

In this data-driven world, is trust the hardest thing to build?

Shape the future with confidence

The better the question. The better the answer. The better the world works.

Build trust in digital transformation through the EY Digital Trust Platform

Transforming digital risk management

Artificial Intelligence is enabling a new approach to digital risk management. The rapid adoption of prompt interfaces, twinned with the impetus to use AI to support day-to-day tasks, brings huge opportunity to the world of Governance, Risk and Compliance. Complex processes can be simplified, business friction eliminated, and compliance postures strengthened:

- Integrate with the new wave of enterprise AI interfaces to trigger governance processes when/where they have the most impact.
- Improve user journeys to simplify governance workflows, enhance risk data-models and enable faster compliance and risk management decisions.
- Design and implement guardrails and guidelines to educate business users about key risk factors and enforce global policy.

EY Digital Trust Platform

EY Digital Trust Platform (EY DTP) is an easy-to-use Governance, Risk & Compliance platform. It is designed to embed digital governance practices, accelerate risk management decisions, and evidence compliance with complex regulatory regimes.

Available as a SaaS platform, EY DTP can scale to grow with your business. EY DTP focusses on useability and interoperability, which means it is easy to implement and can quickly take the pain out of complex compliance processes. And through integrations with common business user interfaces and established IT governance platforms, EY DTP can surface governance processes where they make the most sense to your business users.

Use EY DTP to enhance operational resilience, improve trust in the integrity of your digital assets, and build a foundation for a new wave of AI-enabled digital risk management.

Multiple systems, multiple assets, multiple stakeholders - powered by one digital trust platform

Map

Measure

Govern

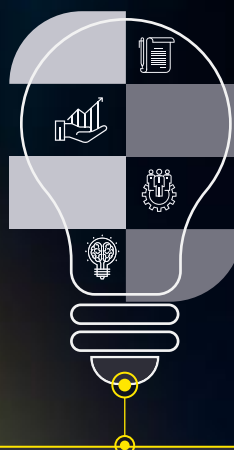

Manage

Layer 4 - Reports and evidence

Agent cards, Model cards, DPIAs, Resilience KPIs, Audit Packs, AI Inventories, Cross-border data transfers, RoPAs...

Layer 2 - Controls and gates

Policies, triggers, organisational approvals, notifications, regulatory and compliance frameworks, risk appetite...

Layer 3 - Assessments Hub

AI risk, Privacy risk, Cyber risk, Control tests, Regulatory risks, Operational resilience, CAF, BCBS239, NIST...

Layer 1 - Business Catalogs

Asset libraries, third parties, tool inventories, business taxonomies...

Unify digital trust using EY's Digital Trust Platform

The future of digital risk management, today

Develop the ability to quickly adopt and scale up new digital technologies by laying the groundwork now

How to get started with the EY Digital Trust Platform

- Step 01**
Schedule a consultation
Book a consultation with the EY Digital Trust Platform team at ntp@ey.com to discuss your objectives and needs.
- Step 02**
Review a customized demo
Receive a tailored demonstration of the platform's features and capabilities.
- Step 03**
Initiate a pilot program
Launch a pilot program to evaluate the platform's effectiveness at transforming your existing processes.
