1. The tax rates reflect budget proposals and news releases to June 1, 2025. Where the tax is determined under the alternative minimum tax provisions (AMT), the above table is not applicable. AMT may be applicable where the tax otherwise payable is less than the tax determined by applying the relevant AMT rate to the individual's taxable income adjusted for certain preference items.
2. The tax determined by the table should be reduced by the applicable federal and territorial tax credits (see chart below), other than the basic personal tax credits, which have been reflected in the calculations (see Note 5 below).
3. The rates apply to the actual amount of taxable dividends received from taxable Canadian corporations. Eligible dividends are those paid by public corporations and private companies out of earnings that have been taxed at the general corporate tax rate (the dividend must be designated by the payor corporation as an eligible dividend). Where the dividend tax credit exceeds the federal and territorial tax otherwise payable on the dividends, the rates do not reflect the value of the excess credit that may be used to offset taxes payable from other sources of income. This assumption is consistent with prior year rates.
4. The rates apply to the actual amount of the capital gain. A capital gains exemption may be available to reduce or eliminate the tax on capital gains from certain qualifying property and qualifying business transfers.
5. The federal and territorial basic personal amounts comprise two elements: the base amount (\$14,538 for 2025) and an additional amount (\$1,591 for 2025). The additional amount is reduced for individuals with net income in excess of \$177,882 and is fully eliminated for individuals with net income in excess of \$253,414. Consequently, the additional amount is clawed back on net income in excess of \$177,882 until the additional tax credit (\$231 federally and \$102 in Yukon) is eliminated; this results in additional federal and territorial income tax (e.g., 0.31% and 0.13%, respectively, on ordinary income) on taxable income between \$177,883 and \$253,414.
