

# EY CAFTA's Certificate in treasury analytics

## About the course

Over the past years, requirements for the finance function to become a value adding service function using disruptive technology have grown significantly. The new challenges include the demand to provide financial information faster, more compact and based on actual data.

Hence, a traditional Management Information System (MIS) that reports what has happened in the past is not sufficient anymore. Companies are using visualization and analytical techniques to draw insights from process to drive efficiencies and take enhanced decisions

This course introduces you to the ever-growing world of technology and its application in global treasury functions. The module leverages real world problem statements and solutions to understand treasury analytics better.

# Table of contents

## Introduction to technology

- ▶ Overview and introduction to technology
- ▶ Define common terminologies such as artificial intelligence, machine learning, etc.

## Evolution of technology

- ▶ Learn about the trends driving the treasury technology landscape
