

Grant calls for 2025

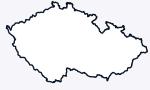

The better the question. The better the answer. The better the world works.

If you are interested in an overview of other subsidy calls, for example, in the areas of research, development and innovation (especially TAČR programs); renewable energy sources (biomethane, biomass, hydro and wind power plants); nature conservation (small water reservoirs, ponds, park landscaping, etc.), please do not hesitate to contact our subsidy specialists.

At the same time, we focus on European subsidies, especially the Digital Europe and Innovation Fund programmes. The Digital Europe programme offers a number of challenges in the area of implementation of new technologies in IT, artificial intelligence or cybersecurity. The Innovation Fund, where the call is running now until 24 April, is aimed at supporting innovative low-carbon technologies in the fields of energy, RES or the transition of technology-intensive sectors.

Calls now open

CALL	DEADLINE	OBJECTIVES	WHO MAY APPLY	CZECH REP./ OUTSIDE PRAGUE
