

Shape the future with confidence

Integrity Insights Hub

EY Forensic & Integrity Services
Integrity & Remediation

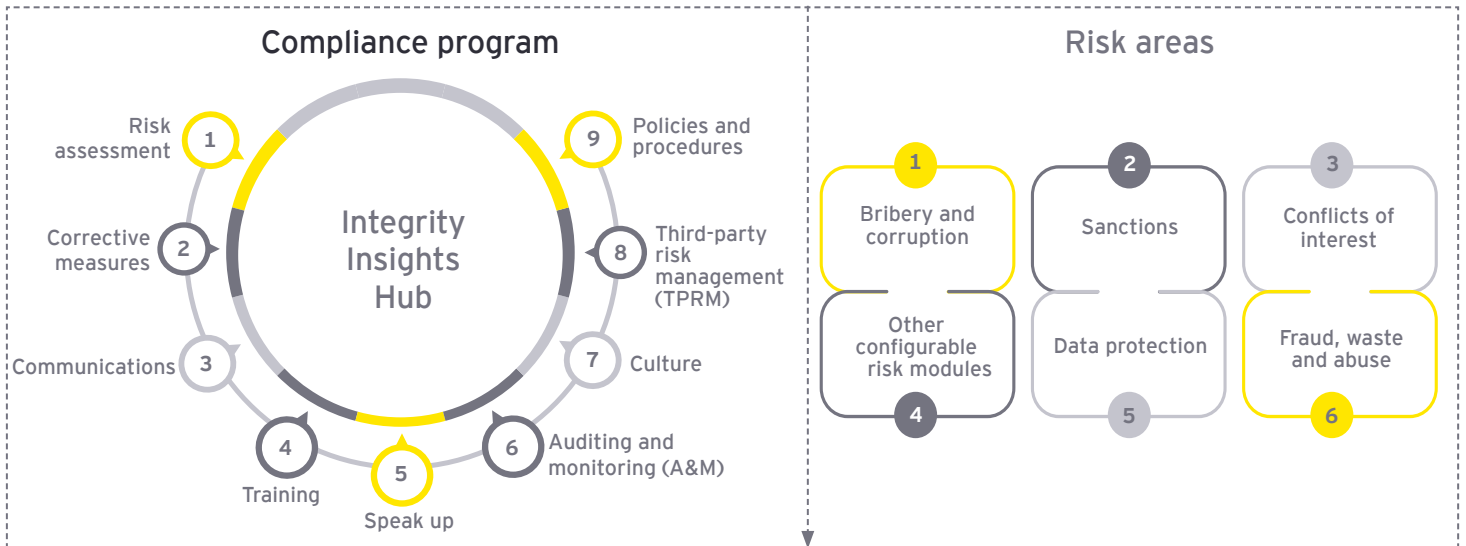

The better the prompt. The better the answer.
The better the world works.

The EY Integrity Insights Hub empowers organizations to leverage technology and harness the power of data-driven insights in their compliance program. The Integrity Insights Hub was developed based on decades of experience building compliance programs and presenting to regulators regarding those programs. The Integrity Insights Hub allows compliance professionals to take the first (or next) step in their digital journey by:

- 1 Utilizing existing compliance-related data and tools
- 2 Leveraging pre-built compliance modules to enhance the compliance program
- 3 Connecting data and tools to generate cross-module insights across the compliance program
- 4 Actioning insights into measurable countermeasures and improving the program

These features culminate in efficient reporting to key stakeholders across the organization, including business operations, executive leadership teams and the board of directors.

Enabled by AI

The **Integrity Insights Hub** addresses common challenges that we hear from clients relating to using technology in compliance departments:

Challenges

- 1 Fragmented technology tools and siloed data have led to manual, resource-intensive workflows that are prone to inefficiencies, human errors and avoidable cost
- 2 Limited technology use may inhibit identifying key insights, which may expose the organization to avoidable risk
- 3 Budget constraints are prohibitive in starting a compliance technology transformation

Solutions

- 1 Provides configurable workflows that help standardize the compliance process to promote efficiency and quality
- 2 Centralizes data to allow compliance programs to create agile, strategic solutions that can identify cross-domain insights across data sets
- 3 Includes pre-built modules designed using regulatory guidance and leading practices that allow for incremental, tailored advances in technology transformation consistent with your strategy

The Integrity Insights Hub drives benefits for compliance programs that enable compliance professionals to be better strategic partners to their executive leaders.

Benefits

Credentials

- A Fortune 20 company utilized the Integrity Insights Hub as a central compliance platform for risk assessment, control testing, third-party risk management and monitoring at 100+ individual entities. This solution helped the client **achieve a globally consistent methodology and performance standard and identify new and emerging risks.**
- A global technology company requested that we deploy the Integrity Insights Hub to **more efficiently and effectively mitigate multiple risk areas simultaneously.** We enabled this solution via advanced analytics and generative artificial intelligence (GenAI) to monitor these risks in real time.
- A semi-conductor company, with a resource-constrained compliance team, leveraged the Integrity Insights Hub to **identify its third-party risks and implement real-time monitoring of related disbursement activity.** Over time, the client elected to **incrementally expand the monitoring capability according to its compliance strategy** across other risk areas - e.g., conflicts of interest and sales activity.

EY | Building a better working world

EY is building a better working world by creating new value for clients, people, society and the planet, while building trust in capital markets.

Enabled by data, AI and advanced technology, EY teams help clients shape the future with confidence and develop answers for the most pressing issues of today and tomorrow.

EY teams work across a full spectrum of services in assurance, consulting, tax, strategy and transactions. Fueled by sector insights, a globally connected, multi-disciplinary network and diverse ecosystem partners, EY teams can provide services in more than 150 countries and territories.

All in to shape the future with confidence.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. Information about how EY collects and uses personal data and a description of the rights individuals have under data protection legislation are available via ey.com/privacy. EY member firms do not practice law where prohibited by local laws. For more information about our organization, please visit ey.com.

Ernst & Young LLP is a client-serving member firm of Ernst & Young Global Limited operating in the US.

About EY Forensic & Integrity Services

Embedding integrity into an organization's strategic vision and day-to-day operations is critical when managing complex issues of fraud, regulatory compliance, investigations and business disputes. More than 4,000 EY forensic and technology professionals help leaders balance business objectives and risks, build data-centric ethics and compliance programs, and ultimately develop a culture of integrity. EY teams consider your distinct circumstances and needs to assemble the right multidisciplinary and culturally aligned professionals for you and your legal advisors. They strive to bring you the benefits of leading EY technology, deep subject-matter knowledge and broad global sector experience.
