid to employees (under certain conditions). The reduction may not exceed the amount of the tax base. In addition, taxable persons may reduce their tax base by up to 70% of the amount invested in equipment and intangible assets, under certain conditions.

**Tax relief for research and development expenditure.** Tax relief is available for research and development (R&D) expenditure.

The tax base may be decreased by 100% of the expenditure incurred in R&D activities.

The taxable person may also carry forward the unused portion of the tax relief to the following five fiscal periods.

Such tax relief may not be granted for R&D that is financed by government funding or the EU.

Tax relief for R&D expenditure excludes the use of the tax relief for investments.

**Tax relief for the hiring of employees.** An employer who hires certain employees may claim relief in the amount of 45% of the salary of such employees for the first 24 months of employment, but not exceeding the amount of the tax base. To be eligible for the relief, all of the following conditions must be met:

• The employee must be younger than 26 years old or older than 55 years old.

• The employee must have been registered as unemployed at the Employment Service of Slovenia for more than six months before the commencement of employment.

• The employee was not employed by the employer seeking the tax relief or a related party in the past 24 months.
• Agreement is reached on an employment contract for an indefinite time period.
• The overall number of employees employed at the employer in the tax period increased.

**Hidden profit distributions.** Hidden profit distributions are non-deductible expenditures and are subject to withholding tax as deemed dividends. The following items are treated as hidden profit distributions to a shareholder owning directly or indirectly at least 25% of the capital in the payer (or controlling the payer on the basis of the contract or having influence over the payer):

• Providing assets or performing services, including the discharge of debts, without consideration or at a price that is lower than the comparable market prices
• Payments for the purchase of assets and services at a price that is higher than the comparable market prices
• Payments for assets that were not transferred or for services that were not rendered
• Interest on loans granted at an interest rate that differs from the acknowledged interest rate if the taxpayer cannot prove that an unrelated entity would have agreed to the interest rate
• Interest on loans exceeding the thin-capitalization limit (see Section E)

**Relief for losses.** Assessed tax losses may be carried forward for an unlimited time period. The right to carry forward tax losses is lost if the ownership of share capital or voting rights changes by more than 50% during a tax year, as compared to the beginning of the tax year, and if the taxpayer did not conduct any business activity for two years or the business activity was significantly changed in the two-year period before or after the change of ownership (unless the business activity was significantly changed to maintain jobs or to restore business operations).

Loss carrybacks are not allowed.

**Groups of companies.** The formation of groups of companies for tax purposes is not allowed.

**D. Other significant taxes**

The following table summarizes other significant taxes.

### E. Miscellaneous matters

**Foreign-exchange controls.** The official Slovenian currency is the euro (€).

Legal entities with their head office in Slovenia and subsidiaries of foreign commercial companies that are registered in the Court Registry in Slovenia may maintain foreign-currency accounts or foreign-currency deposit accounts at authorized banks in Slovenia. Slovenian and foreign enterprises and their subsidiaries may freely perform one-sided transfers of property to or from Slovenia. Profits may be freely transferred abroad in foreign currency.

Resident enterprises may obtain loans from nonresident enterprises in their own name and for their own account. They are required to report selected loan transactions with nonresident enterprises to the Bank of Slovenia. For this purpose, loan transactions include the following:

- Pledges of real estate and other security
- Purchases by nonresidents of accounts receivable arising from transactions between resident enterprises
- Purchases by residents of accounts receivable arising from transactions between nonresident enterprises
- Certain other transactions between resident and nonresident enterprises if the economic purpose of the transaction is effectively the granting of a loan

**Transfer pricing.** Transfer prices are determined by referring to market prices of the same or comparable assets or services charged between unrelated parties (comparable market prices). Comparable market prices are determined by one of the five methods prescribed by the OECD guidelines.

A resident or nonresident and a foreign legal entity or foreign partnership are deemed to be related parties if any of the following circumstances exist:
• The taxable person directly or indirectly holds 25% or more of the value or number of shares or equity holdings, or control over management or supervision or voting rights of the foreign person or controls the foreign person on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.

• The foreign person directly or indirectly holds 25% or more of the value or number of shares or equity holdings or control over management or supervision or voting rights of a taxable person, or controls the taxable person on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.

• The same person at the same time, directly or indirectly, holds 25% or more of the value or number of shares or holdings or participates in the management or supervision of the taxable person and the foreign person or two taxable persons or they are under the same person’s control on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.

• The same natural persons or members of their families directly or indirectly hold 25% or more of the value or number of shares or holdings or control over the management or supervision of the taxable person and the foreign person or two resident entities or they are under their control on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be achieved between unrelated parties.

Taxpayers must maintain transfer-pricing documentation continuously. The transfer-pricing documentation requirements are based on the masterfile concept. Under this concept, which is recommended by the European Community (EC) Council and the EU Joint Transfer Pricing Forum, the transfer-pricing documentation consists of a general part and a country-specific part. A prescribed abstract of the documentation must be enclosed with the tax return when the tax return is filed with the tax authorities. The transfer-pricing documentation must be archived for a period of 10 years after the year to which it relates.

The transfer-pricing rules can apply to transactions between domestic related parties in specific circumstances.

Debt-to-equity rules. Interest on loans from shareholders, who directly or indirectly at any time during a tax year hold at least 25% of capital or voting rights of the taxable person (with the exception of banks and insurance companies as borrowers) is deductible only if it is attributable to the part of the loan that does not exceed a specified multiple of the value of the share capital owned (debt-to-equity ratio). For 2012 and future years, the applicable debt-to-equity ratio is 4:1.

F. Treaty withholding tax rates

Most of Slovenia’s double tax treaties follow the OECD model convention. The following table shows the withholding tax rates under Slovenia’s tax treaties.

</table>

(a) The lower rate applies if the recipient of the dividends is a company that holds at least 25% of the capital of the payer of the dividends.

(b) The 0% rate applies to interest paid to the government including local authorities or the national bank. In certain treaties, the 0% rate applies to interest paid to national export companies and other institutions, subject to additional conditions.

(c) The lower rate applies to royalties paid for the use of, or the right to use, the following:
• Copyrights of literary, artistic or scientific works (not including cinematographic works)
• Industrial, commercial or scientific equipment
(d) The 0% rate applies if the recipient of the dividends is a company that holds at least 20% of the capital of the payer of the dividends.
(e) Interest arising in a contracting state and paid to the government of the other contracting state is exempt from tax in the state of the payer. In the case of Slovenia, interest arising in Norway and paid with respect to a loan guaranteed or insured by Slovene Export and Development Bank Inc., Ljubljana on account of the Republic of Slovenia as authorized in accordance with the domestic law is exempt from tax in Norway.
(f) Slovenia is honoring the tax treaties between the former Yugoslavia and these countries. Slovenia has concluded a new tax treaty with Cyprus, but the treaty is not yet effective.
(g) For dividends paid by Slovenian companies, the 5% rate applies if the recipient of dividends holds at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends paid by Slovenian companies. For dividends paid by Canadian companies, the 5% rate applies if the recipient of dividends holds at least 10% of the voting power of the payer of the dividends. The 15% rate applies to other dividends paid by Canadian companies.
(h) For dividends paid by Slovenian companies, the 5% rate applies if the recipient of dividends owns at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends paid by Slovenian companies. For dividends paid by Maltese companies to Slovenian resident beneficiaries, the withholding tax rate may not exceed the tax imposed on the profits out of which dividends are paid.
(i) The 5% rate applies to royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic works, and films or tapes used for radio or television broadcasting.
(j) The 10% rate applies to interest paid to financial institutions, including insurance companies.
(k) The 10% rate applies to royalties paid for the following:
• The use of, or the right to use, copyrights of literary or artistic works, including motion pictures, live broadcasting, films and tapes
• Other means for use or reproduction in connection with radio and television broadcasting
• The use of, or the right to use, industrial, commercial, or scientific equipment
(l) Subject to additional conditions, the 0% rate applies to the following:
• Interest paid with respect to indebtedness of the government or local authorities
• Interest paid to an entity that was established and operates exclusively to administer or provide benefits under pension, retirement or other employee benefit plans
Interest arising in Slovenia (Canada) and paid to a resident of Canada (Slovenia) is taxable only in Canada (Slovenia) if it is paid with respect to loans made, guaranteed or insured by the Export Development Corporation (Slovenian Export Company).
(m) The 0% applies if any of the following circumstances exists:
• The interest is paid to the government including local authorities or the national bank.
• The payer of the interest is the government including local authorities or the national bank.
• The interest is paid with respect to a loan made, approved, guaranteed or insured by an institution that is authorized under internal law to act as an export financing institution on behalf of the contracting state.
(n) The tax treaty between Slovenia and the former Union of Serbia and Montenegro is expected to continue to apply to the republics of Serbia and Montenegro. The treaty does not apply to Kosovo.
(o) The 5% rate applies if the recipient of the dividends is a company that holds at least 10% of the capital of the payer of the dividends.
(p) The 0% rate applies if the recipient of dividends owns more than 20% of the capital voting rights of the payer of the dividends.
(q) The 0% rate applies if either of the following circumstances exists:
• The interest is paid to the government including local authorities or the national bank.
• The payer and the recipient are both companies and one of the companies owns directly at least 20% of the capital of the other company, or a third company that is a resident of a contracting state holds directly at least 20% of the capital of both the payer company and the recipient company.
(r) The 0% rate applies if any of the following circumstances exists:
• The recipient of dividends owns more than 15% of the capital voting rights of the payer of the dividends.
• In the case of Norway, the beneficial owner of the dividends is a resident of Norway who is a partner in a Norwegian partnership and alone or together with the other partners holds directly at least 15% of the capital of the company paying the dividends.
• The dividends are derived and beneficially owned by the government of a contracting state.

(s) A 0% rate applies if any of the following circumstances exists:
• The payer of the interest is the government of a contracting state, political subdivision, local authority or central bank of such state.
• The interest is paid to the government of the other contracting state or a political subdivision, local authority or central bank of such state.
• The interest is paid with respect to a loan made, approved, guaranteed or insured by an institution that is authorized in accordance with internal law on insurance and financing of international business transactions.

(t) A 0% rate applies if either of the following circumstances exists:
• The payer of the interest is the government of a contracting state, or a political subdivision, local authority or central bank of such state.
• The interest is paid to the government of the other contracting state or a political subdivision, local authority or central bank of such state.

Slovenia has concluded new double tax treaties with Armenia, Azerbaijan, Egypt, Iceland and Kuwait, but these treaties are not yet effective.

(a) The mining income of gold mining companies is taxed under a special formula, and the nonmining income of such companies is taxed at a rate of 28%. Special rules apply to life insurance companies, petroleum and gas producers and small business corporations. See Section B.
(b) This is the effective rate. See Section B.
(c) Dividend withholding tax (DWT) was introduced, effective from 1 April 2012. Previously, a tax known as the secondary tax on companies (STC) was levied at a rate of 10%. The DWT applies to dividends declared by South African-resident companies. Certain dividends are exempt from the withholding tax, such as dividends received by South African-resident companies and public benefit organizations. A decreased rate may apply under a double tax treaty. See Section B.
(d) Interest withholding tax at a rate of 15%, which will take effect on 1 March 2014, will apply to nonresidents only. Certain interest income will be exempt from this withholding tax, such as interest with respect to government debt instruments, listed debt instruments and debt instruments owed by banks. A decreased rate may apply under a double tax treaty.
(e) The rate of 15% will apply to royalties paid (or due and payable) on or after 1 March 2014. Until this date, the 12% rate applies. This withholding tax applies to nonresidents only.
(f) See Section C.

B. Taxes on corporate income and gains

Company tax. A residence-based tax system applies in South Africa. Companies are considered to be resident in South Africa if they are incorporated or have their place of effective management in South Africa.

South African-resident companies are taxed on their worldwide income (including capital gains).

Under complex look-through rules, the foreign operating income of nonresident subsidiaries derived from “non-business establishment” operations in foreign countries is taxed in the hands of the immediately cross-border South African-resident parent company on an accrual basis (see the discussion on controlled foreign companies [CFCs] in Section E). The income of nonresident subsidiaries with business establishments in foreign countries is generally exempt from the look-through rules. Dividends paid by foreign companies that are not CFCs are taxable unless the shareholding of the South African-resident recipient is 10% or more (see the discussion of foreign dividends in Dividends). The participation exemption amendment reducing the percentage from 20% to 10% took effect on 1 April 2012.

Nonresident companies are taxed on their South African-source income only.

Tax rates. The basic corporate tax rate is 28%. Branch profits tax at a rate of 28% is imposed on South African-source profits of nonresident companies.

Secondary tax on companies and new dividend withholding tax. The secondary tax on companies (STC) has been abolished. It was effective until 31 March 2012. STC was imposed on the company, not on the shareholders, and was regarded as a tax on income. It was not similar to a withholding tax and consequently did not qualify for relief under dividends’ articles in treaties.

The STC was replaced by a withholding tax imposed at a rate of 15% on dividends declared on or after 1 April 2012. The tax is levied on dividends declared and paid by South African-resident companies or by foreign companies listed on the Johannesburg Stock Exchange (JSE). Dividend withholding tax is a tax levied on the recipient of a dividend.

The declaring company must withhold the tax from the dividend paid and pay the tax to the South African Revenue Service (SARS)
on behalf of the recipient. In the case of a listed company, a regulated intermediary withholds the tax.

Dividends are not subject to the withholding tax if any of the following circumstances exists:

- The beneficial owner is a resident company.
- The beneficial owner is a local, provincial or national government.
- The beneficial owner is a specified tax-exempt entity.
- The dividend is paid to certain regulated intermediaries who in turn are liable to administer the tax on behalf of the declaring company.
- The dividend is paid by a micro business, up to R 200,000.
- The dividend is paid by a foreign company listed on the JSE to a nonresident beneficial owner.
- The dividend is paid by a headquarter company.
- The dividend is paid to a portfolio of a collective-investment scheme in securities.
- The dividend is taxable in nature or was subject to STC.

A paying company may not withhold the dividends tax if the beneficial owner has supplied it with a written declaration stating the following:

- It is exempt from the dividends tax.
- It will inform the company when it is no longer the beneficial owner of the shares.

If the beneficial owner is a nonresident that wants to rely on a reduced dividends tax rate under a double tax treaty between South Africa and its country of residence, it must provide the company with a written declaration that the reduced rate applies and specified undertakings.

A dividend is any amount transferred or applied by a company for the benefit of its shareholders, whether by way of a distribution or as consideration for a share buyback, excluding the following:

- Amounts that result in a reduction of the contributed tax capital of the company
- Shares in the company
- An acquisition by a listed company of its own shares through a general repurchase of shares in accordance with the JSE listing requirements

STC credits that were available to a company on 31 March 2012 are carried forward into the dividend tax regime for set-off against dividends in determining the net dividend subject to the tax. The STC credit is increased by dividends received after the introduction of the dividends tax from another company that had used its own STC credits when paying the dividends concerned and that had notified the recipient company of the amount of credits used. A company’s STC credits are available for a period of three years after the introduction of the dividends tax.

**Special types of companies.** Gold mining companies may elect to have their mining income taxed under a special formula, while the nonmining income of such companies is taxed at a rate of 28%.

Petroleum and gas production is taxed in accordance with the usual provisions of the Income Tax Act, as modified by a special schedule applicable to prospecting and development expenses, as
well as to farm-ins. A fiscal stability regime can be agreed to with the Minister of Finance. The tax rate is capped at a maximum of 28% for both South African-resident and nonresident companies.

Life assurance companies are subject to special rules that separate the taxation of policyholders’ and corporate funds and apply different tax rates to such items.

Small business corporations (SBCs) are taxed at the following rates on their taxable income:

- 0% on the first R 63,556 of taxable income
- 7% of the amount of taxable income exceeding R 63,556 but not exceeding R 350,000
- R 20,051 plus 28% on taxable income exceeding R 350,000

To qualify as an SBC, a company must satisfy all of the following requirements:

- Its gross income for the year must not exceed R 14 million.
- Its shares must be held by individuals who do not hold interests in other companies (except for certain specified interests such as interests in South African-listed companies).
- Its total personal service and investment income must not exceed 20% of its gross income.

**Capital gains.** Capital gains derived by resident companies are subject to capital gains tax (CGT) at an effective rate of 18.648% (66.6% of the normal corporate tax rate).

Resident companies are subject to CGT on capital gains derived from disposals of worldwide tangible and intangible assets.

Nonresidents are subject to CGT on capital gains derived from disposals of fixed property (land and buildings) and interests in fixed property located in South Africa, and assets of a permanent establishment located in South Africa. An interest in fixed property includes a direct or indirect interest of at least 20% in a resident or nonresident company if, at the time of disposal of the interest, 80% or more of the market value of the assets of the company is attributable to fixed property located in South Africa that is held as capital assets.

A capital gain is equal to the amount by which the disposal proceeds for an asset exceed the base cost of the asset. A capital loss arises if the base cost exceeds the disposal proceeds. Capital losses may offset capital gains, and regular income losses may offset net capital gains. However, net capital losses may not offset regular income.

The base cost for an asset includes the sum of the following:

- The amount actually incurred to acquire the asset
- Cost of the valuation of the asset for the purposes of determining the capital gain or loss
- Expenditure directly related to the acquisition or disposal of the asset, such as transfer costs, advertising costs, costs of moving the asset from one location to another and cost of installation
- Expenditure incurred to establish, maintain or defend the legal title to, or right in, the asset
- Expenditure on improvement costs (if the improvement is still in existence)
The base cost is reduced by any amounts that have been allowed as income tax deductions. It is also reduced by the following amounts if such expenditure was originally included in the base cost:

- Expenditure that is recoverable or recovered
- Amounts paid by another person
- Amounts that have not been paid and are not due in the tax year

Inflation indexation of the base cost is not allowed.

Special rules apply to the base cost valuation of an asset acquired before 1 October 2001. Subject to loss limitation rules, in principle, a taxpayer may elect to use the market value of such asset on 1 October 2001 as the base cost of the asset (the asset must have been valued before 30 September 2004) or, alternatively, it may use a time-apportionment basis, which is determined by a formula, effectively splitting the gain between the components from before 1 October 2001 and after that date.

A disposal is defined as an event that results in, among other things, the creation, variation or extinction of an asset. It includes the transfer of ownership of an asset, the destruction of an asset and the distribution of an asset by a company to a shareholder. For CGT purposes, a company does not dispose of assets when it issues shares or when it grants an option to acquire a share or debenture in the company.

The proceeds from the disposal of an asset by a taxpayer are equal to the amount received by, or accrued to, the taxpayer as a result of the disposal less any amount that is or was included in the taxpayer’s taxable income for income tax purposes. If a company makes a dividend distribution of an asset to a shareholder, it is deemed to have disposed of the asset for proceeds equal to the asset’s market value.

Rollover relief is available in certain circumstances including destruction of assets and scrapping of assets.

All related-party transactions are deemed to occur at market value, and restrictions are imposed on the claiming of losses incurred in such transactions.

Corporate emigration, which occurs when the effective management of the company is moved outside South Africa, triggers a deemed disposal at market value of the assets of the company, followed by a deemed dividend in specie.

Subject to certain exceptions, disposals of equity shares in foreign companies to nonresidents are exempt from CGT if the disposing party has held at least 10% of the equity in the foreign company for at least 18 months.

Administration. The tax year for a company is its financial year. A company must file its annual tax return in which it calculates its taxable income and capital gains, together with a copy of its audited financial statements, within 60 days after the end of its financial year. Extensions of up to 12 months after the end of the financial year are usually granted. No payment is made with the annual return.

The tax authorities issue an official tax assessment based on the annual return. The company must pay the balance of tax due after
deduction of provisional payments within a specified period after receipt of the assessment.

Companies must pay provisional tax in two installments during their tax year. The installments must be paid by the end of the sixth month of the tax year (the seventh month if the tax year begins on 1 March) and by the end of the tax year. The second payment must generally be accurate to within 80% of the actual tax for the year. A third (“topping up”) payment may be made within six months after the end of the tax year. If this payment is not made and if there is an underpayment of tax, interest is charged from the due date of the payment. A 20% penalty is charged if the total provisional tax paid for the year does not fall within certain prescribed parameters.

An e-filing system allows provisional payments and tax returns to be submitted electronically.

Dividends

South African dividends. Dividends paid by South African-resident companies are generally exempt from mainstream tax in the hands of the recipients and, accordingly, recipients may not deduct expenses relating to the earning of these dividends, such as interest and other expenses incurred on the acquisition of their shares.

Foreign dividends. Foreign dividends are dividends paid by non-resident companies and headquarter companies. Most foreign dividends accruing to or received by South African residents are taxable. The following foreign dividends are exempt from tax:

- Dividends paid by a foreign company to a South African resident holding at least 10% of the equity and voting rights in the foreign company
- Dividends paid by a controlled foreign company (CFC) to a South African resident (subject to certain limitations)
- Dividends paid by a foreign company that is listed on the JSE
- Dividends paid by a foreign company to another foreign company that is resident in the same country as the payer

For dividends that are not exempt, a rebate may be claimed. The rebate is limited to the amount of South African tax attributable to the foreign dividend. Any excess of the foreign tax over the allowable rebate may be carried forward for a period of seven years. The excess taxes are available for set-off against foreign-source income in subsequent years (the calculation is done on a pooled basis).

A South African resident (company or individual) holding 10% or more of the equity share capital of a nonresident company is exempt from tax on all dividends (including those on preferred shares) received from the nonresident. The reduced participation rate of 10% took effect on 1 April 2012 for companies and on 1 March 2012 for individuals and applies to dividends received or accrued on or after that date.

Recipients of dividends that are not exempt are taxed on a formula basis.

Withholding tax. Dividend withholding tax at a rate of 15% is imposed, subject to treaty rates. For further details, see Secondary tax on companies and new dividend withholding tax.
Foreign tax relief. In the absence of treaty relief provisions, unilateral relief is granted through a credit for foreign taxes paid on foreign income, foreign dividends, foreign taxable capital gains, or income attributed under the CFC rules (see Section E), limited to the lesser of the actual foreign tax liability and the South African tax on such foreign income. The credit may be claimed only if the income is from a non-South African source. Excess credits may be carried forward, but they are lost if they are not used within seven years.

New rules allow a credit to be claimed with respect to tax on income from services rendered in South Africa. These credits cannot be carried forward.

Foreign taxes that cannot be claimed as a tax credit can generally be claimed as a deduction from taxable income.

C. Determination of trading income

General. The assessment to tax is based on taxable income determined in accordance with the Income Tax Act. Taxable income normally approximates profit calculated in accordance with International Financial Reporting Standards, before adjustment for specific allowances and nondeductible items.

To be eligible for deduction, expenditures must be incurred in the production of income and for purposes of trade, and must not be of a capital nature.

Prepayments of insurance, rent and certain other items may not be deducted in full in the tax year of payment unless either of the following applies:

- The related service or other benefit is enjoyed within six months after the end of the tax year of payment.
- The aggregate of such expenditure is less than R 80,000.

Nonresident companies are exempt from tax on South African-source interest income unless at any time during that year it carried on business in South Africa through a permanent establishment. Withholding tax on interest at a rate of 15% will be introduced on 1 March 2014. Relief may be available in treaties.

Inventories. Inventory is valued at the lower of cost or net realizable value. Last-in, first-out (LIFO) is not an acceptable method of valuation for tax purposes. Appropriate overhead expenses must be included in the valuation of inventory. Special rules apply to construction work in progress. Consumable stores and spare parts are included in inventory.

Tax depreciation (capital allowances)

Industrial plant and machinery. New plant and machinery that is brought into use in a manufacturing or similar process by other businesses is depreciated at a rate of 40% in the first year and at a straight-line rate of 20% for the second, third and fourth years. Used machinery or plant used in such a process qualifies for a 20% allowance per year over five years. The same allowances apply to foundations for plant and machinery if they are built specifically for particular machines and have a useful life limited to the life of the relevant machine.
SBCs (see Section B) qualify for a 100% deduction of the cost of new or used plant or machinery that is first brought into use on or after 1 April 2001 in a manufacturing or similar process. For other plant or machinery of an SBC, the following allowances are granted:

- 50% in the first year of use
- 30% in the second year of use
- 20% in the third year of use

**Industrial buildings.** A 5% annual straight-line allowance is granted on the cost of the construction of, and improvements to, industrial buildings erected by a taxpayer. Purchased industrial buildings generally qualify for annual straight-line allowances on the purchase price paid, excluding the amount attributable to the land, at the following rates:

- 2% if originally constructed before 1 January 1989
- 5% if constructed during the period of 1 January 1989 through 30 June 1996
- 10% if constructed during the period of 1 July 1996 through 31 March 2000
- 5% if constructed after 1 April 2000

**Hotels.** Construction of and improvements to hotels qualify for a 5% straight-line allowance. However, capital expenditure on the internal renovation of hotels qualifies for straight-line depreciation at an annual rate of 20%.

**Urban renewal.** The cost of erection of new buildings or renovation (including extension) of old buildings in certain depressed urban areas qualifies for allowances if the building is used by the taxpayer for the taxpayer’s own trade or is leased for commercial or residential purposes. If the building is new or significant extensions are made to an existing building, the allowance is 20% in the year of first occupation and 8% per year for the following 10 years. If a building is renovated and if the existing structural or exterior framework is preserved, the allowance is 20% per year for five years.

**Other commercial buildings.** An allowance of 5% of the cost is generally available on commercial buildings not qualifying for any of the above allowances.

**Wear-and-tear allowance for movables.** An annual “wear-and-tear” tax depreciation allowance on movable items may be calculated using the declining-balance method or the straight-line method, but the straight-line method is generally preferred by the Inland Revenue. The allowance may be claimed based on the value (generally the cost) of movable nonmanufacturing machinery and equipment used by the taxpayer for the purposes of its trade. Rates for the wear-and-tear allowance are not prescribed by statute, but certain periods of depreciation are generally accepted by the tax authorities. The following are some of the acceptable periods of straight-line depreciation.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aircraft (light passenger, commercial and helicopters)</td>
<td>4</td>
</tr>
<tr>
<td>Computers (mainframe)</td>
<td>5</td>
</tr>
<tr>
<td>Computers (personal computers)</td>
<td>3</td>
</tr>
</tbody>
</table>
Apportionment of the wear-and-tear allowances is required for assets acquired during the course of a year.

Any asset costing R 7,000 or less may be written off in the year of acquisition of the asset.

**Special capital allowances.** Subject to the approval of the Minister of Science and Technology, the cost of developing and registering patents, designs, copyrights or similar property, and related know-how and of discovering novel scientific and technological information qualifies for a 150% deduction in the year in which the costs are incurred.

The acquisition cost of patents, copyrights and similar property (other than trademarks) and of related know-how is deductible at a rate of 5% per year. The cost of designs is deductible at a rate of 10% per year.

The cost of goodwill and trademarks (acquired on or after 1 January 2004) is not depreciable for tax purposes.

Deductions with respect to restraint of trade payments are allowed over the period of restraint, with a minimum period of three years.

A 10% annual allowance is granted for the cost of new and unused pipelines used for transportation of natural oil, gas and refined products.

A 5% annual allowance is granted for the following:
- Water pipelines and electrical lines
- Railway lines used for the transportation of persons, goods and other items

Other special capital allowances are provided for expenditures on ships and aircraft, hotel equipment, scientific research, employee housing, plant and machinery of small business corporations (see Section B), aircraft hangars, aprons, runways and taxiways, and solar, wind and tidal equipment for the generation of electricity, as well as for certain capital expenditures for mining and agriculture, which are deductible in full against mining and agricultural income.

**Recapture.** The amount of tax depreciation claimed on an asset may be recouped (recaptured) when the asset is sold. In general, the amount recouped is the excess of the selling price over the tax value, but it is limited to the amount of tax depreciation claimed.

**Groups of companies.** Companies in a group may not share their tax losses with other profitable companies in the group.

Special rules provide income tax and CGT relief for transactions between 70%-held group companies and between shareholders and their companies. These transactions include the following:
• Asset-for-share transactions
• Amalgamation transactions
• Intragroup transactions
• Unbundling transactions
• Transactions relating to the liquidation, winding up and deregistration of companies

**Relief for losses.** Tax losses may not be carried back but may be carried forward indefinitely, provided there is trading in every tax year.

Foreign tax losses may be offset against foreign income only. If a foreign tax loss exceeds foreign income, the excess may be carried forward to offset foreign income in future years for an unlimited period.

**D. Other significant taxes**

The following table summarizes other significant taxes.

**E. Miscellaneous matters**

**Foreign-exchange controls.** Measures were introduced in the 1960s to stem the outflow of capital from South Africa and to ensure a measure of stability in currency markets.

Permission must be obtained from the South African Reserve Bank (SARB) for the remittance of management fees. Royalties are freely remittable if the license agreement has been approved by the SARB (see Debt-to-equity rules). The remittance of dividends requires an auditor’s certificate. South African companies raising loan financing offshore must obtain the authorization of the SARB regarding the terms and conditions. Foreign-equity investments are not restricted but share certificates must be endorsed “nonresident” by the SARB.

**Debt-to-equity rules.** The tax law includes measures that counter thin capitalization by adjusting both the interest rate and the amount of a loan based on arm’s length principles. These measures generally require a debt-to-equity ratio of no more than 3:1. However, the tax authorities have moved away from this ratio to require each company to consider its debt-equity mix on an arm’s length basis. In certain circumstances, the thin-capitalization rules do not apply to headquarter companies.

**Transfer pricing.** The South African tax law includes transfer-pricing provisions, which are based on the internationally accepted principles of transfer pricing. These provisions allow the South African tax authorities to treat any term or condition of a cross-border related-party transaction differently, but only to the extent that the term or condition differs from those that would
exist between unrelated parties. In addition, exchange control regulations discourage unreasonable pricing by requiring that many foreign contracts, such as license agreements, be approved by the Department of Trade and Industry before payment is allowed.

**Antiavoidance legislation.** In addition to transfer-pricing rules (see *Transfer pricing*), South African law contains general antiavoidance provisions that target “impermissible tax avoidance arrangements.” Broadly, an impermissible tax avoidance arrangement is an arrangement that seeks to achieve a tax benefit as its sole or main purpose and was entered into in a manner that would not normally be employed for bona fide business purposes, lacks commercial substance or misuses or abuses other provisions of the tax law. The South African Revenue Service has wide powers in determining the tax consequences of an impermissible tax avoidance arrangement.

**Personal service companies.** The interposition of a corporate entity (personal service company) to disguise employment income does not prevent the imposition of employee withholding tax on fees earned. These companies are taxed at a rate of 28% and may claim only certain deductions, such as salaries, legal expenses, bad debts, contributions by the employer to pension and provident funds and medical aids, tax depreciation, rental expenses, finance charges, insurance, repairs, and fuel and maintenance for assets. The expenses with respect to premises and assets are allowed as deductions only if they are incurred wholly or exclusively for purposes of trade.

**Controlled foreign companies.** Legislation regulates the taxation of certain income of controlled foreign companies (CFCs). Key aspects of the legislation are described below.

Net foreign income, including capital gains, derived by a CFC may be attributed proportionately to any South African-resident beneficial owner of the CFC (other than a headquarter company) that has an interest of 10% or more in the CFC. The net foreign income is calculated using South African tax principles, but generally ignoring passive income flows between CFCs in a 70%-held group.

A company is considered to be a CFC if more than 50% of the participation or voting rights of the company is held directly or indirectly by South African residents. In determining whether a company is a CFC, the participation rights and voting rights of a headquarter company (see *Headquarter companies*) are ignored. In addition, for a foreign listed company or a collective-investment portfolio, any person who holds less than 5% of the participation rights of the foreign company is deemed not to be a resident unless connected parties hold more than 50% of the participation rights or voting rights of the company. The CFC attribution rules do not apply to a resident if the resident (together with any connected person) holds less than 10% of the participation rights and voting rights.

A CFC’s income is not attributed to a South African resident to the extent that the income is effectively connected to a business operation carried on through a “foreign business establishment”
(FBE). In broad terms, an FBE is a fixed place of business that is suitably equipped with on-site operational management, employees, equipment and other facilities for the purpose of conducting the primary operations of the business and that is used for a bona fide business purpose and not for tax avoidance (the place of business may be located elsewhere than in the CFC’s home country). Several antiavoidance exceptions exist with respect to the measure described in this paragraph. Also, if the tax payable to a foreign government equals at least 75% of the tax liability that would have arisen in South Africa, no income needs to be imputed into the resident’s taxable income.

See Section B for information regarding foreign attributable tax credits and carryforward rules.

**Headquarter companies.** The headquarter company regime was introduced to encourage foreign companies to use South Africa as their base for investing in Africa. Broadly, headquarter companies are exempt from dividend and royalty withholding tax and from interest withholding tax (after it takes effect on 1 March 2014).

A headquarter company is a South African-resident company that has elected to be treated as a headquarter company and that satisfies all of the following conditions:

- Each shareholder (alone or together with its connected persons, whether resident or nonresident) holds 10% or more of the equity shares and voting rights in the headquarter company.
- At least 80% of the cost of the headquarter company’s assets (excluding cash) is attributable to investments in equity shares, amounts loaned or advanced and intellectual property in nonresident companies in which at least a 10% equity interest is held.
- If the gross income of the company exceeds R 5 million, at least 50% of that gross income must consist of rentals, dividends, interest, royalties, service fees received from foreign companies, or proceeds from the sale of equity shares or intellectual property in such foreign companies.

A headquarter company must submit an annual report to the Minister of Finance.

The CFC imputation rules do not apply to headquarter companies, unless 50% or more of its shares are held by South African residents. As a result of this concession, the net income of the headquarter company’s foreign subsidiaries is not taxed in its hands, but in the hands of the ultimate shareholders if they are South African residents.

Headquarter companies are also exempt from the transfer-pricing and thin-capitalization rules if they on-lend loan proceeds received from their offshore shareholders to their foreign subsidiaries in which they hold at least 10%. The transfer-pricing rules also do not apply to back-to-back royalties under licenses from nonresidents.

**F. Treaty withholding tax rates**

The rates reflect the lower of the treaty rate and the withholding rate under domestic tax law.

</table>

(a) Effective from 1 April 2012, dividends are subject to withholding tax in South Africa.

(b) Interest withholding tax of 15%, which will be effective from 1 March 2014, will apply to nonresidents only.

(c) In general, royalties are exempt from withholding tax if they are subject to tax in the recipient's country. Otherwise, the rate is 12% until 28 February 2014, and 15%, effective from 1 March 2014. These rates may be reduced by tax treaties as shown in the table above.

(d) In general, royalties are exempt if they are subject to tax in Israel. Otherwise, the rate is in accordance with South African domestic law, as discussed in footnote (c). If royalties derived from cinematographic and television films are subject to tax in Israel, the rate is 4.5%.

(e) The rate applies only if the recipient is the beneficial owner of the royalties.

(f) The 6% rate applies to royalties paid for copyrights of literary, dramatic, musical or other artistic works (excluding royalties with respect to motion picture films, works on film or videotape or other means for use in connection with television broadcasting), as well as for the use of, or the right of use, computer software, patents or information concerning industrial, commercial or scientific experience (excluding information provided in connection with a rental or franchise agreement). The 10% rate applies to other royalties.

(g) The 10% rate applies to royalties paid for copyrights of literary, artistic or scientific works, including cinematographic films, tapes, discs, patents, know-how, trademarks, designs, models, plans or secret formulas. The 10% rate applies to the “adjusted amount” of royalties paid (that is, 70% of the gross amount of royalties) for industrial, commercial or scientific equipment.

(h) The 5% rate applies to royalties paid for copyrights of literary, artistic and scientific works. The 7% rate applies to royalties paid for patents, trademarks, designs, models, plans or secret formulas, as well as for industrial, commercial or scientific equipment.

(i) The 5% rate applies to royalties paid for copyrights of cultural, dramatic, musical or other artistic works or for industrial, commercial and scientific equipment. The 10% rate applies to other royalties.

(j) The 15% rate applies to royalties paid for the use of trademarks. The 10% rate applies to other royalties.

(k) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 10% rate applies to other dividends.

(l) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.

(m) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 10% rate applies to other dividends.

(n) The 7.5% rate applies if the beneficial owner is a company that owns at least 25% of the shares or voting power. The 15% rate applies to other dividends.

(o) The 8% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.
(p) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 15% rate applies to qualifying dividends paid by a property investment company that is a resident of a contracting state. The 10% rate applies to other dividends.

(q) The 5% rate applies if the beneficial owner is a company that owns at least 20% of the shares. The 15% rate applies to other dividends.

(r) The 7.5% rate applies if the beneficial owner is a company that owns at least 10% of the shares or voting power. The 10% rate applies to other dividends.

(s) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.

(t) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 15% rate applies to other dividends.

(u) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 20% rate applies to other dividends.

(v) The 10% rate applies if the beneficial owner is a company that owns at least 15% of the shares. The 20% rate applies to other dividends.

(w) The 10% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 15% rate applies to other dividends.

(x) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the voting shares of the company paying the dividends during the six-month period immediately before the end of the accounting period for which the distribution of profits takes place. The 15% rate applies to other dividends.

(y) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares for an uninterrupted period of two years before the payment of the dividend. The 15% rate applies to other dividends.

(z) The 10% rate applies if the beneficial owner is a company that owns at least 30% of the shares in the company paying the dividends, and holds a minimum direct investment of US$100,000 in that company. The 15% rate applies to other dividends.

(aa) The 0% rate applies to government institutions and unrelated financial institutions. The 10% rate applies in all other cases.

South Africa has ratified comprehensive tax treaties with Gabon, Kenya and Sudan.

South Africa has signed a comprehensive tax treaty with Chile and protocols to existing comprehensive tax treaties with Malta, Norway and Oman. However, these agreements have not yet been ratified.

South Africa is currently negotiating comprehensive tax treaties with Bangladesh, Cameroon, Cuba, Estonia, Hong Kong SAR, Isle of Man, Latvia, Lithuania, Madagascar, Morocco, Qatar, Senegal, Serbia, Sri Lanka, Syria, the United Arab Emirates and Vietnam, but these treaties have not yet been signed.

South Africa is renegotiating tax treaties with Belgium, Botswana, Brazil, the Czech Republic, Cyprus, Germany, India, Indonesia, Kuwait, Lesotho, Luxembourg, Malawi, Mauritius, Mozambique, Namibia, Singapore, Swaziland, Switzerland, Turkey, Zambia and Zimbabwe.

B. Taxes on corporate income and gains

Corporate income tax. Corporate tax is imposed on the income of companies and other entities and organizations that have a separate legal status. Resident entities are taxable on their worldwide income. The following entities are considered to be resident entities:

- An entity incorporated under Spanish law
- An entity having its legal headquarters or its effective place of management in Spain
In addition, the tax authorities may presume that an entity resident in a tax haven or in a country with no income taxation is tax resident in Spain if any of the following circumstances exist:

- The majority of its assets is directly or indirectly located in Spain.
- A majority of its rights should be exercised in Spain.
- The principal activity of the entity is carried out in Spain.

The above measure does not apply if business reasons justify the effective performance of operations and exercise of management in such foreign jurisdiction.

Nonresident entities are taxable only on Spanish-source income, which includes income from any kind of business activity conducted in Spain through a branch, office or other permanent establishment. Nonresident companies or individuals must appoint a fiscal representative if they are conducting business activities in Spain through a permanent establishment or if certain other specified circumstances occur.

**Tax rates.** The general tax rate for residents and nonresidents that conduct business activities in Spain through a permanent establishment is 30%. Entities that earned (on a group basis) net revenue of less than €10 million in the immediately preceding tax year are taxed at a rate of 25% on profits up to €300,000, and at a rate of 30% on the tax base exceeding this amount. Effective for fiscal years beginning during 2009, 2010, 2011, 2012 and 2013, the tax rate applicable to small and medium-sized enterprises with fewer than 25 employees that maintain or increase the number of employees and that have net revenues of less than €5 million is 20% on the tax base up to €120,202.41 (effective for fiscal years commencing during 2011, 2012 and 2013, €300,000) and 25% on the tax base exceeding this amount. Other tax rates apply to certain specified entities.

In addition to other tax benefits, companies licensed to operate in the Canary Islands Special Zone (ZEC) are subject to a reduced tax rate of 4% if certain conditions are satisfied. Such reduced rate applies up to a maximum amount of taxable income. This maximum amount equals the lesser of the following:

- The ratio of income derived from qualified ZEC transactions with respect to total income
- An amount determined on the basis of the jobs created, which varies according to the type of activity of the company

The amount described in the second bullet above is determined based on the following table.

<table>
<thead>

</tbody>
</table>

In general, nonresidents operating in Spain without a permanent establishment are taxable at a general rate of 24% (for the 2012
and 2013 tax years, the tax rate is 24.75%). Nonresidents without a permanent establishment that operate in Spain may deduct any expense allowed by the Personal Income Tax Law, as provided in Law 36/2006, 28 November (this law also refers to the Corporate Income Tax Law to determine the net tax base in the case of economic activities), if the taxpayer is resident in a European Union (EU) member state and can prove that these expenses are directly linked to their Spanish-source income and have a “direct and fully inseparable nexus” with the activity performed in Spain. Dividends and interest received by nonresidents are subject to a final withholding tax at a rate of 19% (for the 2012 and 2013 tax years, the tax rate is 21%). The tax rate applicable to income from reinsurance operations is 1.5%. A 4% tax rate applies to Spanish-source income generated by companies resident abroad operating ships and aircraft in Spain. Interest income is exempt from tax if the recipient is resident in an EU member state (or if the recipient is an EU permanent establishment of a resident in another EU member state) that is not on the Spanish tax haven list. Interest paid to nonresidents on Spanish Treasury obligations is exempt from tax. Income derived by nonresidents without a permanent establishment in Spain from bonds issued in Spain by nonresidents without a permanent establishment in Spain and from bank accounts is exempt from tax in Spain. Effective from 1 July 2011, royalties paid to associated EU resident companies or permanent establishments are exempt from tax in Spain if specific conditions are met.

In addition to nonresident income tax at a rate of 30%, nonresidents operating in Spain through a permanent establishment are subject to a branch remittance tax at a rate of 19% (for the 2012 and 2013 tax years, the tax rate is 21%), unless one of the following exemptions applies:

- Branches of EU resident entities, other than tax-haven residents, are exempt from the tax.
- A branch can be exempt from tax if Spain and the country of residence of its head office have entered into a double tax treaty that does not provide otherwise and grants reciprocal treatment.

**Capital gains.** Spanish law generally treats capital gains as ordinary income taxable at the regular corporate tax rate. Capital gains may qualify for a 12% tax credit if conditions for reinvestment relief are satisfied.

Capital gains realized by nonresidents without a permanent establishment in Spain are taxed at a rate of 19% (for the 2012 and 2013 tax years, the tax rate is 21%). Capital gains on movable property, including shares, are exempt from tax if the recipient is resident in an EU country that is not on the Spanish tax haven list, unless the gains are derived from the transfer of shares and either of the following circumstances exists:

- The seller directly or indirectly owns at least 25% of the company.
- The company’s assets directly or indirectly consist primarily of Spanish real estate.

If a nonresident that does not have a permanent establishment in Spain disposes of Spanish real estate, a 3% tax is withheld by the buyer from the sale price, with certain exceptions. The tax withheld constitutes an advance payment on the final tax liability of the seller.
Capital gains derived by nonresidents without a permanent establishment in Spain from the reimbursement of units in Spanish investment funds or from the sale of shares traded on a Spanish stock exchange are exempt from tax in Spain if the seller is resident in a jurisdiction that has entered into a tax treaty with Spain containing an exchange of information clause.

**Administration.** The tax year is the same as the accounting period, which may be other than a calendar year. The tax year may not exceed 12 months. The tax return must be filed within 25 days after six months following the end of the tax year. In April, October and December of each calendar year, companies and permanent establishments of nonresident entities or individuals must make payments on account of corporate income tax or nonresidents income tax, respectively, equal to either of the following:

- Eighteen percent of the tax liability for the preceding tax year.
- An amount calculated by applying $5/7$ of the corporate income tax rate (however, see next paragraph) to the profits for the year as of the end of the month preceding the date of the payment and then subtracting from the result tax withheld from payments to the company and advance payments of tax previously made.

This alternative is compulsory for companies with turnover of more than €6,010,121.04 in the immediately preceding tax year.

Effective for 2012 and 2013, the tax rate mentioned in the second bullet above (that is, $5/7$ of the corporate income tax rate) is increased for certain taxpayers, in accordance with their revenue in the immediately preceding tax year. The following are the tax rates:

- Revenue between €10 million and €20 million: $15/20$ of the corporate income tax rate
- Revenue between €20 million and €60 million: $17/20$ of the corporate income tax rate
- Revenue exceeds €60 million: the tax rate equals $19/20$ of the corporate income tax rate

Effective for 2012 and 2013, for taxpayers with revenue exceeding €20 million, their prepayment must not be lower than 12% of the positive earnings figure recorded in the profit-and-loss account, subtracting only the advance payments of tax previously made (that is, the so-called minimum prepayment). The minimum prepayment rate is 6% if the relevant entity derives at least 85% of its income from either of the following:

- Dividends or capital gains exempt under the participation exemption regime (see Participation exemption regime and foreign tax relief) or through foreign permanent establishments that are also exempt from tax in Spain
- Dividends that benefit from a 100% deduction under the domestic tax credit rules (see Dividends)

**Dividends.** Dividends received by a resident company from another resident company are subject to corporate tax, as well as to a 19% withholding tax (for the 2012 and 2013 tax years, the withholding tax rate is 21%), which may be credited against the corporate tax. However, the withholding tax is not imposed if, at the time of the distribution, the recipient of the dividend has owned at least 5% of the payer for an uninterrupted period of more than one year. Under Spanish domestic law, in general, a tax credit of 50% is granted to a resident company that receives dividends. The credit
is increased to 100% if, at the time of the distribution, the company receiving the dividend has owned (or is committed to own) at least 5% of the paying company for an uninterrupted period of one year (the shareholding interest percentage may be reduced to 3% under certain circumstances). The 50% or 100% tax credit does not apply if the shares on which the dividends are paid are purchased within a two-month period before the date of distribution of the dividends and such shares or similar shares are sold within the two-month period after such date. The credit does not apply if the dividend does not increase taxable income or if the distribution causes depreciation in the value of the shares (some exceptions are allowed). The credit may be carried forward to the following seven years.

A tax credit is granted to resident companies that derive income from transfers of shares of other resident companies subject to Spanish corporate income tax if, at the time of transfer, the company has owned at least 5% of the share capital of the other company for an uninterrupted one-year period. This credit is calculated by applying the general rate (currently, 30%) to the portion of the capital gains representing undistributed profits earned during the period the shares were held by the company. The tax credit may be carried forward to the following seven years.

Distributions by Spanish subsidiaries to parent companies in EU member states that are not on the Spanish tax haven list are exempt from withholding tax if the parent company owns directly or indirectly at least 5% of the subsidiary for an uninterrupted period of at least one year and if certain other requirements are met. The one-year holding period requirement may be satisfied at the date of the distribution or subsequent to such date. An anti-avoidance provision applies in situations in which the ultimate shareholder is not an EU resident.

**Foreign portfolio holding company regime.** A special tax regime applies to companies that have foreign portfolio holding company (entidades de tenencia de valores extranjeros or ETVE) status. ETVEs are ordinary Spanish companies engaged in the administration and management of participations in the equity of non-resident entities. ETVEs may also be engaged in other activities. In addition to the general exemption for dividends and capital gains derived from shares in qualifying foreign companies as described in Participation exemption regime and foreign tax relief, an ETVE benefits from certain other tax advantages, including the following:

- No withholding tax is imposed on distributions made by ETVEs out of reserves derived from tax-exempt foreign-source dividends and capital gains to nonresident shareholders who are not tax-haven residents.
- Capital gains derived by foreign shareholders of ETVEs from transfers of shares in ETVEs are not taxed to the extent that the capital gain corresponds to qualifying exempt dividends and gains (realized or unrealized) derived at the ETVE level if the shareholder is not resident in a tax haven.

**Participation exemption regime and foreign tax relief.** The exemption method may be used to avoid double taxation on dividends received from abroad and on capital gains derived from transfers of shares of foreign companies if the following requirements are met:
• At the time of the distribution of the dividend or the generation of the capital gain, the Spanish company has owned, directly or indirectly, at least 5% of the share capital of the nonresident company for an uninterrupted period of at least one year. ETVEs are not required to hold the 5% share interest in the foreign company if the acquisition cost exceeds €6 million. For dividends, the one-year period can be completed after the distribution. In addition, the time period in which the participation is held by other group entities is taken into account for purposes of the computation of the one-year period.

• The foreign company is subject to and not exempt from corporate tax in a tax system that is similar to Spain’s corporate tax system. This requirement is considered to be met if the subsidiary is resident in a country that has entered into a double tax treaty with Spain containing an exchange-of-information clause.

• The foreign company is not resident in a country identified by the Spanish tax authorities as a tax haven.

• The foreign company derives at least 85% of its income from business activities conducted outside Spain.

For capital gains derived from transfers of shares of foreign companies, if the subject-to-tax and business-income requirements (outlined above) are not complied with during the entire holding period of the shares, Spanish law provides for specific criteria to calculate the amount of exempt capital gains.

If the exemption method does not apply, a tax credit is allowed for underlying foreign taxes paid by a subsidiary on the profits out of which dividends are paid and for foreign withholding taxes paid on dividends.

The credit method (see below) and exemption cannot be used with respect to the same income. Tax credits granted under the credit method may be carried forward for 10 years.

A tax credit is available for resident entities deriving foreign-source income that is effectively taxed abroad. Such credit is equal to the lesser of the following:

• The Spanish corporate tax payable in Spain if the foreign income had been obtained in Spain

• The tax effectively paid abroad on the foreign-source income (in accordance with applicable double tax treaty provisions)

C. Determination of taxable income

General. Taxable income is the company’s gross income for the tax year, less certain deductions. It is determined from the annual financial statements prepared under Spanish generally accepted accounting principles (Spanish GAAP), as adjusted for certain statutory tax provisions. Spanish GAAP follows several criteria contained in International Financial Reporting Standards (IFRS).

In general, all necessary expenses incurred in producing income during the year and depreciation on income-producing property may be deducted from gross income to arrive at taxable income.

Certain items are not deductible from gross income, such as the following:

• Penalties and fines

• Corporate income tax payments

• Gifts and donations
• Expenditures for the improvement or enhancement of capital assets
• Amounts directly or indirectly remunerating own equity (for example, dividends and other payments made by entities in favor of their shareholders)
• Expenses related to services carried out by persons or entities that are resident in a listed tax haven, unless the taxpayer can prove that the expense relates to an effectively performed transaction
• Depreciation charges that exceed the maximum rates prescribed by law, unless it can be demonstrated that the rates used correspond to the actual depreciation incurred
• Interest expenses on intragroup financing related to the acquisition (or equity increase) of a participation in group entities, unless valid business reasons for such transactions are proven

Inventories. The corporate tax law does not prescribe permissible methods for the valuation of inventory. Consequently, any valuation method allowed under the Spanish accounting rules may be used for tax purposes. Weighted average price is the generally accepted method, but first-in, first-out (FIFO) is also accepted. A common method is required with regard to inventories of the same nature and use.

Provisions. Provisions that are properly recorded are generally tax-deductible except for those specified by law.

Depreciation. All fixed or movable tangible assets (except land) that are owned by and used in the trade or business of a company are depreciable if their useful life exceeds a tax year. Intangible assets may be amortized if they depreciate and have a limited useful life, such as patents. They are generally amortized at an annual rate of 10%, unless it can be proved that their useful life is shorter than 10 years. Under certain circumstances, goodwill and intangible assets with an indefinite useful life are amortizable for tax purposes. Goodwill recorded in the books of a Spanish corporate taxpayer may be amortized for tax purposes at a maximum rate of 5% if certain requirements are satisfied. During the 2012 and 2013 tax years, the maximum annual rate to amortize goodwill is 1%, while the maximum annual rate to amortize intangible assets with an indefinite life is 2%.

Under certain conditions, Spanish-resident entities are entitled to amortize for tax purposes the financial goodwill embedded in shares of qualified foreign subsidiaries with respect to the following acquisitions:
• Acquisitions carried out before 21 May 2011 in non-EU countries if it can be proven that cross-border mergers cannot be accomplished
• Other acquisitions, carried out before 21 December 2007

The amortization of financial goodwill is set at a maximum rate of 5%. However, for 2011, 2012 and 2013, the maximum rate is set at 1%.

Depreciation methods are restricted to the straight-line method and the declining-balance method. The straight-line method may be used for any depreciable asset. The declining-balance method may be used only for certain new tangible assets (industrial and
farming machinery, vehicles, information systems and so forth) that have an anticipated useful life of three years or more.

The basis for depreciation is the acquisition price of assets purchased by the company or the manufacturing cost of assets manufactured by the company. The acquisition price includes all related costs, such as customs duties, transportation costs and installation expenses.

Maximum depreciation rates for tax purposes are fixed by law. The rates vary depending on the industry. The following are general straight-line rates and periods of depreciation for certain assets.

Companies may use higher rates if they can demonstrate that the actual depreciation is in excess of that allowed by law.

To be deductible, the depreciation amount must be recorded in the company’s accounting books (some exceptions to this requirement may apply) and must be “effective,” that is, it must correspond to the actual depreciation of the asset. The second condition is met if the depreciation amount is calculated in accordance with the rates prescribed by law or with other rates that have been expressly approved by the tax authorities. Otherwise, the “effectiveness” of the depreciation must be demonstrated. On request, the tax authorities may grant approval for accelerated depreciation if the company presents a plan specifying the assets, the date and price of the acquisition, the depreciation rates and the annual depreciation allowance desired, and reasons to support the adoption of such a plan.

Investments in new tangible assets and real estate in Spain or abroad carried from 2009 through 31 March 2012 may qualify for a free tax depreciation allowance. For investments made during tax years that began during 2009 and 2010, such tax benefit is conditioned on the maintenance of the level of employment. Any depreciation allowance on such assets that was pending to be fully accelerated by 31 March 2012 will still be available to be used but will be subject to certain limitations during the 2012 and 2013 tax years.

Gross income derived from certain intangible assets may be reduced by 50% for tax purposes if certain criteria are met. The following intangibles are subject to this special regime:
- Patents
- Drawings
- Models and blueprints
- Formulas or secret procedures
- Rights regarding information pertaining to industrial, commercial or scientific experiences
The special regime described above is not available in the fiscal year following the year in which the amount of income exceeds six times the cost of the asset.

**Relief for losses.** Effective for tax periods beginning in or after 2012, tax losses may be carried forward and offset against future taxable income for a period of 18 tax years. Previously, the carry-forward period was 15 years. For newly established enterprises, the 18-year period begins in their first profitable year for tax purposes. Tax losses cannot be carried back.

Effective for 2012 and 2013, the following transitory restrictions on the compensation of tax losses carried forward are imposed on taxpayers with revenue exceeding €20 million in the immediately preceding year:

- If revenue within the 12 months before the beginning of the tax period ranged from €20 million to €60 million, tax losses carried forward may be offset up to a maximum amount of 50% of taxable income.
- If revenue in the period mentioned above exceeded €60 million, the limitation equals 25% of taxable income.

**Groups of companies.** A group of companies may file a consolidated tax return if the election to apply this regime is carried out before the beginning of the tax year in which the regime is to be applied and if the tax authorities are notified of the election. After the group elects taxation under the consolidated regime, the regime applies indefinitely, provided that certain requirements are satisfied. For tax purposes, a group of companies is defined as a group of corporations resident in Spain controlled by a parent corporation that is a resident of Spain and that is not controlled by another resident company. For this purpose, corporations include stock companies (*sociedades anónimas*, or SAs), limited liability companies (*sociedades limitadas*, or SLs) and limited partnerships (*sociedades comanditarias por acciones*, or SCpAs). The parent company may adopt any of these legal forms or, otherwise, it must have legal personality and be subject to and not exempt from corporate income tax. Registered branches of nonresident entities may qualify as controlling top entities in consolidated groups if certain requirements are met.

A company is deemed to control another company if, on the first day of the tax year for which the consolidated regime applies, it satisfies the following requirements:

- It owns, directly or indirectly, at least 75% of the other company’s share capital (70% for companies quoted on the stock exchange) and it maintains such ownership for the entire tax year of consolidation.
- It is not subject to certain look-through tax regimes.
- It is not a subsidiary of another domestic controlling company.

Tax-exempt companies, companies taxed at a different rate than the parent company and companies in specified legal situations, such as bankruptcy, may not be part of a group of companies.

Pre-consolidation losses can be used only up to the amount of the individual positive tax base that is aggregated to the consolidated tax base.

E. Miscellaneous matters

Foreign-exchange controls. Exchange controls are administered by the Bank of Spain and the Ministry of Economy and Finance. Exchange controls were liberalized several years ago. As a result, only a few, simple reporting requirements are now imposed, primarily for statistical purposes.

Restrictions on the deduction of financial expenses. Effective for tax years beginning in 2012 and future tax years, the thin-capitalization rule (debt-to-equity ratio of 3:1) is abolished and other limitations on the deductibility of financial expenses have been introduced. In general, net interest expenses exceeding 30% of earnings before interest, tax, depreciation and amortization (EBITDA), with some adjustments, may not be claimed as a deduction for tax purposes in the year of their accrual (with some exceptions, such as a minimum allowance of €1 million per year). The excess may be subject to carryforward in the following 18 years. This restriction applies regardless of whether the interest is paid to a related party or an unrelated lender. In addition, as mentioned in General in Section C, interest expense on intragroup financing related to the acquisition (or equity increase) of participation in group entities is disallowed unless valid business reasons for such transactions are proven.

Antiavoidance legislation. To prevent fraud, the tax code contains several antiavoidance measures in various chapters. Substance-over-form principles apply.
Controlled foreign companies. Under controlled foreign company (CFC) rules contained in the corporate income tax law, Spanish resident companies must include in their tax base certain passive income derived by their foreign subsidiaries if certain control and effective taxation conditions are satisfied. Significant exceptions apply to these rules.

These rules do not apply to EU-controlled subsidiaries if the Spanish shareholder proves that the incorporation of the foreign entity was undertaken for sound business reasons and such entity carries on business activities.

Transfer pricing. Spanish law includes the arm’s length principle and the requirement of documenting all related-party transactions. The arm’s length principle applies to all transactions carried out by taxpayers with related parties. The following are the principal aspects of the law:

- Taxpayers must use arm’s length values in their tax returns. As a result, taxpayers bear the burden of proof on transfer-pricing issues.
- Organization for Economic Cooperation and Development (OECD) guidelines and pricing methodology apply.
- The law provides for secondary adjustments. Under this measure, if the agreed value in a transaction differs from the normal market value, the difference between the values is recharacterized by following a substance-over-form approach. In particular, for a transaction between a company and a shareholder, the difference (proportionally to the participation in the entity) is considered a dividend if such difference is in favor of the shareholder or a contribution by the shareholder to the entity’s equity if the difference is in favor of the entity.
- Advance Price Agreements (APAs) may be negotiated. They apply to the current year, the preceding year and the following four years.
- Statutory documentation requirements in line with the guidelines of the EU Joint Transfer Pricing Forum entered into force on 19 February 2009. This documentation is required to support the taxpayer’s transfer-pricing policy regarding domestic and international transactions.
- Penalties and delay interest may be imposed. If the documentation is correct, the tax authorities do not impose a penalty with respect to a transfer-pricing assessment. However, the absence (or incompleteness) of documentation is subject to penalties, even if no adjustments are assessed.

Regulations provide the following three exceptions to the obligation to prepare statutory transfer-pricing documentation:

- When the transaction takes place between entities that form part of a Spanish tax consolidated group
- When the transaction is carried out between members of an Economic Interest Grouping (Agrupaciones de Interés Económico) or a Temporary Business Alliance (Uniones Temporales de Empresas)
- When the transaction is carried out within the scope of a public stock offering

Royal Decree 897/2010 introduced the following exceptions regarding the statutory documentation requirements, effective from 2010:
• Total transactions with the same entity not exceeding €250,000 per year need not be documented.
• Total transactions with the same entity not exceeding €100,000 per year must not be documented if the company is deemed a “small or medium size enterprise.”

Some specified transactions must be documented in any case, such as transactions performed with group “related parties” that are tax resident in a tax-haven jurisdiction. Article 16.3 of the Spanish Corporate Income Tax Act provides a definition of “related parties.”

In addition, transactions performed with related or unrelated residents of listed tax havens must comply with the arm’s length principle and are subject to statutory documentation requirements.

**New rules under discussion.** Certain additional tax measures to increase the collection of taxes by the Spanish tax authorities and improve business activity are currently under discussion in the Spanish parliament and are expected to be effective from 1 January 2013. The most relevant of these tax measures are discussed below.

For entities with revenue exceeding €10 million, a temporary restriction will be imposed on its amortization or depreciation for tax purposes of fixed, intangible and real estate assets. This restriction will apply for tax years commencing in 2013 and 2014. It will not apply to assets that follow a special amortization (or depreciation) regime authorized by the Spanish tax authorities. The restriction implies that the tax-deductible expense be limited to 70% of the maximum depreciation or amortization amount in accordance with the corporate income tax regulations. The depreciation expense not taken in such tax years will be rolled forward and become deductible for tax purposes after the conclusion of the useful life of each of the respective assets.

In the 2013 tax year, a voluntary step-up of the tax value of tangible fixed assets, real estate investments and assets leased under financial lease agreements will be available for Spanish resident companies and Spanish permanent establishments through the application of percentages (which will be approved by a future regulation) to the assets’ book value and accumulated depreciation. This step-up will be subject to, among other conditions, the payment of a 5% charge.

**F. Treaty withholding tax rates**

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

(a) Distributions by Spanish subsidiaries to parent companies in EU member states are exempt from withholding tax if the parent company owns at least 5% of the subsidiary for an uninterrupted period of at least one year and if certain other requirements are met. The one-year holding period requirement may be satisfied at the date of the distribution or subsequent to such date. An anti-avoidance provision also applies in situations in which the ultimate shareholder is not an EU resident.

(b) Interest paid to an EU resident without a permanent establishment in Spain is exempt from tax if the EU country is not on the Spanish tax haven list.

(c) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 75% of the capital of the distributing company. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 10% of the capital of the distributing company.

(d) Certain interest payments are not subject to withholding tax.

(e) The treaty withholding rate tax is increased to 15% in certain circumstances if the recipient is not a corporation or if the shareholding does not exceed a certain percentage.

(f) A 14% rate applies to royalties paid for artistic, scientific or literary works.

(g) Interest paid to the government or central bank of the other contracting state is exempt from tax if the recipient is the beneficial owner of the interest. The government of the state of the payer may authorize an exemption for interest paid to a beneficial recipient other than the government or central bank of the other contracting state.

(h) See Section B.

(i) The treaty provides for a tax sparing in favor of Armenia for the five years following the entry into force of the treaty.

(j) The 0% rate applies if all of the following conditions are satisfied:
   • The recipient of the dividends is the beneficial owner of the income.
   • The direct or indirect shareholding is equal to or higher than 25%.
   • A minimum two-year shareholding period has been fulfilled.
   • Dividends are not subject to tax in the state of residency of the recipient of the dividends.

(k) The 5% rate applies to royalties for copyrights of literary, artistic or scientific works (including films and videotapes used for its reproduction on television or radio).

(l) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 25% of the capital of the distributing company.

(m) The 0% rate applies if all of the following conditions are satisfied:
   • The recipient of the dividends is a corporation.
   • The shareholding is equal to or higher than 25%.
   • Exemption is allowed under the rules of the state of residence of the subsidiary.

The rate is 15% if the effective beneficiary is a resident of the other contracting state.
A 15% rate applies if the shareholding is less than 20%.

A 10% rate applies to interest paid to financial institutions for long-term (10 or more years) loans for goods or equipment.

A 10% rate applies to royalties paid for copyrights of literary, artistic or scientific works (including films and videotapes produced by a resident of a contracting state).

A 5% rate applies if the effective beneficiary of the dividends is a corporation that controls at least 20% of the capital of the distributing company.

A 5% rate applies to interest derived from loans granted by banks and insurance companies, from bonds and securities traded on a recognized stock exchange and from sales on credit of machinery and equipment.

A 5% rate applies to royalties paid for the use of industrial, commercial and scientific equipment.

The 0% rate applies if the dividends are received by a company that holds a direct or indirect shareholding of at least 20% in the capital of the distributing company.

The protocol includes a most-favored-nation clause under which Costa Rica automatically will provide similar tax treatment to Spanish residents if Costa Rica enters into a treaty with a third country that enters into force and that offers more beneficial tax treatment for dividends, interest, royalties and/or income from personal independent services.

The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 20% of the capital of the distributing company.

A 15% rate applies if the shareholding is less than 25%.

Certain copyright royalties are exempt.

Spain honors the Czechoslovakia treaty with respect to the Czech and Slovak Republics.

A 5% rate applies to certain loans.

A 5% rate applies to royalties paid for copyrights of literary, musical or artistic works (excluding motion picture films and television films or videotapes).

A 12% rate applies if the shareholding is less than 25%.

The 12% rate applies if the shareholding is less than 50%.

The 5% rate applies to royalties paid for industrial, commercial or scientific equipment.

No withholding tax is imposed if the recipient is a company that is subject to corporate income tax and that holds a participation of at least 10% in the payer.

A 10% rate applies if the shareholding is at least 25%, but less than 50%. A 15% rate applies if the shareholding is less than 25%.

The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 10% of the capital of the distributing company.

The withholding tax rate is 5% if the effective beneficiary of the dividends is a corporation and if the shareholding is equal to or higher than 25%. The withholding tax rate is 10% for other dividends.

Withholding tax is not imposed if the recipient is the beneficial owner of the interest and if the interest is beneficially owned by a contracting state, or a political subdivision or local authority of the contracting state.

The 20% rate applies to certain royalties.

The 10% rate applies if the shareholding is less than 20%.

A 5% rate applies to royalties paid for copyrights of musical compositions and literary, dramatic or artistic works. An 8% rate applies to royalties paid for the following:

- Motion picture films
- Films, tapes and other means of transmission or reproduction of sounds
- Industrial, commercial or scientific equipment
- Copyrights of scientific works

A 5% rate applies to interest paid with respect to sales of industrial, commercial, scientific equipment, or on loans from financial institutions. A 0% rate applies to interest paid to the government or central bank of the other contracting state.

A 5% rate applies to royalties paid for copyrights of musical compositions, and literary, dramatic or artistic works, and to amounts paid for the use of industrial, commercial or scientific equipment.

The rate is 4% for royalties paid for copyrights of literary, dramatic, musical or artistic works (excluding motion picture films and television films or videotapes).

The 10% rate applies if the shareholding is less than 25%.
The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly or indirectly controls at least 10% of the capital of the distributing company.

The treaty withholding tax rate is increased to 10% in certain circumstances if the recipient is not a corporation or if the shareholding does not exceed a certain percentage.

A 5% rate applies if the effective beneficiary of the dividends is a corporation that controls at least 25% of the capital of the distributing company.

A 15% rate applies if the shareholding is less than 10%.

A 0% rate applies if the beneficial owner holds at least 5% of the share capital of the distributing entity.

A 5% rate applies to income derived from the rendering of technical services.

A 5% rate applies if the shareholding is less than 25%.

The withholding tax rate is 10% if the effective beneficiary of the interest is a financial entity.

The 0% rate applies if the dividends are received by a company that holds directly or indirectly a shareholding of at least 50% in the capital of the distributing company. A 5% rate applies if the direct shareholding is more than 25% but less than 50%. Otherwise, a 10% rate applies.

The withholding rate is 5% if the recipient is not subject to Dutch tax on the dividends and if the 10% rate would otherwise apply.

The 5% rate applies if the beneficial owner of the dividends is a company that has owned directly for the six-month period ending on the date on which entitlement to the dividends is determined at least 50% of the voting shares of the distributing company. The 7.5% rate applies if the beneficial owner of the dividends is a company that has owned directly for the period of six months ending on the date on which entitlement to the dividends is determined at least 25% of the voting shares of the distributing company.

Certain interest payments are not subject to withholding tax.

Tax treaty provisions do not apply if the dividend, interest or royalties paid by a Panamanian resident are sourced in Spain or in a country that has not entered into a tax treaty with Spain and if such income has not been effectively taxed in Panama.

The 0% rate applies if the beneficial owner of the dividends is a capital company that directly controls at least 80% of the capital of the distributing company and if certain conditions are satisfied. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 40% of the capital of the distributing company.

A 10% rate applies to interest paid with respect to sales of industrial equipment or publicly traded bonds.

A 20% rate applies to royalties paid with respect to films, television or radio. A 10% rate applies to royalties derived in preferred areas of activities.

A 0% rate applies to royalties paid for copyrights of literary, dramatic, musical or artistic works (excluding motion picture films and television films or videotapes).

The withholding tax rate is 5% if the effective beneficiary of the dividends is a company that has invested at least ECU 100,000 in the share capital of the payer and if the dividends are exempt from tax in the other contracting state. The withholding tax rate is 10% if only one of these requirements is met. The withholding tax rate is 15% for other dividends.

No withholding tax is imposed on interest paid to and beneficially owned by financial institutions with respect to long-term (seven years or more) loans and certain other debts.

A 0% rate applies if the beneficial owner of the dividends is a company that directly controls at least 25% of the capital of the distributing company.

A most-favored-nation clause applies.

The 5% rate applies to royalties paid for the use of copyrights of literary, artistic or scientific works, including cinematographic films or films or tapes used for radio or television broadcasting, but excluding computer software. The 10% rate applies to royalties paid for the use of patents, trademarks, designs or models, plans, secret formulas or processes and computer software, for the use of, or the right to use, industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

The 5% rate applies if the distributing company is a stock-listed real estate investment company and if the beneficial owner of the dividends directly or indirectly controls less than 10% of the capital of the distributing company.
(ooo) A 0% rate applies to interest paid to financial institutions for long-term (seven years or more) loans.

(ppp) A 0% rate applies if certain conditions are met.

(qqq) A limitation-of-benefits clause in the treaty may apply.

(rrr) A 5% rate applies to loans over seven years.

(sss) A 5% rate applies to certain dividend distributions.

(ttt) A 10% rate applies to interest derived from loans granted by banks or in connection with sales on credit of merchandise or equipment.

(uuu) Spain honors the double tax treaty with the former USSR with respect to Belarus, Kyrgyzstan, Tajikistan and Ukraine.

(vvv) A 5% rate applies if the beneficial owner of the dividends is a corporation that holds directly at least 10% of the entity paying the dividends.

(www) The 0% rate applies if the beneficial owner of the dividends is a capital company that directly controls at least 75% of the capital of the distributing company.

(xxx) The 5% rate applies to royalties paid for copyrights of literary, artistic or scientific works.

(yyy) A 4.95% rate applies to interest paid to financial institutions.

Spain is in the process of negotiation, ratification or signature of tax treaties with Azerbaijan, Belarus, the Dominican Republic, Kuwait, Namibia, Nigeria, Oman, Peru, Senegal and Syria. Spain is negotiating agreements on the exchange of tax information with Bermuda, Guernsey, the Cayman Islands, the Cook Islands, the Isle of Man, Jersey, St. Lucia and St. Vincent and the Grenadines.

Spain is renegotiating its tax treaties with Brazil, Canada, Switzerland and the United States.

Spain has authorized the signature of the protocol to its tax treaty with India.

(a) This is the standard rate. For other rates, see Section B.
(b) This tax, which is a final tax, is imposed on dividends paid to residents and nonresidents. A deemed dividend tax is imposed on companies if the dividend distributed is less than 10% of the company’s distributable profits. For details, see Section B.
(c) The 10% rate applies to interest paid on deposits. Companies may offset the 10% withholding tax against their annual income tax liability.
(d) This withholding tax applies to amounts exceeding Rs. 500,000.
(e) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in Sri Lanka are subject to income tax on their worldwide income. Nonresident companies are subject to tax on their profits and income derived from Sri Lankan sources. A company is considered to be a resident company if its registered or principal office is in Sri Lanka or if the control and management of its business are exercised in Sri Lanka.

Rates of corporate tax. The standard rate of corporate income tax is 28%. A company that is not a subsidiary or associate company (member of a group of companies) with taxable income of less than Rs. 5 million is taxed at a rate of 12%.

If the income tax rate following the expiration of a tax holiday, as specified in a Board of Investment (BOI) agreement, is higher than the income tax rate under the Inland Revenue Act, the lower rate prevails.

Companies in the business of the import, manufacture and sale of liquor or tobacco are subject to tax at a rate of 40%.

Profits derived from priority sectors are taxed at a rate of 12%. The 12% rate applies to the following priority sectors:
- Construction
- Exports (including organic tea in bulk)
- Tourism

Export profits derived by direct and indirect exporters from products that include more than 65% value addition and that are sold with a brand name registered in Sri Lanka with patents rights reserved in Sri Lanka are subject to tax at a rate of 10%.

Profits from agriculture are taxed at a rate of 10%, effective from 1 April 2011.

Venture capital companies and petroleum exploration companies are subject to tax at a rate of 12%.

Undertakings for the operation and maintenance of storage facilities, local software development or the supply of labor are subject to tax at a rate of 10%.

Profits and income from educational services are taxed at a rate of 10%.

Profits and income of an undertaking engaged in the manufacturing of articles or the provision of services that has turnover of less than Rs. 500 million (nongroup company) are taxed at a rate of 10%.

Profits and income of newly established branches of commercial banks dedicated to development banking are taxed at a rate of 24%.
Profits and income from research and development (R&D) activities are taxed at a rate of 20%.

A 12% rate applies to manufacturing income attributable to the amount of tea purchased for manufacturing by a joint venture entered into by a grower and manufacturer of tea with a tea exporter, for the purpose of exporting pure Sri Lankan tea in value-added form with a Sri Lankan brand name.

Profits and income from the local manufacturing of handloom products are taxed at a rate of 12%.

Profits and income derived from healthcare services are taxed at a rate of 12%.

Profits and income from poultry farming are taxed at a rate of 10%.

Profits and income paid in foreign currency from the supply of goods manufactured in Sri Lanka or services to foreign ships are taxed at a rate of 12%.

Profits and income derived from the operation of a minihydro-power project or other alternative energy source are taxed at a rate of 12%.

Profits and income from the sale of products manufactured in Sri Lanka that are received in foreign currency through a foreign exchange earning account authorized by the Central Bank of Sri Lanka are taxed at a rate of 12%.

Export-oriented companies manufacturing garments or ceramic products that are permitted to increase domestic sales up to 40% are subject to tax at a rate of 12% on such sales.

Profits and income arising to an export-oriented BOI company from the sale of goods to a BOI company enjoying a tax holiday under Sections 16C, 16D or 17A of the Inland Revenue Act No. 10 of 2006 (most recently amended by the Amendment Act No. 8 of 2012) or to a company engaged in a Strategic Development Project are taxed at a rate of 12%.

Unit trust management companies are taxed at a rate of 10%.

Clubs and associations are subject to tax at a rate of 10%.

Nonresident companies may qualify for the 12% rate in the priority sectors, except for construction. Foreign-currency banking units of banks are subject to income tax at a rate of 28% on their offshore and onshore profits.

**Tax incentives.** All of the income tax incentives offered have been streamlined and are now included in the Inland Revenue Act.

The BOI incentives are limited to those relating to customs duties, exchange-control restrictions and certain other items.

Significant tax incentives currently offered include the incentives described below.

A four-year tax holiday is granted to new enterprises engaged in agriculture and/or agroprocessing, animal husbandry and/or processing, fisheries and/or fish processing or creative work, with a minimum investment of Rs. 25 million.
Medium-scale enterprises engaged in specified activities are eligible for tax holidays based on the amount of the investment. The following are the tax holidays:

<table>
<thead>
<tr>
<th>Investment Exceeding Rs. millions</th>
<th>Not exceeding Rs. millions</th>
<th>Length of tax holiday Years</th>
</tr>
</thead>
<tbody>

A concessionary tax rate of 12% is granted to existing enterprises that are engaged in the production of the above-mentioned products to replace imports and make the above-mentioned investments.

Profits and income derived from undertakings for the operation of port terminals in Sri Lanka are exempt from income tax.

Profits and income derived from services rendered in ports in Sri Lanka in the course of business carried on in the ports are exempt from income tax.

Profits and income of undertakings for the construction of ports in Sri Lanka are exempt from tax.

A five-year tax holiday is granted to a new company that invests from US$5 million to US$10 million in a new undertaking engaged in specified activities with respect to the development of the national economy.

A five-year tax holiday beginning on 1 April 2011 is granted for investments in fishing, cultivation and primary processing of agricultural seeds or planting materials.

A tax exemption is granted for profits earned in foreign currency by manufacturers of textiles, leather products, footwear and hand-
bags from supplies made to foreign purchasers that establish headquarters in Sri Lanka for management, finance, supply chain and billing.

A five-year income tax holiday beginning 1 April 2011 is granted to the Ceylon Electricity Board, National Water Supply and Drainage Board, Ceylon Petroleum Corporation and Sri Lanka Ports Authority.

A 10-year income tax holiday beginning 1 April 2011 is granted to the Sri Lankan Airlines and Mihin Lanka (a budget airline in Sri Lanka).

Profits and income (other than interest and dividends) of the Institute of Certified Management Accountants of Sri Lanka and the Child Protection Authority are exempt from income tax.

Unit trusts and mutual funds are taxed at a rate of 10% on their income. Income derived by unit trusts from investments in listed debentures and equity is exempt from income tax.

Income earned by resident companies or partnerships for services provided in or outside Sri Lanka to persons or partnerships outside Sri Lanka (other than commissions, discounts or similar receipts) is exempt from income tax if such income is remitted to Sri Lanka through a bank.

A three-year tax exemption is granted to new undertakings that are engaged in the manufacturing of articles other than liquor and tobacco and that have a minimum investment of Rs. 50 million before 31 March 2012.

A three-year tax exemption is granted to new undertakings that have a minimum investment of Rs. 50 million before 31 March 2015 and that are engaged in agriculture and/or agroprocessing, animal husbandry and/or processing, fisheries and/or fish processing, information technology, business or knowledge process outsourcing, healthcare, education, beauty care, cold room storage, tourism, sports and fitness centers and creative work including artwork.

A three-year tax holiday is granted to businesses providing manor houses or thematic bungalows to tourists.

A three-year tax holiday is granted to venture capital companies investing in ordinary shares of companies engaged in projects of a pioneering nature.

A five-year tax holiday is granted to new undertakings of companies engaged solely in R&D with an investment of more than Rs. 2 million.

A five-year tax holiday is granted for profits and income of cooperative societies.

A 7- or 10-year tax holiday is granted for income derived from the exhibition of cinematographic films in new cinemas or upgraded cinemas, respectively.

Income derived from exports of gold, gems (exported after the cutting and polishing of imported gems in raw form) and jewelry is exempt from tax. The value of gems sold at the gem auction
conducted by the State Gem Corporation of Sri Lanka is taxed at a rate of 2.5%, which is the final tax on such sales.

Dividends, interest and fees derived from investments from outside Sri Lanka are exempt from income tax if the income is remitted to Sri Lanka.

The income of cooperative societies is exempt from income tax for five years.

Income earned by resident companies or partnerships for services provided in or outside Sri Lanka to persons or partnerships outside Sri Lanka (other than commissions, discounts or similar receipts) is exempt from income tax if such income is remitted to Sri Lanka through a bank.

For years of assessment beginning after 1 April 2009, half of the income of persons derived from the production of a drama for a period of one year from the date of the first public performance is exempt from tax.

Export development rebates paid to exporters by the Export Development Board of Sri Lanka under the Export Development Reward Scheme are exempt from income tax.

Profits and income derived from the sale after 1 April 2009 of Sri Lanka Development Bonds are exempt from income tax.

Profits and income derived by persons or partnerships from investments in Economic Resurgence Certificates with monies that were contained in an account approved by the Central Bank of Sri Lanka and that were deposited in such account after 1 February 2009 are exempt from income tax.

Income earned in foreign currency by resident companies from services rendered outside Sri Lanka for the carrying out of construction projects is exempt from income tax.

Income derived by nonresident companies outside Sri Lanka from the supply of plant, machinery or equipment to the government of Sri Lanka, public corporations or government institutions or from projects approved as essential for the economic development of Sri Lanka is exempt from income tax.

Income and profits derived by undertakings from the construction and sale of houses for low-income families with a floor area exceeding 500 square feet are exempt from income tax if the sale takes place before 1 April 2013.

Profits earned in foreign currency by consignors or consignees that are resident companies or partnerships from the export of goods that are not subject to any manufacturing process other than repacking or labeling are exempt from income tax.

Profits derived from sales of shares are exempt from income tax.

Profits derived from sales of foreign-currency sovereign bonds to nonresident persons or licensed commercial banks in Sri Lanka are exempt from income tax, effective from 21 October 2008.

Royalties received from outside Sri Lanka are exempt from income tax if remitted to Sri Lanka through a bank.
Profits and income from the redemption of units of unit trusts or mutual funds are exempt from income tax.

Profits and income from the administration of sports grounds, sports stadiums or sports complexes are exempt from income tax.

Profits and income (other than interest and dividends) of the College of General Practitioners of Sri Lanka are exempt from income tax.

Profits and income (other than interest and dividends) of the Sri Lanka Social Security Board are exempt from income tax.

Profits and income (other than interest and dividends) of the Sri Lanka Savings Bank are exempt from income tax.

Profits and income (other than interest and dividends) of a government-assisted private school under specified conditions are exempt from income tax.

Profits and income (other than interest and dividends) of certain public corporations are exempt from income tax.

Profits and income (other than interest and dividends) of the Lanka Puthra Development Bank are exempt from income tax.

Profits and income of companies that obtain quotations on the Stock Exchange of Sri Lanka by floating and maintaining a minimum of 20% of shares among the public are entitled to a 50% relief on income tax payable for three years.

Profits and income earned from a business in which goods are purchased from one country and transferred to another country other than Sri Lanka are exempt from income tax, effective from 1 April 2012.

Profits and income of an undertaking for the cultivation of renewable energy crops in agricultural land are exempt from income tax for 10 years.

Profits and income from the manufacturing, distribution and marketing of organic fertilizers and pesticides are exempt from income tax and all indirect taxes.

Royalties or payments made for designing that are paid by a company that has entered into an agreement with the BOI of Sri Lanka to a nonresident company during the tax holiday period under Sections 16A and 17D of the Inland Revenue Act No. 10 of 2006 (most recently amended by the Amendment Act No. 8 of 2012) are exempt from income tax if the payer company has invested more than US$50 million from funds sourced overseas. The services for which payments are made must be essential for carrying out activities in Sri Lanka and must not be obtainable in Sri Lanka.

A person that has annual turnover not exceeding Rs. 300 million per year from all trades and businesses carried on for a period ending before 1 April 2011 and that has not complied with the income tax laws is exempt from income tax if the past earnings are invested before 31 March 2014 in a trade or business and is compliant thereafter. The profits and income earned from such investments are exempt from income tax for five years.

Administration. The normal fiscal year (year of assessment) runs from 1 April to 31 March. A company may select a different fiscal year if it obtains prior permission from the Department of Inland Revenue. Income tax is payable in four quarterly installments, which are due one and a half months after the end of each quarter. The final tax return must be submitted by 30 November after the fiscal year. Any balance of income tax due must be paid by 30 September following the end of the fiscal year.

If a company files the final tax return by 30 November, the statute of limitations for the issuance of an assessment expires 18 months from the statutory date of filing the return, effective from the year of assessment beginning 1 April 2013. For returns filed after 30 November, the statute of limitations expires four years after the statutory date of filing the return.

Separate sets of accounts must be maintained for different activities of a trade or business that are exempt or subject to tax at different tax rates.

An advance ruling system is available for investors eligible for tax exemptions to ensure consistency in the application of provisions of the tax laws. Interpretations of the Inland Revenue Act must be provided to taxpayers within six months of the date of the request for a ruling.

Dividends. A dividend tax of 10% (also known as the Dividend Tax at Source) is withheld from dividends distributed out of profits included in taxable income. The 10% tax is the final tax on dividends paid to residents and nonresidents. Dividends paid by a resident company to a resident or nonresident company are not included in the assessable income of the recipient if any of the following apply:
- A withholding has been made for dividend tax.
- The dividend is exempt from income tax.
- The dividend consists of any part of the amount of dividends received by the payer from another resident company.

Dividends received from nonresident companies are exempt from income tax.

Dividends distributed by BOI companies (companies that have entered into agreements with the BOI under which tax holidays have been granted) are subject to the dividend tax if the agreement between the BOI and the company was entered into after 6 November 2002.

A company that distributes dividends that total less than 10% of its distributable profits for the preceding fiscal year is subject to a deemed dividend tax at a rate of 15% on the difference between 33⅓% of the distributable profits and the total dividends distributed. The calculation of distributable profits is specified in the law.

The definition of dividends has been expanded to include scrip dividends.

Interest. The following are significant aspects of the taxation of interest:
Withholding tax at a rate of 10% is imposed on interest paid to companies on bank deposits. Companies may offset this withholding tax against their annual income tax liability.

Withholding tax at a rate of 10% is imposed on interest payable to residents and nonresidents on corporate debt securities at the time of issuance of the security. For such instruments with a floating rate of interest, withholding tax is deductible at the beginning of each reviewing period. If no upfront deduction of withholding tax is made, the tax must be withheld at the time of payment of interest.

Tax at a rate of 10% is withheld at the point of issuance of government securities, bonds and similar instruments by the Central Bank of Sri Lanka.

Interest income on secondary market transactions and income on corporate debt securities that are included in business income are grossed up by \(\frac{1}{9}\), and a notional credit of 10% is granted against tax liability.

Interest income received by a bank in Sri Lanka on loans is exempt from income tax if the loans are granted to a company for investment in or the meeting of expenditure incurred by a newly formed company outside the Colombo and Gampaha districts or by a company relocating outside the Colombo and Gampaha districts.

Interest on investments made outside Sri Lanka is exempt from income tax.

Interest accruing on funds invested in Sri Lanka Development Bonds and Reconstruction Bonds that are denominated in U.S dollars and issued by the Central Bank of Sri Lanka is exempt from income tax.

Interest income on foreign-currency sovereign bonds paid to nonresident persons or licensed commercial banks in Sri Lanka is exempt from income tax.

Interest accruing to persons or partnerships outside Sri Lanka on loans granted to persons or partnerships in Sri Lanka is exempt from income tax.

Interest earned by banks or financial institutions on loans granted from Investment Fund Accounts (banks and financial institutions that are liable to value-added tax [VAT] on financial services must transfer specified amounts to Investment Fund Accounts) is exempt from income tax.

Interest earned on listed corporate debt instruments is exempt from income tax.

Interest on bonds issued by the Municipal Council is exempt from income tax.

Foreign tax relief. Foreign tax relief is available under various double tax treaties. In general, Sri Lankan tax payable (other than dividend tax) is allowed as a credit against any foreign tax computed by reference to the same income. Similar relief is available for foreign tax paid in the other treaty country.

C. Determination of trading income

General. The assessment is based on financial statements prepared in accordance with generally accepted accounting principles.

Nonresident companies may pay income tax on a deemed profit negotiated with the Inland Revenue Department. However, they must be taxed on at least 6% of their turnover.
All expenses incurred in the production of income are allowable unless specifically prohibited. In addition, certain expenses that are specifically authorized are permitted as deductions. Nondeductible expenses include capital expenditures, personal and domestic expenses, and losses from appropriation of profits.

The following restrictions apply to the deductibility of expenses:

- 25% of advertising expenses is disallowed (other than advertising outside Sri Lanka with respect to the export trade or the provision of services for payment in foreign currency). Specific sponsorship of international sports events approved by the Minister of Sports is fully allowed, effective from 1 August 2012.
- Entertainment expenses are disallowed.
- The deductibility of head office expenses is restricted to the lower of the actual expenditure or 10% of the profits or income of the nonresident company.
- Foreign travel expenses relating to business and foreign training expenses can be claimed up to a maximum of 2% of the preceding year’s statutory income.
- Debt-to-equity rules restrict the deduction of interest paid (see Section E).
- Hire or rental expenses included in traveling expenses are disallowed.
- The deduction for management fees is limited to Rs. 2 million or 1% of turnover, whichever is less.
- Listing expenses of a company are allowed up to a maximum of 1% of the value of the initial public offer.
- Tax borne on behalf of employees is disallowed.

Expenses with respect to vehicles provided to employees are deductible regardless of whether such vehicle benefits are taxable in the hands of the employees.

Local or foreign travel expenses incurred by companies exclusively providing services of design development, product development or product innovation are allowable expenses.

Maintenance or management expenses incurred by a company with respect to sports grounds, stadiums or sports complexes are allowable expenses.

Precommencement expenses incurred by new small-and-medium scale enterprises with expected turnover of less than Rs. 500 million are allowed as a deduction from statutory income in the year of commercial production.

Nation Building Levy (see Section D) paid is an allowable expense.

An enterprise that incurs research and development expenditure carried out through a government or private institution is eligible for a triple deduction.

Special levies payable to the government by public corporations or government-owned business undertakings are allowable expenses.

**Qualifying payments.** Companies may claim a deduction for qualifying payments, which include donations to the government and approved investments. The deduction for qualifying payments is limited to one-fifth of assessable income.
Donations to the government in cash are deductible in full. Unlimited qualified payment deductions are also available for investments in relocated companies outside the Colombo and Gampaha districts and for investments in housing projects for shanty dwellers.

Qualifying payment deductions for donations to approved charities established for the provision of institutional care for the sick and needy are limited to Rs. 500,000 or one-fifth of the assessable income, whichever is less. Qualifying payment deductions for investments in the production of a film are restricted to Rs. 35 million. Qualifying payment deductions for investments in companies located outside the Colombo and Gampaha districts are restricted to Rs. 100 million.

The investment of a minimum of Rs. 50 million by an existing enterprise in itself for expansion can be claimed as a qualifying payment subject to 25% of the investment being maintained for four years of assessment.

Expenses incurred under community development projects in the most difficult villages identified and published in the Government Gazette can be claimed as a qualifying payment, up to a maximum of Rs. 10 million.

**Inventories.** Inventories are normally valued at the lower of historical cost or net realizable value. For agricultural produce, inventories are valued at subsequent sale prices. Cost is usually determined on a first-in, first-out (FIFO) formula or a weighted-average cost formula.

**Provisions.** In general, no deductions are allowed for reserves or provisions. However, provisions may be deducted if the expenses provided for are paid within three years after the year of assessment.

For banks, the deductibility of a specific provision for bad debts is limited to 1% of aggregate outstanding loans of the bank at the end of the fiscal year.

**Depreciation.** Depreciation allowances are granted to the owner of the asset from the fiscal year in which the asset is first used. The allowance is computed using the straight-line method at the following rates, which are effective from 1 April 2011.

<table>
<thead>
<tr>
<th>Asset</th>

</tbody>
</table>

(a) This rate applies to constructed buildings and purchased industrial buildings and hotels, including condominium property acquired or constructed to be used as a commercial unit, hotel building or industrial building.
(b) For assets other than software, acquisition and assembling expenditure qualifies for the allowance.
(c) This rate applies to assets acquired on or after 1 April 2013.

Depreciation allowances are generally subject to recapture on the sale of an asset to the extent the sales proceeds exceed the tax value after depreciation. Any amounts recaptured are subject to tax at the regular corporate tax rate. Losses on the sale of a depreciable asset may be claimed as trade losses.

If a capital asset is disposed of and replaced within one year, the allowance is granted on the acquisition cost, less the profit on sale of the old asset.

**Relief for losses.** A loss incurred is deductible if, had there been a profit instead of the loss, such profit would have been assessable. Losses may be carried forward for an unlimited number of years. However, a loss carryforward may offset only 35% of the total statutory income. The balance of the losses may be carried forward to offset income in future years. Losses incurred by foreign-currency banking units and losses from horse racing may offset profit from the same source only.

Losses from a leasing business may be offset only against profits from the same business.

Insurance companies may set off general losses and life losses only against the same source of profits.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate</th>

**E. Miscellaneous matters**

**Foreign-exchange controls.** Foreign-exchange regulations are governed by the Exchange Control Act and other directives issued by the Central Bank of Sri Lanka. The regulations include the following:
• Dividends may be remitted to nonresident shareholders on the production of an Auditors’ Certificate.
• Authorized dealers are permitted to maintain nonresident accounts, which may be held by nonnationals resident outside Sri Lanka, companies registered outside Sri Lanka, foreign banks and so forth.
• Facilities are provided for resident nonnationals to maintain accounts in designated foreign currencies with commercial banks in Sri Lanka.
• Foreign investors may acquire shares representing up to 49% of a company’s issued capital and repatriate profits and sales proceeds (the Ministry of Finance may approve a larger percentage of up to 100%, depending on the type of investment). Subject to the approval of the Central Bank, foreign ownership of 100% is allowed in retail and wholesale trading with a minimum investment of US$150,000 or in nondeposit financial services, such as merchant banking and venture capital companies.
• Companies approved by the Board of Investment of Sri Lanka may freely remit capital and profits.
• No restrictions are imposed on current-account transactions.
• Exporters with adequate protection against foreign-currency fluctuations may engage in foreign borrowing free of exchange-control restrictions.
• Corporate entities may borrow up to US$10 million per year for the next three years without Department of Exchange Control approval.
• Licensed commercial banks may borrow up to US$50 million per year without Department of Exchange Control approval.
• Persons providing services to tourism and foreign businesses may accept foreign currency if such earnings are deposited in a bank within seven working days.

Significant changes to exchange-control restrictions with regard to capital account transactions, which took effect on 22 November 2010, include the following:
• Foreign beneficiaries may invest in rupee-denominated debentures.
• Foreign companies may open places of business in Sri Lanka.
• Foreigners touring Sri Lanka or engaged in business in Sri Lanka may open foreign-currency accounts in Sri Lanka.
• Staff of foreign embassies may open foreign-currency accounts in Sri Lanka.

Transfer pricing. Under the Inland Revenue Act, if significant pricing discrepancies are considered “artificial,” the tax authorities may determine a commercially acceptable price for tax purposes. Profits and losses from transactions between associated undertakings are determined taking into account the arm’s length principle.

Currently, transfer-pricing regulations apply equally to local and foreign transactions. Separate measures will be introduced for the determination of arm’s length prices of goods and services with respect to local transactions of associated undertakings as well as for advance pricing arrangements.

Debt-to-equity rules. For group companies, a debt-to-equity ratio of 3:1 applies to manufacturing companies, and a 4:1 ratio applies to other types of companies. Interest paid on loans in excess of the debt-to-equity ratio is not deductible for tax purposes.

B. Taxes on corporate income and gains

Income tax. Income tax is levied on resident and nonresident companies. Resident companies are those incorporated under Suriname law, even if their management is located abroad, as well as companies incorporated under foreign law, but effectively managed and controlled in Suriname.

For resident companies, income tax is, in principle, levied on the aggregate amount of net income earned from all sources during the company’s accounting period. In principle, nonresident companies are subject to Suriname income tax on the following specific Suriname income items:

- Income derived from a permanent establishment in Suriname
- Income derived from real estate located in Suriname and/or debt claims secured by mortgages on real estate located in Suriname
- Income derived from rights to the profit of an enterprise of which the management is located in Suriname

Nonresident companies are deemed to derive income from a permanent establishment in Suriname if they derive income from, among other activities, acting as an insurer and the exploration and exploitation of natural resources, such as oil and gas.

Tax rates. Resident and nonresident companies, including branches of foreign companies, are taxed at a standard effective rate of 36%. Withholding taxes are not imposed on the remittance of profit by branches to their foreign head offices.
**Tax incentives.** Tax incentives, such as tax holidays, may be granted to new business enterprises engaged in certain activities. Business enterprises engaged in, among other activities, mining and tourism may apply for several tax incentives such as accelerated depreciation, investment allowance deduction and fiscal unity. A written letter of request for the granting of a tax incentive must be filed with the Suriname tax authorities.

**Capital gains.** No distinction is made between the taxation of capital gains and the taxation of other income. All income is taxed at the income tax rate of 36%.

**Administration.** The taxable amount is the profit realized in a fiscal year or calendar year.

The final tax return must be filed within six months after the end of the financial year. Any difference between the tax due based on the provisional return and the tax due based on the final return must be settled at the time the final return is filed. Companies must file a provisional tax return before 15 April of the current calendar year or within two and one-half months after the beginning of the current fiscal year. This return must show a taxable profit that is at least equal to the taxable profit shown on the most recently filed final tax return.

In principle, the tax due on this provisional tax return must be paid in four equal installments, by 15 April, 15 July, 15 October and 31 December or within two and one-half months after the beginning of the current fiscal year and subsequently by the end of every three months.

An extension of time to file the return and pay the tax later than 31 December is not granted. On request of a company, the Tax Inspector may consent to the reporting of a lower taxable profit than the taxable profit shown on the most recently filed final tax return.

The tax authorities may impose arbitrary assessments if the taxpayer fails to file a tax return. Additional assessments may be imposed if insufficient tax is levied when tax returns are filed or when arbitrary assessments are imposed. Depending on the degree of wrongdoing, a penalty of up to 100% of the additional tax due may be levied.

**Dividends.** In principle, a 25% withholding tax is imposed on dividends distributed by resident companies. Dividends distributed by resident companies to qualifying resident companies are exempt from Suriname dividend withholding tax. For this purpose, the following are qualifying resident companies:

- Investment companies conducted as limited liability companies that exclusively or almost exclusively aim to acquire, hold, manage and sell shares
- Other Suriname resident companies that hold the share interest generating dividends continuously from the beginning of the year

The tax treaty between Suriname and the Netherlands provides for special dividend withholding tax rates (see Section F).

**Participation exemption.** In principle, dividend distributions received from qualifying resident companies and qualifying non-
resident companies are exempt from Suriname income tax. For dividend distributions received from qualifying nonresident companies, the exemption applies only if the recipient holds at least 10% of the share capital of the payer of the dividends.

**Foreign tax relief.** No foreign tax relief is available under domestic law. Foreign tax relief may be available under the tax treaty between Suriname and the Netherlands.

**C. Determination of taxable income**

**General.** Taxable income must be calculated in accordance with “sound business practices.”

In principle, all expenses incurred with respect to the conducting of a business are deductible. However, if expenses exceed normal arm’s length charges and are incurred directly or indirectly for the benefit of shareholders or related companies, the excess is considered to be a nondeductible profit distribution (dividend).

In principle, interest expenses are deductible for tax purposes if the interest rate is determined on an arm’s length basis.

No thin-capitalization requirements apply in Suriname under the Suriname tax legislation.

**Inventories.** Inventories are generally valued using the historical-cost, first-in, first-out (FIFO) or weighted-average methods.

**Depreciation.** Depreciation may be calculated using the straight-line, declining-balance or other methods that are in accordance with “sound business practices.”

**Relief for losses.** Losses in a financial year may be carried forward for seven years. No carryback is available. Losses incurred by companies during their first three years of business may be carried forward indefinitely.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<td>0 to 40</td>
</tr>
</tbody>
</table>

**E. Miscellaneous matters**

**Foreign-exchange controls.** The currency in Suriname is the Suriname dollar (SRD).

In general a foreign-exchange permit is required for the movement of capital with respect to the following transactions:

- Loans issued by nonresidents of Suriname
- Real estate transactions in which one of the parties is a nonresident of Suriname
• Capital proceeds (profits and dividends)
• Incorporation of a limited liability company in accordance with the laws of Suriname if the company is located in Suriname and if one of the incorporators or shareholders is a nonresident of Suriname
• Purchase or sale of the shares of a limited liability company resident in Suriname by a nonresident of Suriname.

Specific guidelines for exchange control apply in the case of a petrol agreement: an agreement concluded between a state enterprise and a contractor for the survey, exploration and exploitation of petrol in specified areas of Suriname.

Transfer pricing. In general, intercompany charges must be determined on an arm’s length basis.

F. Tax treaties

Suriname has only entered into a tax treaty with the Netherlands, which contains provisions to avoid double taxation between Suriname and the Netherlands regarding taxes on income.

The tax treaty between Suriname and the Netherlands provides the following dividend withholding tax rates:
• 7.5% of the gross amount of the dividends if the recipient is an entity that has its capital wholly or partly divided into shares and that has direct control of at least 25% of the capital of the entity paying the dividends, provided that the relationship between the two companies has not been created or maintained in the first place for the purpose of enjoying the benefit of the reduced rate
• 15% of the gross amount of the dividends not falling under the above-mentioned 7.5% rate if such dividends are not included in the base on which tax is levied in the country of which the recipient is a resident
• 20% of the gross amount of the dividends in all other cases.

Suriname has signed a double tax treaty with Indonesia, but this treaty is not yet in force.
Swaziland

Please direct all inquiries regarding Swaziland to Rendani Neluvhalani of the Beijing, China office (office telephone: +86 (10) 5815-2831; mobile telephone: +86 (138) 1129-7145; fax: +86 (10) 5811-4281; email: rendani.neluvhalani@cn.ey.com) or Josephine Banda of the Gaborone, Botswana office (office telephone: +267 397-4078; mobile telephone: +267 7167-9011; fax: +267 397-4079; email: josephine.banda@za.ey.com).

(a) For purposes of the withholding taxes, nonresident companies are companies that are neither registered nor incorporated in Swaziland.
(b) This withholding tax applies to dividends paid to nonresidents. See Section B.
(c) This withholding tax is imposed on the payment after deduction of direct costs of materials used in construction operations.
(d) This tax is imposed on the deemed repatriated income of the branch of a nonresident company. However, for the branch of a company registered in Botswana, Lesotho, Mozambique, Namibia or South Africa, the rate of the tax is reduced to 12.5%.

B. Taxes on corporate income and gains

Corporate income tax. Domestic and foreign companies are taxed on all income received or accrued from a source in Swaziland or deemed to be from a source in Swaziland.

Rate of corporate tax. The corporate tax rate is 30%.

Administration. The tax year runs from 1 July to 30 June. Corporate taxpayers may obtain permission to pay tax on a different fiscal year-end. Tax returns are due within 30 days after the notice given by the Commissioner of Taxes. Taxpayers unable to submit returns within 30 days must apply for an extension and submit an estimate of their income for the year.

Companies must pay provisional tax based on their estimated annual tax liability in two installments during their financial year. The installments must be paid by the end of the sixth month of the financial year and by the end of the financial year. A third (“topping-up”) payment of any balance of tax due must be made within six months after the end of the financial year.
Dividends. Dividends paid to resident companies are exempt from tax. A 15% withholding tax is imposed on dividends paid to non-residents, including companies. The rate is reduced to 12.5% if the dividend is paid to a company incorporated or registered in the Southern African Customs Union (SACU; the SACU consists of Botswana, Lesotho, Namibia, South Africa and Swaziland), provided the company is not a subsidiary or branch of a company incorporated or registered outside the SACU.

Foreign tax relief. No specific provisions for foreign tax relief exists, except under double tax agreements.

C. Determination of trading income

General. Income tax is levied on all taxable income received by or accrued to any person from a source within Swaziland or deemed to be within Swaziland. Taxable income includes all income other than capital gains and losses and exempt income.

Expenses, other than those of a capital nature, incurred in Swaziland for the production of income may be deducted from income. Expenses incurred outside Swaziland in the production of income are deductible at the discretion of the Commissioner of Taxes.

Expenses specifically allowed include interest on business-related loans, repairs and maintenance, and bad and doubtful debts. In general, expenses that are not wholly or necessarily incurred in the production of income are not deductible.

Inventories. In general, inventories are valued using the last-in, first-out (LIFO), first-in, first-out (FIFO) or weighted-average methods.

Provisions. Provisions are not normally allowed as deductions in computing taxable income.

Depreciation. An annual depreciation allowance, calculated using a declining-balance method, is available for most capital expenditures. An annual depreciation allowance is also available for industrial buildings and hotels. The straight-line method may be used if prior permission is obtained from the Commissioner of Taxes.

An initial allowance of 50% is granted for investments in plant and machinery used in manufacturing, industrial buildings and hotels.

Relief for trading losses. Trading losses are deductible in the year sustained and may be carried forward without limitation. Losses may not be carried back.

D. Value-added tax

Value-added tax (VAT) is charged on the supply of goods and services in Swaziland as well as on the importation of goods and services. The VAT rates are the standard rate of 14% and a 0% rate.

E. Foreign-exchange controls

Foreign-exchange controls are not imposed within the Common Monetary Area, which includes Lesotho, South Africa and Swaziland. Transactions outside this area are regulated by the Central
Bank of Swaziland in cooperation with authorized dealers. Residents outside the Common Monetary Area may open nonresident accounts.

Foreign-exchange controls are imposed on imports as well as on the repatriation of capital, profits, interest, royalties, fees and income of expatriate personnel. These transactions require prior approval from the Central Bank of Swaziland, but approval is generally granted.

(a) This rate is effective from 1 January 2013. The prior rate was 26.3%.
(b) This withholding tax applies to nonresidents. In general, no withholding tax is imposed on dividends paid to a foreign company that is similar to a Swedish limited liability company (aktiebolag) and that is not regarded as a tax-haven company. If the payer is a company listed on the stock exchange, an exemption is granted only if the recipient holds at least 10% of the voting rights of the payer for more than one year.
(c) Royalties paid to nonresidents are not subject to withholding tax, but are taxed as Swedish-source income at the normal corporate rate of 22% of the net income. However, under most treaties, the tax rate is reduced. Sweden has enacted legislation implementing the European Union (EU) directive on interest and royalties (2003/49/EC), effective from 1 January 2004. In implementing the directive, Sweden considered the most recent amendments adopted by the European Council.

B. Taxes on corporate income and gains

Corporate income tax. Income from all business activities is aggregated as one source of income — income from business. In principle, corporate income tax (CIT) is levied on all corporate income of a company incorporated in Sweden (resident corporation), except for certain domestic and foreign dividends (see Dividends). If a Swedish company markets abroad directly or through a branch office, the foreign profits are also subject to Swedish tax, unless a treaty provides otherwise. Nonresident corporations are subject to tax on Swedish-source income only.

Rate of tax. Companies pay CIT at a rate of 22%. This rate is lowered from 26.3%, effective from 1 January 2013, and applies to companies with a financial year beginning on or after 1 January 2013. No local income taxes are levied on corporate profits.

Capital gains. No separate regime exists for capital gains, but special rules apply to the calculation of the amount of capital gains and losses.
In general, capital gains on shares held for business purposes are exempt from tax (for details regarding shares held for business purposes, see Dividends). Effective from 1 January 2010, the participation exemption regime has been expanded to cover interests in partnerships and shares held by partnerships. Corresponding losses on interests in partnerships are nondeductible. However, capital gains on interests in partnerships domiciled outside the European Economic Area (EEA) are not covered by the participation exemption.

Taxable capital gains are aggregated with other corporate business income. Capital gains are subject to tax when transactions are closed, regardless of the holding period or when payment is received.

Administration. New rules on the administration of tax were introduced as of 2 February 2012. A company may choose its financial year, but is assigned an income year for tax filing purposes, depending on when the financial year ends. The following table provides the assigned income years and dates of filing of the tax return.

</table>

A financial year may be extended for up to 18 months in certain circumstances, such as for a company’s first or last financial year or if a company changes its financial year.

Advance tax payments are made in monthly installments during the year to which they relate. The final tax assessment must be issued by the Swedish Tax Agency before the 15th day of the 12th month after the end of the assigned income year. Any balance of tax due must be paid within 90 days after the final tax assessment.

Dividends. In general, dividends received from Swedish companies on shares held for business purposes are exempt from tax. Dividend distributions on other shares are fully taxable. Shares are deemed to be held for business purposes if they are not held as current assets and if any of the following conditions is satisfied:

- The shares are unlisted.
- The shares are listed and the recipient of the dividends owns at least 10% of the voting power of the payer for more than one year.
- The shares are held for organizational purposes (important to the business of the holder or a company in the same group as the holder).
Dividends received from foreign companies are exempt from tax if the dividends satisfy the conditions for exemption with respect to dividends on shares in Swedish companies and if the distributing foreign company is equivalent to a Swedish limited liability company (aktiebolag).

Shares held in a company resident in an EU member state are considered to be shares held for business purposes if both of the following conditions are satisfied:

- The company owning the shares holds 10% or more of the share capital of the payer (it is irrelevant whether the shares are held as current assets).
- The payer is listed in the European Community (EC) Directive 90/435/EEC and is required to pay one of the taxes listed in the directive.

Partnerships may receive tax-exempt dividends to the extent that the dividends would be exempt if received directly by the owners of the partnership interests.

**Foreign tax relief.** Under Swedish law, a Swedish company may usually claim a credit against CIT liability for comparable taxes paid abroad. Sweden applies a so-called “overall” tax credit system. However, certain tax treaties may override internal foreign tax credit rules and instead exempt foreign-source income from Swedish tax.

**C. Determination of trading income**

**General.** Corporate income tax is based on taxable business income computed according to the accrual method of accounting. Taxable business income generally includes all worldwide income earned by a corporation. The major exceptions are capital gains and dividends on shares held for business purposes (see Section B).

**Inventories.** Inventories are valued at the lower of acquisition cost or actual value. Acquisition cost is determined using the first-in, first-out (FIFO) method. An obsolescence provision of 3% is allowed when using acquisition cost to value inventories.

**Reserves.** A profit allocation reserve allows a 25% deduction of the taxable income for the financial year. Each year’s reserve must be added back to taxable income no later than six years after the year of the deduction. The oldest remaining reserve must always be reversed first. The reserve is based on net income before tax and includes any amounts from the allocation reserve that are added back to taxable income.

Tax is imposed annually on fictitious interest income with respect to the deferred tax amounts.

**Depreciation.** Equipment with a life of three years or less may be written off in the year of purchase. Machinery and equipment may be written off either on a straight-line basis at 20% of cost annually or on a declining-balance basis at 30% of the current tax value. In any one year, the same method must be used for all machinery and equipment. However, companies can switch to a different method each year. The above methods may be used only if the same depreciation method is used in the financial statements. If this condition is not satisfied, a third method, which is also based on the remaining depreciable value, is available. Under
this method, companies may choose any percentage, up to a maximum of 25%. The same amortization rules that govern machinery apply to patents, trademarks, purchased goodwill and other intangible property.

Depreciation of buildings is straight-line over the building’s expected life. In general, commercial buildings may be depreciated at 2% to 5% annually, factory buildings at 4% and office buildings at 2%. Buildings subject to greater wear and tear may be depreciated at higher rates.

If depreciable machinery and equipment are sold, the proceeds reduce the depreciable base for the remaining machinery and equipment.

**Relief for losses.** Losses may be carried forward indefinitely. Losses may not be carried back.

The tax law includes rules restricting the use of old tax losses of acquired companies.

In general, the possibility of offsetting the losses of an acquired company through a group contribution (see *Groups of companies*) may in certain circumstances be restricted during a five-year period. The rules also include a restriction under which the amount of losses that may be used is limited to twice the amount paid for the shares. Special restrictions also apply to the possibility of using losses with respect to mergers.

**Groups of companies.** There is no consolidated treatment whereby all companies in a group may be treated as a single taxable entity. However, rules permit income earned by companies in a corporate group to be distributed within the group through the use of group contributions, which are deductible for the paying company and taxable income for the receiving company. In general, group contributions may be made between Swedish group companies if ownership of more than 90% exists during the entire financial year. This rule applies even if a foreign parent or subsidiary is in the group structure. A Swedish permanent establishment of a foreign company resident in an EEA state is treated as a Swedish company for purposes of the group contribution rules.

Effective from 1 July 2010, in certain circumstances it is possible for Swedish companies to claim deductions of losses in foreign subsidiaries.

**D. Other significant taxes**

The following table describes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>

</tr>
</tbody>
</table>
Nature of tax Rate (%)
Social security contributions, on salaries, wages and the assessed value of benefits in kind; paid by employer
General rate (for 2012) 31.42
Rate for employees aged up to 26 (for 2012) 15.49
Pension contribution on salaries, wages and the assessed value of benefits in kind; paid by employee on amounts up to SEK 440,000 (for 2012) 7
Special salary tax, on earnings not included in the base for social security contributions; paid by the employer (for 2012) 24.26

E. Miscellaneous matters

Controlled foreign companies. A Swedish company that holds or controls, directly or indirectly, at least 25% of the capital or voting rights of a foreign low-taxed entity (controlled foreign company, or CFC) is subject to current taxation in Sweden on its share of the foreign entity’s worldwide profits if the ownership or control exists at the end of the Swedish company’s fiscal year. Foreign entities are considered to be low-taxed if their net income is taxed at a rate of less than 12.1% (55% of the effective corporate income tax rate) on a base computed according to Swedish accounting and tax rules. However, the CFC rules do not apply to foreign entities that are resident and subject to corporate income tax in jurisdictions on the so-called “white list.” If Sweden has entered into a tax treaty with a jurisdiction on the white list, an additional requirement for the exemption is that the foreign entity and its income must be eligible for treaty benefits.

Antiavoidance legislation. A general antiavoidance act applies in Sweden. The act is considered a source of insecurity to taxpayers because it limits the predictability of the tax law. Under the act, a transaction may be adjusted for tax purposes if all of the following conditions are met:

- The transaction, alone or together with other transactions, is part of a procedure that provides a substantial tax advantage to the taxpayer.
- The taxpayer, directly or indirectly, participated in the transaction or transactions.
- Taking into account all of the circumstances, the tax advantage can be considered to be the predominant reason for the procedure.
- A tax assessment based on the procedure would be in conflict with the purpose of the tax law, as it appears from the general design of the tax rules, the rules that are directly applicable or the rules that have been circumvented through the procedure.

Transfer pricing. The Swedish law on transfer pricing is based on the arm’s length principle. As a result, in general, the Organization for Economic Cooperation and Development (OECD) transfer-pricing guidelines apply. Under the transfer-pricing law, the Swedish Tax Agency may adjust the income of an enterprise if its taxable income in Sweden is reduced as a result of contractual provisions that differ from those that would be agreed to by unrelated parties and if the following three additional conditions are met:
The party to which the income is transferred is not subject to tax in Sweden.

It is reasonably established that a community of economic interest exists between the parties.

It is clear from the circumstances that the contractual provisions were not agreed upon for reasons other than the community of economic interest.

If the conditions under the law are met, the Swedish Tax Agency may increase the income of an enterprise by the amount of the reduction resulting from the contractual provisions that were not determined at arm’s length.

Under Swedish rules, a Swedish company must have formal transfer-pricing documentation in place with respect to cross-border transactions.

Debt-to-equity rules. No thin-capitalization rules exist in Sweden. However, the Companies Act requires the compulsory liquidation of a company if more than 50% of the share capital is lost without replacement of new capital.

Before 1 January 2013, a Swedish company was not allowed to deduct interest expenses on loans for intragroup acquisitions of shares and share-based instruments unless certain conditions applied. The interest expenses were deductible if the interest income related to the loan was taxable at a rate of 10% in the hands of the beneficial owner of the interest income or if the intragroup acquisition and the debt related to the interest expenses were motivated predominantly by business reasons. To determine whether the rate was 10%, the interest income was considered on a stand-alone basis; that is, as if the interest income was the only income recognized by the beneficial owner.

Effective from 1 January 2013, the rules discussed above are expanded. Accordingly, the main rule limits deductibility of interest expense relating to all loans between related parties. The existing exemptions from the main rule are maintained but are somewhat modified.

The 10% rule is maintained, but specific rules with respect to situations in which the recipient is subject to yield tax are introduced. In addition, the taxpayer must show that the predominant reason for establishing the debt relationship is not to provide the group with a substantial tax advantage.

The “business reasons exemption” provides that interest expense is deductible if the debt relationship is predominately motivated by business reasons. If the debt relationship relates to an acquisition of shares or share-based instruments from a related company, or to an acquisition of shares or share-based instruments in a company that becomes related after the acquisition, it is also required that the acquisition be motivated predominantly by business reasons. In addition, the beneficial owner of the income must be resident in an EEA state or, under certain circumstances, a state with which Sweden has a tax treaty. The new rules also provide that it should be taken into consideration whether the financing could have been made through contributions by direct or indirect shareholders or by the lender.
Interest payments are not subject to withholding tax under Swedish internal law. Consequently, the following table provides treaty withholding tax rates for dividends and royalties only. However, under Swedish domestic law, no dividend withholding tax is levied on dividends paid by a Swedish company to a foreign company that is equivalent to a Swedish company. A foreign company is considered equivalent to a Swedish company if the company is resident and liable for income tax in a country with which Sweden has entered into a tax treaty, provided that the taxation is not limited to certain income and that the entity is covered by the provisions of the tax treaty.

</table>

(a) Royalties paid to nonresidents are not subject to withholding tax, but are taxed as Swedish-source income at the normal corporate tax rate of 22%. However, under certain treaties, the tax rate may be reduced.

(b) The reduced tax rate applies if a parent owns at least the minimum percentage of the paying company prescribed by the relevant treaty.

(c) The rate of tax is further reduced if specific conditions are satisfied.

(d) Under Swedish domestic law, dividends paid to a foreign company (other than a tax-haven company) that is equivalent to a Swedish company are exempt from withholding tax if the shares are held for business purposes. Unlisted shares in Swedish companies are normally considered to be held for business purposes unless they are regarded as inventory. If the shares are listed, they must also be held for at least 12 months and the holding must exceed 10% of the voting rights. A special exemption also applies if the recipient fulfills the conditions in Article 2 of the EC Parent-Subsidiary Directive and if the holding is at least 10% of the share capital.

(e) Sweden applies the treaty with the former Czechoslovakia to the Czech Republic and the Slovak Republic.

(f) Sweden applies the treaty with the former Yugoslavia to Bosnia-Herzegovina, Croatia, Montenegro, Serbia and Slovenia. Sweden has entered into a tax treaty with Macedonia. The withholding rates under the Macedonia treaty are listed in the table.

(a) The rates reflect the maximum aggregate effective tax burden of ordinarily taxed companies and are composed of federal, cantonal and communal (municipal) taxes. Approximately 7.8% of the rates relate to the federal tax. The rates depend on the canton and commune in which the taxable entity performs its activities. Lower rates are available for privileged companies described in Section E.
(b) See Section B.
(c) The withholding tax rates may be reduced under the Switzerland-European Union (EU) agreement (see Section E) and under double tax treaties (see Section F).
(d) Withholding tax is levied on bank interest, but normally not on interest on commercial loans, including loans from foreign parents to Swiss subsidiaries.
(e) Income of the current year may be offset against losses incurred in the preceding seven years. Losses may not be carried back. See Section C.

B. Taxes on corporate income and gains

Income tax. Switzerland is a confederation of 26 cantons (states). Taxes are levied at the federal and cantonal/communal levels. As a result of this multilayered tax system, no standard tax rates exist. Under the Swiss income tax system, earnings are taxed at the corporate level and, to the extent profits are distributed as dividends, again at the shareholder’s level. However, see Dividends for details regarding the participation exemption.
In general, a resident corporation is a corporation that is incorporated in Switzerland. In addition, a corporation incorporated in a foreign country is considered a resident of Switzerland under Swiss domestic law if it is effectively managed and controlled in Switzerland.

Resident companies are subject to corporate tax on worldwide income. Income realized by a foreign permanent establishment of a Swiss company or derived from foreign real estate is excluded from taxable income, but must be included in determining the applicable tax rate. Losses incurred by a foreign permanent establishment are deductible from taxable income. However, if a foreign permanent establishment of a Swiss company realizes profits in the seven years following the year of a loss and if the permanent establishment can offset the loss against such profits in the foreign jurisdiction, the Swiss company must add the amount of losses offset in the country of the permanent establishment to its Swiss taxable income.

A company not resident in Switzerland is subject to Swiss income tax if it has a permanent establishment in Switzerland.

**Tax Harmonization Act.** The Tax Harmonization Act (THA) sets certain minimum standards for cantonal/communal taxes. However, cantonal/communal tax rates are not harmonized under the THA.

**Rates of corporate tax.** The federal corporate income tax is levied at a flat rate of 8.5% of taxable income. Because taxes are deductible, the effective federal corporate income tax rate is approximately 7.8%.

Cantonal/communal tax rates vary widely. The cantonal/communal tax rates are usually a certain percentage (known as “multipliers”) of the relevant cantonal statutory tax rates. The total effective maximum tax burden, which consists of federal, cantonal and communal taxes, ranges from 12% to 24%, depending on the canton and commune in which the taxable entity is located.

**Tax incentives.** In Switzerland, tax incentives are granted to companies either by the cantons or by both the cantons and the federation. Except for the limitation on the duration of tax incentives to a maximum period of 10 years, the cantons are autonomous in granting cantonal/communal tax incentives to the following:

- Newly established enterprises
- Existing companies that substantially change their business if such change corresponds to the incorporation of a new enterprise

Tax incentives at the federal level require approval of the federation. Incentives at the federal level are governed by the federal law on regional policy. The following are the criteria for granting federal incentives:

- Establishment of new business activities in a qualifying area of economic development
- The performance by the applying company of industrial activities or services that have a close nexus to production activities
- Creation of new jobs either directly or indirectly (through its suppliers and/or partners) or preservation of existing long-term jobs in a changing business environment
Particular economic relevance of the planned project for the area

The federation and the cantons grant partial or full tax holidays.

**Capital gains.** Capital gains are generally taxed as ordinary business income at regular income tax rates. Different rules may apply to capital gains on real estate or to real estate companies at the cantonal/communal level.

Capital gains derived from dispositions of qualifying investments in subsidiaries qualify for the participation exemption. Under the participation exemption rules for capital gains, the parent company must sell a shareholding of at least 10% and, at the time of the disposal, it must have held the shares for at least one year (for further details regarding the participation exemption, see Dividends).

**Administration.** Income tax is generally assessed on the income for the current fiscal year, which corresponds to the corporation’s financial year. The financial year need not correspond with the calendar year. Corporations are required to close their books once a year and file annual returns. This rule does not apply to the founding year. Consequently, the first fiscal year can be extended up to a maximum of nearly two years.

The cantonal deadlines for filing the corporate tax return vary, and extensions may be obtained. The federal and cantonal tax returns are generally filed together.

Corporations pay income tax in one lump-sum payment or in installments. The deadline for the payment of federal income tax is 31 March of the year following the fiscal year. The deadline for cantonal/communal taxes is usually between 30 June and 31 December.

**Dividends.** Dividends received are taxable as ordinary income. However, under the participation exemption rules, the federal tax liability is reduced by a proportion of dividend income (as defined by the law) to the total taxable income if the recipient of dividends satisfies any of the following conditions:

- The recipient owns at least 10% of the shares of the distributing corporation.
- The recipient has a share of at least 10% of the profits and reserves of the distributing corporation.
- The recipient holds shares with a market value of at least CHF 1 million.

The participation exemption also applies at the cantonal/communal level. However, income received by qualifying holding companies is fully exempt from cantonal/communal corporate income taxes (see Section E).

Swiss companies distributing dividends or proceeds from liquidation exceeding the nominal share capital are generally required to withhold tax at a rate of 35%. Under the Net Remittance Procedure, Swiss companies distributing qualifying dividends may apply the treaty withholding rates prospectively without making the full 35% prepayment. The Net Remittance Procedure applies to dividends distributed on “substantial participations.” These are
participations that qualify for an additional reduction or a full exemption from Swiss withholding tax under a comprehensive income tax treaty or under the Switzerland-EU agreement (see Section E). To distribute dividends under the Net Remittance Procedure, companies must file an application with the Swiss Federal Tax Administration before distributing dividends, as well as a notification form no later than 30 days after the due date of the dividend.

Under the capital contribution principle, which entered into force on 1 January 2011, contributions to equity made on or after 31 December 1996 can be distributed without triggering withholding tax consequences, provided certain requirements are met.

**Intercantonal tax allocation.** If a company operates in more than one canton, that is, the head office is in one canton and permanent establishments are in other cantons, its taxable earnings are allocated among the different cantons. The tax rate for each canton is based on the aggregate profit. The allocation method depends on the type of business of the company. The determination of the method is based on case law, which is governed by a constitutional guarantee against intercantonal double taxation.

**Foreign tax relief.** Income from foreign permanent establishments of a Swiss company is not taxable in Switzerland. The international allocation of profit is based on intercantonal rules, unless a tax treaty provides for a different method. For the treatment of losses of foreign permanent establishments, see *Income tax*.

### C. Determination of taxable income

**General.** The net profit shown in commercial financial statements generally serves as the basis for income taxation. However, the tax authorities may require adjustments to correct for certain items such as excessive depreciation and provisions.

Federal and cantonal/communal corporate taxes paid or due are deductible for income tax purposes.

**Inventories.** Any system of inventory pricing that is in accordance with accepted business practice and is used consistently by the taxpayer is presumed to be acceptable by the tax authorities.

**Provisions.** Swiss federal and cantonal regulations provide that a company may record a general tax-deductible reserve amounting to one-third of the inventory valuation.

Provisions to cover doubtful accounts receivable and expected liabilities are generally allowed for tax purposes if they are commercially justifiable.

In general, a reserve of 5% of accounts due from Swiss debtors and 10% of those due from foreign debtors is allowed, without substantiation. In addition, provisions for specific accounts may be established if economically justifiable.

**Depreciation.** Depreciation may be calculated using the straight-line or the declining-balance method. For federal tax purposes, the following are some of the maximum rates set forth in the official guidelines.
Method  
Declining-  Straight-  
balance (%)  line (%)  

<table>
<thead>
<tr>

<td>20</td>
</tr>
</tbody>
</table>

Some cantons have particularly favorable provisions (for example, immediate or one-time depreciation).

**Relief for losses.** Income of the current year may be offset against losses incurred in the preceding seven years, to the extent that such losses have not yet been used to absorb profits of prior years. No loss carryback is allowed.

**Groups of companies.** Except for value-added tax purposes, the concept of a consolidated or group return is unknown in Swiss tax law. Each corporation is treated as a separate taxpayer and files its own return.

### D. Other significant taxes

The following table summarizes other significant taxes.

</tbody>
</table>
E. Miscellaneous matters

**Domiciliary and mixed companies.** Domiciliary and mixed companies are primarily engaged in activities abroad. The profits derived by these companies from non-Swiss sources are taxed at substantially reduced rates at the cantonal/communal level. Domiciliary and mixed companies can be used for sales, financing, holding of intellectual property and other activities focusing primarily on non-Swiss markets. Relief at the federal level is available for principal companies (see Principal companies) with sufficient substance.

Under the THA (see Section B), for cantonal taxes, the following tax rules apply to domiciliary and mixed companies:

- Income derived from a qualifying participation (10% of the share capital, 10% of the profit and reserves or fair market value of CHF 1 million), including capital gains resulting from step-ups in the tax basis of such investments, is exempt from tax.
- Income derived from Swiss sources not described in the item above is taxed at ordinary rates (this rule applies only to mixed companies because domiciliary companies do not derive Swiss-source income).
- Income derived from non-Swiss sources is also taxed at ordinary rates. However, the tax base is substantially reduced by the application of rules that take into account the significance of administrative activities performed by the Swiss company (this depends on the intensity of its physical presence in Switzerland and the level of its economical affinity to Switzerland). As a result of these rules, approximately 10% to 30% of the non-Swiss income is subject to the ordinary cantonal and municipal tax, while the remaining non-Swiss income is exempt from tax.

**Holding companies.** Holding companies may take advantage of a special status for cantonal and communal tax purposes. At the cantonal/communal level, holding companies are completely exempt from corporate income tax. Consequently, all types of income derived from financial participations, such as dividends, interest and capital gains, are exempt at the cantonal/communal level. At the federal level, tax relief is granted with respect to qualifying dividends and capital gains (see Section B).

Currently, holding companies are prohibited from performing any commercial activities in Switzerland (this implies that they could do so abroad; however, this is rare).

**Service companies.** For Swiss resident companies providing coordination or management services to a multinational group (technical, administrative or scientific assistance including research and promotion activities), Swiss tax law requires that a share of the profits accruing to the group be allocated to the Swiss company. Switzerland applies the Organization for Economic Cooperation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations. However, for the provision of financial and management services the cost-plus method is accepted in exceptional cases only. Relief is granted to service companies for cantonal and communal tax purposes in accordance with the rules governing mixed companies (see Domiciliary and mixed companies).
Principal companies. Federal guidelines provide a special federal tax regime for principal companies. A Swiss company within an international group is treated as a principal company if it assumes risks and responsibilities for certain activities, including the following:

- Purchasing
- Planning of research and development (R&D), manufacturing and distribution
- Development of marketing strategies
- Logistics
- Treasury
- Finance
- Administration

In structures involving principal companies, manufacturing is typically performed outside of Switzerland by group companies or third parties on a contract manufacturing or cost-plus basis on the instruction of and for the account of the principal. Sales are made exclusively in the name of international group distribution companies for the account of the principal company. These distribution companies must act exclusively as agents with the authority to conclude contracts on behalf of the principal company (commissionaires) or as limited-risk (stripped-buy/sell) distributors because of the related risks borne by the principal.

The federal guidelines can result in an attractive combined federal and cantonal/communal effective tax rate that may be as low as approximately 5% to 10%, depending on the particular set-up and the location. In addition, depending on the substance and the location, principal companies may qualify for tax holidays of up to 10 years.

Debt-to-equity rules. Under the federal thin-capitalization guidelines which are also applied by most cantons, the minimum capitalization is calculated based on the maximum indebtedness of all of the assets. For each type of asset, only a specified percentage may be financed with debt from related parties (directly or indirectly). Consequently, the debt-to-equity ratio results from the sum of the maximum amount of indebtedness of all of the assets. The following are examples of the maximum percentages of indebtedness:

- Cash: 100%
- Accounts receivable: 85%
- Participations: 70%
- Manufacturing plants: 70%
- Intangibles: 70%

The required equity is calculated at the end of the year based on the balance sheet or on the fair market value of all assets, if higher.

For finance companies, the maximum indebtedness is 6/7 of the assets.

Interest rates may not exceed arm’s length rates (the Swiss Federal Tax Administration publishes safe haven rates periodically).

In certain cantons, specific debt-to-equity rules apply to real estate companies.

Foreign-exchange controls. Switzerland does not impose foreign-exchange controls.
Transfer pricing. Switzerland does not have statutory transfer-pricing rules. Intercompany charges should be determined at arm’s length. The tax authorities accept the transfer-pricing methods described by the OECD guidelines. In particular, cost-plus charges should be justified and documented with appropriate ranges of mark-ups for each individual case. For the provision of financial and management services, the cost-plus method is accepted in exceptional cases only.

Special guidelines apply concerning minimum and maximum interest on loans granted to or from shareholders or related parties.

Companies may discuss transfer-pricing issues with the tax authorities, but generally do not apply for advance pricing agreements. Rulings are more common.

Reorganizations. The Swiss Merger Law of 3 October 2003 authorizes companies to carry out tax-neutral reorganizations (mergers, demergers and transformations) if certain conditions are met, including the following:

- Liability to Swiss tax continues after the reorganization.
- Assets and liabilities are transferred and acquired at their previous value for income tax purposes.

Double tax treaties. Switzerland has entered into more than 90 treaties for the avoidance of double taxation. The treaties generally follow the OECD model treaty.

In 1962, the federal council issued an antiabuse decree (BRB 62) under which the Swiss tax authorities unilaterally restricted the use of the Swiss tax treaty network by Swiss companies that are controlled by foreign residents. The BRB 62 regulations were substantially loosened by a circular letter in 1999 and amendments in 2001. This circular letter substantially relaxed the restrictions for the following companies:

- Companies that are engaged in an active business
- Holding companies
- Companies of which at least 50% of their shares (by voting rights and nominal value) is quoted and regularly traded on a Swiss stock exchange or on a foreign stock exchange with identical or comparable regulations and standards
- Companies of which at least 50% of their shares (by voting rights and nominal value) is held directly by a Swiss company or several Swiss companies and the Swiss company or all of the Swiss companies are quoted and regularly traded on a Swiss stock exchange or on a foreign stock exchange with identical or comparable regulations and standards

If a company that remains subject to the antiabuse decree receives dividends, interest or royalties from sources in a country having a double tax treaty with Switzerland and if foreign withholding tax is reduced as a result of the applicable tax treaty, no more than 50% of this income may be diverted to persons outside Switzerland.

The Federal Tax Administration published another circular letter on 1 August 2010 with respect to BRB 62 and the changes made in 1999 and 2001. This circular letter further relaxed the antiabuse decree. It provides that, as of 1 August 2010, the antiabuse regulations set forth in the new double tax treaties (including the
extended administrative assistance clause in accordance with Article 26 of the OECD Model Convention) supersedes the regulations set forth in BRB 62 and the amendments of 1999 and 2001. For all treaties without antiabuse clauses, BRB 62 remains applicable. The 2010 circular letter also states that the following Swiss companies (in addition to the ones already specified in 1999 and 2001) are considered engaged in active business and therefore are no longer subject to the restrictions imposed in 1962:

- Finance companies if their activities are conducted by highly qualified employees and a real value-added is generated. The actual activities carried out and the risks assumed are relevant rather than the number of employees.
- Intellectual property (IP) companies. The same factors as mentioned above for finance companies are taken into account.
- Holding companies with a participation of at least 10% in the affiliate.

For further relief, the personnel of another Swiss group company may be considered when determining whether a company is active.

**Switzerland-European Union agreement.** The Switzerland-EU agreement on savings taxation took effect on 1 July 2005. In general, it provides for Switzerland measures equal to those contained in the European Community (EC) Parent-Subsidiary Directive of 1990. Under these measures, dividends paid (similar rules also apply to intercompany interest and royalties) are not subject to tax in the country of source if the following conditions are satisfied:

- The parent company has a direct minimum holding of 25% of the capital of the payer of the dividends (subsidiary) for at least two years.
- Both the parent company and the subsidiary are subject to corporate tax without being exempted and both are in the form of a limited company.
- One company is tax resident in an EU member state and the other company is tax resident in Switzerland.
- Neither company is tax resident in a third state under a double tax treaty with that state.

Existing double tax treaties between Switzerland and EU member states that provide for more favorable tax treatment remain applicable.

The Switzerland-EU agreement applies to all EU member states, including the following jurisdictions:

- Guadeloupe, Guyana, Martinique and Reunion (France)
- Gibraltar (United Kingdom)
- Azores and Madeira (Portugal)
- Canary Islands (Spain)

The Switzerland-EU agreement will be extended to other territories that join the EU in the future.

Relief from withholding tax under the Switzerland-EU agreement requires filing and approval of Form 823C by the Swiss Federal Tax Administration. The Swiss Federal Tax Administration uses beneficial ownership or substance as a criterion for its examination of Form 823C. An approval remains valid for a three-year period. Reimbursements of Swiss withholding tax on dividends paid before the completion of the two-year minimum holding period requires filing and approval of Form 70 after the completion of the two-year holding period.
The Switzerland-EU agreement also applies to all interest payments made by a paying agent in Switzerland to an individual resident for tax purposes in an EU member state. Switzerland applies a withholding tax at a rate of 35% (effective from 1 July 2011). The Switzerland-EU agreement allows foreign bank customers to choose between the withholding tax and a declaration to the tax authorities (voluntary declaration).

**F. Treaty withholding tax rates**

Effective from 1 July 2005, Switzerland benefits from measures equivalent to those found in the EC Parent-Subsidiary Directive and the EC Directive on a common system of taxation applicable to interest and royalty payments made between associated companies of different Member States. Subject to fulfillment of the respective requirements, the taxpayer may apply either the Switzerland-EU agreement or an applicable double tax treaty.

</tbody>
</table>
(a) Withholding tax is imposed only on bank interest and on interest from public
ly offered bonds, debentures and other instruments of indebtedness issued
by a Swiss borrower, but not on interest on commercial loans, including loans
from foreign parents to Swiss subsidiaries.
(b) Under Swiss domestic law, no withholding tax is imposed on royalties, manage-
ment fees, rents, licenses and technical assistance fees and similar payments.
(c) A 5% general rate and a 0% rate on interest paid between related parties (as
defined in the double tax treaty) apply to interest paid on or after 1 July 2013.
A 10% rate applies to interest paid on or before 30 June 2013.
(d) This rate applies if the shareholding by a corporation is at least 25%. A 15% rate
applies to all other dividends.
(e) The renegotiated treaty entered into force on 4 November 2010. The 0% rate
generally applies if the shareholding of a corporate recipient of dividends is
at least 10%. The rate is increased to 15% if the shareholding of a corporate
recipient is less than 10% or if the corporate recipient is controlled by persons
that are not in the contracting states unless the corporate recipient demon-
strates that the participation rights are not solely intended to profit from the
advantages mentioned above. The 0% rate also applies to dividends paid to
individuals and all other dividends.
(f) The 5% rate applies to dividends paid to corporations with a shareholding and
voting stock of at least 10% in the payer. A 15% rate applies to other dividends.
(g) The 5% rate applies to dividends paid to corporations with a shareholding of
at least 10% in the payer. A 15% rate applies to other dividends.
(h) This rate applies to dividends paid to corporations holding at least 10% of the
capital and to dividends paid to pension funds or other similar institutions
providing pension schemes. A 15% rate applies to other dividends.
(i) The 5% rate applies to the recipient of the dividends is a corporation with a
shareholding of at least 15%. A 15% rate applies to other dividends.
(j) The 0% rate generally applies to the recipient of the dividends is a corporation
that has a shareholding of at least 10% and if the participation has been held
for at least one year. A 15% rate applies if the recipient of the dividends is a
corporation that has a shareholding of less than 10% or if the recipient of the
dividends is an individual.
(k) A rate of 5% applies to interest on bank loans.
(l) Rate is applicable if shareholding by a corporation is at least 10%. The net
treaty withholding rate is increased to 20% if shareholding is less than 10%.
(m) A 0% rate applies to interest on bank loans.
(n) The 0% rate applies to the following interest payments:
   • Interest paid to the other contracting state in connection with the sale on
     credit of industrial, commercial or scientific equipment
   • Interest paid in connection with the sale on credit of merchandise by one
e   enterprise to another enterprise
   • Interest on a loan granted by a bank or to the other contracting state or a
     political subdivision or a local authority thereof
(o) The 5% rate applies if the recipient of the dividends is a corporation with a
shareholding of at least 20%. The rate is increased to 15% in all other cases.
(p) For interest paid to banks, the withholding tax rate is reduced to 5%.
(q) The 0% rate applies to dividends paid to corporations with direct ownership
of at least 10% and a holding period of two years and to dividends paid to
pension funds or other similar institutions. A 5% rate applies to corporations
with direct ownership of at least 10% before the two-year holding period has
elapsed. A 15% rate applies in all other cases.
(r) The 0% rate applies to the following interest payments:
   • Interest paid with respect to a loan made, guaranteed or insured by the
     government of the other state or an instrumentality or agency thereof
   • Interest paid in connection with the sale on credit of industrial, commercial
     or scientific equipment
   • Interest paid in connection with the sale on credit of merchandise by one
     enterprise to another enterprise
   • Interest on a loan granted by a bank
(s) This rate applies to dividends paid to corporations holding at least 10% of the
voting power of the payer. A 15% rate applies to other dividends.
(t) This rate applies if the shareholding of the recipient is at least 20%. For other
dividends, the rate is 15%.
(u) The 0% rate applies to interest on special trade credits or loans. The 10% rate
applies to interest paid to banks or insurance companies. The 15% rate
applies to other interest.
(v) This rate applies if the shareholding of the recipient is at least 50%. The rate
is 10% if the shareholding of the recipient is at least 25% but less than 50%.
The rate is 15% for other dividends.
(w) The China treaty does not cover the Hong Kong SAR.
Because offshore companies on the island of Madeira enjoy a privileged tax treatment, the Swiss tax authorities may not consider these companies to be residents of Portugal under the treaty between Switzerland and Portugal. However, the Switzerland-EU agreement covers Madeira (see Section E and the paragraph preceding the treaty withholding tax rate table).

This rate applies if the direct shareholding of the corporate recipient is at least 10%. For other dividends, the rate is 15%.

The rate is 10% if the shareholding of the recipient is less than 25%

The 0% rate applies to interest on certain government bonds. The 5% rate applies to other interest.

This rate applies if the shareholding of the recipient is at least 10%. A 15% rate applies to all other dividends.

A 0% rate applies to interest on bank loans and in certain other special cases.

The 5% rate applies if the shareholding by a corporation is at least 20%. The treaty withholding tax rate is increased to 15% if the shareholding is less than 20%.

The 10% rate applies to dividends paid to corporations holding participations of at least 20% in other enterprises. A 20% rate applies to other dividends.

The 0% rate applies to the following interest payments:

- Interest paid to a contracting state or a political subdivision or local authority thereof
- Interest paid to the central bank of the other contracting state or any institution owned by the government
- Interest paid to a bank, insurance company, securities dealer or pension fund or scheme

A 0% rate may apply under the Switzerland-EU agreement (see the paragraph preceding the treaty withholding tax rate table). The rates shown in the table are the treaty withholding tax rates.

The 0% rate applies to corporate recipients if the direct shareholding is at least 25% and if the participation has been held for at least two years. The treaty withholding tax rate is increased to 15% if the shareholding is less than 25% or if the participation has been held for less than two years.

The 0% rate applies if the recipient is a company (other than a partnership) that owns directly at least 25% of the capital of the company paying the dividends, a governmental institution, a pension fund or a central bank authority. A 15% rate applies to other dividends.

The 5% rate applies if the corporate recipient of the dividends holds a shareholding of at least 20% in the distributing entity and has invested at least US$200,000 in the country of the distributing entity. The treaty withholding tax rate is increased to 15% if the shareholding is less than 20%.

The 0% rate applies to interest paid to certain government agencies or in connection with the purchase of industrial, commercial or scientific equipment on credit. The 5% rate applies to interest paid to banks or in connection with the purchase of goods on credit. The 10% rate applies to other interest.

The 0% rate applies to the following interest payments:

- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest paid on the sale of goods between corporate entities
- Interest paid on certain bank loans

A 10% rate applies to all other interest payments.

The 5% rate applies if, at the time the dividends become due, the corporate recipient of the dividends holds a shareholding of at least 25% in the distributing entity and the value of the participation is at least CHF 200,000 (or the equivalent in foreign currency). The treaty withholding tax rate is 15% if these conditions are not met.

No treaty is in force. However, the Swiss-EU Savings Tax Agreement is available.

The 0% rate generally applies if the shareholding of a corporate recipient of dividends is at least 10%. The rate is increased to 10% if the shareholding of a corporate recipient is less than 10%.

A 0% rate applies to dividends paid to the other contracting state or a political subdivision or local authority thereof, the central bank or pension funds. The 5% rate applies to dividends paid to corporate recipients if the shareholding is at least 10%. A 10% rate applies if the recipient is an individual with a shareholding of at least 10%. For other dividends, the rate is 15%.

These treaties have been renegotiated and signed and will enter into force on 1 January of the year following the year of the notifications of each contracting state. It appears that these treaties will not enter into force before 1 January 2014.
The treaty between Denmark and Switzerland was extended to the Faroe Islands as of 22 September 2009. The extension and the revised protocol between Denmark and Switzerland entered into force in November 2010.

On 10 October 2011, an amending protocol entered into force. The protocol did not change the withholding tax rates. However, if after the date of signing of the amending protocol, India and a third state that is an OECD member sign a convention, agreement or protocol and if under this convention, agreement or protocol, India limits its taxation at source of dividends, interest, royalties or fees for technical services to a rate lower than the rate provided for in the double tax treaty between Switzerland and India, the lower rate will also apply under the double tax treaty between Switzerland and India, effective from the date on which such convention, agreement or protocol enters into force.

The 0% rate applies if the dividends are paid to corporations with a shareholding of at least 10% in the capital of the payer and the shareholding is held for at least two years or if the dividends are paid to pension funds or similar institutions. A 15% rate applies in all other cases.

The 0% rate applies to interest paid to the other contracting state or certain government agencies of the contracting state or in connection with financing transactions, the purchase of industrial, commercial or scientific equipment or the construction of industrial, commercial, scientific or public facilities on credit. The 10% rate applies to all other interest.

The 5% rate applies to interest paid on bank and insurance loans, on bonds and other securities that are traded on a stock exchange and in certain other special transactions. The 15% rate applies to all other interest payments.

The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company that has owned directly or indirectly for at least six months shares representing at least 50% of the capital or voting power of the company paying the dividends
- A pension fund or scheme

The 5% rate applies to corporate recipients if the direct or indirect shareholding represents at least 10% of the capital or voting power and if the participation has been held for six months. A 10% rate applies to all other dividends.

The 0% rate applies to dividends that are paid to the Bank of Canada or qualifying pension schemes.

The 0% rate applies to interest payments if the beneficial owner of the interest is a resident of Canada and is not related to the payer.

The 0% rate applies if the beneficial owner of the dividends is the other contracting state, a political subdivision or a local authority of the other contracting state or a pension fund or scheme.

The 0% rate applies to dividends paid to the Bank of Canada or qualifying pension schemes. The 5% rate applies to dividends paid to a corporation (other than a partnership) holding directly at least 10% of the capital of the company paying the dividends. The 15% rate applies to other dividends.

The 0% rate applies to interest paid by a banking enterprise to a banking enterprise in the other contracting state or interest arising in Switzerland and paid to the Monetary Authority of Singapore. The 5% rate applies to other interest.

These treaties have been renegotiated and signed. The revised treaties will enter into force after each country has completed the domestic law procedures for ratification and complied with the respective provisions of the treaties.

The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) that has owned directly or indirectly shares representing at least 10% of the capital or voting power of the company paying the dividends
- A pension fund or scheme

The 15% rate applies to other dividends.

The 0% rate applies to dividends paid to a corporation with a direct shareholding of at least 10% in the capital of the payer and to dividends paid to a governmental institution, pension fund or central banking authority. A 15% rate applies to other dividends.

The 0% rate applies to interest paid to the state or the central bank. The 5% rate applies to interest paid with respect to a loan or credit made, guaranteed or insured for the purposes of promoting export by an Eximbank or similar institution. The 10% rate applies to interest derived by a bank. A 15% rate applies in all other cases.
On 16 January 2012, the Government of Argentina issued a note directed to the Swiss ambassador in Argentina regarding the immediate termination of the provisional application of the treaty for avoidance of double taxation with respect to taxes on income and capital between Switzerland and Argentina and the related protocols. At the time of writing, it is not clear whether the tax authorities will continue to grant the treaty benefits.

The 5% rate applies if the recipient of the dividends holds a shareholding of at least 20% in the distributing entity and if the value of the participation is at least CHF 200,000 (or the equivalent in foreign currency). A 15% rate applies to other dividends (in specific cases the 0% rate applies; see footnote [ooo]).

The 0% rate applies to the following interest payments:

- Interest paid with respect to a loan made, guaranteed or insured by the government of the other state or an instrumentality or agency thereof
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest paid in connection with the sale on credit of merchandise by one enterprise to another enterprise
- Interest paid to the other contracting state

The 0% rate applies to the following interest payments:

- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest paid on bank loans
- Interest paid to a bank, insurance company or pension fund or scheme
- Interest paid to a contracting state, a political subdivision or local authority thereof, or a central bank
- Interest paid between enterprises that are associated by a state of at least 25% held for at least two years or that are both held by a third company that directly holds at least 25% of the capital of both companies for at least two years

A 0% rate applies to dividends paid to the other contracting state or a political subdivision or local authority thereof, the central bank or a pension fund.

The 0% rate applies to the following interest payments:

- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest paid on the sale of goods between corporate entities
- Interest paid on bank loans

In addition, the 0% rate applies if the interest is paid between enterprises that satisfy all of the following conditions:

- They are associated by a stake of at least 10% held for at least one year or they are both held by a third company that directly holds at least 10% of the capital of both companies.
- They are resident in a contracting state and, under any double tax agreement with any third state, none of the companies is resident in that third state.
- They are subject to corporation tax and are not exempt from tax on interest payments.
- They are both limited companies.

The 10% rate applies to other interest payments.

The 0% rate applies if the direct shareholding of the corporate recipient is at least 10% and if the participation has been held for at least one year. For other dividends, the rate is 15%.

The 0% rate applies to the following interest payments:

- Interest paid to a contracting state or a political subdivision, local authority, administrative-territorial unit or export financing institution thereof
- Interest paid between enterprises that are associated by a stake of at least 25% or that are both held by a third company that directly holds at least 25% of the capital of both companies

The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:

- A pension fund or scheme
- The government of the other state, or a political subdivision or local authority thereof
- The Swiss central bank

The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:

- A company (other than a partnership) directly owning shares representing at least 10% of the capital of the company paying the dividends
A pension fund or scheme
The Swiss central bank

The 10% rate applies to other dividends.

The agreement is effective from 1 January 2013 with respect to Swiss taxes, and from 1 April 2013 with respect to Hong Kong SAR taxes.

The 0% rate applies to the following interest payments:

- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest on a loan granted by a bank

The agreement is retroactively effective from 1 January 2012 with respect to withholding taxes, and from 1 January 2013 with respect to all other taxes.

A double tax treaty with Peru has been signed, but has not yet entered into force. Previously, Switzerland had never entered into a double tax treaty with Peru. At the time of writing, Switzerland had signed new double tax treaties with Bulgaria, the Czech Republic, Greece, Ireland, Kazakhstan, Portugal, Slovenia and Turkmenistan. Switzerland has initialed but not signed new double tax treaties with Costa Rica, Korea (North), Oman and Zimbabwe.

(a) For details, see Section B.
(b) Effective from 1 January 1990, income from securities transactions is not subject to regular corporate income tax. Such income is subject to alternative minimum tax. See Section B.
(c) For details and the definition of a nonresident corporation, see Section B.
(d) Payments in connection with securities issued under the Financial Asset Securitization Act or Real Estate Securitization Act and interest derived from short-term commercial paper are subject to a 10% withholding tax. In addition, they are included in the computation of the resident corporation’s taxable income and are taxed at a rate of 17%.
(e) Interest arising from short-term commercial paper, asset-backed securities, bonds, structured products and repurchase agreements underlying such financial instruments is not included in the tax computation in a resident individual’s tax return but is subject to a 10% withholding tax.
(f) The applicable tax rate for interest arising from short-term commercial paper, asset-backed securities, bonds, structured products and interest arising from repurchase agreements is 15%. Other types of interest are subject to a tax rate of 20%.
(g) The withholding of tax is not required if the licensor issues a Government Uniform Invoice (GUI).

B. Taxes on corporate income and gains

Corporate income tax. A domestic profit-seeking enterprise is subject to corporate income tax on all of its income regardless of source. All profit-seeking enterprises, including subsidiaries of foreign companies that are incorporated under the Company Law of Taiwan, are considered domestic profit-seeking enterprises. A foreign profit-seeking enterprise is subject to tax only on income sourced in Taiwan.

Tax rates. For 2012, the taxing threshold for taxable income is NT$120,000, and the total net income exceeding NT$120,000 is
subject to corporate income tax at a rate of 17%. However, the income tax payable may not exceed one-half of the taxable income minus the NT$120,000 threshold amount.

**Alternative minimum tax.** The alternative minimum tax (AMT) applies to domestic profit-seeking enterprises and foreign profit-seeking enterprises that have a fixed place of business or business agent in Taiwan, if the enterprise’s base income exceeds NT$500,000. The AMT is calculated in accordance with the following formula:

\[
\text{AMT} = (\text{base income} - \text{deduction of NT$500,000}) \times 12\%
\]

Base income equals the sum of the following items:
- Taxable income
- Tax-exempt income under the Statute for Upgrading Industries and other credit regulations
- Income from transactions in securities and futures
- Tax-exempt income of offshore banking units

If the regular income tax equals or exceeds the AMT, only the regular income tax is payable. The regular income tax equals tax payable calculated under the Income Tax Law, less tax credits. If the regular income tax is less than the AMT, the difference between regular income tax and the AMT is payable in addition to the regular income tax. The additional tax payment cannot be off-set by tax credits.

**Tax incentives.** A new Statute for Industry Innovation (SII) was announced and published on 12 May 2010 to replace the old Statute for Upgrading Industries (SUI), which expired on 31 December 2009. In comparison to the SUI, the SII retains only the tax incentive for expenditure spent on research and development (R&D) activities and offers other nontax subsidies for various qualified activities. Under the SII, enterprises may claim up to 15% of their R&D expenditures as a credit to offset against their corporate income tax payable in the current year only, with a maximum credit of 30% of the tax payable. The unused R&D tax credits obtained under the SII cannot be carried over to the future years. The SII is effective from 1 January 2010 through 31 December 2019. The tax incentives obtained before the expiration of SUI remain effective after the expiration of SUI.

**Capital gains.** For profit-seeking enterprises, effective from 1 January 1990, income from securities transactions is not subject to regular income tax. Such income is subject to AMT. A securities transaction tax of 0.3% or 0.1% is imposed based on the transaction value.

During the period of 1 January 2010 through 31 December 2016, trading in corporate bonds and financial bonds (as defined in the Banking Law of Taiwan) is exempt from securities transaction tax. The suspension of income tax on securities transactions applies only to securities issued and certified in accordance with the law of Taiwan. Gains derived from disposals of securities that are not issued or certified in accordance with Taiwan regulations are subject to income tax.

Gains on sales of land are exempt from income tax, but are subject to land value increment tax (see Section D).
Administration. The tax year is normally the calendar year. Permission must be obtained to use any other period. An annual tax return must be filed during the fifth month of the year following the tax year. An extension to file a tax return is not available.

In general, the late filing penalty is 10% of the tax due. It may not exceed NT$30,000 or be less than NT$1,500. A delinquent reporting surcharge is 20% of the tax assessed by the authorities. It may not exceed NT$90,000 or be less than NT$4,500. A taxpayer that fails to pay the tax within the prescribed time limit is subject to a surcharge for delinquent payment and interest on a daily basis at the prevailing interest rate provided by the Directorate General of Postal Remittances and Savings Bank (PRSB). Underreporting of taxable income is subject to a penalty of up to two times the underpayment of tax. In the event of a failure to file the annual income tax return after expiration of the prescribed period, the tax authorities may make a provisional assessment of the amount of income and tax payable on the basis of available tax data or the profit standard of the same trade. In the event that other tax information is subsequently obtained by the tax authorities, the taxpayer is subject to a penalty of up to three times the tax shortfall, in addition to the delinquent reporting surcharge.

During the month of September, a profit-seeking enterprise (excluding a sole proprietor, partnership, prescribed small-size enterprise or tax-exempted entity) must pay an interim tax equal to 50% of the preceding year’s tax liability. Under the Income Tax Law, qualified enterprises may pay interim tax based on the income derived in the first six months of the current year. If the interim tax payment is made after 30 September but before 31 October, late payment interest accrues on a daily basis at the prevailing interest rate provided by the PRSB. If the interim payment is not made by 31 October, the tax authorities assess one month’s interest at the prevailing interest rate provided by the PRSB.

Dividends. Effective from 1 January 2010, the dividend withholding tax rate is 20% for nonresident corporations or nonresident individuals, regardless of whether the investments are approved by the Taiwan government pursuant to the Statute for Investment by Foreign Nationals or the Statute for Investment by Overseas Chinese. Withholding tax is not imposed on dividends paid to residents.

Under an imputation system, which took effect on 1 January 1998, a 10% surtax is imposed on the undistributed profits of companies in the second year following the year in which the profits are earned. This tax is in addition to the normal corporate income tax imposed on the profits. Resident individuals who receive dividends from resident companies must include the dividends in their taxable income and are granted tax credits for the corporate income tax and the 10% surtax paid by the distributing company in Taiwan. For nonresident individuals and corporations, the tax credit is limited to 10% of the franked dividends (dividends paid out of company profits on which the 10% surtax has been imposed). Cash refunds for excess credits are granted to shareholders who are resident individuals.

Companies must maintain an imputation credit account and calculate the imputation credits that are allocated to shareholders.
These accounts are designed to limit the credit to the amount of corporate income tax and surtax paid in Taiwan. The total tax credit available is determined by multiplying the dividends received by the ratio of total tax paid at the corporate level to accumulated retained earnings since 1998.

Dividends received by resident companies from other resident companies are exempt from corporate income tax. However, imputation credits cannot be used by resident companies and must be passed on to individual shareholders. The tax credits are passed through to the company's individual shareholders by adding the tax credits received to the numerator of the ratio described in the preceding paragraph.

**Foreign tax relief.** A tax credit is allowed for foreign income tax paid directly by a domestic profit-seeking enterprise, but it may not exceed the additional amount of the Taiwan tax resulting from the inclusion of the foreign-source portion in the profit-seeking enterprise’s total income.

### C. Determination of trading income

**General.** Income for tax purposes is computed according to Taiwan’s generally accepted accounting principles, adjusted for certain provisions included in the tax code.

Necessary and ordinary expenses of a profit-seeking enterprise are deductible, provided these are adequately supported by documentation. The guidelines of Examination of Income Tax of Profit-Seeking Enterprises, promulgated by the Ministry of Finance, provide guidance for determining deductible business expenses. Transactions must conform to regular business practice; otherwise, tax authorities may assess tax based on standard profit margins derived from industry statistics.

If the income of a company consists of both taxable income and exempt income, the costs, expenses or losses, except for those that are attributable to the taxable income and exempt income in a direct, reasonable and definite way, must be allocated to taxable income and exempt income based on certain permitted methods.

**Tax exemptions.** A foreign enterprise engaging in international transportation that derives income in Taiwan is exempt from tax if Taiwan and the home country of the foreign enterprise have entered into an international transportation income tax agreement, which provides reciprocal treatment to Taiwan international transportation enterprises operating in the foreign country.

Income derived by profit-seeking enterprises or individuals from the sale of land is exempt from income tax.

On approval from the competent authority, royalties paid to a foreign enterprise for the use of its patent rights or trademarks, or for the licensing of other special rights, may be exempt from tax if the licensed rights are used to introduce new production technology or products, improve product quality or reduce production cost. In addition, service fees received by a foreign enterprise for rendering technical services in the construction of a factory for an emerging strategic important enterprise (ESIE) and royalties for the licensing of know-how to the ESIE may also be exempt from tax on approval. Tax exemption treatment for royalties for the
licensing of know-how or technical service fees for the construction of a factory for an ESIE applies only to licenses or service contracts signed by 31 December 2010.

A foreign-based corporate taxpayer that is engaged in international transportation, construction contracting, technical service provision, or machinery and equipment leasing may apply to use a deemed-profit-rate method (15% in general, and 10% for international transportation business) in determining its taxable income in Taiwan if it is difficult to calculate the costs and expenses arising from the conduct of the business in Taiwan.

Interest received by a foreign financial institution for offering financing facilities to its Taiwan branch offices or other financial institutions in Taiwan is exempt from tax. With the approval of the Ministry of Finance, interest received by a foreign financial institution for extending loans to legal entities in Taiwan for financing important economic construction projects is also exempt from tax.

**Inventories.** Inventories are valued for tax purposes at the lower of cost or net realizable value. In determining the cost of goods sold, specific identification, first-in, first-out (FIFO), weighted average, moving average, or any other method prescribed by the competent authority may be used. However, the use of two different cost methods in one fiscal year is not allowed.

**Provisions.** Provisions for a retirement fund approved by the authorities are deductible in amounts up to 15% of the total payroll. The applicable percentage depends on whether the fund is managed separately from the business entity and whether it conforms to the provisions of the Labor Standards Law.

Allowance for bad debts is limited to 1% of the balance of outstanding trade accounts and notes receivable (secured or unsecured) at year-end.

**Tax depreciation, depletion and amortization.** A taxpayer may claim a depreciation deduction for most property (except land) used in a trade or business. Depreciation may be computed using the straight-line, fixed percentage on diminishing book value method, working-hour method, sum-of-the-years'-digits method or production-unit method. Under the working-hour method, depreciation is computed based on the number of working hours that a depreciable asset is used in a tax year. The time periods over which an asset may be depreciated are specified by the tax authorities. The following are some of the applicable time periods.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial buildings</td>
<td>10 to 50</td>
</tr>
<tr>
<td>Industrial buildings</td>

<td>3 to 5</td>
</tr>
<tr>
<td>Motor vehicles and vessels</td>
<td>3 to 18</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>2 to 20</td>
</tr>
</tbody>
</table>

Companies may use the accelerated depreciation method if they meet certain criteria.

Depletion of assets in the form of irreplaceable resources can be computed either based on the production units or methods provided by the Table of Depletion Assets promulgated by the Ministry of Finance. This method must be applied consistently
from year to year. In addition, a taxpayer may claim an amortization deduction for intangibles and organizational expenses. Business rights (for example, commercial rights for operating public utility, telephone, public transportation, shipping and air transportation businesses) and copyrights are amortized over 10 years and 15 years, respectively. Trademarks, patents and franchises must be amortized over the period prescribed by the respective laws governing the granting of these rights. Organizational and preoperating expenditures incurred during the period from the planning phase to the first year in which significant revenue is generated from the main business activities must be expensed on occurrence.

**Relief for losses.** If certain requirements are met, companies may carry forward for up to 10 years losses that have been approved by the tax authorities and not yet expired. Loss carrybacks are not permitted.

**Groups of companies.** In general, associated or related companies in a group are taxed separately for corporate income tax purposes and may not file consolidated tax returns. However, a financial holding company that holds 90% or more of the shares of subsidiaries in Taiwan for at least 12 months may elect to file a consolidated profit-seeking enterprise income tax return under its own name.

In addition, a company that acquires 90% or more of the shares or capital of its subsidiaries through a merger, spin-off or other acquisition under the Business Merger and Acquisition Law and holds such shares for at least 12 months may elect to file a consolidated profit-seeking enterprise income tax return under its own name.

A 10% surtax on the undistributed consolidated retained earnings applies in addition to the corporate income tax on consolidated net income.

An election to file a consolidated profit-seeking enterprise return applies only to corporate income tax and, as a result, qualifying parent companies and their subsidiaries must calculate all other taxes separately.

**D. Other significant taxes**

The following table summarizes other significant taxes.

E. Miscellaneous matters

Foreign-exchange controls. Under foreign-exchange control regulations, registered business entities or adults legally residing in Taiwan may remit out (in) unlimited funds for the import (export) of goods and services. However, prior declaration to the Central Bank of China (Taiwan) is required for the following:

- An individual who has accumulated inward or outward remittances exceeding US$5 million in a year
- A business entity with accumulated inward or outward remittances exceeding US$50 million in a year
- A single remittance by an individual exceeding US$500,000
- A single remittance by a business entity exceeding US$1 million

In addition, supporting documents, such as transaction contracts, must be submitted at the time of remittance for the Central Bank’s audit purposes.

Debt-to-equity rules. On 26 January 2011, the President of Taiwan announced the thin-capitalization rule enacted into Article 43-2 of the Income Tax Act. On 22 June 2011, the Ministry of Finance announced the enforcement rules for the thin-capitalization rule. The enforcement rules contain a debt-to-equity ratio of 3:1 (excluding companies in the financial industries). Interest on the excess portion of loans is not deductible. The enforcement rules do not apply to enterprises satisfying any of the following conditions:

- Total net current annual operating income and nonoperating income is less than NT$30,000,000.
- Total annual interest expenses and total interest expenses derived from intercompany loans in the current year are both less than NT$4 million.
- Before including the interest expenses in the taxable income calculation, the current year’s taxable income is negative and such tax losses are not eligible for the tax loss carryforward regime under Article 39 of the Income Tax Act.

Controlled foreign companies. Taiwan does not currently have a controlled foreign company (CFC) measure. Income derived by foreign subsidiaries of Taiwan companies is not subject to Taiwan
income tax until it is repatriated to Taiwan in the form of dividends. However, the Taiwan government is considering the introduction of a CFC regime. Under the draft bill currently under review by the Legislative Yuan, a nonresident company is considered a CFC if it is 50%-or-more owned by a Taiwan resident company or individual. A resident company or individual that holds an interest of 50% or more in a CFC is taxed on the company or individual’s share of the profits of the CFC, regardless of whether a dividend has been declared.

**Antiavoidance legislation.** The Taiwan tax laws contain rules that deal with tax evasion and tax avoidance. The general rule is that the tax authorities may ignore transactions that constitute an abuse of the law and assess taxes with respect to each transacting party based on the economic substance of the transactions as well as on the attribution of the economic benefits. The same rule applies to sham transactions designed to conceal the economic reality of the transaction. In addition, under a draft bill currently under review by the Legislative Yuan, the Taiwan government is considering the introduction of rules of place of effective management into the antiavoidance rules.

**Transfer pricing.** The Taiwan Transfer Pricing Examination Guidelines (the TP Guidelines) took effect on 30 December 2004. Except for immaterial amounts from related-party transactions, extensive contemporaneous documentation is required. Under the TP Guidelines, on filing the annual income tax return, a profit-seeking enterprise must have the transfer-pricing report and relevant documents prepared and ready for audit, if requested. In addition, in the event of a tax audit, a profit-seeking enterprise must provide the tax authorities with all required documents within one month of a request for such documents. The TP Guidelines provide that the tax authorities may impose a maximum penalty of 200% of the tax shortfall resulting from improper transfer prices.

**F. Treaty withholding tax rates**

Taiwan has entered into double tax treaties with the countries listed in the table below.

Taiwan has entered into international transportation income tax agreements with Canada, the European Union, Germany, Israel, Japan, Korea (South), Luxembourg, the Macau SAR, the Netherlands, Norway, Sweden, Thailand and the United States.

The following table lists the withholding tax rates under Taiwan’s double tax treaties. The rates apply only if the recipient is the beneficial owner of the income.

United Kingdom | 10% | 10% | 10%
Vietnam | 15% | 10% | 15%
Nontreaty countries | 20% (e) | 20% | 20%

(a) The 10% rate applies to dividends paid to a company (other than a partnership) holding directly at least 25% of the capital of the payer. The 15% rate applies to other dividends.

(b) For dividends paid to Singapore residents, the withholding tax on the dividends and the corporate income tax payable on the profits of the payer may not exceed 40% of the taxable income of the payer out of which the dividends are paid.

(c) The 5% rate applies if the beneficial owner of the dividends holds directly at least 10% of the capital of the payer. The 15% rate applies to other dividends.

(d) The 10% rate applies to dividends paid to a company (other than a partnership) holding directly at least 20% of the capital of the payer. The 15% rate applies to other dividends.

(e) The 20% rate applies to dividends paid to nonresident corporations and nonresident individuals, effective from 1 January 2010 (see Section B).

(f) The 7% rate applies to interest on bank loans. The 10% rate applies in all other cases.

(g) The Singapore treaty does not provide a preferential withholding tax rate for interest payments.

(h) The 5% rate applies to the royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies in all other cases.

(i) This treaty is effective for income derived from Taiwan on or after 1 January 2012. It is effective for income derived from India on or after 1 April 2012.

A. At a glance

Corporate Income Tax Rate (%)  30 (a)
Capital Gains Tax Rate (%)  30 (b)
Branch Tax Rate (%)  30
Withholding Tax (%)
  Dividends  5/10 (c)
  Interest  0/10 (d)
  Royalties  15 (e)
  Management and Professional Fees (Services Fees)  5/15 (f)
  Insurance Premiums  5 (g)
  Rent, Premiums and Similar Consideration  10/15 (h)
  Natural Resources Payments  15 (e)
  Branch Remittance Tax  10 (i)
Net Operating Losses (Years)
  Carryback  0
  Carryforward  Unlimited

(a) The corporate income tax rate is reduced to 25% for three years for companies that are newly listed on the Dar es Salaam Stock Exchange and that issue at least 30% of their share capital to Tanzanian nationals. Companies reporting tax losses for three consecutive years or more must pay alternative minimum tax at a rate of 0.3% on annual turnover beginning with the third year of consecutive losses.

(b) Capital gains are treated as business income for companies and are taxed at the regular corporate income tax rate.

(c) The 10% rate is the general rate for dividends paid by unlisted companies to residents and nonresidents. The rate is 5% for dividends paid by companies listed on the Dar es Salaam Stock Exchange and for dividends paid by a resident company to a resident company owning 25% or more of the shares in the payer of the dividends. The dividend withholding tax is a final tax.

(d) This tax applies to residents and nonresidents. It is a final tax for resident individuals and nonresidents. Resident companies may credit the withholding tax against their annual corporate income tax. Interest paid by strategic investors to nonresident banks is exempt from withholding tax.

(e) This withholding tax applies to both residents and nonresidents.

(f) The 5% rate applies to residents, and the 15% rate applies to nonresidents. The withholding tax on management and professional fees (services fees) is a final tax.

(g) This tax applies to nonresidents only.

(h) The 10% rate applies to residents. The 15% rate applies to nonresidents. This withholding tax is a final tax for nonresidents and for individuals not engaged in business.

(i) This tax applies to branches of foreign companies. Tax is levied on an annual deemed profit repatriation basis. Special rules apply to the calculation of the base.

B. Taxes on corporate income and gains

Corporate income tax. Companies are considered resident for tax purposes if either of the following applies:
• They are incorporated, established or registered in Tanzania.
• Management and control of the affairs of the company are exercised in Tanzania during any part of the tax year.

Resident companies are subject to tax on their worldwide income. Nonresident companies are subject to tax on their Tanzanian-source income only.

Rates of corporate tax. Both resident and nonresident companies are subject to tax at a rate of 30%.

The corporate income tax rate is reduced from 30% to 25% (for the first three years) for companies that are newly listed on the Dar es Salaam Stock Exchange and that issue at least 30% of their share capital to Tanzanian nationals.
Alternative minimum tax. Companies reporting tax losses for three consecutive years or more must pay alternative minimum tax at a rate of 0.3% on annual turnover beginning with the third year of consecutive losses.

Tax incentives. Companies holding certificates of incentives under the Tanzania Investment Act, 1997 benefit from the following:
- Deferral of payment of value-added tax until the beginning of production of goods and services
- Exemption from customs duty on capital goods

Companies operating in the Export Processing Zone (EPZ) are exempt from corporate tax for the first 10 years. They are also exempt from withholding tax on dividends, interest and rental payments.

Capital gains. Capital gains are treated as business income for companies and are taxed at the regular corporate income tax rate.

Administration. A company’s tax year is the calendar year. Companies may apply to the Commissioner for approval of a different tax year.

Companies must file provisional tax returns by the end of the third month of their tax year and file their final tax returns within six months after the end of the tax year. The estimated tax must be paid in four equal installments, as set forth in the provisional return. The remaining balance of tax due must be paid with the final return. The taxpayer’s estimate of taxable income may not be less than its taxable income as finally determined for the preceding tax year. The Commissioner may allow a lower estimate if justified by the facts and circumstances of the case. Companies may revise their provisional return if new developments suggest an increase or decrease in income.

A penalty is imposed for a failure to file a return. Fraud related to a return may be subject to a penalty of up to 100% of the underpaid tax.

Interest is charged for unpaid and underestimated taxes. An interest charge based on the prevailing discount rate determined by the Bank of Tanzania is immediately imposed on tax unpaid after the due date, and it is compounded monthly. If the amount of tax payable is underestimated, interest at a statutory rate, compounded monthly, is charged on the difference between the tax assessed and the estimated tax.

Dividends. A final withholding tax is imposed on dividends. A 10% rate generally applies to residents and nonresidents. A 5% rate applies to dividends paid by companies listed on the Dar es Salaam Stock Exchange and to dividends paid to resident companies that hold 25% or more of the shares in the payer of the dividends.

Dividends are generally taxable in the year payable. However, if the payment date is determined at an annual general meeting to be in a year other than the year in which the meeting is held, the dividend is taxed in the year of receipt.

C. Determination of trading income

General. The starting point for computing taxable income is financial statement income. Expenses and losses are generally not
deductible unless they are incurred wholly and exclusively in the production of income.

**Inventories.** Inventories are valued at the lower of cost or net realizable value. The last-in, first-out (LIFO) method is not allowed.

**Provisions.** Provisions for losses are allowed only for losses that are specifically identified.

**Depreciation.** Depreciation computed for financial statement purposes is not deductible, but capital allowances are provided for depreciable assets, which are allocated to one of the eight classes. The following are the classes and the rates of the capital allowances.

<table>
<thead>
<tr>
<th>Class</th>
<th>Assets</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Computers and data handling equipment, together with peripheral devices; automobiles; buses and minibuses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than 7 tons; and construction and earth-moving equipment</td>
<td>37.5%</td>
</tr>
<tr>
<td>2</td>
<td>Buses with a seating capacity of 30 or more passengers; heavy general purpose or specialized trucks, trailers and trailer-mounted containers; railroad cars, locomotives and equipment; vessels, barges, tugs and similar water transportation equipment; aircraft; other self-propelling vehicles; plant and machinery, including windmills, electric generators and distribution equipment used in agriculture, manufacturing or mining operations; specialized public utility plant, equipment; and machinery; and other irrigation installations and equipment</td>
<td>25%</td>
</tr>
<tr>
<td>3</td>
<td>Office furniture, fixtures and equipment; and any assets not included in another class</td>
<td>12.5%</td>
</tr>
<tr>
<td>4</td>
<td>Natural resources exploration and production rights; and assets referred to in Subparagraph 3 in the Third Schedule to the 2004 Income Tax Act and related to natural resource prospecting, exploration and development</td>
<td>20%</td>
</tr>
<tr>
<td>5</td>
<td>Buildings, structures, dams, water reservoirs, fences and similar works of a permanent nature used in agriculture, livestock farming or fish farming</td>
<td>20%</td>
</tr>
<tr>
<td>6</td>
<td>Buildings, structures, and similar works of a permanent nature other than those in Class 5</td>
<td>5%</td>
</tr>
<tr>
<td>7</td>
<td>Intangible assets other than those in Class 4</td>
<td>1/useful life</td>
</tr>
<tr>
<td>8</td>
<td>Plant and machinery, including windmills, electric generators and distribution equipment used in agriculture</td>
<td>100%</td>
</tr>
</tbody>
</table>
Depreciation of assets in Classes 1, 2 and 3 is computed using the declining-balance method. Depreciation of assets in Classes 4, 5, 6, 7 and 8 is computed using the straight-line method.

Assets in Classes 2 and 3 qualify for an initial capital expenditure allowance of 50% for the first year.

The maximum depreciable amount for a noncommercial automobile is TSHS 15 million.

Mining enterprises may deduct 100% of qualifying expenditure in the year of expenditure.

**Relief for losses.** Companies may carry forward tax losses indefinitely. In general, no carryback is allowed. However, a carryback may be allowed for companies performing long-term contracts.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax (VAT)</td>
<td>18</td>
</tr>
<tr>
<td>Customs duties (imports may also be subject to VAT)</td>
<td>0/5/10/20/25</td>
</tr>
<tr>
<td>Property tax; imposed by local governments on the value of real property</td>
<td>0.15</td>
</tr>
<tr>
<td>Skills and Development Levy; imposed on gross payroll</td>
<td>6</td>
</tr>
<tr>
<td>National Social Security Fund; imposed on basic salary; paid by Employer</td>
<td>10/15</td>
</tr>
<tr>
<td>Employee</td>
<td>5/10</td>
</tr>
</tbody>
</table>

**E. Foreign-exchange controls**

Tanzania does not impose foreign-exchange controls on current-account transactions. Bank of Tanzania approval is required for capital-account transactions.

**F. Treaty withholding tax rates**

(a) This rate applies to accounting periods beginning on or after 1 January 2013. The prior rate was 23%.
(b) Certain types of interest are exempt from tax [see footnote (a) to Section F].

B. Taxes on corporate income and gains

Corporate income tax. Thai resident companies are subject to corporate income tax on their worldwide income. Thai resident companies are those incorporated in Thailand. Branches of foreign corporations are subject to Thai tax on Thailand-source income only.

Rates of corporate tax. Thai resident companies and branches of foreign corporations are subject to corporate income tax at a flat rate of 20% on taxable profits. This rate applies to accounting periods beginning on or after 1 January 2013. The prior rate was 23%.

Progressive corporate income tax rates of 0%, 15% and 20% apply to locally incorporated companies with paid-up capital of not more than THB 5 million and revenue of not more than THB 30 million per year.

Capital gains. Capital gains are treated as ordinary business income subject to income tax.
**Administration.** Corporate income tax returns, together with the audited financial statements, must be filed with the Revenue Department within 150 days after the accounting year-end. Corporate income tax payments are due on the filing date.

Mid-year (interim) tax returns must be filed with interim tax payments within two months after the end of the first half of the accounting year. Listed companies, financial institutions and companies approved by the Director-General of the Revenue Department compute their interim tax based on actual operating results for the first half-year. Other companies compute their interim tax based on one-half of the estimated annual profit. These companies do not have to submit audited or reviewed financial statements. The interim tax is creditable against the annual tax payable at the end of the year.

**Dividends**

*Received from resident companies.* In general, one-half of dividends received by resident companies from other resident companies may be excluded from taxable income. However, the full amount of the dividends may be excluded if either of the following applies:

- The recipient is a company listed on the Stock Exchange of Thailand.
- The recipient owns at least a 25% equity interest in the distributing company, provided that the distributing company does not own a direct or indirect equity interest in the recipient company.

These rules apply if the related shares are acquired not less than three months before receiving the dividends and are not disposed of within three months after receiving the dividends.

*Received from foreign companies.* A Thai company that owns an equity interest of at least 25% in a foreign company can exclude dividends received from such foreign company from its taxable profit if, on the date of receipt of the dividend, it has held the investment for at least six months and if the profit out of which the dividends are distributed is subject to income tax in the hands of the foreign company at a rate of at least 15%.

**Foreign tax relief.** Thailand has entered into double tax treaties with 55 countries. In general, under the treaties, foreign tax relief is limited to the lower of the foreign tax and the amount of Thai tax calculated on such income.

Foreign tax payable in nontreaty countries may be credited against Thai tax, limited to the Thai tax computed on the foreign income, provided the foreign tax meets the conditions set forth in the relevant measure. If the foreign tax is not used as a credit, it may be claimed as a deduction for income tax purposes.

**C. Determination of trading income**

**General.** Corporate income tax is based on audited financial statements, subject to certain adjustments.

In general, expenses are tax-deductible if they are incurred wholly and exclusively for the purpose of generating income. However, expenses created by means of provisions or allowances, such as those for bad debts or stock obsolescence, are not tax-deductible until they are actually used.
Inventories. Inventories must be valued at the lower of cost or market value. Cost may be determined using any generally accepted accounting method. After a method is adopted, a change to another method may be made only with approval of the Director-General of the Revenue Department.

Depreciation and amortization allowance. A company may depreciate its fixed assets under any generally accepted accounting method, provided the number of years of depreciation under the selected method is not less than the minimum prescribed period. However, after a method is adopted, it may not be changed unless prior consent has been obtained from the Director-General of the Revenue Department. The following are the minimum prescribed periods applicable to some major fixed assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Time period</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>20 years</td>
</tr>
<tr>
<td>Furniture, fixtures, machinery, equipment and motor vehicles</td>
<td>5 years</td>
</tr>
<tr>
<td>Trademarks, goodwill, licenses, patents and copyrights (including software)</td>
<td>Over period of use (or 10 years if no period of use)</td>
</tr>
<tr>
<td>Computer hardware and operating software</td>
<td>3 years</td>
</tr>
</tbody>
</table>

Relief for losses. Operating losses may be carried forward for a period of five years. Loss carrybacks are not allowed.

Groups of companies. The Thai tax law does not include any provisions for consolidated treatment under which companies within a group may be treated as one tax entity. Each individual company must file its income tax return and pay its tax.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax, on goods sold, services rendered and imports</td>
<td>7</td>
</tr>
<tr>
<td>Specific business tax, on financial service and real estate businesses</td>
<td>Various</td>
</tr>
</tbody>
</table>

E. Miscellaneous matters

Foreign-exchange controls. On presentation of supporting documents, virtually all foreign-exchange transactions may be processed by a commercial bank.

Transfer pricing. Under transfer-pricing guidelines issued by the Thai Revenue Department, all sales or service transactions must be executed at an arm’s length price, and the taxpayer is required to prepare and maintain contemporaneous documentation to substantiate the price. Acceptable transfer-pricing methods include the comparable uncontrolled price method, the resale price method, the cost-plus method and other internationally accepted methods. If the taxpayer fails to prove that a transaction challenged by the tax authorities was executed on an arm’s length basis, additional tax can be assessed. Transactions between related parties are subject to particular scrutiny.
### F. Treaty withholding tax rates

The rates in the table reflect the lower of the treaty rate and the rate under domestic tax law.

(a) The following types of interest are exempt from tax:
- Interest paid to a financial institution wholly owned by another state
- Interest on certain foreign-currency loans brought into Thailand between 1 May 1979 and 28 February 1990
- Interest paid by the government or a financial institution established by a specific law of Thailand for the purpose of lending money to promote agriculture, commerce and industry
- Interest paid by the central bank or state enterprises on loans approved by the Ministry of Finance

(b) The rate is reduced to 10% if the interest is paid to banks, financial institutions or insurance companies of the treaty countries.

(c) Interest paid to the government, subdivisions of contracting states or a central bank is exempt from tax.

(d) The withholding rate is 3% for interest on loans or credits granted for at least four years with the participation of a public financing institution to a statutory body or enterprise of the other contracting state, in relation to sales of equipment, or in relation to the survey, installation or supply of industrial, commercial or scientific premises, or public works.

(e) Interest paid to a financial institution wholly owned by the other contracting state is exempt.

(f) The withholding rate is 5% (10% for Pakistan) for royalties for copyrights of literary, artistic or scientific works.

(g) The withholding rate is 10% for royalties paid for patents, trademarks, designs, models, plans, or secret formulas or processes.

(h) Royalties and similar payments paid to the other contracting state or a state-owned company for films or tapes are exempt.

(i) Interest paid to residents of Switzerland with respect to loans guaranteed or insured under the Swiss provisions regulating the Export or Investment Risk Guarantee is exempt.

(j) The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of equipment, merchandise or services. Interest on debt obligations guaranteed or insured by the government is exempt.

(k) The withholding rate is 5% (10% for Slovenia) for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including software and motion pictures and works on films, tape or other means of reproduction for use in connection with radio or television broadcasting. The withholding rate is 8% (10% for Slovenia) for royalties for the use of, or the right to use, industrial, commercial or scientific equipment.

(l) The withholding rate is 5% for royalties paid for the use of, or the right to use, copyrights of literary, dramatic or scientific works, excluding cinematographic films or films or tapes used for radio or television broadcasting. The withholding rate is 8% for amounts paid under financial leases for the use of, or the right to use, industrial, commercial or scientific equipment.

(m) The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of equipment, merchandise or services, except for sales between persons not dealing with each other at arm’s length. Under the New Zealand treaty, interest derived by the government of New Zealand or its central bank from the investment of official reserves is exempt from tax.

(n) The withholding tax rate is 10% for royalties paid for the following:
- The use of or right to use, copyrights, industrial, scientific or commercial equipment, motion picture films, films or videotapes or other recordings for use in connection with television, and tapes or other recordings used in connection with radio broadcasting
- For the reception of, or the right to receive, visual images or sounds transmitted to the public by satellite, cable, optic fiber or similar technology
- For the use of, or right to use, in connection with television or radio broadcasting, visual images or sounds transmitted by cable, optic fiber or similar technology
Interest on loans made, guaranteed or insured by the government, central bank, agency or body wholly owned or controlled by the government is exempt from tax.

Interest is exempt from tax if it is paid on loans made, guaranteed or insured by the contracting state or by an authorized body of the state on behalf of the state or if it is paid on other debt claims or credits guaranteed or insured on behalf of the contracting state by an authorized body of the state.

The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of industrial, commercial, or scientific equipment or from sales on credit of merchandise between enterprises.

A withholding tax rate of 5% applies to royalties for the use of, or the right to use, copyrights of literary, dramatic, musical, artistic or scientific works, including software, cinematographic films and films or tapes used for radio or television broadcasting. A withholding tax rate of 10% applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience.

The withholding tax rate is 10% for royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.

The rate is reduced to 10% if the loan or debt claim generating the interest is guaranteed by the government, central bank, state general reserve fund, local authorities, or a body wholly owned by the government.

The withholding tax rate is 10% for royalties paid for copyrights of literary, artistic or scientific works and the right to use industrial, commercial and scientific equipment.

The withholding tax rate is 10% for royalties paid for managerial or consultancy services or for information concerning commercial, industrial, or scientific experience.

(a) A business levy and a green fund levy are also imposed. The rate for companies engaged in the downstream petrochemical sector and related sectors is 35%. Upstream petroleum operations are taxed under a separate regime. See Section B.
(b) See Section B.
(c) These withholding taxes apply to payments to nonresidents only.
(d) The 5% rate applies to dividends paid to corporations owning 50% or more of the voting power of the distributing company. The 10% rate applies to other dividends.
(e) Applicable to payments to companies and individuals.
(f) Applicable to deemed remittances of profits to overseas head office.

B. Taxes on corporate income and gains

Corporation tax. Resident companies are subject to tax on their worldwide income from all sources. Relief from taxation of foreign-source income may be available under a double tax treaty.
Nonresident companies engaged in business in Trinidad and Tobago are subject to tax on income directly or indirectly accruing in or derived from Trinidad and Tobago.

**Rates of tax.** For the 2013 year of income, the basic rate of corporation tax is 25%.

A business levy at a rate of 0.2% is imposed on the annual gross sales or receipts of companies, including branches of nonresident companies operating in Trinidad and Tobago. This levy is credited against the corporation tax liability. It is the final liability if the corporation tax liability is less than the business levy. Certain companies are exempt from the levy, including the following:

- Companies or statutory corporations exempt from corporation tax under any act
- Certain government corporations under the jurisdiction of the Public Utilities Commission or exempted by order of the President
- Companies subject to tax under the Petroleum Taxes Act

A company is not subject to the business levy for the first 36 months following the date of registration of its business.

A green fund levy at a rate of 0.1% is imposed on the gross receipts of companies engaged in business in Trinidad and Tobago.

The corporation tax rate for companies engaged in the downstream petrochemical sector and related sectors is 35%. Companies engaged in upstream petroleum operations are subject to various taxes and imposts, of which the most significant are petroleum profits tax of 50%, unemployment levy of 5% and supplemental petroleum tax at rates based on the weighted average crude oil price. Upstream petroleum companies are also subject to a different system of tax administration.

The long-term insurance business of an assurance company is subject to tax at a rate of 15%.

**Capital gains.** Capital gains are generally not subject to tax. Depending on the class of asset and the nature of the company’s business activities, however, the profit or loss on depreciable assets disposed of after being held for more than 12 months may require a balancing adjustment (see Section C).

Short-term capital gains are profits on the disposal of assets within 12 months of their acquisition. Although these gains are of a capital nature, they are generally subject to tax. Profits derived from the partial disposal of an asset within 12 months of acquisition are also subject to tax.

**Administration.** The tax year is the calendar year. Tax is calculated on the profits for the accounting period that ends during the tax year. For each quarter, a company is required to pay a green fund levy installment, as well as either a corporation tax or business levy installment, whichever is greater. The quarterly payments must be made by 31 March, 30 June, 30 September and 31 December in each tax year. Quarterly payments of corporation tax are determined based on the taxable income for the preceding accounting period. Business levy and green fund levy installments are based on the actual gross sales or receipts of the company for the relevant quarter. The business levy calculation excludes income that
is exempt for corporation tax purposes such as dividends received from Trinidad and Tobago resident companies, but the green fund levy calculation takes into account such income.

If the current year’s profits exceed the preceding year’s profits, a company must pay by 31 December the sum of the tax liability on the preceding year’s taxable profits plus 80% of the increase in tax liability over the preceding year. Annual tax returns must be filed by 30 April in the year following the tax year, and any balance of tax due is payable at that time.

If the balance of tax due is not paid by the 30 April deadline, interest accrues at a rate of 20% on the outstanding amount beginning on 1 May. A grace period to 31 October is granted for the filing of the tax return. If the return is not filed by 31 October, a penalty of TT$1,000 accrues beginning 1 November for each six-month period or part of such period that the return remains outstanding.

**Dividends.** Dividends received from nonresident companies out of profits not derived from or accruing in Trinidad and Tobago are subject to tax. Dividends received by resident companies from other resident companies are tax-exempt.

Dividends paid to nonresident companies and individuals are generally subject to a withholding tax of 10%. The rate is reduced to 5% if the recipient is a corporation owning 50% or more of the voting power of the distributing company.

**Double tax relief.** Bilateral agreements have been entered into between the government of Trinidad and Tobago and the governments of certain other countries to provide relief from double taxation. These agreements assure taxpayers that their trade or investment in the other countries is free from the deterrent of double taxation. Relief from double taxation is achieved by one of the following two methods:

- Exemption or a reduced rate on certain classes of income in one of the two countries concerned.
- Credit if the income is fully or partially taxed in the two countries. The tax in the country where the income arises is allowed as a credit against the tax on the same income in the country where the recipient is resident. The credit is the lower of the Trinidad and Tobago tax or the foreign tax on the same income.

**C. Determination of taxable income**

**General.** The assessment is based on financial statements prepared according to international accounting standards, subject to certain adjustments.

To be deductible, expenses must be incurred wholly and exclusively in the production of income. The deduction for business meals and entertainment expenses is limited to 75% of actual expenses. Deductions for management charges (now more broadly defined) paid to a nonresident company may not exceed 2% of the payer’s total expenses, exclusive of such charges and capital allowances.

Donations made under a registered deed of covenant to an approved charity that are actually paid during the year of income are deductible, up to a maximum of 15% of the total income of the company (as defined in the law).
Inventories. Inventory may be valued at cost or market value, whichever is lower. A method of stock valuation, once properly adopted, is binding until permission to change is obtained from the Board of Inland Revenue.

Bad debts. Trading debts that have become bad, and are proven to be so to the satisfaction of the Board of Inland Revenue, may be deducted from taxable income. In addition, doubtful debts are deductible to the extent that they have become bad during the year. If these debts are subsequently collected, they are included in taxable income in the year of recovery.

Tax depreciation (capital allowances)

Depreciation (wear-and-tear) allowances. Depreciation is calculated on the depreciated value of fixed assets at the beginning of each accounting year.

Industrial buildings qualify for a depreciation allowance of 10% under the declining-balance method. Buildings completed before 1 January 1995 that are used in retail or wholesale trade or as office buildings or rental properties are not entitled to any depreciation allowances, unless they are used exclusively to house plant and machinery and the amounts claimed for the depreciation allowance are reasonable.

Buildings or structures completed on or after 1 January 1995 and capital improvements made to buildings or structures on or after that date qualify for a 10% depreciation allowance under the declining-balance method.

Other assets are depreciated using the declining-balance method. The depreciation rates vary depending on when the assets were acquired. The following are the applicable rates for assets acquired on or after 1 January 1995.

<table>
<thead>

<td>33.3</td>
</tr>
<tr>
<td>Aircraft</td>
<td>40</td>
</tr>
</tbody>
</table>

Balancing adjustments. Proceeds from disposals of assets are deducted from the residual value of the pool for that particular class of assets. Under the pool system, balancing charges or balancing allowances arise only on the disposal of all of the assets in a particular class.

Initial allowance. A 10% initial allowance is granted on acquired industrial buildings that are used in manufacturing. Machinery and equipment used in manufacturing also qualify for an initial allowance at a rate of 90%. Lessees of plant and machinery may also claim the initial allowance if the lease transfers substantially all of the risks and rewards of ownership to the lessee. The rate of the initial allowance is reduced to 20% for plant and machinery used in the production of sugar, petroleum or petrochemicals or in an industry enjoying concessions under the Fiscal Incentives Act.
The initial allowance reduces the asset’s value for purposes of depreciation in subsequent periods.

**Relief for losses.** Losses carried forward can be written off to the full extent of taxable profits for the tax year. The unrelieved balance can be carried forward indefinitely. No loss carryback is allowed.

**Groups of companies.** Under group relief provisions in the tax law, a member of a group of companies (the surrendering company) may surrender current trading losses (exclusive of capital allowances) to another member of the group (the claimant company). The claimant company may then claim deductions for the losses in calculating its taxable income. To qualify for group relief, the surrendering company and the claimant company must be resident in Trinidad and Tobago and must be members of the same group throughout the respective accounting periods of each of the companies. Two companies are members of the same group if one is a wholly owned subsidiary of the other or both are wholly owned subsidiaries of a third company. The reduction in tax payable by the claimant company is limited to 25% of the tax that would have been payable if the relief had not been granted.

Group relief is available only if the claimant company has used all of its available capital allowances and offset its loss carryforwards against its current income.

**D. Value-added tax**

A value-added tax (VAT) applies to most products supplied and services rendered in Trinidad and Tobago. The standard rate is 15%. A 0% rate applies to certain items, including exports. Imports of inputs by highly capital intensive manufacturing corporations are exempt from VAT if the corporation is declared an approved enterprise under the Fiscal Incentives Act.

Companies and other businesses are required to register for the tax if their turnover exceeds TT$360,000 a year.

The Value-Added Tax Act allows the tax authorities to offset VAT refunds against any other tax liability, such as corporation tax or income tax.

**E. Miscellaneous matters**

**Foreign-exchange controls.** The Trinidad and Tobago dollar floats. Commercial banks and licensed foreign-exchange dealers set the exchange rate. Residents may hold foreign currencies for their own account. Profits may be repatriated without the approval of the Central Bank of Trinidad and Tobago.

**Debt-to-equity rules.** In general, no thin-capitalization rules are imposed in Trinidad and Tobago. However, if a local company pays or accrues interest on securities issued to a nonresident company and if the local company is a subsidiary of, or a fellow subsidiary in relation to, the nonresident company, the interest is treated as a distribution and may not be claimed as a deduction against the profits of the local company.

**F. Treaty withholding tax rates**

The following table lists the withholding tax rates under Trinidad and Tobago’s tax treaties. If the treaty rates are higher than the rates prescribed in the domestic law, the lower domestic rates apply.

(a) The rate applies to interest paid to banks and financial institutions. Interest paid to other recipients is taxed at 15%.
(b) See footnote (d) to Section A.
(c) The lower rate applies if the recipient is a corporation owning 25% or more of the voting power of the distributing company.
(d) The lower rate applies if the recipient is a corporation owning 10% or more of the voting power of the distributing company.
(e) The lower rate applies to interest paid on deposits, commercial debts and borrowings from banking enterprises.
(f) The listed countries have ratified the Caribbean Community and Common Market (CARICOM) double tax treaty.
(g) The lower rate applies if the recipient is a company holding directly at least 10% of the capital of the distributing company.
(h) The lower rate applies if the recipient is a company holding directly or indirectly at least 25% of the capital of the distributing company.
(i) The 0% rate applies if the recipient is a company holding directly at least 50% of the capital of the distributing company. The 5% rate applies if the recipient is a company holding directly at least 25% of the capital of the distributing company.

(a) This is the standard rate of corporate income tax. Oil service companies, banks, financial institutions (for example, insurance companies) and telecommunication companies are subject to corporate income tax at a rate of 35%. Handicraft, agricultural and fishing companies are subject to corporate income tax at a rate of 10%. Benefits from exportations realized on or after 1 January 2014 will be subject to corporate income tax at a rate of 10%.

(b) Applicable to payments to residents and nonresidents.

(c) The rate is 5% for interest paid on loans made by nonresident banks.

(d) Applicable to payments to nonresidents. For further details, see Section B.

(e) The 5% rate applies to payments to hotels. The 15% rate applies to other payments to residents and nonresidents.

(f) The 5% rate applies to payments to residents; the 15% rate applies to payments to nonresidents.

### B. Taxes on corporate income and gains

#### Corporate income tax

Companies are subject to tax on profits derived from establishments located in Tunisia and on profits that are deemed to be derived in Tunisia under double tax treaties.
Tunisian-source income that is not realized within the framework of a Tunisian establishment, such as interest and royalties, is subject only to final withholding taxes (see Royalties).

**Tax rates.** The standard rate of corporate income tax is 30%. Oil service companies, banks, financial institutions (for example, insurance companies) and telecommunication companies are subject to corporate income tax at a rate of 35%. Benefits from exportations realized on or after 1 January 2014 will be subject to corporate income tax at a rate of 10%.

The minimum tax payable is 0.1% of annual turnover (excluding turnover from exports).

The minimum tax may be credited against the corporate income tax payable for the current financial year, but it is not refundable.

Tax benefits, such as exemptions from certain taxes and duties, may be granted to companies established in a Tunisian Free Zone and to companies engaged wholly or partly in exporting.

**Capital gains.** Capital gains are included in ordinary income and are taxed at the regular corporate income tax rate. For nonresident and nonestablished companies in Tunisia, capital gains derived from the sale of shares is subject to withholding tax at a rate of 30%, which is levied on the difference between the sales price and the acquisition price, reduced by the expenses incurred on the sale including the share premium. In all cases, the tax on capital gains may not exceed 5% of the sales price.

As an option, a tax return on capital gains may be filed.

**Administration.** The financial year is generally the calendar year.

Tax returns must be filed by the 25th day of the third month following the end of a company’s financial year. Consequently, for companies using the calendar year as their financial year, tax returns are due by 25 March.

Starting from the second year of their activities, companies must pay tax in three installments. Each installment is equal to 30% of the corporate income tax due for the preceding financial year. The installments are payable by companies during the first 28 days of the sixth, ninth and twelfth months following the end of the financial year. The balance of tax due must be paid when a tax bill (a document that specifies the amount of tax due and when the tax must be paid) is filed.

**Dividends.** Dividends are not subject to tax in Tunisia.

**Royalties.** Subject to the provisions of double tax treaties, a 15% withholding tax is imposed on royalties paid to nonresidents. This tax applies to the following types of payments:

- Copyright royalties
- Payments for the use of, or the right to use, patents, trademarks, designs, models, plans, formulas, manufacturing processes and movies, including proceeds received from sales of such items
- Payments for the use of, or the right to use, industrial, commercial, agricultural, harbor or scientific equipment, except for amounts paid to charter a plane or vessel for international operations
Payments for information concerning industrial, commercial or scientific experience
Payments for technical or economic studies or for technical assistance

Companies wholly engaged in exporting (as defined) are exempt from the withholding tax on royalties.

Foreign tax relief. Tunisia does not grant any relief for foreign taxes.

C. Determination of trading income

General. Taxable income is based on financial statements prepared in accordance with generally accepted accounting principles, subject to certain adjustments.

Business expenses are generally deductible unless specifically disallowed by the tax law. The following expenses are deductible:

- All types of expenses relating to production or the operation of a business
- Tax depreciation (see Tax depreciation)
- Attendance fees paid to members of the board of directors or the supervisory board, limited to the amount of expenses incurred by these individuals in carrying out their duties
- Interest paid to shareholders on loans if the amount of the loan does not exceed 50% of authorized capital, if the interest rate does not exceed 8% and if the share capital is fully paid up
- Donations and subsidies paid to charities and organizations established for the public good that are engaged in philanthropic, educational, scientific, social or cultural activities, up to a maximum deduction of 2% of gross turnover
- Amounts paid to social funds established for employees in accordance with the law
- Gifts and meal expenses, up to a maximum deduction of the lower of 1% of annual gross income or TND 20,000
- Plant manager payroll

Inventories. Inventories are valued at cost.

Provisions. Doubtful debts of up to TND 100 (TND 500 for banks) per debtor are deductible if they were due at least one year prior to the date on which they were written off and if the company has had no further business relationship with the debtor.

The following provisions are deductible, up to a maximum deduction of 50% of taxable income:

- Reserves for doubtful debts for which recovery is being pursued in the courts
- Provisions for finished goods
- Provisions for depreciation of shares of listed companies

Banks may deduct bad debt provisions from their tax base without any limit. This deduction can result in a tax loss.

Tax depreciation. Under the Tunisian Tax Code, depreciation must be computed using the straight-line method. Depreciation is deductible only if it is recorded in the accounts.

The following are some of the standard rates of depreciation allowed in Tunisia.

</tr>
</tbody>
</table>

For equipment other than transportation equipment, the depreciation rates may be increased by 50% if the equipment is used at least 16 hours a day and may be doubled if it is used 24 hours a day.

The costs of setting up a business may be amortized at a rate of 33% if the costs are very high. Otherwise, 100% of the costs may be deducted in the year of expenditure. Assets worth less than TND 200 are fully deductible in the year of acquisition.

**Relief for losses.** Losses may be carried forward five years, but may not be carried back.

**Groups of companies.** Tunisian law provides for the fiscal integration of related parties equivalent to a consolidated filing position if certain conditions are satisfied.

**D. Other significant taxes**

The following table summarizes other significant taxes.

</tr>
</tbody>
</table>

**E. Foreign-exchange controls**

For companies wholly or partially owned by nonresidents, the remittance of benefits, dividends, attendance fees and interest payments to nonresidents is guaranteed. Tunisian branches of foreign companies may freely remit their after-tax profits. Remittances must be made through a registered intermediary, which is generally a bank. Tunisian banks may obtain foreign loans not exceeding TND 10 million a year. Tunisian companies other than banks may obtain foreign loans up to TND 3 million per year.

</table>

(a) The rate is 10% if the recipient is a company that holds at least 25% of the capital of the payer.
(b) Tunisia applies a 15% rate instead of the highest rate.
(c) Dividends are taxed at the domestic rate of the country from which the dividends originate.
(d) The rate is 5% if the beneficial owner of the dividends is a company that holds directly at least 50% of the capital of the payer.
(e) The rate is 15% if the recipient is a company that owns at least 25% of the capital of the payer.
(f) The rate is 12% if the recipient is a company that owns at least 25% of the capital of the payer.

(g) The rate is 12% if the beneficial owner is a company that controls directly at least 25% of the voting power of the payer.

(h) The rate is 14% if the recipient is a company that owns at least 25% of the capital of the payer.

(i) Taxed at the domestic rate of the country of domicile of the recipient.

(j) The 10% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties paid for the use of or right to use the following:
   - Technical and economic studies
   - Cinematographic and television films
   - Patents, trademarks, designs and models, plans, and secret formulas and processes
   - Industrial, commercial and scientific equipment
   - Information concerning agricultural, industrial, commercial or scientific experience

(k) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works. The 15% rate applies to royalties or other amounts paid for the use of or right to use the following:
   - Patents, designs and models, plans, and secret formulas and processes
   - Information relating to industrial, commercial or scientific experience
   - Technical and economic studies
   - Technical assistance relating to the use of the items mentioned above

   The 20% rate applies to royalties or other amounts paid for the use of or right to use trademarks, cinematographic and television films, and agricultural, industrial, harbor, commercial or scientific equipment.

(l) The 20% rate applies to royalties paid for the use of or right to use trademarks, cinematographic and television films or videotapes for television, and industrial, harbor, commercial or scientific equipment. The 15% rate applies to other royalties.

(m) The 0% rate applies to amounts paid to a public body of the other contracting state for the use of cinematographic films or radio and television broadcasts. The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the use of or right to use the following:
   - Patents, designs and models, plans, and secret formulas and processes
   - Information relating to industrial, commercial or scientific experience
   - Technical and economic studies

The 20% rate applies to royalties or other amounts paid for the use of or right to use trademarks, cinematographic and television films, and agricultural, industrial, harbor, commercial or scientific equipment.

(n) The 10% rate applies to royalties or other amounts paid for the use of or right to use the following:
   - Copyrights of literary, scientific or artistic works, but not including cinematographic and television films
   - Information concerning agricultural, industrial, commercial or scientific experience
   - Economic and technical studies

The 15% rate applies to royalties paid to use patents, trademarks, designs and models, plans, secret formulas and processes, and cinematographic and television films.

(o) The 5% rate applies to royalties relating to literary, scientific or artistic works. The 16% rate applies to royalties relating to trademarks, cinematographic and television films, or industrial, commercial or scientific equipment. The 12% rate applies to other royalties.

(p) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the use of patents, designs and models, plans, and secret formulas and processes; information relating to industrial, commercial or scientific experience; or technical or economic studies. The 20% rate applies to royalties or other amounts paid for the use of or the right to use trademarks; cinematographic and television films; and agricultural, industrial, harbor, commercial or scientific equipment.

(q) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, not including motion picture and television films. The 15% rate applies to other royalties.
The 10% rate applies to royalties paid for the use of or the right to use industrial, commercial or scientific equipment, or to remuneration for the performance of accessory technical assistance for the use of property or rights described above, to the extent such technical assistance is performed in the contracting state where the payment for the property or right has its source. The 15% rate applies to royalties or other amounts paid for the use of or right to use copyrights of literary, artistic and scientific works, including cinematographic and television films and videotapes used in television broadcasts; patents, trademarks, designs and models, plans, and secret formulas and processes; and information relating to industrial, commercial or scientific experience.

The 10% rate applies if the beneficial owner of the interest is a bank or other financial institution. The 12% rate applies to other interest.

Under Tunisian domestic law, dividends are not subject to tax. Consequently, withholding tax is not imposed on dividends paid from Tunisia to other countries.

A 5% rate applies to interest paid to banks.

The rate is 0% if the beneficiary of the dividends owns at least 10% of the payer.

Interest is taxed at the domestic rate of the country from which the interest originates.

Royalties are taxed at the domestic rate of the country from which the royalties originate.

The 5% rate applies to interest paid to banks.

The 5% rate applies to payments for technical and economic studies as well as for technical assistance.

The 10% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer.

The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, scientific or artistic works including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the following:

- The use of patents, designs and models, plans, and secret formulas and processes
- Information relating to industrial, commercial or scientific experience
- Technical or economic studies
- Technical assistance
- The use of, or the right to use, trademarks and industrial, commercial or scientific equipment

Dividends are exempt from tax if the beneficial owner of the dividends is a company that holds at least 25% of the capital of the payer.

The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer.

B. Taxes on corporate income and gains

Corporate income tax. Companies whose legal or business headquartes (as stated in their articles of association) are located in Turkey or whose operations are centered and managed in Turkey are subject to corporation tax on their worldwide income. In Turkish tax legislation, they are described as full liability taxpayers; they are also known as resident companies.

Taxable income of limited liability taxpayers (nonresident companies or taxpayers other than full liability taxpayers) is comprised of the following:

- Professional fees obtained in Turkey
- Profits from commercial, agricultural and industrial enterprises in Turkey (if they have an establishment or a permanent representative in Turkey)
- Income arising from rental of real estate, rights and movable property in Turkey
- Income obtained in Turkey from various types of securities
- Other income and revenue obtained in Turkey

Rates of corporate tax. The effective corporate tax rate is 20%. However, incentive programs provide for reduced corporate tax rates for income from the investments supported (see Tax incentives).
Tax incentives. Incentive regulations provide for a wide range of incentive and support elements for certain investments with incentive certificates, including reduced corporate tax rates, government support for interest on loans, government support for employees’ and employers’ shares of social security premiums, government support for income tax for wages, value-added tax (VAT) and customs duty exemptions, VAT refund support and allocation of treasury-owned lots.

The incentive and support elements vary according to the type, sector, subject, size and place of the investment.

Participation exemption

Dividend income derived from Turkish (resident) participations. Turkish tax law provides a participation exemption for dividends derived by companies from Turkish (resident) participations. Dividends qualifying for the participation exemption are fully exempt from corporate tax.

To qualify for the participation exemption, a Turkish resident company need only hold a participation in another Turkish resident company.

Dividend income derived from foreign (nonresident) participations. The Turkish tax law also provides a participation exemption for dividends derived by companies from foreign participations. Dividends qualifying for the participation exemption are fully exempt from corporate tax.

To qualify for the participation exemption for dividends derived from foreign participations, all of the following conditions must be satisfied:

• The Turkish company must have owned at least 10% of the paid-in capital of the foreign company for an uninterrupted period of at least one year as of the date of receiving the dividend.
• The foreign company must be a limited or joint stock company.
• The foreign company must be subject to corporate tax at an effective rate of at least 15% (for corporations whose principal activities is the procurement of finance and insurance, the rate must be at least the rate of corporation tax in Turkey, which is 20%).
• The dividends must be transferred to Turkey by the due date of filing of the annual corporate tax return (25 April).

The effective corporate tax is determined in accordance with the following formula:

\[
\text{Effective corporate tax rate} = \frac{\text{Corporate tax}}{\text{Distributable corporate income} + \text{corporate tax}}
\]

Special participation exemption rules apply to companies established in foreign countries whose principal purpose is construction, repair, assembly and technical services. If, under the laws of a foreign country, the establishment of a corporation is necessary to undertake these activities, dividends repatriated by the foreign subsidiary to the Turkish parent company qualify for the participation exemption, regardless of whether the conditions described above for the participation exemption are satisfied.
The participation exemption also applies to income derived from permanent establishments (PEs) and permanent representative resident abroad if the following conditions are met:

- The PE or permanent representative is subject to corporate tax at an effective rate of at least 15% in the country where the PE or permanent representative is located. For PEs whose principal activities are the procurement of finance, including financial leasing, or investment in marketable securities and insurance, the rate must be at least the rate of corporation tax in Turkey, which is 20%.
- Income derived from foreign PEs must be transferred to Turkey by the due date of filing of the annual corporate tax return (25 April).

A participation exemption also applies to capital gains. For details, see General in Section C.

**International holding companies.** A special regime applies to international holding companies.

International holding companies may benefit from the participation exemption with respect to dividends derived from foreign participations if they satisfy the conditions applicable to other entities (see Participation exemption). They also may benefit from the participation exemption with respect to capital gains, but different conditions apply. Turkish international holding companies benefit from the participation exemption with respect to capital gains if foreign participations account for at least 75% of the non-cash assets of the international holding company and if the international holding company has held a shareholding of 10% or more in the foreign limited or joint stock company for at least two years.

Dividends distributed by international holding companies to non-resident companies out of profits derived from their foreign participations are subject to a withholding tax rate equal to one-half of the general withholding tax rate on dividends. As a result, the withholding tax rate is 7.5%.

**Capital gains.** Capital gains derived by all companies, including branches of foreign companies, are included in ordinary income and are subject to corporation tax. Capital gains are generally computed by subtracting the cost of the asset, including the related expenses paid by the seller, from the selling price.

Capital gains derived from sales of depreciable fixed assets are not taxable to the extent the gains are reinvested in new fixed assets. However, the amount of gains used to acquire new assets is subtracted from the depreciable cost of the new asset. Capital gains that will be used for reinvestment are transferred to a special reserve account. If the special reserve is not used to finance the purchase of similar new assets in the following three years, the balance in the reserve is included in taxable income.

Capital gains derived from sales of resident companies’ shares by nonresident companies without a permanent establishment in Turkey are subject to corporation tax. In computing these gains, changes in exchange rates are not taken into account.

Seventy-five percent of capital gains derived by corporate taxpayers from the disposal of shares owned for at least two years
qualify for corporate tax exemption if the gains for which exemp-
tion is claimed are recorded as a special fund under the share-
holder’s equity account in the balance sheet until the end of the
fifth year following the year of sale.

**Administration.** Companies file tax returns based on their finan-
cial accounting year.

Tax returns must be submitted to the relevant tax office by the
25th day of the 4th month after the end of the accounting period. The
return must be accompanied by the balance sheet, income
statement and other required documents.

Corporation tax due must be paid by the end of the fourth month
following the end of the accounting period.

Companies must make quarterly payments of advance corporation
tax during the tax year. These payments are each equal to 20% of
the taxable income for the quarter. The advance tax may be offset
against the tax shown on the annual corporation tax return.

If advance corporation tax exceeds the final tax payable, the ex-
cess amount can be offset against the company’s other tax liabil-
ities or it can be refunded.

**Dividends.** Dividends received by resident companies from other
resident companies are not subject to corporation tax.

Dividends received from foreign companies are included in taxable
income. However, certain dividends received from foreign com-
panies may qualify for exemption from corporation tax under the
participation exemption or the international holding regime (see
Participation exemption and International holding companies).

Withholding tax at a rate of 15% is imposed on dividends paid by
resident corporations to the following recipients:
- Resident individuals
- Resident recipients who are not subject to corporation tax and
  income tax, or are exempt from such taxes
- Nonresident individuals
- Nonresident corporations (excluding those receiving dividends
  through a PE or permanent representative in Turkey)
- Nonresident recipients who are exempt from corporation tax
  and income tax

A branch remittance tax is imposed at a rate of 15% on profits
remitted by nonresident corporations that have a PE or permanent
representative in Turkey to their headquarters.

**Foreign tax relief.** Corporation tax and similar taxes paid abroad
on income that is derived abroad and that is included in the Turk-
ish accounts may be offset against the corporation tax that is
assessed on such income in Turkey.

In cases in which the controlled foreign company (CFC) rules are
applied, the taxes similar to income and corporation taxes that the
foreign affiliate has paid can be set off against the corporation tax
that is calculated on the basis of the earnings of the foreign com-
pany.

Resident companies that have a direct or indirect participation in
shares or voting rights of 25% or more in foreign subsidiaries can
claim a tax credit for the corporate or income tax paid by foreign
subsidiaries in their jurisdictions on profits out of which dividend distributions were paid to the resident companies. The credit is limited to the tax in Turkey that is attributable to the dividend distributions. As a result, the credit applies only to dividends that do not qualify for the participation exemption.

Amounts that are set off against the taxes that are assessed in Turkey on the income derived from the foreign countries may not exceed the tax amount that would be calculated by applying the local corporation tax rate (20%) to such earnings.

Foreign taxes that cannot be offset against the corporate tax in Turkey because of insufficient corporate income may be carried forward for a period of three years. The tax credit can also be offset against advance tax payments.

C. Determination of trading income

General. The corporate tax base is determined by deducting expenses from the revenue of an enterprise. However, the following items are not subject to corporation tax:

- Revenue derived by corporations, including nonresident companies, from participations in the capital of other corporations that are subject to full corporate taxation, excluding shares of profits from participation certificates of investment funds and stocks in investment partnerships
- Proceeds derived by corporations from the sale of their preferred shares, and profits derived by joint stock companies from the sale of their shares at the time of the establishment of the company and from the sale of their shares at a price exceeding the par value of the shares when they are increasing their capital
- Seventy-five percent of profits derived from disposals of shares, preferred shares, preemptive rights, bonus shares or real estate owned for at least two years if the profit is placed in a reserve account and not distributed for five years

Corporation tax exemptions are available under the participation exemption and the international holding regime (see Section B). In addition, the following corporate tax exemptions apply to Turkish and foreign investment funds and companies:

- Profits derived by mutual funds (excluding foreign-exchange funds) and trusts from transactions involving their operating portfolio
- Profits derived by risk capital investment funds or companies from transactions involving their operating portfolio
- Profits derived by real estate investment funds or companies from transactions involving their operating portfolio
- Profits derived by designated private pension investment funds

All business-related expenses are deductible, with the following exceptions:

- Interest on shareholder’s equity or on advances from shareholders.
- Reserves set aside from profits (except technical reserves of insurance companies and doubtful debts from debtors against whom legal proceedings have been instituted).
- Corporation tax and all monetary and tax penalties and interest imposed on such tax.
- Discounts or other losses arising from selling the corporation’s own securities for less than par value.
• For nonresident companies, commissions, interest and other charges paid to headquarters or other offices outside Turkey on purchases or sales made on their behalf, as well as allocated charges to contribute to losses or expenses of headquarters or branches outside Turkey. However, charges are deductible if they are made in accordance with allocations keys that are in compliance with the arm’s length principle and if they are related to the generation and maintenance of business income in Turkey.
• Interest, foreign-exchange differences or comparable expenses that are calculated or paid on disguised capital (see Debt-to-equity rules in Section E).
• Disguised profit distribution through improper transfer pricing.

For enterprises (except loan institutions, financial organizations, financial leasing, factoring and financing companies) whose current liabilities exceed their equities, the portion determined by the Council of Ministers that does not exceed 10% of the total expenses and costs incurred as interest, commissions, maturity differences, delay interest, dividends, exchange-rate differences and similar items relating to liabilities (except financing expenses added to investment costs) used within the enterprise may not be deducted from corporate profit. However, the amount exceeding this percentage is deductible.

Provisions. Tax-deductible provisions include provisions for bad debts, for abandoned claims and for insurance technical reserves.

Tax depreciation. Assets that are used in a company for more than one year and that are subject to wear and tear are depreciated.

The useful life concept is used for the depreciation of fixed assets. The Ministry of Finance has issued Communiqués, which set forth the useful lives of different types of fixed assets. The following are examples of the useful lives for various fixed assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Useful life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>50</td>
</tr>
<tr>
<td>Office furniture, office equipment and automobiles</td>
<td>5</td>
</tr>
<tr>
<td>Computers</td>
<td>4</td>
</tr>
<tr>
<td>Computer software and cellular phones</td>
<td>3</td>
</tr>
</tbody>
</table>

The taxpayers may select the straight-line method or the declining-balance method to calculate depreciation. A company may change from the declining-balance method to the straight-line method (but the reverse change is not permitted) at any time during the useful life of a fixed asset. A company may exercise this option on an asset-by-asset basis.

Fixed assets can be depreciated beginning in the year of capitalization (the year in which an asset becomes ready to use). For fixed assets that are purchased as ready to use, the depreciation begins in the year of the acquisition of the fixed asset. For fixed assets that need to be constructed or assembled, the depreciation begins in the year in which the construction or assembly is completed and the assets become ready to use.

In general, an asset qualifies for full-year depreciation in the year of capitalization, regardless of the date of capitalization. For example, even if a fixed asset is capitalized in the last month of the
accounting year, full-year depreciation is calculated. The only exception to this general rule is for passenger cars. Depreciation for passenger cars begins in the month in which the cars are purchased. For example, if a passenger car that was purchased for TL 1,000 is depreciated using a straight-line depreciation rate of 20%, the regular depreciation for a full year is TL 200. Under the applicable rules, if such an automobile is acquired in November, tax-deductible depreciation for the year of acquisition is calculated as follows:

\[
\frac{2 \text{ months}}{12 \text{ months}} \times \text{TL 200} = \text{TL 33.33}
\]

The balance of the regular depreciation for the year of acquisition is deductible in the last year of depreciation of the asset, together with the regular depreciation for the last year.

**Investment allowance.** Effective from 1 January 2006, the investment allowance was abolished. However, companies can carry forward investment allowance amounts due on or before 31 December 2005.

**Research and development expenditures.** One hundred percent of research and development (R&D) expenditures may be deducted from the tax base if certain conditions are fulfilled. This is an incentive that is granted in addition to the ordinary depreciation expense recognition of capitalized R&D expenditures. The incentive covers the following expenses:

- Raw materials and supplies’ expenses
- Personnel expenses
- General expenses
- Payments for benefits and services provided by outsourcing companies
- Taxes, duties and fees
- Depreciation and depletion
- Financial expenses

Companies that are not able to deduct R&D expenditures because of insufficient taxable income may deduct the unused amount in the following years.

In addition, to support R&D activities, the Turkish Scientific and Technological Research Institution (TUBITAK) may provide monetary aid to companies with respect to their R&D activities under certain conditions. A new law regulating R&D took effect on 1 April 2008. This law provides various types of incentives such as R&D deductions, wage income withholding exemptions, social security premium support, stamp duty exemption and capital aid for technological enterprises.

**Relief for losses.** In general, losses may be carried forward for five years. Losses cannot be carried back. An order of priority applies for the use of losses and exemptions to offset taxable income for the year. Past years’ losses are used after exemptions that apply even in the event of a loss. After the losses are used, the other exemptions that apply in profitable years are administered (investment allowance, R&D deduction, tax-deductible donations and others).

Resident companies may deduct the losses incurred in business activities performed abroad if the foreign losses are approved by auditors authorized under the laws of the relevant jurisdiction.
Foreign losses from foreign activities cannot be deducted if income arising from such activities is exempt from corporation tax in Turkey.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>

</tbody>
</table>
E. Miscellaneous matters

Foreign-exchange controls. Turkey has a liberal foreign-exchange regime, which allows local foreign-exchange accounts.

Law No. 4875 guarantees the remittance of profits. The company’s bank may transfer profits, provided the company subsequently submits to the bank its approved tax statement and its tax accrual and payment slips. This law also guarantees the remittance of the proceeds from the liquidation of an investment.

Fees and royalties from management agreements, technical services agreements and license contracts may be remitted abroad, and applicable withholding tax must be paid.

Foreign investment partnerships and funds may invest in Turkish securities and freely remit dividends, interest, profits and capital.

Turkish resident companies may grant loans to related parties residing abroad.

Transfer pricing. The Turkish Corporate Tax Code contains transfer-pricing regulations, which include the arm’s length principle and the requirement for documentation of all related-party transactions. The arm’s length principle applies to all transactions carried out by taxpayers with related parties. Under Turkish transfer-pricing rules, the traditional transfer-pricing methods recommended in the Organization for Economic Cooperation and Development (OECD) model guidelines are acceptable. The main methods that can be applied by the taxpayers in the determination of the arm’s length price are the comparable uncontrolled price method, the cost-plus method and the resale price method.

However, taxpayers may select other transfer-pricing methods if they can establish that the traditional methods are not suitable for their transactions. It is possible to enter into advance-pricing agreements with the tax authorities.

Transfer-pricing rules apply to both domestic and foreign related-party transactions. Commercial transactions conducted by companies resident in low-tax jurisdictions (tax havens) are considered to be related-party transactions.

The Ministry of Finance has issued Communiqués clarifying the transfer-pricing rules and documentation requirements. Under these Communiqués, taxpayers must prepare annual transfer pricing forms, reports and other documentation.

Debt-to-equity rules. Under the new thin-capitalization rules, a “related party” is a person holding, directly or indirectly, at least 10% of the shares or voting rights of the other party.

Borrowings from related parties that exceed a debt-to-equity ratio of 3:1 are considered to be disguised capital. For borrowings from related parties that are banks or financial institutions, half of the borrowings are taken into consideration in performing the calculation for disguised capital. Total borrowings from all related parties are treated collectively.

The equity at the beginning of the taxpayer’s fiscal year applies for thin-capitalization purposes. Interest paid or accounted for and foreign-exchange differences related to disguised capital are regarded as nondeductible expenses in determining the corporate
tax base. Interest related to disguised capital is treated as a dividend distribution and is subject to dividend withholding tax.

**Controlled foreign companies.** The controlled foreign company (CFC) rules apply if resident individuals and corporate taxpayers jointly or severally have a direct or indirect participation of 50% or more in the shares, dividend rights or voting rights in a foreign company that meets all of the following conditions:

- Twenty-five percent or more of the foreign company’s gross income is of a passive nature (portfolio investment income). If the business activities of the company are not commensurate with the capital, organization or the work force of the company, income derived from commercial, agricultural or independent personal services may be regarded to be of a passive nature.
- The foreign company is subject to effective corporate taxation at a rate of less than 10%.
- The gross revenue of the foreign company exceeds TL 100,000 (approximately US$55,000).

If the foreign company falls within the scope of the Turkish CFC measures, Turkish resident taxpayers declare corporate income of the foreign company attributable to them. In the event of a dividend distribution by the foreign company, the recipient of the dividend is taxed only to the extent that the amount has not been taxed in accordance with the CFC rules.

**Antiavoidance measures.** Turkish resident taxpayers are subject to a 30% withholding tax on all payments made in cash or on account that relate to transactions with companies resident in countries that the Council of Ministers considers to be in harmful tax competition. The Council of Ministers has not yet identified these countries. The principal, interest or profit contributions corresponding to debts to financial institutions established outside Turkey and payments to insurance and reinsurance companies established outside Turkey are not subject to the 30% withholding tax. The Council of Ministers has the authority to reduce the withholding tax rate to 0% for transactions that are considered to be performed at arm’s length.

The payments taxed in accordance with the rules described in the preceding paragraph are not subject to further corporate tax or income tax.

The Turkish tax law includes antiabuse rules. The principal rule is the substance-over-form rule, which is contained in Article 3 of the Tax Procedural Law.

**Mergers and acquisitions.** Mergers, acquisitions and demergers may be tax-free if the transaction involves two resident companies and if the assets are transferred at book value.

**F. Treaty withholding tax rates**

The table below shows the maximum withholding rates for dividends, interest and royalties provided under Turkey’s double tax treaties.

To benefit from the advantageous rates under the double tax treaties, additional conditions may be required (for example, the recipient is required to be the beneficial owner of the related gain). Readers should obtain detailed information regarding the treaties before engaging in transactions.

</table>

(a) The 5% rate applies if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.
(b) The 5% rate applies if the recipient owns more than 20% of the payer of the dividends or if the recipient is the central bank or an entity that is wholly owned by the government. The 10% rate applies to other dividends.
(c) The 10% rate applies if the recipient owns more than 25% of the payer of the dividends. The 10% rate applies to other dividends.
(d) The 5% rate applies to dividends distributed by Belgian companies. The 10% rate applies to dividends distributed by Turkish companies.
(e) The 15% rate applies if the recipient owns more than 25% of the payer of the dividends. The 20% rate applies to other dividends.
(f) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
(g) The 15% rate applies if the recipient owns more than 10% of the payer of the dividends. The 20% rate applies to other dividends.
(h) The 10% rate applies to interest on loans granted by banks and financial institutions. The 15% rate applies to other interest payments.
(i) The 10% rate applies to interest on loans granted by financial institutions. The 15% rate applies to other interest payments.
(j) The 10% rate applies to interest paid with respect to a loan or other debt claim with a term exceeding two years. The 15% rate applies to other interest payments.
(k) The 7% rate applies if the recipient owns more than 25% of the payer of the dividends. The 10% rate applies to other dividends.
(l) For Luxembourg recipients, the 10% rate applies if the recipient owns more than 25% of the payer of the dividends and the 20% rate applies to other dividends. For Turkish recipients, these rates are applied as 5% and 20%, respectively.
(m) The 10% rate applies to interest on loans with a term exceeding two years. The 15% rate applies to other interest payments.
(n) The 5% rate applies if the recipient owns more than 25% of the payer of the dividends. The 10% rate applies to other dividends.
(o) The 10% rate applies if the recipient owns more than 15% of the payer of the dividends. The 15% rate applies to other dividends.
(p) The 5% rate applies to dividends distributed by Dutch companies. The 10% rate applies to dividends distributed by Turkish companies if dividends received by Dutch resident companies from Turkish resident companies are not subject to tax in the Netherlands.

(q) The rate is 5% of the gross amount of the dividends if either of the following circumstances exist:

- The beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends and the dividends are exempt from tax in the other state.
- The dividends are derived by the government pension fund in the case of Norway or by the government social security fund in the case of Turkey.

(r) The 7.5% rate applies to interest on loans paid by financial institutions. The 10% rate applies to other interest payments.

(s) The 5% rate applies to dividends to the extent they are paid out of profits that have been subject to tax as specified in the tax treaty and if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.

(t) The 10% rate applies to interest on loans granted by banks. The 15% rate applies to other interest payments.

(u) The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and recordings for radio and television. The 15% rate applies to royalties paid for patents, trademarks, designs or models, plans, secret formulas or processes, or for information concerning industrial, commercial or scientific experience.

(v) The 10% rate applies to interest on loans granted by banks, financial institutions and insurance companies. The 15% rate applies to other interest payments.

(w) The 12% rate applies if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.

(x) The 5% rate applies if the recipient of the dividends is the government, a public institution wholly owned by the government or a political subdivision or local authority of the other contracting state. The 10% rate applies if the recipient owns more than 25% of the payer of the dividends. The 12% rate applies to other dividends.

(y) The 10% rate applies to interest derived from loans granted by financial institutions, such as banks, savings institutions or insurance companies. The 15% rate applies to other interest payments.

(z) The 5% rate applies if the recipient owns more than 25% of the payer of the dividends for an uninterrupted period of at least two years. The 15% rate applies to other dividends.

(aa) For Irish recipients, the 5% rate applies if the dividends are paid out of the profits that have been subject to tax in Turkey and if the recipient owns more than 25% of the voting rights of the payer of the dividends. The 10% rate applies if the recipient owns more than 25% of the voting rights of the payer of the dividends, and the 15% rate applies to other dividends. For Turkish recipients, these rates are applied as 5%, 5% and 15%, respectively.

(bb) The 10% rate applies to interest received by financial institutions or paid with respect to loans or other debt claims with a term exceeding two years. The 15% rate applies to other interest payments.

(cc) Interest paid to the government and central bank is exempt.

(dd) A new treaty between Turkey and Norway was signed on 15 January 2010. This new treaty is effective from 1 January 2012. Under the new treaty, the dividend withholding tax rate may be reduced to 5%. The withholding tax rate for interest ranges from 5% to 10%. The withholding tax on royalties is 10% if certain conditions are satisfied.

(ee) A new treaty between Turkey and Finland, which was signed on 6 October 2009, is effective from 1 January 2013.

(ff) A treaty between Turkey and Germany, which was resigned by the countries on 19 September 2011, is effective retroactively from 1 January 2011.

(gg) Interest paid from Turkey to the government of Brazil, the Central Bank of Brazil or the National Bank for Economic and Social Development (BNDES) is exempt from Turkish tax. Interest paid from Brazil to the government of Turkey, the Central Bank of Turkey (Turkiye Cumhuriyet Merkez Bankasi) or the Turkish Export/Import Bank (Eximbank) is exempt from tax.

(hh) The tax rate is 15% of the gross amount of the royalties arising from the use of, or the right to use, trademarks. The rate is 10% of the gross amount of royalties in all other cases.

(ii) The rate is 5% of the gross amount of interest with respect to a loan or credit made, guaranteed or insured for the purpose of promoting exports by
the Finnish Export Credit (FINNVERA) or similar Turkish public entities that have the objective of promoting exports. The rate is 10% of the gross amount of interest derived by banks. The rate is 15% of the gross amount of interest in all other cases.

(jj) The rate is 5% of the gross amount of the following types of interest:
  • Interest paid to the government pension fund or the Norwegian Guarantee Institute for Export Credits (Eksportfinans ASA) if the interest is wholly or mainly passed on to the government of Norway under the 108 Agreement between Eksportfinans ASA and the government of Norway
  • Interest paid to the Turkish social security fund or the Turkish Eximbank

The rate is 10% for interest paid to banks. The rate is 15% in all other cases.

(kk) For Swiss recipients, the rate is 5% if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends and if relief from Swiss tax is granted for such dividends through an abatement of the profits tax in a proportion corresponding to the ratio between the earnings from participations and total profits or through equivalent relief. The rate is 15% in all other cases for Swiss recipients. For Turkish recipients, the rate is 5% if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends. The rate is 15% in all other cases for Turkish recipients.

(ll) The rate is 5% for interest paid with respect to a loan or credit made, guaranteed or insured for the purpose of promoting exports by an Eximbank or a similar institution that has the objective of promoting exports. The rate is 10% in all other cases.

(a) For mining companies, the tax rate ranges from 25% to 45%, depending on the profitability of the mine.  
(b) Applicable to capital gains on business assets only.  
(c) Applicable to residents and nonresidents (see Section B for further details).  
(d) The rate is 10% for dividends paid by companies listed on the stock exchange to individuals.  
(e) The rate is 20% for interest paid on government securities, effective from 1 July 2012.
(f) Applicable to nonresidents.

(g) This withholding tax is imposed on resident professionals who are not exempt from withholding tax.

(h) This withholding tax is imposed on payments in excess of U Sh 1 million to any person in Uganda who is not exempt from withholding tax for goods and services supplied to, or under a contract with, the government, a local authority, a company controlled by the government of Uganda or any person designated in a notice by the Minister.

(i) In general, loss carrybacks are not allowed. However, for long-term construction contracts that result in a loss in the final year, a loss carryback for an unlimited number of years is allowed.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their worldwide income, but tax credits are granted for taxes paid on foreign-source income (see Foreign tax relief). Nonresident companies are subject to tax on income derived from sources in Uganda.

A company is resident in Uganda if any of the following applies:
- It is incorporated in Uganda.
- The management and control of its affairs are exercised in Uganda during the tax year.
- During the tax year, it performs the majority of its operations in Uganda.

Rates of corporate tax. For the year ending 30 June 2012, the regular corporate income tax rate is 30%. For mining companies, the tax rate ranges from 25% to 45%, depending on the profitability of the mine. Oil and gas exploration and production entities are taxed at the normal rate of 30%.

Capital gains. Capital gains on business assets are subject to tax at a rate of 30%.

Administration. Companies must file provisional income tax returns within six months after the beginning of the accounting period. This return includes an estimate of the income that will be earned by the company during the accounting period. The tax liability shown in the provisional return must be paid in two equal installments, which are due 6 months and 12 months after the beginning of the accounting period. A final tax return must be filed within six months after the end of the accounting period, and any balance of tax due must be paid when this return is filed.

Penalties are imposed if the final tax liability for the year exceeds the tax liability shown in the provisional return by more than 10%. However, the penalty for underestimating provisional tax does not apply to companies engaged in agricultural, plantation or horticultural farming.

Dividends. Dividends paid to residents and nonresidents are subject to withholding tax at a general rate of 15%. However, the withholding tax does not apply if the recipient of the dividends is a resident company that controls at least 25% of the voting power in the payer. The withholding tax rate is 10% for dividends paid by companies listed on the stock exchange to individuals. The withholding tax on dividends paid to nonresidents and to resident individuals is considered a final tax.
Interest. Interest paid to residents and nonresidents is subject to a withholding tax at a rate of 15%. The withholding tax rate for interest paid on government securities is 20%, effective from 1 July 2012. The withholding tax on interest does not apply if any of the following circumstances exist:

- The recipient of the interest is a resident company that controls at least 25% of the voting power in the payer.
- The recipient is a financial institution (except with respect to interest from government securities).
- The interest is paid by a natural person to a resident.

The withholding tax for interest paid on government securities is considered a final tax. Interest paid by resident companies to nonresident financial institutions with respect to debentures is exempt from tax.

Foreign tax relief. A foreign tax credit is granted for foreign tax paid on foreign-source income taxable in Uganda. The credit is limited to the equivalent of the Uganda tax on such income.

C. Determination of trading income

General. Taxable income is the income reported in the companies’ financial statements, subject to certain adjustments. Expenses are deductible to the extent that they are incurred in the production of taxable income.

Inventories. For tax purposes, inventory is valued at the lower of cost or market value.

Provisions. Only financial institutions and insurance companies may deduct specific provisions for bad debts.

Bad trade debts may be deducted when they are written off if all reasonable steps have been taken to recover the debt without success.

Tax depreciation. Depreciation charged in companies’ financial statements is not deductible for tax purposes, but capital allowances are granted at specified depreciation rates ranging from 20% to 40%.

Capital expenditure on buildings that are designated as industrial buildings, excluding the cost of the land, qualifies for an annual industrial building allowance of 5%. Commercial buildings constructed on or after 1 July 2001 qualify for a straight-line commercial building deduction of 5%. Wear-and-tear allowances (tax depreciation), calculated using the declining-balance method, are granted for plant and machinery at the following rates.

<table>
<thead>
<tr>
<th>Class</th>
<th>Assets</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>Computers and data handling equipment</td>
<td>40</td>
</tr>
<tr>
<td>II</td>
<td>Automobiles, buses and minibuses with a seating capacity of less than 30 passengers, goods vehicles designed to carry or pull loads of less than 7 tons, and construction and earth-moving equipment</td>
<td>35</td>
</tr>
</tbody>
</table>
Class | Assets | Rate (%)
--- | --- | ---
III | Buses with a seating capacity of 30 or more passengers, goods vehicles designed to carry or pull loads of more than 7 tons, specialized trucks, tractors, trailers and trailer-mounted containers, and plant and machinery used in farming, manufacturing or mining operations | 30
IV | Railroad cars, locomotives, equipment vessels, barges, tugs and similar water transportation equipment, aircraft, specialized public utility plant, equipment and machinery, office furniture, fixtures and equipment, and depreciable assets not included in another class | 20

An initial allowance at a rate of 50% is allowed for certain types of plant and machinery. The rate of the allowance is increased to 75% for capital expenditure in areas outside Kampala, Entebbe, Jinja, Namanve and Njeru. Initial allowances are granted in the year the plant and machinery is placed in service. Industrial buildings, excluding approved commercial buildings, qualify for an initial allowance of 20% if their construction begins on or after 1 July 2000.

An asset may qualify for both the initial allowance and the annual depreciation deduction. Both allowances are claimed in the same year with respect to an asset. The amount of the initial allowance is subtracted from the depreciable cost of the asset.

**Relief for losses.** Losses may be carried forward for an indefinite period of time to offset future profits.

In general, loss carrybacks are not allowed. However, for long-term construction contracts that result in a loss in the final year, a loss carryback for an unlimited number of years is allowed.

**Groups of companies.** No provisions exist for filing consolidated returns or for relieving losses within a group.

**D. Other significant taxes**

**E. Miscellaneous matters**

**Foreign-exchange controls.** The foreign-exchange market is now fully liberalized. A company can freely transfer foreign exchange into and out of Uganda without restriction. A company can prepare financial statements in foreign currency if it obtains approval from the tax authorities.
Transfer pricing. Transfer-pricing regulations are effective from 1 July 2011. They apply to a controlled transaction (transaction between associates) if a person who is party to the transaction is located in and is subject to tax in Uganda and the other person who is a party to the transaction is located in or outside Uganda. The regulations require a person to record in writing sufficient information and analysis to verify that a controlled transaction is consistent with the arm’s length principle.

For an income year, this documentation must be in place before the due date for the filing of the income tax return for that year.

(a) The 5% rate applies if the recipient owns at least 10% of the company paying the dividends. The 15% rate applies to other dividends.

(b) The 10% rate applies if the recipient is a company resident in the other contracting state that owns at least 25% of the capital of the payer. The 15% rate applies to other dividends.

(c) The 0% rate applies if the recipient holds at least 50% of the capital of the company paying the dividends. The 5% rate applies if the recipient holds less than 50% of the capital of the company paying the dividends. The 15% rate applies if the beneficial owner of the dividends is not a tax resident of the Netherlands.
A. At a glance

Corporate Income Tax Rate (%) 19 (a)

Other Ukrainian-Source Income 15
Branch Remittance Tax 0
Net Operating Losses (Years)
Carryback 0
Carryforward Unlimited (f)

(a) Exemptions apply (see Section B).
(b) The following types of interest payments are not subject to withholding tax:
   • Interest and income (discounts) received by nonresidents from state securities, municipal bonds or debt securities if these instruments are secured by state or municipal guarantees and if they are sold or placed by nonresidents outside Ukraine through nonresident authorized agents
   • Interest paid to nonresidents on loans received by the state and included in the state budget or in the budget of the National Bank of Ukraine
   • Interest on loans obtained by business entities if the fulfillment of these loans is secured by state or municipal guarantees
(c) In essence, the tax on advertising services and insurance payments is not a withholding tax, because the tax applicable to fees paid to nonresidents for advertising services and the tax on insurance payments is not withheld from the payments remitted to the nonresident recipient, but is paid at the expense of the Ukrainian company making the payments (that is, the economic burden of paying the tax is borne by the Ukrainian party).
(d) The tax base is calculated as the difference between the nominal value of the discount bonds and the acquisition value (purchase price) of the bonds on the primary or secondary stock market.
(e) The 0% rate applies to the following:
   • Insurance and reinsurance payments to financially reliable nonresidents
   • Reinsurance payments under compulsory civil liability insurance of nuclear plant operators
   • Insurance payments to nonresident individuals under mandatory insurance agreements
   • Insurance payments under Green Card insurance agreements (mandatory third-party liability insurance for car owners of states participating in the Green Card system)
   The 4% rate applies to insurance payments to nonresidents under insurance agreements covering risks outside Ukraine (subject to exceptions). The standard 12% rate applies in all other cases.
(f) Exceptions apply (see Section C).

B. Taxes on corporate income and gains

Corporate profit tax. Ukrainian legal entities and their separate subdivisions (except for representative offices) are subject to corporate profit tax (CPT) on their worldwide income and gains. Foreign legal entities (except for organizations with diplomatic privileges or immunities) are subject to CPT if they receive Ukrainian-source income. CPT also applies to permanent establishments of nonresidents receiving income from Ukrainian sources or performing agency services or certain other services for the benefit of nonresidents.

Rates of tax. Effective from 1 January 2013, the CPT rate is 19%. The rate will decrease to 16% on 1 January 2014. A CPT rate of 5% applies to certain software industry participants for the period of 1 January 2013 until 1 January 2023. This tax rate is available to companies that perform the following business activities:
   • Release of software, business applications and computer games
   • Computer programming and all types of activities related to creation, modification, testing, provision of technical support and software documenting
   • Rendering advisory services on informatization, including computer system planning and development
   • Computer equipment maintenance
   • Development and implementation of technical information complexes, systems and networks
   • Data processing, allocation of information on websites and related activities

A software industry participant must meet several requirements during the last four consecutive tax reporting quarters to qualify for preferential tax treatment. Newly established software industry participants are also eligible if they meet certain criteria.
Tax holidays until 2016 are also available for certain companies with limited turnover and activities.

**Capital gains.** Capital gains are included in taxable income and taxed at the regular CPT rate.

**Administration.** Beginning 1 January 2013, a new procedure applies for declaring and paying CPT.

Taxpayers with annual income for the previous year exceeding UAH 10 million must make monthly CPT prepayments in the current (reporting) year. Under the general rule, each CPT prepayment cannot be less than 1/12th of the CPT “accrued for payment” in the final annual tax return of the preceding year. However, this general rule does not apply to newly created companies, agricultural producers and nonprofit organizations.

Taxpayers making CPT prepayments only file a final annual tax return and do not have to submit quarterly interim tax returns. Together with the final annual CPT return, taxpayers submit a schedule and calculations of CPT prepayments for the next year. Each 12-month cycle of CPT prepayments begins in March of the current (reporting) year and continues until February of the next year. As an exception, in January and February of 2013 the CPT prepayments must not be less than 1/9th of the tax reported in the tax return for nine months of 2012. The exact algorithm for calculating the advance payments and their offset is not yet clear. At the time of writing, the updated form of the CPT return was unavailable.

Newly created companies, nonprofit organizations and companies with annual income less than UAH 10 million do not make CPT prepayments and report and pay their CPT liabilities after the year-end based on the final annual tax return.

If, in the first quarter of the current (reporting) year, a taxpayer has made CPT prepayments but has not received any income or has incurred a loss, the taxpayer can opt for submitting quarterly tax returns and discontinuing the CPT prepayments. In this case, the CPT liabilities of the taxpayer for the second and subsequent quarters are determined on the basis of respective quarterly tax returns.

If a taxpayer does not make CPT prepayments because in the previous year the taxpayer did not have any income or reported a loss, but has received income in the first quarter of the current year, such taxpayer must submit quarterly CPT returns beginning in the second quarter of the current year and must pay CPT on a quarterly basis.

Quarterly tax returns are prepared on a cumulative basis. Quarterly tax returns and the final annual tax return must be submitted within 40 days after the quarter or year-end. Tax is payable within 10 days after the deadline for submitting the tax return.

**Dividends.** A company distributing dividends to its shareholders must pay a 19% advance corporate profit tax (ACPT) on the amount of the dividends. The tax is paid either before or at the moment of the dividend distribution. The ACPT is an expense of the dividend payer and does not decrease dividends due to shareholders. The Tax Code provides that the ACPT can be offset against CPT liabilities of the taxpayer in the current or subsequent
periods. This provision is not reconciled with the new provisions of the Tax Code regarding regular CPT monthly prepayments (see Administration), which may jeopardize smooth ACPT offset.

Exemption from ACPT on dividends applies to the following dividends:

- Dividends paid to individuals
- Dividends paid as shares in the taxpayer’s equity if the percentage of shareholders’ participation in the taxpayer’s equity remains unchanged
- Dividends paid by joint investment vehicles
- Dividends paid to shareholders of the taxpayer’s parent company, up to the amount of dividends received by the parent company from third companies
- Dividends paid by managers of real estate funds on the distribution of income of such funds
- Dividends paid to companies whose profits are exempt from tax, up to the amount of such profits in the period for which dividends are paid

Dividends distributed to nonresidents are subject to withholding tax at a rate of 15%, unless an applicable double tax treaty provides otherwise.

Ukrainian taxpayers do not include dividends received from other Ukrainian residents or controlled nonresident legal entities in their taxable income. This exemption does not apply to dividends received from nonresident companies that are not under the control of the taxpayer or from offshore companies.

Foreign tax relief. Ukrainian enterprises may credit foreign tax paid with respect to foreign-source profits against Ukrainian tax imposed on the same income, up to the amount of such Ukrainian tax. The credit is granted only if the taxpayer submits a written confirmation from the tax authorities of the foreign country that certifies payment of the foreign tax.

C. Determination of taxable profit

General. Taxable profit is defined as income of the reporting period less cost of goods (works, services) and other expenses, including depreciation charges. Income received (accrued) in foreign currency is converted into local currency at the official exchange rate as of the date of such income accrual or, if it is an advance payment, as of the date of its receipt.

Deductible expenses are recognized on an accrual basis in line with national accounting standards. Deductible expenses consist of “operating expenses” (cost of goods, works and services) and “other expenses.”

Operating expenses are recognized in the period in which income from the sale of such goods and services is recognized (matching). Other expenses (with some exceptions) are recognized in the period in which they are incurred.

The Tax Code limits deductibility of the expenses described below.

The deductibility of fees for consulting, marketing and advertising services purchased from nonresidents (unless these are paid to a permanent establishment of the nonresident service provider) is limited to 4% of the taxpayer’s total income (revenues) from sales
of goods and services in the preceding reporting year (excluding VAT and excise tax). Fees for consulting, marketing and advertising services purchased from offshore companies are not deductible at all.

Fees for engineering services purchased from nonresidents may be deducted up to an amount not exceeding 5% of the customs value of the imported equipment. Fees for engineering services are not deductible if the fee recipient is not a beneficial owner of the fees or is an offshore company.

Royalties paid to nonresidents may be deducted up to an amount not exceeding 4% of the preceding year’s income. This limitation does not apply to companies operating in the fields of television, radio and cinema. Other conditions for royalty deductibility may apply.

**Depreciation.** For purposes of tax depreciation, fixed assets are defined as assets that are designated for use in a taxpayer’s business activity for more than one year and that have a value exceeding UAH 2,500. The Tax Code provides for 16 groups of tangible fixed assets, 6 groups of intangible fixed assets and 5 methods of tax depreciation. Similar to financial accounting, tax depreciation is accrued per each item.

The list of depreciation methods is in line with methods stipulated for financial accounting. The following are the methods:

- **Straight-line**
- **Declining-balance**
- **Accelerated declining balance** (applies only to machinery and equipment and transport facilities; these assets are in Groups 4 and 5; see below)
- **Sum-of-the-years’ digits**
- **Unit-of-production**

Depreciation of an asset is accrued on a monthly basis throughout the useful life cycle of the asset. The following table shows the minimum allowable term of the useful lives of assets.

<table>
<thead>
<tr>
<th>Group</th>

<td>7</td>
</tr>
</tbody>
</table>
Assets of Group 1 (land plots) and Group 13 (natural resources) are not subject to depreciation.

The minimum term of useful life is not determined for the assets of Group 10 (library holdings) and Group 11 (tangible assets of small value).

Depreciation charges for a reporting quarter per each fixed asset equal the sum of depreciation charges for the three months of such quarter.

**Relief for losses.** In general, the Tax Code allows the unlimited carryforward of losses. A limitation applies to losses accumulated before 1 January 2012. Under this limitation, the losses reported in the annual tax return for 2011 can only be carried forward gradually during the period of 2012 through 2015. The annual amount allowed to be carried forward cannot exceed 25% of the reported losses. After 2015, the remaining tax losses can be carried forward without limitation. The limitation applies only to taxpayers whose taxable income in 2011 exceeded UAH 1 million. It is advisable to monitor further developments in the tax laws as ad-hoc restrictions and adverse interpretations of the law are possible.

The law does not allow tax losses to be carried back (that is, offsetting the tax loss of the current year against the taxable income of previous years to reduce tax payments). However, because taxpayers complete their CPT return cumulatively, the carryback of a tax loss within a year may be technically possible.

**Groups of companies.** The Ukrainian tax law does not provide for the grouping of different legal entities.

The Ukrainian law allows the offsetting of profits and losses among the branches of the same company. Under Ukrainian law, a branch is a subdivision of a company that does not have the status of legal entity and is located on the territory of another territorial community (a branch located on the territory of another territorial community means an office, other than the head office, located in the district [region or city/village] other than the district of the head office). Branches are normally treated as separate taxpayers. However, a Ukrainian legal entity may choose to pay consolidated tax.

E. Miscellaneous matters

Foreign-exchange controls. The Ukrainian currency is the hryvnia (UAH). The official exchange rate of the hryvnia against the U.S. dollar can be found at the National Bank of Ukraine (NBU) website (www.bank.gov.ua); the retail exchange rate may differ from the official exchange rate. A wide variety of controls are imposed with respect to the use, circulation and transfer of foreign currency within Ukraine and abroad. These controls, which affect almost all international business transactions, include the following:

- In general, transactions between Ukrainian residents and cash settlements within Ukraine may not be carried out in foreign currency.
- All statutory accounting and tax reporting, as well as tax payments, must be in Ukrainian currency.
- Wages and salaries paid to Ukrainian citizens must be in Ukrainian currency.
- Ukrainian currency may be used to purchase foreign currency.
- Ukrainian enterprises must obtain an individual license (permission) from the NBU to engage in certain business transactions, including the opening of bank accounts abroad.
- Ukrainian enterprises must collect their foreign currency proceeds for goods, works or services supplied by them within 180 days from the date of exportation or supply of services. Similarly, foreign currency prepayments for goods, works or services must not exceed 180 days.
- Payments for services rendered by nonresidents, as well as cross-border lease and royalty payments, are subject to price-evaluation review if the total amount of the contract (or the total annual amount payable under several contracts for similar services between the same parties) exceeds €100,000 (or its equivalent in another foreign currency). The governmental informational-analytical center for monitoring foreign commodities markets conducts the price-evaluation reviews.

Debt-to-equity ratios and other restrictions on the deductibility of interest. No debt-to-equity rules are in effect in Ukraine. However, the law imposes a restriction on the deductibility of interest payable by Ukrainian companies with 50% or more foreign investment to their nonresident shareholders and parties related to such nonresidents. This measure essentially implies that, in a reporting period, such a Ukrainian company may deduct interest payable in an amount not exceeding the amount of interest income received plus 50% of its adjusted taxable profit for the relevant period. The remaining interest may be carried forward without time limit, subject to the same 50% limitation.

Payments to residents of offshore locations. Only 85% of the amount of payments in consideration for goods and services to residents with offshore status is deductible for tax purposes. The Cabinet of Ministers of Ukraine publishes the list of jurisdictions that are considered to be offshore zones (tax-haven jurisdictions). The current list includes approximately 40 tax havens and countries with concessionary tax regimes.

The Tax Code does not allow the deduction of royalties and fees for marketing, consulting, engineering and advertising services paid to nonresidents with offshore status.
Transfer pricing. New transfer-pricing rules are effective from 1 January 2013. Transfer-pricing rules apply to barter transactions, related-party transactions (both domestic and cross-border), and transactions with nonresidents and other persons that are not regular CPT payers. For tax purposes, prices in controlled transactions must be at arm’s length. A 20% deviation from arm’s length prices is allowed.

Arm’s length prices can be established by the following transfer-pricing methods:
• Compared uncontrolled price
• Resale-minus
• Cost-plus
• Transaction net margin method
• Profit-split

If none of these methods can be applied, an arm’s length price can be determined by a certified evaluator. Only official sources of information can be used to determine arm’s length prices.

Transfer-pricing rules do not apply to prices regulated or established by the government (except for cases in which the government establishes a minimal price) and prices determined through tenders.

For products imported into Ukraine, the arm’s length price cannot be lower than the customs value of the imported products.

The burden of proof that the actual contract prices are not at an arm’s length rests on the tax authorities. If a deviation from arm’s length prices is proved, the tax authorities can adjust the tax liabilities of the taxpayer and apply penalties. If the taxpayer challenges such decisions of the tax authorities, the tax authorities must apply to the court to proceed with the tax adjustment.

Large taxpayers may apply to State Tax Service of Ukraine for an advance pricing agreement.

No transfer-pricing documentation requirement is imposed in Ukraine.

Further developments in Ukrainian transfer pricing are expected in 2013.

F. Treaty withholding tax rates

Ukraine honors the double tax treaties of the former USSR, except for treaties that have been superseded by new treaties concluded directly by Ukraine or renounced by the other party to the treaty. Ukraine is not a member of the Organization for Economic Cooperation and Development (OECD). As a result, the Ukrainian tax authorities may not follow commentary of the OECD model convention. The rates in the following table reflect the lower of the treaty rate and the rate under domestic tax law for dividends, interest and royalties paid from Ukraine to residents of treaty countries. Exceptions or conditions may apply, depending on the terms of the particular treaty.

</table>
The 0% rate applies to dividends paid to one or more companies that are the beneficial owners of these dividends and if either of the following conditions is satisfied:

- The recipient company or companies hold directly or indirectly at least 50% of the capital of the company paying the dividends, and the total amount of their investments in the paying company is not less than 5 million French francs.
- The investments of the recipient companies in the company paying the dividends are guaranteed or insured by the other state, the central bank of such state or a person acting on behalf of such state.

The 5% rate applies to dividends paid to companies that own at least 20% of the capital of a Ukrainian resident payer or 10% of the capital of a French resident payer. The 15% rate applies to other dividends.

The 0% rate applies to royalties paid for the use of, or the right to use, copyrights for literary, dramatic, musical or artistic works. The higher rate applies to other royalties.

The 10% rate applies to the following:

- Payments for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes
- Payments for copyrights of scientific works; payments for the use of, or the right to use, industrial, commercial or scientific equipment
- Payments for information concerning industrial, commercial or scientific experience

The 15% rate applies to payments for the use of, or the right to use, cinematographic films, or tapes for radio or television broadcasting, and to payments for copyrights of literary or artistic works.

The lower rate applies to dividends paid to companies owning a minimum percentage of the capital of the payer (under the treaties, this percentage ranges from 10% to 50%). The higher rate applies to other dividends.

The 0% rate may apply to the following:

- Interest paid to or by government institutions of the contracting states
- Interest paid to entities authorized by government institutions
- Interest on debt claims that are warranted, insured or directly or indirectly financed by the state or a financial institution wholly owned by the state

The higher rate applies to other interest.

The 0% rate applies to payments for the use of, or the right to use, computer software. The 10% rate applies to other royalties.

The 0% rate applies to payments for the use of, or right to use, secret formulas or processes, or for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

The 0% rate applies to interest paid to the state or an agency owned or controlled by the state and to interest paid to a resident of a contracting state with respect to a loan or other debt claim or credit granted, guaranteed or insured by public entities owned or controlled by the state. The 2% rate applies to

interest on loans from banks or financial institutions and to interest with respect to sales on credit of merchandise or services between enterprises or sales of industrial, commercial or scientific equipment. The higher rate applies to other interest.

(i) The 0% rate applies to dividends paid to companies (other than partnerships) that hold directly at least 50% of the capital of the payer of the dividends and have made an investment in the capital of the payer of at least US$300,000 or the equivalent in the currencies of the contracting states. The 0% rate also applies to dividends paid to companies whose investment in the capital of the payer is guaranteed or insured by government institutions or an agency or instrumentality owned or controlled by the government. The 5% rate applies to dividends paid to companies owning at least 20% of the payer. The 15% rate applies to other dividends.

(j) The 0% rate applies to interest paid to the state or an agency owned or controlled by the state and to interest paid to a resident of a contracting state with respect to a loan or other debt claim or credit granted, guaranteed or insured by public entities owned or controlled by the state. The 2% rate applies to the following:
- Interest paid on loans granted by banks or other financial institutions of the other state, including investment banks, savings banks and insurance companies
- Interest paid with respect to the sale on credit of industrial, commercial or scientific equipment, or with respect to the sale or furnishing on credit of goods or merchandise or services by an enterprise to another enterprise
The 10% rate applies to other interest.

(k) The 0% rate applies to payments for the use of, or the right to use, copyrights of scientific works, patents, trademarks, designs or models, plans, and secret formulas or processes, as well as to information concerning industrial, commercial or scientific experience. The higher rate applies to other royalties.

(l) The 0% rate applies to royalties paid for the use of, or the right to use, computer software, patents, designs or models, or plans. The 5% rate applies to royalties paid for the use of, or right to use, secret formulas or processes, as well as for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works including cinematographic films, and films or tapes for television or radio broadcasting, or trademarks.

(m) The 0% rate applies to dividends paid by a company resident in Ukraine to a company that is resident in Finland and that is the beneficial owner of the dividends if either of the following circumstances exists:
- The Finnish Guarantee Board has issued an investment guarantee for dividends paid or for the capital invested on which the dividends are paid.
- The recipient of the dividends has made an investment of at least US$1 million in the capital of the payer and holds at least 50% of the equity capital of the company paying the dividends.
The 0% rate is allowed with respect to dividends paid for any tax year within the period for which the above-mentioned guarantee is in force or, if no such guarantee is made, with respect to dividends paid for the first three years following the year in which the investment is made. The 5% rate applies to dividends paid to companies owning at least 20% of the capital of the payer. The 15% rate applies to other dividends.

(n) The 0% rate applies if the interest is paid to the State of Finland, or a local authority or a statutory body thereof, the Bank of Finland, the Finnish Fund for Industrial Co-operation Ltd (FINNFUND) or the Finnish Export Credit Ltd or any similar institution. The 0% rate also applies to interest paid to a resident of Finland on a loan guaranteed by any of the bodies mentioned in the preceding sentence or by the Finnish Guarantee Board and paid to a resident of Finland. The 5% rate applies to interest related to commercial credit. The 10% rate applies to other interest.

(o) The 5% rate applies to dividends paid to companies that have invested at least US$50,000 in the capital of the payer or an equivalent amount in the currencies of the contracting states. The 15% rate applies to other dividends.

(p) The 0% rate applies to the following types of interest:
- Interest paid to government institutions
- Interest on loans granted by banks
- Interest paid with respect to sales on credit of merchandise, or industrial, commercial or scientific equipment
The 10% rate applies to other interest.

(q) The 10% rate applies to dividends paid to the beneficial owner if, for an uninterrupted period of two years before the payment of the dividend, the beneficial owner owned directly at least 25% of the capital stock of the company paying the dividends. The higher rate applies to other interest.
The 0% rate applies to payments for the use of, or the right to use, software, patents, trademarks, designs or models, plans, or secret formulas or processes, or for information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, secret formulas or processes, as well as for information concerning industrial, commercial or scientific experience. The 15% rate applies to other royalties.

The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the voting power of the payer of the dividends and if at least 50% of the voting power of the company that is the beneficial owner of the dividends is held by residents of the beneficial owner's contracting state.

The 0% rate applies to the following:
- Interest paid on loans provided, guaranteed or insured by a government of a state where the beneficial owner of the interest is located, or interest on loans made, guaranteed or insured on behalf of such government by an authority thereof that is so entrusted
- Interest with respect to indebtedness arising on sales on credit by enterprises of merchandise or industrial, commercial or scientific equipment to an enterprise of another contracting state, unless the sale or indebtedness is between related persons

The 10% rate applies to other interest payments.

The 0% rate applies to royalties paid for patents concerning industrial and manufacturing know-how or processes, agriculture, pharmaceuticals, computers, software, building constructions, secret formulas or processes, as well as for information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

The 0% rate applies to interest derived by the government, a political subdivision or a local authority, central bank of a contracting state or other financial institution established and owned by the government to promote trade and investment, as well as to interest paid to residents of a contracting state with respect to debt-claims guaranteed or insured by the government, a local authority thereof, the central bank or other financial institution established and owned by the government to promote trade and investment. The 10% rate applies to interest paid on loans granted by banks or other financial institutions, including investment banks, savings banks and insurance companies. The 15% rate applies to other interest payments.

The 5% rate applies to royalties paid for the use of, or the right to use, patents, plans, secret formulas or processes, as well as for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

The 0% rate applies to dividends paid to the government, a political subdivision or local authority, central bank or other state financial institution. The 5% rate applies to dividends paid to companies owning at least 10% of the capital of the payer.

The 0% rate applies to interest paid on loans granted by the government of a contracting state, including its political subdivisions and local authorities, the central bank or financial instrumentalities of that government. The 5% rate applies to interest paid on loans granted by banks. The 10% rate applies to all other interest payments.

A discrepancy exists between the Ukrainian and English texts of the Belgium treaty with respect to the withholding tax rates for interest and royalties. In the Ukrainian version, the highest treaty rate is 5%, while in the English version, it is 10%. The English version prevails in accordance with Paragraph (e) of the protocol to the treaty.

The treaty does not apply to the Hong Kong Special Administrative Region (SAR).

The 0% rate applies to dividends paid to the government, a political subdivision or local authority, the central bank or other state financial institution. The 5% rate applies to all other dividends.

Notwithstanding the provisions allowing the 5% reduced rate (see footnote [d]), the 10% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends and if the dividend payer is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax.

A discrepancy exists between the Ukrainian and English texts of the Belgium treaty with respect to the withholding tax rates for interest and royalties. In the Ukrainian version, the highest treaty rate is 5%, while in the English version, it is 10%. The English version prevails in accordance with Paragraph (e) of the protocol to the treaty.

The treaty does not apply to the Hong Kong Special Administrative Region (SAR).

The 0% rate applies to dividends paid to the government, a political subdivision or local authority, the central bank or other state financial institution. The 5% rate applies to all other dividends.

If a resident of a contracting state has a permanent establishment in the other state, such permanent establishment may be subject to a withholding tax under the law of that other state. However, this tax may not exceed 10% of the amount of the profits of that permanent establishment after payment of the corporate tax on the profits.
Interest arising in a contracting state and paid to the government of the other contracting state, political subdivisions thereof or agencies (including financial institutions) wholly owned by that government or a political subdivision is exempt from tax in the state where the income arises, unless the rule mentioned in the following sentence applies. Interest on securities, bonds or debentures issued by the government of a contracting state, political subdivisions thereof or agencies (including financial institutions) wholly owned by that government or political subdivision thereof is taxable only in that state.

The 5% rate applies to royalties paid for the use of, or right to use, scientific works, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary or artistic works, including cinematographic films, and tapes for television or radio broadcasting.

Interest derived by the government of the contracting state including local authorities thereof, a political subdivision, the central bank or any financial institution controlled by such government, the capital of which is wholly owned by the government of the contracting state, is exempt from tax.

The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary or artistic works, including cinematographic films, and tapes for television or radio broadcasting.

Interest derived by the government of the contracting state including local authorities thereof, a political subdivision, the central bank or any financial institution controlled by such government, the capital of which is wholly owned by the government of the contracting state, is exempt from tax.

The 0% rate applies if interest is received and actually held by the government or a political subdivision. Interest paid to and held by a resident of one contracting state is exempt from tax in the other contracting state if it is paid with respect to a loan made, guaranteed or insured or with respect to any other debt claim or credit, if the loan, debt claim or credit is guaranteed or insured on behalf of the first-mentioned state or by an authorized organ.

The 0% rate applies if the interest is paid by a purchaser to a seller with respect to commercial credit resulting from deferred payments for goods, merchandise, equipment or services, unless the sale or indebtedness is between associated persons.

The 0% rate also applies to interest arising in a contracting state and paid to a resident of the other contracting state that was established and operated exclusively to administer or provide benefits under one or more pension, retirement or other employee benefits plans if the following conditions are satisfied:

- The recipient is the beneficial owner of the interest and is generally exempt from tax in the other state.
- The interest is not derived from the carrying on of a trade or a business or from a related person.

Tax imposed on the earnings of a company attributable to a permanent establishment in a contracting state in addition to the tax that would be chargeable on the earnings of a company that is a national of that state may not exceed 5% of the amount of such earnings.

If a resident of a contracting state has a permanent establishment in the other state, such permanent establishment may be subject to a withholding tax under the law of that other state. However, this tax may not exceed 10% of the amount of the profits of that permanent establishment after payment of the corporate tax on the profits. This measure does not affect provisions contained in production-sharing contracts and contracts of work (or any other similar contracts) relating to the oil and gas sector or other mining sector entered into by the government of Indonesia, its instrumentalities, its relevant state oil and gas company or any other entities of the government of Indonesia, with a person that is a resident of the other contracting state.

The 0% rate applies to the interest paid with respect to bonds, debentures or similar obligations of the government, political subdivisions, local authorities or the central bank.
The 0% rate applies to dividends if the beneficial owner of the dividends is the government, the central bank, or other government institutions or statutory bodies. The 5% rate applies to dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the payer. The 15% rate applies to other dividends.

The 10% rate applies to dividends paid to the beneficial owner of the dividends if the beneficial owner owns directly at least 25% of the capital stock of the company paying the dividends. The 15% rate applies to other dividends.

The 0% rate applies to interest received and belonging to the government, political subdivisions, local authorities or the central bank.

The double tax treaty with Yugoslavia applies to Serbia and Montenegro.

The 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes for radio or television broadcasting. The 10% rate applies to the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

The 5% rate applies to dividends paid to persons that own at least 20% of the capital of a Ukrainian resident payer. The 15% rate applies to other dividends.

The 5% rate applies to dividends paid to companies (other than partnerships) that hold directly at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends.

The 0% rate applies to the following types of interest:
- Interest paid to or by the state, political subdivision or central bank
- Interest arising and paid with respect to a loan granted for a term over three years that is guaranteed or insured or to a credit granted for a term over three years that is guaranteed or insured by the authorized state institutions.

The 10% rate applies in other cases. The procedure for application of these restrictions will be set by the competent authorities of Mexico and Ukraine.

Ukraine has ratified a double tax treaty with Cuba, but this treaty is pending.

A Governmental Order dated 15 August 2012 authorized the Minister of Finance to sign a tax treaty with Ireland.

Ukraine signed a tax treaty with Luxembourg, but the Ukrainian parliament has not ratified it.

Ukraine has negotiated a double tax treaty with Malta, but this treaty has not yet been signed.

Ukraine is negotiating double tax treaties with Guinea and Tunisia.

A. At a glance

Corporate Income Tax Rate (%) 0*
Capital Gains Tax Rate (%) 0*
Branch Tax Rate (%) 0*
Withholding Tax (%) 0*

* No taxes are imposed by the federal government of the United Arab Emirates. See Section B for further information.

B. Taxes on corporate income and gains

Corporate income tax. Although no federal taxation currently exists in the United Arab Emirates (UAE), each of the individual Emirates (Abu Dhabi, Ajman, Dubai, Fujairah, Ras Al Khaimah, Sharjah and Umm Al Quwain) has issued corporate tax decrees that theoretically apply to all businesses established in the UAE. However, in practice, these laws have not been applied. Taxes are currently imposed at the Emirate level only on oil and gas producing companies in accordance with specific government concession agreements, and on branches of foreign banks under specific tax decrees or regulations or in accordance with agreements with the Rulers of the Emirates in which the branches operate.
The preceding paragraph describes how the practice has evolved in the UAE. No general exemption is contained in the law. Investors in the UAE should be aware of the risk that the law may be more generally applied in the future and of the remote risk that it may be applied retroactively.

**Tax incentives.** Several of the Emirates have free zones which offer tax and business incentives aimed at making the UAE a global financial and commercial center. The incentives usually include tax exemptions for a guaranteed period, the possibility of 100% foreign ownership, absence of customs duty within the free zone and a “one-stop shop” for administrative services. The free zones include, but are not limited to, the Dubai Airport Free Zone (DAFZ), Dubai International Financial Centre (DIFC) for financial services, Dubai Internet City (DIC), Dubai Media City (DMC), Dubai Studio City (DSC) and Jebel Ali Free Zone (JAFZ). Approximately 30 free zones are located in the Emirate of Dubai alone.

**C. Customs duties**

The member states of the Gulf Cooperation Council (GCC), which are Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates, approved regulations for the implementation of the GCC Customs Union on 22 December 2002. All of the states have adopted the unified customs duty generally calculated at 5% of the invoice value on most goods (except those on the exempted list) imported into the region. If goods are shipped directly from a non-GCC country to the customer, duty is payable at the first entry point. The duty is levied on the cost, insurance and freight (CIF) value of the imported goods as evidenced by the manufacturers’ or suppliers’ invoices. The duty is payable by the importer of record.

**D. Foreign-exchange controls**

Neither the federal government of the UAE nor the individual Emirates impose foreign-exchange controls.

**E. Tax treaties**

The UAE has more than 50 tax treaties currently in force, including treaties with Algeria, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bosnia-Herzegovina, Bulgaria, Canada, China, the Czech Republic, Egypt, Estonia, Finland, France, Georgia, Germany, India, Indonesia, Ireland, Italy, Korea (South), Lebanon, Luxembourg, Malaysia, Malta, Mauritius, Morocco, Mozambique, the Netherlands, New Zealand, Pakistan, Philippines, Poland, Portugal, Romania, Seychelles, Singapore, Spain, Sri Lanka, Sudan, Switzerland, Syria, Tajikistan, Thailand, Tunisia, Turkey, Turkmenistan, Ukraine, Venezuela, Vietnam and Yemen.

In addition, treaties with the following countries are in various stages of negotiation, renegotiation, signature, ratification, translation or entry into force.

(a) The small profits rate of corporation tax is 20%. Effective from 1 April 2013, the main rate of corporation tax will decrease to 23%, while the small profits rate will remain at 20%. The intention is that the main rate will decrease by a further 1% to 22%, effective from 1 April 2014. The main rate of corporation tax for ring-fence profits (that is, profits from oil extraction and oil rights in the United Kingdom and the U.K. continental shelf) is 30% (small profits rate of 19%). The rates for ring-fence profits will not change on 1 April 2013.

(b) The small profits rate of 20% applies in certain circumstances if taxable profits are below £300,000. This benefit is phased out for taxable profits from £300,000 to £1.5 million. These limits are reduced if associated companies exist.

(c) Capital gains are subject to tax at the normal corporation tax rate. See Section B for details concerning the taxation of capital gains derived by nonresidents.

(d) This tax applies to payments to nonresidents and noncorporate residents.

### B. Taxes on corporate income and gains

#### Corporate income tax

Companies that are resident in the United Kingdom are subject to corporation tax on their worldwide profits. Tax is imposed on the total amount of income earned from all sources in the company’s accounting period, including any chargeable capital gains. However, under a provision contained in the 2011 Finance Act, a company can elect to exempt non-U.K. branch income and losses from U.K. corporation tax, subject to certain transitional rules. This election is irrevocable and takes effect from the accounting period after the one in which the election is made.

Nonresident companies are subject to U.K. corporation tax only if they carry on a trade in the United Kingdom through a permanent establishment. A permanent establishment arises either from a fixed place of business in the United Kingdom through which the nonresident company carries on its business, or from an agent exercising authority to do business in the United Kingdom on behalf of the nonresident company. The amount of profit attributable to a permanent establishment is computed in accordance with the separate enterprise principle.

A company is resident in the United Kingdom if it is incorporated in the United Kingdom or if the central management and control of the company is exercised there. However, companies regarded as resident under domestic law, but as nonresident under the tie-breaker clause of a double tax treaty, are regarded as nonresident for all corporation tax purposes.

#### Rates of corporation tax

The main rate of corporation tax for large companies (companies with taxable profits above £1,500,000) is 24% for the financial year beginning 1 April 2012. This rate will be reduced to 23% for the financial year beginning 1 April 2013. The intention is that the rate will decrease to 22% for the financial year beginning 1 April 2014. The rate is 30% for companies with ring-fence profits (that is, profits from oil extraction and oil rights in the United Kingdom and the U.K. continental shelf). If an accounting period does not coincide with the financial year, the profits for the accounting period are time-apportioned and the appropriate rate applied to each part. A company may claim the small profits rate of corporation tax, which is 20% (19% on ring-fence profits of companies) if its taxable profits for an accounting period are less than £300,000. The effective marginal rate for
companies with non-ring-fence profits between £300,000 and £1,500,000 is 25% (23.75% for the financial year beginning 1 April 2013). These limits are divided by one plus the number of associates if a company has associated companies (subsidiaries or fellow subsidiaries), regardless of whether they are within or outside the United Kingdom.

**Capital gains.** Capital gains on chargeable assets are taxed at the normal corporation tax rate. For U.K. tax purposes, a capital gain is usually the excess of the sale proceeds over the original cost plus any subsequent qualifying capital expenditure incurred on the chargeable asset being disposed of. If chargeable assets acquired before 31 March 1982 are disposed of, only the portion of the gain after that date is usually taxable. An allowance is available for inflation; the amount of the reduction is based on the increase in the retail price index. This indexation allowance may be used only to eliminate a gain; it may not be used to create an allowable loss.

The Substantial Shareholdings Exemption (SSE) broadly exempts from U.K. tax any capital gain on disposals made by trading companies or groups with substantial shareholdings (more than 10%) in other trading companies or groups. The following three sets of conditions must be satisfied:

- The substantial shareholding requirement
- Conditions relating to the “investing” company or group
- Conditions relating to the “investee” company or subgroup

Broadly, both the investing company and the investee company must be a trading company, group or subgroup for 12 months before the disposal and immediately afterwards.

Capital gains tax is not generally levied on nonresidents; consequently, no tax is levied on a gain on the sale of shares in a U.K. subsidiary by the foreign nonresident parent company. However, gains on the sale of assets situated in and used in a trade carried on by a permanent establishment in the United Kingdom are subject to tax.

Special provisions permit the deferral of the capital gains charge on qualifying business assets if the sales proceeds are reinvested. There are numerous other special rules relating to capital gains.

Capital losses may be offset against capital gains of the same accounting period or carried forward indefinitely, but may not be carried back. Capital losses may not be used to reduce trading profits.

**Administration.** Tax returns, accounts and computations must be filed within 12 months after the end of the accounting period.

Large companies must make quarterly installment payments of their corporation tax. The first installment is due six months and thirteen days after the first day of the accounting period, and the last installment is due three months and fourteen days after the end of the accounting period. These payments are based on the estimated tax liability for the current year. Fewer payments may be required for shorter accounting periods.

All other companies must pay estimates of their corporation tax liability within nine months after the end of their accounting period.
Companies not complying with the filing and payment deadlines described above are subject to interest and penalties.

A self-assessment system requires companies to assess correctly their tax liabilities or face significant penalties. In addition, the tax authority (Her Majesty’s Revenue & Customs, or HMRC) has extensive investigative powers.

**Advance Agreements Unit.** Significant inward investors can apply to the Advance Agreements Unit (AAU) for a range of services, including the following:

- Rulings on which businesses can rely if uncertainty exists with respect to the application of the tax law to a specific transaction
- A “one-stop shop” to coordinate responses from different parts of HMRC, depending on the taxes and duties involved
- A fast track towards agreement if time is of the essence
- Help for inward investors who need advice on U.K. taxes and systems

**Dividends.** Dividends paid by U.K. resident companies are not subject to withholding tax. For dividends received by U.K. resident companies, the United Kingdom has a dividend exemption regime. A dividend or other income distribution received on or after 1 July 2009 is generally exempt from U.K. corporation tax if all of the following conditions are satisfied:

- The distribution falls within an exempt class or, if the recipient is a “small” company, the payer is resident in a qualifying territory.
- The distribution is not of a specified kind.
- No deduction is allowed to a resident of any territory outside the United Kingdom under the law of that territory with respect to the distribution.

U.K. resident shareholders other than companies are subject to income tax on the distribution received plus a deemed tax credit. The deemed tax credit attaching to dividends is equal to 10/90 of the net dividend. Under several of the U.K.’s double tax treaties, a foreign shareholder in a U.K. company may claim payment of part or all of this deemed tax credit that would have been available to a U.K. individual. However, in most cases, the benefit is eliminated or reduced to a negligible amount.

**Interest.** Interest payments on “short loans” (loans with a duration that cannot exceed 364 days) may be made without the need to account for withholding tax. All interest payments by U.K.-resident companies may be made without the imposition of withholding tax if the paying company reasonably believes that the interest is subject to U.K. corporation tax in the hands of the recipient.

**Foreign tax relief.** Foreign direct tax on income and gains of a U.K. resident company other than that relating to a non-U.K. branch for which an exemption election has been made (see Corporate income tax) may be credited against the corporation tax on the same profits. The foreign tax relief cannot exceed the U.K. corporation tax charged on the same profits.

If a company receives a dividend from a foreign company in which it has at least 10% of the voting power, it may also obtain relief for the underlying foreign tax on the profits out of which
the dividend is paid. Foreign tax relief does not apply if the dividend satisfies the conditions for the dividend exemption (see Dividends).

C. Determination of trading income

General. The assessment is based on financial statements prepared in accordance with generally accepted accounting principles (GAAP), subject to certain adjustments and provisions.

In general, expenses must be incurred wholly and exclusively for the purposes of the trade. However, specific reliefs and prohibitions exist for certain expenses. For example, no deduction is allowed for entertainment expenses, except for the entertaining of company employees (in certain circumstances).

Corporate and government debt and foreign-exchange differences. The rules under the “loan relationships” regime are designed to allow the tax treatment of interest, discounts and premiums on debt instruments to follow the accounting treatment in most circumstances. However, the regime includes many antiabuse measures as well as other measures, such as the Worldwide Debt Cap, which can restrict the allowable deductions (for further details, see Section E).

Foreign-exchange differences on most monetary items are taxable or relievable in accordance with GAAP. Specific rules apply to foreign-exchange differences arising on loans that hedge exchange risk on shareholdings.

Inventory. Inventory is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out (FIFO) basis; the last-in, first-out (LIFO) basis is not acceptable under U.K. GAAP.

Provisions. HMRC allows specific provisions made in accordance with U.K. GAAP to be deductible for tax purposes unless specific legislation provides to the contrary. However, no expenditure may be relieved more than once.

Leased assets. If leases of plant or machinery function essentially as financing transactions (long-funding leases), they are taxed as such and the following rules apply:

- The lessor includes only the finance element of the rentals arising under the lease in income.
- The lessee deducts only the finance element of the rentals payable over the life of the lease and is entitled to capital allowances.

This regime applies to finance leases and certain operating leases. With the exception of some hire-purchase transactions, leases of less than five years are not affected.

Tax depreciation (capital allowances)

Plant and machinery. Expenditure on plant and machinery, including some cars bought after April 2009, is pooled together (the main pool) and allowances are given at 18% on a reducing-balance basis. Assets with a useful life of 25 years or more (long-life assets) are depreciated at 8% on a reducing-balance basis. Integral features to a building also qualify for the 8% rate of capital allowances. An annual investment allowance (AIA) of 100% is available for the first £250,000 of investment in plant and
machinery (other than cars) to all businesses, regardless of size. This increased allowance applies to qualifying investment made on or after 1 January 2013 (subject to enactment in the 2013 Finance Act). One AIA is available to each individual business or corporate group.

A 100% first-year allowance rate applies to expenditure before 1 April 2013 on electric cars and cars with CO₂ emissions of less than 110g/km. Cars emitting no more than 160g/km are added to the main pool, and the 18% rate applies. Cars emitting above 160g/km are added to the special-rate pool, and the 8% rate applies. For leased cars with CO₂ emissions above 160g/km, 15% of the lease cost is disallowed for tax purposes. Effective from 1 April 2013, the 110 g/km threshold is reduced to 95 g/km for two years, and the 160 g/km threshold is reduced to 130 g/km. The 100% first-year allowance rate will not apply to cars that will be leased.

Energy-saving assets. A 100% first-year allowance is available to businesses for expenditure on gas-refueling infrastructure, water technologies and energy-saving technologies. Lists of qualifying technologies are reviewed regularly. Companies may surrender losses derived from these enhanced capital allowances in return for a cash payment.

Renovation of business premises in disadvantaged areas. A first-year allowance of 100% is available for individuals and companies engaged in certain businesses in designated Enterprise Zones or other assisted areas (such as Northern Ireland) that incur expenditure on plant and machinery between 1 April 2012 and 31 March 2017.

Industrial and agricultural buildings. Allowances for industrial buildings and agricultural buildings were fully withdrawn on 1 April 2011.

Other. Capital allowances are usually subject to recapture on the disposal of an asset on which capital allowances have been claimed. Capital allowances are also available for expenditure on mineral extraction and hotels.

Relief for trading losses. Trading losses may be used to relieve other income and capital gains of the year in which the loss was incurred and of the preceding year, provided the same trade was then carried on. Losses may also be carried forward, without time limit, for relief against future profits from the same trade. A trading loss in one company may be offset against profits (including capital gains) for the same period of another company within a 75%-owned group of companies (as defined). A company that ceases trading may carry back trading losses and offset them against profits of the preceding 36 months.

Groups of companies. U.K. law does not provide for tax consolidation. However, a trading loss incurred by one company within a 75%-owned group of companies may be grouped with profits for the same period realized by another member of the group. Similar provisions apply in a consortium situation to allow a transfer of a proportion of the losses; for this purpose, a U.K. resident company is owned by a consortium if 75% or more of its ordinary share capital is owned by other companies, none of which individually
has a holding of less than 5%. However, the consortium-owned company must not be a 75%-owned subsidiary of any company. In both situations, antiavoidance provisions that aim to prevent artificial arrangements exist.

Capital losses cannot be grouped with capital gains of other group members under the above provisions. However, the seller of an asset and another group company may jointly elect to transfer a capital gain or allowable loss to enable offset of capital gains and capital losses. A transferred capital loss can be carried forward in the transferee company.

In a 75%-worldwide group, the transfer of assets between group companies does not result in a capital gain if the companies involved are subject to U.K. corporation tax. This rule applies regardless of the residence status of the companies or their shareholders. The transferee company assumes the transferor’s original cost of the asset plus subsequent qualifying expenditure and indexation. However, under an antiavoidance provision, if the transferee company leaves the group within six years after the date of the transfer of the asset, that company is deemed to have disposed of and reacquired the asset at its market value immediately after the transfer. In certain circumstances, the chargeable gain or allowable loss that arises is added to the proceeds from the share sale causing the company to leave the group (and can potentially be covered by SSE). Alternatively, the gain or loss remains in the company itself, but the gain or loss can be transferred by election to another company in the group. Antiavoidance provisions that aim to prevent artificial arrangements exist.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>

Nature of tax | Rate (%)
--- | ---
Acquisitions by companies and certain other bodies | 15
Nonresidential or mixed-use property
Up to £150,000 (provided that annual rent is less than £1,000; otherwise a charge is payable) | 0
£150,001 to £250,000 | 1
£250,001 to £500,000 | 3
More than £500,000 | 4
Social security contributions, on employees’ salaries and wages; payable on weekly wages by Employer; imposed on employees’ weekly wages exceeding £144 (£148 from 1 April 2013) | 13.8
Employee; imposed on employees’ weekly wages
On first £146 (£149 from 1 April 2013) | 0
On next £671 (£648 from 1 April 2013) | 12
On balance of weekly wage | 2
Bank levy; based on the total chargeable equity and liabilities (subject to various exclusions) as reported in relevant balance sheets at the end of a chargeable period; a half-rate applies to long-term amounts and a nil rate allowance is granted for the first £20 million | 0.130/0.065

E. Miscellaneous matters

Foreign-exchange controls. Foreign-exchange regulations were suspended in 1979 and subsequently abolished. No restrictions are imposed on inward or outward investments. The transfer of profits and dividends, loan principal and interest, royalties and fees is unlimited. Nonresidents may repatriate capital, together with any accrued capital gains or retained earnings, at any time, subject to company law or tax considerations.

Antiavoidance legislation. The U.K. tax law contains several antiavoidance provisions, which include the substitution of an arm’s length price for intercompany transactions (including intercompany debt) with U.K. or foreign affiliates, the levy of an exit charge on companies transferring a trade or their tax residence from the United Kingdom and the recharacterization of income for certain transactions in securities and real property. Some of these antiavoidance provisions apply only if the transaction is not carried out for bona fide commercial reasons. Specific antiarbitrage provisions applying to both deductions and receipts may be relevant to cross-border transactions.

In certain situations, legislation provides a facility for an advance clearance to be obtained from HMRC. If legislation does not provide this facility, a nonstatutory clearance facility exists under which companies may apply to HMRC in advance of a transaction for a written confirmation of HMRC’s view on how the tax law will apply to that transaction. HMRC undertakes to provide advance clearance within 28 days if evidence exists that the transaction is genuinely contemplated. It also aims to respond within this time period if certainty is sought for a transaction that has already taken place. HMRC does not provide clearance if it believes that the arrangements are primarily intended to obtain a tax advantage.
The United Kingdom has implemented a system requiring the disclosure of certain transactions and arrangements to HMRC. As a direct result of this disclosure regime, tax-planning schemes are frequently disclosed in advance to HMRC.

A new general antiabuse rule (GAAR) is proposed to come into force on the date on which the 2013 Finance Act is enacted. The proposed GAAR aims to tackle artificial and abusive tax-avoidance schemes and is intended to apply to the main taxes but not value-added tax.

**Transfer pricing.** U.K. tax law contains measures that substitute an arm’s length price for certain intercompany transactions with U.K. or foreign affiliates. Companies are required to prepare their tax returns in accordance with the arm’s length principle, and retain adequate records or other documentation to support their compliance with such principle, or otherwise suffer substantial penalties. These rules have other far-reaching consequences, and taxpayers should seek specific advice concerning their circumstances.

If both parties to a transaction are subject to U.K. corporation tax, and one is required to increase its taxable profits in accordance with the arm’s length principle, the other is usually allowed to decrease its taxable profits through a corresponding adjustment. Companies that were dormant as of 31 March 2004 and remain dormant are exempt from the transfer-pricing rules. Although small and medium-sized companies (unless they elect otherwise) are exempt from the rules with respect to transactions with persons in qualifying territories (broadly, the United Kingdom and those countries with which the United Kingdom has entered into a double tax treaty containing a nondiscrimination article), they can be subject to the issuance of a transfer pricing notice by HMRC. However, for small companies, this notice can be issued only if the company has undertaken a non-arm’s length transaction with an affiliate that is taken into account in determining profits under the Patent Box regime (see **Patent Box**).

Persons that are otherwise independent but collectively control a business and have acted together with respect to the financing arrangements for the business are also subject to the U.K. transfer-pricing regime.

**Interest restrictions.** The U.K.’s transfer-pricing measures apply to the provision of finance (as well as to trading income and expenses). As a result, companies must self-assess their tax liability on financing transactions using the arm’s length principle. Consequently, HMRC may challenge interest deductions on the grounds that, based on all of the circumstances, the loan would not have been made at all or that the amount loaned or the interest rate would have been less, if the lender was an unrelated third party acting at arm’s length.

**Worldwide Debt Cap.** The Worldwide Debt Cap (WWDC) is a cap on allowable interest deductions in addition to thin-capitalization restrictions and other antiavoidance provisions. The WWDC provisions are designed to restrict the U.K. tax deduction available for financing expenses of large groups based on the gross financing expense of the worldwide group. The WWDC legislation applies to accounting periods beginning on or after 1 January 2010.
The WWDC provisions include a gateway test. If the gateway test is satisfied, the U.K. group falls outside of the remaining provisions. Under the gateway test, broadly, the WWDC applies only if a group’s U.K. net debt exceeds 75% of the worldwide gross debt. If the WWDC applies and if the tested expense amount exceeds the available amount, the excess amount is disallowed. Broadly, the tested expense amount is the aggregate net finance expense of all U.K. group companies that have a net finance expense above £500,000, and the available amount is the group’s external worldwide finance expense which is taken from the consolidated financial statements. If a disallowance arises, some interest income may be exempted from U.K. tax. The amount of the exempted income is limited to the lower of the aggregate net finance income of all U.K. group companies (above £500,000) and the total disallowed amount.

**Controlled foreign companies.** The controlled foreign company (CFC) regime was significantly revised in 2012, effective for accounting periods beginning on or after 1 January 2013. The regime applies to non-U.K. resident companies that are controlled by U.K. residents. It also applies to non-U.K. branches of U.K. resident companies for which an exemption election has been made.

The regime is similar to the prior regime in that, if a CFC has profits that do not meet any of the exemptions, those profits are taxed on any U.K. resident companies having a 25% or more interest in the CFC. However, the new regime is much more focused on identifying artificial movements of profits out of the United Kingdom.

The new regime has an initial “gateway” test that eliminates certain companies from the scope of a CFC charge, and it is possible to seek a clearance from HMRC as to whether a particular company meets this gateway. The gateway test eliminates companies if any of the following four conditions is met:

- The CFC’s purpose is not mainly to achieve a U.K. tax advantage.
- The management and control of the CFC’s “risks and assets” is not carried out in the United Kingdom, other than through a U.K. permanent establishment of the CFC.
- The CFC can carry out its activities independently of the United Kingdom.
- The CFC has only property business and/or nontrading finance profits.

If none of these conditions are met, the more detailed provisions of the CFC regime need to be considered.

Profits arising from lending activities may be subject to a CFC charge if they derive from U.K. activity or capital investment from the United Kingdom. However, a full or partial exemption may be available for profits derived from lending to other CFCs within the group. The full exemption is available in limited circumstances if the loan is funded out of existing resources, but the partial exemption may be more widely available and can effectively exempt 75% of the profits from U.K. taxation.

Special rules apply to banks, financial traders and insurance companies.
Further exemptions apply if any of the following circumstances exist:

- The CFC’s local tax liability is 75% or more of the equivalent U.K. liability.
- The CFC has low profits or a low profit margin.
- The CFC is resident in certain qualifying territories.
- A foreign company has become a CFC for the first time.

If the CFC does not qualify for any of the exemptions, a CFC charge arises to the extent that profits from any assets or risks of the CFC are attributable principally to Significant People Functions (SPFs) in the United Kingdom, based on the profit that would arise in a hypothetical U.K. permanent establishment containing those assets or risks. That profit itself is subject to further exclusions if any of the following circumstances exist:

- The CFC has business premises in its local territory, its business does not principally relate to the United Kingdom, and its profits from intellectual property (if any) are not significantly based on intellectual property transferred from the United Kingdom.
- Over 20% of the value to the group from holding that asset or risk in the CFC relates to a purpose other than the tax saving.
- The function performed by the U.K. SPF could have been performed by an independent party.

The new regime is complex, and the assistance of specialists is required to determine the extent to which profits arising outside the United Kingdom are subject to a charge in the United Kingdom under these rules.

**Patent Box.** The Patent Box regime was introduced in 2012, and is effective for accounting periods beginning on or after 1 April 2013. The regime taxes qualifying income relating to patents and certain other intellectual property at a rate of 10%, but this rate is being phased in over five years.

The Patent Box regime can apply to patents granted by U.K. and European patent offices and certain other patent offices in the European Economic Area, as well as to patent applications that cannot be published for reasons of national security or public safety. Other innovative intellectual property found in the medical, veterinary and agriculture industries is also included, such as regulatory data, marketing exclusivity, supplementary protection certificates and plant variety rights.

The 10% effective tax rate is achieved by creating an additional deduction from taxable profits and applies to all income arising from the patents, including royalties and income from the sale of the patent. Significantly, it also applies to income from the sale of products with embedded patents. Accordingly, for example, income from the sale of cars manufactured with a combination of patented and unpatented components can qualify in full. The Patent Box regime is therefore potentially of very wide application.

**Dual-resident companies.** A dual-resident company that is not a trading company loses the right to surrender its losses to fellow group members and is prevented from enjoying certain other reliefs. These rules effectively prevent such dual-resident companies from obtaining a double deduction for interest costs in both countries of residence.
Impact of decisions of the Court of Justice of the European Union.

The U.K. tax system is currently subject to significant external influence in the form of binding decisions rendered by the Court of Justice of the European Union (CJEU). These decisions have held that many U.K. domestic tax measures are contrary to European Fundamental Freedoms. The ECJ judgments in *Marks & Spencer v Halsey, Test Claimants in the Franked Investment Income Group Litigation* and *Cadbury Schweppes* significantly influence international tax planning in the United Kingdom. The recent *Philips Electronics UK Limited* case has similar potential, because it comments on the ability to surrender losses between two U.K. companies.

At this stage, it is impossible to definitively reach a conclusion on the ultimate impact of the CJEU decisions, because, among other reasons, the cases are likely to continue for years. A CJEU decision does not necessarily lead to law changes in the United Kingdom, but new U.K. legislation was enacted as a result of the *Marks & Spencer* and *Cadbury Schweppes* cases, and further changes may arise from the *Philips Electronics* case. Because these cases and several other cases have held that some fundamental aspects of the U.K. domestic law are contrary to EC law, it is possible that CJEU decisions will lead to further changes in the U.K. tax system in the future.

### F. Treaty withholding tax rates

The rates in the following table reflect the lower of the treaty rate and the rate under domestic tax law. The table is for general guidance only.

</table>

(a) Under U.K. domestic law, withholding tax is not imposed on dividends. As explained in Section B, under existing law, a U.K. resident individual receiving a dividend obtains a tax credit of 10/90 of the dividend; this satisfies his or her basic rate income tax liability on the grossed up amount. The United Kingdom’s double tax treaties fall into the following four general categories concerning dividends:

1. Treaties that give no tax credit to companies resident in the other state possessing more than a portfolio holding of the company paying the dividend (usually more than 10% of the voting power), but give a full credit to other shareholders resident in the other state, subject to a reduction based on the total of the dividend and the tax credit.

2. Treaties that give no tax credit to residents of the other state.
(3) Treaties that give no tax credit to corporations, but give a full credit to other shareholders resident in the other state, subject to a reduction of 15% of the total of the dividend and the tax credit.

(4) Treaties that give the following to residents of the other state:
   (i) A half tax credit to companies possessing 10% or more of the voting power of the company paying the dividend, subject to a reduction of 5% of the total of the dividend and credit.
   (ii) A full credit to other shareholders, subject to a reduction of 15% (20% for Belgium) of the total of the dividend and the tax credit. However, effective from 6 April 1999, the tax credit available to shareholders resident in the other state is eliminated. This results from the reduction of the tax credit available to U.K. shareholders to 10/90.

(b) Under a European Union (EU) directive, payments of interest and royalties made between, broadly, associated companies resident in EU member states are exempt from withholding tax. Numerous conditions and transitional rules apply, including some that delay the application of the rules for several years.

(c) Antiavoidance provisions restrict the tax credit repayment or other treaty benefits in certain circumstances.

(d) No withholding tax is imposed on royalties paid for copyrights of literary, dramatic, musical or artistic works (except motion pictures, films, videotapes and certain other items), payments for patents or commercial or industrial experience or payments for the use of computer software.

(e) See Section B.

(f) The lower rate applies to interest paid with respect to the following: loans from banks and insurance companies; securities quoted on a stock exchange; and certain sales of machinery and equipment.

(g) The higher rate applies to cinematographic royalties.

(h) The higher rate applies to industrial royalties.

(i) The lower rate applies to payments for the use of, or right to use, industrial, commercial or scientific equipment. The higher rate applies to other royalties.

(j) The lower rate applies to payments for the use of industrial, commercial or scientific equipment. The higher rate applies to other royalties.

(k) The 5% rate applies to royalties for patents, trademarks or processes as well as to royalties for know-how concerning industrial, commercial or scientific experience. The 7% rate applies to royalties for copyrights of literary, artistic or scientific works.

(l) The standard rate of withholding tax on interest is 12%. Interest is exempt from withholding tax if any of the following apply:
   • The state is the payer of the interest.
   • The interest is paid on a loan made, guaranteed or insured by the other contracting state.
   • The interest is paid on a loan granted by a bank to an unrelated party at preferential rates and the loan is repayable over a period of not less than five years.
   • The interest is paid on a debt resulting from either of the following:
     — Sales on credit of industrial, commercial or scientific equipment by a resident of the other contracting state (excluding sales between related persons).
     — Purchases of industrial, commercial or scientific equipment financed through a leasing contract.

(m) The 3% rate applies to royalties for the right to use news. The 5% rate applies to royalties for copyrights of artistic works. The 10% rate applies to royalties for patents or payments for industrial experience, including the rendering of technical assistance. The 15% rate applies to other royalties.

(n) The lower rate applies to copyright royalties.

(o) The lower rate (the 7% rate under the Mongolia treaty and the 10% rate under the India and Thailand treaties) applies to interest paid to banks and other financial institutions.

(p) The higher rate applies if the recipient is a Malawi company that controls more than 50% of the voting power in the U.K. company that makes the payment.

(q) The lower rate applies to interest on listed bonds.

(r) The higher rate applies to cinematographic, television and radio broadcasting royalties and is capped by the nontreaty rate.

(s) The applicability to Montenegro of the treaty entered into with Serbia and Montenegro is uncertain. Montenegro has stated it will honor the treaty, but the United Kingdom has not yet confirmed the application of the treaty to Montenegro.

(t) The 5% rate applies to patent royalties and motion picture royalties.

(u) In the United Kingdom, this treaty is generally effective from 6 April 2012, but for withholding tax purposes, it is effective from 1 January 2013.
The lower rate applies to the right to use industrial, commercial or scientific equipment.

The lower rate applies to copyright royalties. The higher treaty rate applies to all other royalties payable with respect to rights granted after the signing of the double tax treaty.

The United Kingdom has also entered into tax treaties with Algeria, Brazil, British Virgin Islands, Cameroon, Congo (Democratic Republic of), Iran and Lebanon. These treaties do not have articles covering dividends, interest or royalties. Payments to these countries are subject to withholding tax at the nontreaty countries’ rates set forth in the above table.

The United Kingdom has signed a tax treaty with Ethiopia and amendments and protocols or treaties with China and India, but these are not yet in force.

A. At a glance

Corporate Income Tax Rate (%) 35 (a)
Corporate Capital Gains Tax Rate (%) 35
Branch Tax Rate (%) 35 (a)
Withholding Tax (%) (b)
Dividends 30 (c)
Interest 30 (c)(d)
Royalties from Patents, Know-how, etc. 30 (c)
Branch Remittance Tax 30 (e)
Net Operating Losses (Years)
Carryback 2 (f)
Carryforward 20 (f)

(a) In addition, many states levy income or capital-based taxes. An alternative minimum tax is imposed (see Section B).
(b) Rates may be reduced by treaty.
(c) Applicable to payments to nonresidents.
(d) Interest on certain “portfolio debt” obligations issued after 18 July 1984 and noneffectively connected bank deposit interest are exempt from withholding tax.
(e) This is the branch profits tax (see Section D).
(f) Special rules apply to certain types of losses and entities. For details, see Section C.

B. Taxes on corporate income and gains

Corporate income tax. U.S. corporations are subject to federal taxes on their worldwide income, including income of foreign branches (whether or not the profits are repatriated). In general, a U.S. corporation is not taxed by the United States on the earnings of a foreign subsidiary until the subsidiary distributes dividends or is sold or liquidated. Numerous exceptions to this deferral concept may apply, resulting in current U.S. taxation of some or all of the foreign subsidiary’s earnings.

Foreign corporations generally are taxable in the United States on income that is effectively connected with a U.S. trade or business and on certain U.S.-source income. However, if the foreign corporation is resident in a country having an income tax treaty with the United States, business profits are taxable by the United States only to the extent the income is attributable to a permanent establishment in the United States and rates of tax on certain U.S.-source income are reduced or eliminated.

Rates of corporate tax. A corporation’s taxable income exceeding $75,000 but not exceeding $10 million is taxed at 34%. Corporations with taxable income between $335,000 and $10 million are effectively taxed at 34% on all taxable income (including the first $75,000). Corporations with taxable income of less than $335,000...
receive partial benefit from the graduated rates of 15% and 25% that apply to the first $75,000 of taxable income. A corporation’s taxable income exceeding $15 million but not exceeding $18,333,333 is subject to an additional tax of 3%. Corporations with taxable income in excess of $18,333,333 are effectively subject to tax at a rate of 35% on all taxable income. These rates apply both to U.S. corporations and to the income of foreign corporations that is effectively connected with a U.S. trade or business.

Alternative minimum tax. The alternative minimum tax (AMT) is designed to prevent corporations with substantial economic income from using preferential deductions, exclusions and credits to substantially reduce or eliminate their tax liability. To achieve this goal, the AMT is structured as a separate tax system with its own allowable deductions and credit limitations. The tax is imposed at a flat rate of 20% on alternative minimum taxable income (AMTI). It is an “alternative” tax because corporations are required to pay the higher of the regular tax or AMT. To the extent the AMT exceeds regular tax, a minimum tax credit is generated and carried forward to offset the taxpayer’s regular tax to the extent it exceeds the AMT in future years.

In general, AMTI is computed by making adjustments to regular taxable income and then adding back certain nondeductible tax preference items. The required adjustments are intended to convert preferential deductions allowed for regular tax (for example, accelerated depreciation) into less favorable alternative deductions that are allowable under the parallel AMT system. In addition, an adjustment based on “adjusted current earnings” can increase or decrease AMTI. Net operating losses may reduce AMT by up to 90% (subject to modifications; see Section C), compared to a potential reduction of 100% for regular tax purposes. Foreign tax credits may reduce AMT by up to 100%.

An AMT exemption applies to small business corporations that meet certain income requirements.

Capital gains and losses. Capital gains are taxed at a maximum rate of 35%. In general, capital losses may offset only capital gains, not ordinary income. Subject to certain restrictions, a corporation’s excess capital loss may be carried back three years and forward five years to offset capital gains in such other years.

Administration. The annual tax return is due by the 15th day of the third month after the close of the company’s fiscal year. A corporation is entitled, upon request, to an automatic six-month extension to file its return. In general, 100% of a corporation’s tax liability must be paid through quarterly estimated tax installments during the year in which the income is earned. The estimated tax payments are due on the 15th day of the fourth, sixth, ninth and twelfth months of the company’s fiscal year. The Tax Increase Prevention and Reconciliation Act of 2005 (the Act) increased the corporate estimated tax payments due for July, August, and September 2012 and 2013 for certain large corporations. Under the Act, for corporations with assets of at least $1 billion, the payments due in July, August and September 2013 will be increased to 100.75% of the payment otherwise due, and the next required payment will be reduced accordingly.
**Foreign tax relief.** A tax credit is allowed for foreign income taxes paid, or deemed paid, by U.S. corporations, but the credit is generally limited to the amount of U.S. tax incurred on the foreign-source portion of a company’s worldwide taxable income. For tax years beginning on or after 1 January 2007, separate limitations must be calculated for passive income and for “general” category income (most types of active business income).

**C. Determination of taxable income**

**General.** Income for tax purposes is generally computed according to generally accepted accounting principles, as adjusted for certain statutory tax provisions. Consequently, taxable income typically does not equal income for financial reporting purposes.

In general, a deduction is permitted for ordinary and necessary trade or business expenses. However, expenditures that create an asset having a useful life longer than one year may need to be capitalized and recovered ratably.

**Depreciation.** A depreciation deduction is available for most property (except land) used in a trade or business or held for the production of income, such as rental property. Tangible depreciable property that is used in the United States (whether new or used) and placed in service after 1980 and before 1987 is generally depreciated on an accelerated basis (ACRS). Tangible depreciable property that is used in the United States and placed in service after 1986 is generally depreciated under a modified ACRS basis. In general, under the modified ACRS system, assets are grouped into six classes of personal property and into two classes of real property. Each class is assigned a recovery period and a depreciation method. The following are the depreciation methods and recovery periods for certain assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Depreciation method</th>
<th>Recovery period (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial and industrial buildings</td>
<td>Straight-line</td>
<td>39 (a)</td>
</tr>
<tr>
<td>Office equipment</td>
<td>Double-declining balance or straight-line</td>
<td>7 or 12</td>
</tr>
<tr>
<td>Motor vehicles and computer equipment</td>
<td>Double-declining balance or straight-line</td>
<td>5 or 12</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>Double-declining balance or straight-line</td>
<td>7 or 12 (b)</td>
</tr>
</tbody>
</table>

(a) 31.5 years if placed in service before 13 May 1993.
(b) These are generally the recovery periods.

Alternatively, a taxpayer may elect to use the straight-line method of depreciation over specified longer recovery periods or the methods prescribed for AMT purposes, which would avoid a depreciation adjustment for AMT.

The cost of intangible assets developed by a taxpayer may be amortized over the determinable useful life of an asset. Certain intangible assets, including goodwill, going concern value, patents and copyrights, may generally be amortized over 15 years if they are
acquired as part of a business after 10 August 1993. A taxpayer may elect to apply this provision to all property acquired after 25 July 1991.

Tax depreciation is generally subject to recapture on the sale of an asset to the extent the sales proceeds exceed the tax value after depreciation. The amounts recaptured are subject to tax as ordinary income.

The American Taxpayer Relief Act of 2012 extended by one year the availability of an additional first-year depreciation deduction equal to 50% of the adjusted basis of qualified property. Qualified property acquired and placed in service before 1 January 2014 (or 1 January 2015, for long-production-period property and certain aircraft) qualifies for the additional first-year depreciation deduction.

Net operating losses. If allowable deductions of a U.S. corporation or branch of a foreign corporation exceed its gross income, the excess is called a net operating loss (NOL). In general, NOLs may be carried back 2 years and forward 20 years to offset taxable income in those years. A specified liability loss (product liability loss) may be carried back 10 years. Commercial banks may carry back bad debt losses 10 years and carry forward such losses 5 years. A real estate investment trust (REIT) may not carry back an NOL to a tax year in which the entity operated as a REIT. Farming business losses may be carried back five years. Limitations apply in utilizing NOLs of acquired operations.

The American Reinvestment and Recovery Act of 2009 and the Worker, Homeownership, and Business Assistance Act of 2009, extended the carryback period from two years to up to five years for most companies for certain 2008 or 2009 net operating losses. Special rules apply with respect to the 90% NOL limitation for AMT purposes, for life insurance companies and for certain “eligible small businesses.”

Inventories. Inventory is generally valued for tax purposes at either cost or the lower of cost or market value. In determining the cost of goods sold, the two most common inventory flow assumptions used are last-in, first-out (LIFO) and first-in, first-out (FIFO). The method chosen must be applied consistently. Uniform capitalization rules require the inclusion in inventory costs of many expenses previously deductible as period costs.

Dividends. In general, dividends received from other U.S. corporations qualify for a 70% dividends-received deduction, subject to certain limitations. The dividends-received deduction is generally increased to 80% of the dividend if the recipient corporation owns at least 20% of the distributing corporation. Dividend payments between members of an affiliated group of U.S. corporations qualify for a 100% dividends-received deduction. In general, an affiliated group consists of a U.S. parent corporation and all other U.S. corporations in which the parent owns, directly or indirectly through one or more chains, at least 80% of the total voting power and value of all classes of shares (excluding nonvoting preferred shares).

Consolidated returns. An affiliated group of U.S. corporations (as described in Dividends) may elect to determine its taxable income
and tax liability on a consolidated basis. The consolidated return provisions generally allow electing corporations to report aggregate group income and deductions in accordance with the requirements for financial consolidations. Consequently, the net operating losses of some members of the group can be used to offset the taxable income of other members of the group, and transactions between group members, such as intercompany sales and dividends, are generally deferred or eliminated until there is a transaction outside the group. Under certain circumstances, losses incurred on the sale of consolidated subsidiaries are disallowed.

**Foreign subsidiaries.** Under certain circumstances, undistributed income of a foreign subsidiary controlled by U.S. shareholders is taxed to the U.S. shareholders on a current basis, as if the foreign subsidiary distributed a dividend on the last day of its taxable year. This may result if the foreign subsidiary invests its earnings in “U.S. property” (including loans to U.S. shareholders) or earns certain types of income (referred to as “Subpart F” income), including certain passive income and “tainted” business income.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Branch profits tax, on branch profits</td>
<td>30%</td>
</tr>
<tr>
<td>(reduced by reinvested profits and increased by withdrawals of previously reinvested earnings); the rate may be reduced by treaty</td>
<td>30%</td>
</tr>
<tr>
<td>Branch interest tax, on interest expense paid by a branch (unless the interest would be exempt from withholding tax if paid by a U.S. corporation); the rate may be reduced by treaty</td>
<td>30%</td>
</tr>
<tr>
<td>Personal holding company (PHC) tax, applies to a corporation that satisfies a passive-income test; in addition to regular tax or AMT; imposed on undistributed income</td>
<td>15%</td>
</tr>
<tr>
<td>Accumulated earnings tax; penalty tax levied on a corporation (excluding a PHC) accumulating profits to avoid shareholder-level personal income tax; assessed on accumulated taxable income exceeding a calculated amount (at least $250,000 or $150,000 for certain personal services corporations)</td>
<td>15%</td>
</tr>
<tr>
<td>State and local income taxes, imposed by most states and some local governments</td>
<td>0% to 13%</td>
</tr>
<tr>
<td>State and local sales taxes, imposed by many states and some local governments</td>

</tr>
<tr>
<td>Payroll taxes</td>
<td></td>
</tr>
<tr>
<td>Federal unemployment insurance (FUTA); imposed on first $7,000 of wages</td>
<td>6.0% and 0.6% (assuming full credit of 5.4%)</td>
</tr>
<tr>
<td>Workmen’s compensation insurance; provisions varying according to state laws; rates vary depending on nature of employees’ activities</td>
<td>Various</td>
</tr>
</tbody>
</table>
Nature of tax

Social security contributions (including 1.45% Medicare tax); imposed on
Wages up to $113,700 (for 2013); paid by
Employer 7.65%
Employee 7.65%
Wages in excess of $113,700 (for 2013; Medicare tax); paid by
Employer 1.45%
Employee 1.45%
(Effective from 1 January 2013, an additional Medicare tax of 0.9% applies to wages, tips, other compensation and self-employment income in excess of $200,000 for taxpayers who file as single or head of household. For married taxpayers filing jointly and surviving spouses, the additional 0.9% Medicare tax applies to the couple’s combined wages in excess of $250,000. The additional tax applies only to the amount owed by the employee; the employer does not pay the additional tax.)

E. Miscellaneous matters

Foreign-exchange controls. The United States currently has no foreign-exchange control restrictions.

Debt-to-equity rules. The United States has thin-capitalization principles under which the Internal Revenue Service (IRS) may attempt to limit the deduction for interest expense if a U.S. corporation is thinly capitalized. In such case, funds loaned to it by a related party may be recharacterized by the IRS as equity. As a result, the corporation’s deduction for interest expense may be disallowed, and principal and interest payments may be considered distributions to the related party and be subject to withholding tax as distributions.

Although the United States has no fixed rules for determining whether a thin-capitalization situation exists, a facts and circumstances test may be applied based on U.S. case law. A deduction is disallowed for certain “disqualified” interest paid on loans made or guaranteed by related foreign parties that are not subject to U.S. tax on the interest received. This disallowed interest may be carried forward to future years and allowed as a deduction. No interest deduction is disallowed under this provision if the payer corporation’s debt-to-equity ratio does not exceed 1.5:1. If the debt-to-equity ratio exceeds this amount, the deduction of disqualified interest is deferred to the extent of any “excess interest expense.” “Excess interest expense” is defined as the excess of interest expense over interest income, minus 50% of the adjusted taxable income of the corporation plus any “excess limitation carryforward.” Special rules apply to corporate partners in partnerships for purposes of determining disallowances.

In addition, under U.S. Treasury regulations, interest expense accrued on a loan from a related foreign lender must be actually paid before the U.S. borrower can deduct the interest expense.
Transfer pricing. In general, the IRS may redetermine the tax liability of related parties if, in its discretion, this is necessary to prevent the evasion of taxes or to clearly reflect income. Specific regulations require that related taxpayers (including U.S. persons and their foreign affiliates) deal among themselves on an arm’s length basis. Under the best-method rule included in the transferpricing regulations, the best transfer-pricing method is determined based on the facts and circumstances. Transfer-pricing methods that may be acceptable, depending on the circumstances, include uncontrolled price, resale price and profit-split. It is possible to reach transfer-pricing agreements in advance with the IRS.

If the IRS adjusts a taxpayer’s tax liability, tax treaties between the U.S. and other countries usually provide procedures for allocation of adjustments between related parties in the two countries to avoid double tax.

Uncertain tax positions. In 2010, the IRS issued new rules requiring certain corporate taxpayers to file Schedule UTP (Uncertain Tax Position Statement) with their U.S. federal income tax return. Schedule UTP asks for information about uncertain tax positions “that affect the U.S. federal income tax liabilities of certain corporations that issue or are included in audited financial statements…” Corporations with total assets of $100 million or more were required to file Schedule UTP beginning with the 2010 tax year. However, corporations with total assets of $50 million or more are now required to file Schedule UTP beginning with the 2012 tax year. Corporations with assets of $10 million or more will be required to file Schedule UTP beginning with the 2014 tax year.

F. Securities and Exchange Commission regulatory matters

Accounting for income taxes. Income tax accounting matters continue to receive a great deal of attention in the United States and globally. Accounting for income taxes remains a subject of focus for both standard setters and regulators. The U.S. Securities and Exchange Commission (SEC) staff continues to question registrants with respect to U.S. generally accepted accounting principles (GAAP) financial statement disclosures related to income taxes. Representatives of the SEC have specifically expressed concern about the transparency of the effect of foreign earnings on the effective tax rate and the effect on consolidated liquidity when a registrant intends to indefinitely reinvest foreign earnings. In addition, the SEC staff has noted that registrants should continually assess the negative and positive evidence in determining whether to record, maintain or reverse a valuation allowance. When determining the weight to place on each piece of evidence, registrants should consider the extent to which the evidence can be objectively verified.

International Financial Reporting Standards. At the American Institute of Certified Public Accountants (AICPA) National Conference in December 2012 on current SEC and Public Company Accounting Oversight Board (PCAOB) developments, the SEC stated that it is continuing to evaluate whether further analysis is necessary relative to whether to incorporate International Financial Reporting Standards (IFRS) into the U.S. financial reporting system, and if it is decided that they should be incorporated, when
and how this will be accomplished. SEC officials at the conference advised stakeholders to stay tuned, but did not indicate that a decision would be made any time soon. Speakers from both the SEC and the Financial Accounting Standards Board (FASB) discussed the importance of the United States setting its own accounting standards while continuing to work with the International Accounting Standards Board (IASB) to improve comparability and narrow differences in the standards.

G. Treaty withholding tax rates

The following are U.S. withholding tax rates for dividends, interest and royalties paid from the United States to residents of various treaty countries.

Various exceptions (for example, for governmental entities and REITs) or conditions may apply (for example, a limitation-on-benefits provision), depending upon the terms of the particular treaty.

(a) The 0% rate applies if dividends are paid by an 80%-owned U.S. corporation to its parent company (80% ownership must be for at least a 12-month period ending on the date the dividend is declared or the entitlement is determined) and if certain other conditions are met. The 5% rate applies to dividends paid to a company that directly owns at least 10% of the voting power (or share capital, if applicable) of the payer. The 15% rate applies to other dividends.

(b) The 10% rate applies to all interest payments with the following exceptions:
- Interest derived by the government of a contracting state
- Interest derived by certain financial institutions

(c) The withholding rate is reduced to 5% (10% in the case of Bangladesh, Indonesia, Jamaica, Korea (South), Morocco, Spain, Thailand and Trinidad and Tobago; 12.5% in the case of Israel; 14% in the case of Tunisia; 15% in the case of India, Pakistan and Turkey; and 20% in the case of the Philippines) if, among other conditions, the recipient is a corporation owning a specified percentage of the voting power of the distributing corporation.

(d) The 5% rate applies to interest paid to banks or financial institutions and interest related to the sale on credit of industrial, commercial or scientific equipment or of merchandise.

(e) The 0% rate applies to royalties for cultural works as well as to payments for the use of, or the right to use, computer software, patents and information concerning industrial, commercial and scientific experience.

(f) The 0% rate applies to royalties paid for copyrights. The 10% rate applies to royalties paid for patents, trademarks, and industrial, commercial or scientific equipment or information.

(g) The 5% rate applies to royalties paid for the use of commercial, industrial or scientific equipment.

(h) The 0% rate applies to royalties paid for copyrights of literary, artistic or scientific works, cinematographic films, sound or picture recordings, or software.

(i) The exemption does not apply if the recipient controls directly or indirectly more than 50% of the voting power in the paying corporation.

(j) The United States and Hungary have signed a new income tax treaty, which will enter into force on the exchange of the instruments of ratification. This treaty generally retains the rates of the old treaty and includes a new limitation-on-benefits provision.
The treaty provides for a general exemption from withholding tax on royalties. A 5% withholding tax rate applies to royalties for trademarks and motion pictures.

The 10% rate applies to interest paid on loans granted by banks carrying on bona fide banking business and similar financial institutions.

The 10% rate generally applies to royalties for the use of industrial, commercial or scientific equipment.

The 10% rate applies to interest on bank loans. The 17.5% rate applies to other interest.

The 10% rate applies to copyright and film royalties.

The exemption applies to the following:

- Interest paid to qualified governmental entities, provided the entity owns, directly or indirectly, less than 25% of the payer of the interest
- Interest paid with respect to debt guaranteed or insured by a qualified governmental entity
- Interest paid or accrued with respect to the sale of goods, merchandise or services
- Interest paid or accrued on a sale of industrial, commercial, or scientific equipment

The 0% rate applies to royalties paid for the use of certain copyright materials. The 5% rate applies to royalties paid for the use of computer software and industrial, commercial or scientific equipment. The 8% rate applies in all other cases.

The 10% rate applies to royalties paid for copyrights or rights to produce or reproduce literary, dramatic, musical, or artistic works and to royalties paid for motion picture films.

The rate is 0% for dividends paid by a company resident in Luxembourg if the beneficial owner of the dividends is a company that is a resident of the United States and if, during an uninterrupted period of two years preceding the date of payment of the dividends, the beneficial owner of the dividends has held directly at least 25% of the voting shares of the payer.

The 4.95% rate applies to interest paid on loans made by financial institutions and insurance companies. The 10% rate applies to other interest.

The 0% rate applies to the following dividends:

- Dividends paid to certain recipients that own at least 80% of the voting shares of the payer of the dividends
- Dividends paid to certain pension plans

The 5% rate applies if the conditions for the 0% rate are not met and if the recipient owns at least 10% of the payer of the dividends. The 10% rate applies if the 10% ownership threshold is not met. A protocol to the treaty provides an exemption from the 5% “dividend equivalent amount” tax if certain conditions are met (the conditions are similar to those that apply with respect to the 0% withholding tax rate on dividends).

The 4.9% rate applies to interest paid on loans (except back-to-back loans) made by banks and insurance companies and to interest paid on publicly traded securities. The 10% rate applies to interest paid by banks and to interest paid by sellers to finance purchases of machinery and equipment. The 15% rate applies to other interest.

Interest on certain “portfolio debt” obligations issued after 18 July 1984 and noneffectively connected bank deposit interest are exempt from withholding tax.

The United States and Norway initialed a new income tax treaty in 2006. As of 1 January 2013, the treaty had not yet been signed.

The general withholding tax rate for interest may be increased to 10% if both Norway and the United States tax interest paid to nonresidents under their domestic tax laws. Norway does not impose tax on interest paid to nonresidents and, consequently, a 0% rate applies to U.S.-source interest under the treaty. The treaty also provides that a 0% rate applies to certain types of interest, such as interest paid on bank loans.

The 10% rate applies to interest derived by a resident of one of the contracting states from sources in the other contracting state with respect to public issuances of bonded indebtedness.

The tax imposed by the source state may not exceed, in the case of the Philippines, the lowest of the following:

- 25%
- 15% if the royalties are paid by a corporation registered with the Philippine Board of Investments and engaged in preferred areas of activities
- The lowest rate of Philippine tax that may be imposed on royalties of the same kind paid under similar circumstances to a resident of a third state

In November 2005, U.S. government officials stated that preliminary discussions on a new tax treaty had begun with Poland. However, as of 1 January 2013, a new treaty had not yet been signed.
A reduced rate may apply if the beneficial owner of the dividend is a Portuguese company that owns at least 25% of the capital of the dividend-paying company.

In November 2005, preliminary discussions on a new tax treaty began with Romania. As of 1 January 2013, a new treaty had not yet been signed.

The lower rate applies to cultural royalties, which are defined as payments for the right to use copyrights of literary, artistic or scientific works, including cinematographic films.

The 5% rate applies to royalties paid for copyrights of musical compositions or literary, dramatic or artistic works. The 8% rate applies to royalties paid for the following:
- Motion picture films, and films, tapes and other means of transmission or reproduction of sounds
- Industrial, commercial or scientific equipment
- Copyrights of scientific works

The 5% rate applies to rent paid for the use of tangible movable property.

The 10% rate applies to interest on loans granted by financial institutions. The 15% rate applies to other interest.

This rate applies to interest paid to banks and financial institutions.

The 10% rate applies to the following:
- Royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment
- Remuneration for the performance of accessory technical assistance with respect to the use of the property or rights described above, to the extent that such technical assistance is performed in the contracting state where the payment for the property or right has its source
- The 15% rate applies to royalties or other amounts paid for the following:
  - The use of, or right to use, copyrights of literary, artistic and scientific works, including cinematographic and television films and videotapes used in television broadcasts
  - Patents, trademarks, designs and models, plans, and secret formulas and processes
  - Information relating to industrial, commercial or scientific experience

The U.S. Department of Treasury has announced that the income tax treaty between the United States and the USSR, which was signed on 20 June 1973, continues to apply to the former republics of the USSR, including Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan and Uzbekistan, until the United States enters into tax treaties with these countries. The United States has entered into tax treaties with Estonia, Kazakhstan, Latvia, Lithuania, the Russian Federation and Ukraine. The withholding tax rates under these treaties are listed in the above table.

The 5% rate applies to payments for the right to use industrial, commercial or scientific equipment. The 10% rate generally applies to other royalties.

The U.S. Department of Treasury has announced that the income tax treaty between the United States and the USSR, which was signed on 20 June 1973, continues to apply to the former republics of the USSR, including Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan and Uzbekistan, until the United States enters into tax treaties with these countries. The United States has entered into tax treaties with Estonia, Kazakhstan, Latvia, Lithuania, the Russian Federation and Ukraine. The withholding tax rates under these treaties are listed in the above table.

The 0% rate applies if the dividends are paid by U.S. companies to U.K. companies that owned 80% or more of the voting shares of the payer of the dividends for a 12-month period preceding the declaration of the dividends and if either of the following additional conditions is met:
- The 80% test was met before 1 October 1998.
- The recipient is a qualified resident under certain prongs of the limitation-on-benefits provision in the treaty.

The 0% rate also applies to U.S.-source dividend payments made to U.K. pension schemes. The 5% rate applies if the beneficial owner of the dividends is a company owning 10% or more of the payer. For other dividends, the 15% rate applies.

Withholding tax may be imposed at the full domestic rate on interest paid in certain circumstances.

The United States and Chile signed their first income tax treaty in February 2010. It includes a general limitation-on-benefits provision and reductions in withholding rates. The treaty has not yet been ratified.

(a) This is the maximum rate. The rate includes a 10% surcharge.
(b) The statutory rate for each withholding tax is 10%. The U.S. Virgin Islands Bureau of Internal Revenue has taken the position that the 10% surcharge also applies to each withholding tax, and consequently the withholding rate is 11%.
(c) Under certain circumstances, these taxes may not apply to U.S. corporations doing business in the U.S. Virgin Islands.
(d) This is the branch profits tax, imposed on the earnings of a foreign corporation attributable to its branch, reduced by earnings reinvested in the branch and increased by reinvested earnings withdrawn (see Section B).
(e) These periods apply to losses incurred in tax years beginning after 5 August 1997. A three-year carryback period is available in certain circumstances. Small businesses may elect to carry back net operating losses incurred in 2008 for up to the five preceding years.

B. Taxes on corporate income and gains

Corporate income tax. The system of corporate income taxation in force in the U.S. Virgin Islands is generally a mirror image of the U.S. Internal Revenue Code (I.R.C.). The applicable law is the I.R.C. with “U.S. Virgin Islands” substituted for all references to the “United States.” Significant differences between U.S. and U.S. Virgin Islands taxation are discussed below.

U.S. Virgin Islands corporations are subject to income tax on their worldwide income. A foreign corporation, which is a corporation organized outside the U.S. Virgin Islands, is subject to income tax only on its income from U.S. Virgin Islands sources and on its income that is effectively connected with the conduct of a trade or business in the U.S. Virgin Islands.

Under Section 937(b) of the I.R.C., rules similar to those for determining U.S.-source income or income effectively connected with the conduct of a trade or business in the United States must be used to determine if income is from sources within the U.S. Virgin Islands or effectively connected with the conduct of a trade or business within the U.S. Virgin Islands.
Rates of corporate income tax. Corporations are taxed at the rates specified in the I.R.C., except that the U.S. Virgin Islands imposes an additional 10% surcharge on the tax liability of all domestic and foreign corporations. This increases the maximum effective income tax rate to 38.5%.

U.S. Virgin Islands corporations may benefit from the tax exemptions and reductions indicated below.

Economic development program. Qualifying corporations are exempt from income tax on up to 90% of their income. In addition, they are exempt from real property, gross receipts and certain excise taxes. Other reductions in various taxes may apply.

Exempt companies. Qualifying corporations that are foreign-owned and do not carry on a trade or business in the United States or in the U.S. Virgin Islands may elect a 20-year exemption from substantially all U.S. Virgin Islands taxes.

Development of renewable and alternative energy-generation sources. Individuals and businesses that install a new solar water heating system, wind energy system, photovoltaic energy system or other renewable energy system may claim a rebate from the Virgin Islands Energy Office that ranges, subject to certain limitations, from 25% to 70% of the actual cost of the equipment, depending on the type of system and on the type of property on which it is installed. In addition, the new legislation provides that equipment or component parts brought into the U.S. Virgin Islands for the purpose of manufacturing solar water heaters or wind or solar energy systems are exempt from the payment of custom duties and excise taxes. Also, revenues derived from the installation or construction of a renewable or alternative energy electric power or production plant or device are exempt from the gross receipts tax.

Alternative minimum tax. The alternative minimum tax rules in the U.S. Virgin Islands are the same as those in the United States.

Branch profits tax and branch interest tax. The branch profits tax (BPT) and branch interest tax (BIT) rules in the U.S. Virgin Islands are similar to those in the United States, except that the BPT and BIT rates are 11% (including the 10% surcharge) instead of 30%. Under certain circumstances, these taxes may not apply to U.S. corporations doing business in the U.S. Virgin Islands.

Capital gains and losses. The provisions applicable to capital gains and losses in the U.S. Virgin Islands are the same as those in the United States.

Administration. The annual income tax return is due by the fifteenth day of the third month after the close of the company’s fiscal year. On request, a corporation receives an automatic six-month extension to file its return. In general, 100% of a corporation’s tax liability must be paid through estimated tax installments during the year in which the income is earned.

Domestic and foreign corporations file their returns with the Bureau of Internal Revenue (BIR).

Foreign tax relief. The provisions related to foreign tax credits are similar to those in the United States.
Foreign Investment in Real Property Tax Act. The Foreign Investment in Real Property Tax Act (FIRPTA) applies to corporations owning real property interests in the U.S. Virgin Islands. Under this act, a foreign corporation (including a U.S. corporation) pays tax attributable to its gain from the sale of U.S. Virgin Islands property to the U.S. Virgin Islands treasury.

C. Determination of trading income

General. The rules for determining trading income are the same as those in the United States.

Groups of companies. A U.S. Virgin Islands corporation may not file a consolidated income tax return with a related U.S. tax entity. However, a group of U.S. Virgin Islands corporations may file a consolidated return with the BIR if they meet the requirements set by the I.R.C. provisions for consolidated returns.

Employer | 1.45  
Employee | 1.45  
Insurance premium tax, on gross premiums received by insurers for insurance policies covering risks in the U.S. Virgin Islands; certain exceptions apply | 5

E. Miscellaneous matters

Foreign-exchange controls. The U.S. Virgin Islands has not enacted any specific foreign-exchange controls, but U.S. laws concerning cash transaction reporting and other financial matters are applicable.

Debt-to-equity rules. The U.S. Virgin Islands debt-to-equity rules are the same as those in the United States.

F. Treaty withholding tax rates

The U.S. Virgin Islands does not have tax treaties with foreign governments.

(a) Applicable to nonresidents and resident individuals. Nonresident corporations are corporations not incorporated in Uruguay.

(b) See Section B.

B. Taxes on corporate income and gains

Corporate income tax. Corporations are taxed on Uruguay-source income, defined as income derived from activities performed, property situated or economic rights used in Uruguay. Any profits, including capital gains, are taxable.

Rate of corporate tax. The corporate tax rate is 25%.

Capital gains. Capital gains are included in ordinary income and taxed at the regular corporate rate.

Administration. Corporations are required to make monthly advance payments. These payments are calculated by applying to monthly gross income a fraction with a numerator equal to income tax for the prior tax year and a denominator equal to the corporation’s gross income for that year. For the months of the current year prior to filing the income tax return, however, the income tax
and gross income used are from the corresponding months of the prior year. Filing of tax returns and payment of the balance must be made by the fourth month after the end of the accounting period, which is the company’s tax year-end.

**Dividends and branch remittances.** Dividends paid to resident companies are exempt from tax. Dividends paid to resident individuals are subject to personal income tax at a rate of 7% if the dividends are paid out of income subject to corporate income tax. Dividends paid to nonresident companies and individuals and branch remittances are subject to withholding tax at a rate of 7% if they are paid out of income subject to corporate income tax. Dividends and branch remittances paid out of income not subject to corporate income tax are exempt from tax. Dividends subject to withholding tax cannot exceed the taxable profit of the company.

**Withholding tax on certain payments to nonresidents.** In general, a 12% withholding tax is imposed on the following payments to nonresidents:
- Interest
- Royalties
- Technical assistance payments
- Service fees
- Equipment rent

C. Determination of trading income

**General.** Tax is imposed on taxable profit, which is accounting profit earned in the accounting period after tax adjustments. An inflation adjustment is applied. All Uruguay-source income is taxable. Expenses are deductible to the extent that they are incurred in producing taxable income.

In general, payments to nonresidents are fully deductible as expenses if the effective income tax rate of the country of the recipient is 25% or higher (to be proved through a specific certificate). If the effective tax rate of the country of the recipient is lower than 25%, only a percentage of the expenses is deductible. The percentage equals the ratio of the nonresident withholding tax rate of 12% plus the effective income tax rate of the country of the nonresident to the corporate income tax rate of 25% in Uruguay. If the nonresident withholding tax of 12% applies, the minimum percentage of deduction is 48% (the ratio of the withholding tax rate of 12% to the corporate income tax rate of 25%).

**Inventories.** Stock is valued according to cost of purchases or production costs. Last-in, first-out (LIFO), first-in, first-out (FIFO), average cost and market price are acceptable methods. The corporation can choose which method to use, but may not change the method without prior authorization.

**Provisions.** Only deductions for expenses already incurred are allowed. Provisions for bad debts and severance pay are not allowed. Bad debts may be written off if the debtor goes bankrupt or if 18 months have elapsed since the obligation to pay the debt became due.

**Depreciation.** A depreciation deduction may be taken on tangible assets based on their useful lives using the straight-line method. The following are some of the applicable rates.
Asset Rate (%)

Commercial and industrial buildings 2/3 (a)
Motor vehicles 10
Office equipment 10 (b)
Machinery and equipment 10 (b)

(a) The 2% rate applies to buildings in urban areas; the 3% rate applies to buildings in rural areas.
(b) This is the usual rate. The rate for a particular asset depends on its estimated useful life.

For some assets, the units-of-production method may be used. Goodwill may not be depreciated.

**Relief for losses.** The general rule is that losses may be carried forward for five years and deducted from income without limit. No carryback is possible.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>

</tr>
</tbody>
</table>

**E. Miscellaneous matters**

**Foreign-exchange controls.** Uruguay does not impose foreign-exchange controls. No restrictions are imposed on inbound or outbound investments. The transfer of profits and dividends, loan principal and interest, royalties and fees is unlimited. Nonresidents may repatriate capital, together with accrued capital gains and retained earnings, subject to applicable withholding taxes and company law considerations (for example, the requirement that companies transfer a portion of their annual income to a reserve).

Import and export operations are transacted at a free rate determined by the market.

**Debt-to-equity rules.** No specific debt-to-equity rules apply in Uruguay.
### F. Treaty withholding tax rates

The maximum withholding tax rates under Uruguay’s double tax treaties are set forth below.

<table>
<thead>
<tr>

(a) These are the rates under a renegotiated treaty between Germany and Uruguay.
(b) See Section B.
A. At a glance

| Corporate Profits Tax Rate (%) | 9 (a) |
| Capital Gains Tax Rate (%) | 9 (a) |
| Permanent Establishment Tax Rate (%) | 9 (a) |
| Branch Profits Tax Rate (Additional Tax) (%) | 10 (b) |
| Withholding Tax (%) (c) | |
| Dividends | 10 (d) |
| Interest | 10 (d) |
| Royalties from Patents, Know-how, etc. | 20 (e) |
| Net Operating Losses (Years) | |
| Carryback | 0 |
| Carryforward | 5 (f) |

(a) This is the general corporate profits tax rate. For commercial banks, the rate is 15%.
(b) This tax is imposed on the net profits of permanent establishments after deduction of the profits tax.
(c) The withholding taxes are generally considered to be final taxes.
(d) The withholding tax is imposed on payments to Uzbek companies and individuals and to foreign companies without a permanent establishment in Uzbekistan.
(e) The withholding tax is imposed on payments to foreign companies without a permanent establishment in Uzbekistan.
(f) See Section C.

B. Taxes on corporate income and gains

Corporate profits tax. Most enterprises in Uzbekistan, including Uzbek companies with foreign participation, are subject to the general profits tax regime. Small businesses and retail and wholesale trading companies are subject to different regimes. Foreign
companies that are deemed by the tax authorities to have a permanent establishment (PE) in Uzbekistan are taxable on profits derived from business activities of the PE in Uzbekistan (the taxable profits of a PE should not be less than 10\% of deductions). The definition of a PE in Uzbek legislation is somewhat similar to the definition of a PE in the model treaty of the Organization for Economic Cooperation and Development (OECD), with certain exceptions. However, the legislation regarding the taxation and treatment of PEs in Uzbekistan is undeveloped.

**Rates of corporate tax.** The regular corporate profits tax rate is 9\%. This rate also applies to Uzbek enterprises with foreign participation and to PEs of foreign companies. For commercial banks, the profits tax rate is 15\%.

PEs are also subject to a 10\% tax on their net profits after deduction of the corporate profits tax.

Foreign legal entities without a PE in Uzbekistan are subject to withholding tax on income derived from their activities in Uzbekistan. The following are the withholding tax rates.

<table>
<thead>
<tr>
<th>Nature of payment</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends and interest</td>
<td>10</td>
</tr>
<tr>
<td>International communication and freight fees</td>
<td>6</td>
</tr>
<tr>
<td>Insurance premiums</td>
<td>10</td>
</tr>
<tr>
<td>Royalties, rent, management fees and fees for</td>
<td>20</td>
</tr>
<tr>
<td>other services not connected with an Uzbek PE</td>
<td></td>
</tr>
</tbody>
</table>

**Capital gains.** Capital gains are generally included in taxable profits and are subject to tax at the regular corporate tax rate (or regular withholding tax rate for nonresidents without a permanent establishment). Capital losses are generally deductible only if they are incurred on fixed assets used in production for at least three years.

**Administration.** The tax year is the calendar year.

Tax declarations must be filed quarterly by the 25th day of the month following the reporting quarter and annually by 15 February of the year following the tax year. Companies must file financial statements together with the tax declarations. Companies with foreign participation must file the annual declaration by 25 March.

The final tax liability must be paid by the deadline for filing the tax declarations. Quarterly estimates of the tax payable must be made by the 10th day of the 1st month of the quarter. Tax installment payments based on the estimates are required to be made by the 10th day of each month. Companies generating profits of less than 200 minimum monthly wages per reporting quarter (approximately US$8,000) are subject to profits tax based on actual quarterly profits and are not required to pay installments of profits tax.

On written request, excess payments of tax must be refunded within a 30-day period or be offset against future tax liability. In practice, it is difficult to obtain refunds of overpayments of tax.

**Dividends.** Dividends, including those paid to domestic enterprises, are subject to a withholding tax at a rate of 10\%. Dividends received by a legal entity and reinvested into the charter fund of the payer of the dividends are exempt from tax.
Foreign tax relief. Under the double tax treaties of Uzbekistan, a foreign tax credit is available for foreign tax paid on income earned abroad.

C. Determination of trading income

General. Taxable profits are equal to the annual net profits disclosed in the company’s Uzbek financial statements, as adjusted by the tax law. Financial statements must be prepared on an accrual basis and be supported by documentation. The following are the most significant items that are not deductible for tax purposes:

- Nonbusiness expenses
- Entertainment, business travel and voluntary insurance expenses in excess of (low) statutory limits
- Interest on overdue and deferred loans (in excess of normal loan interest rate)
- Losses resulting from misappropriations of funds or assets
- Audit expenses, if an annual audit was conducted more than once for the same period
- Certain benefits to employees
- Charitable donations
- Litigation expenses
- Penalties

Special deductions. Taxable profits may be reduced by certain special deductions, including the following:

- Amounts reinvested in main production in the form of new construction and reconstruction of buildings and facilities used for production needs and new technological equipment (less current depreciation) over a certain time period, up to 30% of taxable profits
- Charitable donations of up to 2% of taxable profits

Provisions. Banks may deduct loan loss provisions within the limits established by the Central Bank of the Republic of Uzbekistan.

Tax depreciation. The following are the applicable depreciation rates in Uzbekistan.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and structures</td>
<td>5</td>
</tr>
<tr>

<td>Cars, computers and office equipment</td>
<td>20</td>
</tr>
<tr>
<td>Perennial plants</td>
<td>10</td>
</tr>
<tr>
<td>All other assets</td>
<td>15</td>
</tr>
</tbody>
</table>

Intangible assets are amortized for tax purposes over the useful life of an asset, the life of the company or five years, whichever is less.

Relief for losses. Tax losses can be carried forward for five years. However, the amount of losses carried forward that may be deducted each year is subject to a limit of 50% of taxable profits for the year. Losses incurred during a profits tax exemption period cannot be carried forward.

Groups of companies. The tax law does not allow the offsetting of profits and losses among members of a tax group.
### D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>

</tbody>
</table>
Nature of tax

Employees (withheld from salaries of local employees) 5.5%
Unified Social Payment; payable by employers on the total payroll 25%
Contributions to individual accumulative pension accounts of citizens (maintained at Peoples Bank); payable by employers on salaries of local employees; amounts of the contributions are deducted from the amounts of accrued individual income tax 1%

E. Foreign-exchange controls

The currency in Uzbekistan is the Uzbek soum (UZS).

Uzbekistan imposes various foreign-exchange controls, including the following:
- Restrictions on purchases of foreign currencies, which are subject to the availability of foreign currencies in authorized banks
- Mandatory sales of 50% of foreign-currency revenues of companies to their servicing banks
- Mandatory exchange rates set weekly by the Central Bank of the Republic of Uzbekistan for accounting, reporting, tax and customs duty calculations
- Strict control over payments in foreign currencies to parties outside Uzbekistan
- Limitations on the circulation of foreign currencies in Uzbekistan, and limitations on the domestic foreign currencies markets

Uzbek resident individuals may freely export only up to the equivalent of US$2,000 of foreign currency. Nonresident individuals may export any cash legally imported and supported by a customs declaration. These limits may be increased by amounts withdrawn from foreign-currency accounts in Uzbekistan if proper documentation is provided.

F. Treaty withholding tax rates

The following table lists the withholding rates under Uzbekistan’s tax treaties.

</table>

(a) The rate is 5% if the beneficial owner of the dividends is a company that holds directly at least 10% of the payer of the dividends.

(b) The rate is 5% if the recipient holds at least 10% of the voting shares of the payer.

(c) A 5% rate applies to royalties paid for certain cultural works as well as for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (know-how).

(d) The 10% rate applies to royalties paid for trademarks or certain cultural works. A 0% rate applies to royalties for the use of, or the right to use, computer software, patents, designs or models, or plans. A 5% rate applies to royalties paid for the use of, or the right to use, secret formulas or processes, or for information concerning industrial, commercial or scientific experience (know-how).

(e) The rate is 5% if the recipient company holds at least 25% of the voting shares or capital of the payer.

(f) A 3% rate applies to royalties paid for the use of, or the right to use, copyrights of scientific works, patents, trademarks, designs or models, plans, or secret formulas or processes, as well as for the disclosure of industrial, commercial, or scientific knowledge.

(g) These are the withholding tax rates under the USSR-Japan treaty, which is honored by Uzbekistan.

(h) A 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including motion picture films.

(i) The rate is 2% for the use of, or the right to use, industrial, commercial, or scientific equipment.

(j) The rate is 5% if the recipient holds at least 20% of the voting shares of the payer.

(k) The rate is 10% for interest received by financial institutions, including insurance companies.
(l) The rate is 5% if the beneficial owner of the dividends is a company that holds directly at least 20% of the payer of the dividends.

(m) A 0% rate applies to interest with respect to the following:
   • Loans made, guaranteed or insured by the government of the other contracting state or an instrumentality or agency thereof
   • Sales on credit of industrial, commercial or scientific equipment
   • Sales on credit of merchandise between enterprises
   • Bank loans

(n) The rate is 7% if the beneficial owner of the dividends is a company that holds at least 25% of the payer of the dividends.

(o) The domestic withholding tax rate for dividends and interest in Uzbekistan is 10%. Consequently, the withholding tax rate of 15% for dividends and interest under treaties does not apply to payments made by Uzbek companies.

(a) This is the maximum progressive rate, which applies to income exceeding 3,000 tax units. Effective from 16 February 2012, the value of a tax unit is Bs.F 90. For further details, see Section B. Petroleum companies and income from petroleum-related activities are taxed at a rate of 50%. Mining royalties and transfers of such royalties are subject to tax at a rate of 60%.

(b) For details, see Section B.

(c) The withholding tax applies to payments over Bs.F 7,500. The tax is imposed on the payment minus Bs.F 225.

(d) This withholding tax applies to payments over Bs.F 25.

(e) For interest related to loans invested in activities generating income, the withholding tax is imposed on 95% of the gross payment. Consequently, the effective withholding tax rate is 32.3% (95% x 34%). For other cases, the tax base is the gross interest payment.

(f) In general, the withholding tax rate is determined under Tariff No. 2 (see Section B), which provides for a maximum tax rate of 34%. For interest related to loans invested in activities generating income, the withholding tax is imposed on 95% of the gross payment. For other cases, the tax base is the gross interest payment. Interest paid to foreign financial institutions that are not domiciled in Venezuela is subject to withholding tax at a flat rate of 4.95%.

(g) For residents, royalties are considered to be part of ordinary income.

(h) Royalties paid to nonresidents are taxed on a deemed profit element, which is 90% of gross receipts.
(i) Because royalties paid to nonresidents are taxed on a deemed profit element (see footnote (h) above), the effective withholding tax rate is 30.6% (90% x 34%).

(j) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because royalties paid to nonresidents are taxed on a deemed profit element (see footnote (h) above), the maximum effective withholding tax rate is 30.6% (90% x 34%).

(k) Professional fees paid to nonresidents are taxed on a deemed profit element, which is 90% of gross receipts. Consequently, the effective withholding tax rate is 30.6% (90% x 34%).

(l) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%.

(m) Payments to nonresidents for technical assistance are taxed on a deemed profit element, which is 30% of gross receipts.

(n) Because payments to nonresidents for technical assistance are taxed on a deemed profit element (see footnote (m) above), the effective withholding tax rate is 10.2% (30% x 34%).

(o) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because payments to nonresidents for technical assistance are taxed on a deemed profit element (see footnote (m) above), the maximum effective withholding tax rate is 10.2% (30% x 34%).

(p) Payments to nonresidents for technological services are generally taxed on a deemed profit element, which is 50% of gross receipts.

(q) Because payments to nonresidents for technological services are taxed on a deemed profit element (see footnote (p) above), the effective withholding tax rate is 17% (50% x 34%).

(r) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because payments to nonresidents for technological services are taxed on a deemed profit element (see footnote (o) above), the maximum effective withholding tax rate is 17% (50% x 34%).

(s) This tax applies to transfers of shares of corporations domiciled in Venezuela that are not traded on national stock exchanges. The withholding tax rates are applied to the sale price.

B. Taxes on corporate income and gains

Corporate income tax. Companies domiciled in Venezuela are subject to income tax on their net annual income from Venezuelan and foreign sources. Companies organized in Venezuela are deemed to be domiciled in Venezuela. In addition, Venezuelan permanent establishments of foreign companies are also considered to be domiciled in Venezuela. However, only income attributable to a permanent establishment is taxable in Venezuela.

Rates of corporate income tax. Domestic corporations and branches of foreign corporations are subject to the corporate income tax rates of Tariff No. 2, which are progressive and are expressed in tax units. Effective from 16 February 2012, the value of a tax unit is Bs.F 90. The Venezuelan Budget Law may change the value of the tax unit each year. The following are the corporate income tax rates provided in Tariff No. 2.

<table>
<thead>
<tr>
<th>Taxable income exceeding tax units</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>15</td>
</tr>
<tr>
<td>2,000</td>
<td>22</td>
</tr>
<tr>
<td>3,000</td>
<td>34</td>
</tr>
</tbody>
</table>

Net income arising from mining and related activities is taxed under Tariff No. 2. Petroleum companies and income from petroleum-related activities, such as transportation and exploitation, are taxed at a rate of 50%. Mining royalties and transfers of such royalties are subject to tax at a rate of 60%.

Interest paid to foreign financial institutions that are not domiciled in Venezuela is subject to a 4.95% withholding tax.
**Capital gains.** Capital gains are not taxed separately, but are taxable as business profits. For the computation of gains from sales of shares, the tax basis is zero if such shares had been received as a result of a dividend paid with new shares of the payer of the dividend.

**Administration.** Companies must file an annual income tax return, self-assess and pay any resulting balance of tax due, within three months after the end of their fiscal year.

Companies must make estimated tax payments during their fiscal year.

**Dividends.** Dividends paid by Venezuelan companies and profits remitted by permanent establishments of foreign companies to the countries of their home offices are taxable to the extent that “net income” exceeds its “net taxable income.” For this purpose, “net income” is the financial income approved by the shareholders’ meeting based on the financial statements, and “net taxable income” is the resulting income subject to tax after the tax reconciliation. The tax reconciliation is the procedure for determining the income tax liability. However, the tax does not apply to remittances paid by permanent establishments of foreign companies if the permanent establishment can prove that the excess amount is reinvested in Venezuela for at least five years.

The tax is withheld at source. The applicable rate depends on the business of the payer of the dividends. For dividends paid by hydrocarbon or mining companies subject to the 50% or 60% rates of corporate income tax (see Rates of corporate income tax), the dividend tax rate is the corporate tax rate applicable to the company. For dividends paid by other companies, the dividend tax rate is 34%.

**Foreign tax relief.** A credit is granted for income taxes paid on foreign-source income, up to the amount of Venezuelan tax payable on such income.

**C. Determination of trading income**

**General.** Corporate tax is based on the annual net taxable accounting profits calculated in accordance with generally accepted accounting principles, subject to certain adjustments for nontaxable income and nondeductible expenses defined by law.

To determine the net taxable income, deductions are subtracted from gross income. In general, most expenses, including cost of production, are deductible, provided that they are normal and necessary for the earning of the income.

Under reconciliation rules, the determination of the Venezuelan and foreign-source income is made separately (two baskets). The reconciliation rules include detailed measures for the allocation of allowances and deductions to the two baskets.

**Inventories.** Inventories may be valued using any method in accordance with generally accepted accounting principles. The method chosen must be applied consistently. Because of tax indexation (see Tax indexation), inventory is effectively valued using the last-in, first-out (LIFO) method, adjusted for inflation.
Tax indexation. Companies must apply an annual inflation adjustment. A company carries out this adjustment by adjusting its non-monetary assets, some of its nonmonetary liabilities and its equity to reflect the change in the consumer price index from the preceding year. These adjustments affect the calculation of depreciation and cost of goods sold. The net effect of these adjustments is recorded in an inflation adjustment account and is added to taxable income or allowed as a deduction.

Effective for tax years beginning after 22 October 1999, the tax indexation rules apply only to the reconciliation of Venezuelan-source income. Therefore, foreign-source nonmonetary assets and liabilities are not subject to tax indexation.

Provisions. Provisions for inventory obsolescence and accounts receivable are not deductible; amounts are deductible only when inventories or accounts receivable are effectively written off.

Depreciation. In general, acceptable depreciation methods are the straight-line and the units-of-production methods. The declining-balance method and accelerated depreciation are not accepted. Venezuelan law does not specify depreciation rates. If the estimated useful life of an asset is reasonable, the depreciation is accepted. Estimated useful lives ranging from 3 to 10 years are commonly used.

Relief for tax losses. Operating losses may be carried forward for three years. No carryback is permitted.

Losses in the foreign-source basket (see General) may not offset Venezuelan-source income. Such foreign-source losses may be carried forward three years to offset foreign-source income only.

Losses attributable to tax indexation may be carried forward one year.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax (VAT), imposed on goods and services, including imports; the National Executive may exonerate from tax acquisitions of goods and services; the law provides an indexation system for input VAT during the preoperational period for enterprises engaged in certain industrial activities; input VAT generated during the preoperational phase of industrial projects intended primarily for export is refunded</td>
<td>12</td>

E. Miscellaneous matters

Foreign-exchange controls. Under the foreign-exchange control system in Venezuela, the purchase and sale of currency in Venezuela is centralized by the Central Bank of Venezuela. This limits foreign-currency trade in Venezuela and other transactions.

Debt-to-equity rules. For fiscal years beginning on or after 16 February 2007, a new law disallows deductions to companies for interest payments to related parties domiciled abroad if the average of the companies’ debts (owed to related and unrelated parties) exceeds the average amount of their fiscal equity for the respective fiscal year.

Transfer pricing. Under transfer-pricing rules, cross-border income and expense allocations in transactions with related parties are subject to analysis and special filings. The rules contain a list of related parties and provide a list of acceptable transfer-pricing methods.

Controlled foreign corporations. Under controlled foreign corporation (CFC) rules, income derived by a CFC (as defined) domiciled in a low income tax jurisdiction is taxable to its Venezuelan shareholders. The tax authorities have issued a list of low income tax jurisdictions.

</table>

(a) Under Venezuelan domestic law, a reduced withholding tax rate of 4.95% applies to interest paid to financial institutions not domiciled in Venezuela.

(b) The 5% rate applies to dividends paid to a parent company that owns at least 25% of the capital of the payer of the dividends. Under the Denmark and Sweden treaties, to benefit from the 5% rate, the recipient of the dividends must have direct control of at least 25% of the voting shares of the payer of the dividends. The higher rate applies to other dividends (portfolio dividends).

(c) The 5% rate applies if the beneficial owner of the dividends is a company that owns at least 15% of the capital of the payer of the dividends. Under the treaties with Austria, Czech Republic and Iran, to benefit from the 5% rate, the beneficial owner of the dividends must have direct control of at least 15% of the capital of the payer of the dividends. The higher rate applies to other dividends (portfolio dividends).

(d) The 5% rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payer of the dividends. Under the treaties with China, Korea and Norway, to benefit from the 5% rate, the beneficial owner of the dividends must have direct control of at least 10% of the capital of the payer of the dividends. The higher rate applies to other dividends (portfolio dividends).

(e) The 5% rate applies if the beneficial owner of the dividends is a company that owns directly at least 5% of the capital of the payer of the dividends. The higher rate applies to other dividends.

(f) The 0% rate applies to dividends paid to certain recipients who own at least 25% of the voting shares of the payer of the dividends. Under the treaty with Switzerland, to benefit from the 0% rate, the recipient of the dividends must have direct control of at least 25% of the voting shares of the payer of the dividends. The higher rate applies to other dividends.

(g) The 0% rate applies if the beneficial owner of the dividends is a company that directly controls at least 10% of the capital of the payer of the dividends. The 10% applies to other dividends.

(h) The 10% rate applies if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payer of the dividends. Under the treaty with Cuba, to benefit from the 10% rate, the beneficial owner of the dividends must have direct control of at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends.
(i) The 10% rate applies if the beneficiary of the dividends is a company that owns at least 10% of the capital of the payer of the dividends and if it has an investment in the payer of at least US$100,000. The 15% rate applies to other dividends.

(j) The 10% rate applies if the beneficiary of the dividends is a company that controls at least 20% of the capital of the payer of the dividends. The 15% rate applies to other dividends.

(k) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the payer of the dividends. The 15% rate applies if the beneficiary of the dividends is a resident of Venezuela that receives from a company resident in France dividends that would give rise to a tax credit (avoir fiscal). For dividends received by a resident of France, the recipient has a right to a payment from the French Treasury in an amount equal to the avoir fiscal. The 5% rate applies in all other cases.

(l) The 10% rate applies if the beneficiary of the dividends is a company that controls directly at least 10% of the voting power of the distributing company. The 15% rate applies to other dividends.

(m) The 4.95% rate applies to interest paid to banks. The 10% rate applies to other interest payments.

(n) The 4.95% rate applies to interest paid to financial institutions. The 10% rate applies to other interest payments.

(o) The 5% rate applies to interest paid to banks. The higher rate applies to other interest payments.

(p) The 0% rate applies to interest paid to the Eximbank, Federal Reserve Bank, Private Investment Corporation, Foreign Trade Bank, Central Bank of Venezuela and Venezuelan Investment Fund. The 4.95% rate applies to interest paid to financial institutions or insurance companies. The 10% rate applies to other interest payments.

(q) The 4.95% rate applies to interest paid to banks or insurance companies. The 10% rate applies if the beneficial owner of the interest is not one of the entities mentioned in the preceding sentence and if either of the following additional conditions is satisfied:

- The interest is paid by banks.
- The interest is paid on bonds or other credit securities that are traded regularly and substantially on a recognized securities market.

The 15% rate applies to other interest payments.

(r) The following interest payments are exempt:

- Interest paid to the government of the other contracting state, or a local authority or central bank of such state
- Interest paid for the sale on credit of industrial, commercial or scientific equipment
- Interest on bank loans

The 5% rate applies to other interest payments.

(s) The 10% rate also applies to technical assistance fees.

(t) The 15% rate applies to royalties related to copyrights, trademarks, know-how, literary, artistic or scientific works, or films. A protocol to the treaty provides that payments for technical assistance services are treated as royalties and are therefore also subject to the 15% rate.

(u) The 5% rate applies to the following:

- Copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties for motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting)
- Royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience (but not including royalties paid in connection with rental or franchise agreements) if the payer and the beneficial owner of the royalties are not related persons

The 10% rate applies to other royalties.

(v) The 12% rate also applies to technical assistance fees.

(w) The 5% rate applies to technical assistance fees resulting from the rendering of technical, managerial or consultancy services if such services make available technical knowledge, experience, skills, know-how or processes. The 10% rate applies to the following royalties:

- Royalties paid as consideration for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, patents, trademarks, designs or models, plans, and secret formulas or processes
- Royalties for information concerning industrial, commercial or scientific experience

The 10% rate applies to payments for technical assistance. The 20% rate applies to royalties.

(y) This rate applies to royalties and to amounts paid for technical assistance services.
The 7% rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films, or works on film, videotape or other means of reproduction for use in connection with television broadcasting); and royalties for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (but not including royalties paid in connection with rental or franchise agreements) if the payer and the beneficial owner of the royalties are not related persons. The 10% rate applies to other royalties.

The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment. The 10% rate applies to other royalties.

The 0% rate applies to royalties paid for technical services, scientific, geological or technical studies, engineering works, consulting or supervision services, if the recipient does not have a permanent establishment. The 5% rate applies to royalties paid for industrial, commercial or scientific equipment. The 10% rate applies to royalties paid for the following:

- Patents, designs or models, plans, or secret formulas or processes
- Industrial, commercial or scientific know-how
- Trademarks
- Copyrights with respect to literature, arts or sciences, motion pictures, or movies and tapes for radio or television broadcasting

The 5% rate applies to payments for the following:

- Patents, designs or models, plans, or secret formulas or processes
- The use of, or the right to use, industrial, commercial, or scientific equipment
- Information concerning industrial, commercial or scientific experience

The 7% rate applies to amounts paid for trademarks or trade names. The 10% rate applies to amounts paid for copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting.

The lower rate applies to payments for technical assistance. The 12% rate applies to royalties.

The 10% rate applies to technical assistance fees, which are all payments in consideration for the rendering of technical, managerial or consultancy services, if such services make available technical knowledge, experience, skills, know-how or processes. The 15% rate applies to royalties.

The 10% rate applies to royalties related to literary, artistic or scientific works, or films. The 7% rate applies to other royalties.

This is the general rate. Certain special rules apply.

See Section A.

This treaty has been signed, but it has not yet been ratified and accordingly is not yet in force.

The 4.95% rate applies to interest paid to financial institutions. The 5% rate applies to other interest payments.

The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of scientific works, software and trademarks, and to payments for the use of, or the right to use, equipment and transportation vehicles. The 10% rate applies to other royalties.

The 4.95% rate applies to interest paid to banks. The 15% rate applies to other interest payments.

The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, cinematographic films, patents, trademarks, designs or models, plans, or secret formulas or processes, and to payments for the use of, or the right to use, industrial, commercial or scientific experience. It also applies to gains derived from the alienation of such rights or property to the extent that such gains are contingent on the productivity, use or disposition of such property.

The 4.95% rate applies to interest paid to banks. The 5% rate applies to other interest payments.

Venezuela has signed other tax treaties that cover only air and maritime transportation.

  Carryforward 5 (c)

(a) Petroleum companies are subject to tax at a rate ranging from 32% to 50%. Mining companies exploiting rare precious natural resources are subject to tax at a rate ranging from 40% to 50%. Such companies may also be subject to a natural resource royalty tax. For details, see Section B.
(b) Gains derived from sales of fixed assets are treated as taxable profits and are subject to tax at the normal corporate income tax rate. Gains derived from sales of capital or shares in an entity are subject to tax at a rate of 25%. Transfers of securities by foreign investors are subject to presumptive tax of 0.1% on total sales proceeds. For details, see Section B.

(c) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. The following types of enterprises are subject to corporate income tax:

• Enterprises established under the Law on Enterprises, the Law on Investment, the Law on Credit Organisations, the Law on Insurance Business, the Law on Securities, the Law on Oil and Gas, the Trade Law and other legal entities including joint stock companies, limited liability companies, partnerships, private businesses, state-owned businesses, law offices, private public notary offices, parties to business cooperation contracts, parties to oil and gas product sharing contracts, oil and gas joint ventures and joint operation companies

• Public and nonpublic organizations engaged in business

• Organizations established under the Law on Cooperatives

• Businesses established under foreign laws that have a permanent establishment in Vietnam

• Other organizations conducting production and business activities that generate taxable income

Rates of corporate income tax. The standard corporate income tax rate is 25% unless tax incentives apply.

The rate of corporate income tax ranges from 32% to 50% for exploration and exploitation of oil and gas and from 40% to 50% for the exploration and exploitation of precious natural resources. The rate varies according to the specific project.

Tax incentives

Incentive tax rates. Preferential tax rates of 10% or 20% may be available to eligible foreign investment projects in industries or locations that are encouraged by the government.

A 10% rate for the 15-year period beginning with the first year of revenue may be available to the following:

• Newly established enterprises engaged in investment projects in areas with extremely difficult socioeconomic conditions and in economic zones and high-technology zones established by decisions of the prime minister

• Newly established enterprises that are engaged in the production of software products, investment projects in the sectors of high technology, scientific research and technological development or investment projects involving the development of especially important infrastructure facilities of the state. For large-scale and high-technology projects or new projects that need to attract investment, the period of the 10% preferential tax rate may be extended, but the period for the 10% tax rate, which is specified in the prime minister’s decision and based on a proposal from the Minister of Finance, may not exceed 30 years.

A 10% rate applies for the entire period of operation for enterprises operating in the sectors of education and training, occupational training, health care, culture, sports, environment and publishing. However, this incentive is subject to detailed conditions provided separately by the prime minister.
A 20% rate for the 10-year period beginning with the first year of revenue may apply to newly established enterprises engaged in investment projects in areas with difficult socioeconomic conditions. A 20% rate for the entire operational period may apply to agricultural service cooperatives, people’s credit funds and micro-financial institutions established under the Vietnamese laws on credit institutions.

The period for the application of the preferential tax rates begins with the first revenue-making year of the activities eligible for tax incentives. After the expiration of the period for the tax-incentive rate, the standard rate of 25% applies.

Income from mining activities of enterprises established and licensed to carry out mining activities from 1 January 2009 is not eligible for corporate income tax incentives. This does not retroactively affect any incentives granted to such enterprises established before 1 January 2009.

If, within an assessment period, an enterprise has both incentivized activities and normal activities, it must conduct a separate accounting for income from each activity to declare and pay tax separately. Otherwise, taxable income must be prorated according to the ratio of revenue or deductible expenses of each activity to the total revenue or deductible expenses.

Income and losses from incentivized activities and normal activities (except for transfers of property, transfers of projects and transfers of mineral exploratory, mining and processing rights) may be netted against each other before the tax rate of the activity with the highest amount of income is applied.

Tax incentives previously granted as a result of the export ratio are repealed, effective from 1 January 2012. Affected taxpayers can adopt either tax incentives based on the prevailing regulations effective at the time they were licensed or those effective from 31 December 2011. Taxpayers are required to notify the tax authorities regarding the tax incentive option selected.

**Tax exemptions and tax reductions.** The following enterprises are exempt from corporate income tax for a maximum period of four years and to a 50% reduction of the amount of corporate income tax payable for a maximum period of nine subsequent years:

- Newly established enterprises engaged in investment projects in areas with especially difficult socioeconomic conditions or in economic zones and high-technology zones established under decisions of the prime minister
- Newly established enterprises that are engaged in investment projects in various sectors, including high technology, scientific research and technological development or that are engaged in investment projects involving the production of software projects or the development of water plans, power plans, water supply and irrigation systems, bridges, railways, airports, seaports, river ports or other important infrastructure projects, as decided by the prime minister
- Newly established enterprises operating in the sectors of education and training, occupational training, health care, culture, sport and the environment in areas with especially difficult socioeconomic conditions
Enterprises operating in sectors mentioned in the last bullet above in areas that do not have particularly difficult socioeconomic conditions are entitled to tax exemption of four years and a tax reduction of 50% for five subsequent years.

Other newly established enterprises engaged in investment projects in areas with difficult socioeconomic conditions are exempt from corporate income tax for a period of two years and a 50% reduction of the amount of corporate income tax payable for a maximum period of four subsequent years.

The duration of the tax exemption and reduction described above is calculated from the first year in which the enterprise has taxable income. If an enterprise does not have taxable income in the first three years in which it has turnover, the period for the tax exemption and reduction is calculated from the fourth year.

**Capital gains.** Gains derived from sales of shares or assignments of capital in enterprises are subject to tax at a rate of 25%. The taxable income equals the transfer price less the sum of the purchase price of the transferred capital and expenses incurred with respect to the transfer.

Foreign investors transferring securities (for example, listed shares of public companies) are subject to presumptive tax at a rate of 0.1% on total sale proceeds, regardless of whether the transfer is profitable. However, securities transfers by individuals from 1 August 2011 through 31 December 2012 enjoy a 50% tax reduction.

**Administration.** Enterprises normally use the calendar year as their tax year. Enterprises that have their own particular characteristics of operational organization may choose a financial year of 12 months according to the Gregorian calendar and they must notify the local authorities of such year.

Enterprises must file quarterly provisional income tax returns and pay their quarterly income tax due within 30 days after the last day of the quarter. Enterprises must file a final income tax return and pay any balance of income tax due within 90 days after the end of the tax year.

A fraudulent return or a return filed with the intent to avoid tax is subject to a penalty of up to three times the amount involved. Late payments of tax are subject to a fine of 0.05% of the unpaid amount for each day that the payment is delayed.

**Dividends.** The remittance tax was abolished, effective from 1 January 2004. As a result, dividends and branch remittances are not subject to withholding tax.

**Withholding taxes on interest and royalties.** The rate of withholding tax on interest paid under loan contracts is reduced from 10% to 5%, effective from 1 March 2012.

A withholding tax at a rate of 10% is imposed on royalties paid to foreign legal entities with respect to technology transfers and licensing.

**Foreign tax relief.** Vietnam has signed tax treaties with several countries that provide relief from double taxation (see Section F).
C. Determination of taxable income

**General.** The taxable income of an enterprise is the income shown in the financial statements, subject to certain adjustments. Taxable income includes income derived by branch operations from business and other activities.

An enterprise may deduct expenses if the following conditions are satisfied:

- The expenses arose in and are related to the production and business activities of the enterprise.
- The expenses are accompanied by complete invoices and source vouchers as required by law.

Certain expenses are not deductible in determining taxable income, including the following:

- Expenses that do not satisfy both conditions mentioned in the preceding paragraph.
- Provisions that do not conform to the regulations of the Ministry of Finance.
- Depreciation of fixed assets that does not conform to the regulations of the Ministry of Finance.
- Accrued expenses that are not in compliance with regulations except for accrued expenses corresponding to taxable turnover that has been recognized.
- The compensated value of damaged goods resulting from expiration or biochemical processes.
- Bonuses and life insurance expenses for employees that are not clearly stated in the labor contracts, the collective labor contracts, the financial regulations of the company or the reward regulations promulgated by the chairman of the board of management.
- Interest payments on loans corresponding to the unpaid portion of registered capital in accordance with the capital contribution schedule provided in the enterprise charter.
- Interest payments on loans borrowed from lenders that are not credit institutions or economic organizations that exceed 150% of the basic interest rate quoted by the State Bank of Vietnam at the time of the loan agreement.
- Expenses for advertising, marketing, promotion and broker’s commissions (excluding insurance brokerage, commissions provided by the Law on Insurance Business, commissions for agents who sell goods at the prices stipulated by their principals and commissions for distributors of multi-level marketing companies), expenses for receptions, formal occasions and conferences, expenses for marketing support, expenses for costs support, payment discounts and expenses for complimentary newspapers by press agencies (except for complimentary newspapers given to wounded and sick soldiers, and soldiers in islands, remote areas and areas with special difficult conditions), to the extent that these expenses exceed 10% of the “total amount of deductible expenses.” For the first three years from the date of establishment of newly established enterprises, the percentage is increased to 15%. For purposes of calculating the limit on the deductibility of expenses, the “total amount of deductible expenses” does not include the expenses mentioned above or the purchase price of goods in the case of trading activities.
- Expenses sourced from other funding and expenses paid from the Science and Technology Development Fund of the enterprise.
• The portion of expenses that are permitted to be recovered and that exceed the ratio provided in an approved petroleum contract. If a petroleum contract does not provide the recoverable expenses ratio, the ratio is deemed to equal 35%.

• The portion of business management expenses allocated by a foreign company to its resident establishment in Vietnam (for example, head office charges allocated to the Vietnam branch) that exceeds the level allowed under the regulations.

• Input value-added tax (VAT) that has been credited or refunded, input VAT on the value of a car of nine seats or less that exceeds VND 1,600,000,000, corporate income tax (except for the corporate income tax that a Vietnamese company pays on behalf of a foreign contractor under a net contract) and personal income tax (unless the employer pays net salary to employees).

• Expenses that do not correspond to taxable revenue.

• Exchange-rate loss as a result of the revaluation of the year-end balance of money items in foreign currencies, except for the revaluation of payables in foreign currencies.

• Exchange-rate loss arising in the process of capital construction of fixed assets, which is governed by a separate regulation of the Ministry of Finance.

**Inventories.** Inventory valuation should be consistent with the accounting principles and standards selected by the company and approved by the MOF. No specific guidelines have been established by the tax authorities.

**Tax depreciation.** Depreciation of fixed assets is normally computed using the straight-line method. The MOF has issued guidelines setting forth the minimum and maximum years for depreciation of various assets, but companies may apply to the MOF for permission to use different time periods. The following are the minimum and maximum years of depreciation for certain categories of assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intangible assets</td>
<td>20*</td>
</tr>
<tr>
<td>Buildings and factories</td>
<td>5 to 50</td>
</tr>
<tr>
<td>Tools and machinery</td>
<td>3 to 20</td>
</tr>
<tr>
<td>Transportation vehicles</td>
<td>6 to 30</td>
</tr>
<tr>
<td>Other fixed assets</td>
<td>2 to 40</td>
</tr>
</tbody>
</table>

* Depreciation period for a land-use right corresponds to the period of the lease, up to a maximum of 20 years.

Depreciation at rates exceeding those allowed by the MOF is not deductible for tax purposes. For cars with nine seats or less purchased by enterprises for business other than passenger transportation, hotel, or tourism, the depreciable amount is capped at VND 1,600,000,000 (US$80,000).

**Relief for losses.** Enterprises that incur losses may carry forward the losses to the following five years and claim such losses as deductions from taxable income. Losses must be wholly carried forward to consecutive years (including the year of a tax holiday).

Enterprises that incur losses from real property transfers may carry forward the losses to offset only the assessable income from such activities.

Carrybacks of losses are not allowed.
Groups of companies. Dependent production establishments of a company operating in different areas of Vietnam must declare and pay tax with the local tax authorities where the dependent establishments’ offices are located based on the ratio of the expenses of the dependent establishment to the total expenses of the company. The offsetting of losses and profits between parents and subsidiaries is not allowed.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax (VAT); imposed on all goods and services consumed in and imported into Vietnam, including goods and services subject to special consumption tax, except for nontaxable items</td>

E. Miscellaneous matters

Foreign-exchange controls. Enterprises with foreign-owned capital must open accounts denominated in a foreign currency or the Vietnamese dong (VND) at a bank located in Vietnam and approved by the State Bank of Vietnam (SBV). All foreign-exchange transactions, such as payments or overseas remittances, must be in accordance with policies set by the SBV.

Enterprises with foreign-owned capital and foreign parties may purchase foreign exchange from a commercial bank to meet the requirements of current transactions or other permitted transactions, subject to the bank having available foreign exchange.

The government may guarantee foreign currency to especially important investment projects or assure the availability of foreign currency to investors in infrastructure facilities and other important projects.

Transfer pricing. The Vietnamese tax authorities may recalculate the purchase or sales price to reflect the domestic or foreign market price. The methods permissible under the regulation closely resemble the methods provided for by the Organization for Economic Cooperation and Development (OECD) guidelines. The following are the permissible methods:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Profit-split method
- Transaction net margin method

F. Treaty witholding tax rates

The withholding rates under Vietnam’s double tax treaties are listed in the following table.

</tbody>
</table>

(a) The rates vary depending on the percentage of the payer’s capital that is owned by the recipient of the dividends.

(b) The treaty with France does not cover the taxation of interest.

Vietnam has signed double tax treaties with Algeria, Egypt, Kazakhstan, Morocco, Mozambique and Tunisia, but these treaties have not yet been ratified or have not yet taken effect.
A. At a glance

Corporate Income Tax Rate (%) 15 to 40 (a)
Capital Gains Tax Rate (%) 0
Branch Tax Rate (%) 15 to 40 (a)
Withholding Tax (%) (b)
   Dividends 15 (c)
   Interest 15 (d)
   Royalties 20 (e)
   Management Fees 20 (f)
   Branch Remittance Tax 0
Net Operating Losses (Years)
   Carryback 0
   Carryforward 5 or 10 (g)

(a) For details, see Section B.
(b) These withholding taxes apply to payments to resident and nonresident companies and individuals.
(c) For resident and nonresident companies and individuals, this is a final tax. Zambian-incorporated companies may offset the withholding tax imposed on dividends received from other Zambian-incorporated companies against withholding tax payable on their own distributions of dividends.
(d) This rate applies to interest paid to companies. This is a final tax for nonresident companies. Resident companies may credit the withholding tax against their income tax.
(e) For individuals and nonresident companies, this is a final tax. Resident companies may credit the withholding tax against their income tax.
(f) This is a final tax applicable to nonresident companies and individuals. Resident companies and individuals include management fees in their taxable income and do not suffer withholding tax on these fees.
(g) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Resident and nonresident companies are subject to tax on their income derived from Zambian sources. Resident companies are also subject to tax on profits derived from a business carried on partly inside, and partly outside, Zambia. A
A company is considered resident in Zambia if it is incorporated in Zambia or if the central management and control of the company’s business or affairs are exercised in Zambia.

**Tax rates.** The following are the standard corporate tax rates.

<table>
<thead>
<tr>
<th>Source</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Farming</td>
<td>10</td>
</tr>
<tr>
<td>Export of nontraditional products</td>
<td>15</td>
</tr>
<tr>
<td>Manufacturing</td>
<td>35</td>
</tr>
<tr>
<td>Banking income</td>
<td>35</td>
</tr>
<tr>
<td>Mobile telephone operators</td>
<td></td>
</tr>
<tr>
<td>Profits up to K 250 million</td>
<td>35</td>
</tr>
<tr>
<td>Profits exceeding K 250 million</td>
<td>40</td>
</tr>
<tr>
<td>Royalties</td>
<td>35 (a)</td>
</tr>
<tr>
<td>Income from mining operations</td>
<td>30 (b)</td>
</tr>
<tr>
<td>Trading and other sources</td>
<td>35</td>
</tr>
</tbody>
</table>

(a) A 20% final withholding tax is imposed on royalties paid to nonresidents.
(b) A mining operation is any operation carried out under a mining right referred to in Section 6 of the Mines and Minerals Development Act, but does not include any operations carried out under a prospecting permit or prospecting license or any operations involving only mineral processing.

A tax incentive is available to companies that are newly listed on the Lusaka Stock Exchange. A two percentage point reduction of each corporate tax rate is granted to such companies. In addition, a reduction of five percentage points (for a total reduction of seven percentage points) of each corporate tax rate is available to companies with more than 33% of their shares owned by Zambians. The incentive applies for one year only, and a company may claim the incentive only once.

**Capital gains.** Capital gains are not subject to tax in Zambia, but depreciation recaptured for tax purposes (see *Tax depreciation*) is taxable at the regular corporate tax rates. In addition, a property transfer tax is imposed (see Section D).

**Administration.** The Zambia Revenue Authority administers the Income Tax Act. The tax year runs from 1 January to 31 December. However, the 2012 tax year runs for nine months, from 1 April 2012 to 31 December 2012. Annual tax returns must be filed by 30 June of the following tax year.

Companies must make four advance payments of tax, which are due on 14 April, 14 July, 14 October and 14 January. The installments are based on an estimate of the tax due for the year. The balance of tax due must be paid by the due date for filing the annual tax return.

A company may apply to the Commissioner-General to use an accounting year other than the standard tax year. However, the due dates described above for filing returns and advance payments of tax also apply to companies with an accounting year-end other than 31 December.

**Dividends.** A 15% withholding tax is imposed on dividends paid. For resident and nonresident companies and individuals, this is a final tax.

Zambian-incorporated companies may offset the withholding tax imposed on dividends received from other Zambian-incorporated
companies against withholding tax payable on their own distributions of dividends.

Dividends received from foreign companies are not subject to tax. No special rules apply to dividends received from subsidiaries.

**Foreign tax relief.** A foreign tax credit is available to resident companies for foreign taxes paid on foreign income subject to Zambian tax. The amount of the tax credit is the lower of the Zambian tax payable on the foreign income and the foreign tax paid on the same income.

### C. Determination of trading income

**General.** Taxable income is the net profit reported in the companies’ financial statements, adjusted by certain tax law provisions. Expenses are deductible to the extent they are incurred wholly and exclusively for the purposes of the business.

Companies engaged in fishing or farming for two consecutive tax years may elect to calculate taxable income or loss for the two tax years by averaging the taxable income earned or loss incurred in each of the two tax years. This election must be filed with the Commissioner-General before the end of the tax year following the second consecutive tax year. The election is not allowed in certain circumstances.

**Inventories.** Inventories are valued at the lower of cost or net realizable value.

**Provisions.** Specific identifiable provisions are allowed for tax purposes, but general provisions are not allowed.

**Tax depreciation.** Industrial buildings qualify for an initial allowance of 10%. The initial allowance is not deductible from the cost of the assets. Annual wear-and-tear allowances, which are calculated using the straight-line method, are available for the following assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial buildings</td>
<td>10</td>
</tr>
<tr>
<td>Low-cost housing (buildings used to provide housing for the purposes of a business with a cost per unit of up to K 20 million [US$4,000])</td>
<td>10</td>
</tr>
<tr>
<td>Others</td>
<td>5</td>
</tr>
<tr>
<td>Commercial buildings</td>
<td>2</td>
</tr>
<tr>
<td>Implements and plant and machinery used in farming, tourism and manufacturing</td>
<td>50</td>
</tr>
<tr>
<td>Other implements and plant and machinery, and commercial vehicles</td>
<td>25</td>
</tr>
<tr>
<td>Other vehicles</td>
<td>20</td>
</tr>
</tbody>
</table>

The amount of depreciation claimed on an asset may be recaptured when the asset is sold. In general, the amount recaptured is the excess of the sales price over the tax value, but it is limited to the amount of depreciation claimed.

**Relief for losses.** Tax losses may be carried forward five years to offset income from the same source. Mining operations and companies operating in the hydro- and thermo-generation sector may
carry forward losses for a period of 10 years. In general, losses may not be carried back.

Groups of companies. There are no provisions for filing consolidated returns.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax, on any supply of goods and services, other than an exempt supply, made in Zambia and on taxable imports; exports are zero-rated</td>
<td>16</td>
</tr>
<tr>
<td>National Pensions Scheme Authority (NAPSA; social security system) contributions on monthly wages; maximum contribution of K 586,984.60 per month for both employers and employees</td>
<td>Employer 5</td>
</tr>
<tr>
<td>Property transfer tax, on transfers of shares of companies incorporated in Zambia, and land, buildings and structures located in Zambia</td>
<td>5</td>
</tr>
<tr>
<td>Property transfer tax on transfer of mining rights</td>
<td>10</td>
</tr>
<tr>
<td>Royalty, on the extraction, production and selling of ore</td>
<td>6</td>
</tr>
</tbody>
</table>

E. Foreign-exchange controls

The Zambian currency is the kwacha (K). The exchange rate of the kwacha against foreign currencies fluctuates.

Zambia does not impose foreign-exchange controls.

F. Treaty withholding tax rates

| Management fees |
|-----------------|-----------------|-----------------|-----------------|
| Dividends | Interest | Royalties | fees |
| % | % | % | % |

(a) Special tax rates apply to certain enterprises. For details, see Section B.
(b) An AIDS levy of 3% is imposed on income tax payable (excluding tax on income subject to special rates).
(c) Tax is imposed on capital gains on sales of immovable property and listed and unlisted marketable securities. See Section B.
(d) A capital gains withholding tax is imposed on the proceeds from sales of listed and unlisted marketable securities and immovable property. The 1% withholding tax on the disposal of securities listed on the Zimbabwe Stock Exchange is a final tax. See Section B.
(e) The 10% rate applies to dividends paid by companies listed on the Zimbabwe Stock Exchange to resident individuals and nonresidents. The 15% rate applies to other dividends paid to resident individuals and nonresidents.
(f) This is a final withholding tax imposed on residents. The following types of interest are exempt from income tax and withholding tax:
  • Interest paid by the People’s Own Savings Bank
  • Interest on building society Class C (tax-free) shares
(g) This is a final tax imposed on the income to maturity of treasury bills, bankers’ acceptances and discounted instruments traded by financial institutions that are purchased by resident investors who are not financial institutions. The tax is imposed at the time of disposal or maturity of the instrument.
(h) These withholding taxes are imposed on nonresidents. The income is also subject to income tax unless a tax treaty provides that the withholding tax is a final tax.
(i) This is a final tax imposed on remittances transferred from Zimbabwe by nonresidents for technical, managerial, administrative or consulting expenditures incurred outside Zimbabwe in connection with a trade carried on in Zimbabwe.
(j) This tax is imposed on payments by residents to nonresidents of technical, managerial, administrative, consulting or directors’ fees.
(k) This tax is withheld from all payments made under contracts for more than a specified threshold to resident suppliers who cannot provide a tax-clearance certificate.
(l) Only remittances of head office expenditures are subject to a 15% withholding tax.
(m) Mining losses are ring fenced to specific locations and may be carried forward indefinitely.
B. Taxes on corporate income and gains

Corporate income tax. Income tax is levied in foreign currency on all amounts (other than capital) received or accrued in foreign currency from a Zimbabwean source or a deemed Zimbabwean source, less expenditures not of a capital nature incurred in the production of income or for business purposes. Certain specific types of income are exempt.

Foreign interest and dividends accruing to taxpayers that are ordinarily resident in Zimbabwe are deemed to be from a source in Zimbabwe. A corporation is ordinarily resident in Zimbabwe if it is managed and controlled in Zimbabwe.

Rates of corporate tax. Resident and nonresident companies are subject to income tax at a rate of 25%. Effective from 1 January 2011, resident companies are subject to income tax at a rate of 20% on gross foreign dividends receivable.

An AIDS levy of 3% is imposed on income tax payable (excluding tax on income subject to special rates).

Special tax rates. Special tax rates apply to the following enterprises.

<table>

</tbody>
</table>

* The 3% AIDS levy is also payable.

Interest received by residents on deposits with Zimbabwean financial institutions and building societies is exempt from income tax, but it is subject to a final withholding tax at a rate of 15%. A final withholding tax at a rate of 15% is also imposed on the income to maturity of treasury bills, bankers’ acceptances and discounted instruments traded by financial institutions that are purchased by resident investors that are not financial institutions. The tax is imposed at the time of disposal or maturity of the instrument. No deduction for expenses and losses is permitted from
interest subject to the final taxes described above. Other interest received by residents is taxable at the regular corporate income tax rate and may be offset by expenses and losses.

**Tax concessions.** In the past, export-processing zones were designated in the major business centers and border areas of Zimbabwe. Concessions have recently been restricted to licenses issued before 1 January 2007 to certain investors to operate in these zones. The concessions are in the form of reduced rates or an exemption with respect to the following taxes:

- Income tax on profits (0% rate for five years and 15% rate for subsequent years)
- Capital gains tax
- Nonresident and resident shareholders taxes on dividends
- Nonresident taxes on remittances, fees and royalties
- Customs duty
- Value-added tax on goods and services (refundable)

Foreign entities that provide finance for development in Zimbabwe are exempt from income tax and capital gains tax.

**Capital gains.** Withholding tax is imposed on the gross proceeds derived from sales of listed marketable securities and immovable property. The withholding tax rates on the disposal of assets acquired before 1 February 2009 are 1% for listed marketable securities and 5% for unlisted marketable securities and immovable property. The withholding tax rates on disposal of assets acquired on or after 1 February 2009 are 1% for listed marketable securities, 5% for unlisted marketable securities and 15% for immovable property. This tax is offset against any capital gains tax assessed on the transaction.

Capital gains derived from the disposal of immovable property and unlisted securities acquired before 1 February 2009 are taxed at the greater of 5% of the gross sale proceeds and the amount of the withholding tax withheld on disposal.

Capital gains derived from disposals of immovable property and unlisted marketable securities acquired after 1 February 2009 are taxed at a rate of 20%. Gains are determined by deducting from the selling price the cost plus an allowance of 2.5% per year on the cost from the date the cost was incurred to the date of disposal. Capital allowances recaptured for income tax purposes (see Section C) are excluded from gains. Capital gain withholding tax is offset against any capital gains tax assessed on the transaction.

Capital gains derived from the disposal of listed securities are exempt from capital gains tax, effective from 1 August 2009, but the gross sale proceeds are subject to 1% capital gains withholding tax which is a final tax.

**Administration.** Zimbabwe’s tax year ends on 31 December. Tax returns must be filed on 30 April. The Revenue Authority prefers that companies use accounting years ending in September, October, November or December of a given tax year. Self-assessment has been introduced for specified taxpayers.

Corporate tax must be paid during the relevant tax year. Provisional payments equaling specified percentages of the estimated total tax payable are due on the following dates:
Penalties can be imposed for late or incorrect returns, and late payments are subject to interest at a rate of 10% per year.

Withholding taxes that are not considered final taxes are credited to the income tax imposed on the income from which the tax has been withheld.

**Dividends.** Dividends received by a resident corporation from another resident corporation are exempt from withholding tax and income tax. A 10% withholding tax is imposed on dividends paid by companies listed on the Zimbabwe Stock Exchange to resident individuals and nonresidents. A 15% withholding tax is imposed on other dividends paid to resident individuals and nonresidents. Gross dividends received from foreign companies are subject to tax at a rate of 20%.

**Foreign tax relief.** If relief is not provided by a treaty, a unilateral tax credit is given for foreign withholding tax. The tax credit may not exceed the Zimbabwean income tax imposed on the income.

### C. Determination of trading income

**General.** Income tax is levied on all income from a source in Zimbabwe or deemed to be in Zimbabwe. The following types of interest are exempt from income tax:
- People’s Own Savings Bank interest
- Interest from certain building society investments

Interest on deposits with financial institutions and income from treasury bills, bankers’ acceptances and discounted instruments traded by financial institutions is subject to a final withholding tax at a rate of 15%. For further details regarding this withholding tax, see Section B.

Expenses incurred for business purposes are generally deductible. The following expenses are not deductible:
- Expenses incurred in the production of exempt income or income not derived or deemed to be derived from Zimbabwe
- Pension fund contributions in excess of a specified amount
- Cost of attending trade missions and conventions in excess of a specified amount
- Rent or repairs for premises not occupied for purposes of trade
- Payments in restraint of trade
- Entertainment expenses
- Payments in excess of a specified amount for the lease of passenger motor vehicles (as defined)
- Interest relating to excess debt in a company with a debt-to-equity ratio that exceeds 3:1
- General administration expenses charged by a holding or subsidiary company or foreign head office that exceed 0.75% of expenditure incurred during the preproduction phase or 1% of tax-deductible expenditure incurred after the beginning of trading or the production of income

Donations of up to a specified threshold for the construction, maintenance or operation of hospitals and schools run by the state,
local authorities or religious organizations and donations to approved research institutions are deductible.

A double tax deduction is allowed for specified export market development expenditure.

Amounts contributed to approved scientific and educational bodies for industrial research or scientific experimental work are also deductible for tax purposes.

**Inventories.** The only acceptable inventory valuation methods for tax purposes are cost, using the first-in, first-out (FIFO) method, and market value.

**Provisions.** In general, only specific provisions are deductible for tax purposes.

**Tax depreciation.** Depreciation charged in the financial statements is not deductible; instead, a 25% special initial allowance is granted on the cost of certain assets. A wear-and-tear allowance of 25% of cost is granted in the following three years. The special initial allowance is granted on the cost of construction or additions to fixed assets other than land and certain buildings and also on the purchase price of movable property. If the special initial allowance is not claimed, a wear-and-tear allowance at varying rates is granted on these assets. The following are the rates and the methods of computing this wear-and-tear allowance for certain assets.

<table>

</tr>
</tbody>
</table>

* Toll roads and toll bridges declared to be such under the Toll Roads Act are included in this category.

All capital allowances are subject to recapture on the disposal of assets on which such allowances have been claimed. Any amounts recaptured are subject to tax at the regular corporate tax rate. The full sale price of mining assets on which capital allowances have been granted is subject to tax at the corporate tax rate for mining.

**Relief for losses.** Mining losses are ring fenced to specific locations and may be carried forward indefinitely. Other losses may be carried forward for six years. Losses may not be carried back.

**Groups of companies.** Zimbabwean law does not contain measures for filing consolidated returns or for relieving losses within a group.

Transfers of assets in a merger or group reconstruction between companies under common control may be made at the tax value for both income tax and capital gains tax purposes. On the subsequent disposal of such assets outside the group, the gain or loss to the seller is computed with reference to the cost to the first transferor within the group.

**D. Other significant taxes**

The following table summarizes other significant taxes.
Nature of tax | Rate (%)
---|---
Value-added tax; on the supply and importation of goods and services; certain items are exempt, including, financial services, medical services, fuel, tobacco, educational or training services, long-term residential leases and transport of passengers by road or rail; suppliers of qualifying goods and services with an annual value in excess of a specified threshold must register; the annual threshold is currently US$60,000

**Standard rate**

Exports, prescribed drugs and services supplied by designated tourist facilities to tourists that are paid for with foreign currency, as well as certain other items

| 15 |

Presumptive taxes on different bases and at various rates are imposed on informal traders, small-scale miners, and operators of taxicabs, omnibuses, goods vehicles, driving schools, hair-dressing salons and licensed and unlicensed bottle stores and restaurants.

**E. Miscellaneous matters**

**Foreign-exchange controls.** The legislation and regulations with respect to foreign-exchange controls are currently under review. The present rules are discussed below.

The government still imposes broad controls over all transactions involving a nonresident. Applications through commercial banks are required for the approval of most transactions of this nature. Commercial banks refer exceptional items to the Reserve Bank of Zimbabwe.

Foreign investment of up to 35% in primary issues of shares and bonds is permitted if funded by inward transfers of foreign exchange. Purchases by foreign investors in the secondary market are not permitted, but disposals on that market are allowed.

Agreements relating to foreign borrowings require registration with the commercial banker of the borrower before implementation. Borrowings in excess of specified limits require the approval of the Reserve Bank of Zimbabwe. The approvals are granted based on the merits of the borrowings in accordance with guidelines set by the External Loans Coordinating Committee. The guidelines provide that foreign borrowings may be approved only if they are used to fund productive, export-oriented ventures that have the potential to generate sufficient foreign currency for loan principal and interest repayments without recourse to the foreign-currency market. Foreign loans to purchase shares, existing companies or real estate, or to fund private consumption, personal loans or retail inventories, are generally discouraged.

With the approval of the authorities, 100% of after-tax normal trading profits may be remitted to nonresident shareholders within one year after the accrual of the profits.

After-tax dividends and capital gains derived from investments on the Zimbabwe Stock Exchange are fully remittable.

**Debt-to-equity rules.** Debt-to-equity rules apply to all companies (see Section C).
### F. Treaty Withholding Tax Rates

The rates shown in the table reflect the lower of the treaty rate and the rate under domestic tax law.
