

The role for oil and gas in climate change

Only half of American consumers believe oil and gas companies have acknowledged that climate change is real, and nearly a third say the industry doesn't want to be a part of the solution. Industry executive responses tell a different story.

Oil and gas executive views

believe **climate change is real.**

agree climate change should **be addressed immediately.**

say oil and gas companies want to be and can be **part of the solution.**

When asked how the industry is combatting climate change, oil and gas executives most commonly cited:

Greenhouse gas emission reductions

43%

Company efficiency

19%

Alternative energy and investment

18%
