Corporate income tax is prepaid in four installments. Companies with a financial year ending on 31 December must pay the installments on 15 March, 15 June, 15 September and 15 December. The balance of corporate tax is due by 15 May of the following year. Other companies must pay the balance of corporate tax due within four months following the end of their financial year.

In general, late payment and late filing are subject to a 10% penalty. If additional tax is payable as a result of a reassessment of tax, interest is charged at 0.4% per month (4.8% per year). Many exceptions and specific rules apply to interest and penalties.

**Capital gains.** Under the corporate income tax rules, in general, no distinction is made between the taxation of capital gains and the taxation of other income. In general, all income is taxed at the standard income tax rate of 20%.

Capital gains derived from the sale of qualifying participations are exempt from tax. Qualifying participations must satisfy both of the following conditions:
• They must be considered to be *titres de participation* (specific class of shares for accounting purposes that enables the shareholder to have a controlling interest) or be eligible for the dividend participation exemption regime (see *Dividends received* in Section C).

• They must have been held for at least two years before their sale.

However, corporate income tax applies to 5% of the gross capital gains (that is, not reduced by any related costs) realized on qualifying participations. As a result, the effective tax rate on such gains is 1%.

Corporate income tax applies to 10% of the gross capital gains derived from the sale of industrial property rights if they have been held for at least two years before their sale.

**Dividends paid.** Saint-Martin does not levy withholding tax on dividend distributions.

**Foreign tax relief.** Saint-Martin domestic law grants a tax credit with respect to tax on foreign-source income that has already been taxed in its source country, even in the absence of a double tax treaty. The tax credit equals the amount of tax paid in the source country, up to the corresponding amount of tax due in Saint-Martin for this income.

**C. Determination of trading income**

**General.** The assessment is based on financial statements prepared according to French generally accepted accounting principles, subject to certain adjustments.

All expenses incurred with respect to conducting a business are, in principle, deductible.

**Dividends received.** To compute taxable profit, favorable tax treatment may apply to dividends received by companies established in Saint-Martin that qualify as parent companies and receive dividends from companies established in Saint-Martin or abroad.

To qualify for this favorable treatment, the following conditions must be met:

• The parent company must be liable for corporate income tax.

• The parent company must hold a minimum of 5% of the distributing company’s capital (financial rights and voting rights) or the amount paid for the shareholding is at least EUR1 million.

• The shares are held by the parent company for at least one year.

If the above conditions are met, 95% of the dividends received from the subsidiary are exempt from corporate income tax for the parent company. The remaining 5% that is still taxable may not exceed expenses and costs that the parent company incurred during the tax year.

**Inventories.** Inventory is normally valued at the lower of cost or market value. Cost must be determined under a weighted average cost price method. A first-in, first-out (FIFO) basis is also generally acceptable, but a last-in, first-out (LIFO) basis is not permitted.
Reserves. In determining accounting profit, companies must book certain reserves, such as reserves for a decrease in the value of assets, risk of loss or expenses. These reserves are normally deductible for tax purposes. In addition, the law provides for the deduction of special reserves, including reserves for foreign investments and price increases.

Capital allowances. In general, assets are depreciated using the straight-line method. However, specific assets are generally depreciated using the declining-balance method.

Depreciable assets composed of various parts with different characteristics must be depreciated on a separate basis. These assets must be split into the following:
- A principal component or structure
- Additional components

The depreciable amount of each asset must be spread out over its likely useful life for the company, which corresponds to the time period during which the company may expect to derive a profit from it. The depreciation method applied to each asset (straight-line method or accelerated method) must also be consistent with the pace at which the company expects to derive a profit from the asset.

Periodic assessment of the residual value of each component must be conducted to establish a (non-tax deductible) provision for impairment if needed.

For tax purposes, the depreciation of assets that have not been split into components and the depreciation of the asset’s principal component that has been split into components can be spread out over the useful life commonly accepted in business practices. This rule does not apply to buildings acquired by real estate investment companies. The following are some of the acceptable straight-line rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial buildings</td>
<td>2 to 5</td>
</tr>
<tr>
<td>Office buildings</td>
<td>4</td>
</tr>
<tr>
<td>Furniture</td>
<td>10</td>
</tr>
</tbody>
</table>

Certain specified assets may be depreciated using accelerated depreciation methods. For example, hotel investments (movable or immovable) may be fully depreciated over a 12-month period.

Relief for tax losses. Tax operating losses can be carried forward for an unlimited number of years. They may also be carried back to offset profits in the preceding three years. If losses are carried back, a credit is granted rather than a refund. The credit may be used in the following five years and is refundable in the sixth year if it is not used.

Groups of companies. Related companies subject to corporate tax may elect to form a tax-consolidated group. Under the tax-consolidation regime, the parent company files a consolidated return, thereby allowing the offset of losses of one group entity against the profits of related companies. The parent company then pays tax based on the net taxable income of companies.
included in the consolidated group, after certain adjustments for intra-group provisions are made, such as the following:

- Intra-group asset or share transfers, as well as any subsequent depreciation related to these transfers, are neutralized.
- Waivers of debts and subsidies between members of the group are neutralized.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>

<td>Business activity tax (taxe générale sur le chiffre d’affaire, or TGCA); levied in principle on all sales of goods and services provided in exchange for payment within the territory of Saint-Martin by persons acting independently as producers, traders or persons supplying services</td>
<td>4</td>
</tr>
<tr>
<td>Contribution des patentes; subject to certain exemptions that have a limited scope, the tax is payable each year by individuals and legal entities that regularly carry on a non-salaried business activity in Saint-Martin; a company may request a cap set at 3% of the value-added generated in the preceding year</td>
<td></td>
</tr>
<tr>
<td>Companies in general; tax base is the cost of equipment and movable assets (such as furniture, vehicles and computers)</td>
<td>13</td>
</tr>
<tr>
<td>Companies exercising a non-commercial activity (such as persons in the medical sector, lawyers, accountants, auditors, architects, consulting engineers, software designers and surveyors); tax base is revenue</td>
<td>5</td>
</tr>
</tbody>
</table>

E. Miscellaneous matters

Foreign-exchange controls. Saint-Martin does not impose any specific foreign-exchange controls. The euro (EUR) is the official currency. The US dollar (USD) is used on a daily basis.

Payments to residents of tax havens or to uncooperative states or territories. Under Article 238 A of the Saint-Martin Tax Code, interest, royalties and other remuneration paid to a recipient established in a tax haven or on a bank account located in a tax haven are deemed to be fictitious and not at arm’s length. As a result, to deduct the amount paid, the Saint-Martin entity must prove that the operation is effective (that it effectively compensates executed services) and is at arm’s length.

For purposes of the above rules, a privileged tax regime is a regime under which the effective tax paid is 50% lower than the tax that would be paid in Saint-Martin in similar situations.

Controlled foreign companies. Under Section 209 B of the Saint-Martin Tax Code, if Saint-Martin companies subject to corporate income tax in Saint-Martin have a foreign branch or if they hold, directly or indirectly, an interest (shareholding, voting rights or share in the profits) of at least 50% in any type of structure benefiting from a privileged tax regime in its home country (the
shareholding threshold is reduced to 5% if more than 50% of the foreign entity is held by Saint-Martin companies acting in concert or by entities controlled by the Saint-Martin company), the profits of this foreign entity or enterprise are subject to corporate income tax in Saint-Martin. Such foreign entity is known as a CFC. If the foreign profits have been realized by a legal entity, these profits are taxed as a deemed distribution in the hands of the Saint-Martin company. If the profits have been realized by an enterprise (an establishment or a branch), these profits are taxed as profits of the Saint-Martin company.

For purposes of the above rules, a privileged tax regime is a regime under which the effective tax paid is 50% lower than the tax that would be paid in Saint-Martin in similar situations.

Tax paid by a CFC in its home country may be credited against Saint-Martin corporate income tax.

The CFC rules do not apply if the profits of the foreign entity are derived from an activity effectively performed in the country of establishment. However, this exception does not apply if either of the two following circumstances exists:

- More than 20% of the profits are derived from portfolio management activities (involving securities, shares and outstanding debts) and intangible rights management.
- The total profits derived from the items mentioned in the first bullet and from intercompany services represent more than 50% of the profits of the foreign entity.

In such circumstances, the Saint-Martin company may nevertheless try to establish that the principal effect from the use of the foreign entity is not the obtaining of an advantage from a privileged tax regime.

**F. Tax treaties**

A tax treaty between France and Saint-Martin entered into force in 2010. Saint-Martin has not signed any other tax treaty, and tax treaties signed by France do not apply in Saint-Martin.

Saint-Martin grants a tax credit with respect to tax on foreign-source income that has already been taxed in its source country, even in the absence of a double tax treaty. For details, see *Foreign tax relief* in Section B.

(a) The general tax rate of 25% applies to resident companies and nonresident companies with a permanent establishment (PE) in São Tomé and Príncipe. Income derived from oil activities is subject to a specific regime, which includes a tax rate of 30%. Companies exclusively engaged in the agricultural sector benefit from a 50% exemption regarding the respective taxable income.

(b) Nonresident companies without a PE in São Tomé and Príncipe are subject to a final withholding tax at a rate of 20% on certain types of income.

(c) Capital gains are taxed as business income.
B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or IRC) is levied on resident and nonresident entities.

Under São Tomé and Príncipe’s General Tax Code, legal entities with a registered office and place of effective management in São Tomé and Príncipe are deemed to be resident for tax purposes.

Resident entities. Resident companies and other entities, including non-legal entities, whose principal activity is commercial, industrial or agricultural, are subject to IRC on worldwide profits, but a foreign tax credit may reduce the amount of IRC payable (see Foreign tax relief).

A 50% IRC exemption applies to entities exclusively engaged in agricultural activities.

Nonresident entities. Companies or other entities that operate in São Tomé and Príncipe through a PE are subject to IRC on their profits attributable to the PE. General administrative costs attributable to the PE may be deductible under certain conditions.

Income earned by companies or other entities without a PE in São Tomé and Príncipe are subject to IRC through a withholding tax mechanism.

A nonresident entity is deemed to have a PE in São Tomé and Príncipe if it has one of the following fixed places of business to carry out commercial, industrial, agricultural, forestry, livestock or fishing activities:

- A place of management
- A branch
- An office
- A factory
- A workshop
- A natural resources’ extraction site

In addition, a building, installation or assembly yard qualifies for PE purposes if the activity is carried on for more than six months.

Installations, platforms and vessels rendering prospecting and exploration services with respect to natural resources may also attract a PE in São Tomé and Príncipe if the activity is carried out for more than six months.

Free-Zone Regime. São Tomé and Príncipe has implemented a Free-Zone Regime, which grants several tax incentives. Among other incentives, entities included in this regime are entitled to benefit from a tax exemption (covering all taxes for a period of 10 years), as well as exemptions on income of any kind paid to nonresidents. In addition, these entities are not subject to any foreign-exchange controls on their funds held in foreign currency.

Taxation groups. The following taxation groups are established in the IRC Code:

- Group 1, which includes resident entities with an annual turnover (expected for the current year or based on the previous year), equal to or greater than STD500 million (approximately USD23,161), as well as public undertakings, public companies,
partnerships limited by shares and PEs of nonresident entities, regardless of whether their annual turnover exceeds the threshold
• Group 2, which, as a secondary legal regime, includes all companies not included in Group 1 (Group 1 is mandatory for companies that have annual turnover equal to or greater to STD500 million [approximately USD23,161]), as well as other taxable persons that carry out commercial, industrial or agricultural activities or that provide services, even if on an occasional or temporary basis

**Tax rates.** For 2016, IRC is levied at the following rates:

<table>
<thead>
<tr>
<th>Type of enterprise</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Companies or other entities with a head office or effective management control in São Tomé and Príncipe, whose principal activity is commercial, industrial or agricultural</td>
<td>25*</td>
</tr>
<tr>
<td>PEs</td>
<td>25</td>
</tr>
<tr>
<td>Nonresident companies or other entities without a head office, effective management control or a PE in São Tomé and Príncipe; income is subject to withholding tax</td>
<td>20</td>
</tr>
</tbody>
</table>

* Companies exclusively engaged in the agricultural sector benefit from a 50% exemption regarding the respective taxable income.

Certain types of income are subject to withholding tax at a rate of 20% if it is obtained in São Tomé and Príncipe and if the beneficiary is subject to IRC.

A participation exemption mechanism (full or partial) applies to domestic dividends (see *Dividends*). Dividends received from abroad are subject to IRC, but a foreign tax relief mechanism can be applied (see *Foreign tax relief*).

**Simplified regime of taxation.** Micro and small-sized resident companies that have annual turnover of less than STD500 million (approximately USD23,161) and meet certain other conditions may opt to be taxed under the simplified regime of taxation established for companies included in Group 2.

Companies in Group 2 may choose one of the following regimes:
• Simplified accounting records for computing taxable profit.
• Simplified taxation regime, based on presumed margins over the turnover (ranging from 20% to 30%), with a minimum amount of taxable income equal to 18 minimum monthly salaries, as per Article 58 (9) of the São Tomé Corporate Income Tax Code. Ministry of Finance Order No. 5/2010 of 13 April 2010 set the national minimum monthly salary at STD715,000 (approximately USD33).

**Capital gains.** Capital gains are taxed in São Tomé and Príncipe as business income and subject to the general rate of IRC. Capital gains correspond to the positive difference between the sales proceeds, net of expenses incurred on the sale, and the acquisition value, as adjusted by depreciation, impairment relevant for tax purposes and an official index.

Fifty percent of the capital gains derived from disposals of certain qualifying assets held for more than one year may be exempt if the corresponding sales proceeds are reinvested in tangible fixed
assets during a four-year period, consisting of the year before the disposal, the year of the disposal and the two subsequent years after the disposal, and to the extent that such tangible fixed assets are not acquired from a related entity in secondhand condition. A statement of the intention to reinvest the sales proceeds must be included in the annual corporate income tax return in the year of disposal. The remaining 50% of the net gain derived from the disposal is subject to tax in the year of the disposal.

If only a portion of the proceeds is reinvested, the exemption is reduced proportionally. If no reinvestment is made by the end of the second year following the disposal, the net capital gain that remains untaxed (50%) is added to taxable profit for that year and compensatory interest is payable.

**Administration.** In general, the tax year is the calendar year. However, through a request to the tax authorities, nonresident entities with a PE may adopt a different tax year.

All companies engaged in activities in São Tomé and Príncipe must register with the tax department to obtain a taxpayer number.

Entities included in Group 1 and Group 2 (with the exception of those subject to the simplified taxation regime) must file an annual corporate income tax return, together with their financial statements and other documentation. For entities in Group 1, the deadline is 30 April of the year following the tax year. For entities included in Group 2, the deadline is 20 February of such year.

Entities subject to the simplified taxation regime are not required to submit an annual tax return.

All companies must make three advance payments of IRC in June, September and December of the tax year, each equal to 25% of the IRC paid in the preceding year. These payments may be credited against the final tax assessment for the tax year and any remaining amount due must paid with the submission of the year-end tax return. Excessive advance payments are refunded to taxpayers.

Penalties are imposed for the failure to file tax returns and satisfy other compliance obligations. If, on the final assessment, the tax authorities determine that a further payment is required and that the taxpayer is at fault, interest is imposed on the amount of the additional payment. Fines, which are generally based on the amount of tax due, are also imposed. If the tax due is not paid, interest is imposed from the date of the tax authorities’ notice that an additional payment is due.

**Binding rulings.** The General Tax Code grants the taxpayer the possibility of obtaining a binding ruling. The binding ruling is limited to a certain time period, which is determined on a case-by-case basis by the tax authorities.

**Dividends.** Dividends paid by companies to residents and non-residents are generally subject to withholding tax at a rate of 20%.

On distributions to resident parent companies, the 20% withholding tax is treated as a payment on account of the final IRC due.
Under a participation exemption mechanism, a resident company may deduct 100% of dividends received from another resident company if both of the following conditions are met:

- The recipient owns directly at least 20% of the capital.
- The recipient held the interest for an uninterrupted period of at least one year before the date of distribution of the dividends or will subsequently complete this holding period.

If the holding period or the minimum participation conditions are not met, the recipient may deduct 50% of the dividends received for purposes of computing taxable income.

**Foreign tax relief.** Foreign-source income is taxable in São Tomé and Príncipe. However, direct foreign tax may be credited against the local tax liability, limited to the lower of the following amounts:

- The amount of tax incurred in the foreign jurisdiction
- The amount of IRC attributable to the foreign-source income

**C. Determination of trading income**

**General.** Taxable profit is determined according to the following rules:

- For companies included in Group 1, the taxable profit is the net accounting profit computed in accordance with the generally accepted accounting principles, adjusted for positive and negative equity variations and adjusted or corrected by the provisions in the IRC Code. Positive or negative equity variations are considered capital gains or losses for tax purposes.
- For companies included in Group 2 subject to the regime of the simplified accounting records, the taxable profit is based on the specific accounting records required for this regime and equals the difference between the profits and costs (deemed necessary), pertaining to the tax year.
- For companies included in Group 2 subject to the simplified taxation regime, the taxable profit is computed by the application of different coefficients (depending on the activity of the company) to the turnover.

Expenses that are considered essential for the generation or maintenance of profits are deductible. However, certain expenses are not deductible for IRC purposes. These include, but are not limited to, the following:

- Illicit expenses, which are expenses not in compliance with local law
- Depreciation and amortization claimed that exceed the rates fixed in the tax law
- Provisions and impairments (except for those provided in the tax law)
- IRC and other income taxes, including payments on account and withholding tax
- Taxes and other costs of third parties that the company is not legally authorized to bear
- Penalties of any kind, including compensatory interest
- Confidential or improperly documented expenses
- Entertainment expenses to the extent that they exceed 2% of turnover
- Payments made to entities resident in tax havens, unless the company is able to justify the operation from an economic
viewpoint (that is, the need for the costs incurred and the reasonableness of the amounts of the costs)
• Compensation or indemnities paid for insurable risk events
• 50% of the expenses incurred by employees when traveling in their own vehicles at the service of the employer if these amounts are not charged to clients, excluding the amounts subject to personal income tax
• 50% of the expenses incurred with respect to a travel allowance (travel bonuses and compensation, which differ from the expenses mentioned in the preceding bullet), excluding amounts subject to personal income tax

Inventories. Inventories must be consistently valued by one of the following criteria:
• Effective cost of acquisition or production
• Standard costs in accordance with adequate technical and accounting principles
• Cost of sales less the normal profit margin, under certain conditions
• Other methods of valuation subject to prior authorization from the tax authorities

Changes in the method of valuation must be justifiable and acceptable to the tax authorities.

Provisions. The following provisions are deductible:
• Bad and doubtful debts, based on a judicial claim or on an analysis of the accounts receivable
• Inventory losses
• Litigation processes involving items that would represent costs of that year
• Technical provisions imposed on insurance companies and financial institutions by the regulatory authorities of São Tomé and Príncipe

Depreciation. In general, depreciation is calculated using the straight-line method.

Maximum depreciation rates are established by law. If rates that are less than 50% of the official rates are used, part of the depreciation costs will not be tax deductible in the future (that is, in the tax periods that go beyond the maximum period of useful life; this is determined by dividing 100 by the minimum official depreciation rate, which corresponds to half of the standard depreciation rate established by law).

The following depreciation or amortization costs are nondeductible:
• Depreciation or amortization of assets not subject to effective depreciation
• Depreciation of immovable property with respect to the component related to the value of the land or any other component not subject to effective depreciation
• Depreciation or amortization costs computed at rates greater than the maximum accepted rates
• Depreciation costs deriving from the use of rates of less than half of the maximum rates
• Depreciation of light passenger vehicles valued at more than STD200 million (approximately USD9,265), leisure boats and
airplanes (unless allocated for public transportation or to a leasing business)

**Relief for tax losses.** Tax losses may be carried forward for five years. The amount that may be deducted is not capped. Loss carrybacks are not allowed.

Companies included in Group 2 cannot deduct the tax losses of previous years.

**Groups of companies.** The law of São Tomé and Príncipe does not provide a special tax regime for groups of companies (that is, a tax-consolidation regime).

**D. Other significant taxes**

The following table summarizes other significant taxes.

</tbody>
</table>

**E. Miscellaneous matters**

**Foreign-exchange controls.** The currency in São Tomé and Príncipe is the dobra (STD).

São Tomé and Príncipe imposes foreign-exchange controls in certain situations.
Foreign PE profits. Transactions between the head office and a foreign PE must respect the arm’s-length principle.

Mergers and reorganizations. Mergers and other type of corporate reorganizations may be neutral for tax purposes in São Tomé and Príncipe if certain conditions are met.

Controlled foreign companies. A resident shareholder in São Tomé and Príncipe is deemed to have a substantial holding in a controlled foreign company (CFC) if either of the following circumstances exist.

- The shareholder owns directly or indirectly, 25% or more in the capital of the foreign company.
- The shareholder owns 10% or more of the foreign company’s capital, and more than 50% of the foreign company’s capital is owned (directly or indirectly) by entities resident in São Tomé and Príncipe.

In the computation of its taxable profit, a shareholder resident in São Tomé and Príncipe must include the profits after taxes of the CFC in proportion to its total direct or indirect participation.

Under the IRC Code, payments made by a resident entity in São Tomé and Príncipe to nonresidents entities subject to a more favorable tax regime are not deductible for tax purposes, unless the taxpayers can demonstrate that such payments relate to an effective operation and have no abnormal character or are not excessive. However, the deduction of these expenses may be subject to further analysis of the tax authorities, particularly with respect to the level of the payment of the respective taxes due (effective tax burden).

A company is considered an entity subject to a more favorable regime if it is not subject to tax on its income or if the amount of the tax effectively paid is lower than 60% of the tax that would be due if such entity was resident for tax purposes in São Tomé and Príncipe.

Related-party transactions. For related-party transactions (transactions between parties with a special relationship), the tax authorities may make adjustments to taxable profit that are necessary to reflect transactions on an arm’s-length basis.

A special relationship is deemed to exist if one entity has the capacity, directly or indirectly, to influence in a decisive manner the management decisions of another entity. This capacity is deemed to exist in the following relationships:

- Between one entity, and its shareholders and their spouses, ascendants and descendants, if they possess, directly or indirectly, 20% of the capital or voting rights of the entity
- Between two entities in which the same shareholders and their spouses, ascendants and descendants hold, directly or indirectly, a participation of not less than 20% of the capital or voting rights
- Between two entities in which, as a result of their commercial, financial, professional or juridical relations, directly or indirectly established or practiced, a situation of dependence exists in the fiscal year

Debt-to-equity rules. A limitation to the deduction of interest expenses applies if the total amount of total debt of the taxpayer
is excessive. The amount of debt includes all loans granted by shareholders, in cash or in kind, regardless of the agreed type of payment, and credits resulting from the commercial operation that are overdue for more than six months.

For purposes of the above rule, a loan is considered an excessive loan if either of the following circumstances exist:
- The total amount of debt of the taxpayer is higher than twice its equity at any time during the fiscal year.
- The total amount of debt of the taxpayer to any shareholder holding a participation of 20% or more is higher than twice the shareholder’s equity participation.

F. Tax treaties

São Tomé and Príncipe signed its first tax treaty with Portugal in March 2015. However, this treaty is not yet in force.
## Saudi Arabia

A. At a glance

Corporate Income Tax Rate (%)
Companies Engaged in Natural Gas Investment Activities 20
Oil and Hydrocarbon Production Companies 50 to 85 (a)
Other Companies 20
Capital Gains Tax Rate (%) 20
Withholding Tax (%) (b)
Dividends 5
Interest 5
Royalties 15
Net Operating Losses (Years)
Carryback 0
Carryforward Unlimited (d)

(a) For further details, see Section B.
(b) For further details and a complete listing of withholding taxes, see Section B.
(c) See Section C.

B. Taxes on corporate income and gains

Income tax. Income tax is assessed on profits of the following:
- A resident capital company with respect to shares owned directly or indirectly by persons operating in oil and hydrocarbon production
- A resident capital company (only on profits attributable to shares owned by non-Saudi or non-Gulf Cooperation Council [GCC] shareholders; see below)
- A resident non-Saudi or non-GCC natural person who carries on a business in Saudi Arabia
- A nonresident company that carries on business in Saudi Arabia through a permanent establishment
- A nonresident without a permanent establishment in Saudi Arabia that has taxable income from sources in Saudi Arabia (tax is assessed through withholding tax)
- A person engaged in the field of natural gas investment
- A person engaged in the production of oil and hydrocarbon materials

Partners in partnerships (that is, general partnerships, unincorporated joint ventures and limited partnerships) are subject to tax rather than the partnerships themselves.

For income tax purposes, non-Saudis do not include citizens (nationals) of countries that are the members of the GCC. Members of the GCC are Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates. The share of profits attributable to interests owned by GCC nationals in a company is subject to zakat (see Section D). The share of profits attributable to interests owned by non-GCC nationals in that company is subject to income tax.

Rates of tax. All companies, including companies engaged in the business of natural gas investment activity, are taxed at a rate of 20%.

Companies engaged in the production of oil and other hydrocarbons are subject to tax on their net profit at rates ranging from...
The slab rate is determined based on the capital investment of the company. The following are the tax rates.

<table>
<thead>
<tr>
<th>Total capital investment of company</th>
<th>Rate of income tax (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>More than SAR375 billion (USD100 billion)</td>
<td>50</td>
</tr>
<tr>
<td>SAR300 billion to SAR375 billion (USD80 billion to USD100 billion)</td>
<td>65</td>
</tr>
<tr>
<td>SAR225 billion to SAR300 billion (USD60 billion to USD80 billion)</td>
<td>75</td>
</tr>
<tr>
<td>Not more than SAR225 billion (USD60 billion)</td>
<td>85</td>
</tr>
</tbody>
</table>

Withholding tax. A Saudi resident entity, including a permanent establishment of a nonresident, is required to withhold tax from payments made to nonresidents that do not have a legal registration or a permanent establishment in Saudi Arabia with respect to income earned from a source in Saudi Arabia. This rule applies regardless of whether the payer is considered to be a taxpayer under the regulations and whether such payments are treated as a tax-deductible expense in the Saudi resident entity’s tax declaration. The following are the withholding tax rates.

<table>
<thead>
<tr>
<th>Type of payment</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Payments for technical or consultancy services to unrelated parties, payments for services for international telephone calls, rental, airline tickets, air or sea freight charges, dividends distributed, returns on loans (see next paragraph) and insurance or reinsurance premiums</td>
<td>5</td>
</tr>
<tr>
<td>Royalties, payments to the head office or any other related companies for services, including technical or consultancy services and services for international telephone calls</td>
<td>15</td>
</tr>
<tr>
<td>Management fees</td>
<td>20</td>
</tr>
<tr>
<td>All other payments</td>
<td>15</td>
</tr>
</tbody>
</table>

Loan fees (interest expenses and commissions) on interbank deposits paid to nonresident banks are exempt from Saudi withholding tax if such deposits remain with the Saudi resident borrower banks for a maximum period of 90 days. Resident borrower banks are required to submit an annual statement attested by the Saudi Arabian Monetary Authority listing the names of the nonresident lending banks, their addresses, periods of lending and the amount of loan fees paid.

The party withholding the tax must register with the General Authority of Zakat and Tax (GAZT) before the settlement of the first tax payment. The party withholding the tax must deposit the tax withheld with the GAZT within the first 10 days of the month following the month in which the taxable payment is made and issue a certificate to the nonresident party. A delay fine of 1% for each 30 days of delay is computed after the lapse of 30 days from the due date of tax until the date on which the tax is paid. An annual withholding tax return must be filed within 120 days following the end of the tax year.

Capital gains. In general, capital gains are treated as ordinary income and taxed at the regular corporate income tax rates. Capital gains realized by nonresident shareholders on the disposal of
shares in a Saudi Arabian company are subject to tax at a rate of 20%.

Capital gains arising on the sale by non-Saudi shareholders of shares in a Saudi joint stock company traded on the Saudi stock exchange are exempt from tax if the shares (investments) were acquired after the effective date of the new tax regulations (30 July 2004). Under a recent amendment to the tax law, exemption also applies to capital gains realized from the sale of securities traded on stock markets outside Saudi Arabia or through any other means if such securities are also traded on the Saudi Arabian stock market (Tadawul).

Furthermore, no capital gain or loss is computed on the transfer of assets between wholly owned group companies (directly or indirectly) if the assets transferred are held for at least two years within the group.

Gains on the disposal of property other than assets used in a business activity are also exempt from tax.

**Administration.** All persons subject to tax (excluding nonresidents who derive income from a source in Saudi Arabia and are subject to withholding tax) are required to register with the GAZT before the end of their first fiscal year. Failure to register with the GAZT results in the imposition of a fine ranging from SAR1,000 to SAR10,000.

A taxable entity that has a permanent establishment or commercial registration in Saudi Arabia must file its annual tax declaration with the GAZT based on its accounting books and records within 120 days following the end of the tax year and pay the income tax due with the tax declaration. However, the GAZT may also request audited financial statements before issuing the final tax assessments.

The Saudi Arabian Income Tax Regulations require certification of annual tax declarations reporting taxable revenue in excess of SAR1 million. A locally licensed chartered accountant is required to certify the validity of the information contained in the taxpayer’s return and also certify the following:

- The information contained in the declaration is taken from the taxpayer’s books and records (maintained in Arabic and in Saudi Arabia) and is in accordance with such records.
- The return is prepared according to the standards, requirements and provisions of the Saudi Arabian Income Tax Regulations.

The nonresident partners of partnerships are subject to tax, rather than the partnerships themselves. However, partnerships must file an information declaration within 60 days after the end of the tax year.

Fines for non-submission of tax declarations by the due date may be imposed at a rate of 1% of the total revenue, with a maximum fine of SAR20,000. A fine is also calculated based on a percentage of the underpaid tax. Such a fine is payable if it exceeds the amount of the fine based on total revenue. The following are the percentages applied to underpaid tax:

- 5% of the underpaid tax if the delay is up to 30 days from the due date
• 10% of the underpaid tax if the delay is more than 30 and not more than 90 days from the due date
• 20% of the underpaid tax if the delay is more than 90 and not more than 365 days from the due date
• 25% of the underpaid tax if the delay is more than 365 days from the due date

An advance payment on account of tax for the year is payable in three installments. The installments are due by the end of the 6th, 9th and 12th months of the tax year. Each installment of advance payment of tax is calculated in accordance with the following formula:

\[
25\% \times (A - B)
\]

For the purposes of the above calculation, “A” equals the taxpayer’s liability as per the tax declaration for the preceding year and “B” equals tax withheld at source for the taxpayer in the preceding year.

A taxpayer is not required to make advance tax payments in a year if the tax liability for the preceding year was less than SAR2 million.

A delay fine of 1% for each 30 days of delay after the lapse of 30 days from the due date of tax until the date the tax is paid.

**Dividends.** Dividends paid to nonresident shareholders are subject to withholding tax at a rate of 5% (see Withholding tax). After-tax profit remittances of a branch (permanent establishment) are also considered dividends under the Saudi Income Tax Regulations.

Dividend income or bonus shares earned by a resident company on its investments in a resident or a nonresident capital company is exempt from tax if the ownership in the investee company is 10% or more and if the investment is held for a period of one year or more.

**Foreign tax relief.** Relief is not provided for foreign taxes paid (unless covered by a double tax treaty).

**C. Determination of tax payable**

**Taxable profits.** Tax liabilities are assessed by the GAZT on the basis of the audited financial statements, as adjusted for tax purposes. In certain cases (for example, permanent establishments of nonresidents that do not maintain books of accounts in Saudi Arabia, foreign airlines, and foreign freight and land and marine transport companies operating in Saudi Arabia), tax may be assessed under the “presumptive basis.” Under the presumptive basis, no financial statements are presented, and the tax liability is assessed on deemed profit calculated at rates specified in the tax regulations.

**Nondeductible expenses.** Certain expenses are not deductible in calculating taxable profit, including the following:

• Expenses not connected with the earning of income subject to tax
• Payments or benefits to a shareholder, a partner or their relatives if they constitute salaries, wages, bonuses or similar items or if they do not represent an arm’s-length payment for property or services
• Entertainment expenses
• Expenses of a natural person for personal consumption
• Income tax paid in Saudi Arabia or another country
• Financial penalties and fines paid or payable to any party in
  Saudi Arabia except those paid for breach of contractual terms
  and obligations
• Payments of bribes and similar payments, which are considered
  criminal offenses under the laws of Saudi Arabia, even if paid
  abroad

Allocation of overhead and indirect expenses. A branch of a non-
resident company cannot claim deductions for head office costs
that are allocated to the branch on an estimated or allocation
basis. However, certain certifiable direct costs incurred abroad
are deductible.

Technical costs. For tax purposes, in general, technical costs are
expenses that relate to engineering, chemical, geological or in-
dustrial work and research even if incurred wholly abroad by the
main office or other offices. These costs are generally allowed as
deductions if they can be substantiated by certain documents,
such as technical services agreements, head office auditors’ cer-
tificates and invoices.

Under the tax regulations, payments for technical and consultancy
services rendered by third parties (including foreign sharehold-
ers) are subject to withholding tax at a rate of 5%. However, such
payments to nonresident related parties are subject to a 15% with-
holding tax (for details regarding withholding taxes, see
Section B).

Contributions to foreign social insurance, pension and savings plans.
Contributions to a retirement fund, social insurance fund or any
other fund established in or outside Saudi Arabia for the purpose
of an employee’s end-of-service benefits (retirement) or to meet
the employee’s medical expenses is deductible if all of the follow-
ing conditions are satisfied:
• The fund has an independent legal status and has financial
  statements audited by an independent licensed auditor.
• The allowable deduction does not exceed the unfunded liabili-
ties at the beginning of the year.
• The entitlement to the benefit is mentioned in the employment
  contract.
• The employer submits the fund’s information to the GAZT.

Contributions to Saudi social insurance with respect to an
employee’s share are not deductible from Saudi-source revenue.

Provisions and reserves. Provisions for doubtful debts, termina-
tion benefits and other similar items are not deductible. Specific
write-offs and actual employment termination benefit payments
that comply with Saudi Arabian labor laws are deductible.
Provisions for doubtful debts are allowed as deductible expenses
for banks if they are confirmed by the Saudi Arabian Monetary
Agency.

Interest deductibility. Deductions may be claimed for loan fees
(interest expenses and commissions) incurred with respect to the
earning of income subject to tax. However, the maximum deduc-
tion for loan fees is restricted to the lower of the following:
• Loan fees paid during the year
• Total of loan income plus 50% of tax-adjusted profits (excluding loan fees and loan income)

Loan fees exceeding this restriction are disallowed as a deduction and may not be carried forward to future years. Banks are excluded from the above limitation.

Saudi Arabian tax law does not contain any specific provisions on thin capitalization other than the limit on the interest deduction described above.

**Depreciation.** Depreciation is calculated for each group of fixed assets by applying the prescribed depreciation rate to the remaining value of each group at the fiscal year-end.

The remaining value for each group at the fiscal year-end is calculated as follows:

\[
\text{Remaining value for the group} = \left( X \times + 50\% \right) + \left( X \times - 50\% \right)
\]

The tax law provides the following depreciation rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Land (non-depreciable)</td>
<td>0</td>
</tr>
<tr>
<td>Fixed buildings</td>
<td>5</td>
</tr>
<tr>
<td>Industrial and agricultural movable buildings</td>
<td>10</td>
</tr>
<tr>
<td>Factories, plant, machinery, computer hardware and application programs (computer software) and equipment, including cars and cargo vehicles</td>
<td>25</td>
</tr>
<tr>
<td>Expenses for geological surveying, drilling, exploration expenses and other preliminary work to extract natural resources and develop their fields</td>
<td>20</td>
</tr>
<tr>
<td>All other tangible and intangible depreciable assets that are not included in the above groups, such as furniture, aircraft, ships, trains and goodwill</td>
<td>10</td>
</tr>
</tbody>
</table>

Assets acquired under build-operate-transfer (BOT) or build-operate-own-transfer (BOOT) contracts must be depreciated over the period of contract or the remaining period of contract.

Cost of repairs or improvements of fixed assets are deductible, but the deductible expense for each year may not exceed 4% of the remaining value of the related asset group at year-end. Excess amounts must be added to the remaining value of the asset group and depreciated.

**Relief for losses.** Losses may be carried forward indefinitely. However, the maximum loss that can be offset against a year's profit is 25% of the tax-adjusted profits for that year. Saudi tax regulations do not provide for the carryback of losses.
If a change of 50% or more occurs in the underlying ownership or control of a capital company, no deduction is allowed for the non-Saudi share of the losses incurred before the change in the tax years following the change. However, under a recent amendment of the tax law, companies may deduct the losses if they continue with the same business activities.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Other significant taxes</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zakat; a religious levy imposed on the shareholders in Saudi Arabian companies; Zakat is calculated and paid by a Saudi Arabian resident capital company on behalf of its individual or corporate shareholders; Zakat is levied on the Zakat base of a resident capital company; the Zakat base is broadly calculated as capital employed (for example, share capital and retained earnings) that is not invested in fixed assets, long-term investments and deferred costs, as adjusted by net results of operations for the year that is attributable to Saudi or GCC shareholders; complex rules apply to the calculation of Zakat liabilities, and it is therefore suggested that Zakat payers seek specific advice suited to their circumstances</td>

E. Miscellaneous matters

Foreign-exchange controls. Saudi Arabia does not impose foreign-exchange controls.

Supply and erection contracts. Profits from “supply only” operations to Saudi Arabia are exempt from income tax (whether the contract is made inside or outside Saudi Arabia) because the supplier trades “with” but not “in” Saudi Arabia. The net profits of operations that include supply, erection or maintenance are subject to tax, and the contractors are required to register with the GAZT and submit a tax declaration in accordance with the tax regulations.

The following information must generally be submitted in support of the cost of imported materials and equipment:
• Invoices from the foreign supplier
• Customs clearance document
• If the supplying entity is the head office of the Saudi Arabian branch, a certificate from the external auditor of the head office confirming that the cost claimed is equal to the international market value of the equipment supplied (usually the contracted selling price)

In general, no profit results in the Saudi Arabian books on materials and equipment supplied, because the revenue from the sale of equipment equals the cost based on the sales value declared for customs.

**Subcontractors.** Payments to subcontractors, reported by a taxpayer in its tax return, are subject to close scrutiny by the GAZT. The taxpayer is required to withhold tax due on payments to non-resident subcontractors and to deposit it with the GAZT, unless the taxpayer can provide a tax file number or tax clearance certificate as evidence that such subcontractor is settling its tax liability.

Tax is not required to be withheld from payments to subcontractors resident in Saudi Arabia. However, government procurement regulations provide for the retention of 10% of the contract value until the completion of the statutory formalities including the submission of the certificate from the GAZT.

**Imports from head office and affiliates.** A Saudi “mixed” entity (with Saudi/GCC shareholders and non-Saudi/non-GCC shareholders) is expected to deal on an arm’s-length basis with its foreign shareholders or any company affiliated with its foreign shareholders. The company may be required to submit to the GAZT a certificate from the seller’s auditors confirming that the materials and goods supplied to the Saudi Arabian company were sold at the international market price prevailing at the date of dispatch. This requirement also applies to foreign branches importing materials and goods from the head office for the fulfillment of their Saudi contracts.

**Transfer pricing.** The GAZT has announced the implementation of transfer-pricing regulations in Saudi Arabia and published the draft of such regulations, which are elaborated in bylaws to the Saudi Arabia income tax law, for public consultations (the transfer-pricing bylaws). The transfer-pricing bylaws contain mandatory legislative provisions regarding transactions among related parties and documentation requirements following the Base Erosion and Profit Shifting (BEPS) Action 13 standard. They also prescribe transfer-pricing methods and establish other administrative procedures, including related-party disclosure forms.

**F. Tax treaties**

The table below shows the withholding rates for dividends, interest and royalties provided under Saudi Arabia’s double tax treaties that are in force and effective as of 1 January 2019.

Certain other tax-exempting provisions (for example, for sovereign wealth funds) are contained in certain protocols to Saudi tax treaties.
To benefit from the reduced rates or exemptions under double tax treaties, additional conditions must be met (for example, the recipient is required to be the beneficial owner of the related gain). Readers should seek professional advice with respect to the application of Saudi tax treaties.

The treaty benefits are not applicable automatically and should be claimed from the GAZT in each case by submitting the Q7-B form and other supporting documents (for example, tax residence certificate). The taxpayer may claim the treaty benefit up front and follow double tax treaty rules, or the taxpayer may pay the tax under domestic income tax law and then claim a refund from the GAZT.

<table>

(a) The 0% rate generally applies to payments to government bodies.
(b) The 0% rate applies to income from debt claims paid on loans granted, insured or guaranteed by a public institution for the purposes of promoting exports.
(c) The 5% rate applies to dividends if any of the following circumstances exist:
   • The beneficial owner is the government of the other contracting state, the central bank of that other contracting state or any entity wholly owned by the government of that other contracting state.
   • If the beneficial owner has invested in the company paying the dividends at least USD300,000 or its equivalent in any other currency.
(d) The 0% rate applies to income from debt claims if the loan agreements were approved by the government.
(e) The 0% rate applies to income from debt claims that are indirectly financed by government bodies.
(f) The 5% rate applies to dividends paid to a shareholder (other than the partnership) that is the beneficial owner and directly owns at least 20% of the shares of the company paying the dividends.
(g) The 0% rate applies to income from debt claims paid by a national of either contracting state to a bank or financial institution that has the nationality of either contracting state.
(h) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.
(i) The 0% rate applies to dividends paid to a shareholder (other than the partnership) that is the beneficial owner and directly owns at least 25% of shares of the company paying the dividends.
(j) The 5% rate applies to dividends paid to a shareholder (other than the partnership) that is the beneficial owner and directly owns at least 25% of shares of the company paying the dividends.
(k) The 5% rate applies to dividends paid to a shareholder that is the beneficial owner if both of the following conditions are satisfied:
   • The beneficial owner is the government of the other contracting state, the central bank of that other contracting state or any entity wholly owned by the government of that other contracting state.
   • The company paying the dividends is not entitled to a deduction for dividends paid to its beneficiaries in computing its taxable income in Japan.
(l) The 0% rate applies to income from debt claims that are guaranteed or financed by government bodies.
(m) The 0% rate applies to income from debt claims if the payer of such income is a government body.
(n) The 5% rate applies to income from debt claims paid to financial entities or pension funds.
(o) The 5% rate applies to dividends paid to a shareholder (other than the partnership) that is the beneficial owner and directly owns at least 10% of shares of the company paying the dividends.
(p) The 5% rate applies to dividends paid to either a company or an entity wholly owned by the government that is the beneficial owner.
(q) The 5% rate applies to dividends paid to government bodies.
(r) The 5% rate applies to dividends if the beneficial owner is a company (other than a partnership) that holds at least 10% of the voting power or voting shares of the company paying the dividends.
(s) The 2.5% rate applies to interest paid to banks.
(t) The 15% rate applies to dividends if qualifying dividends are paid by a property investment vehicle; in all other cases, the 5% rate applies to dividends.
(u) The 5% rate applies to dividends paid to a shareholder (other than a partnership) that is the beneficial owner and owns directly at least 50% of the capital of the company paying the dividends or has invested USD20 million or more or any equivalent currency in the capital of the company paying the dividends.
(v) The 7.5% rate applies to royalties paid for the rendering of services or assistance of a technical or managerial nature.
Saudi Arabia has signed and ratified tax treaties with Bulgaria, Georgia and Morocco, and signed tax treaties with Cyprus, Gabon, Mauritania, Switzerland and the United Arab Emirates. These treaties were not yet in force as of December 2018.

Saudi Arabia is negotiating tax treaties with Barbados, Belgium, Bosnia and Herzegovina, Botswana, Croatia, Gambia, Guernsey, Jersey, Latvia, Lebanon, Mauritius, New Zealand, Seychelles, Sri Lanka, Sudan, and Taiwan.

Saudi Arabia has also entered into limited tax treaties with the United Kingdom, the United States and certain other countries for the reciprocal exemption from tax on income derived from the international operation of aircraft and ships.

On 18 September 2018, Saudi Arabia has signed the Multilateral Tax Convention (MLI) and submitted a list of 53 double tax treaties to be amended through the MLI, including the tax treaties that have been signed, but have not yet become effective.

(a) If the company does not derive a taxable profit for a given year, minimum tax applies. The minimum tax equals 0.5% of the turnover for the preceding tax year. For example, the minimum tax for 2018 is determined based on the annual turnover for 2017. The minimum tax may not be less than XOF500,000 or more than XOF5 million.

(b) In certain circumstances the tax is deferred or reduced (see Section B).

(c) See Section B for special rules applicable to certain dividends, and see Section C for a list of nondeductible expenses.

(d) This rate may be modified by a tax treaty. See Section B.

(e) The 6% rate applies to interest on long-term (that is, a duration of at least five years) bonds. The 8% rate applies to bank interest. The 13% rate applies to interest on short-term bonds. The 20% rate applies to interest on deposits. The 16% rate applies to other interest payments.

(f) This tax applies to technical assistance fees and other types of remuneration paid to nonresident companies and nonresident individuals that do not have a permanent establishment in Senegal. The tax is calculated by applying a rate of 25% to a base of 80% of the remuneration that is paid.
B. Taxes on corporate income and gains

Corporate income tax. Senegalese companies are taxed on the basis of the territoriality principle. As a result, companies carrying on a trade or business outside Senegal are not taxed in Senegal on the related profits. Foreign companies developing activities in Senegal are subject to Senegalese corporate tax on Senegalese-source profits only.

Tax rates. The corporate income tax rate is 30%. The minimum tax (impôt minimum forfaitaire, or IMF) payable equals 0.5% of the turnover for the preceding tax year. The minimum tax cannot be less than XOF500,000, or more than XOF5 million.

Capital gains. Capital gains are generally taxed at the regular corporate tax rate. However, the tax can be deferred if the proceeds are used by a taxable company to acquire new fixed assets (other than financial immobilizations; this concept was introduced in a tax law, dated 30 March 2018) for its companies based in Senegal within three years or in the event of a merger (or similar corporate restructurings, such as a transfer of a business unit or a demerger).

If the business is partially transferred or discontinued or if the company’s fixed assets are sold at the end of its operation, only one-half of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business, and only one-third of the gain is taxed if the event occurs five years or more after the business was begun or purchased. This regime does not apply to a transfer of shares in an unlisted predominant real estate company. A company is considered a predominant real estate company if more than 50% of its assets consist of real estate.

Capital gains on sales or transfers of land and buildings are also subject to land tax (see Section D).

Administration. The tax year is the calendar year. Companies must file their tax returns by 30 April of the year following the tax year. Corporate tax must be paid in two installments (each equal to one-third of the preceding year’s tax) by 15 February and 30 April. The 15 February installment may not be less than the amount of the minimum tax. The balance must be paid by 15 June.

Late payments are subject to interest at a rate of 5% of the tax due. Each additional month of delay results in additional interest of 0.5%.

Dividends paid. Dividends paid are subject to a 10% withholding tax.

Dividends distributed by a Senegalese parent company that consist of dividends received from a Senegalese subsidiary that is at least 10% owned are not subject to dividend withholding tax on the second distribution.

Unless otherwise stipulated in a double tax treaty, the profits realized in Senegal by branches of foreign companies that have not been reinvested in Senegal are deemed to be distributed and are accordingly subject to a 10% withholding tax.
Foreign tax relief. In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from Senegalese tax under the territoriality principle is taxable net of the foreign tax. However, the tax treaty with France provides a tax credit for French tax paid on dividends.

C. Determination of taxable income

**General.** Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the Accounting Plan of the Organization for the Harmonisation of Business Law in Africa (Organisation pour l’Harmonisation en Afrique du Droit des Affaires, or OHADA).

Business expenses are generally deductible unless specifically excluded by law. The following expenses are partially deductible or nondeductible:

- Foreign head-office expenses, based on the proportion of Senegal turnover to global turnover, of which the deduction is limited to 20% of Senegalese accounting profits before deduction of foreign head-office expenses (unless otherwise provided for by tax treaties).
- The following nondeductible amounts of interest:
  - The amount of interest paid to shareholders in excess of three percentage points above a standard annual rate set by the central bank
  - The amount of interest on loans in excess of 1.5 of the capital stock amount
  - The amount of interest that exceeds 15% of the profits derived from ordinary activities increased by the interest, depreciation and accruals taken into consideration for the determination of such profits

The above provisions were introduced into the Senegalese tax code by Law No. 2018-10, dated 30 March 2018, and apply to the tax year beginning on 1 January 2018 and ending on 31 December 2018 and to future tax years.

- Certain specific charges over specified limits.
- Certain taxes, penalties and gifts.

**Inventories.** Inventory is normally valued at the lower of cost or market value.

**Provisions.** In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they are related to clearly specified losses or to expenses that are probably going to be incurred and if they appear in the financial statements and in a specific statement in the tax return.

**Participation exemption.** A parent company may exclude from its tax base for corporate income tax purposes 95% of the gross dividends received from a subsidiary if all of the following conditions are met:

- The parent company and the subsidiary are either joint stock companies or limited liability companies.
- The parent company has its registered office in Senegal and is subject to corporate income tax.
- The parent company holds at least 10% of the shares of the subsidiary.
The shares of the subsidiary are subscribed to or allocated when the subsidiary is created, and they are registered in the name of the parent company or, alternatively, the parent company commits to holding the shares for two consecutive years in registered form. The letter containing such commitment must be annexed to the corporate income tax return.

The above participation exemption regime is extended to Senegalese holding companies incorporated in the form of joint stock companies or limited liability companies meeting the conditions mentioned above.

**Tax depreciation.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated. The straight-line method is generally allowed. The following are some of the applicable straight-line rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial and industrial buildings</td>
<td>3 to 5</td>
</tr>

</tr>
<tr>
<td>Motor vehicles</td>
<td>25 to 33</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10 to 20</td>
</tr>
</tbody>
</table>

In certain circumstances, plant and machinery as well as other assets may be depreciated using the declining-balance method or an accelerated method.

**Relief for tax losses.** Losses may be carried forward three years; losses attributable to depreciation (deferred deemed amortization, which is amortization of assets reported during a loss year) may be carried forward indefinitely. Losses may not be carried back.

**Groups of companies.** No fiscal integration system equivalent to tax consolidation or fiscal unity exists in Senegal.

**D. Other significant taxes**

The following table summarizes other significant taxes.

E. Miscellaneous matters

Foreign-exchange controls. Exchange-control regulations exist in Senegal for financial transfers outside the West African Economic and Monetary Union (WAEMU). The exchange-control regulations are contained in the WAEMU 09/2010 CM Act, together with its appendices and the Central Bank of West African States (La Banque Centrale des États de l’Afrique de l’Ouest, or BCEAO) application decrees.

Transfer pricing. The Senegalese tax law contains specific transfer-pricing documentation requirements. Transactions between associated enterprises must be documented. Such documentation must include at a minimum a description of the terms of the transactions, the entities involved, a functional analysis and a detailed description of the chosen methodology to determine the applied transfer prices. The documentation must establish how transfer prices were determined and whether the terms of the intercompany transactions would have been adopted if the parties were unrelated. If such information is not available on request in an audit or a litigation, the tax authorities may assess the taxable income based on information at their disposal. The concerned companies do not have to automatically file the transfer-pricing documentation. They must make it available to the National Directorate of Taxes and Domains (Direction Générale des Impôts et Domaines), which is empowered to request such documentation within the framework of an accounts examination procedure (field audit of the company). Failure to provide such documentation triggers a penalty of 0.5% of the value of transactions for which supporting documentation has not been provided to the National Directorate of Taxes and Domains or completed on its request.

The 2018 tax reform implemented the following two new transfer-pricing reporting obligations:
• Transfer pricing annual report
• Country-by-Country Report (CbCR)

Transfer pricing annual report. Companies meeting the conditions listed below should file by 30 April of the year following the tax year a transfer-pricing report containing general and specific information on the group of companies and the reporting entity, such as the following:
• Transaction values
• General description of the activities
• General description of the transfer-pricing policy of the group
• Information on loans, borrowings and other transactions realized with related entities

The filing is mandatory for entities meeting one of the following conditions:
• Turnover, excluding taxes or gross assets, equal to XOF5 billion or more
• Holding, at the end of the tax year, directly or indirectly, more than half of the share capital or voting rights of a company, located in Senegal or abroad, that generates turnover, excluding taxes, or holds gross assets equal to XOF5 billion or more
• More than half of its share capital or voting rights is held by a company generating turnover, excluding taxes, or holds gross assets equal to XOF5 billion or more

Failure to submit the transfer-pricing report triggers a fiscal fine of XOF10 million.

**CBCR.** Multinational enterprises (MNEs) meeting the reporting conditions must electronically submit a CbCR. Under the regulation, all Senegal tax resident constituent entities that are Ultimate Parent Entities (UPEs) of an MNE group with annual consolidated group revenue equal to or exceeding XOF491 billion (approximately EUR750 million) must prepare a CbCR for tax years starting on or after 1 January 2018.

Any other constituent entity of the MNE group that is tax resident in Senegal must prepare and submit the CbCR if the UPE is not resident in Senegal and if any of the following conditions are met:
• The Senegalese tax resident company has been elected by the MNE group to file a CbCR and has informed the Senegalese tax administration.
• The Senegalese tax resident company fails to provide evidence that another company of the MNE group (based in Senegal, in a country that has implemented a similar CbCR requirement or in a jurisdiction that has concluded with Senegal a qualified exchange of information instrument) has been designated for purposes of filing the CbCR.
• Senegal has been notified regarding a systematic failure to exchange the information.

Notwithstanding the above, a consistent entity in Senegal is not required to file a CbCR if a Surrogate Parent Entity (SPE) is appointed in Senegal or in another jurisdiction that has entered into a qualifying information exchange instrument with Senegal for purposes of filing the CbCR.

A failure to comply with the CbCR rules is punishable by a fine of XOF25 million (approximately USD27,700).

**F. Treaty withholding tax rates**

Senegal has entered into a multilateral tax treaty with the other member states of the WAEMU, which are Benin, Burkina Faso, Côte d’Ivoire, Guinea-Bissau, Mali, Niger, Senegal and Togo. The principal provisions of this tax treaty took effect on 1 January 2010. Senegal has entered into bilateral tax treaties with Belgium, Canada, France, Italy, Mauritania, Mauritius, Morocco, Norway, Qatar, Spain, Tunisia, the United Arab Emirates and the United Kingdom.
The rates reflect the lower of the treaty rate and the rate under domestic tax law.

(a) The 20% rate applies to interest on deposit receipts. The 16% rate applies to other interest payments.
(b) The 5% rate applies if the beneficial owner of the dividends is a company that holds at least 20% of the share capital of the distributing company. The 10% rate applies to other dividends.
(c) The 6% rate applies to royalties paid for the use of industrial, commercial and scientific equipment. The 10% rate applies to other royalties.
(d) The 5% rate applies if the real beneficiary of the dividends is a company that holds at least 25% of the share capital of the distributing company. Under the United Kingdom treaty, the 8% rate applies if the beneficiary is a pension fund located in the other state. The 10% rate applies to other dividends.
(e) For details, see footnote (e) to Section A.
(f) Senegal has signed a tax treaty with Luxembourg. The Head of State of Senegal has been authorized by parliament to ratify such treaty. However, the treaty is yet to be ratified and enforced from a Senegalese perspective. The rates of the treaty are listed in the table.

Senegal has signed tax treaties with China (mainland), Iran, Kuwait, Lebanon, Malaysia and Taiwan, but these treaties have not yet been ratified.

(a) This tax applies to nonresident companies. Under the Personal Income Tax Law, dividends and interest paid to resident and nonresident individuals are taxed at a rate of 15%.
(b) This tax applies to nonresident companies. Under the Personal Income Tax Law, royalties paid to resident and nonresident individuals are taxed at a rate of 20%.
(c) This tax applies to nonresident companies. Under the Personal Income Tax Law, individuals are taxed at a rate of 20% on rent and service fees.

(d) As of 1 April 2018, only fee payments related to market research services, accounting and audit services, and other legal and business advisory services are subject to withholding tax regardless of the place where the services were provided or used.

(e) This tax applies to nonresident companies. Under the Personal Income Tax Law, individuals are taxed at a rate of 15% on capital gains.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in the Republic of Serbia (RS) are subject to tax on their worldwide income. A company is resident in the RS if it is incorporated in the RS or if its central management and control is actually exercised in the RS. Nonresident companies are subject to tax only on their income derived from the RS. Nonresident companies are companies registered in other countries that have a permanent place of business in the RS. Foreign representative offices may not derive profits from their activities in the RS. However, if they do derive such profits, the profits are subject to tax in the RS.

Rate of corporate income tax. The rate of corporate income tax in the RS is 15%.

Tax incentives. A company qualifies for a 10-year tax exemption if it invests RSD1 billion (approximately EUR8 million) in its own fixed assets and if it employs at least 100 new workers in the period of investment.

Double the amount of costs directly connected to research and development activities that the taxpayer conducts in Serbia can be deducted.

Up to 80% of income accrued in connection with use of intellectual property rights may be excluded from the tax base if certain conditions are met. Also, 80% of capital gains derived from the transfer of intellectual property is excluded from the tax base.

Taxpayers that invest in newly formed companies conducting innovative business activity can be granted a tax credit of 30% of the investment in such companies if certain conditions are met.

A taxpayer’s income deriving from the transfer of non-monetary assets without reimbursement under concession agreements is excluded from the tax base if the value of a concession agreement is more than EUR50 million. In this context, a concession agreement is an agreement between a competent state authority (including a publicly owned company) and a legal entity based on which the competent state authority gives to a domestic or foreign legal entity the commercial right to use natural resources or resources in general or public use or allows it to perform activities of general interest for the respective period under the conditions prescribed by law, with the payment of the concession fee.

The effects of the change of accounting policies caused by the first application of International Accounting Standards (IAS) or International Financial Reporting Standards (IFRS) for small and medium enterprises that cause changes of positions in the balance sheet are recognized as income or expense in the tax balance.
Under the Personal Income Tax Law and the Law on Compulsory Social Security Contributions, companies may be partially exempted from paying salary tax and employer social security contributions for newly employed individuals and disabled persons under the conditions specifically mentioned in the legislation.

**Capital gains.** Capital gains derived from the disposal of the following are included in taxable income and are subject to tax at the regular corporate income tax rate:

- Real estate that the taxpayer uses or used as a fixed asset in its business activities, including real estate under construction
- Intellectual property rights
- Capital participations and shares and other securities that are, according to IFRS and IAS, long-term financial investments (except certain bonds issued by government bodies or by the national bank)
- Investment units purchased by investment funds, in accordance with the law regulating investment funds

Capital gains tax is also imposed on income derived by nonresident companies from disposals of the aforementioned assets (except intellectual property rights) and real estate in the RS that were not used as fixed assets in conducting business activities. These gains were previously subject to a 20% tax rate.

The possibility of claiming a tax credit has been introduced in cases in which a resident taxpayer realizes capital gains in another state and pays tax on such gains in that state.

Capital gains realized by resident companies may be offset against capital losses incurred in the same year, and net capital losses may be carried forward to offset capital gains in the following five years.

**Administration.** The tax year is the calendar year. Exceptionally, at the taxpayer’s request, the tax period may be set within any 12 months, subject to the tax authorities’ approval.

Companies must file annual tax returns within 180 days after the expiration of the period for which the tax liability is determined (usually by 30 June of the year following the tax year), except in cases of statutory changes (transactions resulting in the cessation of the legal entity), liquidation and bankruptcy. In such circumstances, companies must file returns within the following periods:

- Sixty days from the date on which the liquidation proceedings began or were completed (the companies must file two tax returns; one is related to the period before the beginning of the liquidation proceedings, while the second return covers the period during the liquidation proceedings)
- Sixty days from the date on which the bankruptcy proceedings began
- Sixty days from the date of the beginning of the implementation of the reorganization plan

Companies must make monthly advance payments of tax by the 15th day of the month following the month for which the payment is due. Companies determine advance payments based on their tax
Companies may submit an interim tax return during the tax year to increase or decrease their monthly advance payments of tax if significantly changed circumstances exist, such as changes to the company’s activities or to the tax rules.

At the time of submission of the annual tax return, companies must pay any positive difference between the tax liability calculated by the company and the total of the advance payments. They may receive a refund of any overpayment, or the overpayment may be treated as a prepayment of future monthly payments.

**Dividends.** Resident companies include dividends received from its nonresident affiliates in taxable income.

Corporate and dividend taxes paid abroad may be claimed as a tax credit up to the amount of domestic tax payable on the dividends. Any unused amount can be carried forward for offset against corporate profit tax in the following five years. This tax credit applies only to dividends received by companies with a shareholding of 10% or more in the payer for at least one year before the tax return is submitted.

A 20% withholding tax is imposed on dividends paid to nonresidents.

An applicable double tax treaty may provide a reduced withholding tax rate for dividends (see Section F). To benefit from a double tax treaty, a nonresident must verify its tax residency status and prove that it is the true beneficiary of the income.

**Foreign tax relief.** Companies resident in the RS that perform business activities through permanent establishments outside the RS may claim a tax credit for corporate income tax paid in other jurisdictions, up to the amount of domestic tax payable on such income. In addition, resident companies are entitled to a tax credit for tax on interest income, income from lease fees, royalty income and dividend income (shareholding less than 10%) that is withheld and paid by nonresident income payers in other jurisdictions. The tax credit is available up to the amount of domestic tax payable on a tax base equal to 40% of foreign-source income that is included in the total income of the resident company.

**C. Determination of trading income**

**General.** The assessment is based on the profit or loss shown in the financial statements prepared in accordance with International Accounting Standards and domestic accounting regulations, subject to certain adjustments for tax purposes.

Taxable income is the positive difference between income and expenses. For tax purposes, income consists of income from the following:

- Sales of products, goods and services
- Financial income
- Capital gains
- Income resulting from transfer-pricing adjustments
Tax-deductible expenses include expenses incurred in performing business activities. Expenses must be documented. Certain expenses, such as depreciation (see Tax depreciation), donations and entertainment expenses, are deductible up to specified limits. Impairment of assets may not be deducted unless the assets were alienated or damaged as a result of force majeure.

**Inventories.** Inventories must be valued using average prices or the first-in, first-out (FIFO) method.

**Bad debt provisions and write-offs.** Legal entities may deduct as expenses write-offs of receivables if such actions are in conformity with the Accounting Law. This conformity exists if the following conditions are satisfied:

- Receivables were included in the taxpayer’s revenues.
- Receivables have been written off from the taxpayer’s accounting books as uncollectible.
- The taxpayer has sued the debtor or claimed the debt in a liquidation or bankruptcy procedure, or the execution procedure has been initiated.

Write-offs of receivables that were not recorded as revenues in the taxpayer’s accounting records are also tax-deductible expenses if the second and third conditions above are met.

Bad debt provisions are tax-deductible expenses in the period in which at least 60 days have elapsed since the due date for the payment of receivables.

**Tax depreciation.** Fixed assets are divided into five groups, with depreciation and amortization rates prescribed for each group. New rules for the calculation of tax amortization have been introduced (the declining-balance method has been abandoned and the straight-line [linear] method has been introduced), which are being applied as of 1 January 2019. Old assets, which were present at the beginning of the application of the new rules, are depreciated using the old rules until 2028.

The straight-line method must be used for all five groups. New depreciation rules also prescribe that if the depreciation calculated for accounting purposes is lower than the depreciation calculated in accordance with corporate income tax rules, the amount of accounting depreciation should also be used for tax purposes.

The following are the depreciation and amortization rates.

<table>
<thead>
<tr>
<th>Group of assets</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>2.5</td>
</tr>
<tr>
<td>II</td>
<td>10</td>
</tr>
<tr>
<td>III</td>
<td>15</td>
</tr>
<tr>
<td>IV</td>
<td>20</td>
</tr>
<tr>
<td>V</td>
<td>30</td>
</tr>
</tbody>
</table>

Group I includes immovable assets.

Starting from the 2018 tax year, tax depreciation of intangible assets should be equal to the accounting depreciation of such assets.

In addition, if the assets are acquired from a related party, the depreciation base is the lower of the following two amounts:
• Purchase price for the transfer of the fixed assets
• Acquisition price of fixed assets determined by applying the arm’s-length principle

Relief for losses. Tax losses incurred in business operations may be carried forward for five years. Loss carrybacks are not allowed.

Groups of companies. Under group relief provisions, a group of companies consisting only of resident companies may offset profits and losses for tax purposes. The group relief provisions are available if a parent company holds directly or indirectly at least 75% of the shares in subsidiaries. To obtain group relief, a group must file a request with the tax authorities. If tax consolidation is allowed, the group companies must apply tax-consolidation rules for five years. Each group company files its own annual income tax return, and the parent company files a consolidated tax return based on the subsidiaries’ tax returns. Any tax liability after consolidation is paid by the group companies with taxable profits on a proportional basis.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax (VAT), on supplies of goods and services in the RS and on imports of goods; certain tax exemptions with or without the right to deduct input VAT are granted; VAT taxpayers are legal entities and entrepreneurs who had turnover of goods and services in excess of RSD8 million (approximately EUR65,000) in the preceding 12 months or who expect to have annual turnover greater than the threshold</td>
<td>20</td>

<tr>
<td>Transfer tax; paid on transfers of ownership rights over immovable property, intellectual property rights, ownership rights over used motor vehicles (with certain exemptions) and usage rights over city construction land; certain transfers are exempt; tax base is the contract price, unless the market value is higher</td>
<td>2.5</td>
</tr>
</tbody>
</table>
Nature of tax | Rate (%)
---|---
Payroll taxes, on monthly gross salaries | 10
Tax on salary; paid by employee | 10
Social security contributions (for health, pension and unemployment funds); paid by | 17.15
Employer | 17.15
Employee | 19.9

E. Miscellaneous matters

Foreign-exchange controls. In the RS, the local currency is the dinar (RSD).

In the RS, all payments, collections and transfers must generally be effected in dinars, but a “currency clause” may allow conversion from hard currency on the date of payment. In addition, the following transactions may be effected using foreign currencies:

- Sale and rental of immovable property
- Granting loans in the RS for the payment of imported goods and services and acquisition of immovable property
- Insurance premiums and transfers based on life insurance contracts
- Purchasing receivables and accepting payables specified in the law
- Payments of deposits representing collateral
- Donations for charitable, cultural and scientific purposes in accordance with the donation legislation
- Transactions involving guarantees specified by the law, if the underlying transaction is in foreign currency
- Allowances for business trips abroad
- Salary payments to resident individuals sent on temporary work abroad based on an agreement on investment projects, as well as to individuals employed at diplomatic and consular missions, United Nations organizations and international financial institutions in the RS
- Purchase of software and other digital products on the internet that are delivered exclusively through telecommunication, digital or information technology devices, provided that payment is made using a payment card or electronic money through a payment service provider that has its company seat in the RS

Residents and nonresidents may open foreign-currency accounts in RS banks or in foreign banks authorized to operate in the RS. Foreign currency may be held in such accounts and used for payments out of the RS, such as dividends and payments for purchases of imports, as well as for authorized foreign-currency payments in the RS.

Transfer pricing. Under general principles, transactions between related parties must be made on an arm’s-length basis. The difference between the price determined by the arm’s-length principle and the taxpayer’s transfer price is included in the tax base for purposes of the computation of corporate income tax. Taxpayers must submit transfer-pricing documentation together with their corporate income tax return.

Thin-capitalization rules. Related-party interest expenses and related expenses are limited to 4 times the value of the
taxpayer’s equity (10 times value for banks and financial-leasing organizations).

### F. Treaty withholding tax rates

The following table lists the withholding tax rates under the treaties of the former Union of Serbia and Montenegro and under the treaties of the former Federal Republic of Yugoslavia and the former Yugoslavia that remain in force. It is suggested that taxpayers check with the tax authorities before relying on a particular tax treaty.

(a) Various tax exemptions and reductions are available (see Section B).
(b) See Section F.
(c) See Section B.
(d) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Income tax is imposed on all income derived from sources in Singapore, and on income from sources outside Singapore if received in Singapore. However, a nonresident company that is not operating in or from Singapore is generally not taxed on foreign-source income received in Singapore. A company is resident in Singapore if the control and management of its business is exercised in Singapore; the place of incorporation is not relevant.

Remittances of foreign income in the form of dividends, branch profits and services income (specified foreign income) into Singapore by companies resident in Singapore are exempt from tax if prescribed conditions are met. For remittances of specified foreign income that does not meet the prescribed conditions, companies may be granted tax exemption under specific scenarios or circumstances on an approval basis.

Rates of corporate income tax. The standard corporate income tax rate is 17%. Seventy-five percent of the first SGD10,000 of normal chargeable income is exempt from tax, and 50% of the next SGD290,000 (SGD190,000 effective from the 2020 year of assessment) is exempt from tax. The balance of chargeable income is fully taxable at the standard rate of 17%. For the 2019 year of assessment, a 20% corporate income tax rebate is granted, capped at SGD10,000.

Tax incentives, exemptions and reductions. Singapore offers a wide range of tax incentives that are generally granted on an approval basis to promote investments in selected industry sectors, including the following:
Pioneer companies and pioneer service companies. A pioneer enterprise is exempt from income tax on its qualifying profits for up to 15 years.

Development and Expansion Incentive (DEI). DEI companies enjoy a concessionary tax rate of 5% or 10% on their incremental income derived from the performance of qualifying activities.

Approved royalties, technical assistance fees and contributions to research and development (R&D) costs.

Investment allowances.

R&D incentives. An additional 150% tax deduction (effective from the 2019 year of assessment to the 2025 year of assessment) is allowed for certain qualifying R&D expenditure.

Intellectual Property (IP) Development Incentive. A new IP regime, the IP Development Incentive, was proposed in the 2017 budget and is effective from 1 July 2018 to 31 December 2023. This incentive incorporates the Base Erosion and Profit Shifting (BEPS)-compliant modified nexus approach.

Finance and treasury center incentive. Income derived from the provision of qualifying services to approved network companies and from the carrying on of qualifying activities on own account is subject to tax at a rate of 8%.

Financial sector incentive (FSI). The FSI is designed to encourage the development of high-growth and high value-added financial activities in Singapore. A 5%, 10%, 12% or 13.5% concessionary tax rate applies to income derived from carrying on qualifying activities by approved FSI companies in Singapore.

Maritime sector incentives. Ship operators, maritime lessors and providers of certain supporting shipping services may enjoy tax incentives under the Maritime Sector Incentive, which consists of the following three broad categories:

- International shipping enterprise
- Maritime (ship or container) leasing
- Supporting shipping services

Global Trader Programme (GTP). Under the GTP, approved companies enjoy a concessionary tax rate of 5% or 10% on qualifying transactions conducted in prescribed commodities and products.

Capital gains. Capital gains are not taxed in Singapore. However, in certain circumstances, the Singapore Revenue considers transactions involving the acquisition and disposal of assets, such as real estate, stocks or shares to be the carrying on of a trade, and, as a result, gains arising from such transactions are taxable. The determination of whether such gains are taxable is based on a consideration of the facts and circumstances of each case.

Administration. The tax year, known as a year of assessment, runs from 1 January to 31 December. The period for which profits are identified for assessment is called the basis year. Therefore, income earned during the 2018 basis year is assessed to tax in the 2019 year of assessment. For companies engaged in business in Singapore that adopt an accounting period other than the calendar year, the assessable profits are those for the 12-month accounting period ending in the year preceding the year of assessment.
An estimate of the chargeable income (ECI) of a company must be filed within three months after the end of its accounting year. However, companies are not required to file an ECI if their annual revenue is not more than SGD5 million for the financial year and if their ECI is nil.

The statutory deadline for filing the income tax return is 30 November for paper filing and 15 December for e-filing. No extension of time to file the return is allowed. Mandatory e-filing has been implemented in stages beginning from the 2018 year of assessment, with e-filing becoming mandatory for all companies from the 2020 year of assessment.

Income tax is due within one month after the date of issuance of the notice of assessment. In certain circumstances, companies may pay tax in monthly installments on the ECI, up to a maximum of 10, with the first installment payable one month after the end of the accounting period. No installments are allowed if the ECI is submitted more than three months after the end of the relevant accounting period.

A late payment penalty of 5% of the tax due is imposed if the tax is not paid by the due date. If the tax is not paid within 60 days of the imposition of the 5% penalty, an additional penalty of 1% of the tax is levied for each complete month that the tax remains outstanding, up to a maximum of 12%.

**Dividends.** Dividends paid by a Singapore tax-resident company are exempt from income tax in the hands of shareholders, regardless of whether the dividends are paid out of taxed income or tax-free gains. No withholding tax is imposed on dividends.

**Foreign tax relief.** Singapore has entered into double tax agreements with more than 80 countries, but notably not with the United States. Under Singapore rules, a foreign tax credit is limited to the lower of the foreign tax paid and the Singapore tax payable on that income. The foreign tax credit (FTC) is granted on a country-by-country, source-by-source basis unless the resident taxpayer elects to claim FTC under the pooling method, subject to meeting certain conditions.

A unilateral tax credit system, similar to FTC relief, is also available for income derived from countries that have not entered into double tax agreements with Singapore.

**C. Determination of taxable income**

**General.** In general, book profits reported in the financial statements prepared under the financial reporting standards in Singapore are adjusted in accordance with the Singapore tax rules to arrive at taxable income.

If a company maintains its financial accounts in a functional currency other than Singapore dollars, as required under the financial reporting standards in Singapore, it must furnish tax computations to the Singapore Revenue denominated in that functional currency in a manner as prescribed by the law.

For expenses to be deductible, they must meet all of the following conditions:
- They must be incurred wholly and exclusively in the production of income.
They must be revenue in nature.
They must not be specifically prohibited under the Singapore tax law.

To facilitate business start-ups, it is specifically provided that a person is treated as having commenced business on the first day of the accounting year in which the business earns its first dollar of business receipt. This is known as the deemed date of commencement, and businesses may deduct revenue expenses incurred in the accounting year (not exceeding a 12-month period) immediately preceding the deemed date of commencement.

Special rules govern the deductibility of expenses for investment holding companies.

Expenses attributable to foreign-source income are not deductible unless the foreign-source income is received in Singapore and subject to tax in Singapore. In general, offshore losses may not be offset against Singapore-source income.

No deduction is allowed for the book depreciation of fixed assets, but tax depreciation (capital allowances) is granted according to statutory rates (see Capital allowances [tax depreciation]).

**Double deductions.** Double deductions are available for certain expenses relating to approved trade fairs, exhibitions or trade missions, maintenance of overseas trade offices, overseas investment development, R&D projects and approved salary expenditure for employees posted overseas. A sunset clause of 31 March 2020 applies to the double deduction schemes.

**Renovation or refurbishment deduction.** A tax deduction is allowable on due claim, for qualifying renovation or refurbishment (R&R) expenditure incurred for the purposes of a trade, profession or business. The allowable R&R costs are capped at SGD300,000 for every three-year period, beginning with the basis period in which the deduction is first allowed. Any unused R&R deduction is allowed as a loss carryback or loss carryforward (see Relief for trading losses) or for group relief (see Groups of companies).

**Inventories.** Trading inventory is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out (FIFO) basis; the last-in, first-out (LIFO) basis is not accepted.

**Provisions.** Under FRS 109 Financial Instruments, impairment losses that represent 12-month expected credit loss (ECL) or lifetime ECL are recognized if some risk of default exists or even in the absence of loss events. Only impairment losses recognized in the profit and loss statement with respect to the credit-impaired financial instruments on revenue account are allowed for tax deduction, and any reversal amount subsequently recognized in the profit and loss statement will be taxable.

**Capital allowances (tax depreciation)**

*uPlant and machinery.* Tax depreciation or capital allowances are given for capital expenditures incurred on the acquisition of plant and machinery used for the purposes of a trade or business. Qualifying plant and machinery are normally written off in equal amounts over three years when claimed. Alternatively,
expenditures on such assets may be claimed in one year if each item costs no more than SGD5,000. However, the total claim for all such assets may not exceed SGD30,000 for a year of assessment.

The cost of the following may be written off in the year of acquisition:
- Computers or other prescribed automation equipment
- Websites
- Generators
- Robots
- Certain efficient pollution-control equipment
- Certain industrial noise- and chemical hazards-control equipment

Only expenditure on certain automobiles, such as commercial vehicles and cars registered outside Singapore and used exclusively outside Singapore, qualify for capital allowances.

Land intensification allowance incentive. The land intensification allowance (LIA) incentive grants an initial allowance of 25% and an annual allowance of 5% on qualifying capital expenditure incurred on or after 23 February 2010 by businesses on the construction or renovation of qualifying buildings or structures if certain conditions are met. The application window period for the LIA incentive is from 1 July 2010 through 30 June 2020.

Intellectual properties. Writing-down allowances (WDAs) are granted for capital expenditure incurred on the acquisition of specified categories of intellectual property (IP) on or before the last day of the basis period for the 2020 year of assessment if the legal and economic ownership of the IP lies with Singapore companies. Companies may elect a 5-, 10- or 15-year amortization period. This election is irrevocable.

On application, the legal ownership requirement may be waived for IP rights acquired on or after 17 February 2006 if the Singapore company has substantial economic rights over the IP, while the foreign parent holds the legal title.

Disposal of plant and equipment and industrial buildings. Allowances are generally subject to recapture on the sale of qualifying plant and equipment and industrial buildings if the sales proceeds exceed the tax-depreciated value (to the extent of the excess but not more than the allowances claimed). If sales proceeds are less than the tax-depreciated value, an additional allowance is given.

Relief for trading losses. Trading losses may be offset against all other chargeable income of the same year. Unused losses may be carried forward indefinitely, subject to the shareholding test (see below). Excess capital allowances can also be offset against other chargeable income of the same year and carried forward indefinitely subject to the shareholding test and to the requirement that the trade giving rise to the capital allowances continues to be carried on (same trade test).

A one-year carryback of up to an aggregate amount of SGD100,000 of current year unused capital allowances and trade losses (collectively referred to as “qualifying deductions”) may be allowed, subject to the meeting of certain conditions and compliance with specified administrative procedures.
The carryforward and carryback of losses and capital allowances are subject to the shareholders remaining substantially (50% or more) the same at the relevant comparison dates (shareholding test). If the shareholder of the loss company is itself another company, look-through provisions apply through the corporate chain to the final beneficial shareholder.

The carryback of capital allowances is subject to the same trade test that is applicable to the carryforward of unused capital allowances.

The Singapore Revenue has the authority to allow companies to deduct their unused tax losses and capital allowances, notwithstanding a substantial change in ownership at the relevant dates, if the change is not motivated by tax considerations. If allowed, these losses and capital allowances may be offset only against profits from the same business.

Groups of companies. Under group relief measures, current-year unused losses, capital allowances and donations may be transferred by one company to another within a group, subject to meeting certain qualifying conditions. A group generally consists of a Singapore-incorporated parent company and all of its Singapore-incorporated subsidiaries. Two Singapore-incorporated companies are members of the same group if one is 75% owned by the other, or both are 75% owned by a third Singapore-incorporated company.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Goods and Services Tax (GST) on any supply of goods and services, except an exempt supply, made in Singapore by a taxable person (a person whose annual taxable supplies exceed or are expected to exceed SGD1 million) in the course of or furtherance of business and on imports of goods into Singapore unless the imports qualify for import reliefs (The government has announced that the GST rate will be increased by two percentage points, from 7% to 9%, sometime between 2021 to 2025.)</td>
<td>0/7</td>
</tr>
<tr>
<td>Social security contributions (Central Provident Fund [CPF]); foreigners holding work passes are exempt For employees up to age 55, on monthly ordinary wages (lower rates apply if employee is older than age 55); the monthly salary ceiling for contributions is SGD6,000 for ordinary wages; contributions paid by Employer (limited to SGD1,020 a month)</td>
<td>17</td>
</tr>
<tr>
<td>Employee (limited to SGD1,200 a month)</td>
<td>20</td>
</tr>
<tr>
<td>Contributions on additional wages, such as bonuses and non-regular payments (limited to SGD102,000 less the total ordinary wages subject to CPF contributions in the year); paid by</td>
<td></td>
</tr>
</tbody>
</table>
The table shows the nature of tax and the corresponding rate in Singapore.

<table>

<tbody>
<tr>
<td>Employer</td>
<td>17</td>
</tr>
<tr>
<td>Employee</td>
<td>20</td>
</tr>
</tbody>
</table>

(For both contributions on ordinary wages and contributions on additional wages, the employer’s contribution rate for workers aged from above 55 to 60 is 13%; lower contribution rates apply to individuals older than age 60. The employee’s contribution rate for workers aged from above 55 to 60 is 13%; lower contribution rates apply to individuals older than age 60. For employees who earn total wages of less than SGD750 per month, different rates apply.)

Skills development levy; payable by employer for all employees; based on the first SGD4,500 of monthly gross remuneration; subject to a minimum of SGD2 0.25

E. Miscellaneous matters

Foreign-exchange controls. Singapore does not impose any restrictions on the remittance or repatriation of funds in or out of Singapore.

Debt-to-equity ratios. In general, Singapore does not impose any specific debt-to-equity restrictions.

Anti-avoidance legislation. The domestic tax legislation allows the Singapore Revenue to disregard or vary any arrangement that has the purpose or effect of altering the incidence of taxation or reducing or avoiding Singapore tax liability. The Singapore Revenue may also tax profits of a nonresident in the name of a resident as if the latter is an agent of the nonresident, if the profits of the resident from business dealings with the nonresident are viewed as lower than expected as a result of the close connection between the two parties.

On 21 December 2018, Singapore deposited the Instrument of Ratification for the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI). For Singapore, the MLI will enter into force on 1 April 2019. An existing tax treaty of Singapore will be amended by the MLI only if Singapore and the treaty partner have identified their tax treaty as a covered tax agreement and after both countries have ratified the MLI. At the point of ratification on 21 December 2018, Singapore intends for the MLI to apply to its existing 86 tax treaties. Under the MLI, the relevant treaty will be modified to include a Principal Purpose Test, which is an anti-abuse measure.

Transfer pricing. Specific legislation governs the arm’s-length principle to be applied to related-party transactions. The Singapore Revenue may make adjustments to the amount of income, deduction or loss of a taxpayer in cases in which the terms of commercial relations or financial relations between two related parties are not at arm’s length. A 5% surcharge is imposed on transfer-pricing (TP) adjustments made for non-compliance with the arm’s-length principle, effective from 2019 year of assessment.
The Singapore Transfer Pricing Guidelines provide guidance on the arm’s-length principle and TP documentation requirements in Singapore. The guidelines on the application of the arm’s-length principle are broadly consistent with the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, which endorse the arm’s-length principle. Specific guidance, including a recommendation to adopt a three-step approach (conduct a comparability analysis, identify the most appropriate TP method and tested party, and determine the arm’s-length results) to apply the arm’s-length principle, is provided together with specific requirements relating to external benchmarking searches and the application of results.

The Singapore Revenue expects companies to maintain contemporaneous TP documentation. Effective from the 2019 year of assessment, Singapore taxpayers are required to prepare contemporaneous TP documentation, if certain conditions are satisfied, to support their transactions with related parties, unless specifically exempted. The Singapore Revenue does not require TP documentation to be submitted together with the tax returns but taxpayers have 30 days to submit the documents on the Singapore Revenue’s request. Failure to prepare contemporaneous documentation or the inability of taxpayers to substantiate transfer prices may result in the imposition of penalties for noncompliance, upward adjustment, ineligibility to invoke competent authority assistance, rejection of an Advance Pricing Arrangement (APA) application and disallowance of self-initiated adjustments. The TP documentation must be organized at the group level and entity level.

TP administration provides information and guidance on the TP consultation program and the avoidance and resolution of TP disputes. The TP consultation process involves the Singapore Revenue selecting taxpayers based on various risk indicators and reviewing and auditing their TP methods and documentation. The guidelines also provide details on the step-by-step processes for the Mutual Agreement Procedure (MAP) and APAs, including sample documents for the MAP and APAs. Double tax agreements provide for the MAP to resolve instances of double taxation. MAP is a dispute-resolution process used by the competent tax authorities to resolve disputes arising under the application of double tax agreements.

Discussion and guidance is also provided with respect to TP adjustments, related-party loans, services and attribution of profits to permanent establishments (PEs).

Country-by-Country Reporting. On 21 June 2017, Singapore signed the Multilateral Competent Authority Agreement on exchange of Country-by-Country (CbC) Reports (CbCR MCAA), which enables Singapore to efficiently establish a wide network of exchange relationships for the automatic exchange of CbC Reports. As of 16 November 2018, the Singapore Revenue has activated bilateral Automatic Exchange of Information relationships for the exchange of CbC Reports with 60 jurisdictions; these facilitate the automatic exchange of CbC Reports for the
Ultimate Parent Entity of Singapore multinational enterprise groups.

**Common Reporting Standard.** Singapore has implemented the Common Reporting Standard (CRS), an internationally agreed standard for the automatic exchange of financial account information in tax matters. On 21 June 2017, Singapore signed the CRS Multilateral Competent Authority Agreement (CRS MCAA), which enables Singapore to efficiently establish a wide network of exchange relationships for the automatic exchange of information based on CRS. As of December 2018, the Singapore Revenue has concluded more than 60 bilateral Competent Authority Agreements. The first exchange took place in September 2018.

**Carbon tax.** The Singapore government will implement a carbon tax on the emission of greenhouse gases from 2019. The carbon tax rate will be set at SGD5 per ton of carbon dioxide-equivalent (tCO2e) of emissions from 2019 to 2023. The carbon tax rate will be reviewed by 2023 and it set to increase to between SGD10 and SGD15 per tCO2e of emissions by 2030.

**F. Domestic and treaty withholding tax rates**

In general, withholding tax at a rate of 15% is imposed on certain payments to nonresidents, including royalties and interest with respect to loans or indebtedness.

A 10% withholding tax, with certain exceptions, is imposed on the following types of payments to nonresidents:

- Royalties for the use of, or the right to use, movable property
- Payments for the use of, or the right to use, scientific, technical, industrial or commercial knowledge or information

In general, a 17% withholding tax is imposed on payments to non-resident companies for assistance or services rendered in connection with the application or use of scientific, technical, industrial or commercial knowledge or information, and for management or assistance in the management of any trade, business or profession. If services are performed outside Singapore, such services are not subject to withholding tax.

The rates of withholding tax on interest and royalties may be reduced under the terms of a double tax agreement, and details of the rates applicable to treaty jurisdictions are set out below.

</table>

(a) Exempt under certain specified circumstances.
(b) The rate is 7% for interest paid to banks or financial institutions.
(c) The 10% rate applies to interest paid to financial institutions. The 15% rate applies to other interest.
(d) The rate is 5% for interest paid to banks.
(e) The rate is 8% for interest paid to banks or financial institutions.
(f) The rate is 10% for interest paid by industrial undertakings to financial institutions in Sweden.
(g) Payments received as consideration for the use of, or the right to use, industrial, commercial or scientific equipment constitute business profits (that is, not royalties).
(h) The rate is 7.5% for interest paid to financial institutions.
(i) In certain circumstances, the reduced rates or exemptions do not apply to royalties for copyrights of literary or artistic works, including cinematographic films and films or tapes for radio or television broadcasting. Reference should be made to the applicable tax treaty.
(j) The 10% rate applies to payments relating to patents, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment or information concerning industrial, commercial or scientific experience. The 15% rate applies in all other cases.
(k) Royalties approved under the Economic Expansion Incentives (Relief from Income Tax) Act are exempt.
(l) This rate does not apply to royalties with respect to the operation of mines or quarries or the exploitation of natural resources. A contracting state may exempt or reduce the tax on industrial royalties in accordance with its domestic laws.
(m) The 5% rate applies if the interest is received by a bank or financial institution.
(n) The double tax agreement between Singapore and Taiwan does not contain an interest article.
(o) The lower rate applies to payments relating to patents, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment or information concerning industrial, commercial or scientific experience.
(p) The lower rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.
(q) The tax rate on royalties in the recipient's country is limited to 20%.
(r) The 10% rate applies to interest arising in the Philippines with respect to the public issuance of bonds, debentures or similar obligations.
(s) In the case of the Philippines, the 15% rate applies to royalties paid by enterprises registered with the Philippine Board of Investments (BOI) and engaged in preferred activities. It also applies to royalties paid with respect to cinematographic films or tapes for television or broadcasting. The 25% rate applies in all other cases, except for those covered by footnote (k).
The 15% rate applies to payments relating to copyrights of scientific works, patents, trademarks, designs or models, plans, secret formulas or processes, industrial, commercial or scientific equipment or experience or information concerning industrial or scientific experience. The 20% rate applies to literary or artistic works, including cinematographic films or tapes for television or broadcasting.

The 0% withholding tax rate does not apply to persons incorporated under the International Companies Act if their income or profits are not taxed at the normal rate of corporate income tax in Mauritius or any income tax comparable thereto.

The 10% rate applies if the interest is beneficially owned by a financial institution or insurance company or if the interest is paid with respect to indebtedness arising from a sale on credit of equipment, merchandise or services.

The rate also applies to payments for the use of industrial, commercial or scientific equipment, which includes transport vehicles for cargo transportation.

The rates are three-tiered, which vary according to the nature of the payment.

The 5% rate applies to royalties paid for the use, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, or films or tapes used for radio or television broadcasting. The rate is 8% if the royalties are for the use of, or right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or for industrial, commercial or scientific equipment.

A second protocol to amend the double tax treaty entered into force on 3 August 2018 and is effective from 1 January 2019.

The term “royalties” has been amended to mean payments of any kind received as consideration for the use of, or the right to use, copyrights of literary, artistic or scientific works including cinematographic film, patents, trademarks, designs or models, plans, secret formulas or processes, or for information concerning industrial, commercial or scientific experience.

The term “royalties” excludes payments of any kind received as a consideration for the use of, or the right to use, the following:

- Computer software if the payments do not constitute payments for the right to commercially exploit such computer software by reproducing, modifying or adapting the computer software for the purpose of distribution or sale or by preparing derivative works based on the computer software for the purpose of distribution or sale
- Any digital content on any media for reproduction or transmission if the payments do not constitute payments for the right to commercially exploit such digital content by reproducing, modifying or adapting the digital content for the purpose of distribution or sale or by preparing derivative works based on the digital content for the purpose of distribution or sale

This double tax treaty entered into force on 1 November 2018 and is effective from 1 January 2019.

Payments for computer software are royalties only if such payments are made for the right to use and exploit the copyright in the program.

The term “royalties” does not include payments for the use of, or the right to use, industrial, commercial or scientific equipment.

The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, or films or tapes used for radio or television broadcasting. The rate is 10% in all other cases.
Please direct all requests regarding Sint Maarten to the persons listed below in the Willemstad, Curaçao, office.

On 10 October 2010, the country Netherlands Antilles, which consisted of five island territories in the Caribbean Sea (Bonaire, Curaçao, Saba, Sint
Eustatius and Sint Maarten), was dissolved. On dissolution of the Netherlands Antilles, the islands of Bonaire, Sint Eustatius and Saba (BES-Islands) became part of the Netherlands as extraordinary overseas municipalities. Curaçao and Sint Maarten have both become autonomous countries within the Kingdom of the Netherlands. The former Netherlands Antilles tax laws remain applicable to Sint Maarten, with the understanding that references in the laws to “the Netherlands Antilles” should now read “Sint Maarten.” This chapter provides information on taxation in Sint Maarten only. Chapters on the BES-Islands and Curaçao also appear in this guide.

(a) A surtax of 15% is levied on a rate of 30%, resulting in an effective tax rate of 34.5%.

(b) Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in a business in the shipping or aviation industry may be carried forward indefinitely. Companies under the Sint Maarten offshore tax regime may carry forward tax losses for five years.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax is levied on resident and nonresident entities. Resident entities are those incorporated under former Netherlands Antilles or current Sint Maarten law, even if their management is located abroad, as well as entities incorporated under foreign law, but effectively managed in Sint Maarten. For resident entities, corporate income tax is, in principle, levied on the aggregate amount of net profits earned from all sources during the entity’s accounting period. Nonresident entities are subject to tax on specific Sint Maarten income items, such as profits earned through a permanent establishment and income related to real estate property in Sint Maarten, including interest derived from a mortgage on such real estate property.

Tax rates. The net profits earned by resident and nonresident entities, including branches of foreign entities, are subject to the standard corporate income tax rate of 34.5%. However, other rates may apply to companies qualifying for tax holidays, E-zone companies, offshore companies, tax-exempt companies, and taxed private foundations and trusts.

Withholding taxes are not imposed on remittances of profits by branches to their foreign head offices.

Tax incentives. Reduced tax rates and other tax incentives (tax holidays) are available to new business enterprises that engage in certain activities, including tourism and land development.

Offshore companies. The offshore tax regime was abolished in 2001. However, under grandfathering rules, special incentives are available for qualifying offshore companies in existence before 1 January 2002. Offshore companies are resident companies owned by nonresidents that perform their business activities abroad.
Income derived by offshore companies (for example, royalty, financing, holding, portfolio investment, mutual fund, real estate and service activities) is subject to corporate income tax rates of 2.4% to 3%. For trading and service companies, offshore status may result in reduced rates. Capital gains on securities, loans, intellectual property and immovable property are exempt from corporate income tax. In addition, advance tax rulings can be obtained for determining the offshore tax status and method of calculating the tax base of offshore companies. The offshore tax rates are guaranteed through 2019.

**Tax-exempt companies.** Tax-exempt companies (TECs) are exempt from Sint Maarten corporate income tax. Only private limited liability companies incorporated under former Netherlands Antilles or current Sint Maarten law may qualify as TECs. TECs are allowed to solely or practically solely (more than 90%) engage in the extending of loans, investing in securities and deposits and licensing of intellectual and industrial property rights and similar property rights. To qualify as a TEC, a written request must be submitted to the Tax Inspector and certain conditions must be satisfied. TECs are not eligible for benefits under the Tax Arrangement between the Netherlands and Sint Maarten (effective as of 1 January 2017) or for benefits under any other double tax treaty of the former Netherlands Antilles or Sint Maarten. However, exchange-of-information provisions in this tax regulation, tax treaties and tax information exchange agreements apply to TECs. If a TEC loses its tax-exempt status, it is treated as a regularly taxed company subject to tax on its worldwide income, and it receives a tax-free step-up in basis.

**Taxable private foundations and trusts.** The corporate income tax law provides an option for private foundations and trusts to be subject to a reduced effective corporate income tax rate of 10% (including surtax). In principle, Sint Maarten private foundations and trusts are fully exempt from corporate income tax if they do not conduct an enterprise. After the option is exercised, the reduced effective rate of 10% applies for a period of at least three full fiscal years. After this three-year period, the private foundation can request that it no longer be subject to the reduced effective rate of 10%.

**Ruling policy.** Sint Maarten has an extensive advance tax ruling practice. These rulings include the following:

- Cost-plus rulings for intercompany support activities
- Minimum gross margin rulings for finance activities
- Participation exemption rulings for holding activities
- Informal capital (or cost-plus) rulings for intercompany trading activities

These rulings are usually valid for a three-year period, with an option for extension.

**Other incentives.** Sint Maarten also offers other incentives for specific activities, such as the international use of aircraft and ships and the insurance of risks outside Sint Maarten.

**Capital gains.** Under the current corporate income tax rules, in general, except for offshore companies, no distinction is made between the taxation of capital gains and the taxation of other income. All income is taxed at the applicable corporate income...
tax rate (34.5%). Taxation of capital gains on qualifying share interests (participation exemption) is discussed in Section C.

**Administration.** The standard tax year is the calendar year. However, on request and under certain conditions, a company may use a different financial accounting year as its tax year.

Companies must file a provisional tax return within three months after the end of the financial year. In principle, this return must show a taxable profit that is at least equal to the taxable profit shown on the most recently filed final tax return. Any tax due must be paid at the time of filing of the provisional tax return. An extension for filing and payment with respect to the provisional tax return is not granted. On request of the company, the Tax Inspector may consent to the reporting of a lower taxable profit than the taxable profit shown on the most recently filed final tax return.

The final tax return must be filed within six months after the end of the financial year. Any difference between the tax due based on the provisional return and the tax due based on the final return must be settled at the time of the filing of the final return. On request, an extension for the filing of the final tax return can be obtained.

To ensure compliance with the rules described above, penalties may be imposed. The tax authorities may impose arbitrary assessments if the taxpayer fails to file a tax return. Additional assessments, including a penalty, may be imposed if insufficient tax is levied. A penalty of 100% of the additional tax due may be levied. Depending on the degree of wrongdoing, this penalty is normally 25% or 50%.

In general, offshore companies must file their tax returns within six months following the end of the financial year. In practice, the tax authorities do not strictly enforce this deadline for offshore companies.

**Dividends.** Sint Maarten does not levy dividend withholding tax on dividend distributions.

**Foreign tax relief.** A 100% exemption from Sint Maarten corporate income tax is available for foreign business profits. For this purpose, foreign profits are profits earned in another country through a permanent establishment or a permanent representative in the other country, or profits earned from immovable property located in a foreign country, including the rights related to the property that is part of the business activities of the taxpayer but is deemed to be part of the foreign business. If the foreign profits are derived from a business that can be considered a low-taxed portfolio investment, a reduced exemption of 70% applies.

**C. Determination of taxable income**

**General.** Taxable profit must be calculated in accordance with “sound business practices.”

All expenses incurred with respect to conducting a business are, in principle, deductible. However, if expenses exceed normal arm’s-length charges and are incurred directly or indirectly for the benefit of shareholders or related companies, the excess is considered to be a nondeductible profit distribution (dividend). In
addition, certain expenses, such as fines, penalties and expenses incurred with respect to crimes, are not deductible. Only 80% of representation expenses, as well as expenses incurred on meals, beverages, gifts, courses and seminars, is deductible.

In principle, interest expenses are deductible for tax purposes if the interest rate is determined on an arm’s-length basis. However, certain restrictions apply to the deduction of interest on loans connected to certain tax-driven transactions and intragroup reorganizations. Under thin-capitalization rules, the deductibility of interest accrued or paid directly or indirectly to an affiliated TEC may be restricted.

**Participation exemption.** In principle, a 100% participation exemption applies for all qualifying share interests held by Sint Maarten corporate taxpayers.

In general, a shareholding qualifies for the participation exemption if it represents at least 5% of the share capital or voting power in a company or if the amount paid for the shareholding amounts to at least USD500,000. In addition, any member of a cooperative association can apply for the participation exemption.

For dividend income, additional requirements are imposed for a participation to be considered a qualifying participation. To apply the 100% exemption on dividends, either of the following conditions must be met:

- The qualifying participation is subject to a (nominal) profit tax rate of 10% (subject-to-tax clause).
- Dividends, interest or royalties received from other sources than the business of the participation do not account for 50% or more of the gross income of the participation (non-portfolio-investment clause).

The above conditions may be met on a consolidated basis. If neither of the above conditions is met, a lower participation exemption of 70% applies to dividends. The subject-to-tax clause and the non-portfolio-investment clause do not apply to the 100% participation exemption on capital gains and income received from participations that exclusively or almost exclusively hold immovable property.

Expenses that are connected with the participation, including financing expenses, are not deductible if the income is 100% tax-exempt.

**Tax depreciation.** In general, assets are depreciated using the straight-line method, with the residual value taken into consideration. The following are some of the applicable rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
<th>Residual value (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2 to 2.5</td>
<td>10</td>

<tr>
<td>Motor vehicles</td>
<td>10 to 33</td>
<td>15</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10</td>
<td>10</td>
</tr>
</tbody>
</table>

The rates listed above provide a general overview of the depreciation rates. The actual depreciation rate depends on the type of asset used by the company.

Fixed company assets acquired by companies operating in Sint Maarten may qualify for accelerated depreciation at a one-time
maximum annual rate of $33\frac{1}{3}\%$ of the acquisition costs of the assets. Fixed company assets are assets used for a business process for at least one business cycle, unless the assets are intended to be processed or sold.

An investment allowance deduction of 8% (12% for new buildings or restorations of buildings) is granted for acquisitions of fixed assets exceeding approximately USD2,800. The allowance is deducted from taxable income in the year of the investment and in the following year. The investment allowance deduction is recaptured in the year of sale and the subsequent year if the asset is sold within 6 years (15 years for buildings) of the date of the investment.

**Groups of companies.** On written request, Sint Maarten resident companies may form a fiscal unity (tax-consolidated group) for corporate income tax purposes. To qualify for a fiscal unity, the parent company must own at least 99% of the shares in the subsidiary. A fiscal unity may include, among others, a company incorporated under Dutch law that has its place of effective management in Sint Maarten. The whole group is taxed for corporate income tax purposes as if it were one company and, as a result, the subsidiaries in the fiscal unity are no longer individually subject to corporate income tax.

Advantages for corporate income tax purposes of fiscal unity treatment include the following:

- Losses of one subsidiary may be offset against profits of other members of the fiscal unity.
- Reorganizations, including movements of assets with hidden reserves from one company to another, have no direct tax consequences for corporate income tax purposes.
- Intercompany profits may be fully deferred.

The fiscal unity does not apply for revenue tax purposes.

**Relief for losses.** Losses in a tax year may be carried forward for 10 years. No carryback is available. Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in a business in the shipping or aviation industry may be carried forward indefinitely. Companies under the Sint Maarten offshore tax regime can carry forward tax losses for five years.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<td></td>
</tr>
<tr>
<td>Real estate transfer tax</td>
<td>4</td>
</tr>
<tr>
<td>Import duties</td>
<td>0</td>
</tr>
</tbody>
</table>

**E. Miscellaneous matters**

**Foreign-exchange controls.** The currency in Sint Maarten is the Antillean guilder (ANG).
For foreign investors that obtain a foreign-exchange license from the Central Bank of Curaçao and Sint Maarten, no restrictions are imposed on the movement of funds into and out of Curaçao and Sint Maarten. In general, the Sint Maarten Central Bank automatically grants foreign-exchange licenses for remittances abroad. Residents are subject to several foreign-exchange regulations imposed by the Sint Maarten Central Bank. However, residents may be granted nonresident status for foreign-exchange control purposes. Some reporting requirements exist for statistical purposes.

Transfer pricing. In general, intercompany charges should be determined on an arm's-length basis.

F. Tax treaties

Provisions for double tax relief are contained in the tax treaty with Norway and in the Tax Arrangement between the Netherlands and Sint Maarten (effective as of 1 January 2017). Under a measure in the Tax Arrangement between the Netherlands and Sint Maarten, dividend distributions by a Dutch subsidiary to its Sint Maarten parent company are, in principle, subject to 15% Dutch dividend withholding tax or to reduced 0% Dutch dividend withholding tax if certain conditions are fulfilled. Sint Maarten does not impose withholding tax on payments from Sint Maarten to residents of other countries.

The Netherlands Antilles has entered into tax information exchange agreements with Antigua and Barbuda, Australia, Bermuda, British Virgin Islands, Canada, Cayman Islands, Costa Rica, the Czech Republic, Denmark, Faroe Islands, Finland, France, Germany, Greenland, Iceland, Italy, Mexico, New Zealand, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Spain, Sweden, the United Kingdom and the United States. As a result of the constitutional reform of the Kingdom of the Netherlands, the tax treaties entered into by the Netherlands Antilles became automatically applicable to the surviving countries, which are the legal successors of the Netherlands Antilles.

Under the latest published Organisation for Economic Co-operation and Development (OECD) list, Sint Maarten qualifies as a white-listed jurisdiction.

The government of the former Netherlands Antilles entered into bilateral agreements with the European Union (EU) member states with respect to the application of the EU Council Directive on taxation of savings income. The Sint Maarten (former Netherlands Antilles) law to implement the directive took effect in July 2006.

The Kingdom of the Netherlands has entered into many bilateral investment treaties that also apply to Sint Maarten.

Sint Maarten also signed the OECD Convention on Mutual Administrative Assistance in Tax Matters.

The Tax Arrangement between the Netherlands and Sint Maarten, which entered into force on 1 March 2016 (effective as of 1 January 2017), replaced the Tax Regulation for the Kingdom of the Netherlands.
The chapter below is based on the existing law in the Slovak Republic as of 1 January 2019. Because further changes to the 2019 tax rules are possible, readers should obtain updated information before engaging in transactions.

(a) The 7% rate applies to the dividend income of individuals paid out from profits generated in tax periods beginning on or after 1 January 2017. The 35% rate applies to dividends paid out from profits generated in tax periods beginning on or after 1 January 2017 if the dividends are paid to or received from residents of non-treaty countries or countries that have not signed the Convention on Mutual Administrative Assistance in Tax Matters.

(b) The 35% rate applies to income paid to residents of non-treaty countries or countries that have not signed the Convention on Mutual Administrative Assistance in Tax Matters. Also, see Section B.

(c) This tax applies to nonresidents only. For resident companies, royalties are included in taxable income subject to corporate tax. The 35% rate applies to income paid to residents of non-treaty countries or countries that have not signed the Convention on Mutual Administrative Assistance in Tax Matters. The rates may be reduced by an applicable double tax treaty. Also, see Section B.

(d) This tax applies to income received by authors (individuals) for contributions to newspapers, radio and television. It is possible for the author and the payer of the income to agree that no withholding tax be applied; in such case, the income is taxed through the tax return of the author at tax rates of 19% and 25%. The 35% rate applies to income paid to residents of non-treaty countries or countries that have not signed the Convention on Mutual Administrative Assistance in Tax Matters.

(e) The tax loss may be carried forward proportionally during a period of four consecutive years.

B. Taxes on corporate income and gains

Corporate income tax. Slovak (resident) companies are subject to corporate income tax on their worldwide income. Slovak companies are those incorporated or having their place of management in the Slovak Republic. Foreign (nonresident) companies are subject to corporate income tax only on their Slovak-source income, such as income attributable to a permanent establishment.

Under Slovak law, a permanent establishment is a fixed place or facility for nonresidents to carry out activities in the Slovak Republic. A permanent establishment includes an administrative location, branch, office, workshop, sales location, technical facility or location for research and extraction of natural resources. The fixed place or the facility is considered to be permanent if the activities are carried out continuously or repeatedly. Repeated intermediary services related to transportation and accommodation that are rendered through a digital platform (a hardware or software platform required to create and administer applications) are also deemed to have their fixed place in the Slovak Republic. In the case of one-off activities, the place or facility is considered to be permanent if the duration of the activities exceeds six months, either continuously or divided into 2 or more periods in the course of 12 consecutive calendar months. A building site, construction site or assembly works site (as described in the Commentary to Article 5, Paragraph 3 of the Organisation for Economic Co-operation and Development [OECD] Model Tax Treaty) is regarded as a permanent establishment only if the duration of the activities performed by a tax nonresident and its related parties exceeds six months. The provision of services in the Slovak Republic by an enterprise through its employees or other personnel is considered to create a “service permanent establishment” if the provision of services exceeds 183 days in
any consecutive 12-month period. A permanent establishment also includes the activity of an agent if both of the following conditions are satisfied:

- The agent negotiates, enters into agreements, acts as an intermediary in the conclusion of contracts or plays a principal role leading to the conclusion of contracts that are routinely concluded without material modification by the enterprises.
- These contracts are concluded in the name of the enterprise, or for the transfer of the ownership of, or for the granting of the right to use, property owned by that enterprise or that enterprise has the right to use, or for the provision of services by that enterprise.

**Rates of corporate tax.** The corporate income tax rate is 21%, except for withholding tax (see Section A).

**Incentives.** To promote investments, the Slovak government provides potential local and foreign investors with investment incentives that are proportionate to their activities in the Slovak Republic. The maximum limits for state aid are determined by the European Union (EU) regulations and are driven by the relative development of the country or region in which an investment project is located and the unemployment rate in that region. The limits are set as a percentage of eligible costs of an investment project.

Under the Slovak Regional Investment Aid Act, investment aid may be granted to support the realization of investments in manufacturing productions, technology centers and shared-service centers.

The Slovak Republic provides the following indirect forms of incentives:

- Tax relief
- Transfer of immovable assets owned by the state or municipality at a price lower than the market price

The Slovak Republic provides the following direct forms of incentives:

- Cash grants on acquisitions of fixed assets
- Cash grants on newly created jobs
- Cash grants on training

**Tax relief.** Under the Slovak Regional Investment Aid Act, companies may apply for a 100% tax reduction (full tax relief) for 10 consecutive tax years. The tax relief can be provided for newly established companies (new production) and also for existing companies (extension of existing production).

**Transfers of immovable assets owned by the state or municipality at a price lower than the market price.** In exceptional circumstances, as part of regional aid, the government may award a financial grant or discount from the market price with respect to a transfer of immovable assets (usually land and buildings) to investors by the state or municipalities.

**Cash grants for the acquisition of fixed assets.** Cash grants can be made for the acquisition of tangible fixed assets (for example, land, buildings, and plant and machinery) and intangible fixed assets (for example, patents, licenses, know-how or unpatented technical knowledge).
Cash grants for newly created jobs. Cash grants for newly created jobs are made based on the anticipated wage costs related to newly created jobs and the regional location of the project (taking into account the regional unemployment rate).

Cash grants on training. The amounts of cash grants for training are expressed as a percentage of eligible training costs and vary according to region (grants for the Bratislava region are lower than grants for the rest of the country) and type of training (general or specific).

General conditions. To qualify for investment aid, applicants must meet the general and specific conditions under the Slovak Regional Investment Aid Act, the Regulation of the Slovak government and the European legislation.

The following are the general conditions:
- An applicant must submit its investment intention (plan) before the start of the projected works.
- The project must be completed within three years (five years in case of large investment projects).
- All subsidized job positions must be filled within three years after the completion of the projects and maintained for a period of three (five) years.
- The project operation must be maintained for a minimum period of five years from its completion without change of its location.

Specific conditions. The specific conditions under the Slovak Regional Investment Aid Act vary according to the type of project.

The following are the specific conditions for manufacturing projects under the Slovak Regional Investment Aid Act:
- The works on the investment project did not start before the submission of the application to the Ministry of the Economy.
- The long-term tangible assets (land, building and machinery) and the long-term intangible assets (patents, licenses and know-how) are acquired.
- The minimum amount of the new machinery intended for manufacturing production is acquired.
- The minimum amount of new jobs is created.
- The main area of the investment is realized.

The following are the specific conditions for technology centers under the Slovak Regional Investment Aid Act:
- The works on the investment project did not start before the submission of the application to the Ministry of the Economy.
- The long-term tangible assets (land, building and machinery) and the long-term intangible assets (patents, licenses and know-how) are acquired.
- The minimum multiple of the average monthly wage in the given region is paid to employees of the center during the three (five) years. The average wage is tested for the calendar year preceding the calendar year during which the job was created.
- The minimum amount of new jobs is created.
- The main area of the investment is realized.

The following are the specific conditions for shared-service centers under the Slovak Regional Investment Aid Act:
- The works on the investment project did not start before the submission of the application to the Ministry of the Economy.
The long-term tangible assets (land, building and machinery) and the long-term intangible assets (patents, licenses and know-how) are acquired.

The minimum multiple of the average monthly wage in the given region is paid to employees of the center during the three (five) years. The average wage is tested for the calendar year preceding the calendar year during which the job was created.

The minimum amount of new jobs is created.

The main area of the investment is realized.

The specific values for each type of the project are provided by the Regulation of the Slovak government. Conditions, such as the value of acquired assets, ratio of new assets, minimum amount of created jobs and minimum multiple of average wage are set differently depending on the type of the project, type of the requested aid, region (based on the unemployment rate) and area (priority or non-priority).

Approval of the aid. No legal entitlement to any investment aid exists. An applicant must submit an investment aid intent to the relevant authorities (that is, the Ministry of the Economy and other relevant aid providers), which review compliance with both the general and specific conditions under the Slovak Regional Investment Aid Act. An applicant can begin work on the project as soon as the investment aid intent is submitted to the respective authority. If the conditions are met, the Ministry of Economy may issue an official offer to the applicant. Following receipt of the official offer, the investor may submit an investment aid application. The investment aid application is submitted to the Slovak government for approval. Approval of the European Commission may also be required if the requested aid exceeds the thresholds stated in the EU General Block Exemption Regulation.

Other national and local incentives. The Slovak Republic is entitled to draw support from the Structural Funds and Cohesion Fund during the period of 2014 through 2020. Most of the funds will be drawn by public institutions (for example, municipalities, cities, nonprofit-making companies), while only a minor part will be available for businesses. The incentives available for companies are mainly focused on tourism, enhancing research and development (R&D) and employee training.

Investors may benefit from infrastructure (for example, electricity, water, gas and sewage) fully or partially financed by the state and/or municipality. The municipality may also offer minor tax exemptions (real estate tax and other local taxes). In general, most of this support qualifies as regional state aid.

Municipalities are entitled to use state budget funding for the development of industrial parks. At the predevelopment stage, investors are typically requested to sign a letter of intent with the relevant municipality. Benefiting from advantages offered by industrial parks does not, in general, qualify as state aid.

Patent Box. Effective from 1 January 2018, 50% of the income derived from the commercial use of certain intangible assets and embedded royalties is exempt from tax. This affects income from compensation for the use of software, patents and utility models as well as income from the sale of products that were manufactured using patents or technical solutions protected by a utility
model. To apply the income exemption in both of these cases, the intangible assets (for example, software or patents) must be the result of an R&D activity of a resident or a nonresident legal person performing the activity in the Slovak Republic through a permanent establishment.

**Capital gains.** Capital gains are subject to income tax at a rate of 21%.

Effective from 2018, the income of legal entities, Slovak tax residents or nonresidents with a Slovak permanent establishment, arising from the sale of shares may be exempted from tax if the following conditions are satisfied:

- These persons perform substantial function and manage and bear risks connected to the ownership of these shares in the Slovak Republic.
- They possess the required personal and material equipment necessary to perform these functions.
- They have a direct shareholding of at least 10% in the company, the share capital of which is being sold.
- At least 24 consecutive calendar months have passed since the shareholding was acquired. If shares were obtained before 1 January 2018, this holding qualification period begins on 1 January 2018 or on the first day of the tax year beginning after 31 December 2017, for taxpayers with a different tax year.

The exemption does not apply to income from the sale of securities and shares by securities dealers, as this represents their principal activity; nor is it available to taxpayers subject to liquidation proceedings. In addition, income arising from the sale of shares is not exempt if the company of which shares were sold has gone into liquidation, declared insolvency or had its restructuring approved.

Capital gains realized by Slovak tax nonresidents on the sale of shares of companies established in the Slovak Republic are considered Slovak-source income and are generally taxable.

**Administration.** The tax year is usually the calendar year. However, if a company informs the tax authorities in advance, it may change its tax (accounting) year.

Tax returns for each tax year must be filed within three months after the end of the tax year. The filing period may be extended by a maximum of three months based on a written announcement filed with the tax authority before the expiration of the regular filing deadline. Another extension of an additional three months is possible if the company received income from foreign sources.

In general, monthly or quarterly prepayments of tax are required, depending on the amount of tax liability for the preceding year.

**Dividends.** Profits distributed by companies to their holding companies are not subject to tax in the Slovak Republic unless either of the following circumstances exists:

- The distribution is deductible for tax purposes at the level of the subsidiary.
- The distribution is a transaction (or part of a series of transactions) that is (are) not business driven, and the purpose or one of the main purposes is to gain a tax advantage.
Effective from 2017, dividends paid out of profits generated for periods beginning on or after 1 January 2017 that are paid to or received from residents of non-treaty countries or countries that have not signed the Convention on Mutual Administrative Assistance in Tax Matters are subject to a 35% income tax. The dividend income of individuals paid out of profits generated for tax periods beginning on or after 1 January 2017 is taxed at a rate of 7% or 35%.

Special rules apply to dividends distributed out of profits realized before 2004.

**Interest and royalties.** Under Slovak law, interest and royalty payments satisfying the conditions contained in Council Directive No. 2003/49/EC are exempt from Slovak withholding tax.

**Foreign tax relief.** Under applicable double tax treaties, a foreign tax relief is available to Slovak residents for foreign tax paid on income earned abroad.

### C. Determination of trading income

**General.** Corporate tax is based on the statutory accounting profit as adjusted for certain items prescribed by the tax law.

In general, dividends are not included in the tax base.

Items that are specifically deductible for tax purposes include, among others, tax depreciation (see **Tax depreciation**) and certain expenses relating to health and safety at work and environmental protection.

Nondeductible items include, among others, the following:
- Entertainment and travel allowances in excess of the statutory limits
- Penalties and fines
- Taxes paid on behalf of other taxpayers
- Damages exceeding compensation received, unless the damage arose as a result of natural disaster, or it was caused by a person or persons unknown and this is confirmed by the police
- Most accruals and provisions (see **Provisions**)
- Write-offs of debts, unless specific conditions are met

**Inventories.** Inventories may be valued using the first-in, first-out (FIFO) or average-cost methods. Costs include all costs necessary to convert the inventory to its current condition and to transport it to its current location. Shortages and damages are not tax deductible, unless the damage resulted from a natural disaster, or it was caused by a person or persons unknown and this is confirmed by the police.

**Provisions.** Accruals and provisions are generally not deductible, with certain exceptions specified by law.

Special rules apply to banks and insurance companies.

**Tax depreciation.** Under the Income Tax Act, tangible assets are divided into six categories, each of which specifies a period (a specified number of years, which range from 4 to 40) over which all assets in the category are depreciated. Intangible assets are depreciated over their actual useful life.
It is possible to split assets and depreciate separable parts of the assets. Each separable part must have an acquisition price higher than EUR1,700, and separate evidence must be maintained. Only parts of assets specified by the Income Tax Act can be depreciated based on separate parts (for example, specific buildings and machinery).

Tax depreciation may be calculated by using either the straight-line method or the accelerated method. A company chooses the method on an asset-by-asset basis and, after the method is chosen, it cannot be changed during the depreciation period.

**Research and development.** To support entities performing research and development (R&D), the Slovak Republic provides an allowance equal to 100% of R&D costs and expenses that may be deducted from the tax base. This allowance may also include the cost of licenses for software used in performing R&D activities. In addition, the R&D allowance can be increased by 100% of the positive difference between the average of the total R&D costs for the current tax year and the preceding tax year and the average of total R&D costs for two tax years immediately preceding the current tax year.

**Relief for losses.** Companies may carry forward losses and offset them against income proportionally during a period of four consecutive years following the tax year of the loss. If the tax period is shorter than 12 months (for example, if the company changes its financial year), the tax loss that would normally be deductible is fully deductible in that tax period.

**Groups of companies.** Slovak law does not contain any provisions regarding the corporate taxation of groups in the Slovak Republic.

### D. Other significant taxes

### E. Miscellaneous matters

**Thin-capitalization rules.** Thin-capitalization rules apply to domestic and foreign related parties, effective from 1 January 2015. The
maximum amount of tax-deductible interest is set at 25% of earnings before interest costs, tax, depreciation and amortization. These rules also apply to contracts signed before 1 January 2015. They do not apply to financial institutions.

**Transfer pricing.** If the price agreed between related parties differs from the usual market price and if this difference cannot be satisfactorily justified, the tax authorities may adjust the tax base to reflect the usual market price.

The transfer-pricing rules apply to personally or economically related persons, as well as to other related persons.

Persons are economically or personally related if one person participates in the ownership, control or administration of another person, if such persons are under the control or administration of the same person or a close family relative of the person, or if the same person or a close family relative of the person has a direct or indirect equity interest in the persons. Participation in ownership or control exists if the direct or indirect participation in the basic capital of, or voting rights in, one company by another company is higher than 25%. Participation in the administration is a relationship between members of statutory bodies or supervisory boards of the companies. Other relationships are defined as relationships created for the purpose of decreasing the tax base or increasing the tax loss.

Under the Slovak transfer-pricing measures, an advance ruling on the transfer-pricing method may be obtained through an agreement with the tax authorities at least 60 days before the tax year in which the transfer-pricing method will be used.

The Slovak transfer-pricing measures specify the acceptable transfer-pricing methods, which conform to the methods included in the OECD Transfer-Pricing Guidelines.

Taxpayers must provide transfer-pricing documentation within 15 days after an official request by the tax authorities.

**Tax regime for business combinations.** The Slovak Income Tax Act addresses in detail the taxation of the sale of all or part of an enterprise, the taxation of non-monetary contributions to registered capital and the taxation of mergers and divisions of companies.

Since 1 January 2018, new rules for local business combinations apply to mergers, acquisitions or company splits, with decisive dates for tax and accounting purposes set after 1 January 2018 (that is, on 2 January 2018 at the earliest). The possibility to carry out local business combinations (mergers and demergers) in tax book values was abolished. The decisive date is the date from which the acts of a company dissolving as a result of business reorganization (for example, a merger) are considered, from an accounting and tax point of view, to be acts made on the account of successor company. In general, business combinations can be made only in real values for tax purposes, with the exception of certain cross-border business combinations meeting specific criteria.

**Exit tax.** An exit tax at a rate of 21% is introduced, effective from 1 January 2018. Assets are subject to taxation if a taxpayer moves
them, with no change of ownership, to a jurisdiction outside of the Slovak Republic or if the taxpayer changes its tax residence.

The exit tax base equals the difference between the fair market value of the moved assets and their tax residual value (that is, the fiction of the sale of these assets is applied, and this difference must not be negative). The tax applies in the following circumstances, among others:

• Assets are moved from a head office in the Slovak Republic to a permanent establishment abroad.
• Assets are moved from a permanent establishment located in the Slovak Republic to a head office or other permanent establishment in another state.
• The tax residence of a taxpayer changes to a jurisdiction outside the Slovak Republic.
• A taxpayer moves an activity or part of an activity performed in Slovak Republic through a permanent establishment to another state, or a taxpayer with unlimited tax liability moves its business activity or its part of its activity to a permanent establishment abroad.

Hybrid mismatches. Rules against hybrid mismatches are effective from 1 January 2018. Under these rules, tax deductibility of expenses is denied in the following situations:

• The same tax expense incurred in another state has been deducted in the Slovak Republic pursuant to the Income Tax Act, as well as under the legislation of that other state (double deduction of the same expense).
• The tax expense has been applied in the Slovak Republic, but it is not taxable income included in the tax base in the Slovak Republic or in another jurisdiction (deduction without inclusion).

Controlled foreign companies. The rules for controlled foreign companies (CFCs) are effective from 1 January 2019. A CFC for Income Tax Act purposes is a legal person, entity or permanent establishment that satisfies both of the following conditions:

• A Slovak company or an entity has more than a 50% share of the assets, voting rights or profits of the controlled company (does not apply to a permanent establishment).
• Tax paid in the Slovak Republic on the income of this controlled company is lower than the difference between the corporate income tax that this controlled foreign company would have paid in the Slovak Republic after recalculating its tax base under Slovak law, and the tax paid by the company abroad.

If both of the above conditions are met, the company is considered a CFC and the taxpayer must carry out specific tax base arrangements.

F. Treaty withholding tax rates

The Slovak Republic honors the bilateral tax treaties that were concluded by the former Czechoslovakia. The withholding rates under these treaties, and the treaties entered into by the Slovak Republic are listed in the following table.

In general, treaty rates apply if the recipient is the beneficial owner of the income. To obtain the benefit of the reduced treaty rates, the
beneficial owner must be in a position to provide a tax residency certificate.

In general, dividends are exempt from tax. Consequently, the treaty rates do not apply to dividends paid by Slovak companies.

---

(a) The 5% rate applies to dividends paid to a company that owns more than 10% of the capital of the payer of the dividends.

(b) The lower rate applies if the beneficial owner is a company that controls at least 10% of the voting power of the payer.

(c) The lower rate applies to interest on government loans.

(d) The lower rate applies if the recipient is a company that directly holds at least 25% of the capital of the payer of the dividends.

(e) If the corporate tax rate in a contracting state on distributed profits is 20% lower than the corporate tax rate on undistributed profits, the withholding tax rate may be increased to 25%.

(f) This rate also applies to fees for technical services.

(g) The 10% rate applies if the recipient is a company that owns at least 25% of the voting shares of the payer during the six-month period immediately preceding the date of payment of the dividends.

(h) The 15% rate applies to dividends paid by Slovak companies to Sri Lankan recipients. The 0% rate applies to dividends paid by Sri Lankan companies to Slovakian recipients, except for Sri Lankan income tax and additional tax under Sri Lanka's tax law. A maximum tax rate of 6% applies to the additional tax.

(i) The 0% rate applies to royalties relating to copyrights and films derived from sources within one of the contracting states.

(j) The 0% rate applies to interest paid in any of the following circumstances:
   - It is paid with respect to indebtedness arising as a result of the sale on credit of equipment, merchandise or services.
   - It is paid on any type of loan granted by a financial institution.
   - It is paid to a pension fund or other similar institution providing pension schemes in which individuals may participate in order to secure retirement, disability and survivors’ benefits, if such pension fund or other similar institution is established, recognized for tax purposes and controlled in accordance with the laws of the other contracting state.
   - It is paid to the government of the other contracting state, a political subdivision or local authority thereof or the central bank of the other contracting state.
   - It is paid by a company to a company of the other contracting state if the recipient company was affiliated with the company paying the interest by a direct minimum holding of 25% in the capital for at least two years before the payment of the interest or if, for at least two years before the payment of the interest, both companies were held by a third company that held...
The 5% rate applies to interest payments.

(k) The 10% rate applies if the recipient is the beneficial owner of the interest and if the interest is paid on a loan granted by a bank for a period of at least 10 years in connection with the sale of industrial equipment or the installation or furnishing of scientific units or public works.

(l) The lower rate applies to cultural royalties, which are defined as the right to use copyrights of literary, artistic or scientific works, including cinematographic films.

(m) The higher rate also applies to payments for the right to use transport vehicles.

(n) The lower rate applies if the recipient is a company (other than a general partnership) directly holding at least 10% of the capital of the payer.

(o) The 0% rate applies to interest paid to banking institutions, interest paid on government loans and interest paid by the government or other state institutions.

(p) The 25% rate applies to royalties paid for trademarks.

(q) The 5% rate applies if the royalties are taxable in Spain. Otherwise, the rate is determined in accordance with the law of the source country. The 0% rate applies to cultural royalties, except for royalties for films.

(r) The lower rate applies to industrial royalties.

(s) The lower rate applies to the following types of interest:
   • Interest paid on commercial debt claims (including debt claims represented by commercial paper) that result from deferred payments for goods, merchandise or services supplied by an enterprise
   • Interest paid on loans made, guaranteed or insured by public entities that are intended to promote exports
   • Interest paid on current accounts or loans that are not represented by bearer instruments between banks or public credit institutions of the contracting states
   • Interest paid to the other contracting state, public subdivision or local authority

(t) The 2% rate applies to interest on government loans. The 5% rate applies to interest paid to financial institutions.

(u) The tax in Malta on dividends may not exceed the tax on the profits out of which the dividends are paid.

(v) The 5% rate applies to dividends paid to a company that owns more than 25% of the voting power of the payer of the dividends.

(w) The 1% rate applies to payments under a financial lease of equipment. The 5% rate applies to payments under an operating lease of equipment, as well as to payments for the right to use cinematographic films and software for personal computers.

(x) Dividends may be taxed in both contracting states in accordance with the domestic laws in the states.

(y) The 0% rate applies to interest on government loans and on loans for the purchase of goods or industrial, trade and scientific equipment.

(z) These rates are based on a multilateral treaty, which the former Czechoslovakia entered into with the other members of the Council for Mutual Economic Assistance (Comecon or CMEA).

(aa) See Section B.

(bb) The lower rates apply only if the recipient is one of the following:
   • An individual
   • A contracting state or a political subdivision or local authority of the state
   • A recipient engaged in the active conduct of a trade or business in the United States (other than the business of making or managing investments, unless these activities are banking or insurance activities carried on by a bank or insurance company) if the income derived from the Slovak Republic is derived in connection with, or is incidental to, that trade or business
   • A company whose principal class of shares is substantially and regularly traded on a recognized securities exchange or is wholly owned, directly or indirectly, by a resident of the company’s state whose principal class of shares is substantially and regularly traded on a recognized securities exchange
   • A not-for-profit organization
   • A person who satisfies both of the following conditions:
     — More than 50% of the beneficial interest in such person is owned, directly or indirectly, by persons entitled to the lower rates according to the treaty.
     — Not more than 50% of the gross income of such person is used directly or indirectly, to meet liabilities (including liabilities for interest or royalties) to persons not entitled to the lower rates according to the treaty.
The lower rate applies if the recipient is a company that holds directly at least 30% of the capital of the payer of the dividends.

The 5% rate applies if the recipient is a company that holds directly at least 70% of the capital of the payer of the dividends.

The 5% rate applies to royalties paid for patents. The 15% rate applies in all other cases.

The 0% rate applies to the following types of interest:

- Interest paid to the other contracting state, public subdivisions or local authorities with respect to loans, debt-claims or credits
- Interest paid on loans made, guaranteed or insured by public entities that are intended to promote exports

The lower rate applies if the recipient is one of the following:

- A company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends
- A pension fund or other similar institution providing pension schemes in which individuals may participate in order to secure retirement, disability and survivors’ benefits, if such pension fund or other similar institution is established, recognized for tax purposes and controlled in accordance with the laws of the other contracting state
- The government of the other contracting state, a political subdivision or local authority thereof or the central bank of the other contracting state

The 0% rate applies to cultural royalties, which are defined as the right to use copyrights of literary, artistic or scientific works, including cinematographic films. The 0% rate also applies to other royalties if, for a period of at least two years before the royalty payment, the payer and recipient of the royalty were mutually connected by a direct share of at least 25% in ownership or if a third entity had a direct share of at least 25% in both the payer and recipient for a period of at least two years before the royalty payment.

The 5% rate applies to industrial royalties, which are defined as the right to use a patent, trademark, design or model, plan, secret formula or process, and to consideration for information concerning industrial, commercial or scientific experience, provided Switzerland does not under its internal law levy a tax at source on royalties paid to nonresidents. The 10% rate applies to other royalties.

The 0% rate applies to the following types of interest:

- Interest paid on loans made, guaranteed or insured by the government, a local authority or national bank of a contracting state
- Interest paid on loans made, guaranteed or insured by institutions established according to public law whose assets are fully owned by the government of a contracting state
- Interest paid on loans made, guaranteed or insured by Eximbank SR, Slovak Guarantee and Development Bank (Slovakia), Kuwait Investment Authority, Kuwait Petroleum Corporation, Public Institution for Social Security or the Kuwait Fund for Arab Economic Development (Kuwait)

The 0% rate applies to the following types of interest:

- Interest paid on loans made by the government, a local authority or national bank of a contracting state
- Interest paid on loans made by Eximbank SR, Slovak Guarantee and Development Bank and the Export-Import Bank of Malaysia Berhad

The 0% rate applies if the interest is received from the other contracting state and beneficially owned by the government, including its administrative units, local authorities, central bank or other financial institutions owned by the government of the other contracting state or if interest is received and guaranteed by this government.

The 0% rate applies if the interest is derived and beneficially owned by the following:

- The government of the Slovak Republic, its local authorities, the National Bank of Slovakia, the Export-Import Bank of the Slovak Republic, the Slovak Guarantee and Development Bank or the Debt and Liquidity Management Agency
- The Central Bank of the United Arab Emirates, the Emirates Investment Authority, the Abu Dhabi Investment Authority, the International Petroleum Investment Company, the Abu Dhabi Investment Council, the Investment Corporation of Dubai, the Abu Dhabi National Energy Company, the Mubadala Development Company, the Abu Dhabi Retirement Pensions and Benefits Fund and the General Pension and Social Security Authority
- Any other institutions that are agreed upon between the two contracting states through an exchange of letters
The 0% rate applies if the royalties are derived and beneficially owned by the following:

- The government of the Slovak Republic, its local authorities, the National Bank of Slovakia, the Export-Import Bank of the Slovak Republic, the Slovak Guarantee and Development Bank, and the Debt and Liquidity Management Agency
- The Central Bank of the United Arab Emirates, the Emirates Investment Authority, the Abu Dhabi Investment Authority, the International Petroleum Investment Company, the Abu Dhabi Investment Council, the Investment Corporation of Dubai, the Abu Dhabi National Energy Company, the Mubadala Development Company, the Abu Dhabi Retirement Pensions and Benefits Fund, and the General Pension and Social Security Authority
- Any other institutions that are agreed upon between the two contracting states through an exchange of letters

The 0% rate applies to the following types of interest, if paid to its beneficial owners resident in the other contracting state:

- Interest paid to the government, an administrative territorial unit or a local authority thereof or to the central bank
- Interest paid in connection with a loan or a credit guaranteed or insured by the government, an administrative-territorial unit or a local authority thereof or by the central bank

A. At a glance

Corporate Income Tax Rate (%) 19
Capital Gains Tax Rate (%) 19
Branch Tax Rate (%) 19
Withholding Tax (%)
  Dividends 15 (a)
  Interest 15 (a)
  Royalties from Patents, Know-how, etc. 15 (a)
  Services 15 (b)
  Rentals 15 (c)
Net Operating Losses (Years)
  Carryback 0
  Carryforward Unlimited (d)
(a) This tax applies to payments to residents and nonresidents.
(b) Specified categories of service payments (consulting, marketing, market research, human resources, legal, administrative and information technology services) are subject to a 15% withholding tax if the payments are made to persons with a head office outside the European Union (EU) and if the country of the head office is on the list published by the Ministry (list of blacklisted countries).
(c) A 15% withholding tax applies to cross-border payments for the lease of real estate located in Slovenia.
(d) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. In general, all companies resident in Slovenia are subject to tax on their worldwide income (but see Foreign tax relief). A company is resident in Slovenia if it has its legal seat or effective place of management in Slovenia. Nonresident companies are subject to tax on their Slovenian-source income only (income derived from or through a permanent establishment and other Slovenian-source income subject to withholding tax).

Rates of corporate income tax. The standard corporate income tax rate is 19%.

The corporate income tax rate for qualified venture capital companies is 0%, subject to specific conditions.

Investment funds that distribute 90% of their operating profits for the preceding tax year by 30 November of the current tax year are taxed at a rate of 0%.

Pension funds established in accordance with the Pension and Disability Insurance Act are taxed at a rate of 0%.

Insurance undertakings that are authorized to implement the pension scheme in accordance with the act regulating pension and disability insurance must pay tax with respect to the activities relating to such implementation at a rate of 0% of the tax base if a separate tax calculation is compiled only for this pension scheme.

Capital gains. Fifty percent of a capital gain from the disposal of shares is exempt from tax if certain conditions are met. The other 50% is treated as ordinary business income and is subject to tax at the regular corporate rate. However, in such circumstances, the expenses of a taxpayer are decreased by 5% of the exempt amount of capital gains. The same principle applies to capital losses (only 50% of a capital loss is deductible for tax purposes).

If a capital gain is realized from disposal of shares acquired with respect to venture capital investments in a venture capital company that is established in accordance with the act regulating venture capital companies, the total amount of such gain may be exempt from tax if the company had the status of a venture capital company for the entire tax period and if the company had the status of venture capital company for the entire period of the holding of the shares by the taxpayer. Losses incurred on the transfer of shares acquired under a venture capital scheme are not deductible for tax purposes.
Administration. The tax year is the calendar year. However, a company may select its financial year as its tax year if the selected year does not exceed a period of 12 months and if it informs the tax authorities regarding its selection of the tax year. The selected tax year may not be changed for a period of three years.

Annual tax returns must be filed within three months after the end of the tax year.

Companies must make advance payments of corporate income tax. Monthly advance payments of corporate income tax are required if the total amount of the advance payments exceeds EUR400, based on the tax calculated in the tax return for the preceding tax year. Companies must make quarterly advance payments if the total amount of the advance payments is less than EUR400, based on the tax calculated in the tax return for the preceding tax year. Advance payments of corporate income tax are due on the 10th day of the month following the period to which the advance tax payment relates. The balance of tax due must be paid within 30 days after the annual tax return is filed with the tax authorities. If the total amount of advance payments of corporate income tax exceeds the amount of tax due for the year, the overpaid tax is refunded to the company.

Dividends. In principle, dividends paid to residents and nonresidents are subject to withholding tax at a rate of 15%. The tax does not apply to dividends paid to a resident or to a permanent establishment of a nonresident if the dividend recipient informs the dividend payer of its tax number.

Measures implementing the EU Parent-Subsidiary Directive are in effect in Slovenia. Under these measures, dividend distributions are exempt from withholding tax if all of the following conditions are satisfied:

- The recipient of the dividends owns at least 10% of the equity capital or voting power of the payer of the dividends.
- The duration of the recipient's ownership in the payer is at least two years.
- The recipient of dividends is a taxable company that has one of the prescribed legal forms, is a resident of an EU member state and is a taxpayer for one of the taxes for which the common system of taxation applies.

If, at the time of payment of a dividend, the duration of ownership of the recipient is shorter than two years and all other requirements are met, a withholding tax exemption is still possible if the payer or its agent provides an appropriate bank guarantee to the tax authorities.

Dividends paid to EU/European Economic Area (EEA) residents are exempt from withholding tax if a tax credit is not available in the country of residence of the recipient.

Dividends and interest paid to EU/EEA resident pension funds, investment funds and insurance companies performing pension plans are exempt from withholding tax if a tax credit is not available in the country of residence of the recipient and if the recipient of such income is not a Slovenian branch of such persons.

Dividends received by Slovenian taxable persons are generally subject to a full participation exemption.
Expenses of an amount equal to 5% of the dividends received are not deductible for tax purposes because they are deemed to be expenses incurred with respect to the exempt dividend income.

**Foreign tax relief.** Income tax paid abroad can be credited against the final tax liability of a company if the income on which the tax has been paid abroad is included in the tax base. The foreign tax credit may not exceed the lower of the amount of foreign tax on foreign income that was paid or the amount of tax that would have been paid under Slovenian law on the foreign income if the credit had not been granted. To claim the tax credit, the taxpayer must submit appropriate documentation together with the tax return.

C. Determination of trading income

**General.** Taxable income is based on the profits reported in the annual financial statements prepared in accordance with International Financial Reporting Standards (IFRS) or Slovenian accounting standards, which generally follow IFRS. For tax purposes, profits are adjusted, primarily for nondeductible expenses.

In general, only those expenses that are directly required for the generation of taxable revenues are allowed as deductible expenses. The law specifies that certain expenses are not deductible, including the following:
- Incentives paid to the management board and to the board of directors
- Pecuniary penalties (fines paid to government agencies)
- Donations
- Bribes

Only 50% of entertainment expenses and fees paid to the supervisory board is deductible for tax purposes.

Interest on loans to related entities is deductible up to the amount computed by applying the acknowledged interest rate at the time of the loan approval. The Ministry of Finance publishes the acknowledged interest rate. It is possible for a taxable person to prove that a contractual interest rate exceeding the acknowledged interest rate is an arm’s-length rate. The measure described in the preceding sentence applies to interest accrued after 7 June 2008 and to loan agreements entered into after January 2007.

A deduction for bad debts can be claimed if specified conditions are met.

**Inventories.** Inventories may be valued using any of the methods prescribed by the applicable accounting standards. Permissible methods include first-in, first-out (FIFO), average cost and other methods. The last-in, first-out (LIFO) method is not allowed. Inventories are measured at the lower of cost or net realizable value.

**Provisions.** The following provisions are deductible for tax purposes up to an amount equal to 50% of the provisions established in accordance with the accounting standards:
- Provisions for warranties
- Provisions for restructurings
- Provisions for expected losses from onerous contracts
- Provisions for pensions
- Provisions for termination benefits with respect to employees
- Provisions for jubilee benefits
Other provisions established based on applicable accounting standards are 100% tax deductible when they are set aside.

Specific provisions established by a bank for specific risks are deductible up to the amount prescribed by the Banking Act. Technical provisions that insurance companies are required to establish under the law are deductible up to the amount prescribed by the Insurance Act. Special provisions that are required for stockbrokerage companies are deductible up to the amount prescribed by the Financial Instruments Market Act.

**Revaluation expenses.** In general, subject to special conditions and limitations, revaluations of the following items are deductible for tax purposes:
- Receivables
- Financial assets and financial instruments measured at fair value through profit or loss
- Goodwill
- Debts, receivables, investments and cash receivables, provided that the revaluations are based on changes in the exchange rate.

**Tax depreciation.** Depreciation calculated using the straight-line method is deductible for tax purposes. The tax law sets the maximum depreciation rates. The following are some of the prescribed maximum straight-line depreciation rates.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings, including investment property</td>
<td>3</td>
</tr>
<tr>
<td>Parts of buildings, including investment property</td>
<td>6</td>
</tr>
<tr>
<td>Equipment, vehicles and machinery</td>
<td>20</td>
</tr>
<tr>
<td>Parts of equipment and equipment for research activities</td>
<td>33.3</td>
</tr>
<tr>
<td>Computer equipment, hardware and software</td>
<td>50</td>

<tr>
<td>Crops lasting several years</td>
<td>10</td>
</tr>
<tr>
<td>Breeding animals</td>
<td>20</td>
</tr>
<tr>
<td>Other investments</td>
<td>10</td>
</tr>
</tbody>
</table>

**Tax relief for investments.** A taxable person may claim a reduction of the tax base in the amount of 40% of the amount invested in equipment and intangible assets (subject to certain limitations). The reduction may not exceed the amount of the tax base, and the unused portion of the tax relief can be carried forward to the next five tax periods.

For 2010 through 2019, a special regulation applies in the region of Pomurje. Taxable persons may claim a reduction of the tax base in the amount of 70% of salaries paid to employees (under certain conditions). The reduction may not exceed the amount of the tax base. In addition, taxable persons may reduce their tax base by up to 70% of the amount invested in equipment and intangible assets, under certain conditions.

**Tax relief for research and development expenditure.** Tax relief is available for research and development (R&D) expenditure.

The tax base may be decreased by 100% of the expenditure incurred in R&D activities.

The taxable person may also carry forward the unused portion of the tax relief to the following five fiscal periods.
Such tax relief may not be granted for R&D that is financed by
government funding or the EU.

Tax relief for R&D expenditure excludes the use of the tax relief
for investments.

**Tax relief for the hiring of employees.** An employer who hires cer-
tain employees may claim relief in the amount of 45% of the sal-
ary of such employees for the first 24 months of employment, but
not exceeding the amount of the tax base. To be eligible for the
relief, all of the following conditions must be met:

- The employee must be younger than 26 years old or older than
  55 years old.
- The employee must have been registered as unemployed at the
  Employment Service of Slovenia for more than six months be-
  fore the commencement of employment.
- The employee was not employed by the employer seeking the
tax relief or a related party in the past 24 months.
- Agreement is reached on an employment contract for an indef-
  finite time period.
- The overall number of employees employed at the employer in
  the tax period increased.

**Hidden profit distributions.** Hidden profit distributions are non-
deductible expenditures and are subject to withholding tax as
deemed dividends. The following items are treated as hidden
profit distributions to a shareholder owning directly or indirectly
at least 25% of the capital in the payer (or controlling the payer
on the basis of the contract or having influence over the payer):

- Providing assets or performing services, including the discharge
  of debts, without consideration or at a price that is lower than
  the comparable market prices
- Payments for the purchase of assets and services at a price that
  is higher than the comparable market prices
- Payments for assets that were not transferred or for services that
  were not rendered
- Interest on loans granted at an interest rate that differs from the
  acknowledged interest rate if the taxpayer cannot prove that an
  unrelated entity would have agreed to the interest rate
- Interest on loans exceeding the thin-capitalization limit (see
  Section E)

**Relief for losses.** Assessed tax losses may be carried forward for
an unlimited time period. It is possible to use tax losses carried
forward from previous years, up to a maximum of 50% of the tax
base for a tax period. The right to carry forward tax losses is lost
if the ownership of share capital or voting rights changes by more
than 50% during a tax year, as compared to the beginning of the
tax year, and if the taxpayer did not conduct any business activity
for two years or the business activity was significantly changed
in the two-year period before or after the change of ownership
(unless the business activity was significantly changed to main-
tain jobs or to restore business operations).

Loss carrybacks are not allowed.

**Groups of companies.** The formation of groups of companies for
tax purposes is not allowed.

### E. Miscellaneous matters

**Foreign-exchange controls.** The official Slovenian currency is the euro (EUR).

Legal entities with their head office in Slovenia and subsidiaries of foreign commercial companies that are registered in the Court Registry in Slovenia may maintain foreign-currency accounts or foreign-currency deposit accounts at authorized banks in Slovenia. Slovenian and foreign enterprises and their subsidiaries may freely perform one-sided transfers of property to or from Slovenia. Profits may be freely transferred abroad in foreign currency.

Resident enterprises may obtain loans from nonresident enterprises in their own name and for their own account. They are required to report selected loan transactions with nonresident enterprises to the Bank of Slovenia. For this purpose, loan transactions include the following:

- Pledges of real estate and other security
• Purchases by nonresidents of accounts receivable arising from transactions between resident enterprises
• Purchases by residents of accounts receivable arising from transactions between nonresident enterprises
• Certain other transactions between resident and nonresident enterprises if the economic purpose of the transaction is effectively the granting of a loan

Transfer pricing. Transfer prices are determined by referring to market prices of the same or comparable assets or services charged between unrelated parties (comparable market prices). Comparable market prices are determined by one of the five methods prescribed by the OECD guidelines.

A resident or nonresident and a foreign legal entity or foreign partnership are deemed to be related parties if any of the following circumstances exist:
• The taxable person directly or indirectly holds 25% or more of the value or number of shares or equity holdings, or control over management or supervision or voting rights of the foreign person or controls the foreign person on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.
• The foreign person directly or indirectly holds 25% or more of the value or number of shares or equity holdings or control over management or supervision or voting rights of a taxable person, or controls the taxable person on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.
• The same person at the same time, directly or indirectly, holds 25% or more of the value or number of shares or holdings or participates in the management or supervision of the taxable person and the foreign person or two taxable persons or they are under the same person’s control on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.
• The same natural persons or members of their families directly or indirectly hold 25% or more of the value or number of shares or holdings or control over the management or supervision of the taxable person and the foreign person or two resident entities or they are under their control on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be achieved between unrelated parties.

Taxpayers must maintain transfer-pricing documentation continuously. The transfer-pricing documentation requirements are based on the master file concept. Under this concept, which is recommended by the European Community (EC) Council and the EU Joint Transfer Pricing Forum, the transfer-pricing documentation consists of a general part and a country-specific part. Country-by-Country (CbC) reporting obligations may apply in Slovenia to a group of businesses if it has at least business based in Slovenia and at least business based in another country and if it has a consolidated group revenue of at least EUR750 million.
Country-by-Country Reports (CbCRs) must be filed within 12 months after the end of the fiscal year to which they relate. The CbCR must include the following information for each fiscal year and for each jurisdiction where business is conducted:

- Amount of revenue generated
- Amount of profit or loss before tax
- Amount of accrued and paid tax
- Amount of undistributed profits
- The number of employees
- Size of tangible assets (excluding cash and cash equivalents)

If a group needs to report, it must notify the Slovenian tax authority every year where it intends to report. The CbC reporting notification must be submitted in electronic form via the eDavki portal together with the corporate income tax return. The CbC notification form is available on the Slovenian tax authority website and is available in Slovenian language.

Related-party transactions must also be reported every year with the corporate income tax return in accordance with the following rules:

- If the cumulative amount of given or received loans from a particular related party exceeds EUR50,000 in a tax period, the taxpayer must disclose the name of the related party, its state of residence and tax number, the cumulative amount of loans and the type of relationship with the related party.
- If the cumulative amount of other intercompany receivables or liabilities toward a particular related party exceeds EUR50,000 in a tax period, the taxpayer must disclose the name of the related party, its state of residence and tax number, the cumulative amount of receivables or liabilities toward the related party and the type of relationship with the related party.

The transfer-pricing rules can apply to transactions between domestic related parties in specific circumstances.

**Debt-to-equity rules.** Interest on loans from shareholders, who directly or indirectly at any time during a tax year hold at least 25% of capital or voting rights of the taxable person (with the exception of banks and insurance companies as borrowers), is deductible only if it is attributable to the part of the loan that does not exceed a specified multiple of the value of the share capital owned (debt-to-equity ratio). Loans from shareholders are also considered loans from related persons of the taxable person if the shareholder directly or indirectly at any time during a tax year holds at least 25% of shares, holdings or voting rights in the lender and the taxable person. For example, this applies to loans obtained from sister companies. For 2018, the applicable debt-to-equity ratio is 4:1.

**Anti-avoidance legislation.** On 27 November 2018, the National Assembly adopted the amended Corporate Income Tax Act (CITA-2). The amendments are based on Council Directive (EU) 2016/1164 of 12 July 2016. The changes took effect on 1 January 2019. The amended act introduces a general anti-abuse rule to prevent abusive tax practices. The rule may be used only if all of the other rules set out in CITA-2 cannot prevent tax abuse. This means that the general anti-abuse rule is used as a last resource if other rules set out in CITA-2 are not sufficient to prevent the obtaining an unjustified tax advantage.
In addition, the amendment introduces the controlled foreign company (CFC) regime. A CFC has two main elements. The first is based on participation and entitlement to profits, while the other is based on actual taxation, as compared to possible taxation in Slovenia. A person who is not taxed under CITA-2 is treated as a CFC if the following conditions are met:

- A taxable person directly or indirectly participates in the person with more than 50% of the voting rights, has directly or indirectly more than 50% of the capital of the person, or is entitled to more than 50% of the person’s profits.
- The corporate income tax on the profits actually paid by the person is less than half of the corporate income tax that would be charged to a person on the basis of the applicable corporate taxation system in Slovenia for that profit under CITA-2.

**Multilateral instrument.** On 22 March 2018, Slovenia ratified the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI), effective 1 July 2018. The MLI is designed to swiftly implement the tax treaty-related measures arising from the OECD Base Erosion and Profit Shifting project through the automatic modification of existing bilateral tax treaties. It implemented “minimum standard” changes to existing treaties in the areas of treaty abuse, mutual agreement procedures and treaty preambles. In addition, depending on the reservations and notifications made by each party, the MLI facilitates optional changes to modify tax treaties with respect to permanent establishments, transparent entities, residence tiebreakers, double tax relief, minimum shareholding periods, capital gains derived from immovable property and a jurisdiction’s right to tax its own residents.

**F. Treaty withholding tax rates**

Most of Slovenia’s double tax treaties follow the OECD model convention. The following table shows the withholding tax rates under Slovenia’s tax treaties.

</table>

(a) The lower rate applies if the recipient of the dividends is a company that holds at least 25% of the capital of the payer of the dividends.

(b) The 0% rate applies to interest paid to the government including local authorities or the national bank. In certain treaties, the 0% rate applies to interest paid to national export companies and other institutions, subject to additional conditions.

(c) The lower rate applies to royalties paid for the use of, or the right to use, the following:
   - Copyrights of literary, artistic or scientific works (not including cinematographic works)
   - Industrial, commercial or scientific equipment

(d) The 0% rate applies if the recipient of the dividends is a company that holds at least 20% of the capital of the payer of the dividends.
Interest arising in a contracting state and paid to the government of the other contracting state is exempt from tax in the state of the payer. In the case of Slovenia, interest arising in Norway and paid with respect to a loan guaranteed or insured by Slovene Export and Development Bank Inc., Ljubljana on account of the Republic of Slovenia as authorized in accordance with the domestic law is exempt from tax in Norway.

For dividends paid by Slovenian companies, the 5% rate applies if the recipient of dividends holds at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends paid by Slovenian companies. For dividends paid by Canadian companies, the 5% rate applies if the recipient of dividends holds at least 10% of the voting power of the payer of the dividends. The 15% rate applies to other dividends paid by Canadian companies.

For dividends paid by Slovenian companies, the 5% rate applies if the recipient of dividends owns at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends paid by Slovenian companies. For dividends paid by Maltese companies to Slovenian resident beneficiaries, the withholding tax rate may not exceed the tax imposed on the profits out of which dividends are paid.

The 5% rate applies to royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic works, and films or tapes used for radio or television broadcasting.

The 10% rate applies to interest paid to financial institutions, including insurance companies.

The 10% rate applies to royalties paid for the following:
- The use of, or the right to use, copyrights of literary or artistic works, including motion pictures, live broadcasting, films and tapes
- Other means for use or reproduction in connection with radio and television broadcasting
- The use of, or the right to use, industrial, commercial or scientific equipment

Subject to additional conditions, the 0% rate applies to the following:
- Interest paid with respect to indebtedness of the government or local authorities
- Interest paid to an entity that was established and operates exclusively to administer or provide benefits under pension, retirement or other employee benefit plans

Interest arising in Slovenia (Canada) and paid to a resident of Canada (Slovenia) is taxable only in Canada (Slovenia) if it is paid with respect to loans made, guaranteed or insured by the Export Development Corporation (Slovenian Export Company).

Interest paid by a company that is a resident of a contracting state is taxable only in the other contracting state if the beneficial owner of the interest is one of the following:
- The other state
- Political subdivision
- Local government
- Local authority
- Central bank
- Recognized pension fund
- Abu Dhabi Investment Authority
- Abu Dhabi Investment Council
- Emirates Investment Authority
- Mubadala Development Company
- International Petroleum Investment Company
- Dubai World
- Investment Corporation of Dubai
- Any other institution created by the government, a political subdivision, a local authority or a local government of that other state that is recognized as an integral part of that government, as agreed through an exchange of letters by the competent authorities of the contracting states

Interest arising in the United Arab Emirates and paid on a loan guaranteed or insured by the Slovenian Export and Development Bank (Slovenska Izvozna in Razvojna Banka, or SID Bank) Inc. Ljubljana, on behalf of the Republic of Slovenia as authorized by the domestic law is exempt from tax in the United Arab Emirates.

The 0% applies if any of the following circumstances exists:
- The interest is paid to the government including local authorities or the national bank.
- The interest is paid with respect to a loan made, approved, guaranteed or insured by a government or any other institution that is authorized under federal law to act as an export financing institution on behalf of the contracting state.
The tax treaty between Slovenia and the former Union of Serbia and Montenegro is expected to continue to apply to the republics of Serbia and Montenegro. The treaty does not apply to Kosovo.

The 5% rate applies if the recipient of the dividends is a company that holds at least 10% of the capital of the payer of the dividends.

The 0% rate applies if the recipient of dividends owns more than 20% of the capital voting rights of the payer of the dividends.

The 0% rate applies if either of the following circumstances exists:
- The interest is paid to the government including local authorities or the national bank.
- The payer and the recipient are both companies and one of the companies owns directly at least 20% of the capital of the other company, or a third company that is a resident of a contracting state holds directly at least 20% of the capital of both the payer company and the recipient company.

The 0% rate applies if any of the following circumstances exist:
- The recipient of dividends owns more than 20% of the capital voting rights of the payer of the dividends.
- In the case of Norway, the beneficial owner of the dividends is a resident of Norway who is a partner in a Norwegian partnership and alone or together with the other partners holds directly at least 15% of the capital of the company paying the dividends.
- The dividends are derived and beneficially owned by the government of a contracting state.

A 0% rate applies if any of the following circumstances exist:
- The payer of the interest is the government of a contracting state, political subdivision, local authority or central bank of such state.
- The interest is paid to the government of the other contracting state or a political subdivision, local authority or central bank of such state.
- The interest is paid with respect to a loan made, approved, guaranteed or insured by an institution that is authorized in accordance with internal law on insurance and financing of international business transactions.

A 0% rate applies if either of the following circumstances exist:
- The payer of the interest is the government of a contracting state, or a political subdivision, local authority or central bank of such state.
- The interest is paid to the government of the other contracting state or a political subdivision, local authority or central bank of such state.

The lower rate applies to royalties paid for the use, or the right to use, patents, patterns, models, plans, and secret formulas or procedures or for information regarding industrial, commercial or scientific experience.

The 0% rate applies if the beneficial owner of the income is a resident of the other contracting state and is one of the following:
- The government of that contracting state or a political subdivision or local authority thereof or the central bank
- A governmental institution created in that contracting state under public law such as a corporation, fund, authority, foundation, agency or similar entity
- An entity established in that contracting state, all the capital of which has been provided by that contracting state or a political subdivision or local authority thereof or any governmental institution mentioned in the bullet above together with other states

A 0% rate applies if the beneficial owner of the interest is a resident of the other contracting state and is one of the following:
- The government of that contracting state or a political subdivision or local authority thereof or the central bank
- A governmental institution created in that contracting state under public law such as a corporation, fund, authority, foundation, agency or similar entity
- An entity established in that contracting state, all the capital of which has been provided by that contracting state or a political subdivision or local authority thereof or a governmental institution as defined in the bullet above, together with other states

A 0% rate applies if any of the following circumstances exist:
- The payer of the interest is the government of that contracting state or an administrative-territorial or political subdivision or a local authority or the central bank.
- The interest is paid to the government of the other contracting state or an administrative-territorial or political subdivision or a local authority or the central bank.
- The interest is paid with respect to a loan made, approved, guaranteed or insured, on behalf of the Republic of Slovenia, by the Slovenian Export and Development Bank (Slovenska Izvozna in Razvojna Banka, or SID Bank) Inc. Ljubljana, which is authorized under the domestic legislation of the
Republic of Slovenia for insuring and financing international business transactions.
• The interest is paid to the State Oil Fund of the Republic of Azerbaijan.
(y) The lower rate applies to royalties paid for the use of, or the right use, of computer software, patents, designs or models, plans, secret formulas or processes, or for information concerning industrial, commercial or scientific experience.
(z) A 0 % rate applies if the beneficial owner of the dividends is one of the following:
• A company (other than a partnership) that is a resident of the other contracting state and that holds directly at least 25% of the capital in the company paying the dividends
• A pension scheme
(aa) Interest arising in a contracting state and paid to a resident of the other contracting state that is the beneficial owner of the interest is taxable only in that other state to if any of the following circumstances exist:
• It is paid by the government of a contracting state, a political subdivision, a local authority or the central bank.
• It is paid to the government of a contracting state, a political subdivision, a local authority or the central bank.
• It is paid with respect to a loan made, approved, guaranteed or insured by an institution that is authorized in accordance with internal law to insure and finance international business transactions.
• It is paid with respect to indebtedness arising as a result of the sale on credit of equipment, merchandise or services.
• It is paid by a bank to a bank of the other contracting state.
• It is paid by a company to a company of the other contracting state if the recipient company is affiliated with the company paying the interest by a direct minimum holding of 25% in the capital or if both companies are held by a third company that is resident of an EU member state or Switzerland and that has directly a minimum holding of 25% in the capital of the first company and in the capital of the second company.
(bb) Royalties paid by a company that is a resident of a contracting state to a resident of the other contracting state is taxable in only the other state if the beneficial owner is a company that is affiliated with the company paying the royalties by a direct minimum holding of 25% in the capital or if both companies are held by a third company that is resident of an EU member state or Switzerland and that has directly a minimum holding of 25% in the capital of the first company and in the capital of the second company.
(cc) The lower rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends.
(dd) A 0% rate applies if any of the following circumstances exists:
• The payer of the interest is the government of that contracting state or a political subdivision, local authority or the central bank.
• The interest is paid to the government of the other contracting state or a political subdivision, local authority or the central bank.
• The interest is paid with respect to a loan made, approved, guaranteed or insured by an institution of the other contracting state on behalf of that state as authorized by a special domestic law on insuring and financing of international business transactions.
(ee) Interest arising in a contracting state and paid to a resident of the other contracting state that is the beneficial owner of the interest is taxable only in that other state if any of the following circumstances exist:
• The interest is paid the government of the other contracting state, a political subdivision or a local authority thereof, or to the central bank of the other contracting state.
• The interest is paid in connection with the sale on credit of industrial, commercial or scientific equipment.
• The interest is paid in connection with the sale on credit of merchandise by one enterprise to another enterprise.
(ff) Dividends paid by a company that is a resident of a contracting state is taxable only in the other contracting state if the beneficial owner of the dividends is one of the following:
• The other state
• Political subdivision
• Local government
• Local authority
• Central bank
• Recognized pension fund
• Abu Dhabi Investment Authority
• Abu Dhabi Investment Council
• Emirates Investment Authority
• Mubadala Development Company
• International Petroleum Investment Company
• Dubai World
• Investment Corporation of Dubai
• Any other institution created by the government, a political subdivision, a local authority or a local government of the other state that is recognized as an integral part of that government as agreed through an exchange of letters by the competent authorities of the contracting states

(gg) The 0% rate applies to interest paid to the government, including local authorities, or the national bank. The 0% rate also applies to interest paid to a resident of the other contracting state with respect to debt claims guaranteed, insured or indirectly financed by any institution promoting exports, investment or development.

Slovenia has ratified double tax treaties with Egypt and Morocco, but these treaties are not yet effective.

Certain amendments to the tax law have been proposed, but not yet enacted. Because of the expected changes to the tax law, readers should obtain updated information before engaging in transactions.

A. At a glance

| Corporate Income Tax Rate (%) | 28 (a) |
| Capital Gains Tax Rate (%)    | 22.4 (b) |
Branch Tax Rate (%)  28 (a)
Withholding Tax (%)  
Dividends  20 (c)
Interest  15 (d)(e)
Royalties from Patents, Know-how, etc.  15 (e)
Branch Remittance Tax  0
Net Operating Losses (Years)  
Carryback  0
Carryforward  Unlimited (f)

(a) The mining income of gold mining companies is taxed under a special formula, and the non-mining income of such companies is taxed at a rate of 28%. Special rules apply to life insurance companies, petroleum and gas producers and small business corporations. See Section B.

(b) This is the effective rate for companies. See Section B.

(c) Dividend withholding tax (DWT) was introduced, effective from 1 April 2012. Previously, a tax known as the secondary tax on companies (STC) was levied at a rate of 10%. The rate increased from 15% to 20% for dividends paid on or after 22 February 2017 (regardless of declaration date). The DWT applies to dividends declared by South African-resident companies. Certain dividends are exempt from the withholding tax, such as dividends received by South African-resident companies and public benefit organizations. A decreased rate may apply under a double tax treaty. See Section B.

(d) Interest withholding tax at a rate of 15%, which took effect on 1 March 2015, applies to nonresidents only. Certain interest income is exempt from this withholding tax, such as interest with respect to government debt instruments, listed debt instruments and debt instruments owed by banks. A reduced rate may apply under a double tax treaty.

(e) The 15% rate applies to royalties paid (or due and payable) on or after 1 January 2015. This withholding tax applies to nonresidents only. A reduced rate may apply under a double tax treaty.

(f) See Section C.

B. Taxes on corporate income and gains

Company tax. A residence-based tax system applies in South Africa. Companies are considered to be resident in South Africa if they are incorporated or have their place of effective management in South Africa.

South African-resident companies are taxed on their worldwide income (including capital gains).

Under complex look-through rules, the foreign operating income of nonresident subsidiaries derived from “non-business establishment” operations in foreign countries is taxed in the hands of the immediately cross-border South African-resident parent company on an accrual basis (see the discussion on controlled foreign companies [CFCs] in Section E). The income of nonresident subsidiaries with business establishments in foreign countries is generally exempt from the look-through rules. Dividends paid by foreign companies that are not CFCs are taxable unless the shareholding of the South African-resident recipient is 10% or more (see the discussion of foreign dividends in Dividends). The participation exemption amendment reducing the participation percentage from 20% to 10% took effect on 1 April 2012.

Nonresident companies are taxed on their South African-source income only.

Tax rates. The basic corporate tax rate is 28%. Branch profits tax at a rate of 28% is imposed on South African-source profits of nonresident companies.
Secondary tax on companies and new dividend withholding tax.
The secondary tax on companies (STC) has been abolished. It was
effective until 31 March 2012. STC was imposed on the compa-
nies, not on the shareholders, and was regarded as a tax on income.
It was not similar to a withholding tax and consequently did not
qualify for relief under dividends’ articles in treaties.

The STC was replaced by a withholding tax imposed at a rate of
15% on dividends declared on or after 1 April 2012. The tax is
levied on dividends declared and paid by South African-resident
companies or by foreign companies listed on the Johannesburg
Stock Exchange (JSE). Dividend withholding tax is a tax levied
on the recipient of a dividend.

The declaring company must withhold the tax from the dividend
paid and pay the tax to the South African Revenue Service (SARS)
on behalf of the recipient. In the case of a listed company, a regu-
lated intermediary withholds the tax.

Dividends are not subject to the withholding tax if any of the fol-
lowing circumstances, among others, exists:
- The beneficial owner is a resident company.
- The beneficial owner is a local, provincial or national govern-
- The beneficial owner is a specified tax-exempt entity.
- The dividend is paid by a closure rehabilitation trust.
- The dividend is paid to an institution, board or body corporate
  that meets specific requirements.
- The dividend is paid to certain regulated intermediaries who in
  turn are liable to administer the tax on behalf of the declaring
  company.
- The dividend is paid by a micro business, up to ZAR200,000.
- The dividend is paid by a foreign company listed on the JSE to
  a nonresident beneficial owner.
- The dividend is paid to a portfolio of a collective-investment
  scheme in securities.
- The dividend is taxable in nature or was subject to STC.

A paying company may not withhold the dividends tax if the ben-
eficial owner has supplied it with a written declaration stating the
following:
- It is exempt from the dividends tax.
- It will inform the company when it is no longer the beneficial
  owner of the shares.

If the beneficial owner is a nonresident that wants to rely on a
reduced dividends tax rate under a double tax treaty between
South Africa and its country of residence, it must provide the
company with a written declaration that the reduced rate applies
and specified undertakings.

A dividend is any amount transferred or applied by a company for
the benefit of its shareholders, whether by way of a distribution
or as consideration for a share buyback, excluding the following:
- Amounts that result in a reduction of the contributed tax capital
  of the company
- Shares in the company
- An acquisition by a listed company of its own shares through a
general repurchase of shares in accordance with the JSE listing
requirements
STC credits that were available to a company on 31 March 2012 were carried forward into the dividend tax regime for setoff against dividends in determining the net dividend subject to the tax. The STC credit was increased by dividends received after the introduction of the dividends tax from another company that had used its own STC credits when paying the dividends concerned and that had notified the recipient company of the amount of credits used. A company’s STC credits were available for a period of three years after the introduction of the dividends tax (that is, until 31 March 2015). Effective from 1 April 2015, STC credits of a company are deemed to be nil.

**Special types of companies.** Gold mining companies may elect to have their mining income taxed under a special formula, while the non-mining income of such companies is taxed at a rate of 28%.

Petroleum and gas production is taxed in accordance with the usual provisions of the Income Tax Act, as modified by a special schedule applicable to prospecting and development expenses, as well as to farm-ins. A fiscal stability regime can be agreed to with the Minister of Finance. The tax rate is capped at a maximum of 28% for both South African-resident and nonresident companies. Dividends tax need not be withheld from dividends paid out of oil and gas income, and interest withholding tax need not be withheld from interest paid with respect to loans used to fund oil and gas exploration and post-exploration capital expenditure.

Life assurance companies are subject to special rules that separate the taxation of policyholders’ and corporate funds and apply different tax rates to such items.

Small business corporations (SBCs) are taxed at the following rates on their taxable income:

- 0% on the first ZAR75,000 of taxable income
- 7% of the amount of taxable income exceeding ZAR75,000 but not exceeding ZAR365,000
- ZAR20,300 plus 21% on taxable income exceeding ZAR365,000 but not exceeding ZAR550,000
- ZAR59,150 plus 28% on taxable income exceeding ZAR550,000

To qualify as an SBC, a company must satisfy all of the following requirements:

- Its gross income for the year must not exceed ZAR20 million.
- Its shares must be held by individuals who do not hold interests in other companies (except for certain specified interests such as interests in South African-listed companies).
- Its total personal service and investment income must not exceed 20% of its gross income.
- It is not an employment entity.

**Capital gains.** Capital gains derived by resident companies are subject to capital gains tax (CGT) at an effective rate of 22.4% (80% of the normal corporate tax rate).

Resident companies are subject to CGT on capital gains derived from disposals of worldwide tangible and intangible assets.

Nonresidents are subject to CGT on capital gains derived from disposals of fixed property (land and buildings) and interests in fixed property located in South Africa, and assets of a permanent establishment located in South Africa. An interest in fixed
property includes a direct or indirect interest of at least 20% in a resident or nonresident company if, at the time of disposal of the interest, 80% or more of the market value of the assets of the company is attributable to fixed property located in South Africa that is held as capital assets.

A capital gain is equal to the amount by which the disposal proceeds for an asset exceed the base cost of the asset. A capital loss arises if the base cost exceeds the disposal proceeds. Capital losses may offset capital gains, and regular income losses may offset net capital gains. However, net capital losses may not offset regular income.

The base cost for an asset includes the sum of the following:

- The amount actually incurred to acquire the asset
- Cost of the valuation of the asset for the purposes of determining the capital gain or loss
- Expenditure directly related to the acquisition or disposal of the asset, such as transfer costs, advertising costs, costs of moving the asset from one location to another and cost of installation
- Expenditure incurred to establish, maintain or defend the legal title to, or right in, the asset
- Expenditure on improvement costs (if the improvement is still in existence)

The base cost is reduced by any amounts that have been allowed as income tax deductions. It is also reduced by the following amounts if such expenditure was originally included in the base cost:

- Expenditure that is recoverable or recovered
- Amounts paid by another person
- Amounts that have not been paid and are not due in the tax year

Inflation indexation of the base cost is not allowed.

Special rules apply to the base cost valuation of an asset acquired before 1 October 2001. Subject to loss limitation rules, in principle, a taxpayer may elect to use the market value of such asset on 1 October 2001 as the base cost of the asset (the asset must have been valued before 30 September 2004) or, alternatively, it may use a time-apportionment basis, which is determined by a formula, effectively splitting the gain between the components from before 1 October 2001 and after that date.

A disposal is defined as an event that results in, among other things, the creation, variation or extinction of an asset. It includes the transfer of ownership of an asset, the destruction of an asset and the distribution of an asset by a company to a shareholder. For CGT purposes, a company does not dispose of assets when it issues shares or when it grants an option to acquire a share or debenture in the company.

The proceeds from the disposal of an asset by a taxpayer are equal to the amount received by, or accrued to, the taxpayer as a result of the disposal less any amount that is or was included in the taxpayer’s taxable income for income tax purposes. If a company makes a dividend distribution of an asset to a shareholder, it is deemed to have disposed of the asset for proceeds equal to the asset’s market value.

Rollover relief is available in certain circumstances including destruction of assets and scrapping of assets.
All related-party transactions are deemed to occur at market value, and restrictions are imposed on the claiming of losses incurred in such transactions.

Corporate emigration, which occurs when the effective management of the company is moved outside South Africa, triggers a deemed disposal at market value of the assets of the company, followed by a deemed dividend in specie.

Subject to certain exceptions, disposals of equity shares in foreign companies to nonresidents are exempt from CGT if the disposing party has held at least 10% of the equity in the foreign company for at least 18 months.

Administration. The Tax Administration Act, which took effect on 1 October 2012, governs the administration of most taxes in South Africa.

The tax year for a company is its financial year. A company must file its annual tax return in which it calculates its taxable income and capital gains, together with a copy of its audited financial statements, within 60 days after the end of its financial year. Extensions of up to 12 months after the end of the financial year are usually granted. No payment is made with the annual return.

The tax authorities issue an official tax assessment based on the annual return. The company must pay the balance of tax due after deduction of provisional payments within a specified period after receipt of the assessment.

Companies must pay provisional tax in two installments during their tax year. The installments must be paid by the end of the sixth month of the tax year (the seventh month if the tax year begins on 1 March) and by the end of the tax year. The second payment must generally be accurate to within 80% of the actual tax for the year. A third (“topping up”) payment may be made within six months after the end of the tax year. If this payment is not made and if there is an underpayment of tax, interest is charged from the due date of the payment. A 20% penalty is charged if the total provisional tax paid for the year does not fall within certain prescribed parameters.

Tax penalties fall into two broad categories, which are non-compliance (for which penalty amounts can range between ZAR250 and ZAR16,000) and understatement (for which penalty amounts can range between 5% and 200% of the shortfall).

An e-filing system allows provisional payments and tax returns to be submitted electronically.

Dividends

South African dividends. Dividends paid by South African-resident companies are generally exempt from mainstream tax in the hands of the recipients and, accordingly, recipients may not deduct expenses relating to the earning of these dividends, such as interest and other expenses incurred on the acquisition of their shares.

Foreign dividends. Most foreign dividends accruing to or received by South African residents are taxable. The following foreign dividends are exempt from tax:
Dividends paid by a foreign company to a South African resident holding at least 10% of the equity and voting rights in the foreign company, unless the dividend paid by the foreign company is deductible for purposes of determining its tax liability in that foreign country

Dividends paid by a CFC to a South African resident (subject to certain limitations)

Dividends paid by a listed foreign company that are not considered distributions of assets in specie (a dividend in specie is a distribution to shareholders in a form other than cash)

Dividends paid by a foreign company to another foreign company that is resident in the same country as the payer, unless the dividend paid by the foreign company is deductible for the purposes of determining its tax liability in that country

For foreign dividends that are not exempt, a rebate may be claimed by South African resident recipients. The rebate is limited to the amount of South African tax attributable to the foreign dividend. Any excess of the foreign tax over the allowable rebate may be carried forward for a period of seven years. The excess taxes are available for setoff against foreign-source income in subsequent years (the calculation is done on a pooled basis).

A South African resident (company or individual) holding 10% or more of the equity share capital of a nonresident company is exempt from tax on dividends received from the nonresident company with respect to those equity shares. The reduced participation rate of 10% took effect on 1 April 2012 for companies and on 1 March 2012 for individuals and applies to dividends received or accrued on or after that date.

Recipients of dividends that are not exempt are taxed on a formula basis.

**Withholding tax.** Dividend withholding tax at a rate of 20% is imposed, subject to applicable treaty rates. For further details, see Secondary tax on companies and new dividend withholding tax.

**Foreign tax relief.** In the absence of treaty relief provisions, unilateral relief is granted through a credit for foreign taxes paid on foreign income, foreign dividends, foreign taxable capital gains, or income attributed under the CFC rules (see Section E), limited to the lesser of the actual foreign tax liability and the South African tax on such foreign income. The credit may be claimed only if the income is from a non-South African source. Excess credits may be carried forward, but they are lost if they are not used within seven years.

A credit was previously available with respect to foreign taxes on service income from a South African source. These credits could not be carried forward. This measure has been eliminated, effective from 1 January 2016.

Foreign taxes that cannot be claimed as a tax credit can generally be claimed as a deduction from taxable income.

**C. Determination of trading income**

**General.** The assessment to tax is based on taxable income determined in accordance with the Income Tax Act. Taxable income normally approximates profit calculated in accordance with
International Financial Reporting Standards, before adjustment for specific allowances and nondeductible items.

To be eligible for deduction, expenditures must be incurred in the production of income and for purposes of trade, and must not be of a capital nature.

Prepayments of insurance, rent and certain other items may not be deducted in full in the tax year of payment unless either of the following applies:
- The related service or other benefit is enjoyed within six months after the end of the tax year of payment.
- The aggregate of such expenditure is less than ZAR100,000.

Withholding tax on interest at a rate of 15% was introduced on 1 March 2015. A reduced rate of tax or exemption may apply under an applicable treaty. The treaty may reduce the rate that South Africa is allowed to charge, or even deny South Africa the right to tax interest payments. The reduced rates or exemptions under a double tax treaty do not automatically apply but require certain documentation to be submitted to the payer of the interest before payment of the interest.

**Inventories.** Inventory is valued at the lower of cost or net realizable value. Last-in, first-out (LIFO) is not an acceptable method of valuation for tax purposes. Appropriate overhead expenses must be included, in the valuation of inventory. Special rules apply to construction work in progress. Consumable stores and spare parts may be included in inventory.

**Tax depreciation (capital allowances)**

*Industrial plant and machinery.* New plant and machinery that is brought into use in a manufacturing or similar process by other businesses is depreciated at a rate of 40% in the first year and at a straight-line rate of 20% for the second, third and fourth years. Used machinery or plant used in such a process qualifies for a 20% allowance per year over five years. The same allowances apply to foundations for plant and machinery if they are built specifically for particular machines and have a useful life limited to the life of the relevant machine.

SBCs (see Section B) qualify for a 100% deduction of the cost of new or used plant or machinery that is first brought into use on or after 1 April 2001 in a manufacturing or similar process. For other plant or machinery of an SBC, the following allowances are granted:
- 50% in the first year of use
- 30% in the second year of use
- 20% in the third year of use

*Industrial buildings.* A 5% annual straight-line allowance is granted on the cost of the construction of, and improvements to, industrial buildings erected by a taxpayer. Purchased industrial buildings generally qualify for annual straight-line allowances on the purchase price paid, excluding the amount attributable to the land, at the following rates:
- 2% if originally constructed before 1 January 1989
- 5% if constructed during the period of 1 January 1989 through 30 June 1996
Hotels. Construction of and improvements to hotels qualify for a 5% straight-line allowance. However, capital expenditure on the internal renovation of hotels qualifies for straight-line depreciation at an annual rate of 20%.

Urban renewal. The cost of erection of new buildings or renovation (including extension) of old buildings in certain depressed urban areas qualifies for allowances if the building is used by the taxpayer for the taxpayer’s own trade or is leased for commercial or residential purposes. If the building is new or significant extensions are made to an existing building, the allowance is 20% in the year of first occupation and 8% per year for the following 10 years. If a building is renovated and if the existing structural or exterior framework is preserved, the allowance is 20% per year for five years.

Renewable energy plant and machinery. Effective from 1 January 2016, costs incurred with respect to the acquisition and construction of plant and machinery used in the generation of renewable energy qualify for allowances (based on certain criteria) at the following rates:
- 50% in the first year of use
- 30% in the second year of use
- 20% in the third year of use

Other commercial buildings. An allowance of 5% of the cost is generally available on commercial buildings not qualifying for any of the above allowances.

Wear-and-tear allowance for movables. An annual “wear-and-tear” tax depreciation allowance on movable items may be calculated using the declining-balance method or the straight-line method, but the straight-line method is generally preferred by the revenue authority. The allowance may be claimed based on the value (generally the cost) of movable non-manufacturing machinery and equipment used by the taxpayer for the purposes of its trade. Rates for the wear-and-tear allowance are not prescribed by statute, but certain periods of depreciation are generally accepted by the tax authorities. The following are some of the acceptable periods of straight-line depreciation.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aircraft (light passenger, commercial and helicopters)</td>
<td>4</td>
</tr>
<tr>

<td>Passenger cars</td>
<td>5</td>
</tr>
<tr>
<td>Heavy duty trucks</td>
<td>3</td>
</tr>
</tbody>
</table>

Apportionment of the wear-and-tear allowances is required for assets acquired during the course of a year.
Any asset costing ZAR7,000 or less may be written off in the year of acquisition of the asset.

**Special capital allowances.** Subject to the approval of the Minister of Science and Technology, the cost of developing and registering patents, designs, copyrights or similar property, and related know-how and of discovering novel scientific and technological information qualifies for a 150% deduction in the year in which the costs are incurred.

The acquisition cost of patents, copyrights and similar property (other than trademarks) and of related know-how is deductible at a rate of 5% per year. The cost of designs is deductible at a rate of 10% per year.

The cost of goodwill and trademarks (acquired on or after 1 January 2004) is not depreciable for tax purposes.

Deductions with respect to restraint of trade payments are allowed over the period of restraint, with a minimum period of three years.

A 10% annual allowance is granted for the cost of new and unused pipelines used for transportation of natural oil, gas and refined products.

A 5% annual allowance is granted for the following:
- Water pipelines and electrical lines
- Railway lines used for the transportation of persons, goods and other items

Other special capital allowances are provided for expenditures on ships and aircraft, hotel equipment, scientific research, employee housing, plant and machinery of small business corporations (see Section B), aircraft hangars, aprons, runways and taxiways, and solar, wind and tidal equipment for the generation of electricity, as well as for certain capital expenditures for mining and agriculture, which are deductible in full against mining and agricultural income.

**Recapture.** The amount of tax depreciation claimed on an asset may be recouped (recaptured) when the asset is sold. In general, the amount recouped is the excess of the selling price over the tax value, but it is limited to the amount of tax depreciation claimed.

**Groups of companies.** Companies in a group may not share their tax losses with other profitable companies in the group.

Special rules provide income tax and CGT relief for transactions between 70%-held group companies and between shareholders and their companies. These transactions include the following:
- Asset-for-share transactions
- Amalgamation transactions
- Substitutive share-for-share transactions (this is a transaction between a person and a company in which the person disposes of an equity share in the form of a linked unit in the company and acquires an equity share other than a linked unit in the company)
- Intragroup transactions
- Unbundling transactions
- Transactions relating to the liquidation, winding up and deregistration of companies
Relief for losses. Tax losses may not be carried back but may be carried forward indefinitely, provided there is trading in every tax year.

Foreign tax losses may be offset against foreign income only. If a foreign tax loss exceeds foreign income, the excess may be carried forward to offset foreign income in future years for an unlimited period.

E. Miscellaneous matters

Foreign-exchange controls. Measures were introduced in the 1960s to stem the outflow of capital from South Africa and to ensure a measure of stability in currency markets.

Permission must be obtained from the South African Reserve Bank (SARB) for the remittance of management fees. Royalties are freely remittable if the license agreement has been approved by the SARB (see Debt-to-equity rules). South African companies raising loan financing offshore must obtain the authorization of the SARB regarding the terms and conditions. Foreign-equity investments are not restricted but share certificates must be endorsed “nonresident” by the SARB.

Debt-to-equity rules. The tax law includes measures that counter thin capitalization by adjusting both the interest rate and the amount of a loan based on arm’s-length principles. These measures previously contained a debt-to-equity ratio safe harbor of 3:1. However, the tax authorities have moved away from this ratio to require each company to consider its debt-equity mix on an arm’s-length basis. In certain circumstances, the thin-capitalization rules do not apply to headquarter companies. In addition, new legislation further limits deductions to an amount determined by a formula. This amount roughly equals 40% of taxable income (with adjustments largely intended to match cash flow, subject to a ceiling of 60%). The new limitation applies from 1 January 2015.

Transfer pricing. The South African tax law includes transfer-pricing provisions, which are based on the internationally accepted principles of transfer pricing. These provisions allow the South African tax authorities to treat any term or condition of a cross-border related-party transaction differently, but only to the extent that the term or condition differs from those that would exist between unrelated parties. In addition, exchange control regulations discourage unreasonable pricing by requiring that many foreign contracts, such as license agreements, be approved by the
Department of Trade and Industry before payment is allowed. The following are key aspects of the legislation:

- **Effected transaction** means any transaction, operation, scheme, agreement or understanding entered into or effected between or for the benefit of connected parties, as defined, and the terms or conditions are different from arm’s-length terms or conditions.
- The arm’s-length principle is extended to financial transactions.
- If there is a transfer-pricing adjustment, a secondary adjustment is triggered and results in a deemed dividend *in specie* to a company attracting dividends tax at a 20% rate and a deemed donation to an individual subject to donation tax at 20%.
- South Africa has adopted the Base Erosion and Profit Shifting Action 13 for Country-by-Country Reporting.
- South Africa does not subscribe to the simplified approach for low-value-adding intra-group services.

**Anti-avoidance legislation.** In addition to transfer-pricing rules (see *Transfer pricing*), South African law contains general anti-avoidance provisions that target “impermissible tax avoidance arrangements.” Broadly, an impermissible tax avoidance arrangement is an arrangement that seeks to achieve a tax benefit as its sole or main purpose and was entered into in a manner that would not normally be employed for bona fide business purposes, lacks commercial substance or misuses or abuses other provisions of the tax law. The SARS has wide powers in determining the tax consequences of an impermissible tax avoidance arrangement.

**Personal service companies.** The interposition of a corporate entity (personal service company) to disguise employment income does not prevent the imposition of employee withholding tax on fees earned. These companies are taxed at a rate of 28% and may claim only certain deductions, such as salaries, legal expenses, bad debts, contributions by the employer to pension and provident funds and medical aids, tax depreciation, rental expenses, finance charges, insurance, repairs, and fuel and maintenance for assets. The expenses with respect to premises and assets are allowed as deductions only if they are incurred wholly or exclusively for purposes of trade.

**Controlled foreign companies.** Legislation regulates the taxation of certain income of CFCs. Key aspects of the legislation are described below.

Net foreign income, including capital gains, derived by a CFC may be attributed proportionately to any South African-resident beneficial owner of the CFC (other than a headquarter company) that has an interest of 10% or more in the CFC. The net foreign income is calculated using South African tax principles, but generally ignoring passive income flows between CFCs in a 70%-held group.

A company is considered to be a CFC if more than 50% of the participation or voting rights of the company is held directly or indirectly by South African residents. In determining whether a company is a CFC, the participation rights and voting rights of a headquarter company (see *Headquarter companies*) are ignored. In addition, for a foreign listed company or a collective-investment portfolio, any person who holds less than 5% of the participation...
rights of the foreign company is deemed not to be a resident unless connected parties hold more than 50% of the participation rights or voting rights of the company. The CFC attribution rules do not apply to a resident if the resident (together with any connected person) holds less than 10% of the participation rights and voting rights.

A CFC’s income is not attributed to a South African resident to the extent that the income is effectively connected to a business operation carried on through a “foreign business establishment” (FBE). In broad terms, an FBE is a fixed place of business that is suitably equipped with on-site operational management, employees, equipment and other facilities for the purpose of conducting the primary operations of the business and that is used for a bona fide business purpose and not for tax avoidance (the place of business may be located elsewhere than in the CFC’s home country). Several anti-avoidance exceptions exist with respect to the measure described in this paragraph. Also, if the tax payable to a foreign government equals at least 75% of the tax liability that would have arisen in South Africa, no income needs to be imputed into the resident’s taxable income.

See Section B for information regarding foreign attributable tax credits and carryforward rules.

**Headquarter companies.** The headquarter company regime was introduced to encourage foreign companies to use South Africa as their base for investing in Africa. Broadly, headquarter companies are exempt from withholding taxes on dividends, interest and royalties.

A headquarter company is a South African-resident company that has elected to be treated as a headquarter company and that satisfies all of the following conditions:

- Each shareholder (alone or together with its connected persons, whether resident or nonresident) holds 10% or more of the equity shares and voting rights in the headquarter company.
- At least 80% of the cost of the headquarter company’s assets (excluding cash) is attributable to investments in equity shares, loans or advances and intellectual property in nonresident companies in which at least a 10% equity interest is held.
- If the gross income of the company exceeds ZAR5 million, at least 50% of that gross income must consist of rentals, dividends, interest, royalties, service fees received from foreign companies, or proceeds from the sale of equity shares or intellectual property in such foreign companies.

A headquarter company must submit an annual report to the Minister of Finance.

The CFC imputation rules do not apply to headquarter companies, unless 50% or more of its shares are held by South African residents. As a result of this concession, the net income of the headquarter company’s foreign subsidiaries is not taxed in its hands, but in the hands of the ultimate shareholders if they are South African residents.

Headquarter companies are also exempt from the transfer-pricing and thin-capitalization rules if they on-lend loan proceeds received from their offshore shareholders to their foreign
subsidiaries in which they hold at least 10%. The transfer-pricing rules also do not apply to back-to-back royalties under licenses from nonresidents.

### F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the withholding rate under domestic tax law.

</table>

(a) Effective from 1 April 2012, dividends are subject to withholding tax in South Africa at a standard rate of 15%, unless reduced by tax treaties as shown in the table above.

(b) Interest withholding tax at a rate of 15%, which is effective from 1 March 2015, applies to nonresidents only.

(c) In general, royalties are exempt from withholding tax if they are subject to tax in the recipient’s country. Otherwise, the rate is 12% until 31 December 2014, and 15%, effective from 1 January 2015. These rates may be reduced by tax treaties as shown in the table above.

(d) In general, royalties are exempt if they are subject to tax in Israel. Otherwise, the rate is in accordance with South African domestic law, as discussed in footnote (c). Therefore, the treaty rate of 25% is not used.

(e) The rate applies only if the recipient is the beneficial owner of the royalties.

(f) The 6% rate applies to royalties paid for copyrights of literary, dramatic, musical or other artistic works (excluding royalties with respect to motion picture films, works on film or videotape or other means for use in connection with television broadcasting), as well as for the use of, or the right of use, computer software, patents or information concerning industrial, commercial or scientific experience (excluding information provided in connection with a rental or franchise agreement). The 10% rate applies to other royalties.

(g) The 10% rate applies to royalties paid for copyrights of literary, artistic or scientific works, including cinematographic films, tapes, discs, patents, know-how, trademarks, designs, models, plans or secret formulas. The 10% rate applies to the “adjusted amount” of royalties paid (that is, 70% of the gross amount of royalties) for industrial, commercial or scientific equipment. This effectively provides a 7% rate on the gross royalties paid.

(h) The 5% rate applies to royalties paid for copyrights of literary, artistic and scientific works. The 7% rate applies to royalties paid for patents, trademarks,
designs, models, plans or secret formulas, as well as for industrial, commercial or scientific equipment.

(i) The 5% rate applies to royalties paid for copyrights of cultural, dramatic, musical or other artistic works or for industrial, commercial and scientific equipment. The 10% rate applies to other royalties.

(j) The 15% rate applies to royalties paid for the use of trademarks. The 10% rate applies to other royalties.

(k) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 10% rate applies to other dividends.

(l) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.

(m) The 5% rate applies if the beneficial owner is a company that owns at least 15% of the shares. The 10% rate applies to other dividends.

(n) The 7.5% rate applies if the beneficial owner is a company that owns at least 25% of the shares or voting power. The 15% rate applies to other dividends.

(o) The 8% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.

(p) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 15% rate applies to qualifying dividends paid by a property investment company that is a resident of a contracting state. The 10% rate applies to other dividends.

(q) The 5% rate applies if the beneficial owner is a company that owns at least 20% of the shares. The 15% rate applies to other dividends.

(r) The 7.5% rate applies if the beneficial owner is a company that owns at least 20% of the shares or voting power. The 10% rate applies to other dividends.

(s) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.

(t) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.

(u) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 10% rate applies to other dividends.

(v) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 20% rate applies to other dividends.

(w) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.

(x) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the shares or voting power. The 15% rate applies to other dividends.

(y) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares for an uninterrupted period of two years before the payment of the dividend. The 15% rate applies to other dividends.

(z) The 10% rate applies if the beneficial owner is a company that owns at least 30% of the shares in the company paying the dividends during the six-month period immediately before the end of the accounting period for which the distribution of profits takes place. The 15% rate applies to other dividends.

(aa) The 0% rate applies to government institutions and unrelated financial institutions. The 10% rate applies in all other cases.

(bb) The 0% rate applies to banks or other financial institutions. The 10% rate applies in all other cases.

(cc) The 0% rate applies to commercial debt claims, public financial institutions or public entities under a scheme for the promotion of exports, loans and deposits with banks and interest paid to the other contracting state. The 15% rate applies to other debt claims.

(dd) The 0% rate applies to government institutions and unrelated financial institutions. The 10% rate applies in all other cases.

(ee) The 0% rate applies to government institutions. The 5% rate applies in all other cases.

(ff) The 10% rate applies to government institutions.

(gg) The 15% rate applies to government institutions.

(hh) The 0% rate applies to government institutions. The 12% rate applies in all other cases.

(ii) The 0% rate applies to government institutions. The 8% rate applies in all other cases.

(jj) The 5% rate applies to banks. The 10% rate applies in all other cases.

(kk) The 0% rate applies to government institutions and interest paid on loans or credits for periods of no less than three years that are granted, guaranteed or insured by a financial or credit institution that is wholly government-owned.

(ll) The 0% rate applies to government institutions. The 7.5% rate applies in all other cases.
(mm) The 5% rate applies to government institutions and interest paid on long-term loans (seven years or more) granted by banks or other credit institutions that are resident in a contracting state.

(nn) The 0% rate applies to government institutions. The 10% rate applies to financial institutions (including insurance companies). The 15% rate applies in all other cases.

(oo) The 0% rate applies to government institutions. The 5% rate applies to banks. The 12% rate applies in all other cases.

(pp) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment, or transport vehicles. The 10% rate applies in all other cases.

(qq) The exemption of royalties from tax in a contracting state if they are taxable in the other contracting state does not apply to an amount paid with respect to the operation of a mine, oil well or quarry or any other extraction of natural resources.

(rr) The 0% rate applies if the dividend is paid out of profits that have borne the normal rate of company tax and if the beneficial owner is a company that owns at least 10% of the shares. The higher rate applies to other dividends.

(ss) The 5% rate applies to interest on loans from banks and insurance companies, bonds and securities traded on a recognized securities market and credit sales of machinery or equipment if the seller is the beneficial owner of the items. The 15% rate applies in all other cases.

(tt) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies in all other cases.

South Africa has ratified comprehensive tax treaties with Gabon, Germany (renegotiated) and Sudan, as well as a protocol to an existing comprehensive tax treaty with Brazil.

South Africa is currently negotiating comprehensive tax treaties with Cuba, the Isle of Man (limited treaty), Morocco, Senegal, Syria and Vietnam, as well as protocols to existing comprehensive tax treaties with Austria, Belgium, Germany, Ireland, Kuwait, Luxembourg, Mozambique, the Netherlands, Norway, Swaziland, Switzerland and Thailand, but these instruments have not yet been signed.

South Africa is currently renegotiating tax treaties with Malawi, Namibia and Zambia, but the renegotiated treaties have not yet been signed.

(a) For details regarding these rates, see Section B.
(b) Capital gains are recognized as business income, while capital losses are recognized as business losses.
(c) The taxation of a branch is similar to that of a company or subsidiary.
(d) This withholding tax applies to payments to both residents and nonresidents.
(e) This is considered to be a final tax.
(f) This withholding tax applies only to payments to nonresidents.

### B. Taxes on corporate income and gains

**Corporate income tax.** Business organizations pay South Sudan corporate income (business profits) tax. Business organizations are organizations that are required to be registered under the provisions of the Taxation Act except for insurance companies and individuals.
A resident taxpayer is a company, partnership or other entity that is established in South Sudan or that has its place of effective management in South Sudan. Taxable profit for a resident taxpayer is the taxable profit from South Sudan and foreign sources.

**Corporate tax rates.** The corporate income tax rates range from 10% to 25%, depending on the level of turnover. The following are the rates for resident and nonresident companies.

<table>
<thead>
<tr>
<th>Type of business</th>
<th>Annual turnover (SSP)*</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Small business enterprises</td>
<td>Up to 1,000,000</td>
<td>10</td>
</tr>
<tr>
<td>Medium business enterprises</td>
<td>From 1,000,000 to 30,000,000</td>
<td>20</td>
</tr>
<tr>
<td>Large business enterprises</td>
<td>Above 30,000,000</td>
<td>25</td>
</tr>
</tbody>
</table>

* The exchange rate for the South Sudanese pound (SSP) against the US dollar (USD) was SSP150.0031 = USD1 as of October 2018.

**Capital gains.** Capital gains are recognized as business income, while capital losses are recognized as business losses.

**Administration.** The tax period is the calendar year. The law does not allow for a change of the tax period from the calendar year.

A company must make payments for each quarter by 15 April, 15 July, 15 October and 15 January. The payments are estimated on a current year or prior year basis. The tax balance, if any, must be paid by 1 April of the following year. A company must file the tax return on or before 1 April of the year following the tax year.

Late filing of a return results in a penalty of 5% of the tax reportable on the return per month, up to a maximum of 25% of the tax reportable. Late payment of tax results in a penalty of 5% per month until the tax is paid. The interest rate payable on late payment of tax is published annually by the Directorate of Taxation and is 120% of the prime commercial rate (this is the average rate that commercial banks in South Sudan charge other banks and financial institutions).

**Dividends and interest.** A 10% withholding tax is imposed on payments of dividends and interest. This tax is deemed to be a final payment of tax.

**Foreign tax relief.** Tax paid by resident taxpayers that derive profits from business activities outside South Sudan through permanent establishments is allowed as a foreign tax credit if the jurisdiction (country) in which the permanent establishment is located allows similar treatment for tax paid in South Sudan.

Relief for foreign taxes paid will also be granted in accordance with tax treaties with other countries.

**C. Determination of business profits**

**General.** Business profit is accounting income adjusted for certain non-taxable income and nondeductible expenses, such as depreciation. Expenses are deductible if incurred wholly and exclusively in the production of income.
Representation costs are all costs related to the promotion of the business or its products. These are allowed as deductible expenses, up to a maximum of 2% of gross income.

**Inventories.** The normal accounting basis of the lower of cost or net realizable value is generally accepted for tax purposes.

**Bad debts.** Bad debts are allowable deductions if they meet the stipulated conditions contained in the Taxation Act.

**Tax depreciation.** Depreciation charged in the financial statements is not deductible for tax purposes. It is replaced by the following tax depreciation allowances.

<table>
<thead>
<tr>
<th>Asset class</th>
<th>Description</th>
<th>Rate (%)</th>
<th>Method</th>
</tr>
</thead>
<tbody>
<tr>
<td>Category 1</td>
<td>Buildings and other structures</td>
<td>10</td>
<td>Straight line (a)</td>
</tr>
<tr>
<td>Category 2</td>
<td>Vehicles, office equipment and computers</td>
<td>33</td>
<td>Reducing balance (b)</td>
</tr>
<tr>
<td>Category 3</td>
<td>All other property</td>
<td>25</td>
<td>Reducing balance (b)</td>
</tr>
</tbody>
</table>

(a) The initial cost for buildings and other structures includes taxes, duties and interest attributable to the property before they are placed in service.
(b) Expenditure on property in Categories 2 and 3 of less than SSP1,000 is allowed as a current expense.

Amounts expended on repair, maintenance or improvement of a category of capital assets are allowed as deductions, up to a maximum of 5% of the written-down value of that category of capital assets.

**Relief for losses.** Business losses can be carried forward for up to five successive tax periods and may be claimed as a deduction against any income in those years.

**Groups of companies.** The income tax law does not permit consolidated returns combining the profits and losses of affiliated companies or the transfer of losses from loss companies to profitable members of the same group of companies.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sales tax; on the production and importation of goods into South Sudan and on the supply of specified services</td>
<td>18</td>
</tr>
<tr>
<td>General rate</td>
<td>18</td>
</tr>
<tr>
<td>Social security scheme</td>
<td>8/17</td>
</tr>
</tbody>
</table>

(The country has not yet set up a national social security scheme. However, deductions of 8% from wages and employer contributions of 17% of wages are required.)

**E. Miscellaneous matters**

**Foreign-exchange controls.** The Bank of South Sudan imposes certain foreign-exchange controls. In December 2015, the fixed exchange rate regime was phased out and a free-market exchange rate regime was introduced.
Transfer pricing. The arm’s-length price should be determined under the comparable uncontrollable price method. If this is not possible, the resale-price method or the cost-plus method can be used.

Debt-to-equity rules. No debt-to-equity ratio restrictions are imposed.

F. Tax treaties

South Sudan has only one ratified treaty, which is an agreement with Morocco.
Spain

On 16 January 2019, the State Budget Bill (the Budget Bill) for the 2019 fiscal year was published in the Spanish Parliament Official Gazette. The Budget Bill still has to follow the parliamentary discussion and approval process. If approved without amendments, the Budget Bill would modify relevant aspects of the Corporate Income Tax Law and the Personal Income Tax Law. It would modify the Spanish participation exemption regime, include minimum taxation levels for companies with turnover exceeding EUR20 million and provide lower corporate income tax rates for companies with turnover below EUR1 million. Readers should closely monitor the parliamentary procedure and any developments regarding these potential tax measures.

(a) Other rates apply to specific entities. See Section B.
(b) Certain capital gains are exempt from tax or are subject to tax at a reduced rate. See Section B.
(c) See Section B.
(d) Certain interest and royalties are exempt from tax. See Section B.
(e) Exceptions may apply to this rate. See Section B.
B. Taxes on corporate income and gains

**Corporate income tax.** Corporate tax is imposed on the income of companies and other entities and organizations that have a separate legal status. Resident entities are taxable on their worldwide income. The following entities are considered to be resident entities:

- An entity incorporated under Spanish law
- An entity having its legal headquarters in Spain or its effective place of management in Spain

In addition, the tax authorities may presume that an entity resident in a tax haven or in a country with no income taxation is tax resident in Spain if any of the following circumstances exist:

- The majority of its assets is directly or indirectly located in Spain.
- A majority of its rights may be exercised in Spain.
- The principal activity of the entity is carried out in Spain.

The above measure does not apply if business reasons justify the effective performance of operations and exercise of management in such foreign jurisdiction.

Nonresident entities are taxable only on Spanish-source income, which includes income from any kind of business activity conducted in Spain through a branch, office or other permanent establishment. Nonresident companies or individuals must appoint a fiscal representative if they are conducting business activities in Spain through a permanent establishment (exceptions apply) or if certain other specified circumstances occur.

**Tax rates.** The general tax rate for residents and nonresidents that conduct business activities in Spain through a permanent establishment is 25%.

Newly incorporated entities carrying out business activities are taxed at a rate of 15% in the first fiscal year in which the entity has a positive tax base and in the following year, regardless of the amount of the tax base. However, this special tax rate does not apply in certain cases, such as the following:

- Newly incorporated entities carrying out economic activities previously carried out by related entities
- Newly incorporated companies belonging to a group of companies
- Entities qualifying as passive entities (*entidades patrimoniales*), which are entities that have more than 50% of their assets constituted by shares or other assets not linked to a business activity

In addition to other tax benefits, companies licensed to operate in the Canary Islands Special Zone (Zona Especial Canaria, or ZEC) are subject to a reduced tax rate of 4% if certain conditions are satisfied. This reduced rate applies up to a maximum amount of taxable income, equaling the lesser of the following:

- The ratio of income derived from qualified ZEC transactions with respect to total income
- The amount resulting from the sum of the following amounts:
  - EUR1,800,000 for those entities within the ZEC that fulfill the minimum job creation requisites (that is creation of three or five jobs annually, depending on the island)
  - An additional EUR500,000 for each job created exceeding the minimum job creation requirements, up to 50 jobs
The tax reduction resulting from the application of the above rule (this reduction is calculated by comparing the corporate income tax paid to the tax that would have been due under the general corporate income tax rate) cannot be greater than the following:

- 17.5% of the ZEC entity’s turnover for an entity in the industrial sector
- 10% of the ZEC’s entity’s turnover for an entity in a different sector

Specific tax rates apply to, among others, non-governmental organizations, charities, certain cooperatives, investment fund entities meeting certain requirements and financial institutions.

In general, nonresidents operating in Spain without a permanent establishment are taxable at a rate of 24%. This tax rate is reduced to 19% for income derived by European Union (EU) or European Economic Area tax residents in a jurisdiction with which an effective exchange of tax information agreement is in place. Nonresidents without a permanent establishment that operate in Spain and that are resident in an EU member state and that can prove that their expenses are directly linked to their Spanish-source income and have a “direct and fully inseparable nexus” with the activity performed in Spain may deduct any expenses allowed by the following:

- The Personal Income Tax Law, as provided in Law 36/2006, 28 November (this law also refers to the Corporate Income Tax Law to determine the net tax base in the case of economic activities), if they are individuals
- The Corporate Income Tax Law (27/2014), if they are legal entities

Dividends and interest received by nonresidents are subject to a final withholding tax of 19%. As a result of a change in the Spanish Personal Income Tax Law, share premium distributions made to non-Spanish resident shareholders may be treated as dividend distributions instead of a return of basis and therefore subject to withholding tax under the general rules.

The tax rate applicable to income from reinsurance operations is 1.5%. A 4% tax rate applies to Spanish-source income generated by companies resident abroad operating ships and aircraft in Spain.

Interest income is exempt from tax if the recipient is resident in an EU member state (or if the recipient is an EU permanent establishment of a resident in another EU member state) that is not on the Spanish tax haven list. Interest paid to nonresidents on Spanish Treasury obligations is exempt from tax. Income derived by nonresidents without a permanent establishment in Spain from bonds issued in Spain by nonresidents without a permanent establishment in Spain and from bank accounts is exempt from tax in Spain.

Distributions by Spanish subsidiaries to parent companies in EU member states that are not on the Spanish tax haven list are exempt from withholding tax if the parent company owns directly or indirectly at least 5% of the subsidiary for an uninterrupted period of at least one year and if certain other requirements are met. The one-year holding period requirement may be satisfied at the date of the distribution or subsequent to such date. An anti-avoidance
provision applies in situations in which the ultimate shareholder is not an EU resident.

Royalties paid to associated EU resident companies or permanent establishments are exempt from tax in Spain if specific conditions are met.

In addition to nonresident income tax at a rate of 25%, nonresidents operating in Spain through a permanent establishment are subject to a branch remittance tax at a rate of 19%, unless one of the following exemptions applies:

- Branches of EU resident entities, other than tax-haven residents, are exempt from the tax.
- A branch can be exempt from tax if Spain and the country of residence of its head office have entered into a double tax treaty that does not provide otherwise and grants reciprocal treatment.

**Patent Box Regime.** Under the Patent Box Regime, a 60% exemption is granted for net income derived from the licensing of certain qualifying intellectual property (IP), including registered advance software that derives from R&D activities. Such income is considered only in the proportion of the amount resulting from the application of a specified ratio. The following are the rules for calculating the ratio:

- The numerator consists of the expenses incurred by the licensing entity that are directly related to the creation or development of the IP, including those incurred from outsourcing to unrelated third parties in this regard. These expenses are increased by 30%, subject to the limit of the amount included in the denominator.
- The denominator consists of the expenses incurred by the licensing entity that are directly related to the creation of the IP, including those related to the outsourcing from either related or unrelated parties and, if applicable, the acquisition of the IP.

Under the regime, expenses with respect to works related to the development of the IP that are subcontracted to related parties are included in the denominator, but not the numerator. Therefore, to the extent that the works related to the development of the IP are subcontracted to related parties, the reduction is less than 60% (that is, the lower the numerator in comparison with the denominator, the lower the percentage of reduction).

The net income qualifying for the reduction is calculated as the positive difference between the following two amounts:

- The revenues derived from the licensing of the right to use or exploit the assets or from the transfer of the assets
- The costs incurred by the company that are directly related to the creation of the assets and have not been included in the value of such assets, the amounts deducted as depreciation, and the costs that have been included in the corporate income tax base

This exemption also applies to the net income from the transfer of the qualifying IP.

To qualify for the exemption, the following requirements must be met:

- The licensee must use the licensed IP assets in an economic activity. This use cannot result in the sale of goods or provision
of services to the licensor that generates deductible expenses for the licensor if the licensor and the licensee are related parties.

- The licensed entity must not be resident in a no-tax or black-listed jurisdiction.
- If any additional goods or services are included in the licensing agreement, the consideration for such services must be included separately in the agreement.
- Accounting books for determining the income and direct expenses with respect to each of the licensed assets must be maintained. Income to be reduced is considered net of depreciation and of expenses directly related to such asset in the relevant period.

**Transitory regime.** The regulation provides for a transitory regime for pre-July 2016 licensing agreements. The taxpayer needs to select the option on the tax form corresponding to the 2016 fiscal year.

For licensing agreements entered into before 29 September 2013, the licensing entities may opt to continue applying the original Spanish Patent Box Regime, which entered into force on 1 January 2008.

For licensing agreements entered into from 30 September 2013 to 30 June 2016, the licensing entities may opt for applying the Spanish Patent Box Regime in accordance with the law in force from 1 January 2015.

In general, these transitory regimes will remain applicable until 30 June 2021. After this date, the amended Spanish Patent Box Regime will be the only applicable regime.

In addition, gains derived from the sale of the IP assets made from 1 July 2016 to 30 June 2021 (or, exceptionally until 31 December 2017 regarding certain sales occurring between related parties) may also benefit from the application of the reduction in accordance with the law in force as of 1 January 2015. The option should be made in the tax form corresponding to the period in which the assets are sold.

**Capital gains.** Spanish law generally treats capital gains as ordinary income taxable at the regular corporate tax rate.

Capital gains realized by nonresidents without a permanent establishment in Spain are taxed at a rate of 19%. Capital gains on movable property, including shares, are exempt from tax if the recipient is resident in an EU country that is not on the Spanish tax haven list, unless the gains are derived from the transfer of shares and any of the following circumstances exists:

- The company’s assets directly or indirectly consist primarily of Spanish real estate.
- For an EU shareholder who is an individual, he or she has held at least a 25% interest in the Spanish company at any time during the prior 12 months.
- For an EU shareholder that is a legal person, it has not held a minimum ownership percentage of 5% or its acquisition cost was less than EUR20 million and a one-year minimum holding period in the subsidiary has not been met.
If a nonresident that does not have a permanent establishment in Spain disposes of Spanish real estate, a 3% tax is withheld by the buyer from the sale price, with certain exceptions. The tax withheld constitutes an advance payment on the final tax liability of the seller.

Capital gains derived by nonresidents without a permanent establishment in Spain from the reimbursement of units in Spanish investment funds or from the sale of shares traded on a Spanish stock exchange are exempt from tax in Spain if the seller is resident in a jurisdiction that has entered into a tax treaty with Spain containing an exchange of information clause.

**Administration.** The tax year is the same as the accounting period, which may be other than a calendar year. The tax year may not exceed 12 months. The tax return must be filed within 25 days after six months following the end of the tax year. In April, October and December of each calendar year, companies and permanent establishments of nonresident entities or individuals must make payments on account of corporate income tax or nonresidents income tax, respectively, equal to one of the following:

- Eighteen percent of the tax liability for the preceding tax year.
- An amount calculated by applying 19/20 (for entities with net turnover of more than EUR10 million) or 5/7 (for entities with net turnover not exceeding EUR10 million) of the corporate income tax rate (that is, 24% or 17%, respectively, if the corporate tax rate is the general rate of 25%) to the profits for the year as of the end of the month preceding the date of the payment and then subtracting from the result tax withheld from payments to the company and advance payments of tax previously made. This alternative is compulsory for companies with turnover of more than EUR6 million in the immediately preceding tax year.
- For taxpayers with net turnover of more than EUR10 million in the immediately preceding tax year, a minimum interim payment of 23% of the taxpayer’s accounting result after taxes (regardless of eventual applicable book-to-tax adjustments and the pending application of a tax-loss carryforward), reduced by the amount of previous payments on account corresponding to the same fiscal year. As a result, for taxpayers with net turnover of more than EUR10 million, the interim payment is the higher of the following:
  - 24% to the profits (tax base) for the year as of the end of the month preceding the date of the payment, reduced by the tax withheld from payments to the company and advance payments of tax previously made
  - 23% of the positive accounting profit for the year as of the end of the month preceding the date of the payment, reduced by tax withheld from payments to the company and advance payments of tax previously made

**Statute of limitations.** Although the Spanish tax law provides that the statute of limitations period is four years, the Corporate Income Tax Act provides that tax losses and tax credits may be subject to tax audit for a period of 10 years from the tax year of generation. It also contains provisions enabling the tax auditors to review transactions implemented in statute-barred years if they produce effects in non-statute barred periods.
Participation exemption regime and foreign tax relief. The exemption method may be used to avoid double taxation on dividends received from Spanish-resident and non-Spanish resident subsidiaries and on capital gains derived from transfers of shares issued by such companies if the following requirements are met:

- At the time of the distribution of the dividend or the generation of the capital gain, the Spanish company has owned, directly or indirectly, at least 5% of the share capital of the resident or non-resident company for an uninterrupted period of at least one year or the acquisition cost of the subsidiary exceeds EUR20 million.

Up to 2014, for a foreign portfolio holding company (entidades de tenencia de valores extranjeros or ETVE; see Foreign portfolio holding company regime), investments over EUR6 million qualified for the participation exemption rules. Under a transitional regime, investments made by ETVEs before 1 January 2015 that meet the EUR6 million threshold but do not meet the EUR20 million requirement qualify for the participation exemption regime. For dividends, the one-year period can be completed after the distribution. In addition, the time period in which the participation is held by other group entities is taken into account for purposes of the computation of the one-year period.

- For foreign companies only, a minimum level of (nominal) taxation of 10% is required under a foreign corporate tax system similar to Spain’s corporate tax system. This requirement is considered to be met if the subsidiary is resident in a country that has entered into a double tax treaty with Spain containing an exchange-of-information clause.

- The foreign company is not resident in a country identified by the Spanish tax authorities as a tax haven.

The new Spanish Corporate Income Tax Act eliminates the so-called “business activity test,” commonly referred to as the 85/15 rule. However, the potential impact of the new controlled foreign company (CFC) rules (see Section E) need to be taken into account because capital gains derived from the transfer of shares may not benefit from the participation exemption regime if the subsidiary has registered CFC income in excess of certain thresholds. In addition, a new anti-hybrid measure prevents the application of the participation exemption if the dividend constitutes a deductible expense for the payer.

If the exemption method does not apply, a tax credit is allowed for underlying foreign taxes paid by a subsidiary on the profits out of which dividends are paid and for foreign withholding taxes paid on dividends.

For medium-size and large taxpayers (with revenue exceeding EUR20 million in the immediately preceding year), the tax credit is limited to 50% of the gross tax liability, but the unused credit may be carried forward indefinitely.

The credit method (see below) and exemption method cannot be used with respect to the same income. Tax credits granted under the credit method may be carried forward indefinitely.

A tax credit is available for resident entities deriving foreign-source income that is effectively taxed abroad. Such credit is equal to the lesser of the following:

- The Spanish corporate tax payable in Spain if the foreign income had been obtained in Spain
The tax effectively paid abroad on the foreign-source income (in accordance with applicable double tax treaty provisions)

**Foreign portfolio holding company regime.** A special tax regime applies to companies that have foreign portfolio holding company (entidades de tenencia de valores extranjeros or ETVE) status. ETVEs are ordinary Spanish companies engaged in the administration and management of participations in the equity of nonresident entities. ETVEs may also be engaged in other activities. In addition to the general exemption for dividends and capital gains derived from shares in qualifying foreign companies as described in Participation exemption regime and foreign tax relief, an ETVE benefits from certain other tax advantages, including the following:

- No withholding tax is imposed on distributions made by ETVEs out of reserves derived from tax-exempt foreign-source dividends and capital gains to nonresident shareholders who are not tax-haven residents.
- Capital gains derived by foreign shareholders of ETVEs from transfers of shares in ETVEs are not taxed to the extent that the capital gain corresponds to qualifying exempt dividends and gains (realized or unrealized) derived at the ETVE level if the shareholder is not resident in a tax haven.

**C. Determination of taxable income**

**General.** Taxable income is the company’s gross income for the tax year, less certain deductions. It is determined from the annual financial statements prepared under Spanish generally accepted accounting principles (Spanish GAAP), as adjusted under certain statutory tax provisions. Spanish GAAP follows several criteria contained in International Financial Reporting Standards (IFRS).

In general, all necessary expenses incurred in producing income during the year and depreciation on income-producing property may be deducted from gross income to arrive at taxable income.

Certain items are not deductible from gross income, such as the following:

- Penalties and fines.
- Corporate income tax payments.
- Gifts and donations (gifts to customers are deductible up to an amount equal to 1% of a company’s turnover).
- Expenditures for the improvement or enhancement of capital assets.
- Amounts directly or indirectly remunerating own equity (for example, dividends and other payments made by entities in favor of their shareholders).
- Expenses related to services carried out by persons or entities that are resident in a listed tax haven, unless the taxpayer can prove that the expense relates to an effectively performed transaction.
- Depreciation charges that exceed the maximum rates prescribed by law, unless it can be demonstrated that the rates used correspond to the actual depreciation incurred.
- Interest expenses on intragroup financing related to the acquisition (or equity increase) of a participation in group entities, unless valid business reasons for such transactions are proven.
• Losses from foreign permanent establishments, unless the permanent establishment is transferred or closed down. In the event that the permanent establishment is closed down, the losses may be reduced by the amount of previous exempt income.
• Capital losses derived from the sale of a permanent establishment.
• Losses from members of Temporary Business Alliances (Uniones Temporales de Empresas) operating abroad, unless the interest is transferred or the relevant Temporary Business Alliance is closed down.

Deduction of losses derived from the impairment of tangible assets, intangible assets (including goodwill), real estate assets and shares of subsidiaries is deferred until they are sold to third parties or, if they are depreciated, during their useful life.

Deduction of losses arising from the transfer of tangible assets, intangible assets, real estate assets and debt securities between entities in the same group of companies (as defined by Article 42 of the Commercial Code) is deferred until the earliest of the following periods:
• The period in which the assets are further written off by the buyer
• The period in which the buyer resells the assets to a third party outside the group of companies
• The period in which the seller or the buyer leaves the group of companies

For depreciable assets, the deduction is claimed during their useful life.

Deduction of tax losses derived from the sale of shares in subsidiaries in which the buyer is a company of the same group of companies as the seller is deferred until the shares are resold to a third party outside the group or until the buyer or the seller leaves the group of companies. However, such deferred tax losses are deductible only with respect to the sale of non-qualifying participations (see Participation exemption regime and foreign tax relief in Section B); in the case of nonresident subsidiaries, they must also meet the 10% minimum taxation requirement. In addition, the tax losses may be reduced by the exempt gains recognized by the related-party buyer on the sale to a third party outside the group.

Capital losses derived from the sale of qualifying participations are not deductible.

Capital losses derived from the sale of non-qualifying participations may be deductible, but reduced by the amount of exempt dividends received since 2009 and by the amount of exempt gains recognized by a related-party seller in the purchase by the Spanish company.

The deduction of losses derived by the dissolution of subsidiaries may be reduced by exempt dividends recognized in the preceding 10 years.

Recapture of losses. Write-downs of participations deducted before 2013 must be recaptured in a maximum period of five years beginning in 2016, or in a shorter period if the value of the
subsidiary is recovered in a shorter time period or if the participation is sold before the end of the five-year period.

The Spanish head office is not allowed to apply the participation exemption regime on profits of the branch abroad until profits do not exceed the amount of branch losses deducted before 2013.

In the case of a sale of a permanent establishment, the taxpayer’s tax base must be increased by an amount equal to the positive difference between the negative income generated by the permanent establishment before 1 January 2013 and the positive income generated by the permanent establishment after 1 January 2013, up to the amount of the capital gain derived from the sale.

**Capitalization reserve.** Taxpayers may reduce their tax base by an amount equal to 10% of the increase of their net equity in a given year if they book a non-distributable reserve corresponding to the tax base reduction and keep it in their balance sheet for five fiscal years.

The reduction is calculated as 10% of the difference between the net book value of the company at the beginning of the year (excluding the preceding year’s accounting result) and the net book value at the end of the financial year after deducting negative adjustments, up to a maximum limit of the positive taxable base before the utilization of any tax loss carryforward. Any amount exceeding this limit will be carried forward to the following two years.

**Hybrid instruments.** The new Spanish Corporate Income Tax Act introduces certain amendments to anti-abuse rules in accordance with the Organisation of Economic Co-operation and Development (OECD) Base Erosion Profit Shifting (BEPS) project. In this regard, a special anti-abuse provision for hybrid instruments prevents the deductibility of expenses incurred in transactions with related parties in which as a result of different tax characterizations, any of the following circumstances would exist:

- Income would not be subject to tax.
- No income would be generated to the counterparty.
- The income would be subject to a nominal tax rate below 10%.

In addition, intra-group profit-sharing loans are characterized as equity instruments for Spanish tax purposes. Consequently, interest expenses derived from profit-participating loans are not tax deductible for the borrower. In line with such treatment, interest income derived from intra-group profit-sharing loans qualifies as a dividend that is exempt for the lender under the participation exemption regime (see Section B).

**Inventories.** The corporate tax law does not prescribe permissible methods for the valuation of inventory. Consequently, any valuation method allowed under the Spanish accounting rules may be used for tax purposes. Weighted average price is the generally accepted method, but first-in, first-out (FIFO) is also accepted. A common method is required with regard to inventories of the same nature and use.

**Provisions.** Provisions that are properly recorded are generally tax-deductible except for those specified by law.
**Depreciation.** All fixed or movable tangible assets (except land) that are owned by and used in the trade or business of a company are depreciable if their useful life exceeds a tax year. Intangible assets, such as patents, may be amortized during their useful life if they depreciate and have a limited and clearly defined useful life. Intangible assets whose useful life cannot be estimated reliably are amortized at an annual rate of 10%.

Goodwill is amortized at an annual rate of 5%.

Under certain conditions, Spanish-resident entities may amortize for tax purposes the financial goodwill embedded in shares of qualified foreign subsidiaries with respect to the following acquisitions:

- Acquisitions carried out before 21 May 2011 in non-EU countries if it can be proven that cross-border mergers cannot be accomplished
- Other acquisitions carried out before 21 December 2007

The amortization of financial goodwill is set at a maximum rate of 5%.

Depreciation methods are restricted to the straight-line method and the declining-balance method. The straight-line method may be used for any depreciable asset. The declining-balance method may be used only for certain new tangible assets (industrial and farming machinery, vehicles, information systems and so forth) that have an anticipated useful life of three years or more.

The basis for depreciation is the acquisition price of assets purchased by the company or the manufacturing cost of assets manufactured by the company. The acquisition price includes all related costs, such as customs duties, transportation costs and installation expenses.

Maximum depreciation rates for tax purposes are fixed by law. The following are general straight-line rates and periods of depreciation for certain assets.

Companies may use higher rates if they can demonstrate that the actual depreciation is in excess of that allowed by law.

To be deductible, the depreciation amount must be recorded in the company’s accounting books and must be “effective”; that is, it must correspond to the actual depreciation of the asset. The second condition is met if the depreciation amount is calculated in accordance with the rates prescribed by law or with other rates that have been expressly approved by the tax authorities. Otherwise, the “effectiveness” of the depreciation must be demonstrated. On request, the tax authorities may grant approval for accelerated depreciation if the company presents a plan specifying the
assets, the date and price of the acquisition, the depreciation rates and the annual depreciation allowance desired, and reasons to support the adoption of such a plan.

Investments in new tangible assets and real estate in Spain or abroad carried from 2009 through 31 March 2012 may qualify for a free tax depreciation allowance. For investments made during tax years that began during 2009 and 2010, such tax benefit is conditioned on the maintenance of the level of employment. Any depreciation allowance on such assets that was pending to be fully accelerated by 31 March 2012 is still available for use but is subject to certain limitations. New fixed assets can be freely depreciated on an annual basis if their unit cost is below EUR300, with an overall cap of EUR25,000.

**Relief for losses.** Net operating losses can be carried forward indefinitely (no expiration period) with an annual limit of 70% of the positive tax base before the application of the capitalization reserve tax reduction (see *Capitalization reserve*). The limitation applies to losses in excess of EUR1 million.

The following restrictions are imposed on taxpayers with revenue exceeding EUR20 million in the immediately preceding year:

- If the revenue within the 12 months before the beginning of the tax period ranged from EUR20 million to EUR60 million, tax losses carried forward may offset up to a maximum of 50% of taxable income.
- If the revenue in the period mentioned in the first bullet exceeded EUR60 million, the limitation equals 25% of taxable income.

Change-in-control rules for entities with tax loss carryforwards are aimed at limiting the transfer or the use of loss carryforwards. In particular, the use of tax losses is restricted if the entity that is transferred engages in a different or additional activity within the two years after the change of ownership and if the net turnover derived from such activities in those years is greater than 50% of the average turnover of the prior two years.

**Groups of companies.** A group of companies may file a consolidated tax return if the election to apply this regime is carried out before the beginning of the tax year in which the regime is to be applied and if the tax authorities are notified of the election. After the group elects taxation under the consolidated regime, the regime applies indefinitely, provided that certain requirements are satisfied.

Effective from 1 January 2015, in line with several EU court cases, Spanish legislation has extended the scope of the tax group concept in order to allow the following:

- Subsidiaries held indirectly through a foreign intermediary company can form part of the tax group.
- Horizontal tax consolidation is allowed, so that Spanish direct or indirect subsidiaries of a common foreign parent company are able to form a Spanish tax group.

For this purpose, Spanish corporations include stock companies (*sociedades anónimas*), limited liability companies (*sociedades limitadas*) and limited partnerships (*sociedades comanditarias por acciones*). The parent company may adopt any of these legal forms or otherwise it must have legal personality and be subject
to and not exempt from corporate income tax, if resident in Spanish territory, or if resident abroad, subject to a similar corporate tax system as in Spain. Registered branches of nonresident entities may qualify as controlling top entities in consolidated groups if certain requirements are met.

A company is deemed to control another company if, on the first day of the tax year for which the consolidated regime applies, it satisfies the following requirements:

- It owns, directly or indirectly, at least 75% of the other company’s share capital (70% for companies quoted on the stock exchange) and it maintains such ownership and a minimum 50% of voting rights in such entities for the entire tax year of consolidation.
- It is not subject to the special tax regimes applicable to Domestic and European Economic Interest Groupings (Agrupaciones de Interés Económico) or Temporary Business Alliances (Uniones Temporales de Empresas).
- It is not a subsidiary of another company fulfilling the requirements to be regarded as the controlling company.

Tax-exempt companies, companies taxed at a different rate than the parent company and companies in specified legal situations, such as bankruptcy, may not be part of a group of companies.

Pre-consolidation losses can be used only up to the amount of the individual positive tax base that could be used on a stand-alone basis.

### D. Other significant taxes

The following table summarizes other significant taxes.

E. Miscellaneous matters

Foreign-exchange controls. Exchange controls are administered by the Bank of Spain and the Ministry of Economy and Finance. Exchange controls were liberalized several years ago. As a result, only a few, simple reporting requirements are now imposed, primarily for statistical purposes.

Restrictions on the deduction of financial expenses. In general, net interest expenses exceeding 30% of earnings before interest, tax, depreciation and amortization (EBITDA), with some adjustments, may not be claimed as a deduction for tax purposes in the year of their accrual (with some exceptions, such as a minimum allowance of EUR1 million per year). The excess may be carried forward indefinitely. This restriction applies regardless of whether the interest is paid to a related party or an unrelated lender. In addition, as mentioned in General in Section C, interest expense on intragroup financing related to the acquisition (or equity increase) of participation in group entities is disallowed unless valid business reasons for such transactions are proven.

Additional rules for leveraged acquisitions limit the deductibility of interest on loans to purchase shares (acquisition debt) to 30% of the operating profit of the acquiring entity. The limitation applies if the acquired and acquiring entities are merged within a four-year period or if new entities join the tax group in which the acquiring and acquired entity are included. Under an escape clause in the law, the limitation does not apply in the year of the acquisition if the acquisition debt does not exceed 70% of the consideration paid for the shares. In the following years, the limitation will not apply if the acquisition debt is proportionally repaid within an eight-year period until it is reduced to 30% of the total consideration.

Anti-avoidance legislation. To prevent fraud, the tax code contains several anti-avoidance measures in various chapters. Substance-over-form principles apply.

Controlled foreign companies. Under controlled foreign company (CFC) rules contained in the corporate income tax law, Spanish resident companies must include in their tax base certain passive income derived by their foreign subsidiaries if certain control and effective taxation conditions are satisfied. Significant exceptions apply to these rules.

These rules do not apply to EU-controlled subsidiaries if the Spanish shareholder proves that the incorporation of the foreign entity was undertaken for sound business reasons and such entity carries on business activities.

Effective from 1 January 2015, certain amendments to CFC rules were introduced. These include, among others, additional substance requirements to be met by the foreign subsidiary in order to avoid the imputation of the foreign low-taxed income.

Transfer pricing. Spanish law includes the arm’s-length principle and the requirement of documenting all related-party transactions. The arm’s-length principle applies to all transactions carried out by taxpayers with related parties. The following are the principal aspects of the law:
• Taxpayers must use arm’s-length values in their tax returns. As a result, taxpayers bear the burden of proof on transfer-pricing issues.
• OECD guidelines and pricing methodology apply.
• The law provides for secondary adjustments. Under this measure, if the agreed value in a transaction differs from the normal market value, the difference between the values is recharacterized by following a substance-over-form approach. In particular, for a transaction between a company and a shareholder, the difference (propportionally to the participation in the entity) is considered a dividend if such difference is in favor of the shareholder or a contribution by the shareholder to the entity’s equity if the difference is in favor of the entity.
• Advance Price Agreements (APAs) may be negotiated. They apply to the current year, the preceding four years and the following four years. The law allows APAs to have retroactive effect within the statute-of-limitations period.
• Statutory documentation requirements in line with the guidelines of the EU Joint Transfer Pricing Forum entered into force on 19 February 2009. This documentation is required to support the taxpayer’s transfer-pricing policy regarding domestic and international transactions.
• Penalties and delay interest may be imposed. If the documentation is correct, the tax authorities do not impose a penalty with respect to a transfer-pricing assessment. However, the absence (or incompleteness) of documentation is subject to penalties, even if no adjustments are assessed.

The Spanish Corporate Income Tax Act provides the following three exceptions to the obligation to prepare statutory transfer-pricing documentation:
• When the transaction takes place between entities that form part of a Spanish tax consolidated group
• When the transaction is carried out between members of an Economic Interest Grouping (Agrupaciones de Interés Económico) or a Temporary Business Alliance (Uniones Temporales de Empresas)
• When the transaction is carried out within the scope of a public stock offering
• When transactions with the same entity do not exceed EUR250,000 per year

Simplified documentation requirements apply to entities with a turnover that does not exceed EUR45 million, computed at the level of the mercantile group.

Some specified transactions must be documented in any case, such as transactions performed with group “related parties” that are tax resident in a tax-haven jurisdiction. Article 18.2 of the Spanish Corporate Income Tax Act provides a definition of “related parties.”

In addition, transactions performed with related or unrelated residents of listed tax havens must comply with the arm’s-length principle and are subject to statutory documentation requirements.

New Country-by-Country (CbC) Reporting obligations apply to Spanish tax resident groups if the consolidated group’s net turnover in the immediately preceding fiscal year exceeded
EUR750 million. This obligation may also apply in certain cases to subsidiaries of foreign groups.

As of 1 January 2016, new transfer-pricing documentation rules require more detailed information (for example, intangible assets, financial activities, management structure, main competitors and reconciliation of data used in economic analyses with annual financial statements).

**VAT Immediate Supply of Information System.** Effective from the 2017 fiscal year, businesses and professionals who are required to file VAT returns on a monthly basis are subject to the new VAT Immediate Supply of Information System. Businesses and professionals who are required to file monthly returns if they meet any of the following conditions:

- They have revenue exceeding EUR6 million.
- They are included in the monthly refund regime.
- They are applying the VAT grouping provisions.

Under the new system, information related to all invoices issued or received, customs documents and accountancy documents, if any, must be transmitted electronically and almost immediately to the Spanish tax authorities so that the tax authorities have all of the information relating to the operations carried out by VAT taxpayers in real time. Failure to comply with this filing system is subject to penalties.

**F. Treaty withholding tax rates**

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

Spain has signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (Multilateral Instrument, or MLI) and included several of the agreements listed below in their list of covered tax agreements under Article 2(1)(a)(ii) of the MLI. The text and interpretation of such agreements may be affected by the MLI dispositions.

</table>

(a) Distributions by Spanish subsidiaries to parent companies in EU member states are exempt from withholding tax if the parent company owns at least 5% of the subsidiary for an uninterrupted period of at least one year and if certain other requirements are met. The one-year holding period requirement may be satisfied at the date of the distribution or subsequent to such date. An anti-avoidance provision also applies in situations in which the ultimate shareholder is not an EU resident.

(b) Interest paid to an EU resident without a permanent establishment in Spain is exempt from tax if the EU country is not on the Spanish tax haven list.

(c) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 75% of the capital of the distributing company. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 10% of the capital of the distributing company.

(d) Certain interest payments are not subject to withholding tax.

(e) The treaty withholding rate tax is increased to 15% in certain circumstances if the recipient is not a corporation or if the shareholding does not exceed a certain percentage.

(f) A 14% rate applies to royalties paid for artistic, scientific or literary works.

(g) Interest paid to the government or central bank of the other contracting state is exempt from tax if the recipient is the beneficial owner of the interest. The government of the state of the payer may authorize an exemption for interest paid to a beneficial recipient other than the government or central bank of the other contracting state.

(h) See Section B.

(i) The treaty provides for a tax sparing in favor of Armenia for the five years following the entry into force of the treaty.

(j) The 0% rate applies if all of the following conditions are satisfied:
- The recipient of the dividends is the beneficial owner of the income.
- The direct or indirect shareholding is equal to or higher than 25%.
- A minimum two-year shareholding period has been fulfilled.
- Dividends are not subject to tax in the state of residency of the recipient of the dividends.

(k) The 5% rate applies to royalties for copyrights of literary, artistic or scientific works (including films and videotapes used for its reproduction on television or radio).

(l) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 25% of the capital of the distributing company.
The 0% rate applies if all of the following conditions are satisfied:

- The recipient of the dividends is a corporation.
- The shareholding is equal to or higher than 25%.
- Exemption is allowed under the rules of the state of residence of the subsidiary.

The rate is 15% if the effective beneficiary is a resident of the other contracting state.

The 5% rate applies if the beneficial owner of the dividends is a company that directly controls at least 20% of the capital of the distributing company.

A 10% rate applies to interest paid to financial institutions for long-term (10 or more years) loans for goods or equipment.

A 10% rate applies to royalties paid for copyrights of literary, artistic or scientific works (including films and videotapes produced by a resident of a contracting state).

A 5% rate applies if the effective beneficiary of the dividends is a corporation that controls at least 20% of the capital of the distributing company.

The rate is 15% if the effective beneficiary is a resident of the other contracting state.

A 5% rate applies if the beneficial owner of the dividends is a company that directly controls at least 20% of the capital of the distributing company.

A 10% rate applies to interest derived from loans granted by banks and insurance companies, from bonds and securities traded on a recognized stock exchange and from sales on credit of machinery and equipment.

The 5% rate applies to royalties paid for the use of industrial, commercial and scientific equipment.

The 0% rate applies if the dividends are received by a company that holds a direct or indirect shareholding of at least 20% in the capital of the distributing company.

The protocol includes a most-favored-nation clause under which Costa Rica automatically will provide similar tax treatment to Spanish residents if Costa Rica enters into a treaty with a third country that enters into force and that offers more beneficial tax treatment for dividends, interest, royalties and/or income from personal independent services.

The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 20% of the capital of the distributing company.

The 5% rate applies to loans with a maturity exceeding five years.

Certain copyright royalties are exempt.

Spain honors the Czechoslovakia treaty with respect to the Czech and Slovak Republics.

A 5% rate applies to certain loans.

A 5% rate applies to royalties paid for copyrights of literary, dramatic, musical or artistic works (excluding motion picture films and television films or videotapes).

A 12% rate applies if the shareholding is less than 25%.

The 12% rate applies if the shareholding is less than 50%.

A 5% rate applies to royalties paid for industrial, commercial or scientific equipment.

No withholding tax is imposed if the recipient is a company that is subject to corporate income tax and that holds a participation of at least 10% in the payer.

The 7% rate applies if the shareholding is at least 50%. The 10% rate applies if the shareholding is at least 25%, but less than 50%. The 15% rate applies if the shareholding is less than 25%.

The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 10% of the capital of the distributing company.

The withholding tax rate is 5% if the effective beneficiary of the dividends is a corporation and if the shareholding is equal to or higher than 25%. The withholding tax rate is 10% for other dividends.

Withholding tax is not imposed if the recipient is the beneficial owner of the interest and if the interest is beneficially owned by a contracting state, or a political subdivision or local authority of the contracting state.

The 20% rate applies to certain royalties and technical services.

The 10% rate applies if the shareholding is less than 20%.

A 5% rate applies to royalties paid for copyrights of musical compositions and literary, dramatic or artistic works. An 8% rate applies to royalties paid for the following:

- Motion picture films
- Films, tapes and other means of transmission or reproduction of sounds
- Industrial, commercial or scientific equipment
- Copyrights of scientific works
A 5% rate applies to interest paid with respect to sales of industrial, commercial, scientific equipment, or on loans from financial institutions. A 0% rate applies to interest paid to the government or central bank of the other contracting state.

A 5% rate applies to royalties paid for copyrights of musical compositions, and literary, dramatic or artistic works, and to amounts paid for the use of industrial, commercial or scientific equipment.

The rate is 4% for royalties paid for copyrights of literary, dramatic, musical or artistic works (excluding motion picture films and television films or videotapes).

The 10% rate applies if the shareholding is less than 25%.

The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly or indirectly controls at least 10% of the capital of the distributing company.

The treaty withholding tax rate is increased to 10% in certain circumstances if the recipient is not a corporation or if the shareholding does not exceed a certain percentage.

A 5% rate applies if the effective beneficiary of the dividends is a corporation that controls at least 25% of the capital of the distributing company.

A 15% rate applies if the shareholding is less than 10%.

A 0% rate applies if the beneficial owner holds at least a specified percentage of the share capital of the distributing entity and if certain other conditions are met.

A 5% rate applies to income derived from the rendering of technical services.

A 5% rate applies if the shareholding in less than 25%.

The withholding tax rate is 10% if the effective beneficiary of the interest is a financial entity.

The 0% rate applies if the dividends are received by a company that holds directly or indirectly a shareholding of at least 50% in the capital of the distributing company. A 5% rate applies if the direct shareholding is more than 25% but less than 50%. Otherwise, a 10% rate applies.

The withholding rate is 5% if the recipient is not subject to Dutch tax on the dividends and if the 10% rate would otherwise apply.

The 5% rate applies if the beneficial owner of the dividends is a company that has owned directly for the six-month period ending on the date on which entitlement to the dividends is determined at least 50% of the voting shares of the distributing company. The 7.5% rate applies if the beneficial owner of the dividends is a company that has owned directly for the period of six months ending on the date on which entitlement to the dividends is determined at least 25% of the voting shares of the distributing company.

Certain interest payments are not subject to withholding tax.

Tax treaty provisions do not apply if the dividend, interest or royalties paid by a Panamanian resident are sourced in Spain or in a country that has not entered into a tax treaty with Spain and if such income has not been effectively taxed in Panama.

The 0% rate applies if the beneficial owner of the dividends is a capital company that directly controls at least 80% of the capital of the distributing company and if certain conditions are satisfied. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 40% of the capital of the distributing company.

A 10% rate applies to interest paid with respect to sales of industrial equipment or publicly traded bonds.

A 20% rate applies to royalties paid with respect to films, television or radio. A 10% rate applies to royalties derived in preferred areas of activities.

A 0% rate applies to royalties paid for copyrights of literary, dramatic, musical or artistic works (excluding motion picture films and television films or videotapes).

The withholding tax rate is 5% if the effective beneficiary of the dividends is a company that has invested at least ECU100,000 in the share capital of the payer and if the dividends are exempt from tax in the other contracting state. The withholding tax rate is 10% if only one of these requirements is met. The withholding tax rate is 15% for other dividends.

No withholding tax is imposed on interest paid to and beneficially owned by financial institutions with respect to long-term (seven years or more) loans and certain other debts.

A 0% rate applies if the beneficial owner of the dividends is a company that controls at least 25% of the capital of the distributing company.

A most-favored-nation clause applies.
The 5% rate applies to royalties paid for the use of copyrights of literary, artistic or scientific works, including cinematographic films or films or tapes used for radio or television broadcasting, but excluding computer software. The 10% rate applies to royalties paid for the use of patents, trademarks, designs or models, plans, secret formulas or processes and computer software, for the use of, or the right to use, industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

The 5% rate applies if the distributing company is a stock-listed real estate investment company and if the beneficial owner of the dividends directly or indirectly controls less than 10% of the capital of the distributing company.

A 0% rate applies to interest paid to financial institutions for long-term (seven years or more) loans.

A limitation-of-benefits clause in the treaty may apply.

A 5% rate applies to loans over seven years.

A 5% rate applies to certain dividend distributions.

A 10% rate applies to interest derived from loans granted by banks or in connection with sales on credit of merchandise or equipment.

Spain honors the double tax treaty with the former USSR with respect to Belarus, Kyrgyzstan, Tajikistan, Turkmenistan and Ukraine.

A 5% rate applies if the beneficial owner of the dividends is a corporation that holds directly at least 10% of the entity paying the dividends.

A 0% rate applies if the beneficial owner of the dividends is a company that directly controls at least 25% of the capital of the distributing company.

The 5% rate applies to royalties paid for copyrights of literary, artistic or scientific works.

A 4.95% rate applies to interest paid to financial institutions.

The 0% rate applies if the beneficial owner of the dividends is a company that directly controls at least 10% of the capital of the distributing company.

The 0% rate applies if the dividends paid to a company the capital of which is wholly or partly divided into shares and that directly controls at least 10% of the capital of the distributing company or if the dividends paid to a pension fund.

The 4.9% applies to interest paid on loans of any kind granted by banks or other financial institutions, including investment banks, savings banks and insurance companies, as well as to interest paid on bonds and other debt instruments that are traded regularly and substantially on a recognized stock exchange. The 10% rate applies in all other cases.

The 4.9% applies to interest paid on loans of any kind granted by banks or other financial institutions, including investment banks, savings banks and insurance companies, as well as to interest paid on bonds and other debt instruments that are traded regularly and substantially on a recognized stock exchange. The 10% rate applies in all other cases.

The 3% rate applies to copyright royalties with respect to (journalistic) news. The 5% rate applies to copyright royalties received by the author or his or her heirs with respect to literary, theater, musical or artistic works. The 10% rate applies to royalties relating to patents, designs or models, computer software, know-how and technical assistance. The 15% rate applies in all other cases.
of the company paying the dividends or is a public body holding at least 5% of the stock in the company paying the dividends.

(kkkk) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds at least 25% of the capital of the company paying the dividends. The 5% rate applies in all other cases.

(llll) Sixty percent of the gross amount of royalties for the right to use industrial, commercial or scientific equipment is subject to tax.

Spain is in the process of negotiation, ratification or signature of its tax treaties with Azerbaijan, Bahrain, Belarus, Cape Verde, Montenegro, Namibia, Peru, Syria and Ukraine. Spain is negotiating agreements on the exchange of tax information with Bermuda, the Cayman Islands, the Cook Islands, Guernsey, the Isle of Man, Jersey, the Macau Special Administrative Region (SAR), Monaco, St. Lucia, St. Vincent and the Grenadines.

Spain has agreements on the exchange of tax information with Andorra, Aruba, Bahamas, Curacao, San Marino and Sint Maarten.

The agreement between Spain and the United States for the improvement of international tax compliance and the implementation of the Foreign Account Tax Compliance Act entered into force on 1 July 2014.

A new tax treaty with the United States, which was signed in 2013, is pending ratification after negotiation and signature.

A new tax treaty with China (mainland), which was signed in 2018, is pending ratification after negotiation and signature.

Spain is renegotiating its tax treaties with Austria, Belgium, Finland, India, the Netherlands and Romania.
This chapter reflects amendments contained in the new Inland Revenue Act. These amendments are effective from 1 April 2019, unless specified otherwise. The recent budget proposals announced in March 2019 include further amendments as stated in Section G. At the time of writing, these proposals had not yet been legally enacted.

(a) This is the standard rate. For other rates, see Section B.
(b) Capital gains tax is reimposed in Sri Lanka, effective from 1 April 2018.
(c) This tax, which is a final tax, is imposed on dividends paid to residents and nonresidents.
(d) The 5% withholding tax applies to interest paid on deposits. Companies can claim the 5% withholding tax as a credit against their annual income tax liability. The 14% withholding tax must be deducted and remitted to the Inland Revenue Department when making payments of interest to persons outside Sri Lanka on loans granted by companies, partnerships or other bodies of persons outside Sri Lanka other than foreign banks or financial institutions.
(e) Withholding tax at a rate of 14% must be deducted and remitted to the Inland Revenue Department when making payments of royalties to persons outside Sri Lanka.
(f) See Relief for losses in Section C.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in Sri Lanka are subject to income tax on their worldwide income. Nonresident companies are subject to tax on their profits and income derived from Sri Lankan sources. A company is considered to be a resident company if its registered or principal office is in Sri Lanka or if the control and management of its business are exercised in Sri Lanka.

Rates of corporate income tax. The standard rate of corporate income tax is 28%.

A 14% rate of corporate income tax applies to profits and income derived by the following:
- Small and Medium Enterprises (defined as persons conducting business solely in Sri Lanka that do not have an associate that is an entity and that have gross annual turnover of less than LKR500 million)
- Companies “predominantly” conducting an agriculture business
- Companies “predominantly” conducting a business of exporting goods and services
- Companies “predominantly” providing educational services
- Companies “predominantly” engaged in the promotion of tourism
- Companies “predominantly” providing information technology services
- Charitable institutions

For purposes of the above bullets, “predominantly” means that the specified activities account for 80% or more of the gross
income of the company. If this condition is not satisfied, the standard rate of 28% applies.

Gains derived from the realization of investment assets by companies are taxed at a rate of 10%.

A 40% rate of corporate income tax applies to profits and income derived from the businesses of tobacco, liquor, and betting and gaming.

A remittance tax of 14% is imposed on the remittance of profits by nonresidents.

**Tax incentives.** Tax holidays are not available.

Tax incentives are provided through enhanced capital allowances for new companies in addition to the normal capital allowances.

The following are the enhanced capital allowances:

- An enhanced capital allowance of 200% is granted for investment exceeding USD3 million in depreciable assets other than intangible assets in the Northern Province.
- An enhanced capital allowance of 100% is granted for investment exceeding USD3 million but less than USD100 million in depreciable assets other than intangible assets in other provinces.
- An enhanced capital allowance of 150% is granted for investment exceeding USD100 million in depreciable assets other than intangible assets in other provinces.
- An enhanced capital allowance of 150% is granted for investment exceeding USD250 million in assets or shares of a state-owned company.

The enhanced capital allowance must be claimed in the year of assessment of the investment.

Any unrelieved loss arising from the enhanced capital allowance must be claimed within 10 years. This period is extended to 25 years if the investment exceeds USD1 billion.

The following temporary concessions apply for the three years of assessment after the effective date (1 April 2018) of the new Inland Revenue Act:

- An enhanced capital allowance of 200% is granted for an investment up to USD3 million in computers, data-handling equipment, specified plant and machinery, or buildings and structures in the Northern Province.
- An enhanced capital allowance of 100% is granted for an investment up to USD3 million in computers, data-handling equipment, specified plant and machinery, or buildings and structures in other provinces.
- Gains and profits (surplus) distributed to a policyholder of a life insurance company is subject to a reduced income tax rate of 14%.
- A headquarters or regional head office, as specified by the Commissioner General of Inland Revenue, established in Sri Lanka on or after 1 October 2017 is exempt from income tax.
- A company entering into a standardized power purchase agreement regarding renewable energy on or before 10 November 2016 with the Ceylon Electricity Board is subject to a reduced income tax rate of 14%.
• R&D expenses are 100% deductible from business income.
• A company providing information technology services may claim an additional deduction in computing business income equal to 35% of the total amount of payments that are included in computing the taxable income of its employees other than company directors. The conditions for this deduction are 80% of gross income from the business of providing information technology services, at least 50 employees during the whole year and no entitlement to enhanced capital allowances. Any unrelieved losses resulting from the additional deduction may not be claimed in any succeeding years of assessment.

The following items, among others, are exempt from income tax:
• Any sums received from the President’s Fund or National Defence Fund
• Prizes received as awards made by the President of Sri Lanka or by the government in recognition of an invention or research.

**Capital gains.** Capital gains tax is re-imposed on gains from the realization of investment assets (capital assets held as part of an investment). In computing capital gains, the cost of an investment asset held as at 30 September 2017 is the market value of such asset at that time. Specific exclusions and exemptions, such as gains on sales of listed shares, are provided.

**Administration.** The normal fiscal year (year of assessment) runs from 1 April to 31 March. A company may select a different fiscal year if it obtains prior permission from the Department of Inland Revenue. Income tax is payable in four quarterly installments, which are due one and a half months after the end of each quarter. A company must file the final tax return by 30 November (self-assessment). Any balance of income tax due must be paid by 30 September following the end of the fiscal year.

If a company fails to file a return, the Assistant Commissioner can issue a Default Assessment at any time. Filing a return after a Default Assessment is issued is not considered to be a self-assessment.

The Assistant Commissioner also has the power to issue an Advance Assessment, usually in advance of the due date of the return.

The Assistant Commissioner also has the authority to revise a previously issued assessment or make an additional assessment.

For a self-assessment return, an amended or additional assessment must be filed within 30 months from the date of filing of the self-assessment return.

For any other assessments (default or advance), the amended or additional assessment must be filed within 30 months from the date on which the Assistant Commissioner issued the original assessment.

In the case of fraud, no time limit applies for the issuance of an assessment.

Separate sets of accounts must be maintained for different activities of a trade or business that are exempt or subject to tax at different tax rates.
A refund claim for a year of assessment must be claimed in writing within four years after the date of payment or, if made on the Commissioner General’s initiative, within the specified time period.

The Commissioner General may make a public ruling setting out the Commissioner General’s interpretation of the application of the Inland Revenue Act.

A taxpayer may apply for a private ruling setting out the Commissioner General’s position with regard to a transaction entered into or proposed to be entered into by a taxpayer.

**Dividends.** The definition of a “dividend” is broadened. It now includes the following:

- A payment derived by a member from a company, whether received as a division of profits, in the course of a liquidation or reconstruction, in a reduction of capital or in a share buy-back or in other circumstances
- Capitalization of profits (bonus shares)

The definition of “dividends” excludes a payment to the extent that any of the following circumstances exists:

- It is matched by a payment made by a member to the company.
- It is debited to capital, share premium or similar account.
- It constitutes a final withholding payment.
- It is otherwise included in calculating the income of the member.

A dividend tax of 14% (also known as the Dividend Tax at Source) is withheld from dividends distributed out of profits included in taxable income. The 14% tax is the final tax on dividends paid to residents and nonresidents.

The company has no liability to dividend tax other than as a withholding tax agent.

Dividends paid by a resident company to a resident or nonresident company are not included in the taxable income of the recipient if any of the following apply:

- A withholding has been made for dividend tax.
- The dividend is exempt from income tax.
- The dividend consists of any part of the amount of dividends received by the payer from another resident company.

Dividends received from nonresident companies are exempt from income tax if the recipient has a participation of at least 10% in the value of the shares of the foreign company.

Dividends distributed out of dividends received from nonresident companies outside Sri Lanka are liable to dividend tax.

**Interest.** The following are significant aspects of the taxation of interest:

- Withholding tax at a rate of 5% is imposed on interest paid to companies on bank deposits. Companies may offset this withholding tax against their annual income tax liability.
- Withholding tax at a rate of 5% is imposed on interest paid to residents and nonresidents on corporate debt securities.
- No withholding tax is imposed on interest payments on government securities, bonds and similar instruments issued by the Central Bank of Sri Lanka.
• No withholding tax is imposed on amounts equal to interest or discounts paid to nonresident persons or to licensed commercial banks in Sri Lanka by the issuer of a sovereign bond denominated in a foreign currency issued after 1 October 2008.

Foreign tax relief. Foreign tax relief is available under various double tax treaties. In general, Sri Lankan tax payable (other than dividend tax) is allowed as a credit against any foreign tax computed by reference to the same income. Similar relief is available for foreign tax paid in the other treaty country. However, the benefit is not available to a body that is a resident of the other state if 50% or more of the underlying ownership is held by an individual or individuals who are not residents of the other state. This restriction does not apply if the resident of the other state is a company listed on a stock exchange in that other state.

Foreign tax credits must be calculated for each source (employment, business, investment or other source) and for each gain from the realization of investment assets. For each calculation, the credit cannot exceed the amount calculated by applying the average rate of Sri Lankan income tax to the person’s assessable foreign income.

Conditions apply for the claiming of such credit.

C. Determination of trading income

General. The assessment is based on financial statements prepared in accordance with generally accepted accounting principles.

All expenses incurred during the year in the production of income are allowable unless specifically prohibited. In addition, certain expenses that are specifically authorized are permitted as deductions. Nondeductible expenses include, but are not limited to, the following:
• Capital expenditures
• Personal and domestic expenses
• Expenditure incurred in deriving exempt amounts
• Final withholding tax payments
• Outlays or expenses for entertainment
• Payments subject to withholding tax if withholding tax has not been paid to the Inland Revenue Department

The following expenses, among others, are deductible:
• Interest expenses if money was borrowed under a debt obligation and used during the year to acquire an asset that is used in the production of income (see next paragraph)
• Repairs and improvements, whether or not capital, limited to 5% of the written-down value of buildings and 20% of the written-down value of other assets
• Research and development expenses (including capital expenditure incurred through an institution in Sri Lanka)
• Agricultural startup expenses such as opening up land for cultivation or animal husbandry, purchase of livestock and cultivation of land

Interest expenses incurred (other than by financial institutions) on the excess of the total debt obligations under financial instruments over the statutory limit (three or four times the amount of share capital and reserves) is not deductible in the year of assessment in which they are incurred. Any unclaimed amount
can be carried forward to be claimed in the next six years of assessment.

**Qualifying payments.** Companies may claim a deduction for qualifying payments, which are donations to the government and approved charities.

Donations to the government in cash are deductible in full.

Qualifying payment deductions for donations to approved charities established for the provision of institutional care for the sick and needy are limited to LKR500,000 or one-fifth of taxable income, whichever is less.

Amounts that cannot be deducted in a year of assessment as qualifying payments cannot be carried forward.

**Inventories.** Inventories are normally valued at the lower of historical cost or net realizable value. For agricultural produce, inventories are valued at subsequent sale prices. Cost is usually determined on a first-in, first-out (FIFO) formula or a weighted average cost formula.

**Provisions.** In general, no deductions are allowed for reserves or provisions. However, provisions may be deducted if the expenses provided for are paid within three years after the year of assessment.

For banks, the deductibility of a specific provision for bad debts is subject to the approval of the Commissioner General, based on the reasonableness of the provision.

**Depreciation.** Depreciation allowances are granted to the owner of the asset from the fiscal year in which the asset is first used. The allowance is computed using the straight-line method at the following rates, which are effective from 1 April 2018.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>5 (a)</td>
</tr>
<tr>
<td>Plant and machinery or equipment</td>
<td>20</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>20</td>
</tr>
<tr>
<td>Furniture</td>
<td>20</td>
</tr>
<tr>
<td>Computer hardware</td>
<td>20</td>
</tr>
<tr>
<td>Intangible assets (excluding goodwill)</td>
<td>5/20 (b)</td>
</tr>
</tbody>
</table>

(a) This rate applies to buildings, structures and similar works of a permanent nature.

(b) If the intangible asset has an indefinite useful life, the rate is 20%.

Depreciation allowances are generally subject to recapture on the sale of an asset to the extent that the sales proceeds exceed the tax value after depreciation. Any amounts recaptured are subject to tax at the regular corporate tax rate. Losses on the sale of a depreciable asset may be claimed as business losses.

**Relief for losses.** Business losses can be deducted in full in determining the taxable income of a company. Any balance may be carried forward for six years of assessment.

Losses can be offset against business income or investment income, subject to restrictions.
Losses relating to reduced rates can be deducted from income taxable at the same rate or a lower rate and income from exempt activities.

Losses from exempt activities can be set off only against exempt income.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax (VAT); imposed on all goods and services supplied in, or imported into, Sri Lanka and on retail and wholesale trade, excluding essentials, other than certain exempt items including the supply and import of motor vehicles, cigarettes and liquor (effective from 25 October 2014, these items are liable to the Excise [Special Provisions] Duty, which replaces VAT at the point of import); sales of condominium units are liable to VAT, effective from 1 April 2018; liability threshold for VAT is LKR12 million per year or LKR3 million per quarter</td>

  Employers’ Trust Fund; paid by employer  3%

E. Miscellaneous matters

Foreign-exchange controls. Foreign-exchange regulations are governed by the Exchange Control Act No. 12 of 2017, effective from 20 November 2017, and other directives issued by the Central Bank of Sri Lanka. The regulations include those discussed below.

Any licensed commercial bank as an authorized dealer can open the following types of accounts in Sri Lanka:
- Inward Investment Accounts (IIAs)
- Outward Investment Accounts (OIAs)
- Capital Transaction Rupee Accounts (CTRAs)

Persons outside Sri Lanka may engage in specified capital transactions in Sri Lanka that require remittance of foreign exchange into Sri Lanka, such as the following:
- Investing
- Acquiring all classes of shares in companies not incorporated in Sri Lanka and listed on the Colombo Stock Exchange
- Granting loans through debt securities issued in foreign currency or Sri Lankan rupees by licensed, commercial banks, finance companies and specialized banks

Exclusions include the acquisition of shares of a company proposing to carry on businesses of pawn broking, coastal fishing or retail trade if the capital contributed by persons resident outside Sri Lanka is less than USD5 million. In such cases, investments are limited to 40% of the stated capital or if special approval is granted by the Board of Investment of Sri Lanka for a higher percentage.

Overseas companies registered under the Companies Act of Sri Lanka may carry on the following business in Sri Lanka:
- Any commercial trading or industrial activity provided that permission has been obtained from the government of Sri Lanka
- Any non-commercial, non-trading or non-industrial activity, such as activities carried on by a liaison office, representative office or similar office

Overseas companies cannot carry on undertakings for money lending, pawn broking or retail trade if the capital contributed by a person resident outside Sri Lanka is less than USD5 million, coastal fishing or other prohibited activities as specified in the
regulations. Permissible activities are also set out in the regulations.

Overseas profits, royalties, franchise payments and similar payments may be remitted out of Sri Lanka net of tax through the IIA of the parent company through which the investments were routed.

The following capital transactions are permitted through an authorized dealer:

• Repatriation of sales proceeds of immovable property held by residents outside Sri Lanka, subject to conditions.

• For migrant transfers, an initial migration allowance of USD200,000 per individual aged 18 years and above, an annual migration allowance of USD30,000 transferable after a lapse of 12 months after utilization of the initial allowance subject to directions issued by the Central Bank of Sri Lanka and an annual allowance of USD30,000 with respect to the proceeds to a foreign national from the sale of inherited property in Sri Lanka.

• Granting of loans and advances in Sri Lanka in foreign currency or in Sri Lanka rupees to residents outside Sri Lanka. These are permitted to Sri Lankans residents outside Sri Lanka on a permanent residency visa in another country, dual citizens and Sri Lankans employed abroad (other than emigrants), subject to conditions in the regulations.

A tax-clearance certificate is required for outward remittances other than for specific remittances, which include, among others, the following:

• Remittances of sales proceeds from quoted company shares owned by nonresidents in companies in Sri Lanka

• Dividends paid to nonresidents if withholding tax on such dividends is paid

• Foreign investments made by resident companies

• Capital repayments of foreign loans obtained by resident companies

• Remittances by export companies with respect to registration of trademarks outside Sri Lanka

Transfer pricing. Under the Inland Revenue Act, if significant pricing discrepancies are considered “artificial,” the tax authorities may determine a commercially acceptable price for tax purposes. Profits and losses from transactions between associated undertakings are determined taking into account the arm’s-length principle.

Currently, transfer-pricing regulations apply to local transactions exceeding LKR50 million and to foreign transactions exceeding LKR100 million.

Advance pricing agreements may be entered into with the Department of Inland Revenue with regard to “international transactions.” The arm’s-length price is determined using methods prescribed for this purpose.

A permanent establishment in Sri Lanka is recognized as a distinct and separate entity from its head office and related branches in Sri Lanka.
The Commissioner General of Sri Lanka can specify safe harbor rules to simplify transfer-pricing compliance and administration.

A specific transfer-pricing penalty regime is introduced for the following:
- Failure to maintain required documents: 1% of the aggregate value of transactions with associated enterprises
- Not furnishing required documents: an amount not exceeding LKR250,000
- Nondisclosure of required information relative to transactions with associated persons: not exceeding 2% of the aggregate value of transactions with associated enterprises
- Failure to submit documents by due dates: an amount not exceeding LKR100,000
- Concealment of income: 200% of amount of additional tax

The basis for charging penalties for the types of noncompliance referred to above are 1% of aggregate transaction value of LKR250,000, 2% of aggregate transaction value of LKR100,000 and 200% of incremental tax on the transfer-pricing adjustments.

No tax exemption or benefit is provided on taxable income enhanced as a result of transfer-pricing adjustments.

**Debt-to-equity rules.** For group companies, a debt-to-equity ratio of 3:1 applies to manufacturing companies, and a 4:1 ratio applies to other types of companies. Interest paid on loans in excess of the debt-to-equity ratio is not deductible for tax purposes.

**Purchase of land by foreigners.** The purchase of land by foreign companies and companies incorporated in Sri Lanka with direct or indirect foreign shareholding exceeding 50% is prohibited, except for quoted public companies. It is proposed that the restriction on the ability of foreigners to purchase condominiums below the fourth floor be removed.

**F. Treaty withholding tax rates**

The following table lists the maximum withholding tax rates under Sri Lanka’s double tax treaties.

(a) The lower rate applies to royalties for copyrights and cinematographic films. The higher rate applies to other royalties.
(b) The 10% rate applies if the recipient holds at least 25% of the payer. The 15% rate applies to other dividends.
(c) The 10% rate applies to interest received by a financial institution. The 25% rate applies to other interest.
(d) The 10% rate applies if the beneficial owner of the dividends is a company that holds at least 10% of the capital of the payer. The 15% rate applies to other dividends.
(e) The 10% rate applies to interest paid to banks. The 15% rate applies to other interest.
(f) Rent paid for the use of tangible movable property is taxed at the rate of 5%.
(g) See the applicable footnotes in Section A.

Sri Lanka has also entered into agreements covering international air transport with the Hong Kong SAR, Oman, Saudi Arabia and the United Arab Emirates.

**G. Key proposals in 2019 budget**

The following are key proposals in the 2019 budget relating to Section B of this chapter:

- Earnings (gains and interest) from sovereign bonds denominated in both local and foreign currency will be exempt from income tax.
- Interest on Sri Lanka Development Bonds will be exempt (the current exemption is only for sovereign bonds denominated in foreign currency), and the applicability of the exemption will be extended to resident persons.
- Interest paid to any person outside Sri Lanka on a loan granted to any person in Sri Lanka (other than on a loan granted by a nonresident company to its holding company or a subsidiary company in Sri Lanka) will be exempt from income tax.
• Interest income earned by a resident person on Non Resident Foreign Currency (NRFC) Accounts and Resident Foreign Currency (RFC) Accounts will be exempt from income tax for five years.

• With reference to the conditions to be satisfied to ascertain if a company is “predominantly” conducting business to qualify for the 14% concessionary tax rate, the term “gross income” will be defined as total income excluding investment income.

• The budget introduces the following tax incentives:
  — Large-scale projects approved by the Board of Investment of Sri Lanka with an investment of greater than USD100 million in depreciable assets excluding intangible assets will be entitled to 150% capital allowances for 10 years from commercial operations.
  — During the project implementation period or construction period for the above projects, companies will be exempt from the Nation Building Tax, Port and Airport Development Levy, and cess on all project-related items.
  — For investments over USD1 billion, the period for deduction of unrelieved losses will be 25 years, a 0% dividend tax will apply to dividends paid to nonresident persons out of profits sheltered by the enhanced capital allowances referred to above, and expatriate employees will be exempt from withholding tax on employment income during the period that profits are sheltered by the enhanced capital allowances.
  — For investments over USD50 million but less than USD100 million, the additional deduction will be 100% capital allowances and an exemption from the up-front taxes mentioned above will be granted.

The following are key proposals in the 2019 budget relating to Section D of this chapter:

• VAT: The effective date for VAT on the supply of condominium housing units will be revised to 1 April 2019 if the deed of agreement is not executed before 1 April 2019.

• ESC: The ESC on the import of articles or goods other than capital goods prescribed by the Minister of Finance will be 0.5%.

• Nation Building Tax: The rate for foreign payments using electronic fund transfer cards to purchase goods or services including offshore digital services will be 3.5%.

• Betting and gaming levy: The annual levy will be revised to LKR400 million, the levy on gross collection will be revised to 15%, and the casino entrance levy will be revised to USD50 per person.

• Port and Airport Development Levy: The rate on specified items, such as high-technology machinery, will be reduced to 2.5%.

• Luxury tax on vehicles: This tax will be imposed on the Cost, Insurance, Freight (CIF) value, or the manufacturer’s price, in excess of the luxury tax-free threshold with respect to diesel, petrol, hybrid diesel, hybrid petrol and electric vehicles. The luxury tax-free threshold will be LKR3,500,000, LKR3,500,000, LKR4 million, LKR4 million and LKR6 million, respectively, and the tax rates will be 120%, 100%, 90%, 80% and 60%, respectively.

* Losses incurred by companies during their first three years of business may be carried forward indefinitely.

B. Taxes on corporate income and gains

Income tax. Income tax is levied on resident and nonresident companies. Resident companies are those incorporated under Suriname law, even if their management is located abroad, as well as companies incorporated under foreign law, but effectively managed and controlled in Suriname.

For resident companies, income tax is, in principle, levied on the aggregate amount of net income earned from all sources during the company’s accounting period. In principle, nonresident companies are subject to Suriname income tax on the following specific Suriname income items:
• Income derived from a permanent establishment in Suriname
• Income derived from real estate located in Suriname and/or debt claims secured by mortgages on real estate located in Suriname
• Income derived from rights to the profit of an enterprise of which the management is located in Suriname

Nonresident companies are deemed to derive income from a permanent establishment in Suriname if they derive income from, among other activities, acting as an insurer and the exploration and exploitation of natural resources, such as oil and gas.

**Tax rates.** Resident and nonresident companies, including branches of foreign companies, are taxed at a standard effective rate of 36%.

**Tax incentives.** Tax incentives, such as tax holidays, may be granted to new business enterprises engaged in certain activities. Business enterprises engaged in, among other activities, mining and tourism may apply for several tax incentives such as accelerated depreciation and fiscal unity. A written letter of request for the granting of a tax incentive must be filed with the Suriname tax authorities.

**Capital gains.** No distinction is made between the taxation of capital gains and the taxation of other income. All income is taxed at the income tax rate of 36%.

**Administration.** The taxable amount is the profit realized in a fiscal year or calendar year.

The final tax return must be filed within six months after the end of the financial year. Any difference between the tax due based on the provisional return and the tax due based on the final return must be settled at the time the final return is filed. Companies must file a provisional tax return before 15 April of the current calendar year or within two and one-half months after the beginning of the current fiscal year. In principle, this return must show a taxable profit that is at least equal to the taxable profit shown on the most recently filed final tax return.

In principle, the tax due on this provisional tax return must be paid in four equal installments, by 15 April, 15 July, 15 October and 31 December or within two and one-half months after the beginning of the current fiscal year and subsequently by the end of every three months.

An extension of time to file the return and pay the tax later than 31 December is not granted. On request of a company, the Tax Inspector may consent to the reporting of a lower taxable profit than the taxable profit shown on the most recently filed final tax return.

The tax authorities may impose arbitrary assessments if the taxpayer fails to file a tax return. Additional assessments may be imposed if insufficient tax is levied when tax returns are filed or when arbitrary assessments are imposed. Depending on the degree of wrongdoing, a penalty of up to 100% of the additional tax due may be levied.

**Dividends.** In principle, a 25% withholding tax is imposed on dividends distributed by resident companies. Dividends distributed by resident companies to qualifying resident companies are
exempt from Suriname dividend withholding tax. For this purpose, the following are qualifying resident companies:

• Investment companies conducted as limited liability companies that exclusively or almost exclusively aim to acquire, hold, manage and sell shares

• Other Suriname resident companies that continuously held the shares in the payer of the dividends from the beginning of the year from which the distributed profits derive, provided that the recipient and payer are not mutual shareholders (entities that hold shares in one another)

Withholding tax is not imposed on remittances of profits by branches to their foreign head offices.

**Participation exemption.** In principle, dividend distributions received from qualifying resident companies and qualifying non-resident companies are exempt from Suriname income tax. For dividends received from qualifying nonresident companies, the participation exemption applies if both of the following conditions are met:

• The share interest held in the nonresident company is in line with the business activities of the company receiving the dividend distribution. The share interest held in the nonresident company is regarded to be in line with the business activities of the company receiving the dividend distribution if the recipient holds at least 10% of the share capital of the payer of the dividends.

• The nonresident company is subject to tax in its country of residence.

**Foreign tax relief.** No foreign tax relief is available under domestic law. Foreign tax relief may be available under the tax treaties entered into with Indonesia and the Netherlands.

**C. Determination of taxable income**

**General.** Taxable income must be calculated in accordance with “sound business practices.”

In principle, all expenses incurred with respect to the conducting of a business are deductible. However, if expenses exceed normal arm’s-length charges and are incurred directly or indirectly for the benefit of shareholders or related companies, the excess is considered to be a nondeductible profit distribution (dividend).

In principle, interest expenses are deductible for tax purposes if the interest rate is determined on an arm’s-length basis.

No thin-capitalization requirements apply in Suriname under the Suriname tax legislation.

**Inventories.** Inventories are generally valued using the historical-cost, first-in, first-out (FIFO) or weighted-average methods.

**Depreciation.** Depreciation may be calculated using the straight-line, declining-balance or other methods that are in accordance with “sound business practices.”

**Relief for losses.** Losses in a financial year may be carried forward for seven years. No carryback is available. Losses incurred by companies during their first three years of business may be carried forward indefinitely.
D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>

<td>10</td>
</tr>
<tr>
<td>Delivery of services</td>
<td>8</td>
</tr>
<tr>
<td>Import duties</td>
<td>0 to 50</td>
</tr>
</tbody>
</table>

E. Miscellaneous matters

Foreign-exchange controls. The currency in Suriname is the Suriname dollar (SRD).

In general, a foreign-exchange permit is required for the movement of capital with respect to certain transactions including, but not limited to, the following:

- Loans issued by nonresidents of Suriname
- Real estate transactions in which one of the parties is a nonresident of Suriname
- Capital proceeds (profits and dividends)
- Incorporation of a limited liability company in accordance with the laws of Suriname if the company is located in Suriname and if one of the incorporators or shareholders is a nonresident of Suriname
- Purchase or sale of the shares of a limited liability company established in Suriname by a nonresident of Suriname

Specific guidelines for exchange control apply in the case of a petrol agreement: an agreement concluded between a state enterprise and a contractor for the survey, exploration and exploitation of petrol in specified areas of Suriname.

Transfer pricing. In general, intercompany charges must be determined on an arm’s-length basis.

F. Tax treaties

Suriname has entered into tax treaties with Indonesia and the Netherlands. These treaties contain provisions to avoid double taxation between Suriname and these countries regarding taxes on income.

A. At a glance

Corporate Income Tax Rate (%)  21.4
Capital Gains Tax Rate (%)  21.4
Branch Tax Rate (%)  21.4
Withholding Tax (%)
  Dividends  30 (a)
  Interest  0
  Royalties from Patents, Know-how, etc.  0 (b)
  Branch Remittance Tax  0
Net Operating Losses (Years)
  Carryback  0
  Carryforward  Unlimited

(a) This withholding tax applies to nonresidents. In general, no withholding tax is imposed on dividends paid to a foreign company that is similar to a Swedish limited liability company (aktiebolag) and that is not regarded as a tax-haven company. If the payer is a company listed on the stock exchange, an exemption is granted only if the recipient holds at least 10% of the voting rights of the payer for more than one year.

(b) Royalties paid to nonresidents are not subject to withholding tax, but the net income is taxed as Swedish-source income at the normal corporate tax rate. However, under most treaties, the tax rate is reduced. Sweden has enacted legislation implementing the European Union (EU) directive on interest and royalties (2003/49/EC), effective from 1 January 2004. In implementing the directive, Sweden considered the most recent amendments adopted by the European Council.

B. Taxes on corporate income and gains

Corporate income tax. Income from all business activities is aggregated as one source of income — income from business. In principle, corporate income tax (CIT) is levied on all corporate income of a company incorporated in Sweden (resident corporation),
except for certain domestic and foreign dividends (see Dividends). If a Swedish company markets abroad directly or through a branch office, the foreign profits are also subject to Swedish tax, unless a treaty provides otherwise. Nonresident corporations are subject to tax on Swedish-source income only.

**Rate of tax.** The corporate income tax rate is reduced from 22% to 21.4%, effective from 2019 and will be further reduced to 20.6% in 2021. The new corporate income tax rate applies to companies with a fiscal year starting after 31 December 2018. No local income taxes are levied on corporate profits.

**Capital gains.** No separate regime exists for capital gains, but special rules apply to the calculation of the amount of capital gains and losses.

In general, capital gains on shares held for business purposes are exempt from tax (for details regarding shares held for business purposes, see Dividends). Effective from 1 January 2010, the participation exemption regime was expanded to cover interests in partnerships and shares held by partnerships. Corresponding losses on interests in partnerships are nondeductible. However, capital gains on interests in partnerships domiciled outside the European Economic Area (EEA) are not covered by the participation exemption.

Taxable capital gains are aggregated with other corporate business income. Capital gains are subject to tax when transactions are closed, regardless of the holding period or when payment is received.

**Administration.** A company may choose its financial year and is required to file its corporate income tax return by the corresponding due date for the return. A company can submit its return electronically through the Tax Agency’s e-service or via regular mail. The following table provides the dates for filing the corporate income tax return for all financial years.

<table>
<thead>
<tr>
<th>Financial year</th>
<th>Filing of tax return</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper filing</td>
<td>E-filing</td>
</tr>
<tr>
<td>1 February–31 January, 1 March–28 February, 1 April–31 March or 1 May–30 April</td>
<td>1 November 1 December</td>
</tr>
<tr>
<td>1 June–31 May or 1 July–30 June</td>
<td>15 December 15 January</td>
</tr>
<tr>
<td>1 August–31 July or 1 September–31 August</td>
<td>1 March 1 April</td>
</tr>
<tr>
<td>1 October–30 September, 1 November–31 October, 1 December–30 November or 1 January–31 December</td>
<td>1 July 1 August</td>
</tr>
</tbody>
</table>

A financial year may be extended for up to 18 months in certain circumstances, such as for a company’s first or last financial year or if a company changes its financial year.

Advance tax payments are made in monthly installments during the year to which they relate. The final tax assessment must be issued by the Swedish Tax Agency before the 15th day of the 12th
month after the end of the assigned income year. Any balance of tax due must be paid within 90 days after the final tax assessment.

**Dividends.** In general, dividends received from Swedish companies on shares held for business purposes are exempt from tax. Dividend distributions on other shares are fully taxable. Shares are deemed to be held for business purposes if they are not held as current assets and if any of the following conditions is satisfied:

- The shares are unlisted.
- The shares are listed and the recipient of the dividends owns at least 10% of the voting power of the payer for more than one year.
- The shares are held for organizational purposes (important to the business of the holder or a company in the same group as the holder).

Dividends received from foreign companies are exempt from tax if the dividends satisfy the conditions for exemption with respect to dividends on shares in Swedish companies and if the distributing foreign company is equivalent to a Swedish limited liability company (aktiebolag).

Shares held in a company resident in an EU member state are considered to be shares held for business purposes if both of the following conditions are satisfied:

- The company owning the shares holds 10% or more of the share capital of the payer (it is irrelevant whether the shares are held as current assets).
- The payer is listed in Council Directive 2015/121/EU (the Parent-Subsidiary Directive) and is required to pay one of the taxes listed in the directive.

Partnerships may receive tax-exempt dividends to the extent that the dividend would be exempt if received directly by the owners of the partnership interests.

However, if the distributing company is a foreign company that can deduct the dividend payment as interest or as a similar payment, the dividend is not exempt for the Swedish receiving company.

**Foreign tax relief.** Under Swedish law, a Swedish company may usually claim a credit against CIT liability for comparable taxes paid abroad. Sweden applies a so-called “overall” tax credit system. However, certain tax treaties may override internal foreign tax credit rules and instead exempt foreign-source income from Swedish tax.

**C. Determination of trading income**

**General.** Corporate income tax is based on taxable business income computed according to the accrual method of accounting. Taxable business income generally includes all worldwide income earned by a corporation. The major exceptions are capital gains and dividends on shares held for business purposes (see Section B).

**Inventories.** Inventories are valued at the lower of acquisition cost or actual value. Acquisition cost is determined using the first-in, first-out (FIFO) method. An obsolescence provision of 3% is allowed when using acquisition cost to value inventories.
Reserves. A profit allocation reserve allows a 25% deduction of the taxable income for the financial year. Each year’s reserve must be added back to taxable income no later than six years after the year of the deduction. The oldest remaining reserve must always be reversed first. The reserve is based on net income before tax and includes any amounts from the allocation reserve that are added back to taxable income.

Tax is imposed annually on fictitious interest income with respect to the deferred tax amount.

Depreciation. Equipment with a life of three years or less may be written off in the year of purchase. Machinery and equipment may be written off either on a straight-line basis at 20% of cost annually or on a declining-balance basis at 30% of the current tax value. In any one year, the same method must be used for all machinery and equipment. However, companies can switch to a different method each year. The above methods may be used only if the same depreciation method is used in the financial statements. If this condition is not satisfied, a third method, which is also based on the remaining depreciable value, is available. Under this method, companies may choose any percentage, up to a maximum of 25%. The same amortization rules that govern machinery apply to patents, trademarks, purchased goodwill and other intangible property.

Depreciation of buildings is straight-line over the building’s expected life. In general, commercial buildings may be depreciated at 2% to 5% annually, factory buildings at 4% and office buildings at 2%. Buildings subject to greater wear and tear may be depreciated at higher rates. Accelerated depreciation of 2% annually is allowed for new buildings, additions or reconstructions during a period of six years following completion.

If depreciable machinery and equipment are sold, the proceeds reduce the depreciable base for the remaining machinery and equipment.

Relief for losses. Losses may be carried forward indefinitely. Losses may not be carried back.

The tax law includes rules restricting the use of old tax losses of acquired companies.

In general, the possibility of offsetting the losses of an acquired company through a group contribution (see Groups of companies) may in certain circumstances be restricted during a five-year period. The rules also include a restriction under which the amount of losses that may be used is limited to twice the amount paid for the shares. Special restrictions also apply to the possibility of using losses with respect to mergers.

Groups of companies. There is no consolidated treatment whereby all companies in a group may be treated as a single taxable entity. However, rules permit income earned by companies in a corporate group to be distributed within the group through the use of group contributions, which are deductible for the paying company and taxable income for the receiving company. In general, group contributions may be made between Swedish group companies if ownership of more than 90% exists during the entire financial
year. This rule applies even if a foreign parent or subsidiary is in the group structure. A Swedish permanent establishment of a foreign company resident in an EEA state is treated as a Swedish company for purposes of the group contribution rules.

In certain circumstances it is possible for Swedish companies to claim deductions of losses in foreign subsidiaries.

D. Other significant taxes

The following table describes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>

<td>24.26</td>
</tr>
</tbody>
</table>

E. Miscellaneous matters

Controlled foreign companies. A Swedish company that holds or controls, directly or indirectly, at least 25% of the capital or voting rights of a foreign low-taxed entity (controlled foreign company, or CFC) is subject to current taxation in Sweden on its share of the foreign entity’s worldwide profits if the ownership or control exists at the end of the Swedish company’s fiscal year.

Foreign entities are considered to be low-taxed if their net income is taxed at a rate of less than 11.77% (55% of the effective corporate income tax rate) on a base computed according to Swedish accounting and tax rules. However, the CFC rules do not apply to foreign entities that are resident and subject to corporate income tax in jurisdictions on the so-called “white list.” If Sweden has entered into a tax treaty with a jurisdiction on the white list, an additional requirement for the exemption is that the foreign entity and its income must be eligible for treaty benefits.

Anti-avoidance legislation. A general anti-avoidance act applies in Sweden. The act is considered a source of insecurity to taxpayers because it limits the predictability of the tax law. Under the act, a transaction may be adjusted for tax purposes if all of the following conditions are met:

- The transaction, alone or together with other transactions, is part of a procedure that provides a substantial tax advantage to the taxpayer.
- The taxpayer, directly or indirectly, participated in the transaction or transactions.
Taking into account all of the circumstances, the tax advantage can be considered to be the predominant reason for the procedure.

A tax assessment based on the procedure would be in conflict with the purpose of the tax law, as it appears from the general design of the tax rules, the rules that are directly applicable or the rules that have been circumvented through the procedure.

Transfer pricing. The Swedish transfer-pricing regulation is based on the arm’s-length principle. As a result, in general, the transfer-pricing guidelines of the Organisation for Economic Co-operation and Development (OECD) apply. The Swedish Tax Agency may adjust the income of an enterprise if its taxable income in Sweden is reduced as a result of contractual provisions that differ from those that would be agreed to by unrelated parties and if the following three additional conditions are met:

- The party to which the income is transferred is not subject to tax in Sweden.
- It is reasonably established that a community of economic interest exists between the parties.
- It is clear from the circumstances that the contractual provisions were not agreed upon for reasons other than the community of economic interest.

If the conditions under the law are met, the Swedish Tax Agency may increase the income of an enterprise by the amount of the reduction resulting from the contractual provisions that were not determined at arm’s length.

Under Swedish rules, a Swedish company must have formal transfer-pricing documentation in place with respect to cross-border transactions. These requirements have been modified to follow the OECD Base Erosion and Profit Shifting (BEPS) Action 13 recommendations. The new documentation requirements apply to financial years starting after 31 March 2017 and require a Master File/Local File structure under which one Master File is prepared for the multinational enterprise group, and a Local File is prepared for each country where the group has operations. Small and medium-sized multinational enterprise groups are excluded from the obligation to prepare transfer-pricing documentation. The classification of small and medium-sized companies includes the following companies:

- Companies employing less than 250 persons
- Companies having an annual turnover below SEK450 million or a balance-sheet value below SEK400 million

In addition to the above, aggregated transactions with a counterparty that amount to less than SEK5 million per counterparty are deemed “non-essential” and do not need to be documented in the Local File.

Debt-to-equity rules. No thin-capitalization rules exist in Sweden. However, the Companies Act requires the compulsory liquidation of a company if more than 50% of the share capital is lost without replacement of new capital.

Interest limitation rules based on earnings before interest, tax, depreciation and amortization. Sweden introduced major changes to its interest limitation rules as of 1 January 2019, which
supersede the previous rules. The new rules, which are based on earnings before interest, tax, depreciation and amortization (EBITDA), are described below.

**General limitation.** Deductibility of net interest expense is limited to 30% of “Tax EBITDA.” Special rules apply to investment companies and cooperative associations. These include a safe harbor rule to ease the administrative burden on smaller companies. No limitation is imposed on companies with a net interest expense below SEK5 million. The limitation is applied at the group level, meaning that the total deductible within a group under the safe harbor rule is limited to SEK5 million.

It is possible to offset net interest income and expense among companies that can exchange group contributions.

A nondeductible net interest expense can be carried forward for six years, but a change of control would forfeit the carryforward. However, this is not the case if the change of ownership occurs between two companies within the same group. The same applies for qualified mergers and demergers.

The inclusion of interest expense in the tax base of certain assets (for example, inventory, buildings, machinery and equipment, and intangible assets) is not permitted.

**Targeted limitation.** Deduction of interest is subject to further limitations with respect to debt between affiliated companies. Such interest expense is tax-deductible only if the interest would have been subject to a taxation of at least 10%, had the interest been the only income of the beneficial owner. In addition, the beneficial owner of the interest must reside in a state within the EU/EEA, or in a state with which Sweden has a tax treaty.

Even with taxation of at least 10%, the interest expense is still not tax-deductible if the debt relationship has been created “exclusively, or virtually exclusively,” to provide the group with a significant tax advantage.

**Interest definition.** The definition of interest in Swedish tax law includes “costs which are comparable to interest costs,” and in some cases, currency exchange rate effects.

**Hybrid mismatches.** A Swedish company is not allowed to deduct interest expense paid to an affiliated company in another state if the corresponding interest income is not subject to tax in that state and if the reason for this is the result of mismatches in the classification of an entity (opaque/transparent) or a financial instrument (debt/equity) for tax purposes.

**F. Treaty withholding tax rates**

Interest payments are not subject to withholding tax under Swedish internal law. Consequently, the table below provides treaty withholding tax rates for dividends and royalties only. However, under Swedish domestic law, no dividend withholding tax is levied on dividends paid by a Swedish company to a “foreign company,” as defined under Swedish tax law, if it is equivalent to a Swedish limited liability company and certain holding requirements are met. Also, no withholding tax is levied if the EU Parent-Subsidiary Directive applies. In addition, a foreign legal entity qualifies as a “foreign company” if it is resident and liable to
Swedish domestic law on withholding tax contains an anti-avoidance rule. Under this rule, a person or entity that holds shares to provide an illegitimate tax advantage or reduction of withholding tax for someone else is subject to withholding tax. The anti-avoidance rule may also potentially apply to situations for which an exception from withholding tax would otherwise be available.

</tbody>
</table>

(a) Royalties paid to nonresidents are not subject to withholding tax but are taxed as Swedish-source income at the normal corporate tax rate. However, under certain treaties, the tax rate may be reduced.

(b) The reduced tax rate applies if the parent company owns at least the minimum percentage of the paying company as prescribed by the relevant treaty.

(c) The rate of tax is further reduced if specific conditions are satisfied.

(d) Under Swedish domestic law, dividends paid to a “foreign company” (as defined under Swedish law) are exempt from withholding tax if the shares are held for business purposes. Unlisted shares in Swedish companies are normally considered to be held for business purposes unless they are regarded as inventory. If the shares are listed, they must also be held for at least 12 months and the holding must amount to at least 10% of the voting rights. A special exemption also applies if the recipient fulfills the conditions in Article 2 of the EU Parent-Subsidiary Directive and if the holding is at least 10% of the share capital.
(e) Sweden applies the treaty with the former Czechoslovakia to the Czech Republic and the Slovak Republic.

(f) Sweden applies the treaty with the former Yugoslavia to Bosnia and Herzegovina, Croatia, Montenegro, Serbia and Slovenia.

(g) The rates are 3% on news royalties, 5% for copyright (excluding films and certain other items) royalties, 10% for industrial royalties and 15% in other cases.

(h) The higher rate applies if the Austrian company owns more than 50% of the capital of the Swedish company. The EU Interest and Royalties Directive may be more beneficial in this respect.

(i) In practice, the domestic Swedish rate of 21.4% applies to all royalties because the treaty rate of 25%, which applies to trademarks, is higher and the treaty withholding tax rate of 15% for all other royalties has expired.

(j) The rates are 3% for patent royalties, 5% for leasing royalties and 10% for other royalties.

(k) The lower rate applies to leasing, and the higher rate applies to other royalties.

(l) The rates are 0% for copyright royalties and 5% for other royalties.

(m) The lower rate applies to industrial royalties.

(n) The lower rate applies to leasing and know-how royalties.

(o) The reduced treaty rate does not apply to mining royalties and cinematographic film royalties.

(p) The lower rate applies to copyright royalties.

(q) The domestic rate applies.

(r) The 0% rate applies to copyright royalties. The domestic rate applies to mining royalties. The 20% rate applies to all other royalties.

(s) The 10% rate applies to copyright royalties.

(a) The rates reflect the maximum aggregate effective tax burden of ordinarily taxed companies and are composed of federal and cantonal/communal taxes. Approximately 7.8% of the rates relate to the federal tax. The rates depend on the canton and commune in which the taxable entity performs its activities. Lower rates are available for privileged companies described in Section E.

(b) See Section B.

(c) The withholding tax rates may be reduced under the Switzerland-European Union (EU) agreement (see Section E) and under double tax treaties (see Section F).

(d) Withholding tax is levied on bank interest and bond interest, but normally not on interest on commercial loans, including loans from foreign parents to Swiss subsidiaries.

(e) Income of the current year may be offset against losses incurred in the preceding seven years. Losses may not be carried back (see Section C).

B. Taxes on corporate income and gains

Income tax. Switzerland is a confederation of 26 cantons (states). Taxes are levied at the federal and cantonal/communal levels. As
a result of this multilayered tax system, no standard tax rates exist. Under the Swiss income tax system, earnings are taxed at the corporate level and, to the extent profits are distributed as dividends, again at the shareholder’s level. However, see Dividends for details regarding the participation exemption.

In general, a resident corporation is a corporation that is incorporated in Switzerland. In addition, a corporation incorporated in a foreign country is considered a resident of Switzerland under Swiss domestic law if it is effectively managed and controlled in Switzerland.

Resident companies are subject to corporate tax on worldwide income. Income realized by a foreign permanent establishment of a Swiss company or derived from foreign real estate is excluded from taxable income. Losses incurred by a foreign permanent establishment are deductible from taxable income. However, if a foreign permanent establishment of a Swiss company realizes profits in the seven years following the year of a loss and if the permanent establishment can offset the loss against such profits in the foreign jurisdiction, the Swiss company must add the amount of losses offset in the country of the permanent establishment to its Swiss taxable income.

A company not resident in Switzerland is subject to Swiss income tax if it has a permanent establishment in Switzerland. Tax Harmonization Act. The Tax Harmonization Act (THA) sets certain minimum standards for cantonal/communal taxes. However, cantonal/communal tax rates are not harmonized under the THA.

Rates of corporate tax. The federal corporate income tax is levied at a flat rate of 8.5% of taxable income. Because taxes are deductible, the effective federal corporate income tax rate is approximately 7.8%.

Cantonal/communal tax rates vary widely. The cantonal/communal tax rates are usually a certain percentage (known as “multipliers”) of the relevant cantonal statutory tax rates. The total effective maximum tax burden, which consists of federal and cantonal/communal taxes, ranges from 12% to 24%, depending on the canton and commune in which the taxable entity is located.

Tax incentives. In Switzerland, tax incentives are granted to companies either by the cantons or by both the cantons and the federation. Except for the limitation on the duration of tax incentives to a maximum period of 10 years, the cantons are autonomous in granting cantonal/communal tax incentives to the following:
- Newly established enterprises
- An already established enterprise that makes a material change in its operations

Tax incentives at the federal level require approval of the federation. Incentives at the federal level are governed by the federal law on regional policy, which is based on the following key factors:
- Establishment of new business activities in a qualifying area of economic development
- The performance by the applying company of industrial activities or services that have a close nexus to production activities
• Creation of new jobs or maintaining of jobs
• Particular economic relevance of the planned project for the area

The maximum amount of the federal tax relief is determined by the number of newly created or maintained jobs. Production-related service providers are eligible for a federal tax holiday if they create at least 10 new jobs within the first 5 years. No such limitation applies to industrial enterprises.

Federal and cantonal/communal tax holidays are typically subject to claw-back provisions. The claw-back clause is generally triggered if the conditions for the tax holidays are no longer met (for example, the envisaged number of jobs have not been created or have not been maintained within the relevant time frame).

**Capital gains.** Capital gains are generally taxed as ordinary business income at regular income tax rates. Different rules may apply to capital gains on real estate or to real estate companies at the cantonal/communal level.

Capital gains derived from dispositions of qualifying investments in subsidiaries qualify for the participation exemption. Under the participation exemption rules for capital gains, the parent company must sell a shareholding of at least 10% and, at the time of the disposal, it must have held the shares for at least one year (for further details regarding the participation exemption, see Dividends).

**Administration.** Income tax is generally assessed on the income for the current fiscal year, which corresponds to the corporation’s financial year. The financial year does not need to correspond with the calendar year. Corporations are required to close their books once a year and file annual returns. This rule does not apply to the founding year. Consequently, the first fiscal year can be extended up to a maximum of nearly two years.

The cantonal deadlines for filing the corporate tax return vary, and extensions may be obtained. The federal and cantonal tax returns are generally filed together.

Corporations may pay income tax in one lump-sum payment or in installments. The deadline for the payment of federal income tax is 31 March of the year following the fiscal year. The deadline for cantonal/communal taxes is usually between 30 June and 31 December.

**Dividends.** Dividends received are taxable as ordinary income. However, under the participation exemption rules, the federal tax liability is reduced by a proportion of dividend income (as defined by the law) to the total taxable income if the recipient of dividends satisfies any of the following conditions:
- The recipient owns at least 10% of the shares of the distributing corporation.
- The recipient has a share of at least 10% of the profits and reserves of the distributing corporation.
- The recipient holds shares with a market value of at least CHF1 million.
The participation exemption also applies at the cantonal/communal level. However, participation income received by qualifying holding, domiciliary or mixed companies is directly exempt from cantonal/communal corporate income taxes (see Section E).

Swiss companies distributing dividends or proceeds from liquidation exceeding the nominal share capital and the capital contribution reserves are generally required to withhold tax at a rate of 35%. Under the Net Remittance Procedure, Swiss companies distributing qualifying dividends may apply the treaty withholding rates prospectively without making the full 35% prepayment. The Net Remittance Procedure applies to dividends distributed on “substantial participations.” These are participations that qualify for an additional reduction or a full exemption from Swiss withholding tax under a comprehensive income tax treaty or under the Automatic Exchange of Information (AEI) Agreement between Switzerland and the EU (see Section E). To distribute dividends under the Net Remittance Procedure, companies must file an application with the Swiss Federal Tax Administration (SFTA).

Under the capital contribution principle, contributions to equity made by a shareholder on or after 31 December 1996 can be distributed without triggering withholding tax consequences, provided certain requirements are met.

Intercantonal tax allocation. If a company operates in more than one canton, that is, the head office is in one canton and permanent establishments are in other cantons, its taxable earnings are allocated among the different cantons. The allocation method depends on the type of business of the company. The determination of the method is based on case law, which is governed by a constitutional guarantee against intercantonal double taxation.

Foreign tax relief. Income from foreign permanent establishments of a Swiss company is not taxable in Switzerland. The international allocation of profit is based on intercantonal rules, unless a tax treaty provides for a different method. For the treatment of losses of foreign permanent establishments, see Income tax.

C. Determination of taxable income

General. The net profit shown in commercial financial statements generally serves as the basis for income taxation. However, the tax authorities may require adjustments to correct for certain items such as excessive depreciation and provisions.

Federal and cantonal/communal corporate taxes paid or due are deductible for corporate income tax purposes.

Inventories. Any system of inventory pricing that is in accordance with accepted business practice and is used consistently by the taxpayer is presumed to be acceptable by the tax authorities.

Provisions. Swiss federal and cantonal regulations provide that a company may record a general tax-deductible reserve amounting to one-third of the inventory valuation.

Provisions to cover doubtful accounts receivable and expected liabilities are generally allowed for tax purposes if they are commercially justifiable.
In general, a reserve of 5% of accounts due from Swiss debtors and 10% of those due from foreign debtors is allowed, without substantiation. In addition, provisions for specific accounts may be established if economically justifiable.

**Depreciation.** Depreciation may be calculated using the declining-balance or the straight-line method. For federal tax purposes, the following are some of the maximum rates set forth in the official guidelines.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Declining-balance (%)</th>

</tr>
</tbody>
</table>

Some cantons have particularly favorable provisions (for example, immediate or one-time depreciation).

**Relief for losses.** Income of the current year may be offset against losses incurred in the preceding seven years, to the extent that such losses have not yet been used to absorb profits of prior years. No loss carryback is allowed.

**Groups of companies.** Except for value-added tax purposes, the concept of a consolidated or group return is unknown in Swiss tax law. Each corporation is treated as a separate taxpayer and files its own return.

**D. Other significant taxes**

The following table summarizes other significant taxes.

Securities issued by a Swiss party | 0.15  
Securities issued by a foreign party | 0.3  
Stamp duty, onredeemable capital insurance with single premium for Swiss policyholders | 2.5  

E. Miscellaneous matters

Domiciliary and mixed companies. Domiciliary and mixed companies are primarily engaged in activities abroad. The profits derived by these companies from non-Swiss sources are taxed at substantially reduced rates at the cantonal/communal level. Domiciliary and mixed companies can be used for sales, financing, holding of intellectual property and other activities focusing primarily on non-Swiss markets. Relief at the federal level is available for principal companies (see Principal companies) with sufficient substance.

Under the THA (see Section B), for cantonal taxes, the following tax rules apply to domiciliary and mixed companies:

- Income derived from a qualifying participation (10% of the share capital, 10% of the profit and reserves or fair market value of CHF1 million), including capital gains resulting from step-ups in the tax basis of such investments, is exempt from tax.
- Income derived from Swiss sources not described in the item above is taxed at ordinary rates (this rule applies only to mixed companies because domiciliary companies do not derive Swiss-source income).
- Income derived from non-Swiss sources is also taxed at ordinary rates. However, the tax base is substantially reduced by the application of rules that take into account the significance of administrative activities performed by the Swiss company (this depends on the intensity of its physical presence in Switzerland and the level of its economical affinity to Switzerland). As a result of these rules, approximately 10% to 30% of the non-Swiss income is subject to the ordinary cantonal/communal tax, while the remaining non-Swiss income is exempt from tax.

Holding companies. Holding companies may take advantage of a special status for cantonal and communal tax purposes. At the cantonal/communal level, in general, holding companies are exempt from corporate income tax (only income from Swiss real estate is ordinarily taxed). Consequently, all types of income derived from financial participations, such as dividends, interest and capital gains, are exempt at the cantonal/communal level. At the federal level, tax relief is granted with respect to qualifying dividends and capital gains (see Section B).

Currently, holding companies are prohibited from performing any commercial activities in Switzerland.

Service companies. For Swiss resident companies providing coordination or management services to a multinational group (technical, administrative or scientific assistance including research and promotion activities), Swiss tax law requires that a share of the profits accruing to the group be allocated to the Swiss company.
Switzerland applies the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multi-national Enterprises and Tax Administrations.

**Principal companies.** Federal guidelines provide special rules for international profit allocation of principal companies at the federal level. A Swiss company within an international group is treated as a principal company if it assumes risks and responsibilities for certain activities, including the following:

- Purchasing
- Planning of research and development (R&D), manufacturing and distribution
- Development of marketing strategies
- Logistics
- Treasury
- Finance
- Administration

In structures involving principal companies, manufacturing is often performed outside of Switzerland by group companies or third parties on a contract manufacturing or cost-plus basis on the instruction of and for the account of the principal. The local distribution affiliates typically act as agents with the authority to conclude contracts on behalf of the principal company (commissionaires) or as limited-risk (stripped-buy/sell) distributors because of the related risks borne by the principal.

The federal guidelines can result in an attractive combined federal and cantonal/communal effective tax rate that may be as low as approximately 5% to 10%, depending on the particular set-up and the location. In addition, depending on the substance and the location, principal companies may qualify for tax holidays of up to 10 years.

In 2014, the SFTA specified its practice and issued new interpretation guidelines to ensure a consistent taxation of Swiss principal companies for federal income tax purposes.

The new interpretation guidelines refer to the following:

- Exclusivity of distributors
- Remuneration of distributors
- Outsourcing of principal functions
- Mutual agreement procedures and advance pricing agreements (APAs)

In the context of the new corporate tax reform bill, Tax Reform and AHV Financing (TRAF), the SFTA no longer applies the federal practices concerning principal companies and finance branches to new entities from 2019. Unlike the rules governing the cantonal tax privileges, the abolition of the federal practices does not require any legislative amendment. With the envisaged entry into force of TRAF at the beginning of 2020, the federal practices for existing principal companies and finance branches will also be abolished.

**Debt-to-equity rules.** Under the federal thin-capitalization guidelines, which are also applied by most cantons, the minimum capitalization is calculated based on the maximum indebtedness of all of the assets. For each type of asset, only a specified percentage may be financed with debt from related parties (directly or
Consequently, the debt-to-equity ratio results from the sum of the maximum amount of indebtedness of all of the assets. The following are examples of the maximum percentages of indebtedness:

- Cash: 100%
- Accounts receivable: 85%
- Participations: 70%
- Manufacturing plants: 70%
- Intangibles: 70%

The required equity is calculated at the end of the year based on the balance sheet or on the fair market value of all assets, if higher.

For finance companies, the maximum indebtedness is 6/7 of the assets.

Interest rates may not exceed arm’s-length rates (the SFTA publishes safe haven rates periodically).

In certain cantons, specific debt-to-equity rules apply to real estate companies.

**Foreign-exchange controls.** Switzerland does not impose foreign-exchange controls.

**Transfer pricing.** Switzerland does not have statutory transfer-pricing rules. Intercompany charges should be determined at arm’s length. The tax authorities accept the transfer-pricing methods described by the OECD guidelines. In particular, cost-plus charges should be justified and documented with appropriate ranges of mark-ups for each individual case. For the provision of financial and management services, the cost-plus method is accepted in exceptional cases only.

Special guidelines apply concerning minimum and maximum interest on loans granted to or from shareholders or related parties.

Companies may discuss transfer-pricing issues with the tax authorities and confirm the outcome in binding rulings. In complex cases, they may apply for APAs. Rulings are more common.

Switzerland signed the Multilateral Competent Authority Agreement on the Exchange of Country-by-Country Reports (Base Erosion and Profit Shifting [BEPS] Action 13) on 27 January 2016. The local legislation (Act and Ordinance on the International Automatic Exchange of Country-by-Country Reporting of Multinationals) entered into force on 1 December 2017. Multinational corporations that are resident in Switzerland with a minimum consolidated turnover of more than CHF900 million are required to submit a Country-by-Country Report (CbCR) for fiscal years starting on or after 1 January 2018. The 2018 fiscal year CbCR will be exchanged with partner countries beginning in 2020.

**Reorganizations.** The Swiss Merger Law of 3 October 2003 authorizes companies to carry out tax-neutral reorganizations (mergers, demergers and transformations) if certain conditions are met, including the following:

- Liability to Swiss tax continues after the reorganization.
- Assets and liabilities are transferred and acquired at their previous value for income tax purposes.
Tax Reform and AHV Financing. On 28 September 2018, the Swiss parliament approved the new corporate tax reform bill, TRAF. This bill was formerly referred to as Tax Proposal 17.

Within the framework of TRAF, the preferential cantonal tax status available for domiciliary, mixed and holding companies will be abolished and replaced by new competitive and internationally accepted measures. In addition, the federal tax practices governing the profit allocation rules for principal companies and finance branches will be abolished.

TRAF will replace the above-mentioned taxation schemes with the following:
- Introduction of a Patent Box with a maximum relief of 90% on net profits from patents and equivalent rights (mandatory at cantonal level)
- Super deduction for domestic R&D expenses, up to a maximum of 50% (optional at cantonal level)
- Notional interest deduction (optional at cantonal level but subject to certain requirements)
- Disclosure of hidden reserves (including self-created goodwill) on immigration to Switzerland (mandatory at cantonal level)
- Overall cantonal tax relief limited to 70% (mandatory at cantonal level)

A referendum on TRAF is expected to be held on 19 May 2019. The reform will enter into force on 1 January 2020 if approved by Swiss voters. The cantons are conducting legislative procedures to implement TRAF measures into their cantonal tax laws.

Anti-avoidance measures. Switzerland has entered into more than 90 treaties for the avoidance of double taxation. These treaties generally follow the OECD model treaty. In addition, Switzerland enacted in 1962 domestic anti-avoidance measures to counter the improper use of its treaties by foreign taxpayers (commonly known as the 1962 Abuse Decree). This set of specific anti-avoidance measures were amended and interpreted by the 1999, 2001 and 2010 Abuse Circulars. In June 2017, the Swiss Federal Council further softened the importance of the 1962 Abuse Decree when it repealed the part of it related to the obvious unlawful claim of treaty benefits.

Automatic Exchange of Information Agreement between Switzerland and the EU. Article 9 of the Automatic Exchange of Information Agreement between Switzerland and the EU (AEI Agreement) contains a measure providing that dividends paid (similar rules apply to intercompany interest payments and royalties) are not subject to tax in the country of source if the following conditions are satisfied:
- The parent company has a direct minimum holding of 25% of the capital of the payer of the dividends (subsidiary) for at least two years.
- Both the parent company and the subsidiary are subject to corporate tax without being exempted and both are in the form of a limited company.
- One company is tax resident in an EU member state and the other company is tax resident in Switzerland.
- Neither company is tax resident in a third state under a double tax treaty with that state.
The above measure is equal to the measure contained in Article 15 of the former bilateral Agreement on Savings Taxation.

Bilateral double tax treaties between Switzerland and individual EU member states remain applicable and are not restricted by the AEI Agreement.

The AEI Agreement will be extended to other jurisdictions that join the EU in the future.

Relief from Swiss withholding tax under the AEI Agreement requires advance approval of Form 823C by the SFTA. The SFTA assesses, among other items, beneficial ownership and substance elements on its examination of Form 823C. An approval remains valid for a three-year period. Reimbursements of Swiss withholding tax on dividends paid before the completion of the two-year minimum holding period requires filing and approval of Form 70 after the completion of the two-year holding period (Denkavit-Practice; this is a reference to the European Court of Justice’s decision in the Denkavit case).

F. Treaty withholding tax rates

Switzerland benefits from measures equivalent to those found in the EU. Subject to fulfillment of the respective requirements, the taxpayer may rely either on the AEI Agreement or the applicable double tax treaty.

</tbody>
</table>

(a) Withholding tax is imposed only on bank interest and on interest from publicly offered bonds, debentures and other instruments of indebtedness issued by a Swiss borrower, but not on interest on commercial loans, including loans from foreign parents to Swiss subsidiaries.

(b) Under Swiss domestic law, no withholding tax is imposed on royalties, management fees, rents, licenses and technical assistance fees and similar payments.

(c) A 5% general rate and a 0% rate on interest paid between related parties (as defined in the double tax treaty) apply to interest paid on or after 1 July 2013. A 10% rate applies to interest paid on or before 30 June 2013.

(d) This rate applies if the shareholding by a corporation is at least 25%. A 15% rate applies to all other dividends.

(e) The 0% rate generally applies if the shareholding of a corporate recipient of dividends is at least 10%. The rate is increased to 15% if the shareholding of a corporate recipient is less than 10% or if the corporate recipient is controlled by persons that are not in the contracting states unless the corporate recipient demonstrates that the participation rights are not solely intended to profit from the advantages mentioned above. The 15% rate also applies to dividends paid to individuals and all other dividends.

(f) The 5% rate applies to dividends paid to corporations with a shareholding of at least 10% in the payer. A 15% rate applies to other dividends.

(g) The 5% rate applies to dividends paid to corporations with a shareholding of at least 10% in the payer. A 15% rate applies to other dividends.

(h) This rate applies to dividends paid to corporations holding at least 10% of the capital and to dividends paid to pension funds or other similar institutions providing pension schemes. A 15% rate applies to other dividends.

(i) The 5% rate applies if the recipient of the dividends is a corporation with a shareholding of at least 15%. A 15% rate applies to other dividends.

(j) The 0% rate generally applies if the recipient of the dividends is a corporation that has a shareholding of at least 10% and if the participation has been held for at least one year. A 15% rate applies if the recipient of the dividends is a corporation that has a shareholding of less than 10% or if the recipient of the dividends is an individual.

(k) A rate of 5% applies to interest on bank loans.

(l) Rate is applicable if shareholding by a corporation is at least 10%. The net treaty withholding rate is increased to 20% if shareholding is less than 10%.

(m) A 0% rate applies to interest on bank loans.

(n) The 0% rate applies to the following interest payments:
   - Interest paid to the other contracting state in connection with the sale on credit of industrial, commercial or scientific equipment
   - Interest paid in connection with the sale on credit of merchandise by one enterprise to another enterprise
   - Interest on a loan granted by a bank or to the other contracting state or a political subdivision or a local authority thereof

(o) The 5% rate applies if the recipient of the dividends is a corporation with a shareholding of at least 20%. The rate is increased to 15% in all other cases.

(p) For interest paid to banks, the withholding tax rate is reduced to 5%.
(q) The 0% rate applies to dividends paid to corporations with direct ownership of at least 10% and a holding period of two years and to dividends paid to pension funds or other similar institutions. A 5% rate applies to corporations with direct ownership of at least 10% before the two-year holding period has elapsed. A 15% rate applies in all other cases.

(r) The 0% rate applies to the following interest payments:
   - Interest paid with respect to a loan made, guaranteed or insured by the government of the other state or an instrumentality or agency thereof
   - Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
   - Interest paid in connection with the sale on credit of merchandise by one enterprise to another enterprise
   - Interest on a loan granted by a bank

(s) This rate applies to dividends paid to corporations holding at least 10% of the voting power of the payer. A 15% rate applies to other dividends.

(t) This rate applies if the shareholding of the recipient is at least 20%. For other dividends, the rate is 15%.

(u) The 0% rate applies to interest on special trade credits or loans. The 10% rate applies to interest paid to banks or insurance companies. The 15% rate applies to other interest.

(v) This rate applies if the shareholding of the recipient is at least 50%. The rate is 10% if the shareholding of the recipient is at least 25% but less than 50%. The rate is 15% for other dividends.

(w) This rate applies if the shareholding of the corporate recipient is at least 10%. For other dividends, the rate is 15%.

(x) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
   - A company (other than a partnership) directly owning shares representing at least 10% of the capital of the company paying the dividends for at least one year before the payment of the dividends
   - A pension fund or scheme
   - The central bank

(y) This rate applies if the direct shareholding of the corporate recipient is at least 10%. For other dividends, the rate is 15%.

(z) The rate is 10% if the shareholding of the recipient is less than 25%.

(aa) The 0% rate applies to interest on certain government bonds. The 5% rate applies to other interest.

(bb) This rate applies if the shareholding of the recipient is at least 10%. A 15% rate applies to all other dividends.

(cc) A 0% rate applies to interest on bank loans and in certain other special cases.

(dd) The 0% rate applies if the beneficial owner of the dividends is one of the following:
   - A company (other than a partnership) that is a resident of the other state and that holds directly at least 10% of the capital in the company paying the dividends for at least one year before the payment of the dividend
   - A pension scheme
   - The central bank of the other contracting state

(ee) The 10% rate applies to dividends paid to corporations holding participations of at least 20% in other enterprises. A 20% rate applies to other dividends.

(ff) The 0% rate applies to the following interest payments:
   - Interest paid to a contracting state or a political subdivision or local authority thereof
   - Interest paid to the central bank of the other contracting state or any institution owned by the government
   - Interest paid to a bank, insurance company, securities dealer or pension fund or scheme

(gg) A 0% rate may apply under the Switzerland-EU agreement (see the paragraph preceding the treaty withholding tax rate table). The rates shown in the table are the treaty withholding tax rates.

(hh) The 0% rate applies if the recipient is a company that owns directly at least 10% for a period of at least one year of the capital of the company paying the dividends or if the recipient is a pension fund or pension scheme, provided that the dividends do not result from a business activity or are paid by a related company. The 15% rate applies to other dividends.

(ii) The 0% rate applies if the recipient is a company (other than a partnership) that owns directly at least 25% of the capital of the company paying the dividends, a governmental institution, a pension fund or a central bank authority. A 15% rate applies to other dividends.

(jj) The 5% rate applies if the corporate recipient of the dividends holds a shareholding of at least 20% in the distributing entity and has invested at least USD200,000 in the country of the distributing entity. The treaty withholding tax rate is increased to 15% if the shareholding is less than 20%.
The 0% rate applies to interest paid to certain government agencies or in connection with the purchase of industrial, commercial or scientific equipment on credit. The 5% rate applies to interest paid to banks or in connection with the purchase of goods on credit. The 10% rate applies to other interest.

Interest paid to the following interest payments:

- Interest paid on loans granted by a company of the other state
- Interest paid to pension funds or pension schemes, provided that the interest does not result from a business activity or is paid by a related company
- Interest paid to the other contracting state, one of its political subdivisions, to local authorities or to a statutory body

A 10% rate applies to all other interest payments.

The 5% rate applies if, at the time the dividends become due, the corporate recipient of the dividends holds a shareholding of at least 25% in the distributing entity and the value of the participation is at least CHF200,000 (or the equivalent in foreign currency). The treaty withholding tax rate is 15% if these conditions are not met.

The 0% rate applies if the beneficial owner of the dividends is one of the following:

- A company (other than a partnership) that is a resident of the other contracting state and that holds directly at least 10% of the capital in the company paying the dividends for at least one year before the payment of the dividend
- A pension scheme
- The central bank of the other contracting state

The treaty between Denmark and Switzerland was extended to the Faroe Islands as of 22 September 2009. The extension and the revised protocol between Denmark and Switzerland entered into force in November 2010.

On 10 October 2011, an amending protocol entered into force. The protocol did not change the withholding tax rates. However, if after the date of signing of the amending protocol, India and a third state that is an OECD member sign a convention, agreement or protocol and if under this convention, agreement or protocol, India limits its taxation at source of dividends, interest, royalties or fees for technical services to a rate lower than the rate provided for in the double tax treaty between Switzerland and India, the lower rate will also apply under the double tax treaty between Switzerland and India, effective from the date on which such convention, agreement or protocol enters into force.
The 0% rate applies to interest payments if the beneficial owner of the interest is a resident of Canada and is not related to the payer.

The 0% rate applies if the beneficial owner of the dividends is the other contracting state, a political subdivision or a local authority of the other contracting state or a pension fund or scheme.

The 0% rate applies to dividends paid to the Monetary Authority of Singapore or the Government of Singapore Investment Corporation Pte Ltd. The 5% rate applies to dividends paid to a corporation (other than a partnership) holding directly at least 10% of the capital of the company paying the dividends. The 15% rate applies to other dividends.

The 0% rate applies to interest paid by a banking enterprise to a banking enterprise in the other contracting state or interest arising in Switzerland and paid to the Monetary Authority of Singapore. The 5% rate applies to other interest.

This treaty has been renegotiated and signed. The revised treaty will enter into force after each country has completed the domestic law procedures for ratification and complied with the respective provisions of the treaty.

The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:

- A company (other than a partnership) that has owned directly or indirectly shares representing at least 10% of the capital or voting power of the company paying the dividends
- A pension fund

The 15% rate applies to dividends. The 15% rate applies to other dividends.

The 0% rate applies to dividends paid to a corporation with a direct shareholding of at least 10% in the capital of the payer and to dividends paid to a governmental institution, pension fund or central banking authority. A 15% rate applies to other dividends.

The 0% rate applies to interest paid to the state or the central bank. The 5% rate applies to interest paid with respect to a loan or credit made, guaranteed or insured for the purposes of promoting export by an Eximbank or similar institution. The 10% rate applies to interest derived by a bank. A 15% rate applies in all other cases.

The 10% rate applies to dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 15% rate applies to other dividends.

The 5% rate applies if the recipient of the dividends holds a shareholding of at least 20% in the distributing entity and if the value of the participation is at least CHF200,000 (or the equivalent in foreign currency). A 15% rate applies to other dividends (in specific cases the 0% rate applies; see footnote [oo]).

The 0% rate applies to the following interest payments:

- Interest paid in connection with a sale on credit of industrial, commercial or scientific equipment
- Interest paid in connection with the sale of goods between corporate entities
- Interest paid on bank loans
- Interest paid to a bank, insurance company or pension fund or scheme
- Interest paid to the other contracting state

The 0% rate applies to the following interest payments:

- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest paid between enterprises that are associated by a stake of at least 25% held for at least two years or that are both held by a third company that directly holds at least 25% of the capital of both companies for at least two years

A 0% rate applies to dividends paid to the other contracting state or a political subdivision or local authority thereof, the central bank or a pension fund.

The 0% rate applies to the following interest payments:

- Interest paid in connection with the sale on credit of goods between corporate entities
- Interest paid on bank loans

In addition, the 0% rate applies if the interest is paid between enterprises that satisfy all of the following conditions:
They are associated by a stake of at least 10% held for at least one year or they are both held by a third company that directly holds at least 10% of the capital of both companies.

They are resident in a contracting state and, under any double tax agreement with any third state, none of the companies is resident in that third state.

They are subject to corporation tax and are not exempt from tax on interest payments.

They are both limited companies.

The 10% rate applies to other interest payments.

The 0% rate applies if the direct shareholding of the corporate recipient is at least 10% and if the participation has been held for at least one year. For other dividends, the rate is 15%.

The 0% rate applies to the following interest payments:

- Interest paid to a contracting state or a political subdivision, local authority, administrative-territorial unit or export financing institution thereof
- Interest paid between enterprises that are associated by a stake of at least 25% or that are both held by a third company that directly holds at least 25% of the capital of both companies

The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:

- A pension fund or scheme
- The government of the other state, or a political subdivision or local authority thereof
- The central bank

The 10% rate applies to other dividends.

The 0% rate applies to interest on government bonds and in certain other special cases.

The 0% rate applies to interest payments:

- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest on a loan granted by a bank
- Interest paid in connection with the sale on credit of equipment, merchandise or services
- Interest paid on bank loans
- Interest paid with respect to pension schemes
- Interest paid to the government of the other state, a political subdivision or local authority thereof, or the central bank
- Interest paid between companies that are associated by a direct stake of at least 10% held for at least one year or by a direct holding of a third company of at least 10% for at least one year of the capital of both companies

The 5% rate applies to other interest payments.

The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:

- A company (other than a partnership) that has its capital wholly or partly divided into shares and that holds directly at least 10% of the capital of the company paying the dividends during an uninterrupted period of at least one year
- A pension fund or other similar institution providing pension schemes in which individuals may participate to secure retirement, disability and survivors' benefits, if such pension fund or other similar institution is established, recognized for tax purposes and controlled in accordance with the laws of the other contracting state
- The government of the other contracting state, a political subdivision or local authority thereof, or the central bank of the other contracting state
The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) that directly owns shares representing at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least one year
- A pension fund or central bank

The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) that directly owns shares representing at least 10% of the capital of the company paying the dividends
- A pension scheme
- The central bank

The 15% rate applies to other dividends.

The 0% rate applies to the following interest payments:
- Interest paid to the government of the other state, a political subdivision or local authority thereof, or the central bank
- Interest paid on specific bank loans of international business transactions
- Interest paid in connection with the sale on credit of equipment, merchandise or services
- Interest paid between companies that are associated by a direct stake of at least 25% or by a direct holding of a third company (resident in the EU or Switzerland) of at least 25% of the capital of both companies

The 5% rate applies to other interest payments.

The 10% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is a company (other than a partnership) that holds directly at least 10% of the capital and of the voting power of the company paying the dividends. The 15% rate applies to other dividends.

The 10% rate applies to interest payments. However, exemptions apply to, among others, the following:
- The government of the other contracting state, and several governmental bodies and institutions thereof
- The national bank
The 0% rate applies to dividends if the beneficial owner of the dividends is one of the following:

- A corporation that directly holds at least 10% of the capital in the company paying the dividend for at least one year before the payment of the dividends
- A pension scheme
- A contracting state, political subdivision or local authority thereof

A 15% rate applies to all other dividends.

The 0% rate applies to interest if the beneficial owner is a resident of the other contracting state and is in one of the following categories:

- Bodies exercising governmental functions and banks performing central bank functions
- Financial institutions that are unrelated to and dealing independently with the payer
- Complying Australian superannuation funds and tax-exempt Swiss pension schemes

A 10% rate applies to other interest payments.

The 0% rate applies to the following interest payments:

- Interest on loans approved by the government
- Interest income derived from sales on credit of industrial, medical or scientific equipment
- Interest on bonds issued by a contracting state or a political subdivision or local authority thereof

The 5% rate applies to interest on bank loans. The 8% rate applies to other interest payments.

The 0% rate applies if any of the following circumstances exist:

- The beneficial owner of the interest is the contracting state or a political subdivision or local authority thereof.
- The interest is paid in connection with the sale on credit of goods, merchandise or any equipment.
- The interest is paid on bank loans.

A rate of 10% applies to other interest payments.

The 0% rate applies to interest in connection with bonds, debentures or other similar obligations of the government or of a political subdivision or local authority thereof and in certain other special cases. The 10% rate applies to other interest payments.

Special rules apply to for collective-investment vehicles regarding dividend and interest payments.

The 0% rate applies to the following interest payments:

- Interest paid in connection with the sale on credit of equipment, merchandise or services
- Interest paid on bank loans
- Interest paid with respect to pension schemes
- Interest paid to the government of the other state, a political subdivision or local authority thereof, or the central bank
- Interest paid on intercompany loans

The 5% rate applies to other interest payments.

The 5% rate applies if, at the time the dividends become due, the corporate recipient of the dividends has directly held a shareholding of at least 25% in the distributing entity for more than a year. For the purpose of the holding period, prior restructurings are disregarded. The treaty withholding tax rate is 15% if this condition is not met.

At the time of writing, Switzerland had signed new double tax treaties or protocols to existing double tax treaties that provide changes to treaty withholding tax rates with Brazil, Saudi Arabia and Zambia.

(a) For details, see Section B.
(b) Effective from 1 January 1990, income from securities transactions is not subject to regular corporate income tax. Such income is subject to alternative minimum tax. See Section B.
(c) For details and the definition of a nonresident corporation, see Section B.
(d) Payments in connection with securities issued under the Financial Asset Securitization Act or Real Estate Securitization Act and interest derived from short-term commercial paper are subject to a 10% withholding tax. In addition, they are included in the computation of the resident corporation’s taxable income and are taxed at a rate of 20%.
(e) Interest arising from short-term commercial paper, asset-backed securities, bonds, structured products and repurchase agreements underlying such financial instruments is not included in the tax computation in a resident individual’s tax return but is subject to a 10% withholding tax.
(f) The applicable tax rate for interest arising from short-term commercial paper, asset-backed securities, bonds, structured products and interest arising from repurchase agreements is 15%. Other types of interest are subject to a tax rate of 20%.

(g) The withholding of tax is not required if the licensor issues a Government Uniform Invoice (GUI).

B. Taxes on corporate income and gains

Corporate income tax. A domestic profit-seeking enterprise is subject to corporate income tax on all of its income regardless of source. All profit-seeking enterprises, including subsidiaries of foreign companies that are incorporated under the Company Law of Taiwan, are considered domestic profit-seeking enterprises. A foreign profit-seeking enterprise is subject to tax only on income sourced in Taiwan.

Place of effective management. Taiwan introduced an act containing a place of effective management regime in July 2016. Under the act, a company is regarded as tax resident in Taiwan if it is effectively managed in Taiwan. “Effective management” refers to the situation in which the company’s critical decisions are made in Taiwan, accounting and legal records are kept in Taiwan, and major business activities are executed in Taiwan. However, this act has not yet entered into force. The Executive Yuan will decide the effective date of the act.

Tax rates. The rate is 20% (increased from 17%) for the tax year starting on or after 1 January 2018. For enterprises with taxable income not exceeding TWD500,000, the corporate income tax rate is 18% for 2018 and 19% for 2019.

Alternative minimum tax. The alternative minimum tax (AMT) applies to domestic profit-seeking enterprises and foreign profit-seeking enterprises that have a fixed place of business or business agent in Taiwan, if the enterprise’s base income exceeds TWD500,000. The AMT is calculated in accordance with the following formula:

\[
AMT = (\text{basic income} - \text{deduction of TWD500,000}) \times 12\%
\]

Basic income equals the sum of the following items:
- Taxable income
- Tax-exempt income under the Statute for Upgrading Industries and other tax-incentive regulations
- Income from transactions in securities and futures
- Tax-exempt income of offshore banking units

If the regular income tax equals or exceeds the AMT, only the regular income tax is payable. The regular income tax equals tax payable calculated under the Income Tax Law, less tax credits. If the regular income tax is less than the AMT, the difference between regular income tax and the AMT is payable in addition to the regular income tax. The additional tax payment cannot be offset by tax credits.

Tax incentives. A new Statute for Industry Innovation (SII) was announced and published on 12 May 2010 to replace the old Statute for Upgrading Industries (SUI), which expired on 31 December 2009. In comparison to the SUI, the SII retains only the tax incentive for expenditure spent on research and development (R&D) activities and offers other non-tax subsidies for various
qualified activities. Under the SII, enterprises may claim up to 15% of their R&D expenditures as a credit to offset against their corporate income tax payable in the current year only or claim up to 10% of their R&D expenditures as a credit to offset against their corporate income tax payable in three years, with a maximum credit of 30% of the tax payable. The SII is effective from 1 January 2010 through 31 December 2019. The tax incentives obtained before the expiration of SUI remain effective after the expiration of SUI. Amendments were made to the SII in November 2017. Under the amendments, a venture capital limited partnership started from 2017 to 2019 that meets some requirements and obtains the regulator's approval can be treated as a pass-through entity rather than as a taxable corporate entity for 10 years from its startup.

**Capital gains.** For profit-seeking enterprises, effective from 1 January 1990, income from securities transactions is not subject to regular income tax. Such income is subject to AMT. A securities transaction tax of 0.3% or 0.1% is imposed based on the transaction value.

During the period of 1 January 2010 through 31 December 2026, trading in corporate bonds and financial bonds (as defined in the Banking Law of Taiwan) is exempt from securities transaction tax. The suspension of income tax on securities transactions applies only to securities issued and certified in accordance with the law of Taiwan. Gains derived from disposals of securities that are not issued or certified in accordance with Taiwan regulations are subject to income tax.

Gains on sales of land are subject to land value increment tax (see Section D). Gains on sales of land had been exempt from income tax. However, effective from 1 January 2016, gains on sales of land that is acquired on or after 2 January 2014 and is held for a period of less than two years before disposal or that is acquired on or after 1 January 2016 is subject to income tax. Land value increment tax continues to apply but it can be credited against the income tax payable on gains on property.

**Administration.** The tax year is normally the calendar year. Permission must be obtained to use any other period. An annual tax return must be filed during the fifth month of the year following the tax year. An extension to file a tax return is not available.

In general, the late filing penalty is 10% of the tax due. It may not exceed TWD30,000 or be less than TWD1,500. A delinquent reporting surcharge is 20% of the tax assessed by the authorities. It may not exceed TWD90,000 or be less than TWD4,500. A taxpayer that fails to pay the tax within the prescribed time limit is subject to a surcharge for delinquent payment and interest on a daily basis at the prevailing interest rate provided by the Directorate General of Postal Remittances and Savings Bank (PRSB). Underreporting of taxable income is subject to a penalty of up to two times the underpayment of tax. In the event of a failure to file the annual income tax return after expiration of the prescribed period, the tax authorities may make a provisional assessment of the amount of income and tax payable on the basis of available tax data or the profit standard of the same trade. In the event that other tax information is subsequently obtained by the tax
authorities, the taxpayer is subject to a penalty of up to three times the tax shortfall, in addition to the delinquent reporting surcharge.

During the month of September, a profit-seeking enterprise (excluding a sole proprietor, partnership, prescribed small-size enterprise or tax-exempted entity) must pay an interim tax equal to 50% of the preceding year’s tax liability. Under the Income Tax Law, qualified enterprises may pay interim tax based on the income derived in the first six months of the current year. If the interim tax payment is made after 30 September but before 31 October, late payment interest accrues on a daily basis at the prevailing interest rate provided by the PRSB. If the interim payment is not made by 31 October, the tax authorities assess one month’s interest at the prevailing interest rate provided by the PRSB.

Dividends. The dividend withholding tax rate is 21% (increased from 20%) starting from 1 January 2018, for nonresident corporations or nonresident individuals, regardless of whether the investments are approved by the Taiwan government pursuant to the Statute for Investment by Foreign Nationals or the Statute for Investment by Overseas Chinese. Withholding tax is not imposed on dividends paid to residents.

A surtax is imposed on the undistributed profits of companies in the second year following the year in which the profits are earned. The surtax rate is 5% (reduced from 10%), effective for tax years starting on or after 1 January 2018. This tax is in addition to the corporate income tax imposed on the profits. Resident individuals can include the dividends received from Taiwan corporations in their individual income tax return as taxable income, subject to a tax-exempt amount of 8.5% of dividend income (capped at TWD80,000) or have dividends taxed separately at a flat rate of 28%.

Dividends received by resident companies from other resident companies are exempt from corporate income tax.

Foreign tax relief. A tax credit is allowed for foreign income tax paid directly by a domestic profit-seeking enterprise, but it may not exceed the additional amount of the Taiwan tax resulting from the inclusion of the foreign-source portion in the profit-seeking enterprise’s total income.

C. Determination of trading income

General. Income for tax purposes is computed according to Taiwan’s generally accepted accounting principles, adjusted for certain provisions included in the tax code.

Necessary and ordinary expenses of a profit-seeking enterprise are deductible, provided these are adequately supported by documentation. The guidelines of Examination of Income Tax of Profit-Seeking Enterprises, promulgated by the Ministry of Finance, provide guidance for determining deductible business expenses. Transactions must conform to regular business practice; otherwise, tax authorities may assess tax based on standard profit margins derived from industry statistics.
If the income of a company consists of both taxable income and exempt income, the costs, expenses or losses, except for those that are attributable to the taxable income and exempt income in a direct, reasonable and definite way, must be allocated to taxable income and exempt income based on certain permitted methods.

**Tax exemptions.** A foreign enterprise engaging in international transportation that derives income in Taiwan is exempt from tax if Taiwan and the home country of the foreign enterprise have entered into an international transportation income tax agreement, which provides reciprocal treatment to Taiwan international transportation enterprises operating in the foreign country.

Gains on sales of land had been exempt from income tax. However, effective from 1 January 2016, gains on sales of land that is acquired on or after 2 January 2014 and is held for a period of less than two years before disposal or that is acquired on or after 1 January 2016 is subject to income tax. Land value increment tax (see Section D) continues to apply but it can be credited against the income tax payable on gains on property.

On approval from the competent authority, royalties paid to a foreign enterprise for the use of its patent rights or trademarks, or for the licensing of other special rights, may be exempt from tax if the licensed rights are used to introduce new production technology or products, improve product quality or reduce production cost. In addition, service fees received by foreign enterprises for rendering technical services in the construction of a factory for certain strategically important enterprises (SIEs) and royalties for the licensing of patents to SIEs may also be exempt from tax on approval.

A foreign-based corporate taxpayer that is engaged in international transportation, construction contracting, technical service provision, or machinery and equipment leasing may apply to use a deemed-profit-rate method (15% in general, and 10% for international transportation business) in determining its taxable income in Taiwan if it is difficult to calculate the costs and expenses arising from the conduct of the business in Taiwan.

Interest received by a foreign financial institution for offering financing facilities to its Taiwan branch offices or other financial institutions in Taiwan is exempt from tax. With the approval of the Ministry of Finance, interest received by a foreign financial institution for extending loans to legal entities in Taiwan for financing important economic construction projects is also exempt from tax.

**Inventories.** Inventories are valued for tax purposes at the lower of cost or net realizable value. In determining the cost of goods sold, specific identification, first-in, first-out (FIFO), weighted average, moving average, or any other method prescribed by the competent authority may be used. However, the use of two different cost methods in one fiscal year is not allowed.

**Provisions.** Provisions for a retirement fund approved by the authorities are deductible in amounts up to 15% of the total payroll. The applicable percentage depends on whether the fund is managed separately from the business entity and whether it conforms to the provisions of the Labor Standards Law.
Allowance for bad debts is limited to 1% of the balance of outstanding trade accounts and notes receivable (secured or unsecured) at year-end.

**Tax depreciation, depletion and amortization.** A taxpayer may claim a depreciation deduction for most property (except land) used in a trade or business. Depreciation may be computed using the straight-line, fixed percentage on diminishing book value method, working-hour method, sum-of-the-years’-digits method or production-unit method. Under the working-hour method, depreciation is computed based on the number of working hours that a depreciable asset is used in a tax year. The time periods over which an asset may be depreciated are specified by the tax authorities. The following are some of the applicable time periods.

<table>
<thead>
<tr>
<th>Assets</th>
<th>Years</th>

<tr>
<td>Motor vehicles and vessels</td>
<td>3 to 18</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>2 to 20</td>
</tr>
</tbody>
</table>

Companies may use the accelerated depreciation method if they meet certain criteria.

Depletion of assets in the form of irreplaceable resources can be computed either based on the production units or methods provided by the Table of Depletion Assets promulgated by the Ministry of Finance. This method must be applied consistently from year to year. In addition, a taxpayer may claim an amortization deduction for intangibles and organizational expenses. Business rights (for example, commercial rights for operating public utility, telephone, public transportation, shipping and air transportation businesses) and copyrights are amortized over 10 years and 15 years, respectively. Trademarks, patents and franchises must be amortized over the period prescribed by the respective laws governing the granting of these rights. Organizational and preoperating expenditures incurred during the period from the planning phase to the first year in which significant revenue is generated from the main business activities must be expensed on occurrence.

**Relief for losses.** If certain requirements are met, companies may carry forward for up to 10 years losses that have been approved by the tax authorities and not yet expired. Loss carrybacks are not permitted.

**Groups of companies.** In general, associated or related companies in a group are taxed separately for corporate income tax purposes and may not file consolidated tax returns. However, a financial holding company that holds 90% or more of the shares of subsidiaries in Taiwan for at least 12 months may elect to file a consolidated profit-seeking enterprise income tax return under its own name.

In addition, a company that acquires 90% or more of the shares or capital of its subsidiaries through a merger, spin-off or other acquisition under the Business Merger and Acquisition Law and holds such shares for at least 12 months may elect to file a
consolidated profit-seeking enterprise income tax return under its own name.

A 5% surtax on the undistributed consolidated retained earnings applies in addition to the corporate income tax on consolidated net income.

An election to file a consolidated profit-seeking enterprise return applies only to corporate income tax and, as a result, qualifying parent companies and their subsidiaries must calculate all other taxes separately.

**D. Other significant taxes**
The following table summarizes other significant taxes.

</tr>
</tbody>
</table>

**E. Miscellaneous matters**

**Foreign-exchange controls.** Under foreign-exchange control regulations, registered business entities or adults legally residing in Taiwan may remit out (in) unlimited funds for the import (export) of goods and services. However, prior declaration to the Central Bank of China (Taiwan) is required for the following:

- An individual who has accumulated inward or outward remittances exceeding USD5 million in a year
- A business entity with accumulated inward or outward remittances exceeding USD50 million in a year
- A single remittance by an individual exceeding USD500,000
- A single remittance by a business entity exceeding USD1 million

In addition, supporting documents, such as transaction contracts, must be submitted at the time of remittance for the Central Bank’s audit purposes.

**Debt-to-equity rules.** On 26 January 2011, the President of Taiwan announced the thin-capitalization rule enacted into Article 43-2 of the Income Tax Act. On 22 June 2011, the Ministry of Finance announced the enforcement rules for the thin-capitalization rule. The enforcement rules contain a debt-to-equity ratio of 3:1 (excluding companies in the financial industries). Interest on the excess portion of loans is not deductible. The enforcement rules do not apply to enterprises satisfying any of the following conditions:

- Total net current annual operating income and non-operating income is less than TWD30 million.
- Total annual interest expenses and total interest expenses derived from intercompany loans in the current year are both less than TWD4 million.
- Before including the interest expenses in the taxable income calculation, the current year’s taxable income is negative and such tax losses are not eligible for the tax loss carryforward regime under Article 39 of the Income Tax Act.
Taiwan introduced an act containing a controlled foreign company (CFC) regime in July 2016. Under the act, a nonresident company is considered a CFC if it is 50% or more directly or indirectly owned by a Taiwan resident company or individual. A resident company that holds an interest of 50% or more in a CFC is taxed on the company’s share of the profits of the CFC, regardless of whether a dividend has been received by the Taiwanese company. However, this act has not yet entered into force. The Executive Yuan will decide the effective date of the act.

The Taiwan tax laws contain rules that deal with tax evasion and tax avoidance. The general rule is that the tax authorities may ignore transactions that constitute an abuse of the law and assess taxes with respect to each transacting party based on the economic substance of the transactions as well as on the attribution of the economic benefits. The same rule applies to sham transactions designed to conceal the economic reality of the transaction.

The Taiwan Transfer Pricing Examination Guidelines (the TP Guidelines) took effect on 30 December 2004. Except for immaterial amounts from related-party transactions, extensive contemporaneous documentation is required. Under the TP Guidelines, on filing the annual income tax return, a profit-seeking enterprise must have the transfer-pricing report and relevant documents prepared. In addition, in the event of a tax audit, a profit-seeking enterprise must provide the tax authorities with all required documents within one month of a request for such documents. The TP Guidelines provide that the tax authorities may impose a maximum penalty of 200% of the tax shortfall resulting from improper transfer prices. In addition, amendments made to the TP Guidelines in November 2017 adopt the three-tier, transfer-pricing documentation requirement including Master File, Country-by-Country Report (CbCR) and Local File, in line with Action 13 of the Organisation for Economic Co-operation and Development (OECD) Base Erosion and Profit Shifting (BEPS) Project. The amendments apply to the profit-seeking enterprises’ income tax returns starting with the 2017 tax year.

However, a Taiwan profit-seeking enterprise that is an affiliate of a multinational enterprise (MNE) group can be exempt from submission of the Master File, Country-by-Country Report (CbCR) and Local File, if the following criteria are met:
• The Taiwan profit-seeking enterprise is the Ultimate Parent Entity (UPE) of an MNE group, and the total consolidated revenue of the group in the preceding year was less than TWD27 billion.

A Taiwan profit-seeking enterprise that is an affiliate of an MNE group can be exempt from submission of the CbCR if the following criteria are met:
• The Taiwan profit-seeking enterprise is the Ultimate Parent Entity (UPE) of an MNE group, and the total consolidated revenue of the group in the preceding year was less than TWD1.5 billion.
• The UPE of the MNE group is not within the jurisdiction of Taiwan and one of the following conditions applies:
  — The jurisdiction in which the UPE is a tax resident has established the CbCR requirement, and the MNE group meets the safe harbor rules of the jurisdiction.
  — The jurisdiction in which the UPE is a tax resident has not established the CbCR Requirement, and the Surrogate Parent Entity (SPE) meets the safe harbor rules of the jurisdiction in which the SPE is a tax resident.
  — The jurisdiction in which the UPE is a tax resident has not established the CbCR requirement, there is no SPE, and the Taiwan safe harbor rules are met.

Even if the safe harbor rules are met, the Taiwan profit-seeking enterprise is still required to submit the Master File or CbCR to the tax authority on request for audit if the MNE group is obligated to submit these documents based on the request of the other tax jurisdiction.

F. Treaty withholding tax rates

Taiwan has entered into double tax treaties with the jurisdictions listed in the table below.

Taiwan has entered into international transportation income tax agreements with Canada, the European Union, Germany, Japan, Korea (South), Luxembourg, the Macau SAR, the Netherlands, Norway, Sweden, Thailand and the United States.

The following table lists the withholding tax rates under Taiwan’s double tax treaties. The rates apply only if the recipient is the beneficial owner of the income.

(a) The 10% rate applies to dividends paid to a company (other than a partnership) holding directly at least 25% of the capital of the payer. The 15% rate applies in all other cases.
(b) The 15% rate applies if the beneficial owner of the dividends is a collective-investment vehicle established in Luxembourg and treated as a body corporate for tax purposes in Luxembourg. The 10% rate applies in all other cases.
(c) For dividends paid to Singapore residents, the withholding tax on the dividends and the corporate income tax payable on the profits of the payer may not exceed 40% of the taxable income of the payer out of which the dividends are paid.
(d) The 5% rate applies if the beneficial owner of the dividends holds directly at least 10% of the capital of the payer. The 15% rate applies in all other cases.
(e) The 10% rate applies to dividends paid to a company (other than a partnership) holding directly at least 20% of the capital of the payer. The 15% rate applies to other dividends.
(f) The 5% rate applies if the beneficial owner of the dividends holds at least 25% of the capital of the payer. The 10% applies in all other cases.
(g) The 21% rate applies to dividends paid to nonresident corporations and non-resident individuals, effective from 1 January 2018 (see Section B).
(h) The 15% rate applies to interest on real estate investment trusts and real estate asset trusts. The 10% rate applies in all other cases.
(i) The 7% rate applies to interest on bank loans. The 10% rate applies in all other cases.
(j) The 15% rate applies if the beneficial owner of the interest is a collective-investment vehicle established in Luxembourg and treated as a body corporate for tax purposes in Luxembourg. The 10% rate applies in all other cases.
(k) The Singapore treaty does not provide a preferential withholding tax rate for interest payments.
(l) The 10% rate applies to interest received by financial institutions (including insurance companies). The 15% rate applies in all other cases.
(m) The 15% rate applies to interest on financial instruments (see Section A).
(n) The 5% rate applies to the royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies in all other cases.
(o) This treaty is not yet effective.
(p) The 5% rate applies to dividends paid to a company (other than a partnership) holding directly at least 25% of the capital of the payer. The 10% rate applies in all other cases.
(q) The 15% rate applies to dividends distributed by a German real estate investment company that is tax-exempt regarding all or part of its profits or that can deduct the distributions in determining its profits. The 10% rate applies in all other cases.
(r) The 3% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies in all other cases.

  Carryforward Unlimited

(a) The corporate income tax rate is 30%. The corporate income tax rate is reduced to 25% for companies newly listed on the Dar es Salaam Stock Exchange that issue at least 30% of their share capital to the public for three consecutive years from the date of listing. The corporate income tax rate is reduced from 30% to 10% for five consecutive years from the year of commencement of production for companies that have a newly established plant for assembling motor vehicles, tractors, fishing boats or outboard motors for boats and that have a performance agreement with the government of Tanzania. The corporate income tax rate is reduced from 30% to 20% for five consecutive years from the year of commencement of production for newly established entities that are engaged in the manufacturing of pharmaceuticals or leather products and that have a performance agreement with the government of Tanzania. Companies reporting tax losses for three consecutive years must pay an alternative minimum tax at a rate of 0.5% on the annual turnover in the third loss year.

(b) Capital gains are treated as business income for companies and are taxed at the regular corporate income tax rate of 30%.

(c) The 10% rate applies to dividends paid by unlisted companies to residents and nonresidents. The 5% rate applies to dividends paid by companies listed on the Dar es Salaam Stock Exchange and for dividends paid by a resident company to a resident company owning 25% or more of the shares in the payer of the dividends.

(d) This withholding tax applies to residents and nonresidents. Resident companies may credit the withholding tax against their annual corporate income tax. Interest paid by strategic investors to nonresident banks and resident financial institutions is exempt from withholding tax.

(e) This withholding tax applies to both residents and nonresidents.
(f) The 5% rate applies to residents, while the 15% rate applies to nonresidents. The withholding tax on management and professional fees (services fees) for resident persons is an advance tax creditable against the final income tax. The withholding tax on technical services provided to mining, oil or gas companies is a final tax. Also, see Section B.

(g) This is a final tax.

(h) This withholding tax applies to all supplies of goods to the government.

(i) This withholding tax applies to nonresidents only.

(j) This withholding tax applies to residents who pay a money transfer commission to a money transfer agent.

(k) This withholding tax applies to branches of foreign companies. Tax is levied on an annual deemed profit repatriation basis. Special rules apply to the calculation of the base.

B. Taxes on corporate income and gains

Corporate income tax. A company is considered resident for tax purposes if it satisfies either of the following conditions:

- It is incorporated or formed under the laws of Tanzania.
- Its management and control of its affairs is exercised in Tanzania at any time during the year of income.

Resident companies are subject to income tax on their worldwide income. Nonresident companies are subject to income tax on their Tanzanian-source income.

Rates of corporate tax. Both resident and nonresident companies are subject to income tax at a rate of 30%.

The corporate income tax rate is reduced from 30% to 25% for the first three years from the date of listing for companies that are newly listed on the Dar es Salaam Stock Exchange and that issue at least 30% of their share capital to the public.

Companies operating in the Export Processing Zone (EPZ) are exempt from corporate income tax for the first 10 years. They are also exempt from withholding tax on dividends, interest and rental payments.

The corporate income tax rate is reduced from 30% to 10% for five consecutive years from the year of commencement of production for companies that have a newly established plant for assembling motor vehicles, tractors, fishing boats or outboard motors for boats and that have a performance agreement with the government of Tanzania.

The corporate income tax rate is reduced from 30% to 20% for five consecutive years from the year of commencement of production for newly established entities that are engaged in the manufacturing of pharmaceuticals or leather products and that have a performance agreement with the government of Tanzania.

Alternative minimum tax. Companies reporting tax losses or utilizing loss carryforwards for three consecutive years must pay an alternative minimum tax at a rate of 0.5% on the annual turnover in the third loss year.

Capital gains. Capital gains are treated as business income for companies and are taxed at the corporate income tax rate. Direct and indirect share transfers are subject to capital gains tax. Disposals of mineral and petroleum rights are also subject to capital gains tax.
**Administration.** A company’s year of income is the calendar year. Companies may apply to the Commissioner General for the Tanzania Revenue Authority for approval of a different year of income.

Companies must file provisional tax returns by the end of the third month of their year of income and file their final tax returns within six months after the end of the year of income. The estimated tax must be paid in four equal installments, as set forth in the provisional return. The remaining balance of tax due (the difference between the actual tax and tax paid in installments) must be paid by the due date of filing the final return. The taxpayer’s estimate of taxable income may not be less than 80% of the company’s taxable income as finally determined for the year of income. The Commissioner of Income Tax may allow a lower estimate if justified by the facts and circumstances of the case. Companies may revise their provisional return and file a revised return in the 6th, 9th or 12th month of the year of income if new developments suggest an increase or decrease in income.

A penalty is imposed for a failure to file a return. The penalty equals the greater of the following:

- 2.5% of the amount of tax assessable less tax paid by the start of the period in which the return is due
- 15 currency points (1 currency point = TZS15,000)

Fraud related to a return is subject to a penalty of 50% of the tax shortfall if the statement or omission is made without reasonable excuse. The penalty is increased to 75% of the tax shortfall if the statement or omission is made knowingly or recklessly.

**Dividends.** A final withholding tax is imposed on dividends. A 10% withholding rate applies to dividends paid to residents and nonresidents. A 5% withholding tax rate applies to dividends paid by companies listed on the Dar es Salaam Stock Exchange and to dividends paid to resident companies that hold 25% or more of the shares in the payer of the dividends.

**Extractive industry.** Technical services provided by resident companies or branches to the extractive industry in mining or oil and gas are subject to a final withholding tax of 5%. For nonresident service providers, the withholding tax rate is 15%.

A special tax regime was introduced for the extractive industry, effective from 1 July 2016. Significant aspects of the regime are discussed below.

Under the regime, each separate mining operation and each separate petroleum right is treated as an independent business for corporate income tax purposes. Accounts should be prepared for each separate mining operation or each separate petroleum right.

Taxable income should be determined, and income tax should be paid for each separate mining operation and each separate petroleum right for each year of income.

Royalties paid under the Mining Act or Petroleum Act are not deductible for tax purposes.

Arrangements between separate mining and petroleum operations and the other activities of the person should reflect the arm’s-length principle.

Losses are ring-fenced for each mining and petroleum operation.
C. Determination of trading income

**General.** The audited financial statements serve as the starting point for computing taxable income. Expenses and losses are generally not deductible unless they are incurred wholly and exclusively in the production of income.

Certified financial statements must now be attached when filing a corporate income tax return.

**Inventories.** Inventories are valued at the lower of cost or net realizable value. The last-in, first-out (LIFO) method is not allowed.

**Provisions.** Provisions may not be deducted.

**Depreciation.** Depreciation computed for financial statement purposes is not deductible, but capital allowances are provided for depreciable assets, which are allocated to one of the eight classes. The following are the classes and the rates of the capital allowances.

<table>
<thead>
<tr>
<th>Class</th>
<th>Assets</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Computers and data handling equipment, together with peripheral devices; automobiles, buses and minibuses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than 7 tons; and construction and earth-moving equipment</td>
<td>37.5% (reducing-balance)</td>
</tr>
<tr>
<td>2</td>
<td>Buses with a seating capacity of 30 or more passengers; heavy general purpose or specialized trucks, trailers and trailer-mounted containers; railroad cars, locomotives and equipment; vessels, barges, tugs and similar water transportation equipment; aircraft; other self-propelling vehicles; plant and machinery used in agriculture or manufacturing; specialized public utility plant and equipment; and machinery irrigation installations and equipment</td>
<td>25% (reducing-balance)</td>
</tr>
<tr>
<td>3</td>
<td>Office furniture, fixtures and equipment; and any assets not included in another class</td>
<td>12.5% (reducing-balance)</td>
</tr>
<tr>
<td>4</td>
<td>No assets (the depreciation rules for the assets that had been in this class are discussed in the paragraphs after the table)</td>
<td></td>
</tr>
<tr>
<td>5</td>
<td>Buildings, structures and similar works of a permanent nature used in agriculture, livestock farming or fish farming</td>
<td>20% (straight-line)</td>
</tr>
<tr>
<td>6</td>
<td>Buildings, structures and similar works of a permanent nature other than those mentioned in Class 5</td>
<td>5% (straight-line)</td>
</tr>
</tbody>
</table>
Depreciable assets used in petroleum and mining operations are placed in a separate pool, which does not fall under the normal classes. The depreciation allowance with respect to mineral or petroleum operations is granted at the following rates.

<table>
<thead>
<tr>
<th>Year of income</th>
<th>Depreciation allowance</th>
</tr>
</thead>
<tbody>
<tr>
<td>First</td>
<td>20% of expenditure</td>
</tr>
<tr>
<td>Second</td>
<td>20% of expenditure</td>
</tr>
<tr>
<td>Third</td>
<td>20% of expenditure</td>
</tr>
<tr>
<td>Fourth</td>
<td>20% of expenditure</td>
</tr>
<tr>
<td>Fifth</td>
<td>20% of expenditure</td>
</tr>
</tbody>
</table>

Depreciable assets included in Class 4 were deleted, effective from 1 July 2016. However, the classes of depreciable assets were not renumbered when the above changes were introduced. To date, the law still provides for eight classes, despite the removal of depreciable assets that were under Class 4, and no amendment has been made with respect to the reference to Class 4 that is found under Class 7.

Plant and machinery in Categories 2 and 3 qualify for an initial capital expenditure allowance of 50% for the first year if they satisfy any of the following conditions:

- They are fixed in a hotel used for tourism services.
- They are fixed in a factory used for manufacturing.
- They are used in fish farming.

The maximum depreciable amount for a non-commercial automobile is TZS30 million.

**Relief for tax losses.** Companies may carry forward tax losses indefinitely. No carryback is allowed. Special rules for long-term contracts may apply. Loss carryforwards may offset only 70% of the profits from mineral and petroleum operations each year.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax (VAT)</td>
<td>18</td>
</tr>
<tr>
<td>Customs duties (imports may also be subject to VAT)</td>

<td>4.5</td>
</tr>
</tbody>
</table>
Nature of tax | Rate (%)  
--- | ---  
Social security; imposed on basic salary; rates depend on the respective fund; paid by  
Employer | 10/15  
Employee | 5/10  
Workers’ Compensation Fund; imposed on employers’ annual wage bill; employers must make monthly payments through deposits in the fund’s bank account; payments must be made on the last working day of the month after the month to which the payment relates  
Private sector employers | 1  
Public sectors employers | 0.5  
Railways Development Levy; imposed on customs value on importation of goods | 1.5  

E. Miscellaneous matters

Foreign-exchange controls. Tanzania does not impose foreign-exchange controls on current-account transactions, but the Bank of Tanzania must be notified of foreign capital-account transactions.

Transfer pricing. A company with controlled transactions of TZS10 billion (approximately USD4,300,000) or more in a tax year is required to file contemporaneous transfer-pricing documentation together with the final tax return. Taxpayers whose controlled transactions in a tax year do not reach the TZS10 billion threshold do not have to submit the contemporaneous transfer-pricing documentation with the final income tax return but must have it in place by the due date for filing the final income tax return and should submit it to the Tanzania Revenue Authority within 30 days on request.

A penalty is imposed for failure to prepare contemporaneous transfer-pricing documentation. The penalty is a minimum of 3,500 currency points, as prescribed from time to time by the Commissioner General for the Tanzania Revenue Authority. One currency point equals TZS15,000, which results in a penalty of TZS52,500,000 (approximately USD23,000).

F. Treaty withholding tax rates

Net Operating Losses (Years)
  Carryback 0
  Carryforward 5

* Certain types of interest are exempt from tax [see footnote (a) to Section F].
B. Taxes on corporate income and gains

Corporate income tax. Thai resident companies are subject to corporate income tax on their worldwide income. Thai resident companies are those incorporated in Thailand. Branches of foreign corporations are subject to Thai tax on Thailand-source income only.

Rates of corporate tax. Thai resident companies and branches of foreign corporations are subject to corporate income tax at a flat rate of 20% on taxable profits.

Progressive corporate income tax rates of 0%, 15% and 20% apply to locally incorporated companies with paid-up capital of not more than THB5 million and revenue of not more than THB30 million per year.

Tax incentives. Tax incentives are available in Thailand for International Headquarters (IHQs), Treasury Centers (TCs), International Trading Centers (ITCs) and International Business Centers (IBCs), if relevant conditions are met.

IHQs. Income derived by IHQs from qualified support services and licensing fees from intellectual properties provided and/or granted to qualified overseas affiliate companies is exempt from Thai corporate income tax. Service fees and licensing fees generated from qualified local affiliate companies are subject to a reduced corporate income tax rate of 10%.

TCs. TCs licensed by the Bank of Thailand and operating as part of an IHQ may be eligible for corporate income tax exemption on interest income and income from qualified TC services generated from qualified overseas affiliate companies. Interest income and treasury service fees generated from qualified local affiliate companies are subject to a reduced corporate income tax rate of 10%.

ITCs. Income derived by ITCs from sales of goods bought from a supplier outside Thailand and sold to a customer outside Thailand (out-out trading transactions) and service fees generated from other relevant services are exempt from Thai corporate income tax.

IBCs. On 28 December 2018, the Royal Decree regarding IBCs was published in the Royal Gazette and is effective from 29 December 2018. Major developments include parity of tax incentives on income earned from local and overseas associated enterprises, the removal of tax incentives under the IHQ, TC and ITC schemes. The existing IHQs, TCs and ITCs received grandfathered rights to maintain their privileges. No new IHQ, TC and ITC applications or licenses are allowed.

An IBC should be able to provide support services functions and/or financial management services under a treasury center license from the Bank of Thailand. The following are tax incentives available to IBCs:

- Reduced corporate income tax rate to 8%, 5% or 3%, based on the net profits from qualifying service fees and royalty income earned from its Thai and overseas associated enterprises, provided that it meets annual local spending requirements of THB60 million, THB300 million or THB600 million, respectively (see below).
• Exemption from corporate income tax on qualifying dividends received from its associated enterprises
• Exempt from Specific Business Tax (see Section D) on qualifying income from treasury services
• Entitled to a flat personal income tax rate of 15% for employment remuneration of qualifying expatriates working full time for the qualifying IBC
• Exemption from withholding tax on dividends distributed by the IBC to its overseas shareholders that are paid out of profits from the IBC’s operations that are subject to tax at a reduced corporate income tax rate and/or out of defined qualifying profits from the operations of the Regional Operating Headquarters (ROH) or the IHQ within one year after the conversion to an IBC is approved
• Exemption from withholding tax on qualifying interest paid by the IBC to an overseas loan provider in connection with a loan obtained for re-lending as a result of its treasury activities

The following are the conditions for qualifying as an IBC:
• Registered share capital of at least THB10 million at the end of each accounting year
• Providing qualifying support services or treasury services to its associated enterprises
• Employing at least 10 skilled full-time employees (or at least 5 employees if the IBC performs only a treasury center function)
• Minimum local spending requirement of at least THB60 million per accounting period unless converted from an ROH or IHQ (see below)
• Obtains approval from the Director-General of the Revenue Department

Qualifying IBCs are entitled to reduced corporate income tax rates of 8%, 5% or 3%, provided that is meets the minimum annual local spending requirements of THB60 million, THB300 million or THB600 million, respectively. However, for entitlement to the reduced 8% corporate income tax rate, no minimum local spending requirement is imposed on ROH Is (ROH Is are the ROHs registered under Royal Decree No. 405) that convert to IBCs, while ROH IIs (ROH IIs are the ROHs registered under Royal Decree No. 508) and IHQs that convert to IBCs are required to have minimum local spending of at least THB15 million per accounting year.

Capital gains. Capital gains are treated as ordinary business income subject to income tax.

Administration. Corporate income tax returns, together with the audited financial statements, must be filed with the Revenue Department within 150 days after the accounting year-end. Corporate income tax payments are due on the filing date.

Mid-year (interim) tax returns must be filed with interim tax payments within two months after the end of the first half of the accounting year. Listed companies, financial institutions and companies approved by the Director-General of the Revenue Department compute their interim tax based on actual operating results for the first half-year. Other companies compute their interim tax based on one-half of the estimated annual profit. These companies do not have to submit audited or reviewed financial statements.
The interim tax is creditable against the annual tax payable at the end of the year.

**Dividends**

*Received from resident companies.* In general, one-half of dividends received by resident companies from other resident companies may be excluded from taxable income. However, the full amount of the dividends may be excluded if either of the following applies:

- The recipient is a company listed on the Stock Exchange of Thailand.
- The recipient owns at least a 25% equity interest in the distributing company, provided that the distributing company does not own a direct or indirect equity interest in the recipient company.

These rules apply if the related shares are acquired not less than three months before receiving the dividends and are not disposed of within three months after receiving the dividends.

*Received from foreign companies.* A Thai company that owns an equity interest of at least 25% in a foreign company can exclude dividends received from such foreign company from its taxable profit if, on the date of receipt of the dividend, it has held the investment for at least six months and if the profit out of which the dividends are distributed is subject to income tax in the hands of the foreign company at a rate of at least 15%.

**Foreign tax relief.** Thailand has entered into double tax treaties with 61 countries. In general, under the treaties, foreign tax relief is limited to the lower of the foreign tax and the amount of Thai tax calculated on such income.

Foreign tax payable in non-treaty countries may be credited against Thai tax, limited to the Thai tax computed on the foreign income, provided the foreign tax meets the conditions set forth in the relevant measure. If the foreign tax is not used as a credit, it may be claimed as a deduction for income tax purposes.

**C. Determination of trading income**

**General.** Corporate income tax is based on audited financial statements, subject to certain adjustments.

In general, expenses are tax-deductible if they are incurred wholly and exclusively for the purpose of generating income. However, expenses created by means of provisions or allowances, such as those for bad debts or stock obsolescence, are not tax-deductible until they are actually used.

**Inventories.** Inventories must be valued at the lower of cost or market value. Cost may be determined using any generally accepted accounting method. After a method is adopted, a change to another method may be made only with approval of the Director-General of the Revenue Department.

**Depreciation and amortization allowance.** A company may depreciate its fixed assets under any generally accepted accounting method, provided the number of years of depreciation under the selected method is not less than the minimum prescribed period. However, after a method is adopted, it may not be changed unless
prior consent has been obtained from the Director-General of the Revenue Department. The following are the minimum prescribed periods applicable to some major fixed assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Time period</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>20 years</td>
</tr>
<tr>
<td>Furniture, fixtures, machinery, equipment and motor vehicles</td>
<td>5 years</td>
</tr>
<tr>
<td>Trademarks, goodwill, licenses, patents and copyrights (including software)</td>
<td>Over period of use (or 10 years if no period of use)</td>
</tr>
<tr>
<td>Computer hardware and operating software</td>
<td>3 years</td>
</tr>
</tbody>
</table>

**Relief for losses.** Operating losses may be carried forward for a period of five years. Loss carrybacks are not allowed.

**Groups of companies.** The Thai tax law does not include any provisions for consolidated treatment under which companies within a group may be treated as one tax entity. Each individual company must file its income tax return and pay its tax.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax, on goods sold, services rendered and imports</td>
<td>7</td>
</tr>
<tr>
<td>Specific Business Tax, on financial service and real estate businesses</td>
<td>Various</td>
</tr>
</tbody>
</table>

**E. Miscellaneous matters**

**Foreign-exchange controls.** On presentation of supporting documents, virtually all foreign-exchange transactions may be processed by a commercial bank.

**Transfer pricing.** Under transfer-pricing guidelines issued by the Thai Revenue Department, all sales or service transactions must be executed at an arm’s-length price, and the taxpayer is required to prepare and maintain contemporaneous documentation to substantiate the price. Acceptable transfer-pricing methods include the comparable uncontrolled price method, the resale price method, the cost-plus method and other internationally accepted methods. If the taxpayer fails to prove that a transaction challenged by the tax authorities was executed on an arm’s-length basis, additional tax can be assessed. Transactions between related parties are subject to particular scrutiny.

In addition, Thailand’s Transfer Pricing Act was published in the *Royal Gazette* on 21 November 2018 and will be effective from accounting years starting on or after 1 January 2019. The following are key features of the act:

- The tax authorities are granted the authority to assess additional revenue and/or expenses on transactions between related parties, for the purpose of calculating corporate income tax or adjusting assessable income.
• Regardless of having related-party transactions or regardless of the length of the relationship during the accounting period, related parties must prepare a report providing descriptions of the related-party relationships and disclosing the value of related-party transactions for each accounting period in accordance with the specified format and submit the report to the tax authorities within 150 days from the closing date of the accounting period. Taxpayers with annual revenue of less than THB200 million are exempt from the requirement to prepare and submit a report.

• Within five years from the date of filing the report, the tax authorities with the approval of the Director-General of the Revenue Department can request additional documents or evidence necessary to analyze the related-party transactions. The taxpayer is required to submit the additional documents within 60 days after receiving a request letter.

F. Treaty withholding tax rates

The rates in the table reflect the lower of the treaty rate and the rate under domestic tax law.

</table>

(a) The following types of interest are exempt from tax:
- Interest paid to a financial institution wholly owned by another state.
- Interest on certain foreign-currency loans brought into Thailand between 1 May 1979 and 28 February 1990.
- Interest paid by the government or a financial institution established by a specific law of Thailand for the purpose of lending money to promote agriculture, commerce and industry.
- Interest paid by the central bank or state enterprises on loans approved by the Ministry of Finance.

(b) The rate is reduced to 10% if the interest is paid to banks, financial institutions or insurance companies of the treaty countries.

(c) Interest paid to the government, subdivisions of contracting states or a central bank is exempt from tax.

(d) The withholding rate is 3% for interest on loans or credits granted for at least four years with the participation of a public financing institution to a statutory body or enterprise of the other contracting state, in relation to sales of equipment, or in relation to the survey, installation or supply of industrial, commercial or scientific premises, or public works.

(e) Interest paid to a financial institution wholly owned by the other contracting state is exempt.

(f) The withholding rate is 5% (10% for Pakistan) for royalties for copyrights of literary, artistic or scientific works.

(g) The withholding rate is 10% for royalties paid for patents, trademarks, designs, models, plans, or secret formulas or processes.

(h) Royalties and similar payments paid to the other contracting state or a state-owned company for films or tapes are exempt.

(i) Interest paid to residents of Switzerland with respect to loans guaranteed or insured under the Swiss provisions regulating the Export or Investment Risk Guarantee is exempt.

(j) The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of equipment, merchandise or services. Interest on debt obligations guaranteed or insured by the government is exempt.
The withholding rate is 5% (10% for Slovenia) for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including software and motion pictures and works on films, tape or other means of reproduction for use in connection with radio or television broadcasting. The withholding rate is 8% (10% for Slovenia) for royalties for the use of, or the right to use, industrial, commercial or scientific equipment.

The withholding rate is 5% for royalties paid for the use of, or the right to use, copyrights of literary, dramatic or scientific works, excluding cinematographic films or films or tapes used for radio or television broadcasting. The withholding rate is 8% for amounts paid under financial leases for the use of, or the right to use, industrial, commercial or scientific equipment.

The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of equipment, merchandise or services, except for sales between persons not dealing with each other at arm’s length. Under the New Zealand treaty, interest derived by the government of New Zealand or its central bank from the investment of official reserves is exempt from tax.

The withholding tax rate is 10% for royalties paid for the following:

- The use of or right to use, copyrights, industrial, scientific or commercial equipment, motion picture films, films or videotapes or other recordings for use in connection with television, and tapes or other recordings used in connection with radio broadcasting
- For the reception of, or the right to receive, visual images or sounds transmitted to the public by satellite, cable, optic fiber or similar technology
- For the use of, or right to use, in connection with television or radio broadcasting, visual images or sounds transmitted by cable, optic fiber or similar technology

Interest on loans made, guaranteed or insured by the government, central bank, agency or body wholly owned or controlled by the government is exempt from tax.

Interest is exempt from tax if it is paid on loans made, guaranteed or insured by the contracting state or by an authorized body of the state on behalf of the state or if it is paid on other debt claims or credits guaranteed or insured on behalf of the contracting state by an authorized body of the state.

The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of industrial, commercial, or scientific equipment or from sales on credit of merchandise between enterprises.

A withholding tax rate of 3% applies to royalties for the use of, or the right to use, copyrights of literary, dramatic, musical, artistic or scientific works, including software, cinematographic films and films or tapes used for radio or television broadcasting. A withholding tax rate of 10% applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience.

The withholding tax rate is 10% for royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.

The rate is reduced to 10% if the loan or debt claim generating the interest is guaranteed by the government, central bank, state general reserve fund, local authorities, or a body wholly owned by the government.

The withholding tax rate is 10% for royalties paid for copyrights of literary, artistic or scientific works and the right to use industrial, commercial and scientific equipment.

The withholding tax rate is 10% for royalties paid for managerial or consultancy services or for information concerning commercial, industrial, or scientific experience.

The withholding tax rate is reduced to 5% (10% for Philippines) if the beneficial owner holds directly at least 25% of the dividend-paying company.

The withholding tax rate is 8% for royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The rate is 10% for royalties in other cases.

The rate is 10% for interest paid on indebtedness resulting from sales on credit of equipment, merchandise or services, except for sales between persons not dealing with each other at arm’s length.

The withholding tax rate is 5% for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including software and motion pictures and works on films or other means of reproduction for use in connection with radio or television broadcasting. The rate is 10% for royalties for the use of, or the right to use, industrial, commercial or scientific equipment or patents.
(aa) Interest is exempt from tax if any of the following circumstances exists:
  • The interest is paid in connection with the sale on credit of merchandise or equipment.
  • This interest is paid on a loan or credit granted by a bank.
  • The interest is paid to the government including a political subdivision or local authority thereof, the central bank or a financial institution controlled by the government.
  • The interest is paid to a resident of the other contracting state in connection with a loan or credit guaranteed by the government including a political subdivision or local authority thereof, the central bank or a financial institution controlled by the government.

(bb) The withholding rate is 5% for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including software and cinema films, or films or tape for radio or television broadcasting. The withholding rate is 8% for royalties for the use of, or the right to use, patents, trademarks, designs, models, plans, secret formulas or processes, or industrial, commercial, or scientific equipment. The withholding tax rate is 10% for other types of royalties.

(cc) The maximum withholding tax rate for all types of royalties is 10%.

  - Carryforward: Unlimited |

(a) A business levy and a green fund levy are also imposed. Companies licensed to carry on “banking business” or the “business of banking” under the Financial Institutions Act (these terms are defined identically under the act) are subject to a corporation tax rate of 35%. The rate for companies engaged in the downstream petrochemical sector and related sectors is 35%. Upstream petroleum operations are taxed under a separate regime. See Section B.

(b) See Section B.

(c) These withholding taxes apply to payments to nonresidents only.
(d) The 5% rate applies to dividends paid to corporations owning 50% or more of the voting power of the distributing company. The 10% rate applies to other dividends.

(e) Applicable to payments to companies and individuals.

(f) Applicable to deemed remittances of profits to overseas head office.

B. Taxes on corporate income and gains

Corporation tax. Companies resident in Trinidad and Tobago are subject to tax on their worldwide income from all sources. Relief with respect to taxation suffered on foreign-source income in an overseas jurisdiction may be available under a double tax treaty. Nonresident companies engaged in business in Trinidad and Tobago are subject to tax on income directly or indirectly accruing in or derived from Trinidad and Tobago.

Rates of tax. For the 2019 year of income, corporation tax is chargeable at a rate of 30%.

The Corporation Tax Act provides for a business levy to be imposed on the annual gross sales and receipts of companies, including branches of nonresident companies operating in Trinidad and Tobago. The rate of the business levy is 0.6%. The business levy is credited against the corporation tax liability. It is the final liability if the corporation tax liability is less than the business levy. Certain companies are exempt from the levy, including the following:

- Companies or statutory corporations exempt from corporation tax under any act
- Certain government corporations under the jurisdiction of the Public Utilities Commission or exempted by order of the President
- Companies subject to tax under the Petroleum Taxes Act

A company is not subject to the business levy for the first 36 months following the date of registration of its business or if its gross sales or receipts do not exceed TTD360,000 in the year of income.

The Miscellaneous Taxes Act provides for a green fund levy to be imposed on the gross sales and receipts of companies engaged in business in Trinidad and Tobago. The rate of the green fund levy is 0.3%. The green fund levy may not be credited against the corporation tax liability or claimed as a tax deduction in determining the company’s taxable income.

The corporation tax rate for companies engaged in the downstream petrochemical sector and related sectors is 35%. Companies engaged in upstream petroleum operations are subject to various taxes and imposts, of which the most significant are petroleum profits tax of 50%, unemployment levy of 5% and supplemental petroleum tax at rates based on the weighted average crude oil price. Upstream petroleum companies are also subject to a different system of tax administration.

For companies licensed to carry on “banking business” or the “business of banking” under the Financial Institutions Act (these terms are defined identically under the act), a 35% rate applies for the 2019 year of income.
Generally, the profits from a long-term insurance business of an assurance company that is subject to tax are the profits derived from the investment of its Statutory Fund.

The rate of corporation tax on the profits from a long-term insurance business for the 2019 year of income is 15%. However, if such profits are transferred to the shareholders’ account, such transferred amounts are subject to tax at a rate of 25%.

**Capital gains.** Capital gains are generally not subject to tax. Depending on the class of asset and the nature of the company’s business activities, however, the profit or loss on depreciable assets disposed of after being held for more than 12 months may require a balancing adjustment (see Section C).

Short-term capital gains are profits on the disposal of assets within 12 months of their acquisition. Although these gains are of a capital nature, they are generally subject to tax. Profits derived from the partial disposal of an asset within 12 months of acquisition are also subject to tax. For the 2019 year of income, the applicable rate is 30%.

**Administration.** The tax year is the calendar year. Tax is calculated on the profits for the accounting period that ends during the tax year. For each quarter, a company is required to pay a green fund levy installment, as well as either a corporation tax or business levy installment, whichever is greater. The quarterly payments must be made by 31 March, 30 June, 30 September and 31 December in each tax year. Quarterly payments of corporation tax are determined based on the taxable income for the preceding accounting period. Business levy and green fund levy installments are based on the actual gross sales or receipts of the company for the relevant quarter. The business levy calculation excludes income that is exempt for corporation tax purposes such as dividends received from Trinidad and Tobago resident companies, but the green fund levy calculation takes into account such income.

If the current year’s profits exceed the preceding year’s profits, a company must pay by 31 December the sum of the tax liability on the preceding year’s taxable profits plus 80% of the increase in tax liability over the preceding year. Annual tax returns must be filed by 30 April in the year following the tax year, and any balance of tax due is payable at that time.

If the balance of tax due is not paid by the 30 April deadline, interest accrues at a rate of 20% on the outstanding amount beginning on 1 May. A grace period to 31 October is granted for the filing of the tax return. If the return is not filed by 31 October, a penalty of TTD1,000 accrues beginning 1 November for each six-month period or part of such period that the return remains outstanding.

**Dividends.** Dividends received from nonresident companies out of profits not derived from or accruing in Trinidad and Tobago are subject to tax. Dividends received by resident companies from other resident companies are tax-exempt. Dividends paid to nonresident companies and individuals are generally subject to a withholding tax of 10%. The rate is reduced to 5% if the recipient is a corporation owning 50% or more of the voting power of the distributing company.
Double tax relief. Bilateral agreements have been entered into between the government of Trinidad and Tobago and the governments of certain other countries to provide relief from double taxation. These agreements assure taxpayers that their trade or investment in the other countries is free from the deterrent of double taxation. Relief from double taxation is achieved by one of the following two methods:

- Exemption or a reduced rate on certain classes of income in one of the two countries concerned.
- Credit if the income is fully or partially taxed in the two countries. The tax in the country where the income arises is allowed as a credit against the tax on the same income in the country where the recipient is resident. The credit is the lower of the Trinidad and Tobago tax or the foreign tax on the same income.

C. Determination of taxable income

General. The assessment is based on financial statements prepared according to international accounting standards, subject to certain adjustments.

To be deductible, expenses must be incurred wholly and exclusively in the production of income. The deduction for business meals and entertainment expenses is limited to 75% of actual expenses. Deductions for management charges (now more broadly defined) paid to a nonresident company may not exceed 2% of the payer’s total expenses, exclusive of such charges, capital allowances and expenses not allowed under the Corporation Tax Act.

Donations made under a registered deed of covenant to an approved charity that are actually paid during the year of income are deductible, up to a maximum of 15% of the total income of the company (as defined in the law).

Inventories. Inventory may be valued at cost or market value, whichever is lower. A method of stock valuation, once properly adopted, is binding until permission to change is obtained from the Board of Inland Revenue.

Bad debts. Trading debts that have become bad, and are proven to be so to the satisfaction of the Board of Inland Revenue, may be deducted in determining taxable income. In addition, doubtful debts are deductible to the extent that they have become bad during the year. If these debts are subsequently collected, they are considered to be income subject to tax in the year of recovery.

Tax depreciation (capital allowances)

Depreciation (wear-and-tear) allowances. Depreciation is calculated on the depreciated value of fixed assets at the beginning of each accounting year.

Industrial buildings qualify for a depreciation allowance of 10% under the declining-balance method. Buildings completed before 1 January 1995 that are used in retail or wholesale trade or as office buildings or rental properties are not entitled to any depreciation allowances, unless they are used exclusively to house plant and machinery and the amounts claimed for the depreciation allowance are reasonable.

Capital expenditure incurred on the construction of a building or structure completed on or after 1 January 1995 and capital
improvements made to buildings or structures on or after that date qualify for a 10% depreciation allowance under the declining-balance method.

Other assets are depreciated using the declining-balance method. The depreciation rates vary depending on when the assets were acquired. The following are the applicable rates for assets acquired on or after 1 January 1995.

<table>

<td>40</td>
</tr>
</tbody>
</table>

Balancing adjustments. Proceeds from disposals of assets are deducted from the residual value of the pool for that particular class of assets. Under the pool system, balancing charges arise if the value in the pool results in a credit balance, and balancing allowances arise only on the disposal of all of the assets in a particular class.

Initial allowance. A 10% initial allowance is granted on acquired industrial buildings that are used in manufacturing. Machinery and equipment used in manufacturing also qualify for an initial allowance at a rate of 90%. The rate of the initial allowance is reduced to 20% for plant and machinery used in the production of sugar, petroleum or petrochemicals or in an industry enjoying concessions under the Fiscal Incentives Act.

The initial allowance reduces the asset’s value for purposes of depreciation in subsequent periods.

Relief for losses. Losses carried forward can be written off to the full extent of taxable profits for the tax year. The unrelieved balance can be carried forward indefinitely. No loss carryback is allowed.

Groups of companies. Under the provisions of the Corporation Tax Act, a company within a group of companies (surrendering company) may surrender its current year trading loss (exclusive of capital allowances) to another company (or companies) within the same group (claimant company). The claimant company may then claim a deduction with respect to the trading loss against its taxable profits.

To qualify for group relief, both the surrendering company and the claimant company must be resident in Trinidad and Tobago. Two companies are members of the same group if one is a wholly owned subsidiary of the other or both are wholly owned subsidiaries of a third company. The surrendering company and the claimant company must be members of the same group throughout the respective accounting periods of each of the companies. If the claimant company and the surrendering company do not have coterminous year-ends, the amount of the current year losses available for setoff and relief is restricted to the accounting period that is common to both the surrendering company and the claimant company.
The claimant company may claim group relief if it has used all of its available capital allowances and offset its loss brought forward from the prior year(s) of income against its current year taxable income. The amount of the trading losses that any one claimant company may claim as a deduction is limited to 25% of the tax that would have been payable by the claimant company had the relief not been granted.

Any unrelieved current year losses of the surrendering company may be carried forward indefinitely and be written off against its future taxable income.

**D. Value-added tax**

A value-added tax (VAT) applies to most products supplied and services rendered in Trinidad and Tobago. The standard rate of VAT is 12.5%. A 0% rate applies to certain items, including exports. Imports of inputs by highly capital-intensive manufacturing corporations are exempt from VAT if the corporation is declared an approved enterprise under the Fiscal Incentives Act.

Companies and other businesses are required to register for the tax if their turnover exceeds a stipulated threshold as specified in the Value Added Tax Act. The VAT threshold is TTD500,000 a year.

The Value-Added Tax Act allows the tax authorities to offset VAT refunds against any other tax liability, such as corporation tax or income tax.

**E. Miscellaneous matters**

**Foreign-exchange controls.** Trinidad and Tobago has a floating exchange-rate regime. Commercial banks and licensed foreign-exchange dealers set the exchange rate. Residents may hold foreign currencies for their own account. Profits may be repatriated without the approval of the Central Bank of Trinidad and Tobago.

**Debt-to-equity rules.** In general, no thin-capitalization rules are imposed in Trinidad and Tobago. However, if a local company pays or accrues interest on securities issued to a nonresident company and if the local company is a subsidiary of, or a fellow subsidiary in relation to, the nonresident company, the interest is treated as a distribution and may not be claimed as a deduction against the profits of the local company.

**F. Treaty withholding tax rates**

The following table lists the withholding tax rates under Trinidad and Tobago’s tax treaties. If the treaty rates are higher than the rates prescribed in the domestic law, the lower domestic rates apply.

(a) The rate applies to interest paid to banks and financial institutions. Interest paid to other recipients is taxed at 15%.

(b) See footnote (d) to Section A.

(c) The lower rate applies if the recipient is a corporation owning 25% or more of the voting power of the distributing company.

(d) The lower rate applies if the recipient is a corporation owning 10% or more of the voting power of the distributing company.

(e) The lower rate applies to interest paid on deposits, commercial debts and borrowings from banking enterprises.

(f) The listed countries have ratified the Caribbean Community and Common Market (CARICOM) double tax treaty.

(g) The lower rate applies if the recipient is a company holding directly at least 10% of the capital of the distributing company.

(h) The lower rate applies if the recipient is a company holding directly or indirectly at least 25% of the capital of the distributing company.

(i) The 0% rate applies if the recipient is a company holding directly at least 50% of the capital of the distributing company. The 5% rate applies if the recipient is a company holding directly at least 25% of the capital of the distributing company.

(a) This is the standard rate of corporate income tax. Oil service companies, banks, financial institutions (for example, insurance companies, including mutual insurance companies), telecommunication companies, car dealers, large commercial enterprises, and franchisees of foreign brands and marks are subject to corporate income tax at a rate of 35%. Handicraft, agricultural and fishing companies are subject to corporate income tax at a rate of 10%. For exporting companies that have completed their full exemption period or that have been established since 2014, benefits from exportations realized on or after 1 January 2014 are subject to corporate income tax at a rate of 10%. However, under the 2019 Finance Act, exportation tax incentives will be progressively suppressed but will remain applicable until 31 December 2020. The corporate income tax rate is 20% for companies that float on the Tunisian stock exchange for the first five years beginning from the listing year if they open up 30% of their capital to the public. Under the 2017 Finance Act, the 20% rate is reduced to 15% for the companies that float on the Tunisian stock exchange starting from 1 January 2017. Under the 2018 Finance Act, a 20% corporate income tax also applies to companies engaged in transformation and purchasing for resale activities that have annual turnover exclusive of taxes not exceeding TND1 million and companies engaged in services...
activities and non-commercial professions that have annual turnover exclusive of taxes not exceeding TND500,000.

(b) Payments to beneficiaries resident in tax havens are subject to a 25% rate.

(c) This tax applies to payments to residents and nonresidents.

(d) The rate is 10% for interest paid on loans made by nonresident banks.

(e) This tax applies to payments to nonresidents. For further details, see Section B.

(f) The applicable rate depends on the nature of the beneficiary and service.

(g) Management fees paid to residents are subject to withholding tax at a rate of 0% if the amount does not exceed TND1,000 and if they do not represent fees.

(h) See Section B.

B. Taxes on corporate income and gains

Corporate income tax. Companies are subject to tax on profits derived from establishments located in Tunisia and on profits that are deemed to be derived in Tunisia under double tax treaties.

Tunisian-source income that is not realized within the framework of a Tunisian establishment, such as interest and royalties, is subject only to final withholding taxes (see Royalties).

Tax rates. The standard rate of corporate income tax is 25%.

Oil service companies, banks, financial institutions (for example, insurance companies, including mutual insurance companies), telecommunication companies, car dealers, large commercial enterprises, and franchisees of foreign brands and marks (for which the integration level is equal to or greater than 30%) are subject to corporate income tax at a rate of 35%.

The corporate income tax rate is 20% for companies that float on the Tunisian stock exchange for the first five years beginning from the listing year if they open up 30% of their capital to the public. Under the 2017 Finance Act, the 20% rate is reduced to 15% for the companies that float on the Tunisian stock exchange starting from 1 January 2017.

A 20% corporate income tax applies to companies engaged in transformation and purchasing for resale activities that have annual turnover exclusive of taxes not exceeding TND1 million and companies engaged in services activities and non-commercial professions that have annual turnover exclusive of taxes not exceeding TND500,000.

The following companies are subject to corporate income tax at a rate of 10%:

• Artisanal, fishing, agricultural and fisheries vessels equipment companies
• Purchasing offices for retail sales companies organized in the form of cooperatives
• Service cooperatives formed between producers for the wholesaling of their production
• Consumer cooperatives governed by the general statute of cooperation
• Commercial and industrial projects benefiting from the youth employment program or the national promotion fund for crafts and small trades
For companies that have completed their full exemption period or that have been established since 2014, benefits from exportations realized on or after 1 January 2014 are subject to corporate income tax at a rate of 10%. However, under the 2019 Finance Act, the export operations tax incentives will be progressively suppressed but will remain applicable until 31 December 2020.

A new corporate income tax rate of 13.5% applies to income from certain activities. This rate applies to local profits and revenues and to those derived from exportation and realized from 1 January 2021 will be reportable during 2022.

The new 13.5% applies to income derived by the following on or after 1 January 2021:
- Companies in the electronic, electrical and mechanical industries.
- Companies in the automotive, aeronautical, marine and railway industries, and their component industries.
- Cable manufacturing companies.
- Pharmaceutical companies and medical device manufacturers.
- Companies in the textile, clothes, leather and footwear industry.
- Companies in the food industry.
- Call centers.
- Information technology and software development renewal service providers.
- International trading companies operating in accordance with the law governing them.
- Companies engaged in the wrapping and packaging of products.
- Companies engaged in the provision of logistical services in a concomitant manner (that is, the services are provided as an overall package). The list of such services is fixed by a government decree.
- Companies in the plastic products industry.

Service providers in the hydrocarbon sector as well as sales and services intended for foreign distribution are subject to a corporate income tax rate of 13.5% instead of 10%. The new rate of 13.5% will apply to profits realized from 1 January 2021 will be reportable during 2022.

Under the 2019 Finance Law, the minimum corporate income tax due is 0.2% of annual turnover inclusive of all taxes and 0.1% of annual turnover from which profits are subject to corporate income tax at a rate of 10% or 13.5%.

The 0.2% minimum corporate income tax due in 2014 may be credited against the corporate income tax due for the next five financial years, but it is not refundable. The 2015 Financial Law eliminated the possibility of deducting the 0.2% minimum tax in the fifth year.

Tax benefits, such as total or partial exemptions from some taxes and duties, may be granted to companies such as those established in a Regional Development Areas or companies incorporated during 2018 and 2019.

Social Contribution of Solidarity. The 2018 Financial Act introduced a new Social Contribution of Solidarity for the companies and enterprises subject to corporate income tax, as well as companies not subject to corporate income tax.
This contribution is imposed at a rate of 1% of the taxable income and profits. The amount due for companies not subject to corporate income tax is TND200.

The Social Contribution of Solidarity applies to income and profits realized on or after 1 January 2018.

**Cyclical tax on banks, financial institutions and insurance companies, including reinsurance companies.** The 2018 Finance Act introduced a cyclical tax that is imposed in on the following:

- Banks and financial institutions, as defined in Law No. 2016-48, dated 11 July 2016, except payment institutions
- Insurance companies, including reinsurance companies, undertaking their activities according to the provisions of the Insurance Code

The cyclical tax is imposed at the following rates:

- 5% of the profits serving for the calculation of the corporate income tax of which the deadline of declaration occurs during 2018, with a minimum tax of TND5,000
- 4% of the profits serving for the calculation of corporate income tax of which the deadline of declaration occurs during 2019, with a minimum tax of TND5,000

**Capital gains.** Capital gains are included in ordinary income and are taxed at the regular corporate income tax rate. For nonresident and non-established companies in Tunisia, capital gains derived from the sale of shares is subject to withholding tax at a rate of 25%, which is levied on the difference between the sales price and the acquisition price, reduced by the expenses incurred on the sale including the share premium. In all cases, the tax on capital gains may not exceed 5% of the sales price.

As an option, a tax return on capital gains may be filed.

**Administration.** The financial year is generally the calendar year.

Tax returns must be filed by the 25th day of the third month following the end of a company’s financial year. Consequently, for companies using the calendar year as their financial year, tax returns are due by 25 March. For companies subject to mandatory audit, this return can be considered a temporary tax return and a definitive return must be submitted by 25 June.

Starting from the second year of their activities, companies must pay tax in three installments. Each installment is equal to 30% of the corporate income tax due for the preceding financial year. The installments are payable by companies during the first 28 days of the sixth, ninth and twelfth months following the end of the financial year. The balance of tax due must be paid when a tax bill (a document that specifies the amount of tax due and when the tax must be paid) is filed.

**Dividends.** Dividends paid to resident and nonresident individuals and nonresident entities in Tunisia are subject to a 10% withholding tax.

Profits realized in Tunisia by Tunisian establishments of foreign companies are assumed to be distributed for the benefit of the partners not resident in Tunisia and are accordingly subject to the 10% withholding tax for distributions. This withholding tax is
imposed at a rate of 25% if the establishments have their head offices in tax havens.

**Royalties.** Subject to the provisions of double tax treaties, a 15% withholding tax is imposed on royalties paid to nonresidents. This tax applies to the following types of payments:

- Copyright royalties
- Payments for the use of, or the right to use, patents, trademarks, designs, models, plans, formulas, manufacturing processes and movies, including proceeds received from sales of such items
- Payments for the use of, or the right to use, industrial, commercial, agricultural, harbor or scientific equipment, except for amounts paid to charter a plane or vessel for international operations
- Payments for information concerning industrial, commercial or scientific experience
- Payments for technical or economic studies or for technical assistance

**Foreign tax relief.** Tunisia does not grant any relief for foreign taxes.

**C. Determination of trading income**

**General.** Taxable income is based on financial statements prepared in accordance with generally accepted accounting principles, subject to certain adjustments.

Business expenses are generally deductible unless specifically disallowed by the tax law. Expenses that are deductible include, but are not limited to, the following:

- All types of expenses relating to production or the operation of a business, such as salaries and wages, and raw materials
- Tax depreciation (see Tax depreciation)
- Attendance fees paid to members of the board of directors or the supervisory board
- Interest paid to shareholders on loans if the amount of the loan does not exceed 50% of authorized capital, if the interest rate does not exceed 8% and if the share capital is fully paid up
- Donations and subsidies paid to charities and organizations established for the public good that are engaged in philanthropic, educational, scientific, social or cultural activities, up to a maximum deduction of 0.2% of gross turnover
- Amounts paid to social funds established for employees in accordance with the law
- Gifts and meal expenses, up to a maximum deduction of the lower of 1% of annual gross income or TND20,000
- Sponsorships allocated to the incorporation and the maintenance of green spaces as well as family and rural parks, within the framework of conventions concluded to this effect with the ministry in charge of the environment or the ministry in charge of infrastructure and housing, are deductible in determining the base subject to corporate income tax, up to the threshold of TND150,000 per year

Expenses that are not deductible include, but are not limited to, the following:

- Fines, forfeitures and penalties of any kind, as well as transactions designed to avoid the application of higher penalties
• Charges on passenger cars of more than nine horsepower
• Expenses related to aircraft, pleasure craft and second homes
• Expenses amounting to over TND5,000 that are paid in cash
• Charges invoiced by persons established in tax havens

Inventories. Inventories are valued at cost.

Provisions. Doubtful debts of up to TND100 (TND500 for banks) per debtor are deductible if they were due at least one year prior to the date on which they were written off and if the company has had no further business relationship with the debtor.

The following provisions are deductible, up to a maximum deduction of 50% of taxable income:
• Reserves for doubtful debts for which recovery is being pursued in the courts
• Provisions for finished goods
• Provisions for depreciation of shares of listed companies

Banks may deduct bad debt provisions from their tax base without any limit. This deduction can result in a tax loss.

Tax depreciation. Under the Tunisian Tax Code, depreciation must be computed using the straight-line method. Depreciation is deductible only if it is recorded in the accounts.

Standard depreciation rates allowed in Tunisia include, but are not limited to, the following.

For equipment other than transportation equipment, the depreciation rates may be increased by 50% if the equipment is used at least 16 hours a day and may be doubled if it is used 24 hours a day.

The costs of setting up a business may be amortized at a rate of 33% if the costs are very high. Otherwise, 100% of the costs may be deducted in the year of expenditure. Assets worth less than TND200 are fully deductible in the year of acquisition.

The following types of depreciation are not deductible:
• Depreciation of assets exceeding an amount of TND5,000 that are acquired for cash
• Depreciation of aircraft, pleasure craft and second homes
• Depreciation of land and ongoing businesses
• Depreciation that exceeds the maximum allowed rates
• Depreciations of passenger cars with more than nine horsepower
• Depreciation of assets acquired from persons established in tax havens
Relief for losses. Losses may be carried forward five years, but may not be carried back. However, losses related to depreciation may be carried forward indefinitely.

Groups of companies. Tunisian law provides for the fiscal integration of related parties equivalent to a consolidated filing position if certain conditions are satisfied.

D. Other significant taxes

The following table summarizes other significant taxes.

E. Miscellaneous matters

Foreign-exchange controls. For companies wholly or partially owned by nonresidents, the remittance of benefits, dividends, attendance fees and interest payments to nonresidents is guaranteed. Tunisian branches of foreign companies may freely remit their after-tax profits. Remittances must be made through a registered intermediary, which is generally a bank. Tunisian banks may obtain foreign loans not exceeding TND10 million a year. Tunisian companies other than banks may obtain foreign loans up to TND3 million per year.

Transfer pricing. The 2019 Finance Act established new rules for the determination of transfer prices and a new definition of entities’ dependency and control.
For the purpose of determining the tax due by resident or established enterprises in Tunisia that are dependent on or control other enterprises belonging to the same group, the profits indirectly transferred to such enterprises either by raising or lowering the prices of transactions, or by any other means, are incorporated into the results of these enterprises.

Indirectly transferred profits are determined by comparison with those that would have been realized in the absence of any arm’s-length or control relationship. The condition of dependence or control referred to above is not required if the transfer of profits is made with enterprises resident or established in a state or territory whose tax system is privileged.

Dependency or control relationships are deemed to exist between companies if either of the following circumstances exists:

• One company directly or indirectly holds more than 50% of the share capital or voting rights of another enterprise or exercises the decision-making power of such enterprise.

• Companies are subject to the control of the same undertaking or the same person under the conditions mentioned in the first bullet above.

In addition, Article 30 of the 2019 Finance Act provides that companies resident or established in Tunisia that are controlled by other companies or that control other companies under Article 48 septies of the Personal and Corporate Income Tax Code (PCITC) and whose gross annual turnover is equal to or greater than TND20 million are required to submit a transfer-pricing annual return within the timeframe for filing the annual corporate income tax return by using reliable electronic means according to a model established by the administration. In addition, these entities must present to tax authorities the transfer-pricing documentation when requested during a comprehensive tax audit.

Country-by-country reporting. Companies that are established in Tunisia and that fulfill all of the conditions fixed by the law are required to file within 12 months after the year-end date by any reliable electronic means, a Country-by-Country Report, based on a model established by the tax administration. The country-by-country declaration is subject to reciprocity through the automatic exchange with the states that have concluded an agreement with Tunisia for this purpose. These provisions are effective for financial years beginning after 1 January 2020.

</table>

(a) The rate is 10% if the recipient is a company that holds at least 25% of the capital of the payer.
(b) Tunisia applies a 15% rate instead of the highest rate.
(c) Dividends are taxed at the domestic rate of the country from which the dividends originate.
(d) The rate is 5% if the beneficial owner of the dividends is a company that holds directly at least 50% of the capital of the payer.
(e) The rate is 15% if the recipient is a company that owns at least 25% of the capital of the payer.
(f) The rate is 12% if the recipient is a company that owns at least 25% of the capital of the payer.
(g) The rate is 12% if the beneficial owner is a company that controls directly at least 25% of the voting power of the payer.
(h) The rate is 14% if the recipient is a company that owns at least 25% of the capital of the payer.
(i) Taxed at the domestic rate of the country of domicile of the recipient.
(j) The 10% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties paid for the use of or right to use the following:
  • Technical and economic studies
  • Cinematographic and television films
• Patents, trademarks, designs and models, plans, and secret formulas and processes
• Industrial, commercial and scientific equipment
• Information concerning agricultural, industrial, commercial or scientific experience

(k) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works. The 15% rate applies to royalties or other amounts paid for the use of or right to use the following:
• Patents, designs and models, plans, and secret formulas and processes
• Information relating to industrial, commercial or scientific experience
• Technical and economic studies
• Technical assistance relating to the use of the items mentioned above
The 20% rate applies to royalties or other amounts paid for the use of or right to use trademarks, cinematographic and television films, and agricultural, industrial, harbor, commercial or scientific equipment.

(l) The 20% rate applies to royalties paid for the use of or right to use trademarks, cinematographic and television films or videotapes for television, and industrial, harbor, commercial or scientific equipment. The 15% rate applies to other royalties.

(m) The 0% rate applies to amounts paid to a public body of the other contracting state for the use of cinematographic films or radio and television broadcasts. The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the use of the following:
• Patents, designs and models, plans, and secret formulas and processes
• Information relating to industrial, commercial or scientific experience
• Technical and economic studies
The 20% rate applies to royalties or other amounts paid for the use of or right to use trademarks, cinematographic and television films, and agricultural, industrial, harbor, commercial or scientific equipment.

(n) The 10% rate applies to royalties or other amounts paid for the use of or right to use the following:
• Copyrights of literary, scientific or artistic works, but not including cinematographic and television films
• Information concerning agricultural, industrial, commercial or scientific experience
• Economic and technical studies
The 15% rate applies to royalties paid to use patents, trademarks, designs and models, plans, secret formulas and processes, and cinematographic and television films.

(o) The 5% rate applies to royalties relating to literary, scientific or artistic works. The 16% rate applies to royalties relating to trademarks, cinematographic and television films, or industrial, commercial or scientific equipment. The 12% rate applies to other royalties.

(p) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the use of patents, designs and models, plans, and secret formulas and processes; information relating to industrial, commercial or scientific experience; or technical or economic studies. The 20% rate applies to royalties or other amounts paid for the use of or the right to use trademarks; cinematographic and television films; and agricultural, industrial, harbor, commercial or scientific equipment.

(q) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, not including motion picture and television films. The 15% rate applies to other royalties.

(r) The 10% rate applies to royalties paid for the use of or the right to use industrial, commercial or scientific equipment, or to remuneration for the performance of accessory technical assistance for the use of property or rights described above, to the extent such technical assistance is performed in the contracting state where the payment for the property or right has its source. The 15% rate applies to royalties or other amounts paid for the use of or right to use copyrights of literary, artistic and scientific works, including cinematographic and television films and videotapes used in television broadcasts; patents, trademarks, designs and models, plans, and secret formulas and processes; and information relating to industrial, commercial or scientific experience.

(s) The 10% rate applies if the beneficial owner of the interest is a bank or other financial institution. The 12% rate applies to other interest.

(t) Under Tunisian domestic law, dividends are not subject to tax. Consequently, withholding tax is not imposed on dividends paid from Tunisia to other countries.
A 10% rate applies to interest paid to banks.

The rate is 0% if the beneficiary of the dividends owns at least 10% of the payer.

For further details, see Section B.

Interest is taxed at the domestic rate of the country from which the interest originates.

Royalties are taxed at the domestic rate of the country from which the royalties originate.

The 5% rate applies to interest paid to banks.

The 5% rate applies to payments for technical and economic studies as well as for technical assistance.

The 10% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer.

The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, scientific or artistic works including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the following:

- The use of patents, designs and models, plans, and secret formulas and processes
- Information relating to industrial, commercial or scientific experience
- Technical or economic studies
- Technical assistance
- The use of, or the right to use, trademarks and industrial, commercial or scientific equipment

Dividends are exempt from tax if the beneficial owner of the dividends is a company that holds at least 25% of the capital of the payer.

The 10% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer.

This rate is 25% if the beneficiary is resident in a jurisdiction listed as a tax-haven country in a decree. The tax-haven list includes the following jurisdictions.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Companies whose legal or business headquarters (as stated in their articles of association) are located in Turkey or whose operations are centered and managed in Turkey are subject to corporation tax on their worldwide income. In Turkish tax legislation, they are described as full liability taxpayers; they are also known as resident companies.

Taxable income of limited liability taxpayers (nonresident companies or taxpayers other than full liability taxpayers) is comprised of the following:

- Professional fees obtained in Turkey
- Profits from commercial, agricultural and industrial enterprises in Turkey (if they have an establishment or a permanent representative in Turkey)
- Income arising from rental of real estate, rights and movable property in Turkey
- Income obtained in Turkey from various types of securities
- Other income and revenue obtained in Turkey
Rates of corporate tax. The effective corporate tax rate is 22% for the 2018, 2019 and 2020 tax years. However, incentive programs provide for reduced corporate tax rates for income from the investments supported (see Tax incentives).

Tax incentives. Incentive regulations provide for a wide range of incentive and support elements for certain investments with incentive certificates, including reduced corporate tax rates, government support for interest on loans, government support for employees’ and employers’ shares of social security premiums, government support for income tax for wages, value-added tax (VAT) and customs duty exemptions, VAT refund support and allocation of treasury-owned lots.

The incentive and support elements vary according to the type, sector, subject, size and place of the investment.

Fifty percent of the following types of income with respect to inventions resulting from research, development, innovation and software development activities performed in Turkey are exempt from corporate tax under certain conditions:

- Income derived from leasing.
- Income derived from transfers or sales.
- Income derived from marketing through mass production in Turkey. Based on the Communiqué for the incentive, this refers to the sales of an item that is mass produced in Turkey and that has a license or beneficial model certificate. The Turkish Patent Institute grants a license under an examination system. It grants a beneficial model certificate as a result of a research report.
- Income pertaining to a license or beneficial model certificate for an invention that is included in the income obtained from the sale of the products produced in Turkey through the use of this invention in the production process.

In addition, the leasing, transfer and sale of intangible assets pertaining to a license or beneficial model certificate for an invention is exempt from VAT if the invention is produced as a result of research and development (R&D), innovation and software activities.

For the assessment of the corporate tax base, taxpayers can deduct 50% of the interest amount calculated over the capital increases in cash in capital companies and the part of the capital covered by cash in newly incorporated companies (this deduction does not apply to entities operating in the finance, banking and insurance industries as well as to state economic enterprises).

The following is the calculation of the deduction:
Deduction = Increased capital cash amount \times \text{Central Bank of the Republic of Turkey interest rate} \times \text{Period (Months)} \times \text{Discount rate}

For purposes of the above calculation, the Central Bank of the Republic of Turkey interest rate equals the latest weighted annual average interest rate applicable to commercial loans extended by banks in Turkish lira announced by the Central Bank of the Republic of Turkey for the year of deduction. “Period (Months)” refers to the period from the capital increase to the last day of the financial year.
The incentive amount should be separately stated on the corporate tax return. The calculated amount may be deducted from the tax base if certain conditions are fulfilled. The incentive amount that cannot be utilized because of insufficient taxable income can be carried forward to following tax years without any time limitation.

**Participation exemption**

*Dividend income derived from Turkish (resident) participations.* Turkish tax law provides a participation exemption for dividends derived by companies from Turkish (resident) participations. Dividends qualifying for the participation exemption are fully exempt from corporate tax.

To qualify for the participation exemption, a Turkish resident company need only hold a participation in another Turkish resident company.

*Dividend income derived from foreign (nonresident) participations.* The Turkish tax law also provides a participation exemption for dividends derived by companies from foreign participations. Dividends qualifying for the participation exemption are fully exempt from corporate tax.

To qualify for the participation exemption for dividends derived from foreign participations, all of the following conditions must be satisfied:

- The Turkish company must have owned at least 10% of the paid-in capital of the foreign company for an uninterrupted period of at least one year as of the date of receiving the dividend.
- The foreign company must be a limited or joint stock company.
- The foreign company must be subject to corporate tax at an effective rate of at least 15% (for corporations whose principal activity is the procurement of finance, including financial leasing, insurance or investment in marketable securities, the rate must be at least the rate of corporation tax in Turkey, which is 22%).
- The dividends must be transferred to Turkey by the due date of filing of the annual corporate tax return (25 April).

The effective corporate tax is determined in accordance with the following formula:

\[
\text{Effective corporate tax rate} = \frac{\text{Corporate tax}}{\text{Distributable corporate income + corporate tax}}
\]

Special participation exemption rules apply to companies established in foreign countries whose principal purpose is construction, repair, assembly and technical services. If, under the laws of a foreign country, the establishment of a corporation is necessary to undertake these activities, dividends repatriated by the foreign subsidiary to the Turkish parent company qualify for the participation exemption, regardless of whether the conditions described above for the participation exemption are satisfied.

The participation exemption also applies to income derived from permanent establishments (PEs) and permanent representatives resident abroad if the following conditions are met:
• The PE or permanent representative is subject to corporate tax at an effective rate of at least 15% in the country where the PE or permanent representative is located. For PEs whose principal activities are the procurement of finance, including financial leasing, or investment in marketable securities and insurance, the rate must be at least the rate of corporation tax in Turkey, which is 22%.

• Income derived from foreign PEs must be transferred to Turkey by the due date of filing of the annual corporate tax return (25 April).

A participation exemption also applies to capital gains. For details, see General in Section C.

**International holding companies.** A special regime applies to international holding companies.

International holding companies may benefit from the participation exemption with respect to dividends derived from foreign participations if they satisfy the conditions applicable to other entities (see Participation exemption). They also may benefit from the participation exemption with respect to capital gains, but different conditions apply. Turkish international holding companies benefit from the participation exemption with respect to capital gains if foreign participations account for at least 75% of the non-cash assets of the international holding company and if the international holding company has held a shareholding of 10% or more in the foreign limited or joint stock company for at least two years.

Dividends distributed by international holding companies to non-resident companies out of profits derived from their foreign participations are subject to a withholding tax rate equal to one-half of the general withholding tax rate on dividends. As a result, the withholding tax rate is 7.5%.

**Capital gains.** Capital gains derived by all companies, including branches of foreign companies, are included in ordinary income and are subject to corporation tax. Capital gains are generally computed by subtracting the cost of the asset, including the related expenses paid by the seller, from the selling price.

Capital gains derived from sales of depreciable fixed assets are not taxable to the extent the gains are reinvested in new fixed assets. However, the amount of gains used to acquire new assets is subtracted from the depreciable cost of the new asset. Capital gains that will be used for reinvestment are transferred to a special reserve account. If the special reserve is not used to finance the purchase of similar new assets in the following three years, the balance in the reserve is included in taxable income.

Capital gains derived from sales of resident companies’ shares by nonresident companies without a permanent establishment in Turkey are subject to corporation tax. In computing these gains, changes in exchange rates are not taken into account.

Seventy-five percent of capital gains derived by corporate taxpayers from the disposal of shares owned for at least two years qualify for corporate tax exemption if the gains for which exemption is claimed are recorded as a special fund under the
shareholder’s equity account in the balance sheet until the end of the fifth year following the year of sale.

**Administration.** Companies file tax returns based on their financial accounting year.

Tax returns must be submitted to the relevant tax office by the 25th day of the 4th month after the end of the accounting period. The return must be accompanied by the balance sheet, income statement and other required documents.

Corporation tax due must be paid by the end of the fourth month following the end of the accounting period.

Companies must make quarterly payments of advance corporation tax during the tax year. These payments are each equal to 22% of the taxable income for the quarter. Companies could be subject to a reduced rate of corporation tax in accordance with their investments’ incentive certificates. The advance tax may be offset against the tax shown on the annual corporation tax return.

If advance corporation tax exceeds the final tax payable, the excess amount can be offset against the company’s other tax liabilities or it can be refunded.

**Dividends.** Dividends received by resident companies from other resident companies are not subject to corporation tax.

Dividends received from foreign companies are included in taxable income. However, certain dividends received from foreign companies may qualify for exemption from corporation tax under the participation exemption or the international holding regime (see Participation exemption and International holding companies).

Withholding tax at a rate of 15% is imposed on dividends paid by resident corporations to the following recipients:

- Resident individuals
- Resident recipients who are not subject to corporation tax and income tax, or are exempt from such taxes
- Nonresident individuals
- Nonresident corporations (excluding those receiving dividends through a PE or permanent representative in Turkey)
- Nonresident recipients who are exempt from corporation tax and income tax

A branch remittance tax is imposed at a rate of 15% on profits remitted by nonresident corporations that have a PE or permanent representative in Turkey to their headquarters.

**Foreign tax relief.** Corporation tax and similar taxes paid abroad on income that is derived abroad and that is included in the Turkish accounts may be offset against the corporation tax that is assessed on such income in Turkey.

In cases in which the controlled foreign company (CFC) rules are applied, the taxes similar to income and corporation taxes that the foreign affiliate has paid can be set off against the corporation tax that is calculated on the basis of the earnings of the foreign company.

Resident companies that have a direct or indirect participation in shares or voting rights of 25% or more in foreign subsidiaries can
claim a tax credit for the corporate or income tax paid by foreign subsidiaries in their jurisdictions on profits out of which dividend distributions were paid to the resident companies. The credit is limited to the tax in Turkey that is attributable to the dividend distributions. As a result, the credit applies only to dividends that do not qualify for the participation exemption.

Amounts that are set off against the taxes that are assessed in Turkey on the income derived from the foreign countries may not exceed the tax amount that would be calculated by applying the local corporation tax rate (22%) to such earnings.

Foreign taxes that cannot be offset against the corporate tax in Turkey because of insufficient corporate income may be carried forward for a period of three years. The tax credit can also be offset against advance tax payments.

C. Determination of trading income

General. The corporate tax base is determined by deducting expenses from the revenue of an enterprise. However, the following items are not subject to corporation tax:

- Revenue derived by corporations, including nonresident companies, from participations in the capital of other corporations that are subject to full corporate taxation, excluding shares of profits from participation certificates of investment funds and stocks in investment partnerships
- Proceeds derived by corporations from the sale of their preferred shares, and profits derived by joint stock companies from the sale of their shares at the time of the establishment of the company and from the sale of their shares at a price exceeding the par value of the shares when they are increasing their capital
- Seventy-five percent of profits derived from disposals of shares, preferred shares, preemptive rights and bonus shares, and 50% of the profits derived from sales of real estate owned for at least two years, if the profits are placed in a reserve account and not distributed for five years

Corporation tax exemptions are available under the participation exemption and the international holding regime (see Section B). In addition, the following corporate tax exemptions apply to Turkish and foreign investment funds and companies:

- Profits derived by mutual funds (excluding foreign-exchange funds) and trusts from transactions involving their operating portfolio
- Profits derived by risk capital investment funds or companies from transactions involving their operating portfolio
- Profits derived by real estate investment funds or companies from transactions involving their operating portfolio
- Profits derived by designated private pension investment funds

All business-related expenses are deductible, with the following exceptions:

- Interest on shareholders’ equity or on advances from shareholders.
- Reserves set aside from profits (except technical reserves of insurance companies and doubtful debts from debtors against whom legal proceedings have been instituted).
• Corporation tax and all monetary and tax penalties and interest imposed on such tax.
• Discounts or other losses arising from selling the corporation’s own securities for less than par value.
• For nonresident companies, commissions, interest and other charges paid to headquarters or other offices outside Turkey on purchases or sales made on their behalf, as well as allocated charges to contribute to losses or expenses of headquarters or branches outside Turkey. However, charges are deductible if they are made in accordance with allocations keys that are in compliance with the arm’s-length principle and if they are related to the generation and maintenance of business income in Turkey.
• Interest, foreign-exchange differences or comparable expenses that are calculated or paid on disguised capital (see Debt-to-equity rules in Section E).
• Disguised profit distribution through improper transfer pricing (see Transfer pricing in Section E).

For enterprises (except loan institutions, financial organizations, financial leasing, factoring and financing companies) whose current liabilities exceed their equities, the portion determined by the Council of Ministers that does not exceed 10% of the total expenses and costs incurred as interest, commissions, maturity differences, delay interest, dividends, exchange-rate differences and similar items relating to liabilities (except financing expenses added to investment costs) used within the enterprise may not be deducted from corporate profit. However, the amount exceeding this percentage is deductible.

Provisions. Tax-deductible provisions include provisions for bad debts, for abandoned claims and for insurance technical reserves.

Tax depreciation. Assets that are used in a company for more than one year and that are subject to wear and tear are depreciated.

The useful life concept is used for the depreciation of fixed assets. The Ministry of Finance has issued Communiqués, which set forth the useful lives of different types of fixed assets. The following are examples of the useful lives for various fixed assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Useful life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>50</td>
</tr>
<tr>
<td>Office furniture, office equipment and automobiles</td>
<td>5</td>
</tr>
<tr>
<td>Computers</td>
<td>4</td>
</tr>
<tr>
<td>Computer software and cellular phones</td>
<td>3</td>
</tr>
</tbody>
</table>

The taxpayers may select the straight-line method or the declining-balance method to calculate depreciation. A company may change from the declining-balance method to the straight-line method (but the reverse change is not permitted) at any time during the useful life of a fixed asset. A company may exercise this option on an asset-by-asset basis.

Fixed assets can be depreciated beginning in the year of capitalization (the year in which an asset becomes ready to use). For fixed assets that are purchased as ready to use, the depreciation begins in the year of the acquisition of the fixed asset. For fixed assets that need to be constructed or assembled, the depreciation
begins in the year in which the construction or assembly is completed and the assets become ready to use.

In general, an asset qualifies for full-year depreciation in the year of capitalization, regardless of the date of capitalization. For example, even if a fixed asset is capitalized in the last month of the accounting year, full-year depreciation is calculated. The only exception to this general rule is for passenger cars. Depreciation for passenger cars begins in the month in which the cars are purchased. For example, if a passenger car that was purchased for TRY 1,000 is depreciated using a straight-line depreciation rate of 20%, the regular depreciation for a full year is TRY 200. Under the applicable rules, if such an automobile is acquired in November, tax-deductible depreciation for the year of acquisition is calculated as follows:

\[
\frac{2 \text{ months}}{12 \text{ months}} \times \text{TRY} 200 = \text{TRY} 33.33
\]

The balance of the regular depreciation for the year of acquisition is deductible in the last year of depreciation of the asset, together with the regular depreciation for the last year.

**Investment allowance.** Effective from 1 January 2006, the investment allowance was abolished. However, companies can carry forward investment allowance amounts due on or before 31 December 2005.

**Research and development and design expenditures.** One hundred percent of R&D and design expenditures may be deducted from the tax base if certain conditions are fulfilled. This is an incentive that is granted in addition to the ordinary depreciation expense recognition of capitalized R&D and design expenditures. The incentive covers the following expenses:

- Raw materials and supplies’ expenses
- Personnel expenses
- General expenses
- Payments for benefits and services provided by outsourcing companies
- Taxes, duties and fees
- Depreciation and depletion
- Financial expenses

Companies that are not able to deduct R&D and design expenditures because of insufficient taxable income may deduct the unused amount in the following years.

In addition, to support R&D and design activities, the Turkish Scientific and Technological Research Institution (TUBITAK) may provide monetary aid to companies with respect to their R&D and design activities under certain conditions. The related law also provides various types of incentives such as R&D and design deductions, wage income withholding exemptions, social security premium support, stamp duty exemption and capital aid for technological enterprises.

**Relief for losses.** In general, losses may be carried forward for five years. Losses cannot be carried back. An order of priority applies for the use of losses and exemptions to offset taxable income for the year. Past years’ losses are used after exemptions that apply
even in the event of a loss. After the losses are used, the other exemptions that apply in profitable years are administered (investment allowance, R&D and design deduction, tax-deductible donations and others).

Resident companies may deduct the losses incurred in business activities performed abroad if the foreign losses are approved by auditors authorized under the laws of the relevant jurisdiction. Foreign losses from foreign activities cannot be deducted if income arising from such activities is exempt from corporation tax in Turkey.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>

**E. Miscellaneous matters**

**Foreign-exchange controls.** Turkey has a liberal foreign-exchange regime, which allows local foreign-exchange accounts.

Law No. 4875 guarantees the remittance of profits. The company’s bank may transfer profits, provided the company subsequently submits to the bank its approved tax statement and its tax accrual and payment slips. This law also guarantees the remittance of the proceeds from the liquidation of an investment.

Fees and royalties from management agreements, technical services agreements and license contracts may be remitted abroad, and applicable withholding tax must be paid.

Foreign investment partnerships and funds may invest in Turkish securities and freely remit dividends, interest, profits and capital.

Turkish resident companies may grant loans to related parties residing abroad in some circumstances.

Transactions related to the foreign-exchange legislation should be checked to determine whether they are in compliance with the Communiqué regarding capital movements published on 2 May 2018.

**Transfer pricing.** The Turkish Corporate Tax Code contains transfer-pricing regulations, which include the arm’s-length principle and the requirement for documentation of all related-party transactions. The arm’s-length principle applies to all transactions carried out by taxpayers with related parties. Under Turkish transfer-pricing rules, the traditional and transactional transfer-pricing methods recommended in the Organisation for Economic Co-operation and Development (OECD) model guidelines are acceptable. The main methods that can be applied by the taxpayers in the determination of the arm’s-length price are the following:

- Comparable uncontrolled price method
- Cost-plus method
- Resale price method
- Profit-split method
- Transactional net margin method

It is possible to enter into advance-pricing agreements with the tax authorities.

Transfer-pricing rules apply to both domestic and foreign related-party transactions. Commercial transactions conducted by companies resident in low-tax jurisdictions (tax havens) are considered to be related-party transactions.
The Ministry of Finance has issued Communiqués clarifying the transfer-pricing rules and documentation requirements. Under these Communiqués, taxpayers must prepare annual transfer-pricing forms, reports and other documentation. If the documentation requirements relating to transfer pricing are completely fulfilled on time, the tax-loss penalty is applied with a 50% discount for taxes not accrued at all or accrued deficiently in the past with respect to the profits distributed in a disguised manner.

Cases in which the relationship is established through direct or indirect shareholding are deemed to be within the scope of disguised profit distributions if the percentage of the shareholding, voting rights or dividend rights is at least 10%. Parties that do not have a shareholding relationship are also deemed to be related parties if the percentage of voting or dividend rights is 10%, directly or indirectly. These percentage are taken into account collectively for related parties.

**Debt-to-equity rules.** Under the new thin-capitalization rules, a “related party” is a person holding, directly or indirectly, at least 10% of the shares or voting rights of the other party.

Borrowings from related parties that exceed a debt-to-equity ratio of 3:1 are considered to be disguised capital. For borrowings from related parties that are banks or financial institutions, half of the borrowings are taken into consideration in performing the calculation for disguised capital. Total borrowings from all related parties are treated collectively.

The equity at the beginning of the taxpayer’s fiscal year applies for thin-capitalization purposes. Interest paid or accounted for and foreign-exchange differences related to disguised capital are regarded as nondeductible expenses in determining the corporate tax base. Interest related to disguised capital is treated as a dividend distribution and is subject to dividend withholding tax.

**Controlled foreign companies.** The controlled foreign company (CFC) rules apply if resident individuals and corporate taxpayers jointly or severally have a direct or indirect participation of 50% or more in the shares, dividend rights or voting rights in a foreign company that meets all of the following conditions:

- Twenty-five percent or more of the foreign company’s gross income is of a passive nature (portfolio investment income). If the business activities of the company are not commensurate with the capital, organization or the work force of the company, income derived from commercial, agricultural or independent personal services may be regarded to be of a passive nature.
- The foreign company is subject to effective corporate taxation at a rate of less than 10%.
- The gross revenue of the foreign company exceeds TRY100,000 (approximately USD19,000).

If the foreign company falls within the scope of the Turkish CFC measures, Turkish resident taxpayers declare corporate income of the foreign company attributable to them. In the event of a dividend distribution by the foreign company, the recipient of the dividend is taxed only to the extent that the amount has not been taxed in accordance with the CFC rules.
**Anti-avoidance measures.** Turkish resident taxpayers are subject to a 30% withholding tax on all payments made in cash or on account that relate to transactions with companies resident in countries that the president considers to be in harmful tax competition. The president has not yet identified these countries. The principal, interest or profit contributions corresponding to debts to financial institutions established outside Turkey and payments to insurance and reinsurance companies established outside Turkey are not subject to the 30% withholding tax. The president has the authority to reduce the withholding tax rate to 0% for transactions that are considered to be performed at arm’s length.

The payments taxed in accordance with the rules described in the preceding paragraph are not subject to further corporate tax or income tax.

The Turkish tax law includes anti-abuse rules. The principal rule is the substance-over-form rule, which is contained in Article 3 of the Tax Procedural Law.

**Mergers and acquisitions.** Mergers, acquisitions and demergers may be tax-free if the transaction involves two resident companies and if the assets are transferred at book value.

**F. Treaty withholding tax rates**

The table below shows the maximum withholding rates for dividends, interest and royalties provided under Turkey’s double tax treaties.

To benefit from the advantageous rates under the double tax treaties, additional conditions may be required (for example, the recipient is required to be the beneficial owner of the related gain). Readers should obtain detailed information regarding the treaties before engaging in transactions.

(a) The 5% rate applies if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.
(b) The 5% rate applies if the recipient owns more than 20% of the payer of the dividends or if the recipient is the central bank or an entity that is wholly owned by the government. The 10% rate applies to other dividends.
(c) The 10% rate applies if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends. With reference to Subparagraphs (a) and (b) of Paragraph 2 of Article 10 of the Japan treaty, in the case of Turkey, the tax rates referred to therein (10% and 15%) are 15% for Subparagraph (a) and 20% for Subparagraph (b), respectively, if the amount of the Turkish tax imposed on the income of the company paying the dividends is less than 40% of such income that is derived in the accounting period ending immediately before the date when such dividends become payable.
(d) The 5% rate applies to dividends distributed by Belgian companies. The 10% rate applies to dividends distributed by Turkish companies.
(e) The 15% rate applies if the recipient owns more than 25% of the payer of the dividends. The 20% rate applies to other dividends.
(f) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
(g) The 15% rate applies if the recipient owns more than 10% of the payer of the dividends. The 20% rate applies to other dividends.
(h) The 10% rate applies to interest on loans granted by banks and financial institutions. The 15% rate applies to other interest payments.
(i) The 10% rate applies to interest on loans granted by financial institutions. The 15% rate applies to other interest payments.
(j) The 10% rate applies to interest paid with respect to a loan or other debt claim with a term exceeding two years. The 15% rate applies to other interest payments.
(k) The 7% rate applies if the recipient owns more than 25% of the payer of the dividends. The 10% rate applies to other dividends.
(l) For Luxembourg recipients, the 10% rate applies if the recipient owns more than 25% of the payer of the dividends and the 20% rate applies to other dividends. For Turkish recipients, these rates are applied as 5% and 20%, respectively.
(m) The 10% rate applies to interest on loans with a term exceeding two years. The 15% rate applies to other interest payments.
(n) The 5% rate applies if the recipient owns more than 25% of the payer of the dividends. The 10% rate applies to other dividends.
(o) The 10% rate applies if the recipient owns more than 15% of the payer of the dividends. The 15% rate applies to other dividends.
(p) The 5% rate applies to dividends distributed by Dutch companies. The 10% rate applies to dividends distributed by Turkish companies if dividends received by Dutch resident companies from Turkish resident companies are not subject to tax in the Netherlands.
(q) The 7.5% rate applies to interest on loans paid by financial institutions. The 10% rate applies to other interest payments.
The 5% rate applies to dividends to the extent they are paid out of profits that have been subject to tax as specified in the tax treaty and if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.

The 10% rate applies to interest on loans granted by banks. The 15% rate applies to other interest payments.

The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and recordings for radio and television. The 15% rate applies to royalties paid for patents, trademarks, designs or models, plans, secret formulas or processes, or for information concerning industrial, commercial or scientific experience.

The 10% rate applies to interest on loans granted by banks, financial institutions and insurance companies. The 15% rate applies to other interest payments.

The 12% rate applies if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.

The 5% rate applies if the recipient of the dividends is the government, a public institution wholly owned by the government or a political subdivision or local authority of the other contracting state. The 10% rate applies if the recipient owns more than 25% of the voting rights of the payer of the dividends. The 15% rate applies to other dividends.

For Irish recipients, the 5% rate applies if the dividends are paid out of the profits that have been subject to tax in Turkey and if the recipient owns more than 25% of the voting rights of the payer of the dividends. The 10% rate applies if the recipient owns more than 25% of the voting rights of the payer of the dividends, and the 15% rate applies to other dividends. For Turkish recipients, these rates are applied as 5%, 5% and 15%, respectively.

The 10% rate applies to interest received by financial institutions or paid with respect to loans or other debt claims with a term exceeding two years. The 15% rate applies to other interest payments.

Interest paid to the government and central bank is exempt.

A new treaty between Turkey and Norway was signed on 15 January 2010. This new treaty is effective from 1 January 2012. Under the new treaty, the dividend withholding tax rate may be reduced to 5%. The withholding tax rate for interest ranges from 5% to 10%. The withholding tax on royalties is 10% if certain conditions are satisfied.

A new treaty between Turkey and Finland, which was signed on 6 October 2009, is effective from 1 January 2013.

A treaty between Turkey and Germany, which was re-signed by the countries on 19 September 2011, is effective retroactively from 1 January 2011.

Interest paid from Turkey to the government of Brazil, the Central Bank of Brazil or the National Bank for Economic and Social Development (BNDES) is exempt from Turkish tax. Interest paid from Brazil to the government of Turkey, the Central Bank of Turkey (Turkiye Cumhuriyet Merkez Bankasi) or the Turkish Export/Import Bank (Eximbank) is exempt from tax.

The tax rate is 15% of the gross amount of the royalties arising from the use of, or the right to use, trademarks. The rate is 10% of the gross amount of royalties in all other cases.

The rate is 5% of the gross amount of interest with respect to a loan or credit made, guaranteed or insured for the purpose of promoting exports by the Finnish Export Credit (FINNVERA) or similar Turkish public entities that have the objective of promoting exports. The rate is 10% of the gross amount of interest derived by banks. The rate is 15% of the gross amount of interest in all other cases.

The rate is 5% of the gross amount of the following types of interest:
- Interest paid to the government pension fund or the Norwegian Guarantee Institute for Export Credits (Eksportfinskans ASA) if the interest is wholly or mainly passed on to the government of Norway under the 108 Agreement between Eksportfinans ASA and the government of Norway
- Interest paid to the Turkish social security fund or the Turkish Eximbank

The rate is 10% for interest paid to banks. The rate is 15% in all other cases.

For Swiss recipients, the rate is 5% if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends and if relief from Swiss tax is granted for such dividends through an abatement of the profits tax in a
proportion corresponding to the ratio between the earnings from participa-
tions and total profits or through equivalent relief. The rate is 15% in all
other cases for Swiss recipients. For Turkish recipients, the rate is 5% if the
beneficial owner of the dividends is a company (other than a partnership)
that holds directly at least 20% of the capital of the company paying the
dividends. The rate is 15% in all other cases for Turkish recipients.

(ll) The rate is 5% for interest paid with respect to a loan or credit made, guar-
anteed or insured for the purpose of promoting exports by an Eximbank or
a similar institution that has the objective of promoting exports. The rate is
10% in all other cases.

(mm) For Australian recipients, the 5% rate applies if the beneficial owner of the
dividends is a company that owns directly more than 25% of the capital of
the company and if the dividends are paid out of profits that have been
subject to corporation tax in Turkey. The 15% rate applies to other dividends
paid to Australian recipients. For Turkish recipients, the 5% rate applies if
the beneficial owner of the dividends is a company that owns directly more
than 10% of the voting power of the company. The 15% rate applies to other
dividends paid to Turkish recipients.

(nn) A new treaty between Turkey and Korea (South) is under negotiation.

(oo) Please consult the treaty for further details because exemptions may be
provided for interest on loans obtained from certain institutions, such as
central banks and governments of the contracting states or their subdivi-
sions.

(pp) Various rates apply.

(qq) The 10% rate applies to royalties paid for the use of, or the right to use,
copyrights of literary, artistic or scientific works, patents, trademarks,
designs or models, plans, secret formulas or processes, or from the use of,
or the right to use, industrial, commercial, or scientific equipment, or for
information concerning industrial, commercial or scientific experience. The
15% rate applies to royalties paid for the use of or the right to use, cinemat-
ographic films and films or tapes for television or radio broadcasting.

(rr) The rate is 5% of the gross amount of the dividends if the beneficial owner
is a company (other than a partnership) that holds directly at least 50% of
the capital of the company paying the dividends or has invested more than
USD10 million, or the equivalent in Turkish or Vietnamese currency, in the
capital of the company paying the dividends. The rate is 10% of the gross
amount of the dividends if the beneficial owner is a company that holds
directly or indirectly at least 25% but less than 50% of the capital of the
company paying the dividends. The rate is 15% of the gross amount of the
dividends in all other cases.

(ss) Interest paid to the government of Turkey or to the Central Bank of Turkey
is exempt from Vietnamese taxes and interest paid to the government of
Vietnam or to the State Bank of Vietnam is exempt from Turkish taxes.

Turkey has ratified income tax treaties with Côte d’Ivoire,
Gambia and Somalia, but these treaties have not yet entered into
force.

A tax treaty between Turkey and Venezuela was signed in 2018.
The treaty will enter into force after approval of the relevant
authorities.

A new tax treaty between Turkey and Qatar, which would replace
the 2001 treaty between the countries, was signed on
18 December 2016 and ratified by Qatar on 8 March 2017.

Turkey has initialed tax treaties with Burkina Faso (22 September
2017), Burundi (9 December 2016), Cameroon (11 July 2014),
Chad (10 April 2015), Gabon (3 September 2015), the Hong
Kong Special Administrative Region (SAR) (12 August 2016),
Kenya (15 July 2016), the Palestinian Authority (15 November
2012), Senegal (10 July 2015) and Uganda (12 July 2016).

On 22 January 2016, Turkey and Turkmenistan initialed a new
income tax treaty, which would replace the 1995 treaty between
the countries.
Turkey is negotiating tax treaties with Botswana, Ghana, Iraq, Liberia, Mali, Mozambique, Niger, Nigeria, Rwanda and Tanzania.

Turkey is engaged in negotiations with Korea (South) for a new income tax treaty, which would replace the 1986 treaty between the countries.

On 9 March 2017, Turkey has ratified a protocol to the double tax treaty with South Africa.

Turkey has signed protocols to amend the current double tax treaties with Kuwait (14 September 2017) and Ukraine (9 October 2017).

Turkey has initialiaed a protocol to the tax treaty with Uzbekistan.

The Turkish Council of Ministers ratified the Foreign Account Tax Compliance Act (FATCA) agreement between Turkey and the United States, signed on 29 July 2015, through Decree No. 2016/9229, which was published in the Official Gazette of 5 October 2016. However, this agreement has not yet entered into force.

Turkey has signed Exchange of Information Agreements Relating to Tax Matters with Bermuda, Gibraltar, Guernsey, the Isle of Man and Jersey. The Exchange of Information Agreement Relating to Tax Matters with Bermuda and Jersey entered into force as of September 2013. On 7 October 2017, the Exchange of Information Agreement between the Isle of Man and Turkey entered into force. The agreement generally applies from 7 October 2017 for criminal tax matters. For other tax matters, it applies in Turkey from 1 January 2013 and in the Isle of Man from 1 April 2013. On 6 October 2017, the Exchange of Information Agreement between Turkey and Guernsey entered into force. The agreement generally applies from 6 October 2017. The Exchange of Information agreement with Gibraltar was rati- fied by Turkey on 28 September 2017. Negotiations are continu- ing on such agreements with the Bahamas and Barbados.

The Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting was signed by Turkey on 7 June 2017.

An investment protection agreement between Turkey and Mexico entered into effect on 17 December 2017. On 14 March 2017, the Council of Ministers of Mozambique approved the investment protection agreement between Turkey and Mozambique, which was signed on 24 January 2017. Turkey has ratified investment protection agreements with Bangladesh, China (mainland), Colombia, Guatemala and Pakistan. Turkey has signed investment protection agreements with Cameroon, Gambia, Guinea, Kenya, Ukraine and Vietnam. Negotiations regarding investment protection agreements are continuing with Angola and Guinea.

(a) Applicable to capital gains on business assets, shares in private limited liability companies and commercial buildings.
(b) Applicable to residents and nonresidents (see Section B for further details).
(c) The rate is 10% for dividends paid by companies listed on the stock exchange to individuals.
(d) The rate is 20% for interest paid on government securities.
(e) Applicable to nonresidents.
(f) This withholding tax is imposed on resident professionals who are not exempt from withholding tax.

(g) A 10% withholding tax is imposed on nonresident contractors who derive income from providing services to licensees in the mining and petroleum sectors.

(h) This withholding tax is imposed on payments in excess of UGX1 million to any person in Uganda who is not exempt from withholding tax for goods and services supplied to, or under a contract with, the government, a local authority, an urban authority, a company controlled by the government of Uganda or any person designated in a notice by the Minister.

(i) In general, loss carrybacks are not allowed. However, for long-term construction contracts that result in a loss in the final year, a loss carryback for an unlimited number of years is allowed.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their worldwide income, but tax credits are granted for taxes paid on foreign-source income (see Foreign tax relief). Nonresident companies are subject to tax on income derived from sources in Uganda.

A company is resident in Uganda if any of the following applies:

- It is incorporated in Uganda.
- The management and control of its affairs are exercised in Uganda during the tax year.
- During the tax year, it performs the majority of its operations in Uganda.

Rates of corporate tax. The regular corporate income tax rate is 30%.

Rental income earned in Uganda is taxed separately from other income and taxed at a rate of 30% for companies. It is no longer consolidated with other income.

Capital gains. Capital gains on business assets, shares and commercial buildings are subject to tax at a rate of 30%.

Administration. Companies must file provisional income tax returns within six months after the beginning of the accounting period. This return includes an estimate of the income that will be earned by the company during the accounting period. The tax liability shown in the provisional return must be paid in two equal installments, which are due 6 months and 12 months after the beginning of the accounting period. A final tax return must be filed within six months after the end of the accounting period, and any balance of tax due must be paid when this return is filed. A taxpayer with an annual turnover of UGX500 million must submit audited financial statements prepared by an accountant registered by the Institute of Certified Public Accountants of Uganda with the taxpayer’s return.

Penalties are imposed if the final tax liability for the year exceeds the tax liability shown in the provisional return by more than 10%. However, the penalty for underestimating provisional tax does not apply to companies engaged in agricultural, plantation or horticultural farming.

Effective from 1 July 2016, the Tax Procedure Code Act regulates all procedural aspects relating to income tax, value-added tax and excise duty, and any other taxes that could be added by the Minister of Finance by statutory instrument. The provisions of
the act replace the provisions in the various tax laws that dealt with procedures.

**Dividends.** Dividends paid to residents and nonresidents are subject to withholding tax at a general rate of 15%. However, the withholding tax does not apply if the recipient of the dividends is a resident company that controls at least 25% of the voting power in the payer. The withholding tax rate is 10% for dividends paid by companies listed on the stock exchange to resident individual shareholders. The withholding tax on dividends paid to nonresidents and to resident individuals is considered a final tax.

**Interest.** Interest paid to residents and nonresidents is subject to a withholding tax at a rate of 15%. The withholding tax rate for interest paid on government securities is 20%. The withholding tax on interest does not apply if either of the following circumstances exist:

- The recipient is a financial institution (except with respect to interest from government securities).
- The interest is paid by a natural person to a resident.

The withholding tax for interest paid on government securities is considered a final tax. Interest paid by resident companies to nonresident financial institutions with respect to debentures is exempt from tax.

**Other withholding taxes.** Royalties, rent, natural resource payments and management fees paid to nonresidents are subject to a 15% final withholding tax. Reinsurance premiums are subject to a 10% final withholding tax. A 10% withholding tax is imposed on nonresident contractors who derive fees from the provision of services to licensees in the mining and petroleum sectors.

A resident person who purchases an asset from a nonresident person must withhold a 10% tax from the gross payment for the asset.

A payment for agricultural supplies in excess of UGX1 million is subject to withholding tax at a rate of 1% on the total amount of the gross payment.

**Foreign tax relief.** A foreign tax credit is granted for foreign tax paid on foreign-source income taxable in Uganda. The credit is limited to the equivalent of the Uganda tax on such income.

**C. Determination of trading income**

**General.** Taxable income is the income reported in the companies’ financial statements, subject to certain adjustments. Expenses are deductible to the extent that they are incurred in the production of taxable income.

**Inventories.** For tax purposes, inventory is valued at the lower of cost or market value.

**Provisions.** Only financial institutions and insurance companies may deduct specific provisions for bad debts.

Bad trade debts may be deducted when they are written off if all reasonable steps have been taken to recover the debt without success.
**Tax depreciation.** Depreciation charged in companies’ financial statements is not deductible for tax purposes, but capital allowances are granted at specified depreciation rates ranging from 20% to 40%.

Capital expenditure on buildings that are designated as industrial buildings, excluding the cost of the land, qualifies for an annual industrial building allowance of 5%. Commercial buildings constructed on or after 1 July 2001 qualify for a straight-line commercial building deduction of 5%. Wear-and-tear allowances (tax depreciation), calculated using the declining-balance method, are granted for plant and machinery at the following rates.

</tbody>
</table>

The initial allowance is reinstated, effective from 1 July 2017, at a rate of 50% of the cost base, with respect to eligible property placed into service for the first time outside a radius of 50 kilometers from the boundaries of Kampala.

The initial allowance is also reinstated, effective from 1 July 2017, at a rate of 20% of the cost base, with respect to new industrial buildings placed into use for the first time during the year of income.

**Relief for losses.** Losses may be carried forward for an indefinite period of time to offset future profits.

In general, loss carrybacks are not allowed. However, for long-term construction contracts that result in a loss in the final year, a loss carryback for an unlimited number of years is allowed.

**Groups of companies.** No provisions exist for filing consolidated returns or for relieving losses within a group.
D. Other significant taxes

E. Miscellaneous matters

Foreign-exchange controls. The foreign-exchange market is now fully liberalized. A company can freely transfer foreign exchange into and out of Uganda without restriction, provided that the transfer is through a bank and complies with anti-money laundering regulations. A company can prepare financial statements in foreign currency if it obtains approval from the tax authorities.

Transfer pricing. Transfer-pricing regulations apply to a controlled transaction (transaction between associates) if a person who is party to the transaction is located in and is subject to tax in Uganda, and the other person who is party to the transaction is located in or outside Uganda. The minimum threshold for transactions between associates who are both located in Uganda is UGX500 million (approximately USD130,000); no minimum threshold applies to cross-border transactions. The regulations require a person to record in writing sufficient information and analysis to verify that a controlled transaction is consistent with the arm’s-length principle.

For an income year, this documentation must be in place before the due date for the filing of the income tax return for that year.

Thin-capitalization rules. The Income Tax (Amendment) Act, 2018 repealed the thin-capitalization provisions and replaced them with new limitation of interest deductibility rules. The amount of deductible interest for all debts owed by a taxpayer that is a member of a group may not exceed 30% of the tax earnings before interest, tax, depreciation and amortization. The excess interest may be carried forward for not more than three years and will be treated as incurred during the next year of income.

F. Treaty withholding tax rates

The table below lists treaty withholding tax rates. Tax treaty provisions that lower Ugandan tax or provide exemptions from Ugandan tax for nonresident persons apply only if the nonresident is a resident of the state that has a tax treaty with Uganda and if at least 50% of the underlying ownership of the nonresident person is held by an individual or individuals who are themselves tax residents of that state.

(a) The 5% rate applies if the recipient owns at least 10% of the company paying the dividends. The 15% rate applies to other dividends.

(b) The 10% rate applies if the recipient is a company resident in the other contracting state that owns at least 25% of the capital of the payer. The 15% rate applies to other dividends.

(c) The 0% rate applies if the recipient holds at least 50% of the capital of the company paying the dividends. The 5% rate applies if the recipient holds less than 50% of the capital of the company paying the dividends. The 15% rate applies if the beneficial owner of the dividends is not a tax resident of the Netherlands.
The information in this chapter is current as of 1 January 2019. Because further changes to the tax law are possible, readers should obtain updated information before engaging in transactions.

Net Operating Losses (Years)
- Carryback: 0
- Carryforward: Unlimited (g)

(a) Special tax rates exist for insurance and lottery companies.
(b) The following interest is exempt from withholding tax:
   - Interest and income (discounts) received by nonresidents from state securities, municipal bonds or debt securities if these instruments are secured by state or municipal guarantees
   - Other income from state securities, paid by the Ministry of Finance of Ukraine
   - Interest payments to nonresidents on loans received by the state or to a municipal budget if they are reflected in the state or municipal budget or in the budget of the National Bank of Ukraine
   - Interest on loans obtained by business entities if fulfillment of these loans is secured by state or municipal guarantees

(c) Withholding tax exemption is available for interest paid to nonresident lenders on loans financed through the issuance of debt securities (interest on loan participation notes) on a stock exchange outside Ukraine. The following conditions apply:
   - If the loan is obtained before 2017, the exemption applies if the funds provided as a loan were raised with the aim to provide (directly or indirectly) a loan to a resident.
   - If the loan is obtained in 2017 or 2018, the exemption applies if all of the following conditions are satisfied:
     - The qualifying debt securities are listed on a recognized stock exchange (currently, the list contains 21 stock exchanges in various jurisdictions, including the New York Stock Exchange, London Stock Exchange, Deutsche Boerse AG, Japan Exchange Group, Inc. and Singapore Exchange).
     - The funds provided as a loan were raised with the aim to provide (directly or indirectly) a loan to a resident.
     - The foreign interest recipient is not resident in a low-tax or non-transparent jurisdiction (see Transfer pricing in Section E for more details).
   A reduced 5% withholding tax rate applies to interest from loans obtained from 2019 onward, subject to similar conditions.

(d) In essence, the tax on advertising services and insurance payments is not a withholding tax, because the tax applicable to fees paid to nonresidents for advertising services and the tax on insurance payments is not withheld from the payments remitted to the nonresident recipient, but is paid at the expense of the Ukrainian company making the payments (that is, the economic burden of paying the tax is borne by the Ukrainian party).

(e) The tax base is calculated as the difference between the nominal value of the discount bonds and the acquisition value (purchase price) of the bonds on the primary or secondary stock market. Exemptions apply (see footnote [b] above).

(f) The 0% rate applies to the following:
   - Insurance and reinsurance payments to financially reliable nonresidents
   - Insurance payments with respect to civil aviation passenger transportation
   - Insurance payments to nonresident individuals under mandatory insurance agreements
   - Insurance payments under Green Card insurance agreements (mandatory third-party liability insurance for car owners of states participating in the Green Card system)
Reinsurance payments with respect to mandatory civil liability insurance of nuclear facility operators
The 4% rate applies to insurance payments to nonresidents under insurance agreements covering risks outside Ukraine (subject to exceptions). The standard 12% rate applies in all other cases.

(g) Exceptions apply (see Section C).

B. Taxes on corporate income and gains

Corporate profit tax. Ukrainian legal entities (except for non-profit organizations) are subject to corporate profit tax (CPT) on their worldwide income and gains. Foreign legal entities (except for organizations with diplomatic privileges or immunities) are subject to CPT if they receive Ukrainian-source income. CPT also applies to permanent establishments of nonresidents receiving income from Ukrainian sources or performing agency services or certain other services for the benefit of nonresidents.

Rates of tax. The CPT rate is 18%.

Tax holidays are available until 2021 for certain qualifying low-turnover companies. CPT payers incorporated as a result of corporate reorganization or companies engaged in certain business activities (e.g., financial and insurance businesses, extractive industries, most types of cross-border activities) are not eligible for this CPT exemption. Notably, taxpayers enjoying the CPT exemption are still obliged to pay advance CPT on dividends (see Dividends section) and regular CPT for the period when dividends are accrued and paid.

Temporary tax incentives (including CPT exemption) are introduced for the aircraft industry until 2024, and for income derived from coal bed methane and from derivative feedstock of coal bed methane until 2019. Certain conditions apply.

Capital gains. Capital gains are included in the pretax financial result and generally taxed at the regular CPT rate.

Special tax rules apply to capital gains derived from trading in securities. Profits from trading in securities are included in taxable profit. Losses from trading in securities, including losses on security revaluations, can be carried forward indefinitely to offset future income from such trading.

Administration. Under the general rule, taxpayers must report CPT quarterly on a cumulative basis. Annual CPT reporting is available for the following taxpayers:

- Newly incorporated companies
- Agricultural producers
- Companies with annual income, net of indirect taxes, of less than UAH20 million (approximately USD713,000)

Taxpayers that file only an annual return must submit it by within 60 days after the year-end. If a taxpayer files tax returns quarterly, the quarterly tax returns must be submitted within 40 days after the end of the quarter, and the final annual return must be submitted within 60 days after the end of the year. Tax is payable within 10 days after the deadline for submitting the tax return.

Dividends. A company distributing dividends to its shareholders must pay an 18% advance corporate profit tax (ACPT) on the positive difference between the amount of dividends and taxable
profit for the reporting year for which dividends are paid, provided that the tax liability for the year is settled (if unsettled, ACPT is levied on the whole amount of dividends). The tax is paid either before or at the moment of the dividend distribution. The ACPT is paid at the expense of the dividend payer and does not decrease the amount of dividends due to shareholders. In general, ACPT can be offset against the CPT liability of the taxpayer in the current period and subsequent periods.

Exemption from ACPT on dividends applies to the following dividends:
- Dividends paid to individuals
- Dividends paid by joint investment vehicles
- Dividends paid to shareholders of the taxpayer’s parent company, up to the amount of dividends received by the parent company from third companies
- Dividends paid to companies whose profits are exempt from tax, up to the amount of such exempt profits in the period for which dividends are paid

Dividends distributed to nonresidents are subject to withholding tax at a rate of 15%, unless an applicable double tax treaty provides otherwise.

Ukrainian CPT payers do not include in their taxable profit dividends received from other Ukrainian CPT payers (except for collective investment vehicles and companies whose profits are exempt from tax, up to the amount of such exempt profits) and single taxpayers.

Notably, beginning in 2017, the term “dividends” covers any monetary payment made by a legal entity to its shareholders in relation to the distribution of part or all of its net profit.

**Foreign tax relief.** Ukrainian companies may credit foreign tax paid with respect to foreign-source profits against Ukrainian tax imposed on the same income, up to the amount of such Ukrainian tax. The credit is granted only if the taxpayer submits a written confirmation from the tax authorities of the foreign country that certifies payment of the foreign tax.

**C. Determination of taxable profit**

**General.** Taxable profit is defined as the financial result before tax, determined under Ukrainian accounting standards or under International Financial Reporting Standards, subject to several adjustments. Add-back adjustments increasing the financial result for tax purposes include the following:
- Thirty percent of the cost of goods, fixed assets (except for right-of-use assets under lease agreements), works and services purchased from nonresidents registered in low-tax and non-transparent jurisdictions, from nonresidents that do not pay CPT and/or are not tax residents in their country of registration or from nonprofit organizations if the amount of purchase from nonprofit organizations exceeds 25 minimum salaries (approximately USD3,721). This limitation does not apply to controlled transactions for transfer-pricing purposes (see Transfer pricing in Section E) or if the taxpayer substantiates the arm’s-length level of the expenses by preparing transfer-pricing documentation.
• Royalties paid to nonresidents exceeding the sum of royalty income and 4% of the taxpayer’s net sales income for the preceding reporting year. The limitation does not apply to controlled transactions for transfer-pricing purposes or if the taxpayer substantiates the arm’s-length level of the royalties by preparing transfer-pricing documentation. In some cases, royalties are added back in full.

• Adjustments under the thin capitalization rules (see Debt-to-equity ratios and other restrictions on the deductibility of interest in Section E).

• Transfer-pricing adjustments.

• Provisions and allowances accrued in financial accounting (except for salary and payroll tax provisions).

• Funds or cost of goods, works or services provided to nonprofit organizations in an amount exceeding 4% (8% for sports nonprofit organizations) of the taxpayer’s taxable profit for the preceding year.

• Non-repayable financial aid, or the cost of goods, works or services provided for free, to entities (other than registered nonprofit organizations and individuals) that are not CPT payers, enjoy tax holidays or are CPT exempt.

• Penalties under civil law contracts paid to non-CPT payers (except for individuals) or to CPT payers that enjoy CPT exemption.

• Impairment of fixed assets and intangible assets.

• Losses from participation in the equity of other companies.

Industry-specific adjustments apply for banks and financial institutions and agricultural producers.

Tax-loss carryforwards decrease the pretax financial result for CPT purposes.

If a taxpayer’s income does not exceed UAH20 million (USD713,000), the taxpayer may opt not to make any adjustments to the financial result before tax for CPT purposes.

**Depreciation.** For purposes of tax depreciation, fixed assets are defined as assets that are designated for use in a taxpayer’s business activity for more than one year and that have a value exceeding UAH6,000 (approximately USD214). The Tax Code provides for 16 groups of tangible fixed assets, 6 groups of non-tangible fixed assets and 5 methods of tax depreciation. Similar to financial accounting, tax depreciation is accrued per each item.

The list of depreciation methods is in line with methods stipulated for financial accounting, except for the unit-of-production method, which may not be used. The following are the methods:

• Straight-line

• Declining-balance

• Accelerated declining-balance

• Sum-of-the-years’ digits

Depreciation of an asset is accrued on a monthly basis throughout the useful life cycle of the asset. The following table shows the minimum allowable term of the useful lives of assets.
<table>
<thead>
<tr>
<th>Group</th>
<th>Assets</th>

<td>7</td>
</tr>
</tbody>
</table>

Assets of Group 1 (land plots) and Group 13 (natural resources), as well as goodwill and non-production fixed assets and intangibles, are not subject to depreciation.

The minimum term of useful life is not determined for the assets of Group 10 (library holdings) and Group 11 (tangible assets of small value).

Taxpayers should use the longer of the tax accounting or financial accounting depreciation terms.

Starting 1 January 2017, taxpayers are allowed to depreciate under a straight-line method qualifying fixed assets of Group 4 over a minimal two-year period if these assets were purchased after 1 January 2017 and put into operations before 31 December 2019. The right to use this tax incentive may be transferred upon reorganization.

**Relief for losses.** In general, the Tax Code allows the unlimited carryforward of losses. However, it is advisable to monitor further developments in the tax laws as ad hoc restrictions and adverse interpretations of the law are possible.

The law does not allow tax losses to be carried back (that is, offsetting the tax loss of the current year against the taxable profit of previous years to reduce tax payments). However, for taxpayers that determine tax payable based on quarterly tax returns, the carryback of a tax loss within a year may be technically possible because tax returns are completed cumulatively.

**Groups of companies.** The Ukrainian tax law does not provide for the grouping of different legal entities.
D. Other significant taxes

E. Miscellaneous matters

**Foreign-exchange controls.** The Ukrainian currency is the hryvnia (UAH). The official exchange rate of the hryvnia against the US dollar can be found at the National Bank of Ukraine (NBU) website (www.bank.gov.ua); the retail exchange rate may differ from the official exchange rate. A wide variety of controls are imposed with respect to the use, circulation and transfer of foreign currency within Ukraine and abroad. These controls, which affect almost all international business transactions, include the following:

- In general, transactions between Ukrainian residents and cash settlements within Ukraine may not be carried out in foreign currency.
- All statutory accounting and tax reporting, as well as tax payments, must be in Ukrainian currency.
- Wages and salaries paid to Ukrainian citizens must be in Ukrainian currency.
- Ukrainian currency may be used to purchase foreign currency.
- Fifty percent of Ukrainian residents’ foreign currency proceeds are subject to mandatory sale on the Ukrainian interbank currency market (exceptions apply). The NBU sets the percentage of mandatory sale on an ad hoc basis and, as a result, the percentage could change.
- Several temporary restrictions are imposed on cross-border payments in foreign currency.

A new currency control law and a package of related regulations enter into force on 7 February 2019. They ease some of the existing currency controls and provide, among other items, the following:

- The deadline for settlements on export and import transactions is extended to 365 days (instead of 180 days).
- Early repayment of cross-border loans is allowed.
- Burdensome individual licensing of currency transactions is replaced by e-limits. E-limits are annual cap amounts for the remittance of foreign currency outside Ukraine, including the placement of own funds in foreign bank accounts and foreign investment. The limits are EUR2 million for legal entities and EUR50,000 for individuals.
- Control over low-value transactions may become less stringent.
- Several temporary restrictions continue to be imposed on cross-border payments in foreign currency.
Debt-to-equity ratios and other restrictions on the deductibility of interest. If a taxpayer’s debt to a nonresident related party is at least 3.5 times (10 times for financial and leasing companies) the amount of its equity, interest payable to nonresident related parties by such taxpayer may be deductible in an amount of up to 50% of the sum of its financial result before taxation, financial expenses and financial accounting depreciation for the reporting year. The remaining interest, annually reduced by 5%, may be carried forward indefinitely, subject to the same limitation.

Transfer pricing. Transfer pricing (TP) rules have been effective in Ukraine since 2013. Ukrainian TP regulations are frequently changed. The most recent changes were made at the end of 2018 (effective from 1 January 2019).

Under the TP rules, controlled transactions include the following:
- Transactions with nonresident related parties.
- Transactions with nonresidents registered in low-tax and non-transparent jurisdictions. The government approves the list of such jurisdictions.
- Commission sales of goods and services through nonresident commissioners.
- Transactions involving goods and services between related parties through unrelated intermediaries that do not undertake significant functions, do not use significant assets and do not assume significant risks.
- Transactions with nonresidents that do not pay corporate profit tax, or are exempt from this tax and/or are not tax residents of the country where they are registered as legal entities. The government shall approve the list of legal forms of such nonresidents of such countries.
- Transactions between a nonresident and its permanent establishment in Ukraine.

The above-mentioned transactions are controlled if both of the following circumstances exist (for transactions between a nonresident and its permanent establishment, only the second circumstance needs to exist):
- The annual income of the taxpayer exceeds UAH150 million (approximately USD5,351,000).
- The amount of such annual transactions with each entity exceeds UAH10 million (approximately USD357,000).

The Tax Code provides for the following five methods for determining the arm’s-length price for controlled transactions:
- Compared uncontrolled price (the preferred method)
- Resale price
- Cost-plus
- Transactional net margin
- Profit-split

Specific profit-level indicators are assigned to each TP method.

Special rules apply to exports or imports of quoted goods.

Taxpayers that perform controlled transactions must file a TP Report (report on controlled transactions) by 1 October of the year following the reporting year. TP documentation must be submitted within 30 calendar days after the date of receipt of the request. The statute of limitations for TP purposes is currently seven years.
F. Treaty withholding tax rates

Ukraine honors the double tax treaties of the former USSR, except for treaties that have been superseded by new treaties concluded directly by Ukraine or renounced by the other party to the treaty. Ukraine is not a member of the Organisation for Economic Co-operation and Development (OECD). As a result, the Ukrainian tax authorities are not bound by the commentary of the OECD model convention. The rates in the table below reflect the lower of the treaty rate and the rate under domestic tax law for dividends, interest and royalties paid from Ukraine to residents of treaty countries. Exceptions or conditions may apply, depending on the terms of the particular treaty.

A beneficial ownership test must be met to apply reduced withholding tax rates under the majority of the double tax treaties.

</table>

(a) The 0% rate applies to dividends paid to one or more companies that are the beneficial owners of these dividends and if either of the following conditions is satisfied:

- The recipient company or companies hold directly or indirectly at least 50% of the capital of the company paying the dividends, and the total amount of their investments in the paying company is not less than 5 million French francs.
- The investments of the recipient companies in the company paying the dividends are guaranteed or insured by the other state, the central bank of such state or a person acting on behalf of such state.

The 5% rate applies to dividends paid to companies that own at least 20% of the capital of a Ukrainian resident payer or 10% of the capital of a French resident payer. The 15% rate applies to other dividends.

(b) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights for literary, dramatic, musical or artistic works (excluding royalties with respect to cinematographic films or any means of image or sound reproduction for use in radio or television). The higher rate applies to other royalties.

(c) The 10% rate applies to the following:

- Payments for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes.
• Payments for copyrights of scientific works; payments for the use of, or the right to use, industrial, commercial or scientific equipment
• Payments for information concerning industrial, commercial or scientific experience

The 15% rate applies to payments for the use of, or the right to use, cinematographic films, or tapes for radio or television broadcasting, and to payments for copyrights of literary or artistic works.

(d) The lower rate applies to dividends paid to companies that are the beneficial owners of such dividends and own a minimum percentage of the capital of the payer (under the treaties, this percentage ranges from 10% to 50%). The higher rate applies to other dividends. Additional conditions may apply.

(e) The 0% rate may apply to interest paid to or, in some cases, by government institutions or central banks of the contracting states. In some cases, the 0% rate also applies to the following:
• Interest paid to entities authorized by government institutions
• Interest on debt claims that are warranted, insured or directly or indirectly financed by the state or a financial institution wholly owned by the state
Specific institutions are named in some treaties. The higher rate applies to other interest (additional beneficial ownership requirements may apply).

(f) The 0% rate applies to payments for the use of, or the right to use, computer software. The 10% rate applies to other royalties.

(g) The 0% rate applies to payments for the use of, or right to use, secret formulas or processes, or for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

(h) The 0% rate applies to interest paid to the state or an agency owned or controlled by the state and to interest paid to a resident of a contracting state with respect to a loan or other debt claim or credit granted, guaranteed or insured by a public entity owned or controlled by the state (may be subject to additional conditions). The 2% rate applies to interest on loans from banks or financial institutions and to interest with respect to sales on credit of merchandise or services between enterprises or sales of industrial, commercial or scientific equipment. The higher rate applies to other interest.

(i) The 0% rate applies to dividends paid to companies (other than partnerships) that hold directly at least 50% of the capital of the payer of the dividends and have made an investment in the capital of the payer of at least USD300,000 or the equivalent in the currencies of the contracting states. The 0% rate also applies to dividends paid to companies whose investment in the capital of the payer is guaranteed or insured by government institutions or an agency or instrumentality owned or controlled by the government. The 5% rate applies to dividends paid to companies owning at least 20% of the payer. The 15% rate applies to other dividends.

(j) The 0% rate applies to interest paid to the state or an agency owned or controlled by the state and to interest paid to a resident of a contracting state with respect to a loan or other debt claim or credit granted, guaranteed or insured by public entities owned or controlled by the state. The 2% rate applies to the following:
• Interest paid on loans granted by banks or other financial institutions of the other state, including investment banks, savings banks and insurance companies
• Interest paid with respect to the sale on credit of industrial, commercial or scientific equipment, or with respect to the sale or furnishing on credit of goods or merchandise or services by an enterprise to another enterprise
The 10% rate applies to other interest.

(k) The 0% rate applies to payments for the use of, or the right to use, copyrights of scientific works, patents, trademarks, designs or models, plans, and secret formulas or processes, as well as to information concerning industrial, commercial or scientific experience. The higher rate applies to other royalties.

(l) The 0% rate applies to royalties paid for the use of, or the right to use, computer software, patents, designs or models, or plans. The 5% rate applies to royalties paid for the use of, or right to use, secret formulas or processes, as well as for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works including cinematographic films, and films or tapes for television or radio broadcasting, or trademarks.

(m) The 0% rate applies to dividends paid by a company resident in Ukraine to a company that is resident in Finland and that is the beneficial owner of the dividends if either of the following circumstances exists:
• The Finnish Guarantee Board has issued an investment guarantee for dividends paid or for the capital invested on which the dividends are paid.
The recipient of the dividends has made an investment of at least USD1 million in the capital of the payer and holds at least 50% of the equity capital of the company paying the dividends.

The 0% rate is allowed with respect to dividends paid for any tax year within the period for which the above-mentioned guarantee is in force or, if no such guarantee is made, with respect to dividends paid for the first three years following the year in which the investment is made. The 5% rate applies to dividends paid to companies owning at least 20% of the capital of the payer. The 15% rate applies to other dividends.

(n) The 0% rate applies if the interest is paid to the State of Finland, or a local authority or a statutory body thereof, the Bank of Finland, the Finnish Fund for Industrial Co-operation Ltd (FINNFUND) or the Finnish Export Credit Ltd or any similar institution. The 0% rate also applies to interest paid to a resident of Finland on a loan guaranteed by any of the bodies mentioned in the preceding sentence or by the Finnish Guarantee Board and paid to a resident of Finland. The 5% rate applies to interest related to commercial credit. The 10% rate applies to other interest.

(o) The 5% rate applies to dividends paid to companies that have invested at least USD50,000 in the capital of the payer or an equivalent amount in the currencies of the contracting states. The 15% rate applies to other dividends.

(p) The 0% rate applies to the following types of interest:
• Interest paid to government institutions
• Interest on loans granted by banks
• Interest paid with respect to sales on credit of merchandise, or industrial, commercial or scientific equipment
The 10% rate applies to other interest.

(q) The 10% rate applies to dividends paid to the beneficial owner if, for an uninterrupted period of two years before the payment of the dividend, the beneficial owner owned directly at least 25% of the capital stock of the company paying the dividends. The higher rate applies to other interest.

(r) The 0% rate applies to payments for the use of, or the right to use, software, patents, trademarks, designs or models, plans, or secret formulas or processes, or for information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

(s) The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, secret formulas or processes, as well as for information concerning industrial, commercial or scientific experience. The 15% rate applies to other royalties.

(t) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the voting power of the payer of the dividends and if at least 50% of the voting power of the company that is the beneficial owner of the dividends is held by residents of the beneficial owner's contracting state.

(u) The 0% rate applies to the following:
• Interest paid on loans provided, guaranteed or insured by a government of a state where the beneficial owner of the interest is located, or interest on loans made, guaranteed or insured on behalf of such government by an authority thereof that is so entrusted
• Interest with respect to indebtedness arising on sales on credit by enterprises of merchandise or industrial, commercial or scientific equipment to an enterprise of another contracting state, unless the sale or indebtedness is between related persons
The 10% rate applies to other interest payments.

(v) The 0% rate applies to royalties paid for patents concerning industrial and manufacturing know-how or processes, agriculture, pharmaceuticals, computers, software, building constructions, secret formulas or processes, as well as for information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

(w) The 0% rate applies to interest derived by the government, a political subdivision or a local authority, central bank of a contracting state or other financial institution established and owned by the government to promote trade and investment, as well as to interest paid to residents of a contracting state with respect to debt-claims guaranteed or insured by the government, a local authority thereof, the central bank or other financial institution established and owned by the government to promote trade and investment. The 10% rate applies to interest paid on loans granted by banks or other financial institutions, including investment banks, savings banks and insurance companies. The 15% rate applies to other interest payments.

(x) The 5% rate applies to royalties paid for the use of, or the right to use, patents, plans, secret formulas or processes, as well as for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.
(y) The 0% rate applies to dividends paid to the government, a political subdivision or local authority, central bank or other state financial institution. The 5% rate applies to dividends paid to companies owning at least 10% of the capital of the payer. The 15% rate applies to other dividends.

(z) Notwithstanding the provisions allowing the 5% reduced rate (see footnote [d]), the 10% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends and if the dividend payer is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax.

(aa) A discrepancy exists between the Ukrainian and English texts of the Belgium treaty with respect to the withholding tax rates for interest and royalties. In the Ukrainian version, the highest treaty rate is 5%, while in the English version, it is 10%. The English version prevails in accordance with Paragraph (e) of the protocol to the treaty.

(bb) The treaty does not apply to the Hong Kong Special Administrative Region (SAR).

(cc) The 0% rate applies to dividends paid to the government, a political subdivision or local authority, the central bank or other state financial institution. The 5% rate applies to all other dividends.

(dd) The 0% rate applies to interest paid on loans granted by the government of a contracting state, including its political subdivisions and local authorities, the central bank or financial instrumentalities of that government. The 5% rate applies to interest paid on loans granted by banks. The 10% rate applies to all other interest payments.

(ee) If a resident of a contracting state has a permanent establishment in the other state, such permanent establishment may be subject to a withholding tax under the law of that other state. However, this tax may not exceed 10% of the amount of the profits of that permanent establishment after payment of the corporate tax on the profits.

(ff) Interest arising in a contracting state and paid to the government of the other contracting state, political subdivisions thereof or agencies (including financial institutions) wholly owned by that government or a political subdivision is exempt from tax in the state where the income arises, unless the rule mentioned in the following sentence applies. Interest on securities, bonds or debentures issued by the government of a contracting state, political subdivisions thereof or agencies (including financial institutions) wholly owned by that government or political subdivision thereof is taxable only in that state.

(gg) The 5% rate applies to royalties paid for the use of, or right to use, scientific works, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary or artistic works, including cinematographic films, and tapes for television or radio broadcasting.

(hh) Interest derived by the government of the contracting state including local authorities thereof, a political subdivision, the central bank or any financial institution controlled by such government, the capital of which is wholly owned by the government of the contracting state, is exempt from tax.

(ii) The treaty rates do not apply to residents of a contracting state who perform their activity outside of this state if the income and profits of such persons are exempt from tax or are taxed at a substantially lower rate in such state.

(jj) The 0% rate applies if interest is received and actually held by the government or a political subdivision. Interest paid to and held by a resident of one contracting state is exempt from tax in the other contracting state if it is paid with respect to a loan made, guaranteed or insured or with respect to any other debt claim or credit, if the loan, debt claim or credit is guaranteed or insured on behalf of the first-mentioned state or by an authorized organ.

(kk) The 0% rate also applies if the interest is paid by a purchaser to a seller with respect to commercial credit resulting from deferred payments for goods, merchandise, equipment or services, unless the sale or indebtedness is between associated persons.

(ll) The 0% rate also applies to interest paid to an institution (including a financial institution) with respect to a loan made under an agreement between the governments of the contracting states.

(mm) The reduced rates apply if the beneficial owner of the dividends is subject to tax with respect to such dividends.
The 0% rate also applies to interest arising in a contracting state and paid to a resident of the other contracting state that was established and operated exclusively to administer or provide benefits under one or more pension, retirement or other employee benefits plans if the following conditions are satisfied:

- The recipient is the beneficial owner of the interest and is generally exempt from tax in the other state.
- The interest is not derived from the carrying on of a trade or a business or from a related person.

The 0% rate also applies to interest paid with respect to indebtedness incurred in connection with the sale on credit of industrial, commercial or scientific equipment by an enterprise that is resident of one contracting state to an enterprise resident in the other contracting state, unless the sale or indebtedness is between associated enterprises.

Tax imposed on the earnings of a company attributable to a permanent establishment in a contracting state in addition to the tax that would be chargeable on the earnings of a company that is a national of that state may not exceed 5% of the amount of such earnings.

If a resident of a contracting state has a permanent establishment in the other state, such permanent establishment may be subject to a withholding tax under the law of that other state. However, this tax may not exceed 10% of the amount of the profits of that permanent establishment after payment of the corporate tax on the profits. This measure does not affect provisions contained in production-sharing contracts and contracts of work (or any other similar contracts) relating to the oil and gas sector or other mining sector entered into by the government of Indonesia, its instrumentalities, its relevant state oil and gas company or any other entities of the government of Indonesia, with a person that is a resident of the other contracting state.

The 0% rate applies to the interest paid with respect to bonds, debentures or similar obligations of the government, political subdivisions, local authorities or the central bank.

The 0% rate applies to dividends if the beneficial owner of the dividends is the government, the central bank, or other government institutions or statutory bodies. The 5% rate applies to dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the payer. The 15% rate applies to other dividends.

The 10% rate applies to dividends paid to the beneficial owner of the dividends if the beneficial owner owns directly at least 25% of the capital stock of the company paying the dividends. The 15% rate applies to other dividends.

The 0% rate applies to interest received and belonging to the government, political subdivisions, local authorities or the central bank.

The double tax treaty with Yugoslavia applies to Serbia and Montenegro.

The 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes for radio or television broadcasting. The 10% rate applies to the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

The 5% rate applies to dividends paid to the beneficial owner of the dividends if such owner holds at least 20% of the capital of the company paying the dividends or has invested in the acquisition of the shares or other rights of the company the equivalent of at least EUR100,000. The 15% rate applies in all other cases.

The 5% rate applies to royalties with respect to copyrights of scientific works, patents, trademarks, secret formulas, processes or information concerning industrial, commercial or scientific experience. The 10% rate applies in other cases.

The 0% rate applies to the following types of interest:

- Interest paid to or by the state, political subdivision or central bank
- Interest arising and paid with respect to a loan granted for a term over three years that is guaranteed or insured or to a credit granted for a term over three years that is guaranteed or insured by the authorized state institutions

The 10% rate applies in other cases. The procedure for application of these restrictions will be set by the competent authorities of Mexico and Ukraine.
The 0% rate applies to interest if any of the following circumstances exist:

- The beneficial owner of the interest is the government or an agency authorized by the government.
- The interest is paid with respect to loans made, guaranteed or issued by or on behalf of the government or an agency authorized by the government.
- The interest is paid with respect to debt claims that are warranted, insured, or directly or indirectly financed by the government or an agency authorized by the government.

The 5% rate applies to interest paid in connection with the sale on credit of industrial, commercial or scientific equipment, or in connection with loans granted by banks. The 10% rate applies in all other cases if the recipient of the interest is resident in either treaty state and is the beneficial owner of the interest.

See footnotes (b) and (c) in Section A.

The 0% rate applies to interest paid with respect to a loan made, guaranteed or insured, or with respect to any other debt claim or credit guaranteed or insured, on behalf of the state by its authorized body. The 5% rate applies to interest paid on loans granted by banks and other financial institutions (including investment banks and savings banks). The 10% rate applies to all other interest payments.

The 5% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, as well as for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works including cinematographic films, and films or tapes for television or radio broadcasting.

Ukraine has ratified a double tax treaty with Cuba, but this treaty is pending.

Ukraine has signed double tax treaties with Malaysia and Qatar, but these treaties have not yet been ratified.

Ukraine has signed amending protocols to the double tax treaties with Cyprus, the Netherlands, Turkey, Switzerland and the United Kingdom, but these protocols are still pending ratification.

The Ukrainian government has approved the protocol to the double tax treaty with Austria, raising the rates overall and introducing additional conditions for obtaining treaty benefits, and authorized the first deputy head of the Ministry of Finance of Ukraine to sign the protocol. It also authorized the first deputy head of Minister of Finance of Ukraine to sign a protocol to the double tax treaty with Singapore.

The Minister of Finance has been authorized to sign a new treaty with Spain and a double tax treaty with Sri Lanka.

On 23 July 2018, Ukraine signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI), but the MLI has not yet been ratified by the Ukrainian parliament.

Ukraine is negotiating double tax treaties with Guinea, New Zealand and Tunisia.

Ukraine is negotiating an amendment to its double tax treaty with Belgium.

A. At a glance

Corporate Income Tax Rate (%) 0*
Capital Gains Tax Rate (%) 0*
Branch Tax Rate (%) 0*
Withholding Tax (%) 0*

* No taxes are imposed by the federal government of the United Arab Emirates. See Section B for further information.

B. Taxes on corporate income and gains

Corporate income tax. Although no federal taxation currently exists in the United Arab Emirates (UAE), each of the individual Emirates (Abu Dhabi, Ajman, Dubai, Fujairah, Ras Al Khaimah, Sharjah and Umm Al Quwain) has issued corporate tax decrees that theoretically apply to all businesses established in the UAE. However, in practice, these laws have not been applied. Taxes are currently imposed at the Emirate level only on oil and gas producing companies in accordance with specific government concession agreements, and on branches of foreign banks under specific tax decrees or regulations or in accordance with agreements with the Rulers of the Emirates in which the branches operate.

The preceding paragraph describes how the practice has evolved in the UAE at the level of the individual Emirates. No general exemption is contained in the Emirates’ tax decrees. Persons investing in the Emirates should be aware of the risk that the tax decrees may be more generally applied in the Emirates in the future and of the remote risk that they may be applied retroactively.
They should also bear in mind the potential introduction of federal-level taxation in the medium to long term.

In August 2015, the UAE Ministry of Finance (MoF) announced the potential introduction of corporate tax in the UAE. No further details have been provided with respect to the proposed tax rate or timeline. The MoF stated that after an announcement has been made that the draft law has been finalized, it will be at least 12 months before businesses will be required to fulfill their UAE corporate tax obligations. This will allow businesses to prepare for the implementation of the corporate tax.

**Tax incentives.** Several of the Emirates have free zones that offer tax and business incentives aimed at making the UAE a global financial and commercial center. The incentives usually include tax exemptions for a guaranteed period, the possibility of 100% foreign ownership, absence of customs duty within the free zone and a “one-stop shop” for administrative services. The free zones include, but are not limited to, the Dubai Airport Free Zone (DAFZ), Dubai International Financial Centre (DIFC) (typically for financial services), Dubai Internet City (DIC), Dubai Media City (DMC), Dubai Multi Commodities Centre (DMCC), Dubai South (DS), Jebel Ali Free Zone (JAFZ), and Abu Dhabi General Markets (ADGM; typically for financial services). Approximately 20 free zones are located in the Emirate of Dubai alone.

**C. Foreign-exchange controls**

Neither the federal government of the UAE nor the individual Emirates impose foreign-exchange controls.

**D. Tax treaties**

The UAE has tax treaties currently in force with the following jurisdictions.

In June 2016, the UK public voted to leave the European Union (EU). Article 50, which allows a member state to leave within two years, was triggered on 29 March 2017 and subsequently extended, so that the latest date for the United Kingdom to leave the EU became 31 October 2019. At the date of writing, the United Kingdom had not yet left the EU, but the UK government is still committed to this happening. An agreement on transitional arrangements, which would be expected to continue until 31 December 2020, may be reached. Until the United Kingdom leaves the EU, and during any transition period, it will benefit from and be subject to its EU rights and obligations.

In the event that the United Kingdom leaves the EU during 2019 without having agreed transition arrangements, the UK tax implications of leaving the EU are unpredictable; there is a possibility that the UK government may implement changes to the UK tax provisions outlined below, and that these may come into effect within a very short timeframe.

</table>
(a) The rate of corporation tax is 19% for both large and small companies. Legislation has been enacted to decrease the rate of corporation tax to 17%, effective from 1 April 2020. The main rate of corporation tax for ring-fence profits (that is, profits from oil extraction and oil rights in the United Kingdom and the UK continental shelf) is 30% (small profits rate of 19%). The rates for ring-fence profits are not scheduled to change.

(b) The small profits rate of 19% for ring-fence profits applies in certain circumstances if taxable profits are below GBP300,000. This benefit is phased out for taxable profits from GBP300,000 to GBP1,500,000. These limits are reduced if associated companies exist.

(c) An additional 8% surcharge is levied on the profits of banks in excess of GBP25 million (before the offset of losses carried forward).

(d) Capital gains are subject to tax at the normal corporation tax rate. See Section B for details concerning the taxation of capital gains derived by non-residents.

(e) A 45% rate applies to compound interest received from the UK tax authorities in certain cases.

(f) The amount of annual profits that can be relieved by losses carried forward is limited to 50% from 1 April 2017, subject to an allowance of GBP5 million per group.

B. Taxes on corporate income and gains

Corporate income tax. Companies that are resident in the United Kingdom are subject to corporation tax on their worldwide profits, but several exemptions have the effect of focusing corporation tax on UK-related activities. Tax is imposed on the total amount of income earned from all sources in the company’s accounting period, including any chargeable capital gains. However, a company can elect to exempt non-UK branch income and losses from UK corporation tax, subject to transitional rules that govern entry into the regime. This election is irrevocable and takes effect from the accounting period after the one in which the election is made.

Nonresident companies are generally subject to UK corporation tax only if they carry on a trade in the United Kingdom through a permanent establishment (however, companies should also consider any potential diverted profits tax issues; see Section E). A permanent establishment arises either from a fixed place of business in the United Kingdom through which the nonresident company carries on its business, or from an agent exercising authority to do business in the United Kingdom on behalf of the nonresident company. The amount of profit attributable to a permanent establishment is computed in accordance with the separate enterprise principle. A corporation tax charge is also imposed for nonresidents disposing of UK land in the course of a property dealing or development trade, regardless of whether there is a UK permanent establishment and regardless of the residence of the entity.

Legislation is in place so that from 6 April 2020, non-UK resident companies that carry on a UK property business or have other UK property income will be chargeable to corporation tax (rather than income tax) on that income.

A company is resident in the United Kingdom if it is incorporated in the United Kingdom or if the central management and control of the company is exercised there. However, companies regarded as resident under domestic law, but as nonresident under the tie-breaker clause of a double tax treaty, are regarded as nonresident for all corporation tax purposes.
Rates of corporation tax. The rate of corporation tax for both large and small companies is 19%. Legislation has been enacted to reduce the rate to 17%, effective from the financial year beginning 1 April 2020. If an accounting period does not coincide with the financial year, the profits for the accounting period are time-apportioned and the appropriate rate is applied to each part.

The rate is 30% for companies with ring-fence profits (that is, profits from oil extraction and oil rights in the United Kingdom and the UK continental shelf). For ring-fence profits, a company may claim a small profits rate of corporation tax, which is 19%, if its taxable profits for an accounting period are less than GBP300,000. Ring-fence companies can claim marginal relief on profits between GBP300,000 and GBP1,500,000. These limits are divided by one plus the number of associates if a company has associated companies (subsidiaries or fellow subsidiaries), regardless of whether they are in or outside the United Kingdom.

An additional 8% surcharge is levied on the profits of banks in excess of GBP25 million (before the offset of losses carried forward), effective from 1 January 2016.

A special rate of corporation tax of 45% applies on restitution interest, which is compound interest received from the UK tax authorities on the repayment of tax (either by agreement or an order of a court) originally collected in breach of law, which applies to awards determined on or after 21 October 2015.

Capital gains. Gains on chargeable assets are subject to corporation tax at the corporation tax rate. For UK tax purposes, a capital gain is usually the excess of the sale proceeds over the sum of the original cost and any subsequent qualifying capital expenditure incurred on the chargeable asset being disposed of. If chargeable assets acquired before 31 March 1982 are disposed of, only the portion of the gain after that date is usually taxable. An allowance is available for inflation up to 31 December 2017; the amount of the reduction is based on the increase in the retail price index between the date of acquisition (or 31 March 1982, if later) and 31 December 2017. This indexation allowance may be used only to eliminate a gain; it may not be used to create or increase an allowable loss.

The Substantial Shareholdings Exemption (SSE) broadly exempts from UK tax any chargeable gain on disposals made by trading companies or trading groups with substantial shareholdings (at least 10%) in other trading companies or groups. Broadly, the following are the two sets of conditions that must be satisfied:
- A substantial shareholding requirement
- A trading requirement relating to the “investee” company or subgroup

No tax is levied on a gain on the sale of shares in a UK subsidiary by a foreign nonresident parent company unless that company is deemed to represent a property-rich asset by way of an indirect disposal of property (see below). In addition, gains on the sale of assets situated in, and used in a trade carried on by a permanent establishment in, the United Kingdom are subject to corporation tax at the corporation tax rate.
Special provisions permit the deferral of the capital gains charge on qualifying business assets if the sales proceeds are reinvested. There are numerous other special rules relating to capital gains.

Disposals of property before 6 April 2019. Capital gains tax at a rate of 28% (known as the Annual Tax on Enveloped Dwellings [ATED]-related capital gains tax) may be charged on the disposal by companies of residential property that is within the ATED charge. The ATED charge is an annual charge levied on companies holding residential property worth over GBP500,000 (see Section D for the rates of the ATED). The ATED and the ATED-related capital gains tax charge are designed to prevent tax avoidance through the wrapping of residential property in corporate or other “envelopes.” Several reliefs are available to reduce the impact of this tax on genuine business transactions. Until 6 April 2019, the ATED-related capital gains tax charge applies to the disposal of residential property by both UK and non-UK resident companies.

If, prior to 6 April 2019, there is a disposal of residential property by non-UK resident closely held companies that is not subject to the 28% ATED-related capital gains tax charge mentioned above, it may instead be subject to nonresident capital gains tax (NRCGT) at a UK corporation tax rate of 19%.

Disposals of property on or after 6 April 2019. From 6 April 2019, UK tax is chargeable on gains derived by non-UK residents on the direct or indirect disposal of all types (residential or commercial) of UK immovable property. This applies regardless of the nature of the property or the residence of the disposing entity.

The charge also applies to certain disposals by nonresidents of interests (such as shares or partnership interests) that derive their value from UK property. The existing NRCGT regime will be subsumed within the new regime, and the ATED-related capital gains tax regime will be abolished for non-UK resident companies.

Capital losses. Capital losses are offset against capital gains of the same accounting period and, if an excess exists, they may be carried forward indefinitely (to be set off against chargeable gains of future accounting periods), but may not be carried back. Capital losses may not be used to reduce trading profits. See Relief for losses in Section C for proposals that are intended to be introduced in April 2020.

Administration. Tax returns, accounts and computations must be filed within 12 months after the end of the accounting period.

Large companies (companies with annual taxable profits exceeding GBP1,500,000 divided by one plus the number of active associated companies) make quarterly installment payments of their corporation tax. The first installment is due 6 months and 13 days after the first day of the accounting period, and the last installment is due 3 months and 14 days after the end of the accounting period. These payments are based on the estimated tax liability for the current year. Fewer payments may be required for shorter accounting periods.

For accounting periods beginning on or after 1 April 2019, the installment payment dates for corporation tax for “very large...
companies” (annual taxable profits exceeding GBP20 million divided by one plus the number of active associated companies) will be brought forward. Those companies will be required to pay corporation tax in quarterly instalments in the 3rd, 6th, 9th and 12th months of their accounting period (rather than in the 7th and 10th months of the current accounting period and the 1st and 4th months of the following accounting period). All other companies must pay estimates of their corporation tax liability within nine months after the end of their accounting period.

Companies not complying with the filing and payment deadlines described above are subject to interest and penalties.

A self-assessment system requires companies to assess correctly their tax liabilities or face significant penalties. In addition, the tax authority (HMRC) has extensive investigative powers.

Large businesses must publish annually their UK tax strategy. Those businesses that fail to do so correctly and in time are liable to a penalty. The UK tax strategy report for each accounting period must be published before the end of the accounting period to which it relates (and within 15 months of the previous one being published). The tax strategy report should include the approach of the UK group to tax governance and risk management, as well as its attitude toward tax planning, the level of risk in relation to UK taxation that the group is prepared to accept and its approach to dealing with HMRC. In broad terms, the following entities are required to publish a tax strategy:

- UK subgroups of and subsidiaries and permanent establishments of multinational groups with EUR750 million global turnover (that is, those that fall within the Country-by-Country Reporting [CbCR] requirement)
- UK-headed groups, some specific UK subgroups and standalone UK entities (including companies and partnerships) with at least either GBP200 million of turnover or a balance sheet total exceeding GBP2 million.

A key point is that no de minimis level is set for UK entities that are part of a EUR750 million turnover group. A UK company, subgroup or permanent establishment that is part of such a multinational group must publish a strategy, even if the level of activity in the UK is minimal.

**Inward Investments Support.** Significant inward investors can apply under HMRC’s Inward Investments Support service for written confirmation of the UK tax treatment of specific transactions or events. In this context, “significant” is regarded as an investment of GBP30 million or more, but smaller investments are considered if they are potentially of importance to the national or regional economy.

**Dividends.** Dividends paid by UK resident companies are not subject to withholding tax. For dividends received by UK resident companies, the United Kingdom has a dividend exemption regime. A dividend or other income distribution received on or after 1 July 2009 is generally exempt from UK corporation tax if all of the following conditions are satisfied:

- The distribution falls within an exempt class or, if the recipient is a “small” company, the payer is resident in the United Kingdom or a qualifying territory.
• The distribution is not of a specified kind.
• No deduction is allowed to a resident of any territory outside the United Kingdom under the law of that territory with respect to the distribution.

**Interest.** Interest payments on “short loans” (loans with a duration that cannot exceed 364 days) may be made without the need to account for withholding tax. All interest payments by UK resident companies may be made without the imposition of withholding tax if the paying company reasonably believes that the interest is subject to UK corporation tax in the hands of the recipient. See Section E for a summary of the UK’s rules on tax deductions for interest payments.

**Foreign tax relief.** Foreign direct tax on income and gains of a UK resident company other than that relating to a non-UK branch for which an exemption election has been made (see Corporate income tax) may be credited against the corporation tax on the same profits. The foreign tax relief cannot exceed the UK corporation tax charged on the same profits.

If a company receives a dividend from a foreign company in which it has at least 10% of the voting power, it may also obtain relief for the underlying foreign tax on the profits out of which the dividend is paid. Foreign tax relief does not apply if the dividend satisfies the conditions for the dividend exemption, unless an election is made (see Dividends).

**C. Determination of trading income**

**General.** The assessment is based on financial statements prepared in accordance with generally accepted accounting principles (GAAP), subject to certain adjustments and provisions. Since 1 January 2015, most UK entities (with limited exceptions) have been required to report either under International Financial Reporting Standards or under Financial Reporting Standards in the United Kingdom and Republic of Ireland (either FRS 101 or 102).

In general, to be deductible, expenses must be incurred wholly and exclusively for the purposes of the trade. However, specific reliefs and prohibitions exist for certain expenses. For example, no deduction is allowed for entertainment expenses, except for the entertaining of company employees (in certain circumstances).

**Corporate and government debt and foreign-exchange differences.** The rules under the “loan relationships” regime are designed to allow the tax treatment of interest, discounts and premiums on debt instruments to follow the accounting treatment in most circumstances. However, the regime includes many anti-abuse measures as well as other measures, which can restrict the allowable deductions (for further details, see Section E).

Foreign-exchange differences on most items are taxable or relievable when they are recognized in the profit-and-loss account. Specific rules apply to foreign-exchange differences arising on loans that hedge exchange risk on shareholdings.

**Inventory.** Inventory is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out
basis; the last-in, first-out basis is not currently acceptable under UK GAAP.

**Provisions.** HMRC allows specific provisions made in accordance with GAAP to be deductible for tax purposes unless specific legislation provides to the contrary. However, no expenditure may be relieved more than once.

**Leased assets.** If leases of plant or machinery function essentially as financing transactions (long-funding leases), they are taxed as such and the following rules apply:
- The lessor includes only the finance element of the rentals arising under the lease income.
- The lessee deducts only the finance element of the rentals payable over the life of the lease and is entitled to capital allowances.

This regime applies to finance leases and certain operating leases. With the exception of some hire-purchase transactions, leases of less than five years are not affected.

*Impact of introduction of International Financial Reporting Standards 16.* International Financial Reporting Standards (IFRS) 16, the new international accounting standard relating to the accounting treatment of leases, replaces the existing standard, International Accounting Standard (IAS) 17, effective from periods of account beginning on or after 1 January 2019 (although earlier adoption is permitted). A key change made by IFRS 17 is that, for lessees, all leases (with some limited exceptions) will need to be reported on balance sheet. Therefore, for lessees that apply IASs (or FRS101), the distinction that exists between finance leases, which are recognized on the balance sheet, and operating leases, which are not recognized on the balance sheet, will be removed.

The UK government has amended the legislation relating to the taxation of leases to ensure that it continues to work as set out above following the introduction of IFRS 16. However, accounting adjustments may arise in lessee companies on adoption of IFRS 16; the tax treatment of these adjustments is complex, but they will typically be taxable or deductible for tax purposes, spread over the remaining lease term.

**Tax depreciation (capital allowances)**

Capital allowances are usually subject to recapture on the disposal of an asset on which capital allowances have been claimed.

*Plant and machinery.* Expenditure on plant and machinery bought after April 2009 is pooled together (the main pool), and allowances are given at 18% on a reducing-balance basis. Assets with a useful life of 25 years or more (long-life assets) are depreciated at 8% on a reducing-balance basis (this rate falls to 6% per year from 1 April 2019). Integral features to a building also qualify for the 8% rate of capital allowances (this rate also falls to 6% from 1 April 2019). An annual investment allowance (AIA) of 100% is available and applies to the first GBP200,000 of investment in plant and machinery (other than cars) by all businesses, regardless of size. One AIA is available to each individual business or corporate group.
A temporary increase in the AIA from GBP200,000 to GBP1 million applies for expenditure incurred between 1 January 2019 and 31 December 2020.

Cars. The capital allowances rules for cars are based on their CO₂ emissions per kilometer driven. A 100% first-year allowance rate applies to expenditure incurred on or before 31 March 2021 on electric cars and cars with CO₂ emissions of 50g/km or less. Cars emitting between 50g/km and 110g/km are added to the main pool, and the 18% rate applies. Cars emitting above 110g/km are added to the special-rate pool, and the 8% rate applies. For leased cars with CO₂ emissions above 110g/km, 15% of the lease cost is disallowed for tax purposes. The 100% first-year allowance rate does not apply to cars that will be leased.

Energy-saving assets. A 100% first-year allowance is available to businesses for expenditure on gas-refueling infrastructure, water-efficient technologies and energy-saving technologies. Lists of qualifying technologies are reviewed regularly. This allowance will be abolished from 31 December 2020.

Nonresidential structures and buildings. A new Structures and Buildings Allowance applies for new nonresidential buildings and structures (excluding land) at an annual rate of 2% on a straight-line basis. The new allowance applies to contracts for construction works entered into on or after 29 October 2018.

Other. Capital allowances are also available for certain other types of expenditure, such as expenditure on mineral extraction and dredging.

Relief for losses

Trading Losses. Trading losses may be used to relieve other income and capital gains of the year in which the loss was incurred and of the preceding year, provided the same trade was then carried on. Losses incurred prior to 1 April 2017 may also be carried forward without time limit but may only be relieved against future profits from the same trade. The use of losses that are carried forward as at 31 March 2015 by banks was restricted from that date to an offset of a maximum of 50% of profits and further restricted from 31 March 2016 to 25%. Anti-avoidance provisions exist to prevent the offset of losses carried forward in arrangements that are principally tax driven. A company that ceases trading may carry back trading losses and offset them against profits of the preceding 36 months.

Non-trading losses. Relief is also available for non-trading deficits and management expenses. Specific rules provide how such losses can be used or carried forward and the order in which they can be used.

New rules relating to use of carried-forward corporate tax losses in periods beginning on or after 1 April 2017. New legislation on corporation tax loss relief was introduced with effect for accounting periods beginning on or after 1 April 2017 (accounting periods straddling 1 April 2017 being deemed to be split into two for this purpose).

The new rules increase groups’ flexibility to use carried-forward losses, but restrict the amount of losses that can be used in any one year. They provide the following:
Losses arising in accounting periods beginning on or after 1 April 2017 can be carried forward and offset against total profits of the company and group, rather than being restricted to particular types of income. However, losses arising prior to 1 April 2017 remain subject to existing restrictions as to the profits against which they can be offset.

The amount of annual profit incurred in accounting periods beginning on or after 1 April 2017 that can be relieved by brought forward losses (whether arising before or after 1 April 2017) is limited to 50% from 1 April 2017, subject to a GBP5 million allowance per “group” (“group” for this purpose is determined using concepts similar to those in the definition found in the group relief rules but with key differences). Groups have full discretion as to how the GBP5 million allowance is used within the group. This allowance will also apply to the carryforward of capital losses (see below).

No new restrictions are imposed on the carryback of losses, and groups have full discretion as to how the GBP5 million allowance is used within the group.

Losses for the purposes of the new rules mean trading losses, non-trading loan relationship deficits, UK property losses, management expenses and non-trading losses on intangible fixed assets.

Capital losses. The UK government has proposed that, for disposals occurring on or after 1 April 2020, companies’ ability to obtain relief for capital losses carried forward in each period will be restricted to 50% of net capital gains arising in that period. Groups will have a single allowance that allows groups unrestricted use of up to GBP5 million capital or income losses each year.

Groups of companies. UK law does not provide for tax consolidation. However, a trading loss incurred by one company within a 75%-owned group of companies may be grouped with profits for the same period realized by another member of the group. Similar provisions apply in certain consortium situations to allow a transfer of a proportion of the losses; for this purpose, a UK resident company is owned by a consortium if 75% or more of its ordinary share capital is owned by other companies, none of which individually has a holding of less than 5%. However, the consortium-owned company must not be a 75%-owned subsidiary of any company. In both situations, anti-avoidance provisions that aim to prevent artificial arrangements exist.

Capital losses cannot be grouped with capital gains of other group members under the above provisions. However, the seller of an asset and another group company may jointly elect to transfer a capital gain or allowable loss to enable offset of capital gains and capital losses. A transferred capital loss can be carried forward in the transferee company.

In a capital gains worldwide group (a 75% group but with some differences from the 75% group for group relief purposes), the transfer of assets between group companies does not result in a capital gain if the companies involved are subject to UK corporation tax. The transferee company assumes the transferor’s original cost of the asset plus subsequent qualifying expenditure and
indexation. However, under an anti-avoidance provision, if the transforee company leaves the group within six years after the date of the transfer of the asset, that company is deemed to have disposed of and reacquired the asset at its market value immediately after the transfer. In certain circumstances, the chargeable gain or allowable loss that arises is added to or deducted from the proceeds of a share sale that caused the company to leave the group in the first place. The resulting gain or loss can then potentially be exempted or disallowed under the SSE (see Capital gains). If this provision does not apply, the gain or loss remains in the company that has left the group, but the gain or loss can be transferred by election to another company in the group. Anti-avoidance provisions that aim to prevent artificial arrangements exist.

Annual Tax on Enveloped Dwellings (ATED); a UK-wide levy on certain higher value residential property held by companies and partnerships with a corporate member; several reliefs are available to exempt genuine property development and investment rental businesses from the tax; the tax is levied at a flat rate per year; the amounts in parentheses apply from 1 April 2019  

Properties worth between GBP500,000 and GBP1 million  GBP3,600 (GBP3,650)  
Properties worth more than GBP1 million and not more than GBP2 million  GBP7,250 (GBP7,400)  
Properties worth more than GBP2 million and not more than GBP5 million  GBP24,250 (GBP24,800)  
Properties worth more than GBP5 million and not more than GBP10 million  GBP56,550 (GBP57,900)  
Properties worth more than GBP10 million and not more than GBP20 million  GBP113,400 (GBP116,100)  
Properties worth more than GBP20 million  GBP226,950 (GBP232,350)  

E. Miscellaneous matters  

Foreign-exchange controls. No restrictions are imposed on inward or outward investments. The transfer of profits and dividends, loan principal and interest, royalties and fees is unlimited. Nonresidents may repatriate capital, together with any accrued capital gains or retained earnings, at any time, subject to company law or tax considerations.  

Anti-avoidance legislation. UK tax law contains many anti-avoidance provisions, which include the substitution of an arm’s-length price for intercompany transactions (including intercompany debt) with UK or foreign affiliates, the levy of an exit charge on companies transferring a trade or their tax residence from the United Kingdom and the recharacterization of income for certain transactions in securities and real property. Some of these anti-avoidance provisions apply only if the transaction is not carried out for bona fide commercial reasons.  

In certain situations, legislation provides a facility for an advance clearance to be obtained from HMRC. If legislation does not provide this facility and if uncertainty exists as to the tax treatment for a transaction, a non-statutory clearance facility exists under which companies may apply to HMRC in advance of the transaction for a written confirmation of HMRC’s view on how the tax
law will apply to the transaction. HMRC undertakes to provide advance clearance within 28 days if evidence exists that the transaction is genuinely contemplated. It also aims to respond within this time period if certainty is sought for a transaction that has already taken place. HMRC does not provide clearance if it believes that the arrangements are primarily intended to obtain a tax advantage.

The United Kingdom has implemented a system requiring the disclosure of certain transactions and arrangements to HMRC. As a direct result of this disclosure regime, tax-planning arrangements are sometimes disclosed in advance to HMRC.

The United Kingdom is also in the process of implementing the EU directive on mandatory disclosure (Mandatory Disclosure Regime [MDR]) and automatic exchange of information regarding reportable cross-border arrangements. The MDR introduces transparency rules for tax intermediaries and applies to transactions from 25 June 2018 (although the first disclosures will not be made until 2020).

A general anti-abuse rule (GAAR) entered into force on 17 July 2013. The GAAR targets artificial and abusive tax-avoidance schemes and applies to the main taxes but not VAT.

**Anti-hybrid rules.** The previous rules counteracting structures involving hybrid entities or instruments (the anti-arbitrage rules) were replaced with broader anti-hybrid rules from 1 January 2017 in response to Action 2 of the Base Erosion and Profit Shifting (BEPS) project of the Organisation for Economic Co-operation and Development (OECD). The rules effectively target deduction or non-inclusion or double deduction mismatches resulting from hybrid entities or instruments, dual-resident companies or companies with permanent establishments. The rules also cover imported mismatches. This is a situation in which the UK corporate taxpayer is not directly party to a relevant mismatch, but such a mismatch exists within a wider arrangement. Unlike the previous anti-arbitrage rules, the new rules do not contain a purpose test, and it is only necessary for it to be reasonable to suppose that the mismatch arises as a result of the specified features.

In deduction or non-inclusion cases, the mismatches are countered by the following:

- Disallowing a deduction if the payer is within the charge to UK corporation tax
- In cases in which the United Kingdom is the payee jurisdiction, taxing the income if it is reasonable to assume that the deduction has not been counteracted by equivalent rules outside the United Kingdom

In cases in which a double deduction is in more than one territory, the outcome depends on the structure and whether the other territory takes action. However, the rules often result in the United Kingdom denying a deduction unless the deduction is offset against dual-inclusion income.

**Royalty withholding tax.** From 16 March 2016, a new rule applies to deny the benefit of double tax treaties if connected-party arrangements have as a main purpose, or one of the main purposes, the avoidance of withholding tax on intellectual property (IP)
royalty payments. In addition, from 28 June 2016, the definition of IP royalties for the purposes of determining whether income tax should be withheld at source has been broadened. The rules have also been extended to treat as UK source and subject to withholding tax, IP royalty payments paid by a nonresident company in connection with a UK permanent establishment. If such royalty payments are made in connection with an avoided permanent establishment, a diverted profits tax charge is imposed (see Diverted profits tax).

**UK tax treatment of intangible assets.** The intangible fixed assets (IFA) regime was introduced in 2002 and changed the way the UK corporation tax system treats IFAs (such as copyrights, patents and trademarks) and goodwill by, in general, aligning the tax treatment of assets within the scope of the regime with the accounting treatment. Broadly, the commencement rules to the IFA regime mean that it does not apply to assets that existed at 1 April 2002 unless the assets were acquired from an unrelated party on or after that date. A key change occurred to the regime in 2015, when relief for amortization for goodwill and customer-related intangibles was removed. However, the UK government has enacted legislation to repeal this change, and introduced targeted relief for goodwill and certain other assets from 1 April 2019.

**Offshore receipts with respect to intangible property.** The UK government has enacted legislation that imposes a 20% tax on gross receipts that certain foreign companies receive with respect to their intangible property if such receipts are referable to the sale of goods or services in the United Kingdom (whether that be directly by the company or indirectly, including through an unrelated party). The legislation includes some exemptions to the tax, as well as an anti-avoidance rule and a formula for apportioning income between the UK and other countries. The measure does not apply to entities that are resident in states with whom the United Kingdom has a “full tax treaty” (that is, a tax treaty that includes a nondiscrimination article), provided that the territory does not tax only on a remittance or local source basis. The legislation applies from 6 April 2019, but the anti-avoidance rules apply from 29 October 2018.

**Transfer pricing.** UK tax law contains measures that substitute an arm’s-length price for certain intercompany transactions with UK or foreign affiliates. Companies are required to prepare their tax returns in accordance with the arm’s-length principle, and retain adequate records or other documentation to support their compliance with that principle, or otherwise suffer substantial penalties. These rules have other far-reaching consequences, and taxpayers should seek specific advice concerning their circumstances.

If both parties to a transaction are subject to UK corporation tax, and one is required to increase its taxable profits in accordance with the arm’s-length principle, the other is usually allowed to decrease its taxable profits through a corresponding adjustment. Companies that were dormant as of 31 March 2004 and remain dormant are exempt from the transfer-pricing rules. Although small and medium-sized companies (unless they elect otherwise) are exempt from the rules with respect to transactions with
persons in qualifying territories (broadly, the United Kingdom and those countries with which the United Kingdom has entered into a double tax treaty containing a non-discrimination article), they can be subject to the issuance of a transfer-pricing notice by HMRC. However, for small companies, this notice can be issued only if the company has undertaken a non-arm’s-length transaction with an affiliate that is taken into account in determining profits under the Patent Box regime (see Patent Box).

Persons that are otherwise independent but collectively control a business and have acted together with respect to the financing arrangements for the business are also subject to the UK transfer-pricing regime.

**Interest restrictions.** The United Kingdom’s transfer-pricing measures apply to the provision of finance (as well as to trading income and expenses). As a result, companies must self-assess their tax liability on financing transactions using the arm’s-length principle. Consequently, HMRC may challenge interest deductions on the grounds that, based on all of the circumstances, the loan would not have been made at all or that the amount loaned or the interest rate would have been less, if the lender was an unrelated third party acting at arm’s length.

In addition, new rules are in effect for financial periods beginning on or after 1 April 2017 (periods straddling 1 April 2017 being deemed to be split into two for this purpose). Under the new rules, the amount of relief for interest is capped at the lower of 30% of taxable earnings before interest, depreciation and amortization (EBITDA) in the United Kingdom or the modified debt cap (the fixed ratio rule). This is tighter than the previous and now-repealed Worldwide Debt Cap and provides that a group’s net tax-interest amounts in the United Kingdom cannot exceed the global net adjusted interest expense of the group. Alternatively, groups can elect for the restriction to be based on the ratio of net interest (excluding interest paid to related parties) to accounting EBITDA for the worldwide group as opposed to UK taxable EBITDA (the group ratio rule, which is also subject to a modified debt cap). If a group’s net tax-interest expense exceeds its interest capacity, the excess interest is disallowed. However, the excess interest can be carried forward indefinitely (in the company in which it was disallowed) and treated as if it were an amount of interest in a subsequent period. If a group has spare capacity, it can carry this forward for up to five years. Restricted interest or spare capacity cannot be carried back.

Notwithstanding the above rules, groups may always deduct net tax-interest expense of up to GBP2 million per year (subject to existing anti-avoidance and thin-capitalization provisions).

**Controlled foreign companies.** The controlled foreign company (CFC) regime was significantly revised in 2012, effective for accounting periods beginning on or after 1 January 2013. The regime applies to non-UK resident companies that are controlled by UK residents. Similar rules apply to non-UK branches of UK resident companies for which an exemption election has been made.

The regime is similar to the prior regime in that, if a CFC has profits that do not meet any of the exemptions, those profits are
taxed on any UK resident companies having a 25% or more interest in the CFC. However, the regime is much more focused on identifying artificial diversion of profits out of the United Kingdom. Consequently, it is necessary to examine a company’s income on a source-by-source basis to determine whether it falls within one of the “gateways,” or whether one of the entity exemptions apply.

The following are the five “gateways,” which must all be considered:

• Profits attributable to UK activities
• Non-trading finance profits
• Trading finance profits
• Captive insurance business
• Solo consolidation (for banking subsidiaries), which allows a UK bank to treat the foreign company as it were a division of the UK bank

For each gateway test, it is necessary to establish whether the test applies, and then determine which profits pass through the gateway and are chargeable profits of the CFC. Such profits are then subject to apportionment to the appropriate UK resident shareholders. Profits that fall outside one gateway may still fall within one of the others.

Several safe harbors and specific exemptions exist with respect to the gateways, intended to narrow the scope to only artificially diverted profits. In particular, a company may make a claim that between 75% and 100% of profits arising from certain “qualifying loan relationships” are exempt to the extent that they do not relate to UK significant people functions. The prior year version of these rules is currently being considered in the context of the EU state-aid provisions.

The entity-level exemptions apply if any of the following circumstances exist:

• The CFC’s local tax liability is 75% or more of the equivalent UK liability.
• The CFC has low profits or a low-profit margin.
• The CFC is resident in certain qualifying territories.
• A foreign company has become a CFC for the first time (in certain circumstances).

**Diverted profits tax.** The diverted profits tax (DPT) is an anti-avoidance measure, which is effective from 1 April 2015. It is aimed at perceived abuse in certain circumstances involving “insufficient economic substance” somewhere in the supply chain or avoided UK permanent establishments. The DPT is separate from the corporation tax and is imposed at the rates listed below, on profits diverted from the United Kingdom, broadly in the following situations:

• A different transfer-pricing outcome allocating more profits to the United Kingdom and less to a low-tax entity would have resulted had all the facts, including the full supply chain and the activities undertaken by each entity in that chain, been considered.
• An alternative transaction would have been entered into in the absence of tax considerations, and it would have resulted in
more taxable profits in the United Kingdom and less in a low-tax entity.

• A UK resident or nonresident carries on an activity in the United Kingdom in connection with the supply of goods, services or property by a non-UK trading company, and it is reasonable to assume that the activities are designed to ensure that no permanent establishment is established in the United Kingdom, and certain other conditions are satisfied. An exclusion applies if the total UK-related sales revenues of the company (together with connected companies) that are not already included within the charge to UK corporation tax in a 12-month accounting period are less than GBP10 million. Likewise, an exclusion applies if the total UK-related expenses of the company (together with connected companies) in a 12-month accounting period are less than GBP1 million.

Exclusions apply based on substance and the relative values of the tax and other benefits of the transactions. Transactions are also excluded from DPT if they only give rise to one or more loan relationships and associated hedging derivatives. Notification requirements (which are broader than the tax-levying measures) and a unique charging mechanism are imposed with respect to DPT.

The following are the DPT rates:
• General rate: 25%
• Diverted ring-fence or notional ring-fence profits: 55%
• Diverted profits that would have been subject to the 8% bank surcharge: 33%

**Patent Box.** The Patent Box regime was introduced in 2012, and is effective for accounting periods beginning on or after 1 April 2013. The regime (which is optional) taxes qualifying income relating to patents and certain other IP at a rate of 10%. This rate was phased in over five years. Therefore, the 10% rate has been available on all qualifying income from patents and certain other IP since 1 April 2017.

The Patent Box regime applies to patents granted by UK and European patent offices and certain other patent offices in the European Economic Area, as well as to patent applications that cannot be published for reasons of national security or public safety. Other innovative IP found in the medicinal, veterinary and agriculture industries is also included, such as regulatory data, marketing exclusivity, supplementary protection certificates and plant variety rights.

The 10% effective tax rate is achieved by creating an additional deduction from taxable profits and applies to all income arising from the patents, including royalties and income from the sale of patents. Significantly, it also applies to profits from the sale of products, services and processes with embedded patents.

Effective from 1 July 2016, the regime was amended in line with the recommendations of the OECD BEPS Action 5 report. For new entrants (new IP or new claimants) after 30 June 2016, an additional requirement is introduced into the regime. This requirement restricts the availability of the 10% tax rate if the claimant company has, to a significant extent, outsourced research and development (R&D) to related parties or has acquired the IP.
Qualifying income needs to be divided into substreams and then the nexus fraction applied (broadly based on the amount of R&D performed or outsourced by the company) to each income stream to determine how much income qualifies for the reduced tax rate. Existing IP in the regime as of 30 June 2016 should continue to qualify under the existing regime for up to a further five years.

**Dual-resident companies.** A dual-resident company that is broadly not a trading company loses the right to surrender its losses to fellow group members and is prevented from enjoying certain other reliefs. These rules effectively prevent such dual-resident companies from obtaining double reliefs in both countries of residence.

**Impact of decisions of the Court of Justice of the European Union.** The UK tax system is currently subject to significant external influence in the form of binding decisions rendered by the Court of Justice of the European Union (CJEU). These decisions have held that several UK domestic tax measures are contrary to European Fundamental Freedoms (for example, the decisions in *Marks & Spencer; Test Claimants in the Franked Investment Income Group Litigation, Cadbury Schweppes and Philips Electronics UK Limited*).

New UK legislation has been enacted as a result of cases, such as *Marks & Spencer; Cadbury Schweppes* and *Philips Electronics*. Also, UK legislation has been amended following CJEU decisions that concern the tax system in another EU member state, if an equivalent tax provision exists in UK domestic law (for example, *National Grid Indus BV*).

Under the European Union (Withdrawal) Act 2018, when the United Kingdom leaves the EU, the existing body of EU law will be converted into British law so that the same rules will apply after the United Kingdom leaves the EU as did before. The UK parliament will then be free, subject to international agreements and treaties, to amend, repeal or improve any law as necessary. If the United Kingdom leaves the EU with a deal, there will be a transition period (probably ending on 31 December 2020) during which the role of the CJEU will remain.

**Devolution of tax powers.** Legislation enabling devolution of some corporation tax powers (including the power to set a Northern Ireland rate with respect to certain trading profits) to the Northern Ireland Assembly was enacted during 2015, and will take effect on a date to be determined by statutory instrument. To date, the power to set a Northern Ireland corporate tax rate has not been devolved, but a rate of 12.5% has been proposed. Although certain tax-raising powers have been devolved to the Scottish Parliament and Welsh Assembly (such as LBTT and LTT; see Section D), the power over corporation tax has not yet been devolved.

**F. Treaty withholding tax rates**

The rates in the table below reflect the lower of the treaty rate and the rate under domestic tax law. The table is for general guidance only.
Under UK domestic law, withholding tax is not imposed on dividends.

Under an EU directive, payments of interest and royalties made between, broadly, associated companies resident in EU member states are exempt from withholding tax. Numerous conditions and transitional rules apply, including some that delay the application of the rules for several years.

If the United Kingdom leaves the EU during 2019 with an agreed deal, there will be a transition period (probably ending on 31 December 2020) during which the EU directive relating to the payment of interest and royalties will continue to apply to the United Kingdom. If the United Kingdom leaves the EU during 2019 without an agreed deal, the interest and royalties directive will cease to apply as of the date of leaving. However, the UK government has released guidance confirming its view that the domestic provisions with which the UK implemented the EU directive will continue to provide relief from UK withholding tax on interest and royalties arising in the United Kingdom.

Anti-avoidance provisions may also restrict treaty benefits in certain circumstances.

</table>

(a) No withholding tax is imposed on royalties paid for copyrights of literary, dramatic, musical or artistic works (except motion pictures, films, videotapes and certain other items), payments for patents or commercial or industrial experience or payments for the use of computer software.

(b) The lower rate applies to interest paid with respect to loans from banks and insurance companies, securities quoted on a stock exchange, and certain sales of machinery and equipment.

(c) The 0% rate applies if the recipient is any of the following:
• The other state (including its local authorities, political subdivisions, local
governments and statutory bodies)
• An individual
• A company whose shares are regularly traded on a recognized stock
exchange
• A company of which less than 25% of its shares of which are owned by
persons who are not residents of the other state
• A pension scheme
• A person who passes the “principal purpose test” set out in the treaty

d) The higher rate applies to industrial, commercial, scientific, technical and
 technological royalties, and royalties with respect to patents, trademarks,
designs or models, plans, and secret formulas or processes.
(e) The lower rate applies to payments for the use of, or right to use, industrial,
commercial or scientific equipment. The higher rate applies to other royal-
ties.
(f) The lower rate applies to payments for the use of industrial, commercial or
scientific equipment. The higher rate applies to other royalties.
(g) The 5% rate applies to royalties for patents, trademarks or processes as well
as to royalties for know-how concerning industrial, commercial or scientific
experience. The 7% rate applies to royalties for copyrights of literary, artistic
or scientific works.

(h) The standard rate of withholding tax on interest is 12%. Interest is exempt
from withholding tax if any of the following apply:
• The state is the payer of the interest.
• The interest is paid on a loan made, guaranteed or insured by the other
contracting state.
• The interest is paid on a loan granted by a bank to an unrelated party at
preferential rates and the loan is repayable over a period of not less than
five years.
• The interest is paid on a debt resulting from either of the following:
   — Sales on credit of industrial, commercial or scientific equipment by a
   resident of the other contracting state (excluding sales between related
   persons).
   — Purchases of industrial, commercial or scientific equipment financed
   through a leasing contract.

(i) The 3% rate applies to royalties for the right to use news. The 5% rate applies
to royalties for copyrights of artistic works (excluding motion picture films
and television). The 10% rate applies to royalties for patents or payments for
industrial experience, including the rendering of technical assistance. The
15% rate applies to other royalties.

(j) The lower rate applies to copyright royalties.

(k) The lower rate (the 7% rate under the Mongolia treaty and the 10% rate under
the India and Thailand treaties) applies to interest paid to banks and other
financial institutions.

(l) The higher rate applies if the recipient is a Malawi company that controls more
than 50% of the voting power in the UK company that makes the payment.

(m) The 10% rate applies to interest on listed bonds.

(n) The higher rate applies to cinematographic, television and radio broadcasting
royalties.

(o) The applicability to Bosnia and Herzegovina of the treaty entered into with
the former Yugoslavia is uncertain. The UK tax authorities request that claims
for relief be examined by their Tax Treaty Team. The UK tax authorities con-
sider the former Yugoslavia treaty to be applicable to Montenegro and Serbia.
New agreements have been entered into with Croatia, Kosovo, Macedonia and
Slovenia.

(p) The lower rate applies to royalties with respect to cinematographic films and
films or tapes for television or radio broadcasting.

(q) The higher rate applies to royalties with respect to mines, quarries or other
extractions of natural resources.

(r) The lower rate applies to the right to use industrial, commercial or scientific
equipment.

(s) The lower rate applies to copyright royalties. The higher treaty rate applies to
all other royalties payable with respect to rights granted after the signing of
the double tax treaty.

(t) The 0% rate applies to, among other interest payments, the following:
• Interest paid to the state (or a subdivision), an individual, a pension scheme,
a financial institution, a quoted company or an unquoted company if it is
less than 25% owned by Bahrain residents, provided that such interest is not
paid as part of an arrangement involving back-to-back loans
• Interest paid by the state (or a subdivision) or a bank, or on a quoted
Eurobond
The lower rate applies to interest on loans between enterprises (20% relationship required in the case of Slovenia), interest paid to a pension scheme (some treaties) or to a state or political subdivision.

The lowest rate applies, depending on the treaty, to interest paid to a state or political subdivision or the central bank. Some treaties also apply this rate to interest guaranteed by or paid by the state.

The lower rate applies if any of the following circumstances exists:

- The interest is paid to a state or political subdivision or the central bank.
- The interest is paid with respect to the sale on credit of merchandise or equipment to an enterprise of either country.
- The interest is paid as a result of financing provided in connection with agreements concluded between the two governments.
- The beneficial owner of the interest is a pension scheme.

The 0% rate applies if any of the following circumstances exists:

- The recipient and beneficial owner of the interest is the other state or the central bank, an institution owned by that government, a statutory body or a bank.
- The interest is paid by the state in which the interest arises or by a political subdivision or local authority thereof, or the interest is paid with respect to a loan, debt claim or credit that is owed to or made, provided, guaranteed or insured by that state or a political subdivision, local authority or export financing agency thereof.
- The interest is paid with respect to indebtedness arising as a result of the sale on credit of equipment, merchandise or services.

Qualification for the lower rate may require certification by the relevant competent authority that one of a company’s main purposes is not the securing of the treaty relief.

An adjusted amount (60% of the gross amount of the royalties) is subject to the 10% rate with respect to the right to use industrial, commercial or scientific equipment.

The 0% rate applies if the recipient of the interest is the government of the other state, political subdivisions or local authorities thereof.

Relief may be restricted to 15% in certain circumstances (see Article 11(5) of the treaty).

The 0% rate applies if the interest is paid by the state in which it arises (including its political subdivisions, local authorities or statutory bodies), or if the recipient is any of the following:

- The other state (including its political subdivisions, central bank and statutory bodies)
- An individual
- A company whose shares are regularly traded on a recognized stock exchange
- A company of which less than 25% of its shares are owned by persons who are not residents of the other state
- A pension scheme
- A bank or building society
- A financial institution
- A person who passes the “principal purpose test” set out in the treaty.

The new double tax treaties with Isle of Man and Jersey enter into force with respect to tax withheld at source from 1 February 2019.

The new double tax treaty with Guernsey enters into force with respect to tax withheld at source from 1 March 2019.

The United Kingdom has also entered into tax treaties with Brazil, British Virgin Islands, Cameroon, Cayman Islands, Congo (Democratic Republic of), Iran and Lebanon. These treaties do not have articles covering dividends, interest or royalties. Payments to these countries are subject to withholding tax at the non-treaty countries’ rates set forth in the above table.

The United Kingdom also has new treaties, amendments or protocols to treaties with Belgium, Colombia, Israel, Kyrgyzstan, Switzerland and Ukraine, which are signed but not yet in force.

A. At a glance

Corporate Income Tax Rate (%) 21 (a)
Corporate Capital Gains Tax Rate (%) 21
Branch Tax Rate (%) 21 (a)
Withholding Tax (%) (b)
  Dividends 30 (c)
  Interest 30 (c)(d)
  Royalties from Patents, Know-how, etc. 30 (c)
  Branch Remittance Tax 30 (e)
Net Operating Losses (Years)
  Carryback 0 (f)
  Carryforward Unlimited (f)

(a) The 21% rate is effective for tax years beginning after 31 December 2017. In addition, many states levy income or capital-based taxes. A base erosion minimum tax is also imposed on corporations. See Section B.
(b) Rates may be reduced by treaty.
(c) Applicable to payments to non-US corporations and nonresidents.
(d) Interest on certain “portfolio debt” obligations issued after 18 July 1984 and non-effectively connected bank deposit interest are exempt from withholding tax.
(e) This is the branch profits tax applicable to non-US corporations (see Section D).
(f) A net operating loss deduction is generally limited to 80% of taxable income. Special rules apply to certain types of losses and entities. For details, see Section C.

B. Taxes on corporate income and gains

Corporate income tax. US corporations are subject to US federal taxation on their worldwide income, including income of foreign branches and certain income of their foreign subsidiaries (regardless of whether such income is repatriated to the United States in the year in which it is earned). If certain conditions are met, a US corporation is allowed a 100% deduction against the foreign-source portion of dividends received from certain foreign subsidiaries, including any gain from the sale or exchange of stock in a foreign subsidiary that is treated as a dividend under Section 1248 of the Internal Revenue Code (IRC).

In general, foreign corporations are subject to US taxation on income that is effectively connected with a US trade or business and on certain other US-source income. However, if the foreign corporation is resident in a country having an income tax treaty with the United States and is eligible to claim the benefits of that treaty, only the foreign corporation’s business profits that are attributable to a permanent establishment in the United States are subject to US taxation and the rate of tax on certain other US-source income may be reduced.
Rates of corporate tax. For tax years beginning after 31 December 2017, a corporation’s taxable income is taxed at 21%. This rate applies both to US corporations and to the income of foreign corporations that is effectively connected with a US trade or business. Special rules under Section 15 of the IRC apply to US corporations with certain fiscal tax years to account for the corporate rate change.

Base erosion and anti-abuse tax. The base erosion and anti-abuse tax (BEAT) is a minimum tax on corporations that are subject to US corporate income tax and that meets certain gross receipts and base erosion percentage thresholds. The BEAT amount is the excess, if any, of an amount equal to a 10% (5% for tax years beginning in the 2018 calendar year and 12.5% for tax years beginning after 31 December 2025) of modified taxable income (MTI) over an amount equal to the regular tax liability of the taxpayer reduced by certain credits (including the foreign tax credit). In general, MTI means taxable income calculated without regard to any base erosion tax benefits (for example, current expenses or cost-recovery deductions) generated from base erosion payments and the base erosion percentage of certain net operating loss deductions. Base erosion payments include most deductible payments to foreign related persons, including payments for services, for the use of property and for depreciable or amortizable property. Base erosion payments generally do not include costs of goods sold, with exceptions.

Capital gains and losses. A corporation’s gains are taxed at the same rates as ordinary income. In general, capital losses may offset only capital gains, not ordinary income. Subject to certain restrictions, a corporation’s excess capital loss may be carried back three years and forward five years to offset capital gains in such other years.

Administration. The annual tax return for domestic corporations is due by the 15th day of the fourth month after the close of the company’s tax year. A corporation is entitled, upon request, to an automatic six-month extension to file its return. In general, 100% of a corporation’s tax liability must be paid through quarterly estimated tax installments during the year in which the income is earned. The estimated tax payments are due on the 15th day of the 4th, 6th, 9th and 12th months of the company’s fiscal year.

Credit for foreign taxes. A credit is allowed for foreign income taxes paid, or deemed paid, by US corporations, but the credit is generally limited to the amount of US tax incurred on the foreign-source portion of a company’s worldwide taxable income. Separate limitations must also be calculated for passive income, “general” category income, foreign branch income, global intangible low-taxed income (GILTI; see Section C) and income resourced under a treaty.

C. Determination of taxable income

General. Income for tax purposes generally is computed according to certain statutory tax provisions (for example, Sections 451 and 461 of the IRC) and underlying regulations. Consequently, taxable income typically does not equal income for financial reporting purposes.
In general, a deduction is permitted for ordinary and necessary trade or business expenses. However, expenditures that create an asset having a useful life longer than one year (and not eligible for certain exceptions, such as those relating to the bonus depreciation deduction for qualified depreciable tangible property and eligible de minimis items) may need to be capitalized and recovered over an appropriate period.

**Depreciation.** A depreciation deduction is available for most tangible property (except land) used in a trade or business or held for the production of income, such as rental property. Tangible depreciable property that is used in the United States and placed in service after 1986 is generally depreciated under prescribed recovery periods pursuant to the Modified Accelerated Cost Recovery System (MACRS). In general, under the MACRS, each class is assigned a recovery period and a depreciation method. Significantly, under tax reform legislation effective for tax years beginning in 2018, a 100% first-year bonus depreciation deduction is allowed for certain qualified property acquired and placed in service after 27 September 2017 and before 1 January 2023. Qualified property generally includes tangible property with a recovery period of 20 years or less under MACRS (subject to certain significant exceptions related to designated types of real property improvements), provided the certain statutory requirements are met.

After 2022, the rate of bonus depreciation for qualified property decreases over the next four years to the following rates:
- 80% for property placed in service in 2023
- 60% for property placed in service in 2024
- 40% for property placed in service in 2025
- 20% for property placed in service in 2026

The cost of intangible assets developed by a taxpayer may be amortized over the determinable useful life of an asset. Certain intangible assets, including goodwill, going concern value, patents and copyrights, may generally be amortized over 15 years if they are acquired as part of a business.

Tax depreciation is generally subject to recapture on the sale of a depreciated asset to the extent that the sales proceeds exceed the tax value after depreciation. The amounts recaptured are subject to tax as ordinary income.

**Net operating losses.** If allowable deductions of a US corporation or branch of a foreign corporation exceed its gross income, the excess is called a net operating loss (NOL). With the exception of a two-year carryback for certain losses incurred in the trade or business of farming, NOLs may not be carried back to prior years. However, corporations may generally carry losses forward indefinitely. A net operating loss deduction is generally limited to 80% of taxable income.

**Inventories.** Inventory is generally valued for tax purposes at either cost or the lower of cost or market value. In determining the cost of goods sold, the two most common inventory flow assumptions used are last-in, first-out (LIFO) and first-in, first-out (FIFO). The method chosen must be applied consistently. Uniform
capitalization rules require the inclusion in inventory costs of allocable indirect costs.

**Dividends.** In general, dividends received by a US corporation from other US corporations qualify for a 50% dividends-received deduction, subject to certain limitations. The dividends-received deduction is generally increased to 65% of the dividend if the recipient corporation owns at least 20% of the distributing corporation. Dividend payments between members of an affiliated group of US corporations qualify for a 100% dividends-received deduction. In general, an affiliated group consists of a US parent corporation and all other US corporations in which the parent owns, directly or indirectly through one or more chains, at least 80% of the total voting power and value of all classes of shares (excluding non-voting preferred shares). For distributions made after 31 December 2017, the foreign source-portion of dividends (excluding hybrid dividends) received by a US corporation from certain 10%-owned foreign corporations qualifies for a 100% dividends-received deduction.

**Consolidated returns.** An affiliated group of US corporations (as described in Dividends) may elect to determine its taxable income and tax liability on a consolidated basis. The consolidated return provisions generally allow electing corporations to report aggregate group income and deductions. Consequently, the NOLs of some members of the group can, subject to certain limitations, be used to offset the taxable income of other members of the group, and transactions between group members, such as intercompany sales and dividends, are generally deferred or eliminated until there is a transaction outside the group. Under certain circumstances, losses incurred on the sale of consolidated subsidiaries are disallowed.

**Foreign subsidiaries.** Under certain circumstances, undistributed income of a foreign subsidiary controlled by US shareholders is taxed to the US shareholders on a current basis, as if the foreign subsidiary distributed a dividend on the last day of its tax year. This may result if the foreign subsidiary holds “United States property” (including loans to US shareholders) during its tax year or earns certain types of income (Subpart F, including certain passive income and “tainted” business income, and global intangible low-taxed income [GILTI]). In addition (for tax years of foreign corporations beginning after 31 December 2017, and tax years of US shareholders in which or with which such tax years of foreign corporations end), the US shareholder includes in gross income the aggregate net income of its foreign subsidiary that is treated as GILTI. GILTI is broadly the amount of gross income in excess of a deemed return from tangible depreciable assets held by the foreign subsidiaries reduced by certain amounts of interest expense incurred by the foreign subsidiaries and excluding income that is effectively connected with a US trade, Subpart F income, foreign base company high-taxed income, dividends from related parties and foreign oil and gas extraction income.

**Foreign derived intangible income and global intangible low-taxed income deduction.** For tax years beginning after 31 December 2017, a US corporation may deduct 37.5% (21.875% for tax years beginning after 31 December 2025) of its foreign derived intangible income (FDII) and 50% (37.5% for tax years beginning
after 31 December 2025) of its GILTI, subject to certain limitations. In general, FDII equals the foreign derived amount of a domestic corporation’s deemed intangible income that is driven, in part, by property and services sold to non-US persons. Deemed intangible income equals deduction-eligible income in excess of a deemed return from tangible depreciable assets held by the domestic corporation.

**Anti-hybrid rules.** For tax years beginning after 31 December 2017, a deduction is denied for any disqualified related-party amount paid or accrued pursuant to a hybrid transaction (involving payments that are treated as interest or royalties for US tax purposes but not by the recipient’s residence country) or by, or to, a hybrid entity (an entity that is fiscally transparent for US tax purposes but not for purposes of the tax law of the resident country, or vice versa).

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Branch profits tax, on branch profits (reduced by reinvested profits and increased by withdrawals of previously reinvested earnings); the rate may be reduced by treaty</td>
<td>30%</td>
</tr>
<tr>
<td>Branch interest tax, on interest expense paid by a branch (unless the interest would be exempt from withholding tax if paid by a US corporation); the rate may be reduced by treaty</td>
<td>30%</td>
</tr>
<tr>
<td>Personal holding company (PHC) tax, applies to a corporation that satisfies a passive-income test; in addition to regular tax or AMT; imposed on undistributed income</td>
<td>20%</td>
</tr>
<tr>
<td>Accumulated earnings tax; penalty tax levied on a corporation (excluding a PHC) accumulating profits to avoid shareholder-level personal income tax; assessed on accumulated taxable income exceeding a calculated amount (at least USD250,000 or USD150,000 for certain personal services corporations)</td>
<td>20%</td>
</tr>
<tr>
<td>State and local income taxes, imposed by most states and some local governments</td>
<td>Various</td>

<tr>
<td>Workmen’s compensation insurance; provisions vary according to state laws; rates vary depending on nature of employees’ activities</td>
<td>Various</td>
</tr>
<tr>
<td>Social security contributions (including 1.45% Medicare tax); imposed on Wages up to USD132,900 (for 2019); paid by Employer</td>
<td>6.2%</td>
</tr>
<tr>
<td>Employee</td>
<td>6.2%</td>
</tr>
</tbody>
</table>
Nature of tax

All covered wages (for 2019; Medicare tax);
paid by
Employer 1.45%
Employee 1.45%

(Effective from 1 January 2013, an additional Medicare tax of 0.9% applies to wages, tips, other compensation and self-employment income in excess of USD200,000 for taxpayers who file as single or head of household. For married taxpayers filing jointly and surviving spouses, the additional 0.9% Medicare tax applies to the couple’s combined wages in excess of USD250,000. The additional tax applies only to the amount owed by the employee; the employer does not pay the additional tax. Employers withhold tax only on wages in excess of USD200,000.)

E. Miscellaneous matters

Foreign-exchange controls. The United States currently has no foreign-exchange control restrictions.

Debt-to-equity rules. The United States has a number of provisions that must be considered in evaluating whether a purported debt instrument is considered debt or equity for US tax purposes. Extensive regulations were promulgated for debt instruments issued after 4 April 2016 under Section 385 of the IRC. In such case, funds loaned to a corporation by a related party may be recharacterized by the Internal Revenue Service (IRS) as equity if a prohibited distribution (or similar) transaction occurs. As a result, the corporation’s deduction for interest expense may be disallowed, and principal and interest payments may be considered distributions to the related party and be subject to withholding tax at rates applicable to distributions. Documentation requirements, which were also a part of the same set of regulations, have been withdrawn.

In addition to the Section 385 regulations, the United States has extensive case law distinguishing debt from equity and generally applying some type of facts and circumstances test in determining whether an instrument issued by a business should be considered debt or equity.

If an instrument is properly considered debt, there a number of provisions that can deny or defer the deduction for interest expense. The deduction for net interest expense was modified by the 2017 Tax Cuts and Jobs Act and now generally applies to limit the deduction for business interest to 30% of adjusted taxable income (ATI). For the first four years, ATI is computed without regard to depreciation, amortization or depletion. Thereafter (beginning in 2022), ATI will be decreased by those items, thereby making the computation 30% of net interest expense exceeding earnings before interest and taxes. Interest expense must be related to a “business,” which means the interest must be properly allocable to a trade or business. Certain exceptions apply, including a small business exception, and special rules apply to partnerships for purposes of determining the limitation. Disallowed interest may be carried forward to future years.
and allowed as a deduction. Proposed regulations under Section 163(j) greatly expand the definition of interest expense to include certain fees and hedges and provide substantial rules on the application to controlled foreign corporations (CFCs).

In addition, interest expense accrued on a loan from a related foreign lender must be actually paid before the US borrower can deduct the interest expense.

**Transfer pricing.** In general, the IRS may redetermine the tax liability of related parties if, in its discretion, this is necessary to prevent the evasion of taxes or to clearly reflect income. Specific regulations require that related taxpayers (including US persons and their foreign affiliates) deal among themselves on an arm’s-length basis. Under the best-method rule included in the transfer-pricing regulations, the best transfer-pricing method is the one that provides the most reliable measure of an arm’s-length result, determined based on the facts and circumstances. Transfer-pricing methods that may be acceptable, depending on the circumstances, include the comparable profits method, comparable uncontrolled price method, cost-plus method, resale price method and profit-split method. It is possible to reach transfer-pricing agreements in advance with the IRS.

If the IRS adjusts a taxpayer’s tax liability, tax treaties between the United States and other countries usually provide mutual agreement procedures for the allocation of adjustments between related parties in the two countries to avoid double tax.

**F. Treaty withholding tax rates**

The following are US withholding tax rates for dividends, interest and royalties paid from the United States to residents of various treaty countries.

</table>

Various exceptions (for example, for governmental entities and REITs) or conditions may apply (for example, a limitation-on-benefits provision), depending upon the terms of the particular treaty.

(a) The 0% rate applies if dividends are paid by an 80%-owned US corporation to its parent company (80% ownership must be for at least a 12-month period ending on the date the dividend is declared or the entitlement is determined) and if certain other conditions are met. The 5% rate applies to dividends paid to a company that directly owns at least 10% of the voting power (or share capital, if applicable) of the payer. The 15% rate applies to other dividends.

(b) The 10% rate applies to all interest payments with the following exceptions:
- Interest derived by the government of a contracting state
- Interest derived by certain financial institutions
The withholding rate is reduced to 5% (10% in the case of Bangladesh, Indonesia, Jamaica, Korea (South), Morocco, Spain, Thailand and Trinidad and Tobago; 12.5% in the case of Israel; 14% in the case of Tunisia; 15% in the case of India, Pakistan and Turkey; and 20% in the case of the Philippines) if, among other conditions, the recipient is a corporation owning a specified percentage of the voting power of the distributing corporation.

The 5% rate applies to interest paid to banks or financial institutions and interest related to the sale on credit of industrial, commercial or scientific equipment or of merchandise.

The 0% rate applies to royalties for cultural works as well as to payments for the use of, or the right to use, computer software, patents and information concerning industrial, commercial and scientific experience.

The 0% rate applies to royalties paid for copyrights. The 10% rate applies to royalties paid for patents, trademarks, and industrial, commercial or scientific equipment or information.

The 5% rate applies to royalties paid for the use of commercial, industrial or scientific equipment.

The 0% rate applies to royalties paid for copyrights of literary, artistic or scientific works, cinematographic films, sound or picture recordings, or software.

The exemption does not apply if the recipient controls directly or indirectly more than 50% of the voting power in the paying corporation.

On 4 February 2010, the United States and Hungary signed a new income tax treaty that would replace the existing treaty between the two countries. As of 31 December 2018, the proposed treaty had not yet received US Senate advice and consent to ratification.

The treaty provides for a general exemption from withholding tax on royalties. A 5% withholding tax rate applies to royalties for trademarks and motion pictures.

The 10% rate applies to interest paid on loans granted by banks carrying on bona fide banking business and similar financial institutions.

The 10% rate generally applies to royalties for the use of industrial, commercial or scientific experience.

The 10% rate applies to interest on bank loans. The 17.5% rate applies to other interest.

The 10% rate applies to copyright and film royalties.

The exemption applies to the following:
- Interest paid to qualified governmental entities, provided the entity owns, directly or indirectly, less than 25% of the payer of the interest
- Interest paid with respect to debt guaranteed or insured by a qualified governmental entity
- Interest paid or accrued with respect to the sale of goods, merchandise or services
- Interest paid or accrued on a sale of industrial, commercial, or scientific equipment

The 0% rate applies to royalties paid for the use of certain copyright materials. The 5% rate applies to royalties paid for the use of computer software and industrial, commercial or scientific equipment. The 8% rate applies in all other cases.

The 10% rate applies to royalties paid for copyrights or rights to produce or reproduce literary, dramatic, musical, or artistic works and to royalties paid for motion picture films.

The rate is 0% for dividends paid by a company resident in Luxembourg if the beneficial owner of the dividends is a company that is a resident of the United States and if, during an uninterrupted period of two years preceding the date of payment of the dividends, the beneficial owner of the dividends has held directly at least 25% of the voting shares of the payer.

The 4.95% rate applies to interest paid on loans made by financial institutions and insurance companies. The 10% rate applies to other interest.

The 0% rate applies to the following dividends:
- Dividends paid to certain recipients that own at least 80% of the voting shares of the payer of the dividends
- Dividends paid to certain pension plans

The 5% rate applies if the conditions for the 0% rate are not met and if the recipient owns at least 10% of the payer of the dividends. The 10% rate applies if the 10% ownership threshold is not met. A protocol to the treaty provides an exemption from the 5% “dividend equivalent amount” tax if certain conditions are met (the conditions are similar to those that apply with respect to the 0% withholding tax rate on dividends).
(v) The 4.9% rate applies to interest paid on loans (except back-to-back loans) made by banks and insurance companies and to interest paid on publicly traded securities. The 10% rate applies to interest paid by banks and to interest paid by sellers to finance purchases of machinery and equipment. The 15% rate applies to other interest.

(w) Interest on certain "portfolio debt" obligations issued after 18 July 1984 and non-effectively connected bank deposit interest are exempt from withholding tax.

(x) Interest paid to state-owned enterprises in China is exempt from withholding tax.

(y) The general withholding tax rate for interest may be increased to 10% if both Norway and the United States tax interest paid to nonresidents under their domestic tax laws. Norway does not impose tax on interest paid to nonresidents and, consequently, a 0% rate applies to US-source interest under the treaty. The treaty also provides that a 0% rate applies to certain types of interest, such as interest paid on bank loans.

(z) The 10% rate applies to interest derived by a resident of one of the contracting states from sources in the other contracting state with respect to public issuances of bonded indebtedness.

(aa) The tax imposed by the source state may not exceed, in the case of the Philippines, the lowest of the following:

- 25%
- 15% if the royalties are paid by a corporation registered with the Philippine Board of Investments and engaged in preferred areas of activities
- The lowest rate of Philippine tax that may be imposed on royalties of the same kind paid under similar circumstances to a resident of a third state

(bb) On 13 February 2013, the United States and Poland signed a new income tax treaty that would replace the existing treaty between the two countries. As of 31 December 2018, the proposed treaty had not yet received US Senate advice and consent to ratification.

(cc) A reduced rate may apply if the beneficial owner of the dividend is a Portuguese company that owns at least 25% of the capital of the dividend-paying company.

(dd) On 24 January 2013, the United States and Japan signed a protocol that would amend the existing income tax treaty between the countries. As of 31 December 2018, the proposed protocol had not yet received US Senate advice and consent to ratification.

(ee) The lower rate applies to cultural royalties, which are defined as payments for the right to use copyrights of literary, artistic or scientific works, including cinematographic films.

(ff) The 5% rate applies to royalties paid for copyrights of musical compositions or literary, dramatic or artistic works. The 8% rate applies to royalties paid for the following:

- Motion picture films, and films, tapes and other means of transmission or reproduction of sounds
- Industrial, commercial or scientific equipment
- Copyrights of scientific works

(gg) The 5% rate applies to rent paid for the use of tangible movable property.

(hh) The 10% rate applies to interest on loans granted by financial institutions. The 15% rate applies to other interest.

(ii) On 14 January 2013, the United States and Spain signed a new protocol that would amend the existing income tax treaty and protocol between the two countries. As of 31 December 2018, the proposed protocol had not yet received US Senate advice and consent to ratification.

(jj) The 10% rate applies to the following:

- Royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment
- Remuneration for the performance of accessory technical assistance with respect to the use of the property or rights described above, to the extent that such technical assistance is performed in the contracting state where the payment for the property or right has its source

- The use of, or right to use, copyrights of literary, artistic and scientific works, including cinematographic and television films and videotapes used in television broadcasts
- Patents, trademarks, designs and models, plans, and secret formulas and processes

- Information relating to industrial, commercial or scientific experience

(kk) The 5% rate applies to payments for the right to use industrial, commercial or scientific equipment. The 10% rate generally applies to other royalties.
The US Department of Treasury has announced that the income tax treaty between the United States and the USSR, which was signed on 20 June 1973, continues to apply to the former republics of the USSR, including Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan and Uzbekistan, until the United States enters into tax treaties with these countries. The United States has entered into tax treaties with Estonia, Kazakhstan, Latvia, Lithuania, the Russian Federation and Ukraine. The withholding tax rates under these treaties are listed in the above table.

The 0% rate applies if the dividends are paid by US companies to UK companies that owned 80% or more of the voting shares of the payer of the dividends for a 12-month period preceding the declaration of the dividends and if either of the following additional conditions is met:

- The 80% test was met before 1 October 1998.
- The recipient is a qualified resident under certain prongs of the limitation-on-benefits provision in the treaty.

The 0% rate also applies to US-source dividend payments made to UK pension schemes. The 5% rate applies if the beneficial owner of the dividends is a company owning 10% or more of the payer. For other dividends, the 15% rate applies.

Withholding tax may be imposed at the full domestic rate on interest paid in certain circumstances.

On 20 May 2009, the United States and Luxembourg signed a protocol that would amend the existing income tax treaty between the two countries. As of 31 December 2018, the proposed protocol had not yet received US Senate advice and consent to ratification.

On 23 September 2009, the United States and Switzerland signed a protocol that would amend the existing income tax treaty between the two countries. As of 31 December 2018, the proposed protocol had not yet received US Senate advice and consent to ratification.

The United States and Chile signed their first-ever income tax treaty and protocol on 4 February 2010. It includes a general limitation-on-benefits provision and reductions in withholding tax rates. As of 31 December 2018, the proposed treaty and protocol had not yet received US Senate advice and consent to ratification.

The United States and Vietnam signed their first-ever income tax treaty and protocol on 7 July 2015. It includes a general limitation-on-benefits provision and reductions in withholding tax rates. As of 31 December 2018, the proposed treaty and protocol had not yet received US Senate advice and consent to ratification.

On 22 December 2017, the President of the United States signed into the law the bill known as the “Tax Cuts and Jobs Act,” which amended various provisions of the US Internal Revenue Code (IRC). Because the US Virgin Islands operates under a system of corporate income taxation that is a mirror image of the IRC, please refer to the United States chapter of this guide for further details on the applicable new provisions.

**A. At a glance**

| Corporate Income Tax Rate (%) | 23.1 (a) |
| Capital Gains Tax Rate (%)    | 23.1 (a) |
| Branch Tax Rate (%)           | 23.1 (a) |
| Withholding Tax (%) (b)       |          |
| Dividends                     | 11 (c)   |
| Interest                      | 11 (c)   |
| Royalties from Patents, Know-how, etc. | 11 (c) |
| Branch Remittance Tax         | 11 (c)(d) |
| Net Operating Losses (Years) (e) | 0 |
| Carryforward                  | Unlimited |

(a) This is the maximum rate. The rate includes a 10% surcharge. The 21% rate is effective for tax years beginning after 31 December 2017.
(b) The statutory rate for each withholding tax is 10%. The US Virgin Islands Bureau of Internal Revenue has taken the position that the 10% surcharge also applies to each withholding tax, and consequently the withholding rate is 11%.
(c) Under certain circumstances, these taxes may not apply to US corporations doing business in the US Virgin Islands. The US Virgin Islands Bureau of Internal Revenue has taken the position that a 10% withholding applies to dividend distributions to US corporations, despite the statutory provision stating otherwise.
(d) This is the branch profits tax, imposed on the earnings of a foreign corporation attributable to its branch, reduced by earnings reinvested in the branch and increased by reinvested earnings withdrawn (see Section B).

(e) As a general rule, no carryback is allowed for losses incurred in tax years beginning after 31 December 2017. A two-year carryback period is available in certain circumstances. An 80% net taxable income limitation is imposed for tax years commencing after 31 December 2017.

B. Taxes on corporate income and gains

Corporate income tax. The system of corporate income taxation in force in the US Virgin Islands is generally a mirror image of the US Internal Revenue Code (IRC). The applicable law is the IRC with “US Virgin Islands” substituted for all references to the “United States.” Significant differences between US and US Virgin Islands taxation are discussed below.

US Virgin Islands corporations are subject to income tax on their worldwide income. A foreign corporation, which is a corporation organized outside the US Virgin Islands, is subject to income tax only on its income from US Virgin Islands sources and on its income that is effectively connected with the conduct of a trade or business in the US Virgin Islands.

Under Section 937(b) of the IRC, rules similar to those for determining US-source income or income effectively connected with the conduct of a trade or business in the United States must be used to determine if income is from sources within the US Virgin Islands or effectively connected with the conduct of a trade or business within the US Virgin Islands.

Rates of corporate income tax. Corporations are taxed at the rates specified in the IRC, except that the US Virgin Islands imposes an additional 10% surcharge on the tax liability of all domestic and foreign corporations. This increases the maximum effective income tax rate to 23.1% for tax years beginning after 31 December 2017. This rate applies both to US Virgin Islands corporations and to the income of foreign corporations that is effectively connected with a US trade or business.

US Virgin Islands corporations may benefit from the tax exemptions and reductions indicated below.

Economic development program. Qualifying corporations are exempt from income tax on up to 90% of their income. In addition, they are exempt from real property, gross receipts and certain excise taxes. Other reductions in various taxes may apply.

Exempt companies. Qualifying corporations that are foreign-owned and do not carry on a trade or business in the United States or in the US Virgin Islands may elect a 20-year exemption from substantially all US Virgin Islands taxes.

Development of renewable and alternative energy-generation sources. Equipment or component parts brought into the US Virgin Islands for the purpose of manufacturing solar water heaters or wind or solar energy systems are exempt from the payment of custom duties and excise taxes. Also, revenues derived from the installation or construction of a renewable or alternative energy electric power or production plant or device are exempt from the gross receipts tax.
Branch profits tax and branch interest tax. The branch profits tax (BPT) and branch interest tax (BIT) rules in the US Virgin Islands are similar to those in the United States, except that the BPT and BIT rates are 11% (including the 10% surcharge) instead of 30%. Under certain circumstances, these taxes may not apply to US corporations doing business in the US Virgin Islands.

Capital gains and losses. The provisions applicable to capital gains and losses in the US Virgin Islands are the same as those in the United States.

Administration. The annual income tax return is due by the fifteenth day of the fourth month after the close of the company's fiscal year. On request, a corporation receives an automatic six-month extension to file its tax return. In general, 100% of a corporation's tax liability must be paid through estimated tax installments during the year in which the income is earned.

Domestic and foreign corporations file their returns with the Bureau of Internal Revenue (BIR).

Foreign tax relief. The provisions related to foreign tax credits are similar to those in the United States.

Foreign Investment in Real Property Tax Act. The Foreign Investment in Real Property Tax Act (FIRPTA) applies to corporations owning real property interests in the US Virgin Islands. Under this act, a foreign corporation (including a US corporation) pays tax attributable to its gain from the sale of US Virgin Islands property to the US Virgin Islands treasury.

C. Determination of trading income

General. The rules for determining trading income are the same as those in the United States.

Groups of companies. A US Virgin Islands corporation may not file a consolidated income tax return with a related US tax entity. However, a group of US Virgin Islands corporations may file a consolidated return with the BIR if they meet the requirements set by the IRC provisions for consolidated returns.

D. Other significant taxes

The following table summarizes other significant taxes.

Franchise tax, imposed annually on capital stock of domestic and foreign corporations qualified to do business in the US Virgin Islands; minimum tax is USD300 (USD1.50 per USD1,000 of capital stock)

Stamp tax, on transfer of real or personal property located in the US Virgin Islands 2 to 3.5

Payroll taxes
- Federal unemployment insurance (FUTA), imposed on first USD7,000 of wages 6
- US Virgin Islands unemployment insurance (creditable against FUTA; each employer must pay USD25 annually per employee for interest accrued on the Virgin Islands Federal Trust Fund Loan) 5.4
- Workmen’s compensation insurance, varies depending on classification of employee’s activities Various
- Social security contributions; subject to the same limitations as in the United States; imposed on
  - Wages up to USD132,900 (for 2019); paid by
    - Employer 6.2
    - Employee 6.2
  - Medicare portion (hospital insurance; for 2019); paid by
    - Employer 1.45
    - Employee (subject to an additional 0.9% of Medicare tax for wages in excess of USD200,000; no employer matching contribution for Medicare tax) 1.45
- Insurance premium tax, on gross premiums received by insurers for insurance policies covering risks in the US Virgin Islands; certain exceptions apply 5

E. Miscellaneous matters

Foreign-exchange controls. The US Virgin Islands has not enacted any specific foreign-exchange controls, but US laws concerning cash transaction reporting and other financial matters are applicable.

Debt-to-equity rules. The US Virgin Islands debt-to-equity rules are the same as those in the United States.

F. Treaty withholding tax rates

The US Virgin Islands does not have tax treaties with foreign governments.

(a) This tax applies to nonresident corporations and individuals and resident individuals. Nonresident corporations are corporations not incorporated in Uruguay.

(b) See Section B.

(c) Under Accountability Law No. 19,438, notional dividends are taxable, effective from 1 March 2017. For the purposes of this law, notional dividends are determined considering the net taxable income of the company that is more than three years old, less certain items (equity participation investments in other resident entities and investments in fixed and intangible assets, among others), subject to certain limits.

(d) This tax applies to income paid to entities that are resident, domiciled, constituted or located in low or nil tax countries or jurisdictions or that benefit from a low or nil tax regime, except for dividends distributed by Uruguayan corporate income taxpayers. This rate applies from 1 January 2017, according to Accountability Law No. 19,438 and Fiscal Transparency Law No. 19,484. In addition, a complementary tax rate of 5.25% applies to income derived from immovable assets.

#### B. Taxes on corporate income and gains

**Corporate income tax.** Corporations are taxed on Uruguay-source income, defined as income derived from activities performed,
property situated or economic rights used in Uruguay. Any profits, including capital gains, are taxable.

**Rate of corporate tax.** The corporate tax rate is 25%.

**Capital gains.** Capital gains are included in ordinary income and taxed at the regular corporate rate.

**Administration.** Corporations are required to make monthly advance payments. These payments are calculated by applying to monthly gross income a fraction with a numerator equal to income tax for the prior tax year and a denominator equal to the corporation’s gross income subject to tax for that year (the one that corresponds to the last filed corporate income tax return). Filing of tax returns and payment of the balance must be made by the fourth month after the end of the accounting period, which is the company’s tax year-end.

**Dividends and branch remittances.** Dividends paid to resident companies are exempt from tax. Dividends paid to resident individuals are subject to personal income tax at a rate of 7% if the dividends are paid out of income subject to corporate income tax. Dividends paid to nonresident companies and individuals and branch remittances are subject to withholding tax at a rate of 7% if they are paid out of income subject to corporate income tax. Dividends and branch remittances paid out of income not subject to corporate income tax are exempt from tax. Dividends subject to withholding tax cannot exceed the taxable profit of the company.

Effective from 1 March 2017, companies must calculate and withhold personal income tax or nonresidents income tax on notional dividends, which are be deemed to be paid to shareholders. The rates of this tax are 12% on dividends from income from foreign capital investment received by resident individuals and 7% for other dividends and profit distributions. For this purpose, notional dividends are calculated in accordance with specified rules (see footnote [c] in Section A). The payer of corporate income tax acts as the “withholding” agent before it makes the actual income payment. Because no real withholding takes place, it must pay the tax to the tax office. On receipt of actual dividends, shareholders can credit the taxes already paid against their income tax liability. Consequently, no additional tax is due.

**Withholding tax on certain payments to nonresidents.** In general, a 12% withholding tax is imposed on the following payments to nonresidents:

- Interest
- Royalties
- Technical assistance payments
- Publicity and advertising services
- Service fees
- Equipment rent

If a nonresident is a low or nil tax entity, the general withholding tax rate is 25%, instead of the general rate of 12%. This rate applies from 1 January 2017, according to Accountability Law No. 19,438 and Fiscal Transparency Law No. 19,484.
C. Determination of trading income

General. Tax is imposed on taxable profit, which is accounting profit earned in the accounting period after tax adjustments. An inflation adjustment is applied currently if certain conditions are met. However, under Accountability Law No. 19,438, for fiscal years ending from 1 January 2017, the inflation adjustment applies only if the inflation index increases more than 100% (in a cumulative manner) in the three-year period preceding the relevant fiscal year. All Uruguay-source income is taxable. Expenses are deductible to the extent that they are incurred in producing or maintaining taxable income, are documented, are accrued in the fiscal year and are taxable to the counterparty.

In general, payments to nonresidents are fully deductible as expenses if the effective income tax rate of the country of the recipient is 25% or higher (to be proved through a specific certificate). If the effective tax rate of the country of the recipient is lower than 25%, only a percentage of the expenses is deductible. The percentage equals the ratio of the nonresident withholding tax rate (12%) plus the effective income tax rate of the country of the nonresident (reduced by a tax credit if one exists) to the corporate income tax rate of 25% in Uruguay. If the nonresident withholding tax of 12% applies, the minimum percentage of deduction is 48% (the ratio of the withholding tax rate of 12% to the corporate income tax rate of 25%). Stock is valued according to the cost of purchases, production costs or reposition costs (the valuing of inventory according to reposition costs is accepted only if it is based on quantities, prices and conditions that reflect normal market conditions, based on the taxpayer’s type of business).

Inventories. Last-in, first-out (LIFO), first-in, first-out (FIFO), average cost and market price are acceptable methods. The corporation can choose which method to use, but may not change the method without prior authorization.

Provisions. Only deductions for expenses already incurred are allowed. Provisions for bad debts and severance pay are not allowed. Bad debts may be written off if the debtor goes bankrupt or if 18 months have elapsed since the obligation to pay the debt became due.

Depreciation. A depreciation deduction may be taken on tangible assets based on their useful lives using the straight-line method. The following are some of the applicable rates.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial and industrial buildings</td>
<td>2/3 (a)</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>10</td>
</tr>
<tr>
<td>Office equipment</td>
<td>10 (b)</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>10 (b)</td>
</tr>
</tbody>
</table>

(a) The 2% rate applies to buildings in urban areas; the 3% rate applies to buildings in rural areas.

(b) This is the usual rate. The rate for a particular asset depends on its estimated useful life.

For some assets, the units-of-production method may be used. Goodwill may not be depreciated.
Intangible assets must be amortized based on their expected useful life. If it is not possible to determine the expected useful life, they should be amortized at an annual rate of 10%.

Tangible assets must be revalued according an index determined by the government. Intangible assets and goodwill cannot be revalued.

**Relief for losses.** Under Accountability Law No. 19,438, for fiscal years ending from 1 January 2017, the offset of fiscal losses allowed for a specific fiscal year is limited to 50% of the taxable income before applying such offset. This means that 50% of the tax generated in the fiscal year (before the relief for losses) must always be paid, unless a corporate income tax exemption applies to an investment project approved under Law No. 16,906 of Promotion and Protection of Investments.

Under the prior general rule, losses could be carried forward for five years and deducted from income without limit.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>

<td></td>
</tr>
</tbody>
</table>

**E. Miscellaneous matters**

**Foreign-exchange controls.** Uruguay does not impose foreign-exchange controls. No restrictions are imposed on inbound or outbound investments. The transfer of profits and dividends, loan principal and interest, royalties and fees is unlimited. Nonresidents may repatriate capital, together with accrued capital gains and
retained earnings, subject to applicable withholding taxes and company law considerations (for example, the requirement that companies transfer a portion of their annual income to a reserve).

Import and export operations are transacted at a free rate determined by the market.

**Debt-to-equity rules.** No specific debt-to-equity rules apply in Uruguay.

**Transfer pricing.** Transfer-pricing regulations are included in the corporate income tax law. Transfer pricing in Uruguay is based on the arm’s-length principle and is in many aspects consistent with the transfer-pricing guidelines of the Organisation for Economic Co-operation and Development (OECD). Every corporate income taxpayer that has operations with related parties must perform a transfer-pricing analysis.

**F. Treaty withholding tax rates**

The maximum withholding tax rates under Uruguay’s double tax treaties are set forth below. The withholding tax rates can never exceed those under domestic law. The withholding tax rates in the treaties can be applied only if the nonresident is the effective beneficiary of the income.

(a) This is the general corporate profits tax rate. See Section B for other rates.
(b) The withholding taxes are generally considered to be final taxes.
(c) The 5% rate applies to dividends and interest paid to Uzbek tax resident companies and individuals. The 10% rate applies to dividends and interest paid to foreign (nonresident) companies and individuals.
(d) The withholding tax is imposed on payments to foreign companies without a permanent establishment in Uzbekistan.
(e) See Section C.

B. Taxes on corporate income and gains

Corporate profits tax. Most enterprises in Uzbekistan, including Uzbek companies with foreign participation, are subject to the general profits tax regime. Enterprises with annual turnover of less than UZS1 billion (approximately USD120,000) may choose a simplified taxation regime and pay a Unified Tax Payment (at various rates) on revenue. Foreign companies that are deemed by the tax authorities to have a permanent establishment (PE) in Uzbekistan are taxable on profits derived from business activities of the PE in Uzbekistan (the taxable profits of a PE should not be less than 7% of deductions). The definition of a PE in Uzbek legislation is somewhat similar to the definition of a PE in the model treaty of the Organisation for Economic Co-operation and Development (OECD), with certain exceptions. However, the legislation regarding the taxation and treatment of PEs in Uzbekistan is undeveloped.
Rates of corporate tax. The regular corporate profits tax rate is 12%. This rate also applies to Uzbek enterprises with foreign participation and to PEs of foreign companies. For commercial banks, mobile telecommunication operators, manufacturers of polyethylene granules and cement (clinker), the profits tax rate is 20%.

PEs are no longer subject to an additional tax on their net profits after deduction of the corporate profits tax.

Foreign legal entities without a PE in Uzbekistan are subject to withholding tax on income derived from their activities in Uzbekistan. The following are the withholding tax rates for payments to nonresidents.

<table>

</tr>
<tr>
<td>Insurance premiums</td>
<td>10</td>
</tr>
<tr>
<td>Royalties, capital gains, rent and service fees not connected with an Uzbek PE</td>
<td>20</td>
</tr>
</tbody>
</table>

Withholding tax is also imposed on payments of dividends and interest to Uzbek tax resident companies and individuals at a rate of 5%.

Capital gains. Capital gains are generally included in taxable profits and are subject to tax at the regular corporate tax rate. Capital losses are generally deductible only if they are incurred on fixed assets used in production for at least three years. Capital gains derived by nonresidents from disposals of shares in Uzbek resident legal entities or real estate located in Uzbekistan are subject to withholding tax at the general rate of 20%.

Administration. The tax year is the calendar year.

Tax declarations must be filed quarterly by the 25th day of the month following the reporting quarter and annually by 15 February of the year following the tax year. Companies must file financial statements together with the tax declarations. Companies with foreign participation and PEs of foreign companies must file the annual declaration by 25 March of the year following the tax year.

The final tax liability must be paid by the deadline for filing the tax declarations. Quarterly estimates of the tax payable must be filed by the 10th day of the 1st month of the quarter. Tax installment payments based on the filed estimates are required to be made by the 10th day of each month. Companies generating profits of less than 200 minimum monthly wages per reporting quarter (approximately USD5,000) are subject to profits tax based on actual quarterly profits and are not required to pay installments of profits tax.

On written request, excess payments of tax must be refunded within a 15-working-day period or be offset against other tax liabilities. In practice, it may be difficult to obtain refunds of overpayments of tax.
Dividends and interest. A 5% withholding tax is imposed on payments of dividends and interest to Uzbek tax resident companies and individuals. A 10% withholding tax is imposed on payments of dividends and interest to foreign (nonresident) companies and individuals.

Foreign tax relief. Under the double tax treaties of Uzbekistan, a foreign tax credit is available for foreign tax paid on income earned abroad (subject to certain documentary requirements).

C. Determination of trading income

General. Taxable profits are equal to the annual net profits disclosed in the company’s Uzbek financial statements, as adjusted by the tax law. Financial statements must be prepared on an accrual basis and be supported by documentation. The following are the most significant items that are not deductible for tax purposes:

- Nonbusiness expenses
- Entertainment expenses
- Interest on overdue and deferred loans (in excess of normal loan interest rate)
- Losses resulting from misappropriations of funds or assets
- Certain benefits to employees
- Charitable donations
- Penalties
- Taxes paid on behalf of other taxpayers or assessed as a result of tax audits

Special deductions. Taxable profits may be reduced by certain special deductions, including the following:

- Amounts reinvested in main production in the form of new construction and reconstruction of buildings and facilities used for production needs and new technological equipment (less current depreciation) over a certain time period, subject to other conditions, up to 30% of taxable profits
- Charitable donations of up to 2% of taxable profits

Provisions. Banks may deduct loan loss provisions within the limits established by the Central Bank of the Republic of Uzbekistan.

Tax depreciation. The following are the applicable depreciation rates in Uzbekistan.

<table>
<thead>
<tr>

<td>Cars, computers and office equipment</td>
<td>20</td>
</tr>
<tr>
<td>Perennial plants</td>
<td>10</td>
</tr>
<tr>
<td>All other assets</td>
<td>15</td>
</tr>
</tbody>
</table>

Intangible assets are amortized for tax purposes over the useful life of an asset, the life of the company or five years (if useful life cannot be determined), whichever is less.
Relief for losses. Tax losses can be carried forward for five years. However, the amount of losses carried forward that may be deducted each year is subject to a limit of 50% of taxable profits for the year. Losses incurred during a profits tax exemption period cannot be carried forward.

The taxable base may be reduced by the amount of losses in accordance with the above rules only at the end of the year.

Groups of companies. The tax law does not allow the offsetting of profits and losses among members of a tax group.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax (VAT), on the supply of all goods and services, including imports, unless they are zero-rated or exempt</td>

</tbody>
</table>
Nature of tax

Land tax; imposed at a fixed rate per hectare, which varies depending on the location, quality and purpose of the land plot; rate in Zone 1 of Tashkent UZS157,410,563 (approximately USD18,880)

Unified Social Payment; payable by employers
   On the total payroll of state entities and entities with 50% or more state ownership share 25%
   On the total payroll of all other entities 12%

Contributions to individual accumulative pension accounts of citizens (maintained at Peoples Bank);
   amounts of the contributions are deducted from the amounts of accrued individual income tax 0.1%

E. Foreign-exchange controls

The currency in Uzbekistan is the Uzbek soum (UZS).

Uzbekistan imposes various foreign-exchange controls, including the following:
   • Mandatory exchange rates set weekly by the Central Bank of the Republic of Uzbekistan for accounting, reporting, tax and customs duty calculations
   • Strict control over payments in foreign currencies to parties outside Uzbekistan
   • Limitations on the circulation of foreign currencies in Uzbekistan, and limitations on the domestic foreign currencies markets

F. Treaty withholding tax rates

The following table lists the withholding rates under Uzbekistan’s tax treaties.

</table>

(a) The lower rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the payer of the dividends.
(b) The lower rate applies if the beneficial owner of the dividends is a company that owns at least 25% of the payer of the dividends.
(c) The lower rate applies if the beneficial owner of the dividends is a company that owns at least 20% of the payer of the dividends.
(d) The 0% rate applies to interest with respect to the following:
  • Loans made, guaranteed or insured by the government of the other contracting state or an instrumentality or agency thereof
  • Sales on credit of industrial, commercial or scientific equipment
  • Sales on credit of merchandise between enterprises
  • Bank loans
(e) The 5% rate applies to royalties paid for certain cultural works (with exceptions) as well as for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (know-how), with exceptions.
(f) The 0% rate applies to royalties for the use of, or the right to use, computer software, patents, designs or models, or plans. The 5% rate applies to royalties paid for the use of, or the right to use, secret formulas or processes, or for information concerning industrial, commercial or scientific experience (know-how). The 10% rate applies to royalties paid for trademarks or certain cultural works.
(g) The 3% rate applies to royalties paid for the use of, or the right to use, copyrights of scientific works, patents, trademarks, designs or models, plans, or secret formulas or processes, as well as for the disclosure of industrial, commercial, or scientific knowledge. The 5% rate applies to royalties paid for certain cultural works.

(h) The 5% rate applies to royalties paid for certain cultural works (with exceptions).

(i) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including motion picture films.

(j) The 2% rate applies to royalties for the use of, or the right to use, industrial, commercial, or scientific equipment.

(k) These are the withholding tax rates under the USSR-Japan treaty, which is honored by Uzbekistan.

(l) The domestic withholding tax rate for dividends and interest in Uzbekistan is 10%. Consequently, the withholding tax rate of 15% for dividends and interest under treaties does not apply to payments made by Uzbek companies.

(m) Under the double tax treaty with the Netherlands, withholding tax rates may be reduced to zero if certain conditions are met.

(a) This is the maximum progressive rate, which applies to income exceeding 3,000 tax units. Effective from 11 September 2018, the value of a tax unit is VES17. For further details, see Section B. Petroleum companies and income from petroleum-related activities are taxed at a rate of 50%. Mining royalties and transfers of such royalties are subject to tax at a rate of 60%.
(b) For details, see Section B.
(c) The withholding tax applies to payments over VES1,416.67. The tax is imposed on the payment minus VES42.50.
(d) This withholding tax applies to payments over VES0.00025.
(e) For interest associated with a loan invested in an income-generating activity, the withholding tax is imposed on 95% of the gross payment. Consequently, the effective withholding tax rate is 32.3% (95% x 34%). For other cases, the tax base is the gross interest payment.
(f) In general, the withholding tax rate is determined under Tariff No. 2 (see Section B), which provides for a maximum tax rate of 34%. It is applied to 95% of the gross interest payment associated with a loan invested in an income-generating activity. For other cases, the tax base is the gross interest
payment. Interest paid to foreign financial institutions that are not domiciled in Venezuela is subject to withholding tax at a flat rate of 4.95%.

(g) The law does not explicitly set forth any withholdings for royalties paid to residents. However, in practice, it is possible that the Tax Administration could consider the operation to be a provision of services and, accordingly, a 1% or 2% rate of withholding tax would apply.

(h) Royalties paid to nonresidents are taxed on a deemed profit element, which is 90% of gross receipts.

(i) Because royalties paid to nonresidents are taxed on a deemed profit element (see footnote (h) above), the effective withholding tax rate is 30.6% (90% x 34%).

(j) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because royalties paid to nonresidents are taxed on a deemed profit element (see footnote (h) above), the maximum effective withholding tax rate is 30.6% (90% x 34%).

(k) Professional fees paid to nonresidents are taxed on a deemed profit element, which is 90% of gross receipts. Consequently, the effective withholding tax rate is 30.6% (90% x 34%).

(l) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%.

(m) Payments to nonresidents for technical assistance are taxed on a deemed profit element, which is 30% of gross receipts.

(n) Because payments to nonresidents for technical assistance are taxed on a deemed profit element (see footnote (m) above), the effective withholding tax rate is 10.2% (30% x 34%).

(o) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because payments to nonresidents for technical assistance are taxed on a deemed profit element (see footnote (m) above), the maximum effective withholding tax rate is 10.2% (30% x 34%).

(p) Payments to nonresidents for technological services are generally taxed on a deemed profit element, which is 50% of gross receipts.

(q) Because payments to nonresidents for technological services are taxed on a deemed profit element (see footnote (p) above), the effective withholding tax rate is 17% (50% x 34%).

(r) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because payments to nonresidents for technological services are taxed on a deemed profit element (see footnote (o) above), the maximum effective withholding tax rate is 17% (50% x 34%).

(s) This tax applies to transfers of shares of corporations domiciled in Venezuela that are not traded on national stock exchanges. The withholding tax rates are applied to the sale price.

(t) Losses may be carried forward three tax years, but they may not offset more than 25% of the income obtained in such tax years.

B. Taxes on corporate income and gains

Corporate income tax. Companies domiciled in Venezuela are subject to income tax on their net annual income from Venezuelan and foreign sources. Companies organized in Venezuela are deemed to be domiciled in Venezuela. In addition, Venezuelan permanent establishments of foreign companies are also considered to be domiciled in Venezuela. However, only income attributable to a permanent establishment is taxable in Venezuela.

Rates of corporate income tax. Domestic corporations and branches of foreign corporations are subject to the corporate income tax rates of Tariff No. 2, which are progressive and are expressed in tax units. Effective from 11 September 2018, the value of a tax unit is VES17. The Venezuelan Budget Law may change the value of the tax unit each year. The following are the corporate income tax rates provided in Tariff No. 2.

<table>

</tbody>
</table>
Net income arising from mining and related activities is taxed under Tariff No. 2. Petroleum companies and income from petroleum-related activities, such as transportation and exploitation, are taxed at a rate of 50%. Mining royalties and transfers of such royalties are subject to tax at a rate of 60%.

For tax years beginning on or after 31 December 2015, taxpayers that perform banking, financial, insurance and reinsurance activities are taxed at a proportional rate of 40%.

Interest paid to foreign financial institutions that are not domiciled in Venezuela is subject to a 4.95% withholding tax.

**Capital gains.** Capital gains are not taxed separately, but are taxable as business profits. For the computation of gains from sales of shares, the tax basis is zero if such shares had been received as a result of a dividend paid with new shares of the payer of the dividend.

**Administration.** Companies must file an annual income tax return, self-assess and pay any resulting balance of tax due, within three months after the end of their fiscal year.

Companies must make estimated tax payments during their fiscal year.

**Dividends.** Dividends paid by Venezuelan companies and profits remitted by permanent establishments of foreign companies to the countries of their home offices are taxable to the extent that “net income” exceeds its “net taxable income.” For this purpose, “net income” is the financial income approved by the shareholders’ meeting based on the financial statements, and “net taxable income” is the resulting income subject to tax after the tax reconciliation. The tax reconciliation is the procedure for determining the income tax liability. However, the tax does not apply to remittances paid by permanent establishments of foreign companies if the permanent establishment can prove that the excess amount is reinvested in Venezuela for at least five years.

The tax is withheld at source. The applicable rate depends on the business of the payer of the dividends. For dividends paid by hydrocarbon or mining companies subject to the 50% or 60% rates of corporate income tax (see Rates of corporate income tax), the dividend tax rate is the corporate tax rate applicable to the company. For dividends paid by other companies, the dividend tax rate is 34%.

**Foreign tax relief.** A credit is granted for income taxes paid on foreign-source income, up to the amount of Venezuelan tax payable on such income.

**C. Determination of trading income**

**General.** Corporate tax is based on the annual net taxable accounting profits calculated in accordance with generally accepted accounting principles, subject to certain adjustments for non-taxable income and nondeductible expenses defined by law.
To determine the net taxable income, deductions are subtracted from gross income. In general, most expenses, including cost of production, are deductible, provided that they are normal and necessary for the earning of the income.

Under reconciliation rules, the determination of the Venezuelan and foreign-source income is made separately (two baskets). The reconciliation rules include detailed measures for the allocation of allowances and deductions to the two baskets.

**Inventories.** Inventories may be valued using any method in accordance with generally accepted accounting principles. The method chosen must be applied consistently. Because of tax indexation (see *Tax indexation*), inventory is effectively valued using the last-in, first-out (LIFO) method, adjusted for inflation.

**Tax indexation.** Companies must apply an annual inflation adjustment. A company carries out this adjustment by adjusting its non-monetary assets, some of its non-monetary liabilities and its equity to reflect the change in the consumer price index from the preceding year. These adjustments affect the calculation of depreciation and cost of goods sold. The net effect of these adjustments is recorded in an inflation adjustment account and is added to taxable income or allowed as a deduction.

Effective for tax years beginning after 22 October 1999, the tax indexation rules apply only to the reconciliation of Venezuelan-source income. Therefore, foreign-source non-monetary assets and liabilities are not subject to tax indexation.

For tax years beginning on or after 18 November 2014, for purposes of determining the adjustment for inflation, the National Index of Consumer Prices must be used instead of the Index of Consumer Prices, which was applicable for previous tax years. In addition, taxpayers that engage in banking, financial, insurance and reinsurance activities are excluded from the tax indexation system set forth in the Income Tax Law.

In addition, for tax years beginning on or after 31 December 2015, taxpayers appointed as “Special Taxpayers” are also excluded from the tax indexation system set forth in the Income Tax Law.

**Provisions.** Provisions for inventory obsolescence and accounts receivable are not deductible; amounts are deductible only when inventories or accounts receivable are effectively written off.

**Depreciation.** In general, acceptable depreciation methods are the straight-line and the units-of-production methods. The declining-balance method and accelerated depreciation are not accepted. Venezuelan law does not specify depreciation rates. If the estimated useful life of an asset is reasonable, the depreciation is accepted. Estimated useful lives ranging from 3 to 10 years are commonly used.

**Relief for tax losses.** Operating losses from Venezuelan sources may be carried forward for three tax years, but they may not offset more than 25% of the income obtained in such tax years. No carryback is permitted.
Losses in the foreign-source basket (see General) may not offset Venezuelan-source income. Such foreign-source losses may be carried forward three tax years to offset foreign-source income only and are also subject to the limitation described above.

Under the amendment of the Income Tax Law published on 18 November 2014 in Official Gazette No. 6,152, losses attributable to tax indexation for tax years beginning on or after that date cannot be carried forward.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax (VAT), imposed on goods and services, including imports; the National Executive may exonerate from tax acquisitions of goods and services; the law provides an indexation system for input VAT during the preoperational period for enterprises engaged in certain industrial activities; input VAT generated during the preoperational phase of industrial projects intended primarily for export is refunded</td>
<td>16</td>
</tr>
<tr>
<td>Tax on Large Financial Transactions; imposed on any payment made by taxpayers qualified as “special taxpayers” (that is, high income) by the tax administration, regardless of Venezuelan financial system involvement, including payment-equivalent means, such as offsetting, novation or debt forgiveness</td>
<td>2</td>
</tr>
<tr>
<td>Municipal tax; business activity tax, usually based on gross receipts or sales; rate varies depending on the industrial or commercial activity and the municipal jurisdiction</td>
<td>0.5 to 10</td>
</tr>
<tr>
<td>Social security contributions, on monthly salary of each employee, up to five minimum salaries; paid by Employer</td>
<td>9/10/11</td>
</tr>
<tr>
<td>National Institute of Cooperative Education; contributions required if employer has five or more employees; paid by Employer, on total employee remuneration</td>
<td>2</td>
</tr>
<tr>
<td>Housing policy contributions, on the integral salary (any remuneration, benefit or advantage received by an employee in consideration for services rendered, provided it can be evaluated in terms of cash value) of each employee; paid by Employer, on profit share received, if any, from employer at year-end</td>
<td>0.5</td>
</tr>
<tr>
<td>Unemployment and training contributions, on the monthly salary of each employee, up to five minimum salaries; paid by Employer</td>
<td>2</td>
</tr>
<tr>
<td>Employee</td>
<td>1</td>

<tr>
<td>Employee</td>
<td>0.5</td>
</tr>
</tbody>
</table>
E. Miscellaneous matters

**Monetary reconversion.** As of 20 August 2018, the unit of the monetary system was restated in the equivalent of VEF100,000, according to Decree No. 3,548 published in Official Gazette No. 41,446 of 25 July 2018.

**Foreign-exchange controls.** Under the foreign-exchange control system in Venezuela, the purchase and sale of currency in Venezuela is centralized by the Central Bank of Venezuela. This limits foreign-currency trade in Venezuela and other transactions.

**Debt-to-equity rules.** For fiscal years beginning on or after 16 February 2007, the law disallows deductions to companies for interest payments to related parties domiciled abroad if the average of the companies’ debts (owed to related and unrelated parties) exceeds the average amount of their fiscal equity for the respective fiscal year.

**Transfer pricing.** Under transfer-pricing rules, cross-border income and expense allocations in transactions with related parties are subject to analysis and special filings. The rules contain a list of related parties and provide a list of acceptable transfer-pricing methods.

**Controlled foreign corporations.** Under controlled foreign corporation (CFC) rules, income derived by a CFC (as defined) domiciled in a low income tax jurisdiction is taxable to its Venezuelan shareholders. The tax authorities have issued a list of low income tax jurisdictions.

</table>

(a) Under Venezuelan domestic law, a reduced withholding tax rate of 4.95% applies to interest paid to financial institutions not domiciled in Venezuela.

(b) The 5% rate applies to dividends paid to a parent company that owns at least 25% of the capital of the payer of the dividends. Under the Denmark and Sweden treaties, to benefit from the 5% rate, the recipient of the dividends must have direct control of at least 25% of the voting shares of the payer of the dividends. The higher rate applies to other dividends (portfolio dividends).

(c) The 5% rate applies if the beneficial owner of the dividends is a company that owns at least 15% of the capital of the payer of the dividends. Under the treaties with Austria, Czech Republic and Iran, to benefit from the 5% rate, the beneficial owner of the dividends must have direct control of at least 15% of the capital of the payer of the dividends. The higher rate applies to other dividends (portfolio dividends).

(d) The 5% rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payer of the dividends. Under the treaties with China, Korea and Norway, to benefit from the 5% rate, the beneficial owner of the dividends must have direct control of at least 10% of the capital of the payer of the dividends. The higher rate applies to other dividends.

(e) The 5% rate applies if the beneficial owner of the dividends is a company that owns directly at least 5% of the capital of the payer of the dividends. The higher rate applies to other dividends.

(f) The 0% rate applies to dividends paid to certain recipients who own at least 25% of the voting shares of the payer of the dividends. Under the treaty with Switzerland, to benefit from the 0% rate, the recipient of the dividends must have direct control of at least 25% of the voting shares of the payer of the dividends. The higher rate applies to other dividends.

(g) The 0% rate applies if the beneficial owner of the dividends is a company that controls at least 10% of the capital of the payer of the dividends. The 10% rate applies to other dividends.

(h) The 10% rate applies if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payer of the dividends. Under the treaty with Cuba, to benefit from the 10% rate, the beneficial owner of the dividends must have direct control of at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends.

(i) The 10% rate applies if the beneficiary of the dividends is a company that owns at least 10% of the capital of the payer of the dividends and if it has an investment in the payer of at least USD100,000. The 15% rate applies to other dividends.

(j) The 10% rate applies if the beneficiary of the dividends is a company that controls directly at least 20% of the capital of the payer of the dividends. The 15% rate applies to other dividends.

(k) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the payer of the dividends. The 15% rate applies if the beneficiary of the dividends is a resident of Venezuela that receives from a company resident in France dividends that would give rise to a tax credit (avoir fiscal). For dividends received by a resident of France, the recipient has a right to a payment from the French Treasury in an amount equal to the avoir fiscal. The 5% rate applies in all other cases.

(l) The 10% rate applies if the beneficiary of the dividends is a company that controls directly at least 10% of the voting power of the distributing company. The 15% rate applies to other dividends.
The 4.95% rate applies to interest paid to banks. The 10% rate applies to other interest payments.

The 4.95% rate applies to interest paid to financial institutions. The 10% rate applies to other interest payments.

The 5% rate applies to interest paid to banks. The higher rate applies to other interest payments.

The 0% rate applies to interest paid to the Eximbank, Federal Reserve Bank, Private Investment Corporation, Foreign Trade Bank, Central Bank of Venezuela and Venezuelan Investment Fund. The 4.95% rate applies to interest paid to financial institutions or insurance companies. The 10% rate applies to other interest payments.

The 4.95% rate applies to interest paid to banks or insurance companies. The 10% rate applies if the beneficial owner of the interest is not one of the entities mentioned in the preceding sentence and if either of the following additional conditions is satisfied:

- The interest is paid by banks.
- The interest is paid on bonds or other credit securities that are traded regularly and substantially on a recognized securities market.

The 15% rate applies to other interest payments.

The following interest payments are exempt:

- Interest paid to the government of the other contracting state, or a local authority or central bank of such state
- Interest paid for the sale on credit of industrial, commercial or scientific equipment
- Interest on bank loans

The 5% rate applies to other interest payments.

The 10% rate also applies to technical assistance fees.

The 15% rate applies to royalties related to copyrights, trademarks, know-how, literary, artistic or scientific works, or films. A protocol to the treaty provides that payments for technical assistance services are treated as royalties and are therefore also subject to the 15% rate.

The 5% rate applies to the following:

- Copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties for motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting)
- Royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience (but not including royalties paid in connection with rental or franchise agreements) if the payer and the beneficial owner of the royalties are not related persons

The 10% rate applies to other royalties.

The 12% rate also applies to technical assistance fees.

The 5% rate applies to technical assistance fees resulting from the rendering of technical, managerial or consultancy services if such services make available technical knowledge, experience, skills, know-how or processes. The 10% rate applies to the following royalties:

- Royalties paid as consideration for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, patents, trademarks, designs or models, plans, and secret formulas or processes
- Royalties for information concerning industrial, commercial or scientific experience

The 10% rate applies to payments for technical assistance. The 20% rate applies to royalties.

This rate applies to royalties and to amounts paid for technical assistance services.

The 7% rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films, or works on film, videotape or other means of reproduction for use in connection with television broadcasting); and royalties for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (but not including royalties paid in connection with rental or franchise agreements) if the payer and the beneficial owner of the royalties are not related persons. The 10% rate applies to other royalties.
(aa) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment. The 10% rate applies to other royalties.

(bb) The 0% rate applies to royalties paid for technical services, scientific, geological or technical studies, engineering works, consulting or supervision services, if the recipient does not have a permanent establishment. The 5% rate applies to royalties paid for industrial, commercial or scientific equipment. The 10% rate applies to royalties paid for the following:
• Patents, designs or models, plans, or secret formulas or processes
• Industrial, commercial or scientific know-how
• Trademarks
• Copyrights with respect to literature, arts or sciences, motion pictures, or movies and tapes for radio or television broadcasting

(cc) The 5% rate applies to payments for the following:
• Patents, designs or models, plans, or secret formulas or processes
• The use of, or the right to use, industrial, commercial, or scientific equipment
• Information concerning industrial, commercial or scientific experience
The 7% rate applies to amounts paid for trademarks or trade names. The 10% rate applies to amounts paid for copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting.

(dd) The lower rate applies to payments for technical assistance. The 12% rate applies to royalties.

(ee) The 10% rate applies to technical assistance fees, which are all payments in consideration for the rendering of technical, managerial or consultancy services, if such services make available technical knowledge, experience, skills, know-how or processes. The 15% rate applies to royalties.

(ff) The 10% rate applies to royalties related to literary, artistic or scientific works, or films. The 7% rate applies to other royalties.

(gg) This is the general rate. Certain special rules apply.

(hh) The 5% rate applies to royalties for patents, trademarks, designs or models, plans, or secret formulas or processes, or for information (know-how) concerning industrial, commercial or scientific experience. The 7% rate applies to royalties for copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for radio or television broadcasting.

(ii) For details, see Section B.

(jj) See Section A.

(kk) This treaty has been signed, but it has not yet been ratified and is not yet in force.

(ll) The 4.95% rate applies to interest paid to financial institutions. The 5% rate applies to other interest payments.

(mm) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of scientific works, software and trademarks, and to payments for the use of, or the right to use, equipment and transportation vehicles. The 10% rate applies to other royalties.

(nn) The 4.95% rate applies to interest paid to banks. The 15% rate applies to other interest payments.

(oo) The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, cinematographic films, patents, trademarks, designs or models, plans, or secret formulas or processes, and to payments for the use of, or the right to use, industrial, commercial, or scientific equipment or for information (know-how) concerning industrial, commercial or scientific experience. It also applies to gains derived from the alienation of such rights or property to the extent that such gains are contingent on the productivity, use or disposition of such property.

(pp) The 4.95% rate applies to interest paid to banks. The 5% rate applies to other interest payments.

Venezuela has signed other tax treaties that cover only air and maritime transportation.

The standard corporate income tax rate is 20%. However, tax incentives are available (see Section B). Enterprises operating in the oil and gas industry are subject to corporate income tax rates ranging from 32% to 50%, depending on the location and specific project conditions. Enterprises engaging in prospecting, exploration and exploitation of mineral resources (for example, silver, gold and gemstones) are subject to corporate income tax rates of 40% to 50%, depending on the project's location.

Gains derived from sales of capital or shares in entities are subject to tax at a rate of 20%. Transfers of securities by foreign investors are subject to presumptive tax of 0.1% on total sales proceeds, regardless of whether the transfer is profitable.

See Section C.

B. Taxes on corporate income and gains

Corporate income tax. The following types of enterprises are subject to corporate income tax:

- Enterprises established under the Law on Enterprises, the Law on Investment, the Law on Credit Organizations, the Law on Insurance Business, the Law on Securities, the Law on Oil and Gas, the Trade Law and other legal entities including joint stock companies, limited liability companies, partnerships, private businesses, law offices, private public notary offices, parties to business cooperation contracts, parties to oil and gas product sharing contracts, and joint operation companies
- Public and non-public organizations engaged in business
- Organizations established under the Law on Cooperatives
- Businesses established under foreign laws that have a permanent establishment in Vietnam
- Other organizations conducting production and business activities that generate taxable income

Rates of corporate income tax. The standard corporate income tax rate is 20%. However, tax incentives are available (see Tax incentives).

The rate of corporate income tax applicable to activities of exploration and exploitation of oil, gas and other precious natural resources ranges from 32% to 50%, depending on the project.

Tax incentives

Incentive tax rates. Preferential tax rates of 10%, 15% or 17% may be available to eligible projects in industries or locations that are encouraged by the government.

A 10% rate for the 15-year period beginning with the first year of revenue may be available for the following:

- Income from new investment projects in areas with especially difficult socioeconomic conditions, and in economic zones and high-technology zones
- Income from new investment projects that are engaged in the following:
  - Scientific research and technological development
  - Application of high technologies in the list of prioritized high technologies provided by the Law on High Technology
  - Cultivation of high technologies
— Cultivation of high-technology enterprises
— High-risk investment in the development of high technologies in the list of prioritized high technologies provided by the Law on High Technology
— Construction investment and commercial operation of establishments nursing high technologies
— Investment in development water plants, power plants, water supply and drainage systems, bridges, roads, railways, airports, seaports, river ports airfields, stations and other particularly important infrastructure facilities determined by the prime minister
— Software production
— Production of composite materials, light building materials, rare materials, renewable energy, clean energy and energy from waste destruction
— Development of biological technology

• Income of new investment projects in the field of environmental protection, including manufacturing of equipment for treating environmental pollution and equipment for environmental observation and analysis, environmental pollution treatment and protection, collection and treatment of wastewater, exhaust and solid wastes, and recycling and reuse of wastes
• Income of high-technology enterprises and agricultural enterprises that apply high technologies according to the Law on High Technology
• Income from new investment projects that make products supportive of the high-technology industry in line with the Law on High Technology or products supportive of certain industries, including textile and garment, footwear, electronics, information technology, automobile assembly and mechanics, and that are not domestically produced as of 1 January 2015 or meet the quality standard of the European Union or an equivalent standard
• Income from new investment projects in the production sector (except for projects producing goods subject to special sales tax and mineral exploitation projects) that have investment capital of at least VND6 trillion, if the capital is disbursed within three years from the date of the investment certificate and if either of the following conditions is satisfied:
  — The project’s total revenue reaches VND10 trillion per year within three years from the first year of revenue.
  — The project employs more than 3,000 employees.
• Large-scale manufacturing projects (excluding projects manufacturing products subject to special sales tax or exploiting mineral resources) if all of the following conditions are satisfied:
  — The investment capital must be at least VND12 trillion.
  — The technology used must be certified in accordance with the Law on High Technology and the Law on Science and Technology.
  — The capital disbursement must be made within five years of the licensing date.

A 10% or 15% rate applies for the entire period of operation for enterprises in the sectors of education and training, occupational training, health care, culture, sports, environment, social housing, forestry, agriculture, aquaculture, salt production and publishing. However, this incentive is subject to detailed conditions provided separately by the prime minister.
A 17% rate for the 10-year period beginning with the first year of revenue may apply to the following:
• Income from new investment projects based in areas with difficult socioeconomic conditions
• Income from new investment projects that are engaged in the production of high-qualified steel or energy-saving products, the manufacturing of machinery and equipment serving agriculture, forestry, aquaculture, salt production, production of irrigation equipment, the production of foodstuff for cattle and the development of traditional trades

The duration of the application of preferential tax rates described above is counted consecutively from the first year in which enterprises generate turnover from new investment projects eligible for tax incentives. For high-technology enterprises and agricultural enterprises applying high technologies, this duration is counted from the year in which they are certified as high-technology enterprises or agricultural enterprises applying high technologies. For other projects applying high technologies, this duration is counted from the year in which they are granted certificates of projects applying high technologies.

If, within an assessment period, an enterprise has both incentivized activities and normal activities, it must conduct a separate accounting for income from each activity to declare and pay tax separately. Otherwise, taxable income must be prorated according to the ratio of revenue or deductible expenses of each activity to the total revenue or deductible expenses.

Income and losses from incentivized activities and normal activities (except for transfers of mineral exploratory, mining and processing rights) may be netted against each other before the tax rate of the activity with the highest amount of income is applied.

Tax incentives previously granted as a result of the export ratio are repealed, effective from 1 January 2012. Affected taxpayers can adopt either tax incentives for the remaining incentive period based on the prevailing regulations effective at the time they were licensed or those effective from 31 December 2011. Taxpayers are required to notify the tax authorities regarding the tax incentive option selected.

**Tax exemptions and tax reductions.** Criteria for eligibility to tax holidays and reductions, which are set out in the corporate income tax regulations, are described below.

Four years of tax exemption and nine subsequent years of 50% reduction apply to the following:
• Income from new investment projects entitled to the 10% corporate income tax
• Income from new investment projects operating in the socialized sectors and difficult socio-economic areas

Four years of tax exemption and 50% tax reduction for five subsequent years apply to income from new investment projects in the socialized sectors and in regions not included in the list of difficult socio-economic areas.

Two years of tax exemption and four subsequent years of 50% reduction apply to the following:
• Income from new investment projects in regions with difficult socio-economic conditions
• Income from new investment projects, including production of high-grade steel, production of energy-saving products, production of machinery or equipment used to serve agricultural, forestry, fishery or salt production, production of irrigation equipment, production and refinement of foodstuffs for cattle, poultry or aquatic products, and development of traditional trades
• Income from new investment projects in industrial zones (except for industrial zones located in regions with favorable socio-economic conditions)

The continuous period of tax exemption and reduction begins from the first year in which the enterprise earns taxable income from the new investment project that is granted tax incentives. If the enterprise does not have taxable income in the first three years, the period of tax exemption and reduction begins in the fourth year following the first year in which revenue is generated by the new project.

Capital gains. Gains derived from sales of shares or assignments of capital in enterprises are subject to tax at a rate of 20%. The taxable income equals the transfer price less the sum of the purchase price of the transferred capital and expenses incurred with respect to the transfer.

Foreign investors transferring “securities” (this is a specified term, which includes shares of public companies) are subject to presumptive tax at a rate of 0.1% on total sale proceeds, regardless of whether the transfer is profitable.

Administration. Enterprises normally use the calendar year as their tax year. Enterprises that have their own particular characteristics of operational organization may choose a financial year of 12 months according to the Gregorian calendar and they must notify the local authorities of such year.

Enterprises must pay their quarterly income tax due within 30 days after the last day of the quarter. Enterprises must file a final income tax return and pay any balance of income tax due within 90 days after the end of the tax year. If the provisional quarterly payments are less than the final income liability for the year, the shortfall in excess of 20% of the final income tax liability is subject to late payment interest at a fixed rate of 0.03% per day.

An under declaration is subject to only a late-payment fine if it is self-corrected by the taxpayer. Otherwise, a penalty of 20% of the under declared tax is imposed. Late payments of tax are subject to interest at a rate of 0.03% of the unpaid amount per day.

Tax audits are performed on an ad hoc or selected basis. Any tax under declaration identified by the tax auditor is penalized at 20% (or 100% to 300% if considered to be tax evasion) and subject to a prevailing interest rate of the tax liability for each day late, calculated from the statutory deadline to the date of actual payment.

Dividends. Dividends and branch remittances are not subject to withholding tax.
Withholding taxes on interest and royalties. The rate of withholding tax on interest paid under loan contracts is 5%.

A withholding tax at a rate of 10% is imposed on royalties paid to foreign legal entities with respect to technology transfers and licensing.

Foreign tax relief. Vietnam has signed tax treaties with several countries that provide relief from double taxation (see Section F).

C. Determination of taxable income

General. The taxable income of an enterprise is the income shown in the financial statements, subject to certain adjustments. Taxable income includes income derived from business operations and other activities.

An enterprise may deduct expenses if the following conditions are satisfied:

- The expenses are actually incurred and related to the production and business activities of the enterprise.
- The expenses are accompanied by complete invoices and source vouchers as required by law.
- Expenses of VND20 million or more must be supported with cashless payments (for example, bank transfers and payments with cards).
- The expenses are not on the list of nondeductible expenses shown below.

Certain expenses are not deductible in determining taxable income, including the following:

- Provisions that do not conform to the regulations of the Ministry of Finance (MOF)
- Accrued expenses not corresponding to taxable turnover that has been recognized
- Bonuses and life insurance expenses for employees that are not clearly stated in the labor contracts, the collective labor contracts, the financial regulations of the company or the reward regulations promulgated by the chairman of the board of management
- Interest payments on loans corresponding to equity that is not contributed
- Interest payments on loans borrowed from lenders that are not credit institutions or economic organizations that exceed 150% of the basic interest rate quoted by the State Bank of Vietnam at the time of the loan agreement
- Under recently enacted transfer-pricing regulations, loan interest expenses in excess of 20% of the total net profit generated from business activities plus loan interest expenses and amortization costs arising in the period
- Expenses sourced from other funding and expenses paid from the Science and Technology Development Fund of the enterprise
- The portion of business management expenses allocated by a foreign company to its resident establishment in Vietnam (for example, head office charges allocated to the Vietnam branch) that exceeds the level allowed under the regulations
- Depreciation of fixed assets that are not used for business activities and/or supported by ownership documents
• Employees’ fringe benefits that exceed the cap of an average one month’s salary cost (calculated by dividing the yearly wage fund by 12) in the tax year
• Payments above VND1 million per person per month for contributions to a voluntary pension fund or purchase of voluntary pension insurance for employees
• Donations except for certain donations for education, health care, natural disasters or building charitable homes for the poor
• Management expenses allocated to permanent establishments in Vietnam by the foreign company that are not in accordance with the regulations
• Administrative penalties
• Input value-added tax (VAT) that has been credited or refunded, input VAT on the value of a car of nine seats or less that exceeds VND1,600,000,000, corporate income tax (except for the corporate income tax that a Vietnamese company pays on behalf of a foreign contractor under a net contract) and personal income tax (unless the employer pays net salary to employees)
• Expenses that do not correspond to taxable revenue
• Exchange-rate loss as a result of the revaluation of the year-end balance of money items in foreign currencies, except for the revaluation of payables in foreign currencies
• Exchange-rate loss arising in the process of capital construction of fixed assets, which is governed by a separate regulation of the MOF

**Inventories.** Inventory valuation should be consistent with the accounting principles and standards selected by the company and approved by the MOF. No specific guidelines have been established by the tax authorities.

**Tax depreciation.** Depreciation of fixed assets is normally computed using the straight-line method. The MOF has issued guidelines setting forth the minimum and maximum years for depreciation of various assets, but companies may apply to the MOF for permission to use different time periods. The following are the minimum and maximum years of depreciation for certain categories of assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intangible assets</td>
<td>Up to 20</td>
</tr>
<tr>
<td>Buildings and factories</td>
<td>5 to 50</td>
</tr>
<tr>
<td>Tools and machinery</td>
<td>3 to 20</td>
</tr>
<tr>
<td>Transportation vehicles</td>
<td>6 to 30</td>
</tr>
<tr>
<td>Other fixed assets</td>
<td>2 to 40</td>
</tr>
</tbody>
</table>

Depreciation at rates exceeding those allowed by the MOF is not deductible for tax purposes. For cars with nine seats or less purchased by enterprises for business other than passenger transportation, hotel or tourism, the depreciable amount is capped at VND1,600,000,000.

**Relief for losses.** Enterprises that incur losses may carry forward the losses to the following five years and claim such losses as deductions from taxable income. Losses must be wholly carried forward to consecutive years (including the year of a tax holiday).

Enterprises that incur losses from real-property transfers may carry forward the losses to offset income from all of their activities.
Carrybacks of losses are not allowed.

**Groups of companies.** Dependent production establishments of a company operating in different areas of Vietnam must declare and pay tax with the local tax authorities where the dependent establishments’ offices are located based on the ratio of the expenses of the dependent establishment to the total expenses of the company. The offsetting of losses and profits between parents and subsidiaries is not allowed.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>

</tr>
</tbody>
</table>
E. Miscellaneous matters

Foreign-exchange controls. Enterprises with foreign-owned capital must open accounts denominated in a foreign currency or the Vietnam dong (VND) at a bank located in Vietnam and approved by the State Bank of Vietnam (SBV). All foreign-exchange transactions, such as payments or overseas remittances, must be in accordance with policies set by the SBV.

Enterprises with foreign-owned capital and foreign parties may purchase foreign exchange from a commercial bank to meet the requirements of current transactions or other permitted transactions, subject to the bank having available foreign exchange.

The government may guarantee foreign currency to especially important investment projects or assure the availability of foreign currency to investors in infrastructure facilities and other important projects.

Transfer pricing. The Vietnamese transfer-pricing regulations apply the arm’s-length principle to determine transfer prices of business transactions undertaken between related parties and is broadly consistent with the arm’s-length concept as set out in the Organisation for Economic Co-operation and Development’s Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations (OECD Transfer Pricing Guidelines). The applicable transfer-pricing methods under the Vietnamese transfer-pricing regulations closely resemble the methods provided by the OECD Transfer Pricing Guidelines and include the following:

• Comparable uncontrolled price method
• Resale price method
• Cost-plus method
• Profit-split method
• Comparable profit method (referred to as the transactional net margin method in the OECD Transfer Pricing Guidelines)

The Vietnamese regulations contain detailed transfer-pricing documentation requirements. The documentation must be prepared before the submission of the annual income tax return to substantiate the arm’s-length prices and submitted to the tax authority within a prescribed time limit on receipt of written request in a tax audit.

Advance pricing agreement (APA) regulations are largely in line with the OECD Transfer Pricing Guidelines and APA regimes in other tax jurisdictions. An APA is a binding agreement between a taxpayer and the tax authority that determines in advance the basis for tax calculation, transfer-pricing methods and arm’s-length prices of the covered related-party transactions for a specific time period. The APA period is five years with a renewal period of up to five years.

F. Treaty withholding tax rates

The withholding rates under Vietnam’s double tax treaties are listed in the following table.

(a) For details, see Section B.
(b) The 20% rate applies to payments to nonresident companies and individuals. The other rates apply to resident companies and individuals.
(c) For resident and nonresident companies and individuals, this is a final tax. Zambian-incorporated companies may offset the withholding tax imposed on dividends received from other Zambian-incorporated companies against withholding tax payable on their own distributions of dividends.
(d) Withholding tax is payable on the accrual of interest. This rate applies to interest accrued by companies. This is a final tax for nonresident companies. Resident companies may credit the withholding tax against their income tax.
(e) For individuals and nonresident companies, this is a final tax. Resident companies may credit the withholding tax against their income tax.

**A. At a glance**
(f) The 15% rate applies to resident companies and individuals, while the 20% rate applies to nonresidents. This is a final tax for nonresident companies and individuals. The tax withheld from payments to resident companies and individuals is granted as a credit in the final tax return.

(g) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Resident and nonresident companies are subject to tax on their income derived from Zambian sources. However, residents are subject to tax on dividends and interest received on a worldwide basis. Resident companies are also subject to tax on profits derived from a business carried on partly inside, and partly outside, Zambia. A company is considered resident in Zambia if it is incorporated in Zambia or if the central management and control of the company’s business or affairs are exercised in Zambia.

Tax rates. The following are the standard corporate tax rates.

<table>
<thead>
<tr>
<th>Source</th>

</tr>
<tr>
<td>Income from mineral processing</td>
<td>35</td>
</tr>
<tr>
<td>Trading and other sources</td>
<td>35</td>
</tr>
</tbody>
</table>

(a) A 20% final withholding tax is imposed on royalties paid to nonresidents.
(b) A mining operation is any operation carried out under a mining right referred to in Section 6 of the Mines and Minerals Development Act, but does not include any operations carried out under a prospecting permit or prospecting license or any operations involving only mineral processing. Mining operations are subject to a mineral royalty (see Section D). If the income from a mining operation exceeds 8% of gross sales, the rate is determined in accordance with the following formula:

\[ Y = 30\% + \left[ a - \left( \frac{ab}{c} \right) \right] \]

The following are the values of the items in the formula:
- \( Y \) = the tax rate to be applied per year
- \( a = 15\% \)
- \( b = 8\% \)
- \( c = \) the percentage ratio of assessable income to gross sales

A tax incentive is available to companies that are newly listed on the Lusaka Stock Exchange. A two percentage point reduction of each corporate tax rate is granted to such companies. In addition, a reduction of five percentage points (for a total reduction of seven percentage points) of each corporate tax rate is available to companies with more than 33% of their shares owned by Zambians. The incentive applies for one year only, and a company may claim the incentive only once.
Capital gains. Capital gains are not subject to tax in Zambia, but depreciation recaptured for tax purposes (see Tax depreciation) is taxable at the regular corporate tax rates. In addition, a property transfer tax is imposed (see Section D).

Administration. The Zambia Revenue Authority administers the Income Tax Act. The tax year runs from 1 January to 31 December. Annual tax returns must be filed by 21 June of the following tax year.

Companies must make four advance payments of tax, which are due on 10 April, 10 July, 10 October and 10 January. The installments are based on an estimate of the tax due for the year. The balance of tax due must be paid by the due date for filing the annual tax return.

A company may apply to the Commissioner-General to use an accounting year other than the standard tax year. However, the due dates described above for filing returns and advance payments of tax also apply to companies with an accounting year-end other than 31 December.

Dividends. A 15% withholding tax is imposed on dividends paid to resident companies and individuals. A 20% withholding tax is imposed on dividends paid to nonresident companies and individuals. This is a final tax. Dividends received from subsidiaries are also subject to a 15% withholding tax.

Zambian-incorporated companies may offset the withholding tax imposed on dividends received from other Zambian-incorporated companies against withholding tax payable on their own distributions of dividends.

Foreign tax relief. A foreign tax credit is available to resident companies for foreign taxes paid on foreign income subject to Zambian tax. The amount of the tax credit is the lower of the Zambian tax payable on the foreign income and the foreign tax paid on the same income.

C. Determination of trading income

General. Taxable income is the net profit reported in the companies’ financial statements, adjusted by certain tax law provisions. Expenses are deductible to the extent they are incurred wholly and exclusively for the purposes of the business.

Companies engaged in fishing or farming for two consecutive tax years may elect to calculate taxable income or loss for the two tax years by averaging the taxable income earned or loss incurred in each of the two tax years. This election must be filed with the Commissioner-General before the end of the tax year following the second consecutive tax year. The election is not allowed in certain circumstances.

Inventories. Inventories are valued at the lower of cost or net realizable value.

Provisions. Specific identifiable provisions with proof of steps taken to collect the debt are allowed for tax purposes, but general provisions are not allowed.
**Tax depreciation.** Industrial buildings qualify for an initial allowance of 10%. The initial allowance is not deductible from the cost of the assets. Annual wear-and-tear allowances, which are calculated using the straight-line method, are available for the following assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial buildings</td>
<td>10</td>
</tr>
<tr>
<td>Low-cost housing (buildings used to provide housing for the purposes of a business with a cost per unit of up to ZMW20,000 [USD2,000])</td>
<td>10</td>
</tr>
<tr>

</tr>
<tr>
<td>Non-commercial vehicles</td>
<td>20</td>
</tr>
<tr>
<td>Property, plant and equipment investment by companies in the priority sector</td>
<td>100</td>
</tr>
</tbody>
</table>

The amount of depreciation claimed on an asset may be recapitulated when the asset is sold. In general, the amount recaptured is the excess of the sales price over the tax value, but it is limited to the amount of depreciation claimed.

**Relief for losses.** Tax losses may be carried forward five years to offset income from the same source. Mining operations and companies operating in the hydro- and thermo-generation sector may carry forward losses for a period of 10 years. Effective from 1 July 2015, a loss from a mining operation is deducted from 50% of the income of a person from the mining operation. In general, losses may not be carried back.

**Groups of companies.** No provisions for filing consolidated returns exist in Zambia.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax (VAT), on any supply of goods and services, other than an exempt supply, made in Zambia and on taxable imports; exports are zero-rated; at the time of writing, based on the Minister of Finance’s statement, VAT is expected to be abolished on 1 July 2019 and replaced with a sales tax; under the draft legislation, the expected sales tax rates are 9% for goods and services procured or produced locally and 16% for imported goods and services</td>

Nature of tax
Property transfer tax, on transfers of shares of companies incorporated in Zambia, and land, buildings and structures located in Zambia 5
Property transfer tax on transfer of mining rights 10
Property transfer tax on intellectual property; effective from 1 January 2018 5
Royalty on the extraction, production and selling of ore; the mineral royalty tax rate varies depending on the type of mineral Various

E. Miscellaneous matters

Foreign-exchange controls. The Zambian currency is the kwacha (ZMW). The exchange rate of the kwacha against foreign currencies is not controlled.

Zambia does not impose foreign-exchange controls.

Transfer pricing. Transfer-pricing rules apply to transactions between related parties. Related-party transactions must be conducted at arm’s length. Transfer-pricing rules apply to transactions with nonresident related parties as well as to transactions between local entities. The transfer-pricing regulations are based on Organisation for Economic Co-operation and Development (OECD) rules, and any price determined in accordance with OECD rules is acceptable. Effective from 1 January 2018, taxpayers must retain transfer-pricing documentation and submit it within 14 days of a request by the tax authority or they will be subject to a penalty of 80 million penalty units (ZMW24 million).

Permanent establishment. The provision of services, including consultancy services, through employees or other personnel engaged by an entity in Zambia for a period or periods exceeding an aggregate of 90 days in any rolling 12-month period results in a permanent establishment.

(a) Special tax rates apply to certain enterprises. For details, see Section B.
(b) An AIDS levy of 3% is imposed on income tax payable (excluding tax on income subject to special rates).
(c) Tax is imposed on capital gains on the disposal of specified assets, including listed and unlisted marketable securities, immovable property (including rights in residential, commercial or industrial stands and membership interests in condominiums) and intangible property requiring formal registration. See Section B.
(d) A capital gains withholding tax is withheld from funds held by a depositary on behalf of a seller of a specified asset. The 1% withholding tax on the disposal of securities listed on the Zimbabwe Stock Exchange is a final tax. See Section B.
(e) The 10% rate applies to dividends paid by companies listed on the Zimbabwe Stock Exchange to resident individuals and nonresidents. The 15% rate applies to dividends paid to resident persons other than companies and all nonresidents.
(f) This is a final withholding tax imposed on residents. The following types of interest are exempt from income tax and withholding tax:
   - Interest on deposits with a term of more than 12 months
   - Interest paid by the People’s Own Savings Bank
   - Interest on building society Class C (tax-free) shares
   The 5% rate applies to interest on fixed-term deposits of at least 90 days with financial institutions. The 0% rate applies to fixed-term deposits of more than 12 months.
(g) This is a final tax imposed on the income to maturity of treasury bills, bankers’ acceptances and discounted instruments traded by financial institutions that are purchased by resident investors who are not financial institutions. The tax is imposed at the time of disposal or maturity of the instrument.
(h) This withholding tax is imposed on nonresidents. The income is also subject to income tax unless a tax treaty provides that the withholding tax is a final tax.
(i) The withholding taxes are generally accounted for to the Zimbabwe Revenue Authority in the currency of the transaction that relates to the payment from which the tax is withheld.
(j) This is a final tax imposed on remittances transferred from Zimbabwe by nonresidents for allocable technical, managerial, administrative or consulting expenditures incurred outside Zimbabwe in connection with a trade carried on in Zimbabwe.
(k) The 15% rate applies to payments by residents to nonresidents of technical, managerial, administrative and consulting fees. The 20% rate applies to
payments for non-executive directors’ fees and property and insurance commissions paid to resident and nonresidents who are not employees. The tax withheld is deductible from income tax payable. However, the 15% tax is a minimum tax.

(l) This is a tax on the payee, which is withheld by the payer from all payments made under contracts for more than a specified threshold to resident and nonresident suppliers who cannot provide a tax-clearance certificate.

(m) The tax is withheld by Value Added Withholding Tax Agents from payments for taxable supplies to specified noncompliant registered value-added tax (VAT) operators who can offset the tax withheld each month from output VAT for the following month.

(n) Only remittances of head office technical, managerial, administrative and consulting expenditures are subject to the 15% withholding tax (see footnote [i] above).

(o) Mining losses are ring fenced to specific locations and may be carried forward indefinitely.

B. Taxes on corporate income and gains

**Corporate income tax.** Income tax is levied on all amounts (other than capital) received or accrued to residents from a Zimbabwean source or a deemed Zimbabwean source, less expenditures not of a capital nature incurred in the production of income or for business purposes. Certain specific types of income are exempt.

Nonresident companies that carry on business in Zimbabwe are subject to corporate income tax on all taxable income, wherever arising, attributable to a permanent establishment in Zimbabwe.

Foreign interest and dividends accruing to taxpayers that are ordinarily resident in Zimbabwe are deemed to be from a source in Zimbabwe. A corporation is ordinarily resident in Zimbabwe if it is managed and controlled in Zimbabwe.

**Rates of corporate tax.** Resident and nonresident companies are subject to income tax at a rate of 25%. Residents are subject to income tax at a rate of 20% on gross foreign dividends receivable.

An AIDS levy of 3% is imposed on income tax payable (excluding tax on income subject to special rates).

**Special tax rates.** Special tax rates apply to the following enterprises.

<table>
<thead>
<tr>
<th>Type of enterprise</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Investors operating in export-processing zones licensed before 1 January 2007</td>
<td>25</td>

<tr>
<td>(plus additional profits tax)</td>
<td></td>
</tr>
</tbody>
</table>

| BuildOwn-operate-transfer (BOOT) and build-operate-transfer (BOT) projects |
|--------------------|----------|
| Years 1 through 5 | 0 |
| Years 6 through 10 | 15 |
| Year 11 and thereafter | 25 * |
| Industrial park operators | 25 |
| Manufacturing enterprises exporting 31% to 51% of their production | 15/17.5/20 |
| Licensed power generation projects |
| Years 1 through 5 | 0 |
| Thereafter | 15 |
Interest received by residents on deposits with Zimbabwean financial institutions with a term of over 12 months is exempt from income tax and withholding tax. Other interest received by residents from Zimbabwean financial institutions is exempt from income tax, but it is subject to a final withholding tax at a rate of 15% or 5% for fixed-term deposits of at least 90 days. A final withholding tax at a rate of 15% is also imposed on the income to maturity of treasury bills, bankers’ acceptances and discounted instruments traded by financial institutions that are purchased by resident investors that are not financial institutions. The tax is imposed at the time of disposal or maturity of the instrument. No deduction for expenses and losses is permitted from interest subject to the final taxes described above. Other interest received by residents is taxable at the regular corporate income tax rate and may be offset by expenses and losses.

**Tax concessions.** In the past, export-processing zones were designated in the major business centers and border areas of Zimbabwe. Concessions are restricted to licenses issued before 1 January 2007 to certain investors to operate in these zones. Effective from 1 January 2017, similar concessions apply to licensed investors in designated Special Economic Zones established under recently promulgated legislation. These concessions are in the form of reduced rates or an exemption with respect to the following taxes:

- Income tax at reduced rates on taxable income arising from exported goods and services (0% for five years and 15% for subsequent years)
- Tax on employment income at a flat rate of 15% plus a 3% AIDS levy for expatriate employees of licensed investors in Special Economic Zones
- Nonresident and resident shareholders taxes on dividends
- Nonresident taxes on fees and royalties
- Customs duty
- VAT on goods and services (refundable)

Foreign entities that provide finance for approved projects for development in Zimbabwe are exempt from income tax and capital gains tax.

Receipts and accruals of financial institutions that relate to mortgage financing provided by them are exempt from income tax.

**Capital gains.** Withholding tax is imposed on the gross proceeds derived from the disposal of specified assets including listed and unlisted marketable securities, immovable property (including rights in residential, commercial or industrial stands and membership interests in condominiums) and intangible property requiring formal registration.
Specified assets also include any right or title to tangible or intangible property. A depositary includes the official responsible for the formal registration of the right or title.

The withholding tax rates on the disposal of specified assets acquired before 1 February 2009 are 1% for listed marketable securities and 5% for unlisted marketable securities and immovable property. The withholding tax rates on disposal of assets acquired on or after 1 February 2009 are 1% for listed marketable securities, 5% for unlisted marketable securities and 15% for immovable property. This tax is offset against any assessed capital gains tax.

Capital gains derived from the disposal of immovable property and unlisted securities acquired before 1 February 2009 are taxed at the greater of 5% of the gross sale proceeds and the amount of the withholding tax withheld on disposal.

Capital gains derived from disposals of immovable property and unlisted marketable securities acquired after 1 February 2009 are taxed at a rate of 20%. Gains are determined by deducting from the selling price the cost plus an allowance of 2.5% per year on the cost from the date the cost was incurred to the date of disposal. Capital allowances recaptured for income tax purposes (see Section C) are excluded from gains. Capital gains withholding tax is offset against any capital gains tax assessed on the transaction.

Capital gains derived from the disposal of listed securities are exempt from capital gains tax, effective from 1 August 2009. Thereafter, the gross sale proceeds are subject to a 1% capital gains tax, which equals the amount withheld on disposal as capital gains withholding tax.

Administration. Zimbabwe’s tax year ends on 31 December. Tax returns must be filed by 30 April. Self-assessment applies to all taxpayers, other than those who receive employment income only.

Corporate tax must be paid during the relevant tax year. Provisional payments equaling specified percentages of the estimated total tax payable are due on the following dates:

- 25 March: 10%
- 25 June: 25%
- 25 September: 30%
- 20 December: 35%

Penalties can be imposed for late or incorrect returns (excluding returns for provisional tax), and late payments are subject to interest at a rate of 10% per year.

Withholding taxes that are not considered final taxes are credited to the income tax due on the income from which the tax has been withheld.

Dividends. Dividends received by a resident corporation from another resident corporation are exempt from withholding tax and
income tax. A 10% withholding tax is imposed on dividends paid by companies listed on the Zimbabwe Stock Exchange to resident individuals and nonresidents. A 15% withholding tax is imposed on other dividends paid to resident individuals and nonresidents. Gross dividends received from foreign companies are subject to tax at a rate of 20%.

**Foreign tax relief.** If relief is not provided by a treaty, a unilateral tax credit is given for foreign withholding tax. The tax credit may not exceed the Zimbabwean income tax imposed on the income.

### C. Determination of trading income

**General.** Income tax is levied on all income from a source in Zimbabwe or deemed to be in Zimbabwe. The following types of interest are exempt from income tax:

- Interest on deposits with a term of more than 12 months
- People’s Own Savings Bank interest
- Interest from certain building society investments

Other interest on deposits with financial institutions and income from treasury bills, bankers’ acceptances and discounted instruments traded by financial institutions is subject to a final withholding tax at a rate of 15%. For further details regarding this withholding tax, see Section B.

Expenses incurred for business purposes are generally deductible. The following expenses are not deductible:

- Expenses incurred in the production of exempt income or income not derived or deemed to be derived from Zimbabwe.
- Pension fund contributions in excess of a specified amount.
- Cost of attending trade missions and conventions in excess of a specified amount.
- Rent or repairs for premises not occupied for purposes of trade.
- Payments in restraint of trade.
- Entertainment expenses.
- Payments in excess of a specified amount for the lease of passenger motor vehicles (as defined).
- Interest relating to excess debt in a company with a debt-to-equity ratio that exceeds 3:1 is disallowed and treated as a deemed dividend. Resident or nonresident shareholders tax on the deemed dividend is payable by the company deemed to have paid the dividend.
- Expenditure on administration and management fees charged by a holding or subsidiary company or foreign head office that qualifies as an enterprise associated with the taxpayer are disallowed and taxed as a deemed dividend to the extent that they exceed 0.75% of expenditure incurred during the preproduction phase or 1% of tax-deductible expenditure incurred after the beginning of trading or the production of income. Resident or nonresident shareholders tax on the deemed dividend is payable by the company deemed to have paid the dividend. The rate of resident or nonresident tax on the gross deemed dividend is 10% for a dividend deemed to have been declared by a listed company or 15% for a dividend deemed to have been declared by an unlisted company.

Donations of up to a specified threshold for the construction, maintenance or operation of hospitals and schools run by the state,
local authorities or religious organizations and donations to approved research institutions are deductible.

A double tax deduction is allowed for specified export market development expenditure.

Amounts contributed to approved scientific and educational bodies for industrial research or scientific experimental work are also deductible for tax purposes.

Under the Indigenisation and Economic Empowerment Act, the following amounts are deductible for tax purposes:
- Contributions or donations to approved community share ownership trusts or schemes are deductible.
- Loans by corporate taxpayers to acquire shares that are repayable from dividends foregone by the taxpayers on those shares are deductible in equal annual installments over the period of the loan.

**Inventories.** The only acceptable inventory valuation methods for tax purposes are cost, using the first-in, first-out (FIFO) method, and market value.

**Provisions.** In general, only specific provisions are deductible for tax purposes.

**Tax depreciation.** Depreciation charged in the financial statements is not deductible; instead, a 25% special initial allowance is granted on the cost of certain assets. A wear-and-tear allowance of 25% of cost is granted in the following three years. The special initial allowance is granted on the cost of construction or additions to qualifying fixed assets other than land and certain buildings and also on the purchase price of movable property. If the special initial allowance is not claimed, a wear-and-tear allowance at varying rates is granted on these assets. The following are the rates and the methods of computing this wear-and-tear allowance for certain assets.

* Toll roads and toll bridges declared to be such under the Toll Roads Act are included in this category.

All capital allowances are subject to recapture on the disposal of assets on which such allowances have been claimed. Any amounts recaptured are subject to tax at the regular corporate tax rate. The full sale price of mining assets on which capital allowances have been granted is subject to tax at the corporate tax rate for mining.

**Relief for losses.** Mining losses are ring fenced to specific locations and may be carried forward indefinitely. Other losses may be carried forward for six years. Losses cannot be carried back.

**Groups of companies.** Zimbabwean law does not contain provisions for filing consolidated returns or for relieving losses within a group.
Transfers of assets in a merger or group reconstruction between companies under common control may be made at the tax value for both income tax and capital gains tax purposes. On the subsequent disposal of such assets outside the group, the gain or loss to the seller is computed with reference to the cost to the first transferor within the group.

D. Other significant taxes

The following table summarizes other significant taxes.

<table>
<thead>
<tr>
<th>Nature of tax</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value-added tax (VAT); imposed on the supply and importation of goods and services; certain items are exempt, including financial services, medical services, fuel, tobacco, educational or training services, long-term residential leases and transport of passengers by road or rail; also imposed on certain exports; suppliers of qualifying goods and services with an annual value in excess of a specified threshold must register; the annual threshold is currently USD60,000</td>
<td>Standard rate 15%</td>
</tr>
<tr>
<td>Exports of unbeneficiated hides</td>
<td>Greater of 75 cents/kg and 15% of the value</td>
</tr>
<tr>
<td>Exports of lithium</td>
<td>5%</td>
</tr>
<tr>
<td>Exports of uncut and cut three-dimensional stones</td>
<td>2.5%/5%</td>
</tr>
<tr>
<td>Unbeneficiated platinum</td>
<td>Sliding scale based on the degree of beneficiation</td>
</tr>
</tbody>
</table>

Other exports, prescribed drugs and services (excluding accommodation) supplied by designated tourist facilities to tourists that are paid for with foreign currency

Intermediated Money Transfer Tax; payable by financial institutions on transactions mediating the transfer of money with certain exceptions; the financial institution may recover the tax from either the transferee or transferor 2%

Presumptive taxes on different bases and at various rates are imposed on informal traders, small-scale miners, and operators of taxicabs, omnibuses, goods vehicles, driving schools, hair-dressing salons, cottage industries, waterborne vessels, fishing rigs and licensed and unlicensed bottle stores and restaurants.

E. Miscellaneous matters

Foreign-exchange controls. The legislation and regulations with respect to foreign-exchange controls are continuously under review. They are discussed below in general terms.

A significant shortage of foreign currency exits in Zimbabwe.

The government still imposes broad controls over all transactions involving a nonresident. Applications through commercial banks are required for the approval of most transactions of this nature. Commercial banks refer exceptional items to the Reserve Bank of Zimbabwe.
Foreign investment of up to 35% in primary issues of shares and bonds is permitted if funded by inward transfers of foreign exchange. Purchases and disposals by foreign investors in the secondary market require specific approval from the authorities.

Agreements relating to foreign services (including borrowings) require registration with the commercial banker of the borrower before implementation. Borrowings in excess of specified limits require the approval of the Reserve Bank of Zimbabwe. The approvals are granted based on the merits of the borrowings in accordance with guidelines set by the External Loans Coordinating Committee. The guidelines provide that foreign borrowings may be approved only if they are used to fund productive, export-oriented ventures that have the potential to generate sufficient foreign currency for loan principal and interest repayments without recourse to the foreign-currency market. Foreign loans to purchase shares, existing companies or real estate, or to fund private consumption, personal loans or retail inventories, are generally discouraged.

All offshore remittances require pre-approval and are released on the basis of published priorities.

The remittance of amounts due to related or unrelated nonresidents under approved foreign-service agreements is restricted to 3% of audited gross annual revenue.

With the approval of the authorities, 100% of after-tax normal trading profits may be remitted to nonresident shareholders within one year after the accrual of the profits. Specific approval is required for remittances of after-tax normal trading profits accrued in prior years.

After-tax dividends and capital gains derived from investments on the Zimbabwe Stock Exchange are fully remittable.

Debt-to-equity rules. Debt-to-equity rules apply to all companies (see Section C).

Transfer pricing. Zimbabwe introduced transfer-pricing legislation, effective from 1 January 2016. The new transfer-pricing legislation endorses the arm’s-length principle and imposes documentary obligations on taxpayers. The legislation covers transactions between all connected persons and applies to both domestic and international transactions. These new provisions are aligned with transfer-pricing principles developed by the Organisation for Economic Co-operation and Development (OECD); consequently, the law recognizes OECD manuals on the subject as relevant sources of interpretation.

F. Treaty withholding tax rates

The rates shown in the table reflect the lower of the treaty rate and the rate under domestic tax law.

</tbody>
</table>

(a) Except for the Iran treaty, the reduced treaty rates apply only if the recipient is a company that controls at least 15% to 25% of the voting power of the payer company.

(b) The entry into force of these treaties has not yet been published.
Contacts for other jurisdictions

For information regarding services in other jurisdictions that are not covered in this book, please contact the EY professionals listed below.

About EY
EY is a global leader in assurance, tax, transaction and advisory services. The insights and quality services we deliver help build trust and confidence in the capital markets and in economies the world over. We develop outstanding leaders who team to deliver on our promises to all of our stakeholders. In so doing, we play a critical role in building a better working world for our people, for our clients and for our communities.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. Information about how EY collects and uses personal data and a description of the rights individuals have under data protection legislation are available via ey.com/privacy. For more information about our organization, please visit ey.com.

About EY’s Tax Services
Your business will only succeed if you build it on a strong foundation and grow it in a sustainable way. At EY, we believe that managing your tax obligations responsibly and proactively can make a critical difference. Our 50,000 talented tax professionals, in more than 150 countries, give you technical knowledge, business experience, consistency and an unwavering commitment to quality service – wherever you are and whatever tax services you need.
