

How do you balance speed and governance when scaling enterprise transformation?

EY Transformation Hub (EY T-HUB)

EY

Shape the future
with confidence

The better the question. The better the answer. The better the world works.

Challenge

Enterprises struggle to translate ambitious strategies into coordinated, measurable execution at scale. Teams juggle hundreds of initiatives, yet decision-makers lack a single source of truth, integrated governance, and timely insight into value, risk, and progress - especially across complex portfolios that span business units and partners.

Product description

EY Transformation Hub (EY T-HUB) is designed to tackle these challenges by organizational objectives and strategies across departments, to help enable measurable execution. Integrated in Microsoft Teams, it automates planning, governance, and reporting-giving leaders real-time visibility to run complex change with speed, precision, and confidence.

EY T-HUB is an AI-powered portfolio and transformation management platform designed to connect strategy with execution, acting as a central intelligence hub for enterprise change. Embedded directly in Microsoft Teams, it supports leaders and their teams to manage complex transformations with greater speed, precision, and confidence.

The platform enables organizations to:

- Leverage AI-accelerated setup, which includes AI-assisted planning and best practice knowledge access, automated project creation, and smart RAID management to improve transformation design and reinforce execution discipline.
- Foster stronger governance and collaboration through dynamic governance, transparent cross-team collaboration, and one-page AI-curated charters that enhance clarity and decision-making.
- Help ensure enterprise-wide consistency with unified data and workflows that promote leading practices across the organization, complemented by seamless integration with execution tools.
- Achieve holistic visibility by providing a single source of truth for portfolio value, risks and outcomes, supported by integrated Power BI reporting.

Case studies

Key product features

■ AI-powered execution

Real-time insights with automated project plans and AI-curated one-page charters to facilitate faster, smarter decision-making.

■ Proactive risk and delivery control

Smart RAID detection and one click triage to manage risks, assumptions, issues, and dependencies efficiently.

■ Embedded guidance and collaboration

An interactive AI smart assistant plus deep Microsoft Teams integration to support seamless, intuitive teamwork.

■ Unified transformation hub

A single source of truth with enterprise-wide visibility, integrating third wide visibility, integrating party party tools and Power BI for transparent reporting and governance.

Product benefits

■ Faster mobilization

Automated planning and chartering reduce setup time from days to hours, accelerating value delivery.

■ Smarter, earlier decisions

Continuous insights and portfolio visibility support objective prioritization and timely governance.

■ Lower delivery risk

Proactive RAID detection and dependency visibility help avoid surprises across complex programs.

■ Transparency and scalability

Executive level visibility builds trust, while a unified hub supports consistent execution across large portfolios.
