Not-for-profit entities that are registered in Qatar or in another country are within the scope of the Qatar Income Tax Law, although they are exempt from income tax. However, they must comply with withholding tax and contract tax retention requirements as well as other requirements of the Income Tax Law, if applicable.

The income of businesses registered and operating in the QFC is subject to a standard rate of tax of 10%. Regulated and non-regulated activities may be carried on from the QFC. Regulated activities include the following:

- International banking
- Insurance and reinsurance
- Fund management
- Brokerage and dealer operations
- Treasury management
- Funds administration and pension funds
- Financial advice and back-office operations

Non-regulated activities include the following:

- Professional and business services (including, but not limited to audit, legal, consultancy, tax advisory, media and public relations, project management, architecture and engineering)
- Holding company activities
- Special-purpose company
- Single-family office
- Ship brokering and agency services
- Trust and trust services

Tax incentives. Taxpayers may seek approval for an exemption or preferential tax rate for projects based on criteria related to the nature of a project or its location. The Ministry of Finance may grant exemptions for up to five years. The Council of Ministers may approve exemptions for longer periods or approve a preferential tax rate.

Taxpayers enjoying tax exemptions are required to submit their annual corporate tax return showing the amount of income that would have been taxable without the exemption, and the amount of tax exempted. Failure by a tax-exempt entity to file exemption documents together with the tax return results in a penalty of QAR10,000.

The income of businesses operating at the Qatar Science and Technology Park (QSTP) is exempt from tax. However, such businesses must file annual tax returns, together with audited financial statements, with the GTA. QSTP-registered entities must also withhold tax if applicable.

Activities that may be carried out at the QSTP include the following:

- Research and development of new products
- Technology development and development of new processes
- Low-volume, high-value-added specialist manufacturing
- Technology-related consulting services, technology training and promotion of academic developments in the technology fields
- Incubating new businesses with advanced learning

To support financing and investment activities carried on by QFC entities, the QFC tax regulations provide for the establishment of tax-exempt vehicles. A QFC entity that is one of the following exempt vehicles may elect for special tax-exempt status, subject to meeting certain conditions:

- Registered Fund (QFC Scheme or a Private Placement Scheme)
- Special Investment Fund (permitted activities are private equity investments, venture capital investments, investments in property and investments on behalf of a single family)

- Special Funding Company (includes holding company and special-purpose company)
- Alternative Risk Vehicle

QFC firms whose shares are listed on the Qatar Stock Exchange may elect for a special tax exemption, subject to meeting certain conditions.

QFC firms that are engaged in captive insurance or reinsurance business, and of which at least 90% of their ordinary capital, profit and asset entitlement is beneficially, directly or indirectly owned by Qatari nationals (and are licensed to engage in unregulated activities), and investment managers meeting certain conditions may elect a 0% concessionary tax rate for their chargeable profits.

In addition, a newly registered and incorporated QFC company may be able to claim reimbursement in the form of a tax credit with respect to tax losses incurred in the first two accounting periods, subject to meeting all criteria. If a QFC company receives a reimbursement of tax losses, it is automatically precluded for the following three accounting periods from electing the special exemption status or the concessionary 0% tax rate.

Law No. 24 of 2018, as amended, provides a tax exemption for non-Qatari investors holding shares of companies or units in investment funds listed on the Qatar Stock Exchange (non-QFC entities). This exemption also extends to profits realized on the sale, transfer or exchange of listed shares or investment fund units.

Capital gains. Capital gains are aggregated with other income and are subject to tax at the regular corporate income tax rate. The sale by foreign nationals and nonresident GCC nationals of shares in Qatar tax resident companies is taxable at a rate of 10%. However, gains from the sale of shares (and the share of profits) in listed companies is exempt from tax.

Gains resulting from the revaluation of assets that are used as in-kind contributions to the capital of another resident stockholding company are exempt, provided that the shares of that company are not sold within five years.

Capital gains derived by a QFC taxpayer may be exempt from tax in the QFC if they are considered non-local source or meet the conditions of the QFC participation exemption regime.

Administration. A taxpayer must register with the GTA via the GTA tax administration portal, Dhareeba, and obtain a Tax Card and Tax Identification Number within 60 days after commencing a taxable activity in Qatar after obtaining a license from the Ministry of Economy and Commerce, whichever is earlier. Failure to register for tax results in a penalty of QAR20,000.

The tax year runs from 1 January to 31 December, and a taxpayer must use this accounting period unless approval is obtained from the GTA for the use of a different tax year. Approval to use an alternative accounting period is granted in exceptional cases only.

In general, all companies, including tax-exempt companies (see *Tax incentives*), must file corporate income tax declarations,

denominated in Qatari riyals, within four months after the end of the accounting period. The due date may be extended at the discretion of the GTA, but the length of the extension may not exceed four months.

Tax is payable on the due date for filing the tax declaration. The due date for payment of taxes may be extended if the filing date is extended and if the taxpayer provides reasons acceptable to the GTA. Alternatively, the GTA may allow taxes to be paid in installments during the extension period. Tax is payable in Qatari riyals.

Penalties for late filing are levied at a rate of QAR500 per day, subject to a maximum of QAR180,000. The penalty for late payment equals 2% of the tax due for each month or part of a month for which the payment is late, up to the amount of the tax due.

The GTA may issue tax assessments on a presumptive basis or adjust certain related-party transactions in certain circumstances. The tax law provides for a structured appeals process with respect to such tax assessments. Correspondence for all appeals must be in Arabic. The appeals procedure consists of the following three stages:
- Objection correspondence and negotiations with the GTA
- Formal appeal to an Appeal Committee
- The commencement of a case in judicial courts

The GTA may inspect a taxpayer's books and records, which should be maintained in Qatar. The books and records are not required to be maintained in Arabic. The accounting books and records must be maintained for 10 years following the year to which the books, registers and documents are related.

Tax return submissions and communications from the GTA to the taxpayer with respect to inquiries, assessments and appeals are communicated via the Dhareeba online portal.

For QFC entities, including tax-exempt entities, an annual income tax declaration must be submitted and the corresponding tax due must be paid within six months after the end of the accounting period.

Financial sanctions for the late submission of the annual QFC tax declaration are levied based on when the delayed filing is submitted. In addition, a delay payment charge on unpaid tax, which is currently 5% per year, is imposed. An additional financial penalty up to the amount of assessed tax due may be levied by the QFC Tax Department.

Withholding taxes. Payments with respect to royalties, interest, commission and services conducted wholly or partially in Qatar made to nonresident entities for activities not connected with a permanent establishment (PE) in Qatar (essentially, those without a Tax Card issued by the GTA) are subject to a 5% withholding tax. Services are deemed to be conducted in Qatar to the extent that they are used, consumed or exploited in Qatar, even if rendered wholly or partially outside Qatar.

Companies or PEs in Qatar that make the above payments must deduct tax at source and remit it to the GTA by the 15th day of the month following the month in which the payment is made.

The penalty for a failure to deduct withholding tax equals 100% of the withholding tax amount. Penalties for late remittance to the GTA of the amount withheld are levied at a rate of 2% per month, up to a maximum of 100% of the withholding tax due.

There is currently no withholding tax regime in the QFC. QFC taxpayers are not required to withhold tax.

Dividends. Dividends paid by a Qatar tax resident company are not subject to withholding tax. Income distributed from profits that have already been subject to Qatar taxation are not subject to further taxation in the hands of the recipient. Dividends paid by an entity that has a tax exemption are exempt from tax.

Dividends paid to a QFC taxpayer are not subject to tax in the QFC.

Foreign tax relief. A deduction is allowed for income taxes incurred by the taxpayer abroad if the revenues related to the foreign taxes are taxable in Qatar, subject to other deductibility requirements. In addition, foreign tax relief is available under the tax treaties with the countries listed in Section E.

In the QFC, tax resident taxpayers may credit foreign taxes imposed on income that is also taxed in the QFC either through a double tax treaty or unilateral relief, or they may elect to treat such taxes as deductible expenses.

C. Determination of trading income

General. The following are some of the items that are included in taxable income:

- Revenues earned from an activity performed in Qatar, including trading, contracting and the provision of services
- Revenues earned from the partial or total performance of a contract in Qatar
- Service fee income received by head offices, branches or related companies
- Certain dividend income and capital gains on real estate located in Qatar
- Interest on loans obtained in Qatar
- Income derived by a Qatari project (a project managed by a resident in Qatar) that participates directly or indirectly in management or capital of a foreign project or vice versa when the transactions are not at arm's length
- Income derived by a Qatari project from immovable properties situated outside Qatar, including gain on the sale of such properties
- Share in income of a Qatari project from profits of a company abroad, including interest and royalties earned abroad, subject to certain conditions
- Technical fees arising from abroad and received by a Qatari project, subject to certain conditions
- Income of a Qatari project from real estate abroad, including income arising from direct use or rental of immovable property or the use thereof in any form if not attributable to a foreign PE of the Qatari project

In addition, the following income earned abroad is also subject to tax in Qatar:

- Income from rights to distribute products or services

- Payments for marketing, procurement, financial mediation, agency and other mediation services
- Fees for receiving warranties or similar financial support
- Provision of telecommunication and broadcast services

Normal business expenses are allowable and must be determined under the accrual method of accounting. Branches are limited in the deduction of head office expenses (see *Head office overhead*). Self-employed individuals engaged in a professional activity may choose to deduct a notional expense equal to 30% of their total income instead of all of the expenses and costs that are allowed to be deducted. Expenses for entertainment, hospitality, meals, holidays, club subscriptions and client gifts are subject to restrictions. Guidance contained in the Executive Regulations specifies that these expenses are subject to an allowable ceiling of 2% of net income, up to a maximum of QAR500,000.

Inventories. Inventories must be valued using international accounting standards.

Provisions. General provisions, such as bad debts and inventory obsolescence, are generally not allowed. Specific bad debts that are written off are deductible to the extent that they satisfy conditions set by the GTA. Deductions by banks for loan-loss provisions are the subject of periodic instructions from the Qatar Central Bank and, in general, provisions are allowable up to a ceiling of 10% of net profits.

Head office overhead. In general, charges of a general or administrative nature imposed by a head office on its Qatar branch are allowed as deductions, provided that they are incurred for the purposes of the business of the Qatar branch. However, no such deduction is allowed with respect to amounts paid by the Qatar branch to the head office or any of its other offices with respect to the following:

- By way of royalties, fees or other similar payments in return for the use of patents or other rights
- By way of commission for specific services performed or for management
- Except in the case of a banking project, by way of interest on money loaned to the Qatar branch

Tax depreciation. Under the Executive Regulations relating to the Qatar Income Tax Law, assets should be depreciated on a straight-line basis using the following annual depreciation rates:

Asset	Rate (%)
Buildings and facilities	
Buildings and durable facilities	5
Prefabricated light buildings	10
Roads, bridges, railways, and electrified railways	5
Pipelines, tanks and platforms	5
Pipelines and refining equipment within the refinery and small tanks	10
Networks and channels	5
Transportation	
Cargo and passenger means of transportation, including cars, vehicles, tractors, trailers, cranes and motorcycles	20

Asset	Rate (%)
Ships and boats	10
Airplanes and helicopters	20
Rail transport and electrical rail transport	10
Intangible assets	
Pre-establishment expenses	50
Trademarks, patents and similar items	15
Capitalized research and development expenses	20
Machinery and equipment	
Computer hardware, software and accessories	33.33
Machinery, equipment and electrical appliances	20
Industrial machinery and equipment	20
Machinery and public works and construction equipment	20
Drilling tools	15
Air conditioners	25
Passenger and cargo elevators and escalators	15
Furniture and office equipment	15
Gas fixture, transportation and distribution equipment	5
Electricity and water production, transmission and distribution equipment	5
Machinery, equipment and other fixtures	15
Hotels, hostels, resorts, restaurants and cafes	
Cooking and washing machines	20
Glass utensils	50
Other utensils	25
Furniture, furnishings and décor works	25
Swimming pools and accessories thereof	15

Approval of the Minister of Finance is required for departure from the tax depreciation rates noted above. Departures from these rates are normally allowed only for new startup projects if the project owner requests permission to adopt different depreciation rates based on the presentation of appropriate justifications to the Minister. Companies engaged in petrochemical industries and petroleum operations may have alternative depreciation rates specified in their respective production-sharing contract or development and fiscal agreement.

The Executive Regulations limit the deductibility of depreciation to the amount reflected in the financial statements.

In the QFC, tax depreciation should be in line with the depreciation in the financial accounts, subject to additional requirements of the QFC tax regulations.

Relief for losses. Losses may be carried forward for five years. The carryback of losses is not allowed.

In the QFC, losses may be carried forward indefinitely, and the carryback of losses is not allowed.

Groups of companies. No tax regulations cover groups of companies in the Qatar Income Tax Law.

In the QFC, companies that are members of the same group may apply for a group relief (offset of taxable profits and losses).

D. Other significant taxes

Qatar has signed and ratified the GCC Value-Added Tax (VAT) Framework Agreement. However, VAT has not yet been implemented.

When implemented, the standard rate of VAT in Qatar is expected to be 5%.

Qatar has also signed and ratified the GCC Common Excise Tax Agreement and has introduced excise tax on tobacco and tobacco derivatives, carbonated drinks, energy drinks, and special-purpose goods as of 1 January 2019.

E. Miscellaneous matters

Qatar Free Zones. The Qatar Free Zone Authority (QFZA) was created in 2018 as an independent authority to regulate and develop the Qatar Free Zones (QFZs). The QFZs are situated in geographically strategic areas to provide investors with direct access to Qatar's airports and seaports and connect them with global markets. Foreign investors may establish a wholly owned company or branch in these QFZs. In addition, entities licensed in the QFZs are entitled to a 20-year income tax exemption from the establishment of the QFZA and customs exemption on goods imported into them, renewable for similar or more periods.

Foreign-exchange controls. Qatar does not impose foreign-exchange controls. Equity capital, loan capital, interest, dividends, branch profits, royalties and management fees are freely remittable.

Transfer pricing and anti-avoidance legislation. The Qatar Income Tax Law contains anti-avoidance provisions. The GTA may nullify or alter the tax consequences of any transaction that it has reasonable cause to believe was entered into to avoid or reduce a tax liability.

If a company carries out a transaction with a related party that was intended to reduce the company's taxable income, the income arising from the transaction is deemed to be the income that would have arisen had the parties been dealing at arm's length.

There is no distinction between domestic and international transactions under the current transfer-pricing regulations. Therefore, it is expected that all related-party transactions should comply with the law and regulations, which are based on the arm's-length standard.

Under Qatar's tax regime, in determining the arm's-length value, the GTA requires the use of the comparable uncontrolled price (CUP) method. Under this method, the price of the service or goods is deemed to be the price that would have been applied if the transaction had been between unrelated parties. If the information required to apply the CUP method is not available, an application to apply a different transfer-pricing method approved by the OECD must be submitted to the GTA. Transfer-pricing documentation prepared in English is currently accepted by the GTA. However, in practice, and in the event of a preapproval application to use an OECD method other than the CUP method, a summary memorandum should be prepared in Arabic and submitted to the GTA for its approval.

Transfer-pricing documentation prepared in English is currently accepted by the GTA. However, in practice, and in the event of a pre-approval application to use an OECD method other than the CUP method, a summary memorandum should be prepared in Arabic and submitted to the GTA for its approval.

Under the QFC tax regime, transfer pricing may be determined using any of the OECD accepted transfer-pricing methods, and there is no requirement to seek pre-approval to use the OECD recognized method other than the CUP method.

A group Master File and Qatar Local File should be submitted via the GTA's Dhareeba portal if one of the group's entities is resident outside Qatar and if the local entity or permanent establishment's annual revenue or total assets meets or exceeds the statutory threshold of QAR50 million in the reporting year.

In addition to the transfer-pricing documentation, there is an additional transfer-pricing compliance requirement in Qatar. A transfer-pricing statement (together with the annual tax declaration) should be completed and submitted by the Qatar entity via the GTA's Dhareeba portal if the local entity or permanent establishment's annual revenue or total assets meets or exceeds the statutory threshold of QAR10 million in the reporting year.

In June 2022, the GTA confirmed that the transfer-pricing documentation filing deadline is 60 days from the tax return filing due date. For taxpayers with a 31 December financial year-end, the Master and Local File transfer-pricing reports should be filed by 30 June of the following year. Late filing penalties apply at a rate of QAR500 per day capped at QAR180,000.

There is currently no formal advance pricing agreement (APA) regime in Qatar. However, APA regulations are expected to be issued by the local tax authority soon.

Under the QFC tax regime, a taxpayer's presentation to the QFC Tax Department of a Qatar local file or a local transfer-pricing documentation report (including functional analysis and benchmarking study) is generally required in the event of a tax or transfer-pricing inquiry.

Country-by-Country Reporting. On 14 November 2017, Qatar joined the Inclusive Framework (IF) for the global implementation of the Base Erosion and Profit Shifting (BEPS) Project. As a BEPS Associate, Qatar is committed to implementing four minimum standards under the BEPS Project, one of which is Action 13 on transfer-pricing documentation.

On 19 December 2017, Qatar signed the Multilateral Competent Authority Agreement on the Exchange of Country-by-Country (CbC) Reports. The signing of this agreement enables Qatar to efficiently establish a wide network of exchange relationships for the automatic exchange of CbC Reports. As of the end of 2020, Qatar has activated its (non-reciprocal) exchange relationship with approximately 60 countries.

As part of the proposed implementation of Action 13 of the BEPS Project, Qatar published Ministerial Decision No. 16 of 2019, which outlines CbC Reporting requirements in Qatar that are applicable for tax years beginning on or after 1 January 2018.

The CbC Reporting rules are aligned with the model legislation set out in the OECD's BEPS Action 13 Final Report on CbC Reporting. These requirements also apply to entities that are registered in the QFC.

An ultimate parent entity that is tax resident in Qatar is required to submit a CbC Reporting notification and file a CbC Report in Qatar if it is a member of a multinational enterprise group that had consolidated group revenue of at least QAR3 billion in the preceding fiscal year. The annual CbC Reporting notification must be submitted by the end of the reporting tax year. CbC Reports should be filed with Qatar's Tabadol Portal within 12 months after the end of the reporting tax year.

Noncompliance with CbC Reporting notification is subject to a penalty of QAR100 per day for delay of filing or submission of false or incorrect information in the notification. Failure to comply with the CbC Reporting requirements is subject to a penalty of QAR500 per day for delay of filing or submission of false or incorrect information in the report.

Currently, Qatar's CbC Reporting requirements do not apply to entities of a foreign company that operates in Qatar in the form of a subsidiary or a PE.

Thin-capitalization rules. The Executive Regulations indicate that for tax residents, the amount of an intercompany loan should not exceed the debt-equity ratio of 3:1 for interest deductibility purposes.

Interest paid by a PE to its head office or a related entity is not deductible.

However, under the QFC tax regime, the following are safe harbor debt-to-equity ratios:
- 2:1 for nonfinancial institutions
- 4:1 for financial institutions

Although the above ratios are non-statutory and are non-binding on taxpayers and the QFC Tax Department, they are expected to be accepted as default thresholds by the QFC Tax Department. The safe-harbor guidance applies for accounting periods beginning on or after 1 January 2012. A higher debt-to-equity ratio may be accepted by the QFC Tax Department.

Supply and installation contracts. Profits from "supply only" operations in Qatar are exempt from tax because the supplier trades "with" but not "in" Qatar. If a contract includes work elements that are performed partially outside Qatar and partially in Qatar, and if these activities are clearly separated in the contract, only the revenues from the activity performed in Qatar are taxable in Qatar.

Contract retention. All ministries, government departments, public and semipublic establishments and other payers must retain the final contract payment or 3% of the contract value (after deducting the value of supplies and work done abroad), whichever is greater, due to foreign branches that have a commercial registration linked to a specific project with a duration of at least one year. The contract retention payable to the contractor or subcontractor must be retained until the contractor or subcontractor

presents a tax clearance from the GTA confirming that all tax liabilities have been settled.

Contract retention does not apply to QFC taxpayers.

Contract reporting. Ministries and other government bodies, public corporations and establishments, and companies are required to report to the GTA on contracts concluded with nonresidents without a PE in Qatar, regardless of their value. In addition, contracts concluded with residents or with nonresidents that have a PE in Qatar must also be reported to the GTA if the contract value amounts to QAR200,000 for service contracts, or to QAR500,000 for contracting, supply, and supply and service contracts. Copies of the contracts must also be submitted together with the statement, except for contracts concluded with nonresidents with no PE in Qatar that have a contract value not exceeding QAR100,000. A failure to comply results in a penalty of QAR10,000 per contract.

Contract reporting does not apply to QFC taxpayers.

Multilateral Instrument. On 4 December 2018, Qatar signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS (Multilateral Instrument, or MLI). The MLI seeks to facilitate the efficient updating of existing tax treaties to incorporate treaty-related measures recommended by the OECD to counter base erosion and profit shifting, without the need for jurisdictions to bilaterally renegotiate each tax treaty.

Qatar deposited its instrument of ratification for the MLI with the OECD on 23 December 2019. The MLI entered into force on 1 April 2020.

At the point of the MLI ratification, Qatar indicated that it wants to amend its double tax treaties with 76 countries by using the MLI.

Minimum tax rate to align with BEPS 2.0 Pillar Two. On 22 December 2022, Qatar issued Law No. 11 of 2022 to amend some of the provisions of the ITL. The legislation amending the ITL was published in the *Official Gazette* on 2 February 2023. Article 34 of the ITL amending legislation notes that regulations will be issued that will include provisions necessary to address the requirements arising from the digitization of the economy and will set a minimum tax for entities located in Qatar on the basis of their excess profits determined in a manner equivalent to the global rules for combating the erosion of the tax base, provided that it is not less than 15%. The regulations on how Qatar will implement the Global Anti-Base Erosion Rules (Income Inclusion Rule [IIR] only or both IIR and the Undertaxed Payment Rule) and/or a Qualifying Domestic Minimum Top-up Tax is expected to follow in the future. Currently, no official date exists for when the further detailed regulations will be released.

Common Reporting Standard. Qatar is one of the jurisdictions that has committed to implement the Common Reporting Standard (CRS). The CRS is a standard developed by the OECD relating to automatic exchange of financial account information and requires jurisdictions to obtain information from their financial institutions and automatically exchange that information with other jurisdictions on an annual basis. On 10 November 2017,

Qatar signed the CRS Multilateral Competent Authority Agreement (CRS MCAA). The signing of the CRS MCAA enables Qatar to efficiently establish a wide network of exchange relationships for the automatic exchange of information under CRS.

The effective date for the CRS in Qatar was 1 July 2017. Reporting Financial Institutions (such as banks, funds, brokers, custodians and insurance companies offering cash value or annuity products) must have processes and procedures in place to meet their compliance requirements.

Individuals and entities that are not Reporting Financial Institutions should be prepared to provide relevant documentation to Reporting Financial Institutions to support their tax residency status.

The annual reporting deadline is 31 July following the year to which the data relates (subject to change by the GTA).

Economic substance rules. On 17 October 2021, Qatar introduced economic substance rules via the Resolution of the Minister of Finance No. 20 of 2021 for companies that are engaged in relevant activities and intellectual property activities and that benefit from a Preferential Tax System (Qualified Entities). The rules will enter into force on 31 December 2023.

The Preferential Tax System is defined as any system that provides a preferential tax benefit that is not available under the general tax system of the state, regardless of its form, nature of benefit or its amount. Therefore, entities established under the QSTP, the Qatar Free Zone and the QFC (together referred to as Licensed Authorities) that are benefitting from the Preferential Tax System would be covered under these regulations.

The following are the relevant activities under the regulations:
- Head office
- Center for distribution and other services
- Finance acquisition of assets and leasing of assets
- Treasury funds management
- Banking
- Insurance
- Shipping
- Holding companies
- Technical consulting
- Technical training

To continue benefiting from the Preferential Tax System, Qualified Entities should meet certain requirements, such as conducting of a core income-generating activity in Qatar, having adequate number of full-time employees in Qatar, incurring an adequate amount of operational expenses to carry out activities and meeting the other requirements set by the Licensed Authorities.

The Resolution does not provide for reporting compliance requirements but requires Qualified Entities to maintain certain information to be provided to the Licensed Authorities and competent authorities on request.

Law No. 11 of 2022 introduces a penalty of 15% of net income when the "substance" tests are not met.

Ultimate beneficial ownership. Qatar introduced new requirements to report ultimate beneficial owners in line with other existing laws in Qatar concerning beneficial ownership reporting requirements. Further details of the reporting requirement are expected to be addressed when the amended Executive Regulations are issued.

F. Tax treaty withholding tax rates

The following table shows the withholding tax rates for dividends, interests and royalties provided under Qatar double treaties that are in force and effective as of 1 January 2023.

	Dividends			
	A	B	Interest (a)	Royalties
	%	%	%	%

A Individuals and companies
B Qualifying companies

(a) Some treaties provide for an exemption for certain types of interest, such as interest paid to public bodies and institutions. Such exemptions are not considered in this column.

(b) Income may be taxed in the residence state at the rate provided under its domestic law.

(c) Income is taxable only in the residence state at the rate provided under its domestic law.

(d) The 5% rate applies if the beneficial owner has invested capital of more than USD100,000.

(e) The 5% rate applies if the beneficial owner holds at least 25% of the capital of the company paying the dividends.
(f) Dividends, interest and royalties are taxable only in the residence state at the rates provided under its domestic law if the recipient is the beneficial owner of the income.
(g) Royalties are taxable only in the residence state at the rates provided under its domestic law if the recipient is the beneficial owner of the income.
(h) This rate applies if the beneficial owner holds at least 10% of the capital of the company paying the dividends.
(i) The 5% rate applies if the beneficial owner has owned directly or indirectly at least 25% of the capital of the company paying the dividends for a period of at least 12 months preceding the date on which the dividends are declared.
(j) Dividends, interest and royalties are taxable in the residence state at the rates provided under its domestic law.
(k) The 5% rate applies if the beneficial owner is an individual who holds directly at least 10% of the capital of the company paying the dividends and who has been a resident of the other contracting state for a period of 48 months immediately preceding the year in which the dividends are paid.
(l) The 5% rate applies if the beneficial owner is an individual or a company that holds directly at least 10% the capital of the company paying the dividends. Otherwise, a 10% rate applies.
(m) The 5% rate applies if the beneficial owner holds directly at least 10% of the capital of the company paying the dividends.
(n) The 0% rate applies if the beneficial owner is a company that has its capital wholly or partly divided into shares and that holds directly at least 7.5% of the capital of the company paying the dividends.
(o) The 10% rate applies if the individual holds at least 10% of the capital of the distributing company. Otherwise, the 15% rate applies.
(p) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the voting stock of the company paying the dividends. The 0% rate applies to dividends distributed to certain state-owned entities.
(q) The income is not taxable in either state.
(r) The income may be taxed in the source state at the rate provided under its domestic law.
(s) This rate applies if the beneficial owner is the government or a public institution that is wholly owned by the government or its political subdivisions or local authorities, of the other contracting state or a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends. Otherwise, the 10% rate applies.
(t) The income is exempt from tax if it is beneficially owned by the government of the contracting state or a political subdivision or a local authority thereof or by the central bank of the other contacting state.
(u) Dividends distributed by real estate investment trusts are subject to a 15% withholding tax, unless the beneficial owner is a pension scheme, in which case an exemption applies.
(v) The treaty provides for several alternative conditions relating to the beneficial owner or the payer of the interest for the application of the 0% rate. This rate applies if one of these conditions is met. Otherwise, the domestic rate in the source state applies.
(w) The 5% rate applies if the beneficial owner is a company that holds directly or indirectly at least 50% of the capital of the company paying the dividends or that has invested more than USD10 million or the equivalent in Qatari or Vietnamese currency in the capital of the company paying the dividends.
(x) The 5% rate applies to royalties paid for the following:
- The use of, or the right to use, patents, designs or models, plans, or secret formulas or processes
- The use of, or the right to use, industrial, commercial or scientific equipment
- Information concerning industrial, commercial or scientific experience

The 10% rate applies in other cases.
(y) The income is taxable only in the source state at the rate provided under its domestic law.
(z) The income may be taxed in the source state at the rate provided for under its domestic law.
(aa) This rate applies if the beneficial owner is a company (other than a partnership) that holds at least 10% of the capital of the company paying the dividends.
(bb) The 0% rate applies if the beneficial owner of the dividends is a company resident in the other contracting state. The 5% rate applies to all other beneficial owners of dividends resident in the other contracting state.
(cc) See Section B.

(dd) This rate applies if the beneficial owner of the dividends holds at least 10% of the capital of the company paying the dividends or if the beneficial owner is the state of Portugal, a political or administrative subdivision or a local authority thereof, or the central bank of Portugal.

(ee) The 5% rate applies if the beneficial owner of the interest is a bank. A 10% rate applies in all other cases.

(ff) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends.

(gg) The rate is 0% if the beneficial owner is a company (other than a partnership). The rate is 5% of the gross amount of the dividends or interest in all other cases.

(hh) The 5% rate applies if, for the six-month period ending on the date on which entitlement to the dividends is determined, the beneficial owner of the dividends owned at least 10% of the voting power or the total issued shares of the company paying the dividends, and if the company paying the dividends is not allowed a tax deduction for the dividends.

(ii) The 0% rate applies if the interest is derived from government debt or if the beneficial owner is one of the following:
- A government entity
- A bank
- An insurance company
- A securities dealer
- A pension fund (conditions apply)
- Any other enterprise, provided that in the three tax years preceding the tax year in which the interest is paid, the enterprise derives more than 50% of its liabilities from the issuance of bonds in the financial markets or from taking deposits for interest and more than 50% of the assets of the enterprise consist of debt-claims against persons not associated with the enterprise

(jj) The 5% rate applies if the beneficial owner holds at least 10% of the capital of the company paying the dividends. The 0% rate applies to dividends paid to the other contracting state or a local authority, political subdivision or statutory body thereof.

(kk) The 0% rate applies if the interest arises with respect to a government debt or debt listed on a recognized stock exchange.

(ll) Exemptions apply to certain specified state-owned entities.

(mm) The 0% rate applies to dividends beneficially owned by a contracting state, a political subdivision, a local authority, an investment authority, the central bank or a pension fund thereof or any other entity or institution that is recognized, by mutual agreement, as an integral part of the state and is exempt from tax in the source state.

(nn) The exemption applies if the recipient company holds directly at least the following percentage of the capital of the company paying the dividends:
- 1% if the dividends are paid by a company, the shares of which are substantially and regularly traded on a stock exchange
- 5% if the beneficial owner of the dividends is a public body
- 10% in other cases

(oo) The 0% rate applies to dividends beneficially owned by a contracting state, a political subdivision, a local authority, an investment authority, the central bank or a pension fund thereof or any other institution or fund that is recognized, by mutual agreement, as an integral part of the state, political subdivision or local authority. The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends.

(pp) The 5% rate applies to sales on credit of industrial, commercial or scientific equipment, and on loans granted by banks. The 10% rate applies in all other cases.

(qq) The 5% rate applies to payments of royalties regarding copyrights of scientific works, patents, trademarks, secret formulas, processes or information concerning industrial, commercial or scientific experience.

(rr) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. The 0% rate applies to dividends beneficially owned by a contracting state, a political subdivision, a local authority, an investment authority, the central bank or a pension fund thereof or any other institution or fund that is recognized as an integral part of that state, political subdivision or local authority, as shall be agreed by mutual agreement of the competent authorities of the contracting states.

(ss) This treaty is effective from 1 January 2022.

(tt) The 5% rate applies if the beneficial owner is the "government," as defined below, of a contracting state. The 10% rate applies if the beneficial owner is a company that holds at least 25% of the capital of the distributing company. Otherwise, the 15% rate applies.
For the purposes of Article 10 "Dividends", Article 11 "Interest" and Article 13 "Capital gains" of the double tax treaty, the term "government" means the following:
- Political subdivision
- Local authorities
- Central bank
- Any other institution resident in that contracting state performing financial functions of a governmental nature and the capital of which is wholly owned directly or indirectly by that contracting state

In the case of Qatar, the institutions referred to above are the following:
- Qatar Investment Authority
- Qatar Holding
- Qatar Development Bank
- Qatar Energy (formerly known as Qatar Petroleum)
- Qatar Retirement Funds

(uu) The 0% rate applies if the beneficial owner is the "government" of the other contracting state. The term "government" has the same meaning as defined in footnote (tt) above.

(vv) This treaty is effective from 1 January 2023.

(ww) The 0% rate applies if the beneficial owner is a company that holds at least 20% of the capital of the company paying the dividends or if the beneficial owner is a Qatar national, a pension fund, Qatar or a company held directly or indirectly by Qatar.

(xx) The 5% rate applies if one of the following conditions apply:
- The beneficial owner is a company that holds directly at least 15% of the capital of the company paying the dividends throughout a 365-day period that includes the day of the payment of the dividend.
- The beneficial owner is Qatar or any of its political subdivisions or local authorities, or any of their statutory bodies, agencies or instrumentalities or its central bank.
- The beneficial owner is one of the following entities that is wholly owned, directly or indirectly, by Qatar, its political subdivisions or local authorities: Qatar Investment Authority, Qatar Holding LLC, Qatar civil retirement fund, Qatar military retirement fund, Qatar Development Bank, Qatar Ports Management Company (Mwani Qatar), Qatar Petroleum or Qatar Petroleum International Limited.

(yy) The 0% rate applies if one of the following conditions is met:
- The beneficial owner is Qatar or any of its political subdivisions or local authorities, or any of their statutory bodies, agencies or instrumentalities or its central bank
- The beneficial owners is one of the following entities that is wholly owned, directly or indirectly, by Qatar, its political subdivisions or local authorities: Qatar Investment Authority, Qatar Holding LLC, Qatar civil retirement fund, Qatar military retirement fund, Qatar Development Bank, Qatar Ports Management Company (Mwani Qatar), Qatar Petroleum or Qatar Petroleum International Limited.

Qatar has ratified tax treaties with Belgium, Eritrea, Fiji, Gambia, Mauritania, Nigeria and Paraguay. The entry into force dates of these treaties is unknown at this stage.

Qatar is in the process of negotiating, signing and ratifying tax treaties with Benin, Bangladesh, Congo, Côte d'Ivoire, Egypt, Ethiopia, Estonia, Eswatini, Gabon, Ghana, Germany, Iceland, Libya, Lithuania, Montenegro, Peru, Somalia, Tajikistan, Thailand, Turkmenistan and Uzbekistan.

Qatar is renegotiating its tax treaties with India, Morocco and Pakistan.

A. At a glance

Corporate Income Tax Rate (%)	16 (a)
Capital Gains Tax Rate (%)	16 (a)
Branch Tax Rate (%)	16 (a)
Withholding Tax (%) (b)	
Dividends	8 (c)
Interest	16 (d)(e)(f)(g)
Royalties	16 (d)(f)(g)
Commissions	16 (d)(g)
Certain Services Rendered Abroad	16 (d)(g)(h)
Services Rendered in Romania	16 (d)(g)
Gambling	3 (i)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (j)

(a) See Section B.

(b) These withholding tax rates are standard and final. They can be reduced under double tax treaties or European Union (EU) directives.

(c) This tax may be reduced to nil for dividends paid to a legal entity residing in another EU Member State or to a permanent establishment of an entity residing in an EU Member State, if certain conditions relating to the dividend recipient and dividend payer are satisfied. These conditions are described in *Dividends* in Section B. Dividends paid by Romanian legal entities to pension funds, as defined by the law of an EU Member State or of one of the European Economic Area (EEA) countries, as long as there is an exchange of information instrument in place, are exempt from withholding tax in Romania.

(d) This withholding tax applies only if the income is not attributable to a permanent establishment in Romania.

(e) The following types of interest derived by nonresidents are not subject to withholding tax:
- Interest from public debt instruments in national and foreign currency
- Interest related to instruments issued by the National Bank of Romania to carry out monetary policy
- Interest paid by Romanian legal entities to pension funds, as defined by the law of an EU Member State or of one of the EEA countries, as long as there is an exchange of information instrument in place
- Interest paid on instruments issued by Romanian legal entities based on a prospectus approved by the competent regulatory authority, provided that the interest is not paid to related parties

(f) The withholding tax rate is 0% for interest and royalties if certain conditions are satisfied, including the following principal conditions:
- The beneficial owner of the interest or royalties is a legal person resident in an EU Member State or a permanent establishment of an entity resident in such a state.
- The beneficial owner of the interest or royalties holds at least 25% of the value or number of participation titles in the Romanian entity for an uninterrupted period of at least two years that ends on the date of payment of the interest or royalties.

(g) The rate is 10% for income derived by nonresident individuals who are resident in another EU Member State or in a country that has entered into a double tax treaty with Romania.

(h) This withholding tax applies only to management and consultancy services rendered abroad. International transport and supplies of services ancillary to such transport are not subject to withholding tax.

(i) Income from gambling derived by individuals is taxed at source. The tax due is determined on each payment by applying the following scale of taxation to each gross income received by a participant from an organizer or payer of gambling income:
- 3% for income up to and including RON10,000
- RON300 + 20% of the amount exceeding RON10,000 if the gross income is between RON10,000 and RON66,750
- RON11,650 + 40% of the amount exceeding RON66,750 if the gross income is over RON66,750

(j) Annual tax losses are not adjusted for inflation. The annual tax loss realized starting with 2024 or the amended tax year starting in 2024, is recovered at a rate of 70% of taxable profits obtained in the next five consecutive years. Annual tax losses related to the years prior to 2024, remaining to be recovered on 31 December 2023, will be recovered within a limit of 70% of the related taxable profits, during the remaining period of recovery from the seven consecutive years following the year of recording the respective losses.

B. Taxes on corporate income and gains

Corporate income tax. Resident entities are subject to tax on their worldwide income. An entity is resident in Romania if it satisfies any of the following conditions:
- It is incorporated in Romania.
- Its place of effective management and control is located in Romania.
- It is a legal entity that has its headquarters in Romania and that is incorporated in accordance with the European legislation.

Associations or consortia, which are not considered separate legal persons in Romania, are tax transparent. Different tax rules apply depending on the members of the associations or consortia (for example, whether the members are Romanian, nonresident, individuals or companies).

Nonresident companies that do not have an effective place of management in Romania are subject to tax on their Romanian-source income only, including capital gains derived from specified transactions (see *Capital gains*).

Rates of corporate income tax. The standard rate of income tax for Romanian companies is 16%, regardless of whether the companies have foreign participation. Income derived by companies from night bars, nightclubs, discos and casinos directly or in association is also normally taxable at a rate of 16%, but the amount of the tax payable may not be less than 5% of the gross income derived from such activities.

Nonresident companies that do not have their place of effective management in Romania are taxed in Romania at the standard rate of 16% on earnings derived from their operations in Romania through branches, permanent establishments or certain consortia.

A permanent establishment of a foreign company in Romania may be constituted in certain forms, including the following:

- A place of management
- An office
- A branch
- A factory
- A mine, an oil or gas well, a quarry, or any other place of extraction of natural resources
- A building site that exists for a period exceeding six months
- The place in which an activity continues to be carried out with the assets and liabilities of a Romanian legal person subject to a cross-border reorganization

Foreign companies are also normally taxable in Romania at the standard corporate income tax rate on profits derived in Romania from real estate located in Romania and the exploitation of natural resources, as well as on certain capital gains (see *Capital gains*).

Representative offices are subject to an annual tax equal to RON18,000 (approximately EUR4,000).

Minimum Tax on turnover. Starting 1 January 2024, a minimum tax on turnover (MTT) is introduced for taxpayers (other than credit institutions and legal persons carrying out activities in oil and gas sectors for which special rules are applied, as detailed below) that record a turnover higher than EUR50 million during the previous year.

Specifically, taxpayers that, for the reporting year, compute a corporate income tax cumulated from the beginning of the fiscal year or modified fiscal year to the end of the quarter/year of calculation, lower than the MTT established according to the formula below, are obliged to pay the corporate income tax at the level of the MTT.

The MTT is computed according to this formula:

$$MTT = 1\% \text{ of } (VT - Vs - I - A)$$

The letters in the formula represent the following:

- VT: the total revenues, calculated cumulatively from the beginning of the fiscal year/modified fiscal year to the end of the quarter/year of calculation.
- Vs: the amounts to be deducted, calculated cumulatively from the beginning of the fiscal year or modified fiscal year to the end of the quarter/year of calculation, and include the following:
  - Nontaxable revenues provided at Articles 23 and 24 from the Fiscal Code
  - Revenues related to the cost of stock of products
  - Revenues related to the cost of services in execution
  - Revenues from the production of tangible and intangible assets
  - Revenues from subsidies
  - Revenues from compensation from insurance/reinsurance companies, for damages caused to goods representing stocks or own tangible assets
  - Revenues from excise duties that have been simultaneously reflected as expenses

- I: the value of acquisition or production of assets in progress performed during the trimester/year of calculation, starting with the 2024 fiscal year or the modified fiscal year beginning in 2024.
- A: the accounting depreciation of assets purchased or produced starting 1 January 2024/first day of modified fiscal year beginning in 2024. It does not include the accounting depreciation of assets incorporated in the value of indicator I.

Taxpayers performing sponsorships and/or patronage actions can deduct the related expenses from the minimum tax due. This tax credit is capped at the minimum of the following:
- 0.75% of the company's turnover
- 20% of the company's corporate income tax.

However, if the MTT is due, the amounts representing corporate income tax exempt or reduced or other amounts that are deducted from the corporate income tax according to special laws, cannot be deducted, and neither can the reduction of corporate income tax due to equity maintenance/increase criteria according to Government Emergency Ordinance (GEO) nr. 153/2020.

Economic operators exclusively carrying out activities of distribution, supply and transportation of electricity or natural gas and that are regulated/licensed by the National Energy Regulatory Authority (ANRE) are specifically exempt by the MTT.

Additional tax for credit institutions and companies operating in the oil and gas industry. Special regulations are applied to credit institutions and legal entities operating in the oil and gas sectors, as an exemption from the MTT, as described below.

Starting 1 January 2024, an additional tax is established for credit institutions, including Romanian legal entities and Romanian branches of credit institutions and foreign legal entities. Credit institutions owe, in addition to the corporate income tax, an MTT computed by applying the following rates on the turnover (which is specifically defined):
- 2% for the period of 1 January 2024 to 31 December 2025 inclusively
- 1% starting with 1 January 2026

Starting 1 January 2024, an additional tax is established for companies operating in the oil and gas sectors and that recorded during the previous year a turnover higher than EUR50 million.

Additional to the corporate income tax, the specific tax on turnover is computed according to the formula:

$$ICAS = 0.5\%*(VT - Vs - I - A)$$

Microenterprises. Romanian legal persons fulfilling certain conditions may opt to pay microenterprise tax, which is calculated by applying a 1% or 3% tax rate to the taxable revenues with exemptions for certain revenues.

Starting 1 January 2023, the conditions for a Romanian legal entity to qualify as a microenterprise taxpayer are the following:
- It derives revenue lower than EUR500,000.

- It derives revenue other than consultancy and/or management revenues (except tax consultancy) that is more than 80% of total revenue.
- It has at least one employee (full-time or part-time if the fractions of the norm provided in the part-time agreements, added up, represent the equivalent of a full norm).
- It has shareholders that own more than 25% of the value or number of shares or voting rights, and these shareholders do not have this level of ownership in any other Romanian legal entity that is also taxed under the microenterprise income tax regime.
- It has submitted the financial statements in due time, if required under the law.
- Its share capital is owned by persons other than the state and administrative-territorial units.
- It is not in dissolution, followed by liquidation, registered in the commercial register or in the courts, according to the law.

The microenterprise regime is optional. An entity that opted to be a microenterprise taxpayer must switch to the corporate income tax regime during a tax year if one of the first two conditions mentioned above are met.

The microenterprise regime is optional starting 1 January 2023; it will no longer be automatically applied at the setup of a Romanian legal entity. An entity must switch to the corporate income tax regime during a tax year if one of the first two conditions mentioned above are met.

A tax loss incurred by the taxpayer in the period in which the microenterprise income tax is applied is not taken into account (the taxpayer's tax result is not calculated).

Tax losses incurred by legal persons before applying the microenterprise tax regime can be carried forward until the legal entity applies the corporate income tax regime again, but only within the standard five-year period stated by the law.

Tax incentives. Romania offers certain tax incentives, which are summarized below.

Corporate income tax. The Tax Code contains measures allowing companies to claim accelerated depreciation in certain circumstances.

The Tax Code allows "sponsorship" expenses to be claimed as a credit against corporate income tax due, subject to certain limitations. Under the Sponsorship Law, "sponsorship" is defined as "the juridical deed by which two persons agree upon the transfer of the ownership right upon certain material goods or financial means, in order to support the activity without lucrative scope, carried out by one of them." The tax credit for sponsorship expenses is limited to the lower of the following:
- 0.75% of the company's turnover
- 20% of the corporate income tax due

Sponsorship expenses incurred up to 31 December 2021 that were not used for obtaining a tax credit can be carried forward for seven consecutive years.

Starting with 1 January 2022, it is not possible anymore to carry forward sponsorship expenses incurred for which the tax

credit could not be claimed. Instead, it is possible to redirect the corporate income tax up to the unused sponsorship tax credit limit, by the date of submission of the annual corporate income tax return.

Reinvested profit. The profit invested in the production and/or acquisition of certain technological equipment, assets used in production or processing, assets representing refurbishment, computers and peripherals, tax registers, control and billing machines, as well as software and the right to use software, is exempt from tax. The reinvested profit represents the balance in the profit-and-loss account, which is the difference between the total income and total expenses booked in the trial balance of the company from the beginning of the year in which such assets are commissioned. The assets must be retained for at least half of their useful economic life, but no longer than five years, with certain exceptions (for example, cases in which the assets are destroyed, lost or stolen). In addition, the accelerated depreciated method cannot be used for the respective assets.

Innovation and research and development, as well as ancillary activities. Effective from 1 January 2017, a new exemption from corporate income tax was introduced. It applies for the first 10 years of activities to taxpayers that exclusively undertake innovation and research and development (R&D), as well as ancillary activities. Application norms for this incentive are still to be issued by the Romanian authorities.

R&D costs super-deduction. An additional allowance granted for R&D activities equals 50% of eligible costs under certain conditions. Also, accelerated depreciation can be applied for the equipment and machinery used in the R&D activities. To be eligible for this incentive, the R&D activities must qualify as applicative research and/or experimental development.

The procedure for applying the R&D incentives was amended; as of 1 January 2023, a certification by an expert registered in the National Register of Experts for the certification of R&D activity is required for large taxpayers.

Industrial parks. Companies that own buildings and land located inside industrial parks are exempt from building tax and land tax.

Petroleum companies. Incentives are available to titleholders of oil and gas concessions. Titleholders are granted the concessions by the government in exchange for the payment of a royalty. The following are the incentives:

- For rehabilitation projects, a deductible provision equal to 10% of the annual offshore exploitation profits derived by titleholders of oil and gas licenses that relate to offshore areas with water deeper than 100 meters (328 feet).
- Provisions set up for equipment decommissioning and environmental rehabilitation are deductible up to a limit of 1%, which is applied to the accounting result of the exploitation and production of natural resources, except for the result related to the offshore activities and other activities of the legal entity.
- Reserves for the development and modernization of oil and gas production and for oil refining and infrastructure are deductible. These are included in taxable income on the depreciation

of the assets and their write-off, respectively, over the period in which the expenses financed from these reserves are incurred.

Free-trade zones. The following tax benefits are available to companies performing activities in free-trade zones:
- Value-added tax (VAT) exemption applies to supplies of non-Community goods to be placed in a free-trade zone and to supplies of the respective goods performed in a free-trade zone.
- Non-Community goods introduced into free-trade zones for storage purposes are not subject to customs duties.
- State aid is available for investments performed in free-trade zones.

Property taxes. Local councils may grant building and land tax exemptions to legal entities, subject to the state-aid regulations.

Tax reduction for capitalized entities. Tax reductions of up to 15% are granted for taxpayers paying corporate income tax, microenterprise tax or specific tax in the period of 2021 to 2025 for the increase of equity, under certain conditions. The following are the percentages of the reductions:
- 2%, if the value of accounting equity in the year for which the tax is due is positive and at least half of the value of the subscribed share capital
- Between 5% and 10% for annual increases in adjusted equity, depending on the increase percentage
- 3%, starting with 2022, if the taxpayer registers an increase of the adjusted equity compared to 2020 by a certain targeted percentage

Capital gains. Capital gains are included in taxable income and taxed at the normal corporate income tax rate. Capital gains derived by nonresident companies are also subject to the standard 16% tax rate if they are derived from the disposal of the following:
- Immovable property located in Romania
- Participation titles (shares) in a Romanian resident company

Income derived by nonresident collective placement bodies without corporate status from the transfer of value titles (securities participation titles in open funds, and other financial instruments, such as derivatives) and participation titles held directly or indirectly in Romanian resident companies, as well as income derived by nonresidents from the transfer on a foreign capital market of participation titles held in a Romanian resident company and of value titles, is not taxable in Romania.

Income derived from the sale or assignment of shares held in Romanian resident legal entities or in legal entities from countries with which Romania has entered into a double tax treaty is not included in taxable income if the taxpayer holds for an uninterrupted period of one year at least 10% of the share capital of the legal entity that issued the shares.

Administration. In general, the tax year is the calendar year. However, certain companies may opt for a tax year other than the calendar year.

Under the corporate income tax law, payers of corporate income tax (for example, companies, branches and permanent establishments) must file tax returns and pay corporate income tax quarterly (computed based on actual numbers) by the 25th

day of the first month following the first, second and third quarters.

As an exception to the general rule, payments made by banks are advance payments based on the corporate income tax for the preceding year, adjusted by the inflation rate. These payments must be made quarterly by the 25th day of the first month following the first, second and third quarters, as well on 21 December, of the respective year for the fourth quarter. This rule does not apply to newly established banks and banks that recorded a tax loss in the preceding year. These banks apply the 16% rate to the accounting profit of the current quarter.

All other payers of corporate income tax may opt for reporting and paying the annual corporate income tax through advance payments made on a quarterly basis, provided that certain conditions are met.

The annual corporate income tax return must be filed and any balance of annual corporate income tax must be paid by 25 March of the following year (as an exception, for the period of 2021 through 2025, this will be changed to 25 June for most taxpayers). For the taxpayers using a non-calendar tax year, the annual corporate income tax return must be filed and any balance of annual corporate income tax must be paid by the 25th day of the third month (as an exception, for the period 2021 through 2025, this will be changed to the 25th day of the sixth month for most taxpayers) following the tax year-end.

Certain taxpayers, such as nonprofit organizations or taxpayers deriving most of their revenues from cereals and technical plants, must submit the annual corporate income tax return and pay the related tax by 25 February of the following year.

Payers of corporate income tax that cease to exist must submit a final tax return and pay the corporate income tax based on special rules.

The annual financial statements must be submitted within specified time periods after the year-end. The following are the time periods:
- Companies (in general), national companies and R&D institutes: 150 days
- Certain specified legal persons, individuals and bodies: 120 days
- Companies not performing any activities after their formation: 60 days

The failure of a company to file tax returns by the deadline may result in a fine ranging usually from RON500 to RON5,000. Companies are liable for the payment of the fines for late filing of returns even if they pay the tax due. For the late payment of tax liabilities, the following late payment interest and late payment penalties are due (except as otherwise provided):
- Late payment interest, computed at 0.02% per day of delay
- Late payment penalties, computed at 0.01% per day of delay
- Penalties for unreported or inaccurately reported obligations, computed at 0.08% per day of delay
- Late payment penalties for local tax liabilities, computed at 1% per month or part of a month of delay

Dividends. The tax rate for dividends is 8% for all dividend beneficiaries (individuals and legal entities, from Romania and abroad).

Dividends paid by Romanian resident companies to resident companies are subject to an 8% withholding tax. The 8% tax is considered a final tax and, accordingly, the dividends are not included in the taxable income of the recipient. However, as a result of Romania's accession to the EU, no tax is imposed on dividends paid by a Romanian resident company to resident companies that held at least 10% of the shares of the payer for an uninterrupted period of at least one year that ended on the date of payment of the dividend.

Dividends paid by Romanian resident companies to resident individuals and nonresident companies and individuals are generally subject to an 8% withholding tax. However, dividends paid by a Romanian resident legal entity to a legal entity resident in another EU Member State or to a permanent establishment of an entity residing in an EU Member State are not subject to withholding tax if certain conditions relating to the legal entity receiving the dividends and to the Romanian income payer are satisfied. These conditions are described below.

The following conditions must be satisfied with respect to the legal entity receiving the dividends:

- The legal entity or permanent establishment receiving the dividends must be established in one of the legal forms provided by the law and must be resident in the respective EU Member State and, according to the double tax treaties entered into with third countries, may not be resident outside the EU from a tax perspective.
- The legal entity or permanent establishment receiving the dividends must be liable to pay corporate income tax or other similar tax under the tax law in its state of residence without the possibility of exemption or choice of the tax treatment or a tax that substitutes for such tax.
- The beneficiary of the dividends must own at least 10% of the participation titles in the Romanian legal entity for an uninterrupted period of at least one year ending on the date of the payment of the dividends.

The Romanian resident entity paying the dividends must satisfy the following conditions:

- It must be a joint stock company, limited stock partnership (*societate in comandita pe actiuni*), limited liability company, general partnership (*societate in nume colectiv*) or limited partnership (*societate in comandita simpla*).
- It must be liable to pay corporate income tax without the possibility of exemption or choice of the tax treatment, or a tax that substitutes for corporate income tax as per the domestic legislation.

The deadline for payment of dividend withholding tax is the 25th day of the month following the month in which the dividends are paid. However, if the dividends are distributed but not paid to shareholders by the end of the year in which the annual financial statements are approved, the tax is due on 25 January of the following year (the 25th day of the first month following the end of

the tax year for taxpayers that apply a tax year different than the calendar year).

Foreign tax relief. Foreign taxes may be credited against Romanian taxes based on the provisions of a double tax treaty between Romania and the foreign state.

Permanent establishments. Romanian permanent establishments of foreign legal entities resident in an EU or EEA Member State that derive income from another EU or EEA Member State benefit under certain conditions from a tax credit for the tax paid in the state from which the permanent establishment from Romania derived the income.

C. Determination of trading income

General. In general, all income that is booked as revenue is included in taxable income for corporate income tax purposes. However, the following items, among others, are not included in taxable income:

- Dividends received by a Romanian resident company from another Romanian resident company
- Dividends received by a Romanian resident company from a foreign legal entity subject to corporate income tax or a similar tax located in a state with which Romania entered into a double tax treaty, dividends received from an EU resident subsidiary and dividends received by a Romanian permanent establishment of an EU company, if certain conditions are satisfied
- The value of new shares or increases in the value of existing shares held in other companies, resulting from the incorporation of reserves, premiums, profits and similar items
- Revenues from the reversal, recovery and recharge of expenses and provisions that were previously considered to be nondeductible
- Income derived from the liquidation of other Romanian resident legal entities or foreign legal entities located in countries with which Romania has entered into a double tax treaty, if certain conditions are met
- Income from the revaluation of fixed assets, land and intangibles, which offsets the previous decreases incurred with respect to the same assets
- Income derived from a permanent establishment in a country with which Romania has entered into a double tax treaty that provides the exemption method for the elimination of double taxation

The second and fifth items above apply if the taxpayer holds for an uninterrupted period of one year at least 10% of the share capital of the legal entity distributing the dividends or the legal entity subject to liquidation.

In general, expenses are deductible for tax purposes if they are incurred for the purpose of carrying out business activities. However, the following items, among others, are deductible within specified limits:

- Protocol and entertainment expenses (for example, gifts to clients and business lunches), up to 2% of the sum of the accounting profit, corporate income tax, and protocol and entertainment expenses

- Employee-related expenses (social expenses), up to 5% of the total salary cost
- Contributions to the legal reserve fund, generally up to 5% of the accounting profit before tax, until the reserve fund reaches 20% of share capital
- Expenses with respect to shrinkage of goods and to perishable goods (goods on which a company might incur losses for various reasons, such as from damage suffered during the transport of the goods), which are deductible within the limits set by a government decision
- Provisions expenses and contributions to reserve funds within specified limits (see *Provisions*)
- Borrowing costs (see Section E)
- Depreciation expenses (see *Tax depreciation*)
- Net losses from the transfer of receivables, which are deductible within a limit of 30% of such losses

The following expenses, among others, are not deductible for tax purposes:

- Service expenses, including management, assistance and consultancy expenses, if they are provided by a person located in a state with which Romania does not have a legal instrument for information exchange and if such transactions are considered to be artificial.
- Expenses relating to insurance, other than insurance relating to assets owned by the company and risks related to the company's activity.
- Penalties and fines paid to Romanian or foreign authorities.
- Losses from the reduction in the value of inventory that cannot be recovered and uninsured assets, as well as the related VAT. However, these losses are deductible under certain conditions, such as losses regarding goods that exceeded their validity term or passed their expiration date according to the law or that were qualitatively degraded, if their destruction can be proved accordingly.
- Romanian and foreign corporate income tax (however, a tax credit is allowed for taxes paid in other countries based on the provisions of a double tax treaty between Romania and the foreign state).
- Sponsorship expenses (a tax credit is allowed for sponsorship expenses on meeting certain conditions [see Section B]).
- Expenses incurred for the benefit of shareholders or associates, other than payments for goods and services at market value.
- Expenses related to non-taxable income.

The deductibility of car expenses not falling under the full deductibility criteria provided under the Romanian tax law is limited to 50% for certain cars not exclusively used for business purposes.

Taxpayers applying International Financial Reporting Standards. Taxpayers applying International Financial Reporting Standards (IFRS), such as banks and listed companies, must also take specific tax rules into consideration in determining the corporate income tax.

Inventories. Under Romanian law, inventories of raw materials and merchandise are valued at purchase cost, while inventories of finished goods and work-in-progress are valued at production cost. On the write-off of the inventories, the valuation is calculated

using the first-in, first-out (FIFO), weighted average or last-in, first-out (LIFO) methods.

Provisions. Under Romanian law, the following provisions, among others, are deductible for corporate income tax purposes:
- Bad debt provisions under specified conditions
- Provisions for performance guarantees granted to clients
- Mandatory credit risk provisions, if established by banks, credit institutions or nonbanking financial institutions (leasing companies)
- Special provisions for titleholders of oil and gas concessions

Tax depreciation. The following are the permissible depreciation methods:
- Buildings: straight-line depreciation
- Equipment: straight-line, degressive or accelerated depreciation
- Other depreciable assets: straight-line or degressive depreciation

The depreciation method must be applied consistently. Land may not be depreciated.

Under the accelerated depreciation method, the assets are depreciated at a maximum rate of 50% in the first year of use, and the balance of the value is deducted using the straight-line method during the remaining useful life of the asset. Assets financed from reinvested profit cannot be depreciated using the accelerated depreciation method (see Section B).

Patents, licenses, know-how, manufacturers' brands, trademarks and service marks, as well as other similar industrial and commercial property rights, are depreciated during the contract period or during the period in which the purchaser intends to use the rights.

Expenses for the production or purchase of software programs are deductible on a straight-line or degressive basis over three years. The degressive and accelerated depreciation methods may be used for patents.

Goodwill, as well as intangibles with an undetermined operational life according to the accounting regulations, cannot be depreciated for tax purposes.

The deductibility of the tax depreciation of certain vehicles is limited to RON1,500 per month per vehicle.

For tax depreciation purposes, useful lives are prescribed by law. The following are the useful lives that are generally applicable to major categories of assets.

Asset	Years
Buildings and constructions (for example, roads and fences)	8 to 60
Machinery and equipment	2 to 24
Furniture and fittings	2 to 15
Motor vehicles	3 to 9

Reserves from the revaluation of fixed assets, carried out after 1 January 2004, which are deducted as tax depreciation or expenses when assets are sold or written off are taxed simultaneously with the deduction of the tax depreciation or expenses (that is, when the assets are sold or written off).

Relief for losses. The annual tax loss realized starting with 2024, or amended tax year starting in 2024, is recovered at a rate of 70% of taxable profits obtained in the next five consecutive years. Annual tax losses related to the years prior to 2024, remaining to be recovered on 31 December 2023, will be recovered within a limit of 70% of the related taxable profits, during the remaining period of recovery from the seven consecutive years following the year of recording the respective losses.

Losses may not be carried back.

Groups of companies. The Romanian law provides financial accounting rules for the consolidation of companies under certain circumstances. In addition, a tax consolidation system for corporate income tax has been established and can be applied starting with the 2022 fiscal year, provided that certain conditions are met (among others, a direct or indirect holding of at least 75%).

Tax consolidation is also available for foreign legal entities that have several permanent establishments in Romania. As a result, the taxable profits of one permanent establishment may be offset against the tax losses of another permanent establishment.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; certain enterprises, products and services are exempt, including banks, financial intermediaries and insurance companies	
Standard rate	19
Special rates for certain goods and services	5/9
Special consumption (excise) taxes; imposed, for example, on energy products, beverages, cigarettes and coffee; taxes are imposed at specified amounts per unit on certain products (for example, alcohol) and at percentage rates for other products	Various
Local taxes on land, buildings, cars, certain authorizations and other items	Various

E. Miscellaneous matters

Foreign-exchange controls. The Romanian currency is the leu (RON). Regulation 4/2005, as amended, governs the foreign-exchange regime in Romania.

In Romania, transactions between resident companies or between resident companies and resident individuals must be made in local currency, with certain exceptions. Transactions between residents and nonresidents can be made in domestic as well as in foreign currency. In the free-trade zones (see Section B), transactions between residents can also be performed in foreign currency.

Residents and nonresidents may open foreign-currency accounts in Romanian banks or foreign banks authorized to operate in Romania. Residents are allowed to open accounts in banks located abroad. Romanian legal entities may hold and use hard currency deposited with authorized banks.

Romanian legal entities may make payments in foreign currency to nonresidents without prior approval. Current-account transactions include, among others, imports of goods and services, payments of dividends and repatriation of profits.

Romanian and foreign entities may freely buy and sell hard currency on the interbank foreign-exchange market, but specified documentation is usually required.

Transfer pricing. Under the provisions of the Romanian Tax Code, for transactions between related parties, the tax authorities may adjust the amount of income or expenses of either party to reflect the market value of the goods or services provided in the transaction. Such reassessment affects only the tax position of the Romanian entity. It does not affect the entity's financial statements.

The law indicates that in applying the domestic transfer-pricing measures, the Romanian tax authorities must also take into account the Organisation for Economic Co-operation and Development (OECD) Transfer-Pricing Guidelines.

On request, Romanian entities performing transactions with related parties must make available to the tax authorities a file containing specified transfer-pricing documentation.

Country-by-Country Reporting (CbCR) notification requirements were introduced, starting with transactions performed during 2016. They apply to all Romanian entities that are part of multinational enterprise groups that have a total consolidated turnover of at least EUR750 million.

Anti-Tax Avoidance Directive. The provisions of the EU Anti-Tax Avoidance Directive (ATAD; EU Council Directive 2016/1164 of 12 July 2016), which provides rules against tax avoidance practices that directly affect the functioning of the internal market were transposed into the Romanian Tax Code, applying from 1 January 2018.

The following provisions were introduced:
- Limitation on the deductibility of interest and of other costs economically equivalent to interest (see *Borrowing costs*)
- Exit taxation rules
- Controlled foreign company rules

Anti-Tax Avoidance Directive II. The provisions of the EU Anti-Tax Avoidance Directive II (ATAD II; EU Council Directive 2017/952 of 29 May 2017) regarding hybrid mismatches with third countries were transposed into the Romanian Tax Code (together with the provisions on hybrid mismatches included in the ATAD, which had not been implemented previously). The provisions apply from 3 February 2020.

BEPS 2.0 - Pillar Two. In early January 2024, Romania enacted the Pillar Two measures, including Qualified Domestic Minimum Top-up Tax, which are generally computed based on local Romanian generally accepted accounting principles. For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (https://www.ey.com/content/dam/ey-unified-site/ey-com/en-gl/services/tax/documents/beps-2-0-pillar-two-developments-tracker.pdf).

Borrowing costs. As a result of the transposition of ATAD, the limitation on the deductibility of interest and other costs economically equivalent to interest were introduced, replacing the previous limitations applicable to interest and foreign-exchange differences.

The limitation applies also to banks and nonbanking financial entities, as well to borrowing costs owed to them.

Borrowing costs also include, for example, interest capitalized in the accounting value of an asset and arrangement fees.

Taxpayers can deduct during a tax period the exceeding borrowing costs (the amount by which the borrowing costs exceed the interest revenues) up to the deductible limit of the Romanian lei equivalent of EUR1 million, out of which not more than EUR500,000 is for transactions or operations with related parties that do not finance the acquisition or production of certain assets in progress.

The exceeding borrowing costs exceeding the abovementioned limit have limited deductibility in the tax period in which they are incurred, up to 30% from the basis of calculation.

The basis of calculation of the deductible exceeding borrowing costs is calculated as follows:

Total revenues – total expenses – nontaxable revenues + corporate income tax expense + exceeding borrowing costs + deductible tax depreciation (adjusted earnings before interest, taxes, depreciation and amortization [EBITDA])

If the basis of calculation is negative or is equal to zero, the exceeding borrowing costs (the costs exceeding the abovementioned thresholds) are nondeductible in the tax period in which they are incurred, and they are carried forward for an unlimited period of time under the same deduction conditions.

As an exception, taxpayers that are independent entities, are not part of a consolidated group from a financial accounting perspective and have no affiliated entities or permanent establishments can fully deduct the exceeding borrowing costs in the tax period in which the costs are incurred.

These provisions apply also to interest expenses and net foreign-exchange losses carried forward in relation to periods before 2018, according to the previously applicable legislation.

The nondeductible exceeding borrowing costs carried forward recorded by entities that cease to exist as a result of a spin-off or merger can be carried forward by the new taxpayers or taxpayers that take over the assets and liabilities of the merged or spun-off entity.

F. Treaty withholding tax rates

The table below shows the applicable withholding rates under Romania's bilateral tax treaties. This table does not reflect the potential effect that the Multilateral Instrument (MLI) might have over the impacted bilateral tax treaties.

	Dividends (gg) %	Interest (hh) %	Royalties (hh) %
Albania	10/15 (a)	10	15
Algeria	15	15	15
Armenia	5/10 (a)	10	10
Australia	5/15 (b)	10	10

(a) The lower rate applies if the beneficiary of dividends is a company owning at least 25% of the capital of the payer.

(b) The lower rate applies if the beneficiary of dividends is a company owning at least 10% of the capital of the payer.

(c) The rate is 0% if the indebtedness on which the interest is paid is guaranteed, insured, or financed by the other state or by a financial institution that is a resident of the other state.

(d) The 0% rate applies if the beneficial owner of the dividends is one of the following:
- The government of a contracting state
- The governmental institution or entity of a contracting state
- A company that is resident in a contracting state and that has at least 25% of its capital owned directly or indirectly by the government or governmental institutions of either contracting state

(e) The 5% rate applies to royalties paid for patents, brands, designs and models and know-how.

(f) The 2.5% rate applies to royalties relating to computer software or industrial equipment.

(g) The 0% applies to interest paid to the German government, Deutsche Bundesbank Kreditanstalt fur Wiederaufbau or Deutsche Investitions und Entwicklungsgesellschaft (DEG) and to interest paid on a loan guaranteed by Hermes-Deckung. The 0% rate also applies to interest paid to the Romanian government if it is derived and beneficially owned by certain types of institutions (for example, the Romanian government, an administrative-territorial unit, a local authority, or an agency, bank unit or institution of the Romanian government) or if the debt claims of Romanian residents are warranted, insured or financed by a financial institution wholly owned by the Romanian government. In addition, as long as Germany does not impose taxes on interest, Romania may not tax interest. The protocol to the treaty provides that the following types of interest are taxed only in the state where the interest arises and according to the law of that state, provided that they are deductible in the determination of profits of the interest payer:
- Interest derived from rights or debt claims carrying a right to participate in profits
- Interest linked to the borrower's profits
- Interest derived from profit-sharing bonds

(h) The lower rate applies to dividends paid by companies resident in Romania.

(i) The lower rate applies to cultural royalties.

(j) The lower rate applies if the beneficiary of dividends is a company owning at least 40% of the capital of the payer.

(k) The lower rate applies to payments received for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas and processes, or industrial, commercial or scientific equipment, and for information concerning industrial, commercial or scientific experience.

(l) The 0% rate applies to the following types of interest:
- Interest paid in connection with sales on credit of industrial, commercial or scientific equipment
- Interest on loans granted by banks or other financial institutions (including insurance companies)
- Interest on loans with a term greater than two years
- Interest on debt-claims guaranteed, insured or directly or indirectly financed by or on behalf of the government of either contracting state

(m) The 0% rate applies to interest arising in one contracting state with respect to debentures, public funds or similar instruments of the government that is paid to residents of the other contracting state and to interest on loans granted or guaranteed by the National Bank of Romania or by the Bank of Israel. The 5% rate applies to interest paid with respect to sales on credit of merchandise or industrial, commercial or scientific equipment and to interest on loans granted by banks. The 10% rate applies to other interest.

(n) As long as Austria, under its national law, does not levy withholding tax on interest paid to Romanian residents, the withholding tax rate is 0%. An exemption also applies if any of the following circumstances exist:
- The payer or the recipient of the interest is the government of a contracting state, a local authority or an administrative or territorial unit thereof or the central bank of a contracting state.
- The interest is paid with respect to a loan granted, approved, guaranteed or insured by the government of a contracting state, the central bank of a contracting state or a financial institution owned or controlled by the government of a contracting state.
- The interest is paid with respect to a loan granted by a bank or other financial institution (including an insurance company).
- The interest is paid on a loan made for a period of more than two years.
- The interest is paid in connection with the sale on credit of industrial, commercial or scientific equipment.

(o) The 0% rate applies to dividends paid by a company resident in Malaysia to a Romanian resident; the 10% rate applies to dividends paid by a company resident in Romania to a Malaysian resident.

(p) The 0% rate applies to interest paid to Romanian residents on long-term loans.

(q) The 0% rate applies to industrial royalties received from Malaysia by Romanian residents.

(r) The 5% rate applies to the following:
- Copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting)
- Royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience (but not including royalties paid with respect to a rental or franchise agreement)

(s) The 0% rate applies if the beneficiary of the dividends is a company owning at least 25% of the capital of the payer. The 5% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer. The 15% rate applies to other dividends.

(t) Romania will not impose withholding tax on interest and royalties paid to Dutch residents as long as Dutch domestic law does not impose withholding tax on these types of payments. An exemption also applies if any of the following circumstances exist:
- The payer or the recipient of the interest is the government of a contracting state, a public body, a political subdivision, an administrative-territorial unit or a local authority thereof or the central bank of a contracting state.
- The interest is paid with respect to a loan granted, approved, guaranteed or insured by the government of a contracting state, the central bank of a contracting state or any agency or instrumentality (including a financial institution) owned or controlled by the government of a contracting state.
- The interest is paid with respect to a loan granted, approved, guaranteed or insured by the government of a contracting state, the central bank of a contracting state or any agency or instrumentality (including a financial institution) owned or controlled by the government of a contracting state.
- The interest is paid on a loan made for a period of more than two years.
- The interest is paid in connection with the sale on credit of industrial, commercial or scientific equipment.

(u) The lower rate applies to interest related to sales on credit of equipment, loans granted by a bank or to public issues of bonds and debentures.

(v) The 10% rate applies to royalties paid by a company that is registered as a foreign investor and is engaged in an activity in a priority economic field. The 15% rate applies to royalties related to film or television production. The 25% rate applies to other royalties.

(w) The 10% rate applies if the beneficiary of dividends is a company owning at least 25% of the capital of the payer for an uninterrupted period of two years.

(x) The 0% rate applies to interest related to sales on credit of industrial and scientific equipment.

(y) Romania will not impose withholding tax on royalties paid to Swiss residents as long as Swiss domestic law does not impose withholding tax on royalties.

(z) The 10% rate applies if the beneficiary of the interest is a financial company, including an insurance company. The 20% rate applies to interest with respect to sales on credit. The 25% rate applies to other interest payments.

(aa) The 0% rate applies if the interest is beneficially owned by the other contracting state or an administrative-territorial unit or a local authority thereof, the central bank of that other state, or an agency, bank or institution of that other state or administrative-territorial unit or local authority thereof or if the debt-claims of a resident of the other contracting state are warranted, insured or financed by a financial institution wholly owned by that other state.

(bb) The 0% rate applies if either of the following circumstances exist:
- The interest is derived and beneficially owned by the government of the other state, a local authority or an administrative-territorial unit thereof or an agency or bank unit or institution of that government, local authority or administrative-territorial unit.
- The debt claims of a resident of the other state are warranted, insured, or directly or indirectly financed by a financial institution wholly owned by the government of the other state.

(cc) The 0% rate applies to the following types of interest:
- Interest related to public debt instruments or to instruments issued by the National Bank of Romania with the purposes of reaching monetary policy objectives
- Interest paid to EU pension funds

The 16% rate applies to other interest payments.

(dd) This treaty is not yet in force.

(ee) The 0% rate applies if the beneficiary of the dividends is a company owning at least 50% of the capital of the payer. The 5% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer. The 10% rate applies to all other dividends.

(ff) The 0% rate applies to dividends paid to the government of the other contracting state.

(gg) In accordance with an EU directive, the following rules apply to dividends paid to companies residing in the EU:
- The withholding tax rate in Romania is 0% if certain conditions are met, such as the beneficiary of the dividends owns at least 10% of the capital of the payer for an uninterrupted period of one year before the payment of the dividends.
- The withholding tax rate in Romania is 5% if the conditions mentioned in the preceding bullet are not satisfied.

(hh) The withholding tax rate is 0% for interest and royalties if both of the following conditions are satisfied:
- The beneficial owner of the interest or royalties is a legal person resident in an EU Member State or a permanent establishment of an entity resident in such a state.
- The beneficial owner of the interest or royalties holds at least 25% of the value or number of participation titles in the Romanian entity for an uninterrupted period of at least two years that ends on the date of payment of the interest or royalties.

(ii) The 0% rate applies to dividends paid to the government or political subdivisions, local authorities or administrative territorial units. The 0% rate also applies to majority state-owned companies (at least 51%) if the minority shareholders are residents of that state.

(jj) The 0% rate applies if the beneficial owner of the dividends is one of the following:
- The government of a contracting state
- A governmental institution or entity of a contracting state

(kk) The 0% rate applies if any of the following circumstances exists:
- The payer of the income from debt-claims is the government of a contracting state or an administrative-territorial unit or an administrative subdivision or a local authority thereof.
- The income from debt-claims is paid to the government of the other contracting state or administrative-territorial unit, or an administrative subdivision or local authority thereof, or an agency or instrumentality (including a financial institution) wholly owned by the other contracting state or administrative-territorial unit, or an administrative subdivision or local authority thereof.
- The income from debt-claims is paid to any other agency or instrumentality (including a financial institution) with respect to loans made in application of an agreement between the governments of the contracting states.
- The income from debt-claims is paid on loans granted, insured or guaranteed by a public institution for purposes of promoting exports.

(ll) A withholding tax exemption for dividends applies if either of the following circumstances exists:
- The dividends are paid to a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
- The beneficial owner of the dividends is the government of the contracting state or a governmental institution or entity of a contracting state.

(mm) The withholding tax exemption for interest applies if either of the following circumstances exists:
- The interest is paid to related parties (that is, direct parent or sister companies) that have a shareholding of 25% or more.
- The loan is secured by a governmental institution.

(nn) The 0% rate applies if any of the following circumstances exist:
- The beneficial owner is the government, an administrative subdivision, a local authority or an administrative-territorial unit.
- The beneficial owner is a bank owned by the government, an administrative subdivision, a local authority or an administrative-territorial unit.
- The loan is guaranteed, assured or financed by a bank entirely owned by the government.

(oo) This treaty currently applies to Montenegro and Serbia.

(pp) The 0% rate applies if the interest is derived and beneficially owned by the following:
- The government, an administrative territorial unit, a political subdivision, a local authority or an administrative-territorial unit
- In the case of Romania, by the National Bank of Romania or the Export-Import Bank of Romania
- In the case of India, by the Reserve Bank of India, the Export-Import Bank of India or the National Housing Bank
- Any other institution that may be agreed to through an exchange of letters between the competent authorities

(qq) The treaty provides for an exemption for interest in the following circumstances:
- Interest arising in the United Arab Emirates and paid to the Government of Romania or to any of its financial institutions is exempt from United Arab Emirates tax.
- Interest arising in Romania and paid to the government of the United Arab Emirates or its financial institutions is exempt from Romanian tax.
- Interest arising from institutions the capital of which is wholly or partially owned by the Government of Romania or the Government of the United Arab Emirates exempt from tax in the respective contracting states.

(rr) In the case of the Hong Kong Special Administrative Region (SAR), the 0% rate applies if the beneficiary is one of the following:
- The Government of the Hong Kong SAR
- The Hong Kong Monetary Authority
- The Exchange Fund
- A financial institution wholly or mainly owned by the Government of the Hong Kong SAR and mutually agreed on by the competent authorities of the contracting parties

In the case of Romania, the 0% rate applies if the beneficiary is one of the following:
- Romania or an administrative-territorial unit thereof
- The National Bank of Romania
- The Export-Import Bank of Romania (EXIMBANK)
- A financial institution wholly or mainly owned by Romania and mutually agreed on by the competent authorities of the contracting parties

Otherwise, the following are the rates:
- 3% if the beneficial owner is a company (other than a partnership) that holds directly at least 15% of the capital of the company paying the dividends
- 5% in all other cases

(ss) The 0% rate applies if and as long as the Hong Kong SAR, under its internal legislation, levies no withholding tax on interest. In the case of the Hong Kong SAR, an exemption is also available if the interest is beneficially owned by one of the following:
- The Government of the Hong Kong SAR
- The Hong Kong Monetary Authority
- The Exchange Fund
- A financial institution wholly or mainly owned by the Government of the Hong Kong SAR and mutually agreed on by the competent authorities of the contracting parties

In the case of Romania, an exemption is also available if the interest is beneficially owned by one of the following:
- Romania or an administrative-territorial unit thereof
- The National Bank of Romania
- The EXIMBANK
- A financial institution wholly or mainly owned by Romania and mutually agreed upon by the competent authorities of the contracting states

(tt) In the case of Norway, the 0% rate applies to dividends paid to the following:
- The Central Bank of Norway
- The Government Pension Fund Global
- A statutory body or any entity wholly or mainly owned by Norway as may be agreed from time to time between the competent authorities of the contracting states

In the case of Romania, the 0% rate applies to dividends paid to the following:
- The National Bank of Romania
- The EXIMBANK
- A statutory body or any entity wholly or mainly owned by Romania as may be agreed from time to time between the competent authorities of the contracting states

The 5% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer. The 10% rate applies to all other dividends.

(uu) The 0% rate applies if the interest is derived and beneficially owned by the government of the other contracting state or a political subdivision, local authority or administrative-territorial unit thereof or an agency, bank unit or institution of that government or political subdivision, local authority or administrative-territorial unit or if the debt-claims of a resident of the other contracting state are warranted, insured or financed by a financial institution wholly owned by the government of the other contracting state.

(vv) The 0% rate applies to dividends paid to the government of a contracting state or a governmental institution or entity thereof and to companies that are resident of either contracting state and that have at least 25% of their capital owned directly or indirectly by the government or a governmental institution of a contracting state.

(ww) The 0% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer for an uninterrupted period of two years.

(xx) The 0% rate applies if any of the following circumstances exists:
- The payer of the interest is the government of a contracting state or a local organization thereof.
- The interest is paid to the government of the other contracting state or local organization thereof or to a body or an agency (including a financial institution) wholly owned by that contracting state or local authority thereof.
- The interest is paid to other bodies or agencies (including a financial institution) dependent for their funds on the entities mentioned above under agreements concluded between the governments of the contracting states.

(yy) The 0% rate applies to dividends paid to the government or political subdivisions, local authorities or administrative territorial units. The 0% rate also applies to dividends paid to majority state-owned companies (at least 51%) if the minority shareholders are residents of that state.

(zz) The 0% rate applies to the following types of interest:
- Interest paid in connection with sale on credit of equipment, merchandise or services
- Interest on loans granted by financial institutions of the other state
- Interest paid to the other state or a political subdivision, local authority or administrative-territorial unit thereof, or any entity wholly or mainly owned by the other state (more than 50%)

(aaa) The 0% rate applies if the beneficiary of the dividends is a company owning, directly or indirectly, at least 10% of the capital of the payer for more than one year or is a pension scheme that is a resident of the other state.

(bbb) The 0% rate applies if either of the following circumstances exist:
- The interest is derived and beneficially owned by the other contracting state or a political subdivision or administrative-territorial unit thereof or an agency, bank unit or institution of that state, political subdivision or administrative-territorial unit.
- The debt claims of a resident of the other contracting state are warranted, insured or financed by a financial institution wholly or mainly owned by that other state.

In addition, under a protocol to the double tax treaty, as long as, according to its internal legislation, interest arising in a contracting state is exempt from tax in that state, the withholding tax rate is reduced to 0%.

(ccc) The double tax treaty between Romania and Liechtenstein will be effective from 1 January 2025.

(ddd) The 0% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer for an uninterrupted period of one year.

Technical Fees	15
Service Fees	15
Sports and Entertainment Fees	15
Lottery and Gambling Proceeds	15
Imports	5 (d)
Public Procurement	3 (e)
Net Operating Losses (Years)	
Carryback	0 (f)
Carryforward	5

(a) This tax is a final tax.
(b) A reduced 5% rate applies to dividends and interest received by Rwandan and East African Community resident taxpayers from entities listed on the Rwanda Stock Exchange.
(c) A reduced 5% rate applies to interest derived from treasury bonds with a maturity of at least three years.
(d) This is a recoverable advance tax that applies to taxpayers without a tax clearance certificate issued by the Rwanda Revenue Authority.
(e) This is a recoverable advance tax that applies to suppliers of goods and services to public institutions.
(f) Rwanda does not have a provision for the carrying back of losses.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax is payable by companies, cooperative societies, foreign companies or their branches, autonomous public enterprises, associations and any other business entities that engage in for-profit business activities. Resident entities are subject to corporate income tax on worldwide income. Nonresident entities are subject to corporate income tax on income derived through a permanent establishment. Nonresident entities without a permanent establishment in Rwanda are not subject to corporate income tax, but they may be subject to other taxes in Rwanda.

An entity is considered to be resident in Rwanda during a tax year if it satisfies either of the following conditions:
- It is a company or an association established according to Rwandan laws.
- It has its place of effective management in Rwanda at any time during the tax year.

Rates of corporate tax. The corporate tax rate is 28%.

Capital gains. Rwanda imposes a separate tax on capital gains of 5% arising from the transfer of shares (direct or indirect). Gains from the disposal of shares listed on the Rwanda Stock Exchange or units of a collective-investment scheme are exempt from capital gains tax.

Capital gains derived from the transfer of assets other than shares are included in taxable income and taxed at the normal corporate income tax rate.

Administration. A company's year of assessment (tax year) is the calendar year. A company wishing to maintain a tax year other than the calendar year must obtain prior approval from the Minister of Finance.

Companies must make installment payments, which are calculated by multiplying the current annual turnover by a fraction that has the tax paid for the previous annual tax period as the numerator and the turnover of the same tax period as the denominator. The payment dates are 30 June, 30 September and 31 December. The installment payments are subtracted from tax due at the end of the financial year. Any overpayment is generally treated as a prepayment of future income tax liabilities or other tax liabilities and may only be offset on obtaining the prior approval of the Rwanda Revenue Authority. However, a company may seek a refund of the overpayment by a written request to the Commissioner General of Rwanda Revenue Authority.

Companies must file a final tax return accompanied by proof of payment of tax provided by the tax administration within three months after the end of the tax year (31 March for calendar-year taxpayers). The company calculates the tax payable on the tax return form. The tax due equals the tax payable minus installments and recoverable withholding tax paid. Any tax due must be paid with the return.

Dividends. Dividends are subject to a final withholding tax at a rate of 15%. However, a reduced 5% rate applies to dividends

received by Rwandan and East African Community resident taxpayers from securities listed on the Rwanda Stock Exchange.

Foreign tax relief. Relief for foreign taxes paid is granted in accordance with tax treaties with other countries. If foreign tax is paid to a country that does not have a tax treaty with Rwanda, the tax paid may be subtracted from tax payable in Rwanda, subject to a maximum cap of the Rwandan income tax payable on that foreign-source income.

C. Determination of trading income

General. Taxable income is accounting income adjusted for nontaxable income and for nondeductible expenses. Expenses are deductible if they are incurred wholly and exclusively in the production of income.

Provisions. General and specific provisions, which are reflected in the computation of financial accounting income, are generally not deductible for tax purposes. However, banks and financial institutions may deduct any increase in the mandatory reserve for non-performing loans determined by the National Bank of Rwanda.

Tax depreciation. Depreciation charged in the financial statements is nondeductible for tax purposes, subject to limits that are set forth in the tax law or are determined by the Minister of Finance from time to time. The following are the current allowable tax depreciation rates:

Asset class	Rate (%)
Buildings (excluding land) including equipment and machinery	5
Intangible assets including goodwill	10
Information and communication systems with a life of more than 10 years	10
Computer equipment and accessories with a life of less than 10 years	50
All other business assets	25

Groups of companies. The income tax law does not allow the filing of consolidated returns, the combining of profits and losses of affiliated companies or the transfer of losses from loss companies to profitable members of the same group of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax, on the supply of goods and services in Rwanda and on imports of goods and services	
Standard rate	18%
Other rate	0%
Social security contributions; paid by	
Employer	5%
Employee	3%

Nature of tax	Rate
Maternity Leave Benefits Scheme contributions	
Employer	0.3%
Employee	0.3%
Community-based health insurance; paid by employee	0.5%
Trade licenses; the fee is based on the turnover of the prior period (tax year); maximum fee	RWF2,000,000

E. Miscellaneous matters

Foreign-exchange controls. The currency in Rwanda is the Rwandan franc (RWF). Rwanda does not impose foreign-exchange controls.

Debt-to-equity rules. Interest and realized foreign-exchange losses arising from related-party loans exceeding four times equity does not qualify as a deductible expense for companies other than commercial banks, insurance companies and other financial institutions.

Transfer pricing. The transfer-pricing (TP) rules apply to controlled transactions between a resident person with its related parties both in and outside Rwanda or a permanent establishment of a foreign entity in Rwanda engaging directly or indirectly in a controlled transaction with a related person not resident in Rwanda.

The guidelines provide that taxpayer's should have their TP documentation in place before the income tax declaration deadline for the tax period. The TP documentation must be submitted on request by the tax administration within seven days from the date of receipt of the written request. However, a schedule of the controlled transactions must be submitted in a prescribed form to the tax administration together with the income tax declaration.

F. Tax treaties

Rwanda has entered into double tax treaties with Barbados, Belgium, China Mainland, Congo (Republic of), Jersey, Luxembourg, Mauritius, Morocco, Qatar, Singapore, South Africa, Türkiye and the United Arab Emirates.

St. Lucia is a member country of the Organisation for Economic Co-operation and Development (OECD)/G20 Inclusive Framework on Base Erosion and Profit Shifting (BEPS) to tackle tax avoidance, improve the coherence of international tax rules, ensure a more transparent tax environment, and address the tax challenges arising from the digitalization of the economy. As part of the new two-pillar plan to reform international taxation rules, which includes the proposal of a global minimum tax of 15% to address the incentives to shift profits to lower tax regimes and ensure that multinational enterprises pay a fair share of tax wherever they operate, St. Lucia is in the process of formulating its position. In view of the potential changes to the local law, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	0
Branch of Nonresident Corporation Tax Rate (%)	30 (a)
Withholding Tax (%)	

Payments to Nonresidents	
Dividends	0
Interest	15 (b)
Royalties	25 (b)
Rents	0
Management and Technical Services Fees	25 (b)
Any Other Payments of Income	25 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	6

(a) This rate applies only to companies that are in good standing with the Inland Revenue Department. Otherwise, the rate is 33.3%.
(b) This is a final tax.

B. Taxes on corporate income and gains

Corporate income tax. All resident and nonresident companies in St. Lucia are subject to corporate tax on income that is sourced in St. Lucia. Income sourced outside of St. Lucia falls outside the scope of taxation.

Detailed legislation has been passed specifying what is considered local and foreign-source income. Nonresident companies that derive income from St. Lucia (other than by carrying on business through a permanent establishment) are not subject to tax in St. Lucia. However, such income earned by nonresident companies may be subject to withholding tax.

A company is considered to be tax resident in St. Lucia if it is incorporated in St. Lucia. A company incorporated outside of St. Lucia is also considered resident in St. Lucia if its management and control are located in St. Lucia.

Rates of corporate tax. All domestic companies that are in good standing with the Inland Revenue Department, including branches of nonresident companies, are subject to tax at a basic rate of 30%. Companies that are not in good standing are subject to tax at a rate of 33.3%.

Foreign-source income is not subject to tax in St. Lucia. Expenses incurred in connection with foreign-source income are not tax-deductible. Any such expenses paid to nonresidents are not subject to withholding tax in St. Lucia.

International Business Companies. International Business Companies (IBCs) registered before 1 December 2018 are no longer able to utilize preferential tax rates (tax-exempt or a 1% rate) and withholding tax exemptions. Effective 1 July 2021, all IBCs are subject to tax on income from sources in St. Lucia at the standard corporate tax rate of 30%.

IBCs must fulfill certain substance requirements, based on their core economic activity, including the following:
- Employment of an adequate number of employees with the necessary level of qualifications and experience
- Demonstration of an adequate amount of operating expenditure
- Adequate investment and capital commensurate with the type and level of activity

IBCs are also required to do the following:
- File annual tax returns based on annual audited financial statements
- Comply with the monitoring requirement as prescribed by the guidelines and regulations made by the competent authority
- Provide other documents required by the competent authority

Capital gains. Capital gains are not taxed in St. Lucia.

Administration. The fiscal (income) year is the period for which the accounts of the business are normally prepared.

A corporation is required to determine its own tax liability and to prepare and file a corporation tax return within three months after the end of its fiscal year. If a return is not filed on time, the Comptroller of Inland Revenue may levy a penalty of 5% of the tax payable for that income year.

Corporations must prepay tax in three installments. These installments must be paid by 25 March, 25 June and 25 September in each year, and each tax prepayment must equal one-third of the preceding year's tax. Any balance of tax due is paid when the return is filed. Failure to pay an installment of tax is subject to a penalty of 10% of the amount of unpaid tax as well as interest at a rate of 1.04% per month. Any balance of tax not paid by the due date incurs interest at a rate of 1.04% per year for the period during which it remains unpaid.

Dividends. Dividends paid by companies resident in St. Lucia to nonresidents are not subject to withholding tax in St. Lucia. Dividends received by companies resident in St. Lucia from domestic and foreign companies are not included in the companies' taxable income.

C. Determination of trading income

General. Taxable income is determined on the basis of accounts prepared in accordance with International Financial Reporting Standards, subject to specific adjustments identified in the Income Tax Act.

Management fees' restriction. Management fees allowable as a deduction are restricted to 10% of all allowable deductions (excluding the management charge and cost of sales).

Inventories. The authorities generally accept a method of valuation of inventory that conforms to standard accounting practice in the trade or business, provided it is applied consistently. Average cost or first-in, first-out (FIFO) are the generally accepted methods.

Provisions. Reserves or provisions of a general nature for doubtful accounts receivable, inventory shrinkage, inventory obsolescence and other items are not allowable. However, write-offs of specific amounts or balances are generally allowed if these amounts are calculated in accordance with the guidelines issued by the Inland Revenue Department.

Tax depreciation. Depreciation and amortization reported in the financial statements are not allowed as deductions in calculating taxable income. However, a company may claim capital allowances. Annual allowances of between 2.5% and 33.3% are granted

on the original cost of fixed assets, calculated on a declining balance. An initial allowance of 20% is also granted with respect to capital expenditure.

Relief for losses. Losses may be carried forward six years to offset income derived in those years. However, for any year, the deduction with respect to the prior year losses may not exceed one-half of the taxable income for that year. Losses may not be carried back.

Groups of companies. A member of a group of companies (the surrendering company) may surrender current trading losses to another member of the group (the claimant company). The claimant company may then claim a deduction for the losses in calculating its taxable income. This deduction may not exceed half of the taxable income of the claimant company.

To qualify for group relief, the surrendering company and the claimant company must be tax resident in St. Lucia and must be members of the same group throughout the fiscal year for which group relief is claimed. Two companies are members of the same group if one is a 51% subsidiary of the other or both are 51% subsidiaries of a third company. In determining whether a company is a 51% subsidiary of another company, share capital is excluded if profits from sales of such shares would be trading receipts of the direct owner of the shares. Share capital is also excluded if it is owned directly or indirectly in a company not resident in St. Lucia. In addition, the parent company must be beneficially entitled to at least 51% of the profits available for distribution to shareholders of the subsidiary and to at least 51% of the subsidiary's assets available for distribution to shareholders of the subsidiary on a winding up.

Trading losses may not be surrendered to the extent that they include the following:

- The surrendering company's capital allowances
- Expenses payable to a group member that are claimed as deductions but are not included in the income of that group member for the same fiscal year

Group relief is available only if the claimant company has used its capital allowances and offset its loss carryforwards against its current profits. A claim for group relief must be made within two years after the end of the surrendering company's fiscal year, and the surrendering company must consent to the relief. Group relief is not available to IBCs, International Banks and other companies granted special tax concessions.

Consolidated group returns may not be filed with the tax authorities.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on the supply of goods and services in St. Lucia and on goods imported into St. Lucia	
Standard rate	12.5

Nature of tax	Rate (%)
Supply of tourism accommodation services	7
Basic food items	0
Excise tax, on imports of vehicles; this tax is imposed in addition to the VAT	15 to 85
Import duty	5 to 45
National insurance contributions, on monthly insurable earnings up to XCD5,000; paid by	
Employer	5
Employee	5
Self-employed individual	10
Health and Citizen Security Levy; St. Lucia enacted the Health and Citizen Security Levy (HCSL) Act in July 2023 and then suspended the implementation of the HCSL until October 2023; the HCSL is imposed on the importation of goods, services provided by VAT-registered taxpayers, services provided by nonresident entities to VAT-registered taxpayers in St. Lucia and services provided by a business established and carrying on business from outside St. Lucia to the local branch of the business in St. Lucia; services falling outside the purview of Schedule 2 in the HCSL, as well as all exempt and zero-rated services listed in the VAT Act, are not subject to the HCSL	2.5

E. Miscellaneous matters

Foreign-exchange controls. St. Lucia does not impose foreign-exchange controls.

Debt-to-equity rules. St. Lucia does not impose thin-capitalization rules.

Anti-avoidance legislation. Anti-avoidance provisions may be applied to transactions effected for the main purpose of avoidance or reduction of tax liability.

Economic substance. Under the Economic Substance Act, a St. Lucia entity must satisfy certain economic substance requirements for each year of income in which it derives income from a relevant sector. The following are the requirements:

- The company must be directed and managed in St. Lucia.
- The company must have an adequate number of qualified employees in St. Lucia.
- The company has adequate operating expenditure proportionate to the level of activity carried on in St. Lucia.
- The company has an adequate physical presence.
- The company conducts core income-generating activities.

The activities conducted by a company for which economic substance is required include the following:

- Banking business
- Insurance business
- Shipping
- International mutual funds business

- Financing and leasing
- Headquartering
- Activities of a company holding tangible assets
- Activities of a company holding intangible assets
- Activities of a pure equity holding company
- Distribution and service center business
- Carrying on of a combination of businesses or activities listed above

Examples of a core income-generating activity in the banking business sector include, but are not limited to, the following:
- Raising funds
- Managing risk, including credit, currency and interest risk
- Taking hedging positions

If an entity fails to comply with the prescribed economic substance requirements, the entity may no longer qualify for the tax exemption on income that has accrued from a source outside St. Lucia.

Also, see *International Business Companies* in Section B.

Global minimum tax. St. Lucia has joined the two-pillar plan to reform international taxation rules. Under Pillar Two, the inclusive framework members have agreed to introduce a global minimum corporate tax rate of 15%. Global Anti-Base Erosion (GloBE) rules provide for a coordinated system of taxation intended to ensure that multinational enterprises (MNEs) with global revenue exceeding EUR750 million pay a fair share of tax in each of the jurisdictions where they operate. They do so by imposing a top-up tax on profits arising in a jurisdiction whenever the effective tax rate, determined on a jurisdictional basis, is below the minimum rate. The GloBE rules are not mandatory but have been agreed as a "common approach." This means that jurisdictions are not required to adopt the GloBE rules, but if they choose to do so, they agree to implement and administer them in a way that is consistent with the agreed outcomes set out under those rules. Even if they do not implement the rules, agreement on a common approach means that one jurisdiction accepts the application of the GloBE rules by another with respect to MNEs operating in its jurisdiction. If St. Lucia agrees to apply the GloBE rules from 2023, they must first be implemented into domestic law.

F. Treaty withholding tax rates

The following treaty withholding tax rates apply to income received in St. Lucia.

	Dividends %	Interest %	Royalties %
Caribbean Community and Common Market (a)	0	15	15
Switzerland (b)	– (c)	– (d)	0

(a) This is the Caribbean Community and Common Market (CARICOM) double tax treaty. Income is taxed in the country of source only.
(b) This is the 1954 treaty between the United Kingdom and Switzerland, which was extended by exchange of notes to St. Lucia under Article XXI.
(c) The treaty does not contain a dividend article. Consequently, the normal Swiss withholding tax rate applies.
(d) The treaty does not contain an interest article. Consequently, the normal Swiss withholding tax rate applies.

For payments from St. Lucia, the following treaty withholding tax rates apply (however, see the paragraph after the footnotes).

	Dividends %	Interest %	Royalties %
Caribbean Community and Common Market (a)	0	15	15
Switzerland (b)	0 (c)	15 (d)	0
Non-treaty jurisdictions	0	15	25

(a) This is the CARICOM double tax treaty. Income is taxed in the country of source only.
(b) This is the 1954 treaty between the United Kingdom and Switzerland, which was extended by exchange of notes to St. Lucia under Article XXI.
(c) The treaty does not contain a dividend article. Consequently, the normal withholding tax rate applies.
(d) The treaty does not contain an interest article. Consequently, the normal withholding tax rate applies.

Expenses paid to nonresidents in the production of foreign-source income are not subject to withholding tax in St. Lucia.

B. Taxes on corporate income and gains

Corporate income tax. The taxation of Saint-Martin companies is based on a territorial principle. As a result, Saint-Martin companies carrying on a trade or business outside Saint-Martin are generally not taxed in Saint-Martin on the related profits and can not take into account the related losses. However, under the Saint-Martin controlled foreign company (CFC) rules contained in Article 209 B of the Saint-Martin Tax Code, income earned by a Saint-Martin enterprise through a foreign enterprise may be taxed in Saint-Martin if such income is subject to an effective tax rate that is 50% lower than Saint-Martin's effective tax rate on similar income (for further details, see Section E).

Tax rates. The net profits earned by resident and nonresident entities, including branches of foreign entities, are taxed at a standard rate of 20%.

A reduced tax rate of 10% applies to the first EUR40,000 of the profits of small and medium-sized enterprises if certain conditions are met, including the following:

- The turnover of the company is less than EUR7,630,000.
- At least 75% of the shares is directly or indirectly held by private persons or by entities that meet the above condition.
- The capital is fully paid.

In addition, a 10% rate applies to the following:

- Royalties from the lease of property rights, such as patents, patentable inventions, brands and copyrights on artistic, intellectual or cinematographic works.
- Long-term capital gains on the transfer or assignment of patents, patentable inventions or improvement of patents and the granting of licenses to use the rights described in the above bullet.
- Interest derived from securities giving access to the company's capital. These securities include share purchase warrants (*obligations à bons de souscription d'actions*, or OBSAs), Oceane Bonds convertible into new or existing shares, bonds with redeemable share subscription warrants (*obligations à bons de souscription en actions remboursables*, or OBSARs) and certain other securities.

Tax incentives. Business enterprises engaged in, among other activities, hotel industry, transport industry, tourism and information technology services industries may apply for a tax holiday regime.

The mechanism of the tax assistance for these activities is a deduction for direct investments from taxable income. The mechanism allows a 50% tax allowance (that is, 50% of the investment is deductible). As a result, the company may not be taxable on its taxable income if the amount of total income is below 50% of the invested amount.

In addition, companies that subscribe to the capital of a company registered in Saint-Martin that invests in the industries listed above may benefit from this deduction.

In several cases, an approval procedure must be performed to benefit from the deduction.

The tax assistance for investment regime applies to investments realized before 31 December 2025.

Administration. In general, companies must file a tax return within three months following the end of their financial year.

Corporate income tax is prepaid in four installments. Companies with a financial year ending on 31 December must pay the installments on 15 March, 15 June, 15 September and 15 December. The balance of corporate tax is due by 15 May of the following year. Other companies must pay the balance of corporate tax due within four months following the end of their financial year.

In general, late payment and late filing are subject to a 10% penalty. If additional tax is payable as a result of a reassessment of tax, interest is charged at 0.4% per month (4.8% per year). Many exceptions and specific rules apply to interest and penalties.

Capital gains. Under the corporate income tax rules, in general, no distinction is made between the taxation of capital gains and the taxation of other income. In general, all income is taxed at the standard income tax rate of 20%.

Capital gains derived from the sale of qualifying participations are exempt from tax. Qualifying participations must satisfy both of the following conditions:

- They must be considered to be *titres de participation* (specific class of shares for accounting purposes that enables the shareholder to have a controlling interest) or be eligible for the dividend participation exemption regime (see *Dividends received* in Section C).
- They must have been held for at least two years before their sale.

However, corporate income tax applies to 5% of the gross capital gains (that is, not reduced by any related costs) realized on qualifying participations. As a result, the effective tax rate on such gains is 1%.

Corporate income tax applies to 10% of the gross capital gains derived from the sale of industrial property rights if they have been held for at least two years before their sale.

Dividends paid. Saint-Martin does not levy withholding tax on dividend distributions.

Foreign tax relief. Saint-Martin domestic law grants a tax credit with respect to tax on foreign-source income that has already been taxed in its source country, even in the absence of a double tax treaty. The tax credit equals the amount of tax paid in the source country, up to the corresponding amount of tax due in Saint-Martin for this income.

C. Determination of trading income

General. The assessment is based on financial statements prepared according to French generally accepted accounting principles, subject to certain adjustments.

All expenses incurred with respect to conducting a business are, in principle, deductible.

Dividends received. To compute taxable profit, favorable tax treatment may apply to dividends received by companies established in Saint-Martin that qualify as parent companies and receive dividends from companies established in Saint-Martin or abroad.

To qualify for this favorable treatment, the following conditions must be met:

- The parent company must be liable for corporate income tax.
- The parent company must hold a minimum of 5% of the distributing company's capital (financial rights and voting rights) or the amount paid for the shareholding is at least EUR1 million.
- The shares are held by the parent company for at least one year.

If the above conditions are met, 95% of the dividends received from the subsidiary are exempt from corporate income tax for the parent company. The remaining 5% that is still taxable may not exceed expenses and costs that the parent company incurred during the tax year.

Inventories. Inventory is normally valued at the lower of cost or market value. Cost must be determined under a weighted average

cost price method. A first-in, first-out (FIFO) basis is also generally acceptable, but a last-in, first-out (LIFO) basis is not permitted.

Reserves. In determining accounting profit, companies must book certain reserves, such as reserves for a decrease in the value of assets, risk of loss or expenses. These reserves are normally deductible for tax purposes. In addition, the law provides for the deduction of special reserves, including reserves for foreign investments and price increases.

Capital allowances. In general, assets are depreciated using the straight-line method. However, specific assets are generally depreciated using the declining-balance method.

Depreciable assets composed of various parts with different characteristics must be depreciated on a separate basis. These assets must be split into the following:
- A principal component or structure
- Additional components

The depreciable amount of each asset must be spread out over its likely useful life for the company, which corresponds to the time period during which the company may expect to derive a profit from it. The depreciation method applied to each asset (straight-line method or accelerated method) must also be consistent with the pace at which the company expects to derive a profit from the asset.

Periodic assessment of the residual value of each component must be conducted to establish a (non-tax deductible) provision for impairment if needed.

For tax purposes, the depreciation of assets that have not been split into components and the depreciation of the asset's principal component that has been split into components can be spread out over the useful life commonly accepted in business practices. This rule does not apply to buildings acquired by real estate investment companies. The following are some of the acceptable straight-line rates.

Asset	Rate (%)
Commercial buildings	2 to 5
Office buildings	4
Furniture	10

Certain specified assets may be depreciated using accelerated depreciation methods. For example, hotel investments (movable or immovable) may be fully depreciated over a 12-month period.

Relief for tax losses. Tax operating losses can be carried forward for an unlimited number of years. They may also be carried back to offset profits in the preceding three years. If losses are carried back, a credit is granted rather than a refund. The credit may be used in the following five years and is refundable in the sixth year if it is not used.

Groups of companies. Related companies subject to corporate tax may elect to form a tax-consolidated group. Under the tax-consolidation regime, the parent company files a consolidated

return, thereby allowing the offset of losses of one group entity against the profits of related companies. The parent company then pays tax based on the net taxable income of companies included in the consolidated group, after certain adjustments for intra-group provisions are made, such as the following:

- Intra-group asset or share transfers, as well as any subsequent depreciation related to these transfers, are neutralized.
- Waivers of debts and subsidies between members of the group are neutralized.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Business activity tax (*taxe générale sur le chiffre d'affaire*, or TGCA); levied in principle on all sales of goods and services provided in exchange for payment within the territory of Saint-Martin by persons acting independently as producers, traders or persons supplying services	4
Contribution des patentes; subject to certain exemptions that have a limited scope, the tax is payable each year by individuals and legal entities that regularly carry on a non-salaried business activity in Saint-Martin; a company may request a cap set at 3% of the value-added generated in the preceding year	
Companies in general; tax base is the cost of equipment and movable assets (such as furniture, vehicles and computers)	26.48%
Companies exercising a noncommercial activity (such as persons in the medical sector, lawyers, accountants, auditors, architects, consulting engineers, software designers and surveyors); the tax base is revenue	5

E. Miscellaneous matters

Foreign-exchange controls. Saint-Martin does not impose any specific foreign-exchange controls. The euro (EUR) is the official currency. The US dollar (USD) is used on a daily basis.

Payments to residents of tax havens or to uncooperative states or territories. Under Article 238 A of the Saint-Martin Tax Code, interest, royalties and other remuneration paid to a recipient established in a tax haven or on a bank account located in a tax haven are deemed to be fictitious and not at arm's length. As a result, to deduct the amount paid, the Saint-Martin entity must prove that the operation is effective (that it effectively compensates executed services) and is at arm's length.

For purposes of the above rules, a privileged tax regime is a regime under which the effective tax paid is 50% lower than the tax that would be paid in Saint-Martin in similar situations.

Controlled foreign companies. Under Section 209 B of the Saint-Martin Tax Code, if Saint-Martin companies subject to corporate income tax in Saint-Martin have a foreign branch or if they hold,

directly or indirectly, an interest (shareholding, voting rights or share in the profits) of at least 50% in any type of structure benefiting from a privileged tax regime in its home country (the shareholding threshold is reduced to 5% if more than 50% of the foreign entity is held by Saint-Martin companies acting in concert or by entities controlled by the Saint-Martin company), the profits of this foreign entity or enterprise are subject to corporate income tax in Saint-Martin. Such foreign entity is known as a CFC. If the foreign profits have been realized by a legal entity, these profits are taxed as a deemed distribution in the hands of the Saint-Martin company. If the profits have been realized by an enterprise (an establishment or a branch), these profits are taxed as profits of the Saint-Martin company.

For purposes of the above rules, a privileged tax regime is a regime under which the effective tax paid is 50% lower than the tax that would be paid in Saint-Martin in similar situations.

Tax paid by a CFC in its home country may be credited against Saint-Martin corporate income tax.

The CFC rules do not apply if the profits of the foreign entity are derived from an activity effectively performed in the country of establishment. However, this exception does not apply if either of the two following circumstances exists:
- More than 20% of the profits are derived from portfolio management activities (involving securities, shares and outstanding debts) and intangible rights management.
- The total profits derived from the items mentioned in the first bullet and from intercompany services represent more than 50% of the profits of the foreign entity.

In such circumstances, the Saint-Martin company may nevertheless try to establish that the principal effect from the use of the foreign entity is not the obtaining of an advantage from a privileged tax regime.

F. Tax treaties

A tax treaty between France and Saint-Martin entered into force in 2010. Saint-Martin has not signed any other tax treaty, and tax treaties signed by France do not apply in Saint-Martin.

Under the Saint-Martin-France tax treaty, the following are the general withholding tax rates:
- Dividends: 15%
- Interest: 10%
- Royalties: 0%

Withholding tax exemption applies under certain conditions.

Saint-Martin grants a tax credit with respect to tax on foreign-source income that has already been taxed in its source country, even in the absence of a double tax treaty. For details, see *Foreign tax relief* in Section B.

(a) The general tax rate of 25% applies to resident companies and nonresident companies with a permanent establishment (PE) in São Tomé and Príncipe. Income derived from oil activities is subject to a specific regime, which includes a tax rate of 30%. Companies exclusively engaged in the agricultural sector benefit from a 50% exemption regarding the respective taxable income.

(b) Nonresident companies without a PE in São Tomé and Príncipe are subject to a final withholding tax at a rate of 20% on certain types of income.
(c) Capital gains are taxed as business income.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or IRC) is levied on resident and nonresident entities.

Under São Tomé and Príncipe's General Tax Code, legal entities with a registered office and place of effective management in São Tomé and Príncipe are deemed to be resident for tax purposes.

Resident entities. Resident companies and other entities, including non-legal entities, whose principal activity is commercial, industrial or agricultural, are subject to IRC on worldwide profits, but a foreign tax credit may reduce the amount of IRC payable (see *Foreign tax relief*).

A 50% IRC exemption applies to entities exclusively engaged in agricultural activities.

Nonresident entities. Companies or other entities that operate in São Tomé and Príncipe through a PE are subject to IRC on their profits attributable to the PE. General administrative costs attributable to the PE may be deductible under certain conditions.

Income earned by companies or other entities without a PE in São Tomé and Príncipe are subject to IRC through a withholding tax mechanism.

A nonresident entity is deemed to have a PE in São Tomé and Príncipe if it has one of the following fixed places of business to carry out commercial, industrial, agricultural, forestry, livestock or fishing activities:
- A place of management
- A branch
- An office
- A factory
- A workshop
- A natural resources' extraction site

In addition, a building, installation or assembly yard qualifies for PE purposes if the activity is carried on for more than six months.

Installations, platforms and vessels rendering prospecting and exploration services with respect to natural resources may also attract a PE in São Tomé and Príncipe if the activity is carried out for more than six months.

Free-Zone Regime. São Tomé and Príncipe has implemented a Free-Zone Regime, which grants several tax incentives. Among other incentives, entities included in this regime are entitled to benefit from a tax exemption (covering all taxes for a period of 10 years), as well as exemptions on income of any kind paid to nonresidents. In addition, these entities are not subject to any foreign-exchange controls on their funds held in foreign currency.

Law 09/2023, which is a temporary law (valid from 8 September 2023 to 8 September 2027), provides legislative authorization for the government to create additional incentives to the Investment Code, including tax and non-tax incentives.

Taxation groups. The following taxation groups are established in the IRC Code:

- Group 1, which includes resident entities with an annual turnover (expected for the current year or based on the previous year), equal to or greater than STN500,000 (approximately USD23,161), as well as public undertakings, public companies, partnerships limited by shares and PEs of nonresident entities, regardless of whether their annual turnover exceeds the threshold
- Group 2, which, as a secondary legal regime, includes all companies not included in Group 1 (Group 1 is mandatory for companies that have annual turnover equal to or greater to STN500,000 [approximately USD23,161]), as well as other taxable persons that carry out commercial, industrial or agricultural activities or that provide services, even if on an occasional or temporary basis Entities in this group are subject to simplified bookkeeping or the simplified system for the calculation of taxable income.

Taxpayers subject to IRC and personal income tax (Imposto sobre o Rendimento das Pessoas Singulars [IRS] in Portuguese) with an annual turnover of STN1 million or above, as well as those who, regardless of the turnover volume, need to have accounting records duly organized as per the local domestic rules, must have an invoicing software, through which all the invoices issued must be processed under the scope of their economic activity (all actions, transactions and operations that a company carries out as part of its core business).

Tax rates. IRC is levied at the following rates:

Type of enterprise	Rate (%)
Companies or other entities with a head office or effective management control in São Tomé and Príncipe, whose principal activity is commercial, industrial or agricultural	25*
PEs	25
Nonresident companies or other entities without a head office, effective management control or a PE in São Tomé and Príncipe; income is subject to withholding tax	20

* Companies exclusively engaged in the agricultural sector benefit from a 50% exemption regarding the respective taxable income.

Certain types of income are subject to withholding tax at a rate of 20% if it is obtained in São Tomé and Príncipe and if the beneficiary is subject to IRC.

A participation exemption mechanism (full or partial) applies to domestic dividends (see *Dividends*). Dividends received from abroad are subject to IRC, but a foreign tax relief mechanism can be applied (see *Foreign tax relief*).

Simplified regime of taxation. Micro and small-sized resident companies that have annual turnover of less than STN500,000 (approximately USD23,161) and meet certain other conditions may opt to be taxed under the simplified regime of taxation established for companies included in Group 2.

Companies in Group 2 may choose one of the following regimes:

- Simplified accounting records for computing taxable profit.

- Simplified taxation regime, based on presumed margins over the turnover (ranging from 20% to 30%), with a minimum amount of taxable income equal to 18 minimum monthly salaries, as per Article 58 (9) of the São Tomé Corporate Income Tax Code. Under Decree Law No. 24/2015 of 23 December 2015, the minimum monthly salary varies as a function of the number of employees and total turnover, ranging from STN800 to STN1,600 (approximately USD36 and USD72, respectively).

Capital gains. Capital gains are taxed in São Tomé and Príncipe as business income and subject to the general rate of IRC. Capital gains correspond to the positive difference between the sales proceeds, net of expenses incurred on the sale, and the acquisition value, as adjusted by depreciation, impairment relevant for tax purposes and an official index.

Fifty percent of the capital gains derived from disposals of certain qualifying assets held for more than one year may be exempt if the corresponding sales proceeds are reinvested in tangible fixed assets during a four-year period, consisting of the year before the disposal, the year of the disposal and the two subsequent years after the disposal, and to the extent that such tangible fixed assets are not acquired from a related entity in secondhand condition. A statement of the intention to reinvest the sales proceeds must be included in the annual corporate income tax return in the year of disposal. The remaining 50% of the net gain derived from the disposal is subject to tax in the year of the disposal.

If only a portion of the proceeds is reinvested, the exemption is reduced proportionally. If no reinvestment is made by the end of the second year following the disposal, the net capital gain that remains untaxed (50%) is added to taxable profit for that year and compensatory interest is payable.

Administration. In general, the tax year is the calendar year. However, through a request to the tax authorities, nonresident entities with a PE may adopt a different tax year.

All companies engaged in activities in São Tomé and Príncipe must register with the tax department to obtain a taxpayer number.

Entities included in Group 1 and Group 2 (except for those subject to the simplified taxation regime) must file an annual corporate income tax return, together with their financial statements and other documentation. For entities in Group 1, the deadline is 30 April of the year following the tax year. For entities included in Group 2, the deadline is 20 February of such year.

Entities subject to the simplified taxation regime are not required to submit an annual tax return.

All companies must make three advance payments of IRC in June, September and December of the tax year, each equal to 25% of the IRC paid in the preceding year. These payments may be credited against the final tax assessment for the tax year and any remaining amount due must be paid with the submission of the year-end tax return. Excessive advance payments are refunded to taxpayers.

Penalties are imposed for the failure to file tax returns and satisfy other compliance obligations. If, on the final assessment, the

tax authorities determine that a further payment is required and that the taxpayer is at fault, interest is imposed on the amount of the additional payment. Fines, which are generally based on the amount of tax due, are also imposed. If the tax due is not paid, interest is imposed from the date of the tax authorities' notice that an additional payment is due.

Binding rulings. The General Tax Code grants the taxpayer the possibility of obtaining a binding ruling. The binding ruling is limited to a certain time period, which is determined on a case-by-case basis by the tax authorities.

Dividends. Dividends paid by companies to residents and non-residents are generally subject to withholding tax at a rate of 20%.

On distributions to resident parent companies, the 20% withholding tax is treated as a payment on account of the final IRC due.

Under a participation exemption mechanism, a resident company may deduct 100% of dividends received from another resident company if both of the following conditions are met:
- The recipient owns directly at least 20% of the capital.
- The recipient held the interest for an uninterrupted period of at least one year before the date of distribution of the dividends or will subsequently complete this holding period.

If the holding period or the minimum participation conditions are not met, the recipient may deduct 50% of the dividends received for purposes of computing taxable income.

Foreign tax relief. Foreign-source income is taxable in São Tomé and Príncipe. However, direct foreign tax may be credited against the local tax liability, limited to the lower of the following amounts:
- The amount of tax incurred in the foreign jurisdiction
- The amount of IRC attributable to the foreign-source income

C. Determination of trading income

General. Taxable profit is determined according to the following rules:
- For companies included in Group 1, the taxable profit is the net accounting profit computed in accordance with the generally accepted accounting principles, adjusted for positive and negative equity variations and adjusted or corrected by the provisions in the IRC Code. Positive or negative equity variations are considered capital gains or losses for tax purposes.
- For companies included in Group 2 subject to the regime of the simplified accounting records, the taxable profit is based on the specific accounting records required for this regime and equals the difference between the profits and costs (deemed necessary), pertaining to the tax year.
- For companies included in Group 2 subject to the simplified taxation regime, the taxable profit is computed by the application of different coefficients (depending on the activity of the company) to the turnover.

Expenses that are considered essential for the generation or maintenance of profits are deductible. However, certain expenses

are not deductible for IRC purposes. These include, but are not limited to, the following:

- Illicit expenses, which are expenses not in compliance with local law
- Financial lease rents incurred by the lessee that represent the part of the rent intended for financial amortization
- Provisions and impairments (except for those provided in the tax law)
- IRC and other income taxes, including payments on account and withholding tax
- Taxes and other costs of third parties that the company is not legally authorized to bear
- Penalties of any kind, including compensatory interest
- Payments to entities resident in a country, territory, or region with a privileged tax regime
- Confidential or improperly documented expenses
- Entertainment expenses to the extent that they exceed 2% of turnover
- Compensation or indemnities paid for insurable risk events
- 50% of the expenses incurred by employees when traveling in their own vehicles at the service of the employer if these amounts are not charged to clients, excluding the amounts subject to personal income tax
- 50% of the expenses incurred with respect to a travel allowance (travel bonuses and compensation, which differ from the expenses mentioned in the preceding bullet), excluding amounts subject to personal income tax
- Amounts due for the rental without a driver of light passenger or mixed vehicles, in the part corresponding to the value of the depreciation of these vehicles which, under the terms of the law, are not accepted as a cost
- Fuel expenses insofar as the taxable person does not prove that they relate to goods belonging to its assets (items that are owned by the company and recorded in its balance sheet as assets) or the taxable person uses the goods under a leasing regime and that the normal consumption related to the company's corporate purpose is not exceeded

Inventories. Inventories must be consistently valued by one of the following criteria:

- Effective cost of acquisition or production
- Standard costs in accordance with adequate technical and accounting principles
- Cost of sales less the normal profit margin, under certain conditions
- Other methods of valuation subject to prior authorization from the tax authorities

Changes in the method of valuation must be justifiable and acceptable to the tax authorities.

Provisions. The following provisions are deductible:

- Bad and doubtful debts, based on a judicial claim or on an analysis of the accounts receivable
- Inventory losses
- Litigation processes involving items that would represent costs of that year

- Technical provisions imposed on insurance companies and financial institutions by the regulatory authorities of São Tomé and Príncipe

Depreciation. In general, depreciation is calculated using the straight-line method.

Maximum depreciation rates are established by law. If rates that are less than 50% of the official rates are used, part of the depreciation costs will not be tax deductible in the future (that is, in the tax periods that go beyond the maximum period of useful life; this is determined by dividing 100 by the minimum official depreciation rate, which corresponds to half of the standard depreciation rate established by law).

The following depreciation or amortization costs are nondeductible:

- Depreciation or amortization of assets not subject to effective depreciation
- Depreciation of immovable property with respect to the component related to the value of the land or any other component not subject to effective depreciation
- Depreciation or amortization costs computed at rates greater than the maximum accepted rates
- Depreciation costs deriving from the use of rates of less than half of the maximum rates
- Depreciation of light passenger vehicles valued at more than STN200,000 (approximately USD9,265), leisure boats and airplanes (unless allocated for public transportation or to a leasing business)

Relief for tax losses. Tax losses may be carried forward for five years. The amount that may be deducted is not capped. Loss carrybacks are not allowed.

Companies included in Group 2 cannot deduct the tax losses of previous years.

Groups of companies. The law of São Tomé and Príncipe does not provide a special tax regime for groups of companies (that is, a tax-consolidation regime).

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Special Consumption Tax; imposed on the import and production of specific goods; the previous form of calculation of this tax was changed, in that previously a rate was applied to the purchase price of the product and, with the new wording of the law, for certain products a value in STN is applied to the unit, while for other products a rate is applied	
Alcoholic beverages	Up to STN50 per liter/ 10% over the factory selling price.
Soft drinks and carbonated beverages	STN2 per liter

Nature of tax	Rate
Tobacco products	Up to STN15 per pack/unit/gram
Firearms and fireworks	5% over the Cost, Insurance and Freight (CIF)
Jewelry	STN125 per gram
Airplanes, personal ships and motorbikes	Up to STN10,000 per unit
Firearms	STN5,000 per unit/10% over the CIF
Specific food products	STN8 per kilogram
Value added tax (VAT or Imposto sobre o Valor Acrescentado [IVA], in Portuguese); entered into force on the 1 June 2023 revoking the Consumption Tax and republishing the Special Consumption Tax previously in force; VAT is imposed on the transmissions, and importation of goods and services made within the national territory	
General rate	15%
Reduced rate	7.5%
Stamp duty; levied on financial transactions, corporate transactions, transfers of assets and documented legal acts; transactions subject to and not exempt from VAT remain outside the scope of stamp duty; stamp duty entered into force with VAT.	
Credit operations	0.75%
Interest, premiums, commissions or consideration for financial services	3.5%
Guarantees	0.5%
Insurance	0%
Life and occupational accident insurance	3.5%
Other insurances	6.5%
Bills, promissory notes, credit notes and money orders	0.5%
Corporate transactions	0.6%
Transfer of real estate	1%
Transfer of licenses	5%
Leasing and subleasing	10%
Property leasing	1%
Signature recognition	100%
Notarial acts	0%/15%
Registration, forensic and procedural acts	15%
Administrative acts (for each unit)	STN250
Contract deeds (on each sheet)	STN20
Social security contributions regime; the new social security contributions regime (total of 14%) was suspended, but did not revoke the previous regime in force, which provides for contributions payable on gross employee remuneration (6% for the employer and 4% withheld from employee remuneration)	10%

Nature of tax	Rate
Property transfer tax (SISA); levied on property value (acquisition value of the property declared by the contracting parties or the property tax value registered for tax purposes at the local tax office, whichever is higher)	
General rate	8%
Whenever the purchaser or the purchaser's partners are resident in a territory subject to a clearly more favorable tax regime	15%
Urban property tax; imposed annually on the assessed tax value of the property; payable by the owner of the property; several exemptions may apply on request to the tax authorities	0.1%
Tourism Tax; applicable to hotels and travel agents that operate cruise ships; burden of this tax falls on the hotel guests and the passengers of the cruises; the tax finances the National Tourism Fund	STN75 (approximately USD3.5) per night

E. Miscellaneous matters

Foreign-exchange controls. The currency in São Tomé and Príncipe is the dobra (STN).

São Tomé and Príncipe imposes foreign-exchange controls in certain situations.

Foreign PE profits. Transactions between the head office and a foreign PE must respect the arm's-length principle.

Mergers and reorganizations. Mergers and other type of corporate reorganizations may be neutral for tax purposes in São Tomé and Príncipe if certain conditions are met.

Controlled foreign companies. A resident shareholder in São Tomé and Príncipe is deemed is deemed to have a substantial holding in a controlled foreign company (CFC) if either of the following circumstances exist:

- The shareholder owns directly or indirectly, 25% or more in the capital of the foreign company.
- The shareholder owns 10% or more of the foreign company's capital, and more than 50% of the foreign company's capital is owned (directly or indirectly) by entities resident in São Tomé and Príncipe.

In the computation of its taxable profit, a shareholder resident in São Tomé and Príncipe must include the profits after taxes of the CFC in proportion to its total direct or indirect participation.

Under the IRC Code, payments made by a resident entity in São Tomé and Príncipe to nonresidents entities subject to a more favorable tax regime are not deductible for tax purposes, unless the taxpayers can demonstrate that such payments relate to an effective operation and have no abnormal character or are not excessive. However, the deduction of these expenses may be subject to further analysis of the tax authorities, particularly with respect to

the level of the payment of the respective taxes due (effective tax liability).

A company is considered an entity subject to a more favorable regime if it is not subject to tax on its income or if the amount of the tax effectively paid is lower than 60% of the tax that would be due if such entity was resident for tax purposes in São Tomé and Príncipe.

Related-party transactions. For related-party transactions (transactions between parties with a special relationship), the tax authorities may make adjustments to taxable profit that are necessary to reflect transactions on an arm's-length basis.

A special relationship is deemed to exist if one entity has the capacity, directly or indirectly, to influence in a decisive manner the management decisions of another entity. This capacity is deemed to exist in the following relationships:

- Between one entity, and its shareholders and their spouses, ascendants and descendants, if they possess, directly or indirectly, 20% of the capital or voting rights of the entity
- Between two entities in which the same shareholders and their spouses, ascendants and descendants hold, directly or indirectly, a participation of not less than 20% of the capital or voting rights
- Between two entities in which, as a result of their commercial, financial, professional or juridical relations, directly or indirectly established or practiced, a situation of dependence exists in the fiscal year

Debt-to-equity rules. A limitation to the deduction of interest expenses applies if the total amount of total debt of the taxpayer is excessive. The amount of debt includes all loans granted by shareholders, in cash or in kind, regardless of the agreed type of payment, and credits resulting from the commercial operation that are overdue for more than six months.

For purposes of the above rule, a loan is considered an excessive loan if either of the following circumstances exist:

- The total amount of debt of the taxpayer is higher than twice its equity at any time during the fiscal year.
- The total amount of debt of the taxpayer to any shareholder holding a participation of 20% or more is higher than twice the shareholder's equity participation.

Status of the emigrant investor. Law 13/2022 (Status of the Emigrant Investor) regulates the status of emigrants of São Tome and Príncipe. For purposes of the law, an investing emigrant is any person with São Tome and Príncipe nationality, with proof of the quality of the emigrant and with permanent residence abroad, who makes an investment in São Tomé and Príncipe, duly authorized under the terms of the law.

This law also provides the incentives and benefits for the eligible investments, which must adhere to the general incentives foreseen in the Investment Code and in other relevant legislation and applicable to the respective activity sectors, but it also provides the following special incentives:

- The dividends and profits distributed to the emigrant investor and originating from authorized foreign investment are exempt from taxation

- The purchase of construction or finishing materials for the emigrant investor to build, expand or upgrade his first home in São Tomé and Príncipe is exempt from customs duties
- An emigrant investor when importing a new vehicle may benefit from an 80% reduction in customs duties and taxes

These tax benefits are allowed during a period of five years. The benefits do not apply to financial sectors.

After the exemption period is over, the profits and dividends of the investing emigrant that is the holder of a company legally incorporated abroad with an established a branch in São Tomé and Príncipe are taxed at a flat rate of 10%, except for more favorable provisions contained in agreements entered into between São Tomé and Príncipe and the host country of the investing emigrant.

Creation of the Single State Collection Document. Decree No. 20/2023 created the Single State Collection Document as the document that expresses the pecuniary obligation arising from the relationship between the state and the taxpayer. It is applied throughout the national territory in a compulsory manner by all services responsible for collecting and delivering state revenue, as well as by all other entities that, by legal provision, must collect state revenue.

F. Tax treaties

São Tomé and Príncipe has double tax treaties currently in force with Cape Verde and Portugal. São Tomé and Príncipe has also ratified a tax treaty with Morocco, but this treaty is not yet in force.

A. At a glance

Corporate Income Tax Rate (%)	
Companies Engaged in Natural Gas Investment Activities	20
Oil and Hydrocarbon Production Companies	50 to 85 (a)
Other Companies	20
Capital Gains Tax Rate (%)	20
Withholding Tax (%) (b)	
Dividends	5
Interest	5
Royalties	15
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (c)

(a) For further details, see Section B.
(b) For further details and a complete listing of withholding taxes, see Section B. The withholding tax rates in Saudi Arabia range from 5% to 20%.
(c) For further details, see Section C.

B. Taxes on corporate income and gains

Income tax. Income tax is assessed on profits of the following:

- A resident capital company with respect to shares owned directly or indirectly by persons operating in oil and hydrocarbon production, with the exception of shares directly or indirectly owned by persons engaged in the production of oil and hydrocarbons in resident capital companies that are listed in the Saudi Stock Exchange (Tadawul) and the shares owned directly and indirectly by these companies in capital companies
- A resident capital company (only on profits attributable to shares owned by non-Saudi or non-Gulf Cooperation Council [GCC] shareholders; see below)
- A resident non-Saudi or non-GCC natural person who carries on a business in Saudi Arabia
- A nonresident company that carries on business in Saudi Arabia through a permanent establishment
- A nonresident without a permanent establishment in Saudi Arabia that has taxable income from sources in Saudi Arabia (tax is assessed through withholding tax)
- A person engaged in the field of natural gas investment
- A person engaged in the production of oil and hydrocarbon materials

Partners in partnerships (that is, general partnerships, unincorporated joint ventures and limited partnerships) are subject to tax rather than the partnerships themselves.

For income tax purposes, non-Saudis do not include citizens (nationals) of countries that are the members of the GCC. Members of the GCC are Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates. The share of profits attributable to interests owned by GCC nationals in a company is subject to Zakat (see Section D). The share of profits attributable to interests owned by non-GCC nationals in that company is subject to income tax.

Rates of tax. All companies, including companies engaged in the business of natural gas investment activity, are taxed at a rate of 20%.

Companies engaged in the production of oil and other hydrocarbons (upstream business; also, see next paragraph) are subject to tax on their net profit at rates ranging from 50% to 85%. The slab rate is determined based on the capital investment of the company. The following are the tax rates.

Total capital investment of company	Rate of income tax (%)
More than SAR375 billion (USD100 billion)	50
SAR300 billion to SAR375 billion (USD80 billion to USD100 billion)	65
SAR225 billion to SAR300 billion (USD60 billion to USD80 billion)	75
Not more than SAR225 billion (USD60 billion)	85

Companies engaged in the production of oil and other hydrocarbons should segregate the downstream businesses from the oil and hydrocarbons production activities by carrying out the downstream business through an independent legal entity within five years, effective from 1 January 2020 (period of segregation of activities). Downstream business is all works carried out after the production of oil and hydrocarbons, which includes, but is not limited to, refining, transportation and marketing of oil and hydrocarbons products. The income tax rate on the tax base from downstream business is 20%. Complex rules apply for the calculation of income tax of companies engaged in the production of oil and other hydrocarbons (due to segregation of upstream and downstream activities), and it is suggested that specific advice be obtained.

Saudi Regional Headquarters Program. On 5 December 2023, Saudi Arabia announced a 30-year corporate income tax and withholding tax holiday applicable to the regional headquarters (RHQ) of multinational companies in Saudi Arabia. Following this announcement, the Zakat, Tax and Customs Authority (ZATCA) published the RHQ Tax Rules on 16 February 2024 as well as more detailed guidelines on 15 April 2024, which clarify certain RHQ tax matters, including the following:

- RHQs will be eligible to benefit from tax incentives if the criteria set by the Ministry of Investment of Saudi Arabia (MISA) are met.
- RHQs need to comply with the economic substance requirements prescribed by the ZATCA. Otherwise, penalties and potential revocation of tax incentives may be imposed. RHQs shall submit an annual report using the form that will be prescribed by the ZATCA.

- If an RHQ engages in activities outside the scope of its RHQ license, these would be considered as ineligible activities, which should be separately recorded and subject to regular tax and Zakat rules.

Withholding tax. A Saudi resident entity, including a permanent establishment of a nonresident, is required to withhold tax from payments made to nonresidents that do not have a legal registration or a permanent establishment in Saudi Arabia with respect to income earned from a source in Saudi Arabia. This rule applies regardless of whether the payer is considered to be a taxpayer under the regulations and whether such payments are treated as a tax-deductible expense in the Saudi resident entity's tax declaration. The following are the withholding tax rates.

Type of payment	Rate (%)
Payments for technical or consultancy services, payments for services for international telecommunications, rental, airline tickets, air or sea freight charges, dividends distributed, returns on loans (see next paragraph) and insurance or reinsurance premiums	5
Royalties	15
Management fees	20
All other payments	15

Loan fees (interest expenses and commissions) on interbank deposits paid to nonresident banks are exempt from Saudi withholding tax if such deposits remain with the Saudi resident borrower banks for a maximum period of 90 days. Resident borrower banks are required to submit an annual statement attested by the Saudi Arabian Monetary Authority listing the names of the nonresident lending banks, their addresses, periods of lending and the amount of loan fees paid.

The party withholding the tax must register with the ZATCA before the settlement of the first tax payment. The party withholding the tax must deposit the tax withheld with the ZATCA within the first 10 days of the month following the month in which the taxable payment is made and issue a certificate to the nonresident party. A delay fine of 1% for each 30 days of delay is computed after the lapse of 30 days from the due date of tax until the date on which the tax is paid. An annual withholding tax return must be filed within 120 days following the end of the tax year.

Capital gains. In general, capital gains are treated as ordinary income, together with other income earned for the same period, at a rate of 20% if the individual is a person subject to tax in Saudi Arabia and if the gain is realized in connection with the person's business activities. However, capital gains arising on the sale of shares traded on the stock exchange are exempt from tax in accordance with the following rules:

- For the disposal of shares traded on the Saudi Stock Exchange (Tadawul), the disposal must be done in compliance with the Capital Market Law in Saudi Arabia.

- For the disposal of shares traded on a foreign stock exchange, the securities must also be traded on the Saudi Stock Exchange (Tadawul) for the tax exemption to apply.
- In all cases, the shares must have been acquired after 30 July 2004 (the date of enforcement of Saudi tax law).

Based on a Circular issued by the ZATCA, capital gains realized from sale of the following shares in a listed entity are also eligible for tax exemption (if the above conditions are met):
- Sale of founders' shares
- Sale of bonus shares (or stock dividends)
- Sale of shares through a privately negotiated transaction (pursuant to the Saudi Capital Market Authority Law and implementing regulations)

Gains on the sale of shares by a nonresident shareholder in a Saudi Arabian limited liability company is also subject to tax at a rate of 20%.

Administration. All persons subject to tax (excluding nonresidents who derive income from a source in Saudi Arabia and are subject to withholding tax) are required to register with the ZATCA before the end of their first fiscal year. Failure to register with the ZATCA results in the imposition of a fine ranging from SAR1,000 to SAR10,000.

A taxable entity that has a permanent establishment or commercial registration in Saudi Arabia must file its annual tax declaration with the ZATCA based on its accounting books and records within 120 days following the end of the tax year and pay the income tax due with the tax declaration. However, the ZATCA may also request audited financial statements before issuing the final tax assessments.

The Saudi Arabian Income Tax Regulations require certification of annual tax declarations reporting taxable revenue in excess of SAR1 million. A locally licensed chartered accountant is required to certify the validity of the information contained in the taxpayer's return and also certify the following:
- The information contained in the declaration is taken from the taxpayer's books and records (maintained in Arabic and in Saudi Arabia) and is in accordance with such records.
- The return is prepared according to the standards, requirements and provisions of the Saudi Arabian Income Tax Regulations.

The nonresident partners of partnerships are subject to tax, rather than the partnerships themselves. However, partnerships must file an information declaration within 60 days after the end of the tax year.

Fines for non-submission of tax declarations by the due date may be imposed at a rate of 1% of the total revenue, with a maximum fine of SAR20,000. A fine is also calculated based on a percentage of the underpaid tax. Such a fine is payable if it exceeds the amount of the fine based on total revenue. The following are the percentages applied to underpaid tax:
- 5% of the underpaid tax if the delay is up to 30 days from the due date

- 10% of the underpaid tax if the delay is more than 30 and not more than 90 days from the due date
- 20% of the underpaid tax if the delay is more than 90 and not more than 365 days from the due date
- 25% of the underpaid tax if the delay is more than 365 days from the due date

An advance payment on account of tax for the year is payable in three installments. The installments are due by the end of the sixth, ninth and 12th months of the tax year. Each installment of advance payment of tax is calculated in accordance with the following formula:

$$25\% \times (A - B)$$

For the purposes of the above calculation, "A" equals the taxpayer's liability as per the tax declaration for the preceding year and "B" equals tax withheld at source for the taxpayer in the preceding year.

A taxpayer is not required to make advance tax payments in a year if the tax liability for the preceding year was less than SAR2 million.

A delay fine of 1% for each 30 days of delay after the lapse of 30 days from the due date of tax until the date the tax is paid.

Dividends. Dividends paid to nonresident shareholders are subject to withholding tax at a rate of 5% (see *Withholding tax*). After-tax profit remittances of a branch (permanent establishment) are also considered dividends under the Saudi Income Tax Regulations.

Dividend income or bonus shares earned by a resident company on its investments in a resident or a nonresident capital company is exempt from tax if the ownership in the investee company is 10% or more and if the investment is held for a period of one year or more.

Foreign tax relief. Relief is not provided for foreign taxes paid (unless covered by a double tax treaty).

C. Determination of tax payable

Taxable profits. Tax liabilities are assessed by the ZATCA on the basis of the audited financial statements, as adjusted for tax purposes. In certain cases (for example, permanent establishments of nonresidents that do not maintain books of accounts in Saudi Arabia, foreign airlines, and foreign freight and land and marine transport companies operating in Saudi Arabia), tax may be assessed under the "presumptive basis." Under the presumptive basis, no financial statements are presented, and the tax liability is assessed on deemed profit calculated at rates specified in the tax regulations.

Nondeductible expenses. Certain expenses are not deductible in calculating taxable profit, including the following:

- Expenses not connected with the earning of income subject to tax
- Payments or benefits to a shareholder, a partner or their relatives if they constitute salaries, wages, bonuses or similar items or if they do not represent an arm's-length payment for property or services

- Entertainment expenses
- Expenses of a natural person for personal consumption
- Income tax paid in Saudi Arabia or another country
- Financial penalties and fines paid or payable to any party in Saudi Arabia except those paid for breach of contractual terms and obligations
- Payments of bribes and similar payments, which are considered criminal offenses under the laws of Saudi Arabia, even if paid abroad

Allocation of overhead and indirect expenses. A branch of a nonresident company cannot claim deductions for head office costs that are allocated to the branch on an estimated or allocation basis, including royalties and interest and commission charges from the head office. However, certain certifiable direct costs incurred abroad are deductible.

Technical costs. For tax purposes, in general, technical costs are expenses that relate to engineering, chemical, geological or industrial work and research even if incurred wholly abroad by the main office or other offices. These costs are generally allowed as deductions if they can be substantiated by certain documents, such as technical services agreements, head office auditors' certificates and invoices.

Under the new tax regulations, payments for technical and consultancy services are subject to withholding tax at a rate of 5%. For details regarding withholding taxes, see Section B.

Contributions to foreign social insurance, pension and savings plans. Contributions to a retirement fund, social insurance fund or any other fund established in or outside Saudi Arabia for the purpose of an employee's end-of-service benefits (retirement) or to meet the employee's medical expenses is deductible if all of the following conditions are satisfied:

- The fund has an independent legal status and has financial statements audited by an independent licensed auditor.
- The allowable deduction does not exceed the unfunded liabilities at the beginning of the year.
- The entitlement to the benefit is mentioned in the employment contract.
- The employer submits the fund's information to the ZATCA.

Contributions to Saudi social insurance with respect to an employee's share are not deductible from Saudi-source revenue.

Provisions and reserves. Provisions for doubtful debts, termination benefits and other similar items are not deductible. Specific write-offs and actual employment termination benefit payments that comply with Saudi Arabian labor laws are deductible. Provisions for doubtful debts are allowed as deductible expenses for banks if they are confirmed by the Saudi Arabian Monetary Agency.

Interest deductibility. Deductions may be claimed for loan fees (interest expenses and commissions) incurred with respect to the earning of income subject to tax. However, the maximum deduction for loan fees is restricted to the total of loan income plus 50% of tax-adjusted profits (excluding loan fees and loan income).

Loan fees exceeding this restriction are disallowed as a deduction and may not be carried forward to future years. Banks are excluded from the above limitation.

Saudi Arabian tax law does not contain any specific provisions on thin capitalization other than the limit on the interest deduction described above.

Depreciation. Depreciation is calculated for each group of fixed assets by applying the prescribed depreciation rate to the remaining value of each group at the fiscal year-end.

The remaining value for each group at the fiscal year-end is calculated as follows:

The total remaining value of the group at the end of the preceding fiscal year	X
+ 50% of the cost of assets added during the current year and the preceding year	X
– 50% of the proceeds from assets disposed of during the current year and the preceding year, provided that the balance is not negative	(X)
= Remaining value for the group	X

The tax law provides the following depreciation rates.

Asset	Rate (%)
Land (non-depreciable)	0
Fixed buildings	5
Industrial and agricultural movable buildings	10
Factories, plant, machinery, computer hardware and application programs (computer software) and equipment, including cars and cargo vehicles	25
Expenses for geological surveying, drilling, exploration expenses and other preliminary work to extract natural resources and develop their fields	20
All other tangible and intangible depreciable assets that are not included in the above groups, such as furniture, aircraft, ships, trains and goodwill	10

Assets acquired under build-operate-transfer (BOT) or build-operate-own-transfer (BOOT) contracts must be depreciated over the period of contract or the remaining period of contract.

Cost of repairs or improvements of fixed assets are deductible, but the deductible expense for each year may not exceed 4% of the remaining value of the related asset group at year-end. Excess amounts must be added to the remaining value of the asset group and depreciated.

Relief for losses. Losses may be carried forward indefinitely. However, the maximum loss that can be offset against a year's profit is 25% of the tax-adjusted profits for that year. Saudi tax regulations do not provide for the carryback of losses.

If a change of 50% or more occurs in the underlying ownership or control of a capital company, no deduction is allowed for the non-Saudi share of the losses incurred before the change in the tax

years following the change, unless the company continues with the same business activities.

D. Other significant taxes

The following table summarizes other significant taxes.

Other significant taxes	Rate (%)
Zakat; a religious levy imposed on Saudi/GCC shareholders' share in Saudi Arabian companies; Zakat is calculated and paid by a Saudi Arabian resident capital company with respect to the share of a Saudi/GCC individual or corporate shareholders; Zakat is levied on the Zakat base of a resident capital company; the Zakat base is broadly calculated as capital employed (for example, share capital and retained earnings) that is not invested in fixed assets, long-term investments and deferred costs, as adjusted by net results of operations for the year that is attributable to Saudi or GCC shareholders; complex rules apply to the calculation of Zakat liabilities, and it is therefore suggested that Zakat payers seek specific advice suited to their circumstances; in 2024, the New Zakat Regulation (NZR) was issued, which is applicable for years commencing from 1 January 2024; Zakat is assessed between a minimum and maximum range as defined in the NZR	Zakat is calculated at 2.578% of the net assessable funds or the Zakat base (in case the Zakat payer uses the Gregorian year to prepare its accounts)
Value-added tax	Exempt/0/15
Excise tax	50/100
Social security contributions	
Social insurance tax (GOSI)	
Annuity (pension) for Saudi nationals	
Employer share	9
Employee share	9
Occupational hazard; payable by employer; applicable to Saudi nationals and expatriates	2
Unemployment insurance (SANID); applicable to Saudi nationals only	
Employer share	0.75
Employee share	0.75

E. Miscellaneous matters

Foreign-exchange controls. Saudi Arabia does not impose foreign-exchange controls.

Supply and erection contracts. Profits from "supply only" operations to Saudi Arabia are exempt from income tax (whether the contract is made inside or outside Saudi Arabia) because the supplier trades "with" but not "in" Saudi Arabia. The net profits of operations that include supply, erection or maintenance are subject to tax, and the contractors are required to register with the ZATCA and submit a tax declaration in accordance with the tax regulations.

The following information must generally be submitted in support of the cost of imported materials and equipment:
- Invoices from the foreign supplier
- Customs clearance document
- If the supplying entity is the head office of the Saudi Arabian branch, a certificate from the external auditor of the head office confirming that the cost claimed is equal to the international market value of the equipment supplied (usually the contracted selling price)

Subcontractors. Payments to subcontractors, reported by a taxpayer in its tax return, are subject to closer scrutiny by the ZATCA. The taxpayer is required to withhold tax due on payments to nonresident subcontractors and to deposit it with the ZATCA unless the taxpayer can provide a tax file number or tax clearance certificate as evidence that such subcontractor is settling its tax liability.

Tax is not required to be withheld from payments to subcontractors resident in Saudi Arabia. However, government procurement regulations provide for the retention of 10% of the contract value until the completion of the statutory formalities including the submission of the certificate from the ZATCA.

Imports from head office and affiliates. A Saudi "mixed" entity (with Saudi/GCC shareholders and non-Saudi/non-GCC shareholders) is expected to deal on an arm's-length basis with its foreign shareholders or any company affiliated with its foreign shareholders. The company may be required to submit to the ZATCA a certificate from the seller's auditors confirming that the materials and goods supplied to the Saudi Arabian company were sold at the international market price prevailing at the date of dispatch. This requirement also applies to foreign branches importing materials and goods from the head office for the fulfillment of their Saudi contracts.

Transfer pricing. Transfer pricing (TP) bylaws, which were issued in February 2019, contain mandatory legislative provisions regarding transactions among related parties and documentation requirements following the Base Erosion and Profit Shifting (BEPS) Action 13 standard. They also prescribe TP methods and establish other administrative procedures, including the submission of related-party disclosure forms and TP affidavits.

The TP bylaws require Saudi Arabian entities and permanent establishments, including branches of foreign companies that are subject to the Corporate Income Tax Law, which includes mixed entities in Saudi Arabia (those that pay both corporate tax and Zakat), to maintain a TP Master File and Local File if the aggregate arm's-length value of the transactions between related parties exceed the minimum threshold of SAR6 million. The

taxpayers, including mixed entities, are also required to file the TP disclosure form together with the corporate income tax return and submit a TP affidavit issued by a licensed accountant in Saudi Arabia.

In addition, entities that are members of multinational enterprise groups (either Zakat or corporate income tax taxpayers) with consolidated group revenue exceeding SAR3.2 billion during the year immediately preceding the current reporting year must submit a Country-by-Country (CbC) report within 12 months after the end of the group's fiscal year. They can also submit the CbC report at the location of their headquarters instead of Saudi Arabia or other jurisdictions in which they operate if there is an active CbC exchange mechanism between Saudi Arabia and these countries. Moreover, these qualifying multinational enterprises also need to file a CbC reporting notification together with their annual tax return and in the Automatic Exchange of Information (AEOI) portal of the Saudi Arabian tax authority within 120 days after the end of the fiscal year.

On 7 April 2023, the ZATCA announced the issuance of the Decision of the Board of Directors of the Zakat, Tax and Customs, approving changes that will include Zakat payers within the scope of the Saudi Arabian TP bylaws. The new requirements for Zakat payers will be implemented in two phases in accordance with the amended TP bylaws, which have been recently published. Which of the two phases to apply will depend on the Zakat payers' aggregate value of related-party transactions during the year. Zakat payers are expected to comply with these TP requirements for the financial years starting on or after 1 January 2024, so that all related-party transactions are conducted on an arm's-length basis. Among the relevant changes, the amended TP bylaws will also include provisions for entering into advance pricing agreements (APAs) negotiated with the ZATCA if requested by income tax and Zakat payers.

Mutual agreement procedure. ZATCA published the Mutual Agreement Procedure (MAP) Taxpayer Guidance (MAP Guidance) under which taxpayers in Saudi Arabia may choose to initiate MAP requests to relieve double taxation or resolve treaty-based tax disputes in a timely manner, if they believe that tax was not applied in accordance with the relevant treaty.

The MAP Guidance was issued to facilitate access to the MAP and includes information on how a MAP request should be initiated, to whom it should be presented and what information should be included in the request. This is in line with Saudi Arabia's commitment to the BEPS Action 14 minimum standard as a member of the BEPS Inclusive Framework.

Electronic invoicing (e-invoicing). Saudi Arabia has begun implementing e-invoicing, which is intended to improve the efficiency of the filing process for taxpayers and increase compliance with tax laws and regulations. Businesses are required to implement the e-invoicing process in two phases. Phase 1, referred to as the generation phase, started on 4 December 2021, and is now live. Phase 1 mandates the generation of e-invoices and e-notes, including provisions related to their processing and recordkeeping. Phase 2, referred to as the

integration phase, is effective from 1 January 2023, and is being implemented in waves based on taxpayer revenues. Phase 2 mandates the integration of the taxpayer's system with the tax authority, along with the transmission of e-invoices and e-notes for validation.

F. Tax treaties

The table below shows the withholding rates for dividends, interest and royalties provided under Saudi Arabia's double tax treaties that are in force and effective as of May 2024.

Certain other tax-exempting provisions (for example, for sovereign wealth funds) are contained in certain protocols to Saudi tax treaties.

To benefit from the reduced rates or exemptions under double tax treaties, additional conditions should be met (for example, the recipient is required to be the beneficial owner of the related gain).

The treaty benefits are not applicable automatically and should be claimed from the ZATCA in each particular case by submitting the Q7-B form and other supporting documents (for example, a tax residence certificate). The taxpayer may claim the treaty benefit up front and follow double tax treaty rules, or the taxpayer may pay the tax under domestic income tax law and then claim a refund from the ZATCA.

(a) The 0% rate generally applies to payments to government bodies.

(b) The 0% rate applies to income from debt claims paid on loans granted, insured or guaranteed by a public institution for the purposes of promoting exports.

(c) The 5% rate applies to dividends if the beneficial owner is a government of the other contracting state, the central bank of the other contracting state or any entity that is wholly owned by the government of the other contracting state or that has invested in the capital of the company paying the dividends at least USD300,000 or its equivalent in any other currency.

(d) The 0% rate applies to income from debt claims if the loan agreements were approved by the government.

(e) The 0% rate applies to income from debt claims that are indirectly financed by government bodies.

(f) The 5% rate applies to dividends paid to a shareholder (other than the partnership) that is the beneficial owner and directly owns at least 20% of the shares of the company paying the dividends.

(g) The 0% rate applies to income from debt claims paid by a national of either contracting state to a bank or financial institution that has the nationality of either contracting state.

(h) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.

(i) The 0% rate applies to dividends paid to a shareholder (other than the partnership) that is the beneficial owner and directly owns at least 25% of shares of the company paying the dividends.

(j) The 5% rate applies to dividends paid to a shareholder (other than the partnership) that is the beneficial owner and directly owns at least 25% of shares of the company paying the dividends.

(k) The 5% rate applies to dividends paid to a shareholder that is the beneficial owner and owns directly or indirectly, during the period of 183 days ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares or of the total issued shares of the company paying the dividends and the company paying the dividends is not entitled to a deduction for dividends paid to its beneficiaries in computing its taxable income in Japan.
(l) The 0% rate applies to income from debt claims that are guaranteed or financed by government bodies.
(m) The 0% rate applies to income from debt claims if the payer of such income is a government body.
(n) The 5% rate applies to income from debt claims paid to financial entities or pension funds.
(o) The 5% rate applies to dividends paid to a shareholder (other than the partnership) that is the beneficial owner and directly owns at least 10% of shares of the company paying the dividends.
(p) The 5% rate applies to dividends paid to either a company or an entity wholly owned by the government, if the recipient is the beneficial owner.
(q) The 5% rate applies to dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends or if the beneficial owner is, in the case of Saudi Arabia, the state, a political or administrative subdivision or a local authority thereof (including the Saudi Arabian Monetary Agency), or a wholly owned state entity and, in the case of Portugal, the state, a political or administrative subdivision or a local authority thereof, or the Central Bank of Portugal.
(r) The 5% rate applies to dividends if the beneficial owner is a company (other than a partnership) that holds at least 10% of the voting power or voting shares of the company paying the dividends.
(s) The 2.5% rate applies to interest paid to banks.
(t) The 5% rate applies to dividends paid to government bodies.
(u) The 15% rate applies to dividends if qualifying dividends are paid by a property investment vehicle; in all other cases, the 5% rate applies to dividends.
(v) The 5% rate applies to dividends paid to a shareholder (other than a partnership) that is the beneficial owner and owns directly at least 50% of the capital of the company paying the dividends or has invested USD20 million or more or any equivalent currency in the capital of the company paying the dividends.
(w) The 7.5% rate applies to royalties paid for the rendering of services or assistance of a technical or managerial nature.
(x) The 0% rate applies if the payer of dividends is a resident of Kosovo.
(y) The 4% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.

Saudi Arabia has signed tax treaties with Iraq, Mauritania, Gambia, the Slovak Republic and Sri Lanka. These treaties were not yet in force as of May 2024.

Saudi Arabia is negotiating tax treaties with Barbados, Belgium, Bosnia and Herzegovina, Botswana, Côte d'Ivoire, Croatia, Ghana, Guernsey, Guinea-Bissau, Jersey, Lebanon, Mauritius, Moldova, New Zealand, Nigeria, San Marino, Serbia, Seychelles and Sudan.

Saudi Arabia has also entered into limited tax treaties with the United Kingdom, the United States and certain other countries for the reciprocal exemption from tax on income derived from the international operation of aircraft and ships.

Saudi Arabia signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI) on 18 September 2018, submitting its preliminary list of reservations and notifications (MLI positions). Among these are the minimum standards that must be applied by all signatories of the MLI, including the following:

- Adoption of a new preamble that updates the objectives of tax treaties to state that a treaty should not be used to "create opportunities for non-taxation or reduced taxation through tax evasion or avoidance" (Article 6 of the MLI)

- Prevention of treaty abuse by including the principal purpose test clause or the limitation of benefits clause (Article 7 of the MLI)
- Inclusion of additional wording in the treaty to improve the dispute resolution process by allowing taxpayers to initiate the MAP to resolve treaty conflicts (Article 16 of the MLI)

On 23 January 2020, Saudi Arabia deposited its instrument of ratification, including its definitive MLI positions and the final list of covered tax agreements. Accordingly, the MLI entered into force on 1 May 2020. Modification of Saudi Arabia's tax treaties will depend on the final positions adopted by other jurisdictions.

A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30 (b)
Branch Tax Rate (%)	30 (a)
Withholding Tax (%)	
Dividends and Nondeductible Expenses	10 (c)(d)
Directors' Fees	16
Interest	6/8/13/16/20 (d)(e)
Royalties from Patents, Know-how, etc.	20
Payments to Nonresidents for Services	20 (d)(f)
Payments to Resident Individuals for Services	5
Branch Remittance Tax	10 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

(a) If the company does not derive a taxable profit in a given year, the minimum tax applies. The minimum tax equals 0.5% of the turnover for the preceding tax year. For example, the minimum tax payable in 2020 is determined based on the annual turnover of 2019. The minimum tax may not be more than XOF5 million. Under the 2020 Finance Law No. 2019-17 dated 20 December 2019, new companies not registered with the tax directorate in charge for large-size companies are not subject to the payment of the minimum tax during their first three years of activities, while large-size companies are only exempted for one year.

(b) In certain circumstances the tax is deferred or reduced (see Section B).

(c) See Section B for special rules applicable to certain dividends. See Section C for a list of nondeductible expenses.

(d) This rate may be modified by a tax treaty. See Section B.

(e) The 6% rate applies to interest on long-term (that is, a duration of at least five years) bonds. The 8% rate applies to bank interest. The 13% rate applies to interest on short-term bonds. The 20% rate applies to interest on deposit receipts. The 16% rate applies to other interest payments.

(f) This tax applies to technical assistance fees and other types of remuneration paid to nonresident companies and nonresident individuals that do not have a permanent establishment in Senegal. The tax is calculated by applying a rate of 25% to a base of 80% of the remuneration that is paid (that is, an effective withholding tax rate is 20%).

B. Taxes on corporate income and gains

Corporate income tax. Senegalese companies are taxed on the basis of the territoriality principle. As a result, companies carrying on a trade or business outside Senegal are not taxed in Senegal

on the related profits. Foreign companies developing activities in Senegal are subject to Senegalese corporate tax on Senegalese-source profits only.

Tax rates. The corporate income tax rate is 30%. The minimum tax (*impôt minimum forfaitaire*, or IMF) payable equals 0.5% of the turnover for the preceding tax year. The minimum tax cannot exceed XOF5 million.

Capital gains. Capital gains are generally taxed at the regular corporate tax rate. However, the tax can be deferred if the proceeds are used by a taxable company to acquire new fixed assets (other than financial immobilizations; this concept was introduced in a tax law, dated 30 March 2018) for its companies based in Senegal within three years or in the event of a merger (or similar corporate restructurings, such as a transfer of a business unit or a demerger).

If the business is partially transferred or discontinued or if the company's fixed assets are sold at the end of its operation, only one-half of the net capital gain is taxed if the event occurs less than five years after the startup or purchase of the business, and only one-third of the gain is taxed if the event occurs five years or more after the business was begun or purchased. This regime does not apply to a transfer of shares in an unlisted predominant real estate company. A company is considered a predominant real estate company if more than 50% of its assets consist of real estate.

Capital gains on sales or transfers of immovable property are also subject to land tax (see Section D). Rights relating to mining or hydrocarbon titles are considered immovable property. Such tax can be viewed as a corporate income tax prepayment because it can be claimed on the corporate income tax return as a deductible expense.

Administration. The tax year is the calendar year. Companies must file their tax returns by 30 April of the year following the tax year.

Corporate tax must be paid in two installments (each equal to one-third of the preceding year's tax) by 15 February and 30 April. The 15 February installment may not be less than the amount of the minimum tax. The balance must be paid by 15 June.

Late payments are subject to interest at a rate of 5% of the tax due. Each additional month of delay results in additional interest of 0.5%.

Dividends paid. Dividends paid are subject to a 10% withholding tax.

Dividends distributed by a Senegalese parent company that consist of dividends received from a Senegalese subsidiary that is at least 10% owned are not subject to dividend withholding tax on the second distribution.

Unless otherwise stipulated in a double tax treaty, the profits realized in Senegal by branches of foreign companies that have not been reinvested in Senegal are deemed to be distributed and are accordingly subject to a 10% withholding tax.

Foreign tax relief. In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from Senegalese tax under the territoriality principle is taxable net of the foreign tax. However, the tax treaty with France provides a tax credit for French tax paid on dividends.

C. Determination of taxable income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the Accounting Plan of the Organization for the Harmonisation of Business Law in Africa (*Organisation pour l'Harmonisation en Afrique du Droit des Affaires*, or OHADA).

Business expenses are generally deductible unless specifically excluded by law. The following expenses are partially deductible or nondeductible:

- Foreign head-office expenses, based on the proportion of Senegal turnover to global turnover, of which the deduction is limited to 20% of Senegalese accounting profits before deduction of foreign head-office expenses (unless otherwise provided for by tax treaties).
- The following nondeductible amounts of interest:
  - The amount of interest paid to shareholders in excess of three percentage points above a standard annual rate set by the central bank
  - The amount of interest on loans in excess of 1.5 of the capital stock amount
  - The amount of interest on loans in excess of 1.5 of the capital stock amount if it simultaneously exceeds 15% of the profits derived from ordinary activities increased by the interest, depreciation and accruals taken into consideration for the determination of such profits
- Certain specific charges over specified limits.
- Certain taxes, penalties and gifts.

Reinstatement of expenses. Expenses and charges that are not allowed to be deducted from the corporate tax base, excluding depreciation and provisions, taxes, fines and penalties that are considered as irregular distributions, must be taxed at the withholding tax rate of 10/90 (11.11%). The deadline for the declaration and payment of distribution tax on reintegration is 30 April (same deadline for the filing of the corporate income tax return). The above filing deadline provisions were introduced into the Senegalese tax code by Law No. 2022-22, adopted and promulgated on 31 December 2022.

Inventories. Inventory is normally valued at the lower of cost or market value.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they are related to clearly specified losses or to expenses that are probably going to be incurred and if they appear in the financial statements and in a specific statement in the tax return.

Participation exemption. A parent company may exclude from its tax base for corporate income tax purposes 95% of the gross dividends received from a subsidiary if all of the following conditions are met:

- The parent company and the subsidiary are either joint stock companies or limited liability companies.
- The parent company has its registered office in Senegal and is subject to corporate income tax.
- The parent company holds at least 10% of the shares of the subsidiary.
- The shares of the subsidiary are subscribed to or allocated when the subsidiary is created, and they are registered in the name of the parent company or, alternatively, the parent company commits to holding the shares for two consecutive years in registered form. The letter containing such commitment must be annexed to the corporate income tax return.

The above participation exemption regime is extended to Senegalese holding companies incorporated in the form of joint stock companies or limited liability companies meeting the conditions mentioned above.

Tax depreciation. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated. The straight-line method is generally allowed. The following are some of the applicable straight-line rates.

Asset	Rate (%)
Commercial and industrial buildings	3 to 5
Office equipment	10 to 20
Motor vehicles	25 to 33
Plant and machinery	10 to 20

In certain circumstances, plant and machinery as well as other assets may be depreciated using the declining-balance method or an accelerated method.

Relief for tax losses. Losses may be carried forward three years; losses attributable to depreciation (deferred deemed amortization, which is amortization of assets reported during a loss year) may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. No fiscal integration system equivalent to tax consolidation or fiscal unity exists in Senegal.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; on goods sold and services used or rendered in Senegal	
Standard rate	18
Rate for accommodation and catering services	10
Local Economic Contribution (LEC)	
LEC based on rental fees paid by the lessee	15
LEC based on the rental value of lands, installations, fittings and constructions included in the company's assets; the rental value equals 7% of the gross value of such items	20

Nature of tax	Rate (%)
LEC based on the value added in the year preceding the tax year	1
Registration duties, on transfers of real property or businesses	1 to 5
Land tax, on capital gains resulting from sales or transfers of immovable properties	10/15
Payroll tax paid by the employer with respect to both Senegalese and foreign employees	3
Social security contributions	
Paid monthly by the employer on each employee's monthly gross salary, up to XOF63,000	1/3/5
Regular pension, paid monthly on each employee's monthly gross salary, up to XOF432,000; paid by	
Employer	8.4
Employee	5.6
Additional pension, paid monthly on an executive's monthly gross salary, up to XOF1,296,000; paid by	
Employer	3.6
Employee	2.4

E. Miscellaneous matters

Foreign-exchange controls. Exchange-control regulations exist in Senegal for financial transfers outside the West African Economic and Monetary Union (WAEMU). The exchange-control regulations are contained in the WAEMU Regulation No. 09/2010 CM, together with its appendices and the Central Bank of West African States (La Banque Centrale des Etats de l'Afrique de l'Ouest, or BCEAO) application decrees.

Transfer pricing. The Senegalese tax law contains specific transfer-pricing documentation requirements. Transactions between associated enterprises must be documented. Such documentation must include at a minimum a description of the terms of the transactions, the entities involved, a functional analysis and a detailed description of the chosen methodology to determine the applied transfer prices. The documentation must establish how transfer prices were determined and whether the terms of the intercompany transactions would have been adopted if the parties were unrelated. Overall, in accordance with Ministerial Order No. 25840 of 1 August 2023 on the content of transfer-pricing documentation, this transfer-pricing documentation must include a Master File as well as a Local File. In practice, companies establish their transfer pricing documentation in accordance with the Organisation for Economic Co-operation and Development (OECD) Guidelines.

If such information is not available on request in an audit or a litigation, the tax authorities may assess the taxable income based on information at their disposal. The concerned companies do not have to automatically file the transfer-pricing documentation. They must make it available to the National Directorate of Taxes and Domains (Direction Générale des Impôts et Domaines), which is empowered to request such documentation within the framework of an account examination procedure (field audit of the company). Failure to provide such documentation triggers a penalty of 0.5% of the value of transactions for which supporting

documentation has not been provided to the National Directorate of Taxes and Domains or completed on its request.

The 2018 tax reform implemented the following two new transfer-pricing reporting obligations:

- Transfer pricing annual report
- Country-by-Country Report (CbCR)

Transfer pricing annual report. Companies meeting the conditions listed below should file by 30 April of the year following the tax year a transfer-pricing report containing general and specific information on the group of companies and the reporting entity, such as the following:

- Transaction values
- General description of the activities
- General description of the transfer-pricing policy of the group
- Information on loans, borrowings and other transactions realized with related entities

The filing is mandatory for entities meeting one of the following conditions:

- Turnover, excluding taxes or gross assets, equal to XOF5 billion or more
- Holding, at the end of the tax year, directly or indirectly, more than half of the share capital or voting rights of a company, located in Senegal or abroad, that generates turnover, excluding taxes, or holds gross assets equal to XOF5 billion or more
- More than half of its share capital or voting rights is held by a company generating turnover, excluding taxes, or holds gross assets equal to XOF5 billion or more

Failure to submit the transfer-pricing report triggers a fiscal fine of XOF10 million.

CBCR. Multinational enterprises (MNEs) meeting the reporting conditions must electronically submit a CbCR. Under the regulation, all Senegal tax resident constituent entities that are Ultimate Parent Entities (UPEs) of an MNE group with annual consolidated group revenue equal to or exceeding XOF492 billion (approximately EUR750 million) must prepare a CbCR for tax years starting on or after 1 January 2018.

Any legal entity established in Senegal that meets one of the following conditions is also required to file this declaration:

- It is directly or indirectly owned by a legal entity established in a state that does not require the filing of a CbCR but would be required to file such a declaration if it were established in Senegal.
- It is held, directly or indirectly, by a legal entity established in a state that is not on the list of states and territories that have concluded an agreement with Senegal authorizing the automatic exchange of CbCR but with which Senegal has concluded an agreement for the exchange of information on tax matters.

The CbCR must also be filed by any legal entity established in Senegal held, directly or indirectly, by a legal entity established in a state on the list of states and territories that have concluded an agreement with Senegal authorizing the automatic exchange

of CbCR and that is required to file a CbCR under the legislation in force in that state or that would be required to file such a declaration if it were established in Senegal, when it is informed by the tax authorities of a systemic failure in the state of tax residence of the legal entity which holds it directly or indirectly.

A legal entity established in Senegal, other than the UPEs of a MNE group, is not required to file the CbCR with respect to a tax year in the event of substitute filing in another jurisdiction by the MNE group, provided that the following cumulative conditions are met:

- The jurisdiction in which the reporting entity is resident requires the filing of CbCR like that provided for under Senegalese tax provisions.
- The jurisdiction in which the reporting entity is resident has concluded an agreement authorizing the automatic exchange of CbCR with Senegal that is in force on the date on which the CbCR is due to be filed.
- The tax jurisdiction of residence of the reporting entity has not informed Senegal of a systemic failure.
- The country-by-country declaration is exchanged by the jurisdiction of residence of the reporting entity with Senegal.
- The jurisdiction in which the reporting entity is resident has been informed by the constituent entity resident for tax purposes in its jurisdiction that the latter has been designated by the MNE group to file the CbCR on its behalf.
- A notification from the constituent entity resident for tax purposes in Senegal has been received by the tax authorities, indicating the identity and tax residence jurisdiction of the reporting entity.

If two or more legal entities established in Senegal belonging to the same multinational enterprise group meet one or more of the conditions referred to in paragraphs 2 and 3 of Article 31 Ter of the Senegalese tax code, one of them may be designated by the MNE group to file the CbCR, subject to informing the tax authorities that this filing is intended to fulfill the declaration obligation imposed on all the legal entities of this MNE group that are established in Senegal.

CbCR may be exchanged automatically with states and territories that have signed an agreement with Senegal to this effect.

A failure to comply with the CbCR rules and incomplete or inaccurate filing of the CbCR are punishable by a fine of XOF25 million (approximately USD27,700).

As of now, the application of the above-mentioned CbCR requirements remains uncertain due to the lack of publication of the ministerial decree that provides the list of countries that have adopted similar CbCR regulations and have an active tax information exchange agreement with Senegal. Although the Senegalese authorities have published Ministerial Order No. 1697 dated 22 January 2024 governing the content and format of the CbCR, this text does not specify the list of countries mentioned above.

F. Treaty withholding tax rates

Senegal has entered into a multilateral tax treaty with the other Member States of the WAEMU, which are Benin, Burkina Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger and Togo (this tax treaty took effect on 1 January 2010) and has also entered into a multilateral tax treaty with the other Member States of the Economic Community of West African States (ECOWAS), which are Benin, Cape Verde, Côte d'Ivoire, Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Nigeria, Sierra Leone and Togo (this tax treaty took effect on 1 January 2022). Senegal has entered into bilateral tax treaties with Belgium, Canada, the Czech Republic, France, Iran, Italy, Kuwait, Lebanon, Luxembourg, Malaysia, Mauritania, Morocco, Norway, Portugal, Qatar, Spain, Taiwan, Tunisia, Türkiye, the United Arab Emirates and the United Kingdom.

The Senegal-Mauritius double tax treaty has been denounced by the Senegalese government, and its provisions are no longer applicable.

In addition, on 10 May 2022, Senegal ratified the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (BEPS), which entered into force on 1 September 2022.

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends %	Interest %	Royalties %
Belgium	10	16	10
Benin	10	15	15
Burkina Faso	10	15	15
Canada	10	16/20 (a)	15

Non-treaty jurisdictions	10	6/8/13/16/20 (e)	20

(a) The 20% rate applies to interest on deposit receipts. The 16% rate applies to other interest payments.
(b) The 5% rate applies if the beneficial owner of the dividends is a company that holds at least 20% of the share capital of the distributing company. The 10% rate applies to other dividends.
(c) The 6% rate applies to royalties paid for the use of industrial, commercial and scientific equipment. The 10% rate applies to other royalties.
(d) The 5% rate applies if the real beneficiary of the dividends is a company that holds at least 25% of the share capital of the distributing company. Under the United Kingdom treaty, the 8% rate applies if the beneficiary is a pension fund located in the other state. The 10% rate applies to other dividends.
(e) For details, see footnote (e) to Section A.
(f) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividend. The 10% rate applies to other dividends.
(g) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividend. The 10% rate applies to other dividends.
(h) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividend. The 10% rate applies to other dividends.
(i) See the first paragraph of this section.

The Union of Serbia and Montenegro ceased to exist on 25 May 2006. The following chapter provides information on taxation in the Republic of Serbia only.

A. At a glance

Corporate Income Tax Rate (%)	15
Capital Gains Tax Rate (%)	15
Branch Tax Rate (%)	15
Withholding Tax (%)	
Dividends	20 (a)
Interest	20 (a)
Royalties from Patents, Know-how, etc.	20 (b)
Leasing Fees for Lease and Sublease of Property Located in Serbia	20 (c)
Market Research Services, Accounting and Audit Services, and Other Legal and Business Advisory Services	20 (d)
Capital Gains	20 (e)
Payments to Listed Countries with Preferable Tax Regimes	
Interest	25
Royalties	25
Leasing Fees	25
Services	25
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) This tax applies to nonresident companies. Under the Personal Income Tax Law, dividends and interest paid to resident and nonresident individuals are taxed at a rate of 15%.

(b) This tax applies to nonresident companies. Under the Personal Income Tax Law, royalties paid to resident and nonresident individuals are taxed at a rate of 20%.

(c) This tax applies to nonresident companies. Under the Personal Income Tax Law, individuals are taxed at a rate of 20% on rent and service fees.
(d) As of 1 April 2018, only fee payments related to market research services, accounting and audit services, and other legal and business advisory services are subject to withholding tax regardless of the place where the services were provided or used.
(e) This tax applies to nonresident companies. Under the Personal Income Tax Law, individuals are taxed at a rate of 15% on capital gains.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in the Republic of Serbia (RS) are subject to tax on their worldwide income. A company is resident in the RS if it is incorporated in the RS or if its central management and control is actually exercised in the RS. Nonresident companies are subject to tax only on their income derived from the RS. Nonresident companies are companies registered in other countries that have a permanent place of business in the RS. Foreign representative offices may not derive profits from their activities in the RS. However, if they do derive such profits, the profits are subject to tax in the RS.

Rate of corporate income tax. The rate of corporate income tax in the RS is 15%.

Tax incentives. A company qualifies for a 10-year tax exemption if it invests RSD1 billion (approximately EUR8 million) in its own fixed assets and if it employs at least 100 new workers in the period of investment.

Double the amount of costs directly connected to research and development (R&D) activities that the taxpayer conducts in Serbia can be deducted.

Up to 80% of income accrued in connection with use of intellectual property rights may be excluded from the tax base if certain conditions are met. Also, 80% of capital gains derived from the transfer of intellectual property is excluded from the tax base.

Taxpayers that invest in newly formed companies conducting innovative business activity can be granted a tax credit of 30% of the investment in such companies if certain conditions are met.

A taxpayer's income deriving from the transfer of non-monetary assets without reimbursement under concession agreements is excluded from the tax base if the value of a concession agreement is more than EUR50 million. In this context, a concession agreement is an agreement between a competent state authority (including a publicly owned company) and a legal entity based on which the competent state authority gives to a domestic or foreign legal entity the commercial right to use natural resources or resources in general or public use or allows it to perform activities of general interest for the respective period under the conditions prescribed by law, with the payment of the concession fee.

The effects of the change of accounting policies caused by the first application of International Accounting Standards (IAS) or International Financial Reporting Standards (IFRS) for small and medium enterprises that cause changes of positions in the balance sheet are recognized as income or expense in the tax balance

sheet, starting from the tax period in which such corrections are implemented.

Under the Personal Income Tax Law and the Law on Compulsory Social Security Contributions, companies may be partially exempted from paying salary tax and employer social security contributions for newly employed individuals and disabled persons under the conditions specifically mentioned in the legislation.

An employer that is a legal entity and that within its activities conducts R&D in the RS may be exempt from the obligation to pay 70% of calculated and withheld tax from the salary of individuals directly engaged in R&D, proportionally for the time that such individuals spend on R&D in comparison to full-time work. Employers are also exempt from the obligation to pay 100% of the mandatory pension and disability insurance contributions for both the employee and employer parts.

Capital gains. Capital gains derived from the disposal of the following are included in taxable income and are subject to tax at the regular corporate income tax rate:

- Real estate that the taxpayer uses or used as a fixed asset in its business activities, including real estate under construction
- Intellectual property rights
- Capital participations and shares and other securities that are, according to IFRS and IAS, long-term financial investments (except certain bonds issued by government bodies or by the national bank)
- Investment units of an investment fund, in accordance with the law regulating investment funds
- Digital assets, unless the taxpayer, under the terms of the law governing digital assets, has a license to provide services related to digital assets and acquired digital assets solely for resale within the provision of services related to digital assets

Capital gains tax is also imposed on income derived by nonresident companies from disposals of the aforementioned assets (except intellectual property rights) and real estate in the RS that were not used as fixed assets in conducting business activities. These gains were previously subject to a 20% tax rate.

The possibility of claiming a tax credit has been introduced in cases in which a resident taxpayer realizes capital gains in another state and pays tax on such gains in that state.

Capital gains realized by resident companies may be offset against capital losses incurred in the same year, and net capital losses may be carried forward to offset capital gains in the following five years.

Administration. The tax year is the calendar year. Exceptionally, at the taxpayer's request, the tax period may be set within any 12 months, subject to the tax authorities' approval.

Companies must file annual tax returns within 180 days after the expiration of the period for which the tax liability is determined (usually by 30 June of the year following the tax year), except in cases of statutory changes (transactions resulting in the cessation of the legal entity), liquidation and bankruptcy. In such circumstances, companies must file returns within the following periods:

- Sixty days from the date on which the liquidation proceedings began or were completed (the companies must file two tax returns; one is related to the period before the beginning of the liquidation proceedings, while the second return covers the period during the liquidation proceedings)
- Sixty days from the date on which the bankruptcy proceedings began
- Sixty days from the date of the beginning of the implementation of the reorganization plan

Companies must make monthly advance payments of tax by the 15th day of the month following the month for which the payment is due. Companies determine advance payments based on their tax return for the preceding year. Under a self-assessment system, companies must correctly assess their tax liabilities to avoid the imposition of significant penalties.

Companies may submit an interim tax return during the tax year to increase or decrease their monthly advance payments of tax if significantly changed circumstances exist, such as changes to the company's activities or to the tax rules.

At the time of submission of the annual tax return, companies must pay any positive difference between the tax liability calculated by the company and the total of the advance payments. They may receive a refund of any overpayment, or the overpayment may be treated as a prepayment of future monthly payments.

Dividends. Resident companies include dividends received from its nonresident affiliates in taxable income.

Corporate and dividend taxes paid abroad may be claimed as a tax credit up to the amount of domestic tax payable on the dividends. Any unused amount can be carried forward for offset against corporate profit tax in the following five years. This tax credit applies only to dividends received by companies with a shareholding of 10% or more in the payer for at least one year before the tax return is submitted.

A 20% withholding tax is imposed on dividends paid to nonresidents.

An applicable double tax treaty may provide a reduced withholding tax rate for dividends (see Section F). To benefit from a double tax treaty, a nonresident must verify its tax residency status and prove that it is the true beneficiary of the income.

Foreign tax relief. Companies resident in the RS that perform business activities through permanent establishments outside the RS may claim a tax credit for corporate income tax paid in other jurisdictions, up to the amount of domestic tax payable on such income. In addition, resident companies are entitled to a tax credit for tax on interest income, income from lease fees, royalty income, dividend income (shareholding less than 10%) and service income that is withheld and paid by nonresident income payers in other jurisdictions. The tax credit is available up to the amount of domestic tax payable on a tax base equal to 40% of foreign-source income that is included in the total income of the resident company.

C. Determination of trading income

General. The assessment is based on the profit or loss shown in the financial statements prepared in accordance with International Accounting Standards and domestic accounting regulations, subject to certain adjustments for tax purposes.

Taxable income is the positive difference between income and expenses. For tax purposes, income consists of income from the following:
- Sales of products, goods and services
- Financial income
- Capital gains
- Income resulting from transfer-pricing adjustments

Tax-deductible expenses include expenses incurred in performing business activities. Expenses must be documented. Certain expenses, such as depreciation (see *Tax depreciation*), donations and entertainment expenses, are deductible up to specified limits. Impairment of assets may not be deducted unless the assets were alienated or damaged as a result of *force majeure*.

Inventories. Inventories must be valued using average prices or the first-in, first-out (FIFO) method.

Bad debt provisions and write-offs. Legal entities may deduct as expenses write-offs of receivables if such actions are in conformity with the Accounting Law. This conformity exists if the following conditions are satisfied:
- Receivables were included in the taxpayer's revenues.
- Receivables have been written off from the taxpayer's accounting books as uncollectible.
- The taxpayer has sued the debtor or claimed the debt in a liquidation or bankruptcy procedure, or the execution procedure has been initiated.

Write-offs of receivables that were not recorded as revenues in the taxpayer's accounting records are also tax-deductible expenses if the second and third conditions above are met.

Bad debt provisions are tax-deductible expenses in the period in which at least 60 days have elapsed since the due date for the payment of receivables.

Tax depreciation. Fixed assets are divided into five groups, with depreciation and amortization rates prescribed for each group. New rules for the calculation of tax amortization were introduced as of 1 January 2019 (the declining-balance method has been abandoned and the straight-line [linear] method has been introduced). Old assets, which were present at the beginning of the application of the new rules, are depreciated using the old rules until 2028. The new rulebook on amortization has been introduced.

The straight-line method must be used for all five groups. New depreciation rules also prescribe that if the depreciation calculated for accounting purposes is lower than the depreciation calculated in accordance with corporate income tax rules, the amount of accounting depreciation should also be used for tax purposes.

The following are the depreciation and amortization rates.

Group of assets	Rate (%)
I	2.5
II	10
III	15
IV	20
V	30

Group I includes immovable assets.

Starting from the 2018 tax year, tax depreciation of intangible assets should be equal to the accounting depreciation of such assets.

In addition, if the assets are acquired from a related party, the depreciation base is the lower of the following two amounts:
- Purchase price for the transfer of the fixed assets
- Acquisition price of fixed assets determined by applying the arm's-length principle

Relief for losses. Tax losses incurred in business operations may be carried forward for five years. Loss carrybacks are not allowed.

Groups of companies. Under group relief provisions, a group of companies consisting only of resident companies may offset profits and losses for tax purposes. The group relief provisions are available if a parent company holds directly or indirectly at least 75% of the shares in subsidiaries. To obtain group relief, a group must file a request with the tax authorities. If tax consolidation is allowed, the group companies must apply tax-consolidation rules for five years. Each group company files its own annual income tax return, and the parent company files a consolidated tax return based on the subsidiaries' tax returns. Any tax liability after consolidation is paid by the group companies with taxable profits on a proportional basis.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on supplies of goods and services in the RS and on imports of goods; certain tax exemptions with or without the right to deduct input VAT are granted; VAT taxpayers are legal entities and entrepreneurs who had turnover of goods and services in excess of RSD8 million (approximately EUR65,000) in the preceding 12 months or who expect to have annual turnover greater than the threshold	
Standard rate	20
Lower rate	10
Property tax, paid on ownership rights over immovable property in the RS (including residential and business buildings, apartments, garages and other underground and surface buildings) and on usage rights over city construction land; certain tax exemptions are prescribed; tax base equals the market	

Nature of tax	Rate (%)
value of the property; taxpayers that maintain accounting records self-assess and pay the tax quarterly; taxpayers that do not maintain accounting records pay tax quarterly based on a ruling issued by the local authority	
Tax rates applicable to taxpayers that are required to maintain accounting records	0.4
Tax rates applicable to taxpayers that are not required to maintain accounting records	0.4 to 2
Transfer tax; paid on transfers of ownership rights over immovable property, intellectual property rights, ownership rights over used motor vehicles (with certain exemptions) and usage rights over city construction land; certain transfers are exempt; tax base is the contract price, unless the market value is higher	2.5
Payroll taxes, on monthly gross salaries	
Tax on salary; paid by employee	10
Social security contributions (for health, pension and unemployment funds); paid by	
Employer	15.15
Employee	19.9

E. Miscellaneous matters

Foreign-exchange controls. In the RS, the local currency is the dinar (RSD).

In the RS, all payments, collections and transfers must generally be effected in dinars, but a "currency clause" may allow conversion from hard currency on the date of payment. In addition, the following transactions may be effected using foreign currencies:

- Sale and rental of immovable property
- Granting loans in the RS for the payment of imported goods and services and acquisition of immovable property
- Insurance premiums and transfers based on life insurance contracts
- Purchasing receivables and accepting payables specified in the law
- Payments of deposits representing collateral
- Donations for charitable, cultural and scientific purposes in accordance with the donation legislation
- Transactions involving guarantees specified by the law, if the underlying transaction is in foreign currency
- Allowances for business trips abroad
- Salary payments to resident individuals sent on temporary work abroad based on an agreement on investment projects, as well as to individuals employed at diplomatic and consular missions, United Nations organizations and international financial institutions in the RS
- Purchase of software and other digital products on the internet that are delivered exclusively through telecommunication, digital or information technology devices, provided that payment is made using a payment card or electronic money through a payment service provider that has its company seat in the RS

Residents and nonresidents may open foreign-currency accounts in RS banks or in foreign banks authorized to operate in the RS. Foreign currency may be held in such accounts and used for payments out of the RS, such as dividends and payments for purchases of imports, as well as for authorized foreign-currency payments in the RS.

Transfer pricing. Under general principles, transactions between related parties must be made on an arm's-length basis. The difference between the price determined by the arm's-length principle and the taxpayer's transfer price is included in the tax base for purposes of the computation of corporate income tax. Taxpayers must submit transfer-pricing documentation together with their corporate income tax return.

Country-by-Country reporting. Country-by-Country (CBC) reporting is applicable as of the 2020 fiscal year, with filing in the 2021 fiscal year. The Serbian resident ultimate parent legal entity of a multinational group with consolidated revenue above EUR750 million (in RSD equivalent) is subject to CBC reporting obligations.

Thin-capitalization rules. Related-party interest expenses and related expenses are limited to four times the value of the taxpayer's equity (10 times value for banks and financial-leasing organizations).

F. Treaty withholding tax rates

The following table lists the withholding tax rates under the treaties of the former Union of Serbia and Montenegro and under the treaties of the RS, the former Federal Republic of Yugoslavia and the former Yugoslavia that remain in force. It is suggested that taxpayers check with the tax authorities before relying on a particular tax treaty.

	Dividends %	Interest %	Royalties %

Carryforward	Unlimited (d)

(a) Various tax exemptions and reductions are available (see Section B).
(b) See Section B.
(c) See Section F.
(d) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Income tax is imposed on all income derived from sources in Singapore, and on income from sources outside Singapore if received in Singapore. However, a nonresident company that is not operating in or from Singapore is generally not taxed on foreign-source income received in Singapore. A company is resident in Singapore if the control and management of its business is exercised in Singapore; the place of incorporation is not relevant.

Remittances of foreign income in the form of dividends, branch profits and services income (specified foreign income) into Singapore by companies resident in Singapore are exempt from tax if prescribed conditions are met. For remittances of specified foreign income that does not meet the prescribed conditions, companies may be granted tax exemption under specific scenarios or circumstances on an approval basis.

Rates of corporate income tax. The standard corporate income tax rate is 17%. Seventy-five percent of the first SGD10,000 of normal chargeable income is exempt from tax, and 50% of the next SGD190,000 is exempt from tax. The balance of chargeable income is fully taxable at the standard rate of 17%.

Tax incentives, exemptions and reductions. Singapore offers a wide range of tax incentives that are generally granted on an approval basis to promote investments in selected industry sectors, including the following:

- Pioneer companies and pioneer service companies. A pioneer enterprise is exempt from income tax on its qualifying profits for up to 15 years.
- Development and Expansion Incentive (DEI). DEI companies enjoy a concessionary tax rate of 5%, 10% or 15% on their incremental income derived from the performance of qualifying activities.
- Approved royalties, technical assistance fees and contributions to research and development (R&D) costs.
- Investment allowances.
- R&D incentives. An additional 150% tax deduction (effective from the 2019 year of assessment (YA) to the 2024 YA) is allowed for certain qualifying R&D expenditure. For the 2024 to 2028 YAs, an additional 300% tax deduction on the first SGD400,000 of qualifying R&D expenditure is allowed, while an additional 150% tax deduction on the balance of qualifying R&D expenditure in excess of SGD400,000 is allowed.
- Intellectual Property (IP) Development Incentive. The IP Development Incentive is effective from 1 July 2018 to 31 December 2028. This incentive incorporates the Base Erosion and Profit Shifting (BEPS)-compliant modified nexus approach.

- Finance and treasury center incentive. Income derived from the provision of qualifying services to approved network companies and from the carrying on of qualifying activities on own account is subject to tax at a rate of 8% or 10%.
- Financial sector incentive (FSI). The FSI is designed to encourage the development of high-growth and high value-added financial activities in Singapore. A 5%, 10%, 12% or 13.5% concessionary tax rate applies to income derived from carrying on qualifying activities by approved FSI companies in Singapore. The concessionary tax rates will be streamlined to two tiers of 10% and 13.5% for new and renewal awards approved on or after 1 January 2024.
- Maritime sector incentives. Ship operators, maritime lessors and providers of certain supporting shipping services may enjoy tax incentives under the Maritime Sector Incentive, which consists of the following three broad categories:
  — International shipping enterprise
  — Maritime (ship or container) leasing
  — Supporting shipping services

  An alternative basis of tax will be available from the 2024 YA for shipping companies enjoying certain maritime sector incentives. Under the alternative basis of tax, qualifying income is taxed by reference to the net tonnage of their ships.
- Global Trader Programme (GTP). Under the GTP, approved companies enjoy a concessionary tax rate of 5%, 10% or 15% on qualifying transactions conducted in prescribed commodities and products.
- Refundable Investment Credit (RIC). The RIC is awarded on qualifying expenditures incurred by the company with respect to a qualifying project during the qualifying period. The credits are to be offset against corporate income tax payable. Any unused credits will be refunded to the company in cash within four years from when the company satisfies the conditions for receiving the credits, consistent with the Global Anti-Base Erosion (GloBE) Model Rules for Qualified Refundable Tax Credits (QRTC).

Capital gains. Capital gains are not taxed in Singapore. However, in certain circumstances, the Inland Revenue Authority of Singapore (IRAS) considers transactions involving the acquisition and disposal of assets, such as real estate, stocks or shares to be the carrying on of a trade, and, as a result, gains arising from such transactions are taxable. The determination of whether such gains are taxable is based on a consideration of the facts and circumstances of each case.

Gains on sale or disposal of foreign assets. Under the new Section 10L of the Singapore Income Tax Act 1947 (SITA), gains from the sale or disposal of foreign assets on or other 1 January 2024 that are received in Singapore by an entity of a relevant group are treated as income chargeable to tax under Section 10(1)(g) of the SITA, unless exceptions apply. Section 10L applies even if the gains are capital in nature or tax-exempt under other sections of the SITA.

Administration. The tax year, known as YA, runs from 1 January to 31 December. The period for which profits are identified for assessment is called the basis year. Therefore, income earned

during the 2023 basis year is assessed to tax in the 2024 YA. For companies engaged in business in Singapore that adopt an accounting period other than the calendar year, the assessable profits are those for the 12-month accounting period ending in the year preceding the YA.

An estimate of the chargeable income (ECI) of a company must be filed within three months after the end of its accounting year. However, companies are not required to file an ECI if their annual revenue is not more than SGD5 million for the financial year and if their ECI is nil.

The statutory deadline for filing the income tax return is 30 November. No extension of time to file the return is allowed and e-filing is mandatory for all companies.

Income tax is due within one month after the date of issuance of the notice of assessment. In certain circumstances, companies may pay tax in monthly installments on the ECI, up to a maximum of 10, with the first installment payable one month after the end of the accounting period. No installments are allowed if the ECI is submitted more than three months after the end of the relevant accounting period.

A late payment penalty of 5% of the tax due is imposed if the tax is not paid by the due date. If the tax is not paid within 60 days of the imposition of the 5% penalty, an additional penalty of 1% of the tax is levied for each complete month that the tax remains outstanding, up to a maximum of 12%.

Dividends. Dividends paid by a Singapore tax-resident company are exempt from income tax in the hands of shareholders, regardless of whether the dividends are paid out of taxed income or tax-free gains. No withholding tax is imposed on dividends.

Foreign tax relief. Singapore has entered into double tax agreements with more than 90 countries, but notably not with the United States. Under Singapore rules, a foreign tax credit is limited to the lower of the foreign tax paid and the Singapore tax payable on that income. The foreign tax credit (FTC) is granted on a country-by-country, source-by-source basis unless the resident taxpayer elects to claim FTC under the pooling method, subject to meeting certain conditions.

A unilateral tax credit system, similar to FTC relief, is also available for income derived from countries that have not entered into double tax agreements with Singapore.

C. Determination of taxable income

General. In general, book profits reported in the financial statements prepared under the financial reporting standards in Singapore are adjusted in accordance with the Singapore tax rules to arrive at taxable income.

If a company maintains its financial accounts in a functional currency other than Singapore dollars, as required under the financial reporting standards in Singapore, it must furnish tax computations to the IRAS denominated in that functional currency in a manner as prescribed by the law.

For expenses to be deductible, they must meet all of the following conditions:
- They must be incurred wholly and exclusively in the production of income.
- They must be revenue in nature.
- They must not be specifically prohibited under the Singapore tax law.

To facilitate business start-ups, it is specifically provided that a person is treated as having commenced business on the first day of the accounting year in which the business earns its first dollar of business receipt. This is known as the deemed date of commencement, and businesses may deduct revenue expenses incurred in the accounting year (not exceeding a 12-month period) immediately preceding the deemed date of commencement.

Special rules govern the deductibility of expenses for investment holding companies.

Expenses attributable to foreign-source income are not deductible unless the foreign-source income is received in Singapore and subject to tax in Singapore. In general, offshore losses may not be offset against Singapore-source income.

No deduction is allowed for the book depreciation of fixed assets, but tax depreciation (capital allowances) is granted according to statutory rates (see *Capital allowances [tax depreciation]*).

Double deductions. Double deductions are available for certain expenses relating to approved trade fairs, exhibitions or trade missions, maintenance of overseas trade offices, overseas investment development and approved salary expenditure for employees posted overseas. A sunset clause of 31 December 2025 applies to the double deduction schemes for these expenses.

Renovation or refurbishment deduction. A tax deduction is allowable on due claim, for qualifying renovation or refurbishment (R&R) expenditure incurred for the purposes of a trade, profession or business. The allowable R&R costs are capped at SGD300,000 for every three-year period, beginning with the basis period in which the deduction is first allowed. All businesses will be transitioned to a fixed three-year period with the first three-year period being from the 2025 to 2027 YAs. An option is available to accelerate the deduction of qualifying expenditure incurred on renovation or refurbishment for the 2021, 2022 and 2024 YAs in one YA instead of over three consecutive YAs, subject to an expenditure cap of SGD300,000. This option will continue to be available from 2025 YA onward. Any unused R&R deduction is allowed as a loss carryback or loss carryforward (see *Relief for trading losses*) or for group relief (see *Groups of companies*).

Inventories. Trading inventory is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out (FIFO) basis; the last-in, first-out (LIFO) basis is not accepted.

Provisions. Under FRS 109 *Financial Instruments*, impairment losses that represent 12-month expected credit loss (ECL) or lifetime ECL are recognized if some risk of default exists or even

in the absence of loss events. Only impairment losses recognized in the profit and loss statement with respect to the credit-impaired financial instruments on revenue account are allowed for tax deduction, and any reversal amount subsequently recognized in the profit and loss statement will be taxable.

Capital allowances (tax depreciation)

Plant and machinery. Tax depreciation or capital allowances are given for capital expenditures incurred on the acquisition of plant and machinery used for the purposes of a trade or business. Qualifying plant and machinery are normally written off in equal amounts over three years when claimed. An option is available to accelerate the capital allowances claim for plant and machinery acquired for the 2021, 2022 and 2024 YAs over two years (that is, 75% of the cost in the first YA and the remaining 25% in the second YA). Alternatively, expenditures on such assets may be claimed in one year if each item costs no more than SGD5,000. However, the total claim for all such assets may not exceed SGD30,000 for a YA.

The cost of the following may be written off in one year:
- Computers or other prescribed automation equipment
- Websites
- Generators
- Robots
- Certain industrial noise- and chemical hazards-control equipment

Only expenditure on certain automobiles, such as commercial vehicles and cars registered outside Singapore and used exclusively outside Singapore, qualify for capital allowances.

Land intensification allowance incentive. The land intensification allowance (LIA) incentive grants an initial allowance of 25% and an annual allowance of 5% on qualifying capital expenditure incurred on or after 23 February 2010 by businesses on the construction or renovation of qualifying buildings or structures if certain conditions are met. The application window period for the LIA incentive is from 1 July 2010 through 31 December 2025.

Intellectual properties. Writing-down allowances (WDAs) are granted for capital expenditure incurred on the acquisition of specified categories of intellectual property (IP) on or before the last day of the basis period for the 2028 YA if the legal and economic ownership of the IP lies with Singapore companies. Companies may elect a 5-, 10- or 15-year amortization period. This election is irrevocable.

On application, the legal ownership requirement may be waived for IP rights acquired on or after 17 February 2006 if the Singapore company has substantial economic rights over the IP, while the foreign parent holds the legal title.

Disposal of plant and equipment. Allowances are generally subject to recapture on the sale of qualifying plant and equipment if the sales proceeds exceed the tax-depreciated value (to the extent of the excess but not more than the allowances claimed). If sales proceeds are less than the tax-depreciated value, an additional allowance may be given.

Relief for trading losses. Trading losses may be offset against all other chargeable income of the same year. Unused losses may be carried forward indefinitely, subject to the shareholding test (see below). Excess capital allowances can also be offset against other chargeable income of the same year and carried forward indefinitely subject to the shareholding test and to the requirement that the trade giving rise to the capital allowances continues to be carried on (same trade test).

A one-year carryback of up to an aggregate amount of SGD100,000 of current-year unused capital allowances and trade losses (collectively referred to as "qualifying deductions") may be allowed, subject to meeting certain conditions and compliance with specified administrative procedures.

The carryforward and carryback of losses and capital allowances are subject to the shareholders remaining substantially (50% or more) the same at the relevant comparison dates (shareholding test). If the shareholder of the loss company is itself another company, look-through provisions apply through the corporate chain to the final beneficial shareholder.

The carryback of capital allowances is subject to the same trade test that is applicable to the carryforward of unused capital allowances.

The IRAS has the authority to allow companies to deduct their unused tax losses and capital allowances, notwithstanding a substantial change in ownership at the relevant dates, if the change is not motivated by tax considerations. If allowed, these losses and capital allowances may be offset only against profits from the same business.

Groups of companies. Under group relief measures, current-year unused losses, capital allowances and donations may be transferred by one company to another within a group, subject to meeting certain qualifying conditions. A group generally consists of a Singapore-incorporated parent company and all of its Singapore-incorporated subsidiaries. Two Singapore-incorporated companies are members of the same group if one is 75% owned by the other, or both are 75% owned by a third Singapore-incorporated company.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and Services Tax (GST); on any supply of goods and services, except an exempt supply or an excluded transaction, made in Singapore by a taxable person (a person whose annual taxable supplies exceed or are expected to exceed SGD1 million) in the course of or furtherance of business and on imports of goods into Singapore unless certain import reliefs or suspension schemes apply; effective from 1 January 2020, GST is also imposed	

Nature of tax	Rate (%)
on business-to-business (B2B) supplies of imported services by way of reverse charge and business-to-consumer (B2C) supplies of imported digital services via the Overseas Vendor Registration (OVR) regime; effective from 1 January 2023, GST is also imposed on the supplies of imported non-digital services and imports of low-value goods; the GST rate increased from 7% to 8% on 1 January 2023, and from 8% to 9% on 1 January 2024	0/9
Social security contributions (Central Provident Fund [CPF]); foreigners holding work passes are exempt	
CPF contributions are required on monthly "ordinary wages" from 1 January 2024 to 31 December 2024; the monthly salary ceiling for contributions is SGD6,800 per month for ordinary wages; contributions paid by	
Employer (limited to SGD1,156 a month)	17
Employee (limited to SGD1,360 a month)	20
(The above rates are applicable for employees aged 55 and below. Contributions on additional wages, such as bonuses are limited to the total annual wage cap of SGD102,000 less the total ordinary wages for the year. The employer's and employee's contribution rate for workers aged from above 55 to 60 is 15% and 16% respectively; lower contribution rates apply to individuals older than age 60. The government has announced that the CPF contribution rates for workers aged 55 to 70 will be gradually increased until 2030. For employees who earn total wages of less than SGD750 per month, different rates apply.)	
Skills development levy; payable by employer for all employees working in Singapore; based on the first SGD4,500 of total monthly gross remuneration or subject to a minimum of SGD2, whichever is higher; the maximum levy is SGD11.25 per month.	0.25

E. Miscellaneous matters

Foreign-exchange controls. Singapore does not impose any restrictions on the remittance or repatriation of funds in or out of Singapore.

Debt-to-equity ratios. In general, Singapore does not impose any specific debt-to-equity restrictions.

Anti-avoidance legislation. The domestic tax legislation allows the IRAS to disregard or vary any arrangement that has the purpose or effect of altering the incidence of taxation or reducing or avoiding Singapore tax liability. The IRAS may also tax profits of a nonresident in the name of a resident as if the latter is an agent of the nonresident, if the profits of the resident from

business dealings with the nonresident are viewed as lower than expected as a result of the close connection between the two parties.

The IRAS has introduced a 50% surcharge to be imposed on a taxpayer of the tax assessed on any adjustments that the IRAS has made pursuant to the anti-tax avoidance legislation. This surcharge will apply with effect from the 2023 YA. The Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI) entered into force on 1 April 2019. As of 1 March 2024, Singapore's tax treaties with 59 jurisdictions have been amended by the MLI.

Transfer pricing. Specific legislation governs the arm's-length principle to be applied to related-party transactions. The IRAS may make adjustments to the amount of income, deduction or loss of a taxpayer in cases in which the terms of commercial relations or financial relations between two related parties are not at arm's length. A 5% surcharge is imposed on transfer-pricing (TP) adjustments made for non-compliance with the arm's-length principle. A remission on the 5% surcharge may be granted under certain circumstances and subject to conditions.

The Singapore Transfer Pricing Guidelines provide guidance on the arm's-length principle and TP documentation requirements in Singapore. The guidelines on the application of the arm's-length principle are broadly consistent with the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, which endorse the arm's-length principle. Specific guidance, including a recommendation to adopt a three-step approach (conduct a comparability analysis, identify the most appropriate TP method and tested party, and determine the arm's-length results) to apply the arm's-length principle, is provided together with specific requirements relating to external benchmarking searches and the application of results.

The IRAS expects companies to maintain contemporaneous TP documentation. Effective from the 2019 YA, Singapore taxpayers are required to prepare contemporaneous TP documentation, if certain conditions are satisfied, to support their transactions with related parties, unless specifically exempted. The IRAS does not require TP documentation to be submitted together with the tax returns but taxpayers have 30 days to submit the documents on the IRAS's request. Failure to prepare contemporaneous documentation or the inability of taxpayers to substantiate transfer prices may result in the imposition of penalties for noncompliance, upward adjustment, ineligibility to invoke competent authority assistance, rejection of an Advance Pricing Arrangement (APA) application and disallowance of self-initiated adjustments. The TP documentation must be organized at the group level and entity level.

TP administration provides information and guidance on the TP audit process and the avoidance and resolution of TP disputes. The TP audit process involves the IRAS selecting taxpayers based on various risk indicators and reviewing and auditing their TP methods and documentation. The guidelines also provide

details on the step-by-step processes for the Mutual Agreement Procedure (MAP) and APAs, including sample documents for the MAP and APAs. Double tax agreements provide for the MAP to resolve instances of double taxation. MAP is a dispute-resolution process used by the competent tax authorities to resolve disputes arising under the application of double tax agreements.

Discussion and guidance are also provided with respect to TP adjustments, related-party loans, services and attribution of profits to permanent establishments (PEs).

Country-by-Country Reporting. On 21 June 2017, Singapore signed the Multilateral Competent Authority Agreement on exchange of Country-by-Country (CbC) Reports (CbCR MCAA), which enables Singapore to efficiently establish a wide network of exchange relationships for the automatic exchange of CbC Reports. As of 23 February 2024, the IRAS has activated bilateral Automatic Exchange of Information relationships for the exchange of CbC Reports with 92 jurisdictions; these facilitate the automatic exchange of CbC Reports for the Ultimate Parent Entity of Singapore multinational enterprise (MNE) groups.

Common Reporting Standard. Singapore has implemented the Common Reporting Standard (CRS), an internationally agreed standard for the automatic exchange of financial account information in tax matters. On 21 June 2017, Singapore signed the CRS Multilateral Competent Authority Agreement (CRS MCAA), which enables Singapore to efficiently establish a wide network of exchange relationships for the automatic exchange of information based on CRS. As of March 2024, there have been more than 120 signatories to the CRS MCAA, and the IRAS has also concluded more than 10 bilateral Competent Authority Agreements. The first exchange took place in September 2018.

Carbon tax. The Singapore government has implemented a carbon tax on the emission of greenhouse gases from 2019. The carbon tax is levied on facilities that directly emit at least 25,000 tons of carbon dioxide-equivalent of greenhouse gas emissions annually. The carbon tax rate is SGD5 per ton of carbon dioxide-equivalent (tCO2e) of emissions. The carbon tax rate will be increased to SGD25 per tCO2e in 2024 and 2025, SGD45 per tCO2e in 2026 and 2027, with a view to reach SGD50 to SGD80 per tCO2e by 2030. Companies may use high quality international carbon credits (ICCs) to offset up to 5% of their taxable emissions from 2024.

International Compliance Assurance Programme. The International Compliance Assurance Programme (ICAP) is an OECD initiative and is a voluntary risk assessment and assurance program to facilitate cooperative multilateral engagements between MNEs and tax administrations, which will provide MNEs with increased tax certainty on certain of their activities and transactions. The IRAS is a participating tax administration in the ICAP from 2021.

Foreign Account Tax Compliance Act. The Foreign Account Tax Compliance Act (FATCA) was enacted by the United Sates to target noncompliance with US tax laws by US persons using non-US accounts and requires financial institutions outside the United States to report on the assets held by their US account holders or be subject to 30% withholding tax on certain payments. Singapore

has entered into a Model 1 Intergovernmental Agreement (IGA) with the United States to facilitate the FATCA obligations of financial institutions in Singapore, and has been reporting financial account information to the United States since 2015.

BEPS 2.0 – Pillar Two. Singapore will implement the Income Inclusion Rule (IIR) and a Domestic Top-up Tax (DTT), which will impose a minimum effective tax rate of 15% on businesses' profits from financial years starting on or after 1 January 2025. This will apply to relevant multinational enterprise (MNE) groups that are within the scope of Pillar Two. For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (https://www.ey.com/content/dam/ey-unified-site/ey-com/en-gl/services/tax/documents/beps-2-0-pillar-two-developments-tracker.pdf).

F. Domestic and treaty withholding tax rates

A 15% withholding tax, with certain exceptions, is imposed on interest and other payments with respect to loans or indebtedness paid to nonresidents.

A 15% withholding tax, with certain exceptions, is imposed on rent or other payments for the use of movable properties paid to nonresidents.

A 10% withholding tax, with certain exceptions, is imposed on the following types of payments to nonresidents:

- Royalties for the use of, or the right to use, movable property (for example, intellectual property)
- Payments for the use of, or the right to use, scientific, technical, industrial or commercial knowledge or information

A 17% withholding tax is imposed on payments to nonresident companies for assistance or services rendered in connection with the application or use of scientific, technical, industrial or commercial knowledge or information, and for management or assistance in the management of any trade, business or profession. If services are performed outside Singapore, payments for such services are not subject to withholding tax.

The rates of withholding tax on interest and royalties may be reduced under the terms of a double tax agreement, and details of the rates applicable to treaty jurisdictions are set out below.

	Interest %	Royalties (i) %
Albania	5 (a)	5 (cc)
Armenia (z)	5 (a)	5 (cc)
Australia	10	10 (gg)
Austria	5 (a)	5
Bahrain	5 (a)	5
Bangladesh	10	10
Barbados	12 (a)	8 (cc)
Belarus	5 (a)	5 (w)
Belgium	5 (a)	3/5 (p)

(a) Exempt under certain specified circumstances.
(b) The rate is 7% for interest paid to banks or financial institutions.
(c) The 10% rate applies to interest paid to financial institutions. The 15% rate applies to other interest.
(d) The rate is 5% for interest paid to banks or similar financial institutions..
(e) The rate is 8% for interest paid to banks or financial institutions.
(f) The rate is 10% for interest paid by enterprises engaging in industrial undertakings (manufacturing, assembling and processing, construction, civil engineering and shipbuilding, production of electricity, hydraulic power, gas or the supply or water, or fishing) to financial institutions.
(g) Payments received as consideration for the use of, or the right to use, industrial, commercial or scientific equipment constitute business profits (that is, not royalties).
(h) The rate is 7.5% for interest paid to financial institutions.
(i) In certain circumstances, the reduced rates or exemptions do not apply to royalties for copyrights of literary or artistic works, including cinematographic films and films or tapes for radio or television broadcasting. Reference should be made to the applicable tax treaty.
(j) The 10% rate applies to payments relating to patents, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment or information concerning industrial, commercial or scientific experience. The 15% rate applies in all other cases.
(k) In the case of Singapore, royalties approved under the Economic Expansion Incentives (Relief from Income Tax) Act are exempt.
(l) The term "royalties" excludes royalties with respect to the operation of mines or quarries or the exploitation of natural resources. A contracting state may exempt or reduce the tax on industrial royalties in accordance with its domestic laws.
(m) The 5% rate applies if the interest is received by a bank or financial institution.
(n) The double tax agreement between Singapore and Taiwan does not contain an interest article.

(o) The 5% rate applies to payments relating to patents, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment or information concerning industrial, commercial or scientific experience.The 10% rate applies in all other cases.

(p) The lower rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.

(q) The tax rate on royalties in the recipient's country is limited to 20%.

(r) The 10% rate applies to interest arising in the Philippines with respect to the public issuance of bonds, debentures or similar obligations and paid by a company that is a resident of the Philippines.

(s) In the case of the Philippines, the 15% rate applies to royalties paid by enterprises registered with the Philippine Board of Investments (BOI) and engaged in preferred activities. It also applies to royalties paid with respect to cinematographic films or tapes for television or broadcasting. The 25% rate applies in all other cases, except for those covered by footnote (k).

(t) The 15% rate applies to payments relating to copyrights of scientific works, patents, trademarks, designs or models, plans, secret formulas or processes, industrial, commercial or scientific equipment or information concerning industrial or scientific experience. The 20% rate applies to copyrights of literary or artistic works, including cinematographic films or tapes for television or broadcasting.

(u) The 0% withholding tax rate does not apply to persons incorporated under the International Companies Act if their income or profits are not taxed at the normal rate of corporate income tax in Mauritius or any income tax comparable thereto.

(v) Under the protocol to the treaty that provides for a rate reduction on interest if a future treaty signed between Thailand and another state establishes a lower rate, the withholding tax rate applicable to interest is reduced to 10% (or exempt under certain specified circumstances).

(w) The rate also applies to payments for the use of, or the right to use, industrial, commercial or scientific equipment, which includes transport vehicles for cargo transportation.

(x) The rates are three-tiered, which vary according to the nature of the payment.

(y) The 5% rate applies to royalties paid for the use, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, or films or tapes used for radio or television broadcasting. The rate is 8% if the royalties are for the use of, or right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment. The 10% rate applies in all other cases.

(z) This double tax treaty entered into force on 3 December 2021 and is effective from 1 January 2022.

(aa) The exemption applies to interest paid to the following:
- The government of the other contracting state that is the beneficial owner of the interest
- A financial institution of the other contracting state that is the beneficial owner of the interest
- A company (other than a partnership) that is a resident of the other contracting state and that is the beneficial owner of the interest, if the interest is paid by a company that is a resident of the first-mentioned contracting state
- A resident of the other contracting state that is the beneficial owner of the interest, if the interest is paid with respect to a loan, debt-claim or credit that is guaranteed or insured by the government of either contracting state

The 10% rate applies to other interest.

(bb) The term "royalties" excludes payments of any kind received as a consideration for the use of, or the right to use, the following:
- Computer software if the payments do not constitute payments for the right to commercially exploit such computer software by reproducing, modifying or adapting the computer software for the purpose of distribution or sale or by preparing derivative works based on the computer software for the purpose of distribution or sale
- Any digital content on any media for reproduction or transmission if the payments do not constitute payments for the right to commercially exploit such digital content by reproducing, modifying or adapting the digital content for the purpose of distribution or sale or by preparing derivative works based on the digital content for the purpose of distribution or sale

(cc) The term "royalties" does not include payments for the use of, or the right to use, industrial, commercial or scientific equipment.

(dd) Payments for computer software are royalties only if such payments are made for the right to use and exploit the copyright in the program.

(ee) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, or films or tapes used for radio or television broadcasting. The rate is 10% in all other cases.

(ff) This double tax treaty entered into force on 1 December 2021 and is effective from 1 January 2022.

(gg) The term "royalties" excludes royalties with respect to the operation of mines or quarries or the exploitation of natural resources, or for the use of, or the right to use, motion picture films, tapes for use in connection with radio broadcasting or films or video tapes for use in connection with television.

(hh) The protocol to the treaty provides for a rate reduction on interest and/or royalties if a future treaty between Kazakhstan and another state establishes lower rates.

(ii) The 10% rate applies if the beneficial owner is a bank and if the loan has been granted for at least five years for the financing of the purchase of equipment or of investment projects. The protocol to the treaty provides for a rate reduction on interest if a future treaty between Brazil and any other jurisdiction, excluding any jurisdiction in Latin America, establishes lower rates.

(jj) The 15% rate applies to royalties arising from the use or the right to use trademarks. The 10% rate applies to other royalties, which includes payments of any kind received as consideration for the rendering of technical assistance.

(kk) The exemption does not apply to royalties received as consideration for the use of, or the right to use, copyrights of literary or artistic works, including cinematographic films and tapes for television or broadcasting or for information concerning commercial experience.

(ll) The 8% rate applies to royalties received for the use of, or the right to use, industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience. The 10% rate applies to royalties received for the use of, or the right to use, copyright of literary, artistic or scientific works, including cinematographic films, films or tapes used for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulas or processes.

(mm) This double tax treaty entered into force on 30 December 2021 and is effective from 1 January 2022.

(nn) The protocol to the treaty provides for a rate reduction on interest and/or royalties if a future treaty between Nigeria and any other jurisdiction establishes lower rates.

(oo) This double tax treaty entered into force on 16 August 2021 and is effective from 1 January 2022.

(pp) The 5% rate applies to royalties received for the use of, or the right to use, copyrights of literary, artistic or scientific works, including software, cinematographic films, or films, tapes or recordings used for radio or television broadcasting. The 10% rate applies to royalties received for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience.

(qq) The term "royalties" excludes any royalties or other amounts paid with respect to literary or artistic copyrights, copyrights of motion picture films or of tapes for television or broadcasting or for the operation of a mine, oil well, quarry or any other place of extraction of natural resources.

(rr) The term "royalties" includes payments of any kind received in consideration for technical services. The 5% rate applies to payments of any kind received in consideration for technical services. The 10% rate applies to payments of any kind received in consideration for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films; films or tapes for radio or television broadcasting; computer software, patents, trademarks, designs or models, plans, secret formulas or processes, for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience.

(ss) The protocol to the treaty provides for a rate reduction on interest if a future treaty between Uruguay and any other jurisdiction establishes lower rates.

(tt) The protocol to the treaty provides for a rate reduction on interest if a future treaty between Vietnam and any other state establishes lower rates.

(uu) This double tax treaty entered into force on 14 March 2022 and is effective from 1 January 2023.

On 10 October 2010, the country Netherlands Antilles, which consisted of five island territories in the Caribbean Sea (Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten), was dissolved. On the dissolution of the Netherlands Antilles, the islands of Bonaire, Sint Eustatius and Saba (BES-Islands) became part of the Netherlands as extraordinary overseas municipalities. Curaçao and Sint Maarten have both become autonomous countries within the Kingdom of the Netherlands. The former Netherlands Antilles tax laws remain applicable to Sint Maarten, with the understanding that references in the laws to "the Netherlands Antilles" should now read "Sint Maarten." This chapter provides information on taxation in Sint Maarten only. Chapters on the BES-Islands and Curaçao also appear in this guide.

A. At a glance

Corporate Income Tax Rate (%)	34.5 (a)
Capital Gains Tax Rate (%)	34.5 (a)
Branch Tax Rate (%)	34.5 (a)
Withholding Tax (%)	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10 (b)

(a) A surtax of 15% is levied on a rate of 30%, resulting in an effective tax rate of 34.5%.

(b) Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in a business in the shipping or aviation industry may be carried forward indefinitely.

B. Taxes on corporate income and gains

Profit tax. Profit tax is levied on resident and nonresident entities. Resident entities are those incorporated under former Netherlands Antilles or current Sint Maarten law, even if their management is located abroad, as well as entities incorporated under foreign law, but effectively managed in Sint Maarten. For resident entities, profit tax is, in principle, levied on the aggregate amount of net profits earned from all sources during the entity's accounting period. Nonresident entities are subject to tax on specific Sint Maarten income items, such as profits earned through a permanent establishment and income related to real estate property in Sint Maarten, including interest derived from a mortgage on such real estate property.

Tax rates. The net profits earned by resident and nonresident entities, including branches of foreign entities, are subject to the standard profit tax rate of 34.5%. However, other rates may apply to companies qualifying for tax holidays, E-zone companies, tax-exempt companies, and taxed private foundations and trusts.

Withholding taxes are not imposed on remittances of profits by branches to their foreign head offices.

Tax incentives. Reduced tax rates and other tax incentives (tax holidays) are available to new business enterprises that engage in certain activities, including tourism and land development.

Tax-exempt companies. Tax-exempt companies (TECs) are exempt from Sint Maarten profit tax. Only private limited liability companies incorporated under former Netherlands Antilles or current Sint Maarten law may qualify as TECs. TECs are only allowed to exclusively (100%) or almost exclusively (90% or more) engage in the extending of loans, investing in securities and deposits and licensing of intellectual and industrial property rights and similar property rights. To qualify as a TEC, a written request must be submitted to the Tax Inspector and certain conditions must be satisfied. TECs are not eligible for benefits under the Tax Arrangement between the Netherlands and Sint Maarten (effective as of 1 January 2017) or for benefits under any other double tax treaty of the former Netherlands Antilles or Sint Maarten. However, exchange-of-information provisions in this tax regulation, tax treaties and tax information exchange agreements apply to TECs. If a TEC loses its tax-exempt status, it is treated as a regularly taxed company subject to tax on its worldwide income, and it receives a tax-free step-up in basis. In November 2023, the Sint Maarten legislator announced that all requests for the TEC status filed on or after 3 November 2023 will not be taken into consideration in anticipation of a new legislative bill that intends to abolish the TEC regime.

Taxable private foundations and trusts. The profit tax legislation provides an option for private foundations and trusts to be subject to a reduced effective profit tax rate of 10% (including surtax). In principle, Sint Maarten private foundations and trusts are fully exempt from profit tax if they do not conduct an enterprise. After the option is exercised, the reduced effective rate of 10% applies for a period of at least three full fiscal years. After this three-year period, the private foundation can request that it no longer be subject to the reduced effective rate of 10%.

Ruling policy. Sint Maarten has an extensive advance tax ruling practice. These rulings include the following:
- Cost-plus rulings for intercompany support activities
- Minimum gross margin rulings for finance activities
- Participation exemption rulings for holding activities
- Informal capital (or cost-plus) rulings for intercompany trading activities

These rulings are usually valid for a three-year period, with an option for extension.

Other incentives. Sint Maarten also offers other incentives for specific activities, such as the international use of aircraft and ships and the insurance of risks outside Sint Maarten.

Capital gains. Under the current profit tax rules, in general, no distinction is made between the taxation of capital gains and the taxation of other income. All income is taxed at the applicable profit tax rate (34.5%). Taxation of capital gains on qualifying share interests (participation exemption) is discussed in Section C.

Administration. The standard tax year is the calendar year. However, on request and under certain conditions, a company may use a different financial accounting year as its tax year.

Taxpayers must file a provisional tax return within three months after the end of the financial year. In principle, this return must show a taxable profit that is at least equal to the taxable profit shown on the most recently filed final tax return. Any tax due must be paid at the time of filing of the provisional tax return. An extension for filing and payment with respect to the provisional tax return is not granted. On request of the taxpayer, the Tax Inspector may consent to the reporting of a lower taxable profit than the taxable profit shown on the most recently filed final tax return.

The final tax return must be filed within six months after the end of the financial year. Any difference between the tax due based on the provisional return and the tax due based on the final return must be settled at the time of the filing of the final return. On request, an extension for the filing of the final tax return can be obtained.

To ensure compliance with the rules described above, penalties may be imposed. The tax authorities may impose arbitrary assessments if the taxpayer fails to file a tax return. Additional assessments, including a penalty, may be imposed if insufficient tax is levied. A penalty of 100% of the additional tax due may be levied. Depending on the degree of wrongdoing, this penalty is normally 25% or 50%.

Dividends. Sint Maarten does not levy dividend withholding tax on dividend distributions.

Foreign tax relief. A 100% exemption from Sint Maarten profit tax is available for foreign business profits. For this purpose, foreign profits are profits earned in another country through a permanent establishment or a permanent representative in the other country, or profits earned from immovable property located in a foreign country, including the rights related to the property that is part of the business activities of the taxpayer but is deemed to be part of the foreign business. If the foreign profits are derived from a business that can be considered a low-taxed portfolio investment, a reduced exemption of 70% applies.

C. Determination of taxable income

General. Taxable profit must be calculated in accordance with the so-called principles of sound business practice.

All expenses incurred with respect to conducting a business are, in principle, deductible. However, if expenses exceed normal arm's-length charges and are incurred directly or indirectly for the benefit of shareholders or related companies, the excess is considered to be a nondeductible profit distribution (dividend). In addition, certain expenses, such as fines, penalties and expenses incurred with respect to crimes, are not deductible. Only 80% of representation expenses, as well as expenses incurred on meals, beverages, gifts, courses and seminars, is deductible.

In principle, interest expenses are deductible for tax purposes if the interest rate is determined on an arm's-length basis. However, certain restrictions apply to the deduction of interest on loans connected to certain tax-driven transactions and intragroup reorganizations. Under thin-capitalization rules, the deductibility of interest accrued or paid directly or indirectly to an affiliated TEC may be restricted.

Participation exemption. In principle, a 100% participation exemption applies for all qualifying share interests held by Sint Maarten corporate taxpayers.

In general, a shareholding qualifies for the participation exemption if it represents at least 5% of the share capital or voting power in a company or if the amount paid for the shareholding amounts to at least USD500,000. In addition, any member of a cooperative association can apply for the participation exemption.

For dividend income, additional requirements are imposed for a participation to be considered a qualifying participation. To apply the 100% exemption on dividends, either of the following conditions must be met:

- The qualifying participation is subject to a (nominal) profit tax rate of 10% (subject-to-tax clause).
- Dividends, interest or royalties received from other sources than the business of the participation do not account for 50% or more of the gross income of the participation (non-portfolio-investment clause).

The above conditions may be met on a consolidated basis. If neither of the above conditions is met, a lower participation exemption of 70% applies to dividends. The subject-to-tax clause and the non-portfolio-investment clause do not apply to the 100% participation exemption on capital gains and income received from participations that exclusively or almost exclusively hold immovable property.

Expenses that are connected with the participation, including financing expenses, are not deductible if the income is 100% tax-exempt.

Tax depreciation. In general, assets are depreciated using the straight-line method, with the residual value taken into consideration. The following are some of the applicable rates.

Asset	Rate (%)	Residual value (%)
Buildings	2 to 2.5	10
Office equipment	10 to 50	Nil
Motor vehicles	10 to 33	15
Plant and machinery	10	10

The rates listed above provide a general overview of the depreciation rates. The actual depreciation rate depends on the type of asset used by the company.

Fixed company assets acquired by taxpayers operating in Sint Maarten may qualify for accelerated depreciation at a one-time maximum annual rate of 33⅓% of the acquisition costs of the assets. Fixed company assets are assets used for a business

process for at least one business cycle, unless the assets are intended to be processed or sold.

An investment allowance deduction of 8% (12% for new buildings or restorations of buildings) is granted for acquisitions of fixed assets to the extent that the investment exceeds approximately USD2,800. The allowance is deducted from taxable income in the year of the investment and in the following year. The investment allowance deduction is recaptured in the year of sale and the subsequent year if the asset is sold within 6 years (15 years for buildings) of the date of the investment.

Groups of companies. On written request, Sint Maarten resident companies may form a fiscal unity (tax-consolidated group) for profit tax purposes. To qualify for a fiscal unity, the parent company must own at least 99% of the shares in the subsidiary. A fiscal unity may include, among others, a company incorporated under Dutch law that has its place of effective management in Sint Maarten. For profit tax purposes, the whole group is taxed as if it were one company and, as a result, the subsidiaries in the fiscal unity are no longer individually subject to profit tax.

The advantages of fiscal unity treatment for profit tax purposes include the following:

- Losses of one subsidiary may be offset against profits of other members of the fiscal unity.
- Reorganizations, including movements of assets with hidden reserves from one company to another, have no direct tax consequences for profit tax purposes.
- Intercompany profits may be fully deferred.

The fiscal unity does not apply for revenue tax purposes.

Relief for losses. Losses in a tax year may be carried forward for 10 years. No carryback is available. Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in a business in the shipping or aviation industry may be carried forward indefinitely.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Revenue tax; levied on turnover generated from goods sold and services rendered in Sint Maarten	
Standard rate	5
Real estate transfer tax	4
Import duties	0

E. Miscellaneous matters

Foreign-exchange controls. The currency in Sint Maarten is the Antillean guilder (ANG).

For foreign investors that obtain a foreign-exchange license from the Central Bank of Curaçao and Sint Maarten, no restrictions are imposed on the movement of funds into and out of Curaçao and Sint Maarten. In general, the Sint Maarten Central Bank automatically grants foreign-exchange licenses for remittances abroad. Residents are subject to several foreign-exchange

regulations imposed by the Sint Maarten Central Bank. However, residents may be granted nonresident status for foreign-exchange control purposes. Some reporting requirements exist for statistical purposes.

Transfer pricing. In general, intercompany charges should be determined on an arm's-length basis.

F. Tax treaties

Provisions for double tax relief are contained in the tax treaty with Norway and in the Tax Arrangement between the Netherlands and Sint Maarten (effective as of 1 January 2017). Under a measure in the Tax Arrangement between the Netherlands and Sint Maarten, dividend distributions by a Dutch subsidiary to its Sint Maarten parent company are, in principle, subject to 15% Dutch dividend withholding tax or to reduced 0% Dutch dividend withholding tax if certain conditions are fulfilled. Sint Maarten does not impose withholding tax on payments from Sint Maarten to residents of other countries.

The Netherlands Antilles has entered into tax information exchange agreements with Antigua and Barbuda, Australia, Bermuda, British Virgin Islands, Canada, Cayman Islands, Costa Rica, the Czech Republic, Denmark, Faroe Islands, Finland, France, Germany, Greenland, Iceland, Italy, Mexico, New Zealand, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Spain, Sweden, the United Kingdom and the United States. As a result of the constitutional reform of the Kingdom of the Netherlands, the tax treaties entered into by the Netherlands Antilles became automatically applicable to the surviving countries, which are the legal successors of the Netherlands Antilles.

Under the latest published Organisation for Economic Co-operation and Development (OECD) list, Sint Maarten qualifies as an approved-listed jurisdiction.

The government of the former Netherlands Antilles entered into bilateral agreements with the European Union (EU) Member States with respect to the application of the EU Council Directive on taxation of savings income. The Sint Maarten (former Netherlands Antilles) law to implement the directive took effect in July 2006.

The Kingdom of the Netherlands has entered into many bilateral investment treaties that also apply to Sint Maarten.

Sint Maarten also signed the OECD Convention on Mutual Administrative Assistance in Tax Matters.

The Tax Arrangement between the Netherlands and Sint Maarten, which entered into force on 1 March 2016 (effective as of 1 January 2017), replaced the Tax Regulation for the Kingdom of the Netherlands.

The chapter below is based on the existing law in the Slovak Republic as of 1 March 2024. Because further changes to the 2024 tax rules are possible, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	15/21 (a)
Capital Gains Tax Rate (%)	15/21 (a)
Branch Tax Rate (%)	15/21 (a)
Withholding Tax (%)	
Dividends	0/7/10/35 (b)
Interest	19/35 (c)
Royalties	19/35 (d)
Income from Media	19/35 (e)
Net Operating Losses (Years)	
Carryback	0
Carryforward	4/5 (f)

(a) For tax years beginning on or after 1 January 2021, the 15% rate applies to so-called micro-entities whose taxable income does not exceed EUR60,000.

(b) The 7% rate applies to the dividend income of individuals paid rom profits generated in tax periods beginning on or after 1 January 2017 up to and including 2023. For profits generated in tax periods beginning on or after 1 January 2024, the dividend income of individuals will be taxed at a rate of 10%. The 35% rate applies if either of the following circumstances exists:

- The dividends are paid out from profits generated in tax periods beginning on or after 1 January 2017 and the dividends are paid to or received from a taxpayer of a non-cooperative state, that is, an entity having its registered seat or individual having permanent residence in a state not listed on the approved list published by the Ministry of Finance of the Slovak Republic
- The payer is not able to demonstrate who is the beneficial owner of the dividends.

(c) This tax applies to nonresidents only. For resident companies, interest is included in taxable income subject to corporate tax (an exception is, for example, interest on the funds of bank account). The higher rate of 35% applies if either of the following circumstances exists:

- The payments are made to taxpayers of a non-cooperative state.
- The payer is not able to demonstrate who is the beneficial owner of the interest payments (see Section B).

Exemption from or reduction of local withholding tax on the interest payments may be provided by the following:

- A relevant double tax treaty
- Provisions of the Income Tax Act implementing the European Union (EU) Interest-Royalty Directive.

(d) This tax applies to nonresidents only. For resident companies, royalties are included in taxable income subject to corporate tax. The higher rate of 35% applies if either of the following circumstances exists:

- The payments are made to taxpayers of a non-cooperative state.
- The payer is not able to demonstrate who is the beneficial owner of the royalties (see Section B).

Exemption from/reduction of local withholding tax on the interest payments may be provided by the following:

- A relevant double tax treaty
- Provisions of the Income Tax Act implementing the EU Interest-Royalty Directive

(e) This tax applies to income received by authors (individuals) for contributions to newspapers, radio and television. It is possible for the author and the payer of the income to agree that no withholding tax be applied; in such case, the income is taxed through the tax return of the author at tax rates of 15%, 19% and 25%. See Section B for details on when the 35% rate applies.

(f) A tax loss incurred in a tax year beginning before 1 January 2020 may be carried forward proportionally for a period of four consecutive years. The tax loss incurred in a tax year beginning on or after 1 January 2020 or later may be carried forward for a period of five consecutive years and a tax loss may be utilized up to 50% of the calculated tax base. Special rules apply to so-called micro-entities.

B. Taxes on corporate income and gains

Corporate income tax. Slovak (resident) companies are subject to corporate income tax on their worldwide income. Slovak companies are those incorporated or having their place of management in the Slovak Republic. Foreign (nonresident) companies are subject to corporate income tax only on their Slovak-source income, such as income attributable to a permanent establishment.

Under Slovak law, a permanent establishment is a fixed place or facility for nonresidents to carry out activities in the Slovak Republic. A permanent establishment includes an administrative location, branch, office, workshop, sales location, technical facility or location for research and extraction of natural resources. The fixed place or the facility is considered to be permanent if the activities are carried out continuously or repeatedly. Repeated intermediary services related to transportation and accommodation that are rendered through a digital platform (a hardware or

software platform required to create and administer applications) are also deemed to have their fixed place in the Slovak Republic. In the case of one-off activities, the place or facility is considered to be permanent if the duration of the activities exceeds six months, either continuously or divided into 2 or more periods in the course of 12 consecutive calendar months. A building site, construction site or assembly works site (as described in the Commentary to Article 5, Paragraph 3 of the Organisation for Economic Co-operation and Development [OECD] Model Tax Treaty) is regarded as a permanent establishment only if the duration of the activities performed by a tax nonresident and its related parties exceeds six months. The provision of services in the Slovak Republic by an enterprise through its employees or other personnel is considered to create a "service permanent establishment" if the provision of services exceeds 183 days in any consecutive 12-month period. A permanent establishment also includes the activity of an agent if both of the following conditions are satisfied:

- The agent negotiates, enters into agreements, acts as an intermediary in the conclusion of contracts or plays a principal role leading to the conclusion of contracts that are routinely concluded without material modification by the enterprises.
- These contracts are concluded in the name of the enterprise, or for the transfer of the ownership of, or for the granting of the right to use, property owned by that enterprise or that enterprise has the right to use, or for the provision of services by that enterprise.

Rates of corporate tax. The corporate income tax rate is 15% or 21%, except for withholding tax (see Section A). For tax years beginning on or after 1 January 2021, the 15% rate applies only to so called micro-entities whose taxable income does not exceed EUR60,000.

Incentives. To promote investments, the Slovak government provides potential local and foreign investors with investment incentives that are proportionate to their activities in the Slovak Republic. The maximum limits for state aid are determined by the EU regulations and are driven by the relative development of the country or region in which an investment project is located and the unemployment rate in that region. The limits are set as a percentage of eligible costs of an investment project.

Under the Slovak Regional Investment Aid Act, investment aid may be granted to support the realization of investments in manufacturing productions, technology centers and shared-service centers.

The Slovak Republic provides the following indirect forms of incentives:

- Tax relief
- Transfer of immovable assets owned by the state or municipality at a price lower than the market price

The Slovak Republic provides the following direct forms of incentives:

- Cash grants on acquisitions of fixed assets
- Cash grants on newly created jobs
- Cash grants on training

Tax relief. Under the Slovak Regional Investment Aid Act, companies may apply for a maximum of 50% tax reduction, which can be used for a maximum of 10 consecutive tax years.The tax relief can be provided for newly established companies (new production) and also for existing companies (extension of existing production).

Transfers of immovable assets owned by the state or municipality at a price lower than the market price. In exceptional circumstances, as part of regional aid, the government may award a financial grant or discount from the market price with respect to a transfer of immovable assets (usually land and buildings) to investors by the state or municipalities.

Cash grants for the acquisition of fixed assets. Cash grants can be made for the acquisition of tangible fixed assets (for example, land, buildings, and plant and machinery) and intangible fixed assets (for example, patents, licenses, know-how or unpatented technical knowledge).

Cash grants for newly created jobs. Cash grants for newly created jobs are made based on the anticipated wage costs related to newly created jobs and the regional location of the project (taking into account the regional unemployment rate).

Cash grants on training. The amounts of cash grants for training are expressed as a percentage of eligible training costs and vary according to region (grants for the Bratislava region are lower than grants for the rest of the country) and type of training (general or specific).

General conditions. To qualify for investment aid, applicants must meet the general and specific conditions under the Slovak Regional Investment Aid Act, the Regulation of the Slovak government and the European legislation.

The following are the general conditions:
- An applicant must submit its investment intention (plan) before the start of the projected works.
- The project must be completed within three years (five years in case of large investment projects).
- All subsidized job positions must be filled within three years after the completion of the projects and maintained for a period of three (five) years.
- The project operation must be maintained for a minimum period of five years from its completion without change of its location.

Specific conditions. The specific conditions under the Slovak Regional Investment Aid Act vary according to the type of project.

The following are the specific conditions for manufacturing projects under the Slovak Regional Investment Aid Act:
- The works on the investment project did not start before the submission of the application to the Ministry of the Economy.
- The long-term tangible assets (land, building and machinery) and the long-term intangible assets (patents, licenses and know-how) are acquired.
- The minimum amount of the new machinery intended for manufacturing production is acquired.

- The minimum amount of new jobs is created.
- The main area of the investment is realized.

The following are the specific conditions for technology centers under the Slovak Regional Investment Aid Act:

- The works on the investment project did not start before the submission of the application to the Ministry of the Economy.
- The long-term tangible assets (land, building and machinery) and the long-term intangible assets (patents, licenses and know-how) are acquired.
- The minimum multiple of the average monthly wage in the given region is paid to employees of the center during the three (five) years. The average wage is tested for the calendar year preceding the calendar year during which the job was created.
- The minimum amount of new jobs is created.
- The main area of the investment is realized.

The following are the specific conditions for shared-service centers under the Slovak Regional Investment Aid Act:

- The works on the investment project did not start before the submission of the application to the Ministry of the Economy.
- The long-term tangible assets (land, building and machinery) and the long-term intangible assets (patents, licenses and know-how) are acquired.
- The minimum multiple of the average monthly wage in the given region is paid to employees of the center during the three (five) years. The average wage is tested for the calendar year preceding the calendar year during which the job was created.
- The minimum amount of new jobs is created.
- The main area of the investment is realized.

The specific values for each type of the project are provided by the Regulation of the Slovak government. Conditions, such as the value of acquired assets, ratio of new assets, minimum amount of created jobs and minimum multiple of average wage are set differently depending on the type of the project, type of the requested aid, region (based on the unemployment rate) and area (priority or non-priority).

Approval of the aid. No legal entitlement to any investment aid exists. An applicant must submit an investment aid intent to the relevant authorities (that is, the Ministry of the Economy and other relevant aid providers), which review compliance with both the general and specific conditions under the Slovak Regional Investment Aid Act. An applicant can begin work on the project as soon as the investment aid intent is submitted to the respective authority. If the conditions are met, the Ministry of Economy may issue an official offer to the applicant. Following receipt of the official offer, the investor may submit an investment aid application. The investment aid application is submitted to the Slovak government for approval. Approval of the European Commission may also be required if the requested aid exceeds the thresholds stated in the EU General Block Exemption Regulation.

Other national and local incentives. Investors may benefit from infrastructure (for example, electricity, water, gas and sewage) fully or partially financed by the state and/or municipality. The municipality may also offer minor tax exemptions (real estate tax and other local taxes). In general, most of this support qualifies as regional state aid.

Municipalities are entitled to use state budget funding for the development of industrial parks. At the predevelopment stage, investors are typically requested to sign a letter of intent with the relevant municipality. Benefiting from advantages offered by industrial parks does not, in general, qualify as state aid.

Patent Box. Fifty percent of the income derived from the commercial use of certain intangible assets and embedded royalties is exempt from tax. This affects income from compensation for the use of software, patents and utility models as well as income from the sale of products that were manufactured using patents or technical solutions protected by a utility model. To apply the income exemption in both of these cases, the intangible assets (for example, software or patents) must be the result of an R&D activity of a resident or a nonresident legal person performing the activity in the Slovak Republic through a permanent establishment.

Capital gains. Capital gains are subject to income tax at a rate of 15% or 21%. For tax years beginning on or after 1 January 2021, the 15% rate applies only to so-called micro-entities whose taxable income does not exceed EUR60,000.

The income of legal entities, Slovak tax residents or nonresidents with a Slovak permanent establishment, arising from the sale of shares may be exempted from tax if the following conditions are satisfied:

- These persons perform substantial function and manage and bear risks connected to the ownership of these shares in the Slovak Republic.
- They possess the required personal and material equipment necessary to perform these functions.
- They have a direct shareholding of at least 10% in the company, the share capital of which is being sold.
- At least 24 consecutive calendar months have passed since the shareholding was acquired.

The exemption does not apply to income from the sale of securities and shares by securities dealers, as this represents their principal activity; nor is it available to taxpayers subject to liquidation proceedings. In addition, income arising from the sale of shares is not exempt if the company of which shares were sold has gone into liquidation, declared insolvency or had its restructuring approved.

Capital gains realized by Slovak tax nonresidents on the sale of shares of companies established in the Slovak Republic are considered Slovak-source income and are generally taxable unless the relevant double tax treaty stipulates otherwise.

Administration. The tax year is usually the calendar year. However, if a company informs the tax authorities in advance, it may change its tax (accounting) year.

Tax returns for each tax year must be filed within three months after the end of the tax year. The filing period may be extended by a maximum of three months based on a written announcement filed with the tax authority before the expiration of the regular filing deadline. Another extension of an additional three months is possible if the company received income from foreign sources.

In general, monthly or quarterly prepayments of tax are required, depending on the amount of tax liability for the preceding year.

Dividends. Profits distributed by companies to their holding companies are not subject to tax in the Slovak Republic unless either of the following circumstances exists:
- The distribution is deductible for tax purposes at the level of the subsidiary.
- The distribution is a transaction (or part of a series of transactions) that is (are) not business driven, and the purpose or one of the main purposes is to gain a tax advantage.

The 7% rate applies to the dividend income of individuals paid out from profits generated in tax periods beginning on or after 1 January 2017 up to and including 2023. For profits generated in tax periods beginning on or after 1 January 2024, the dividend income of individuals will be taxed at a rate of 10%. The 35% rate applies if the either of the following circumstances exists:
- The dividends are paid from profits generated in tax periods beginning on or after 1 January 2017 and the dividends are paid to or received from a taxpayer of a non-cooperative state.
- The payer is not able to demonstrate who is the beneficial owner of the dividends.

Special rules apply to dividends distributed out of profits realized before 2004.

Interest and royalties. Under Slovak law, interest and royalty payments satisfying the conditions contained in Council Directive No. 2003/49/EC are exempt from Slovak withholding tax.

Foreign tax relief. Under applicable double tax treaties, a foreign tax relief is available to Slovak residents for foreign tax paid on income earned abroad.

C. Determination of trading income

General. Corporate tax is based on the statutory accounting profit as adjusted for certain items prescribed by the tax law.

In general, dividends are not included in the tax base.

Items that are specifically deductible for tax purposes include, among others, tax depreciation (see *Tax depreciation*) and certain expenses relating to health and safety at work and environmental protection.

Nondeductible items include, among others, the following:
- Entertainment and travel allowances in excess of the statutory limits
- Taxes paid on behalf of other taxpayers
- Damages exceeding compensation received, unless the damage arose as a result of natural disaster, or it was caused by a person or persons unknown and this is confirmed by the police
- Most accruals and provisions (see *Provisions*)
- Write-offs of debts, unless specific conditions are met

Inventories. Inventories may be valued using the first-in, first-out (FIFO) or average-cost methods. Costs include all costs necessary to convert the inventory to its current condition and to transport

it to its current location. Shortages and damages are not tax deductible, unless the damage resulted from a natural disaster, or it was caused by a person or persons unknown and this is confirmed by the police.

Provisions. Accruals and provisions are generally not deductible, with certain exceptions specified by law.

Special rules apply to banks and insurance companies.

Tax depreciation. Under the Income Tax Act, tangible assets are divided into seven categories, each of which specifies a period (a specified number of years, which range from 2 to 40) over which all assets in the category are depreciated. Intangible assets are depreciated over their actual useful life. Effective from 1 January 2021, special rules apply to so-called micro-entities.

It is possible to split assets and depreciate separable parts of the assets. Each separable part must have an acquisition price higher than EUR1,700, and separate evidence must be maintained. Only parts of assets specified by the Income Tax Act can be depreciated based on separate parts (for example, specific buildings and machinery).

Tax depreciation may be calculated by using either the straight-line method or the accelerated method (allowed only in specific cases). A company chooses the method on an asset-by-asset basis and, after the method is chosen, it cannot be changed during the depreciation period.

Research and development. To support entities performing research and development (R&D), the Slovak Republic provides an allowance equal to 100% of R&D (for tax years beginning on or after 1 January 2022; previously, the allowance was 200%) costs and expenses that may be deducted from the tax base. This allowance may also include the cost of licenses for software used in performing R&D activities. In addition, the R&D allowance can be increased by 100% of the positive difference between the average of the total R&D costs for the current tax year and the preceding tax year and the average of total R&D costs for two tax years immediately preceding the current tax year.

Deduction of expenses (costs) for investments. Effective from 1 January 2022, taxpayers may claim an additional (super) deduction (15% to 55%) of investment expenses from the tax depreciation of the assets concerned. The amount of the percentage of the additional deduction in the relevant tax year depends on the following two factors:

- The reinvested average value of the investments in percentage terms, which represents the arithmetic average of the capitalized expenses on the acquisition of fixed assets, including technical improvements, made during the three tax years preceding the tax year in which the period of the investment plan begins. The investment plan needs to begin in the tax year starting in 2022 and last for four consecutive tax years (that is, it should end in 2025 for taxpayers whose tax year started 1 January 2022 and in 2026 for taxpayers whose tax year started later). The minimum reinvested average value of the investment is 700%.

- The total value of the planned amount of the reinvested average value of the investments. This is divided into three groups, with a minimum investment of EUR1 million.

This is a temporary measure aimed at supporting investments with higher added value (that is, productive investments with links to Industry 4.0). For purposes of the super deduction, Industry 4.0 refers to the process of optimalization of production processes using the latest technology in order to increase production. For the purposes of this deduction, the taxpayer must draw up an investment plan which declares when investments will be made. A qualifying investment is an investment in a production system and a logistics system consisting of several components such as equipment, machinery, ancillary equipment, automation and communication technology, including software for the management of a production and logistics process capable of real-time exchange, processing and archiving of digitalized data in order to identify and optimize the production and logistics process. The deduction can be applied during the depreciation period of the asset, up to a maximum of 10 immediately consecutive tax years.

Relief for losses. Companies may carry forward losses incurred in tax years beginning on or after 1 January 2020 and offset them against income during a period of five consecutive years. The tax loss may be utilized up to 50% of the calculated tax base, beginning with the first year of the tax loss carryforward. Effective from 1 January 2021, special rules apply to so-called micro-entities, which may offset losses up to the calculated tax base.

Companies may carry forward losses incurred in tax years beginning before 1 January 2020 and offset them against income proportionally during a period of four consecutive years following the tax year of the loss. If the tax period is shorter than 12 months (for example, if the company changes its financial year), the tax loss that would normally be deductible is fully deductible in that tax period.

Groups of companies. Slovak law does not contain any provisions regarding the corporate taxation of groups in the Slovak Republic.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	
Pharmaceutical products, books, accommodation services and selected food products, gastro sector and services provided in connection with sports	10
Supply of a building or parts of a building, including the land on which the building is constructed that is used for the purpose of aided rental housing (should also apply to redevelopment)	5
Other	20
Social security contributions for old age insurance, disability insurance, unemployment insurance, guarantee insurance and the	

Nature of tax	Rate (%)
solidarity reserve fund; imposed on monthly wages with a monthly cap on wages of EUR9,128; contributions are deductible for employers; paid by	
Employer	25.2
Employee	9.4
Social security contributions for accident insurance; imposed on monthly wages without a monthly cap; contributions are deductible for employers; paid by	
Employer	0.8
Health insurance contributions; imposed on monthly wages without a monthly cap; paid by	
Employer	11
Employee	4
Local taxes (tax on land, tax on buildings and apartments, and motor vehicle tax); rates vary depending on location	Various
Windfall tax from excess profits for taxpayers with relevant license in the energy industry	90
Windfall tax from excess profits for taxpayers in the oil and gas industry	70

E. Miscellaneous matters

Thin-capitalization rules. Thin-capitalization rules apply to domestic and foreign related parties, effective from 1 January 2015. The maximum amount of tax-deductible interest is set at 25% of earnings before interest costs, tax, depreciation and amortization. These rules also apply to contracts signed before 1 January 2015. They do not apply to financial institutions.

Interest limitation rule. As a result of transposition of the European Anti-Tax Avoidance Directive into the Slovak tax legislation, effective from 1 January 2024, a new interest limitation on deductibility of interest expenses will apply to all taxpayers, not only to related parties with a de minimis exception to a threshold of interest expenses up to EUR3 million. The rule will not apply to financial institutions. The new legislation will not result in the abolition of the current thin-capitalization rules, but the applicability of the new limitation on the deductibility of interest expenses will be applied as a matter of priority in determining the tax base.

Transfer pricing. If the price agreed between related parties differs from the usual market price and if this difference cannot be satisfactorily justified, the tax authorities may adjust the tax base to reflect the usual market price. Effective from 1 January 2023, if prices in controlled transactions do not comply with the arm's-length principle, the tax authorities may levy additional tax on the difference between the actual value of the transaction and the established median value during a tax audit. The tax authorities consider prices to be at market level when they are within the interquartile range determined by a comparability analysis. However, the taxpayer is given the option to adjust the difference to another value within the range if the circumstances make such an adjustment more appropriate.

The transfer-pricing rules apply to close family relatives (for example, direct family relatives, spouse and siblings) personally or economically related persons, as well as to other related persons.

Persons are economically or personally related if one person participates in the ownership, control or administration of another person, if such persons are under the control or administration of the same person or a close family relative of the person, or if the same person or a close family relative of the person has a direct or indirect equity interest in the persons. Participation in ownership or control exists if the direct or indirect participation in the basic capital of, or voting rights in, one company by another company is higher than 25%. Participation in the administration is a relationship between members of statutory bodies or supervisory boards of the companies. Other relationships are defined as relationships created for the purpose of decreasing the tax base or increasing the tax loss.

Under the Slovak transfer-pricing measures, an advance ruling on the transfer-pricing method may be obtained through an agreement with the tax authorities at least 60 days before the tax year in which the transfer-pricing method will be used. Effective from 1 January 2023, for bilateral and multilateral advanced ruling requests, the option of the Slovak tax authorities agreeing with another jurisdiction's tax authorities to issue a ruling for more than five tax years is added, even if the taxpayer has not requested it. Under the new rules, advanced ruling requests can also be applied retrospectively, for tax periods preceding the application.

The Slovak transfer-pricing measures specify the acceptable transfer-pricing methods, which conform to the methods included in the OECD Transfer-Pricing Guidelines. Effective from 1 January 2023, the OECD Transfer Pricing Guidelines are considered by law as the official technical guidelines in the field of transfer pricing and are officially translated.

Taxpayers must provide transfer-pricing documentation within 15 days after an official request by the tax authorities.

Tax regime for business combinations. The Slovak Income Tax Act addresses in detail the taxation of the sale of all or part of an enterprise, the taxation of non-monetary contributions to registered capital and the taxation of mergers and divisions of companies.

Effective from 1 March 2024, a spin-off has been introduced as a new type of business combination in the Slovak Republic.

In general, business combinations can be made only in real values for tax purposes, with the exception of certain cross-border business combinations meeting specific criteria.

Exit tax. Assets are subject to an exit tax at a rate of 21% if a taxpayer moves them, with no change of ownership, to a jurisdiction outside of the Slovak Republic or if the taxpayer changes its tax residence.

The exit tax base equals the difference between the fair market value of the moved assets and their tax residual value (that is, the fiction of the sale of these assets is applied, and this difference

must not be negative). The tax applies in the following circumstances, among others:

- Assets are moved from a head office in the Slovak Republic to a permanent establishment abroad.
- Assets are moved from a permanent establishment located in the Slovak Republic to a head office or other permanent establishment in another state.
- The tax residence of a taxpayer changes to a jurisdiction outside the Slovak Republic.
- A taxpayer moves an activity or part of an activity performed in Slovak Republic through a permanent establishment to another state, or a taxpayer with unlimited tax liability moves its business activity or its part of its activity to a permanent establishment abroad.

Hybrid mismatches. New rules against hybrid mismatches apply to tax years beginning on or after 1 January 2020 and replace previous rules applicable since 1 January 2018. These rules reflect the transposition of the EU Anti-Tax Avoidance Directive 2 and address the following situations:

- Hybrid financial instrument or payment: a financial instrument or payment of one related entity is considered a debt instrument and/or an interest expense that decreases the tax base, while for a payee it is considered a non-taxable equity instrument and/or dividend.
- Hybrid entity: an entity treated as a corporation by the state in which it was established as a separate taxpayer but treated as a fiscally transparent entity by the state of its founder. The converse situation may also occur, in which case the entity is referred to as a "reverse hybrid entity."
- Diverted payment: the state of a head office attributes the payment to a permanent establishment in another state, while the state in which the permanent establishment is located attributes the payment to the state of the head office. The income is not taxed in the state of the head office or the permanent establishment, while simultaneously giving rise to a tax expense.
- Disregarded permanent establishment: the state in which the permanent establishment is to be located fails to declare its existence and the state of the head office attributes a payment to a disregarded permanent establishment in such state. Accordingly, the income is not included in either the tax base of the head office or the permanent establishment, while simultaneously giving rise to a tax expense.
- Disregarded payment: a hybrid mismatch results from a payment made by a hybrid entity and from non-inclusion of income with respect to a related entity.
- Deemed payment: a notional payment is made by the permanent establishment to the head office (or vice versa), and this income is not included in the taxable income of the head office or the permanent establishment.
- Multiple deduction of expense (cost) without including multiple income (revenue) in taxable income: this most frequently relates to situations in which an expense (cost) is applied in a state where a company is established as well as in the state of its founder.
- Imported mismatch: although the mismatch occurs between the taxpayer's related entities rather than directly between the

taxpayer and its related entity, the taxpayer participates in financing this mismatch, either directly or indirectly.

Reverse hybrid entities. Effective from 1 January 2022, so-called reverse hybrid entities are transposed into Slovak tax legislation. A reverse hybrid entity is a company that is considered transparent in the state of establishment and that is considered a taxpayer in the state of the shareholder. Under the new rules for hybrid mismatches, income (revenues) attributable to foreign (nonresident) shareholders fulfilling the criteria of 50% or more participation in relation to transparent entities will be taxed at the level of a transparent entity (according to Slovak legislation this is a partnership, limited partnership or another subject with or without legal personality taxed at the level of shareholders). This applies if the income (revenues) of a nonresident entity cannot be taxed through a permanent establishment situated in the Slovak Republic and will not be taxed, either in the state of residence of the nonresident entity or abroad. Foreign shareholders of transparent entities also have additional reporting obligations. The rules should not apply to collective-investment subjects fulfilling specific conditions.

Controlled foreign companies

Controlled foreign companies rule applying to companies. A controlled foreign company (CFC) for Income Tax Act purposes is a legal person, entity or permanent establishment that satisfies both of the following conditions:

- A Slovak company or an entity has more than a 50% share of the assets, voting rights or profits of the controlled company (does not apply to a permanent establishment).
- Tax paid in the Slovak Republic on the income of this controlled company is lower than the difference between the corporate income tax that this controlled foreign company would have paid in the Slovak Republic after recalculating its tax base under Slovak law, and the tax paid by the company abroad.

If both of the above conditions are met, the company is considered a CFC and the taxpayer must carry out specific tax base arrangements.

Controlled foreign companies rule applying to individuals. Effective from 1 August 2023, the CFC rule applying to individuals is abolished in the Slovak Republic.

Mandatory Disclosure Regime. The Slovak transposition of the Mandatory Disclosure Regine, in principle, mirrors the EU DAC 6 Directive when it comes to hallmarks and other aspects of the reporting. Statutory tax advisors, auditors and lawyers are exempt from the requirement to disclose arrangements if legal professional privilege applies. However, they are required to notify other intermediaries or clients. If all the involved intermediaries are exempted, the reporting obligation should be placed on the client.

Pillar Two. On 8 December 2023, the National Council of the Slovak Republic approved an act on "top-up tax," which became effective on 31 December 2023. The new law is in reaction to Pillar Two and transposes the Council Directive 2022/2523 from 14 December 2022 on ensuring the global minimum level of taxation of multinational business groups and large domestic groups

in the EU. The purpose of the legislation is to ensure that large business groups are taxed globally at least at the 15% tax rate.

Top-up tax is applicable to companies that are part of the group whose consolidated revenues reach a minimum of EUR750 million in at least two out of the four accounting periods immediately preceding the period under analysis. Entities within the scope of the law are required to evaluate whether their effective tax rate is equal at least to 15%. In this case, the effective tax rate is calculated as the ratio of covered taxes (among others, deferred tax, withholding tax or a specific contribution in regulated sectors should be included within covered taxes) and the profit/loss in the given jurisdiction after the adjustment by specified items indicated in the legislative proposal. If, as a result of the calculation, the effective tax rate is lower than 15%, the taxpayer must pay a top-up tax corresponding to the relevant difference.

F. Treaty withholding tax rates

The Slovak Republic honors the bilateral tax treaties that were concluded by the former Czechoslovakia. The withholding rates under these treaties, and the treaties entered into by the Slovak Republic are listed in the table below.

In general, treaty rates apply if the recipient is the beneficial owner of the income. To obtain the benefit of the reduced treaty rates, the beneficial owner must be in a position to provide a tax residency certificate.

In general, dividends paid by Slovak companies to legal entities are exempt from tax. Consequently, the treaty rates do not apply to these dividends.

Multilateral Instrument. The Slovak Republic signed and ratified the Multilateral Instrument (MLI). It implemented "minimum standard" changes to existing treaties in the areas of treaty abuse, mutual agreement procedures and treaty preambles. In addition, depending on the reservations and notifications made by each party, the MLI facilitates optional changes to modify tax treaties with respect to permanent establishments, transparent entities, residence tiebreakers, double tax relief, minimum shareholding periods, capital gains derived from immovable property and a jurisdiction's right to tax its own residents.

For example, with respect to withholding tax rates for dividends, Paragraph 1 of Article 8 of the MLI introduced an additional condition that the tax rate limited by the treaty can be used if the company is a beneficial owner that holds at least a certain amount of the capital, shares, stock, voting power, voting rights or similar ownership interests of the company paying the dividends throughout a 365-day period that includes the day of the payment of the dividend.

(a) The lower rate applies if the recipient is a company (other than a partnership) that directly holds at least 25% of the capital of the payer of the dividends. Under the Azerbaijan and South Africa treaties, the lower rate applies if the beneficial owner is a company that holds at least 25% of the capital of the payer of the dividends directly throughout a 365-day period, which includes the day of the dividend payment (while calculating that period, changes in ownership — which would directly result from a corporate reorganization, such as a merger or divisive reorganization — of the company that holds shares or pays the dividends, are not taken into account). Under the India treaty, the lower rate applies if the beneficial owner is a company that holds at least 25% of the capital of the payer of the dividends throughout a 365-day period, which includes the day of the dividend payment (while calculating that period, changes in ownership — which would directly result from a corporate reorganization, such as a merger or divisive reorganization — of the company that holds shares or pays the dividends, are not taken into account). Under the Ireland treaty, the lower rate applies if the beneficial owner is a company that directly holds at least 25% of the voting shares of the payer of the dividends throughout a 365-day period, which includes the day of the dividend payment (while calculating that period, changes in ownership — which would directly result from a corporate reorganization, such as a merger or divisive reorganization — of the company that holds shares or pays the dividends, are not taken into account). Under the Belgium and Tunisia treaties, the lower rate applies if the beneficial owner is a company that directly or indirectly holds at least 25% of the capital of the payer of the dividends. Under the Luxembourg and Hungary treaties, the lower rate applies if the beneficial owner is a company that directly holds at least 25% of the capital of the payer of the dividends. Under the Belarus, Croatia, Finland, Iceland, Korea (South), Moldova, Montenegro, Serbia, Spain and Türkiye treaties, the lower rate applies if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the payer of the dividends. Under the Netherlands and Sweden treaties, the lower rate applies if the recipient is a company the capital of which is wholly or partly divided into shares and that directly holds at least 25% of the capital of the payer of the dividends. Under the Japan treaty, the lower rate applies if the recipient is a company that owns at least 25% of the voting shares of the payer during the six-month period immediately preceding the date of payment of the dividends. Under the German treaty, the lower rate applies if the recipient is a company that directly holds at least 25% of the capital of the payer of the dividends. Under the Portugal treaty, the lower rate applies if the beneficial owner is a company that, for an uninterrupted period of two years prior to the payment of the dividend, owns directly at least 25% of the capital stock (capital social) of the company paying the dividends. Under the Slovenia treaty, the lower rate applies if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends and in the case of a Slovak partnership, the lower rate applies if the beneficial

owner is a company — being a resident of the Slovak Republic — which is a partner in a Slovak partnership, and which alone holds directly at least 25% of the capital of the company paying the dividends. Under the United Kingdom treaty, the lower rate applies if the beneficial owner is a company that owns at least 25% of the voting shares of the company paying the dividends.

(b) The lower rate applies if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the payer of the dividends. Under the Albania treaty, the lower rate applies if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the payer of the dividends directly throughout a 365-day period, which includes the day of the dividend payment (while calculating that period, changes in ownership — which would directly result from a corporate reorganization, such as a merger or divisive reorganization — of the company that holds shares or pays the dividends, are not taken into account). Under the Ethiopia and Israel treaties, the lower rate applies if the beneficial owner is a company that holds at least 10% of the capital of the payer of the dividends. Under the Canada treaty, the lower rate applies if the beneficial owner is a company that controls at least 10% of the voting shares of the payer of the dividends, except in the case of dividends paid by a non-resident-owned investment corporation, throughout a 365-day period, which includes the day of the dividend payment (while calculating that period, changes in ownership — which would directly result from a corporate reorganization, such as a merger or divisive reorganization — of the company that holds shares or pays the dividends, are not taken into account). Under the Malaysia treaty, the lower rate applies if the beneficial owner is a company (other than a partnership) directly holding at least 10% of the capital of the payer of the dividends for an uninterrupted period of at least 12 months. Under the Nigeria and United States treaty, the lower rate applies if the beneficial owner is a company that controls at least 10% of the voting shares of the payer of the dividends. Under the Poland treaty, the lower rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends on the date the dividends are paid and has done so or will have done so for an uninterrupted 24-month period in which that date falls. Under the Singapore treaty, the lower rate applies if the beneficial owner is a company that directly holds at least 10% of the capital of the payer of the dividends.

(c) The exemption applies if the interest is received from the other contracting state and is owned by the National Bank of Slovakia, a statutory body, a local authority or any institution wholly or mainly owned by the government of the Slovak Republic, as may be agreed from time to time between the competent authorities of the contracting states. In the case of interest received from the Slovak Republic, the exemption applies if the interest is owned by the Monetary Authority of Singapore and the Board of Commissioners of Currency, the Government of Singapore Investment Corporation Pte Ltd, a statutory body, a local authority or any institution wholly or mainly owned by the government of Singapore, as may be agreed from time to time between the competent authorities of the contracting states.

(d) The lower rate applies if the beneficial owner is one of the following:
- A company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends
- A pension fund or other similar institution providing pension schemes in which individuals may participate in order to secure retirement, disability and survivors' benefits, if such pension fund or other similar institution is established, recognized for tax purposes and controlled in accordance with the laws of the other contracting state
- The government of the other contracting state, a political subdivision or local authority thereof or the central bank of the other contracting state

(e) If the corporate tax rate in a contracting state on distributed profits is 20% lower than the corporate tax rate on undistributed profits, the withholding tax rate may be increased to 25%.

(f) The lower rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 30% of the capital of the payer of the dividends throughout a 365-day period, which includes the day of the dividend payment (while calculating that period, changes in ownership — which would directly result from a corporate reorganization, such as a merger or divisive reorganization — of the company that holds shares or pays the dividends, are not taken into account).

(g) Dividends may be taxed in both contracting states in accordance with the domestic laws in the states.

(h) The 15% rate applies to dividends paid by Slovak companies to Sri Lankan recipients. The 0% rate applies to dividends paid by Sri Lankan companies to Slovak recipients, except for Sri Lankan income tax and additional tax under Sri Lanka's tax law. A maximum tax rate of 6% applies to the additional tax.

(i) The tax in Malta on dividends may not exceed the tax on the profits out of which the dividends are paid.

(j) The 5% rate applies if the recipient is a company that holds directly at least 70% of the capital of the payer of the dividends.

(k) If the profits out of which a dividend is paid are profits that have been subjected to tax at a rate not exceeding 15%, in accordance with tax laws of the contracting state in which the company is a resident, the gross amount of the dividend shall be subject to a tax in that state at a rate of 10%.

(l) The lower rate applies if the recipient is a beneficial owner of the dividend payment.

(m) The lower rate applies if the conditions of ownership specified in the given provisions are met during the entire period of 365 days, which includes the day of the payment of dividends (for the purpose of calculating this period, changes in ownership that would directly result from the reorganization of the company, such as a merger or division of a company that holds shares or that pays out the dividends, are not taken into account).

(n) Under the Albania treaty, the 0% rate applies if the interest is derived and beneficially owned by the following:

- The government of the Slovak Republic, its local authorities, the National Bank of Slovakia, the Export-Import Bank of the Slovak Republic, the Slovak Guarantee and Development Bank or the Debt and Liquidity Management Agency
- The government of Albania, its local authorities or the National Bank of Albania

Under the Armenia treaty, the 0% rate applies if the interest is received from the other contracting state and beneficially owned by the government, including its administrative units, local authorities, central bank or other financial institutions owned by the government of the other contracting state or if interest is received and guaranteed by this government. Under the Azerbaijan treaty, the 0% rate applies if the interest is derived and beneficially owned by the following:

- The government of Azerbaijan, political or administrative-territorial subdivision or a local authority, the Central Bank of the Republic of Azerbaijan or the State Oil Fund and the State Oil Company of the Republic of Azerbaijan
- The government of the Slovak Republic, political or administrative-territorial subdivision or a local authority, the National Bank of Slovakia, Export-Import Bank of the Slovak Republic, the Slovak Guarantee and Development Bank or the Debt and Liquidity Management Agency

Under the Belarus treaty, the 0% rate applies if the interest is received from the other contracting state and beneficially owned by the government or national bank of a contracting state. Under the Brazil treaty, the 0% rate applies to interest paid in either of the following circumstances:

- It is paid to the government of the other contracting state, a political subdivision thereof or any agency (including a financial institution) owned by that government or political subdivision.
- It arises from securities, bonds or debentures issued by the government of a contracting state, a political subdivision thereof or by any agency (including a financial institution) owned by that government or political subdivision.

Under the Bulgaria treaty, the 0% rate applies if the interest is received from the other contracting state and owned by the government or a statutory body thereof, or national bank of a contracting state. Under the Canada treaty, the 0% rate applies to the following types of interest:

- Interest paid with respect to indebtedness of the government of the other contracting state or of a political subdivision or local authority thereof
- Interest paid with respect to a loan made, guaranteed or insured, or a credit extended, guaranteed or insured by any entity wholly owned and controlled by the government of that other state, provided this loan or credit is with respect to imports or exports

Under the Cyprus treaty, the 0% rate applies if the interest arising from credits or loans accorded by the government of a contracting state or by a bank or other institution in the name or on behalf of that government. Under the China Mainland treaty, the 0% rate applies if the interest arising in a contracting state and derived by the government of the other contracting state, a political subdivision, a local authority and the central bank thereof or any financial institution wholly owned by that government, or by any other

resident of that other contracting state with respect to debt claims indirectly financed by the government of that other contracting state, a political subdivision, a local authority and the central bank thereof or any financial institution wholly owned by that government. Under the Estonia treaty, the 0% rate applies if the interest is received from the other contracting state and beneficially owned by the government of the other contracting state or the central bank or any financial institution wholly owned by that government, or interest derived on loans guaranteed by that government. Under the Ethiopia treaty, the 0% rate applies to the following types of interest, if paid to its beneficial owners resident in the other contracting state:

- Interest paid to the government, an administrative territorial unit or a local authority thereof or to the central bank
- Interest paid in connection with a loan or a credit guaranteed or insured by the government, an administrative-territorial unit or a local authority thereof or by the central bank

Under the Greece treaty, the 0% rate applies if the interest is received from the other contracting state and owned by the government of the other contracting state or the bank or any financial institution wholly owned by that government. Under the India treaty, the 0% rate applies if the interest is received from the other contracting state and beneficially owned by the government of the other contracting state or a political subdivision or a local authority of the other contracting state or the central bank of the other contracting states. Under the Indonesia treaty, the 0% rate applies if the interest is received from the other contracting state and owned by the government of the other contracting state including local authorities thereof, a political subdivision, the central bank or any financial institution controlled by that government, the capital of which is wholly owned by the government of the other contracting state, as may be agreed upon between the governments of the contracting states. Under the Japan treaty, the 0% rate applies if the interest is derived by the government of the other contracting state including local authorities thereof, the central bank of that other contracting state or any financial institution wholly owned by that government, or by any resident of the other contracting state with respect to debt claims guaranteed or indirectly financed by the government of that other contracting state including local authorities thereof, the central bank of that other contracting state or any financial institution wholly owned by that government. Under the Kazakhstan, Latvia and Lithuania treaties, the 0% rate applies if the interest is derived and beneficially owned by government of the other contracting state or the central bank (national bank) or any financial institution wholly owned by that government. Under the Korea (South) treaty, the 0% rate applies if either of the following circumstances exist:

- The interest is derived and beneficially owned by the government of the other contracting state including political subdivisions and local authorities thereof, the central bank of that other contracting state or any financial institution owned by that government, or by any resident of the other contracting state with respect to debt claims guaranteed or indirectly financed by the government of that other contracting state including political subdivisions and local authorities thereof, the central bank of that other contracting state or any financial institution owned by that government
- The interest is paid in connection with the sale on credit of any industrial, commercial or scientific equipment, or paid in connection with the sale on credit of any merchandise by one enterprise to another enterprise

Under the Kuwait treaty, the 0% rate applies if the interest is derived and beneficially owned by the following:

- The government of a contracting state, a political subdivision or a local authority thereof, or the central (national) bank of a contracting state
- Institutions established under public law the capital of which is wholly owned by the government of a contracting state as based upon the exchange of diplomatic notes between both contracting states

In the case of the Slovak Republic, the following qualify:

- Eximbanka SR
- The Slovak Guarantee and Development Bank;

In Kuwait, the following qualify:

- Kuwait Investment Authority
- Kuwait Petroleum Corporation
- Public Institution for Social Security
- Kuwait Fund for Arab Economic Development

Under the Libya treaty, the 0% rate applies if the interest is derived and beneficially owned by the other contracting state itself or by a political subdivision or local authority of the other contracting state or by the central (national) bank of that other contracting state. Under the Malaysia treaty, the

0% rate applies if the interest is derived and beneficially owned by the following:

- The federal government of Malaysia, the governments of the states, the local authorities, the statutory bodies, the Bank Negara Malaysia and the Export-Import Bank of Malaysia Berhad
- The government of the Slovak Republic, the local authorities, the statutory bodies, the National Bank of Slovakia, Export-Import Bank of the Slovak Republic, and the Slovak Guarantee and Development Bank

Under the Mexico treaty, the 0% rate applies if the interest is derived and beneficially owned by the following:

- The government, a political subdivision, a local authority or the Central Bank of the other contracting state
- In the case of Mexico: Banco Nacional de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C. and Banco Nacional de Obras y Servicios Públicos, S.N.C.
- In the case of the Slovak Repulbic: Eximbanka SR and the Slovak Guarantee and Development Bank. However, the exemption is applicable only if the loan or credit concerned is granted, guaranteed or insured for a period of not less than three years. Under the Nigeria treaty, the 0% rate applies if the interest is derived and beneficially owned by the government of the other contracting state or a local authority thereof or any agency or instrumentality of that government or local authority. For the purpose of this sub-paragraph, government agency or instrumentality means:
- In the case of the Slovak Republic: the Ceskoslovenska obchodni banka
- In the case of Nigeria: the Central Bank of Nigeria
- Any institution of a contracting state set up by the government of the state to finance external trade, provided that the loan or credit with respect to the interest arises is approved by the governments of the two contracting states

Under the Oman treaty, the 0% rate applies if the interest is derived and beneficially owned by the government, a political subdivision, a local authority or the central (national) bank of the other contracting state. In the case of the Slovak Republic, the following qualifies:

- Eximbanka SR
- The Slovak Guarantee and Development Bank

In the case of Oman, the following qualifies:

- The State General Reserve Fund
- The Omani Investment Fund

Also, any other statutory body or institution wholly owned by the government of the other contracting state, as may be agreed from time to time between the competent authorities of the contracting states, may qualify. Under the Poland treaty, the 0% rate applies if the interest is derived and owned by the government of the other contracting state including local authorities thereof, the central bank or any financial institution controlled by that government, or interest derived on loans guaranteed by that government. Under the Romania treaty, the 0% rate applies if the interest is derived and beneficially owned by the government of the other contracting state, a local authority or an administrative-territorial unit thereof or any agency or bank unit or instrumentality of that government, local authority or administrative-territorial unit or if the debt claims of a resident of the other contracting state are warranted or insured or directly or indirectly financed by a financial institution wholly owned by the government of the other contracting state, provided that the loan or debt claims giving rise to such interest is not on a commercial basis. Under the Sri Lanka treaty, the 0% rate applies to interest derived by the government of the other contracting state either directly or through any agency of that government. Under the Syria treaty, the 0% rate applies to interest derived and beneficially owned by the government of the other contracting state, including any local authority thereof, the central bank or any financial institution wholly owned by that state. Under the Taiwan treaty, the 0% rate applies to the following types of interest:

- Interest paid to the other contracting state, public subdivisions or local authorities with respect to loans, debt-claims or credits
- Interest paid on loans made, guaranteed or insured by public entities that are intended to promote exports

Under the Türkiye treaty, the 0% rate applies to the following types of interest:

- Interest paid to the government of Türkiye or to the Central Bank of Türkiye
- Interest paid to the government of the Slovak Republic or to the National Bank of Slovakia

Under the Turkmenistan treaty, the 0% rate applies to the following types of interest:

- Interest paid to the government of Turkmenistan or to the Central Bank of Turkmenistan (Turkmenistanyn Merkezi Banky)
- Interest paid to the government of the Slovak Republic or to the National Bank of Slovakia

Under the United Arab Emirates treaty, the 0% rate applies if the interest is derived and beneficially owned by the following:

- The government of the Slovak Republic, its local authorities, the National Bank of Slovakia, the Export-Import Bank of the Slovak Republic, the Slovak Guarantee and Development Bank or the Debt and Liquidity Management Agency
- The Central Bank of the United Arab Emirates, the Emirates Investment Authority, the Abu Dhabi Investment Authority, the International Petroleum Investment Company, the Abu Dhabi Investment Council, the Investment Corporation of Dubai, the Abu Dhabi National Energy Company, the Mubadala Development Company, the Abu Dhabi Retirement Pensions and Benefits Fund and the General Pension and Social Security Authority

Under the Vietnam treaty, the 0% rate applies to the following types of interest:

- Interest paid to the State Bank of Vietnam and the Vietnam Development Bank
- Interest paid to the National Bank of Slovakia, the Export-Import Bank of the Slovak Republic, and the Slovak Guarantee and Development Bank

(o) The lower rate applies to the following types of interest:

- Interest paid on commercial debt claims (including debt claims represented by commercial paper) that result from deferred payments for goods, merchandise or services supplied by an enterprise
- Interest paid on loans made, guaranteed or insured by public entities that are intended to promote exports
- Interest paid on current accounts or loans that are not represented by bearer instruments between banks or public credit institutions of the contracting states
- Interest paid to the other contracting state or a public subdivision or local authority

(p) The 10% rate applies if the recipient is the beneficial owner of the interest and if the interest is paid on a loan granted by a bank for a period of at least 10 years in connection with the sale of industrial equipment or the installation or furnishing of scientific units or public works.

(q) The 0% rate applies if the interest is beneficially owned and derived in connection with a loan or credit extended or endorsed by the following:

- In the case of the Slovak Republic: the Ceskoslovenska obchodni banka, to the extent such interest is attributable to financing of exports and imports only
- In the case of India, the Export-Import Bank of India, to the extent such interest is attributable to financing of exports and imports only
- Any institution of a contracting state in charge of public financing of external trade
- Any other person, provided that the loan or credit is approved by the government of the first mentioned contracting state

(r) The 2% rate applies to interest, if the interest is paid with respect to the following:

- A bond, debenture or other similar obligation of the government of that state
- A loan made, refinanced, guaranteed or insured, or a credit extended, refinanced, guaranteed or insured by in the case of the Slovak Republic, the Slovak National Bank or the Slovak Company for the Insurance of International Loans and Credits, or in the case of Israel, the Bank of Israel or the Israeli Company for the Insurance of Risks Arising in International Trade

The 5% rate applies to interest paid to financial institutions.

(s) Under the Switzerland treaty, the 0% rate applies to the following types of interest:

- Interest paid with respect to indebtedness arising as a result of the sale on credit of equipment, merchandise or services
- Interest paid on any type of loan granted by a financial institution
- Interest paid to a pension fund or other similar institution providing pension schemes in which individuals may participate in order to secure retirement, disability and survivors' benefits, if such pension fund or other similar institution is established, recognized for tax purposes and controlled in accordance with the laws of the other contracting state

- Interest paid to the government of the other contracting state, a political subdivision or local authority thereof or the central bank of the other contracting state
- Interest paid by a company to a company of the other contracting state if the recipient company was affiliated with the company paying the interest by a direct minimum holding of 25% in the capital for at least two years before the payment of the interest or if, for at least two years before the payment of the interest, both companies were held by a third company that held directly a minimum of 25% in both the capital of the first company and the capital of the second company

The 5% rate applies to other interest payments.

(t) The 0% rate applies if the interest is paid in respect of loans granted by a contracting state.

(u) The lower rates apply only if the recipient is one of the following:
- An individual
- A contracting state or a political subdivision or local authority of the state
- A recipient engaged in the active conduct of a trade or business in the United States (other than the business of making or managing investments, unless these activities are banking or insurance activities carried on by a bank or insurance company) if the income derived from the Slovak Republic is derived in connection with, or is incidental to, that trade or business
- A company whose principal class of shares is substantially and regularly traded on a recognized securities exchange or is wholly owned, directly or indirectly, by a resident of the company's state whose principal class of shares is substantially and regularly traded on a recognized securities exchange
- A not-for-profit organization
- A person if more than 50% of the beneficial interest in such person is owned, directly or indirectly, by persons entitled to the lower rates according to the treaty and if not more than 50% of the gross income of such person is used directly or indirectly, to meet liabilities (including liabilities for interest or royalties) to persons not entitled to the lower rates according to the treaty

(v) The treaty rate applies if the recipient is a beneficial owner of the interest payment.

(w) The lower rate applies to royalties, which are defined as the use of, or the right to use the following:
- Patents, trademarks, designs or models, plans, secret formulas or processes, software, industrial, commercial, or scientific equipment, or information concerning industrial, commercial or scientific experience under the Azerbaijan treaty
- Copyrights of literary, artistic or scientific works, including cinematographic films or films or tapes and other means of image or sound reproduction under the Belarus treaty
- Copyrights of literary, artistic or scientific works, including cinematographic films and films or recordings for radio and television under the Tunisia treaty
- Industrial, commercial or scientific equipment under the Taiwan treaty

(x) The 0% rate applies if the source state does not possess the right to tax royalties, which are defined as the use of, or the right to use the following:
- Copyrights of literary, artistic or scientific works, including cinematographic films under the Austria treaty
- Literary, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films nor royalties with respect to works on film or videotape or other means of reproduction for use in connection with television broadcasting) under the Canada treaty
- Copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting under the Cyprus, Denmark, Greece, Japan, Korea (South), Luxembourg, Norway and United Kingdom treaties
- Copyrights of literary, artistic or scientific works, including cinematographic films, and films or recordings on tape and any other media for visual and audio reproduction used for radio or television broadcasting, with the exception of computer programs (software) under the Czech Republic treaty
- Copyrights of literary, artistic or scientific works, under the Finland, France and Sweden treaties
- Copyrights of literary, artistic or scientific works, including motion pictures or films, recordings on tape or other media used for radio or television broadcasting or other means of reproduction or transmission under the Ireland treaty

- Copyright of literary, artistic or scientific works, including cinematographic films and television films under the Italy treaty
- Copyright royalties, and other similar payments with respect to the production or reproduction of literary, dramatic, musical or artistic works, except for royalties relating to motion picture films and works on film or videotape for use in connection with television under the Spain treaty
- Copyrights of literary, artistic or scientific works, including cinematographic films or films or tapes and other means of image or sound reproduction under the United States treaty

(y) The 25% rate applies to royalties paid for trademarks.

(z) The 5% rate applies to royalties paid for the use of, or the right to use, patents, designs or models, plans, secret formulas or processes, or for information concerning industrial or scientific experience, or for the use of, or the right to use industrial, commercial or scientific equipment. The 10% rate applies to royalties paid for the use of, or the right to use, trademarks or for information concerning commercial experience. The 15% rate applies in all other cases.

(aa) The 1% rate applies to payments under a financial lease of equipment. The 5% rate applies to payments under an operating lease of equipment, as well as to payments for the right to use cinematographic films and software for personal computers.

(bb) The lower rate applies to payments for the use of, or the right to use, copyrights of motion picture films, films or video for use in connection with television, tapes for use in connection with radio broadcasting, or total or partial forbearance regarding the use or supply or any property or right.

(cc) This rate also applies to fees for technical services.

(dd) The higher rate also applies to payments for the right to use transport vehicles.

(ee) The lower rate applies to industrial royalties, which are defined as payments for the use of or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

(ff) The 0% rate applies to royalties relating to copyrights and films derived from sources within one of the contracting states.

(gg) The 0% rate applies if the royalties are derived and beneficially owned by the following:

- The government of the Slovak Republic, its local authorities, the National Bank of Slovakia, the Export-Import Bank of the Slovak Republic, the Slovak Guarantee and Development Bank, and the Debt and Liquidity Management Agency
- The Central Bank of the United Arab Emirates, the Emirates Investment Authority, the Abu Dhabi Investment Authority, the International Petroleum Investment Company, the Abu Dhabi Investment Council, the Investment Corporation of Dubai, the Abu Dhabi National Energy Company, the Mubadala Development Company, the Abu Dhabi Retirement Pensions and Benefits Fund, and the General Pension and Social Security Authority
- Any other institutions that are agreed upon between the two contracting states through an exchange of letters

(hh) The 0% rate applies to cultural royalties, which are defined as the right to use copyrights of literary, artistic or scientific works, including cinematographic films. The 0% rate also applies to other royalties if, for a period of at least two years before the royalty payment, the payer and recipient of the royalty were mutually connected by a direct share of at least 25% in ownership or if a third entity had a direct share of at least 25% in both the payer and recipient for a period of at least two years before the royalty payment. The 5% rate applies to industrial royalties, which are defined as the right to use patents, trademarks, designs or models, plans, secret formulas or processes, and to consideration for information concerning industrial, commercial or scientific experience, provided Switzerland does not under its internal law levy a tax at source on royalties paid to nonresidents. The 10% rate applies to other royalties.

(ii) The treaty rate applies if the recipient is a beneficial owner of the royalty payment.

(jj) These rates are based on a multilateral treaty, which the former Czechoslovakia entered into with the other members of the Council for Mutual Economic Assistance (Comecon or CMEA).

A. At a glance

Corporate Income Tax Rate (%)	22 (a)
Capital Gains Tax Rate (%)	22 (a)
Branch Tax Rate (%)	22 (a)
Withholding Tax (%)	
Dividends	15 (b)
Interest	15 (b)

Royalties from Patents, Know-how, etc.	15 (b)
Services	15 (c)
Rentals	15 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (e)

(a) This is a temporary increase from 19%. See Section B.
(b) This tax applies to payments to residents and nonresidents.
(c) Specified categories of service payments (consulting, marketing, market research, human resources, legal, administrative and information technology services) are subject to a 15% withholding tax if the payments are made to persons with a head office outside the European Union (EU) and if the country of the head office is on the list published by the Ministry (list of prohibited list countries) or on the list of EU non-cooperative jurisdictions.
(d) A 15% withholding tax applies to cross-border payments for the lease of real estate located in Slovenia.
(e) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. In general, all companies resident in Slovenia are subject to tax on their worldwide income (but see *Foreign tax relief*). A company is resident in Slovenia if it has its legal seat or effective place of management in Slovenia. Nonresident companies are subject to tax on their Slovenian-source income only (income derived from or through a permanent establishment and other Slovenian-source income subject to withholding tax).

The definition and corresponding rules related to "permanent establishment" of a nonresident company in Slovenia were updated on 10 February 2024 with amendments of the corporate income tax in a manner that generally follows the definition in the last version of Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and Capital 2017.

Rates of corporate income tax. The standard corporate income tax rate is 19%. However, a special legislative act (Act on Reconstruction, Development and Provision of Financial Resources) introduced a temporary increase of corporate tax rate from 19% to 22% for the years from 2024 to 2028.

Investment funds that distribute 90% of their operating profits for the preceding tax year by 30 November of the current tax year are taxed at a rate of 0%.

Pension funds established in accordance with the Pension and Disability Insurance Act are taxed at a rate of 0%.

Insurance undertakings that are authorized to implement the pension scheme in accordance with the act regulating pension and disability insurance must pay tax with respect to the activities relating to such implementation at a rate of 0% of the tax base if a separate tax calculation is compiled only for this pension scheme.

Balance sheet tax for banks and savings banks. A 0.2% balance sheet tax for banks and savings banks was introduced in the Act on Reconstruction, Development and Provision of Financial Resources in December 2023. Balance sheet tax will be effective from 2024 to 2028. The tax base is calculated as the average of

the values of the balances on each last day of the month in the tax period.

Capital gains. Fifty percent of a capital gain from the disposal of shares is exempt from tax if certain conditions are met. The other 50% is treated as ordinary business income and is subject to tax at the regular corporate rate. However, in such circumstances, the expenses of a taxpayer are decreased by 5% of the exempt amount of capital gains. The same principle applies to capital losses (only 50% of a capital loss is deductible for tax purposes).

If a capital gain is realized from disposal of shares acquired with respect to venture capital investments in a venture capital company that is established in accordance with the act regulating venture capital companies, the total amount of such gain may be exempt from tax if the company had the status of a venture capital company for the entire tax period and if the company had the status of venture capital company for the entire period of the holding of the shares by the taxpayer. Losses incurred on the transfer of shares acquired under a venture capital scheme are not deductible for tax purposes.

Administration. The tax year is the calendar year. However, a company may select its financial year as its tax year if the selected year does not exceed a period of 12 months and if it informs the tax authorities regarding its selection of the tax year. The selected tax year may not be changed for a period of three years.

Annual tax returns must be filed within three months after the end of the tax year.

Companies must make advance payments of corporate income tax. Monthly advance payments of corporate income tax are required if the total amount of the advance payments exceeds EUR400, based on the tax calculated in the tax return for the preceding tax year. Companies must make quarterly advance payments if the total amount of the advance payments is less than EUR400, based on the tax calculated in the tax return for the preceding tax year. Advance payments of corporate income tax are due on the 20th day of the month following the period to which the advance tax payment relates. The balance of tax due must be paid within 30 days after the annual tax return is filed with the tax authorities. If the total amount of advance payments of corporate income tax exceeds the amount of tax due for the year, the overpaid tax is refunded to the company.

Dividends. In principle, dividends paid to residents and nonresidents are subject to withholding tax at a rate of 15%. The tax does not apply to dividends paid to a resident or to a permanent establishment of a nonresident if the dividend recipient informs the dividend payer of its tax number.

Measures implementing the EU Parent-Subsidiary Directive are in effect in Slovenia. Under these measures, dividend distributions are exempt from withholding tax if all of the following conditions are satisfied:

- The recipient of the dividends owns at least 10% of the equity capital or voting power of the payer of the dividends.
- The duration of the recipient's ownership in the payer is at least two years.

- The recipient of dividends is a taxable company that has one of the prescribed legal forms, is a resident of an EU Member State and is a taxpayer for one of the taxes for which the common system of taxation applies.

If, at the time of payment of a dividend, the duration of ownership of the recipient is shorter than two years and all other requirements are met, a withholding tax exemption is still possible if the payer or its agent provides an appropriate bank guarantee to the tax authorities.

Dividends paid to EU/European Economic Area (EEA) residents are exempt from withholding tax if a tax credit is not available in the country of residence of the recipient.

Dividends and interest paid to EU/EEA resident pension funds, investment funds and insurance companies performing pension plans are exempt from withholding tax if a tax credit is not available in the country of residence of the recipient and if the recipient of such income is not a Slovenian branch of such persons.

Dividends received by Slovenian taxable persons are generally subject to a full participation exemption.

Expenses of an amount equal to 5% of the dividends received are not deductible for tax purposes because they are deemed to be expenses incurred with respect to the exempt dividend income.

Foreign tax relief. Income tax paid abroad can be credited against the final tax liability of a company if the income on which the tax has been paid abroad is included in the tax base. The foreign tax credit may not exceed the lower of the amount of foreign tax on foreign income that was paid or the amount of tax that would have been paid under Slovenian law on the foreign income if the credit had not been granted. To claim the tax credit, the taxpayer must submit appropriate documentation together with the tax return.

C. Determination of trading income

General. Taxable income is based on the profits reported in the annual financial statements prepared in accordance with International Financial Reporting Standards (IFRS) or Slovenian accounting standards, which generally follow IFRS. For tax purposes, profits are adjusted, primarily for nondeductible expenses.

In general, only those expenses that are directly required for the generation of taxable revenues are allowed as deductible expenses.

The law specifies that certain expenses are not deductible, including the following:
- Incentives paid to the management board and to the board of directors
- Pecuniary penalties (fines paid to government agencies)
- Donations
- Bribes

Only 50% of entertainment expenses and fees paid to the supervisory board is deductible for tax purposes.

Interest on loans to related entities is deductible up to the amount computed by applying the acknowledged interest rate at the time of the loan approval. The Ministry of Finance publishes the acknowledged interest rate. It is possible for a taxable person to prove that a contractual interest rate exceeding the acknowledged interest rate is an arm's-length rate.

A deduction for bad debts can be claimed if specified conditions are met.

Limitations to tax base reduction. Effective from 2020, a general limitation of tax base reduction after utilization of tax reliefs and tax losses carried forward was introduced. The maximum reduction of the tax base from tax allowances and the tax losses carried forward is limited to 63% of the tax base for a tax period, which results in an effective minimum corporate tax rate of 7%.

Inventories. Inventories may be valued using any of the methods prescribed by the applicable accounting standards. Permissible methods include first-in, first-out (FIFO), average cost and other methods. The last-in, first-out (LIFO) method is not allowed. Inventories are measured at the lower of cost or net realizable value.

Provisions. The following provisions are deductible for tax purposes up to an amount equal to 50% of the provisions established in accordance with the accounting standards:
- Provisions for warranties
- Provisions for restructurings
- Provisions for expected losses from onerous contracts
- Provisions for pensions
- Provisions for termination benefits with respect to employees
- Provisions for jubilee benefits

Other provisions established based on applicable accounting standards are 100% tax deductible.

Specific provisions established by a bank for specific risks are deductible up to the amount prescribed by the Banking Act. Technical provisions that insurance companies are required to establish under the law are deductible up to the amount prescribed by the Insurance Act. Special provisions that are required for stockbrokerage companies are deductible up to the amount prescribed by the Financial Instruments Market Act.

Transposition of interest limitation rule from the Anti-Tax Avoidance Directive. On 10 February 2024, amendments to the corporate income tax law introduced an interest limitation rule as prescribed under the Anti-Tax Avoidance Directive I (ATAD I). The interest limitation rule under ATAD I allows companies to deduct their net financial expenses up to 30% of their operating profit (earnings before interest, taxes, depreciation and amortization [EBITDA]). In line with ATAD I, the amendments allow the deduction of excess borrowing costs up to the higher amount between the 30% of the taxpayer's EBITDA and EUR1 million.

In addition, Slovenia provides for an exception for financial institutions, insurance undertakings and stand-alone entities from the scope of the rule given the limited risks of tax avoidance. Because Slovenia does not have a fiscal unity regime, it has not opted for the application of the group ratio rule under Article 4(5)

(b) of ATAD I. On the contrary, the amendments include a grandfathering clause for borrowing costs incurred on loans used to finance long-term public infrastructure projects in the EU, and loans concluded before 17 June 2016. However, Slovenia did not opt for any carryforward possibilities.

Despite the acceptance of the new rule, Slovenia decided to retain its pre-existing thin-capitalization rule for interest deductibility, according to which tax deductibility of interest expense on intercompany (group) financing is limited to the debt-to-equity ratio of 4:1.

The amendments are applicable for fiscal years starting 1 January 2024 and later.

Revaluation expenses. In general, subject to special conditions and limitations, revaluations of the following items are deductible for tax purposes:

- Receivables
- Financial assets and financial instruments measured at fair value through profit or loss
- Goodwill
- Debts, receivables, investments and cash receivables, provided that the revaluations are based on changes in the exchange rate

Tax depreciation. Depreciation calculated using the straight-line method is deductible for tax purposes. The tax law sets the maximum depreciation rates. The following are some of the prescribed maximum straight-line depreciation rates.

Assets	Rate (%)
Buildings, including investment property	3
Parts of buildings, including investment property	6
Equipment, vehicles and machinery	20
Parts of equipment and equipment for research activities	33.3
Computer equipment, hardware and software	50
Crops lasting several years	10
Breeding animals	20
Other investments	10

For the depreciation of operating leases, the maximum annual depreciation rate is calculated taking into account the period of the contractual lease of the asset. Depreciation recognition is determined depending on the contractual lease terms.

Tax relief for investments. A taxable person may claim a reduction of the tax base in the amount of 40% of the amount invested in equipment and intangible assets (subject to certain limitations). The reduction may not exceed the amount of the tax base, and the unused portion of the tax relief can be carried forward to the next five tax periods.

Tax relief for research and development expenditure. Tax relief is available for research and development (R&D) expenditure.

The tax base may be decreased by 100% of the expenditure incurred in R&D activities (super deduction).

The taxable person may also carry forward the unused portion of the tax relief to the following five fiscal periods.

Such tax relief may not be granted for R&D that is financed by government funding or the EU.

Tax relief for R&D expenditure excludes the use of the tax relief for investments.

Tax relief for investment in the digital and green transition. Tax relief amounts to 40% of the amount representing investments in the digital transformation and green transition. These investments include investments in cloud computing, artificial intelligence and big data, and investments in environmentally friendly technologies, such as cleaner, cheaper, and healthier public and private transport, decarbonization of the energy sector, energy efficiency of buildings, and the introduction of other climate neutrality standards.

The new relief is mutually exclusive with the R&D investment relief and the investment relief and cannot be claimed if investments were financed from the budgets of self-governing local communities, the budget of the Republic of Slovenia or the EU budget, and if these funds have the nature of a grant.

Tax relief for the hiring of employees. An employer who hires certain employees may claim relief in the amount of 45% of the salary of such employees for the first 24 months of employment, but not exceeding the amount of the tax base. To be eligible for the relief, one of the following conditions should be met:

- The employee is younger than 29 years old or older than 55 years old.
- The employee represents a person who is in a profession for which there is a shortage of jobseekers in the labor market and who was not employed by the employer seeking the tax relief or a related party in the past 24 months, provided such shortage is identified on the list determined by the Ministry of Labor.
- The overall number of employees employed at the employer in the tax period increased.

An employer may claim relief in the amount of 55% of the employee's salary if he employs a person under the age of 25 who is employed for the first time, but no more than the amount of the tax base.

Hidden profit distributions. Hidden profit distributions are nondeductible expenditures and are subject to withholding tax as deemed dividends. The following items are treated as hidden profit distributions to a shareholder owning directly or indirectly at least 25% of the capital in the payer (or controlling the payer on the basis of the contract or having influence over the payer):

- Providing assets or performing services, including the discharge of debts, without consideration or at a price that is lower than the comparable market prices
- Payments for the purchase of assets and services at a price that is higher than the comparable market prices
- Payments for assets that were not transferred or for services that were not rendered
- Interest on loans granted at an interest rate that differs from the acknowledged interest rate if the taxpayer cannot prove that an unrelated entity would have agreed to the interest rate

- Interest on loans exceeding the thin-capitalization limit (see Section E)

Relief for losses. Assessed tax losses may be carried forward for an unlimited time period. It is possible to use tax losses carried forward from previous years, up to a maximum of 50% of the tax base for a tax period. The right to carry forward tax losses is lost if the ownership of share capital or voting rights changes by more than 50% during a tax year, as compared to the beginning of the tax year, and if the taxpayer did not conduct any business activity for two years or the business activity was significantly changed in the two-year period before or after the change of ownership (unless the business activity was significantly changed to maintain jobs or to restore business operations).

Loss carrybacks are not allowed.

Groups of companies. The formation of groups of companies for tax purposes is not allowed.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	
Standard rate	22
Reduced rate	9.5
Super reduced rate	5
Transfer tax on immovable property	2
Motor vehicle tax; amount of tax depends on power of the engine, emission standard, CO_2 emissions and other factors	Various
Water Vessel Tax; amount of the tax depends on the length of the vessel (minimum of five meters) and the power of the engine	Various
Tax on insurance premiums	8.5
Property tax; levied on premises such as buildings, parts of buildings and land and depends on the location, age and other factors	Various
Social security contributions, on monthly salary	
Health insurance, paid by	
Employer	6.56
Employee	6.36
Pension and disability, paid by	
Employer	8.85
Employee	15.5
Unemployment insurance, paid by	
Employer	0.06
Employee	0.14
Maternity benefits, paid by	
Employer	0.1
Employee	0.1
Workers' compensation insurance (for occupational injuries and diseases), paid by employer	0.53

E. Miscellaneous matters

Foreign-exchange controls. The official Slovenian currency is the euro (EUR).

Legal entities with their head office in Slovenia and subsidiaries of foreign commercial companies that are registered in the Court Registry in Slovenia may maintain foreign-currency accounts or foreign-currency deposit accounts at authorized banks in Slovenia. Slovenian and foreign enterprises and their subsidiaries may freely perform one-sided transfers of property to or from Slovenia. Profits may be freely transferred abroad in foreign currency.

Resident enterprises may obtain loans from nonresident enterprises in their own name and for their own account. They are required to report selected loan transactions with nonresident enterprises to the Bank of Slovenia. For this purpose, loan transactions include the following:

- Pledges of real estate and other security
- Purchases by nonresidents of accounts receivable arising from transactions between resident enterprises
- Purchases by residents of accounts receivable arising from transactions between nonresident enterprises
- Certain other transactions between resident and nonresident enterprises if the economic purpose of the transaction is effectively the granting of a loan

Transfer pricing. Transfer prices are determined by referring to market prices of the same or comparable assets or services charged between unrelated parties (comparable market prices). Comparable market prices are determined by one of the five methods prescribed by the OECD guidelines.

A resident or nonresident and a foreign legal entity or foreign partnership are deemed to be related parties if any of the following circumstances exist:

- The taxable person directly or indirectly holds 25% or more of the value or number of shares or equity holdings, or control over management or supervision or voting rights of the foreign person or controls the foreign person on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.
- The foreign person directly or indirectly holds 25% or more of the value or number of shares or equity holdings or control over management or supervision or voting rights of a taxable person, or controls the taxable person on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.
- The same person at the same time, directly or indirectly, holds 25% or more of the value or number of shares or holdings or participates in the management or supervision of the taxable person and the foreign person or two taxable persons or they are under the same person's control on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.

- The same natural persons or members of their families directly or indirectly hold 25% or more of the value or number of shares or holdings or control over the management or supervision of the taxable person and the foreign person or two resident entities or they are under their control on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be achieved between unrelated parties.

Taxpayers must maintain transfer-pricing documentation continuously. The transfer-pricing documentation requirements are based on the Master File concept. Under this concept, which is recommended by the European Community (EC) Council and the EU Joint Transfer Pricing Forum, the transfer-pricing documentation consists of a Master File, country-specific part and Country-by-Country Report (CbCR).

Country-by-Country (CbC) reporting obligations may apply in Slovenia to a group of businesses if it has at least business based in Slovenia and at least business based in another country and if it has a consolidated group revenue of at least EUR750 million. CbCRs must be filed within 12 months after the end of the fiscal year to which they relate. The CbCR must include the following information for each fiscal year and for each jurisdiction where business is conducted:

- Amount of revenue generated
- Amount of profit or loss before tax
- Amount of accrued and paid tax
- Amount of undistributed profits
- The number of employees
- Size of tangible assets (excluding cash and cash equivalents)

If a group needs to report, it must notify the Slovenian tax authority every year where it intends to report. The CbC reporting notification must be submitted in electronic form via the eDavki portal together with the corporate income tax return. The CbC notification form is available on the Slovenian tax authority website and is available in Slovenian language.

Related-party transactions must also be reported every year with the corporate income tax return in accordance with the following rules:

- If the cumulative amount of given or received loans from a particular related party exceeds EUR50,000 in a tax period, the taxpayer must disclose the name of the related party, its state of residence and tax number, the cumulative amount of loans and the type of relationship with the related party.
- If the cumulative amount of other intercompany receivables or liabilities toward a particular related party exceeds EUR50,000 in a tax period, the taxpayer must disclose the name of the related party, its state of residence and tax number, the cumulative amount of receivables or liabilities toward the related party and the type of relationship with the related party.

The transfer-pricing rules can apply to transactions between domestic related parties in specific circumstances.

Debt-to-equity rules. Interest on loans from shareholders, who directly or indirectly at any time during a tax year hold at least 25% of capital or voting rights of the taxable person (with the exception of banks and insurance companies as borrowers), is

deductible only if it is attributable to the part of the loan that does not exceed a specified multiple of the value of the share capital owned (debt-to-equity ratio). Loans from shareholders are also considered loans from related persons of the taxable person if the shareholder directly or indirectly at any time during a tax year holds at least 25% of shares, holdings or voting rights in the lender and the taxable person. For example, this applies to loans obtained from sister companies. The applicable debt-to-equity ratio is currently 4:1.

Global minimum level of taxation. On 21 December 2023, Slovenia implemented the EU Directive on ensuring a global minimum level of taxation for multinational enterprise groups and large-scale domestic groups in the union (Directive 2022/2523). The minimal effective taxation rate of 15% applies to multinational groups of companies with revenues exceeding EUR750 million for financial years starting from 31 December 2023 onward. For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (ey-beps-2-0-pillar-two-developments-tracker.pdf).

Anti-avoidance legislation. On 27 November 2018, the National Assembly adopted the amended Corporate Income Tax Act (CITA-2). The amendments were based on Council Directive (EU) 2016/1164 of 12 July 2016. The changes took effect on 1 January 2019. The amended act introduces a general anti-abuse rule to prevent abusive tax practices. The rule may be used only if all of the other rules set out in CITA-2 cannot prevent tax abuse. This means that the general anti-abuse rule is used as a last resource if other rules set out in CITA-2 are not sufficient to prevent the obtaining an unjustified tax advantage.

In addition, the amendment introduced the controlled foreign company (CFC) regime. A CFC has two main elements. The first is based on participation and entitlement to profits, while the other is based on actual taxation, as compared to possible taxation in Slovenia. A person who is not taxed under CITA-2 is treated as a CFC if the following conditions are met:

- A taxable person directly or indirectly participates in the person with more than 50% of the voting rights, has directly or indirectly more than 50% of the capital of the person, or is entitled to more than 50% of the person's profits.
- The corporate income tax on the profits actually paid by the person is less than half of the corporate income tax that would be charged to a person on the basis of the applicable corporate taxation system in Slovenia for that profit under CITA-2.

Multilateral instrument. On 22 March 2018, Slovenia ratified the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI), effective 1 July 2018. The MLI is designed to swiftly implement the tax treaty-related measures arising from the OECD Base Erosion and Profit Shifting project through the automatic modification of existing bilateral tax treaties. It implemented "minimum standard" changes to existing treaties in the areas of treaty abuse, mutual agreement procedures and treaty preambles. In addition, depending on the reservations and notifications made by each party, the MLI facilitates optional changes to modify tax treaties with respect to permanent establishments, transparent

entities, residence tiebreakers, double tax relief, minimum shareholding periods, capital gains derived from immovable property and a jurisdiction's right to tax its own residents.

Hybrid mismatches and exit taxation. In light of the Base Erosion and Profit Shifting (BEPS) project and Directive 2016/1164/EU, the following two sets of rules were introduced into the Slovenian tax law, effective from 1 January 2020:
- Rules on exit taxation
- Rules on hybrid mismatches aimed at curbing tax avoidance practices that affect the tax base

The first set of rules determines a tax on the unrealized appreciation of assets gained in Slovenia; it taxes hidden reserves on the transfer of a business activity or assets from Slovenia to another country.

The second set of rules concerns the neutralization of effects in cases of hybrid mismatches between EU Member States, as well as with third countries, arising from payments or alleged payments between the taxable person and related parties in different countries. Hybrid mismatches are the result of differences in the legal characterization of payments, financial instruments and similar items in cases of different legal and tax regimes. The rules provide adjustments in the determination of tax liabilities for such cases.

New provisions on reverse hybrid mismatches were introduced, effective from 1 January 2022.

Mandatory disclosure rules. On 22 June 2019, Slovenia implemented the EU directive on the mandatory disclosure and exchange of cross-border tax arrangements (DAC 6). The rules implementing DAC 6 are effective from 1 July 2020; however, reports retroactively cover arrangements for which the first step was implemented between 25 June 2018 and 1 July 2020.

The deadline for (first) reporting on existing cross-border arrangements (implemented after 25 June 2018) was 28 February 2021. Any new arrangements must be reported within 30 days.

Exchange of information reported by platform operators. In December 2022, Slovenia implemented the EU directive on administrative cooperation in the field of taxation (DAC7), which defines the reporting obligations for digital platform operators (Model Reporting Rules for Digital Platforms [MRDP]). The information must be submitted to the Financial Administration of Republic of Slovenia (FURS) by 31 January 2024.

F. Treaty withholding tax rates

Most of Slovenia's double tax treaties follow the OECD model convention. The following table shows the withholding tax rates under Slovenia's tax treaties.

	Dividends %	Interest %	Royalties %
Albania	5/10 (a)	7 (s)	7
Armenia	5/10 (a)	0/10 (m)	5
Austria	5/15 (a)	0/5 (m)	5
Azerbaijan	8	0/8 (x)	5/10 (y)
Belarus	5	5 (t)	5

	Dividends %	Interest %	Royalties %
Belgium	5/15 (a)	10	5
Bosnia and Herzegovina	5/10 (a)	7	5
Bulgaria	5/10 (a)	5 (b)	5/10 (c)
Canada	5/15 (f)	0/10 (k)	10
China Mainland	5	10	10
Croatia	5	0/5 (b)	5
Cyprus	5	5 (t)	5
Czech Republic	5/15 (a)	0/5 (b)	10
Denmark	5/15 (a)	5	5
Estonia	5/15 (a)	0/10 (b)	10
Finland	5/15 (a)	0/5 (b)	5
France	0/15 (d)	5 (b)	5
Georgia	5	0/5 (s)	5
Germany	5/15 (a)	0/5 (b)	5
Greece	10	10	10
Hungary	5/15 (a)	0/5 (k)	5
Iceland	5/15 (a)	0/5 (b)	5
India	5/15	10	10
Iran	7	0/5 (ee)	5
Ireland	5/15 (hh)	0/5 (b)	5
Israel	5/10/15 (ii)	0/5 (b)	5
Italy	5/15 (a)	10	5
Japan	5/10	0/5 (gg)	5
Kazakhstan	5/15 (a)	10	10
Korea (South)	5/15 (a)	5 (b)	5
Kosovo	5/10 (cc)	0/5 (dd)	5
Kuwait	0/5 (v)	0/5 (w)	10
Latvia	5/15 (a)	0/10 (b)	10
Lithuania	5/15 (a)	0/10 (b)	10
Luxembourg	5/15 (a)	0/5 (b)	5
Malta	5/15 (g)	5	5
Moldova	5/10	5	5
Morocco	7/10 (a)	0/10 (b)	10
Netherlands	5/15 (ll)	0/5 (b)	5
North Macedonia	5/15 (a)	10	10
Norway	0/15 (r)	0/5 (e)	5
Poland	5/15 (hh)	0/10 (b)	10
Portugal	5/15 (hh)	0/10 (b)	5
Qatar	5	5	5
Romania	5	0/5 (b)	5
Russian Federation	10	10	10
Serbia and Montenegro (n)	5/10 (hh)	0/10 (b)	5/10 (h)(j)
Singapore	5	0/5 (kk)	5
Slovak Republic	5/15 (jj)	10	10
Spain	5/15 (a)	0/5 (b)	5
Sweden	5/15 (a)	5	5
Switzerland	0/15 (z)	5 (aa)	0/5 (bb)
Thailand	10	0/10/15 (b)(i)	10/15 (j)
Türkiye	10	0/10 (b)	10
Ukraine	5/15 (a)	5	5/10 (h)(j)
United Arab Emirates	0/5 (ff)	0/5 (l)	5

	Dividends %	Interest %	Royalties %
United Kingdom	0/15 (p)	0/5 (q)	5
United States	5/15 (a)	0/5	5
Uzbekistan	8	8	10
Non-treaty jurisdictions	15	15	15

(a) The lower rate applies if the recipient of the dividends is a company that holds at least 25% of the capital of the payer of the dividends.

(b) The 0% rate applies to interest paid to the government including local authorities or the national bank. In certain treaties, the 0% rate applies to interest paid to national export companies and other institutions, subject to additional conditions.

(c) The lower rate applies to royalties paid for the use of, or the right to use, the following:
- Copyrights of literary, artistic or scientific works (not including cinematographic works)
- Industrial, commercial or scientific equipment

(d) The 0% rate applies if the recipient of the dividends is a company that holds at least 20% of the capital of the payer of the dividends and (as modified by Paragraph 1 of Article 8 of the MLI) if this condition is met throughout a 365-day period that includes the day of the payment of the dividends (for the purpose of computing this period, no account is taken of changes of ownership that directly results from a corporate reorganization, such as a merger or divisive reorganization, of the company that holds the shares or that pays the dividends).

(e) Interest arising in a contracting state and paid to the government of the other contracting state is exempt from tax in the state of the payer. In the case of Slovenia, interest arising in Norway and paid with respect to a loan guaranteed or insured by Slovene Export and Development Bank Inc., Ljubljana on account of the Republic of Slovenia as authorized in accordance with the domestic law is exempt from tax in Norway.

(f) For dividends paid by Slovenian companies, the 5% rate applies if the recipient of dividends holds at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends paid by Slovenian companies. For dividends paid by Canadian companies, the 5% rate applies if the recipient of dividends holds at least 10% of the voting power of the payer of the dividends. The 15% rate applies to other dividends paid by Canadian companies.

(g) For dividends paid by Slovenian companies, the 5% rate applies if the recipient of dividends owns at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends paid by Slovenian companies. For dividends paid by Maltese companies to Slovenian resident beneficiaries, the withholding tax rate may not exceed the tax imposed on the profits out of which dividends are paid.

(h) The 5% rate applies to royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic works, and films or tapes used for radio or television broadcasting.

(i) The 10% rate applies to interest paid to financial institutions, including insurance companies.

(j) The 10% rate applies to royalties paid for the following:
- The use of, or the right to use, copyrights of literary or artistic works, including motion pictures, live broadcasting, films and tapes
- Other means for use or reproduction in connection with radio and television broadcasting
- The use of, or the right to use, industrial, commercial or scientific equipment

(k) Subject to additional conditions, the 0% rate applies to the following:
- Interest paid with respect to indebtedness of the government or local authorities
- Interest paid to an entity that was established and operates exclusively to administer or provide benefits under pension, retirement or other employee benefit plans

Interest arising in Slovenia (Canada) and paid to a resident of Canada (Slovenia) is taxable only in Canada (Slovenia) if it is paid with respect to loans made, guaranteed or insured by the Export Development Corporation (Slovenian Export Company).

(l) Interest paid by a company that is a resident of a contracting state is taxable only in the other contracting state if the beneficial owner of the interest is one of the following:
- The other state
- Political subdivision

- Local government
- Local authority
- Central bank
- Recognized pension fund
- Abu Dhabi Investment Authority
- Abu Dhabi Investment Council
- Emirates Investment Authority
- Mubadala Development Company
- International Petroleum Investment Company
- Dubai World
- Investment Corporation of Dubai
- Any other institution created by the government, a political subdivision, a local authority or a local government of that other state that is recognized as an integral part of that government, as agreed through an exchange of letters by the competent authorities of the contracting states

Interest arising in the United Arab Emirates and paid on a loan guaranteed or insured by the Slovenian Export and Development Bank (Slovenska Izvozna in Razvojna Banka, or SID Bank) Inc. Ljubljana, on behalf of the Republic of Slovenia as authorized by the domestic law is exempt from tax in the United Arab Emirates.

(m) The 0% applies if any of the following circumstances exists:
- The interest is paid to the government including local authorities or the national bank.
- The payer of the interest is the government including local authorities or the national bank.
- The interest is paid with respect to a loan made, approved, guaranteed or insured by an institution that is authorized under internal law to act as an export financing institution on behalf of the contracting state.

(n) The tax treaty between Slovenia and the former Union of Serbia and Montenegro is expected to continue to apply to the republics of Serbia and Montenegro. The treaty does not apply to Kosovo.

(o) The 5% rate applies if the recipient of the dividends is a company that holds at least 10% of the capital of the payer of the dividends.

(p) The 0% rate applies if the recipient of dividends owns more than 20% of the capital voting rights of the payer of the dividends.

(q) The 0% rate applies if either of the following circumstances exists:
- The interest is paid to the government including local authorities or the national bank.
- The payer and the recipient are both companies and one of the companies owns directly at least 20% of the capital of the other company, or a third company that is a resident of a contracting state holds directly at least 20% of the capital of both the payer company and the recipient company.

(r) The 0% rate applies if any of the following circumstances exists:
- The recipient of dividends owns more than 15% of the capital voting rights of the payer of the dividends (see last sentence of second bullet below).
- In the case of Norway, the beneficial owner of the dividends is a resident of Norway who is a partner in a Norwegian partnership and alone or together with the other partners holds directly at least 15% of the capital of the company paying the dividends. As modified by Paragraph 1 of Article 8 of the MLI, the conditions stated in this bullet and in the first bullet above must be met throughout a 365-day period that includes the date of the payment of the dividends (for the purpose of computing this period, no account is taken of changes of ownership that would directly result from a corporate reorganization, such as a merger or divisive reorganization, of the company that holds the shares or that pays the dividends).
- The dividends are derived and beneficially owned by the government of a contracting state.

(s) A 0% rate applies if any of the following circumstances exists:
- The payer of the interest is the government of a contracting state, political subdivision, local authority or central bank of such state.
- The interest is paid to the government of the other contracting state or a political subdivision, local authority or central bank of such state.
- The interest is paid with respect to a loan made, approved, guaranteed or insured by an institution that is authorized in accordance with internal law on insurance and financing of international business transactions.

(t) A 0% rate applies if either of the following circumstances exists:
- The payer of the interest is the government of a contracting state, or a political subdivision, local authority or central bank of such state.
- The interest is paid to the government of the other contracting state or a political subdivision, local authority or central bank of such state.

(u) The lower rate applies to royalties paid for the use, or the right to use, patents, patterns, models, plans, and secret formulas or procedures or for information regarding industrial, commercial or scientific experience.

(v) The 0% rate applies if the beneficial owner of the income is a resident of the other contracting state and is one of the following:
- The government of that contracting state or a political subdivision or local authority thereof or the central bank
- A governmental institution created in that contracting state under public law such as a corporation, fund, authority, foundation, agency or similar entity
- An entity established in that contracting state, all the capital of which has been provided by that contracting state or a political subdivision or local authority thereof or any governmental institution mentioned in the bullet above together with other states

(w) A 0% rate applies if the beneficial owner of the interest is a resident of the other contracting state and is one of the following:
- The government of that contracting state, a political subdivision or local authority thereof or the central bank
- A governmental institution created in that contracting state under public law such as a corporation, fund, authority, foundation, agency or similar entity
- An entity established in that contracting state, all the capital of which has been provided by that contracting state or a political subdivision or local authority thereof or a governmental institution as defined in the bullet above, together with other states

(x) A 0% rate applies if any of the following circumstances exists:
- The payer of the interest is the government of that contracting state or an administrative-territorial or political subdivision or a local authority or the central bank.
- The interest is paid to the government of the other contracting state or an administrative-territorial or political subdivision or a local authority or the central bank.
- The interest is paid with respect to a loan made, approved, guaranteed or insured, on behalf of the Republic of Slovenia, by the Slovenian Export and Development Bank (Slovenska Izvozna in Razvojna Banka, or SID Bank) Inc. Ljubljana, which is authorized under the domestic legislation of the Republic of Slovenia for insuring and financing international business transactions.
- The interest is paid to the State Oil Fund of the Republic of Azerbaijan.

(y) The lower rate applies to royalties paid for the use of, or the right use, computer software, patents, designs or models, plans, secret formulas or processes, or for information concerning industrial, commercial or scientific experience.

(z) A 0 % rate applies if the beneficial owner of the dividends is one of the following:
- A company (other than a partnership) that is a resident of the other contracting state and that holds directly at least 25% of the capital in the company paying the dividends
- A pension scheme

(aa) Interest arising in a contracting state and paid to a resident of the other contracting state that is the beneficial owner of the interest is taxable only in that other state to if any of the following circumstances exist:
- It is paid by the government of a contracting state, a political subdivision, a local authority or the central bank.
- It is paid to the government of a contracting state, a political subdivision, a local authority or the central bank.
- It is paid with respect to a loan made, approved, guaranteed or insured by an institution that is authorized in accordance with internal law to insure and finance international business transactions.
- It is paid with respect to indebtedness arising as a result of the sale on credit of equipment, merchandise or services.
- It is paid by a bank to a bank of the other contracting state.
- It is paid by a company to a company of the other contracting state if the recipient company is affiliated with the company paying the interest by a direct minimum holding of 25% in the capital or if both companies are held by a third company that is resident of an EU Member State or Switzerland and that has directly a minimum holding of 25% in the capital of the first company and in the capital of the second company.

(bb) Royalties paid by a company that is a resident of a contracting state to a resident of the other contracting state is taxable in only the other state if the beneficial owner is a company that is affiliated with the company paying the royalties by a direct minimum holding of 25% in the capital or if both companies are held by a third company that is resident of an EU Member State

or Switzerland and that has directly a minimum holding of 25% in the capital of the first company and in the capital of the second company.

(cc) The lower rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends.

(dd) A 0% rate applies if any of the following circumstances exists:
- The payer of the interest is the government of that contracting state or a political subdivision, local authority or the central bank.
- The interest is paid to the government of the other contracting state or a political subdivision, local authority or the central bank.
- The interest is paid with respect to a loan made, approved, guaranteed or insured by an institution of the other contacting state on behalf of that state as authorized by a special domestic law on insuring and financing of international business transactions.

(ee) Interest arising in a contracting state and paid to a resident of the other contracting state that is the beneficial owner of the interest is taxable only in that other state if any of the following circumstances exists:
- The interest is paid the government of the other contracting state, a political subdivision or a local authority thereof, or to the central bank of the other contracting state.
- The interest is paid in connection with the sale on credit of industrial, commercial or scientific equipment.
- The interest is paid in connection with the sale on credit of merchandise by one enterprise to another enterprise.

(ff) Dividends paid by a company that is a resident of a contracting state is taxable only in the other contracting state if the beneficial owner of the dividends is one of the following:
- The other state
- Political subdivision
- Local government
- Local authority
- Central bank
- Recognized pension fund
- Abu Dhabi Investment Authority
- Abu Dhabi Investment Council
- Emirates Investment Authority
- Mubadala Development Company
- International Petroleum Investment Company
- Dubai World
- Investment Corporation of Dubai
- Any other institution created by the government, a political subdivision, a local authority or a local government of the other state that is recognized as an integral part of that government as agreed through an exchange of letters by the competent authorities of the contracting states

(gg) The 0% rate applies to interest paid to the government, including local authorities, or the national bank. The 0% rate also applies to interest paid to a resident of the other contracting state with respect to debt claims guaranteed, insured or indirectly financed by any institution promoting exports, investment or development.

(hh) The lower rate applies if the recipient of the dividends is a company that holds at least 25% of the capital of the payer of the dividends and (as modified by Paragraph 1 of Article 8 of the MLI) if this condition is met throughout a 365-day period that includes the date of the payment of the dividends (for the purpose of computing this period, no account is taken of changes of ownership that would directly result from a corporate reorganization, such as a merger or divisive reorganization, of the company that holds the shares or that pays the dividends).

(ii) The 5% rate applies (as modified by Paragraph 1 of Article 8 of the MLI) if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies (as modified by Paragraph 1 of Article 8 of the MLI) if the following conditions are met:
- The beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that by virtue of the law of the state in which the payer is a resident are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state.
- The above condition is met throughout a 365-day period that includes the date of the payment of the dividends (for the purpose of computing this period, no account is taken of changes of ownership that would directly result from a corporate reorganization, such as a merger or divisive

reorganization, of the company that holds the shares or that pays the dividends).

(jj) The 5% rate applies (as modified by Paragraph 1 of Article 8 of the MLI) if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends. The 5% rate also applies (as modified by Paragraph 1 of Article 8 of the MLI), in the case of a Slovak partnership, if the beneficial owner is a company resident in the Slovak Republic that is a partner in a Slovak partnership that alone holds directly at least 25% of the capital of the company paying the dividends and if this condition is met throughout a 365-day period that includes the date of the payment of the dividends (for the purpose of computing that period, no account is taken of changes of ownership that would directly result from a corporate reorganization, such as a merger or divisive reorganization, of the company that holds the shares or that pays the dividends).

(kk) Interest arising in a contracting state and paid to the government of the other contracting state is exempt from tax in the first-mentioned state. In the case of Slovenia, interest arising in Singapore and paid in consideration of a loan guaranteed or insured by Slovene Export and Development Bank Inc., Ljubljana on account of the Republic of Slovenia, as authorized in accordance with the domestic law, is exempt from tax in Singapore.

(ll) The lower rate applies if the recipient of the dividends is a company that holds at least 10% of the capital of the payer of the dividends and (as modified by Paragraph 1 of Article 8 of the MLI) if this condition is met throughout a 365-day period that includes the date of the payment of the dividends (for the purpose of computing this period, no account is taken of changes of ownership that would directly result from a corporate reorganization, such as a merger or divisive reorganization, of the company that holds the shares or that pays the dividends).

Slovenia has ratified the double tax treaty with Egypt, but the treaty is not yet effective.

Certain amendments to the tax law have been proposed, but not yet enacted. Because of the expected changes to the tax law, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	27 (a)(b)
Capital Gains Tax Rate (%)	21.6 (c)
Branch Tax Rate (%)	27 (a)
Withholding Tax (%)	
Dividends	20 (d)
Interest	15 (e)(f)

Royalties from Patents, Know-how, etc.	15 (f)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (g)

(a) The rate was reduced from 28% to 27% for tax years ending on or after 31 March 2023 (which in most cases will mean tax years starting on or after 1 April 2022). The mining income of gold mining companies is taxed under a special formula, and the non-mining income of such companies is taxed at a rate of 27% (previously 28%). Special rules apply to life insurance companies, petroleum and gas producers and small business corporations. See Section B.
(b) Under legislation that is due to be enacted, from years of assessment commencing on or after 1 January 2024, a global minimum tax of 15% will apply to large multinationals. See Section E.
(c) This is the effective rate for companies. See Section B.
(d) Dividend withholding tax applies to dividends paid by South African-resident companies. Certain dividends are exempt from the withholding tax, such as dividends received by South African-resident companies and public benefit organizations. A decreased rate may apply under a double tax treaty. See Section F.
(e) Interest withholding tax applies only to interest paid to nonresidents. Certain interest income is exempt from this withholding tax, including interest with respect to government debt instruments, listed debt instruments and debt instruments owed by banks. A reduced rate may apply under a double tax treaty. See Section F.
(f) Royalties withholding tax applies only to royalties paid to nonresidents, subject to certain exemptions. A reduced rate may apply under a double tax treaty. See Section F.
(g) See Section C.

B. Taxes on corporate income and gains

Company tax. A residence-based tax system applies in South Africa. Under domestic legislation, companies are resident in South Africa if they are incorporated in South Africa or have their place of effective management in South Africa.

South African-resident companies are taxed on their worldwide income (including capital gains).

Under complex look-through rules, the income of nonresident subsidiaries in foreign countries is taxed in the hands of the immediately cross-border South African-resident parent company on an imputation basis (see the discussion on controlled foreign companies [CFCs] in Section E). The income of nonresident subsidiaries with "foreign business establishments" in foreign countries is generally exempt from the look-through rules, subject to complex anti-avoidance exceptions. Dividends paid by foreign companies that are not CFCs are taxable unless the shareholding of the South African-resident recipient is 10% or more (see the discussion of foreign dividends in *Dividends*).

Nonresident companies are taxed on their South African-source income only.

Tax rates. For tax years ending on or after 31 March 2023, the normal corporate income tax rate in South Africa is 27% (previously 28%). South African branches of nonresident companies are also taxed at 27% on South African-source income.

Global minimum tax. South Africa is due to enact legislation introducing a global minimum tax with effect from years of assessment commencing on or after 1 January 2024. For details, see *Global minimum tax* in Section E.

Dividend withholding tax. A withholding tax is imposed at a rate of 20% on cash and *in specie* dividends paid.

A dividend is any amount transferred or applied by a company for the benefit of its shareholders, whether by way of a distribution or as consideration for a share buyback, excluding the following:
- Amounts that result in a reduction of the contributed tax capital of the company
- Shares in the company
- An acquisition by a listed company of its own shares through a general repurchase of shares in accordance with the Johannesburg Stock Exchange (JSE) listing requirements

The tax applies to dividends paid by South African-resident companies (other than headquarter companies) or with respect to cash dividends paid by foreign companies on shares listed on the JSE. Although the tax is imposed on the recipient of a dividend (in the case of a cash dividend), the declaring company must withhold the tax from the dividend paid and pay the tax to the South African Revenue Service (SARS) on behalf of the recipient. In the case of a listed company, a regulated intermediary withholds the tax.

Dividends are not subject to the withholding tax if any of the following circumstances, among others, exists:
- The beneficial owner is a resident company.
- The beneficial owner is a local, provincial or national government.
- The beneficial owner is a specified tax-exempt entity.
- The beneficial owner is an environmental rehabilitation trust.
- The beneficial owner is an institution, board, body, fund (such as a pension fund) or person that meets specific requirements.
- The dividend is paid by a micro business, up to ZAR200,000.
- The dividend is paid by a foreign company listed on the JSE to a nonresident beneficial owner.
- The dividend is taxable in nature.

A paying company is not required to withhold dividends tax if the beneficial owner has supplied it with a written declaration stating the following:
- It is exempt from dividends tax.
- It will inform the company when it is no longer the beneficial owner of the shares.

If the beneficial owner is a nonresident that would like to rely on a reduced dividends tax rate under a double tax treaty between South Africa and its country of residence, it must provide the company with a written declaration that the reduced rate applies and specified undertakings.

If the dividend is a distribution *in specie*, the tax is imposed on the declaring company.

Special types of companies. The mining income of gold mining companies is taxed under a special formula, while the non-mining income of such companies is taxed at a rate of 27% (previously 28%).

Oil and gas production is taxed in accordance with the usual provisions of the Income Tax Act, as modified by a special schedule applicable to exploration and certain post-exploration activities. A fiscal stability regime can be agreed to with the Minister of Finance. The tax rate is capped at a maximum of 27% (previously 28%) for both South African-resident and nonresident companies. Dividends tax need not be withheld from dividends paid out of oil and gas income, and interest withholding tax need not be withheld from interest paid with respect to loans used to fund oil and gas exploration and post-exploration capital expenditure.

Life assurance companies are subject to special rules that separate the taxation of policyholders' and corporate funds and apply different tax rates to such items.

Small business corporations (SBCs) are taxed at the following rates on their taxable income (for tax years ending any date between 1 April 2023 and 31 March 2025):
- 0% on the first ZAR95,750 of taxable income
- 7% of the amount of taxable income exceeding ZAR96,751 but not exceeding ZAR365,000
- ZAR18,848 plus 21% on taxable income exceeding ZAR365,000 but not exceeding ZAR550,000
- ZAR57,698 plus 27% on taxable income exceeding ZAR550,000

To qualify as an SBC, a company must satisfy all of the following requirements:
- Its gross income for the year must not exceed ZAR20 million.
- Its shares must be held by individuals who do not hold interests in other companies (except for certain specified interests such as interests in South African-listed companies).
- Its total personal service and investment income must not exceed 20% of its gross income.
- It is not a personal service provider.

Capital gains. Capital gains derived by resident companies are subject to capital gains tax (CGT) at an effective rate of 21.6% (the normal corporate tax rate of 27% is applied to only 80% of the net capital gain).

Resident companies are subject to CGT on capital gains derived from disposals of worldwide tangible and intangible assets.

Nonresidents are subject to CGT on capital gains derived from the disposal of the following:
- Fixed property (land and buildings)
- Interests in fixed property located in South Africa (such as land-rich companies), including rights to variable or fixed payments as consideration for the working of or the right to work mineral deposits, sources and other natural resources
- Assets effectively connected with a permanent establishment located in South Africa

An interest in fixed property includes a direct or indirect interest of at least 20% in a resident or nonresident company if, at the time of disposal of the interest, 80% or more of the market value of the assets of the company is attributable to fixed property located in South Africa.

A capital gain is equal to the amount by which the disposal proceeds for an asset exceed the base cost of the asset. A capital loss arises if the base cost exceeds the disposal proceeds. Capital losses may offset capital gains, and regular income losses may offset net capital gains. However, net capital losses may not offset regular income but may be carried forward for setoff against future capital gains.

The base cost for an asset includes the sum of the following:
- The amount actually incurred to acquire the asset
- Cost of the valuation of the asset for the purposes of determining the capital gain or loss
- Expenditure directly related to the acquisition or disposal of the asset, such as transfer costs, advertising costs, costs of moving the asset from one location to another and cost of installation
- Expenditure incurred to establish, maintain or defend the legal title to, or right in, the asset
- Expenditure on improvement costs (if the improvement is still in existence)

The base cost is reduced by any amounts that have been allowed as income tax deductions with respect to the disposed asset. It is also reduced by the following amounts if such expenditure was originally included in the base cost:
- Expenditure that is recoverable or recovered
- Amounts paid by another person
- Amounts that have not been paid and are not due in the tax year

Inflation indexation of the base cost is not allowed.

Special rules apply to the base cost valuation of an asset acquired before 1 October 2001.

A disposal is defined as an event that results in, among other actions, the creation, variation or extinction of an asset. It includes the transfer of ownership of an asset, the destruction of an asset and the distribution of an asset by a company to a shareholder. For CGT purposes, a company does not dispose of assets when it issues shares or when it grants an option to acquire a share or debenture in the company.

The proceeds from the disposal of an asset by a taxpayer are equal to the amount received by, or accrued to, the taxpayer as a result of the disposal less any amount that is or was included in the taxpayer's taxable income for income tax purposes. If a company makes a dividend distribution of an asset to a shareholder, it is deemed to have disposed of the asset for proceeds equal to the asset's market value.

Rollover relief is available in certain circumstances including destruction of assets and scrapping of assets.

Related-party transactions may be deemed to occur at market value, and restrictions are imposed on the claiming of losses incurred in such transactions.

Corporate emigration (cessation of tax residence), which could occur when the company's place of effective management is moved outside South Africa, triggers four separate "exit" charges. First, there is a deemed disposal at market value of the assets of the company, resulting in a CGT and/or normal corporate income tax charge. Secondly, there is a deemed dividend *in specie*, potentially resulting in dividend tax liability. The amount of the dividend *in specie* is deemed to be equal to the sum of the market values of all the shares in that company on that date less the sum of the contributed tax capital of all the classes of shares in the company as of that date. Alternatively, if the deemed dividend qualifies for certain exemptions, the shareholder(s) of the migrating company might be deemed to have disposed of the shares (held in the migrating company), potentially resulting in a CGT liability for the shareholder(s). The third and fourth exit charges arise from the reversal of participation exemptions claimed by the migrating company in the last three years before migration, resulting in additional CGT (on previously exempt foreign share-disposals) and/or normal corporate income tax (on previously exempt foreign dividend income).

Subject to certain exceptions, disposals of equity shares in foreign companies to third-party nonresidents are exempt from CGT if the disposing party has held at least 10% of the equity in the foreign company for at least 18 months.

Administration. The Tax Administration Act governs the administration of most taxes in South Africa.

The tax year for a company is its financial year. A company must file its annual tax return in which it calculates its taxable income and capital gains, together with a copy of its audited financial statements, within 12 months after the end of its financial year The SARS issues an official assessment based on the annual return.

The company must pay the balance of tax due after deduction of provisional payments within a specified period after receipt of the assessment.

Companies must pay provisional tax in two installments during their tax year. The first must be paid by the end of the sixth month of the tax year and the second by the end of the tax year. The second payment must be accurate to within 80% of the actual tax for the year. A third ("topping up") payment may be made within six months after the end of the tax year (for companies with a tax year-end of the last day of February, it is the last business day of September). If this payment is not made and if there is an underpayment of tax, interest is charged from the due date of the payment. A 20% penalty is charged if the total provisional tax paid for the year does not fall within certain prescribed parameters.

Tax penalties fall into two broad categories, which are for specified noncompliance (penalty can range between ZAR250 and ZAR16,000 per month) and understatement (penalty can range between 5% and 200% of the shortfall).

The SARS "eFiling" system allows provisional payments and tax returns to be submitted electronically. It is also a platform for the many other interactions (information uploads, payments and others) with the revenue service.

Dividends

South African dividends. Dividends paid by South African-resident companies are generally exempt from normal corporate income tax in the hands of the recipients. Accordingly, recipients may, in most cases, not deduct expenses relating to the earning of these dividends, such as interest and other expenses incurred on the acquisition of their shares (although there is an exception for certain corporate acquisitions).

Foreign dividends. Foreign dividends are dividends paid by non-resident companies and headquarter companies. Most foreign dividends accruing to or received by South African residents are taxable. The following foreign dividends are exempt from tax:

- Dividends paid by a foreign company to a South African resident holding at least 10% of the equity shares and voting rights in the foreign company (participation exemption), unless the dividend paid by the foreign company is deductible for purposes of determining its tax liability in that foreign country (specific anti-avoidance measures may limit the exemption if foreign dividends arise from active foreign business operations)
- Dividends paid by a CFC to a South African resident (subject to certain limitations)
- Cash dividends paid by a foreign company that is listed in South Africa
- Dividends paid by a foreign company to another foreign company that is resident in the same country as the payer, unless the dividend paid by the foreign company is deductible for the purposes of determining its tax liability in that country

For foreign dividends that are not exempt, a foreign tax credit (rebate) may be claimed by South African resident recipients. The rebate is limited to the amount of South African tax attributable to the foreign dividend. Any excess of the foreign tax over the allowable rebate may be carried forward for a period of seven years. The excess taxes are available for setoff against foreign-source income in subsequent years (the calculation is done on a pooled basis).

Recipients of foreign dividends that are not exempt are taxed on a formula basis, resulting in an effective tax rate of 20%, as opposed to the standard corporate income tax rate of 27% (previously 28%).

Withholding tax. Dividend withholding tax at a rate of 20% is imposed, subject to applicable treaty rates. For further details, see *Dividend withholding tax*.

Foreign tax relief. In the absence of treaty relief provisions, unilateral relief is granted through a rebate for foreign taxes paid on foreign income and taxable capital gains, including income attributed under the CFC rules (see Section E) or trust attribution rules. The rebate is limited to the lesser of the actual foreign tax liability and the South African tax on such foreign income. The

credit may be claimed only if the income is from a non-South African source. Excess credits may be carried forward, but they are lost if they are not used within seven years.

Foreign taxes levied on income from a South African source may, subject to certain requirements and limitations, be claimed as a deduction from taxable income.

C. Determination of trading income

General. The assessment to tax is based on taxable income determined in accordance with the Income Tax Act.

To be eligible for deduction, expenditures must be actually incurred in the production of income and for purposes of trade and must not be of a capital nature.

Prepayments of insurance, rent and certain other items may not be deducted in full in the tax year of payment unless either of the following applies:
- The related service or other benefit is enjoyed within six months after the end of the tax year of payment.
- The aggregate of such expenditure is less than ZAR100,000.

Inventories. Inventory is valued at the lower of cost or net realizable value. Last-in, first-out (LIFO) is not an acceptable method of valuation for tax purposes. Appropriate overhead expenses must be included, in the valuation of inventory. Special rules apply to construction work in progress. Consumable stores and spare parts may be included in inventory.

Tax depreciation (capital allowances)

Industrial plant and machinery. New plant and machinery that is brought into use in a manufacturing or similar process by other businesses is depreciated at a rate of 40% in the first year and at a straight-line rate of 20% for the second, third and fourth years. Used machinery or plant used in such a process qualifies for a 20% allowance per year over five years. The same allowances apply to foundations for plant and machinery if they are built specifically for particular machines and have a useful life limited to the life of the relevant machine.

SBCs (see Section B) qualify for a 100% deduction of the cost of new or used plant or machinery that is first brought into use in a manufacturing or similar process. For other plant or machinery of an SBC, the following allowances are granted:
- 50% in the first year of use
- 30% in the second year of use
- 20% in the third year of use

Industrial buildings. A 5% annual straight-line allowance is granted on the cost of the construction of, and improvements to, industrial buildings erected by a taxpayer. Purchased industrial buildings generally qualify for annual straight-line allowances on the purchase price paid, excluding the amount attributable to the land, at the following rates:
- 2% if originally constructed before 1 January 1989
- 5% if constructed during the period of 1 January 1989 through 30 June 1996

- 10% if constructed during the period of 1 July 1996 through 31 March 2000
- 5% if constructed after 1 April 2000

Hotels. Construction of and improvements to hotels qualify for a 5% straight-line allowance. However, capital expenditure on the internal renovation of hotels qualifies for straight-line depreciation at an annual rate of 20%.

Urban renewal. The cost of erecting new buildings or renovating (including extension) old buildings in certain depressed urban areas qualifies for allowances if the building is used by the taxpayer for the taxpayer's own trade or is leased for commercial or residential purposes. If the building is new or significant extensions are made to an existing building, the allowance is 25% in the year of first occupation, 13% per year for the five succeeding years and 10% in the following year. If a building is renovated and if the existing structural or exterior framework is preserved, the allowance is 25% per year for four years. The allowances have been adjusted over the years. As a result, different rules may be in effect for improvements undertaken in previous tax years.

Enhanced deduction for renewable energy plant and machinery. Costs incurred with respect to the acquisition and construction of plant and machinery used in the generation of renewable energy qualify for an upfront allowance (based on certain criteria) of 125% of the cost incurred. However, the enhanced allowance is only available for assets brought into use on or after 1 March 2023 and before 1 March 2025.

Renewable energy plant and machinery. Costs incurred with respect to the acquisition and construction of plant and machinery used in the generation of renewable energy (that do not qualify for the enhanced deduction noted in *Enhanced deduction for renewable energy plant and machinery*) qualify for allowances (based on certain criteria) at the following rates:

- 50% in the first year of use
- 30% in the second year of use
- 20% in the third year of use

Other commercial buildings. An allowance of 5% of the cost is generally available on commercial buildings not qualifying for any of the above allowances.

Wear-and-tear allowance for movables. An annual "wear-and-tear" tax depreciation allowance on movable items may be calculated using the declining-balance method or the straight-line method, but the straight-line method is generally preferred by the revenue authority. The allowance may be claimed based on the value (generally the cost) of movable non-manufacturing machinery and equipment used by the taxpayer for the purposes of its trade. Rates for the wear-and-tear allowance are not prescribed by statute, but certain periods of depreciation are generally accepted by the tax authorities. The following are some of the acceptable periods of straight-line depreciation.

Asset	**Years**
Aircraft (light passenger, commercial and helicopters)	4
Computers (mainframe)	5

Asset	Years
Computers (personal computers)	3
Computer software (mainframes)	
Purchased	3
Self-developed	5
Computer software (personal computers)	2
Furniture	6
Passenger cars	5
Trucks (heavy duty)	3

Apportionment of the wear-and-tear allowances is required for assets acquired during the course of a year.

Any asset costing ZAR7,000 or less may be written off in full in the year of acquisition of the asset.

Special capital allowances. Subject to the approval of the Minister of Science and Technology (Innovation), the cost of developing and registering patents, designs, copyrights or similar property, and related know-how and of discovering novel scientific and technological information qualifies for a 150% deduction in the year in which the costs are incurred.

The acquisition cost of patents, copyrights and similar property (other than trademarks) and of related know-how is deductible at a rate of 5% per year. The cost of designs is deductible at a rate of 10% per year.

The cost of goodwill and trademarks is not depreciable for tax purposes.

Deductions with respect to restraint of trade payments are allowed over the period of restraint, with a minimum period of three years.

A 10% annual allowance is granted for the cost of new and unused pipelines used for transportation of natural oil, gas and refined products.

A 5% annual allowance is granted for the following:
- Water pipelines and electrical lines
- Railway lines used for the transportation of persons, goods and other items

Other special capital allowances are provided for expenditures on ships and aircraft, hotel equipment, scientific research, employee housing, plant and machinery of small business corporations (see Section B), aircraft hangars, aprons, runways and taxiways, and solar, wind and tidal equipment for the generation of electricity, as well as for certain capital expenditures for mining and agriculture, which are deductible in full against mining and agricultural income.

Recapture. The amount of tax depreciation claimed on an asset may be recouped (recaptured) when the asset is sold. In general, the amount recouped is the excess of the selling price over the tax value, but it is limited to the amount of tax depreciation claimed.

Groups of companies. Companies in a group may not share their tax losses with other profitable companies in the group.

Special rules provide income tax and CGT relief for transactions between 70%-held group companies and between shareholders and their companies. These transactions include the following:

- Asset-for-share transactions
- Amalgamation transactions
- Substitutive share-for-share transactions
- Intragroup transactions
- Unbundling transactions
- Transactions relating to the liquidation, winding up and deregistration of companies

Relief for losses. Tax losses may not be carried back but may be carried forward indefinitely, provided there is trading in every tax year. For tax years ending on or after 31 March 2023 (which in most cases means tax years starting on or after 1 April 2022), the utilization of losses will be limited to 80% of current-year taxable income (or ZAR1 million, if higher). This means that normal corporate income tax will be paid on at least 20% of current-year taxable income. This does not impact the indefinite carryforward of unutilized losses.

Foreign tax losses may be offset against foreign income only. If a foreign tax loss exceeds foreign income, the excess may be carried forward to offset foreign income in future years for an unlimited period.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, levied on supply of a wide range of goods and services	
Standard rate	15
Disposals of going concerns and certain exports	0
Skills development levy, on remuneration	1
Securities transfer tax; levied on the transfer of listed and unlisted securities	0.25

E. Miscellaneous matters

Foreign-exchange controls. The exchange control regime seeks to monitor and manage the outflow of capital from South Africa and to ensure a measure of stability in currency markets.

In general, some form of permission must be obtained either from an authorized dealer (for example, one of the commercial banks) or from the Financial Surveillance Department of the South African Reserve Bank (SARB) for the remittance of cross-border payments. The SARB has been gradually relaxing foreign-exchange controls.

Debt-to-equity rules. Transfer-pricing principles also extend to thin capitalization. Both the interest rate and the amount of a loan must be based on arm's-length principles. There is currently no safe harbor, and each company must consider its debt-equity mix on an arm's-length basis. Certain exclusions exist (for example, certain headquarter company transactions). South Africa also has stand-alone interest limitation provisions that limit payments that

are economically equivalent to interest (including certain foreign-exchange losses) to 30% of adjusted taxable income (that is, tax earnings before interest, taxes, depreciation and amortization [EBITDA]).

Transfer pricing. The transfer-pricing provisions, relying on the arm's-length principle, apply with respect to any cross-border transaction, operation, scheme, agreement or understanding that are concluded between, or for the benefit of connected persons. Primary and secondary adjustments apply where parties are not transacting at arm's length. The following are key aspects of the legislation:

- Affected transaction means any transaction, operation, scheme, agreement or understanding entered into or effected between or for the benefit of connected parties, as defined, and the terms or conditions are different from arm's-length terms or conditions.
- The arm's-length principle applies to financial transactions.
- If there is a transfer-pricing adjustment, a secondary adjustment is also triggered in the form of a deemed dividend *in specie* to a company, attracting dividends tax at a rate of 20%.
- In general, the SARS accepts the application of the OECD Transfer Pricing Guidelines. Regarding documentation, the adoption of rules largely in line with Chapter V (Documentation) have been formalized into domestic law (including Country-by-Country Report, Master File and Local File).

Anti-avoidance legislation. In addition to transfer-pricing rules (see *Transfer pricing*), South African law contains general anti-avoidance provisions that target "impermissible tax avoidance arrangements." Broadly, an impermissible tax avoidance arrangement is an arrangement that seeks to achieve a tax benefit as its sole or main purpose and was entered into in a manner that would not normally be employed for bona fide business purposes, lacks commercial substance or misuses or abuses other provisions of the tax law. The SARS has wide powers in determining the tax consequences of an impermissible tax avoidance arrangement.

Controlled foreign companies. The controlled foreign company (CFC) legislation regulates the taxation of certain income of CFCs. Key aspects of the legislation are described below.

An amount determined with reference to the CFC's net income, including capital gains, may be imputed proportionately to any South African resident (other than a headquarter company) that holds an interest of 10% or more in that CFC. The net income is calculated using South African tax principles, but generally ignoring passive income flows between CFCs in a 70%-held group.

A foreign company is considered a CFC if any of the following circumstances exists:

- South African residents, other than headquarter companies (see *Headquarter companies*), directly or indirectly hold more than 50% of the participation rights in that foreign company.
- More than 50% of the voting rights in that foreign company is directly or indirectly exercisable by one or more residents.
- The financial results of that foreign company are reflected in the consolidated financial statements (prepared in terms of International Financial Reporting Standards 10) of any company that is a resident other than a headquarter company.

There are additional rules dealing with indirect holdings through, for example, listed companies.

A CFC's income is exempt from imputation to the extent that it is attributable to a "foreign business establishment" (FBE) of that CFC. In broad terms, an FBE is a fixed place of business that is suitably equipped with on-site operational management, employees, equipment and other facilities for conducting the primary operations of the business and that is used for a bona fide business purpose and not for tax avoidance (the place of business may be located elsewhere than in the CFC's home country). Several anti-avoidance exceptions exist with respect to the measure described in this paragraph. Also, if the tax payable to a foreign government equals at least 67.5% of the tax liability that would have arisen in South Africa, no income needs to be imputed into the resident's taxable income due to reliance on a high-tax exemption. There are also other exemptions for specific types of income in certain circumstances.

See Section B for information regarding foreign attributable tax credits and carryforward rules.

Headquarter companies. The headquarter company regime was introduced to encourage foreign companies to use South Africa as their base for investing in Africa. Broadly, headquarter companies are exempt from withholding taxes on dividends, interest and royalties.

A headquarter company is a South African-resident company that has elected to be treated as a headquarter company and that satisfies all of the following conditions:

- Each shareholder (alone or together with any company forming part of the same group of companies) holds 10% or more of the equity shares and voting rights in the headquarter company.
- At least 80% of the cost of the headquarter company's assets (excluding cash) is attributable to investments in equity shares, loans or advances, or intellectual property (IP) in nonresident companies (investee companies) in which the headquarter company holds an equity interest of at least 10%.
- If the gross income of the company exceeds ZAR5 million, at least 50% of that gross income must consist of rentals, dividends, interest, royalties and service fees received from the foreign investee companies contemplated above, or proceeds from the sale of equity shares or IP in such foreign companies. There are certain exclusions regarding foreign-exchange gains or losses.

A headquarter company also has certain reporting requirements.

The CFC imputation rules do not apply to headquarter companies, but these companies are essentially transparent for the purposes of the CFC rules. If more than 50% of the headquarter company's shares is held by South African residents, the underlying foreign subsidiaries of the headquarter company might still be CFCs in the hands of those South African residents. As a result of this concession, the net income of the headquarter company's CFCs is not taxed in its hands, but in the hands of the ultimate shareholders if they are South African residents.

Headquarter companies are also exempt from the transfer pricing rules with respect to financial assistance and IP licensing granted to the foreign investee companies. In the case of back-to-back debt or IP arrangements (for example, the headquarter company borrows from a related foreign lender to on-lend to a foreign investee company), both legs of the transaction are exempt from the transfer pricing rules, but the headquarter company would not be permitted to create losses with such back-to-back arrangements.

Global minimum tax. South Africa is due to enact legislation introducing a global minimum tax with effect from years of assessment commencing on or after 1 January 2024. The global minimum tax will ensure that any multinational enterprise (MNE) group with annual revenue exceeding EUR750 million will be subject to an effective tax rate of at least 15%, regardless of where its headquarters, operations, sales or profits are located.

The proposals contained in the Draft Global Minimum Tax Bill are designed to follow the Global Anti-Base Erosion (GloBE) Model Rules and Commentary, and stipulate that the Top-up Tax be imposed in accordance with the following:

- An Income Inclusion Rule (IIR) that taxes the domestic entity of an MNE group on its allocable share of Top-up Tax arising with respect to the low-taxed income of any foreign group company in which it has a direct or indirect ownership interest
- A Domestic Minimum Top-up Tax (DMTT) that imposes a joint and several tax liability on the domestic entities of an MNE group for any Top-up Tax arising in respect of low-taxed income of those domestic entities (calculated on an aggregate basis but only with respect to entities located in South Africa)

A separate Draft Global Minimum Tax Administration Bill, which has also been released, deals with the administrative aspects of the proposed taxes. The bill proposes to introduce, by reference, the administrative provisions of the GloBE Model Rules in South Africa, while locating them within the existing legislative framework provided by the Tax Administration Act.

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the withholding rate under domestic tax law.

	Dividends (a) %	Interest (b) %	Royalties (c) %
Algeria	10/15 (s)	0/10 (aa)	10 (e)

Non-treaty jurisdictions	20	15	15

(a) Dividends are subject to withholding tax in South Africa at a rate of 20%, unless reduced by tax treaties as shown in the table above.

(b) Interest withholding tax at a rate of 15% applies to South African-source interest paid to nonresidents. Certain exemptions and exclusions apply. Domestic rates can be reduced by tax treaties as shown in the table above.

(c) Royalties withholding tax at a rate of 15% applies to South African-source royalties paid to nonresidents. Certain exemptions and exclusions apply. Domestic rates can be reduced by tax treaties as shown in the table above.

(d) In general, royalties are exempt if they are subject to tax in Israel. For film royalties, however, the rate is 15%.

(e) The rate applies only if the recipient is the beneficial owner of the royalties.

(f) The 6% rate applies to royalties paid for copyrights of literary, dramatic, musical or other artistic works (excluding royalties with respect to motion picture films, works on film or videotape or other means for use in connection with television broadcasting), as well as for the use of, or the right of use, computer software, patents or information concerning industrial, commercial or scientific experience (excluding information provided in connection with a rental or franchise agreement). The 10% rate applies to other royalties.

(g) The 10% rate applies to royalties paid for copyrights of literary, artistic or scientific works, including cinematographic films, tapes, discs, patents, know-how, trademarks, designs, models, plans or secret formulas. The 10% rate applies to the "adjusted amount" of royalties paid (that is, 70% of the gross amount of royalties) for industrial, commercial or scientific equipment. This effectively provides a 7% rate on the gross royalties paid.

(h) The 5% rate applies to royalties paid for copyrights of literary, artistic and scientific works. The 7% rate applies to royalties paid for patents, trademarks, designs, models, plans or secret formulas, as well as for industrial, commercial or scientific equipment.

(i) The 5% rate applies to royalties paid for copyrights of cultural, dramatic, musical or other artistic works or for industrial, commercial and scientific equipment. The 10% rate applies to other royalties.

(j) The 15% rate applies to royalties paid for the use of trademarks. The 10% rate applies to other royalties.

(k) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 10% rate applies to other dividends.

(l) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.

(m) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 10% rate applies to other dividends.

(n) The 7.5% rate applies if the beneficial owner is a company that owns at least 25% of the shares or voting power. The 15% rate applies to other dividends.

(o) The 8% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.

(p) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 15% rate applies to qualifying dividends paid by a property investment company that is a resident of a contracting state. The 10% rate applies to other dividends.

(q) The 5% rate applies if the beneficial owner is a company that owns at least 20% of the shares. The 15% rate applies to other dividends.

(r) The 7.5% rate applies if the beneficial owner is a company that owns at least 10% of the shares or voting power. The 10% rate applies to other dividends.

(s) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.

(t) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The higher rate applies to other dividends.

(u) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 20% rate applies to other dividends.

(v) The 10% rate applies if the beneficial owner is a company that owns at least 15% of the shares. The 20% rate applies to other dividends.

(w) The 10% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 15% rate applies to other dividends.

(x) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the voting shares of the company paying the dividends during the six-month period immediately before the end of the accounting period for which the distribution of profits takes place. The 15% rate applies to other dividends.

(y) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares for an uninterrupted period of two years before the payment of the dividend. The 15% rate applies to other dividends.

(z) The 10% rate applies if the beneficial owner is a company that owns at least 30% of the shares in the company paying the dividends, and holds a minimum direct investment of USD100,000 in that company. The 15% rate applies to other dividends.

(aa) The 0% rate applies to government institutions and unrelated financial institutions. The 10% rate applies in all other cases.

(bb) The 5% rate applies to banks or other financial institutions. The 10% rate applies in all other cases.

(cc) The 0% rate applies to commercial debt claims, public financial institutions or public entities under a scheme for the promotion of exports, loans and deposits with banks and interest paid to the other contracting state. The 10% rate applies in all other cases.

(dd) The 10% rate applies to government institutions. The 15% rate applies in all other cases.

(ee) The 0% rate applies to government institutions. The 5% rate applies in all other cases.

(ff) The 10% rate applies to government institutions.

(gg) The 0% rate applies to government institutions. The 10% rate applies in all other cases.

(hh) The 0% rate applies to government institutions. The 12% rate applies in all other cases.

(ii) The 0% rate applies to government institutions. The 8% rate applies in all other cases.

(jj) The 5% rate applies to banks. The 10% rate applies in all other cases.

(kk) The 0% rate applies to government institutions and interest paid on loans or credits for periods of no less than three years that are granted, guaranteed or insured by a financial or credit institution that is wholly government-owned.

(ll) The 0% rate applies to government institutions. The 7.5% rate applies in all other cases.

(mm) The 5% rate applies to government institutions and interest paid on long-term loans (seven years or more) granted by banks or other credit institutions that are resident in a contracting state.

(nn) The 0% rate applies to government institutions. The 10% rate applies to financial institutions (including insurance companies). The 15% rate applies in all other cases.

(oo) The 0% rate applies to government institutions. The 5% rate applies to banks. The 12% rate applies in all other cases.

(pp) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment, or transport vehicles. The 10% rate applies in all other cases.

(qq) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies in all other cases.

(rr) The 5% rate applies if the dividend is paid out of profits that have borne the normal rate of company tax and if the beneficial owner is a company that owns at least 10% of the shares. The higher rate applies to other dividends.

(ss) The 5% rate applies to interest on loans from banks and insurance companies, bonds and securities traded on a recognized securities market and credit sales of machinery or equipment if the seller is the beneficial owner of the items. The 15% rate applies in all other cases.

(tt) Based on the most-favored-nation clause, the rate is reduced to 0%, subject to the protocol between South Africa and Kuwait being ratified by both parties.

South Africa is in the process of negotiating, finalizing, signing or ratifying new treaties, or protocols to existing treaties, with several jurisdictions, including, among others, Eswatini, Gabon, Germany, Kuwait, Luxembourg, Malawi, Mozambique, Netherlands, Senegal, Sudan, Switzerland and Zambia.

The exchange rate for the South Sudanese pound (SSP) against the US dollar (USD) was SSP1092.12 = USD1 as of 31 December 2023.

A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30 (a)(b)
Branch Tax Rate (%)	30 (a)(c)
Withholding Tax (%)	
Dividends	10 (d)(e)
Interest	10 (d)(e)
Royalties	10 (d)
Rent and Associated Services Costs	20 (d)(e)
Technical Fees	20 (e)(f)
Government Contracts	20 (d)(e)
Lottery and Other Gaming Winnings	20 (d)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) See Section B.
(b) Capital gains are recognized as business income, while capital losses are recognized as business losses.
(c) The taxation of a branch is similar to that of a company or subsidiary.
(d) This withholding tax applies to payments to both residents and nonresidents.
(e) This is considered to be an advance tax.
(f) This withholding tax applies only to payments to nonresidents.

B. Taxes on corporate income and gains

Corporate income tax. Business organizations pay South Sudan corporate income (business profits) tax. Business organizations are organizations that are required to be registered under the

provisions of the Taxation Act except for insurance companies and individuals.

A resident taxpayer is a company, partnership or other entity that is established in South Sudan or that has its place of effective management in South Sudan. Taxable profit for a resident taxpayer is the taxable profit from South Sudan and foreign sources. Also, see *General* in Section C.

Corporate tax rates. The corporate income tax rate is 30%. The previous sector-based rates that depended on the level of turnover and sector classification introduced by 2019-20 Finance Act were abolished through the 2021-22 Finance Act.

Capital gains. Capital gains are recognized as business income, while capital losses are recognized as business losses.

Administration. The tax period is the calendar year. The law does not allow for a change of the tax period from the calendar year.

A company must make payments for each quarter by 15 April, 15 July, 15 October and 15 January. The payments are estimated on a current year or prior year basis. The tax balance, if any, must be paid by 1 April of the following year. A company must file the tax return on or before 1 April of the year following the tax year.

Late filing of a return results in a penalty of 5% of the tax reportable on the return per month, up to a maximum of 25% of the tax reportable. Late payment of tax results in a penalty of 5% per month until the tax is paid. The interest rate payable on late payment of tax is published annually by the Commissioner General of the National Revenue Authority and is 120% of the prime commercial rate (this is the average rate that commercial banks in South Sudan charge other banks and financial institutions).

Dividends and interest. A 10% withholding tax is imposed on payments of dividends and interest. This tax is deemed to be an advance payment of tax.

Foreign tax relief. Tax paid by resident taxpayers that derive profits from business activities outside South Sudan through permanent establishments is allowed as a foreign tax credit if the jurisdiction (country) in which the permanent establishment is located allows similar treatment for tax paid in South Sudan.

Relief for foreign taxes paid will also be granted in accordance with tax treaties with other countries.

C. Determination of business profits

General. Business profit is accounting income adjusted for certain non-taxable income and nondeductible expenses, such as depreciation. Expenses are deductible if incurred wholly and exclusively in the production of income. The 2023-24 Finance Act amended the object of business profit tax to provide that business profit tax shall be charged on either the taxable profit or net profit of a taxpayer. Previously, business profit tax was only chargeable on "taxable profit," which the Taxation Act defines as the difference between gross income earned or received during the tax period and any deductions allowable under the Taxation Act.

Representation costs are all costs related to the promotion of the business or its products. These are allowed as deductible expenses, up to a maximum of 2% of gross income.

Inventories. The normal accounting basis of the lower of cost or net realizable value is generally accepted for tax purposes.

Bad debts. Bad debts are allowable deductions if they meet the stipulated conditions contained in the Taxation Act.

Tax depreciation. Depreciation charged in the financial statements is not deductible for tax purposes. It is replaced by the following tax depreciation allowances.

Asset class	Description	Rate (%)	Method
Category 1	Buildings and other structures	10	Straight line (a)
Category 2	Vehicles, office equipment and computers	33	Reducing balance (b)
Category 3	All other property	25	Reducing balance (b)

(a) The initial cost for buildings and other structures includes taxes, duties and interest attributable to the property before they are placed in service.
(b) Expenditure on property in Categories 2 and 3 of less than SSP1,000 is allowed as a current expense.

Amounts expended on repair, maintenance or improvement of a category of capital assets are allowed as deductions, up to a maximum of 5% of the written-down value of that category of capital assets.

Relief for losses. Business losses can be carried forward for up to five successive tax periods and may be claimed as a deduction against any income in those years.

Groups of companies. The income tax law does not permit consolidated returns combining the profits and losses of affiliated companies or the transfer of losses from loss companies to profitable members of the same group of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Sales tax; on the production and importation of goods into South Sudan and on the supply of specified services	
General rate	18
Social security scheme	5/8/17
(The country has not yet set up a national social security scheme. However, deductions of 5% from wages and employer contributions of 15% of wages are required. A lower rate of 5% applies only to government employees.)	

E. Miscellaneous matters

Foreign-exchange controls. The Bank of South Sudan imposes certain foreign-exchange controls. In December 2015, the fixed exchange rate regime was phased out and a free-market exchange rate regime was introduced.

Transfer pricing. The arm's-length price should be determined under the comparable uncontrollable price method. If this is not possible, the resale-price method or the cost-plus method can be used.

Debt-to-equity rules. No debt-to-equity ratio restrictions are imposed.

F. Tax treaties

South Sudan has signed tax treaties with Morocco and the United Arab Emirates. Both treaties have yet to be ratified.

A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	25 (b)
Branch Tax Rate (%)	25
Withholding Tax (%)	
Dividends	19 (c)
Interest	19 (d)
Royalties from Patents, Know-how, etc.	19/24 (d)
Branch Remittance Tax	19 (e)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

(a) Other rates apply to specific entities. See Section B.
(b) Certain capital gains are generally exempt from tax or are subject to tax at a reduced rate. See Section B.
(c) Certain dividends are exempt from tax. See Section B.
(d) Certain interest and royalties are exempt from tax. See Section B.
(e) Exceptions may apply to this rate. See Section B.

B. Taxes on corporate income and gains

Corporate income tax. Corporate tax is imposed on the income of companies and other entities and organizations that have a separate legal status. Resident entities are taxable on their worldwide income. The following entities are considered to be resident entities:

- An entity incorporated under Spanish law
- An entity having its legal headquarters in Spain or its effective place of management in Spain

In addition, the tax authorities may presume that an entity resident in a tax haven or in a country with no income taxation is tax resident in Spain if any of the following circumstances exist:
- The majority of its assets is directly or indirectly located in Spain.
- A majority of its rights may be exercised in Spain.
- The principal activity of the entity is carried out in Spain.

The above measure does not apply if business reasons justify the effective performance of operations and exercise of management in such foreign jurisdiction.

Nonresident entities are taxable only on Spanish-source income, which includes income from any kind of business activity conducted in Spain through a branch, office or other permanent establishment. Nonresident companies or individuals must appoint a fiscal representative if they are conducting business activities in Spain through a permanent establishment (exceptions apply) or if certain other specified circumstances occur.

Tax rates. The general tax rate for residents and nonresidents that conduct business activities in Spain through a permanent establishment is 25%.

For tax periods starting on or after 1 January 2022, a minimum tax payment of 15% corporate tax over the taxable base has been introduced. The taxable base is calculated as the accounting profit plus or minus book-to-tax adjustments (such as the disallowance or limitation of certain expenses or participation exemption). This minimum tax payment applies to the following groups:
- Companies that had more than EUR20 million in revenue during the 12 months preceding the start of the tax year
- Companies that are taxed as part of a tax unity (for example, consolidated tax group), regardless of their revenue
- Foreign companies that obtain income through a Spanish permanent establishment and are subject to the nonresidents income tax

Companies may not use credits and incentives (for example, research and development (R&D) tax credits) to reduce their income tax liability below the minimum tax threshold, except for foreign tax credits and certain tax incentives (*bonificaciones*), which must be applied first. The tax liability resulting from applying the general corporate income tax rate to the taxable base and after the application of certain tax credits may not be below this minimum corporate income tax liability. Unutilized tax credit resulting from this new rule may be carried forward.

Newly incorporated entities carrying out business activities are taxed at a special rate of 15% in the first fiscal year in which the entity has a positive tax base and in the following year, regardless of the amount of the tax base (a 10% minimum tax payment applies to newly created companies for tax periods starting on or after 1 January 2022). However, this special tax rate does not apply in certain cases, such as the following:

- Newly incorporated entities carrying out economic activities previously carried out by related entities
- Newly incorporated companies belonging to a group of companies
- Entities qualifying as passive entities (*entidades patrimoniales*), which are entities that have more than 50% of their assets constituted by shares or other assets not linked to a business activity

For tax periods initiated on or after 2023, the general tax rate is reduced from 25% to 23% for those entities (small-sized companies) with a turnover not exceeding EUR1 million during the 12 months preceding the start of the tax year.

Additionally, entities that have the status of "start-up" company in accordance with requirements regulated in Law 28/2022 will be taxed at a special rate of 15% in the first fiscal year in which the entity has a positive tax base and in the following three years.

In addition to other tax benefits, companies licensed to operate in the Canary Islands Special Zone (Zona Especial Canaria, or ZEC) are subject to a reduced tax rate of 4% if certain conditions are satisfied. This reduced rate applies up to a maximum amount of taxable income, equaling the lesser of the following:

- The ratio of income derived from qualified ZEC transactions with respect to total income
- The amount resulting from the sum of the following amounts:
  - EUR1, 800,000 for those entities within the ZEC that fulfill the minimum job creation requisites (that is creation of three or five jobs annually, depending on the island)
  - An additional EUR500,000 for each job created exceeding the minimum job creation requirements, up to 50 jobs

The tax reduction resulting from the application of the above rule (this reduction is calculated by comparing the corporate income tax paid to the tax that would have been due under the general corporate income tax rate) cannot be greater than the following:

- 17.5% of the ZEC entity's turnover for an entity in the industrial sector
- 10% of the ZEC's entity's turnover for an entity in a different sector

Specific tax rates apply to, among others, non-governmental organizations, charities, certain cooperatives, investment fund entities meeting certain requirements and financial institutions.

In general, nonresidents operating in Spain without a permanent establishment are taxable at a rate of 24%. This tax rate is reduced to 19% for income derived by European Union (EU) or European Economic Area (EEA) tax residents in a jurisdiction with which an effective exchange of tax information agreement is in place. Nonresidents without a permanent establishment that operate in Spain and that are resident in an EU Member State and that can prove that their expenses are directly linked to their Spanish-source income and have a "direct and fully inseparable nexus" with the activity performed in Spain may deduct any expenses allowed by the following:

- The Personal Income Tax Law, as provided in Law 36/2006, 28 November (this law also refers to the Corporate Income Tax

Law to determine the net tax base in the case of economic activities), if they are individuals
- The Corporate Income Tax Law (27/2014), if they are legal entities

Dividends and interest received by nonresidents are subject to a final withholding tax of 19%. As a result of a change in the Spanish Personal Income Tax Law, share premium distributions made to non-Spanish resident shareholders may be treated as dividend distributions instead of a return of basis and therefore subject to withholding tax under the general rules.

The tax rate applicable to income from reinsurance operations is 1.5%. A 4% tax rate applies to Spanish-source income generated by companies resident abroad operating ships and aircraft in Spain.

Interest income is exempt from tax if the recipient is resident in an EU Member State or, effective 1 January 2021, in a state in the EEA under an effective exchange of information with Spain (or if the recipient is an EU/EEA permanent establishment of a resident in another EU Member State or the EEA) that is not on the Spanish tax haven list. Interest paid to nonresidents on Spanish Treasury obligations is exempt from tax. Income derived by nonresidents without a permanent establishment in Spain from bonds issued in Spain by nonresidents without a permanent establishment in Spain and from bank accounts is exempt from tax in Spain.

Distributions by Spanish subsidiaries to parent companies in EU Member States that are not on the Spanish list of non-cooperative jurisdictions (see Section E for further details on this list) are exempt from withholding tax if the parent company owns directly or indirectly at least 5% of the subsidiary for an uninterrupted period of at least one year and if certain other requirements are met. The one-year holding period requirement may be satisfied at the date of the distribution or subsequent to such date. An anti-avoidance provision applies in situations in which the majority of voting rights are vested in non-EU tax residents.

Royalties paid to associated EU resident companies or permanent establishments are exempt from tax in Spain if specific conditions are met.

In addition to nonresident income tax at a rate of 25%, nonresidents operating in Spain through a permanent establishment are subject to a branch remittance tax at a rate of 19%, unless one of the following exemptions applies:
- Branches of EU resident entities, other than tax-haven residents, are exempt from the tax.
- A branch can be exempt from tax if Spain and the country of residence of its head office have entered into a double tax treaty that does not provide otherwise and grants reciprocal treatment.

Patent Box Regime. Under the Patent Box Regime, a 60% exemption is granted for net income derived from the licensing of certain qualifying intellectual property (IP), including registered advance software that derives from R&D activities. Such income is considered only in the proportion of the amount resulting from the application of a specified ratio. The following are the rules for calculating the ratio:

- The numerator consists of the expenses incurred by the licensing entity that are directly related to the creation or development of the IP, including those incurred from outsourcing to unrelated third parties in this regard. These expenses are increased by 30%, subject to the limit of the amount included in the denominator.
- The denominator consists of the expenses incurred by the licensing entity that are directly related to the creation of the IP, including those related to the outsourcing from either related or unrelated parties and, if applicable, the acquisition of the IP.

Under the regime, expenses with respect to works related to the development of the IP that are subcontracted to related parties are included in the denominator, but not the numerator. Therefore, to the extent that the works related to the development of the IP are subcontracted to related parties, the reduction is less than 60% (that is, the lower the numerator in comparison with the denominator, the lower the percentage of reduction).

The net income qualifying for the reduction is calculated as the positive difference between the following two amounts:
- The revenues derived from the licensing of the right to use or exploit the assets or from the transfer of the assets
- The costs incurred by the company that are directly related to the creation of the assets and have not been included in the value of such assets, the amounts deducted as depreciation, and the costs that have been included in the corporate income tax base

This exemption also applies to the net income from the transfer of the qualifying IP.

To qualify for the exemption, the following requirements must be met:
- The licensee must use the licensed IP assets in an economic activity. This use cannot result in the sale of goods or provision of services to the licensor that generates deductible expenses for the licensor if the licensor and the licensee are related parties.
- The licensed entity must not be resident in a no-tax or prohibited list jurisdiction.
- If any additional goods or services are included in the licensing agreement, the consideration for such services must be included separately in the agreement.
- Accounting books for determining the income and direct expenses with respect to each of the licensed assets must be maintained. Income to be reduced is considered net of depreciation and of expenses directly related to such asset in the relevant period.

Transitory regime. The regulation provides for a transitory regime for pre-July 2016 licensing agreements. The taxpayer needs to select the option on the tax form corresponding to the 2016 fiscal year.

For licensing agreements entered into before 29 September 2013, the licensing entities may opt to continue applying the original Spanish Patent Box Regime, which entered into force on 1 January 2008.

For licensing agreements entered into from 30 September 2013 to 30 June 2016, the licensing entities may opt for applying the Spanish Patent Box Regime in accordance with the law in force from 1 January 2015.

In general, these transitory regimes will remain applicable until 30 June 2021. After this date, the amended Spanish Patent Box Regime will be the only applicable regime.

In addition, gains derived from the sale of the IP assets made from 1 July 2016 to 30 June 2021 (or, exceptionally until 31 December 2017 regarding certain sales occurring between related parties) may also benefit from the application of the reduction in accordance with the law in force as of 1 January 2015. The option should be made in the tax form corresponding to the period in which the assets are sold.

Capital gains. Spanish law generally treats capital gains as ordinary income taxable at the regular corporate tax rate.

Capital gains realized by nonresidents without a permanent establishment in Spain are taxed at a rate of 19%. Capital gains on movable property, including shares, are exempt from tax if the recipient is resident in an EU country that is not on the Spanish tax haven list or (effective 1 January 2021) in a state in the EEA under an effective exchange of information with Spain, unless the gains are derived from the transfer of shares and any of the following circumstances exists:

- The company's assets directly or indirectly consist primarily of Spanish real estate.
- For an EU/EEA shareholder who is an individual, he or she has held at least a 25% interest in the Spanish company at any time during the prior 12 months.
- For an EU/EEA shareholder that is a legal person, it has not held a minimum ownership percentage of 5% and a one-year minimum holding period in the subsidiary has not been met.

If a nonresident that does not have a permanent establishment in Spain disposes of Spanish real estate, a 3% tax is withheld by the buyer from the sale price, with certain exceptions. The tax withheld constitutes an advance payment on the final tax liability of the seller.

Capital gains derived by nonresidents without a permanent establishment in Spain from the reimbursement of units in Spanish investment funds or from the sale of shares traded on a Spanish stock exchange are exempt from tax in Spain if the seller is resident in a jurisdiction that has entered into a tax treaty with Spain containing an exchange of information clause.

Administration. The tax year is the same as the accounting period, which may be other than a calendar year. The tax year may not exceed 12 months. The tax return must be filed within 25 days after six months following the end of the tax year. In April, October and December of each calendar year, companies and permanent establishments of nonresident entities or individuals must make payments on account of corporate income tax or nonresidents income tax, respectively, equal to one of the following:

- Eighteen percent of the tax liability for the preceding tax year.

- An amount calculated by applying 19/20 (for entities with net turnover of more than EUR10 million) or 5/7 (for entities with net turnover not exceeding EUR10 million) of the corporate income tax rate (that is, 24% or 17%, respectively, if the corporate tax rate is the general rate of 25%) to the profits for the year as of the end of the month preceding the date of the payment and then subtracting from the result tax withheld from payments to the company and advance payments of tax previously made. This alternative is compulsory for companies with turnover of more than EUR6 million in the immediately preceding tax year.
- For taxpayers with net turnover of more than EUR10 million in the immediately preceding tax year, a minimum interim payment of 23% of the taxpayer's accounting result after taxes (regardless of eventual applicable book-to-tax adjustments and the pending application of a tax-loss carryforward), reduced by the amount of previous payments on account corresponding to the same fiscal year. As a result, for taxpayers with net turnover of more than EUR10 million, the interim payment is the higher of the following:
  - 24% to the profits (tax base) for the year as of the end of the month preceding the date of the payment, reduced by the tax withheld from payments to the company and advance payments of tax previously made
  - 23% of the positive accounting profit for the year as of the end of the month preceding the date of the payment, reduced by tax withheld from payments to the company and advance payments of tax previously made

Statute of limitations. Although the Spanish tax law provides that the statute of limitations period is four years, the Corporate Income Tax Act provides that tax losses and tax credits may be subject to tax audit for a period of 10 years from the tax year of generation. It also contains provisions enabling the tax auditors to review transactions implemented in statute-barred years if they produce effects in non-statute barred periods.

Participation exemption regime and foreign tax relief. The exemption method may be used to avoid double taxation on dividends received from Spanish resident and non-Spanish resident subsidiaries and on capital gains derived from transfers of shares issued by such companies. However, as a result of the 2021 Budget Bill, effective for fiscal years starting on or after 1 January 2021, the former full participation exemption method on qualifying dividends and capital gains is reduced to a 95% partial exemption. Consequently, a 1.25% (1.50% for financial entities) effective tax rate should be expected on these sources of income. Exceptionally, a full participation exemption may still be available for a three-year period under certain conditions to avoid double taxation of dividends or capital gains flowing from newly incorporated entities.

To qualify for this exemption, the following requirements must be met:

- At the time of the distribution of the dividend or the generation of the capital gain, the Spanish company has owned, directly or indirectly, at least 5% of the share capital of the resident or non-resident company for an uninterrupted period of at least one

year. For dividends, the one-year period can be completed after the distribution. In addition, the time period in which the participation is held by other group entities is taken into account for purposes of the computation of the one-year period.
- For foreign companies only, a minimum level of (nominal) taxation of 10% is required under a foreign corporate tax system similar to Spain's corporate tax system. This requirement is considered to be met if the subsidiary is resident in a country that has entered into a double tax treaty with Spain containing an exchange-of-information clause.
- The foreign company is not resident in a country identified by the Spanish tax authorities as a tax haven.

The new Spanish Corporate Income Tax Act eliminates the so-called "business activity test," commonly referred to as the 85/15 rule. However, the potential impact of the new controlled foreign company (CFC) rules (see Section E) need to be taken into account because capital gains derived from the transfer of shares may not benefit from the participation exemption regime if the subsidiary has registered CFC income in excess of certain thresholds. In addition, a new anti-hybrid measure prevents the application of the participation exemption if the dividend constitutes a deductible expense for the payer.

If the exemption method does not apply, a tax credit is allowed for underlying foreign taxes paid by a subsidiary on the profits out of which dividends are paid and for foreign withholding taxes paid on dividends.

The credit method (see below) and exemption method cannot be used with respect to the same income. Tax credits granted under the credit method may be carried forward indefinitely.

A tax credit is available for resident entities deriving foreign-source income that is effectively taxed abroad. Such credit is equal to the lesser of the following:
- The Spanish corporate tax payable in Spain if the foreign income had been obtained in Spain
- The tax effectively paid abroad on the foreign-source income (in accordance with applicable double tax treaty provisions)

Foreign portfolio holding company regime. A special tax regime applies to companies that have foreign portfolio holding company (*entidades de tenencia de valores extranjeros* or ETVE) status. ETVEs are ordinary Spanish companies engaged in the administration and management of participations in the equity of nonresident entities. ETVEs may also be engaged in other activities. In addition to the 95% exemption for dividends and capital gains derived from shares in qualifying foreign companies as described in *Participation exemption regime and foreign tax relief*, an ETVE benefits from certain other tax advantages, including the following:

- No withholding tax is imposed on distributions made by ETVEs out of reserves derived from tax-exempt foreign-source dividends and capital gains to nonresident shareholders who are not tax-haven residents.
- Capital gains derived by foreign shareholders of ETVEs from transfers of shares in ETVEs are not taxed to the extent that the capital gain corresponds to qualifying exempt dividends and

gains (realized or unrealized) derived at the ETVE level if the shareholder is not resident in a tax haven.

C. Determination of taxable income

General. Taxable income is the company's gross income for the tax year, less certain deductions. It is determined from the annual financial statements prepared under Spanish generally accepted accounting principles (Spanish GAAP), as adjusted under certain statutory tax provisions. Spanish GAAP follows several criteria contained in International Financial Reporting Standards (IFRS).

In general, all necessary expenses incurred in producing income during the year and depreciation on income-producing property may be deducted from gross income to arrive at taxable income.

Certain items are not deductible from gross income, such as the following:

- Penalties and fines.
- Corporate income tax payments.
- Gifts and donations (gifts to customers are deductible up to an amount equal to 1% of a company's turnover).
- Expenditures for the improvement or enhancement of capital assets.
- Amounts directly or indirectly remunerating own equity (for example, dividends and other payments made by entities in favor of their shareholders).
- Expenses related to services carried out by persons or entities that are resident in a listed tax haven, unless the taxpayer can prove that the expense relates to an effectively performed transaction.
- Depreciation charges that exceed the maximum rates prescribed by law, unless it can be demonstrated that the rates used correspond to the actual depreciation incurred.
- Interest expenses on intragroup financing related to the acquisition (or equity increase) of a participation in group entities, unless valid business reasons for such transactions are proven.
- Losses from foreign permanent establishments, unless the permanent establishment is transferred or closed down. In the event that the permanent establishment is closed down, the losses may be reduced by the amount of previous exempt income.
- Capital losses derived from the sale of a permanent establishment.
- Losses from members of Temporary Business Alliances (Uniones Temporales de Empresas) operating abroad, unless the interest is transferred or the relevant Temporary Business Alliance is closed down.

Deduction of losses derived from the impairment of tangible assets, intangible assets (including goodwill), real estate assets and shares of subsidiaries is deferred until they are sold to third parties or, if they are depreciated, during their useful life.

Deduction of losses arising from the transfer of tangible assets, intangible assets, real estate assets and debt securities between entities in the same group of companies (as defined by Article 42 of the Commercial Code) is deferred until the earliest of the following periods:

- The period in which the assets are further written off by the buyer
- The period in which the buyer resells the assets to a third party outside the group of companies
- The period in which the seller or the buyer leaves the group of companies

For depreciable assets, the deduction is claimed during their useful life.

Deduction of tax losses derived from the sale of shares in subsidiaries in which the buyer is a company of the same group of companies as the seller is deferred until the shares are resold to a third party outside the group or until the buyer or the seller leaves the group of companies. However, such deferred tax losses are deductible only with respect to the sale of non-qualifying participations (see *Participation exemption regime and foreign tax relief* in Section B); in the case of nonresident subsidiaries, they must also meet the 10% minimum taxation requirement. In addition, the tax losses may be reduced by the exempt gains recognized by the related-party buyer on the sale to a third party outside the group.

Capital losses derived from the sale of qualifying participations are not deductible.

Capital losses derived from the sale of non-qualifying participations may be deductible, but reduced by the amount of exempt dividends received since 2009 and by the amount of exempt gains recognized by a related-party seller in the purchase by the Spanish company.

The deduction of losses derived by the dissolution of subsidiaries may be reduced by exempt dividends recognized in the preceding 10 years.

Capitalization reserve. Taxpayers may reduce their tax base by an amount equal to 10% of the increase of their net equity in a given year if they book a non-distributable reserve corresponding to the tax base reduction and keep it in their balance sheet for five fiscal years.

The reduction is calculated as 10% of the difference between the net book value of the company at the beginning of the year (excluding the preceding year's accounting result) and the net book value at the end of the financial year after deducting negative adjustments, up to a maximum limit of the positive taxable base before the utilization of any tax loss carryforward. Any amount exceeding this limit will be carried forward to the following two years.

Hybrid instruments. The new Spanish Corporate Income Tax Act introduces certain amendments to anti-abuse rules in accordance with the Organisation of Economic Co-operation and Development (OECD) Base Erosion Profit Shifting (BEPS) project. In this regard, a special anti-abuse provision for hybrid instruments prevents the deductibility of expenses incurred in transactions with related parties in which as a result of different tax characterizations, any of the following circumstances would exist:

- Income would not be subject to tax.
- No income would be generated to the counterparty.
- The income would be subject to a nominal tax rate below 10%.

In addition, intragroup profit-sharing loans are characterized as equity instruments for Spanish tax purposes. Consequently, interest expenses derived from profit-participating loans are not tax deductible for the borrower. In line with such treatment, interest income derived from intragroup profit-sharing loans qualifies as a dividend that is exempt for the lender under the participation exemption regime (see Section B).

Furthermore, Spain has implemented the EU Anti-Tax Avoidance Directive (Council Directive 2017/952 of 29 May 2017 or EU ATAD 2) into the Spanish corporate income tax and nonresident income tax provisions, effective from 11 March 2021. Under these newly implemented rules, expenses are not deductible or income must be taken into account, if specified mismatches occur, such as deductions without inclusion, double deductions, hybrid or disregarded permanent establishments or dual residencies. Legal and factual analysis is necessary to determine whether a specified transaction or arrangement falls within the definition of non-permitted mismatches.

Inventories. The corporate tax law does not prescribe permissible methods for the valuation of inventory. Consequently, any valuation method allowed under the Spanish accounting rules may be used for tax purposes. Weighted average price is the generally accepted method, but first-in, first-out (FIFO) is also accepted. A common method is required with regard to inventories of the same nature and use.

Provisions. Provisions that are properly recorded are generally tax-deductible except for those specified by law.

Depreciation. All fixed or movable tangible assets (except land) that are owned by and used in the trade or business of a company are depreciable if their useful life exceeds a tax year. Intangible assets, such as patents, may be amortized during their useful life if they depreciate and have a limited and clearly defined useful life. Intangible assets whose useful life cannot be estimated reliably are amortized at an annual rate of 5%.

Goodwill is amortized at an annual rate of 5%.

Under certain conditions, Spanish-resident entities may amortize for tax purposes the financial goodwill embedded in shares of qualified foreign subsidiaries with respect to the following acquisitions:

- Acquisitions carried out before 21 May 2011 in non-EU countries if it can be proven that cross-border mergers cannot be accomplished
- Other acquisitions carried out before 21 December 2007

The amortization of financial goodwill is set at a maximum rate of 5%.

Depreciation methods are restricted to the straight-line method and the declining-balance method. The straight-line method may be used for any depreciable asset. The declining-balance method may be used only for certain new tangible assets (industrial and

farming machinery, vehicles, information systems and so forth) that have an anticipated useful life of three years or more.

The basis for depreciation is the acquisition price of assets purchased by the company or the manufacturing cost of assets manufactured by the company. The acquisition price includes all related costs, such as customs duties, transportation costs and installation expenses.

Maximum depreciation rates for tax purposes are fixed by law. The following are general straight-line rates and periods of depreciation for certain assets.

Asset	Maximum rate %	Maximum period of depreciation years
Commercial buildings	2	100
Industrial buildings	3	68
Office equipment	10 or 15	20 or 14
Motor vehicles	16	14
Plant and machinery	10 or 12	20 or 18
Computers	25	8

Companies may use higher rates if they can demonstrate that the actual depreciation is in excess of that allowed by law.

To be deductible, the depreciation amount must be recorded in the company's accounting books and must be "effective"; that is, it must correspond to the actual depreciation of the asset. The second condition is met if the depreciation amount is calculated in accordance with the rates prescribed by law or with other rates that have been expressly approved by the tax authorities. Otherwise, the "effectiveness" of the depreciation must be demonstrated. On request, the tax authorities may grant approval for accelerated depreciation if the company presents a plan specifying the assets, the date and price of the acquisition, the depreciation rates and the annual depreciation allowance desired, and reasons to support the adoption of such a plan.

Investments in new tangible assets and real estate in Spain or abroad carried from 2009 through 31 March 2012 may qualify for a free tax depreciation allowance. For investments made during tax years that began during 2009 and 2010, such tax benefit is conditioned on the maintenance of the level of employment. Any depreciation allowance on such assets that was pending to be fully accelerated by 31 March 2012 is still available for use but is subject to certain limitations. New fixed assets can be freely depreciated on an annual basis if their unit cost is below EUR300, with an overall cap of EUR25,000.

Relief for losses. Net operating losses can be carried forward indefinitely (no expiration period) with an annual limit of 70% of the positive tax base before the application of the capitalization reserve tax reduction (see *Capitalization reserve*). The limitation applies to losses in excess of EUR1 million.

Certain restrictions applicable in previous years (tax loss offset capped to a maximum of 50% or 25% of taxable income, based on the turnover of the taxpayer) have been declared inoperative by decision of the Constitutional Court dated 18 January 2024. It

has not yet been determined if these limitations will be re-enacted in the future.

Change-in-control rules for entities with tax loss carryforwards are aimed at limiting the transfer or the use of loss carryforwards. In particular, the use of tax losses is restricted if the entity that is transferred engages in a different or additional activity within the two years after the change of ownership and if the net turnover derived from such activities in those years is greater than 50% of the average turnover of the prior two years.

Groups of companies. A group of companies may file a consolidated tax return if the election to apply this regime is carried out before the beginning of the tax year in which the regime is to be applied and if the tax authorities are notified of the election. After the group elects taxation under the consolidated regime, the regime applies indefinitely, provided that certain requirements are satisfied.

Effective from 1 January 2015, in line with several EU court cases, Spanish legislation has extended the scope of the tax group concept in order to allow the following:

- Subsidiaries held indirectly through a foreign intermediary company can form part of the tax group.
- Horizontal tax consolidation is allowed, so that Spanish direct or indirect subsidiaries of a common foreign parent company are able to form a Spanish tax group.

For this purpose, Spanish corporations include stock companies (*sociedades anónimas*), limited liability companies (*sociedades limitadas*) and limited partnerships (*sociedades comanditarias por acciones*). The parent company may adopt any of these legal forms or otherwise it must have legal personality and be subject to and not exempt from corporate income tax, if resident in Spanish territory, or if resident abroad, subject to a similar corporate tax system as in Spain. Registered branches of nonresident entities may qualify as controlling top entities in consolidated groups if certain requirements are met.

A company is deemed to control another company if, on the first day of the tax year for which the consolidated regime applies, it satisfies the following requirements:

- It owns, directly or indirectly, at least 75% of the other company's share capital (70% for companies quoted on the stock exchange) and it maintains such ownership and a minimum 50% of voting rights in such entities for the entire tax year of consolidation.
- It is not subject to the special tax regimes applicable to Domestic and European Economic Interest Groupings (Agrupaciones de Interés Económico) or Temporary Business Alliances (Uniones Temporales de Empresas).
- It is not a subsidiary of another company fulfilling the requirements to be regarded as the controlling company.

Tax-exempt companies, companies taxed at a different rate than the parent company and companies in specified legal situations, such as bankruptcy, may not be part of a group of companies.

Pre-consolidation losses can be used only up to the amount of the individual positive tax base that could be used on a stand-alone basis.

Applicable only for the tax period started during 2023, the offsetting of 2023 tax losses of entities belonging to a consolidated tax group will be limited to 50% of their amount. The amount of the losses not included in 2023 tax base of the group by application of such limit shall be included in the tax base of the tax group for equal parts (10%) in each of the first 10 tax periods beginning on or after 1 January 2024.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), levied on goods delivered and services rendered within the Spanish territory (excluding the Canary Islands, Ceuta and Melilla), on imports from EU and non-EU Member States, and on certain services rendered by foreign suppliers to persons subject to Spanish VAT (also, see Section E)	
Standard rate	21
Rate on certain necessary products and services	10
Rate on basic products	4
Special annual tax on real estate owned by companies resident in tax havens; assessed on the government's official value on 31 December	3
Social security and employee-related fund contributions, calculated on an employee's total compensation, with certain limitations; paid by	
Employer	29.9
Employee	6.35
Capital duty on reductions and liquidations of companies	1

E. Miscellaneous matters

Foreign-exchange controls. Exchange controls are administered by the Bank of Spain and the Ministry of Economy and Finance. Exchange controls were liberalized several years ago. As a result, only a few, simple reporting requirements are now imposed, primarily for statistical purposes.

Restrictions on the deduction of financial expenses. In general, net interest expenses exceeding 30% of earnings before interest, tax, depreciation and amortization (EBITDA), with some adjustments, may not be claimed as a deduction for tax purposes in the year of their accrual (with some exceptions, such as a minimum allowance of EUR1 million per year). The excess may be carried forward indefinitely. This restriction applies regardless of whether the interest is paid to a related party or an unrelated lender. In addition, as mentioned in *General* in Section C, interest expense on intragroup financing related to the acquisition (or equity increase) of participation in group entities is disallowed unless valid business reasons for such transactions are proven.

Additional rules for leveraged acquisitions limit the deductibility of interest on loans to purchase shares (acquisition debt) to 30% of the operating profit of the acquiring entity. The limitation applies if the acquired and acquiring entities are merged within a four-year period or if new entities join the tax group in which the acquiring and acquired entity are included. Under an escape clause in the law, the limitation does not apply in the year of the acquisition if the acquisition debt does not exceed 70% of the consideration paid for the shares. In the following years, the limitation will not apply if the acquisition debt is proportionally repaid within an eight-year period until it is reduced to 30% of the total consideration.

Anti-avoidance legislation. To prevent fraud, the tax code contains several anti-avoidance measures in various chapters. Substance-over-form principles apply.

Controlled foreign companies. Under controlled foreign company (CFC) rules contained in the corporate income tax law, Spanish resident companies must include in their tax base certain passive income derived by their foreign subsidiaries if certain control and effective taxation conditions are satisfied. Significant exceptions apply to these rules.

These rules do not apply to EU-controlled subsidiaries if the Spanish shareholder proves that the incorporation of the foreign entity was undertaken for sound business reasons and such entity carries on business activities.

Effective from 1 January 2015, certain amendments to CFC rules were introduced. These include, among others, additional substance requirements to be met by the foreign subsidiary in order to avoid the imputation of the foreign low-taxed income.

Transfer pricing. Spanish law includes the arm's-length principle and the requirement of documenting all related-party transactions. The arm's-length principle applies to all transactions carried out by taxpayers with related parties. The following are the principal aspects of the law:

- Taxpayers must use arm's-length values in their tax returns. As a result, taxpayers bear the burden of proof on transfer-pricing issues.
- OECD guidelines and pricing methodology apply.
- The law provides for secondary adjustments. Under this measure, if the agreed value in a transaction differs from the normal market value, the difference between the values is recharacterized by following a substance-over-form approach. In particular, for a transaction between a company and a shareholder, the difference (proportionally to the participation in the entity) is considered a dividend if such difference is in favor of the shareholder or a contribution by the shareholder to the entity's equity if the difference is in favor of the entity.
- Advance Price Agreements (APAs) may be negotiated. They apply to the current year, the preceding four years and the following four years. The law allows APAs to have retroactive effect within the statute-of-limitations period.
- Statutory documentation requirements in line with the guidelines of the EU Joint Transfer Pricing Forum entered into force on 19 February 2009. This documentation is required to support

the taxpayer's transfer-pricing policy regarding domestic and international transactions.
- Penalties and delay interest may be imposed. If the documentation is correct, the tax authorities do not impose a penalty with respect to a transfer-pricing assessment. However, the absence (or incompleteness) of documentation is subject to penalties, even if no adjustments are assessed.

The Spanish Corporate Income Tax Act provides the following three exceptions to the obligation to prepare statutory transfer-pricing documentation:
- When the transaction takes place between entities that form part of a Spanish tax consolidated group
- When the transaction is carried out between members of an Economic Interest Grouping (Agrupaciones de Interés Económico) or a Temporary Business Alliance (Uniones Temporales de Empresas)
- When the transaction is carried out within the scope of a public stock offering
- When transactions with the same entity do not exceed EUR250,000 per year

Simplified documentation requirements apply to entities with a turnover that does not exceed EUR45 million, computed at the level of the mercantile group.

Some specified transactions must be documented in any case, such as transactions performed with group "related parties" that are tax resident in a tax-haven jurisdiction. Article 18.2 of the Spanish Corporate Income Tax Act provides a definition of "related parties."

In addition, transactions performed with related or unrelated residents of listed tax havens must comply with the arm's-length principle and are subject to statutory documentation requirements.

New Country-by-Country (CbC) Reporting obligations apply to Spanish tax resident groups if the consolidated group's net turnover in the immediately preceding fiscal year exceeded EUR750 million. This obligation may also apply in certain cases to subsidiaries of foreign groups.

As of 1 January 2016, new transfer-pricing documentation rules require more detailed information (for example, intangible assets, financial activities, management structure, main competitors and reconciliation of data used in economic analyses with annual financial statements).

VAT Immediate Supply of Information System. Effective from the 2017 fiscal year, businesses and professionals who are required to file VAT returns on a monthly basis are subject to the new VAT Immediate Supply of Information System. Businesses and professionals who are required to file monthly returns if they meet any of the following conditions:
- They have revenue exceeding EUR6 million.
- They are included in the monthly refund regime.
- They are applying the VAT grouping provisions.

Under the new system, information related to all invoices issued or received, customs documents and accountancy documents, if

any, must be transmitted electronically and almost immediately to the Spanish tax authorities so that the tax authorities have all of the information relating to the operations carried out by VAT taxpayers in real time. Failure to comply with this filing system is subject to penalties.

Mandatory disclosure regime. Spain has enacted mandatory disclosure rules in connection with the implementation of the EU Mandatory Disclosure Regime (MDR). The rules entered into force on 1 July 2020. The Spanish MDR legislation is closely aligned with the requirements of the directive.

On 6 April 2021, the Spanish government approved regulations to further implement MDR, which became effective on 8 April 2021. These regulations contain certain detailed guidance on the hallmarks, including reporting deadlines. A Ministerial Order issued by the Ministry of Tax approved the tax forms to comply with these reporting obligations.

List of non-cooperative jurisdictions. On 10 February 2023, the Spanish Ministry of Finance approved the updated list of non-cooperative jurisdictions for Spanish tax purposes, which supersedes the previously existing "tax haven" list. It was published in the Spanish official journal on 10 February 2023 and will apply to tax years commencing as from the publication date for taxes with a tax period (so from 1 January 2024 for corporate income taxpayers following the calendar year) and from the publication date for taxes without a tax period.

According to the updated list, the following jurisdictions are deemed non-cooperative jurisdictions for Spanish tax purposes:

American Samoa
Anguilla
Bahrain
Barbados
Bermuda
British Virgin Islands
Cayman Islands
Dominica
Falkland Islands
Fiji
Gibraltar
Guam
Guernsey
Isle of Man
Jersey
Northen Mariana Islands
Palau
Samoa (with respect to the harmful tax regime [offshore business])
Seychelles
Solomon Islands
Trinidad and Tobago
Turks and Caicos Islands
United States Virgin Islands
Vanuatu

The updated list has excluded the following jurisdictions that were previously considered tax havens:

Antigua and Barbuda
Brunei Darussalam
Cook Islands
Grenada
Jordan
Lebanon
Liberia
Liechtenstein
Macau Special Administrative Region (SAR)
Mauritius
Monaco
Montserrat
Nauru
St. Lucia
St. Vincent and the Grenadines

It had also included American Samoa, Barbados, Guam, Palau, Samoa, and Trinidad and Tobago with respect to the harmful tax regime (offshore business).

Pillar Two. On 20 December 2023, the Ministry of Finance published draft legislation to introduce into Spanish domestic legislation the Pillar Two effective tax rate of 15% for multinational enterprises and large-scale domestic groups for public consultation.

The draft legislation is generally aligned with the EU Global Minimum Tax Directive and the Pillar Two Model Rules (OECD Model Rules) as approved in the OECD/G20 Inclusive Framework on BEPS. The draft legislation is structured as a separate tax law that is not intended to be embedded in the existing Spanish Corporate Income Tax Law.

The draft legislation incorporates an Income Inclusion Rule (IIR) and an Undertaxed Profits Rule (UTPR). The draft legislation makes use of the option provided in the EU Global Minimum Tax Directive to introduce a Qualified Domestic Minimum Top-up Tax (QDMTT), allowing Spain to collect top-up tax on the excess profit of a low-taxed Spain entity that is part of an in-scope group. Further, the draft legislation includes an interpretative clause stating the dynamic interpretation of the Spanish domestic rules in accordance with the OECD Model Rules, Commentary and Administrative Guidance.

The IIR and the QDMTT will be effective retroactively for fiscal years starting on or after 31 December 2023. The UTPR will apply for fiscal years starting on or after 31 December 2024. The draft legislation also includes a Transitional Country-by-Country Reporting (CbCR) Safe Harbor, a QDMTT Safe Harbor and a transitional UTPR Safe Harbor. For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (ey-beps-2-0-pillar-two-developments-tracker.pdf).

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

On 28 September 2021, Spain deposited its instrument of ratification of the Multilateral Convention to Implement Tax Treaty Measures to Prevent Base Erosion and Profit Shifting (MLI) with the OECD. The provisions included in the MLI will have a significant impact on the vast majority of the treaties in the Spanish tax treaty network. The instrument entered into force on 1 January 2022 for Spain. However, because Spain made a reservation pursuant to Article 35(7)(a), the date of effects should be monitored on a jurisdiction-by-jurisdiction basis.

(a) Distributions by Spanish subsidiaries to parent companies in EU Member States are exempt from withholding tax if the parent company owns at least 5% of the subsidiary for an uninterrupted period of at least one year and if certain other requirements are met. The one-year holding period requirement may be satisfied at the date of the distribution or subsequent to such date. An anti-avoidance provision also applies in situations in which the ultimate shareholder is not an EU resident.

(b) Interest paid to an EU resident without a permanent establishment in Spain is exempt from tax if the EU country is not on the Spanish tax haven list.

(c) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 75% of the capital of the distributing company. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 10% of the capital of the distributing company. These rates only apply if the shareholding condition is met for a period of at least 365 days including the date of payment of the dividend (but ownership changes directly resulting from reorganizations are disregarded for these purposes).

(d) Certain interest payments are not subject to withholding tax if the recipient is a qualified entity such as the government, the central bank, a qualified pension fund or any subdivision of the other contracting state, or a financing institution. In the particular case of the double tax treaty between Spain and the United States, as a general rule, interest payments are not subject to withholding tax.

(e) The treaty withholding rate tax is increased to 15% in certain circumstances if the recipient is not a corporation or if the shareholding does not exceed a certain percentage. In addition, the branch remittance tax has been removed from the double tax treaty between Spain and the United States. Consequently, the allocation of benefits from a permanent establishment located in Spain to its head office in the United States is not subject to withholding tax, according to this treaty. In the specific case of Canada, Indonesia, Poland, Portugal, the Slovak Republic and Slovenia the reduced 5% and 10% rates apply if the shareholding condition is met for a period of at least 365 days including the date of payment of the dividend (but ownership changes directly resulting from reorganizations are disregarded for these purposes).

(f) A 14% rate applies to royalties paid for artistic, scientific or literary works.

(g) Interest paid to the government or central bank of the other contracting state is exempt from tax if the recipient is the beneficial owner of the interest. The government of the state of the payer may authorize an exemption for interest paid to a beneficial recipient other than the government or central bank of the other contracting state.

(h) See Section B.

(i) The treaty provides for a tax sparing in favor of Armenia for the five years following the entry into force of the treaty.

(j) The 0% rate applies if all of the following conditions are satisfied:
- The recipient of the dividends is the beneficial owner of the income.
- The direct or indirect shareholding is equal to or higher than 25%.
- A minimum two-year shareholding period has been fulfilled.
- Dividends are not subject to tax in the state of residency of the recipient of the dividends.

(k) The 5% rate applies to royalties for copyrights of literary, artistic or scientific works (including films and videotapes used for its reproduction on television or radio).

(l) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 25% of the capital of the distributing company.

(m) The 0% rate applies if all of the following conditions are satisfied:
- The recipient of the dividends is a corporation.
- The shareholding (voting rights in the case of Ireland) is equal to or higher than 25%.
- Exemption is allowed under the rules of the state of residence of the subsidiary, taking into account that share ownership conditions must be complied with for a period of at least 365 days, including the date of payment of the dividend (but ownership changes directly resulting from reorganizations are disregarded for these purposes).

The rate is 15% if the beneficial owner is a resident of the other contracting state.

(n) The 5% rate applies if the beneficial owner of the dividends is a company that directly controls at least 20% of the capital of the distributing company.

(o) A 10% rate applies to interest paid to financial institutions for long-term (10 or more years) loans for goods or equipment.

(p) A 10% rate applies to royalties paid for copyrights of literary, artistic or scientific works (including films and videotapes produced by a resident of a contracting state).

(q) A 5% rate applies if the beneficial owner of the dividends is a corporation that controls at least 20% of the capital of the distributing company.

(r) A 5% rate applies to interest derived from loans granted by banks and insurance companies, from bonds and securities traded on a recognized stock exchange and from sales on credit of machinery and equipment.

(s) A 5% rate applies to royalties paid for the use of industrial, commercial and scientific equipment.

(t) The 0% rate applies if the dividends are received by a company that holds a direct or indirect shareholding of at least 20% in the capital of the distributing company.

(u) The protocol includes a most-favored-nation clause under which Costa Rica automatically will provide similar tax treatment to Spanish residents if Costa Rica enters into a treaty with a third country that enters into force and that offers more beneficial tax treatment for dividends, interest, royalties and/or income from personal independent services.

(v) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 20% of the capital of the distributing company for a period longer than 365 days,

including the date of payment of the dividend (but ownership changes directly resulting from reorganizations are disregarded for these purposes).

(w) The 5% rate applies to loans with a maturity exceeding five years.

(x) A 15% rate applies if the shareholding is less than 25%.

(y) Certain copyright royalties are exempt.

(z) Spain honors the Czechoslovakia treaty with respect to the Czech and Slovak Republics.

(aa) A 5% rate applies to certain loans.

(bb) A 5% rate applies to royalties paid for copyrights of literary, dramatic, musical or artistic works (excluding motion picture films and television films or videotapes).

(cc) A 12% rate applies if the shareholding is less than 25%. The shareholding condition for both the 9% and the 12% rates must be met for a period of at least 365 days, including the date of payment of the dividend (but ownership changes directly resulting from reorganizations are disregarded for these purposes).

(dd) The 12% rate applies if the shareholding is less than 50%.

(ee) A 5% rate applies to royalties paid for industrial, commercial or scientific equipment.

(ff) No withholding tax is imposed if the recipient is a company that is subject to corporate income tax and that holds a participation of at least 10% in the payer for a period of at least 365 days, including the date of payment of the dividend (but ownership changes directly resulting from reorganizations are disregarded for these purposes).

(gg) The 7% rate applies if the shareholding is at least 50%. The 10% rate applies if the shareholding is at least 25%, but less than 50%. The 15% rate applies if the shareholding is less than 25%.

(hh) The lower withholding tax rate is applicable if the beneficial owner of the dividends is a corporation (other than a partnership) and the shareholding is equal to or higher than 10%. The higher withholding tax rate is applicable for other dividends.

(ii) The withholding tax rate is 5% if the beneficial owner of the dividends is a corporation and if the shareholding is equal to or higher than 25%. The withholding tax rate is 10% for other dividends. In the case of Serbia, shareholding condition for both the 5% and 10% rates must be met for a period of at least 365 days, including the date of payment of the dividend (but ownership changes directly resulting from reorganizations are disregarded for these purposes).

(jj) Withholding tax is not imposed if the recipient is the beneficial owner of the interest and if the interest is beneficially owned by a contracting state, or a political subdivision or local authority of the contracting state.

(kk) The 20% rate applies to certain royalties and technical services.

(ll) The 10% rate applies if the shareholding is less than 20%.

(mm) A 5% rate applies to royalties paid for copyrights of musical compositions and literary, dramatic or artistic works. An 8% rate applies to royalties paid for the following:

- Motion picture films
- Films, tapes and other means of transmission or reproduction of sounds
- Industrial, commercial or scientific equipment
- Copyrights of scientific works

(nn) A 5% rate applies to interest paid with respect to sales of industrial, commercial, scientific equipment, or on loans from financial institutions. A 0% rate applies to interest paid to the government or central bank of the other contracting state.

(oo) A 5% rate applies to royalties paid for copyrights of musical compositions, and literary, dramatic or artistic works, and to amounts paid for the use of industrial, commercial or scientific equipment.

(pp) The rate is 4% for royalties paid for copyrights of literary, dramatic, musical or artistic works (excluding motion picture films and television films or videotapes).

(qq) The 10% rate applies if the shareholding is less than 25%.

(rr) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that has directly or indirectly controlled at least 10% of the capital of the distributing company for a period of at least 365 days, including the date of payment of the dividend (but ownership changes directly resulting from reorganizations are disregarded for these purposes).

(ss) The treaty withholding tax rate is increased to 10% in certain circumstances if the recipient is not a corporation or if the shareholding does not exceed a certain percentage.

(tt) The 0% rate applies if the beneficial owner of the dividend is, among others, the state (or its subdivisions), public entities or companies fully owned (directly or indirectly) by the state or the central bank of the other contracting state. The 5% rate applies if the beneficial owner of the dividend is a corporation (other than a partnership) that controls at least 25% of the capital of the distributing company. The withholding tax rate is 10%/15% for other dividends.

(uu) A 15% rate applies if the shareholding is less than 10%.

(vv) A 0% rate applies if the beneficial owner holds at least a specified percentage of the share capital of the distributing entity and if certain other conditions are met.

(ww) A 5% rate applies to income derived from the rendering of technical services.

(xx) A 5% rate applies if the shareholding is less than 25%.

(yy) The withholding tax rate is 10% if the beneficial owner of the interest is a financial entity.

(zz) The 0% rate applies if the dividends are received by a company that holds directly or indirectly a shareholding of at least 50% in the capital of the distributing company. A 5% rate applies if the direct shareholding is more than 25% but less than 50%. Otherwise, a 10% rate applies.

(aaa) The withholding rate is 5% if the recipient is not subject to Dutch tax on the dividends and if the 10% rate would otherwise apply.

(bbb) The 5% rate applies if the beneficial owner of the dividends is a company that has owned directly at least 50% of the voting shares of the distributing company (this requirement needs to be met in the year before the dividend distribution takes place). The 7.5% rate applies if the beneficial owner of the dividends is a company that has owned directly at least 25% of the voting shares of the distributing company. The shareholding condition for both the 5% and the 7.5% rates must be met for a period of at least 365 days, including the date of payment of the dividend (but ownership changes directly resulting from reorganizations are disregarded for these purposes).

(ccc) Certain interest payments are not subject to withholding tax.

(ddd) Tax treaty provisions do not apply if the dividend, interest or royalties paid by a Panamanian resident are sourced in Spain or in a country that has not entered into a tax treaty with Spain and if such income has not been effectively taxed in Panama.

(eee) The 0% rate applies if the beneficial owner of the dividends is a capital company that directly controls at least 80% of the capital of the distributing company and if certain conditions are satisfied. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 40% of the capital of the distributing company.

(fff) A 10% rate applies to interest paid with respect to sales of industrial equipment or publicly traded bonds.

(ggg) A 20% rate applies to royalties paid with respect to films, television or radio. A 10% rate applies to royalties derived in preferred areas of activities.

(hhh) A 0% rate applies to royalties paid for copyrights of literary, dramatic, musical or artistic works (excluding motion picture films and television films or videotapes).

(iii) The withholding tax rate is 5% both of the following conditions are met in the year before the dividend distribution takes place:

- The beneficial owner of the dividends is a company that has invested at least EUR100,000 in the share capital of the payer.
- The dividends are exempt from tax in the other contracting state.

The withholding tax rate is 10% if only one of these requirements is met. The withholding tax rate is 15% for other dividends.

(jjj) No withholding tax is imposed on interest paid to and beneficially owned by financial institutions or with respect to long-term (seven years or more) loans and certain other debts.

(kkk) A 0% rate applies if the beneficial owner of the dividends is a company that directly controls at least 25% of the capital of the distributing company.

(lll) A most-favored-nation clause applies.

(mmm) The 5% rate applies to royalties paid for the use of copyrights of literary, artistic or scientific works, including cinematographic films or films or tapes used for radio or television broadcasting, but excluding computer software. The 10% rate applies to royalties paid for the use of patents, trademarks, designs or models, plans, secret formulas or processes and computer software, for the use of, or the right to use, industrial,

commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

(nnn) The 5% rate applies if the distributing company is a stock-listed real estate investment company and if the beneficial owner of the dividends directly or indirectly controls less than 10% of the capital of the distributing company.

(ooo) The 5% rate applies to royalties paid for the use of patents, trademarks, designs or models, plans, secret formulas or processes and computer software, for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies in all other cases.

(ppp) A 0% rate applies if certain conditions are met.

(qqq) A limitation-of-benefits clause in the treaty may apply.

(rrr) A 5% rate applies to loans over seven years.

(sss) A 5% rate applies to certain dividend distributions.

(ttt) A 10% rate applies to interest derived from loans granted by banks or in connection with sales on credit of merchandise or equipment. The 15% rate applies in all other cases.

(uuu) Spain honors the double tax treaty with the former USSR with respect to Kyrgyzstan, Tajikistan, Turkmenistan and Ukraine.

(vvv) A 5% rate applies if the beneficial owner of the dividends is a corporation that holds directly at least 10% of the entity paying the dividends. Nevertheless, this rate does not apply if the primary intent, or one of the main objectives, of any individual associated with the holding or share that yields the dividends is to secure the benefits of this provision through such holding or share. The withholding tax rate is 15% for other dividends.

(www) The 0% rate applies if the beneficial owner of the dividends is a capital company that directly controls at least 75% of the capital of the distributing company. In the case of Uruguay, the shareholding condition for both the 0% and the 5% rates must be met for a period of at least 365 days, including the date of payment of the dividend (but ownership changes directly resulting from reorganizations are disregarded for these purposes).

(xxx) The 5% rate applies to royalties paid for copyrights of literary, artistic or scientific works.

(yyy) A 4.95% rate applies to interest paid to financial institutions.

(zzz) The 0% rate applies if the beneficial owner of the dividends is a company that directly controls at least 10% of the capital of the distributing company.

(aaaa) The 0% rate applies to dividends paid to a company that controls, directly or indirectly, at least 10% in the equity of the distributing company, provided that the recipient of the dividends is the beneficial owner. The 15% rate applies to dividends paid out of income (including capital gains) derived directly or indirectly from immovable property by an investment vehicle that distributes most of this income annually and whose income from such immovable property is exempt from tax. The 10% rate applies in all other cases.

(bbbb) The 20% rate applies to EU residents in jurisdictions with which an exchange of information agreement is in place.

(cccc) The 7.5% applies if the beneficial owner of the dividends is a company that directly controls at least 10% of the capital of the distributing company.

(dddd) The 7.5% rate applies if the beneficial owner of the royalties is a capital company.

(eeee) The 0% rate applies if the beneficial owner of the dividends is a company that directly controls at least 20% of the capital of the distributing company.

(ffff) The 5% applies if the beneficial owner of the dividends is a company that directly controls at least 25% of the capital of the distributing company, such stake being required to be held during the previous year before the dividend distribution takes place in the case of South Africa. The 10% rate applies in all other cases.

(gggg) The 3% rate applies to copyright royalties with respect to (journalistic) news. The 5% rate applies to copyright royalties received by the author or his or her heirs with respect to literary, theater, musical or artistic works. The 10% rate applies to royalties relating to patents, designs or models, computer software, know-how and technical assistance. The 15% rate applies in all other cases.

(hhhh) The 0% rate applies if the dividends paid to a company the capital of which is wholly or partly divided into shares and that directly controls at least 10% of the capital of the distributing company during the year

before the dividend distribution takes place or if the dividends paid to a pension fund.

(iiii) The 0% rate applies to interest payments if the beneficial owner is the government, the central bank, a qualified pension fund or any subdivision of the other contracting state. The 4.9% applies to interest paid on loans of any kind granted by banks or other financial institutions, including investment banks, savings banks and insurance companies, as well as to interest paid on bonds and other debt instruments that are traded regularly and substantially on a recognized stock exchange. The 10% rate applies in all other cases.

(jjjj) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% (1% if the company is substantially and regularly traded on a stock exchange of Spain or Qatar) of the capital of the company paying the dividends or is a public body holding at least 5% of the stock in the company paying the dividends.

(kkkk) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds at least 25% of the capital of the company paying the dividends. The 5% rate applies in all other cases.

(llll) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds at least 25% of the capital of the company paying the dividends and its investment exceeds EUR250,000. The 10% rate applies in all other cases.

(mmmm) Subject to the "Limitation of Benefits Test" in Section 17 of the tax treaty, the following are the tax rates:

- The 0% rate may apply if the beneficial owner of the dividends is a corporation in the other Member State that has directly or indirectly held, through tax residents in the either Spain or the United States, at least 80% voting shares for longer than 365 days on the date on which entitlement to the dividends is determined.
- The 5% rate may apply if the beneficial owner of the dividend is a corporation that directly holds at least 10% of voting shares in the entity paying the dividend.

In addition, the branch remittance tax has been removed from the double tax treaty between Spain and the United States. Consequently, the allocation of benefits from a permanent establishment located in Spain to its head office in the United States is not subject to withholding tax.

(nnnn) As a general rule, royalties are not subject to withholding tax.

(oooo) The withholding tax rate is 0% if the beneficial owner of the dividends is a corporation that has voting rights equal to or higher than 10% or a qualifying pension fund. The withholding tax rate is 5% for other dividends, except if the dividend paid is tax deductible for corporate income tax purposes.

(pppp) The withholding tax rate on interest payments is 10% if the interest is computed by reference to certain economic parameters. Otherwise, the interest payments should not be subject to withholding tax.

(qqqq) A 0% rate applies to interest paid to, among others, the government or central bank of the other contracting state. Otherwise, a 5% (in the case of Belarus) or 10% (in the case of China Mainland) withholding tax rate applies.

(rrrr) The MLI Principal Purpose Test is applicable to enjoy treaty benefits on dividend, interest and royalty payments.

Spain is in the process of negotiation, ratification or signature of its tax treaties with Bahrain, Montenegro, Namibia, Peru and Syria.

Spain is renegotiating its tax treaties with Austria and the Netherlands.

Spain is negotiating agreements on the exchange of tax information with Bermuda, the Cayman Islands, the Cook Islands, Guernsey, the Isle of Man, Jersey, the Macau SAR, Monaco, St. Lucia, St. Vincent and the Grenadines.

Spain has agreements on the exchange of tax information with Andorra, Aruba, Bahamas, the Netherlands Antilles and San Marino.

The agreement between Spain and the United States for the improvement of international tax compliance and the implementation of the Foreign Account Tax Compliance Act entered into force on 1 July 2014.

Corporate Income Tax Rate (%)	36
Capital Gains Tax Rate (%)	36
Branch Tax Rate (%)	36
Withholding Tax (%)	
Dividends	25
Interest	0
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	7 *

* Losses incurred by companies during their first three years of business may be carried forward indefinitely.

B. Taxes on corporate income and gains

Income tax. Income tax is levied on resident and nonresident companies. Resident companies are those incorporated under Suriname law, even if their management is located abroad, as well as companies incorporated under foreign law, but effectively managed and controlled in Suriname.

For resident companies, income tax is, in principle, levied on the aggregate amount of net income earned from all sources during the company's accounting period. In principle, nonresident companies are subject to Suriname income tax on the following specific Suriname income items:

- Income derived from a permanent establishment in Suriname
- Income derived from real estate located in Suriname and/or debt claims secured by mortgages on real estate located in Suriname
- Income derived from rights to the profit of an enterprise of which the management is located in Suriname

Nonresident companies are deemed to derive income from a permanent establishment in Suriname if they derive income from, among other activities, acting as an insurer and the exploration and exploitation of natural resources, such as oil and gas.

Tax rates. A flat corporate income tax rate of 36% applies to the entire taxable profit.

Tax incentives. Tax incentives, such as tax holidays, may be granted to new business enterprises engaged in certain activities. Business enterprises engaged in, among other activities, mining and tourism may apply for several tax incentives such as accelerated depreciation and fiscal unity. A written letter of request for the granting of a tax incentive must be filed with the Suriname tax authorities.

Capital gains. No distinction is made between the taxation of capital gains and the taxation of other income. All income is taxed at the income tax rate of 36%.

Administration. The taxable amount is the profit realized in a fiscal year or calendar year.

The final tax return must be filed within six months after the end of the financial year. Any difference between the tax due based on the provisional return and the tax due based on the final return must be settled at the time the final return is filed. Companies must file a provisional tax return before 15 April of the current calendar year or within two and one-half months after the beginning of the current fiscal year. In principle, this return must show a taxable profit that is at least equal to the taxable profit shown on the most recently filed final tax return.

In principle, the tax due on this provisional tax return may be paid at once or in four equal installments, by 15 April, 15 July, 15 October and 31 December or within two and one-half months after the beginning of the current fiscal year and subsequently by the end of every three months. If the provisional tax is paid at once, it must be paid by the due date for the filing of the provisional tax return, which is in general 15 April for a financial year corresponding to the calendar year.

An extension of time to file the return and pay the tax later than 31 December is not granted. On request of a company, the Tax Inspector may consent to the reporting of a lower taxable profit than the taxable profit shown on the most recently filed final tax return. To obtain such consent, a request should be filed with the Suriname tax authorities before 15 February or within one and one-half months after the beginning of the current fiscal year.

The tax authorities may impose arbitrary assessments if the taxpayer fails to file a tax return. Additional assessments may be imposed if insufficient tax is levied when tax returns are filed or when arbitrary assessments are imposed. Depending on the degree of wrongdoing, a penalty of up to 100% of the additional tax due may be levied.

Dividends. In principle, a 25% withholding tax is imposed on dividends distributed by resident companies. Dividends distributed by resident companies to qualifying resident companies are

exempt from Suriname dividend withholding tax. For this purpose, the following are qualifying resident companies:

- Investment companies conducted as limited liability companies that exclusively or almost exclusively aim to acquire, hold, manage and sell shares
- Other Suriname resident companies that continuously held the shares in the payer of the dividends from the beginning of the year from which the distributed profits derive, provided that the recipient and payer are not mutual shareholders (entities that hold shares in one another)

Withholding tax is not imposed on remittances of profits by branches to their foreign head offices.

Participation exemption. In principle, dividend distributions received from qualifying resident companies and qualifying nonresident companies are exempt from Suriname income tax. For dividends received from qualifying nonresident companies, the participation exemption applies if, among others, the following conditions are met:

- The share interest held in the nonresident company is in line with the business activities of the company receiving the dividend distribution. The share interest held in the nonresident company is regarded to be in line with the business activities of the company receiving the dividend distribution if the recipient holds at least 10% of the nominal paid-up capital of the payer of the dividends.
- The nonresident company is subject to a tax on profit in its country of residence.

Foreign tax relief. No foreign tax relief is available under domestic law. Foreign tax relief may be available under the tax treaties entered into with Indonesia and the Netherlands.

C. Determination of taxable income

General. Taxable income must be calculated in accordance with "sound business practices."

In principle, all expenses incurred with respect to the conducting of a business are deductible. However, if expenses exceed normal arm's-length charges and are incurred directly or indirectly for the benefit of shareholders or related companies, the excess is considered to be a nondeductible profit distribution (dividend).

In principle, interest expenses are deductible for tax purposes if the interest rate is determined on an arm's-length basis.

No thin-capitalization requirements apply in Suriname under the Suriname tax legislation.

Inventories. Inventories are generally valued using the historical-cost, first-in, first-out (FIFO) or weighted-average methods.

Depreciation. Depreciation may be calculated using the straight-line, declining-balance or other methods that are in accordance with "sound business practices."

Relief for losses. Losses in a financial year may be carried forward for seven years. No carryback is available. Losses incurred by companies during their first three years of business may be carried forward indefinitely.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT) (Effective from 1 January 2023, the VAT replaced the turnover tax.)	10
Import duties	0 to 52

E. Miscellaneous matters

Foreign-exchange controls. The currency in Suriname is the Suriname dollar (SRD).

In general, a foreign-exchange permit is required for the movement of capital with respect to certain transactions including, but not limited to, the following:

- Loans issued by nonresidents of Suriname
- Real estate transactions in which one of the parties is a nonresident of Suriname
- Capital proceeds (profits and dividends)
- Incorporation of a limited liability company in accordance with the laws of Suriname if the company is located in Suriname and if one of the incorporators or shareholders is a nonresident of Suriname
- Purchase or sale of the shares of a limited liability company established in Suriname by a nonresident of Suriname

Specific guidelines for exchange control apply in the case of a petrol agreement: an agreement concluded between a state enterprise and a contractor for the survey, exploration and exploitation of petrol in specified areas of Suriname.

Transfer pricing. In general, intercompany charges must be determined on an arm's-length basis.

F. Tax treaties

Suriname has entered into tax treaties with Indonesia and the Netherlands. These treaties contain provisions to avoid double taxation between Suriname and these countries regarding taxes on income.

A. At a glance

Corporate Income Tax Rate (%)	20.6
Capital Gains Tax Rate (%)	20.6
Branch Tax Rate (%)	20.6
Withholding Tax (%)	
Dividends	30 (a)
Interest	0
Royalties from Patents, Know-how, etc.	0 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

(a) This withholding tax applies to nonresidents. In general, no withholding tax is imposed on dividends paid to a foreign company that is similar to a Swedish limited liability company (*aktiebolag*) and that is not regarded as a tax-haven company. If the payer is a company listed on the stock exchange, an exemption is granted only if the recipient holds at least 10% of the voting rights of the payer for more than one year.

(b) Royalties paid to nonresidents are not subject to withholding tax, but the net income is taxed as Swedish-source income at the normal corporate tax rate. However, under most treaties, the tax rate is reduced. Sweden has enacted legislation implementing the European Union (EU) directive on interest and royalties (2003/49/EC), effective from 1 January 2004. In implementing the directive, Sweden considered the most recent amendments adopted by the European Council.

B. Taxes on corporate income and gains

Corporate income tax. Income from all business activities is aggregated as one source of income — income from business. In principle, corporate income tax (CIT) is levied on all corporate income of a company incorporated in Sweden (resident corporation), except for certain domestic and foreign dividends (see *Dividends*). If a Swedish company conducts business through a permanent establishment abroad, the foreign profits are also subject to Swedish tax, unless a treaty provides otherwise. Nonresident corporations are subject to tax on Swedish-source income only.

Rate of tax. The corporate income tax rate is 20.6%. No local income taxes are levied on corporate profits.

Capital gains. No separate regime exists for capital gains, but special rules apply to the calculation of the amount of capital gains and losses.

In general, capital gains on shares held for business purposes are exempt from tax (for details regarding shares held for business purposes, see *Dividends*). The exemption is also applicable for interests in partnerships as well as shares held by partnerships. Corresponding losses on interests in partnerships are nondeductible. However, capital gains on interests in partnerships domiciled outside the European Economic Area (EEA) are not covered by the participation exemption.

Taxable capital gains are aggregated with other corporate business income. Capital gains are subject to tax when transactions are closed, regardless of the holding period or when payment is received.

Administration. A company may choose its financial year and is required to file its corporate income tax return by the corresponding due date for the return. A company can submit its return electronically through the Tax Agency's e-service or via regular mail. The following table provides the dates for filing the corporate income tax return for all financial years.

Financial year	Filing of tax return Paper filing and E-filing
1 February–31 January, 1 March–28 February, 1 April–31 March or 1 May–30 April	1 December
1 June–31 May or 1 July–30 June	15 January
1 August–31 July or 1 September–31 August	1 April
1 October–30 September, 1 November–31 October, 1 December–30 November or 1 January–31 December	1 August

If any of the dates above fall on a Saturday or Sunday, the filing date is moved to the following Monday.

A financial year may be extended for up to 18 months in certain circumstances, such as for a company's first or last financial year or if a company changes its financial year.

Advance tax payments are made in monthly installments during the year to which they relate. The final tax assessment must be issued by the Swedish Tax Agency before the 15th day of the 12th month after the end of the assigned income year. Any balance of tax due must be paid within 90 days after the final tax assessment.

Dividends. In general, dividends received from Swedish companies on shares held for business purposes are exempt from tax. Dividend distributions on other shares are fully taxable. Shares are deemed to be held for business purposes if they are not held as current assets and if any of the following conditions is satisfied:

- The shares are unlisted.
- The shares are listed and the recipient of the dividends owns at least 10% of the voting power of the payer for more than one year.

- The shares are held for organizational purposes (important to the business of the holder or a company in the same group as the holder).

The same conditions for exemption also apply to dividends received from foreign companies if the distributing foreign entity is equivalent to a Swedish limited liability company (*aktiebolag*).

Shares held in a company resident in an EU Member State are considered to be shares held for business purposes if both of the following conditions are satisfied:

- The company owning the shares holds 10% or more of the share capital of the payer (it is irrelevant whether the shares are held as current assets).
- The payer is listed in Council Directive 2015/121/EU (the Parent-Subsidiary Directive) and is required to pay one of the taxes listed in the directive.

Partnerships may receive tax-exempt dividends to the extent that the dividend would be exempt if received directly by the owners of the partnership interests.

However, if the distributing company is a foreign company that can deduct the dividend payment as interest or as a similar payment, the dividend is not exempt for the Swedish receiving company.

Foreign tax relief. Under Swedish law, a Swedish company may usually claim a credit against CIT liability for comparable taxes paid abroad. Sweden applies a so-called "overall" tax credit system. However, certain tax treaties may override internal foreign tax credit rules and instead exempt foreign-source income from Swedish tax.

C. Determination of trading income

General. Corporate income tax is based on taxable business income computed according to the accrual method of accounting. Taxable business income generally includes all worldwide income earned by a corporation. The major exceptions are capital gains and dividends on shares held for business purposes (see Section B).

Inventories. Inventories are valued at the lower of acquisition cost or actual value. Acquisition cost is determined using the first-in, first-out (FIFO) method. An obsolescence provision of 3% is allowed when using acquisition cost to value inventories.

Reserves. A profit allocation reserve allows a 25% deduction of the taxable income for the financial year. Each year's reserve must be added back to taxable income no later than six years after the year of the deduction. The oldest remaining reserve must always be reversed first. The reserve is based on net income before tax and includes any amounts from the allocation reserve that are added back to taxable income.

Tax is imposed annually on fictitious interest income with respect to the deferred tax amount.

Depreciation. Equipment with a life of three years or less may be written off in the year of purchase. Machinery and equipment

may be written off either on a straight-line basis at 20% of cost annually or on a declining-balance basis at 30% of the current tax value. In any one year, the same method must be used for all machinery and equipment. However, companies can switch to a different method each year. The above methods may be used only if the same depreciation method is used in the financial statements. If this condition is not satisfied, a third method, which is also based on the remaining depreciable value, is available. Under this method, companies may choose any percentage, up to a maximum of 25%. The same amortization rules that govern machinery apply to patents, trademarks, purchased goodwill and other intangible property.

Depreciation of buildings is straight-line over the building's expected life. In general, commercial buildings may be depreciated at 2% to 5% annually, factory buildings at 4% and office buildings at 2%. Buildings subject to greater wear and tear may be depreciated at higher rates. Accelerated depreciation of 2% annually is allowed for new buildings, additions or reconstructions during a period of six years following completion.

If depreciable machinery and equipment are sold, the proceeds reduce the depreciable base for the remaining machinery and equipment.

Relief for losses. Losses may be carried forward indefinitely. Losses may not be carried back.

The tax law includes rules restricting the use of old tax losses of acquired companies.

In general, the possibility of offsetting the losses of an acquired company through a group contribution (see *Groups of companies*) may in certain circumstances be restricted during a five-year period. The rules also include a restriction under which the amount of losses that may be used is limited to twice the amount paid for the shares. Special restrictions also apply to the possibility of using losses with respect to mergers.

Groups of companies. There is no consolidated treatment whereby all companies in a group may be treated as a single taxable entity. However, rules permit income earned by companies in a corporate group to be distributed within the group through the use of group contributions, which are deductible for the paying company and taxable income for the receiving company. In general, group contributions may be made between Swedish group companies if ownership of more than 90% exists during the entire financial year. This rule applies even if a foreign parent or subsidiary is in the group structure. A Swedish permanent establishment of a foreign company resident in an EEA state is treated as a Swedish company for purposes of the group contribution rules.

In certain circumstances it is possible for Swedish companies to claim deductions of losses in foreign subsidiaries.

D. Other significant taxes

The following table describes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on goods (including imported goods but excluding exported goods) and services, unless specifically exempt by law; based on sales price excluding VAT	
Standard tax rate	25
Rate on hotel services, food served in restaurants, foodstuffs (not including alcoholic beverages) and the repair of bicycles, shoes, leather goods, clothing and linen (a legislative proposal to reduce the VAT rate on such repairs to 6% may be approved during 2022)	12
Rate on books and newspapers, music notes and maps, entry to theaters, cultural and sports events, entry to and demonstrations of zoos and demonstrations of certain areas of nature, passenger transportation and certain copyrights	6
(A new VAT law was implemented in Sweden on 1 July 2023, with the intention to correspond with the EU VAT directive to a greater extent. The changes should not have a direct impact on companies' VAT management, as no extensive material changes are intended.)	
Social security contributions, on salaries, wages and the assessed value of benefits in kind; paid by employer	
General rate	31.42
Special salary tax, on earnings not included in the base for social security contributions; paid by the employer	24.26

E. Miscellaneous matters

Controlled foreign companies. A Swedish company that holds or controls, directly or indirectly, at least 25% of the capital or voting rights of a foreign low-taxed entity (controlled foreign company, or CFC) is subject to current taxation in Sweden on its share of the foreign entity's worldwide profits if the ownership or control exists at the end of the Swedish company's fiscal year. Foreign entities are considered to be low-taxed if their net income is taxed at a rate of less than 11.33% (55% of the effective corporate income tax rate) on a base computed according to Swedish accounting and tax rules. However, the CFC rules do not apply to foreign entities that are resident and subject to corporate income tax in jurisdictions on the so-called "approved list." If Sweden has entered into a tax treaty with a jurisdiction on the approved list, an additional requirement for the exemption is that the foreign entity and its income must be eligible for treaty benefits.

Anti-avoidance legislation. A general anti-avoidance act applies in Sweden. The act is considered a source of insecurity to taxpayers because it limits the predictability of the tax law. Under the act, a transaction may be adjusted for tax purposes if all of the following conditions are met:

- The transaction, alone or together with other transactions, is part of a procedure that provides a substantial tax advantage to the taxpayer.
- The taxpayer, directly or indirectly, participated in the transaction or transactions.
- Taking into account all of the circumstances, the tax advantage can be considered to be the predominant reason for the procedure.
- A tax assessment based on the procedure would be in conflict with the purpose of the tax law, as it appears from the general design of the tax rules, the rules that are directly applicable or the rules that have been circumvented through the procedure.

Transfer pricing. The Swedish transfer-pricing regulation is based on the arm's-length principle. As a result, in general, the transfer-pricing guidelines of the Organisation for Economic Co-operation and Development (OECD) apply. The Swedish Tax Agency may adjust the income of an enterprise if its taxable income in Sweden is reduced as a result of contractual provisions that differ from those that would be agreed to by unrelated parties and if the following three additional conditions are met:

- The party to which the income is transferred is not subject to tax in Sweden.
- It is reasonably established that a community of economic interest exists between the parties.
- It is clear from the circumstances that the contractual provisions were not agreed upon for reasons other than the community of economic interest.

If the conditions under the law are met, the Swedish Tax Agency may increase the income of an enterprise by the amount of the reduction resulting from the contractual provisions that were not determined at arm's length.

Under Swedish rules, a Swedish company must have formal transfer-pricing documentation in place with respect to cross-border transactions. These requirements have been modified to follow the OECD Base Erosion and Profit Shifting (BEPS) Action 13 recommendations. The modified documentation requirements apply to financial years starting after 31 March 2017 and require a Master File/Local File structure under which one Master File is prepared for the multinational enterprise group, and a Local File is prepared for each country where the group has operations. Small and medium-sized multinational enterprise groups are excluded from the obligation to prepare transfer-pricing documentation. The classification of small and medium-sized companies includes the following companies:

- Companies employing less than 250 persons
- Companies having an annual turnover below SEK450 million or a balance-sheet value below SEK400 million

In addition to the above, aggregated transactions with a counterparty that amount to less than SEK5 million per counterparty are

deemed "non-essential" and do not need to be documented in the Local File.

Debt-to-equity rules. No thin-capitalization rules exist in Sweden. However, the Companies Act requires the compulsory liquidation of a company if more than 50% of the share capital is lost without replacement of new capital.

Interest limitation rules based on earnings before interest, tax, depreciation and amortization. Sweden introduced major changes to its interest limitation rules as of 1 January 2019, which supersede the previous rules. The new rules, which are based on earnings before interest, tax, depreciation and amortization (EBITDA), are described below.

General limitation. Deductibility of net interest expense is limited to 30% of "Tax EBITDA." Special rules apply to investment companies and cooperative associations. These include a safe harbor rule to ease the administrative burden on smaller companies. No limitation is imposed on companies with a net interest expense below SEK5 million. The limitation is applied at the group level, meaning that the total deductible within a group under the safe harbor rule is limited to SEK5 million.

It is possible to offset net interest income and expense among companies that can exchange group contributions.

A nondeductible net interest expense can be carried forward for six years, but a change of control would forfeit the carryforward. However, this is not the case if the change of ownership occurs between two companies within the same group. The same applies for qualified mergers and demergers.

The inclusion of interest expense in the tax base of certain assets (for example, inventory, buildings, machinery and equipment, and intangible assets) is not permitted.

Targeted limitation. Deduction of interest is subject to further limitations with respect to debt between affiliated companies. Such interest expense is tax-deductible only to the extent the beneficial owner of the interest income is tax resident within the EU/EEA or in a jurisdiction with which Sweden has concluded a tax treaty, or the interest income is subject to at least 10% taxation in the hands of the beneficial owner of the interest if the interest income is the only income of the beneficial owner.

Even if the above criteria are met, the interest expense is not tax-deductible if the debt relationship has been created "exclusively, or virtually exclusively," to provide the group with a significant tax advantage.

The targeted interest limitation rules have been deemed incompatible with EU's freedom of establishment. Therefore, the rules limiting tax deductibility on interest paid to foreign affiliated companies have been deemed inapplicable under certain circumstances.

Interest definition. The definition of interest in Swedish tax law includes "costs which are comparable to interest costs," and in some cases, currency exchange rate effects.

Hybrid mismatches. Sweden introduced substantial additions to the Swedish provisions to counter hybrid mismatches as of 1 January 2020, applicable to affiliated companies or arrangements resulting in a tax benefit.

Hybrid entities and instruments. A company is not allowed to deduct expenses paid to a company in another state if the corresponding income is not subject to tax in that state and if this is due to differences in the classification of an entity (opaque/transparent) or a financial instrument (debt/equity) for tax purposes.

Imported mismatches. Deduction of a payment to an entity in a state outside of the EU is disallowed if the corresponding income from that payment is set off, directly or indirectly, against an expense that is giving rise to a deduction without inclusion or a double deduction.

Hybrid permanent establishments. A company is not allowed to deduct an expense paid to another company if the corresponding income is not subject to tax and this difference is due to the one of the following:
- The recognition of a permanent establishment
- The allocation of income to a permanent establishment
- A deemed payment disregarded under the laws of the payee jurisdiction

Double deduction. A company is not allowed to deduct an expense if a deduction is also allowed against the income of a company in another state and if one of the following circumstances exists.
- The expense was attributed to a permanent establishment.
- The expense was paid by a Swedish company.
- This is due to a tax residency mismatch.

The application of the first and third circumstances described above is not restricted to affiliated companies or arrangements resulting in a tax benefit.

Limited foreign tax credit on hybrid-transfers. Deduction of foreign tax, attributable to income on a financial instrument, is disallowed to the extent the taxpayer receives a tax credit on dividend or interest income resulting from the terms of a transfer agreement of the financial instrument. The limitation applies only to the extent that another entity is granted a foreign tax credit for the same income and the dividend or interest income is part of a structured arrangement that generally entails a tax credit for the taxpayer and the taxpayer reasonably should have been expected to know about the arrangement.

Reverse hybrid mismatches. Sweden introduced further provisions to counter hybrid mismatches on 1 July 2021. The provisions extend tax liability on income from Swedish transparent entities to associated foreign entities if the income is not subject to tax in the state where the receiving entity is deemed to be a resident for tax purposes, as a result of the classification of the Swedish transparent entity in that state.

Mandatory disclosure regime. The EU directive on mandatory disclosure rules (DAC 6) requires intermediaries and taxpayers to disclose to the relevant tax authorities certain cross-border

arrangements that contain one or more prescribed hallmarks. Some of the hallmarks trigger reporting requirements only if they also fulfill the main benefit test. From 1 January 2021, reporting is required within 30 days of certain trigger events.

F. Treaty withholding tax rates

Interest payments are not subject to withholding tax under Swedish internal law. Consequently, the table below provides treaty withholding tax rates for dividends and royalties only. However, under Swedish domestic law, no dividend withholding tax is levied on dividends paid by a Swedish company to a "foreign company," as defined under Swedish tax law, if it is equivalent to a Swedish limited liability company and certain holding requirements are met. Also, no withholding tax is levied if the EU Parent-Subsidiary Directive applies. In addition, a foreign legal entity qualifies as a "foreign company" if it is resident and liable to income tax in a jurisdiction with which Sweden has entered into a comprehensive tax treaty and if it is eligible for the treaty benefits.

Swedish domestic law on withholding tax contains an anti-avoidance rule. Under this rule, a person or entity that holds shares to provide an illegitimate tax advantage or reduction of withholding tax for someone else is subject to withholding tax. The anti-avoidance rule may also potentially apply to situations for which an exception from withholding tax would otherwise be available.

There is a proposal for a new Swedish withholding tax act, which had previously been put on hold awaiting the EU FASTER directive. There is currently no set date when the new act is expected to be applicable. Overall, the proposed withholding tax act is not intended to result in major changes in the application of withholding taxes in Sweden, but it will contain new anti-abuse provisions and extend the scope to cover additional persons with limited tax liability in Sweden. The new anti-abuse provisions will also result in the general anti-avoidance act being applicable to situations and arrangements relating to withholding tax.

Zambia	15	5	10
Zimbabwe	20	15	10
Non-treaty jurisdictions	30	–	0

(a) Royalties paid to nonresidents are not subject to withholding tax but are taxed as Swedish-source income at the normal corporate tax rate. However, under certain treaties, the tax rate may be reduced.

(b) The reduced tax rate applies if the parent company owns at least the minimum percentage of the paying company as prescribed by the relevant treaty.

(c) The lower tax rates may apply if thresholds regarding ownership or voting power are met.

(d) Under Swedish domestic law, dividends paid to a "foreign company" (as defined under Swedish law) are exempt from withholding tax if the shares are held for business purposes. Unlisted shares in Swedish companies are normally considered to be held for business purposes unless they are regarded as inventory. If the shares are listed, they must also be held for at least 12 months and the holding must amount to at least 10% of the voting rights. A special exemption also applies if the recipient fulfills the conditions in Article 2 of the EU Parent-Subsidiary Directive and if the holding is at least 10% of the share capital.

(e) Sweden applies the treaty with the former Czechoslovakia to the Czech Republic and the Slovak Republic.

(f) Sweden applies the treaty with the former Yugoslavia to Bosnia and Herzegovina, Croatia, Montenegro, Serbia and Slovenia.

(g) The rates are 3% on news royalties, 5% for copyright (excluding films and certain other items) royalties, 10% for industrial royalties and 15% in other cases.

(h) The higher rate applies if the Austrian company owns more than 50% of the capital of the Swedish company. The EU Interest and Royalties Directive may be more beneficial in this respect.

(i) In practice, the domestic Swedish rate of 20.6% applies to all royalties because the treaty rate of 25%, which applies to trademarks, is higher than the domestic Swedish rate. For all other royalties, the treaty withholding tax rate of 15% has expired. Under a new tax treaty between Sweden and Brazil, the rates will be reduced to the following:
- Dividends: 15% normal treaty rate and 10% reduced rate
- Royalties: 15% rate for trademark royalties and 10% for all other royalties

The rates will apply once Brazil has ratified the tax treaty and once the Swedish government has decided when the treaty should enter into force.

(j) The rates are 3% for patent royalties, 5% for leasing royalties and 10% for other royalties.

(k) The lower rate applies to leasing, and the higher rate applies to other royalties.

(l) The rates are 0% for copyright royalties and 5% for other royalties.

(m) The lower rate applies to industrial royalties.

(n) The lower rate applies to leasing and know-how royalties.

(o) The reduced treaty rate does not apply to mining royalties and cinematographic film royalties.

(p) The lower rate applies to copyright royalties.

(q) The domestic rate applies.

(r) The 0% rate applies to copyright royalties. The domestic rate applies to mining royalties. The 20% rate applies to all other royalties.

(s) The 10% rate applies to copyright royalties.

(t) The 5% rate applies to royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or for information concerning industrial, commercial or scientific experience. The 10% rate applies to all other royalties.
(u) The rate may be reduced by virtue of a most-favored-nation clause.
(v) The 5% rate applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment. The 7% rate applies to all other royalties.
(w) The lower rate applies to copyright royalties, excluding royalties for films and certain other items.
(x) The reduced rate applies if the payer of the dividends is engaged in an industrial undertaking.
(y) The higher rate of 15% applies on dividends paid by investment vehicles if the income is derived directly or indirectly from immovable property.

A. At a glance

Corporate Income Tax Rate (%)	11 to 21 (a)
Capital Gains Tax Rate (%)	– (b)
Branch Tax Rate (%)	11 to 21 (a)
Withholding Tax (%) (c)	
Dividends	35
Interest	0/35 (d)
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0 (e)
Carryforward	7 (e)

(a) The rates reflect the maximum aggregate effective tax liability of ordinarily taxed companies and are composed of federal and cantonal/communal taxes. Approximately 7.8% of the rates relate to the federal tax. The rates depend on the canton and commune in which the taxable entity performs its activities.
(b) See Section B.
(c) The withholding tax rates may be reduced under the Automatic Exchange of Information (AEI) Agreement between Switzerland and the European Union (EU) (see Section E) and under double tax treaties (see Section F).
(d) Withholding tax is levied on bank interest and bond interest, but normally not on interest on commercial loans, including loans from foreign parents to Swiss subsidiaries.
(e) Income of the current year may be offset against losses incurred in the preceding seven years. Losses may not be carried back (see Section C).

B. Taxes on corporate income and gains

Income tax. Switzerland is a confederation of 26 cantons (states). Taxes are levied at the federal and cantonal/communal levels. As a result of this multilayered tax system, no standard tax rates exist. Under the Swiss income tax system, earnings are taxed at the corporate level and, to the extent profits are distributed as dividends, again at the shareholder's level. However, see *Dividends* for details regarding the participation exemption.

In general, a resident corporation is a corporation that is incorporated in Switzerland. In addition, a corporation incorporated in a foreign country is considered a resident of Switzerland under Swiss domestic law if it is effectively managed and controlled in Switzerland.

Resident companies are subject to corporate tax on worldwide income. Income realized by a foreign permanent establishment of

a Swiss company or derived from foreign real estate is excluded from taxable income. Losses incurred by a foreign permanent establishment are deductible from taxable income. However, if a foreign permanent establishment of a Swiss company realizes profits in the seven years following the year of a loss and if the permanent establishment can offset the loss against such profits in the foreign jurisdiction, the Swiss company must add the amount of losses offset in the country of the permanent establishment to its taxable income in Switzerland.

A company not resident in Switzerland is subject to Swiss income tax if it has a permanent establishment or real estate in Switzerland.

Tax Harmonization Act. The Tax Harmonization Act (THA) sets certain minimum standards for cantonal/communal taxes. However, cantonal/communal tax rates are not harmonized under the THA.

Rates of corporate tax. The federal corporate income tax is levied at a flat rate of 8.5% of the taxable income. Because taxes are deductible in Switzerland, the federal corporate income tax rate on pre-tax income is approximately 7.8%.

Cantonal/communal tax rates vary widely. The cantonal/communal tax rates are usually a certain percentage (known as "multipliers") of the relevant cantonal statutory tax rates. The total tax liability consisting of federal and cantonal/communal taxes ranges from 11% to 21% (rounded numbers) of the pre-tax income, depending on the canton and commune in which the taxable entity is located.

Tax incentives. In Switzerland, tax incentives are granted to companies either by the cantons or by both the cantons and the federation if the respective conditions are met.

Patent box at the cantonal level. A patent box, which is compliant with the Organisation for Economic Co-operation and Development (OECD), is available at the cantonal level. Subject to the nexus approach, qualifying income derived from patents and equivalent rights is eligible for a relief of 10% to 90% (varies among the cantons). On entry in the patent box, the previously deducted research and development (R&D) expenditures are recaptured and taxed at the cantonal level.

R&D super deduction at the cantonal level. In certain cantons, an incremental deduction between 20% and 50% of the taxpayer's qualifying R&D expenditures can be applied (varies among the cantons). Only expenditures incurred in connection with R&D activities performed in Switzerland, either by the taxpayer or by related or unrelated parties, are eligible for the super deduction.

Notional interest deduction for taxpayers domiciled in the canton of Zurich. There is a grant of a notional interest deduction (NID), which is an imputed interest deduction on surplus equity. Surplus equity represents the portion of equity that exceeds the core equity required to conduct the business activity of the entity.

Immigration step-up at the federal and cantonal level. Hidden reserves, including self-created goodwill, can be disclosed for tax purposes on the immigration of assets, businesses or functions

from abroad to Switzerland. The disclosed hidden reserves must be amortized within the ordinary amortization periods, while disclosed self-created goodwill must be amortized within 10 years.

Overall cantonal tax relief limitation at the cantonal level. The cantonal tax incentives, such as patent box, R&D super deduction and NID, are subject to a maximum relief limitation of up to 70% of the taxable profit (varies among the cantons).

Tax holidays. In Switzerland, tax holidays are granted to companies either by the cantons or by both the cantons and the federation. Except for the limitation on the duration of tax holidays to a maximum period of 10 years, the cantons are autonomous in granting cantonal/communal tax holidays to the following:

- Newly established enterprises
- An already established enterprise that makes a material change in its operations

Tax holidays at the federal level require approval of the federation. Tax holidays at the federal level are governed by the federal law on regional policy, which is based on the following key factors:

- Establishment of new business activities in a qualifying area of economic development
- The performance by the applying company of industrial activities or services that have a close nexus to production activities
- Creation of new jobs or maintaining of jobs
- Particular economic relevance of the planned project for the area

The maximum amount of the federal tax relief is determined by the number of newly created or maintained jobs. Production-related service providers are eligible for a federal tax holiday if they create at least 10 new jobs within the first 5 years. No such limitation applies to industrial enterprises.

Federal and cantonal/communal tax holidays are typically subject to clawback provisions. The clawback clause is generally triggered if the conditions for the tax holidays are no longer met (for example, the envisaged number of jobs have not been created or have not been maintained within the relevant time frame).

Capital gains. Capital gains are generally taxed as ordinary business income at regular income tax rates. Different rules may apply to capital gains on real estate or to real estate companies at the cantonal/communal level.

Capital gains derived from dispositions of qualifying investments in subsidiaries qualify for the participation exemption. Under the participation exemption rules for capital gains, the parent company must sell a shareholding of at least 10% and, at the time of the disposal, it must have held the shares for at least one year (for further details regarding the participation exemption, see *Dividends*).

Administration. Income tax is generally assessed on the income for the current fiscal year, which corresponds to the corporation's financial year. The financial year does not need to correspond with the calendar year. Corporations are required to close their books once a year and file annual returns. This rule does not

apply to the founding year. Consequently, the first fiscal year can be extended up to a maximum of nearly two years.

The cantonal deadlines for filing the corporate tax return vary, and extensions may be obtained. The federal and cantonal tax returns are generally filed together.

Corporations may pay income tax in one lump-sum payment or in installments. The deadline for the payment of federal income tax is 31 March of the year following the fiscal year. The deadline for cantonal/communal taxes is usually between 30 June and 31 December.

Dividends. Dividends received are taxable as ordinary income. However, under the participation exemption rules, the corporate income tax liability is reduced by a proportion of net dividend income (as defined by the law) to the total taxable income if the recipient of dividends satisfies any of the following conditions:

- The recipient owns at least 10% of the shares of the distributing corporation.
- The recipient has a share of at least 10% of the profits and reserves of the distributing corporation.
- The recipient holds shares with a market value of at least CHF1 million.

Swiss companies distributing dividends or proceeds from liquidation exceeding the nominal share capital and the capital contribution reserves are generally required to withhold tax at a rate of 35%. Under the Net Remittance Procedure, Swiss companies distributing qualifying dividends may apply the treaty withholding rates prospectively without making the full 35% prepayment. The Net Remittance Procedure applies to dividends distributed on "qualifying participations." These are participations that qualify for an additional reduction or a full exemption from Swiss withholding tax under a comprehensive income tax treaty or under the AEI Agreement between Switzerland and the EU (see Section E). To distribute dividends under the Net Remittance Procedure, companies must obtain advance approval from the Swiss Federal Tax Administration (SFTA) by filing the designated application form.

The SFTA assesses, among other items, the beneficial ownership and substance elements. The advance approval to apply the Net Remittance Procedure will be issued for a five-year period. Reimbursements of Swiss withholding tax on dividends paid before the completion of a minimum holding period, if any, require filing and approval of Form 70 after the completion of the holding period (Denkavit-Practice; this is a reference to the European Court of Justice's decision in the *Denkavit case*).

Under the capital contribution principle, contributions to equity made by a shareholder on or after 31 December 1996 can generally be distributed without triggering withholding tax consequences, provided that certain requirements are met. Nevertheless, as of 1 January 2020, Swiss companies that are listed on the Swiss stock exchange can only distribute capital contribution reserves tax-free to their shareholders if at least 50% of the dividend is distributed out of other reserves (typically retained earnings) to the extent available.

Intercantonal tax allocation. If a company operates in more than one canton, that is, the head office is in one canton and permanent establishments are in other cantons, its taxable earnings are allocated among the different cantons. The allocation method depends on the type of business of the company. The determination of the method is based on case law, which is governed by a constitutional guarantee against intercantonal double taxation.

Foreign tax relief. Income from foreign permanent establishments of a Swiss company is not taxable in Switzerland. The international allocation of profit is based on intercantonal rules, unless a tax treaty provides for a different method. For the treatment of losses of foreign permanent establishments, see *Income tax*.

C. Determination of taxable income

General. The net profit shown in the commercial financial statements generally serves as the basis for income taxation. However, the tax authorities may require adjustments to correct for certain items such as excessive depreciation and provisions.

Federal and cantonal/communal corporate taxes paid or due are deductible for corporate income tax purposes.

Inventories. Any system of inventory pricing that is in accordance with accepted business practice and is used consistently by the taxpayer is presumed to be acceptable by the tax authorities.

Provisions. Swiss federal and cantonal regulations provide that a company may record a general tax-deductible reserve amounting to one-third of the inventory valuation.

Provisions to cover doubtful accounts receivable and expected liabilities are generally allowed for tax purposes if they are commercially justifiable.

In general, a reserve of 5% of accounts due from Swiss debtors and 10% of those due from foreign debtors is allowed, without substantiation. In addition, provisions for specific accounts may be established if economically justifiable.

Depreciation. Depreciation may be calculated using the declining-balance or the straight-line method. For federal tax purposes, the following are some of the maximum rates set forth in the official guidelines.

	Method	
Asset	**Declining-balance (%)**	**Straight-line (%)**
Commercial buildings	3 to 4	1.5 to 2
Industrial buildings	7 to 8	3.5 to 4
Office furniture	25	12.5
Office machines	40	20
Data-processing equipment	40	20
Machinery	30	15
Motor vehicles	40	20
Intangibles	40	20

Some cantons have particularly favorable provisions (for example, immediate or one-time depreciation).

Relief for losses. Income of the current year may be offset against losses incurred in the preceding seven years, to the extent that such losses have not yet been used to absorb profits of prior years. No loss carryback is allowed.

Groups of companies. Except for value-added tax purposes, the concept of a consolidated or group return is unknown in Swiss tax law. Each corporation is treated as a separate taxpayer and files its own return.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on deliveries of goods and services, including imports of goods and the purchase of services and (in very specific cases) of goods from foreign businesses that are not registered for VAT in Switzerland	
Standard rate	8.1
Hotel and lodging services (overnight stays only)	3.8
Preferential rate (applicable to items such as foodstuffs, farming supplies, agricultural products, medicines and newspapers)	2.6
Exports	0
Net equity tax	
Federal rate	0
Cantonal/communal rate; varies among the cantons and may also depend on the multiplier applied by the canton/commune (the cantons can provide for certain relief measures including the credit of the corporate income tax against the cantonal/communal equity tax)	0.001 to 0.5
Payroll taxes	
Social security contributions, on gross salary; paid by	
Employer	5.3
Employee	5.3
Company pension fund; rate varies by plan (compulsory and optional), gender and age of employee; paid by	
Employer (must bear at least one-half of the contribution)	3.5 to 9
Employee	3.5 to 9
Unemployment insurance, imposed on annual gross salary	
Gross salary up to CHF148,200 (capped); paid by	
Employer	1.1
Employee	1.1
Family allowance; paid on salary by employer; imposed by various cantons at different rates	0.7 to 3.5

Nature of tax	Rate (%)
Maternity insurance (only for some cantons)	Various
Accident insurance; rates vary depending on extent of coverage and the risk of the business; imposed on annual gross salary of up to CHF148,200	
Occupational; paid by employer; for extremely high risks, rates vary depending on various factors (for example, industrial sector of the employer)	Various
Non-occupational; employer may elect to charge all or part of these premiums to employees; for extremely high risks, rates vary depending on various factors (for example, industrial sector of the employer)	Various
Stamp duties	
One-time capital contribution tax, on Swiss shares (the rate is 0% for shares issued within the scope of qualified mergers and reorganizations, as well as for financial reorganizations, provided specific requirements are met); for incorporations and capital increases, the first CHF1 million is exempt from tax	1
Securities turnover tax; on the sale or exchange of taxable securities involving a Swiss-registered securities dealer (as defined by the law) that acts in the capacity of a broker or dealer or that trades on its own account; the onus for payment of the securities turnover tax is on the Swiss securities dealer, but it is customary that the securities turnover tax be charged to the ultimate buyer and/or seller; several types of parties are exempt, including investment fund managers and foreign companies listed on a recognized stock exchange; several types of transactions are exempt, including the brokering of foreign bonds between foreign parties and qualifying internal group transactions	
Securities issued by a Swiss party	0.15
Securities issued by a foreign party	0.3
Stamp duty on insurance premiums	
Third-party liability, fire, comprehensive vehicle and house contents insurance	5
Life insurance with single premium	2.5

E. Miscellaneous matters

Debt-to-equity rules. Under the federal thin-capitalization guidelines, which are also applied by most cantons, the minimum capitalization is calculated based on the maximum indebtedness of all of the assets. For each type of asset, only a specified percentage may be financed with debt from related parties (directly or indirectly). Consequently, the debt-to-equity ratio results from the sum of the maximum amount of indebtedness of all of the assets. The following are examples of the maximum percentages of indebtedness:

- Cash: 100%

- Accounts receivable: 85%
- Participations: 70%
- Manufacturing plants: 70%
- Intangibles: 70%

The required equity is calculated at the end of the year based on the balance sheet or on the fair market value of all assets, if higher.

For finance companies, the maximum indebtedness is 6/7 of the assets.

Interest rates may not exceed arm's-length rates (the SFTA publishes safe-haven rates annually). In case of deviations from the safe-haven rates, the taxpayer must demonstrate that the interest rate applied meets the arm's-length standard. In practice, this would require performing appropriate transfer-pricing analyses of comparable third-party arrangements in line with the latest requirements of Chapter 10 of the OECD Transfer Pricing Guidelines.

In certain cantons, specific debt-to-equity rules apply to real estate companies.

Foreign-exchange controls. Switzerland does not impose foreign-exchange controls.

Transfer pricing. Switzerland does not have statutory transfer-pricing rules. Transactions with related parties (for example, intercompany charges) must be determined at arm's length. The tax authorities accept the transfer-pricing methods described by the OECD guidelines. In particular, cost-plus charges should be justified and documented with appropriate ranges of mark-ups for each individual case. For the provision of financial and management services, the cost-plus method is accepted in exceptional cases only.

Special guidelines apply concerning minimum and maximum interest on loans granted to or from shareholders or related parties.

Companies may discuss transfer-pricing issues with the tax authorities and confirm the outcome in binding rulings. In complex cases, they may apply for APAs. Rulings are more common.

All of Switzerland's tax treaties contain a provision relating to the mutual agreement procedure (MAP), which generally follows Article 25 Paragraphs 1 through 3 of the OECD Model Tax Convention. Furthermore, more than 36 double tax treaties provide for the possibility of binding arbitration if the competent authorities of the countries involved cannot reach an agreement within MAP.

Country-by-Country Reporting. Multinational corporations that are resident in Switzerland with a minimum consolidated turnover of more than CHF900 million are required to submit a Country-by-Country Report to the SFTA no later than 12 months after the end of the respective financial year.

Reorganizations. The Swiss Merger Law of 3 October 2003 authorizes companies to carry out tax-neutral reorganizations (mergers,

demergers and transformations) if certain conditions are met, including the following:

- Liability to Swiss tax continues after the reorganization.
- Assets and liabilities are transferred and acquired at their previous value for income tax purposes.

Anti-avoidance measures. Switzerland has double tax treaties with more than 115 jurisdictions for the avoidance of double taxation and is committed to align all treaties with the global minimum standard in accordance with OECD Base Erosion and Profit Shifting (BEPS) Action 6.

Automatic Exchange of Information Agreement between Switzerland and the EU. Article 9 of the Automatic Exchange of Information Agreement between Switzerland and the EU (AEI Agreement) contains a measure providing that dividends paid (similar rules apply to intercompany interest payments and royalties) are not subject to tax in the country of source if the following conditions are satisfied:

- The parent company has a direct minimum holding of 25% of the capital of the payer of the dividends (subsidiary) for at least two years.
- Both the parent company and the subsidiary are subject to corporate tax without being exempted and both are in the form of a limited company.
- One company is tax resident in an EU Member State and the other company is tax resident in Switzerland.
- Neither company is tax resident in a third state under a double tax treaty with that state.

Bilateral double tax treaties between Switzerland and individual EU Member States remain applicable and are not restricted by the AEI Agreement.

Subject to fulfillment of the respective requirements, the taxpayer may rely either on the AEI Agreement or the applicable double tax treaty. The AEI Agreement will be extended to other jurisdictions that may join the EU in the future.

BEPS 2.0 Pillar Two implementation in Switzerland. The Pillar Two Global Anti-Base Erosion (GloBE) Model Rules stipulate that multinational enterprises (MNEs) with a turnover of more than EUR750 million are subject to a global minimum tax rate of at least 15% in each jurisdiction. The minimum tax is calculated based on the GloBE Model Rules provided by the OECD.

On 22 December 2023, the Swiss federal council implemented a Qualified Domestic Minimum Top-up Tax (QDMTT, also referred to as the Swiss Top-up Tax), which is applicable from 1 January 2024. At the same time, the federal council delayed the application of the Income Inclusion Rule (IIR) and Undertaxed Profits Rules (UTPR; together with the IIR referred to as the International Top-up Tax).

However, the legal basis for the International Top-up Tax (IIR and UTPR) is already established in the Minimum Tax Ordinance, with applicability deferred by a transitional provision for the time

being. Accompanying the ordinance, an explanatory statement was released that suggests that an application of the International Top-up Tax as of 1 January 2025 is likely. Nevertheless, this scenario is greatly contingent upon the global implementation landscape.

The GloBE rules will only apply to in-scope MNEs. The rules apply in addition to the ordinary corporate income tax system, which is not adjusted and applies unchanged in a first step. In a second step, the Swiss Top-up Tax will apply if the covered taxes from the ordinary corporate tax system aggregated for all Swiss group entities of an in-scope MNE group, divided by the respective aggregated GloBE Income or Loss, results in a GloBE Effective Tax Rate below 15%. It is anticipated that the Swiss Top-up Tax should qualify for the QDMTT Safe Harbour. Consequently, no additional IIR and UTPR calculations should be necessary for Swiss in-scope entities abroad.

For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (ey-beps-2-0-pillar-two-developments-tracker.pdf).

(a) Withholding tax is imposed only on bank interest and on interest from publicly offered bonds, debentures and other instruments of indebtedness issued by a Swiss borrower, but not on interest on commercial loans, including loans from foreign parents to Swiss subsidiaries.

(b) Under Swiss domestic law, no withholding tax is imposed on royalties, management fees, rents, licenses and technical assistance fees and similar payments.

(c) A 5% general rate and a 0% rate on interest paid between related parties (as defined in the double tax treaty) apply to interest paid on or after 1 July 2013. A 10% rate applies to interest paid on or before 30 June 2013.

(d) This rate applies if the shareholding by a corporation is at least 25%. A 15% rate applies to all other dividends.

(e) The 0% rate generally applies if the shareholding of a corporate recipient of dividends is at least 10%. The rate is increased to 15% if the shareholding of a corporate recipient is less than 10% or if the corporate recipient is controlled by persons that are not in the contracting states unless the corporate recipient demonstrates that the participation rights are not solely intended to profit from the advantages mentioned above. The 15% rate also applies to dividends paid to individuals and all other dividends.

(f) The 5% rate applies to dividends paid to corporations with a shareholding and voting stock of at least 10% in the payer. A 15% rate applies to other dividends.

(g) A 0% rate applies to dividends paid to pension funds or other similar institutions providing pension schemes. The 5% rate applies to dividends paid to corporations with a shareholding of at least 10% in the payer. A 15% rate applies to other dividends.

(h) This rate applies to dividends paid to corporations holding at least 10% of the capital and to dividends paid to pension funds or other similar institutions providing pension schemes. A 15% rate applies to other dividends.

(i) The 5% rate applies if the recipient of the dividends is a corporation with a shareholding of at least 15%. A 15% rate applies to other dividends.
(j) The 0% rate generally applies if the recipient of the dividends is a corporation that has a shareholding of at least 10% and if the participation has been held for at least one year. A 15% rate applies if the recipient of the dividends is a corporation that has a shareholding of less than 10% or if the recipient of the dividends is an individual.
(k) A rate of 5% applies to interest on bank loans.
(l) Rate is applicable if shareholding by a corporation is at least 10%. The net treaty withholding rate is increased to 20% if shareholding is less than 10%.
(m) A 0% rate applies to interest on bank loans.
(n) The 0% rate applies to the following interest payments:
- Interest paid to the other contracting state in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest paid in connection with the sale on credit of merchandise by one enterprise to another enterprise
- Interest on a loan granted by a bank or to the other contracting state or a political subdivision or a local authority thereof

(o) The 5% rate applies if the recipient of the dividends is a corporation with a shareholding of at least 20%. The rate is increased to 15% in all other cases.
(p) For interest paid to banks, the withholding tax rate is reduced to 5%.
(q) The 0% rate applies to dividends paid to corporations with direct ownership of at least 10% and a holding period of two years and to dividends paid to pension funds or other similar institutions. A 5% rate applies to corporations with direct ownership of at least 10% before the two-year holding period has elapsed. A 15% rate applies in all other cases.
(r) The 0% rate applies to the following interest payments:
- Interest paid with respect to a loan made, guaranteed or insured by the government of the other state or an instrumentality or agency thereof
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest paid in connection with the sale on credit of merchandise by one enterprise to another enterprise
- Interest on a loan granted by a bank

(s) This rate applies to dividends paid to corporations holding at least 10% of the voting power of the payer. A 15% rate applies to other dividends.
(t) This rate applies if the shareholding of the recipient is at least 20%. For other dividends, the rate is 15%.
(u) The 0% rate applies to interest on special trade credits or loans. The 10% rate applies to interest paid to banks or insurance companies. The 15% rate applies to other interest.
(v) This rate applies if the shareholding of the recipient is at least 50%. The rate is 10% if the shareholding of the recipient is at least 25% but less than 50%. The rate is 15% for other dividends.
(w) The China treaty does not cover the Hong Kong SAR.
(x) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) directly owning shares representing at least 10% of the capital of the company paying the dividends for at least one year before the payment of the dividends
- A pension fund or scheme
- The central bank

(y) This rate applies if the direct shareholding of the corporate recipient is at least 10%. For other dividends, the rate is 15%.
(z) The rate is 10% if the shareholding of the recipient is less than 25%.
(aa) The 0% rate applies to interest on certain government bonds. The 5% rate applies to other interest.
(bb) This rate applies if the shareholding of the recipient is at least 10%. A 15% rate applies to all other dividends.
(cc) A 0% rate applies to interest on bank loans and in certain other special cases.
(dd) The 0% rate applies if the beneficial owner of the dividends is one of the following:
- A company (other than a partnership) that is a resident of the other state and that holds directly at least 10% of the capital in the company paying the dividends for at least one year before the payment of the dividend
- A pension scheme
- The central bank of the other contracting state

(ee) The 10% rate applies to dividends paid to corporations holding participations of at least 20% in other enterprises. A 20% rate applies to other dividends.

(ff) A 10% rate applies to interest payments if the interest payments are determined based on the following:
- Revenue, sales, income, profits or other cash flows of the debtor or a related party
- Value adjustments of assets of the debtor or a related party
- Dividend payments or distributions of a partnership
- Similar payments of the debtor or related parties

The 0% rate applies to all other interest payments.

(gg) A 0% rate may apply under the Switzerland-EU agreement (see the paragraph preceding the treaty withholding tax rate table). The rates shown in the table are the treaty withholding tax rates.

(hh) The 0% rate applies if the recipient is a company that owns directly at least 10% for a period of at least one year of the capital of the company paying the dividends or if the recipient is a pension fund or pension scheme, provided that the dividends do not result from a business activity or are paid by a related company. The 15% rate applies to other dividends.

(ii) The 0% rate applies if the recipient is a company (other than a partnership) that owns directly at least 25% of the capital of the company paying the dividends, a governmental institution, a pension fund or a central bank authority. A 15% rate applies to other dividends.

(jj) The 5% rate applies if the corporate recipient of the dividends holds a shareholding of at least 20% in the distributing entity and has invested at least USD200,000 in the country of the distributing entity. The treaty withholding tax rate is increased to 15% if the shareholding is less than 20%.

(kk) The 0% rate applies to interest paid to certain government agencies or in connection with the purchase of industrial, commercial or scientific equipment on credit. The 5% rate applies to interest paid to banks or in connection with the purchase of goods on credit. The 10% rate applies to other interest.

(ll) The 0% rate applies to the following interest payments:
- Interest paid on loans granted by a company of the other state
- Interest paid to pension funds or pension schemes, provided that the interest does not result from a business activity or is paid by a related company
- Interest paid to the other contracting state, one of its political subdivisions, to local authorities or to a statutory body

A 10% rate applies to all other interest payments.

(mm) The 0% rate applies if the beneficial owner of the dividends is one of the following:
- A company that is a resident of the other contracting state that holds directly at least 50% of the capital of the paying company for at least 365 days including the day of the dividend payment (in the case of a merger, demerger or conversion, the holding period continues to run) and that has a stake in the capital of the dividend paying company at the time of the dividend payment amounting to more than CHF2 million (or the equivalent amount in foreign currency)
- A pension fund or scheme
- The central bank of the other contracting state

The 5% rate applies if the beneficial owner of the dividends is a company that is a resident of the other contracting state that holds directly at least 10% of the capital of the paying company for at least 365 days including the day of the dividend payment (in case of a merger, demerger or conversion the holding period continues to run) and that has a stake in the capital of the dividend paying company at the time of the dividend payment amounting to more than CHF100,000 (or the equivalent amount in foreign currency). The 15% rate applies to all other dividend payments.

(nn) The 0% rate applies if the beneficial owner of the dividends is one of the following:
- A company (other than a partnership) that is a resident of the other contracting state and that holds directly at least 10% of the capital in the company paying the dividends for at least one year before the payment of the dividend
- A pension scheme
- The central bank of the other contracting state

(oo) The 0% rate generally applies if the shareholding of a corporate recipient of dividends is at least 10%. The rate is increased to 10% if the shareholding of a corporate recipient is less than 10%.

(pp) A 0% rate applies to dividends paid to the other contracting state or a political subdivision or local authority thereof, the central bank or pension funds. The 5% rate applies to dividends paid to corporate recipients if the

shareholding is at least 10%. A 10% rate applies if the recipient is an individual with a shareholding of at least 10%. For other dividends, the rate is 15%.

(qq) The 0% rate applies if the recipient of the interest is a company (other than a partnership).

(rr) The treaty between Denmark and Switzerland was extended to the Faroe Islands as of 22 September 2009. The extension and the revised protocol between Denmark and Switzerland entered into force in November 2010.

(ss) On 10 October 2011, an amending protocol entered into force. The protocol did not change the withholding tax rates. However, if after the date of signing of the amending protocol, India and a third state that is an OECD member sign a convention, agreement or protocol and if under this convention, agreement or protocol, India limits its taxation at source of dividends, interest, royalties or fees for technical services to a rate lower than the rate provided for in the double tax treaty between Switzerland and India, the lower rate will also apply under the double tax treaty between Switzerland and India, effective from the date on which such convention, agreement or protocol enters into force.

As a result, the following rate reductions apply:

- The withholding tax rate on dividends paid to corporate recipients if the shareholding is at least 10% was lowered from 10% to 5%. The lower rate applies retroactively from 5 July 2018 when Lithuania became a member of the OECD.
- The withholding tax rate on dividends paid to other recipients was lowered from 10% to 5%. The lower rate applies retroactively from 28 April 2020 when Colombia became a member of the OECD.

(tt) The 0% rate applies if the dividends are paid to corporations with a shareholding of at least 10% in the capital of the payer and the shareholding is held for at least two years or if the dividends are paid to pension funds or similar institutions. A 15% rate applies in all other cases.

(uu) The 0% rate applies to interest paid to the other contracting state or certain government agencies of the contracting state or in connection with financing transactions, the purchase of industrial, commercial or scientific equipment or the construction of industrial, commercial, scientific or public facilities on credit. The 10% rate applies to all other interest.

(vv) The 5% rate applies to interest paid on bank and insurance loans, on bonds and other securities that are traded on a stock exchange and in certain other special transactions. The 15% rate applies to all other interest payments.

(ww) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:

- A company that has owned directly or indirectly shares representing at least 10% of the capital or voting power of the company paying the dividends
- A pension fund or scheme

A 10% rate applies to all other dividends.

(xx) The 0% rate applies to dividends that are paid to the Bank of Canada or qualifying pension schemes.

(yy) The 0% rate applies to interest payments if the beneficial owner of the interest is a resident of Canada and is not related to the payer.

(zz) The 0% rate applies if the beneficial owner of the dividends is the other contracting state, a political subdivision or a local authority of the other contracting state or a pension fund or scheme.

(aaa) The 0% rate applies to dividends paid to the Monetary Authority of Singapore or the Government of Singapore Investment Corporation Pte Ltd. The 5% rate applies to dividends paid to a corporation (other than a partnership) holding directly at least 10% of the capital of the company paying the dividends. A 15% rate applies to other dividends.

(bbb) The 0% rate applies to interest paid by a banking enterprise to a banking enterprise in the other contracting state or interest arising in Switzerland and paid to the Monetary Authority of Singapore. The 5% rate applies to other interest.

(ccc) The 0% rate applies to dividends paid to the respective national banks or certain pension funds listed in the protocol. The 5% rate applies if the recipient is a company that owns directly at least 10% for a period of at least one year of the capital of the company paying the dividends. A 15% rate applies to other dividends.

(ddd) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:

- A company (other than a partnership) that has owned directly or indirectly shares representing at least 10% of the capital or voting power of the company paying the dividends
- A pension fund

A 15% rate applies to other dividends.

(eee) The 0% rate applies to dividends paid to a corporation with a direct shareholding of at least 10% in the capital of the payer and to dividends paid to a governmental institution, pension fund or central banking authority. A 15% rate applies to other dividends.

(fff) The 0% rate applies to interest paid to the state or the central bank. The 5% rate applies to interest paid with respect to a loan or credit made, guaranteed or insured for the purposes of promoting export by an Eximbank or similar institution. The 10% rate applies to interest derived by a bank. A 15% rate applies in all other cases.

(ggg) The 10% rate applies to dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. A 15% rate applies to other dividends.

(hhh) The 5% rate applies if the recipient of the dividends holds a shareholding of at least 20% in the distributing entity and if the value of the participation is at least CHF200,000 (or the equivalent in foreign currency). A 15% rate applies to other dividends (in specific cases the 0% rate applies; see footnote [ooo]).

(iii) The 0% rate applies to the following interest payments:
- Interest paid with respect to a loan made, guaranteed or insured by the government of the other state or an instrumentality or agency thereof
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest paid in connection with the sale on credit of merchandise by one enterprise to another enterprise
- Interest paid to the other contracting state

(jjj) The 0% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest paid on bank loans
- Interest paid to a bank, insurance company or pension fund or scheme
- Interest paid to a contracting state, a political subdivision or local authority thereof, or a central bank
- Interest paid between enterprises that are associated by a stake of at least 25% held for at least two years or that are both held by a third company that directly holds at least 25% of the capital of both companies for at least two years

(kkk) A 0% rate applies to dividends paid to the other contracting state or a political subdivision or local authority thereof, the central bank or a pension fund.

(lll) The 0% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest paid on the sale of goods between corporate entities
- Interest paid on bank loans

In addition, the 0% rate applies if the interest is paid between enterprises that satisfy all of the following conditions:
- They are associated by a stake of at least 10% held for at least one year or they are both held by a third company that directly holds at least 10% of the capital of both companies.
- They are resident in a contracting state and, under any double tax agreement with any third state, none of the companies is resident in that third state.
- They are subject to corporation tax and are not exempt from tax on interest payments.
- They are both limited companies.

The 10% rate applies to other interest payments.

(mmm) The 0% rate applies if the direct shareholding of the corporate recipient is at least 10% and if the participation has been held for at least one year. For other dividends, the rate is 15%.

(nnn) The 0% rate applies to the following interest payments:
- Interest paid to a contracting state or a political subdivision, local authority, administrative-territorial unit or export financing institution thereof
- Interest paid between enterprises that are associated by a stake of at least 25% or that are both held by a third company that directly holds at least 25% of the capital of both companies

(ooo) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:
- A pension fund or scheme

- The government of the other state, or a political subdivision or local authority thereof
- The central bank

(ppp) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) directly owning shares representing at least 10% of the capital of the company paying the dividends
- A pension fund or scheme
- The central bank

A 10% rate applies to other dividends.

(qqq) The 0% rate applies to interest on government bonds and in certain other special cases.

(rrr) The 0% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest on a loan granted by a bank
- Interest paid to the government of the other state, a political subdivision or local authority thereof, or the central bank

The 10% rate applies to other interest payments.

(sss) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:
- A company (other than a partnership) that has its capital wholly or partly divided into shares and that holds directly at least 10% of the capital of the company paying the dividends during an uninterrupted period of at least one year
- A pension fund or other similar institution providing pension schemes in which individuals may participate to secure retirement, disability and survivors' benefits, if such pension fund or other similar institution is established, recognized for tax purposes and controlled in accordance with the laws of the other contacting state
- The government of the other contracting state, a political subdivision or local authority thereof, or the central bank of the other contracting state

(ttt) The 0% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of equipment, merchandise or services
- Interest paid on bank loans
- Interest paid with respect to pension schemes
- Interest paid to the government of the other state, a political subdivision or local authority thereof, or the central bank
- Interest paid between companies that are associated by a direct stake of at least 10% held for at least one year or by a direct holding of a third company of at least 10% for at least one year of the capital of both companies

The 5% rate applies to other interest payments.

(uuu) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) that directly owns shares representing at least 25% of the capital of the company paying the dividends
- A pension fund or scheme

(vvv) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) that directly owns shares representing at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least one year
- A pension fund or central bank

(www) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) that directly owns shares representing at least 10% of the capital of the company paying the dividends
- A pension scheme
- The central bank

A 15% rate applies to other dividends.

(xxx) The 0% rate applies to the following interest payments:
- Interest paid to the government of the other state, a political subdivision or local authority thereof, or the central bank
- Interest paid on specific bank loans of international business transactions
- Interest paid in connection with the sale on credit of equipment, merchandise or services

- Interest paid between companies that are associated by a direct stake of at least 25% or by a direct holding of a third company (resident in the EU or Switzerland) of at least 25% of the capital of both companies

The 5% rate applies to other interest payments.

(yyy) A 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:
- A pension fund or scheme
- The central bank

(zzz) The 10% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is a company (other than a partnership) that holds directly at least 10% of the capital and of the voting power of the company paying the dividends. A 15% rate applies to other dividends.

(aaaa) The 10% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
- Interest paid on bank loans

The 15% rate applies to other interest payments.

(bbbb) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:
- The government of the other state, or a political subdivision or local authority thereof
- An institution or fund wholly owned by that other state as agreed by mutual agreement of the competent authorities of the contracting states
- The central bank

The 5% rate applies if the recipient is a company (other than a partnership) that owns directly at least 25% of the capital of the company paying the dividends. A 10% rate applies to other dividends.

(cccc) The 0% rate applies to dividends if the beneficial owner of the dividends is one of the following:
- A corporation of a listed group holding at least 80% of the voting power of the payer
- A pension scheme
- The central bank
- A contracting state, political subdivision or local authority thereof (including a government investment fund)

The 5% rate applies to dividends paid to a corporation holding at least directly 10% of the voting power of the payer. A 15% rate applies to all other dividends.

(dddd) The 10% rate applies to interest payments. However, exemptions apply to, among others, the following:
- The government of the other contracting state, and several governmental bodies and institutions thereof
- The national bank

(eeee) The 0% rate applies to dividends if the beneficial owner of the dividends is one of the following:
- A corporation that directly holds at least 10% of the capital in the company paying the dividend for at least one year before the payment of the dividends
- A pension scheme
- A contracting state, political subdivision or local authority thereof

A 15% rate applies to all other dividends.

(ffff) The 0% rate applies to interest if the beneficial owner is a resident of the other contracting state and is in one of the following categories:
- Bodies exercising governmental functions and banks performing central bank functions
- Financial institutions that are unrelated to and dealing independently with the payer
- Complying Australian superannuation funds and tax-exempt Swiss pension schemes

A 10% rate applies to other interest payments.

(gggg) The 0% rate applies to the following interest payments:
- Interest on loans approved by the government
- Interest income derived from sales on credit of industrial, medical or scientific equipment
- Interest on bonds issued by a contracting state or a political subdivision or local authority thereof

The 5% rate applies to interest on bank loans. The 8% rate applies to other interest payments.

(hhhh) The 0% rate applies if any of the following circumstances exist:
- The beneficial owner of the interest is the contracting state or a political subdivision or local authority thereof.
- The interest is paid in connection with the sale on credit of goods, merchandise or any equipment.
- The interest is paid on bank loans.

A rate of 10% applies to other interest payments.

(iiii) The 0% rate applies to interest in connection with bonds, debentures or other similar obligations of the government or of a political subdivision or local authority thereof and in certain other special cases. The 10% rate applies to other interest payments.

(jjjj) The 0% rate applies to interest on certain loans guaranteed, insured or financed by the contracting state. The 10% rate applies to other interest.

(kkkk) Special rules apply to for collective-investment vehicles regarding dividend and interest payments.

(llll) The 0% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of equipment, merchandise or services
- Interest paid on bank loans
- Interest paid with respect to pension schemes
- Interest paid to the government of the other state, a political subdivision or local authority thereof, or the central bank
- Interest paid on intercompany loans

The 5% rate applies to other interest payments.

(mmmm) The 5% rate applies if, at the time the dividends become due, the corporate recipient of the dividends has directly held a shareholding of at least 25% in the distributing entity for more than a year. For the purpose of the holding period, prior restructurings are disregarded. The treaty withholding tax rate is 15% if this condition is not met.

(nnnn) The 0% rate applies to dividends paid to individual pension institutions (that is, in Switzerland, pillar 3a institutions). The 5% rate applies to dividends paid to corporations with a shareholding of at least 10% in the payer. A 15% rate applies to other dividends.

(oooo) The 0% rate applies if any of the following circumstances exist:
- The beneficial owner of the interest payment is the contracting state, a political subdivision or local authority thereof, or the central bank.
- The interest is paid by the contracting state or a political subdivision or local authority thereof.
- The interest is paid with respect to a loan, debt claim or credit that is owed to, or made, provided, guaranteed or insured by, that state or a political subdivision, local authority or export financing agency thereof.

The 5% rate applies to other interest payments.

(pppp) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:
- The government of the other state, or a political subdivision or local authority thereof
- The central bank
- A pension fund or scheme
- An investment authority or another institution recognized by the contracting state and established by the government of the other state, or a political subdivision or local authority thereof

The 5% rate applies to dividends if the beneficial owner is a company (other than a partnership) with a shareholding of at least 10% of the payer's capital. The 15% rate applies to other dividends.

(qqqq) A 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- Certain pension funds or schemes
- The central bank

The 10% rate applies to dividends if the beneficial owner is a company (other than a partnership) owning directly at least 10% of the capital of the paying company for at least a year. The 15% rate applies to other dividends.

(rrrr) The 0% rate applies to the following interest payments:
- Interest paid with respect to certain pension schemes
- Interest paid to the government of the other state, a political subdivision or local authority thereof, or the central bank

The 10% rate applies to interest payments if the beneficial owner is a bank; the loan is used for the financing of equipment or investment projects; and the loan has a term of at least five years. The 15% rate applies to other interest payments.

(ssss) The 5% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:
- A company owning directly at least 10% of the capital of the paying company
- The central bank
- An institution or fund fully owned by that state
- A pension fund or scheme

The 15% rate applies to other dividends.

(tttt) The double tax treaty between Switzerland and the United Kingdom signed on 30 September 1954 has been extended to the following territories: Antigua, Barbados, Belize, British Virgin Islands, Dominica, Gambia, Grenada, Malawi, Montserrat, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the Grenadines.

(uuuu) The 15% rate applies to dividends if the beneficial owner is a company resident in the other contracting state holding directly or indirectly shares representing at least 95% of the voting power of the Swiss company paying the dividends. The 25% rate applies to dividends if the beneficial owner is a company resident in the other contracting state and is one of the following:
- A company holding directly or indirectly shares representing between 50% and 94% of the voting power of the Swiss company paying the dividends
- A company holding at least 10% of the share capital of the Swiss company paying the dividends and a portion of the dividends is being paid to a company resident in the other contracting state holding directly or indirectly shares representing at least 50% of the voting power of the Swiss company paying the dividends

(vvvv) The 5% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:
- A company (other than a partnership) owning directly at least 25% of the capital of the paying company for at least 365 days (in the case of a merger, demerger or conversion, the holding period continues to run)
- A pension fund or scheme
- The central bank

The 15% rate applies to other dividends.

At the time of writing, Switzerland had signed new double tax treaties or amending protocols to double tax treaties that provide changes to treaty withholding tax rates with Angola, Germany (only slight change to a definition), Jordan and Kuwait.

(a) For details, see Section B.
(b) Effective from 1 January 1990, income from securities transactions is not subject to regular corporate income tax. Such income is subject to alternative minimum tax. See Section B.
(c) For details and the definition of a nonresident corporation, see Section B.
(d) Payments in connection with securities issued under the Financial Asset Securitization Act or Real Estate Securitization Act and interest derived from short-term commercial paper are subject to a 10% withholding tax. In addition, they are included in the computation of the resident corporation's taxable income and are taxed at a rate of 20%.
(e) Interest arising from short-term commercial paper, asset-backed securities, bonds, structured products and repurchase agreements underlying such financial instruments is not included in the tax computation in a resident individual's tax return but is subject to a 10% withholding tax.
(f) The applicable tax rate for interest arising from short-term commercial paper, asset-backed securities, bonds, structured products and interest arising from repurchase agreements is 15%. Other types of interest are subject to a tax rate of 20%.
(g) The withholding of tax is not required if the licensor issues a Government Uniform Invoice (GUI).

B. Taxes on corporate income and gains

Corporate income tax. A domestic profit-seeking enterprise is subject to corporate income tax on all of its income regardless of source. All profit-seeking enterprises, including subsidiaries of foreign companies that are incorporated under the Company Law of Taiwan, are considered domestic profit-seeking enterprises. A foreign profit-seeking enterprise is subject to tax only on income sourced in Taiwan.

Place of effective management. Taiwan introduced an act containing a place of effective management regime in July 2016. Under the act, a company is regarded as tax resident in Taiwan if it is effectively managed in Taiwan. "Effective management" refers to the situation in which the company's critical decisions are made in Taiwan, accounting and legal records are kept in Taiwan, and major business activities are executed in Taiwan. However, this act has not yet entered into force. The Executive Yuan will decide the effective date of the act.

Tax rates. The rate is 20% (increased from 17%) for tax years starting on or after 1 January 2018. For enterprises with taxable income not exceeding TWD500,000, the corporate income tax rate was 18% for 2018 and 19% for 2019.

Alternative minimum tax. The alternative minimum tax (AMT) applies to domestic profit-seeking enterprises and foreign profit-seeking enterprises that have a fixed place of business or business agent in Taiwan, if the enterprise's base income exceeds TWD600,000. The AMT is calculated in accordance with the following formula:

$$\text{AMT} = (\text{basic income} - \text{deduction of TWD600,000}) \times 12\%$$

Basic income equals the sum of the following items:
- Taxable income
- Tax-exempt income under the Statute for Upgrading Industries and other tax-incentive regulations
- Income from transactions in securities and futures
- Tax-exempt income of offshore banking units

If the regular income tax equals or exceeds the AMT, only the regular income tax is payable. The regular income tax equals tax

payable calculated under the Income Tax Law, less tax credits. If the regular income tax is less than the AMT, the difference between regular income tax and the AMT is payable in addition to the regular income tax. The additional tax payment cannot be offset by tax credits.

Tax incentives. A new Statute for Industry Innovation (SII) was announced and published on 12 May 2010 to replace the old Statute for Upgrading Industries (SUI), which expired on 31 December 2009. In comparison to the SUI, the SII retains only the tax incentive for expenditure spent on research and development (R&D) activities and offers other non-tax subsidies for various qualified activities. Under the SII, enterprises may claim up to 15% of their R&D expenditures as a credit to offset against their corporate income tax payable in the current year only or claim up to 10% of their R&D expenditures as a credit to offset against their corporate income tax payable in three years, with a maximum credit of 30% of the tax payable. The SII is effective from 1 January 2010 through 31 December 2029. The tax incentives obtained before the expiration of SUI remain effective after the expiration of SUI. Amendments were made to the SII in November 2017. Under the amendments, a venture capital limited partnership started from 2017 to 2029 that meets some requirements and obtains the regulator's approval can be treated as a pass-through entity rather than as a taxable corporate entity for 10 years from its startup. Under an amendment made to the SII in July 2018, from 2018, profit-seeking enterprises may use their undistributed earnings to construct or purchase buildings, software or hardware equipment, or technology for their operation, as needed, within three years after the year in which such earnings are derived. This investment can be deducted from the undistributed earnings in the current year's undistributed earnings calculation under Article 66-9 of the Income Tax Act.

In addition, on 18 February 2022, the Executive Yuan amended Article 10-1 of the SII to extend the date for investment in artificial-intelligence machinery or 5G-related equipment to 31 December 2024 and to include the products or services of cybersecurity in the scope of the investment deduction. This amendment gives tax credits to enterprises that invest in the artificial-intelligence machinery or 5G-related equipment, technology or services or the products or services of cybersecurity and that meet relevant requirements, including the following:

- Tax credits cannot exceed 30% of a company's tax liability for the year of the investment. Enterprises can choose between a one-time 5% reduction to their income tax for the year or a three-year 3% tax reduction.
- The expenditure must be at least TWD1 million and is capped at TWD1 billion in a tax year.
- The expenditure must be made between 1 January 2019 and 31 December 2024 (for the products or services of cybersecurity, the period is from 1 January 2022 to 31 December 2024).

On 2 November 2020, Taiwan's Ministry of Economic Affairs and Ministry of Finance issued a new tax ruling (no.10904604900 and no.10904670180), which amends some articles of the regulations governing the application of R&D tax credits for corporations and limited partnerships. The key aspects of the amendment

are that the education and training expenses relating to the participation of full-time R&D personnel in R&D activities qualify as R&D expenditure; consequently, income tax credits are applicable. The regulation applies to income tax returns filed for the 2020 and subsequent tax years.

On 7 January 2023, the Legislative Yuan passed an amendment to the SII to add Article 10-2 to provide tax incentives in the form of tax credits for investment in R&D for pioneer innovation and equipment purchased for advanced manufacturing processes to encourage technological innovation and enhance the jurisdiction's position in the global supply chain. The tax credit includes 25% of R&D expenditure incurred in a fiscal year and 5% of the equipment purchase price exceeding a certain amount in a fiscal year but no upper limit. In addition, the total tax credit amount for the incentives is limited to 50% of income tax payable in a fiscal year. The two incentives are effective from 1 January 2023 to 31 December 2029.

To qualify for the tax credit, the following three conditions must be fulfilled:
- The R&D expenditure and the ratio of R&D expenses to operating net revenue exceed a certain scale in a fiscal year.
- The effective tax rate of the year is not below a certain ratio.
- There has been no violation of environmental protection, labor or food safety and public sanitation laws in the past three fiscal years.

Capital gains. For profit-seeking enterprises, effective from 1 January 1990, income from securities transactions is not subject to regular income tax. Such income is subject to AMT. A securities transaction tax of 0.3% or 0.1% is imposed based on the transaction value.

During the period of 1 January 2010 through 31 December 2026, trading in corporate bonds and financial bonds (as defined in the Banking Law of Taiwan) is exempt from securities transaction tax. The suspension of income tax on securities transactions applies only to securities issued and certified in accordance with the law of Taiwan. Gains derived from disposals of securities that are not issued or certified in accordance with Taiwan regulations are subject to income tax.

Gains on sales of land are subject to land value increment tax (see Section D). Gains on sales of land had been exempt from income tax. However, on 9 April 2021, Legislative Yuan passed an amendment to the Income Tax Act with respect to the transfer of a house and land (House and Land Transactions Income Tax 2.0), which is effective from 1 July 2021. This amendment provides that the scope of taxation includes the sale of post 1 January, 2016 acquired land, buildings, pre-sold buildings and underlying land, or a majority (over 50% shareholding) shares of directly or indirectly held by foreign or domestic profit-seeking enterprises of which more than 50% of value of shares or capital contribution is comprised of building and land in Taiwan (excluding sale of listed/over the counter or emerging stock). Under this House and Land Transactions Income Tax 2.0, the capital gains tax on the transfer of real property located in Taiwan is taxed at progressive

rates subject to different holding periods. The following are the rates:

- Holding period up to two years: income tax rate of 45%
- Holding period of two years and up to five years: 35%
- Holding period of more than five years: 20% (same as current corporate income tax rate)

Administration. The tax year is normally the calendar year. Permission must be obtained to use any other period. An annual tax return must be filed during the fifth month of the year following the tax year. An extension to file a tax return is not available.

In general, the late filing penalty is 10% of the tax due. It may not exceed TWD30,000 or be less than TWD1,500. A delinquent reporting surcharge is 20% of the tax assessed by the authorities. It may not exceed TWD90,000 or be less than TWD4,500. A taxpayer that fails to pay the tax within the prescribed time limit is subject to a surcharge for delinquent payment and interest on a daily basis at the prevailing interest rate provided by the Directorate General of Postal Remittances and Savings Bank (PRSB). Underreporting of taxable income is subject to a penalty of up to two times the underpayment of tax. In the event of a failure to file the annual income tax return after expiration of the prescribed period, the tax authorities may make a provisional assessment of the amount of income and tax payable on the basis of available tax data or the profit standard of the same trade. In the event that other tax information is subsequently obtained by the tax authorities, the taxpayer is subject to a penalty of up to three times the tax shortfall, in addition to the delinquent reporting surcharge.

During the month of September, a profit-seeking enterprise (excluding a sole proprietor, partnership, prescribed small-size enterprise or tax-exempted entity) must pay an interim tax equal to 50% of the preceding year's tax liability. Under the Income Tax Law, qualified enterprises may pay interim tax based on the income derived in the first six months of the current year. If the interim tax payment is made after 30 September but before 31 October, late payment interest accrues on a daily basis at the prevailing interest rate provided by the PRSB. If the interim payment is not made by 31 October, the tax authorities assess one month's interest at the prevailing interest rate provided by the PRSB.

Dividends. The dividend withholding tax rate is 21% (increased from 20%) starting from 1 January 2018 for nonresident corporations or nonresident individuals, regardless of whether the investments are approved by the Taiwan government pursuant to the Statute for Investment by Foreign Nationals or the Statute for Investment by Overseas Chinese. Withholding tax is not imposed on dividends paid to residents.

A surtax is imposed on the undistributed profits of companies in the second year following the year in which the profits are earned. The surtax rate is 5% (reduced from 10%), effective for tax years starting on or after 1 January 2018. This tax is in addition to the corporate income tax imposed on the profits. Resident individuals can include the dividends received from Taiwan corporations in their individual income tax return as taxable income, subject to a

tax-exempt amount of 8.5% of dividend income (capped at TWD80,000) or have dividends taxed separately at a flat rate of 28%.

Dividends received by resident companies from other resident companies are exempt from corporate income tax.

Foreign tax relief. A tax credit is allowed for foreign income tax paid directly by a domestic profit-seeking enterprise, but it may not exceed the additional amount of the Taiwan tax resulting from the inclusion of the foreign-source portion in the profit-seeking enterprise's total income.

C. Determination of trading income

General. Income for tax purposes is computed according to Taiwan's generally accepted accounting principles, adjusted for certain provisions included in the tax code.

Necessary and ordinary expenses of a profit-seeking enterprise are deductible, provided these are adequately supported by documentation. The guidelines of Examination of Income Tax of Profit-Seeking Enterprises, promulgated by the Ministry of Finance, provide guidance for determining deductible business expenses. Transactions must conform to regular business practice; otherwise, tax authorities may assess tax based on standard profit margins derived from industry statistics.

If the income of a company consists of both taxable income and exempt income, the costs, expenses or losses, except for those that are attributable to the taxable income and exempt income in a direct, reasonable and definite way, must be allocated to taxable income and exempt income based on certain permitted methods.

Tax exemptions. A foreign enterprise engaging in international transportation that derives income in Taiwan is exempt from tax if Taiwan and the home jurisdiction of the foreign enterprise have entered into an international transportation income tax agreement, which provides reciprocal treatment to Taiwan international transportation enterprises operating in the foreign jurisdiction.

Gains on sales of land had been exempt from income tax. However, see *Capital gains* in Section B for the Taiwan tax implications if the transaction of a house and land meets the criteria of the House and Land Transactions Income Tax 2.0.

On approval from the competent authority, royalties paid to a foreign enterprise for the use of its patent rights or trademarks, or for the licensing of other special rights, may be exempt from tax if the licensed rights are used to introduce new production technology or products, improve product quality or reduce production cost. In addition, service fees received by foreign enterprises for rendering technical services in the construction of a factory for certain strategically important enterprises (SIEs) and royalties for the licensing of patents to SIEs may also be exempt from tax on approval.

A foreign-based corporate taxpayer that is engaged in international transportation, construction contracting, technical service provision, or machinery and equipment leasing may apply to use a deemed-profit-rate method (15% in general, and 10% for

international transportation business) in determining its taxable income in Taiwan if it is difficult to calculate the costs and expenses arising from the conduct of the business in Taiwan.

Interest received by a foreign financial institution for offering financing facilities to its Taiwan branch offices or other financial institutions in Taiwan is exempt from tax. With the approval of the Ministry of Finance, interest received by a foreign financial institution for extending loans to legal entities in Taiwan for financing important economic construction projects is also exempt from tax.

Inventories. Inventories are valued for tax purposes at the lower of cost or net realizable value. In determining the cost of goods sold, specific identification, first-in, first-out (FIFO), weighted average, moving average, or any other method prescribed by the competent authority may be used. However, the use of two different cost methods in one fiscal year is not allowed.

Provisions. Provisions for a retirement fund approved by the authorities are deductible in amounts up to 15% of the total payroll. The applicable percentage depends on whether the fund is managed separately from the business entity and whether it conforms to the provisions of the Labor Standards Law.

Allowance for bad debts is limited to 1% of the balance of outstanding trade accounts and notes receivable (secured or unsecured) at year-end.

Tax depreciation, depletion and amortization. A taxpayer may claim a depreciation deduction for most property (except land) used in a trade or business. Depreciation may be computed using the straight-line, fixed percentage on diminishing book value method, working-hour method, sum-of-the-years'-digits method or production-unit method. Under the working-hour method, depreciation is computed based on the number of working hours that a depreciable asset is used in a tax year. The time periods over which an asset may be depreciated are specified by the tax authorities. The following are some of the applicable time periods.

Assets	Years
Commercial buildings	10 to 50
Industrial buildings	5 to 35
Office equipment	3 to 5
Motor vehicles and vessels	3 to 18
Plant and machinery	2 to 20

Companies may use the accelerated depreciation method if they meet certain criteria.

Depletion of assets in the form of irreplaceable resources can be computed either based on the production units or methods provided by the Table of Depletion Assets promulgated by the Ministry of Finance. This method must be applied consistently from year to year. In addition, a taxpayer may claim an amortization deduction for intangibles and organizational expenses. Business rights (for example, commercial rights for operating public utility, telephone, public transportation, shipping and air transportation businesses) and copyrights are amortized over

10 years and 15 years, respectively. Trademarks, patents and franchises must be amortized over the period prescribed by the respective laws governing the granting of these rights. Organizational and pre-operating expenditures incurred during the period from the planning phase to the first year in which significant revenue is generated from the main business activities must be expensed on occurrence.

Relief for losses. If certain requirements are met, companies may carry forward for up to 10 years losses that have been approved by the tax authorities and not yet expired. Loss carrybacks are not permitted.

Groups of companies. In general, associated or related companies in a group are taxed separately for corporate income tax purposes and may not file consolidated tax returns. However, a financial holding company that holds 90% or more of the shares of subsidiaries in Taiwan for at least 12 months may elect to file a consolidated profit-seeking enterprise income tax return under its own name.

In addition, a company that acquires 90% or more of the shares or capital of its subsidiaries through a merger, spin-off or other acquisition under the Business Merger and Acquisition Law and holds such shares for at least 12 months may elect to file a consolidated profit-seeking enterprise income tax return under its own name.

A 5% surtax on the undistributed consolidated retained earnings applies in addition to the corporate income tax on consolidated net income.

An election to file a consolidated profit-seeking enterprise return applies only to corporate income tax and, as a result, qualifying parent companies and their subsidiaries must calculate all other taxes separately.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on sales and services	5
Business tax for financial industry	1/2/5
Land value increment tax, on unearned increase in the value of land, payable by the seller at the time of ownership transfer	20 to 40
Registration fee, on original or additional capital contributions	0.025

E. Miscellaneous matters

Foreign-exchange controls. Under foreign-exchange control regulations, registered business entities or adults legally residing in Taiwan may remit out (in) unlimited funds for the import (export) of goods and services. However, prior declaration to the Taiwan Central Bank is required for the following:

- An individual who has accumulated inward or outward remittances exceeding USD5 million in a year
- A business entity with accumulated inward or outward remittances exceeding USD50 million in a year

- A single remittance by an individual exceeding USD500,000
- A single remittance by a business entity exceeding USD1 million

In addition, supporting documents, such as transaction contracts, must be submitted at the time of remittance for the Central Bank's audit purposes.

Debt-to-equity rules. On 26 January 2011, the President of Taiwan announced the thin-capitalization rule enacted into Article 43-2 of the Income Tax Act. On 22 June 2011, the Ministry of Finance announced the enforcement rules for the thin-capitalization rule. The enforcement rules contain a debt-to-equity ratio of 3:1 (excluding companies in the financial industries). Interest on the excess portion of loans is not deductible. The enforcement rules do not apply to enterprises satisfying any of the following conditions:

- Total net current annual operating income and non-operating income is less than TWD30 million.
- Total annual interest expenses and total interest expenses derived from intercompany loans in the current year are both less than TWD4 million.
- Before including the interest expenses in the taxable income calculation, the current year's taxable income is negative and such tax losses are not eligible for the tax loss carryforward regime under Article 39 of the Income Tax Act.

Controlled foreign companies. The Taiwan controlled foreign company (CFC) regime entered into force starting 1 January 2023. Under the act, a nonresident company is considered a CFC if it is 50% or more directly or indirectly owned by a Taiwan resident company or individual. A resident company that holds an interest of 50% or more in a CFC is taxed on the company's share of the profits of the CFC, regardless of whether a dividend has been received by the Taiwanese company.

Anti-avoidance legislation. The Taiwan tax laws contain rules that deal with tax evasion and tax avoidance. The general rule is that the tax authorities may ignore transactions that constitute an abuse of the law and assess taxes with respect to each transacting party based on the economic substance of the transactions as well as on the attribution of the economic benefits. The same rule applies to sham transactions designed to conceal the economic reality of the transaction.

Transfer pricing. The Taiwan Transfer Pricing Examination Guidelines (the TP Guidelines) took effect on 30 December 2004. Except for immaterial amounts from related-party transactions, extensive contemporaneous documentation is required. Under the TP Guidelines, on filing the annual income tax return, a profit-seeking enterprise must have the transfer-pricing report and relevant documents prepared. In addition, in the event of a tax audit, a profit-seeking enterprise must provide the tax authorities with all required documents within one month of a request for such documents. The TP Guidelines provide that the tax authorities may impose a maximum penalty of 200% of the tax shortfall resulting from improper transfer prices. In addition, amendments made to the TP Guidelines in November 2017 adopt the three-tier, transfer-pricing documentation requirement, including Master File, Country-by-Country Report (CbCR) and Local File, in line with Action 13 of the Organisation for Economic

Co-operation and Development (OECD) Base Erosion and Profit Shifting (BEPS) Project. The amendments apply to the profit-seeking enterprises' income tax returns starting with the 2017 tax year.

However, a Taiwan profit-seeking enterprise that is an affiliate of a multinational enterprise (MNE) group can be exempt from submission of the Master File if the sum of the net operating revenue and non-operating revenue in the current year is less than TWD3 billion or if the aggregate amount of cross-border controlled transactions in the current year is less than TWD1.5 billion.

A Taiwan profit-seeking enterprise that is an affiliate of an MNE group can be exempt from submission of the CbCR if the following criteria are met:

- The Taiwan profit-seeking enterprise is the Ultimate Parent Entity (UPE) of an MNE group, and the total consolidated revenue of the group in the preceding year was less than TWD27 billion.
- The UPE of the MNE group is not within the jurisdiction of Taiwan and one of the following conditions applies:
  - — The jurisdiction in which the UPE is a tax resident has established the CbCR requirement, and the MNE group meets the safe harbor rules of the jurisdiction.
  - — The jurisdiction in which the UPE is a tax resident has not established the CbCR Requirement, and the Surrogate Parent Entity (SPE) meets the safe harbor rules of the jurisdiction in which the SPE is a tax resident.
  - — The jurisdiction in which the UPE is a tax resident has not established the CbCR requirement, there is no SPE, and the Taiwan safe harbor rules are met.
  - — It satisfies for the condition of the safe harbor of the Master File, namely the sum of its net operating revenue and non-operating revenue in the current year is less than TWD3 billion or the aggregate amount of its cross-border controlled transactions in the current year is less than TWD1.5 billion.

Even if the safe harbor rules are met, the Taiwan profit-seeking enterprise is still required to submit the Master File or CbCR to the tax authority on request for audit if the MNE group is obligated to submit these documents based on the request of the other tax jurisdiction.

On 15 November 2019, the Taiwan Ministry of Finance issued a new tax ruling that provides guidelines for making a one-off transfer-pricing adjustment. Because foreign related-party transactions of profit-seeking enterprises with an overseas parent are often not carried out at the expected terms of the group's transfer-pricing policy, there has been a need for one-off transfer-pricing adjustments. From the 2020 fiscal year, profit-seeking enterprises can conduct one-off transfer-pricing adjustments if they are carried out prior to the end of the year and meet the relevant required criteria. As outlined in the regulation, the relevant duties and taxes (for example, customs duty, value-added tax, commodity tax and withholding tax) are paid or refunded based on the adjusted transfer price.

F. Treaty withholding tax rates

Taiwan has entered into double tax treaties with the jurisdictions listed in the table below.

Taiwan has entered into international transportation income tax agreements with Canada, the European Union, Germany, Japan, Korea (South), Luxembourg, Macau, the Netherlands, Norway, Sweden, Thailand and the United States.

The following table lists the withholding tax rates under Taiwan's double tax treaties. The rates apply only if the recipient is the beneficial owner of the income.

	Dividends %	Interest %	Royalties %
Australia	10/15 (a)	10	12.5
Austria	10	10	10
Belgium	10	10	10
Canada	10/15 (e)	10	10
China Mainland (t)	5/10 (p)	7	7
Czech Republic (o)	10	10	5/10 (n)
Denmark	10	10	10
Eswatini	10	10	10
France	10	10	10
Gambia	10	10	10
Germany	10/15 (q)	10/15 (h)	10
Hungary	10	10	10
India	12.5	10	10
Indonesia	10	10	10
Israel	10	7/10 (i)	10
Italy	10	10	10
Japan	10	10	10
Kiribati	10	10	10
Korea (South)	10	10	10
Luxembourg	10/15 (b)	10/15 (j)	10
Malaysia	12.5	10	10

Switzerland	10/15 (e)	10	10
Thailand	5/10 (f)	10/15 (l)	10
United Kingdom	10	10	10
Vietnam	15	10	15
Non-treaty jurisdictions	21 (g)	15/20 (m)	20

(a) The 10% rate applies to dividends paid to a company (other than a partnership) holding directly at least 25% of the capital of the payer. The 15% rate applies in all other cases.

(b) The 15% rate applies if the beneficial owner of the dividends is a collective-investment vehicle established in Luxembourg and treated as a body corporate for tax purposes in Luxembourg. The 10% rate applies in all other cases.

(c) For dividends paid to Singapore residents, the withholding tax on the dividends and the corporate income tax payable on the profits of the payer may not exceed 40% of the taxable income of the payer out of which the dividends are paid.
(d) The 5% rate applies if the beneficial owner of the dividends holds directly at least 10% of the capital of the payer. The 15% rate applies in all other cases.
(e) The 10% rate applies to dividends paid to a company (other than a partnership) holding directly at least 20% of the capital of the payer. The 15% rate applies to other dividends.
(f) The 5% rate applies if the beneficial owner of the dividends holds at least 25% of the capital of the payer. The 10% applies in all other cases.
(g) The 21% rate applies to dividends paid to nonresident corporations and nonresident individuals, effective from 1 January 2018 (see Section B).
(h) The 15% rate applies to interest on real estate investment trusts and real estate asset trusts. The 10% rate applies in all other cases.
(i) The 7% rate applies to interest on bank loans. The 10% rate applies in all other cases.
(j) The 15% rate applies if the beneficial owner of the interest is a collective-investment vehicle established in Luxembourg and treated as a body corporate for tax purposes in Luxembourg. The 10% rate applies in all other cases.
(k) The Singapore treaty does not provide a preferential withholding tax rate for interest payments.
(l) The 10% rate applies to interest received by financial institutions (including insurance companies). The 15% rate applies in all other cases.
(m) The 15% rate applies to interest on financial instruments (see Section A).
(n) The 5% rate applies to the royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies in all other cases.
(o) The tax treaty entered into force on 12 May 2020 and is effective from 1 January 2021.
(p) The 5% rate applies to dividends paid to a company (other than a partnership) holding directly at least 25% of the capital of the payer. The 10% rate applies in all other cases.
(q) The 15% rate applies to dividends distributed by a German real estate investment company that is tax-exempt regarding all or part of its profits or that can deduct the distributions in determining its profits. The 10% rate applies in all other cases.
(r) The 3% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies in all other cases.
(s) The 4% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies in all other cases.
(t) This treaty is not yet effective.

Other Payments	15
Branch Remittance Tax	10 (l)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (m)

(a) The corporate income tax rate is 30%. The corporate income tax rate is reduced to 25% for companies newly listed on the Dar es Salaam Stock Exchange that issue at least 30% of their share capital to the public for three consecutive years from the date of listing. The corporate income tax rate is reduced from 30% to 10% for five consecutive years from the year of commencement of production for companies that have a newly established plant for assembling motor vehicles, tractors, fishing boats or outboard motors for boats and that have a performance agreement with the government of Tanzania. The corporate income tax rate is reduced from 30% to 25% for companies that are engaged in the manufacturing of sanitary pads and have a performance agreement with the government of Tanzania for two consecutive years from 1 July 2019 to 30 June 2021. The corporate income tax rate is reduced from 30% to 20% for five consecutive years from the year of commencement of production for newly established entities that are engaged in the manufacturing of pharmaceuticals or leather products and that have a performance agreement with the government of Tanzania. Companies reporting tax losses for three consecutive years must pay an alternative minimum tax at a rate of 0.5% on the annual turnover in the third loss year.

(b) Capital gains are treated as business income for companies and are taxed at the regular corporate income tax rate of 30%. A 3% income tax rate on the incoming or approved value of the asset (whichever is greater) is applicable to a resident person that realizes an interest in land or building and does not have records of costs of assets.

(c) A 2% income tax rate applies to gross payments received by a nonresident person from individuals not conducting a business with respect to an electronic service.

(d) The 10% rate applies to dividends paid by unlisted companies to residents and nonresidents. The 5% rate applies to dividends paid by companies listed on the Dar es Salaam Stock Exchange and for dividends paid by a resident company to a resident company owning 25% or more of the shares in the payer of the dividends.
(e) This withholding tax applies to residents and nonresidents. Resident companies may credit the withholding tax against their annual corporate income tax. Interest paid by strategic investors to nonresident banks and resident financial institutions is exempt from withholding tax.
(f) This withholding tax applies to both residents and nonresidents. The 10% rate applies to royalties paid in connection with the use of, or right to use, a cinematographic film, videotape, sound recording or any other like medium.
(g) The 5% rate applies to residents, while the 15% rate applies to nonresidents. The withholding tax on management and professional fees (services fees) for resident persons is an advance tax creditable against the final income tax. The withholding tax on technical services provided to mining, oil or gas companies is a final tax. Also, see Section B.
(h) This withholding tax applies to all supplies of goods to the government.
(i) This withholding tax applies to nonresidents only.
(j) This withholding tax applies to residents who pay a money transfer commission to a money transfer agent.
(k) This withholding tax applies to payments made to resident persons with respect to verified carbon emission reductions.
(l) This withholding tax applies to branches of foreign companies. Tax is levied on an annual deemed profit repatriation basis. Special rules apply to the calculation of the base.
(m) For limitations on the use of loss carryforwards, see for *Relief for tax losses* in Section C.

B. Taxes on corporate income and gains

Corporate income tax. A company is considered resident for tax purposes if it satisfies either of the following conditions:
- It is incorporated or formed under the laws of Tanzania.
- Its management and control of its affairs is exercised in Tanzania, whether physically or through any electronic means, at any time during the year of income.

Resident companies are subject to income tax on their worldwide income.

A company is also subject to income tax in Tanzania as a resident company if such company is an agent of a nonresident "person" or a beneficial owner through which such nonresident "person" receives any business or investment income, whether directly or indirectly, that accrues or is deemed to accrue in Tanzania. The term "person," as used in the Tanzanian Income Tax Act, reflects both individuals and corporate bodies, such as companies.

A person in Tanzania is an agent of a nonresident person or a beneficial owner if any of the following conditions is satisfied:
- The person is employed by or on behalf of a nonresident person or a beneficial owner.
- The person has a business connection with a nonresident person or a beneficial owner.
- A nonresident person or a beneficial owner is in receipt of any income, whether directly or indirectly, from or through the person
- The person is a trustee of a nonresident person. This includes any person who has acquired by means of a transfer a capital asset situated in Tanzania.

Rates of corporate tax. Both resident and nonresident companies are subject to income tax at a rate of 30%.

The corporate income tax rate is reduced from 30% to 25% for the first three years from the date of listing for companies that are newly listed on the Dar es Salaam Stock Exchange and that issue at least 30% of their share capital to the public.

Companies operating in the Export Processing Zone (EPZ) and Special Economic Zone (SEZ) are exempt from corporate income tax for the first 10 years. The exemption does not apply to Category "B" investors whose primary markets are within the area outside the SEZ or who produce for 100% local supply. They are also exempt from withholding tax on dividends, interest and rental payments.

The corporate income tax rate is reduced from 30% to 10% for five consecutive years from the year of commencement of production for companies that have a newly established plant for assembling motor vehicles, tractors, fishing boats or outboard motors for boats and that have a performance agreement with the government of Tanzania.

The corporate income tax rate is reduced from 30% to 20% for five consecutive years from the year of commencement of production for newly established entities that are engaged in the manufacturing of pharmaceuticals or leather products and that have a performance agreement with the government of Tanzania.

The corporate income tax rate is reduced from 30% to 25% for companies that are engaged in the manufacturing of sanitary pads and that have a performance agreement with the government for two consecutive years from 1 July 2019 to 30 June 2021.

Digital service tax. A 2% income tax rate applies to gross payments received by nonresident persons from individuals not conducting a business with respect to electronic services. An electronic service is defined as any service provided or delivered through a telecommunications network. This includes websites; web hosting; remote maintenance of programs and equipment, software and updates, images, text and information, access to databases, self-education packages, music, films and games, including gaming activities, as well as broadcasts of political, cultural, artistic, sporting, scientific and other events, including broadcast television.

Alternative minimum tax. Companies reporting tax losses or utilizing loss carryforwards for three consecutive years must pay an alternative minimum tax at a rate of 0.5% on the annual turnover in the third loss year.

Capital gains. Capital gains are treated as business income for companies and are taxed at the corporate income tax rate. Direct and indirect share transfers are subject to capital gains tax. Disposals of mineral and petroleum rights are also subject to capital gains tax.

Administration. A company's year of income is the calendar year. Companies may apply to the Commissioner General for the Tanzania Revenue Authority for approval of a different year of income.

Companies must file installment tax returns by the end of the third month of their year of income and file their final tax returns

within six months after the end of the year of income. The estimated tax must be paid in four equal installments, as set forth in the installment return. The remaining balance of tax due (the difference between the actual tax and tax paid in installments) must be paid by the due date of filing the final return. The taxpayer's estimate of taxable income may not be less than 80% of the company's taxable income as finally determined for the year of income. The Commissioner of Income Tax may allow a lower estimate if justified by the facts and circumstances of the case. Companies that are registered and issued a taxpayer identification number for the first time may elect to apply for deferment of the requirement to pay installment taxes for six months, with the deferred amount payable in three equal installments for the remaining period in the year of income.

Companies may revise their installment return and file a revised return in the 6th, 9th or 12th month of the year of income if new developments suggest an increase or decrease in income.

Tax returns are filed online through the e-filing portal of the Tanzania Revenue Authority. Companies are required to appoint a declarant (for example, a director or manager) who will be responsible for filing the company's tax returns. The declarant is also required to have an account in the e-filing portal so that he or she can manage the company's account.

A penalty is imposed for a failure to file a return. The penalty equals the greater of the following:
- 2.5% of the amount of tax assessable less tax paid by the start of the period in which the return is due
- 15 currency points (1 currency point = TZS15,000)

Fraud related to a return is subject to a penalty of 50% of the tax shortfall if the statement or omission is made without reasonable excuse. The penalty is increased to 75% of the tax shortfall if the statement or omission is made knowingly or recklessly.

Dividends. A final withholding tax is imposed on dividends. A 10% withholding rate applies to dividends paid to residents and nonresidents. A 5% withholding tax rate applies to dividends paid by companies listed on the Dar es Salaam Stock Exchange and to dividends paid to resident companies that hold 25% or more of the shares in the payer of the dividends.

Extractive industry. Technical services provided by resident companies or branches to the extractive industry in mining or oil and gas are subject to a final withholding tax of 5%. For nonresident service providers, the withholding tax rate is 15%.

A special tax regime was introduced for the extractive industry, effective from 1 July 2016. Significant aspects of the regime are discussed below.

Under the regime, each separate mining operation and each separate petroleum right is treated as an independent business for corporate income tax purposes. Accounts should be prepared for each separate mining operation or each separate petroleum right.

Taxable income should be determined, and income tax should be paid for each separate mining operation and each separate petroleum right for each year of income.

Royalties paid under the Mining Act or Petroleum Act are not deductible for tax purposes.

Arrangements between separate mining and petroleum operations and the other activities of the person should reflect the arm's-length principle.

Losses are ring-fenced for each mining and petroleum operation.

C. Determination of trading income

General. The audited financial statements serve as the starting point for computing taxable income. Expenses and losses are generally not deductible unless they are incurred wholly and exclusively in the production of income. Realized foreign-exchange losses on an interest free debt obligation are deductible up to 70% of the debt obligation.

Certified financial statements must now be attached when filing a corporate income tax return.

Exemptions. Interest, fees or other financial charges paid by the government of Tanzania to a nonresident bank, financial institution, another government or a representative of another government, arising from a loan agreement, entitles the nonresident entity to a tax exemption for purposes of financing government projects. The exemptions have a retroactive effect from 1 June 2017. Interest derived by a person from government bonds issued for a period not less than three years and listed on the Dar es Salaam stock exchange from 1 July 2021 is exempt from income tax.

Gains derived from the realization or transfer of mineral rights and mineral information to a partnership entity formed between the government and an investor are exempt from income tax. Similarly, gains from realization or transfer of free carried interest shares from a partnership entity to the government are also exempt from tax. In addition, gains derived from realization or transfer of shares to the government through the Treasury Registrar are exempt from income tax. Gains derived from the internal restructuring of mining companies pursuant to the requirement of a framework agreement entered between the government and investor to form a partnership entity are exempt.

Inventories. Inventories are valued at the lower of cost or net realizable value. The last-in, first-out (LIFO) method is not allowed.

Provisions. Provisions may not be deducted.

Depreciation. Depreciation computed for financial statement purposes is not deductible, but capital allowances are provided for depreciable assets, which are allocated to one of the eight classes. The following are the classes and the rates of the capital allowances.

Class	Assets	Rate
1	Computers and data handling equipment, together with peripheral devices; automobiles, buses and minibuses with a seating capacity of less than 30 passengers; goods vehicles	

Class	Assets	Rate
	with a load capacity of less than 7 tons; and construction and earth-moving equipment (reducing-balance)	37.5%
2	Buses with a seating capacity of 30 or more passengers; heavy general purpose or specialized trucks, trailers and trailer-mounted containers; railroad cars, locomotives and equipment; vessels, barges, tugs and similar water transportation equipment; aircraft; other self-propelling vehicles; plant and machinery used in agriculture or manufacturing; specialized public utility plant and equipment; and machinery irrigation installations and equipment	25% (reducing-balance)
3	Office furniture, fixtures and equipment; and any assets not included in another class	12.5% (reducing-balance)
4	No assets (the depreciation rules for the assets that had been in this class are discussed in the paragraphs after the table)	
5	Buildings, structures and similar works of a permanent nature used in agriculture, livestock farming or fish farming	20% (straight-line)
6	Buildings, structures and similar works of a permanent nature other than those mentioned in Class 5	5% (straight-line)
7	Intangible assets other than those in Class 4	1/useful life
8	Plant and machinery (including windmills, electric generators and distribution equipment) used in agriculture; electronic fiscal devices purchased by non-value-added tax registered traders; and equipment used for prospecting and exploration of minerals or petroleum	100%

Depreciable assets used in petroleum and mining operations are placed in a separate pool, which does not fall under the normal classes. The depreciation allowance with respect to mineral or petroleum operations is granted at the following rates.

Year of income	Depreciation allowance
First	20% of expenditure
Second	20% of expenditure
Third	20% of expenditure
Fourth	20% of expenditure
Fifth	20% of expenditure

Depreciable assets included in Class 4 were deleted, effective from 1 July 2016. However, the classes of depreciable assets were not renumbered when the above changes were introduced. To date, the law still provides for eight classes, despite the removal of depreciable assets that were under Class 4, and no amendment has been made with respect to the reference to Class 4 that is found under Class 7.

Plant and machinery in Categories 2 and 3 qualify for an initial capital expenditure allowance of 50% for the first year if they satisfy any of the following conditions:
- They are fixed in a hotel used for tourism services.
- They are fixed in a factory used for manufacturing.
- They are used in fish farming.

The maximum depreciable amount for a non-commercial automobile is TZS30 million.

Relief for tax losses. Companies may carry forward tax losses indefinitely. The deductibility of tax losses brought forward is restricted after a period of four years of continuous losses such that only 70% of the taxable profits in the fifth year can be sheltered by tax losses brought forward (with any excess losses carried forward to future years). Mineral and petroleum operations loss carryforwards may only offset 70% of the profits in a tax year. No carryback is allowed. Special rules for long-term contracts may apply.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	18
Customs duties (imports may also be subject to VAT)	
Raw material or capital goods	0
Semifinished goods	10
Finished goods	25
Property tax; imposed by local governments on the value of real property	0.15
Skills and Development Levy; imposed on gross remuneration (excluding benefits-in-kind)	3.5
Social security; imposed on basic salary; rates depend on the respective fund; paid by	
Employer	10/15
Employee	5/10
Workers' Compensation Fund; imposed on employers' annual wage bill; employers must make monthly payments through deposits in the fund's bank account; payments must be made on the last working day of the month after the month to which the payment relates	
Private sector employers	0.5
Public sectors employers	0.5
Railways Development Levy; imposed on customs value on importation of goods	1.5

E. Miscellaneous matters

Foreign-exchange controls. Tanzania does not impose foreign-exchange controls on current-account transactions, but the Bank of Tanzania must be notified of foreign capital-account transactions.

Transfer pricing. A company with controlled transactions of TZS10 billion (approximately USD4,300,000) or more in a tax year is required to file contemporaneous transfer-pricing documentation together with the final tax return. Taxpayers whose controlled transactions in a tax year do not reach the TZS10 billion threshold do not have to submit the contemporaneous transfer-pricing documentation with the final income tax return but must have it in place by the due date for filing the final income tax return and should submit it to the Tanzania Revenue Authority within 30 days on request.

A penalty is imposed for failure to prepare contemporaneous transfer-pricing documentation. The penalty is a minimum of 3,500 currency points, as prescribed from time to time by the Commissioner General for the Tanzania Revenue Authority. One currency point equals TZS15,000, which results in a penalty of TZS52,500,000 (approximately USD23,000).

F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %
Canada	10	15	20
Denmark	10	12.5	20
Finland	10	15	20
India	10	12.5	20
Italy	10	12.5	15
Norway	10	15	20
South Africa	10	10	10
Sweden	10	15	20
Zambia	0	0	0
Non-treaty jurisdictions	10	10	15

The East African countries, which are Burundi, Kenya, Rwanda, Tanzania and Uganda, have signed a tax treaty, which has not yet been ratified. Tanzania has also signed a tax treaty with the United Arab Emirates. The treaty is yet to be made publicly available and ratified.

A. At a glance

Corporate Income Tax Rate (%)	20
Capital Gains Tax Rate (%)	20
Branch Tax Rate (%)	20
Withholding Tax (%)	
Dividends	10
Interest	15*
Royalties from Patents, Know-how, etc.	15
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

* Certain types of interest are exempt from tax [see footnote (a) to Section F].

B. Taxes on corporate income and gains

Corporate income tax. Thai resident companies are subject to corporate income tax on their worldwide income. Thai resident companies are those incorporated in Thailand. Branches of foreign corporations are subject to Thai tax on Thailand-source income only.

Rates of corporate tax. Thai resident companies and branches of foreign corporations are subject to corporate income tax at a flat rate of 20% on taxable profits.

Progressive corporate income tax rates of 0%, 15% and 20% apply to locally incorporated companies with paid-up capital of not more than THB5 million and revenue of not more than THB30 million per year.

Tax incentives. Tax incentives are available in Thailand for International Business Centers (IBCs) and Treasury Centers (TCs), if relevant conditions are met.

IBCs. An IBC should be able to provide support services functions and/or financial management services under a TC license from the Bank of Thailand. The following are tax incentives available to IBCs and TCs:

- Reduced corporate income tax rate to 8%, 5% or 3%, based on the net profits from qualifying service fees and royalty income earned from its Thai and overseas associated enterprises, if it meets annual local spending requirements of THB60 million, THB300 million or THB600 million, respectively (see below)
- Exemption from corporate income tax on qualifying dividends received from its associated enterprises
- Exempt from Specific Business Tax (see Section D) on qualifying income from treasury services
- Entitled to a flat personal income tax rate of 15% for employment remuneration of qualifying expatriates working full time for the qualifying IBC
- Exemption from withholding tax on dividends distributed by the IBC to its overseas shareholders that are paid out of profits from the IBC's operations that are subject to tax at a reduced corporate income tax rate
- Exemption from withholding tax on qualifying interest paid by the IBC to an overseas loan provider in connection with a loan obtained for re-lending as a result of its treasury activities

The following are the conditions for qualifying as an IBC:

- Registered share capital of at least THB10 million at the end of each accounting year
- Providing qualifying support services and/or treasury services to its associated enterprises
- Employing at least 10 skilled full-time employees (or at least five employees if the IBC performs only a treasury center function)
- Minimum local spending requirement of at least THB60 million per accounting period unless converted from a Regional Operating Headquarters (ROH) or IHQ (see below)
- Obtains approval from the Director-General of the Revenue Department

Qualifying IBCs are entitled to reduced corporate income tax rates of 8%, 5% or 3%, provided that is meets the minimum annual local spending requirements of THB60 million, THB300 million or THB600 million, respectively. However, for entitlement to the reduced 8% corporate income tax rate, no minimum local spending requirement is imposed on "ROH Is" (ROH Is are the ROHs registered under Royal Decree No. 405) that convert to IBCs, while "ROH IIs" (ROH IIs are the ROHs registered under Royal Decree No. 508) and IHQs that convert to IBCs are required to have

minimum local spending of at least THB15 million per accounting year.

Capital gains. Capital gains are treated as ordinary business income subject to income tax.

Administration. Corporate income tax returns, together with the audited financial statements, must be filed with the Revenue Department within 150 days (extended 8 days in case of e-filing) after the accounting year-end. Corporate income tax payments are due on the filing date.

Mid-year (interim) tax returns must be filed with interim tax payments within two months (extended eight days in case of e-filing) after the end of the first half of the accounting year. Listed companies, financial institutions and companies approved by the Director-General of the Revenue Department compute their interim tax based on actual operating results for the first half-year. Other companies compute their interim tax based on one-half of the estimated annual profit. These companies do not have to submit audited or reviewed financial statements. The interim tax is creditable against the annual tax payable at the end of the year.

Dividends

Received from resident companies. In general, one-half of dividends received by resident companies from other resident companies may be excluded from taxable income. However, the full amount of the dividends may be excluded if either of the following applies:

- The recipient is a company listed on the Stock Exchange of Thailand.
- The recipient owns at least a 25% equity interest in the distributing company, provided that the distributing company does not own a direct or indirect equity interest in the recipient company.

These rules apply if the related shares are acquired not less than three months before receiving the dividends and are not disposed of within three months after receiving the dividends.

Received from foreign companies. A Thai company that owns an equity interest of at least 25% in a foreign company can exclude dividends received from such foreign company from its taxable profit if, on the date of receipt of the dividend, it has held the investment for at least six months and if the profit out of which the dividends are distributed is subject to income tax in the hands of the foreign company at a rate of at least 15%.

Foreign tax relief. Thailand has entered into double tax treaties with 61 jurisdictions. In general, under the treaties, foreign tax relief is limited to the lower of the foreign tax and the amount of Thai tax calculated on such income.

Foreign tax payable in non-treaty jurisdictions may be credited against Thai tax, limited to the Thai tax computed on the foreign income, provided the foreign tax meets the conditions set forth in the relevant measure. If the foreign tax is not used as a credit, it may be claimed as a deduction for income tax purposes.

C. Determination of trading income

General. Corporate income tax is based on audited financial statements, subject to certain adjustments.

In general, expenses are tax-deductible if they are incurred wholly and exclusively for the purpose of generating income. However, expenses created by means of provisions or allowances, such as those for bad debts or stock obsolescence, are not tax-deductible until they are actually used.

Inventories. Inventories must be valued at the lower of cost or market value. Cost may be determined using any generally accepted accounting method. After a method is adopted, a change to another method may be made only with approval of the Director-General of the Revenue Department.

Depreciation and amortization allowance. A company may depreciate its fixed assets under any generally accepted accounting method, provided the number of years of depreciation under the selected method is not less than the minimum prescribed period. However, after a method is adopted, it may not be changed unless prior consent has been obtained from the Director-General of the Revenue Department. The following are the minimum prescribed periods applicable to some major fixed assets.

Asset	Time period
Buildings	20 years
Furniture, fixtures, machinery, equipment and motor vehicles	5 years
Trademarks, goodwill, licenses, patents and copyrights (including software)	Over period of use (or 10 years if no period of use)
Computer hardware and operating software	3 years

Relief for losses. Operating losses may be carried forward for a period of five years. Loss carrybacks are not allowed.

Groups of companies. The Thai tax law does not include any provisions for consolidated treatment under which companies within a group may be treated as one tax entity. Each individual company must file its income tax return and pay its tax.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on goods sold, services rendered and imports	7
Specific Business Tax, on financial service and real estate businesses	Various

E. Miscellaneous matters

Foreign-exchange controls. On presentation of supporting documents, virtually all foreign-exchange transactions may be processed by a commercial bank.

Transfer pricing. Under Thailand transfer-pricing laws and regulations, all transactions with related parties must be executed at an arm's-length price, and the taxpayer may prepare and maintain contemporaneous documentation to substantiate the arm's-length principle. Acceptable transfer-pricing methods include the following:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Profit split method
- Transactional net margin method
- Other method proposed by the taxpayer

If the taxpayer fails to prove that a transaction challenged by the tax authorities was executed on an arm's-length basis, additional tax can be assessed.

The following are the key features of Thailand transfer-pricing provisions, effective from accounting years starting on or after 1 January 2019:

- The tax authorities can assess additional tax on a transfer price charged between related parties if it is not at market rate.
- Taxpayers who have a related party and generate annual revenue (per the audited financial statements) of THB200 million and above are required to prepare the Transfer Pricing Disclosure Form (TPDF) and submit it to Thai Revenue Department within 150 days after the accounting year end.
- Within five years after submission of the TPDF, the tax authorities with the approval of the Director-General of the Revenue Department can request a Local File report. The taxpayer is required to submit the Local File report within 60 days after receiving a request letter. In the case of a first-time request, the taxpayer has 180 days to prepare the transfer-pricing documentation.

In September 2021, the Thai Revenue Department issued two new regulations, Director-General of Thai Revenue Department Notification (DGN) 407 and DGN 408.

The DGN 407 provides the key mandatory items to be present in the Local File report. It is similar to the list of information required for the Local File under Organisation for Economic Co-operation and Development (OECD) guidelines. The Master File has not been required under any regulation to date.

The DGN 408 is related to the local requirement of the Country-by-Country Report (CbCR). There are few regulations, an announcement and a manual issued thereafter to provide further information about CbCR submission. Basically, CbCR submission is required for a Thai Ultimate Parent Entity (UPE) or a Thai surrogate with group annual revenue of THB28 billion and above. The deadline for filing the CbCR is 12 months after the fiscal year-end. For a Thai subsidiary of a multinational enterprise (MNE) group with annual revenue of THB28 billion and above, the CbCR is on request. The deadline for submission is 60 days after receiving the request letter.

Base Erosion and Profit Shifting (BEPS) 2.0 – Pillar Two. The Government of Thailand has approved in principle the collection

of the global minimum tax aligned with the OECD BEPS 2.0 – Pillar Two. Subject to the legislative process, the government aims to enact the law with an effective date starting in 2025.

F. Treaty withholding tax rates

The rates in the table reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends %	Interest (a)(b) %	Royalties %
Armenia	10	15 (c)	15

Vietnam	10	15 (c)	15
Non-treaty jurisdictions	10	15	15

(a) The following types of interest are exempt from tax:
- Interest paid to a financial institution wholly owned by another state
- Interest paid by the government or a financial institution established by a specific law of Thailand for the purpose of lending money to promote agriculture, commerce and industry
- Interest paid by the central bank or state enterprises on loans approved by the Ministry of Finance

(b) The rate is reduced to 10% if the interest is paid to banks, financial institutions or insurance companies of the treaty countries.

(c) Interest paid to the government, subdivisions of contracting states or a central bank is exempt from tax.

(d) The withholding rate is 3% for interest on loans or credits granted for at least four years with the participation of a public financing institution to a statutory body or enterprise of the other contracting state, in relation to sales of equipment, or in relation to the survey, installation or supply of industrial, commercial or scientific premises, or public works.

(e) Interest paid to a financial institution wholly owned by the other contracting state is exempt.

(f) The withholding rate is 5% (10% for Pakistan) for royalties for copyrights of literary, artistic or scientific works.

(g) The withholding rate is 10% for royalties paid for patents, trademarks, designs, models, plans, or secret formulas or processes.

(h) Royalties and similar payments paid to the other contracting state or a state-owned company for films or tapes are exempt.

(i) Interest paid to residents of Switzerland with respect to loans guaranteed or insured under the Swiss provisions regulating the Export or Investment Risk Guarantee is exempt.

(j) The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of equipment, merchandise or services. Interest on debt obligations guaranteed or insured by the government is exempt.

(k) The withholding rate is 5% (10% for Slovenia) for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including software and motion pictures and works on films, tape or other means of reproduction for use in connection with radio or television broadcasting. The withholding rate is 8% (10% for Slovenia) for royalties for the use of, or the right to use, industrial, commercial or scientific equipment.

(l) The withholding rate is 5% for royalties paid for the use of, or the right to use, copyrights of literary, dramatic or scientific works, excluding cinematographic films or films or tapes used for radio or television broadcasting. The withholding rate is 8% for amounts paid under financial leases for the use of, or the right to use, industrial, commercial or scientific equipment.

(m) The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of equipment, merchandise or services, except for sales between persons not dealing with each other at arm's length. Under the New Zealand treaty, interest derived by the government of New Zealand or its central bank from the investment of official reserves is exempt from tax.

(n) The withholding tax rate is 10% for royalties paid for the following:
- The use of or right to use, copyrights, industrial, scientific or commercial equipment, motion picture films, films or videotapes or other recordings for use in connection with television, and tapes or other recordings used in connection with radio broadcasting
- For the reception of, or the right to receive, visual images or sounds transmitted to the public by satellite, cable, optic fiber or similar technology
- For the use of, or right to use, in connection with television or radio broadcasting, visual images or sounds transmitted by cable, optic fiber or similar technology

(o) Interest on loans made, guaranteed or insured by the government, central bank, agency or body wholly owned or controlled by the government is exempt from tax.

(p) Interest is exempt from tax if it is paid on loans made, guaranteed or insured by the contracting state or by an authorized body of the state on behalf of the state or if it is paid on other debt claims or credits guaranteed or insured on behalf of the contracting state by an authorized body of the state.

(q) The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of industrial, commercial, or scientific equipment or from sales on credit of merchandise between enterprises.

(r) A withholding tax rate of 5% applies to royalties for the use of, or the right to use, copyrights of literary, dramatic, musical, artistic or scientific works, including software, cinematographic films and films or tapes used for radio or television broadcasting. A withholding tax rate of 10% applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience.

(s) The withholding tax rate is 10% for royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.

(t) The rate is reduced to 10% if the loan or debt claim generating the interest is guaranteed by the government, central bank, state general reserve fund, local authorities, or a body wholly owned by the government.

(u) The withholding tax rate is 10% for royalties paid for copyrights of literary, artistic or scientific works and the right to use industrial, commercial and scientific equipment.

(v) The withholding tax rate is 10% for royalties paid for managerial or consultancy services or for information concerning commercial, industrial, or scientific experience.

(w) The withholding tax rate is reduced to 5% if the beneficial owner holds directly at least 25% of the dividend-paying company.

(x) The withholding tax rate is 8% for royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The rate is 10% for royalties in other cases.

(y) The rate is 10% for interest paid on indebtedness resulting from sales on credit of equipment, merchandise or services, except for sales between persons not dealing with each other at arm's length.

(z) The withholding tax rate is 5% for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including software and motion pictures and works on films or other means of reproduction for use in connection with radio or television broadcasting. The rate is 10% for royalties for the use of, or the right to use, industrial, commercial or scientific equipment or patents.

(aa) Interest is exempt from tax if any of the following circumstances exists:
- The interest is paid in connection with the sale on credit of merchandise or equipment.
- This interest is paid on a loan or credit granted by a bank.
- The interest is paid to the government including a political subdivision or local authority thereof, the central bank or a financial institution controlled by the government.
- The interest is paid to a resident of the other contracting state in connection with a loan or credit guaranteed by the government including a political subdivision or local authority thereof, the central bank or a financial institution controlled by the government.

(bb) The withholding rate is 5% for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including software and cinema films, or films or tape for radio or television broadcasting. The withholding rate is 8% for royalties for the use of, or the right to use, patents, trademarks, designs, models, plans, secret formulas or processes, or industrial, commercial, or scientific equipment. The withholding tax rate is 10% for other types of royalties.

(cc) The maximum withholding tax rate for all types of royalties is 10%.
(dd) The withholding tax rate is 5% for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including software and motion pictures and works on films or other means of reproduction for use in connection with radio or television broadcasting. The rate is 10% for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes.

Branch Tax Rate (%)	30 (a)
Withholding Tax (%) (c)	
Dividends	3/8 (d)
Interest	15 (e)
Royalties from Patents, Know-how, etc.	15 (e)
Branch Remittance Tax	3 (f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

(a) A business levy and a green fund levy are also imposed. Companies licensed to carry on "banking business" or the "business of banking" under the Financial Institutions Act (these terms are defined identically under the act) are subject to a corporation tax rate of 35%. The rate for companies engaged in the downstream petrochemical sector and related sectors is 35%. Upstream petroleum operations are taxed under a separate regime. See Section B.
(b) See Section B.
(c) These withholding taxes apply to payments to nonresidents only.

(d) The 3% rate applies to dividends paid to corporations owning 50% or more of the voting power of the distributing company. The 8% rate applies to other dividends.
(e) Applicable to payments to nonresident companies and individuals.
(f) Applicable to deemed remittances of profits to overseas head office.

B. Taxes on corporate income and gains

Corporation tax. Companies resident in Trinidad and Tobago are subject to tax on their worldwide income from all sources. Relief with respect to taxation suffered on foreign-source income in an overseas jurisdiction may be available under a double tax treaty. Nonresident companies engaged in business in Trinidad and Tobago are subject to tax on income directly or indirectly accruing in or derived from Trinidad and Tobago.

Rates of tax. For the 2024 year of income, corporation tax is chargeable at a rate of 30%.

The Corporation Tax Act provides for a business levy to be imposed on the gross sales and receipts of companies for the calendar year, including branches of nonresident companies operating in Trinidad and Tobago. The rate of the business levy is 0.6%. The business levy is credited against the corporation tax liability. It is the final liability if the corporation tax liability is less than the business levy. Certain companies are exempt from the levy, including the following:

- Companies or statutory corporations exempt from corporation tax under any act
- Certain government corporations under the jurisdiction of the Public Utilities Commission or exempted by order of the President
- Companies subject to tax under the Petroleum Taxes Act

A company is not subject to the business levy for the first 36 months following the date of registration of its business or if its gross sales or receipts do not exceed TTD360,000 in the year of income.

The Miscellaneous Taxes Act provides for a green fund levy to be imposed on the gross sales and receipts of companies engaged in business in Trinidad and Tobago. The rate of the green fund levy is 0.3%. The green fund levy may not be credited against the corporation tax liability or claimed as a tax deduction in determining the company's taxable income.

The corporation tax rate for companies engaged in the downstream petrochemical sector and related sectors is 35%. Companies engaged in upstream petroleum operations are subject to various taxes and imposts, of which the most significant are petroleum profits tax of 50%, unemployment levy of 5% and supplemental petroleum tax at rates based on the weighted average crude oil price. Upstream petroleum companies are also subject to a different system of tax administration.

For companies licensed to carry on "banking business" or the "business of banking" under the Financial Institutions Act (these terms are defined identically under the act), a 35% rate applies.

In general, profits from a long-term insurance business of an assurance company that is subject to tax are the profits derived

from the assets supporting liabilities to Trinidad and Tobago policyholders, as required under Section 83(2) of the Insurance Act, 2018. Such profits are credited to the policy account and included in the insurance reserves reported pursuant to Section 145 of the Insurance Act, 2018.

Insurance companies carrying on insurance business other than long-term insurance business are generally taxed on the same basis as ordinary companies and are subject to corporation tax at the standard rate of 30%.

The rate of corporation tax on the profits from a long-term insurance business for the 2024 year of income is 15%. However, if such profits are transferred to the shareholders' account, such transferred amounts are subject to tax at a rate of 25%.

In the case of a Small and Medium Enterprise (SME) company that is listed on the Trinidad and Tobago Stock Exchange, a 0% rate applies for the first five years from listing, while such SME listed company will be subject to tax at 50% of the standard rate for the next five succeeding years and thereafter at the standard tax rate. A SME listed company is also subject to business levy and green fund levy at a 0% rate for the first five years from listing, at 50% of the standard rates of business levy and green fund levy for the next five succeeding years and thereafter at the standard rates of business levy and green fund levy.

Capital gains. Capital gains are generally not subject to tax. Depending on the class of asset and the nature of the company's business activities, however, the profit or loss on depreciable assets disposed of after being held for more than 12 months may require a balancing adjustment (see Section C).

Short-term capital gains are profits on the disposal of assets within 12 months of their acquisition. Although these gains are of a capital nature, they are generally subject to tax. Profits derived from the partial disposal of an asset within 12 months of acquisition are also subject to tax. For the 2023 year of income, the applicable rate is 30%.

Administration. The tax year is the calendar year. Tax is calculated on the profits for the accounting period that ends during the tax year. For each quarter, a company is required to pay a green fund levy installment, as well as either a corporation tax or business levy installment, whichever is greater. The quarterly payments must be made by 31 March, 30 June, 30 September and 31 December in each tax year. Quarterly payments of corporation tax are determined based on the taxable income for the preceding accounting period. Business levy and green fund levy installments are based on the actual gross sales or receipts of the company for the relevant quarter. The business levy calculation excludes income that is exempt for corporation tax purposes such as dividends received from Trinidad and Tobago resident companies, but the green fund levy calculation takes into account such tax-exempt income.

If the current year's profits exceed the preceding year's profits, a company must pay by 31 December the sum of the tax liability on the preceding year's taxable profits plus 80% of the increase in tax liability over the preceding year. Annual tax returns must

be filed by 30 April in the year following the tax year, and any balance of tax due is payable at that time.

If the balance of tax due is not paid by the 30 April deadline, interest accrues at a rate of 20% per year on the outstanding amount beginning on 1 May. A grace period to 31 October is granted for the filing of the tax return. If the return is not filed by 31 October, a penalty of TTD1,000 accrues beginning 1 November for each six-month period or part of such period that the return remains outstanding.

Dividends. Dividends received from nonresident companies out of profits not derived from or accruing in Trinidad and Tobago are subject to tax. Dividends received by resident companies from other resident companies are tax-exempt.

Effective from 1 January 2022, dividends paid to nonresident companies and individuals are generally subject to a withholding tax of 8%. The rate is reduced to 3% if the recipient is a corporation owning 50% or more of the voting power of the distributing company.

Double tax relief. Bilateral agreements have been entered into between the government of Trinidad and Tobago and the governments of certain other countries to provide relief from double taxation. These agreements assure taxpayers that their trade or investment in the other countries is free from the deterrent of double taxation. Relief from double taxation is achieved by one of the following two methods:

- Exemption or a reduced rate on certain classes of income in one of the two countries concerned.
- Credit if the income is fully or partially taxed in the two countries. The tax in the country where the income arises is allowed as a credit against the tax on the same income in the country where the recipient is resident. The credit is the lower of the Trinidad and Tobago tax or the foreign tax on the same income.

C. Determination of taxable income

General. The assessment is based on financial statements prepared according to international accounting standards, subject to certain adjustments.

To be deductible, expenses must be incurred wholly and exclusively in the production of income. The deduction for business meals and entertainment expenses is limited to 75% of actual expenses. Deductions for management charges (now more broadly defined) paid to a nonresident company may not exceed 2% of the payer's total expenses, exclusive of such charges, capital allowances and expenses not allowed under the Corporation Tax Act.

Donations made under a registered deed of covenant to an approved charity that are actually paid during the year of income are deductible, up to a maximum of 15% of the total income of the company (as defined in the law).

Inventories. Inventory may be valued at cost or market value, whichever is lower. A method of stock valuation, once properly adopted, is binding until permission to change is obtained from the Board of Inland Revenue.

Bad debts. Trading debts that have become bad, and are proven to be so to the satisfaction of the Board of Inland Revenue, may be deducted in determining taxable income. In addition, doubtful debts are deductible to the extent that they have become bad during the year. If these debts are subsequently collected, they are considered to be income subject to tax in the year of recovery.

Tax depreciation (capital allowances)

Depreciation (wear-and-tear) allowances. Depreciation is calculated on the depreciated value of fixed assets at the beginning of each accounting year.

Industrial buildings generally qualify for a depreciation allowance of 10% under the declining-balance method. Buildings completed before 1 January 1995 that are used in retail or wholesale trade or as office buildings or rental properties are not entitled to any depreciation allowances, unless they are used exclusively to house plant and machinery and the amounts claimed for the depreciation allowance are reasonable.

Capital expenditure incurred on the construction of a building or structure completed on or after 1 January 1995 and capital improvements made to buildings or structures on or after that date qualify for a 10% depreciation allowance under the declining-balance method.

Other assets are depreciated using the declining-balance method. The depreciation rates vary depending on when the assets were acquired. The following are the applicable rates for assets acquired on or after 1 January 1995.

Asset	Rate (%)
Office equipment	30
Motor vehicles	30
Computers	33.3
Plant and machinery	
Light	30
Heavy	30 or 33.3
Rigs	33.3
Aircraft (secondhand)	40

Balancing adjustments. Proceeds from disposals of assets are deducted from the residual value of the pool for that particular class of assets. Under the pool system, balancing charges arise if the value in the pool results in a credit balance, and balancing allowances arise only on the disposal of all of the assets in a particular class.

Initial allowance. A 10% initial allowance is granted on acquired industrial buildings that are used in manufacturing. Machinery and equipment used in manufacturing also qualify for an initial allowance at a rate of 90%. The rate of the initial allowance is reduced to 20% for plant and machinery used in the production of sugar, petroleum or petrochemicals or in an industry enjoying concessions under the Fiscal Incentives Act.

The initial allowance reduces the asset's value for purposes of depreciation in subsequent periods.

Relief for losses. Losses carried forward can generally be written off to the full extent of taxable profits for the tax year. Effective

from 1 January 2020, companies engaged in the upstream energy sector are only able to claim loss relief of up to 75% of taxable profits. The unrelieved balance can be carried forward indefinitely. No loss carryback is allowed.

Groups of companies. Under the provisions of the Corporation Tax Act, a company within a group of companies (surrendering company) may surrender its current year trading loss (exclusive of capital allowances) to another company (or companies) within the same group (claimant company). The claimant company may then claim a deduction with respect to the trading loss against its taxable profits.

To qualify for group relief, both the surrendering company and the claimant company must be resident in Trinidad and Tobago. Two companies are members of the same group if one is a wholly owned subsidiary of the other or both are wholly owned subsidiaries of a third company. The surrendering company and the claimant company must be members of the same group throughout the respective accounting periods of each of the companies. If the claimant company and the surrendering company do not have coterminous year-ends, the amount of the current year losses available for setoff and relief is restricted to the accounting period that is common to both the surrendering company and the claimant company.

The claimant company may claim group relief if it has used all of its available capital allowances and offset its loss brought forward from the prior year(s) of income against its current year taxable income. The amount of the trading losses that any one claimant company may claim as a deduction is limited to 25% of the tax that would have been payable by the claimant company had the relief not been granted.

Any unrelieved current year losses of the surrendering company may be carried forward indefinitely and be written off against its future taxable income.

D. Value-added tax

A value-added tax (VAT) applies to most products supplied and services rendered in Trinidad and Tobago. The standard rate of VAT is 12.5%. A 0% rate applies to certain items, including exports. Imports of inputs by highly capital-intensive manufacturing corporations are exempt from VAT if the corporation is declared an approved enterprise under the Fiscal Incentives Act.

Companies and other businesses are required to register for the tax if their turnover exceeds a stipulated threshold as specified in the Value Added Tax Act. The VAT threshold is TTD600,000 a year.

The Value-Added Tax Act allows the tax authorities to offset VAT refunds against any other tax liability, such as corporation tax or income tax.

E. Miscellaneous matters

Foreign-exchange controls. Trinidad and Tobago has a floating exchange-rate regime. Commercial banks and licensed

foreign-exchange dealers set the exchange rate. Residents may hold foreign currencies for their own account. Profits may be repatriated without the approval of the Central Bank of Trinidad and Tobago.

Debt-to-equity rules. In general, no thin-capitalization rules are imposed in Trinidad and Tobago. However, if a local company pays or accrues interest on securities issued to a nonresident company and if the local company is a subsidiary of, or a fellow subsidiary in relation to, the nonresident company, the interest is treated as a distribution and may not be claimed as a deduction against the profits of the local company.

F. Treaty withholding tax rates

The following table lists the withholding tax rates under Trinidad and Tobago's tax treaties. If the treaty rates are higher than the rates prescribed in the domestic law, the lower domestic rates apply.

	Dividends %	Interest %	Royalties %
CARICOM treaty (f)			
Antigua and Barbuda	0	15	15
Barbados	0	15	15
Belize	0	15	15
Dominica	0	15	15
Grenada	0	15	15
Guyana	0	15	15
Jamaica	0	15	15
St. Kitts and Nevis	0	15	15
St. Lucia	0	15	15
St. Vincent and the Grenadines	0	15	15
Brazil	10/15 (h)	15	15
Canada	5/15 (d)	10	10
China Mainland	5/10 (c)	10	10
France	10/15 (d)	10	10
Germany	10/20 (c)	10 (a)	10
India	10	10	10
Italy	10/20 (c)	10	5
Luxembourg	5/10 (g)	7.5/10 (e)	10
Spain	0/5/10 (i)	8	5
Sweden	10/20 (c)	10 (a)	20
Switzerland	10/20 (d)	10	10
United Kingdom	10/20 (c)	10	10
United States	10/25 (d)	15 (a)	15
Venezuela	5/10 (c)	15	10
Non-treaty jurisdictions	3/8 (b)	15	15

(a) The rate applies to interest paid to banks and financial institutions. Interest paid to other recipients is taxed at 15%.
(b) See footnote (d) to Section A.
(c) The lower rate applies if the recipient is a corporation owning 25% or more of the voting power of the distributing company.
(d) The lower rate applies if the recipient is a corporation owning 10% or more of the voting power of the distributing company.
(e) The lower rate applies to interest paid on deposits, commercial debts and borrowings from banking enterprises.
(f) The listed countries have ratified the Caribbean Community and Common Market (CARICOM) double tax treaty.
(g) The lower rate applies if the recipient is a company holding directly at least 10% of the capital of the distributing company.

(h) The lower rate applies if the recipient is a company holding directly or indirectly at least 25% of the capital of the distributing company.

(i) The 0% rate applies if the recipient is a company holding directly at least 50% of the capital of the distributing company. The 5% rate applies if the recipient is a company holding directly at least 25% of the capital of the distributing company.

Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) This is the standard rate of corporate income tax. Profits resulting from the provision of services mentioned in Section 130.1 of the Hydrocarbons Code and the provision of hydrocarbon transport services to companies operating within the framework of the related legislation, as well as banks, financial institutions (for example, insurance companies, including mutual insurance companies), telecommunication companies, car dealers, large commercial enterprises (rules applicable starting from 1 January 2020 to be reported in 2021 and future years) and franchisees of foreign brands and marks, are subject to corporate income tax at a rate of 35%. Handicraft, agricultural and fishing companies are subject to corporate income tax at a rate of 10%. Service companies in the hydrocarbons sector as well as sales and provision

of services whose use is intended for abroad are subject to corporate income tax at a rate of 15%. These measures apply to profits made from 1 January 2021, which will be declared during 2022 and subsequent years. Only companies subject to corporate income tax at a rate of 35% can benefit from the reduction of their corporate income tax rate to 20% for five years when their ordinary shares are admitted to listing on the Tunis Stock Exchange, provided that the rate of openness of capital to the public is at least equal to 30%, or on the alternative market, provided that the opening percentage of capital to informed investors is at least equal to 30%.

(b) Payments to beneficiaries resident in low-tax jurisdictions are subject to a 25% rate.

(c) This tax applies to payments to residents and nonresidents.

(d) The rate is 10% for interest paid on loans made by nonresident banks.

(e) This tax applies to payments to nonresidents. For further details, see Section B.

(f) The applicable rate depends on the nature of the beneficiary and service.

(g) Management fees paid to residents are subject to withholding tax at a rate of 0% if the amount does not exceed TND1,000 and if they do not represent fees. Management fees that do not represent fees in return for intellectual services and that are paid to residents are subject to withholding tax at the following rates:

- 0.5% if the profits of the payment recipient are subject to corporate income tax at a rate of 10%
- 1% if the profits of the payment recipient are subject to corporate income tax at a rate of 15%
- 1.5% if the profits of the payment recipient are subject to corporate income tax at the rate of 35%

If management fees paid to residents are related to fees in return of intellectual services, they are subject to withholding tax at a rate of 3%. Management fees paid to nonresidents are subject to withholding tax at a rate of 15%, subject to the provisions in double tax treaties.

(h) See Section B.

B. Taxes on corporate income and gains

Corporate income tax. Companies are subject to tax on profits derived from establishments located in Tunisia and on profits that are deemed to be derived in Tunisia under double tax treaties.

Tunisian-source income that is not realized within the framework of a Tunisian establishment, such as royalties, is subject only to final withholding taxes (see *Royalties*).

Tax rates. The new standard rate of corporate income tax that applies to income realized on or after 1 January 2021 is 15%.

Profits resulting from the provision of services mentioned in Section 130.1 of the Hydrocarbons Code and the provision of hydrocarbon transport services to companies operating within the framework of the related legislation, as well as banks, financial institutions (for example, insurance companies, including mutual insurance companies), telecommunication companies, car dealers, large commercial enterprises (rules applicable starting from 1 January 2020 to be reported in 2021 and following years), and franchisees of foreign brands and marks (for which the integration level is equal to or greater than 30%), are subject to corporate income tax at a rate of 35%.

The tax advantage relating to the reduction of corporate income tax for companies introduced to the Tunis Stock Exchange that are not subject to corporate income tax at a rate of 35% was removed by the 2021 Finance Act. Only companies subject to corporate income tax at a rate of 35% can benefit from the reduction of their corporate income tax rate to 20% for five years when their ordinary shares are admitted to listing on the Tunis Stock Exchange, provided that the rate of openness of capital to the

public is at least equal to 30%, or on the alternative market, provided that the opening percentage of capital to informed investors is at least equal to 30%. These measures apply to profits made from 1 January 2021, which will be declared in 2022 and subsequent years.

The following companies are subject to corporate income tax at a rate of 10%:
- Artisanal, fishing, agricultural and fisheries vessels equipment companies
- Purchasing offices for retail sales companies organized in the form of cooperatives
- Service cooperatives formed between producers for the wholesaling of their production
- Consumer cooperatives governed by the general statute of cooperation
- Commercial and industrial projects benefiting from the youth employment program or the national promotion fund for crafts and small trades

Based on the 2023 Finance Act, the following companies are subject to corporate income tax at a rate of 15% (instead of 10%):
- Private health and hospital companies
- Private education companies
- Vocational training and scientific research companies
- Private dorms companies

As of 2023, tax incentives granted to private health and hospital companies related to offering their services to nonresidents are eliminated.

As of 1 January 2021, all transitional regimes granting tax advantages for exports in terms of direct taxes are eliminated from the Tunisian tax system.

As of January 2022, the value-added tax (VAT) suspension regime for exporting service companies and international trade companies is eliminated. The VAT suspension regime no longer covers the following companies:
- Fully exporting service companies and fully exporting international trade companies
- Service companies and international trade companies whose turnover from exports or sales under tax suspension exceeds 50% of their total turnover
- Service companies and international trade companies that carry out import and local acquisition activities of materials, products and services necessary for the performance of export activities

Before the enactment of the 2022 Finance Act, sales and services and products in the local market by industrial fully exporting companies operating in Tunisia could not exceed 30% of the total turnover. However, the 2022 Finance Act increased this percentage to 50%, starting from 2022.

Under the 2023 Finance Act, wholly export-oriented manufacturing companies are allowed to sell on the local market 50% of the 2019 fiscal year export sales.

Service companies in the hydrocarbons sector as well as sales and provision of services whose use is intended for abroad are

subject to corporate income tax at a rate of 15%. These provisions apply to profits made from 1 January 2021, which will be declared during 2022 and subsequent years.

Under the 2021 Finance Law, the minimum corporate income tax due is 10% of the tax base for companies subject to corporate income tax at a rate of 15%, and 20% of the tax base for those subject to corporate income tax at a rate of 35%. These provisions apply to profits made from 1 January 2021, which will be declared during 2022 and subsequent years.

The rate of the advance due from fiscally transparent entities is reduced from 25% to 15% on the basis of the profits made for the preceding year. This rate is reduced to 10% for profits subject to corporate income tax at a rate lower than 15% at the level of associates and members of legal entities, as well as for profits accruing to associates and natural person members benefiting from the deduction of two-thirds of income in accordance with Personal and Corporate Income Tax Code (PCITC). These provisions apply to advances due from 1 January 2021.

Tax benefits, such as total or partial exemptions from some taxes and duties, may be granted to companies such as those established in Regional Development Areas or some companies incorporated during 2018, 2019 or 2020.

Under Article 38 of the 2020 Finance Act, a tax relief is granted to companies that proceed to list their shares on the TSE alternative market (regardless of the opening rate of their capital) and that are subject to the corporate tax rate not exceeding 25% for the first four years following the listing year. The following are the percentages of the tax relief:
- 100% for the first year following the initial public offering year
- 75% for the second year
- 50% for the third year
- 25% for the fourth year

The 2022 Finance Act extended the deadline for the benefit of the transitional measures provided by the investment law and the law on the recasting of tax benefits covering tax and financial benefits until 31 December 2023.

Financial relief for investments in green, blue, circular economy and sustainable development. Article 49 of the 2024 Finance Act extended the benefit of financial reinvestment to companies carrying out investments in the field of the green, blue and circular economy (as defined in common note No. 10/2024) and sustainable development within the meaning of the laws and regulations in force.

Subject to the provisions of Articles 12 and 12 bis of Law No. 89-114 of 30 December 1989 promulgating the Personal and Corporate Income Tax Code (PITCITC) (minimum tax) and within the limit of the income or profit subject to tax, income or profits reinvested from 1 January 2024 in the subscription to the initial capital or to the increase of capital companies making investments in the field of the green, blue and circular economy and sustainable development in accordance with the legislation and regulations in force are fully deductible. The tax advantage is

not granted to subscription operations intended for the acquisition of land.

Four-year exemption from corporate income tax and personal income tax for newly established companies in 2024 and 2025. Article 33 of the 2024 Finance Act provides a four-year exemption from corporate income tax and personal income tax to newly established companies that have received their investment declaration certificate from the relevant authorities during 2024 and 2025. The exemption applies to companies established during 2024 and 2025 and having received a certificate of investment declaration from the relevant sector-specific authorities during the same period. Companies not covered by this tax incentive are those operating in the financial sector, energy sectors (except renewable energies), mining, real estate development, on-site consumption, trade, and telecommunications operators.

The exemption from corporate income tax and personal income tax does not apply to the following:

- Companies created as part of transmission transactions (including, among others, the total sale of a company or a part of it constituting an independent and autonomous economic unit) or created following the cessation of activity or as a result of a change in the legal form of the existing company, to carry out the same activity related to the same product or service.
- Companies created by individuals who have been engaged in an activity similar to the activity of the new company and having the status of shareholders or directors or those having a first-degree family relationship (spouse or children) in another company engaged in an activity similar to the activity nature of the new company.

The four-year exemption period starts as of the date of effective start of business. The first year of exemption is counted from the date of effective start of business until 31 December of the same year.

For companies benefiting from regional development area tax incentives, the four years of exemption are counted from the date of the tax holiday period expiration as per domestic law for companies established in regional development areas.

The benefit of the exemption is subject to the following requirements:

- Maintaining books in accordance with the Tunisian generally accepted accounting principles (GAAP)
- Effective start of business within a period of two years as of the date of the investment declaration

Extension until 31 December 2025 of the deadlines to benefit from the transitional measures provided by the Law on Restructuring of Fiscal Incentives for physical and financial relief carried out under the auspices of the Tunisia Investment Incentive Code or the PITCITC. Article 38 of the 2024 Finance Act has extended until 31 December 2025, the following transitional measures provided by Paragraph 4 of Article 19 and Paragraphs 3 and 4 of Article 20 of the Law on Restructuring of Fiscal Incentives (LRDAF):

- Investment in tangible and intangible assets (Paragraph 4 of Article 19 of the LRDAF): Income and profits invested by eligible companies within the companies themselves, benefiting

from the tax incentives provided by the PITCITC, remain subject to the legislation in force before 1 April 2017, provided that the investments become effective no later than 31 December 2025.

- Financial relief under the Tunisia Investment Code (Code d'incitations aux investissements, or CII) (Paragraph 3 of Article 20 of the LRDAF): Investment in the capital companies that obtained a depositary certificate of investment declaration deposit before 1 April 2017, qualifying for tax incentives under the CII, remain subject to the provisions of that code, provided that the subscribed capital is paid-up no later than 31 December 2017, and the relevant investment becomes effective no later than 31 December 2025.
- Physical relief under the CII (Paragraph 4 of Article 20 of the LRDAF) Reinvestment operations of profits within the same company, qualifying for tax incentives under the CII and having received a depositary certificate of investment declaration deposit before 1 April 2017, remain subject to the provisions of that code, provided that the effective start date of the operation occurs no later than 31 December 2025.

Social Contribution of Solidarity. The 2018 Financial Act introduced a new Social Contribution of Solidarity (SCS) for the companies and enterprises subject to corporate income tax, as well as companies not subject to corporate income tax.

This contribution is imposed at a rate of 1% of the taxable income and profits. The amount due for companies not subject to corporate income tax is TND200.

The SCS applies to income and profits realized on or after 1 January 2018.

Under the 2023 Finance Act, the following SCS rates apply in 2023, 2024 and 2025:

- 4% for companies subject to corporate tax rate at 35% with a minimum SCS of TND500.
- 3% for companies subject to corporate tax rate at 20% and 15% with a minimum SCS of TND400.
- 3% for companies subject to corporate tax rate at 10% with a minimum SCS of TND200.
- No SCS rate for entities taking advantage of tax holidays or tax relief of 100% of operating income but a minimum SCS of TND400 is required.
- 3% for Tunisian banks and financial institutions, nonresident banks and financial institutions operating within the framework of the code of financial services provisions for nonresidents, and insurance and reinsurance companies, including mutual insurance companies, Takaful insurance and participants funds (a type of Islamic finance instrument), which are subject to a corporate tax rate at 35%.
- 2% for other persons subject to the 35% corporate tax rate. However, for large commercial areas (supermarkets or hypermarkets), the CSS increase applies to profits reported during 2021 and 2022.

New temporary contribution. Article 64 of the 2024 Finance Act has established a new temporary contribution for the benefit of

the state budget, applicable during 2024 and 2025. This optional tax applies to the following:

- Banks and financial institutions
- Insurance and reinsurance companies, including Takaful insurance and reinsurance companies, as well as the Members' Fund (a Members' Fund has no legal personality; its income is derived from the sum of contributions, which are sums paid by members by way of donations)

This temporary contribution is set at 4% of the profits used as the basis for calculating the corporate income tax, for which the declaration deadline falls within 2024 and 2025, with a minimum annual amount of TND10,000.

This temporary contribution must be paid within the same deadlines and according to the same procedures specified for the payment of corporate income tax.

This contribution is not deductible for corporate income tax purposes.

The control of this contribution, and the identification of infractions and related legal disputes are conducted in the same manner as for corporate income tax.

Capital gains. Capital gains are included in ordinary income and are taxed at the regular corporate income tax rate. For nonresident and non-established companies in Tunisia, capital gains derived from the sale of shares is subject to withholding tax at a rate of 15%, which is levied on the difference between the sales price and the acquisition price, reduced by the expenses incurred on the sale including the share premium. In all cases, the tax on capital gains may not exceed 5% of the selling price.

These provisions apply to withholding taxes payable from 1 January 2021.

As an option, a tax return on capital gains may be filed.

Withholding tax on income from movable capital. The 20% withholding tax on income from movable capital realized before 1 January 2022 is final and not subject to restitution, notwithstanding the tax regime of the beneficiary of the income. For purposes of this tax, income from movable capital includes, among others, certain types of interest income. The tax applies to resident and nonresident companies and individuals.

Starting from 1 January 2022, investment income, including income from movable capital, is subject to a flat rate withholding tax instead of the discharging withholding tax mechanism before 2022. A taxpayer must integrate the investment income generated in 2022 in the corporate or personal income tax base and deduct from the tax due on a consolidated basis that takes into account all the income generated and the deductions made.

If the deductions result in a credit, the taxpayer will not be able to claim the refund of the unused excess.

According to administrative doctrine, the 20% withholding tax, which applies to all income from movable capital, other than those made in foreign currency or convertible dinars, is not only final, but also nondeductible and nonrefundable.

Administration. The financial year is generally the calendar year.

Tax returns must be filed by the 25th day of the third month following the end of a company's financial year. Consequently, for companies using the calendar year as their financial year, tax returns are due by 25 March. For companies subject to mandatory audit, this return can be considered a temporary tax return and a definitive return must be submitted by 25 June.

Starting from the second year of their activities, companies must pay tax in three installments. Each installment is equal to 30% of the corporate income tax due for the preceding financial year. The installments are payable by companies during the first 28 days of the sixth, ninth and twelfth months following the end of the financial year. The balance of tax due must be paid when a tax bill (a document that specifies the amount of tax due and when the tax must be paid) is filed. Exceptionally, companies affected by the repercussions of the COVID-19 pandemic can file the declaration relating to the third installment due during 2020 and all declarations relating to the installment payments due during 2021 without payment. These companies can file during 2021 the annual tax return for 2020 without payment. Such tax must be paid by the end of May 2022. These companies may pay such tax without advance and according to a fixed payment schedule by order of the Minister responsible for finance during the period from 1 January 2022 until the end of May 2022.

Dividends. Dividends paid to resident and nonresident individuals and nonresident entities in Tunisia are subject to a 10% withholding tax subject to a preferential rate provided for by the double tax treaty concluded between Tunisia and the country of residence of the beneficiary of the dividends.

Profits realized in Tunisia by Tunisian establishments of foreign companies are assumed to be distributed for the benefit of the partners not resident in Tunisia and are accordingly subject to a 10% withholding tax for distributions subject to a preferential rate provided for by the double tax treaty concluded between Tunisia and the country of residence of the beneficiary of the profits. This withholding tax is imposed at a rate of 25% if the establishments have their head offices in low-tax jurisdictions.

Royalties. Subject to the provisions of double tax treaties, a 15% withholding tax is imposed on royalties paid to nonresidents. This tax applies to the following types of payments:

- Copyright royalties
- Payments for the use of, or the right to use, patents, trademarks, designs, models, plans, formulas, manufacturing processes and movies, including proceeds received from sales of such items
- Payments for the use of, or the right to use, industrial, commercial, agricultural, harbor or scientific equipment, except for amounts paid to charter a plane or vessel for international operations
- Payments for information concerning industrial, commercial or scientific experience
- Payments for technical or economic studies or for technical assistance

Foreign tax relief. Tunisia does not grant any relief for foreign taxes.

C. Determination of trading income

General. Taxable income is based on financial statements prepared in accordance with generally accepted accounting principles (GAAP), subject to certain adjustments.

Business expenses are generally deductible unless specifically disallowed by the tax law. Expenses that are deductible include, but are not limited to, the following:

- All types of expenses relating to production or the operation of a business, such as salaries and wages, and raw materials.
- Tax depreciation (see *Tax depreciation*).
- Attendance fees paid to members of the board of directors or the supervisory board.
- Interest paid to shareholders on loans if the amount of the loan does not exceed 50% of authorized capital, if the interest rate does not exceed 8% and if the share capital is fully paid up.
- Donations and subsidies paid to charities and organizations established for the public good that are engaged in philanthropic, educational, scientific, social or cultural activities, up to a maximum deduction of 0.2% of gross turnover.
- Research and development (R&D) expenses incurred within the framework of agreements concluded for this purpose with public scientific research establishments or public higher education and research establishments on the condition that the participation of companies in the total expenses is not lower than 10%. They are deductible at a rate of 50% and within a limit of TND400,000 as per the green, blue and circular economy and sustainable development in accordance with Article 27 of the 2023 Finance Act.
- Innovation expenses deductible at a rate of 50% and within a limit of TND400,000 per year in accordance with Article 27 of the 2023 Finance Act. The application term will be provided by means of a decree.
- Amounts paid to social funds established for employees in accordance with the law.
- Gifts and meal expenses, up to a maximum deduction of the lower of 1% of annual gross income or TND20,000.
- Sponsorships allocated to the incorporation and the maintenance of green spaces as well as family and rural parks, within the framework of conventions concluded to this effect with the ministry in charge of the environment or the ministry in charge of infrastructure and housing, are deductible in determining the base subject to corporate income tax, up to the threshold of TND150,000 per year.

Expenses that are not deductible include, but are not limited to, the following:

- Fines, forfeitures and penalties of any kind, as well as transactions designed to avoid the application of higher penalties
- Charges on passenger cars of more than nine horsepower
- Expenses related to aircraft, pleasure craft and second homes
- Expenses amounting to over TND5,000 that are paid in cash
- Charges invoiced by persons established in low-tax jurisdictions

Under the 2023 Finance Act, tax measures governing the revaluation of assets with the local GAAP are aligned through the following actions:

- Assets revaluation measures in compliance with Tunisian Accounting Standard No. 5 are adopted as an accepted method.
- Tax incentives related to assets revaluation are granted within the limit of revaluated amount based on revaluation indexes provided by Decrees 2019-971 (28 October 2019) and 2022-297 (28 March 2022).
- To benefit from such tax incentives, the manufacturing entities should not proceed to dispose any of the revalued assets for at least five years as of 1 January of the year subsequent to the revaluation year.

Deduction of amounts invested in share issue premium for corporate income tax calculation purposes. According to Article 37 of the 2024 Finance Act, the share issue premium is part of invested amounts that give right to the deduction for corporate income tax calculation purposes when subscribing to the increase in the capital of companies, under the same limits and conditions.

This benefit is subject to the following conditions:
- The non-use of the share issue premium for a period of five years from 1 January of the year following its release, except for its use for financing the related investment operation or absorbing losses
- The presentation in support of the annual tax return of a copy of the decision of the extraordinary general meeting approving the capital increase operation, including the value of the share issue premium

Consequently, the conditions related to the benefit of the deduction of financial investments for corporate income tax purposes are maintained.

According to Article 37 of the 2024 Finance Act, the aforementioned provisions apply to the deduction of financial investments for income or profits made starting from 1 January 2024.

Inventories. Inventories are valued at cost.

Provisions. Doubtful debts of up to TND100 (TND500 for banks) per debtor are deductible if they were due at least one year prior to the date on which they were written off and if the company has had no further business relationship with the debtor.

The following provisions are deductible, up to a maximum deduction of 50% of taxable income:
- Reserves for doubtful debts for which recovery is being pursued in the courts
- Provisions for finished goods
- Provisions for depreciation of shares of listed companies

Banks may deduct bad debt provisions from their tax base without any limit. This deduction can result in a tax loss.

Tax depreciation. Under the Tunisian Tax Code, depreciation must be computed using the straight-line method. Depreciation is deductible only if it is recorded in the accounts.

Standard depreciation rates allowed in Tunisia include, but are not limited to, the following.

Asset	Rate (%)
Patents and trademarks	20
Capitalized R&D costs	20
Buildings	5
Office furniture and equipment	20
Equipment and machinery	15
Cars	20
Movable equipment	10/20
Engines	15/20/33.33
Ships	6.25
Computer hardware and software	33.33

For equipment other than transportation equipment, the depreciation rates may be increased by 50% if the equipment is used at least 16 hours a day and may be doubled if it is used 24 hours a day.

The costs of setting up a business may be amortized at a rate of 33% if the costs are very high. Otherwise, 100% of the costs may be deducted in the year of expenditure. Assets worth less than TND200 are fully deductible in the year of acquisition.

The following types of depreciation are not deductible:
- Depreciation of assets exceeding an amount of TND5,000 that are acquired for cash
- Depreciation of aircraft, pleasure craft and second homes
- Depreciation of land and ongoing businesses
- Depreciation that exceeds the maximum allowed rates
- Depreciations of passenger cars with more than nine horsepower
- Depreciation of assets acquired from persons established in low-tax jurisdictions

Additional amortization at a rate of 30% applicable to assets in alternative and renewable energies. Article 48 of the 2024 Finance Act grants the deductibility for corporate income tax purposes of an additional amortization of 30% of the gross value of the equipment and machinery dedicated to alternative or renewable energies production, acquired or manufactured, during the first year from the date of acquisition, manufacturing or start of use.

The benefit of the deduction is subject to the submission, in support of the annual tax return for the year of the deduction, of a certificate issued by the competent bodies under the ministry responsible for energy that proves the category of such equipment and materials.

The new additional deduction is not cumulative with the additional deduction at a rate of 30% granted by Paragraph VIII of Article 12 bis of the PITCITC (machinery and equipment acquired or manufactured as part of expansion or renewal operations within the scope of Article 3 of the Investment Law, when it concerns the same equipment or materials).

As in the case of the additional depreciation referred to in Paragraph VIII of Article 12 bis of the PITCITC, fixed assets that have benefited from the additional deduction at a rate of 30% are not eligible for legal revaluation.

The following are significant aspects of the additional tax amortization of 30% provided by the 2024 Finance Act:

- It applies to all companies, including those operating in the financial sector, energy sectors (except renewable energies), mining, real estate development, on-site consumption, trade and telecommunications.
- It is not subject to the realization of an investment operation within the scope of the Investment Law. The 2024 Finance Act only requires the "submission, in support of the annual tax return for the year of the deduction of a certificate issued by the competent bodies under the Ministry responsible for energy proving the category of the said equipment and materials." It must be the National Energy Management Agency, which, under Article 17 of Law No. 2004-72 of 2 August 2004 on energy management, is responsible for "granting certificates for equipment, materials and products contributing to the rational use of energy or related to renewable energies, in order to benefit from the advantages provided by current legislation and regulations."
- It does not require a minimum of an equity financing (that is, investment entirely funded by debt gives right to the new benefit).

Relief for losses. Losses may be carried forward five years, but may not be carried back. However, losses related to depreciation may be carried forward indefinitely.

Groups of companies. Tunisian law provides for the fiscal integration of related parties equivalent to a consolidated filing position if certain conditions are satisfied.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax, on all transactions carried on in Tunisia, including imports	
Normal rate	19%
Other rates	7%/13%
Local tax (TCL); imposed on local turnover and exportations	
Local turnover	0.2%
Professional training tax, on salaries, allowances and fringe benefits paid by an employer	1%/2%
Housing tax (FOPROLOS); on salaries, allowances and fringe benefits paid by employers	1%
Social security contributions, on employee's annual salary; paid by	
Employer	16.57%
Employee	9.18%
Registration duties	
Work contracts	TND30 per contract
Business contracts	0.5% of the contract value
Company formation	Constitution acts of companies or GIEs (a GIE is a type of tax-transparent entity) are subject to a mandatory registration duty of TND150

E. Miscellaneous matters

Foreign-exchange controls. For companies wholly or partially owned by nonresidents, the remittance of benefits, dividends, attendance fees and interest payments to nonresidents is guaranteed. Tunisian branches of foreign companies may freely remit their after-tax profits. Remittances must be made through a registered intermediary, which is generally a bank. Tunisian banks may obtain foreign loans not exceeding TND10 million a year. Tunisian companies other than banks may obtain foreign loans up to TND3 million per year.

Transfer pricing. The 2019 Finance Act established new rules for the determination of transfer prices and a new definition of entities' dependency and control.

For the purpose of determining the tax due by resident or established enterprises in Tunisia that are dependent on or control other enterprises belonging to the same group, the profits indirectly transferred to such enterprises either by raising or lowering the prices of transactions, or by any other means, are incorporated into the results of these enterprises.

Indirectly transferred profits are determined by comparison with those that would have been realized in the absence of any arm's-length or control relationship. The condition of dependence or control referred to above is not required if the transfer of profits is made with enterprises resident or established in a state or territory whose tax system is privileged.

Dependency or control relationships are deemed to exist between companies if either of the following circumstances exists:

- One company directly or indirectly holds more than 50% of the share capital or voting rights of another enterprise or exercises the decision-making power of such enterprise.
- Companies are subject to the control of the same undertaking or the same person under the conditions mentioned in the first bullet above.

In addition, Article 30 of the 2019 Finance Act, as amended by the 2021 Finance Act, provides that companies resident or established in Tunisia that are controlled by other companies or that control other companies under Article 48 Septies of the PCITC and whose gross annual sales exclusive of any turnover taxes is equal to or greater than TND200 million are required to submit an annual transfer-pricing declaration within the time frame for filing the annual corporate income tax return by using reliable electronic means according to a model established by the administration. In addition, these entities must present to the tax authorities the transfer-pricing documentation when requested during a comprehensive tax audit. Under the 2021 Finance Act, only cross-border controlled transactions of which the amount exceeds TND100,000 must be reported within the annual Transfer Pricing Declaration and have to be covered by the transfer-pricing documentation.

The amendment affecting Article 48 Septies of the PCITC as well as the obligation to document transfer pricing applies to fiscal years beginning on or after 1 January 2020, provided that the requirements are the subject of a notice on or after 1 January

2021. The amendment concerning the transfer-pricing annual return applies to fiscal years beginning on or after 1 January 2020 (the first declaration must be filed in 2021).

Country-by-country reporting. Companies that are established in Tunisia and that fulfill all of the conditions fixed by the law are required to file within 12 months after the year-end date by any reliable electronic means, a Country-by-Country Report, based on a model established by the tax administration. The country-by-country declaration is subject to reciprocity through the automatic exchange with the states that have concluded an agreement with Tunisia for this purpose. These provisions are effective for financial years beginning after 1 January 2020.

E-commerce. Under the 2020 Finance Act, companies nonresident in Tunisia selling information technology solutions and internet-based services are subject to a royalty of 3% of the turnover earned from resident individuals and corporate entities. These nonresident companies must file a report regarding their abovementioned turnover on a quarterly basis. Reporting and payment procedures will be established by a governmental decree.

(a) The rate is 10% if the recipient is a company that holds at least 25% of the capital of the payer.

(b) Tunisia applies a 15% rate instead of the highest rate.

(c) Dividends are taxed at the domestic rate of the country from which the dividends originate.

(d) The rate is 5% if the beneficial owner of the dividends is a company that holds directly at least 50% of the capital of the payer.

(e) The rate is 15% if the recipient is a company that owns at least 25% of the capital of the payer.

(f) The rate is 12% if the recipient is a company that owns at least 25% of the capital of the payer.

(g) The rate is 12% if the beneficial owner is a company that controls directly at least 25% of the voting power of the payer.

(h) The rate is 14% if the recipient is a company that owns at least 25% of the capital of the payer.

(i) Taxed at the domestic rate of the country of domicile of the recipient.

(j) The 10% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties paid for the use of or right to use the following:
- Technical and economic studies
- Cinematographic and television films
- Patents, trademarks, designs and models, plans, and secret formulas and processes
- Industrial, commercial and scientific equipment
- Information concerning agricultural, industrial, commercial or scientific experience

(k) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works. The 15% rate applies to royalties or other amounts paid for the use of or right to use the following:
- Patents, designs and models, plans, and secret formulas and processes
- Information relating to industrial, commercial or scientific experience
- Technical and economic studies
- Technical assistance relating to the use of the items mentioned above

The 20% rate applies to royalties or other amounts paid for the use of or right to use trademarks, cinematographic and television films, and agricultural, industrial, harbor, commercial or scientific equipment.

(l) The 20% rate applies to royalties paid for the use of or right to use trademarks, cinematographic and television films or videotapes for television, and industrial, harbor, commercial or scientific equipment. The 15% rate applies to other royalties.

(m) The 0% rate applies to amounts paid to a public body of the other contracting state for the use of cinematographic films or radio and television broadcasts. The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the use of the following:
- Patents, designs and models, plans, and secret formulas and processes
- Information relating to industrial, commercial or scientific experience
- Technical and economic studies

The 20% rate applies to royalties or other amounts paid for the use of or right to use trademarks, cinematographic and television films, and agricultural, industrial, harbor, commercial or scientific equipment.

(n) The 10% rate applies to royalties or other amounts paid for the use of or right to use the following:
- Copyrights of literary, scientific or artistic works, but not including cinematographic and television films
- Information concerning agricultural, industrial, commercial or scientific experience
- Economic and technical studies

The 15% rate applies to royalties paid to use patents, trademarks, designs and models, plans, secret formulas and processes, and cinematographic and television films.

(o) The 5% rate applies to royalties relating to literary, scientific or artistic works. The 16% rate applies to royalties relating to trademarks, cinematographic and television films, or industrial, commercial or scientific equipment. The 12% rate applies to other royalties.

(p) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the use of patents, designs and models, plans, and secret formulas and processes; information relating to industrial, commercial or scientific experience; or technical or economic studies. The 20% rate applies to royalties or other amounts paid for the use of or the right to use trademarks; cinematographic and television films; and agricultural, industrial, harbor, commercial or scientific equipment.

(q) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, not including motion picture and television films. The 15% rate applies to other royalties.

(r) The 10% rate applies to royalties paid for the use of or the right to use industrial, commercial or scientific equipment, or to remuneration for the performance of accessory technical assistance for the use of property or rights described above, to the extent such technical assistance is performed in the contracting state where the payment for the property or right has its source. The 15% rate applies to royalties or other amounts paid for the use of or right to use copyrights of literary, artistic and scientific works, including cinematographic and television films and videotapes used in television broadcasts; patents, trademarks, designs and models, plans, and secret formulas and processes; and information relating to industrial, commercial or scientific experience.

(s) The 10% rate applies if the beneficial owner of the interest is a bank or other financial institution. The 12% rate applies to other interest.

(t) Under Tunisian domestic law, dividends are not subject to tax. Consequently, withholding tax is not imposed on dividends paid from Tunisia to other countries.

(u) A 10% rate applies to interest paid to banks.

(v) The rate is 0% if the beneficiary of the dividends owns at least 10% of the payer.

(w) For further details, see Section B.

(x) Interest is taxed at the domestic rate of the country from which the interest originates.

(y) Royalties are taxed at the domestic rate of the country from which the royalties originate.

(z) The 5% rate applies to interest paid to banks.

(aa) The 5% rate applies to payments for technical and economic studies as well as for technical assistance.

(bb) The 10% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer.

(cc) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, scientific or artistic works including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the following:
- The use of patents, designs and models, plans, and secret formulas and processes
- Information relating to industrial, commercial or scientific experience
- Technical or economic studies
- Technical assistance
- The use of, or the right to use, trademarks and industrial, commercial or scientific equipment

(dd) Dividends are exempt from tax if the beneficial owner of the dividends is a company that holds at least 25% of the capital of the payer.

(ee) The 10% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer.

(ff) This rate is 25% if the beneficiary is resident in a jurisdiction listed as a low-tax jurisdiction in the Ruling of the Minister of Finance dated 25 March 2019. Persons are resident or established in a low-tax jurisdiction or state if the tax due in that state or jurisdiction is less than 50% of the personal income tax or corporate income tax due in Tunisia for the same activity. The following are categories of low-tax states or jurisdictions:
- States or jurisdictions in which the corporate income tax rate is less than 5% for activities subject to tax at the rate of 10% in Tunisia
- States or jurisdictions in which the corporate income tax rate is 12.5% for activities subject to tax at a rate of 25% in Tunisia
- States or jurisdictions in which the rate is 17.5% for activities subject to tax at a rate of 35% in Tunisia

The Ruling of the Minister of Finance dated 25 March 2019 provides listings of the states or jurisdictions falling into the above categories.

(gg) The 5% rate applies if the beneficial owner of the interest is a bank or other financial institution. The 10% rate applies to other interest.

(hh) The 5% rate applies to payments for technical assistance.

(a) The rates in the table are for illustrative purposes only. For detailed information, please contact EY in Türkiye.

(b) The 15% rate applies to payments made for online advertising services performed by nonresident entities or individual service providers and to payments made to resident and nonresident entities and individuals who intermediate the provision of such services. The 0% rate applies to payments made to resident entity service providers or resident entities that intermediate the provision of such services. The local withholding tax rate of 20% applies to income generated by nonresidents from professional services other than petroleum exploration activities.

B. Taxes on corporate income and gains

Corporate income tax. Companies whose legal or business headquarters (as stated in their articles of association) are located in Türkiye or whose operations are centered and managed in Türkiye are subject to corporation tax on their worldwide income. In Turkish tax legislation, they are described as full liability taxpayers; they are also known as resident companies.

Taxable income of limited liability taxpayers (nonresident companies or taxpayers other than full liability taxpayers) is comprised of the following:

- Professional fees obtained in Türkiye
- Profits from commercial, agricultural and industrial enterprises in Türkiye (if they have an establishment or a permanent representative in Türkiye)

- Income arising from rental of real estate, rights and movable property in Türkiye
- Income obtained in Türkiye from various types of securities
- Other income and revenue obtained in Türkiye

Rates of corporate tax. The effective corporate tax rate is 25% for the 2024 tax year. However, incentive programs provide for reduced corporate tax rates for income from the investments supported (see *Tax incentives*).

The corporate tax rate was increased to 30% for banks and companies established under Law No 6361, which are payment and electronic money institutions, authorized foreign-exchange institutions, asset management companies, capital market institutions, insurance and reinsurance companies and pension companies. The new rate applies to their corporate earnings of 2023 and the following tax periods.

Article 35 of Law No. 7256, published in the *Official Gazette* dated 17 November 2020, provides that the corporate tax rate will be applied with a two-point discount on the corporation income in five accounting periods for companies with shares offered to the public (except for example, banks, financial leasing companies, factoring companies, financing companies, payment and e-money institutions, insurance and reassurance companies, asset management companies and pension companies) at a rate of at least 20% on the Istanbul Stock Exchange to be traded for the first time, starting from the accounting period when their shares are offered to the public for the first time.

Article 15 of Law No. 7351, published in the *Official Gazette* dated 22 January 2022, provides that the corporate tax rate will be applied with a one-point discount for earnings that are generated exclusively from exports and for income obtained from the production activities of the companies that have the industrial registration certificate and are actually engaged in production activities. Furthermore, Article 21 of Law No. 7456, published in the *Official Gazette* dated 15 July 2023, provides that the corporate tax discount rate applied to the profits of exporters arising exclusively from exports is increased from one point to five points. Considering the current corporate tax rate (25%), a 20% corporate tax applies to profits generated from exports. Article 62 of Law No. 7491, published in the Official Gazette dated 27 December 2023, provides that the five-point discount will be also applied to earnings obtained by manufacturers or suppliers from export activities carried out through foreign trade capital companies or sectoral foreign trade companies based on intermediary export contracts. This five-point discount is applicable for the income generated as of 1 January 2023.

Digital Services Tax. The Digital Services Tax (DST) is levied at a rate of 7.5% as an indirect tax on in-scope revenues generated in Türkiye from the provision of certain digital services. It applies only to companies with global in-scope revenues of at least EUR750 million and with revenues of at least TRY20 million in Türkiye from in-scope services.

The DST applies to revenues generated from the following categories of services in Türkiye:

- All types of digital advertising services, including services such as advertisement control and performance measurement services, services relating to data transmission and user management (that is, the sale of user data), and technical services relating to the display of advertisements
- The sale of audio, visual or digital content in digital format, as well as services provided in digital format for listening, viewing, playing or recording digital content or using such content in digital format (including computer programs, applications, music, video, games and in-game applications)
- Digital intermediary activities that allow users to interact with other users, including digital intermediary activities that can facilitate the sale of goods and services between users
- Intermediary services provided in a digital environment for the above categories of services

DST applies only to companies with global in-scope revenues exceeding EUR750 million and with revenues exceeding TRY20 million in Türkiye from in-scope services. Both conditions must be met for a company to be subject to the tax. If a digital service provider meets both thresholds, it will become liable for the DST as of the fourth month following the month in which the thresholds are met. The law authorizes the president of Türkiye to reduce the revenue thresholds to as little as zero or to increase them to up to triple the specified levels.

Taxpayers and those responsible for tax declarations must submit a DST return to the relevant tax office by the end of the month following the tax period and pay the tax by the same deadline.

Tax incentives. Incentive regulations provide for a wide range of incentive and support elements for certain investments with incentive certificates, including reduced corporate tax rates, government support for interest on loans, government support for employees' and employers' shares of social security premiums, government support for income tax for wages, value-added tax (VAT) and customs duty exemptions, VAT refund support and allocation of treasury-owned lots.

The incentive and support elements vary according to the type, sector, subject, size and place of the investment.

Fifty percent of the following types of income with respect to inventions resulting from research, development, innovation and software development activities performed in Türkiye are exempt from corporate tax under certain conditions:

- Income derived from leasing.
- Income derived from transfers or sales.
- Income derived from marketing through mass production in Türkiye. Based on the Communiqué for the incentive, this refers to the sales of an item that is mass produced in Türkiye and that has a license or beneficial model certificate. The Turkish Patent Institute grants a license under an examination system. It grants a beneficial model certificate as a result of a research report.
- Income pertaining to a license or beneficial model certificate for an invention that is included in the income obtained from the

sale of the products produced in Türkiye through the use of this invention in the production process.

In addition, the leasing, transfer and sale of intangible assets pertaining to a license or beneficial model certificate for an invention is exempt from VAT if the invention is produced as a result of research and development (R&D/design), innovation and software activities.

For the assessment of the corporate tax base, taxpayers can deduct 50% of the interest amount calculated over the capital increases in cash in capital companies and the part of the capital covered by cash in newly incorporated companies (this deduction does not apply to entities operating in the finance, banking and insurance industries as well as to state economic enterprises). For the discount application regarding the cash capital increase, the discount rate will be 75% instead of 50% for the portion of the capital increase covered by cash brought from abroad.

The following is the calculation of the deduction:
Deduction = Increased capital cash amount x Central Bank of the Republic of Türkiye interest rate x Period (Months) x Discount rate

For purposes of the above calculation, the Central Bank of the Republic of Türkiye interest rate equals the latest weighted annual average interest rate applicable to commercial loans extended by banks in Turkish lira announced by the Central Bank of the Republic of Türkiye for the year of deduction. "Period (Months)" refers to the period from the capital increase to the last day of the financial year.

Under Article 49 of Law No. 7417, the duration of benefiting from the discount application is limited to five years. Accordingly, this reduction will be used separately for the accounting period in which the decision regarding the capital increase or the articles of association was registered at the initial establishment stage and for the four accounting periods following this period.

For in-cash capital increases made before the publication date of the law, this discount will be applied for five accounting periods, including the 2022 accounting period.

Incentives for R&D/design centers and Technology Development Zones. Special incentives apply to R&D/design centers and Technology Development Zones (TDZs). Broadly, these incentives fall into the following categories:

- Corporate income tax advantage for R&D/design centers (Law No. 5746)
- Corporate income tax advantages for TDZs (Law No. 4691)
- Payroll incentives for R&D/design or software personnel (Law Nos. 5746 and 4691)
- Social security premium support
- Stamp duty exemption
- Other tax exemptions for R&D/design centers and TDZs (Law Nos. 5746 and 4691)
- Non-refundable cash grants for R&D and innovation projects

For further information regarding the above incentives, please contact EY in Türkiye.

Participation exemption

Dividend income derived from Turkish (resident) participations. Turkish tax law provides a participation exemption for dividends derived by companies from Turkish (resident) participations. Dividends qualifying for the participation exemption are fully exempt from corporate tax.

To qualify for the participation exemption, a Turkish resident company need only hold a participation in another Turkish resident company.

Dividend income derived from foreign (nonresident) participations. The Turkish tax law also provides a participation exemption for dividends derived by companies from foreign participations. Dividends qualifying for the participation exemption are fully exempt from corporate tax.

To qualify for the participation exemption for dividends derived from foreign participations, all of the following conditions must be satisfied:

- The Turkish company must have owned at least 10% of the paid-in capital of the foreign company for an uninterrupted period of at least one year as of the date of receiving the dividend.
- The foreign company must be a limited or joint stock company.
- The foreign company must be subject to corporate tax at an effective rate of at least 15% (for corporations whose principal activity is the procurement of finance, including financial leasing, insurance or investment in marketable securities, the rate must be at least the rate of corporation tax in Türkiye, which is 30%).
- The dividends must be transferred to Türkiye by the due date of filing of the annual corporate tax return (30 April).

Without regard to the conditions mentioned above, a 50% tax exemption for dividend income derived from foreign participations is applied for the income and gains obtained as of 1 January 2023 if the following two conditions are met:

- At least 50% of the paid-in capital of the foreign company is held.
- The dividends are transferred to Türkiye by the deadline for submitting corporate tax return for the calendar year in which the dividends are obtained.

The effective corporate tax is determined in accordance with the following formula:

$$\text{Effective corporate tax rate} = \frac{\text{Corporate tax}}{\text{Distributable corporate income + corporate tax}}$$

Special participation exemption rules apply to companies established in foreign countries whose principal purpose is construction, repair, assembly and technical services. If, under the laws of a foreign country, the establishment of a corporation is necessary to undertake these activities, dividends repatriated by the foreign subsidiary to the Turkish parent company qualify for the participation exemption, regardless of whether the conditions described above for the participation exemption are satisfied.

The participation exemption also applies to income derived from permanent establishments (PEs) and permanent representatives resident abroad if the following conditions are met:

- The PE or permanent representative is subject to corporate tax at an effective rate of at least 15% in the country where the PE or permanent representative is located. For PEs whose principal activities are the procurement of finance, including financial leasing, or investment in marketable securities and insurance, the rate must be at least the rate of corporation tax in Türkiye, which is 30%.
- Income derived from foreign PEs must be transferred to Türkiye by the due date of filing of the annual corporate tax return (30 April).

A participation exemption also applies to capital gains. For details, see *General* in Section C.

Exchange gain and interest income exemption. Under Law No. 7352, which was published in the *Official Gazette* on 29 January 2022, Türkiye introduced a corporation tax exemption on interest, participation income and other earnings derived at the time of maturity, including the income derived from year-end revaluations, from the foreign-exchange-protected deposits and participation accounts that were opened by converting the foreign currencies into Turkish lira. The exemption covers the foreign-currency deposit accounts available on the Turkish companies' balance sheets of the 2023 tax period.

Inflation adjustment. The profit or loss difference calculated in financial statements dated 31 December 2023 due to the inflation adjustment should be shown in the accounts of the previous years' profits or previous years' losses. Such profit or loss should not be associated with the 2023 accounting period's taxable income. However, profits and losses arising from the inflation adjustment to be made if certain conditions are met in 2024 will directly affect the profit and loss for the year.

International holding companies. A special regime applies to international holding companies.

International holding companies may benefit from the participation exemption with respect to dividends derived from foreign participations if they satisfy the conditions applicable to other entities (see *Participation exemption*). They also may benefit from the participation exemption with respect to capital gains, but different conditions apply. Turkish international holding companies benefit from the participation exemption with respect to capital gains if foreign participations account for at least 75% of the noncash assets of the international holding company and if the international holding company has held a shareholding of 10% or more in the foreign limited or joint stock company for at least two years.

Dividends distributed by international holding companies to nonresident companies out of profits derived from their foreign participations are subject to a withholding tax rate equal to one-half of the general withholding tax rate on dividends. As a result, the withholding tax rate is 5%.

Capital gains. Capital gains derived by all companies, including branches of foreign companies, are included in ordinary income

and are subject to corporation tax. Capital gains are generally computed by subtracting the cost of the asset, including the related expenses paid by the seller, from the selling price.

Capital gains derived from sales of depreciable fixed assets are not taxable to the extent the gains are reinvested in new fixed assets. However, the amount of gains used to acquire new assets is subtracted from the depreciable cost of the new asset. Capital gains that will be used for reinvestment are transferred to a special reserve account. If the special reserve is not used to finance the purchase of similar new assets in the following three years, the balance in the reserve is included in taxable income.

Capital gains derived from sales of resident companies' shares by nonresident companies without a permanent establishment in Türkiye are subject to corporation tax. In computing these gains, changes in exchange rates are not taken into account.

Seventy-five percent of capital gains derived by corporate taxpayers from the disposal of shares owned for at least two years qualify for corporate tax exemption if the gains for which exemption is claimed are recorded as a special fund under the shareholder's equity account in the balance sheet until the end of the fifth year following the year of sale.

Administration. Companies file tax returns based on their financial accounting year.

Tax returns must be submitted to the relevant tax office by the last day of the 4th month after the end of the accounting period. The return must be accompanied by the balance sheet, income statement and other required documents.

Corporation tax due must be paid by the end of the fourth month following the end of the accounting period.

Companies must make quarterly payments of advance corporation tax during the tax year. As of 1 January 2022, the advance corporation tax period is reduced to nine months, so companies will not declare advance corporation tax return for the fourth quarter.

If advance corporation tax exceeds the final tax payable, the excess amount can be offset against the company's other tax liabilities or it can be refunded.

Dividends. Dividends received by resident companies from other resident companies are not subject to corporation tax.

Dividends received from foreign companies are included in taxable income. However, certain dividends received from foreign companies may qualify for exemption from corporation tax under the participation exemption or the international holding regime (see *Participation exemption* and *International holding companies*).

Withholding tax at a rate of 10% is imposed on dividends paid by resident corporations to the following recipients:

- Resident individuals
- Resident recipients who are not subject to corporation tax and income tax, or are exempt from such taxes
- Nonresident individuals
- Nonresident corporations (excluding those receiving dividends through a PE or permanent representative in Türkiye)

- Nonresident recipients who are exempt from corporation tax and income tax

A branch remittance tax is imposed at a rate of 10% on profits remitted by nonresident corporations that have a PE or permanent representative in Türkiye to their headquarters.

Foreign tax relief. Corporation tax and similar taxes paid abroad on income that is derived abroad and that is included in the Turkish accounts may be offset against the corporation tax that is assessed on such income in Türkiye.

In cases in which the controlled foreign company (CFC) rules are applied, the taxes similar to income and corporation taxes that the foreign affiliate has paid can be set off against the corporation tax that is calculated on the basis of the earnings of the foreign company.

Resident companies that have a direct or indirect participation in shares or voting rights of 25% or more in foreign subsidiaries can claim a tax credit for the corporate or income tax paid by foreign subsidiaries in their jurisdictions on profits out of which dividend distributions were paid to the resident companies. The credit is limited to the tax in Türkiye that is attributable to the dividend distributions. As a result, the credit applies only to dividends that do not qualify for the participation exemption.

Amounts that are set off against the taxes that are assessed in Türkiye on the income derived from the foreign countries may not exceed the tax amount that would be calculated by applying the local corporation tax rate (25%) to such earnings.

Foreign taxes that cannot be offset against the corporate tax in Türkiye because of insufficient corporate income may be carried forward for a period of three years. The tax credit can also be offset against advance tax payments.

C. Determination of trading income

General. The corporate tax base is determined by deducting expenses from the revenue of an enterprise. However, the following items are exempt from corporation tax:

- Revenue derived by corporations, including nonresident companies, from participations in the capital of other corporations that are subject to full corporate taxation, excluding shares of profits from some participation certificates of investment funds and stocks in investment partnerships (whose portfolio includes foreign currency or gold or other precious metals or marketable securities with the underlying assets)
- Dividends received from shares of venture capital investment trusts and venture capital investment funds, income derived from returning these participation certificates to the fund and earnings generated as a result of the valuation of these participation certificates
- Dividends received from Turkish lira investment funds purchased before 15 July 2023, income derived from returning these participation certificates to the fund and the earnings generated as a result of the valuation of these participation certificates
- Proceeds derived by corporations from the sale of their preferred shares, and profits derived by joint stock companies from

the sale of their shares at the time of the establishment of the company and from the sale of their shares at a price exceeding the par value of the shares when they are increasing their capital
- Seventy-five percent of profits derived from disposals of shares, preferred shares, preemptive rights and bonus shares, and 25% of the profits derived from sales of real estate purchased before 15 July 2023 and owned for at least two years, if the profits are placed in a reserve account and not distributed for five years

Corporation tax exemptions are available under the participation exemption and the international holding regime (see Section B). In addition, the following corporate tax exemptions apply to Turkish and foreign investment funds and companies:
- Profits derived by mutual funds (excluding foreign-exchange funds) and trusts from transactions involving their operating portfolio
- Profits derived by risk capital investment funds or companies from transactions involving their operating portfolio
- Profits derived by real estate investment funds or companies from transactions involving their operating portfolio
- Profits derived by designated private pension investment funds

All business-related expenses are deductible, with the following exceptions:
- Interest on shareholders' equity or on advances from shareholders.
- Reserves set aside from profits (except technical reserves of insurance companies and doubtful debts from debtors against whom legal proceedings have been instituted).
- Corporation tax and all monetary and tax penalties and interest imposed on such tax.
- Discounts or other losses arising from selling the corporation's own securities for less than par value.
- For nonresident companies, commissions, interest and other charges paid to headquarters or other offices outside Türkiye on purchases or sales made on their behalf, as well as allocated charges to contribute to losses or expenses of headquarters or branches outside Türkiye. However, charges are deductible if they are made in accordance with allocations keys that are in compliance with the arm's-length principle and if they are related to the generation and maintenance of business income in Türkiye.
- Interest, foreign-exchange differences or comparable expenses that are calculated or paid on disguised capital (see *Debt-to-equity rules* in Section E).
- Disguised profit distribution through improper transfer pricing (see *Transfer pricing* in Section E).

For enterprises (except loan institutions, financial organizations, financial leasing, factoring and financing companies) whose current liabilities exceed their equities, the portion determined by the Council of Ministers that does not exceed 10% of the total expenses and costs incurred as interest, commissions, maturity differences, delay interest, dividends, exchange-rate differences and similar items relating to liabilities (except financing expenses added to investment costs) used within the enterprise may not be deducted from corporate profit. However, the amount exceeding this percentage is deductible.

Restrictions on company car expenses. Under amendments to Article 40 of the Income Tax Law, the following restrictions apply to company car expenses:

- Leasing payments up to TRY26,000 for a company car can be deducted from the income or corporate tax base.
- Sums up to TRY690,000 of special consumption tax and VAT paid for the acquisition of company cars can be deducted from the income or corporate tax base.
- Seventy percent of the repair, maintenance and other expenses related to company cars can be deducted from the income or corporate tax base.
- Amortization expense with respect to the purchase price of each company car (excluding special consumption tax and VAT) up to TRY790,000 can be deducted from the tax base. If the company car is acquired second-hand (special consumption tax and VAT is included into the acquisition price), the acquisition value up to TRY1,500,000 is subject to tax-deductible amortization expense.

Amounts exceeding these limits are considered as "non-deductible expenses" in determining the corporate income tax base.

Restriction on the deduction of financing expenses. For tax periods beginning on or after 1 January 2021, a restriction applies to companies with external liabilities exceeding their equity. For these companies, 10% of the total of expenses and cost of items, including interest, commissions, late charges, dividends, exchange differences and similar items related to external liabilities of the enterprise, excluding those added to the cost of the investment, are considered as a nondeductible expense in determining the commercial and corporate income. The restriction applies exclusively to deductions relating to the exceeding portion.

This restriction does not apply to credit institutions, financial institutions, and financial leasing, factoring and financing companies.

Provisions. Tax-deductible provisions include provisions for bad debts, for abandoned claims and for insurance technical reserves.

Tax depreciation. Assets that are used in a company for more than one year and that are subject to wear and tear are depreciated.

The useful life concept is used for the depreciation of fixed assets. The Ministry of Finance has issued Communiqués, which set forth the useful lives of different types of fixed assets. The following are examples of the useful lives for various fixed assets.

Asset	Useful life (years)
Buildings	50
Office furniture, office equipment and automobiles	5
Computers	4
Computer software and cellular phones	3

Also, it is possible for the taxpayers to extend the depreciation periods, provided that the extended useful life period does not exceed twice the useful life period determined by the Ministry of Treasury and Finance or 50 years, through the application of the

constant flat depreciation rate calculated by the following formula (flat rate = 1 / extended useful life).

The taxpayers may select the straight-line method or the declining-balance method to calculate depreciation. A company may change from the declining-balance method to the straight-line method (but the reverse change is not permitted) at any time during the useful life of a fixed asset. A company may exercise this option on an asset-by-asset basis.

Fixed assets can be depreciated beginning in the year of capitalization (the year in which an asset becomes ready to use). For fixed assets that are purchased as ready to use, the depreciation begins in the year of the acquisition of the fixed asset. For fixed assets that need to be constructed or assembled, the depreciation begins in the year in which the construction or assembly is completed and the assets become ready to use.

In general, an asset qualifies for full-year depreciation in the year of capitalization, regardless of the date of capitalization. However, except for passenger cars subject to pro-rata depreciation, taxpayers are given the opportunity to depreciate on a daily basis from the date the assets are ready for use, for depreciable economic assets that are purchased after 26 October 2021. Depreciation for passenger cars begins in the month in which the cars are purchased. For example, if a passenger car that was purchased for TRY1,000 is depreciated using a straight-line depreciation rate of 20%, the regular depreciation for a full year is TRY200. Under the applicable rules, if such an automobile is acquired in November, tax-deductible depreciation for the year of acquisition is calculated as follows:

$$\frac{2 \text{ months}}{12 \text{ months}} \times \text{TRY200} = \text{TRY33.33}$$

The balance of the regular depreciation for the year of acquisition is deductible in the last year of depreciation of the asset, together with the regular depreciation for the last year.

Investment allowance. Effective from 1 January 2006, the investment allowance was abolished. However, companies can carry forward investment allowance amounts due on or before 31 December 2005.

Research and development and design expenditures. One hundred percent of R&D/design expenditures may be deducted from the tax base if certain conditions are fulfilled. This is an incentive that is granted in addition to the ordinary depreciation expense recognition of capitalized R&D/design expenditures. The incentive covers the following expenses:

- Raw materials and supplies' expenses
- Personnel expenses
- General expenses
- Payments for benefits and services provided by outsourcing companies
- Taxes, duties and fees
- Depreciation and depletion
- Financial expenses

Companies that are not able to deduct R&D/design expenditures because of insufficient taxable income may deduct the unused amount in the following years.

In addition, to support R&D/design activities, the Turkish Scientific and Technological Research Institution (TUBITAK) may provide monetary aid to companies with respect to their R&D/design activities under certain conditions. The related law also provides various types of incentives such as R&D/design deductions, wage income withholding exemptions, social security premium support, stamp duty exemption and capital aid for technological enterprises.

Relief for losses. In general, losses may be carried forward for five years. Losses cannot be carried back. An order of priority applies for the use of losses and exemptions to offset taxable income for the year. Past years' losses are used after exemptions that apply even in the event of a loss. After the losses are used, the other exemptions that apply in profitable years are administered (investment allowance, R&D/design deductions, tax-deductible donations and others).

Resident companies may deduct the losses incurred in business activities performed abroad if the foreign losses are approved by auditors authorized under the laws of the relevant jurisdiction. Foreign losses from foreign activities cannot be deducted if income arising from such activities is exempt from corporation tax in Türkiye.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on goods delivered and services rendered, including imported goods and services, communications, conveyances by pipeline and certain leases; exports are exempt	
General rate	20
Rates on other items	1/10
Local withholding taxes, on amounts paid to nonresident corporations	Various
Banking and insurance transactions tax; imposed on all types of payments received by banking and insurance companies with respect to all types of transactions, except financial leasing transactions	
Interbank deposit accounts	1
REPO transactions	1
Sale of government bonds and treasury bills	1
Cambio transactions	0.2
Other payments	5

Employee	1

E. Miscellaneous matters

Foreign-exchange controls. Türkiye has a liberal foreign-exchange regime, which allows local foreign-exchange accounts.

Law No. 4875 guarantees the remittance of profits. The company's bank may transfer profits, provided the company subsequently submits to the bank its approved tax statement and its tax accrual and payment slips. This law also guarantees the remittance of the proceeds from the liquidation of an investment.

Fees and royalties from management agreements, technical services agreements and license contracts may be remitted abroad, and applicable withholding tax must be paid.

Foreign investment partnerships and funds may invest in Turkish securities and freely remit dividends, interest, profits and capital.

Turkish resident companies may grant loans to related parties residing abroad in some circumstances.

Transactions related to the foreign-exchange legislation should be checked to determine whether they are in compliance with the Communiqué regarding capital movements published on 2 May 2018.

Transfer pricing. The Turkish Corporate Tax Code contains transfer-pricing regulations, which include the arm's-length principle and the requirement for documentation of all related-party

transactions. The arm's-length principle applies to all transactions carried out by taxpayers with related parties. Under Turkish transfer-pricing rules, the traditional and transactional transfer-pricing methods recommended in the Organisation for Economic Co-operation and Development (OECD) model guidelines are acceptable. The main methods that can be applied by the taxpayers in the determination of the arm's-length price are the following:

- Comparable uncontrolled price method
- Cost-plus method
- Resale price method
- Profit-split method
- Transactional net margin method

Cases in which the relationship is established through direct or indirect shareholding are deemed to be within the scope of disguised profit distributions if the percentage of the shareholding, voting rights or dividend rights is at least 10%. Parties that do not have a shareholding relationship are also deemed to be related parties if the percentage of voting or dividend rights is 10%, directly or indirectly. These percentages are taken into account collectively for related parties.

Under the local transfer-pricing regulations, the three-tiered transfer pricing documentation requirement (Country-by-Country Report [CbCR], Master File and Local File) apply for tax periods beginning on or after 1 January 2019.

Taxpayers are required to prepare an annual transfer-pricing report in compliance with the local documentation format and requirements for their related-party transactions.

The deadline for Local File is the deadline of corporation tax return, the deadline for Master File is the end of the following year, and the deadline for CbCR notification is June of the following year.

The Ministry of Finance has issued Communiqués clarifying the transfer-pricing rules and documentation requirements. Under these Communiqués, taxpayers must prepare annual transfer-pricing forms, reports and other documentation (CbCR notification and Master File). If the documentation requirements relating to transfer pricing are completely fulfilled on time, the tax-loss penalty is applied with a 50% discount for taxes not accrued at all or accrued deficiently in the past with respect to the profits distributed in a disguised manner.

Transfer-pricing rules apply to both domestic and foreign related-party transactions. In terms of benchmarks, despite not explicitly stated in the legislation, the Turkish tax authorities prefer the information from Turkish companies to be comparable.

It is possible to enter into advance-pricing agreements with the tax authorities. Unilateral advance-pricing agreements are concluded within nine months and bilateral/multilateral advance-pricing agreements are concluded within 18 months after formal application to Turkish Revenue Administration. The duration of advance-pricing agreements is five years and renewal is possible at the end of this period.

Debt-to-equity rules. Under the new thin-capitalization rules, a "related party" is a person holding, directly or indirectly, at least 10% of the shares or voting rights of the other party.

Borrowings from related parties that exceed a debt-to-equity ratio of 3:1 are considered to be disguised capital. For borrowings from related parties that are banks or financial institutions, half of the borrowings are taken into consideration in performing the calculation for disguised capital. Total borrowings from all related parties are treated collectively.

The equity at the beginning of the taxpayer's fiscal year applies for thin-capitalization purposes. Interest paid or accounted for and foreign-exchange differences related to disguised capital are regarded as nondeductible expenses in determining the corporate tax base. Interest related to disguised capital is treated as a dividend distribution and is subject to dividend withholding tax.

Controlled foreign companies. The controlled foreign company (CFC) rules apply if resident individuals and corporate taxpayers jointly or severally have a direct or indirect participation of 50% or more in the shares, dividend rights or voting rights in a foreign company that meets all of the following conditions:

- Twenty-five percent or more of the foreign company's gross income is of a passive nature (portfolio investment income). If the business activities of the company are not commensurate with the capital, organization or the work force of the company, income derived from commercial, agricultural or independent personal services may be regarded to be of a passive nature.
- The foreign company is subject to effective corporate taxation at a rate of less than 10%.
- The gross revenue of the foreign company exceeds TRY100,000 (approximately USD5,300).

If the foreign company falls within the scope of the Turkish CFC measures, Turkish resident taxpayers declare corporate income of the foreign company attributable to them. In the event of a dividend distribution by the foreign company, the recipient of the dividend is taxed only to the extent that the amount has not been taxed in accordance with the CFC rules.

Ultimate Beneficial Owner declaration. It is compulsory to declare the individual(s) who ultimately control or have ultimate influence over the legal entities or the entities without legal status. This is known as the Ultimate Beneficial Owner (UBO) declaration.

As of 1 August 2021, corporation taxpayers and other types of companies (commandite companies (a type of partnership), trusts and similar institutions established in a foreign jurisdiction that have their headquarters in Türkiye with resident managers in Türkiye or with management centers in Türkiye) are required to declare UBO information.

In addition to those listed above, certain parties such as banks, payment agencies, financing and factoring companies, financial leasing companies, asset management companies, notary publics, lawyers, sworn-in financial advisors and certified public accountants, among others, are also required to declare UBO

information, related to the transactions that are performed by their clients, when requested by the Revenue Administration.

Entities considered to be UBOs and subject to declaration are described below.

The following are UBOs for legal entities:
- Individual shareholders with shares exceeding 25% of the legal entity
- If the individual shareholders holding more than 25% of the legal entity are suspected of not being the UBO or if there is no individual shareholder holding such shares, the individuals who have ultimate control of the legal entity
- If the UBO cannot be determined, the individuals with the highest managerial authority

The following are UBOs for entities that do not have legal status, such as business partnerships:
- Individual/s who have ultimate control
- If the UBO cannot be determined, the individual/s with the highest level of executive power
- For trust and similar institutions, those who have the title of founders, trustees, managers, auditors or beneficiaries, or those who have influence over these organizations

Corporation taxpayers must declare UBO information in their advance tax returns and annual corporation tax returns. Parties other than corporation taxpayers must declare their UBO information to the Turkish Revenue Administration via electronic forms by the end of August of every respective year. In cases in which the taxpayers have a new tax registration or if there is a change in the information previously reported, those changes must be declared within one month following the date of their occurrence.

All of the UBO documents and records must be kept for five years by the parties. The relevant penalties under the Turkish Tax Procedural Code are also applicable for parties who do not report the requisite information, or who make incomplete or misleading declarations.

Anti-avoidance measures. Turkish resident taxpayers are subject to a 30% withholding tax on all payments made in cash or on account that relate to transactions with companies resident in countries that the president considers to be in harmful tax competition. The president has not yet identified these countries. The principal, interest or profit contributions corresponding to debts to financial institutions established outside Türkiye and payments to insurance and reinsurance companies established outside Türkiye are not subject to the 30% withholding tax. The president has the authority to reduce the withholding tax rate to 0% for transactions that are considered to be performed at arm's length.

The payments taxed in accordance with the rules described in the preceding paragraph are not subject to further corporate tax or income tax.

The Turkish tax law includes anti-abuse rules. The principal rule is the substance-over-form rule, which is contained in Article 3 of the Tax Procedural Law.

Mergers and acquisitions. Mergers, acquisitions and demergers may be tax-free if the transaction involves two resident companies and if the assets are transferred at book value.

Article 20 of Law No. 7456, published in the *Official Gazette* dated 15 July 2023, excludes immovable property from the scope of tax-free partial demerger, effective from 1 January 2024.

F. Treaty withholding tax rates

The table below shows the maximum withholding rates for dividends, interest and royalties provided under Türkiye's double tax treaties.

To benefit from the advantageous rates under the double tax treaties, additional conditions may be required (for example, the recipient is required to be the beneficial owner of the related gain). Readers should obtain detailed information regarding the treaties before engaging in transactions.

(a) The 5% rate applies if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.
(b) The 5% rate applies if the recipient owns more than 20% of the payer of the dividends or if the recipient is the central bank or an entity that is wholly owned by the government. The 10% rate applies to other dividends.
(c) The 10% rate applies if the recipient is a company (other than a partnership) that owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.
(d) The 5% rate applies to dividends distributed by Belgian companies. The 10% rate applies to dividends distributed by Turkish companies.
(e) The 15% rate applies if the recipient owns more than 25% of the payer of the dividends. The 20% rate applies to other dividends.
(f) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
(g) The 15% rate applies if the recipient owns more than 10% of the payer of the dividends. The 20% rate applies to other dividends.
(h) The 10% rate applies to interest on loans granted by banks and financial institutions. The 15% rate applies to other interest payments.
(i) The 10% rate applies to interest on loans granted by financial institutions. The 15% rate applies to other interest payments.
(j) The 10% rate applies to interest paid with respect to a loan or other debt claim with a term exceeding two years. The 15% rate applies to other interest payments.
(k) The 7% rate applies if the recipient owns more than 25% of the payer of the dividends. The 10% rate applies to other dividends.
(l) For Luxembourg recipients, the 10% rate applies if the recipient owns more than 25% of the payer of the dividends and the 20% rate applies to other dividends. For Turkish recipients, these rates are applied as 5% and 20%, respectively.
(m) The 10% rate applies to interest on loans with a term exceeding two years. The 15% rate applies to other interest payments.
(n) The 5% rate applies if the recipient owns more than 25% of the payer of the dividends. The 10% rate applies to other dividends.
(o) The 10% rate applies if the recipient owns more than 15% of the payer of the dividends. The 15% rate applies to other dividends.
(p) The 5% rate applies to dividends distributed by Dutch companies. The 10% rate applies to dividends distributed by Turkish companies if dividends received by Dutch resident companies from Turkish resident companies are not subject to tax in the Netherlands.
(q) The rate is 5% of the gross amount of the dividends if either of the following circumstances exists:
  - The beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends and the dividends are exempt from tax in the other state.
  - The dividends are derived by the government pension fund in the case of Norway or by the government social security fund in the case of Türkiye. The 15% rate applies to other dividends.
(r) The 7.5% rate applies to interest on loans paid by financial institutions. The 10% rate applies to other interest payments.
(s) The 5% rate applies to dividends to the extent they are paid out of profits that have been subject to tax as specified in the tax treaty and if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.
(t) The 10% rate applies to interest on loans granted by banks. The 15% rate applies to other interest payments.
(u) The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and recordings for radio and television. The 15% rate applies to royalties paid for patents, trademarks, designs or models, plans, secret formulas or processes, or for information concerning industrial, commercial or scientific experience.
(v) The 10% rate applies to interest on loans granted by banks, financial institutions and insurance companies. The 15% rate applies to other interest payments.
(w) The 12% rate applies if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.

(x) The 5% rate applies if the recipient of the dividends is the government, a public institution wholly owned by the government or a political subdivision or local authority of the other contracting state. The 10% rate applies if the recipient owns more than 25% of the payer of the dividends. The 12% rate applies to other dividends.

(y) The 10% rate applies to interest derived from loans granted by financial institutions, such as banks, savings institutions or insurance companies. The 15% rate applies to other interest payments.

(z) The 5% rate applies if the recipient owns more than 25% of the payer of the dividends for an uninterrupted period of at least two years. The 15% rate applies to other dividends.

(aa) For Irish recipients, the 5% rate applies if the dividends are paid out of the profits that have been subject to tax in Türkiye and if the recipient owns more than 25% of the voting rights of the payer of the dividends. The 10% rate applies if the recipient owns more than 25% of the voting rights of the payer of the dividends, and the 15% rate applies to other dividends. For Turkish recipients, these rates are applied as 5%, 5% and 15%, respectively.

(bb) The 10% rate applies to interest received by financial institutions or paid with respect to loans or other debt claims with a term exceeding two years. The 15% rate applies to other interest payments.

(cc) Interest paid to the government and central bank is exempt.

(dd) A new treaty between Türkiye and Norway was signed on 15 January 2010. This new treaty is effective from 1 January 2012. Under the new treaty, the dividend withholding tax rate may be reduced to 5%. The withholding tax rate for interest ranges from 5% to 10%. The withholding tax on royalties is 10% if certain conditions are satisfied.

(ee) A new treaty between Türkiye and Finland, which was signed on 6 October 2009, is effective from 1 January 2013.

(ff) A treaty between Türkiye and Germany, which was re-signed by the countries on 19 September 2011, is effective retroactively from 1 January 2011.

(gg) Interest paid from Türkiye to the government of Brazil, the Central Bank of Brazil or the National Bank for Economic and Social Development (BNDES) is exempt from Turkish tax. Interest paid from Brazil to the government of Türkiye the Central Bank of Türkiye (Türkiye Cumhuriyet Merkez Bankasi) or the Turkish Export/Import Bank (Eximbank) is exempt from tax.

(hh) The tax rate is 15% of the gross amount of the royalties arising from the use of, or the right to use, trademarks. The rate is 10% of the gross amount of royalties in all other cases.

(ii) The rate is 5% of the gross amount of interest with respect to a loan or credit made, guaranteed or insured for the purpose of promoting exports by the Finnish Export Credit (FINNVERA) or similar Turkish public entities that have the objective of promoting exports. The rate is 10% of the gross amount of interest derived by banks. The rate is 15% of the gross amount of interest in all other cases.

(jj) The rate is 5% of the gross amount of the following types of interest:

- Interest paid to the government pension fund or the Norwegian Guarantee Institute for Export Credits (Eksportfinans ASA) if the interest is wholly or mainly passed on to the government of Norway under the 108 Agreement between Eksportfinans ASA and the government of Norway
- Interest paid to the Turkish social security fund or the Turkish Eximbank

The rate is 10 % for interest paid to banks. The rate is 15% in all other cases.

(kk) For Swiss recipients, the rate is 5% if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends and if relief from Swiss tax is granted for such dividends through an abatement of the profits tax in a proportion corresponding to the ratio between the earnings from participations and total profits or through equivalent relief. The rate is 15% in all other cases for Swiss recipients. For Turkish recipients, the rate is 5% if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends. The rate is 15% in all other cases for Turkish recipients.

(ll) The rate is 5% for interest paid with respect to a loan or credit made, guaranteed or insured for the purpose of promoting exports by an Eximbank or a similar institution that has the objective of promoting exports. The rate is 10% in all other cases.

(mm) For Australian recipients, the 5% rate applies if the beneficial owner of the dividends is a company that owns directly more than 25% of the capital of

the company and if the dividends are paid out of profits that have been subject to corporation tax in Türkiye. The 15% rate applies to other dividends paid to Australian recipients. For Turkish recipients, the 5% rate applies if the beneficial owner of the dividends is a company that owns directly more than 10% of the voting power of the company. The 15% rate applies to other dividends paid to Turkish recipients.

(nn) A new treaty between Türkiye and Korea (South) is under negotiation.

(oo) Please consult the treaty for further details because exemptions may be provided for interest on loans obtained from certain institutions, such as central banks and governments of the contracting states or their subdivisions.

(pp) Various rates apply.

(qq) The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, patents, trademarks, designs or models, plans, secret formulas or processes, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial or scientific experience. The 15% rate applies to royalties paid for the use of or the right to use, cinematographic films and films or tapes for television or radio broadcasting.

(rr) The rate is 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 50% of the capital of the company paying the dividends or has invested more than USD10 million, or the equivalent in Turkish or Vietnamese currency, in the capital of the company paying the dividends. The rate is 10% of the gross amount of the dividends if the beneficial owner is a company that holds directly or indirectly at least 25% but less than 50% of the capital of the company paying the dividends. The rate is 15% of the gross amount of the dividends in all other cases.

(ss) Interest paid to the government of Türkiye or to the Central Bank of Türkiye is exempt from Vietnamese taxes and interest paid to the government of Vietnam or to the State Bank of Vietnam is exempt from Turkish taxes.

(tt) The 5% rate applies if the recipient owns more than 10% of the payer of the dividends. The 15% rate applies to other dividends.

(uu) The 10% rate applies if the beneficial owner of the dividends is a company that owns directly more than 10% of the capital of the company paying the dividends. The 15% rate applies to other dividends.

(vv) The 5% rate applies if the beneficial owner of the dividends is a company that owns directly more than 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.

(ww) The 10% rate applies if the beneficial owner of the dividends is a company that owns directly more than 25% of the capital of the company paying the dividends. The 15% rate applies to other dividends.

(xx) The rate is 5% of the gross amount of the dividends if either of the following circumstances exists:

- The beneficial owner is the government or a public institution that is wholly owned by the government or its political subdivisions or local authorities of the other contracting state.
- The beneficial owner of the dividends is a company (excluding a partnership) that holds directly at least 20% of the capital of the company paying the dividends.

The 10% rate applies to other dividends.

(yy) The 7.5% rate applies if the beneficial owner is a company that owns directly at least 10% of the capital of the company paying the dividends.

The amending protocol, signed on 14 September 2017, to the Kuwait-Türkiye income and capital tax treaty (1997) entered into force on 10 November 2021. The protocol applies from the date of its entry into force.

A double tax treaty between Türkiye and Burundi was signed on 11 March 2022. On 17 May 2023, the Senate of Burundi approved the income tax treaty with Türkiye. A double tax treaty between Türkiye and Côte d'Ivoire was signed on 29 February 2016. On 21 April 2020, Türkiye ratified the treaty. Côte d'Ivoire has not yet ratified the treaty. On 21 December 2022, the Council of Ministers of Côte d'Ivoire approved a bill authorizing the president to ratify the treaty. A double tax treaty between Türkiye and Somalia was signed on 3 June 2016. On 4 March 2020,

Türkiye ratified the treaty. Somalia has not yet ratified the treaty. A double tax treaty between Türkiye and Argentina was signed on 1 December 2018. On 15 May 2020, Türkiye ratified the treaty. On 24 November 2021, the Argentine Foreign Relations and Budget and Finance Committees approved the treaty. A double tax treaty between Türkiye and Senegal was signed on 14 November 2015. On 9 March 2020, the National Assembly (parliament) of Senegal approved a bill, authorizing the president to ratify the income tax treaty with Türkiye. On 30 November 2023, Türkiye ratified the treaty. A double tax treaty between Türkiye and the Palestinian Authority was signed on 25 October 2018. On 22 November 2018, the Palestinian Council of Ministers approved the tax treaty with Türkiye. Türkiye has not yet ratified the treaty. A double tax treaty between Türkiye and Iraq was signed on 17 December 2020. On 17 March 2022, the Turkish Grand National Assembly approved the Iraq-Türkiye income tax treaty. On 20 December 2022, the Iraqi Council of Ministers approved the Iraq-Türkiye income tax treaty. A double tax treaty between Türkiye and Nigeria was signed on 20 October 2021. On 30 November 2023, Türkiye ratified the treaty. Nigeria has not yet ratified the treaty. A double tax treaty between Türkiye and Sierra Leone was signed on 3 November 2020. On 9 December 2021, the parliament of Sierra Leone approved the treaty. On 30 November 2023, Türkiye ratified the treaty. On 20 February 2024, Türkiye and Azerbaijan signed a new income tax treaty that would replace the 1994 treaty between the countries.

Türkiye has initialed tax treaties with Botswana (23 November 2018), Burkina Faso (22 September 2017), Cameroon (21 September 2022), Gabon (3 September 2015), Ghana (15 March 2022), the Hong Kong Special Administrative Region (SAR) (12 August 2016), Kenya (23 February 2023) and Uruguay (3 June 2022). On 22 January 2016, Türkiye and Turkmenistan initialed a new income tax treaty that would replace the 1995 treaty between the countries. On 22 October 2021, Türkiye and Korea (South) signed a new income tax treaty that would replace the 1986 treaty between the countries. On 8 December 2022, the Korea (South) National Assembly ratified the treaty. On 23 January 2024, the Turkish Grand National Assembly approved the treaty.

Türkiye is negotiating tax treaties with Afghanistan, Angola, Cuba, El Salvador, Liberia, Mali, Mauritius, Mozambique, Niger, Paraguay (close to signing a tax treaty), Tanzania and Uganda.

The Turkish Council of Ministers ratified the Foreign Account Tax Compliance Act (FATCA) agreement between Türkiye and the United States, signed on 29 July 2015, through Decree No. 2016/9229, which was published in the *Official Gazette* of 5 October 2016. The agreement entered into force on 14 February 2021.

Türkiye has signed Exchange of Information Agreements Relating to Tax Matters with Bermuda, Gibraltar, Guernsey, the Isle of Man and Jersey. The Exchange of Information Agreement Relating to Tax Matters with Bermuda and Jersey entered into force as of September 2013. On 7 October 2017, the Exchange of Information Agreement between the Isle of Man and Türkiye

entered into force. The agreement generally applies from 7 October 2017 for criminal tax matters. For other tax matters, it applies in Türkiye from 1 January 2013 and in the Isle of Man from 1 April 2013. On 6 October 2017, the Exchange of Information Agreement between Türkiye and Guernsey entered into force. The agreement generally applies from 6 October 2017. The Exchange of Information agreement between Türkiye and Gibraltar entered into force on 15 February 2018. Negotiations are continuing on such agreements with the Bahamas and Barbados.

The Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI) was signed by Türkiye on 7 June 2017. A Draft Law on the MLI was submitted to the Turkish Parliament Plan and Budget Committee on 2 June 2020, officially starting the ratification process of the MLI. On 3 October 2023, the legislative proposal on the approval of the MLI was renewed and resubmitted to the Grand National Assembly of Türkiye.

An investment protection agreement between Côte d'Ivoire and Türkiye entered into force on 30 August 2023. On 4 November 2022, the investment protection agreement between Rwanda and Türkiye entered into force. An investment protection agreement between China Mainland and Türkiye entered into force on 11 November 2020. On 30 December 2022, the investment protection agreement between Belarus and Türkiye entered into force.

An investment protection agreement between Georgia and Türkiye entered into force on 10 June 2021. An investment protection agreement between Türkiye and Uzbekistan entered into force on 9 July 2020. An investment protection agreement between Djibouti and Türkiye entered into force on 5 July 2020. An investment protection agreement between Türkiye and Zambia entered into force on 6 May 2020. An investment protection agreement between Kyrgyzstan and Türkiye entered into force on 18 March 2020. From this date, the new agreement replaces the investment protection agreement that was signed on 28 April 1992. An investment protection agreement between Montenegro and Türkiye entered into force on 17 March 2020. An investment protection agreement with Cameroon entered into force on 3 January 2019. An investment protection agreement with Korea (South) entered into force on 1 August 2018. An investment protection agreement between Türkiye and Mexico entered into effect on 17 December 2017. An investment protection agreement with Vietnam entered into force on 19 June 2017. An investment protection agreement with Gambia entered into force on 15 June 2017. An investment protection agreement with Slovak Republic entered into force on 11 December 2013.

On 12 December 2023, the Uruguayan Senate approved the investment protection agreement with Türkiye, which was signed on 23 April 2022. The National Assembly of Venezuela has approved the investment protection agreement with Türkiye, which was signed on 21 July 2023. On 17 June 2019, the Cambodian National Assembly approved the investment protection agreement between Türkiye and Cambodia, which was signed on 21 October 2018 and entered into force on 25 October

2022. On 6 September 2018, the Ukrainian parliament (Rada) passed a draft law ratifying the investment protection agreement between Türkiye and Ukraine, which was signed on 9 October 2017. On 25 April 2017, the Congress of Guatemala approved the investment protection agreement between Türkiye and Guatemala, which was signed on 21 December 2015. On 14 March 2017, the Council of Ministers of Mozambique approved the investment protection agreement between Türkiye and Mozambique, which was signed on 24 January 2017. Türkiye has ratified investment protection agreements with Azerbaijan, Bangladesh, Colombia, Congo (Democratic Republic of), Ghana, Guatemala, Kosovo, Mali, Moldova, Pakistan and Serbia.

Türkiye has signed investment protection agreements with Angola, Burkina Faso, Burundi, Chad, Guinea, the Hong Kong SAR, Kenya, Lithuania, Mauritania, the Palestinian Authority, Somalia and Tunisia.

Negotiations regarding investment protection agreements are continuing with Guinea and Paraguay.

On 23 January 2024, the Turkish parliament approved the amending protocol to the free-trade agreement, which was signed on 29 September 2022 with Malaysia. On 4 December 2023, Tunisia and Türkiye reached consensus on the revision to the free-trade agreement, which was signed on 25 November 2004. On 18 July 2023, United Kingdom and Türkiye agreed to start negotiations for the revision of the existing free-trade agreement. On 23 October 2023, a memorandum of understanding was signed with respect to the free-trade agreement between Ukraine and Türkiye which was signed on 3 February 2022. The free-trade agreement is not yet in force. The protocol to the existing free-trade agreement between Montenegro and Türkiye entered into force on 1 July 2022. The free-trade agreement between Türkiye and Jordan was terminated on 22 November 2018.

A Competent Authority Agreement (CAA) on the Automatic Exchange of Information (AEOI) between Latvia and Türkiye entered into force on 2 January 2019. A CAA on the AEOI between Norway and Türkiye entered into force on 30 December 2018. A CAA on the AEOI between Gibraltar and Türkiye entered into force on 15 February 2018. A CAA on the AEOI between Bermuda and Türkiye entered into force on 18 September 2013.

The decision on the "Approval of the Multilateral Competent Authority Agreement Regarding the Automatic Exchange of Financial Account Information with the Attached Declaration" was published in the *Official Gazette*, dated 31 December 2019.

On 22 November 2021, the Turkish Ministry of Treasury and Finance announced a Joint Statement of Türkiye and the United States regarding a compromise on a transitional approach to existing unilateral measures during the interim period before OECD Pillar One is in effect. Türkiye and the United States have agreed that the same terms of the Unilateral Measures Compromise will apply between Türkiye and the United States with respect to Türkiye's DST and the United States trade actions regarding the DST. Accordingly, the Unilateral Measures Compromise described in the 21 October 2021 Joint Statement is

incorporated by reference into the Joint Statement between Türkiye and the United States.

Türkiye is committed to the implementation of OECD Pillar Two. However, as of the date of preparation of this document, no draft legislation is yet available.

In the 2024 financial year, the government of Uganda introduced significant income tax amendments to the Income Tax Act. For example, manufacturers of electric vehicles, batteries and charging equipment, as well as fabricators of electric vehicle frames and bodies, now enjoy exemptions under the Income Tax Act. In addition, operators of specialized hospital facilities also benefit from these exemptions. For further details regarding the amendments, see Section G.

A. At a glance

Corporate Income Tax Rate (%)	30
Capital Gains Tax Rate (%)	30 (a)
Branch Tax Rate (%)	30
Withholding Tax (%)	
Dividends	15 (b)(c)
Interest	15 (b)(d)

Management Fees	15 (e)
Reinsurance Premiums	10 (e)
Professional Fees	
Residents	6 (f)
Nonresidents	15 (g)
Payments by Government Entities, etc.	6 (h)
Payments for Natural Resources	15 (e)
Payments by Purchasers of Assets from Nonresidents	10
Payments by Purchasers of Businesses or Business Assets	6
Payments of Winnings from Betting	15
Commission paid by Telecommunication Service Providers for Airtime Distribution or Provision of Mobile Money Services	10
Commission Paid to an Insurance or	

Advertising Agent	10
Income Derived from Transmission of Messages by Equipment Located in Uganda	5 (e)
Shipping, Aircraft and Road Transport Income	2 (i)
Branch Remittance Tax	15
Net Operating Losses (Years)	
Carryback	0 (j)
Carryforward	Limited (k)

(a) Applicable to capital gains on business assets, shares in private limited liability companies and commercial buildings.
(b) Applicable to residents and nonresidents (see Section B for further details).
(c) The rate is 10% for dividends paid by companies listed on the stock exchange to individuals.
(d) The rate for interest payments on government securities is 20% if their maturity period does not exceed 10 years and 10% if their maturity period is at least 10 years.
(e) Applicable to nonresidents.
(f) This withholding tax is imposed on resident professionals who are not exempt from withholding tax.
(g) A 10% withholding tax is imposed on nonresident contractors who derive income from providing services to licensees in the mining and petroleum sectors.
(h) This withholding tax is imposed on payments in excess of UGX1 million to any person in Uganda who is not exempt from withholding tax for goods and services supplied to, or under a contract with, the government, a local authority, an urban authority, a company controlled by the government of Uganda or any person designated in a notice by the Minister.
(i) This withholding tax is imposed on nonresident persons who carry on the business of the following:
- Ship operator, charterer or air transport operator who derives income from the carriage of passengers who embark or cargo or mail that is embarked in Uganda
- Road transport operator who derives income from the carriage of cargo or mail that is embarked in Uganda

However, income derived from carriage of passengers who do not embark in Uganda or cargo or mail that is not embarked in Uganda is not income derived from a Ugandan-source service contract and accordingly is not subject to tax in Uganda.
(j) In general, loss carrybacks are not allowed. However, for long-term construction contracts that result in a loss in the final year, a loss carryback for an unlimited number of years is allowed.
(k) As of 1 July 2023, a taxpayer who after seven years of income carries forward assessed losses is only allowed a deduction of 50% of the losses carried forward in the following year of income and the subsequent years of income.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their worldwide income, but tax credits are granted for taxes paid on foreign-source income (see *Foreign tax relief*). Nonresident companies are subject to tax on income derived from sources in Uganda.

A company is resident in Uganda if any of the following applies:
- It is incorporated in Uganda.
- The management and control of its affairs are exercised in Uganda during the tax year.
- During the tax year, it performs the majority of its operations in Uganda.

Rates of corporate tax. The regular corporate income tax rate is 30%.

Rental income earned in Uganda is taxed separately from other income and taxed at a rate of 30%. It is no longer consolidated with other income.

Digital service tax. A nonresident deriving income from providing digital services to a customer in Uganda delivered over the internet, electronic network or an online platform is subject to income tax at a rate of 5% and is required to file a tax return by the 15th day after the end of a tax period.

Capital gains. Capital gains on business assets, shares and commercial buildings are subject to tax at a rate of 30%.

Effective 1 July 2021, the cost base of the asset is to be determined according to the formula indicated below stipulated under section 50(3) of the Income Tax Act (ITA):

$$CB \times \frac{CPID}{CPIA}$$

The following are the amounts in the formula:
- CB is the amount of an item of cost or expenditure incurred determined in accordance with Section 52(2) of the ITA Cap 340.
- CPID is the Consumer Price Index number published for the calendar month of sale.
- CPIA is the Consumer Price Index number published for the month immediately prior to the date on which the relevant item of cost or expense is incurred.

The formula above does not apply to an asset that is sold within 12 months from the date of purchase.

Administration. Companies must file provisional income tax returns within six months after the beginning of the accounting period. This return includes an estimate of the income that will be earned by the company during the accounting period. The tax liability shown in the provisional return must be paid in two equal installments, which are due 6 months and 12 months after the beginning of the accounting period. A final tax return must be filed within six months after the end of the accounting period, and any balance of tax due must be paid when this return is filed. A taxpayer with an annual turnover of UGX500 million must submit audited financial statements prepared by an accountant registered by the Institute of Certified Public Accountants of Uganda with the taxpayer's return.

Penalties are imposed if the final tax liability for the year exceeds the tax liability shown in the provisional return by more than 10%. However, the penalty for underestimating provisional tax does not apply to companies engaged in agricultural, plantation or horticultural farming.

Effective from 1 July 2016, the Tax Procedure Code Act regulates all procedural aspects relating to income tax, value-added tax and excise duty, and any other taxes that could be added by the Minister of Finance by statutory instrument. The provisions of the act replace the provisions in the various tax laws that dealt with procedures such as those for filing returns, objections, recovery, penal taxes and tax offenses.

The Government of Uganda introduced the Electronic Fiscal Receipting and Invoicing System (EFRIS), effective from 1 July 2020. Under EFRIS, it is mandatory for all value-added tax (VAT) persons to issue e-receipts or e-invoices to their customers in accordance with the Tax Procedures Code (E-Invoicing and E-Receipting) Regulations, 2020. A person purchasing goods or services from a designated EFRIS user will not be allowed an income tax deduction unless supported by an e-invoice/receipt (except for purchases from non-VAT registered persons).

Local authorities, government institutions and regulatory bodies may not issue a license or any form of authorization necessary for the purpose of conducting business in Uganda to any person without a Taxpayer Identification Number (TIN).

Dividends. Dividends paid to residents and nonresidents are subject to withholding tax at a general rate of 15%. However, the withholding tax does not apply if the recipient of the dividends is a resident company that controls at least 25% of the voting power in the payer. The withholding tax rate is 10% for dividends paid by companies listed on the stock exchange to resident individual shareholders. The withholding tax on dividends paid to nonresidents and to resident individuals is considered a final tax.

Interest. Interest paid to residents and nonresidents is subject to a withholding tax rate of 15%. The withholding tax rate for interest payments on government securities is 20% if their maturity period does not exceed 10 years and 10% if their maturity period is at least 10 years. The withholding tax for interest paid on government securities is considered a final tax. The withholding tax on interest paid by a resident person to another resident person does not apply if any of the following circumstances exist:

- The recipient is a financial institution (except with respect to interest from government securities).
- The interest is paid by a natural person to a resident.
- The interest is paid by a company to an associated company.
- The interest paid is exempt from tax in the hands of the recipient.

Interest paid by resident companies to nonresident financial institutions with respect to debentures is exempt from tax.

The withholding tax for interest paid on government securities is considered a final tax. Interest paid by resident companies to nonresident financial institutions with respect to debentures is exempt from tax.

Other withholding taxes. Royalties, rent, natural resource payments and management fees paid to nonresidents are subject to a 15% final withholding tax. Reinsurance premiums are subject to a 10% final withholding tax. A 10% withholding tax is imposed on nonresident contractors who derive fees from the provision of services to licensees in the mining and petroleum sectors.

A resident person who purchases an asset from a nonresident person must withhold a 10% tax from the gross payment for the asset.

A resident person who purchases a business or business asset must withhold a 6% tax from the gross payment for the business or a business asset.

A telecommunications service provider that makes a payment of a commission for airtime distribution or provision of mobile money services should withhold tax on the gross amount of the payment at a rate of 10%.

An insurance service provider that makes a payment of a commission to an insurance agent should withhold tax on the gross amount of the payment at a rate of 10%.

A person who makes payment for a commission to an advertising agent should withhold tax on the gross amount of the payment at a rate of 10%.

A payment for agricultural supplies is exempt from withholding tax.

Foreign tax relief. A foreign tax credit is granted for foreign tax paid on foreign-source income taxable in Uganda. The credit is limited to the equivalent of the Uganda tax on such income.

C. Determination of trading income

General. Taxable income is the income reported in the companies' financial statements, subject to certain adjustments. Expenses are deductible to the extent that they are incurred in the production of taxable income.

Deductible rental expenses. Effective from 1 July 2022, expenses and losses incurred by a person, other than an individual or partnership, in the production of rent are allowed as a deduction for any year of income subject to the condition below.

If the expenses and losses incurred by a person, other than an individual or partnership, in the production of rental income exceeds 50% of the rental income, the allowable deduction will be 50% of the rental income for that year of income.

Inventories. For tax purposes, inventory is valued at the lower of cost or market value.

Provisions. Only financial institutions and insurance companies may deduct specific provisions for bad debts.

Bad trade debts may be deducted when they are written off if all reasonable steps have been taken to recover the debt without success.

Tax depreciation. Depreciation charged in companies' financial statements is not deductible for tax purposes, but capital allowances are granted at specified depreciation rates ranging from 20% to 40%.

Capital expenditure on buildings that are designated as industrial buildings, excluding the cost of the land, qualifies for an annual industrial building allowance of 5%. Commercial buildings constructed on or after 1 July 2001 qualify for a straight-line commercial building deduction of 5%.

Wear-and-tear allowances (tax depreciation), calculated using the declining-balance method, are granted for plant and machinery at the rates indicated below.

Effective 1 July 2021, asset depreciation classes were reduced from four to three with depreciation rates adjusted for some classes as shown in the following table.

Class	Assets	Rate (%)
I	Computers and data handling equipment	40
II	Plant and machinery used in farming, Manufacturing and mining.	30
III	Automobiles; buses, minibuses, goods vehicles, construction and earth moving equipment, specialized trucks, tractors, trailers and trailer-mounted containers, rail cars, locomotives, and equipment, vessels, barges, tugs, and similar | water transportation equipment, aircraft, specialized public utility plant, equipment and machinery, office furniture, fixtures and equipment, and any depreciable asset not included in another class	20

Effective from 1 July 2023, the initial allowance for eligible property or new industrial buildings placed in service for the first time during the year of income was repealed.

Relief for losses. Losses may be carried forward for an indefinite period of time to offset future profits. However, a taxpayer that after seven years of income carries forward assessed losses is only allowed a deduction of 50% of the losses carried forward in the following year of income and the subsequent years of income.

In general, loss carrybacks are not allowed. However, for long-term construction contracts that result in a loss in the final year, a loss carryback for an unlimited number of years is allowed.

Groups of companies. No provisions exist for filing consolidated returns or for relieving losses within a group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	18
Social security contributions to the National Social Security Fund (NSSF), on salaries; the contributions are not tax deductible; paid by	
Employer	10
Employee	5

E. Miscellaneous matters

Foreign-exchange controls. The foreign-exchange market is now fully liberalized. A company can freely transfer foreign exchange into and out of Uganda without restriction, provided that the transfer is through a bank and complies with anti-money laundering regulations. A company can prepare financial statements in foreign currency if it obtains approval from the tax authorities.

Transfer pricing. Transfer-pricing regulations apply to a controlled transaction (transaction between associates) if a person who is party to the transaction is located in and is subject to tax in

Uganda, and the other person who is party to the transaction is located in or outside Uganda. The minimum threshold for transactions between associates who are both located in Uganda is UGX500 million (approximately USD130,000); no minimum threshold applies to cross-border transactions. The regulations require a person to record in writing sufficient information and analysis to verify that a controlled transaction is consistent with the arm's-length principle.

For a year of income, this transfer-pricing documentation must be in place before the due date for the filing of the income tax return for that year.

Thin-capitalization rules. The Income Tax (Amendment) Act, 2018 repealed the thin-capitalization provisions and replaced them with limitation of interest deductibility rules. With the exception of financial institutions, micro-finance deposit taking institutions, Tier 4 micro-finance institutions and persons carrying on insurance business, the amount of deductible interest for all debts owed by a taxpayer that is a member of a group may not exceed 30% of the tax earnings before interest, tax, depreciation and amortization. The excess interest may be carried forward for not more than three years and will be treated as incurred during the next year of income.

F. Treaty withholding tax rates

The table below lists treaty withholding tax rates. With the exception of publicly listed companies, tax treaty provisions that lower Ugandan tax or provide exemptions from Ugandan tax for nonresident persons apply only if the nonresident is a resident of the state that has a tax treaty with Uganda, receives the income in a capacity of a "beneficial owner," has full and unrestricted ability to enjoy that income and to determine its future uses, and possesses economic substance in the country of residence.

Effective from 1 July 2022, a "beneficial owner" is defined as the following:

- A natural person who ultimately owns or controls a customer or the natural person on whose behalf a transaction is conducted and includes a person who exercises ultimate control over a legal person or arrangement
- In relation to a legal person, a "beneficial owner" includes the following:
  - The natural person who either directly or indirectly holds at least 10% of shares or voting rights of the legal person
  - The natural person who exercises control of the legal person through other means, including personal or financial superiority
  - The natural person who has power to make or influence decisions of a legal person
- In relation to trust, a "beneficial owner" includes the following:
  - The settlor
  - The trustee
  - The protector
  - The beneficiary, or the individual benefitting from the trust who is yet to be determined
  - Any other natural person exercising ultimate control of the trust

- In relation to other legal arrangements similar to trusts, the natural person who has holdings or positions that are equivalent to any of the items referred to in the third bullet above

	Dividends %	Interest %	Royalties %
Denmark	10/15 (a)	10	10
India	10	10	10
Italy	15	15	10
Mauritius	10	10	10
Netherlands	0/5/15 (b)	10	10
Norway	10/15 (a)	10	10
South Africa	10/15 (a)	10	10
United Kingdom	15	15	15
Non-treaty jurisdictions	15	15	15

(a) The 10% rate applies if the recipient is a company resident in the other contracting state that owns at least 25% of the capital of the payer. The 15% rate applies to other dividends.

(b) The 0% rate applies if the recipient holds at least 50% of the capital of the company paying the dividends. The 5% rate applies if the recipient holds less than 50% of the capital of the company paying the dividends. The 15% rate applies if the beneficial owner of the dividends is not a tax resident of the Netherlands.

G. The Income Tax (Amendment) Bill, 2024

The Income Tax (Amendment) Bill, 2024 was passed by parliament and assented to by the President of the Republic of Uganda. It became law on 1 July 2024. The following are the key amendments:

- Exemptions are granted to manufacturers of electric vehicles, batteries, charging equipment, and fabricators of electric vehicle frames and bodies whose investment capital is at least USD10 million in the case of a foreigner, USD300,000 in the case of a citizen and USD150,000 in the case of a citizen whose investment is placed up country.
- The income of an operator of a specialized hospital facility is exempt from income tax provided the operator meets certain stipulated conditions.
- An exemption for income derived from or by a private equity or venture capital fund regulated under the Capital Markets Authority Act, Cap. 84 is introduced.
- An exemption for income derived from the disposal of government securities on the secondary market is introduced.
- The term "branch" is removed from the Income Tax Act. Instead, the amendment adopts the term "permanent establishment."
- The concept of a permanent establishment is introduced to align Uganda's domestic tax regime with international principles in double taxation treaties, and in the United Nations and Organisation for Economic Co-operation and Development Model Tax Conventions.
- Commissions paid to payment service providers is subject to withholding tax at a rate of 10%. This applies to commissions paid to bank agents or any other agents offering financial services.
- A 15% withholding tax on a nonresident person who derives an annuity paid for by a business carried on by a nonresident person through a permanent establishment in Uganda is introduced.

- The income-sourcing rules are expanded to include income derived from the payment of an insurance premium if the premium relates to the insurance or reinsurance of a risk in Uganda. Insurance premium income is subject to withholding tax at a rate of 15%.
- The income-sourcing rules are expanded to include income derived from the payment of an insurance premium if the premium relates to the insurance or reinsurance of a risk in Uganda.

The information in this chapter is current as of 1 March 2024. Special tax rules have been enacted for the period of martial law in Ukraine, which are briefly summarized in Section G. Martial law was introduced in Ukraine on 24 February 2022 by the Decree of the President of Ukraine "On Martial Law in Ukraine" No. 64/2022, duly approved by Verkhovna Rada of Ukraine and has been prolonged since that time.

A. At a glance

Corporate Income Tax Rate (%)	18 (a)
Capital Gains Tax Rate (%)	18

Branch Tax Rate (%)	18	
Withholding Tax (%)		
Dividends	15	
Interest	0/5/15	(b)(c)
Royalties	15	
Freight	6	
Income from Discount Bonds	18	(d)
Insurance	0/4/12	(e)
In-kind Ukrainian-Source Income	15	(f)
Other Ukrainian-Source Income	15	(g)
Branch Remittance Tax	0	
Net Operating Losses (Years)		
Carryback	0	
Carryforward	Unlimited	(h)

(a) Special tax rates exist for insurance companies, banks and lottery companies.

(b) The following interest is exempt from withholding tax:
- Interest and income (discounts) received by nonresidents from state securities, municipal bonds or debt securities if these instruments are secured by state or municipal guarantees (except for profit of nonresidents from low-tax jurisdictions under the approved list)
- Other income from state securities, paid by the Ministry of Finance of Ukraine
- Interest payments to nonresidents on loans received by the state or to a municipal budget if they are reflected in the state or municipal budget or in the budget of the National Bank of Ukraine (NBU)
- Interest on loans obtained by business entities if fulfillment of these loans is secured by state or municipal guarantees

(c) Withholding tax exemption is available for interest paid to nonresident lenders on loans financed through the issuance of debt securities (interest on loan participation notes) on a stock exchange outside Ukraine. The following conditions apply:
- If the loan is obtained before 2017, the exemption applies if the funds provided as a loan were raised with the aim to provide (directly or indirectly) a loan to a resident.
- If the loan is obtained in 2017 or 2018, the exemption applies if all of the following conditions are satisfied:
  — The qualifying debt securities are listed on a recognized stock exchange (currently, the list contains 21 stock exchanges in various jurisdictions, including the New York Stock Exchange, London Stock Exchange, Deutsche Boerse AG, Japan Exchange Group, Inc. and Singapore Exchange).
  — The funds provided as a loan were raised with the aim to provide (directly or indirectly) a loan to a resident.
  — The foreign interest recipient is not resident in a low-tax or non-transparent jurisdiction (see *Transfer pricing* in Section E for more details).

A reduced 5% withholding tax rate applies to interest from loans obtained from 2019 onward, subject to similar conditions.

(d) The tax base is calculated as the difference between the nominal value of the discount bonds and the acquisition value (purchase price) of the bonds on the primary or secondary stock market. Exemptions apply (see footnote [b] above).

(e) In essence, the tax on insurance payments is not a withholding tax, because the tax on insurance payments is not withheld from the payments remitted to the nonresident recipient, but is paid at the expense of the Ukrainian company making the payments (that is, the economic burden of paying the tax is borne by the Ukrainian party).

The 0% rate applies to the following:
- Insurance and reinsurance payments to nonresidents that meet the requirements established by the NBU
- Insurance payments with respect to civil aviation passenger transportation
- Insurance payments to nonresident individuals under mandatory insurance agreements
- Insurance payments under Green Card insurance agreements (mandatory third-party liability insurance for car owners of states participating in the Green Card system)

- Reinsurance payments with respect to placement of risks in foreign nuclear pools on behalf of members of the nuclear insurance pool

The 4% rate applies to insurance payments to nonresidents under insurance agreements covering risks outside Ukraine (subject to exceptions). The standard 12% rate applies in all other cases.

(f) Payment of in-kind Ukrainian-source income is subject to 15% withholding tax under a gross-up formula provided in the Tax Code.

(g) Profit from disposal of state securities, municipal bonds or debt securities received by nonresidents is exempt from withholding tax if these instruments are secured by state or municipal guarantees (except for profit of nonresidents from low-tax jurisdictions).

(h) Special rules apply to large taxpayers and to transfers of losses in the course of reorganizations. For further details, see *Relief for losses* in Section C.

B. Taxes on corporate income and gains

Corporate profit tax. Ukrainian legal entities (except for nonprofit organizations) are subject to corporate profit tax (CPT) on their worldwide income and gains. Foreign legal entities (except for organizations with diplomatic privileges or immunities) are subject to CPT if they receive Ukrainian-source income. CPT also applies to nonresidents who conduct business activity in Ukraine through a permanent establishment (PE) and/or receive Ukrainian-source income, and other nonresidents obliged to pay CPT in Ukraine.

Foreign companies that have a place of management in Ukraine are included in the list of CPT payers and are taxed on their Ukraine-source income.

PEs. The Ukrainian tax law envisages that a PE could arise for a nonresident in Ukraine by virtue of a fixed place of business, provision of services through personnel, construction site and related supervisory activity, and dependent agent's activity. The 2020 tax reform law has introduced several anti-Base Erosion and Profit Shifting (BEPS) initiatives, including changes to the Ukrainian PE rules. These changes extended and specified the scope of PE, introduced new rules for tax registration and taxation of nonresidents carrying out activity in Ukraine through PEs, and granted to the Ukrainian tax authorities additional powers with respect to PE detection and related tax administration, including forceful tax registration of nonresidents, unscheduled tax audits, and tax seizure of nonresidents' property located in Ukraine.

Rates of tax. The standard CPT rate is 18%.

Banks are subject to a 50% CPT rate in 2023 and to a 25% CPT rate in 2024 and future years.

Temporary CPT exemptions are available for the following cases, subject to qualifying conditions:

- For the aircraft industry: until 1 January 2025
- For large investment projects: within five consecutive years until 1 January 2035
- For profit of business entities engaged exclusively in the manufacturing of electrical vehicles, engines, batteries, and charges for electric vehicles as well as of some other qualifying means of transportation: until 31 December 2035
- For agricultural producers engaged in breeding, rearing and production of poultry, ostriches and quails, except for

rearing chickens, and chicken meat and eggs production: until 1 January 2027

A special tax regime is available for the information technology (IT) industry (see *Diia City Regime* in Section G).

Capital gains. Capital gains are included in the pretax financial result and generally taxed at the regular CPT rate.

Special tax rules apply to capital gains derived from trading in securities. Profits from trading in securities are included in taxable profit. Losses from trading in securities, including losses on security revaluations, can be carried forward indefinitely to offset future income from such trading.

Special rules apply to capital gains from qualifying foreign-to-foreign direct and indirect transfers of real-estate-rich Ukrainian companies. Nonresident buyers must register with the Ukrainian tax authorities and administer withholding tax on such transfers. The applicable withholding tax rate is 15%, subject to treaty protection.

Administration. Under the general rule, taxpayers must report CPT quarterly on a cumulative basis. Annual CPT reporting is available for the following taxpayers:
- Newly incorporated companies
- Agricultural producers
- Companies with annual income, net of indirect taxes, of less than UAH40 million (approximately USD1,051,270)

Taxpayers that file only an annual return must submit it within 60 days after the year-end. If a taxpayer files tax returns quarterly, the quarterly tax returns must be submitted within 40 days after the end of the quarter, and the final annual return must be submitted within 60 days after the end of the year. Tax is payable within 10 days after the deadline for submitting the tax return.

Dividends. A company distributing dividends to its shareholders must pay an 18% advance corporate profit tax (ACPT) on the positive difference between the amount of dividends and taxable profit for the reporting year for which dividends are paid, provided that the tax liability for the year is settled (if unsettled, ACPT is levied on the whole amount of dividends). The tax is paid either before or at the moment of the dividend distribution. The ACPT is paid at the expense of the dividend payer and does not decrease the amount of dividends due to shareholders. In general, ACPT can be offset against the CPT liability of the taxpayer in the current period and subsequent periods.

Exemption from ACPT on dividends applies to the following dividends:
- Dividends paid to individuals
- Dividends paid by joint investment vehicles
- Dividends paid to shareholders of the taxpayer's parent company, up to the amount of dividends received by the parent company from third companies
- Dividends paid to companies whose profits are exempt from tax, up to the amount of such exempt profits in the period for which dividends are paid

Ukrainian CPT payers do not include in their taxable profit dividends received from other Ukrainian CPT payers (except for collective investment vehicles and companies whose profits are exempt from tax, up to the amount of such exempt profits). Payments of dividends are not deductible for CPT purposes.

Dividends distributed to nonresidents are subject to withholding tax at a rate of 15% (to be calculated under a gross-up formula if distributed in-kind), unless an applicable double tax treaty provides otherwise.

The following payments are considered equivalent to dividends:
- Any monetary or in-kind payments made by legal entities to their shareholders in relation to the distribution of part of or all their net profit
- Payments for securities (corporate rights) to related and other qualifying nonresidents in transactions falling under transfer-pricing control in the amount exceeding the arm's-length level
- Value of goods (services) purchased from related and other qualifying nonresidents in transactions falling under transfer-pricing control in the amount exceeding the arm's-length level
- Understatement of the value of goods (services) supplied to related and other qualifying nonresidents in transactions falling under transfer-pricing control in the amount below the arm's-length level
- Monetary or in-kind payments to nonresident shareholders in relation to reductions of share capital, buy-backs of the corporate rights, withdrawals from shareholding or similar transactions between legal entities and their shareholders in the amount resulting in decrease of the retained earnings of the legal entity

The second through fifth payments above are considered equivalent to dividends starting 1 January 2021 and are excluded from the scope of ACPT.

The application of double tax treaty protection to payments considered to be equivalent to dividends should be analyzed on a case-by-case basis.

Foreign tax relief. Ukrainian companies may credit foreign tax paid with respect to foreign-source profits against Ukrainian tax imposed on the same income, up to the amount of such Ukrainian tax. The credit is granted only if the taxpayer submits a written confirmation from the tax authorities of the foreign country that certifies payment of the foreign tax.

C. Determination of taxable profit

General. Taxable profit is defined as the financial result before tax, determined under Ukrainian accounting standards or under International Financial Reporting Standards, subject to established adjustments. Add-back adjustments of the financial result for tax purposes include the following:
- Thirty percent of the cost of goods, including non-current assets (except for purchased right-of-use assets under lease agreements), works and services purchased from or supplied to nonresidents registered in low-tax and non-transparent jurisdictions, nonresidents incorporated in specific legal forms that do not pay CPT and/or are not tax residents in their country of

registration or purchased from nonprofit organizations if the amount of purchase from nonprofit organizations exceeds 25 minimum salaries (approximately USD4,665). This limitation does not apply to transactions falling under transfer-pricing control (see *Transfer pricing* in Section E) or if the taxpayer substantiates the arm's-length level of the expenses/income under transfer-pricing rules.

- Royalties paid to nonresidents exceeding the sum of royalty income and 4% of the taxpayer's net sales income for the preceding reporting year. The limitation does not apply to transactions falling under transfer-pricing control or if the taxpayer substantiates the arm's-length level of the royalties under transfer-pricing rules. In some cases, royalties are added back in full.
- Adjustments under the thin capitalization rules (see *Debt-to-equity ratios and other restrictions on the deductibility of interest* in Section E).
- Transfer-pricing adjustments.
- Provisions and allowances accrued in financial accounting (except for salary and payroll tax provisions).
- Funds or cost of goods, works or services provided to nonprofit organizations in an amount exceeding 4% (8% for sports nonprofit organizations) of the taxpayer's taxable profit for the preceding year.
- Non-repayable financial aid, or the cost of goods, works or services provided for free, to entities (other than registered nonprofit organizations and individuals) that are not CPT payers or are CPT exempt, or to parties related to CPT payers (if the recipients of such aid declared tax losses for the previous reporting year, provided that the donor recognized such aid as expenses when determining its pre-tax financial result).
- Penalties under civil law contracts, compensation for damages and lost profit paid to non-CPT payers (except for individuals) or to CPT payers that enjoy CPT exemption, and fines and penalties imposed by tax and other authorities.
- Impairment of fixed assets and intangible assets.
- Losses from participation in the equity of other companies.
- Value of transactions falling under transfer-pricing control that are not recognized by the tax authorities due to a lack of business purpose (see *Transfer pricing* in Section E).

Industry-specific adjustments apply for banks and financial institutions.

Tax-loss carryforwards decrease the pretax financial result for CPT purposes, subject to special rules for large taxpayers. Transferability of tax losses through a reorganization is limited.

If a taxpayer's income does not exceed UAH40 million (USD1,051,270), the taxpayer may opt not to make any adjustments to the financial result before tax for CPT purposes.

Depreciation. For purposes of tax depreciation, fixed assets are defined as assets that are designated for use in a taxpayer's business activity for more than one year and that have a value exceeding UAH20,000 (approximately USD526). The Tax Code provides for 16 groups of tangible fixed assets and six groups of non-tangible fixed assets. Similar to financial accounting, tax depreciation is accrued per each item.

The list of depreciation methods is in line with methods stipulated for financial accounting. The following are the methods:
- Straight-line
- Declining-balance
- Accelerated declining-balance
- Sum-of-the-years' digits
- Unit-of-production

Depreciation of an asset is accrued on a monthly basis throughout the useful life cycle of the asset. Depreciation is not accrued for the period of non-use of fixed assets in a business activity as a result of their conservation. The following table shows the minimum allowable term of the useful lives of assets.

Group	Assets	Minimum term of useful life Years
2	Capital expenditure on land improvements, not related to construction	15
3	Buildings	20
	Facilities	15
	Transmission devices	10
4	Machinery and equipment	5
	Electronic and computer equipment	2
5	Transport facilities	5
6	Tools, appliances and equipment (furniture)	4
7	Animals	6
8	Perennial plants	10
9	Other fixed assets	12
12	Temporary facilities	5
14	Returnable containers	6
15	Rental objects	5
16	Long-term biological assets	7

Assets of Group 1 (land plots) and Group 13 (natural resources), as well as goodwill and non-production fixed assets and intangibles, are not subject to depreciation.

The minimum term of useful life is not determined for the assets of Group 10 (library holdings) and Group 11 (tangible assets of small value).

Taxpayers should use the longer of the tax accounting or financial accounting depreciation terms. Accelerated depreciation is allowed in accordance with the following rules:
- Taxpayers are allowed to depreciate under a straight-line method qualifying fixed assets of Group 4 over a minimal two-year period if these assets were purchased after 1 January 2017 and put into operations before 31 December 2019. The right to use this tax incentive may be transferred upon reorganization.
- From 1 January 2020 to 31 December 2030, taxpayers may use accelerated depreciation for new machinery and equipment (Group 4) and vehicles (Group 5) within a two-year useful life and for transmission devices (Group 3) and other fixed assets (Group 9) within a five-year useful life, subject to qualifying conditions.

Relief for losses. In general, the Tax Code allows the unlimited carryforward of losses, subject to special rules for the large taxpayers and banks as outlined below. Transferability of tax losses through corporate reorganizations is subject to recently introduced special rules and is limited.

The right of large taxpayers to carry forward tax losses is limited; the losses of previous periods can be carried forward until fully utilized, but only up to 50% of the unutilized amount can be deducted in a reporting period. As an exception, if the tax losses are up to 10% of taxable profit of the current period, such losses can be deducted in full.

Banks are prohibited to utilize in 2023 tax losses of prior periods, with the right to utilize such losses starting in 2024 until full utilization.

The law does not allow tax losses to be carried back (that is, offsetting the tax loss of the current year against the taxable profit of previous years to reduce tax payments). However, for taxpayers that determine tax payable based on quarterly tax returns, the carryback of a tax loss within a year may be technically possible because tax returns are completed cumulatively.

Groups of companies. The Ukrainian tax law does not provide for the grouping of different legal entities.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate	20
Supply and import of certain types of agricultural products	14
Import and supply of pharmaceuticals, and provision of certain types of cultural and temporary accommodation services (exemptions apply)	7
Services for domestic transportation of passengers and luggage by air until 2024	7
Exports of goods and certain services	0
Excise tax	Various
Customs duties	Various
Environmental tax	Various
Rent tax	Various
Property tax	Various

E. Miscellaneous matters

Foreign-exchange controls. The Ukrainian currency is the hryvnia (UAH). The official exchange rate of the hryvnia against the US dollar can be found at the National Bank of Ukraine (NBU) website (www.bank.gov.ua); the retail exchange rate may differ from the official exchange rate. Ukraine has rather strict currency control rules, but they are gradually being softened. A wide variety of controls are imposed with respect to the use, circulation and transfer of foreign currency within Ukraine and abroad. These controls, which affect almost all international business transactions, include the following:

- In general, transactions between Ukrainian residents and cash settlements within Ukraine may not be carried out in foreign currency.
- All statutory accounting and tax reporting must be in Ukrainian currency.
- Wages and salaries paid to Ukrainian citizens must be in Ukrainian currency.
- Legal basis or obligation to perform a transaction in foreign currency that is confirmed by appropriate documents is required for the purchase of foreign currency.
- The deadline for settlements on export and import transactions is 365 days, subject to exceptions.
- There are e-limits, which are annual cap amounts for the remittance of foreign currency outside Ukraine, including the placement of own funds in foreign bank accounts and foreign investment. The limits are EUR2 million for legal entities and EUR200,000 for individuals. There are exhaustive lists of transactions not falling under the limits.
- Declared (publicly announced) simplification of currency control over low-value transactions (up to UAH400,000) does not work because banks are required to verify that there is no artificial splitting of the transactions.
- Exporters' transactions using the letter of credit form of payment are subject to simplified currency control.
- Rules for transactions related to capital movement are complicated.

Special currency-control restrictions apply during the period of martial law in Ukraine (see Section G for more details).

Debt-to-equity ratios and other restrictions on the deductibility of interest. If a taxpayer's debt to nonresidents exceeds its equity by at least 3.5 times, interest accrued to nonresident parties by such taxpayer may be deductible in an amount of up to 30% of the sum of its CPT base, financial expenses and tax depreciation for the reporting year, and is nondeductible in full if this indicator is negative. Tax losses carried forward from prior periods are not taken into account for the calculation of the CPT base in this case.

The remaining interest, annually reduced by 5%, may be carried forward indefinitely, subject to the same limitation.

Special rules apply to capitalized interest. The limitation does not apply to interest accrued in favor of international financial organizations (subject to certain conditions), to foreign banks or to financial companies engaged exclusively in leasing activities.

If interest in transactions subject to transfer-pricing control (see *Transfer pricing*) exceeds the arm's-length level, the above rules apply to the amount of interest that does not exceed this level.

Transfer pricing. Transfer pricing (TP) rules have been effective in Ukraine since 2013. Ukrainian TP regulations are frequently changed.

Under the current TP rules, controlled transactions include the following:

- Transactions with nonresident related parties.

- Transactions with nonresidents registered in low-tax and non-transparent jurisdictions. The government approves the list of such jurisdictions.
- Commission sales of goods and services through nonresident commissioners.
- Transactions involving goods and services between related parties through unrelated intermediaries that do not undertake significant functions, do not use significant assets and do not assume significant risks.
- Transactions with nonresidents that do not pay corporate profit tax, or are exempt from this tax and/or are not tax residents of the country where they are registered as legal entities. The government approves the list of legal forms of such nonresidents of such countries.
- Transactions between a nonresident and its PE in Ukraine.
- Transfer of functions, together with assets, risks and benefits to a related party, if the transfer results in a decrease of a taxpayer's income and/or financial result, regardless of whether the transaction is recorded in accounting.

The abovementioned transactions are controlled if both of the following circumstances exist (for transactions between a nonresident and its PE only the second circumstance needs to exist):
- The annual income of the taxpayer exceeds UAH150 million (approximately USD3,942,264).
- The amount of such annual transactions with each entity determined in line with the arm's-length principle exceeds UAH10 million (approximately USD262,817).

The Tax Code provides for the following five methods for determining the arm's-length price for controlled transactions:
- Compared uncontrolled price (the preferred method)
- Resale price
- Cost-plus
- Transactional net margin
- Profit-split

Specific profit-level indicators are assigned to each TP method.

Special rules apply to exports or imports of quoted goods.

Taxpayers that perform controlled transactions must file a TP Report (report on controlled transactions) and a notification on participation in a multinational group of companies by 1 October of the year following the reporting year. TP documentation must be submitted within 30 calendar days after the date of receipt of the request. The statute of limitations for TP purposes is currently seven years.

Starting from the 2021 reporting year, three-tiered TP reporting applies to qualifying cases. This reporting consists of a Master File, TP documentation (a Local File) and a Country-by-Country Report (CBCR).

Controlled foreign companies. Controlled foreign company (CFC) rules have been introduced in Ukraine. The rules relate to residents of Ukraine (both individuals and legal entities) that control companies registered outside of Ukraine, including trusts and funds. The rules introduce mandatory reporting in Ukraine and

aim to tax profits of foreign companies at the level of Ukrainian controllers unless an exemption applies.

The CFC's profit should be included in the tax base of Ukrainian controllers regardless of whether such profit is paid to these controllers. This profit can be taxable at 18%, and for dividends received by CFCs (directly or indirectly) from Ukrainian companies that are CPT payers or non-CPT payers, the rates are 5% and 9%, respectively.

There are special rules for calculation of a CFC's taxable profit and the cases when the CFC's profit is not included into its controller's income. These rules depend on the effective profit tax rate, the portion of passive income in the CFC`s total income, adequate business substance at the CFC and a double tax treaty between Ukraine and the respective country. The total aggregate income of all CFCs of one controller from all sources not exceeding EUR2 million for the reporting period is exempt from taxation in Ukraine.

Controllers are required to report their control over shares in CFCs and the CFCs' taxable profit. The first reporting period is 2022. The Tax Code allows the submission of the first report in 2024 for the first two reporting periods (2022 and 2023).

Standard Audit File for Tax reporting. Large taxpayers may be asked to submit a Standard Audit File for Tax (SAF-T UA) during tax audits. This file follows a standardized template in an xml format. There is a bill to establish mandatory submission of SAF-T UA for all large taxpayers from 2025 and for all VAT payers from 2027.

Common Reporting Standard. The law to implement Common Standard on Reporting and Due Diligence for Financial Account Information (CRS) in Ukraine entered into force on 28 April 2023. Banks, insurance companies, investment companies and other companies that as of 30 June 2023 met the criteria of reporting financial institutions were required to register with the tax authorities by 31 December 2023. They are liable for due diligence and must submit reporting on qualifying accounts by 1 July for the previous calendar year.

Diia City Regime. A new preferential tax regime for the IT industry, known as the Diia City Regime, became operational in February 2022.

The Diia City Regime allows companies to choose one of the following:

- To keep paying 18% CPT under general rules
- To pay CPT under special rules, which are very similar to the rules of exit capital tax (ECT), at a 9% rate on specific transactions and at 18% rate on controlled transactions that are not at arm's length

In 2024, expenses of Diia City residents on purchases from single taxpayers for CPT purposes should not exceed 50% (20% starting in 2025) of their total expenses for the prior year according to the profit and loss statement, regardless of the applied CPT rules.

A taxable object for the ECT is an exhaustive list of transactions that involve monetary or in-kind payments in favor of persons who are not residents of Diia City. Such transactions include, among others, the following:

- Distribution of dividends
- Payment of royalties in excess of 4% of net operating income for the previous year
- Payment on withdrawal of the owner of corporate rights from the participants, liquidation and repurchase of own corporate rights, in excess of the amount of investment
- Payment of interest, commissions, other rewards
- Free-of-charge provision of property, works, services or their sale without receipt of payment within 365 days and provision of financial aid that is not subject to repayment within 12 calendar months
- Purchase of property, works, services on a prepayment basis if the delivery period exceeds 365 days from the date of payment
- Investments in objects located outside of Ukraine
- Contributions to the authorized capital, joint ventures or trust management
- Transfer of funds to own accounts in foreign banks
- Business transactions that are recognized as controlled according to Article 39 of the Tax Code if their conditions do not comply with the arm's-length principle
- Other qualifying transactions and payments, including those in favor of nonresidents

If payments for the transactions subject to ECT are made in-kind, the tax base is determined at a value not lower than the arm's-length level.

The basic tax reporting period for ECT filing is a calendar year.

Attractive personal income taxation rules apply under the Diia City Regime.

To join the Diia City Regime, a legal entity should be incorporated under the laws of Ukraine and meet the established eligibility criteria.

The Diia City Regime is supposed to be in place for 25 years.

F. Treaty withholding tax rates

Ukraine honors the double tax treaties of the former USSR, except for treaties that have been superseded by new treaties concluded directly by Ukraine or renounced by the other party to the treaty. Ukraine is not a member of the Organisation for Economic Co-operation and Development (OECD). As a result, the Ukrainian tax authorities are not formally bound by the commentary of the OECD model convention; however, Ukrainian tax authorities and Ukrainian courts often rely on OECD commentary. The OECD-Ukraine Country Program was launched in June 2023 as part of the initial dialogue on Ukraine's accession to the organization.

The rates in the table below reflect the treaty rates for dividends, interest and royalties paid from Ukraine to residents of treaty jurisdictions. Exceptions or conditions may apply, depending on the terms of the particular treaty.

Beneficial ownership and tax residency tests, as well as additional eligibility conditions, must be met to apply reduced withholding tax rates under the double tax treaties. The national law details the "beneficial owner" condition and provides for the "principal purpose test" and "look through" concept.

Ukraine has ratified the Multilateral Instrument (MLI) and deposited its final positions with the OECD. On 1 December 2019, the MLI entered into force for Ukraine. The impact of the MLI on the text of Ukrainian treaties (including the date of its entry into effect for a particular treaty) should be analyzed on a case-by-case basis.

Non-treaty jurisdictions	15	0/5/15 (bbb)	15

(a) The 0% rate applies to dividends paid to one or more companies that are the beneficial owners of these dividends and if either of the following conditions is satisfied:
- The recipient company or companies hold directly or indirectly at least 50% of the capital of the company paying the dividends, and the total amount of their investments in the paying company is not less than 5 million French francs (the tax authorities have clarified that EUR762,245 equivalent shall apply).
- The investments of the recipient companies in the company paying the dividends are guaranteed or insured by the other state, the central bank of such state or a person acting on behalf of such state.

The 5% rate applies to dividends paid to companies that own at least 20% of the capital of a Ukrainian resident payer or 10% of the capital of a French resident payer. The 15% rate applies to other dividends.

(b) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights for literary, dramatic, musical or artistic works (excluding royalties with respect to cinematographic films or any means of image or sound reproduction for use in radio or television). The higher rate applies to other royalties.

(c) The 0% rate applies if the beneficial owner of the dividends is a pension scheme. The 5% rate applies to dividends if the beneficial owner is a company that holds directly or indirectly at least 20% of the capital of the payer.

(d) The lower rate applies to dividends paid to companies that are the beneficial owners of such dividends and own a minimum percentage of the capital of the payer (under the treaties, this percentage ranges from 10% to 50%). The higher rate applies to other dividends. Additional conditions may apply.

(e) The 0% rate may apply to interest paid to or, in some cases, by government institutions or central banks of the contracting states. In some cases, the 0% rate also applies to the following:

- Interest paid to entities authorized by government institutions
- Interest on debt claims that are warranted, insured or directly or indirectly financed by the state or a financial institution wholly owned by the state

Specific institutions are named in some treaties. The higher rate applies to other interest (additional beneficial ownership requirements may apply).

(f) The 0% rate applies to payments for the use of, or the right to use, computer software. The 10% rate applies to other royalties.

(g) The 0% rate applies if the beneficial owner of the dividends is a pension fund of the other state.

(h) The 0% rate applies to interest paid to the state or an agency owned or controlled by the state and to interest paid to a resident of a contracting state with respect to a loan or other debt claim or credit granted, guaranteed or insured by public entities owned or controlled by the state (may be subject to additional conditions). The 2% rate applies to interest on loans from banks or financial institutions and to interest with respect to sales on credit of merchandise or services between enterprises or sales of industrial, commercial or scientific equipment. The higher rate applies to other interest.

(i) The 0% rate applies to dividends paid to companies (other than partnerships) whose investment in the capital of the payer is guaranteed or insured by government institutions, the central bank or an agency or instrumentality (including a financial institution) owned or controlled by the government and to dividends paid to pension funds. The 5% rate applies to dividends paid to companies (other than partnerships) owning at least 20% of the payer. The 15% rate applies to other dividends.

(j) The 0% rate applies to interest paid to the state or an agency owned or controlled by the state and to interest paid to a resident of a contracting state with respect to a loan or other debt claim or credit granted, guaranteed or insured by public entities owned or controlled by the state. The 2% rate applies to the following:

- Interest paid on loans granted by banks or other financial institutions of the other state
- Interest paid with respect to the sale on credit of industrial, commercial or scientific equipment, or with respect to the sale or furnishing on credit of goods or merchandise or services by an enterprise to another enterprise

The 10% rate applies to other interest.

(k) The 0% rate applies to payments for the use of, or the right to use, copyrights of scientific works, patents, trademarks, designs or models, plans, and secret formulas or processes, as well as to information concerning industrial, commercial or scientific experience. The higher rate applies to other royalties.

(l) The 0% rate applies to royalties paid for the use of, or the right to use, computer software, patents, designs or models, or plans. The 5% rate applies to royalties paid for the use of, or right to use, secret formulas or processes, as well as for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works including cinematographic films, and films or tapes for television or radio broadcasting, or trademarks.

(m) The 0% rate applies to dividends paid by a company resident in Ukraine to a company that is resident in Finland and that is the beneficial owner of the dividends if either of the following circumstances exists:

- The Finnish Guarantee Board has issued an investment guarantee for dividends paid or for the capital invested on which the dividends are paid.
- The recipient of the dividends has made an investment of at least USD1 million in the capital of the payer and holds at least 50% of the equity capital of the company paying the dividends.

The 0% rate is allowed with respect to dividends paid for any tax year within the period for which the abovementioned guarantee is in force or, if no such guarantee is made, with respect to dividends paid for the first three years following the year in which the investment is made. The 5% rate applies to dividends paid to companies owning at least 20% of the capital of the payer. The 15% rate applies to other dividends.

(n) The 0% rate applies if the interest is paid to the State of Finland, or a local authority or a statutory body thereof, the Bank of Finland, the Finnish Fund for Industrial Co-operation Ltd (FINNFUND) or the Finnish Export Credit Ltd or any similar institution. The 0% rate also applies to interest paid to a resident of Finland on a loan guaranteed by any of the bodies mentioned in the preceding sentence or by the Finnish Guarantee Board and paid to a resident of Finland. The 5% rate applies to interest related to commercial credit (except when the sale or indebtedness is between related persons). The 10% rate applies to other interest.

(o) A 5% rate applies to royalties paid for the use of, or right to use, scientific works, patents, trademarks, designs or models, plans, secret formulas or processes, or for information concerning industrial, commercial or scientific experience. A 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary or artistic works, including cinematographic films, and tapes for television or radio broadcasting.

(p) The 0% rate applies to the following types of interest:
- Interest paid to a beneficial owner that is the state, a political subdivision or local authority or the central bank
- Interest paid by the state in which the interest arises or by a political subdivision or local authority
- Interest paid with respect to a loan, debt claim or credit that is owed to, made, provided, guaranteed or insured by the state or a political subdivision or local authority (or by an export financing agency)

The higher rate applies to other interest.

(q) The 10% rate applies to dividends paid to the beneficial owner if, for an uninterrupted period of two years before the payment of the dividend, the beneficial owner owned directly at least 25% of the capital stock of the company paying the dividends. The higher rate applies to other dividends.

(r) The 0% rate applies to payments for the use of, or the right to use, software, patents, trademarks, designs or models, plans, or secret formulas or processes, or for information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

(s) The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, secret formulas or processes, as well as for information concerning industrial, commercial or scientific experience. The 15% rate applies to other royalties.

(t) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the voting power of the payer of the dividends and if at least 50% of the voting power of the company that is the beneficial owner of the dividends is held by residents of the beneficial owner's contracting state.

(u) The 0% rate applies to the following:
- Interest paid on loans provided, guaranteed or insured by a government of a state where the beneficial owner of the interest is located, or interest on loans made, guaranteed or insured on behalf of such government by an authority thereof that is so entrusted
- Interest with respect to indebtedness arising on sales on credit by enterprises of merchandise or industrial, commercial or scientific equipment to an enterprise of another contracting state, unless the sale or indebtedness is between related persons

The 10% rate applies to other interest payments.

(v) The 0% rate applies to royalties paid for patents concerning industrial and manufacturing know-how or processes, agriculture, pharmaceuticals, computers, software, building constructions, secret formulas or processes, as well as for information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

(w) The 0% rate applies to interest derived by the government, a political subdivision or a local authority, central bank of a contracting state or other financial institution established and owned by the government to promote trade and investment, as well as to interest paid to residents of a contracting state with respect to debt-claims guaranteed or insured by the government, a local authority thereof, the central bank or other financial institution established and owned by the government to promote trade and investment. The 10% rate applies to interest paid on loans granted by banks or other financial institutions, including investment banks, savings banks and insurance companies. The 15% rate applies to other interest payments.

(x) The 5% rate applies to royalties paid for the use of, or the right to use, patents, plans, secret formulas or processes, as well as for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

(y) The 0% rate applies to dividends paid to the government, a political subdivision or local authority, central bank or other state financial institution. The 5% rate applies to dividends paid to companies owning at least 10% of the capital of the payer. The 15% rate applies to other dividends.

(z) Notwithstanding the provisions allowing the 5% reduced rate (see footnote [d]), the 10% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends and if the dividend payer is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax.

(aa) A discrepancy exists between the Ukrainian and English texts of the Belgium treaty with respect to the withholding tax rates for interest and royalties. In the Ukrainian version, the highest treaty rate is 5%, while in the English version, it is 10%. The English version prevails in accordance with Paragraph (e) of the protocol to the treaty.

(bb) The treaty does not apply to the Hong Kong Special Administrative Region (SAR).

(cc) The 0% rate applies to dividends paid to the government, a political subdivision or local authority, the central bank or other state financial institution. The 5% rate applies to all other dividends.

(dd) The 0% rate applies to interest paid on loans granted by the government of a contracting state, including its political subdivisions and local authorities, the central bank or financial instrumentalities of that government. The 5% rate applies to interest paid on loans granted by banks. The 10% rate applies to all other interest payments.

(ee) If a resident of a contracting state has a PE in the other state, such PE may be subject to a withholding tax under the law of that other state. However, this tax may not exceed 10% of the amount of the profits of that PE after payment of the corporate tax on the profits.

(ff) Interest arising in a contracting state and paid to the government of the other contracting state, political subdivisions thereof or agencies (including financial institutions) wholly owned by that government or a political subdivision is exempt from tax in the state where the income arises, unless the rule mentioned in the following sentence applies. Interest on securities, bonds or debentures issued by the government of a contracting state, political subdivisions thereof or agencies (including financial institutions) wholly owned by that government or political subdivision thereof is taxable only in that state.

(gg) The 5% rate applies to royalties paid for the use of, or right to use, scientific works, patents, trademarks, designs or models, plans, secret formulas or processes, or, in some cases, industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary or artistic works, including cinematographic films, and tapes for television or radio broadcasting.

(hh) Interest derived by the government of the contracting state including local authorities thereof, a political subdivision, the central bank or any financial institution controlled by such government, the capital of which is wholly owned by the government of the contracting state, is exempt from tax.

(ii) The treaty rates do not apply to residents of a contracting state who perform their activity outside of this state if the income and profits of such persons are exempt from tax or are taxed at a substantially lower rate in such state.

(jj) The 0% rate applies if interest is received and actually held by the government or a political subdivision. Interest paid to and held by a resident of one contracting state is exempt from tax in the other contracting state if it is paid with respect to a loan made, guaranteed or insured or with respect to any other debt claim or credit, if the loan, debt claim or credit is guaranteed or insured on behalf of the first-mentioned state or by an authorized organ.

(kk) The 0% rate also applies if the interest is paid by a purchaser to a seller with respect to commercial credit resulting from deferred payments for goods, merchandise, equipment or services, unless the sale or indebtedness is between associated persons.

(ll) The 0% rate also applies to interest paid to an institution (including a financial institution) with respect to a loan made under an agreement between the governments of the contracting states.

(mm) The reduced rates apply if the beneficial owner of the dividends is subject to tax with respect to such dividends.

(nn) The 0% rate also applies to interest arising in a contracting state and paid to a resident of the other contracting state that was established and operated exclusively to administer or provide benefits under one or more pension, retirement or other employee benefits plans if the following conditions are satisfied:

- The recipient is the beneficial owner of the interest and is generally exempt from tax in the other state.
- The interest is not derived from the carrying on of a trade or a business or from a related person.

(oo) The 0% rate also applies to interest paid with respect to indebtedness incurred in connection with the sale on credit of industrial, commercial or scientific equipment by an enterprise that is resident of one contracting

state to an enterprise resident in the other contracting state, unless the sale or indebtedness is between associated enterprises.

(pp) Tax imposed on the earnings of a company attributable to a PE in a contracting state in addition to the tax that would be chargeable on the earnings of a company that is a national of that state may not exceed 5% of the amount of such earnings.

(qq) If a resident of a contracting state has a PE in the other state, such PE may be subject to a withholding tax under the law of that other state. However, this tax may not exceed 10% of the amount of the profits of that PE after payment of the corporate tax on the profits. This measure does not affect provisions contained in production-sharing contracts and contracts of work (or any other similar contracts) relating to the oil and gas sector or other mining sector entered into by the government of Indonesia, its instrumentalities, its relevant state oil and gas company or any other entities of the government of Indonesia, with a person that is a resident of the other contracting state.

(rr) The 0% rate applies to the interest paid with respect to bonds, debentures or similar obligations of the government, political subdivisions, local authorities or the central bank.

(ss) The 0% rate applies to dividends if the beneficial owner of the dividends is the government, the central bank, or other government institutions or statutory bodies. The 5% rate applies to dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the payer. The 15% rate applies to other dividends.

(tt) The 10% rate applies to dividends paid to the beneficial owner of the dividends if the beneficial owner owns directly at least 25% of the capital stock of the company paying the dividends. The 15% rate applies to other dividends.

(uu) The 0% rate applies to interest received and belonging to the government, political subdivisions, local authorities or the central bank.

(vv) The double tax treaty with Yugoslavia applies to Serbia and Montenegro.

(ww) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes for radio or television broadcasting. The 10% rate applies to the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

(xx) The 5% rate applies to dividends paid to the beneficial owner of the dividends if such owner holds at least 20% of the capital of the company paying the dividends and has invested in the acquisition of the shares or other rights of the company the equivalent of at least EUR100,000. The 10% rate applies in all other cases.

(yy) The 5% rate applies to royalties with respect to copyrights of scientific works, patents, trademarks, secret formulas, processes or information concerning industrial, commercial or scientific experience. The 10% rate applies in other cases.

(zz) The 0% rate applies to the following types of interest:
- Interest paid to or by the state, political subdivision or central bank
- Interest arising and paid with respect to a loan granted for a term over three years that is guaranteed or insured or to a credit granted for a term over three years that is guaranteed or insured by the authorized state institutions

The 10% rate applies in other cases. The procedure for application of these restrictions will be set by the competent authorities of Mexico and Ukraine.

(aaa) The 0% rate applies to interest if any of the following circumstances exist:
- The beneficial owner of the interest is the government or an agency authorized by the government.
- The interest is paid with respect to loans made, guaranteed or issued by or on behalf of the government or an agency authorized by the government.
- The interest is paid with respect to debt claims that are warranted, insured, or directly or indirectly financed by the government or an agency authorized by the government.

The 5% rate applies to interest paid in connection with the sale on credit of industrial, commercial or scientific equipment, or in connection with loans granted by banks. The 10% rate applies in all other cases if the recipient of the interest is resident in either treaty state and is the beneficial owner of the interest.

(bbb) See footnotes (b) and (c) in Section A.

(ccc) The 0% rate applies to interest paid with respect to a loan made, guaranteed or insured, or with respect to any other debt claim or credit guaranteed or

insured, on behalf of the state by its authorized body. The 5% rate applies to interest paid on loans granted by banks and other financial institutions (including investment banks and savings banks). The 10% rate applies to all other interest payments.

(ddd) The 5% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, as well as for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works including cinematographic films, and films or tapes for television or radio broadcasting.

(eee) The 0% rate applies to dividends paid to the government, a political subdivision or local authority, the central bank or other state financial institution. The 5% rate applies to dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the payer. The 10% rate applies to other dividends.

(fff) The 0% rate applies to interest paid to the government, a political subdivision, local authority, a statutory body or the central bank. The 5% rate applies if the interest is paid in connection with the sale on credit of industrial, commercial or scientific equipment or on any loan of whatever kind granted by a bank. The 10% rate applies to other interest.

Ukraine has signed new double tax treaties with Japan and Spain, which are pending ratification.

Ukraine has ratified a double tax treaty with Cuba, but this instrument is not yet effective.

The Minister of Finance has been authorized to sign a tax treaty with Oman and a tax treaty with Sri Lanka.

Ukraine is negotiating double tax treaties with Kenya and New Zealand and an amendment to its double tax treaty with Belgium.

Effective from 1 January 2022, the agreement between the government of Ukraine and the government of the Russian Federation on avoidance of double taxation of income and property and prevention of tax evasion is terminated.

Ukraine terminated its tax treaty with Belarus, and the Belarus-Ukraine Income and Capital Tax Treaty ceased to apply on 20 December 2022, following the notification of Belarus.

Ukraine terminated its tax treaties with Iran and Syria following the notifications of the counterparties. The termination of both treaties will take effect from 1 January 2025.

G. Special rules for the period of martial law in Ukraine

Martial law was introduced in Ukraine on 24 February 2022 by the Decree of the President of Ukraine No. 64/2022 "On Martial Law in Ukraine" and remains in place in 2024. A package of laws amending Ukrainian tax regulations for the period of martial law has been enacted, and more changes continued to be adopted. This package established special tax rules effective during the period of martial law and included, among others, the changes described below. The martial law regime (as amended from time to time) also extends to other matters referred to herein, including special foreign-exchange restrictions.

Special CPT rules. Key CPT changes included the following:

- Starting 1 April 2022, a special 2% single tax rate based on income was made available for Ukrainian companies (instead of 18% CPT and 20% VAT). Taxable income was to be calculated on a cash basis, considering special rules. If the legal

entity was a VAT payer, during the application of the single tax regime, its registration as a VAT payer was suspended. As a result, such legal entity was exempt from the obligation to charge and pay VAT on supplies of goods and services, except for the importation of goods into Ukraine, and had no right to credit input VAT. After return to the general tax rules, VAT registration renewed and legal entities needed to self-charge notional VAT liabilities on goods, services and non-current assets that were purchased with VAT before the transition to the single tax regime but were used or sold without VAT during the use of the simplified taxation regime. Legal entities involved in certain types of activities (that is, banks, financial institutions, companies operating in extracting industry, gambling and lottery companies) cannot use the special 2% single tax regime.

- Donations for the needs of state defense or humanitarian aid to the Armed Forces of Ukraine and other qualifying establishments and health care facilities set out by the law are allowed for CPT deduction in full.

In addition, several tax relief rules referring to tax administration and compliance were introduced.

Starting 1 August 2023, most of the tax incentives introduced for the period of martial law, including the possibility to apply a special 2% single tax rate based on income, are canceled and pre-war tax obligations are resumed.

The moratorium on tax audits has been gradually lifted during martial law and starting 1 December 2023, scheduled documentary tax audits of companies that fall under established criteria of "risky enterprises" are allowed as well as all types of unscheduled tax audits (except tax audits in the territories where hostilities are taking place and the temporarily occupied territories).

Tax rules for the period of martial law may be further amended or supplemented. Monitoring legislative developments is strongly recommended.

Special foreign-exchange restrictions. Despite the continuation of martial law on the territory of Ukraine, the NBU consistently takes steps to mitigate restrictions imposed due to introduction of the martial law. These mitigations include the following:

- Banks have been allowed to sell non-cash foreign currency to individuals within the established monthly limit.
- All restrictions on banks and non-bank financial institutions on the amount of foreign currency that they can sell in cash to individuals have been abolished.
- Cross-border payments to creditors have been permitted for eligible loans (including loans provided with the involvement [granted or guaranteed] of international financial institutions, a foreign import-export agency or a foreign state through an authorized entity).
- The NBU, which has been maintaining the official hryvnia exchange rate at UAH36.5686 for USD1 since the end of July 2022, has switched to a managed exchange rate flexibility regime starting 3 October 2023.

The NBU strives to maintain a balance between stimulating the economy and avoiding negative consequences; as a result, some

restrictions are still in place. These restrictions include the following:

- Cross-border transactions are substantially limited.
- Payments in foreign currency by residents for the purchase of services are suspended except for certain specifically permitted transactions as per the approved list.
- The statutory deadline for cross-border settlements is reduced to 180 days for transactions made starting 5 April 2022 (exceptions apply).
- Settlements in Russian rubles and Belarusian rubles, as well as settlements of Russian and Belarusian residents, are prohibited.
- Restrictions on cash withdrawals by individuals are introduced (tougher restrictions for withdrawals abroad and lighter restrictions for withdrawals on the territory of Ukraine).
- The set-off of claims in export and import transactions is generally prohibited (exceptions apply).
- The purchase of foreign currency is prohibited if there is still foreign currency available in bank accounts.

Currency-control rules for the period of martial law may be further amended or supplemented. Monitoring legislative developments is strongly recommended.

A. At a glance

Corporate Tax Rate (%)	9 (a)
Capital Gains Tax Rate (%)	9 (b)
Withholding Tax (%)	0
Net Operating Losses (Years)	Indefinite (c)

(a) No taxes were imposed by the federal government of the United Arab Emirates (UAE) for financial years beginning prior to 1 June 2023. The UAE Corporate Tax Law will be effective for accounting periods beginning on or after 1 June 2023. The UAE corporate tax standard rate is 9%. A rate of 0% will apply to taxable income not exceeding AED375,000 as well as to a Qualifying Free Zone Person (QFZP) with respect to their Qualifying Income. See Section B for further information. In October 2023, the UAE Federal Decree-Law No. 60 was issued. This decree has amended some provisions in the UAE Corporate Tax Law to introduce Pillar 2 provisions and the related top up tax of 15% that would be applicable to multinational enterprises (MNEs). A public consultation on Pillar Two was issued by the Ministry of Finance in March 2024 indicating that the UAE is thoroughly evaluating the implications and frameworks of these rules before implementation.

(b) For details concerning capital gains taxation, see Section B.

(c) The UAE Corporate Tax Law will allow businesses to offset losses incurred in one period against the taxable income of future periods, up to a maximum of 75% of the taxable income in each of those future periods (provided such losses are incurred after the effective date of corporate tax and some other criteria are met).

B. Taxes on corporate income and gains

Corporate tax implications for financial years prior to 1 June 2023. Although no federal taxation existed in the UAE for financial years beginning prior to 1 June 2023, each of the individual Emirates (Abu Dhabi, Ajman, Dubai, Fujairah, Ras Al Khaimah, Sharjah and Umm Al Quwain) have issued corporate tax decrees that theoretically apply to all businesses established in the UAE. However, in practice, these laws have not been applied. For the financial years beginning before 1 June 2023, taxes were imposed at the Emirate level only on oil- and gas-producing companies in accordance with specific government concession agreements, and on branches of foreign banks under specific tax decrees or regulations or in accordance with agreements with the Rulers of the Emirates in which the branches operate.

The preceding paragraph describes how the practice has evolved in the UAE at the level of the individual Emirates. Recently the Ruler of Dubai issued Law No. (1) of 2024 on taxation of foreign banks operating in Dubai. which includes new provisions to consider in the application of the federal Corporate Tax Law to foreign banks.

Several Emirates have free zones that offer tax and business incentives aimed at making the UAE a global financial and commercial center. The incentives usually include tax exemptions or a 0% tax rate for a guaranteed period (further information on Qualifying Free Zone Persons (QFZPs) is provided in the *Qualifying Free Zone Persons* section), the possibility of 100% foreign ownership, absence of customs duty within the free zone and a "one-stop shop" for administrative services. The free zones include, but are not limited to, the Dubai Airport Free Zone (DAFZ), Dubai International Financial Centre (DIFC; typically for financial services), Dubai Internet City (DIC), Dubai Media City (DMC), Dubai Multi Commodities Centre (DMCC), Dubai South (DS), Jebel Ali Free Zone (JAFZ), and the Abu Dhabi Global Market (ADGM; typically for financial services).

Corporate tax implications for financial years beginning on or after 1 June 2023. Near the end of 2022, the UAE Ministry of Finance (MoF) published the UAE Corporate Tax Law effective for accounting periods beginning on or after 1 June 2023. The primary UAE Corporate Tax Law has been supplemented with secondary legislation through a series of Cabinet Decisions, Ministerial Decisions and Federal Tax Authority (FTA) Decisions issued by the UAE Cabinet of Ministers and other topic-focused guides relating to various articles in the UAE Corporate Tax Law issued by the FTA.

Details regarding the new corporate tax rules are provided below.

Corporate tax. Under the UAE Corporate Tax Law, a taxable person shall be either a resident or a nonresident person. The definition of a resident person covers the following:

- A juridical person incorporated or otherwise established or recognized in the UAE (including a Free Zone Person; the definition of a Free Zone Person includes branches of resident and nonresident persons that are registered in a UAE free zone)

- A juridical person incorporated or otherwise established or recognized outside of the UAE that is effectively managed and controlled in the UAE
- A natural person that conducts a business activity in the UAE
- Any other person as may be determined in a Cabinet Decision

Resident taxable persons are subject to corporate income tax on their worldwide income.

A nonresident person may be subject to corporate tax if the person has a permanent establishment in the UAE, derives UAE-source income or has a nexus in the UAE. A nonresident person has a nexus in the UAE if they earn income from any immovable property in the UAE (see *Taxation of nonresidents*).

Corporate tax rates. The headline corporate tax rate is set at 9%. A rate of 0% applies to taxable income not exceeding AED375,000. A rate of 0% also applies to Qualifying Free Zone Persons with respect to their Qualifying Income.

Exempt persons. The following persons are considered as exempt persons for UAE Corporate Tax Law purposes (and as such not subject to corporate tax, albeit specific filings and elections may be required):

- Government entities
- Government-controlled entities
- Qualifying public benefit entities (based on a specific list of qualifying public benefit entities published by the MoF)
- Qualifying investment funds (investment funds that meet certain criteria)
- Persons engaged in extractive businesses (exploring, extracting, removing or otherwise producing and exploiting the natural resources in the UAE)
- Persons engaged in a non-extractive natural resource businesses (separating, treating, refining, processing, storing, transporting, marketing or distributing the natural resources in the UAE)
- Public and private pension or social security funds
- A UAE juridical person that is wholly owned and controlled by certain exempt persons under certain conditions
- Any other person as may be confirmed by the Minister of Finance

Qualifying Free Zone Persons. A QFZP is a Free Zone Person (FZP) who meets the following criteria:

- Maintains adequate substance in the UAE. A QFZP undertakes its core income-generating activity in a free zone as well as having adequate assets, number of qualified full-time employees and incurring an adequate number of operating expenditures in relation to each activity.
- Derives qualifying income. Qualifying income is defined in a Cabinet Decision as the following:
  - — Income derived from transactions with FZPs (except for income derived from Excluded Activities (according to a specific list published by the Ministry of Finance)
  - — Income derived from transactions with non-FZPs with respect to Qualifying Activities that are not Excluded Activities (according to a specific list published by the MoF)

  - — Income derived from the ownership or exploitation of Qualifying Intellectual Property (as defined in the Cabinet Decision)
  - — Any other income provided that the QFZP satisfies de minimis requirements (see *Qualifying Free Zone Persons* for more details)
- Has not elected to be subject to UAE corporate tax.
- Satisfies transfer-pricing requirements (see *Transfer pricing* in Section D).
- Meets any other conditions as communicated by the Minister.
- Prepares audited financial statements.
- Its non-qualifying revenue does not exceed the de minimis threshold (subject to specific rules and conditions).

De minimis requirements are assessed on the basis of the following thresholds (whichever is lower, and based on a specific formula providing for adjustments to be considered on revenues considered for the purposes of this calculation):
- Non-qualifying revenue should not exceed 5% of the total revenue.
- Non-qualifying revenue should not exceed AED5 million.

Qualifying income includes income realized from the following qualifying activities:
- Manufacturing of goods or materials
- Processing of goods or materials
- Trading of qualifying commodities
- Holding of shares and other securities for investment purposes
- Ownership, management and operation of ships
- Reinsurance services
- Fund management services
- Wealth and investment management services
- Headquarter services to related parties
- Treasury and financing services to related parties
- Financing and leasing of aircraft
- Distribution of goods or materials in or from a designated zone
- Logistics services
- Any activities that are ancillary to the activities listed in the above bullets

QFZPs can elect to forgo this preferential regime and be subject to the standard corporate tax rate of 9% (if so, they would not be considered as QFZPs). QFZPs that elect to forego the QFZP regime or fail to meet the relevant conditions will cease to be QFZPs for a total of five tax periods.

Taxation of nonresidents. Nonresidents are expected to be subject to UAE corporate tax on the taxable income attributable to their permanent establishment in the UAE, UAE-sourced income not attributable to a UAE permanent establishment of the nonresident or taxable income attributable to the nexus of the nonresident in the UAE (a nonresident person is regarded as having a nexus to the UAE if it derives income from an immovable property in the UAE).

In general, UAE-sourced income is the following:
- Derived from a UAE resident person
- Connected or attributable to a UAE permanent establishment of the nonresident person

- Accrued in or derived from activities performed, assets located, capital invested, and rights used or services performed or benefited from in the UAE

The UAE Corporate Tax Law also provides a more exhaustive list of income that should be regarded as UAE-sourced for corporate tax purposes (subject to additional conditions and limitations that may be determined from time to time by the MoF).

Permanent establishment. According to the UAE Corporate Tax Law, a nonresident person should be regarded as having a permanent establishment in the UAE in any of the following instances:

- The person has a fixed or permanent place in UAE through which the business is conducted (that is, a branch, an office, a factory)
- The person has and habitually exercises an authority to conduct a business in the UAE on behalf of the nonresident person
- The person has any other form of nexus in the UAE

Income allocated to a UAE permanent establishment of the nonresident is subject to UAE corporate tax under ordinary rules (that is, income allocated to the permanent establishment is expected to be considered as ordinary taxable income, subject to the headline rate of 9%, unless specific exemptions apply).

The allocation of income and expenses to the permanent establishment should be made in compliance with the arm's-length principle (as outlined in the transfer pricing rules embedded in the UAE Corporate Tax Law; see *Transfer pricing* in Section D), as if the permanent establishment was a person separate from its foreign head office.

Small-business relief. A business that has a revenue of AED3 million or below can elect to be subject to small-business relief, that is, to be not taxable, subject to meeting conditions prescribed under the relevant Ministerial Decision.

Capital gains. Capital gains are subject to corporate tax at the statutory rate of 9% unless specific exemptions or relief apply. Capital gains realized upon disposal of a qualifying shareholdings may be exempt from corporate tax if the conditions set forth for participation exemption (as discussed in *Dividends*) are met.

Additional relief (Business Restructuring Relief) from corporate tax applicability (in the form of tax deferral and rollover of capital gains taxation) may apply in case of the transfer of assets within a qualifying group (subject to specific conditions).

In certain instances, the UAE Corporate Tax Law allows for the election of taxation of unrealized gains (if and to the extent recognized for financial reporting purposes) on a realization (rather than accrual) basis, subject to conditions.

Administration. All taxpayers (except certain categories of exempted persons) are required to register and obtain a Tax Registration Number. The deadlines for corporate tax registration are stipulated in FTA Decision No. 3 of 2024 which defines separate time frames for registering for corporate tax for resident and nonresident juridical persons and natural persons.

UAE taxpayers, including QFZPs, are required to file a tax return and pay any tax due no later than nine months after the end of the financial year. Additionally, UAE taxpayers may be requested to submit financial statements to the FTA.

A QFZP, as well as taxable persons deriving revenues exceeding AED50 million, are required to prepare and maintain audited financial statements.

Dividends. Dividend income is, in general, subject to corporate tax at a 9% rate unless a specific exemption applies. Dividend income realized by a QFZP may be subject to 0% corporate tax rate if it is regarded as qualifying income.

Domestic dividend exemption. Dividend income and other profits distributions received from a juridical person (that is a UAE tax resident) are considered as exempt income for UAE corporate tax purposes.

Participation exemption. Other dividend income and profit distributions, as well as any other income derived from a qualified shareholding (such as capital gains on the sale of shares) may be exempt from UAE corporate tax if the following conditions are met:

- The taxable person has ownership of at least 5% in the shares or capital of the concerned participation (which entitle the person to not less than 5% of the profits and not less than 5% of any liquidation proceeds). This requirement is also considered to be met if the aggregated acquisition costs of the participation concerned is equal to or exceeds AED4 million.
- The taxable person has held the participation concerned, or has the intention to hold such participation, for an uninterrupted period of at least 12 months.
- The juridical person (in which the UAE taxable person holds a participating interest) is subject to corporate tax, or any other tax of a similar character, in its own jurisdiction at a rate of at least 9%.
- Not more than 50% of the direct and indirect assets of the participation concerned consist of ownership interests or entitlements that would not have qualified for the participation exemption if held directly by a taxable person.
- Other conditions prescribed by a specific Ministerial Decision (ownership interest should be classified as equity interest and ownership interest includes ordinary shares, preferred shares and redeemable shares, among others) are met.

Foreign tax credit. UAE tax residents should be subject to the UAE corporate tax on their worldwide income, which includes foreign-sourced income that may be also subject to tax in another jurisdiction. Any corporate tax paid abroad on income that is also subject to UAE corporate tax (including withholding tax paid abroad) may be allowed as a tax credit against the UAE corporate tax liability as a foreign tax credit. The foreign tax credit that will be utilized in the relevant tax period cannot exceed the amount of UAE corporate tax due in relation to the income considered (that is, taxable income that was subject to tax outside the UAE and for which foreign tax credit is claimed). Guidance to calculate such foreign tax credit has been provided in the relevant topic-specific guide issued by the FTA. Any unutilized foreign tax credit cannot be carried forward or carried back.

A UAE taxable person will need to make sure that they maintain all necessary records for the purposes of claiming the foreign tax credit.

C. Determination of taxable income

General. Taxable income should be determined separately for each taxable person on the basis of standalone financial statements prepared in accordance with accounting standards accepted in the UAE, adjusted for certain items. Such adjustments include the following:

- Exempt income
- Unrealized gain or loss (taxable person may elect to take into account gains and losses on a realization basis)
- Relief relating to transfers within a Qualifying Group or Business Structuring
- Disallowed deductions, including net interest expenditure in excess of the higher of AED12 million or 30% of the adjusted earnings before interest, taxes, depreciation, and amortization (EBITDA) and categories of disallowable expenditure, such as fines and penalties
- Transactions with related parties and connected persons (see *Connected persons* in Section E)
- Tax loss relief
- Special relief for a Qualifying Business Activity
- Any other income or expenditure that may be specified under a Cabinet Decision
- Any other adjustments as may be specified by the Minister of Finance, including transitional rules which have been introduced to support a fair and smooth transition into the new tax law

The calculation of taxable income normally follows accounting rules; however, the UAE corporate tax regime disallows or restricts the deduction of certain specific expenses.

Businesses must maintain all records and documents for seven years following the end of the tax period.

Groups of companies. A UAE resident group of companies may make an application to form a tax group and be treated as a single taxable person if all the following criteria are met:

- The parent entity and all subsidiaries are juridical persons.
- The parent company holds at least 95% of the share capital, voting rights and entitlement to profits and net assets of its subsidiaries (directly or indirectly).
- Neither the parent nor the subsidiaries can be a QFPZ or an exempted person.
- The parent and subsidiaries should have the same fiscal year and apply the same financial standards.

Once formed, the tax group is treated as a single taxable person, with the parent company responsible for the administration of compliance process on behalf of the tax group.

The parent company of the tax group needs to aggregate the financial results, assets and liabilities of each subsidiary for the purposes of calculating taxable income.

To the extent that a tax group is not formed, tax losses can be transferred from one taxable person to another on fulfillment of

certain conditions. One of the conditions is that both entities should have at least 75% direct or indirect ownership.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value added tax (VAT); the scope of VAT includes supplies of all goods and services made in the UAE as well as imports, with certain supplies being zero-rated or exempt	
Standard rate	5
Customs duties; customs duties of the Gulf Cooperation Council (GCC) countries (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the UAE) are unified; the UAE applies the unified tariff in accordance with the Harmonized System (HS) codes, issued by the World Customs Organization (WCO); under the unified customs tariff; for most products, customs duties are calculated by applying percentage rates	
General rates	Free duty/ 5/20/100/125

E. Miscellaneous matters

Foreign exchange controls. Neither the federal government of the UAE nor the individual Emirates impose foreign-exchange controls.

Economic substance. The UAE has introduced economic substance regulations for businesses (companies and branches) registered in the UAE. These regulations apply for periods commencing on or after 1 January 2019. Businesses engaged in the following activities are likely covered by these regulations and subject to compliance requirements:

- Banking
- Insurance
- Investment fund management
- Financing and leasing
- Shipping business
- Distribution and service center
- Headquarters company
- Holding company
- Intellectual property business

Businesses falling within the scope of the regulations are required to self-assess through an annual notification and report on their economic substance in the UAE by way of being directed and managed in the UAE; undertaking core income-generating activities in the UAE; and maintaining adequate employees, physical assets and expenses in the UAE.

Reduced economic substance requirements apply to holding companies. Exemptions from the economic substance requirements may apply to investment funds, businesses operating entirely in the UAE as defined in the economic substance

regulations, companies resident outside the UAE for tax purposes and branches of foreign entities that are taxed outside the UAE.

Country-by-Country Reports. The UAE has also introduced Country-by-Country Report filing requirements for businesses headquartered in the UAE, applicable for periods on or after 1 January 2019.

General anti-abuse and transitional rules. The UAE Corporate Tax Law includes general anti-abuse rules intended to disregard transactions or arrangements undertaken with the main purpose of obtaining a corporate tax advantage. These rules apply from the date the UAE Corporate Tax Law was published in the *Official Gazette* (10 October 2022). As part of its transitional rules, the UAE Corporate Tax Law also indicates that the opening balance sheet for corporate tax purposes will be the closing accounting balance sheet for the financial year immediately before the first tax year. Related party and connected person transactions undertaken during the period covered by the transitional rule are expected to comply with the arm's-length principle.

Further transitional rules have been introduced through a Ministerial Decision and these rules apply to benefit the taxpayers by not requiring the payment of tax on certain pre-corporate tax period gains on the future sale of an identified category of qualifying assets.

Transfer pricing. The UAE Corporate Tax Law also introduced transfer pricing rules. Under the UAE Corporate Tax Law, transactions or arrangement with a related party or connected person should be priced following the arm's-length principle (that is, the outcome of such transaction should be consistent with the outcome that would have been realized if the parties to the same transaction were not related or otherwise connected). In this regard, the five transfer-pricing methods in the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines are recognized; other transfer-pricing methods may be applied if one of the five transfer-pricing methods in the OECD Transfer Pricing Guidelines cannot be applied, and the application of the other transfer-pricing method is consistent with the arm's-length principle. In cases where the outcome of a transaction or arrangement between related parties does not meet the arm's-length standard, the FTA may adjust a person's taxable income accordingly to achieve the arm's-length result that appropriately reflects the facts and circumstances of the transaction or arrangement. In such cases, corresponding adjustments may also be available.

Advance pricing agreements are available under the UAE Corporate Tax Law. Further details regarding the form and manner in which applications should be made are expected.

Transfer-pricing documentation requirements. Businesses that meet certain conditions are required to maintain transfer-pricing documentation (that is, Master File and Local File). The transfer-pricing documentation must be submitted to the FTA within 30 days following a request. Similarly, the FTA may ask taxpayers to provide additional supporting information within 30 days of a request.

Under the UAE Corporate Tax Law, UAE businesses may need to file a disclosure together with their tax return no later than nine months after the end of the financial year.

Related parties. Under the law, parties to a transaction are considered related if they meet certain conditions. These conditions broadly consist of the following:

- Natural persons who are related up to the fourth degree of kinship or affiliation. This also includes affiliation through adoption or guardianship.
- A natural person and a juridical person, if the natural person (either alone or through one of its related parties) directly or indirectly owns the juridical person (that is, has a 50% or more shareholding interest).
- A natural person (whether alone or together with its related parties) who has direct or indirect "control" over a juridical person. "Control" is further defined in the UAE Corporate Tax Law.
- Two or more juridical persons, if one of the juridical persons (either alone or in conjunction with its related parties) directly or indirectly owns the other juridical person (that is, has a 50% or more ownership interest).
- A juridical person, (whether alone or in conjunction with its related parties), directly or indirectly controls another juridical person.
- Any person who (either alone or together with its related parties) has direct or indirect ownership (that is, 50% or more) or controls two or more juridical persons.
- Persons and their permanent establishments.
- Partners in an unincorporated partnership.
- Trustees, founders, settlors and beneficiaries of trusts or foundations and their related parties.

Connected persons. A person is construed to be "connected" to a business if the person meets at least one of the following conditions:

- The person is an owner of the business.
- The person is a director or an officer in the business.
- The person is a related party of any of the above (that is, a relative within the fourth degree of kinship or affiliation).

F. Tax treaties

The UAE has tax treaties currently in force with the following jurisdictions.

Albania
Algeria
Andorra
Angola
Antigua and Barbuda
Argentina
Armenia
Austria
Azerbaijan
Bangladesh
Barbados
Belarus
Belgium
France
Gabon
Georgia
Greece
Guinea

The United Kingdom left the European Union (EU) on 31 January 2020, although an agreement on transitional arrangements continued until 31 December 2020. Following the end of the transition period, the UK is no longer a member of the single market and its relationship with the EU is governed by various agreements, including the Withdrawal Agreement and the Trade and Cooperation Agreement.

A. At a glance

Corporate Income Tax Rate (%)	25 (a)(b)(c)(d)(e)(f)(g)
Capital Gains Tax Rate (%)	25 (h)
Branch Tax Rate (%)	25
Withholding Tax (%)	
Dividends	0
Interest	20 (i)(j)
Royalties	20 (i)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	1 (k)
Carryforward	Unlimited (l)

(a) The rate of corporation tax is 25% from 1 April 2023 (19% previously) for companies with profits of over GBP250,000 per year. The small profits rate is 19% for companies with profits of less than GBP50,000 per year.

Companies with profits between the two thresholds receive marginal relief so that they pay a blended rate between 19% and 25%. The threshold limits are reduced if associated companies exist.

(b) The main rate of corporation tax for ring-fence profits (that is, profits from oil extraction and oil rights in the United Kingdom and the UK continental shelf) is 30% (small profits rate of 19%). The small profits rate of 19% for ring-fence profits applies if taxable profits are below GBP50,000. This benefit is phased out for taxable profits from GBP50,000 to GBP250,000. There is also a 10% supplementary charge on adjusted ring-fence profits.

(c) The energy (oil and gas) profits levy applies on the ring-fence profits of companies producing oil and gas in the United Kingdom or on the UK continental shelf. From 26 May 2022 to 31 December 2022, the rate of the levy was 25%. From 1 January 2023 to 31 March 2028, the rate of the levy is 35%.

(d) From 1 January 2023 until 31 March 2028, the electricity generator levy imposes a 45% charge on exceptional receipts generated from the production of wholesale electricity (legislation is expected to be enacted in the summer of 2023). If a company is liable to an amount of electricity generator levy, that amount may be charged on the company as if it were an amount of corporation tax chargeable on it.

(e) From 1 April 2023, an additional 3% surcharge is levied on the profits of banks in excess of GBP25 million (before the offset of losses carried forward). The surcharge rate was previously 8%.

(f) From 1 April 2022, residential property developer tax is charged on the trading profits from residential property development activity in addition to standard corporation tax. The rate is 4% on residential property development profits that exceed an annual allowance of GBP25 million.

(g) Legislation has been enacted for accounting periods beginning after 31 December 2023 under which a global and domestic minimum tax of 15% applies to large multinationals. See Section B.

(h) Capital gains are subject to tax at the normal corporation tax rate. See Section B for details concerning the taxation of capital gains derived by nonresidents.

(i) This tax applies to payments to nonresidents and non-corporate residents.

(j) A 45% rate applies to compound interest received from the UK tax authorities in certain cases.

(k) A temporary extension for the carryback of losses for three years (up to a maximum of GBP2 million) was available for accounting periods ending between 1 April 2020 and 31 March 2022.

(l) The amount of annual profits that can be relieved by losses carried forward is limited to 50% from 1 April 2017, subject to an allowance of GBP5 million per group.

B. Taxes on corporate income and gains

Corporate income tax. Companies that are resident in the United Kingdom are subject to corporation tax on their worldwide profits, but several exemptions have the effect of focusing corporation tax on UK-related activities. Tax is imposed on the total amount of income earned from all sources in the company's accounting period, including any chargeable capital gains. However, a company can elect to exempt non-UK branch income and losses from UK corporation tax, subject to transitional rules that govern entry into the regime. This election is irrevocable and takes effect from the accounting period after the one in which the election is made.

Nonresident companies are generally subject to UK corporation tax only if they carry on a trade in the United Kingdom through a permanent establishment (however, companies should also consider any potential diverted profits tax issues; see Section E). A permanent establishment arises either from a fixed place of business in the United Kingdom through which the nonresident company carries on its business, or from an agent exercising authority to do business in the United Kingdom on behalf of the nonresident company. The amount of profit attributable to a permanent establishment is computed in accordance with the separate enterprise principle. A corporation tax charge is also

imposed for nonresidents disposing of UK land in the course of a property dealing or development trade, regardless of whether there is a UK permanent establishment and regardless of the residence of the entity.

From 6 April 2020, non-UK resident companies that carry on a UK property business or have other UK property income are chargeable to corporation tax (rather than income tax) on that income. Relief for financing costs relating to property business is subject to the normal corporation tax rules (including application of the corporate interest restriction).

A company is resident in the United Kingdom if it is incorporated in the United Kingdom or if the central management and control of the company is exercised there. However, companies regarded as resident under domestic law, but as nonresident under the tie-breaker clause of a double tax treaty, are regarded as nonresident for all corporation tax purposes.

Rates of corporation tax. The rate of corporation tax for companies with profits of over GBP250,000 per year is 25% from 1 April 2023 (previously 19%). From that date, the small profits rate remains at 19% for companies with profits of less than GBP50,000 per year. Companies with profits between the two thresholds receive marginal relief so that they pay a blended rate between 19% and 25%. These limits are divided by one plus the number of associates if a company has associated companies (subsidiaries or fellow subsidiaries), regardless of whether they are in or outside the United Kingdom. If an accounting period does not coincide with the financial year, the profits for the accounting period are time-apportioned and the appropriate rate is applied to each part.

The rate is 30% for companies with ring-fence profits (that is, profits from oil extraction and oil rights in the United Kingdom and the UK continental shelf). For ring-fence profits, a company may claim a small profits rate of corporation tax, which is 19%, if its taxable profits for an accounting period are less than GBP50,000. Ring-fence companies can claim marginal relief on profits between GBP50,000 and GBP250,000. These limits are divided by one plus the number of associates if a company has associated companies (subsidiaries or fellow subsidiaries), regardless of whether they are in or outside the United Kingdom. There is also a 10% supplementary charge on adjusted ring-fence profits.

The energy (oil and gas) profits levy applies on the ring-fence profits of companies producing oil and gas in the United Kingdom or on the UK continental shelf. From 26 May 2022 to 31 December 2022, the rate of the levy was 25%. From 1 January 2023 to 31 March 2028, the rate of the levy is 35% (legislation is in process to extend the levy to 31 March 2029). There is an investment allowance available for qualifying expenditures, with varying rates depending on the type of expenditure.

From 1 January 2023 until 31 March 2028, the electricity generator levy imposes a 45% charge on exceptional receipts generated from the production of wholesale electricity. The legislation for this levy was published in the Finance Bill on 23 March 2023 and

is expected to be enacted in summer of 2023. The general administration rules applying for corporation tax purposes also apply to the electricity generator levy.

An additional 3% (previously 8%) surcharge is levied on the profits of banks in excess of GBP25 million (before the offset of losses carried forward), from 1 April 2023, producing an overall rate on those profits of 28%.

Residential property developer tax is a tax on the trading profits of residential property developers charged in addition to standard corporation tax. It applies to profits arising from residential property development activity from 1 April 2022, including a proportion of profits of accounting periods that straddle that date. Companies not liable to corporation tax and companies that do not carry on a trade within the charge to corporation tax are outside the scope of the tax. For companies within the scope of the tax, residential property developer tax is charged at 4% on residential property development profits that exceed an annual allowance of GBP25 million.

Following extensive consultation, the United Kingdom has enacted legislation introducing a Multinational Top-up Tax and Domestic Minimum Tax that seeks to implement the Organisation for Economic Co-operation and Development (OECD) Global Anti-Base Erosion (GloBE) Model Rules. The legislation introduces a multinational top-up tax that will require in-scope UK headquartered multinational groups to pay a top-up tax if the jurisdictional effective tax in a foreign jurisdiction is less than 15%. The measures could also apply to non-UK headquartered groups with UK intermediary holding companies and certain other fact patterns, including certain split-ownership scenarios. The legislation also introduces a supplementary domestic top-up tax that will require large groups, including those operating exclusively in the United Kingdom, to pay a top-up tax if their UK operations have an effective tax rate of less than 15%.

These changes apply to large groups with over EUR750 million global revenues in at least two of the previous four accounting periods and take effect in relation to accounting periods beginning on or after 31 December 2023.

Legislation for the introduction of an under-taxed profits rule (UTPR) has not yet been enacted but it has been confirmed that it will apply for accounting periods beginning on or after 31 December 2024. It has also been confirmed that the United Kingdom will apply new anti-avoidance rules to prevent abuse of the Pillar Two transitional Country-by-Country Reporting (CbCR) safe harbor from 14 March 2024.

A special rate of corporation tax of 45% applies on restitution interest, which is compound interest received from the UK tax authorities on the repayment of tax (either by agreement or an order of a court) originally collected in breach of law, which applies to awards determined on or after 21 October 2015.

Capital gains. Gains on chargeable assets are subject to corporation tax at the corporation tax rate. For UK tax purposes, a capital gain is usually the excess of the sale proceeds over the sum of the

original cost and any subsequent qualifying capital expenditure incurred on the chargeable asset being disposed of. If chargeable assets acquired before 31 March 1982 are disposed of, only the portion of the gain after that date is usually taxable. An allowance is available for inflation up to 31 December 2017; the amount of the reduction is based on the increase in the retail price index between the date of acquisition (or 31 March 1982, if later) and 31 December 2017. This indexation allowance may be used only to eliminate a gain; it may not be used to create or increase an allowable loss.

The Substantial Shareholdings Exemption (SSE) broadly exempts from UK tax any chargeable gain on disposals made by trading companies or trading groups with substantial shareholdings (at least 10%) in other trading companies or groups. Broadly, the following are the two sets of conditions that must be satisfied:
- A substantial shareholding requirement
- A trading requirement relating to the "investee" company or subgroup

No tax is levied on a gain on the sale of shares in a UK subsidiary by a foreign nonresident parent company unless that company is deemed to represent a property-rich asset by way of an indirect disposal of property (see below). In addition, gains on the sale of assets situated in, and used in a trade carried on by a permanent establishment in, the United Kingdom are subject to corporation tax at the corporation tax rate.

Special provisions permit the deferral of the capital gains charge on qualifying business assets if the sales proceeds are reinvested. There are numerous other special rules relating to capital gains.

From 6 April 2019, UK tax is chargeable on gains derived by non-UK residents on the direct or indirect disposal of all types (residential or commercial) of UK immovable property. This applies regardless of the nature of the property or the residence of the disposing entity.

The charge also applies to certain disposals by nonresidents of interests (such as shares or partnership interests) that derive their value from UK property.

Capital losses. Capital losses are offset against capital gains of the same accounting period and, if an excess exists, they may be carried forward indefinitely (to be set off against chargeable gains of future accounting periods) but may not be carried back. Capital losses may not be used to reduce trading profits. See *Relief for losses* in Section C for rules that restrict the amount of losses that can be used in any one year, which are effective from April 2020.

Administration. Tax returns, accounts and computations must be filed within 12 months after the end of the accounting period.

Large companies (companies with annual taxable profits exceeding GBP1,500,000 divided by one plus the number of active associated companies) make quarterly installment payments of their corporation tax. The first installment is due six months and 13 days after the first day of the accounting period, and the last

installment is due three months and 14 days after the end of the accounting period. These payments are based on the estimated tax liability for the current year. Fewer payments may be required for shorter accounting periods.

For accounting periods beginning on or after 1 April 2019, the installment payment dates for corporation tax for "very large companies" (annual taxable profits exceeding GBP20 million divided by one plus the number of active associated companies) are brought forward. These companies are required to pay corporation tax in quarterly instalments in the third, sixth, ninth and 12th months of their accounting period (rather than in the seventh and 10th months of the current accounting period and the first and fourth months of the following accounting period). All other companies must pay estimates of their corporation tax liability within nine months after the end of their accounting period.

Companies not complying with the filing and payment deadlines described above are subject to interest and penalties.

A self-assessment system requires companies to assess correctly their tax liabilities or face significant penalties. In addition, the tax authority (HMRC) has extensive investigative powers.

Large businesses (see definition below) must publish annually their UK tax strategy. Those businesses that fail to do so correctly and in time are liable to a penalty. The UK tax strategy report for each accounting period must be published before the end of the accounting period to which it relates (and within 15 months of the previous one being published). The tax strategy report should include the approach of the UK group to tax governance and risk management, as well as its attitude toward tax planning, the level of risk in relation to UK taxation that the group is prepared to accept and its approach to dealing with HMRC. In broad terms, the following entities are required to publish a tax strategy:

- UK subgroups of and subsidiaries and permanent establishments of multinational groups with EUR750 million global turnover (that is, those that fall within the CbCR requirement)
- UK-headed groups, some specific UK subgroups and standalone UK entities (including companies and partnerships) with at least either GBP200 million of turnover or a balance sheet total exceeding GBP2 million

A key point is that no de minimis level is set for UK entities that are part of a EUR750 million turnover group. A UK company, subgroup or permanent establishment that is part of such a multinational group must publish a strategy, even if the level of activity in the UK is minimal.

The UK CBCR rules require large UK-headed multinational enterprises (MNEs) to provide HMRC with information about global activities, profits and taxes. They also require UK entities of foreign-headed MNEs to provide HMRC with information if those results would not otherwise be reported. Groups with turnover greater than EUR750 million are required to submit reports to HMRC within 12 months from the end of the accounting period, and there are also notification requirements. The information provided to HMRC is exchanged with other tax authorities.

From 1 April 2022, there is a requirement for large companies or partnerships to notify HMRC of any uncertain tax treatments (UTT) if there is a "tax advantage" of GBP5 million or more in the relevant period for the relevant tax (which includes corporation tax). Notification must be made on or before the filing deadline of a related "relevant return" that is due after 1 April 2022. There is an exemption to this requirement if HMRC is already aware of the uncertainty and how the business plans to treat it.

A UTT may arise when one or both of the following two triggers are met:

- The amount relates to a transaction with respect to which a provision has been recognized in the accounts of the qualifying company or partnership, to reflect that a different tax treatment may be applied to the transaction.
- In arriving at the amount, reliance was placed on an interpretation or application of the law that is different to HMRC's known interpretation or application.

The UTT only applies to large businesses with a UK turnover above GBP200 million and/or a UK balance sheet total more than GBP2 billion. It applies to partnerships and limited liability partnerships (wherever formed, incorporated, or managed and controlled) that satisfy these criteria, as well as corporates (wherever incorporated or tax resident).

Inward Investment Support. Significant inward investors can apply under HMRC's Inward Investment Support service for written confirmation of the UK tax treatment of specific transactions or events. In this context, "significant" is regarded as an investment of GBP30 million or more, but smaller investments are considered if they are potentially of importance to the national or regional economy.

Dividends. Dividends paid by UK resident companies are not subject to withholding tax. For dividends received by UK resident companies, the United Kingdom has a dividend exemption regime. A dividend or other income distribution received on or after 1 July 2009 is generally exempt from UK corporation tax if all of the following conditions are satisfied:

- The distribution falls within an exempt class or, if the recipient is a "small" company, the payer is resident in the United Kingdom or a qualifying territory.
- The distribution is not of a specified kind.
- No deduction is allowed to a resident of any territory outside the United Kingdom under the law of that territory with respect to the distribution.

Interest. Interest payments on "short loans" (loans with a duration that cannot exceed 364 days) may be made without the need to account for withholding tax. All interest payments by UK resident companies may be made without the imposition of withholding tax if the paying company reasonably believes that the interest is subject to UK corporation tax in the hands of the recipient. See Section E for a summary of the UK's rules on tax deductions for interest payments.

Foreign tax relief. Foreign direct tax on income and gains of a UK resident company other than that relating to a non-UK branch for which an exemption election has been made (see *Corporate income tax*) may be credited against the corporation tax on the same profits. The foreign tax relief cannot exceed the UK corporation tax charged on the same profits.

If a company receives a dividend from a foreign company in which it has at least 10% of the voting power, it may also obtain relief for the underlying foreign tax on the profits out of which the dividend is paid. Foreign tax relief does not apply if the dividend satisfies the conditions for the dividend exemption, unless an election is made (see *Dividends*).

C. Determination of trading income

General. The assessment is based on financial statements prepared in accordance with generally accepted accounting principles (GAAP), subject to certain adjustments and provisions. Since 1 January 2015, most UK entities (with limited exceptions) have been required to report either under International Financial Reporting Standards or under Financial Reporting Standards in the United Kingdom and Republic of Ireland (either FRS 101 or 102).

In general, to be deductible, expenses must be incurred wholly and exclusively for the purposes of the trade. However, specific reliefs and prohibitions exist for certain expenses. For example, no deduction is allowed for entertainment expenses, except for the entertaining of company employees (in certain circumstances).

Corporate and government debt and foreign-exchange differences. The rules under the "loan relationships" regime are designed to allow the tax treatment of interest, discounts and premiums on debt instruments to follow the accounting treatment in most circumstances. However, the regime includes many anti-abuse measures as well as other measures, which can restrict the allowable deductions (for further details, see Section E).

Foreign-exchange differences on most items are taxable or relievable when they are recognized in the profit-and-loss account. Specific rules apply to foreign-exchange differences arising on loans that hedge exchange risk on shareholdings.

Inventory. Inventory is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out basis; the last-in, first-out basis is not acceptable for tax purposes, even if permitted under GAAP.

Provisions. HMRC allows specific provisions made in accordance with GAAP to be deductible for tax purposes unless specific legislation provides to the contrary. However, no expenditure may be relieved more than once.

Leased assets. If leases of plant or machinery function essentially as financing transactions (long-funding leases), they are taxed as such and the following rules apply:

- The lessor includes only the finance element of the rentals arising under the lease income.

- The lessee deducts only the finance element of the rentals payable over the life of the lease and is entitled to capital allowances.

This regime applies to finance leases and certain operating leases. With the exception of some hire-purchase transactions, leases of less than five years are not affected.

The UK government has amended the legislation relating to the taxation of leases to ensure that it continues to work as set out above following the introduction of International Financial Reporting Standard (IFRS) 16. However, accounting adjustments may arise in lessee companies on adoption of IFRS 16; the tax treatment of these adjustments is complex, but they will typically be taxable or deductible for tax purposes, spread over the remaining lease term.

Tax depreciation (capital allowances)

Capital allowances are usually subject to recapture on the disposal of an asset on which capital allowances have been claimed.

Plant and machinery. There is no statutory definition of what constitutes plant for capital allowances purposes. Main pool allowances are available on most types of plant and machinery allowances, and allowances are given at 18% per year on a reducing-balance basis. Plant and machinery with a useful life of 25 years or more (long-life assets) or assets deemed to be integral features to a building (examples include electrical systems, HVAC, water installations and elevators) qualify for a lower rate of relief at 6% per year on a reducing-balance basis. An annual investment allowance (AIA) of 100% is available and applies to the first GBP1 million of investment in plant and machinery (other than cars) by all businesses, regardless of size. One AIA is available to each individual business or corporate group.

Companies can also claim "enhanced capital allowances" (100% first-year allowance) for the following new equipment:
- Electric cars and cars with zero CO2 emissions
- Plant and machinery for gas refueling stations, such as storage tanks, pumps; gas, biogas and hydrogen refueling equipment
- Zero-emission goods vehicles
- Equipment for electric vehicle charging points
- Plant and machinery for use in a freeport tax site

A super-deduction of 130% for main rate pool expenditure, and a first-year allowance of 50% for special-rate expenditure (including long-life assets), applied for expenditure incurred from 1 April 2021 up to and including 31 March 2023, but specifically excludes expenditure incurred as a result of a contract entered into prior to 3 March 2021. The qualifying expenditure was subject to several exclusions, including a general exclusion on cars, second-hand assets and assets held for leasing. The super-deduction for main rate pool expenditure is no longer available for expenditure incurred after 31 March 2023.

Instead, from 1 April 2023, companies are allowed to claim 100% capital allowances on qualifying new main rate plant and machinery investments ("full expensing"). The 50% first-year allowance for special-rate assets can also be claimed from this date. The accelerated relief is subject to similar exclusions, including

a general exclusion on cars, second-hand assets and assets held for leasing (excluding background plant and machinery).

Cars. The capital allowances rules for cars are based on their CO2 emissions per kilometer driven. From 1 April 2021, the 100% first-year allowance is available only for new cars that are either electric cars or have CO2 emissions of 0g/km. Cars emitting between 0g/km and 50g/km are added to the main pool (18%) while cars emitting above 50g/km are added to the special-rate pool (8%). For leased cars with CO2 emissions above 110g/km, 15% of the lease cost is disallowed for tax purposes. The 100% first-year allowance rate does not apply to cars that will be leased.

Nonresidential structures and buildings. A Structures and Buildings Allowance applies for new nonresidential buildings and structures (excluding land) at an annual rate of 3% on a straight-line basis. The allowance applies to contracts for construction works entered into on or after 29 October 2018.

Other. Capital allowances are also available for certain other types of expenditure, such as expenditure on mineral extraction and dredging.

Relief for losses

Trading losses. Trading losses may be used to relieve other income and capital gains of the year in which the loss was incurred and of the preceding year, provided the same trade was then carried on. Losses incurred prior to 1 April 2017 may also be carried forward without time limit but may only be relieved against future profits from the same trade. The use of losses that are carried forward as at 31 March 2015 by banks was restricted from that date to an offset of a maximum of 50% of profits and further restricted from 31 March 2016 to 25%. Anti-avoidance provisions exist to prevent the offset of losses carried forward in arrangements that are principally tax driven. A company that ceases trading may carry back trading losses and offset them against profits of the preceding 36 months.

For trade losses of the 2020-21 and 2021-22 tax years only, unrelieved losses can be carried back and offset against profits of the same trade for three years before the tax year of the loss.

The amount of trading losses that can be carried back to the preceding year remains unlimited for companies. After carrying back losses to the preceding year, a maximum of GBP2 million of unused losses will be available for carryback against profits of the same trade to the earlier two years. This means a cap of on the extended carryback of losses incurred in accounting periods ending in the period of 1 April 2020 to 31 March 2021 and a separate cap of GBP2 million on the extended carryback of losses incurred in accounting periods ending in the period of 1 April 2021 to 31 March 2022.

Non-trading losses. Relief is also available for non-trading deficits and management expenses. Specific rules provide how such losses can be used or carried forward and the order in which they can be used.

Rules relating to use of carried-forward corporate tax losses in periods beginning on or after 1 April 2017.

Losses arising in accounting periods beginning on or after 1 April 2017 can be carried forward and offset against total profits of the company and group, rather than being restricted to particular types of income. However, losses arising prior to 1 April 2017 remain subject to existing restrictions as to the profits against which they can be offset.

The amount of annual profit incurred in accounting periods beginning on or after 1 April 2017 that can be relieved by brought forward losses (whether arising before or after 1 April 2017) is limited to 50% from 1 April 2017, subject to a GBP5 million allowance per "group" ("group" for this purpose is determined using concepts similar to those in the definition found in the group relief rules but with key differences). Groups have full discretion as to how the GBP5 million allowance is used within the group. This allowance also applies to the carryforward of capital losses (see below).

No restrictions are imposed on the carryback of losses, and groups have full discretion as to how the GBP5 million allowance is used within the group.

Losses for the purposes of the new rules mean trading losses, non-trading loan relationship deficits, UK property losses, management expenses and non-trading losses on intangible fixed assets.

Capital losses. For disposals occurring on or after 1 April 2020, companies' ability to obtain relief for capital losses carried forward in each period is restricted to 50% of net capital gains arising in that period. Groups have a single allowance that allows groups unrestricted use of up to GBP5 million capital or income losses each year.

Groups of companies. UK law does not provide for tax consolidation. However, a trading loss incurred by one company within a 75%-owned group of companies may be grouped with profits for the same period realized by another member of the group. Similar provisions apply in certain consortium situations to allow a transfer of a proportion of the losses; for this purpose, a UK resident company is owned by a consortium if 75% or more of its ordinary share capital is owned by other companies, none of which individually has a holding of less than 5%. However, the consortium-owned company must not be a 75%-owned subsidiary of any company. In both situations, anti-avoidance provisions that aim to prevent artificial arrangements exist.

Capital losses cannot be grouped with capital gains of other group members under the above provisions. However, the seller of an asset and another group company may jointly elect to transfer a capital gain or allowable loss to enable offset of capital gains and capital losses. A transferred capital loss can be carried forward in the transferee company.

In a capital gains worldwide group (a 75% group but with some differences from the 75% group for group relief purposes), the transfer of assets between group companies does not result in a capital gain if the companies involved are subject to UK corporation tax. The transferee company assumes the transferor's original cost of the asset plus subsequent qualifying expenditure and

indexation. However, under an anti-avoidance provision, if the transferee company leaves the group within six years after the date of the transfer of the asset, that company is deemed to have disposed of and reacquired the asset at its market value immediately after the transfer. In certain circumstances, the chargeable gain or allowable loss that arises is added to or deducted from the proceeds of a share sale that caused the company to leave the group in the first place. The resulting gain or loss can then potentially be exempted or disallowed under the SSE (see *Capital gains*). If this provision does not apply, the gain or loss remains in the company that has left the group, but the gain or loss can be transferred by election to another company in the group. Anti-avoidance provisions that aim to prevent artificial arrangements exist. Specific rules apply to certain transfers of assets to EU group companies outside the UK corporation tax net that allows the tax due to be paid in six equal installments. The rules apply to gains arising in accounting periods ending on or after 10 October 2018 and are currently still in place.

Similar provisions for tax-neutral transfers between members of the same capital gains worldwide group with respect to assets subject to the intangible fixed assets regime exist. If the transferee company leaves the group within six years of the date of the transfer of the asset, then de-grouping occurs and the company is deemed to dispose and reacquire the asset at its market value at the time of the transfer and must make appropriate adjustments in its return. For de-groupings on or after 7 November 2018, a de-grouping does not arise in situations in which a company leaves a group as a result of a share disposal that qualifies for the SSE (see *Capital gains*), subject to anti-avoidance provisions.

Companies in the same capital gains worldwide group may also transfer debt assets and liabilities (which are loan relationships) and derivative contracts on a tax-neutral basis. However, if a de-grouping event occurs as the transferee leaves the group within six years, the transferee is deemed to have disposed of the asset or liability for consideration equal to the fair value of the asset or liability at the time of leaving the group. Unlike capital gains assets and intangible fixed assets, no reliefs are available to mitigate any de-grouping credit (gain) or debit (loss) that arises in the transferor company.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); on any supply of goods or services, other than an exempt supply, made in the United Kingdom by a taxable person in the course of business (for businesses established in the United Kingdom only); taxable if annual supplies exceed GBP85,000 (GBP90,000 from 1 March 2024)	0%/5%/20%
Digital services tax (DST); charged on gross revenues earned from 1 April 2020 by search engines, social media services and online marketplaces that derive value from UK users; a group is liable to DST if the worldwide	

Nature of tax	Rate
revenues attributable to such activities exceed GBP500 million and more than GBP25 million of these revenues are attributable to UK users; a group's first GBP25 million of revenues derived from UK users is not subject to DST; an exclusion applies to online financial marketplaces	2%
Economic crime levy; an annual charge on entities that are supervised under the Money Laundering Regulations (MLR) and whose UK revenue exceeds GBP10.2 million per year	
Small (UK revenue does not exceed GBP10.2 million)	No liability
Medium (UK revenue from 10.2 million to GBP26 million)	GBP10,000
Large (UK revenues GBP26 million to 1 billion)	GBP36,000
Very large (UK revenues more than GBP1billion) (Increased to GBP500,000 from 1 March 2024)	GBP250,000
Stamp duty; imposed on transfers of shares, securities and interests in certain partnerships; duty charged on the stampable consideration	0.5%
Stamp duty land tax (SDLT); imposed on transfers of land and buildings and certain partnership transactions; tax is charged on the final consideration, but this may be replaced by market value in certain circumstances (not applicable in Scotland and Wales; see Land and Buildings Transaction Tax [LBTT] in Scotland and Land Transaction Tax [LTT] in Wales below)	
Acquisitions of residential property by companies and certain other bodies (SDLT is charged at increasing rates for each portion of the price paid, but no SDLT is due if the consideration is less than GBP40,000); rates applicable from 23 September 2022	
Portion up to GBP250,000	3%
Portion between GBP250,001 and GBP925,000	8%
Portion between GBP925,001 and GBP1,500,000	13%
Consideration exceeds GBP1,500,000; SDLT is charged on the total consideration (subject to certain exclusions)	15%
(There is also a 2% surcharge on residential properties in England and Northern Ireland bought by non-UK residents on or after 1 April 2021.)	
(However, if a property costs more than GBP500,000, a 15% SDLT rate for corporate bodies may apply instead.)	
Nonresidential or mixed-use property

Properties worth more than GBP10 million and not more than GBP20 million	GBP143,550
Properties worth more than GBP20 million	GBP287,500

E. Miscellaneous matters

Foreign-exchange controls. No restrictions are imposed on inward or outward investments. The transfer of profits and dividends, loan principal and interest, royalties and fees is unlimited. Nonresidents may repatriate capital, together with any accrued capital gains or retained earnings, at any time, subject to company law or tax considerations.

Anti-avoidance legislation. UK tax law contains many anti-avoidance provisions, which include the substitution of an arm's-length price for intercompany transactions (including intercompany debt) with UK or foreign affiliates, the levy of an exit charge on companies transferring a trade or their tax residence from the United Kingdom and the recharacterization of income for certain transactions in securities and real property. Some of these anti-avoidance provisions apply only if the transaction is not carried out for bona fide commercial reasons.

In certain situations, legislation provides a facility for an advance clearance to be obtained from HMRC. If legislation does not provide this facility and if uncertainty exists as to the tax treatment for a transaction, a non-statutory clearance facility exists under which companies may apply to HMRC in advance of the transaction for a written confirmation of HMRC's view on how the tax law will apply to the transaction. HMRC undertakes to provide advance clearance within 28 days if evidence exists that the transaction is genuinely contemplated. It also aims to respond within this time period if certainty is sought for a transaction that has already taken place. HMRC does not provide clearance if it believes that the arrangements are primarily intended to obtain a tax advantage.

The United Kingdom has implemented a system requiring the disclosure of certain transactions and arrangements to HMRC. As a direct result of this disclosure regime, tax-planning arrangements are sometimes disclosed in advance to HMRC.

Although the United Kingdom had enacted legislation to implement the EU directive on mandatory disclosure (the Mandatory Disclosure Regime [MDR]) and automatic exchange of information regarding reportable cross-border arrangements from 1 July 2020, the UK's position subsequently changed following the conclusion of the Trade and Cooperation Agreement with the EU in December 2020. The UK has replaced the EU rules (DAC6) with rules aligned to the OECD mandatory disclosure rules. From 28 March 2023, an arrangement will be reportable to HMRC if it involves the use of opaque offshore structures or if it circumvents reporting under the Common Reporting Standard (CRS).

A general anti-abuse rule (GAAR) has been in force since 2013. The GAAR targets artificial and abusive tax-avoidance schemes and applies to the main taxes but not VAT.

Anti-hybrid rules. The previous rules counteracting structures involving hybrid entities or instruments (the anti-arbitrage rules) were replaced with broader anti-hybrid rules from 1 January 2017 in response to Action 2 of the Base Erosion and Profit Shifting (BEPS) project of the OECD. The rules effectively target deduction or non-inclusion or double deduction mismatches resulting from hybrid entities or instruments, dual-resident companies or companies with permanent establishments. The rules also cover imported mismatches. This is a situation in which the UK corporate taxpayer is not directly party to a relevant mismatch, but such a mismatch exists within a wider arrangement. Unlike the previous anti-arbitrage rules, the new rules do not contain a purpose test, and it is only necessary for it to be reasonable to suppose that the mismatch arises as a result of the specified features.

In deduction or non-inclusion cases, the mismatches are countered by the following:
- Disallowing a deduction if the payer is within the charge to UK corporation tax
- In cases in which the United Kingdom is the payee jurisdiction, taxing the income if it is reasonable to assume that the deduction has not been counteracted by equivalent rules outside the United Kingdom

In cases in which a double deduction is in more than one territory, the outcome depends on the structure and whether the other territory takes action. However, the rules often result in the United Kingdom denying a deduction unless the deduction is offset against dual-inclusion income in the same entity. Additional reporting obligations in relation to hybrid mismatches have been introduced for all company tax returns filed after 6 April 2022.

Royalty withholding tax. Rules apply to deny the benefit of double tax treaties if connected-party arrangements have as a main purpose, or one of the main purposes, the avoidance of withholding tax on intellectual property (IP) royalty payments. The rules also treat IP royalty payments paid by a nonresident company in connection with a UK permanent establishment as having a UK source and being subject to withholding tax. If such royalty payments are made in connection with an avoided permanent

establishment, a diverted profits tax charge is imposed (see *Diverted profits tax*).

UK tax treatment of intangible assets. The intangible fixed assets (IFA) regime was introduced in 2002 and changed the way the UK corporation tax system treats IFAs (such as copyrights, patents and trademarks) and goodwill by, in general, aligning the tax treatment of assets within the scope of the regime with the accounting treatment. Broadly, the commencement rules to the IFA regime mean that it does not apply to assets that existed at 1 April 2002 unless the assets were acquired from an unrelated party on or after that date. However, the 2020 Finance Act brought pre-2002 IFAs transferred to the United Kingdom after 1 July 2020 into the scope of the IFA regime (subject to certain restrictions). A change to the regime in 2015 meant that relief for amortization for goodwill and customer-related intangibles was removed. Targeted relief for goodwill and certain other assets was then reinstated from 1 April 2019.

Offshore receipts with respect to intangible property. Legislation imposes a 20% tax on gross receipts that certain foreign companies receive with respect to their intangible property if such receipts are referable to the sale of goods or services in the United Kingdom (whether that be directly by the company or indirectly, including through an unrelated party). The legislation includes some exemptions to the tax, as well as an anti-avoidance rule and a formula for apportioning income between the UK and other countries. The measure does not apply to entities that are resident in states with whom the United Kingdom has a "full tax treaty" (that is, a tax treaty that includes a nondiscrimination article), provided that the territory does not tax only on a remittance or local source basis. The government has announced that these rules will be abolished with respect to income arising from 31 December 2024 but, no legislation has yet been brought forward to achieve this abolition.

Transfer pricing. UK tax law contains measures that substitute an arm's-length price for certain intercompany transactions with UK or foreign affiliates. Companies are required to prepare their tax returns in accordance with the arm's-length principle, and retain adequate records or other documentation to support their compliance with that principle, or otherwise suffer substantial penalties. For accounting periods beginning on or after 1 April 2023, new transfer-pricing documentation requirements apply. They require large multinational businesses operating in the United Kingdom to maintain a Master File and a Local File in a prescribed and standardized format, as set out in the OECD's transfer-pricing guidelines. The transfer-pricing rules have other far-reaching consequences, and taxpayers should seek specific advice concerning their circumstances.

If both parties to a transaction are subject to UK corporation tax, and one is required to increase its taxable profits in accordance with the arm's-length principle, the other is usually allowed to decrease its taxable profits through a corresponding adjustment. Companies that were dormant as of 31 March 2004 and remain dormant are exempt from the transfer-pricing rules. Although small and medium-sized companies (unless they elect otherwise)

are exempt from the rules with respect to transactions with persons in qualifying territories (broadly, the United Kingdom and those countries with which the United Kingdom has entered into a double tax treaty containing a non-discrimination article), they can be subject to the issuance of a transfer-pricing notice by HMRC. However, for small companies, this notice can be issued only if the company has undertaken a non-arm's-length transaction with an affiliate that is taken into account in determining profits under the Patent Box regime (see *Patent Box*).

Persons that are otherwise independent but collectively control a business and have acted together with respect to the financing arrangements for the business are also subject to the UK transfer-pricing regime.

Interest restrictions. The United Kingdom's transfer-pricing measures apply to the provision of finance (as well as to trading income and expenses). As a result, companies must self-assess their tax liability on financing transactions using the arm's-length principle. Consequently, HMRC may challenge interest deductions on the grounds that, based on all of the circumstances, the loan would not have been made at all or that the amount loaned or the interest rate would have been less, if the lender was an unrelated third party acting at arm's length.

In addition, for financial periods beginning on or after 1 April 2017, the amount of relief for interest is capped at the lower of 30% of taxable earnings before interest, depreciation and amortization (EBITDA) in the United Kingdom or the modified debt cap (the fixed ratio rule). This is tighter than the previous and now-repealed Worldwide Debt Cap and provides that a group's net tax-interest amounts in the United Kingdom cannot exceed the global net adjusted interest expense of the group. Alternatively, groups can elect for the restriction to be based on the ratio of net interest (excluding interest paid to related parties) to accounting EBITDA for the worldwide group as opposed to UK taxable EBITDA (the group ratio rule, which is also subject to a modified debt cap). If a group's net tax-interest expense exceeds its interest capacity, the excess interest is disallowed. However, the excess interest can be carried forward indefinitely (in the company in which it was disallowed) and treated as if it were an amount of interest in a subsequent period. If a group has spare capacity, it can carry this forward for up to five years. Restricted interest or spare capacity cannot be carried back.

Notwithstanding the above rules, groups may always deduct net tax-interest expense of up to GBP2 million per year (subject to existing anti-avoidance and thin-capitalization provisions).

Controlled foreign companies. The controlled foreign company (CFC) regime was significantly revised in 2012, effective for accounting periods beginning on or after 1 January 2013. The regime applies to non-UK resident companies that are controlled by UK residents. Similar rules apply to non-UK branches of UK resident companies for which an exemption election has been made.

If a CFC has profits that do not meet any of the exemptions, those profits are taxed on any UK resident companies having a 25% or

more interest in the CFC, and the regime is focused on identifying artificial diversion of profits out of the United Kingdom. Consequently, it is necessary to examine a company's income on a source-by-source basis to determine whether it falls within one of the "gateways," or whether one of the entity exemptions applies.

The following are the five "gateways," which must all be considered:
- Profits attributable to UK activities
- Non-trading finance profits
- Trading finance profits
- Captive insurance business
- Solo consolidation (for banking subsidiaries), which allows a UK bank to treat the foreign company as it were a division of the UK bank

For each gateway test, it is necessary to establish whether the test applies, and then determine which profits pass through the gateway and are chargeable profits of the CFC. Such profits are then subject to apportionment to the appropriate UK resident shareholders. Profits that fall outside one gateway may still fall within one of the others.

Several safe harbors and specific exemptions exist with respect to the gateways, intended to narrow the scope to only artificially diverted profits. In particular, a company may make a claim that between 75% and 100% of profits arising from certain "qualifying loan relationships" are exempt to the extent that they do not relate to UK significant people functions. The version of these rules as it existed up to 31 December 2018 is currently being considered in the context of the EU State Aid provisions.

The entity-level exemptions apply if any of the following circumstances exist:
- The CFC's local tax liability is 75% or more of the equivalent UK liability.
- The CFC has low profits or a low-profit margin.
- The CFC is resident in certain qualifying territories.
- A foreign company has become a CFC for the first time (in certain circumstances).

Diverted profits tax. The diverted profits tax (DPT) is an anti-avoidance measure, which is effective from 1 April 2015. It is aimed at perceived abuse in certain circumstances involving "insufficient economic substance" somewhere in the supply chain or avoided UK permanent establishments. The DPT is separate from corporation tax and is imposed at the rates listed below, on profits diverted from the United Kingdom, broadly in the following situations:
- A different transfer-pricing outcome allocating more profits to the United Kingdom and less to a low-tax entity would have resulted had all the facts, including the full supply chain and the activities undertaken by each entity in that chain, been considered.
- An alternative transaction would have been entered into in the absence of tax considerations, and it would have resulted in more taxable profits in the United Kingdom and less in a low-tax entity.

- A UK resident or nonresident carries on an activity in the United Kingdom in connection with the supply of goods, services or property by a non-UK trading company, and it is reasonable to assume that the activities are designed to ensure that no permanent establishment is established in the United Kingdom, and certain other conditions are satisfied. An exclusion applies if the total UK-related sales revenues of the company (together with connected companies) that are not already included within the charge to UK corporation tax in a 12-month accounting period are less than GBP10 million. Likewise, an exclusion applies if the total UK-related expenses of the company (together with connected companies) in a 12-month accounting period are less than GBP1 million.

Exclusions apply based on substance and the relative values of the tax and other benefits of the transactions. Transactions are also excluded from DPT if they only give rise to one or more loan relationships and associated hedging derivatives. Notification requirements (which are broader than the tax-levying measures) and a unique charging mechanism are imposed with respect to DPT.

The following are the DPT rates:
- General rate: 31% from 1 April 2023 (previously 25%)
- Diverted ring-fence or notional ring-fence profits: 55% (this stays the same from 1 April 2023)
- Diverted profits that would have been subject to the bank surcharge: 33%

Patent Box. The Patent Box regime was introduced in 2012 and is effective for accounting periods beginning on or after 1 April 2013. The regime (which is optional) taxes qualifying income relating to patents and certain other IP at a rate of 10%. This rate was phased in over five years. Therefore, the 10% rate has been available on all qualifying income from patents and certain other IP since 1 April 2017.

The Patent Box regime applies to patents granted by UK and European patent offices and certain other patent offices in the European Economic Area, as well as to patent applications that cannot be published for reasons of national security or public safety. Other innovative IP found in the medicinal, veterinary and agriculture industries is also included, such as regulatory data, marketing exclusivity, supplementary protection certificates and plant variety rights.

The 10% effective tax rate is achieved by creating an additional deduction from taxable profits and applies to all income arising from the patents, including royalties and income from the sale of patents. Significantly, it also applies to profits from the sale of products, services and processes with embedded patents.

Effective from 1 July 2016, the regime was amended in line with the recommendations of the OECD BEPS Action 5 report. For new entrants (new IP or new claimants) after 30 June 2016, an additional requirement is introduced into the regime. This requirement restricts the availability of the 10% tax rate if the claimant company has, to a significant extent, outsourced research and development (R&D) to related parties or has acquired the IP.

Qualifying income needs to be divided into substreams and then the nexus fraction applied (broadly based on the amount of R&D performed or outsourced by the company) to each income stream to determine how much income qualifies for the reduced tax rate. Existing IP in the regime as of 30 June 2016 should continue to qualify under the existing regime for up to a further five years.

R&D tax relief. For accounting periods beginning before 1 April 2024, large companies can claim a Research and Development Expenditure Credit (RDEC) for working on R&D projects. It can also be claimed by small and medium-sized enterprises (SMEs) and large companies that have been subcontracted to do R&D work by a large company. The RDEC is a tax credit equal to 20% of qualifying R&D expenditure from 1 April 2023 (previously it was 13%). The separate SME R&D Relief provides for the deduction of an extra 86% of their qualifying costs from their yearly profit from 1 April 2023, (previously, it was 130%), as well as the normal 100% deduction. SMEs can also claim a tax credit if the company is loss making, worth up to 10% of the surrenderable loss from April 2023 (previously 14.5%). From 1 April 2023, a new relief for R&D intensive loss-making companies was introduced which provides an enhanced payable credit rate of relief of 14.5% on expenditure from 1 April 2023 to 1 April 2024.

For accounting periods beginning on or after 1 April 2024, the UK has introduced a scheme which merges the RDEC relief and the SME R&D relief schemes. The merged scheme provides a 20% general rate of credit and a notional 19% tax rate for loss-makers. The relief for R&D intensive loss-making companies is available outside that merged scheme.

Asset holding companies. The UK Asset Holding Company (AHC) regime was introduced from 1 April 2022 in order to provide a simplified basis of taxation for the holding companies of alternative investment funds. If a UK tax resident company meets the conditions to be a Qualifying AHC and has elected to be treated as such, it is able to benefit from a variety of tax exemptions and simplifications, including the following:

- A simplified gains exemption that applies without any requirements in relation to the trading status of the underlying investment, holding period or ownership percentage
- An ability to return funds to investors in capital form for UK tax purposes and without incurring stamp duty
- An exemption from UK interest withholding tax on both third-party and shareholder debt

Dual-resident companies. A dual-resident company that is broadly not a trading company loses the right to surrender its losses to fellow group members and is prevented from enjoying certain other reliefs. These rules effectively prevent such dual-resident companies from obtaining double reliefs in both countries of residence.

Freeports and investment zones. The UK government has designated certain areas as freeports, in which companies can access tax incentives such as relief from SDLT, reduced employers' social security contributions and enhanced capital allowances. The government has also announced several investment zones

designated around the United Kingdom, which will offer similar tax incentives to companies investing in these areas.

Impact of decisions of the Court of Justice of the European Union. Historically, the UK tax system has been subject to significant external influence in the form of binding decisions rendered by the Court of Justice of the European Union (CJEU).

Under the European Union (Withdrawal) Act 2018, now that the United Kingdom has left the EU, the existing body of EU law has been converted into British law so that the same rules applied following the end of the Brexit transition period as did before the end of the period. The UK parliament is now free, subject to international agreements and treaties, to amend, repeal or improve any law as necessary. Following the end of the transition period on 31 December 2020, the CJEU has no general jurisdiction in the United Kingdom (though it has a specific role with respect to certain matters in the transition agreement). The UK courts are not required to consider post-Brexit CJEU case law but will interpret the meaning of retained EU law by reference to relevant pre-Brexit CJEU case law.

Devolution of tax powers. Legislation enabling devolution of some corporation tax powers (including the power to set a Northern Ireland rate with respect to certain trading profits) to the Northern Ireland Assembly was enacted during 2015 and will take effect on a date to be determined by statutory instrument. To date, the power to set a Northern Ireland corporate tax rate has not been devolved, but a rate of 12.5% has been proposed. Although certain tax-raising powers have been devolved to the Scottish Parliament and Welsh Assembly (such as LBTT and LTT; see Section D), the power over corporation tax has not yet been devolved.

F. Treaty withholding tax rates

The rates in the table below reflect the lower of the treaty rate and the rate under domestic tax law. The table is for general guidance only.

Under UK domestic law, withholding tax is not imposed on dividends.

From 1 June 2021, the UK domestic legislation to transpose the EU Interest and Royalties Directive was repealed. From that date, UK payers of interest and royalties will need to look to withholding tax provisions in the relevant double tax treaty in order to reduce or eliminate UK withholding tax on payments of interest and royalties out of the United Kingdom to EU-connected companies.

Anti-avoidance provisions may also restrict treaty benefits in certain circumstances. In particular, it will be necessary to consider amendments to treaties through the mechanism of the Multilateral Instrument (MLI) as part of the G20/OECD's BEPS initiative.

(a) Withholding tax may not apply to interest paid with respect to loans from banks and insurance companies, securities quoted on a stock exchange, and certain sales of machinery and equipment.

(b) No withholding tax is imposed on royalties paid for copyrights of literary, dramatic, musical or artistic works (except motion pictures, films, videotapes and certain other items), payments for patents or commercial or industrial experience, or payments for the use of computer software.

(c) The 0% rate applies if the recipient is any of the following:
- The other state (including its local authorities, political subdivisions, local governments and statutory bodies)
- An individual
- A company whose shares are regularly traded on a recognized stock exchange
- A company of which less than 25% of its shares of which are owned by persons who are not residents of the other state
- A pension scheme
- A person who passes the "principal purpose test" set out in the treaty

(d) The higher rate applies to industrial, commercial, scientific, technical and technological royalties, and royalties with respect to patents, trademarks, designs or models, plans, and secret formulas or processes.

(e) The lower rate applies to payments for the use of, or right to use, industrial, commercial or scientific equipment. The higher rate applies to other royalties.

(f) The lower rate applies to payments for the use of industrial, commercial or scientific equipment. The higher rate applies to other royalties.

(g) The 5% rate applies to royalties for patents, trademarks or processes as well as to royalties for know-how concerning industrial, commercial or scientific experience. The 7% rate applies to royalties for copyrights of literary, artistic or scientific works.

(h) The standard rate of withholding tax on interest is 12%. Interest is exempt from withholding tax if any of the following apply:
- The state is the payer of the interest.
- The interest is paid on a loan made, guaranteed or insured by the other contracting state.

- The interest is paid on a loan granted by a bank to an unrelated party at preferential rates and the loan is repayable over a period of not less than five years.
- The interest is paid on a debt resulting from either of the following:
  — Sales on credit of industrial, commercial or scientific equipment by a resident of the other contracting state (excluding sales between related persons).
  — Purchases of industrial, commercial or scientific equipment financed through a leasing contract.

(i) The 3% rate applies to royalties for the right to use news. The 5% rate applies to royalties for copyrights of artistic works (excluding motion picture films and television). The 10% rate applies to royalties for patents or payments for industrial experience, including the rendering of technical assistance. The 15% rate applies to other royalties.

(j) The lower rate applies to copyright royalties.

(k) A lower rate (the 7% rate under the Mongolia treaty and the 10% rate under the India and Thailand treaties) applies to interest paid to banks and other financial institutions.

(l) The higher rate applies if the recipient is a Malawi company that controls more than 50% of the voting power in the UK company that makes the payment.

(m) The 10% rate applies to interest on listed bonds.

(n) The higher rate applies to cinematographic, television and radio broadcasting royalties.

(o) The UK tax authorities consider the former Yugoslavia treaty to be applicable to Bosnia and Herzegovina, Montenegro and Serbia. New agreements have been entered into with Croatia, Kosovo, North Macedonia and Slovenia.

(p) The lower rate applies to royalties with respect to cinematographic films and films or tapes for television or radio broadcasting.

(q) The higher rate applies to royalties with respect to mines, quarries or other extractions of natural resources.

(r) The lower rate applies to the right to use industrial, commercial or scientific equipment.

(s) The lower rate applies to copyright royalties. The higher treaty rate applies to all other royalties payable with respect to rights granted after the signing of the double tax treaty.

(t) The 0% rate applies to, among other interest payments, the following:
- Interest paid to the state (or a subdivision), an individual, a pension scheme, a financial institution, a quoted company or an unquoted company if it is less than 25% owned by Bahrain residents, provided that such interest is not paid as part of an arrangement involving back-to-back loans
- Interest paid by the state (or a subdivision) or a bank, or on a quoted Eurobond

(u) The lower rate applies to interest on loans between enterprises (20% relationship required in the case of Slovenia), interest paid to a pension scheme (some treaties) or to a state or political subdivision.

(v) The lowest rate applies, depending on the treaty, to interest paid to a state or political subdivision or the central bank. Some treaties also apply this rate to interest guaranteed by or paid by the state.

(w) The lower rate applies if any of the following circumstances exists:
- The interest is paid to a state or political subdivision or the central bank.
- The interest is paid with respect to the sale on credit of merchandise or equipment to an enterprise of either country.
- The interest is paid as a result of financing provided in connection with agreements concluded between the two governments.
- The beneficial owner of the interest is a pension scheme.

(x) The 0% rate applies if any of the following circumstances exists:
- The recipient and beneficial owner of the interest is the other state or the central bank or a political subdivision or local authority thereof, a financial institution or a pension scheme.
- The interest is paid by the state in which the interest arises or by a political subdivision, or local authority thereof, or the interest is paid with respect to a loan, debt claim or credit that is owed to or made, provided, guaranteed or insured by that state or a political subdivision, local authority or export financing agency thereof.
- The interest is paid with respect to indebtedness arising as a result of the sale on credit of equipment, merchandise or services.

(y) The 0% rate applies if the recipient of the interest is the government of the other state, its central bank, an institution owned by that government, a statutory body or a bank.

(z) Qualification for the lower rate may require certification by the relevant competent authority that one of a company's main purposes is not the securing of the treaty relief.

(aa) An adjusted amount (60% of the gross amount of the royalties) is subject to the 10% rate with respect to the right to use industrial, commercial or scientific equipment.
(bb) The 0% rate applies if the recipient of the interest is the government of the other state, its political subdivisions or local authorities thereof.
(cc) Relief may be restricted to 15% in certain circumstances (see Article 11(5) of the treaty).
(dd) The 0% rate applies if the interest is paid by the state in which it arises (including its political subdivisions, local authorities or statutory bodies), or if the recipient is any of the following:
- The other state (including its political subdivisions, local authorities, central bank and statutory bodies)
- An individual
- A company whose shares are regularly traded on a recognized stock exchange
- A company of which less than 25% of its shares are owned by persons who are not residents of the other state
- A pension scheme
- A bank or building society
- A financial institution
- A person who passes the "principal purpose test" set out in the treaty

The United Kingdom has also entered into tax treaties with British Virgin Islands, Cameroon, Cayman Islands, Congo (Democratic Republic of), Iran and Lebanon. These treaties do not have articles covering dividends, interest or royalties. Payments to these countries are subject to withholding tax at the non-treaty countries' rates set forth in the above table.

The United Kingdom also has new treaties, amendments or protocols to treaties with Belgium, and Brazil which are signed but not yet in force. It has concluded negotiations with Peru and an agreed treaty is due to be signed shortly.

HMRC has indicated that it will prioritize renegotiation of treaties with EU Member States to try to replicate the benefits of the EU Interest and Royalty and Parent and Subsidiary Directives. In addition, it has been indicated that it has been undertaking negotiations with Estonia, New Zealand and Sri Lanka.

A. At a glance

Corporate Income Tax Rate (%)	21 (a)
Corporate Capital Gains Tax Rate (%)	21
Branch Tax Rate (%)	21 (a)
Branch Profits Tax (%)	30 (b)
Withholding Tax (%) (c)	
Dividends	30 (d)
Interest	30 (d)(e)
Royalties from Patents, Know-how, etc.	30 (d)
Net Operating Losses (Years)	
Carryback	0 (f)
Carryforward	Unlimited (f)

(a) The 21% rate is effective for tax years beginning after 31 December 2017. In addition, many states levy income or capital-based taxes. A base erosion and anti-abuse tax and a corporate alternative minimum tax are also imposed on certain corporations. See Section B.
(b) This is the branch profits tax applicable to non-US corporations (see Section D).
(c) Rates may be reduced by treaty.
(d) Applicable to payments to non-US corporations and nonresidents.
(e) Interest on certain "portfolio debt" obligations issued after 18 July 1984 and non-effectively connected bank deposit interest are exempt from withholding tax.
(f) A net operating loss deduction is generally limited to 80% of taxable income. Special rules apply to certain types of losses and entities. For details, see Section C.

B. Taxes on corporate income and gains

Corporate income tax. US corporations are subject to US federal taxation on their worldwide income, including income of foreign branches and certain income of their foreign subsidiaries (regardless of whether such income is repatriated to the United States in the year in which it is earned). If certain conditions are met, a US corporation is allowed a 100% deduction against the foreign-source portion of dividends received from certain foreign subsidiaries, including any gain from the sale or exchange of stock in a foreign subsidiary that is treated as a dividend under Section 1248 of the Internal Revenue Code (IRC).

In general, foreign corporations are subject to US taxation on income that is effectively connected with a US trade or business and on certain other US-source income. However, if the foreign corporation is resident in a country having an income tax treaty with the United States and is eligible to claim the benefits of that treaty, only the foreign corporation's business profits that are attributable to a permanent establishment in the United States are subject to US taxation and the rate of tax on certain other US-source income may be reduced.

The 2022 Inflation Reduction Act included a new 15% corporate alternative minimum tax (CAMT) for companies that report over USD1 billion in aggregate average annual book income, over a three-year period, which applies to years beginning after 31 December 2022. An applicable corporation is liable for the CAMT to the extent that its "tentative minimum tax" exceeds its regular US federal income tax liability plus its liability for the base erosion and anti-abuse tax (BEAT).

Rates of corporate tax. For tax years beginning after 31 December 2017, a corporation's taxable income is taxed at 21%. This rate applies both to US corporations and to the income of foreign corporations that is effectively connected with a US trade or business. Certain foreign corporations that are engaged in a US trade or business may be exempt from US tax on effectively connected income by reason of a treaty.

Base erosion and anti-abuse tax. The BEAT is an additional tax on corporations that are subject to US corporate income tax and that meet certain gross receipts and base erosion percentage thresholds. A taxpayer's BEAT liability for a tax year is the excess, if any, of an amount equal to 10% (5% for tax years beginning in the 2018 calendar year and 12.5% for tax years beginning after 31 December 2025) of the taxpayer's modified taxable income (MTI) over an amount equal to the taxpayer's regular tax liability reduced by certain credits (including the foreign tax credit). In general, MTI is the taxpayer's taxable income calculated without regard to any base erosion tax benefits (for example, current expenses or cost-recovery deductions) generated from base erosion payments and the base erosion percentage of certain net operating loss deductions. Base erosion payments include most deductible payments to foreign related persons, including payments for services, for the use of property and for depreciable or amortizable property. Base erosion payments generally do not include costs of goods sold, with exceptions.

Capital gains and losses. A corporation's gains are taxed at the same rates as ordinary income. In general, capital losses may offset only capital gains, not ordinary income. Subject to certain restrictions, a corporation's excess capital loss may be carried back three years and forward five years to offset capital gains in such other years.

Administration. The annual tax return for domestic corporations is due by the 15th day of the fourth month after the close of the company's tax year. A corporation is entitled, upon request, to an automatic six-month extension to file its return. In general, 100% of a corporation's tax liability must be paid through quarterly estimated tax installments during the year in which the income is earned. The estimated tax payments are due on the 15th day of the 4th, 6th, 9th and 12th months of the company's fiscal year.

Credit for foreign taxes. A credit is allowed for foreign income taxes paid or accrued, or deemed paid, by US corporations, but the credit is generally limited to the amount of regular US tax on the taxpayer's foreign-source taxable income. Separate limitations must also be calculated for specified categories of income, including passive income, general category income, foreign branch income, global intangible low-taxed income ([GILTI]; see Section C) and income resourced under a treaty.

C. Determination of taxable income

General. Income for tax purposes generally is computed for a tax year according to certain statutory tax provisions (for example, Sections 451 and 461 of the IRC) and underlying regulations. Consequently, taxable income typically does not equal income for financial reporting purposes.

In general, a deduction is permitted for ordinary and necessary trade or business expenses. However, expenditures that create an asset having a useful life longer than one year (and not eligible for certain exceptions, such as those relating to the bonus depreciation deduction for qualified depreciable tangible property and eligible de minimis items) may need to be capitalized and recovered over an appropriate period.

Depreciation. A depreciation deduction is available for most tangible property (except land) used in a trade or business or held for the production of income, such as rental property. Tangible depreciable property that is used in the United States and placed in service after 1986 is generally depreciated under prescribed recovery periods pursuant to the Modified Accelerated Cost Recovery System (MACRS). In general, under the MACRS, each class is assigned a recovery period and a depreciation method. Significantly, under tax reform legislation effective for tax years beginning in 2018, a 100% first-year bonus depreciation deduction is allowed for certain qualified property acquired and placed in service after 27 September 2017 and before 1 January 2023. Qualified property generally includes tangible property with a recovery period of 20 years or less under MACRS (subject to certain significant exceptions related to designated types of real property improvements), provided the certain statutory requirements are met.

After 2022, the rate of bonus depreciation for qualified property decreases over the next four years to the following rates:
- 80% for property placed in service in 2023
- 60% for property placed in service in 2024
- 40% for property placed in service in 2025
- 20% for property placed in service in 2026

The cost of intangible assets developed by a taxpayer may be amortized over the determinable useful life of an asset. Certain intangible assets, including goodwill, going concern value, patents and copyrights, may generally be amortized over 15 years if they are acquired as part of a taxable acquisition of a business.

Tax depreciation is generally subject to recapture on the sale of a depreciated asset to the extent that the sales proceeds exceed the tax value after depreciation. The amounts recaptured are subject to tax as ordinary income.

Net operating losses. If allowable deductions of a US corporation or branch of a foreign corporation exceed its gross income, the excess is called a net operating loss (NOL). With the exception of a two-year carryback for certain losses incurred in the trade or business of farming or of certain insurance companies, NOLs may not be carried back to prior years. However, corporations may generally carry losses forward indefinitely. A net operating loss deduction is generally limited to 80% of taxable income.

Inventories. Inventory is generally valued for tax purposes at either cost or the lower of cost or market value. In determining the cost of goods sold, the two most common inventory flow assumptions used are last-in, first-out (LIFO) and first-in, first-out (FIFO). The method chosen must be applied consistently. Uniform capitalization rules require the inclusion in inventory costs of allocable indirect costs.

Dividends. In general, dividends received by a US corporation from other US corporations qualify for a 50% dividends-received deduction, subject to certain limitations. The dividends-received deduction is generally increased to 65% of the dividend if the recipient corporation owns at least 20% of the distributing corporation. Dividend payments between members of an affiliated group of US corporations qualify for a 100% dividends-received deduction. In general, an affiliated group consists of a US parent corporation and all other US corporations in which the parent owns, directly or indirectly through one or more chains, at least 80% of the total voting power and value of all classes of shares (excluding non-voting preferred shares). For distributions made after 31 December 2017, the foreign source-portion of certain dividends (excluding hybrid dividends) received by a US corporation from certain 10%-owned foreign corporations may qualify for a 100% dividends-received deduction.

Consolidated returns. An affiliated group of US corporations (as described in *Dividends*) may elect to determine its taxable income and tax liability on a consolidated basis. The consolidated return provisions generally allow electing corporations to report aggregate group income and deductions. Consequently, the NOLs of some members of the group can, subject to certain limitations, be used to offset the taxable income of other members of the group, and transactions between group members, such as intercompany sales and dividends, are generally deferred or eliminated until there is a transaction outside the group. Under certain circumstances, losses incurred on the sale of consolidated subsidiaries are disallowed.

Foreign subsidiaries. Under certain circumstances, undistributed income of a foreign subsidiary controlled by US shareholders is taxed to the US shareholders on a current basis, as if the foreign subsidiary distributed a dividend on the last day of its tax year. This may result if the foreign subsidiary holds "United States property" (including loans to US shareholders) during its tax year or earns certain types of income (Subpart F, including certain passive income and "tainted" business income, and tested income that results in GILTI to the US shareholders).

Foreign-derived intangible income and global intangible low-taxed income deduction. For tax years beginning after 31 December 2017, a US corporation may deduct 37.5% (21.875% for tax years beginning after 31 December 2025) of its foreign-derived intangible income (FDII) and 50% (37.5% for tax years beginning after 31 December 2025) of its GILTI, subject to a taxable income limitation. In general, FDII equals the foreign-derived amount of a domestic corporation's deemed intangible income that is driven, in part, by sales (or leases or licenses) of property to a foreign person for a foreign use or services provided to a person, or with respect to property, in a foreign location. Deemed intangible income equals deduction-eligible income (DEI) in excess of a deemed return from tangible depreciable assets that are held by the domestic corporation and that generate DEI.

Anti-hybrid rules. For tax years beginning after 31 December 2017, a deduction is denied for any disqualified related-party amount paid or accrued pursuant to a hybrid transaction (involving payments that are treated as interest or royalties for US tax

purposes but not by the recipient's residence country) or by, or to, a hybrid entity (an entity that is fiscally transparent for US tax purposes but not for purposes of the tax law of the resident country, or vice versa).

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Branch profits tax, on branch profits (reduced by reinvested profits and increased by withdrawals of previously reinvested earnings); the rate may be reduced by treaty	30%
Branch interest tax, on interest expense paid by a branch in excess of the amount deductible against effectively connected income (unless the interest would be exempt from withholding tax if paid by a US corporation); the rate may be reduced by treaty	30%
Personal holding company (PHC) tax, applies to a corporation that satisfies a passive-income test; in addition to regular tax; imposed on undistributed income	20%
Accumulated earnings tax; penalty tax levied on a corporation (excluding a PHC) accumulating profits to avoid shareholder-level personal income tax; assessed on accumulated taxable income exceeding a calculated amount (at least USD250,000 or USD150,000 for certain personal services corporations)	20%
State and local income taxes, imposed by most states and some local governments	Various
State and local sales taxes, imposed by many states and some local governments	Various
Payroll taxes	
Federal unemployment insurance (FUTA); imposed on first USD7,000 of wages	6.0% and 0.6% (assuming full credit of 5.4%)
Workmen's compensation insurance; provisions vary according to state laws; rates vary depending on nature of employees' activities	Various
Social security contributions (including 1.45% Medicare tax); imposed on	
Wages up to USD168,600 (for 2024); paid by	
Employer	6.2%
Employee	6.2%
All covered wages (for 2024; Medicare tax); paid by	
Employer	1.45%
Employee	1.45%
(Effective from 1 January 2013, an additional Medicare tax of 0.9% applies to wages, tips, other compensation and self-employment income in excess of USD200,000 for taxpayers who file as single or head of household. For married taxpayers	

Nature of tax	Rate
filing jointly and surviving spouses, the additional 0.9% Medicare tax applies to the couple's combined wages in excess of USD250,000. The additional tax applies only to the amount owed by the employee; the employer does not pay the additional tax. Employers withhold tax only on wages in excess of USD200,000.)	

E. Miscellaneous matters

Foreign-exchange controls. The United States currently has no foreign-exchange control restrictions.

Debt-to-equity rules. The United States has a number of provisions that must be considered in evaluating whether a purported debt instrument is considered debt or equity for US tax purposes. Extensive regulations were promulgated for debt instruments issued after 4 April 2016 under Section 385 of the IRC. In such case, funds loaned to a corporation by a related party may be recharacterized by the Internal Revenue Service (IRS) as equity if a prohibited distribution (or similar) transaction occurs. As a result, the corporation's deduction for interest expense may be disallowed, and principal and interest payments may be considered distributions to the related party and be subject to withholding tax at rates applicable to distributions. Documentation requirements, which were also a part of the same set of regulations, have been withdrawn but continue to exist in case law. In addition to the Section 385 regulations, the United States has extensive case law distinguishing debt from equity and generally applying some type of facts and circumstances test in determining whether an instrument issued by a business should be considered debt or equity for US tax purposes.

If an instrument is properly considered debt, there are a number of provisions that can deny or defer the deduction for interest expense. For example, interest on certain convertible debt instruments may be disallowed. In addition, interest expense accrued on a loan from a related foreign lender must be actually paid before the US borrower can deduct the interest expense. The most expansive interest expense limitation rule is Section 163(j) of the IRC, which generally applies to all taxpayers to limit the deduction for business interest to 30% of adjusted taxable income (ATI). For the first several years of application, ATI was computed without regard to depreciation, amortization or depletion. Beginning in 2022, however, ATI is decreased by those items, thereby making the computation 30% of net interest expense exceeding earnings before interest and taxes. The Coronavirus Aid, Relief, and Economic Security (CARES) Act passed in March 2020 increased the 30% limitation to 50% for two tax years (for all taxpayers except partnerships and in all cases subject to election out and back to 30%). Interest expense must be related to a "business," which means the interest must be properly allocable to a trade or business. Certain exceptions apply, including a small business exception, and special rules apply to partnerships for purposes of determining the limitation. Disallowed interest may be carried forward to future years and allowed as a deduction. Final regulations were issued in 2020 and 2021 affirming application to controlled foreign corporations

(CFCs) and also containing an expanded anti-abuse rule. In addition, proposed regulations were issued in 2018 and 2020. The final and proposed regulations provide certain specific rules with respect to the application of Section 163(j) of the IRC, and taxpayers are advised to analyze the application of these regulations.

Transfer pricing. In general, the IRS may redetermine the tax liability of related parties if, in its discretion, this is necessary to prevent the evasion of taxes or to clearly reflect income. Specific regulations require that related taxpayers (including US persons and their foreign affiliates) deal among themselves on an arm's-length basis. Under the best-method rule included in the transfer-pricing regulations, the best transfer-pricing method is the one that provides the most reliable measure of an arm's-length result, determined based on the facts and circumstances. Transfer-pricing methods that may be acceptable, depending on the circumstances, include the comparable profits method, comparable uncontrolled price method, cost-plus method, resale price method and profit-split method. It is possible to reach transfer-pricing agreements in advance with the IRS.

If the IRS adjusts a taxpayer's tax liability, tax treaties between the United States and other countries usually provide mutual agreement procedures for the allocation of adjustments between related parties in the two countries to avoid double tax.

F. Treaty withholding tax rates

The following are US withholding tax rates for dividends, interest and royalties paid from the United States to residents of various treaty jurisdictions.

	Dividends %	Interest %	Patent and know-how royalties %
Australia	0/5/15 (a)	0/10 (b)	5
Austria	5/15 (c)	0	0
Bangladesh	10/15 (c)	5/10 (d)	10
Barbados	5/15 (c)	5	5
Belgium	0/5/15 (a)	0	0
Bulgaria	5/10 (c)	5	5
Canada	5/15 (c)	0	0/10 (e)
Chile (tt)	5/15 (uu)	4/10/15	2/10
China Mainland	10	10 (x)	10
Cyprus	5/15 (c)	10	0
Czech Republic	5/15 (c)	0	0/10 (f)
Denmark	0/5/15 (a)	0	0
Egypt	5/15 (c)	15	15
Estonia	5/15 (c)	10	5/10 (g)
Finland	0/5/15 (a)	0	0
France	0/5/15 (a)	0	0 (h)
Germany	0/5/15 (a)	0	0
Greece	30	0/30 (i)	0
Hungary (j)	5/15 (c)	0	0
Iceland	5/15 (c)	0	0/5 (k)
India	15/25 (c)	10/15 (l)	10/15 (m)
Indonesia	10/15 (c)	10	10
Ireland	5/15 (c)	0	0
Israel	12.5/25 (c)	10/17.5 (n)	10/15 (o)

	Dividends %	Interest %	Patent and know-how royalties %
Italy	5/15 (c)	0/10 (p)	0/5/8 (q)
Jamaica	10/15 (c)	12.5	10
Japan (dd)	0/5/10	0	0
Kazakhstan	5/15 (c)	10	10
Korea (South)	10/15 (c)	12	10/15 (r)
Latvia	5/15 (c)	10	5/10 (g)
Lithuania	5/15 (c)	10	5/10 (g)
Luxembourg (oo)	0/5/15 (c)(s)	0	0
Malta	5/15	10	10
Mexico	0/5/10 (u)	4.9/10/15 (v)	10
Morocco	10/15 (c)	15	10
Netherlands	0/5/15 (a)	0	0
New Zealand	0/5/15 (a)(c)	10	5
Norway	15	0 (y)	0
Pakistan	15/30 (c)	30	0/30 (pp)
Philippines	20/25 (c)	10/15 (z)	15/25 (aa)
Poland (bb)	5/15 (c)	0	10
Portugal	15 (cc)	10	10
Romania	10	10	10/15 (ee)
Russian Federation (vv)	5/10 (c)	0	0
Slovak Republic	5/15 (c)	0	0/10 (ee)
Slovenia	5/15 (c)	0/5 (qq)	5
South Africa	5/15 (c)	0	0
Spain (ii)	0/5/15	0	0
Sri Lanka	15	10	5/10 (gg)
Sweden	0/5/15 (a)	0	0
Switzerland (ff)	5/15 (c)	0	0
Thailand	10/15 (c)	10/15 (hh)	5/8/15 (rr)
Trinidad and Tobago	30	30	15
Tunisia	14/20 (c)	15	10/15 (jj)
Türkiye	15/20 (c)	10/15 (ss)	5/10 (kk)
Ukraine	5/15 (c)	0	10
USSR (ll)	30	0	0
United Kingdom	0/5/15 (mm)	0 (nn)	0
Venezuela	5/15 (c)	4.95/10 (t)	5/10 (kk)
Non-treaty jurisdictions	30	30 (w)	30

Various exceptions (for example, for governmental entities and REITs) or conditions may apply (for example, a limitation-on-benefits provision), depending upon the terms of the particular treaty.

(a) The 0% rate applies if dividends are paid by an 80%-owned US corporation to its parent company (80% ownership must be for at least a 12-month period ending on the date the dividend is declared or the entitlement is determined) and if certain other conditions are met. The 5% rate applies to dividends paid to a company that directly owns at least 10% of the voting power (or share capital, if applicable) of the payer. The 15% rate applies to other dividends.

(b) The 10% rate applies to all interest payments with the following exceptions:
- Interest derived by the government of a contracting state
- Interest derived by certain financial institutions

(c) The withholding rate is reduced to 5% (10% in the case of Bangladesh, Indonesia, Jamaica, Korea (South), Morocco, Thailand, and Trinidad and Tobago; 12.5% in the case of Israel; 14% in the case of Tunisia; 15% in the

case of India, Pakistan and Türkiye and 20% in the case of the Philippines) if, among other conditions, the recipient is a corporation owning a specified percentage of the voting power of the distributing corporation.

(d) The 5% rate applies to interest paid to banks or financial institutions and interest related to the sale on credit of industrial, commercial or scientific equipment or of merchandise.

(e) The 0% rate applies to royalties for cultural works as well as to payments for the use of, or the right to use, computer software, patents and information concerning industrial, commercial and scientific experience.

(f) The 0% rate applies to royalties paid for copyrights of literary, artistic or scientific works. The 10% rate applies to royalties paid for patents, trademarks, and industrial, commercial or scientific equipment or information.

(g) The 5% rate applies to royalties paid for the use of commercial, industrial or scientific equipment.

(h) The 0% rate applies to royalties paid for copyrights of literary, artistic or scientific works, cinematographic films, sound or picture recordings, software, patents, trademarks, designs or models, plans, secret formulas or processes, or other like right or property, or for information concerning industrial, commercial or scientific experience.

(i) The exemption does not apply if the recipient controls directly or indirectly more than 50% of the voting power in the paying corporation.

(j) On 4 February 2010, the United States and Hungary signed a new income tax treaty that would replace the existing treaty between the two countries. As of 31 December 2023, the proposed treaty had not yet received US Senate advice and consent to ratification. On 8 July 2022, the US Treasury officially began the process of terminating the US-Hungary tax treaty (signed in 1979). The termination of the treaty was effective on 8 January 2023, and with respect to taxes withheld at source, the convention ceased to have effect on 1 January 2024.

(k) The treaty provides for a general exemption from withholding tax on royalties. A 5% withholding tax rate applies to royalties for trademarks and motion pictures.

(l) The 10% rate applies to interest paid on loans granted by banks carrying on bona fide banking business and similar financial institutions.

(m) The 10% rate generally applies to royalties for the use of industrial, commercial or scientific equipment.

(n) The 10% rate applies to interest on bank loans. The 17.5% rate applies to other interest.

(o) The 10% rate applies to copyright and film royalties.

(p) The exemption applies to the following:
- Interest paid to qualified governmental entities, provided the entity owns, directly or indirectly, less than 25% of the payer of the interest
- Interest paid with respect to debt guaranteed or insured by a qualified governmental entity
- Interest paid or accrued with respect to the sale of goods, merchandise or services
- Interest paid or accrued on a sale of industrial, commercial, or scientific equipment

(q) The 0% rate applies to royalties paid for the use of certain copyright materials. The 5% rate applies to royalties paid for the use of computer software and industrial, commercial or scientific equipment. The 8% rate applies in all other cases.

(r) The 10% rate applies to royalties paid for copyrights or rights to produce or reproduce literary, dramatic, musical, or artistic works and to royalties paid for motion picture films.

(s) The rate is 0% for dividends paid by a company resident in Luxembourg if the beneficial owner of the dividends is a company that is a resident of the United States and if, during an uninterrupted period of two years preceding the date of payment of the dividends, the beneficial owner of the dividends has held directly at least 25% of the voting shares of the payer.

(t) The 4.95% rate applies to interest paid on loans made by financial institutions and insurance companies. The 10% rate applies to other interest.

(u) The 0% rate applies to the following dividends:
- Dividends paid to certain recipients that own at least 80% of the voting shares of the payer of the dividends
- Dividends paid to certain pension plans

The 5% rate applies if the conditions for the 0% rate are not met and if the recipient owns at least 10% of the payer of the dividends. The 10% rate applies if the 10% ownership threshold is not met. A protocol to the treaty provides an exemption from the 5% "dividend equivalent amount" tax if certain conditions are met (the conditions are similar to those that apply with respect to the 0% withholding tax rate on dividends).

(v) The 4.9% rate applies to interest paid on loans (except back-to-back loans) made by banks and insurance companies and to interest paid on publicly traded securities. The 10% rate applies to interest paid by banks and to interest paid by sellers to finance purchases of machinery and equipment. The 15% rate applies to other interest.

(w) Interest on certain "portfolio debt" obligations issued after 18 July 1984 and non-effectively connected bank deposit interest are exempt from withholding tax.

(x) Interest paid to state-owned enterprises in China Mainland is exempt from withholding tax.

(y) The general withholding tax rate for interest may be increased to 10% if both Norway and the United States tax interest paid to nonresidents under their domestic tax laws. Norway does not impose tax on interest paid to nonresidents and, consequently, a 0% rate applies to US-source interest under the treaty. The treaty also provides that a 0% rate applies to certain types of interest, such as interest paid on bank loans.

(z) The 10% rate applies to interest derived by a resident of one of the contracting states from sources in the other contracting state with respect to public issuances of bonded indebtedness.

(aa) The tax imposed by the source state may not exceed, in the case of the Philippines, the lowest of the following:
- 25%
- 15% if the royalties are paid by a corporation registered with the Philippine Board of Investments and engaged in preferred areas of activities
- The lowest rate of Philippine tax that may be imposed on royalties of the same kind paid under similar circumstances to a resident of a third state

(bb) On 13 February 2013, the United States and Poland signed a new income tax treaty that would replace the existing treaty between the two countries. As of 31 December 2022, the proposed treaty had not yet received US Senate advice and consent to ratification.

(cc) A reduced rate may apply if the beneficial owner of the dividend is a Portuguese company that owns at least 25% of the capital of the dividend-paying company.

(dd) On 24 January 2013, the United States and Japan signed a protocol to amend the existing income tax treaty between the countries. The protocol entered into force on 30 August 2019.

(ee) The lower rate applies to royalties for the right to use copyrights of literary, artistic or scientific works, including cinematographic films.

(ff) On 23 September 2009, the United States and Switzerland signed a protocol to amend the existing income tax treaty between the two countries. The protocol entered into force on 20 September 2019.

(gg) The 5% rate applies to rent paid for the use of tangible movable property.

(hh) The 10% rate applies to interest on loans granted by financial institutions. The 15% rate applies to other interest.

(ii) On 14 January 2013, the United States and Spain signed a new protocol to amend the existing income tax treaty and protocol between the two countries. The protocol entered into force on 27 November 2019.

(jj) The 10% rate applies to the following:
- Royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment
- Remuneration for the performance of accessory technical assistance with respect to the use of the property or rights described above, to the extent that such technical assistance is performed in the contracting state where the payment for the property or right has its source

The 15% rate applies to royalties or other amounts paid for the following:
- The use of, or right to use, copyrights of literary, artistic and scientific works, including cinematographic and television films and videotapes used in television broadcasts
- Patents, trademarks, designs and models, plans, and secret formulas and processes
- Information relating to industrial, commercial or scientific experience

(kk) The 5% rate applies to payments for the right to use industrial, commercial or scientific equipment. The 10% rate generally applies to other royalties.

(ll) The US Department of Treasury has announced that the income tax treaty between the United States and the USSR, which was signed on 20 June 1973, continues to apply to the former republics of the USSR, including Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan and Uzbekistan, until the United States enters into tax treaties with these countries. The United States has entered into tax treaties with Estonia, Kazakhstan, Latvia, Lithuania, the Russian Federation and

Ukraine. The withholding tax rates under these treaties are listed in the above table.

(mm) The 0% rate applies if the dividends are paid by US companies to UK companies that owned 80% or more of the voting shares of the payer of the dividends for a 12-month period preceding the declaration of the dividends and if either of the following additional conditions is met:
- The 80% test was met before 1 October 1998.
- The recipient is a qualified resident (or in certain cases that otherwise qualify for treaty benefits) under certain prongs of the limitation-on-benefits provision in the treaty.

The 0% rate also applies to US-source dividend payments made to UK pension schemes. The 5% rate applies if the beneficial owner of the dividends is a company owning 10% or more of the payer. For other dividends, the 15% rate applies.

(nn) Withholding tax may be imposed at the full domestic rate on interest paid in certain circumstances.

(oo) On 20 May 2009, the United States and Luxembourg signed a protocol to amend the existing income tax treaty between the two countries. The protocol entered into force on 9 September 2019.

(pp) The 0% rate does not apply to royalties or rentals from motion pictures.

(qq) The 5% rate applies to all interest payments with the following exceptions:
- Interest derived by a qualified governmental entity that does not control the payer
- Interest with respect to debt obligations guaranteed or insured by a qualified governmental entity of the payer's resident state
- Interest with respect to a deferred payment for personal property (movable property) or services

(rr) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, motion pictures, and certain broadcasting. The 8% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 15% rate applies to all other royalties.

(ss) The 10% rate applies to the following:
- Interest beneficially owned by any financial institution (including an insurance company)
- Interest related to a sale on credit of equipment, merchandise or services.

The 15% rate applies to all other interest.

(tt) The United States and Chile exchanged instruments of ratification for the first ever US-Chile income tax treaty in December 2023. The treaty entered into force on 19 December 2023. For taxes withheld at source, the treaty had effect for amounts paid or credited on or after 1 February 2024. For all other taxes, the treaty had effect for tax periods beginning on or after 1 January 2024.

(uu) An accompanying protocol to the US-Chile treaty alters the rates for dividends paid by a Chilean company to a US shareholder.

(vv) On 8 August 2023, the Russian Federation suspended certain double tax treaty benefits with countries that the Russian Federation designates as "unfriendly states," including the United States. The Russian Federation did not suspend the double tax treaties in their entirety, but only those articles which regulate reduced rates or other benefits (Clause 5 of Article 1, Articles 5 to 21, and Article 23). The Russian Federation considers provisions related to the elimination of double taxation and information exchange as still valid. The US response to the Russian Federation's suspension of certain treaty provisions in the US-Russian Federation tax treaty is unclear.

The United States and Chile signed their first-ever income tax treaty and protocol on 4 February 2010. It includes a general limitation-on-benefits provision and reductions in withholding tax rates. As of 31 December 2023, the proposed treaty and protocol had not yet received US Senate advice and consent to ratification.

The United States and Vietnam signed their first-ever income tax treaty and protocol on 7 July 2015. It includes a general limitation-on-benefits provision and reductions in withholding tax rates. As of 31 December 2022, the proposed treaty and protocol had not yet received US Senate advice and consent to ratification.

Because the US Virgin Islands operates under a system of corporate income taxation that is a mirror image of the US Internal Revenue Code (IRC), please refer to the United States chapter of this guide for further details on the applicable new provisions.

A. At a glance

Corporate Income Tax Rate (%)	23.1 (a)
Capital Gains Tax Rate (%)	23.1 (a)
Branch Tax Rate (%)	23.1 (a)
Withholding Tax (%) (b)	
Dividends	11 (c)
Interest	11 (c)
Royalties from Patents, Know-how, etc.	11 (c)
Branch Remittance Tax	11 (c)(d)
Net Operating Losses (Years) (e)	
Carryback	0
Carryforward	Unlimited

(a) This is the maximum rate. The rate includes a 10% surcharge. The 21% rate is effective for tax years beginning after 31 December 2017.

(b) The statutory rate for each withholding tax is 10%. The US Virgin Islands Bureau of Internal Revenue has taken the position that the 10% surcharge also applies to each withholding tax, and consequently the withholding rate is 11%.

(c) Under certain circumstances, these taxes may not apply to US corporations doing business in the US Virgin Islands. The US Virgin Islands Bureau of Internal Revenue has taken the position that a 10% withholding applies to dividend distributions to US corporations, despite the statutory provision stating otherwise.

(d) This is the branch profits tax, imposed on the earnings of a foreign corporation attributable to its branch, reduced by earnings reinvested in the branch and increased by reinvested earnings withdrawn (see Section B).

(e) As a general rule, no carryback is allowed for losses incurred in tax years beginning after 31 December 2017. A two-year carryback period is available in certain circumstances. An 80% net taxable income limitation is imposed for tax years commencing after 31 December 2017.

B. Taxes on corporate income and gains

Corporate income tax. The system of corporate income taxation in force in the US Virgin Islands is generally a mirror image of the US Internal Revenue Code (IRC). The applicable law is the IRC with "US Virgin Islands" substituted for all references to the "United States." Significant differences between US and US Virgin Islands taxation are discussed below.

US Virgin Islands corporations are subject to income tax on their worldwide income. A foreign corporation, which is a corporation organized outside the US Virgin Islands, is subject to income tax only on its income from US Virgin Islands sources and on its income that is effectively connected with the conduct of a trade or business in the US Virgin Islands.

Under Section 937(b) of the IRC, rules similar to those for determining US-source income or income effectively connected with the conduct of a trade or business in the United States must be used to determine if income is from sources within the US Virgin Islands or effectively connected with the conduct of a trade or business within the US Virgin Islands.

Rates of corporate income tax. Corporations are taxed at the rates specified in the IRC, except that the US Virgin Islands imposes an additional 10% surcharge on the tax liability of all domestic and foreign corporations. This increases the maximum effective income tax rate to 23.1% for tax years beginning after 31 December 2017. This rate applies both to US Virgin Islands corporations and to the income of foreign corporations that is effectively connected with a US Virgin Islands trade or business.

US Virgin Islands corporations may benefit from the tax exemptions and reductions indicated below.

Economic development program. Qualifying corporations are exempt from income tax on up to 90% of their income. In addition, they are exempt from real property, gross receipts and certain excise taxes. Other reductions in various taxes may apply.

Enterprise Zone incentives. Qualifying corporations located in historic towns are exempt from income tax on up to 90% of their income. In addition, they are exempt from real property, gross receipts and certain excise taxes. Other reductions in various taxes may apply.

Exempt companies. Qualifying corporations that are foreign-owned and do not carry on a trade or business in the United States or in the US Virgin Islands may elect a 20-year exemption from substantially all US Virgin Islands taxes.

Development of renewable and alternative energy-generation sources. Equipment or component parts brought into the US Virgin Islands for the purpose of manufacturing solar water heaters or wind or solar energy systems are exempt from the payment of custom duties and excise taxes. Also, revenues derived from the installation or construction of a renewable or alternative energy electric power or production plant or device are exempt from the gross receipts tax.

Branch profits tax and branch interest tax. The branch profits tax (BPT) and branch interest tax (BIT) rules in the US Virgin

Islands are similar to those in the United States, except that the BPT and BIT rates are 11% (including the 10% surcharge) instead of 30%. Under certain circumstances, these taxes may not apply to US corporations doing business in the US Virgin Islands.

Capital gains and losses. The provisions applicable to capital gains and losses in the US Virgin Islands are the same as those in the United States.

Administration. The annual income tax return is due by the 15th day of the fourth month after the close of the company's fiscal year. On request, a corporation receives an automatic six-month extension to file its tax return. In general, 100% of a corporation's tax liability must be paid through estimated tax installments during the year in which the income is earned.

Domestic and foreign corporations file their returns with the US Virgin Islands Bureau of Internal Revenue (USVIBIR).

Foreign tax relief. The provisions related to foreign tax credits are similar to those in the United States.

Foreign Investment in Real Property Tax Act. The Foreign Investment in Real Property Tax Act (FIRPTA) applies to corporations owning real property interests in the US Virgin Islands. Under this act, a foreign corporation (including a US corporation) pays tax attributable to its gain from the sale of US Virgin Islands property to the US Virgin Islands treasury.

C. Determination of trading income

General. The rules for determining trading income are the same as those in the United States.

Groups of companies. A US Virgin Islands corporation may not file a consolidated income tax return with a related US tax entity. However, a group of US Virgin Islands corporations may file a consolidated return with the USVIBIR if they meet the requirements set by the IRC provisions for consolidated returns.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Gross receipts tax, on total business receipts	5
Excise tax, on imported goods, merchandise and commodities for sale or for processing in the US Virgin Islands unless exempt by law; tax is computed on invoice value plus a 5% mark-up	2 to 25
Real property tax; imposed on the assessed value of the property as determined by the tax assessor; the application of exemptions and credits may not reduce the tax due to an amount less than USD180	
Unimproved noncommercial property	0.49
Residential property	0.38
Commercial property	0.71
Timeshares	1.4

Nature of tax	Rate (%)
Franchise tax, imposed annually on capital stock of domestic and foreign corporations qualified to do business in the US Virgin Islands; minimum tax is USD300	0.15 (USD1.50 per USD1,000 of capital stock)
Stamp tax, on transfer of real or personal property located in the US Virgin Islands	2 to 3.5
Payroll taxes	
Federal unemployment insurance (FUTA) plus the fund building surtax; imposed on first USD7,000 of wages	6.2
US Virgin Islands unemployment insurance (creditable against FUTA; each employer must pay USD25 annually per employee for interest accrued on the Virgin Islands Federal Trust Fund Loan)	5.4
Workmen's compensation insurance, varies depending on classification of employee's activities	Various
Social security contributions; subject to the same limitations as in the United States; imposed on	
Wages up to USD168,600 (for 2024); paid by	
Employer	6.2
Employee	6.2
Medicare portion (hospital insurance; for 2024); paid by	
Employer	1.45
Employee (subject to an additional 0.9% of Medicare tax for wages in excess of USD200,000; no employer matching contribution for Medicare tax)	1.45
Insurance premium tax, on gross premiums received by insurers for insurance policies covering risks in the US Virgin Islands; certain exceptions apply	5

E. Miscellaneous matters

Foreign-exchange controls. The US Virgin Islands has not enacted any specific foreign-exchange controls, but US laws concerning cash transaction reporting and other financial matters are applicable.

Debt-to-equity rules. The US Virgin Islands debt-to-equity rules are the same as those in the United States.

F. Treaty withholding tax rates

The US Virgin Islands does not have tax treaties with foreign governments.

Branch Tax Rate (%)	25
Withholding Tax (%)	
Dividends	7 (a)(b)(c)
Interest	12 (a)(b)(d)
Royalties	12 (a)(b)
Equipment Rent	12 (a)(b)
Technical Assistance Payments and Service Fees	12 (b)
Income Paid to Entities from Low or Nil Tax Jurisdictions or Benefiting from Low or Nil Tax Regimes	25 (e)
Branch Remittance Tax	7 (b)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) This tax applies to nonresident corporations and individuals and resident individuals. Nonresident corporations are corporations not incorporated in Uruguay.

(b) See Section B.

(c) Under Accountability Law No. 19,438, notional dividends are taxable, effective from 1 March 2017. For the purposes of this law, notional dividends are determined considering the net taxable income of the company that is more than three years old, less certain items (equity participation investments in other resident entities and investments in fixed and intangible assets, among others), subject to certain limits.

(d) From 1 January 2023, the following rates apply to interest from deposits on local financial institutions, interest from obligations and other debt titles issued by local entities, and yields of capital from the holding of certificates of participation on financial trusts, issued by local entities according to public procurement procedures and listed on the Uruguayan stock exchange:

- In national currency with a nominal fixed rate: 5.5% at a year or less, 2.5% from more than one and up to three years and 0.5% for more than three years
- In national currency with a readjustment clause: 10% at a year or less, 7% from more than one and up to three years and 5% for more than three years

- In foreign currency: 12% up to three years and 7% for more than three years

The rate is 12% in any other case.

(e) This tax applies to income paid to entities that are resident, domiciled, constituted or located in low or nil tax countries or jurisdictions or that benefit from a low or nil tax regime, except for dividends distributed by Uruguayan corporate income taxpayers. This rate applies from 1 January 2017, according to Accountability Law No. 19,438 and Fiscal Transparency Law No. 19,484. In addition, a complementary tax rate of 5.25% applies to income derived from immovable assets.

B. Taxes on corporate income and gains

Corporate income tax. Corporations are taxed on Uruguay-source income, defined as income derived from activities performed, property situated or economic rights used in Uruguay. Any profits, including capital gains, are taxable.

Significant modifications were introduced to the source criteria for fiscal years starting from 1 January 2023. For corporate income tax taxpayers that are part of a multinational group, including permanent establishments and its head office, if specific substance requirements are not met, passive income from abroad would be considered Uruguayan-source. In case of brands, all income is considered Uruguayan-source, no matter the substance.

Rate of corporate tax. The corporate tax rate is 25%.

Capital gains. Capital gains are included in ordinary income and taxed at the regular corporate rate.

Administration. Corporations are required to make monthly advance payments. These payments are calculated by applying to monthly gross income a fraction with a numerator equal to income tax for the prior tax year and a denominator equal to the corporation's gross income subject to tax for that year (the one that corresponds to the last filed corporate income tax return). Filing of tax returns and payment of the balance must be made by the fourth month after the end of the accounting period, which is the company's tax year-end.

Dividends and branch remittances. Dividends paid to resident companies are exempt from tax. Dividends paid to resident individuals are subject to personal income tax at a rate of 7% if the dividends are paid out of income subject to corporate income tax. Dividends paid to nonresident companies and individuals and branch remittances are subject to withholding tax at a rate of 7% if they are paid out of income subject to corporate income tax. Dividends and branch remittances paid out of income not subject to corporate income tax are exempt from tax. Dividends subject to withholding tax cannot exceed the taxable profit of the company.

Effective from 1 March 2017, companies must calculate and withhold personal income tax or nonresidents income tax on notional dividends, which are be deemed to be paid to shareholders. The rates of this tax are 12% on dividends from income from foreign capital investment received by resident individuals and 7% for other dividends and profit distributions. For this purpose, notional dividends are calculated in accordance with specified rules (see footnote [c] in Section A). The payer of corporate income tax acts as the "withholding" agent before it makes the actual income payment. Because no real withholding

takes place, it must pay the tax to the tax office. On receipt of actual dividends, shareholders can credit the taxes already paid against their income tax liability. Consequently, no additional tax is due.

Withholding tax on certain payments to nonresidents. In general, a 12% withholding tax is imposed on the following payments to nonresidents:

- Interest
- Royalties
- Technical assistance payments
- Publicity and advertising services
- Service fees
- Equipment rent

If a nonresident is a low or nil tax entity, the general withholding tax rate is 25%, instead of the general rate of 12%. This rate applies from 1 January 2017, according to Accountability Law No. 19,438 and Fiscal Transparency Law No. 19,484.

C. Determination of trading income

General. Tax is imposed on taxable profit, which is accounting profit earned in the accounting period after tax adjustments. An inflation adjustment is applied currently if certain conditions are met. However, under Accountability Law No. 19,438, for fiscal years ending from 1 January 2017, the inflation adjustment applies only if the inflation index increases more than 100% (in a cumulative manner) in the three-year period preceding the relevant fiscal year. All Uruguay-source income is taxable. Expenses are deductible to the extent that they are incurred in producing or maintaining taxable income, are documented, are accrued in the fiscal year and are taxable to the counterparty.

In general, payments to nonresidents are fully deductible as expenses if the effective income tax rate of the country of the recipient is 25% or higher (to be proved through a specific certificate). If the effective tax rate of the country of the recipient is lower than 25%, only a percentage of the expenses is deductible. The percentage equals the ratio of the nonresident withholding tax rate (12%) plus the effective income tax rate of the country of the nonresident (reduced by a tax credit if one exists) to the corporate income tax rate of 25% in Uruguay. If the nonresident withholding tax of 12% applies, the minimum percentage of deduction is 48% (the ratio of the withholding tax rate of 12% to the corporate income tax rate of 25%). Stock is valued according to the cost of purchases, production costs or reposition costs (the valuing of inventory according to reposition costs is accepted only if it is based on quantities, prices and conditions that reflect normal market conditions, based on the taxpayer's type of business).

Inventories. Last-in, first-out (LIFO), first-in, first-out (FIFO), average cost and market price are acceptable methods. The corporation can choose which method to use, but may not change the method without prior authorization.

Provisions. Only deductions for expenses already incurred are allowed. Provisions for bad debts and severance pay are not allowed. Bad debts may be written off if the debtor goes bankrupt

or if 18 months have elapsed since the obligation to pay the debt became due.

Depreciation. A depreciation deduction may be taken on tangible assets based on their useful lives using the straight-line method. The following are some of the applicable rates.

Asset	Rate (%)
Commercial and industrial buildings	2/3 (a)
New motor vehicles	10
Office equipment	10 (b)
Machinery and equipment	10 (b)

(a) The 2% rate applies to buildings in urban areas; the 3% rate applies to buildings in rural areas.
(b) This is the usual rate. The rate for a particular asset depends on its estimated useful life.

For some assets, the units-of-production method may be used. Goodwill may not be depreciated.

Intangible assets must be amortized based on their expected useful life. If it is not possible to determine the expected useful life, they should be amortized at an annual rate of 10%.

Tangible assets must be revalued according an index determined by the government. Intangible assets and goodwill cannot be revalued.

Relief for losses. Under Accountability Law No. 19,924, for fiscal years ended from 31 December 2020, the offset of tax losses allowed for a specific fiscal year has no limit. As a result, losses can be carried forward for five years and deducted from income without limit.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on the sale of products and most services and on imported goods	
Standard rate	22
Rate on basic foodstuffs and pharmaceuticals	10
Net worth tax, on corporate net worth, computed using values used for tax purposes; for some companies, up to 50% of this tax may be credited against corporate income tax (the current discount is 1%)	
Banks and credit card corporations	2.8
Others	1.5
(The rate applicable for entities subject to low or nil taxation that do not have a permanent establishment in Uruguay is 3%.)	
Social security contributions, on salaries and wages; imposed on	
Salaries and wages up to approximately USD6,570; paid by	
Employer; standard rate	12.625
Employee	18.1 to 23.1
Salaries and wages exceeding approximately USD6,570; paid by	

Nature of tax	Rate (%)
Employer	5.125
Employee	3.1 to 8.1
(The salary threshold for social security contributions is updated in February of each year.)	

E. Miscellaneous matters

Foreign-exchange controls. Uruguay does not impose foreign-exchange controls. No restrictions are imposed on inbound or outbound investments. The transfer of profits and dividends, loan principal and interest, royalties and fees is unlimited. Nonresidents may repatriate capital, together with accrued capital gains and retained earnings, subject to applicable withholding taxes and company law considerations (for example, the requirement that companies transfer a portion of their annual income to a reserve).

Import and export operations are transacted at a free rate determined by the market.

Debt-to-equity rules. No specific debt-to-equity rules apply in Uruguay.

Transfer pricing. Transfer-pricing regulations are included in the corporate income tax law. Transfer pricing in Uruguay is based on the arm's-length principle and is in many aspects consistent with the transfer-pricing guidelines of the Organisation for Economic Co-operation and Development (OECD). Every corporate income taxpayer that has operations with related parties must perform a transfer-pricing analysis.

F. Treaty withholding tax rates

The maximum withholding tax rates under Uruguay's double tax treaties are set forth below. The withholding tax rates can never exceed those under domestic law. The withholding tax rates in the treaties can be applied only if the nonresident is the effective beneficiary of the income.

Since June 2020, the agreement covered by the Multilateral Instrument (MLI) has been in force, and since January 2021 it has begun to have effects with respect to several double tax treaties entered into by Uruguay. Therefore, when analyzing a double tax treaty, the MLI should be taken into account to determine possible tax consequences.

	Dividends %	Interest %	Royalties %
Belgium	5/15	0/10	10

A. At a glance

Corporate Profits Tax Rate (%)	15 (a)
Capital Gains Tax Rate (%)	15 (a)
Permanent Establishment Tax Rate (%)	15 (a)
Withholding Tax (%) (b)	
Dividends	5/10 (c)
Interest	5/10 (c)
Royalties, Service Fees and Capital Gains	20 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (e)

(a) This is the general corporate profits tax rate. See Section B for other rates.
(b) The withholding taxes are generally considered to be final taxes.
(c) The 5% rate applies to dividends paid to Uzbek tax resident companies as well as to dividends and interest paid to resident individuals. The 10% rate applies to dividends and interest paid to foreign (nonresident) companies and individuals. Interest paid to Uzbek tax resident companies is not subject to withholding tax. Instead, the recipient of the interest is subject to corporate profits tax on the interest.
(d) The withholding tax is imposed on payments to foreign companies without a permanent establishment in Uzbekistan.
(e) See Section C.

B. Taxes on corporate income and gains

Corporate profits tax. Most enterprises in Uzbekistan, including Uzbek companies with foreign participation, are subject to the general profits tax regime. Enterprises with annual turnover of less than UZS1 billion (approximately USD78,772) may choose a simplified taxation regime and pay a Revenue Tax (at various rates). Foreign companies that are deemed by the tax authorities to have a permanent establishment (PE) in Uzbekistan are taxable on profits derived from business activities of the PE in Uzbekistan. The definition of a PE in Uzbek legislation is somewhat similar to

the definition of a PE in the model treaty of the Organisation for Economic Co-operation and Development (OECD), with certain exceptions. However, the legislation regarding the taxation and treatment of PEs in Uzbekistan is undeveloped. If a foreign company renders auxiliary and preparatory activities in Uzbekistan for the benefit of other entities leading to creation of a PE of a foreign company and if no remuneration is charged for these services, the taxable base of such a PE equals 20% of deductions.

Rates of corporate tax. The regular corporate profits tax rate is 15%. This rate also applies to Uzbek enterprises with foreign participation and to PEs of foreign companies. For commercial banks, mobile telecommunication operators, manufacturers of polyethylene granules, markets and shopping malls, the profits tax rate is 20%. For taxpayers included in the National Register of e-commerce that carry out electronic trade of goods or services, the corporate profits tax rate is 7.5%. For taxpayers carrying out activities in the social sphere, producers of certain agricultural goods, profits from the sale of goods and services for export and certain other taxpayers, the corporate profits tax rate is 0% (if certain conditions are met).

From 1 January 2023 to 1 January 2026, for business entities registered and operating in areas classified as Category 5 (regions with a low level of economic activity), the corporate profits tax rate is 1%. However, it is not applied to large taxpayers, permanent establishments, budget organizations and state enterprises, as well as legal entities of which the state share of the charter capital is 50% or more. For full implementation of the above-mentioned benefits, the state bodies are mandated to draft and introduce a draft law that provides for amendments and changes to the tax legislation.

Foreign legal entities without a PE in Uzbekistan are subject to withholding tax on income derived from their activities in Uzbekistan. The following are the withholding tax rates for payments to nonresidents.

Nature of payment	Rate (%)
Dividends and interest	10
International communication and freight fees	6
Insurance premiums	10
Royalties, capital gains, rent and service fees not connected with an Uzbek PE	20

The withholding tax rate for certain types of income is 0%. Also, see the *Dividends and interest* section.

Capital gains. Capital gains are generally included in taxable profits and are subject to tax at the regular corporate tax rate. Capital gains derived by nonresidents from disposals of shares in Uzbek resident legal entities or real estate located in Uzbekistan are subject to withholding tax at the general rate of 20%.

Administration. The tax year is the calendar year.

Tax declarations must be filed quarterly not later than the 20th day of the month following the reporting quarter and annually not later than 1 March of the year following the tax year.

The final tax liability must be paid by the deadline for filing the tax declarations. Companies that generated revenue of more than UZS10 billion (approximately USD787,720 for the preceding calendar year pay monthly advance payments not later than the 23rd day of each month of the reporting period.

On written request, excess payments of tax must be refunded within a 15-day period or be offset against other tax liabilities within a 10-day period. In practice, it may be difficult to obtain refunds of overpayments of tax.

Starting from 1 January 2023, corporate income tax and value-added tax (VAT) payers with a total revenue of up to UZS10 billion (approximately USD787,720) have a right to pay their tax debts on installments basis within a period of up to six months. Interest-free installments are allowed once during a calendar year.

Dividends and interest. A 5% withholding tax is imposed on payments of dividends to Uzbek tax resident companies as well as on payments of dividends and interest to resident individuals. A 10% withholding tax is imposed on payments of dividends and interest to foreign (nonresident) companies and individuals.

Effective from 1 April 2022 to 31 December 2028, the following tax benefits are available for securities holders:
- For resident and nonresident individuals, dividend income on shares is exempt from tax.
- For legal entities that are nonresidents of Uzbekistan, dividend income on shares is subject to a 5% tax similar to the tax on legal entities that are residents of Uzbekistan.
- For resident and nonresident individuals and legal entities, accrued interest income on bonds of enterprises is exempt from tax.

"Dividend tax" for PEs of nonresidents. Net profit remaining at the disposal of a nonresident operating through a PE in Uzbekistan after payment of tax is considered to be a dividend and subject to a 10% tax. However, a nonresident operating through a PE in Uzbekistan has the right to apply a reduced tax rate on dividend income provided by a relevant double tax treaty. If a tax treaty contemplates several reduced tax rates, the lowest of them can be applied.

Foreign tax relief. Under the double tax treaties of Uzbekistan, a foreign tax credit is available for foreign tax paid on income earned abroad (subject to certain documentary requirements).

C. Determination of trading income

General. Taxable profits are equal to the annual net profits disclosed in the company's Uzbek financial statements, as adjusted by the tax law. Financial statements generally must be prepared on an accrual basis using local generally accepted accounting principles (GAAP) and be supported by documentation. Large taxpayers and certain other categories of companies may conduct bookkeeping and prepare financial statements in accordance with International Financial Reporting Standards (in which case the taxpayer may also be required to make further additional adjustments for tax purposes).

The following are the most significant items that are not deductible for tax purposes:
- Nonbusiness expenses
- Entertainment expenses
- Interest on overdue and deferred loans (in excess of normal loan interest rate) as well as interest on "controlled" liability in excess of norms (see *Thin-capitalization rules* in Section E)
- Losses resulting from misappropriations of funds or assets
- Certain benefits to employees
- Charitable donations
- Penalties
- Taxes paid on behalf of other taxpayers or assessed as a result of tax audits
- Expenses on the creation or increase of reserves or provisions for bad and doubtful debts (except those stipulated for certain activities, such as activities of banks)

Special deductions. Taxable profits may be reduced by certain special investment deductions in the following amounts:
- 20% of the cost of new technological equipment, expenses for modernization and technological re-equipping of production and certain other expenses
- 10% of expenses for the expansion of production in the form of new constructions, reconstruction of buildings and constructions used for production purposes

Provisions. Banks may deduct loan loss provisions within the limits established by the Central Bank of the Republic of Uzbekistan.

Tax depreciation. The following are the applicable depreciation rates in Uzbekistan.

Assets	Rate (%)
Buildings	5
Structures	10
Trains, ships and airplanes	10
Pipelines, communication equipment, and electric power lines and equipment	15
Production machinery and equipment	20
Motor vehicles, car bodies (hulls), trailers and semi-trailers and other transport equipment	20
Computers and office equipment	40
All other assets	15

Intangible assets are amortized for tax purposes over the useful life of an asset or five years (if the useful life cannot be determined).

Relief for losses. Tax losses can be carried forward. Losses resulting from distinct types of activities (for example, general entrepreneurship activities, investment activities and partnership activities) can be carried forward to offset profits resulting from the respective type of activities only. The taxable base may be reduced by the amount of losses in accordance with the above rules only at the end of the year.

Groups of companies. A consolidated group of taxpayers is a voluntary association of taxpayers based on a relevant agreement for

assessing and paying corporate income tax considering the total financial result of the economic activities of these taxpayers.

A consolidated group of taxpayers may be created by legal entities (subject to certain criteria, for example, total revenue of legal entities that are members of the consolidated group of taxpayers from the sale of goods and services, as well as other income according to the financial statements for the calendar year, is at least UZS500 billion [approximately USD39,385,988], provided that the entity directly and/or indirectly participates in the charter [authorized] capital of other legal entities and the share of such participation in each legal entity is at least 90%). These conditions must be met during the entire term of the agreement on the creation of a consolidated group of taxpayers.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT), on the supply of all goods and services, including imports, unless they are zero-rated or exempt	12%
Excise tax; imposed on an extensive number of specified goods produced in Uzbekistan or imported into Uzbekistan; goods subject to tax include oil and gas products, alcohol, tobacco and mobile telecommunication services	Various
Property tax; imposed on the annual average depreciated value of immovable property and certain other assets; land is exempt	1.5%
Subsurface use tax; imposed on the extraction of natural resources; tax imposed on the sales price of extracted natural resources and components and on waste derived from the extraction or processing of natural resources	
Sales	2.6% to 10%
Waste	1.3% to 5%
Special rental tax on mineral extraction; imposed on the rental income received by the taxpayer from the sale of mined metal or hydrocarbon raw materials (the rate may be higher in certain cases)	25%
Signing and commercial discovery bonuses for subsurface users; payable to the state budget through the tax authorities	Various
Vehicle utilization fees; imposed on imported and manufactured (assembled) vehicles in Uzbekistan; various rates depending on the model, engine, capacity and other items	30 to 1,410 times the base specified value, which is UZS340,000 (approximately USD26.80)
Water use tax; general rates per cubic meter	
Surface water	UZS345 (approximately USD0.03)

Nature of tax	Rate
Underground water	UZ415 (approximately USD0.03)
Land tax; imposed at a fixed rate per hectare, which varies depending on the location, quality and purpose of the land plot; rate in Zone 1 of Tashkent	UZS271 million (approximately USD21,347)
Social Tax; payable by employers	
On the total payroll of state-funded organizations	25%
On the total payroll of all other entities	12%
Contributions to individual accumulative pension accounts of citizens (maintained at Peoples Bank); payable by employers on salaries of local employees; amounts of the contributions are deducted from the amounts of accrued individual income tax	0.1%

E. Miscellaneous matters

Foreign-exchange controls. The currency in Uzbekistan is the Uzbek soum (UZS).

Uzbekistan imposes various foreign-exchange controls, including the following:

- Mandatory exchange rates set by the Central Bank of the Republic of Uzbekistan for accounting, reporting, tax and customs duty calculations
- Strict control over payments in foreign currencies to parties outside Uzbekistan
- Limitations on the circulation of foreign currencies in Uzbekistan, and limitations on the domestic foreign currencies markets

Thin-capitalization rules. If the controlled liability of the taxpayer (that is, loans provided by a foreign individual or entity holding at least a 20% share of the taxpayer or by an affiliated party of such individual or entity) exceeds by 3-fold the equity of the taxpayer (for banks and leasing organizations, 13-fold), thin-capitalization rules should be applied and interest expenses above calculated thresholds are considered as nondeductible.

Controlled foreign companies. A controlled foreign company (CFC) is a foreign legal entity (not qualified as a tax resident of Uzbekistan) or a foreign structure without a status of a legal entity whose controlling persons are legal entities qualified as Uzbek tax residents.

For a CFC with a status of a legal entity, the controlling persons are legal entities that meet the following conditions:

- Its share in a foreign company exceeds 25%.
- Its share in a foreign company exceeds 10% if the shares of all other shareholders recognized as tax residents of Uzbekistan exceed 50%.
- It exercises control over a foreign company (regardless of the participation share).

For a CFC without a status of legal entity, the controlling person is its founder.

If a tax-resident company is recognized as the controlling person of a CFC, it must include retained earnings of such CFC in its taxable income and pay the relevant tax.

In addition, tax-resident companies must notify the tax authorities about the following:
- Their participation in foreign legal entities
- The establishment of foreign structures without a status of a legal entity
- CFCs for which they are controlling persons

F. Treaty withholding tax rates

The following table lists the withholding rates under Uzbekistan's tax treaties.

Payee resident in	Dividends (k) %	Interest (k) %	Royalties %
Austria	5/15 (a)	10	5
Azerbaijan	10	10	10

(a) The lower rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the payer of the dividends.

(b) The lower rate applies if the beneficial owner of the dividends is a company that owns at least 25% of the payer of the dividends.

(c) The lower rate applies if the beneficial owner of the dividends is a company that owns at least 20% of the payer of the dividends.

(d) The 0% rate applies to interest with respect to the following:
- Loans made, guaranteed or insured by the government of the other contracting state or an instrumentality or agency thereof
- Sales on credit of industrial, commercial or scientific equipment
- Sales on credit of merchandise between enterprises
- Bank loans

(e) The 5% rate applies to royalties paid for certain cultural works (with exceptions) as well as for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (know-how), with exceptions.

(f) The 0% rate applies to royalties for the use of, or the right to use, computer software, patents, designs or models, or plans. The 5% rate applies to royalties paid for the use of, or the right to use, secret formulas or processes, or for information concerning industrial, commercial or scientific experience (know-how). The 10% rate applies to royalties paid for trademarks or certain cultural works.

(g) The 3% rate applies to royalties paid for the use of, or the right to use, copyrights of scientific works, patents, trademarks, designs or models, plans, or secret formulas or processes, as well as for the disclosure of industrial, commercial, or scientific knowledge. The 5% rate applies to royalties paid for certain cultural works.

(h) The 5% rate applies to royalties paid for certain cultural works (with exceptions).

(i) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including motion picture films.

(j) The 2% rate applies to royalties for the use of, or the right to use, industrial, commercial, or scientific equipment.

(k) The domestic withholding tax rate for dividends and interest in Uzbekistan is 10%. Consequently, the withholding tax rate of 15% for dividends and interest under treaties does not apply to payments made by Uzbek companies.

(l) Under the protocol to the double tax treaty with the Netherlands, withholding tax rates may be reduced to zero if certain conditions are met.

(a) This is the maximum progressive rate, which applies to income exceeding 3,000 tax units. Effective from 8 May 2023, the value of a tax unit is VES9. For further details, see Section B. Petroleum companies and income from petroleum-related activities are taxed at a rate of 50%. Mining royalties and transfers of such royalties are subject to tax at a rate of 60%.

(b) For details, see Section B.

(c) The withholding tax applies to payments over VES750. The tax is imposed on the payment minus VES22.50.

(d) This withholding tax applies to payments over VES0.00000000025. However, considering the limit amount, in practice it applies to all payments.

(e) For interest associated with a loan invested in an income-generating activity, the withholding tax is imposed on 95% of the gross payment. Consequently, the effective withholding tax rate is 32.3% (95% x 34%). For other cases, the tax base is the gross interest payment.

(f) In general, the withholding tax rate is determined under Tariff No. 2 (see Section B), which provides for a maximum tax rate of 34%. It is applied to 95% of the gross interest payment associated with a loan invested in an income-generating activity. For other cases, the tax base is the gross interest payment. Interest paid to foreign financial institutions that are not domiciled in Venezuela is subject to withholding tax at a flat rate of 4.95%.
(g) The law does not explicitly set forth any withholdings for royalties paid to residents. However, in practice, it is possible that the Tax Administration could consider the operation to be a provision of services and, accordingly, a 1% or 2% rate of withholding tax would apply.
(h) Royalties paid to nonresidents are taxed on a deemed profit element, which is 90% of gross receipts.
(i) Because royalties paid to nonresidents are taxed on a deemed profit element (see footnote (h) above), the effective withholding tax rate is 30.6% (90% x 34%).
(j) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because royalties paid to nonresidents are taxed on a deemed profit element (see footnote (h) above), the maximum effective withholding tax rate is 30.6% (90% x 34%).
(k) Professional fees paid to nonresidents are taxed on a deemed profit element, which is 90% of gross receipts. Consequently, the effective withholding tax rate is 30.6% (90% x 34%).
(l) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%.
(m) Payments to nonresidents for technical assistance are taxed on a deemed profit element, which is 30% of gross receipts.
(n) Because payments to nonresidents for technical assistance are taxed on a deemed profit element (see footnote (m) above), the effective withholding tax rate is 10.2% (30% x 34%).
(o) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because payments to nonresidents for technical assistance are taxed on a deemed profit element (see footnote (m) above), the maximum effective withholding tax rate is 10.2% (30% x 34%).
(p) Payments to nonresidents for technological services are generally taxed on a deemed profit element, which is 50% of gross receipts.
(q) Because payments to nonresidents for technological services are taxed on a deemed profit element (see footnote (p) above), the effective withholding tax rate is 17% (50% x 34%).
(r) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because payments to nonresidents for technological services are taxed on a deemed profit element (see footnote (o) above), the maximum effective withholding tax rate is 17% (50% x 34%).
(s) This tax applies to transfers of shares of corporations domiciled in Venezuela that are not traded on national stock exchanges. The withholding tax rates are applied to the sale price.
(t) Losses may be carried forward three tax years, but they may not offset more than 25% of the income obtained in such tax years.

B. Taxes on corporate income and gains

Corporate income tax. Companies domiciled in Venezuela are subject to income tax on their net annual income from Venezuelan and foreign sources. Companies organized in Venezuela are deemed to be domiciled in Venezuela. In addition, Venezuelan permanent establishments of foreign companies are also considered to be domiciled in Venezuela. However, only income attributable to a permanent establishment is taxable in Venezuela.

Rates of corporate income tax. Domestic corporations and branches of foreign corporations are subject to the corporate income tax rates of Tariff No. 2, which are progressive and are expressed in tax units. Effective from 8 May 2023, the value of a tax unit is VES9. The Venezuelan Budget Law may change the value of the tax unit each year. The following are the corporate income tax rates provided in Tariff No. 2.

Taxable income		
Exceeding tax units	Not exceeding tax units	Rate %
0	2,000	15
2,000	3,000	22
3,000	–	34

Net income arising from mining and related activities is taxed under Tariff No. 2. Petroleum companies and income from petroleum-related activities, such as transportation and exploitation, are taxed at a rate of 50%. Mining royalties and transfers of such royalties are subject to tax at a rate of 60%.

For tax years beginning on or after 31 December 2015, taxpayers that perform banking, financial, insurance and reinsurance activities are taxed at a proportional rate of 40%.

Interest paid to foreign financial institutions that are not domiciled in Venezuela is subject to a 4.95% withholding tax.

Capital gains. Capital gains are not taxed separately, but are taxable as business profits. For the computation of gains from sales of shares, the tax basis is zero if such shares had been received as a result of a dividend paid with new shares of the payer of the dividend.

Administration. Companies must file an annual income tax return, self-assess and pay any resulting balance of tax due, within three months after the end of their fiscal year.

Companies must make estimated tax payments during their fiscal year.

Dividends. Dividends paid by Venezuelan companies and profits remitted by permanent establishments of foreign companies to the countries of their home offices are taxable to the extent that "net income" exceeds its "net taxable income." For this purpose, "net income" is the financial income approved by the shareholders' meeting based on the financial statements, and "net taxable income" is the resulting income subject to tax after the tax reconciliation. The tax reconciliation is the procedure for determining the income tax liability. However, the tax does not apply to remittances paid by permanent establishments of foreign companies if the permanent establishment can prove that the excess amount is reinvested in Venezuela for at least five years.

The tax is withheld at source. The applicable rate depends on the business of the payer of the dividends. For dividends paid by hydrocarbon or mining companies subject to the 50% or 60% rates of corporate income tax (see *Rates of corporate income tax*), the dividend tax rate is the corporate tax rate applicable to the company. For dividends paid by other companies, the dividend tax rate is 34%.

Foreign tax relief. A credit is granted for income taxes paid on foreign-source income, up to the amount of Venezuelan tax payable on such income.

C. Determination of trading income

General. Corporate tax is based on the annual net taxable accounting profits calculated in accordance with generally accepted

accounting principles, subject to certain adjustments for non-taxable income and nondeductible expenses defined by law.

To determine the net taxable income, deductions are subtracted from gross income. In general, most expenses, including cost of production, are deductible, provided that they are normal and necessary for the earning of the income.

Under reconciliation rules, the determination of the Venezuelan and foreign-source income is made separately (two baskets). The reconciliation rules include detailed measures for the allocation of allowances and deductions to the two baskets.

Inventories. Inventories may be valued using any method in accordance with generally accepted accounting principles. The method chosen must be applied consistently. Because of tax indexation (see *Tax indexation*), inventory is effectively valued using the last-in, first-out (LIFO) method, adjusted for inflation.

Tax indexation. Companies must apply an annual inflation adjustment. A company carries out this adjustment by adjusting its non-monetary assets, some of its non-monetary liabilities and its equity to reflect the change in the consumer price index from the preceding year. These adjustments affect the calculation of depreciation and cost of goods sold. The net effect of these adjustments is recorded in an inflation adjustment account and is added to taxable income or allowed as a deduction.

Effective for tax years beginning after 22 October 1999, the tax indexation rules apply only to the reconciliation of Venezuelan-source income. Therefore, foreign-source non-monetary assets and liabilities are not subject to tax indexation.

For tax years beginning on or after 18 November 2014, for purposes of determining the adjustment for inflation, the National Index of Consumer Prices must be used instead of the Index of Consumer Prices, which was applicable for previous tax years. In addition, taxpayers that engage in banking, financial, insurance and reinsurance activities are excluded from the tax indexation system set forth in the Income Tax Law.

In addition, for tax years beginning on or after 31 December 2015, taxpayers appointed as "Special Taxpayers" are also excluded from the tax indexation system set forth in the Income Tax Law.

Provisions. Provisions for inventory obsolescence and accounts receivable are not deductible; amounts are deductible only when inventories or accounts receivable are effectively written off.

Depreciation. In general, acceptable depreciation methods are the straight-line and the units-of-production methods. The declining-balance method and accelerated depreciation are not accepted. Venezuelan law does not specify depreciation rates. If the estimated useful life of an asset is reasonable, the depreciation is accepted. Estimated useful lives ranging from 3 to 10 years are commonly used.

Relief for tax losses. Operating losses from Venezuelan sources may be carried forward for three tax years, but they may not offset more than 25% of the income obtained in such tax years. No carryback is permitted.

Losses in the foreign-source basket (see *General*) may not offset Venezuelan-source income. Such foreign-source losses may be carried forward three tax years to offset foreign-source income only and are also subject to the limitation described above.

Under the amendment of the Income Tax Law published on 18 November 2014 in *Official Gazette* No. 6,152, losses attributable to tax indexation for tax years beginning on or after that date cannot be carried forward.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), imposed on goods and services, including imports; the National Executive may exonerate from tax acquisitions of goods and services; the law provides an indexation system for input VAT during the preoperational period for enterprises engaged in certain industrial activities; input VAT generated during the preoperational phase of industrial projects intended primarily for export is refunded	16
Tax on Large Financial Transactions	
Imposed on any payment made by taxpayers qualified as "special taxpayers" (that is, high income) by the tax administration, regardless of Venezuelan financial system involvement, including payment-equivalent means, such as, offsetting novation or debt forgiveness	2
Imposed on individuals, corporations, and economic entities without legal personality, for payments made in a currency other than that of legal tender in the country, or in cryptocurrencies or cryptoactives, (digital assets) other than those issued by the Venezuela, within the national banking system, without the intermediation of a foreign banking correspondent, in accordance with the policies, exceptional authorizations, and parameters established by the Central Bank of Venezuela, or without the mediation of national financial institutions (that is, payments made in foreign currency in cash, through foreign banking institutions or platforms abroad)	3
Equity Tax; imposed on the net equity of special taxpayers (high income taxpayers) with equity over 150 million tax units (USD37,396,122); applicable to entities and individuals; the taxable event occurs on 30 September of each year; the first taxable event date was 30 September 2019	0.25
Municipal tax; business activity tax, usually based on gross receipts or sales; rate varies depending on the industrial or commercial activity and the municipal jurisdiction	0.5 to 10

Nature of tax	Rate (%)
Social security contributions, on monthly salary of each employee, up to five minimum salaries; paid by	
Employer	9/10/11
Employee	4
National Institute of Cooperative Education; contributions required if employer has five or more employees; paid by	
Employer, on total employee remuneration	2
Employee, on profit share received, if any, from employer at year-end	0.5
Housing policy contributions, on the integral salary (any remuneration, benefit or advantage received by an employee in consideration for services rendered, provided it can be evaluated in terms of cash value) of each employee; paid by	
Employer	2
Employee	1
Unemployment and training contributions, on the monthly salary of each employee, up to five minimum salaries; paid by	
Employer	2
Employee	0.5

E. Miscellaneous matters

Monetary reconversion. As of 1 October 2021, the unit of the monetary system was restated in the equivalent of VES1 million, according to Decree No. 4,553 published in *Official Gazette* No. 42,185 of 8 August 2021.

Foreign-exchange controls. Under the foreign-exchange control system in Venezuela, the purchase and sale of currency in Venezuela is centralized by the Central Bank of Venezuela. This limits foreign-currency trade in Venezuela and other transactions.

Debt-to-equity rules. For fiscal years beginning on or after 16 February 2007, the law disallows deductions to companies for interest payments to related parties domiciled abroad if the average of the companies' debts (owed to related and unrelated parties) exceeds the average amount of their fiscal equity for the respective fiscal year.

Transfer pricing. Under transfer-pricing rules, cross-border income and expense allocations in transactions with related parties are subject to analysis and special filings. The rules contain a list of related parties and provide a list of acceptable transfer-pricing methods.

Controlled foreign corporations. Under controlled foreign corporation (CFC) rules, income derived by a CFC (as defined) domiciled in a low-income tax jurisdiction is taxable to its Venezuelan shareholders. The tax authorities have issued a list of low-income tax jurisdictions.

F. Treaty withholding tax rates

	Dividends %	Interest (a) %	Royalties %

United Arab Emirates	5/10 (d)	10	10
United Kingdom	0/10 (g)	5	5/7 (hh)
United States	5/15 (d)	0/4.95/10 (p)	0/5/10 (bb)
Vietnam	5/10 (d)	4.95/10 (n)	10
Non-treaty jurisdictions	34/50/60 (ii)	4.95/34 (jj)	34 (jj)

(a) Under Venezuelan domestic law, a reduced withholding tax rate of 4.95% applies to interest paid to financial institutions not domiciled in Venezuela.

(b) The 5% rate applies to dividends paid to a parent company that owns at least 25% of the capital of the payer of the dividends. Under the Denmark and Sweden treaties, to benefit from the 5% rate, the recipient of the dividends must have direct control of at least 25% of the voting shares of the payer of the dividends. The higher rate applies to other dividends (portfolio dividends).

(c) The 5% rate applies if the beneficial owner of the dividends is a company that owns at least 15% of the capital of the payer of the dividends. Under the treaties with Austria, Czech Republic and Iran, to benefit from the 5% rate, the beneficial owner of the dividends must have direct control of at least 15% of the capital of the payer of the dividends. The higher rate applies to other dividends (portfolio dividends).

(d) The 5% rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payer of the dividends. Under the treaties with China Mainland, Korea (South) and Norway, to benefit from the 5% rate, the beneficial owner of the dividends must have direct control of at least 10% of the capital of the payer of the dividends. The higher rate applies to other dividends.

(e) The 5% rate applies if the beneficial owner of the dividends is a company that owns directly at least 5% of the capital of the payer of the dividends. The higher rate applies to other dividends.

(f) The 0% rate applies to dividends paid to certain recipients who own at least 25% of the voting shares of the payer of the dividends. Under the treaty with Switzerland, to benefit from the 0% rate, the recipient of the dividends must have direct control of at least 25% of the voting shares of the payer of the dividends. The higher rate applies to other dividends.

(g) The 0% rate applies if the beneficial owner of the dividends is a company that directly controls at least 10% of the capital of the payer of the dividends. The 10% applies to other dividends.

(h) The 10% rate applies if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payer of the dividends. Under the treaty with Cuba, to benefit from the 10% rate, the beneficial owner of the dividends must have direct control of at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends.

(i) The 10% rate applies if the beneficiary of the dividends is a company that owns at least 10% of the capital of the payer of the dividends and if it has an investment in the payer of at least USD100,000. The 15% rate applies to other dividends.

(j) The 10% rate applies if the beneficiary of the dividends is a company that controls at least 20% of the capital of the payer of the dividends. The 15% rate applies to other dividends.

(k) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the payer of the dividends. The 15% rate applies if the beneficiary of the dividends is a resident of Venezuela that receives from a company resident in France dividends that would give rise to a tax credit (*avoir fiscal*). For dividends received by a resident of France, the recipient has a right to a payment from the French Treasury in an amount equal to the *avoir fiscal*. The 5% rate applies in all other cases.

(l) The 10% rate applies if the beneficiary of the dividends is a company that controls directly at least 10% of the voting power of the distributing company. The 15% rate applies to other dividends.

(m) The 4.95% rate applies to interest paid to banks. The 10% rate applies to other interest payments.

(n) The 4.95% rate applies to interest paid to financial institutions. The 10% rate applies to other interest payments.

(o) The 5% rate applies to interest paid to banks. The higher rate applies to other interest payments.

(p) The 0% rate applies to interest paid to the Eximbank, Federal Reserve Bank, Private Investment Corporation, Foreign Trade Bank, Central Bank of Venezuela and Venezuelan Investment Fund. The 4.95% rate applies to interest paid to financial institutions or insurance companies. The 10% rate applies to other interest payments.

(q) The 4.95% rate applies to interest paid to banks or insurance companies. The 10% rate applies if the beneficial owner of the interest is not one of the entities mentioned in the preceding sentence and if either of the following additional conditions is satisfied:
- The interest is paid by banks.
- The interest is paid on bonds or other credit securities that are traded regularly and substantially on a recognized securities market.

The 15% rate applies to other interest payments.

(r) The following interest payments are exempt:
- Interest paid to the government of the other contracting state, or a local authority or central bank of such state
- Interest paid for the sale on credit of industrial, commercial or scientific equipment
- Interest on bank loans

The 5% rate applies to other interest payments.

(s) The 10% rate also applies to technical assistance fees.

(t) The 15% rate applies to royalties related to copyrights, trademarks, know-how, literary, artistic or scientific works, or films. A protocol to the treaty provides that payments for technical assistance services are treated as royalties and are therefore also subject to the 15% rate.

(u) The 5% rate applies to the following:
- Copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties for motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting)

- Royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience (but not including royalties paid in connection with rental or franchise agreements) if the payer and the beneficial owner of the royalties are not related persons

The 10% rate applies to other royalties.

(v) The 12% rate also applies to technical assistance fees.

(w) The 5% rate applies to technical assistance fees resulting from the rendering of technical, managerial or consultancy services if such services make available technical knowledge, experience, skills, know-how or processes. The 10% rate applies to the following royalties:

- Royalties paid as consideration for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, patents, trademarks, designs or models, plans, and secret formulas or processes
- Royalties for information concerning industrial, commercial or scientific experience

(x) The 10% rate applies to payments for technical assistance. The 20% rate applies to royalties.

(y) This rate applies to royalties and to amounts paid for technical assistance services.

(z) The 7% rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films, or works on film, videotape or other means of reproduction for use in connection with television broadcasting); and royalties for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (but not including royalties paid in connection with rental or franchise agreements) if the payer and the beneficial owner of the royalties are not related persons. The 10% rate applies to other royalties.

(aa) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment. The 10% rate applies to other royalties.

(bb) The 0% rate applies to royalties paid for technical services, scientific, geological or technical studies, engineering works, consulting or supervision services, if the recipient does not have a permanent establishment. The 5% rate applies to royalties paid for industrial, commercial or scientific equipment. The 10% rate applies to royalties paid for the following:

- Patents, designs or models, plans, or secret formulas or processes
- Industrial, commercial or scientific know-how
- Trademarks
- Copyrights with respect to literature, arts or sciences, motion pictures, or movies and tapes for radio or television broadcasting

(cc) The 5% rate applies to payments for the following:

- Patents, designs or models, plans, or secret formulas or processes
- The use of, or the right to use, industrial, commercial, or scientific equipment
- Information concerning industrial, commercial or scientific experience

The 7% rate applies to amounts paid for trademarks or trade names. The 10% rate applies to amounts paid for copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting.

(dd) The lower rate applies to payments for technical assistance. The 12% rate applies to royalties.

(ee) The 10% rate applies to technical assistance fees, which are all payments in consideration for the rendering of technical, managerial or consultancy services, if such services make available technical knowledge, experience, skills, know-how or processes. The 15% rate applies to royalties.

(ff) The 10% rate applies to royalties related to literary, artistic or scientific works, or films. The 7% rate applies to other royalties.

(gg) This is the general rate. Certain special rules apply.

(hh) The 5% rate applies to royalties for patents, trademarks, designs or models, plans, or secret formulas or processes, or for information (know-how) concerning industrial, commercial or scientific experience. The 7% rate applies to royalties for copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for radio or television broadcasting.

(ii) For details, see Section B.

(jj) See Section A.

(kk) This treaty has been signed, but it has not yet been ratified and is not yet in force.

(ll) The 4.95% rate applies to interest paid to financial institutions. The 5% rate applies to other interest payments.

(mm) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of scientific works, software and trademarks, and to payments for the use of, or the right to use, equipment and transportation vehicles. The 10% rate applies to other royalties.

(nn) The 4.95% rate applies to interest paid to banks. The 15% rate applies to other interest payments.

(oo) The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, cinematographic films, patents, trademarks, designs or models, plans, or secret formulas or processes, and to payments for the use of, or the right to use, industrial, commercial, or scientific equipment or for information (know-how) concerning industrial, commercial or scientific experience. It also applies to gains derived from the alienation of such rights or property to the extent that such gains are contingent on the productivity, use or disposition of such property.

(pp) The 4.95% rate applies to interest paid to banks. The 5% rate applies to other interest payments.

Venezuela has signed other tax treaties that cover only air and maritime transportation.

Because of the rapidly changing economic situation in Vietnam, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	20 (a)
Capital Gains Tax Rate (%)	20 (b)
Branch Tax Rate (%)	20
Withholding Tax (%)	
Dividends	0
Interest	5
Royalties	10
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (c)

(a) The standard corporate income tax rate is 20%. However, tax incentives are available (see Section B). Enterprises operating in the oil and gas industry are subject to corporate income tax rates ranging from 32% to 50%, depending on the location and specific project conditions. Enterprises engaging in prospecting, exploration and exploitation of mineral resources (for example, silver, gold and gemstones) are subject to corporate income tax rates of 40% to 50%, depending on the project's location.
(b) Gains derived from sales of capital or shares in entities are subject to tax at a rate of 20%. Transfers of securities by foreign investors are subject to presumptive tax of 0.1% on total sales proceeds, regardless of whether the transfer is profitable.
(c) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. The following types of enterprises are subject to corporate income tax:

- Enterprises established under the Law on Enterprises, the Law on Investment, the Law on Credit Organizations, the Law on Insurance Business, the Law on Securities, the Law on Oil and Gas, the Trade Law and other legal entities including joint stock companies, limited liability companies, partnerships, private businesses, law offices, private public notary offices, parties to business cooperation contracts, parties to oil and gas product sharing contracts, and joint operation companies
- Public and non-public organizations engaged in business
- Organizations established under the Law on Cooperatives
- Businesses established under foreign laws that have a permanent establishment in Vietnam
- Other organizations conducting production and business activities that generate taxable income

Rates of corporate income tax. The standard corporate income tax rate is 20%. However, tax incentives are available (see *Tax incentives*).

The rate of corporate income tax applicable to activities of exploration and exploitation of oil, gas and other precious natural resources ranges from 32% to 50%, depending on the project.

Tax incentives

Preferential tax rates of 5%, 7%, 9%, 10%, 15% or 17% may be available to eligible projects meeting certain criteria or in industries or locations that are encouraged by the government.

Common incentive tax rates are discussed below.

A 10% rate for the 15-year period beginning with the first year of revenue may be available for the following:

- Income from new investment projects in areas with especially difficult socioeconomic conditions, and in economic zones and high-technology zones
- Income from new investment projects that are engaged in the following:
  - — Scientific research and technological development
  - — Application of high technologies in the list of prioritized high technologies provided by the Law on High Technology
  - — Cultivation of high technologies
  - — Cultivation of high-technology enterprises
  - — High-risk investment in the development of high technologies in the list of prioritized high technologies provided by the Law on High Technology

  - — Construction investment and commercial operation of establishments nursing high technologies
  - — Investment in development water plants, power plants, water supply and drainage systems, bridges, roads, railways, airports, seaports, river ports airfields, stations and other particularly important infrastructure facilities determined by the prime minister
  - — Software production
  - — Production of composite materials, light building materials, rare materials, renewable energy, clean energy and energy from waste destruction
  - — Development of biological technology
- Income of new investment projects in the field of environmental protection, including manufacturing of equipment for treating environmental pollution and equipment for environmental observation and analysis, environmental pollution treatment and protection, collection and treatment of wastewater, exhaust and solid wastes, and recycling and reuse of wastes
- Income of high-technology enterprises and agricultural enterprises that apply high technologies according to the Law on High Technology
- Income from new investment projects that make products supportive of the high-technology industry in line with the Law on High Technology or products supportive of certain industries, including textile and garment, footwear, electronics, information technology, automobile assembly and mechanics, and that are not domestically produced or meet the quality standard of the European Union or an equivalent standard
- Income from new investment projects in the production sector (except for projects producing goods subject to special sales tax and mineral exploitation projects) that have investment capital of at least VND6 trillion, if the capital is disbursed within three years from the date of the investment certificate and if either of the following conditions is satisfied:
  - — The project's total revenue reaches VND10 trillion per year within three years from the first year of revenue.
  - — The project employs more than 3,000 employees.
- Large-scale manufacturing projects (excluding projects manufacturing products subject to special sales tax or exploiting mineral resources) if all of the following conditions are satisfied:
  - — The investment capital must be at least VND12 trillion.
  - — The technology used must be certified in accordance with the Law on High Technology and the Law on Science and Technology.
  - — The capital disbursement must be made within five years of the licensing date.

  These large-scale manufacturing projects may be considered for an extended period for the corporate income tax incentive rate of a maximum of 15 years (that is, a maximum of 30 years of the 10% corporate income tax rate).

A 10% or 15% rate applies for the entire period of operation for enterprises in the sectors of education and training, occupational training, health care, culture, sports, environment, social housing, forestry, agriculture, aquaculture, salt production and publishing. However, this incentive is subject to detailed conditions provided separately by the prime minister.

A 17% rate for the 10-year period beginning with the first year of revenue may apply to the following:
- Income from new investment projects based in areas with difficult socioeconomic conditions
- Income from new investment projects that are engaged in the production of high-qualified steel or energy-saving products, the manufacturing of machinery and equipment serving agriculture, forestry, aquaculture, salt production, production of irrigation equipment, the production of foodstuff for cattle and the development of traditional trades

Special incentive tax rates, generally subject to the Prime Minister's approval, include the following:
- A 5% rate for the 37-year period beginning with the first year of revenue may apply to the following:
  - Income from the operation of the national innovation centers established pursuant to the decision of the Prime Minister
  - Income from specially encouraged sectors investment projects that have total investment capital of at least VND30 trillion of which at least VND10 trillion is disbursed within the first three years and that meet further prescribed criteria for specially incentivized and special investment support projects
- A 7% rate for the 33-year period beginning with the first year of revenue may apply to the following:
  - Income from new investment projects (including the expansion of such new investment projects) to establish innovation centers, new research and development centers with a total investment capital of at least VND3 trillion of which at least VND1 trillion is disbursed within the first three years
  - Income from specially encouraged sectors investment projects that have total investment capital of at least VND30 trillion of which at least VND10 trillion is disbursed within the first three years and that meet further prescribed criteria for specially incentivized and special investment support projects
- A 9% rate for the 30-year period beginning with the first year of revenue may apply to income from the specially encouraged sectors investment projects with total investment capital of at least VND30 trillion of which at least VND10 trillion is disbursed within the first three years.

The duration of the application of preferential tax rates described above is counted consecutively from the first year in which enterprises generate turnover from new investment projects eligible for tax incentives. For high-technology enterprises and agricultural enterprises applying high technologies, this duration is counted from the year in which they are certified as high-technology enterprises or agricultural enterprises applying high technologies. For other projects applying high technologies, this duration is counted from the year in which they are granted certificates of projects applying high technologies.

If, within an assessment period, an enterprise has both incentivized activities and normal activities, it must conduct a separate accounting for income from each activity to declare and pay tax separately. Otherwise, taxable income must be prorated according

to the ratio of revenue or deductible expenses of each activity to the total revenue or deductible expenses.

Income and losses from incentivized activities and normal activities (except for transfers of mineral exploratory, mining and processing rights) may be netted against each other before the tax rate of the activity with the highest amount of income is applied.

Tax exemptions and tax reductions. Criteria for eligibility to tax holidays and reductions, which are set out in the corporate income tax regulations, are described below.

Four years of tax exemption and nine subsequent years of 50% reduction apply to the following:
- Income from new investment projects entitled to the 10% corporate income tax
- Income from new investment projects operating in the socialized sectors and difficult socio-economic areas

Four years of tax exemption and 50% tax reduction for five subsequent years apply to income from new investment projects in the socialized sectors and in regions not included in the list of difficult socio-economic areas.

Two years of tax exemption and four subsequent years of 50% reduction apply to the following:
- Income from new investment projects in regions with difficult socio-economic conditions
- Income from new investment projects, including production of high-grade steel, production of energy-saving products, production of machinery or equipment used to serve agricultural, forestry, fishery or salt production, production of irrigation equipment, production and refinement of foodstuffs for cattle, poultry or aquatic products, and development of traditional trades
- Income from new investment projects in industrial zones (except for industrial zones located in regions with favorable socio-economic conditions)

Five years of tax exemption and 50% tax reduction for 10 subsequent years apply to income from specially incentivized and special investment support projects entitled to the preferential tax rate of 9%.

Six years of tax exemption and 50% tax reduction for 12 subsequent years apply to income from specially incentivized and special investment support projects entitled to the preferential tax rate of 7%.

Six years of tax exemption and 50% tax reduction for 13 subsequent years apply to income from specially incentivized and special investment support projects entitled to the preferential tax rate of 5%.

The continuous period of tax exemption and reduction begins from the first year in which the enterprise earns taxable income from the new investment project that is granted tax incentives. If the enterprise does not have taxable income in the first three years, the period of tax exemption and reduction begins in the fourth year following the first year in which revenue is generated by the new project.

Capital gains. Gains derived from sales of shares or assignments of capital in enterprises are subject to tax, as part of annual taxable income, at a rate of 20%. The taxable income equals the transfer price less the sum of the purchase price of the transferred capital and expenses incurred with respect to the transfer.

Foreign investors transferring "securities" (this is a specified term, which includes shares of public companies) are subject to presumptive tax at a rate of 0.1% on total sale proceeds, regardless of whether the transfer is profitable.

Administration. Enterprises normally use the calendar year as their tax year. Enterprises that have their own particular characteristics of operational organization may choose a financial year of 12 months according to the Gregorian calendar and they must notify the local authorities of such year.

Enterprises must pay their quarterly income tax due by the 30th day of the following quarter. Enterprises must file a final income tax return and pay any balance of income tax due no later than the last day of the third month after the ending date of a calendar year or a financial year.

The total amount of provisional quarterly corporate income tax paid in a tax year must not be less than 80% of the total corporate income tax liability for the year. Any shortfall is subject to late payment interest at a fixed rate of 0.03% per day, counting from the deadline for payment of the fourth-quarter provisional corporate income tax liability.

An under declaration is subject to only a late-payment fine if it is self-corrected by the taxpayer. Otherwise, a penalty of 20% of the under declared tax is imposed. Late payments of tax are subject to interest at a rate of 0.03% of the unpaid amount per day.

Tax audits are performed on an ad hoc or selected basis. Any tax under declaration identified by the tax auditor is penalized at 20% (or 100% to 300% if considered to be tax evasion) and subject to a prevailing interest rate of the tax liability for each day late, calculated from the statutory deadline to the date of actual payment.

Dividends. Dividends paid to corporate shareholders and branch remittances are not subject to withholding tax.

Withholding taxes on interest and royalties. The rate of withholding tax on interest paid under loan contracts is 5%.

A withholding tax at a rate of 10% is imposed on royalties paid to foreign legal entities with respect to technology transfers and licensing.

Foreign tax relief. Vietnam has signed tax treaties with several countries that provide relief from double taxation (see Section F).

C. Determination of taxable income

General. The taxable income of an enterprise is the income shown in the financial statements, subject to certain adjustments. Taxable income includes income derived from business operations and other activities.

An enterprise may deduct expenses if the following conditions are satisfied:

- The expenses are actually incurred and related to the production and business activities of the enterprise.
- The expenses are accompanied by complete invoices and source vouchers as required by law.
- Expenses of VND20 million or more must be supported with cashless payments (for example, bank transfers and payments with cards).
- The expenses are not on the list of nondeductible expenses shown below.

Certain expenses are not deductible in determining taxable income, including the following:

- Provisions that do not conform to the regulations of the Ministry of Finance (MOF).
- Accrued expenses not corresponding to taxable turnover that has been recognized.
- Bonuses and life insurance expenses for employees that are not clearly stated in the labor contracts, the collective labor contracts, the financial regulations of the company or the reward regulations promulgated by the chairman of the board of management.
- Interest payments on loans corresponding to equity that is not contributed.
- Interest payments on loans borrowed from lenders that are not credit institutions or economic organizations that exceed 150% of the basic interest rate quoted by the State Bank of Vietnam at the time of the loan agreement.
- Under recently enacted transfer-pricing regulations, for companies having related-party transactions, loan interest expenses in excess of 30% of the total net profit generated from business activities plus net interest expenses (that is, interest expense after being offset against deposit interest income and loan interest income) and amortization costs arising in the period. Such nondeductible interest expenses can be carried forward for deduction for up to five years from the following year.
- Expenses sourced from other funding and expenses paid from the Science and Technology Development Fund of the enterprise.
- The portion of business management expenses allocated by a foreign company to its resident establishment in Vietnam (for example, head office charges allocated to the Vietnam branch) that exceeds the level allowed under the regulations.
- Depreciation of fixed assets that are not used for business activities and/or supported by ownership documents.
- Employees' fringe benefits that exceed the cap of an average one month's salary cost (calculated by dividing the yearly wage fund by 12) in the tax year.
- Payments above VND3 million per person per month for contributions to a voluntary pension fund or purchase of voluntary pension insurance for employees.
- Donations except for certain donations for education, health care, natural disasters; building charitable homes for the poor.
- Management expenses allocated to permanent establishments in Vietnam by the foreign company that are not in accordance with the regulations.
- Administrative penalties.

- Input value-added tax (VAT) that has been credited or refunded, input VAT on the value of a car of nine seats or less that exceeds VND1,600,000,000, corporate income tax (except for the corporate income tax that a Vietnamese company pays on behalf of a foreign contractor under a net contract) and personal income tax (unless the employer pays net salary to employees).
- Expenses that do not correspond to taxable revenue.
- Exchange-rate loss as a result of the revaluation of the year-end balance of money items in foreign currencies, except for the revaluation of payables in foreign currencies.
- Exchange-rate loss arising in the process of capital construction of fixed assets, which is governed by a separate regulation of the MOF.

Inventories. Inventory valuation should be consistent with the accounting principles and standards selected by the company and approved by the MOF. No specific guidelines have been established by the tax authorities.

Tax depreciation. Depreciation of fixed assets is normally computed using the straight-line method. The MOF has issued guidelines setting forth the minimum and maximum years for depreciation of various assets, but companies may apply to the MOF for permission to use different time periods. The following are the minimum and maximum years of depreciation for certain categories of assets.

Asset	Years
Intangible assets	Up to 20
Buildings and factories	5 to 50
Tools and machinery	3 to 20
Transportation vehicles	6 to 30
Other fixed assets	2 to 40

Depreciation at rates exceeding those allowed by the MOF is not deductible for tax purposes. For cars with nine seats or less purchased by enterprises for business other than passenger transportation, hotel or tourism, the depreciable amount is capped at VND1,600,000,000.

Relief for losses. Enterprises that incur losses may carry forward the losses to the following five years and claim such losses as deductions from taxable income. Losses must be wholly carried forward to consecutive years (including the year of a tax holiday).

Enterprises that incur losses from real-property transfers may carry forward the losses to offset income from all of their activities.

Carrybacks of losses are not allowed.

Groups of companies. Companies having dependent production establishments in different provinces shall declare tax with the local tax authority in charge of the head office and allocate the tax payment to provinces where the establishments are located based on the ratio of expenses of the dependent establishments to the total expenses of the company, except in cases in which the production establishments have tax incentives. In such situation, the establishment shall declare tax with the local tax authority of its location based on its accounted income.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); imposed on all goods and services consumed in and imported into Vietnam, including goods and services subject to special consumption tax, except for non-taxable items	
General rate (see below)	10%
Exports of goods and services	0%
Certain goods and services, such as water supply, agricultural goods, medical goods and teaching aids	5%
Special consumption tax; imposed on imported or domestically produced cigarettes, beer, spirits, motor vehicles, fuel and air conditioners, and various services including casinos, betting, golf courses and various places of entertainment	1% to 150%
Social insurance, health insurance and unemployment insurance contributions, on salaries (applicable to Vietnamese employees); paid by	
Employer	
Social insurance; the contribution is based on the salary and other allowances of the employees as provided in the labor contract but not exceeding 20 times the common minimum salary (The rate of 17.5% consists of a 3% contribution to the maternity and illness fund, a 0.5% contribution to the labor and professional accident fund [a lower rate of 0.3% is applicable if certain conditions are met] and a 14% contribution to the pension and death fund); Health insurance; calculated on the same base as social insurance	17.5%
Unemployment insurance; the contribution is based on the salary and other allowances of the employees as provided in the labor contracts but not exceeding 20 times the regional minimum salary	3%
Employee	1%
Social insurance	8%
Health insurance	1.5%
Unemployment insurance	1%
Social insurance and health insurance on salaries of expatriate employees); paid by	
Employer	
Social insurance	17.5%
Health insurance; calculated on the same base as social insurance	3%
Unemployment insurance	0%
Expatriate employee	
Social insurance	8%
Health insurance	1.5%

Nature of tax	Rate
Unemployment insurance	0%
Foreign contractor tax; rate depends on type of business activity	0.1% to 10%
Land rent (land-use tax); imposed annually for the use of land; tax base is calculated by multiplying the amount of square meters of the land by land price rates, which vary by location; the higher land price rates apply to land in Hanoi, Ho Chi Minh City and other urban locations	Various
Non-agricultural land use tax; taxable objects include residential land in all areas and land used for business purposes, except for certain cases	
Residential land	0.03% to 0.15%
Non-agricultural land used for business purposes	0.03%
Land not used in accordance with granted purposes	0.15%
Environmental Tax; taxable objects consist of petroleum, oil, lubricants, black coal, hydrochlorofluorocarbon (HCFC) solutions, taxable plastic bags, herbicide termite insecticides, forest products protective agents and warehouse insecticides; rates from 1 January 2019	
Petroleum, oil and lubricants	VND600 to VND2,000 per liter/kilogram (Effective from 1 January 2024 to 31 December 2024)
Black coal	VND15,000 to VND30,000 per ton
HCFC solution	VND5,000 per kilogram
Taxable plastic bags	VND50,000 per kilogram
Herbicide (restricted use category)	VND500 per kilogram
Termite insecticide (restricted use category)	VND1,000 per kilogram
Forest products protective agents (restricted use category)	VND1,000 per kilogram
Warehouse insecticides (restricted use category)	VND1,000 per kilogram
Natural Resources Tax (NRT); payable by industries exploiting Vietnam's natural resources; taxable objects include metallic minerals, nonmetallic minerals, products of natural forests, natural marine products, natural mineral water, other natural resources and petroleum; tax base for NRT calculation includes the output of royalty-liable natural resources, royalty-liable price of a unit of natural resource and royalty rate	
Metallic minerals	10% to 20%
Nonmetallic minerals	6% to 27%

Nature of tax	Rate
WW Products of natural forests	5% to 35%
Natural marine products	2% to 10%
Natural mineral water and natural water	1% to 10%
Other natural resources	10% to 20%

Encouraged investment projects	7% to 23%
Other projects	10% to 29%
Natural gas and coal gas	
Encouraged investment projects	1% to 6%
Other projects	2% to 10%

E. Miscellaneous matters

Foreign-exchange controls. Enterprises with foreign-owned capital must open accounts denominated in a foreign currency or the Vietnam dong (VND) at a bank located in Vietnam and approved by the State Bank of Vietnam (SBV). All foreign-exchange transactions, such as payments or overseas remittances, must be in accordance with policies set by the SBV.

Enterprises with foreign-owned capital and foreign parties may purchase foreign exchange from a commercial bank to meet the requirements of current transactions or other permitted transactions, subject to the bank having available foreign exchange.

The government may guarantee foreign currency to especially important investment projects or assure the availability of foreign currency to investors in infrastructure facilities and other important projects.

Transfer pricing. The Vietnamese transfer-pricing regulations apply the arm's-length principle to determine transfer prices of business transactions undertaken between related parties and is broadly consistent with the arm's-length concept as set out in the Organisation for Economic Co-operation and Development's Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations (OECD Transfer Pricing Guidelines). The applicable transfer-pricing methods under the Vietnamese transfer-pricing regulations closely resemble the methods provided by the OECD Transfer Pricing Guidelines and include the following:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Profit-split method
- Comparable profit method (referred to as the transactional net margin method in the OECD Transfer Pricing Guidelines)

The Vietnamese regulations contain detailed transfer-pricing documentation requirements. The documentation must be prepared before the submission of the annual income tax return to substantiate the arm's-length prices and submitted on the tax authority's request in a timely manner.

Advance pricing agreement (APA) regulations are largely in line with the OECD Transfer Pricing Guidelines and APA regimes in other tax jurisdictions. An APA is a binding agreement between a taxpayer and the tax authority that determines in advance the basis

for tax calculation, transfer-pricing methods and arm's-length prices of the covered related-party transactions for a specific time period. The maximum APA period is three years, but it may not exceed the actual number of years that the taxpayer has operated and filed its corporate income tax return in Vietnam.

Resolution on Global Minimum Tax: The National Assembly of Vietnam passed a resolution to apply Income Inclusion Rule (IIR) and Qualified Domestic Minimum Top-up Tax (QDMTT). The resolution will come into effect from 1 January 2024. According to the resolution, in-scope entities include constituent entities that are members of an multinational enterprise (MNE) group that has annual consolidated revenue of at least EUR750 million in at least two of the four preceding fiscal years. If the jurisdictional effective tax rate (ETR) is below the 15% minimum rate, a top-up tax will be imposed in Vietnam.

F. Treaty withholding tax rates

The withholding rates under Vietnam's double tax treaties are listed in the following table.

	Dividends %	Interest %	Royalties %
Australia	10/15	10	10
Austria	5/10/15 (a)	10	7.5/10

Türkiye	5/10/15 (a)	10	10
Ukraine	10	10	10
United Arab Emirates	5/15	10	10
United Kingdom	7/10/15 (a)	10	10
Uruguay	10	10	10
Uzbekistan	15	10	15
Venezuela	5/10 (a)	10	10
Non-treaty jurisdictions	0	5	10

(a) The rates vary depending on the percentage of the payer's capital that is owned by the recipient of the dividends.
(b) The treaty with France does not cover the taxation of interest.

Vietnam has signed double tax treaties with Algeria, Egypt, North Macedonia and the United States, but these treaties have not yet been ratified or have not yet taken effect.

A. At a glance

Corporate Income Tax Rate (%)	0 to 35 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0 to 35 (a)
Withholding Tax (%) (b)	
Dividends	15/20 (c)
Interest	15/20 (d)
Royalties	15/20 (e)
Management Fees	15/20 (f)
Rental Income	0 (g)
Branch Remittance Tax	20
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 or 10 (h)

(a) For details, see Section B. The tax rate on betting is 25%.
(b) The 20% rate applies to payments to nonresident companies and individuals. The other rates apply to payments made to resident companies and individuals.
(c) For resident and nonresident companies and individuals, this is a final tax. Zambian-incorporated companies may offset the withholding tax imposed on dividends received from other Zambian-incorporated companies against withholding tax payable on their own distributions of dividends.
(d) Withholding tax is payable on the accrual of interest. This rate applies to interest accrued by companies. This is a final tax for nonresident companies. Resident companies may credit the withholding tax against their income tax.

(e) For individuals and nonresident companies, this is a final tax. Resident companies may credit the withholding tax against their income tax. Effective from 1 January 2021, Section 82A of the Income Tax Act provides for the charging of withholding tax on commodity royalty financing payments made by Zambian residents to nonresidents at a rate of 15%. Commodity royalty financing payments are amounts paid by persons resident in Zambia to nonresidents that are computed by reference to the production, profit, or value of production from a mineral deposit or other natural resource in Zambia that is payable under royalty financing. It excludes the repayment of the purchase price for the commodity royalty.

(f) The 15% rate applies to resident companies and individuals, while the 20% rate applies to nonresidents. This is a final tax for nonresident companies and individuals. The tax withheld from payments to resident companies and individuals is granted as a credit in the final tax return.

(g) The withholding tax regime on rental income is abolished, effective from 1 January 2022 and there is no longer a requirement to withhold tax from rental payments. Turnover tax is imposed at a rate of 4% on gross rental income of up to K800,000 per year and at a rate of 12.5% if the gross rental income exceeds K800,000 per year. The 12.5% rare applies to the total gross rental income. The turnover tax is subject to detailed rules.

(h) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Resident and nonresident companies are subject to tax on their income derived from Zambian sources. However, residents are subject to tax on dividends and interest received on a worldwide basis. Resident companies are also subject to tax on profits derived from a business carried on partly inside, and partly outside, Zambia. A company is considered resident in Zambia if it is incorporated in Zambia or if the central management and control of the company's business or affairs are exercised in Zambia. Further, it is mandatory that a company obtain a Taxpayer Identification Number (TPIN) at the point of registration.

Tax rates. The following are the standard corporate tax rates.

Source	Rate (%)
Farming	0
Rent	4 to 12.5
Agro-processing	10
Cotton seed production or ginning of cotton (for the first five years)	0
Spinning or weaving cotton (for the first 10 years)	0
Export of non-traditional products	0
Manufacturing	30
Income earned from the manufacturing of products using copper cathodes	15
Banking income	30
Telecommunication companies	35
Income from mining operations	30 *
Income from mineral processing	30
Income earned by hotels and lodges on accommodation and food services	15
Trading and other sources	30

* A mining operation is any operation carried out under a mining right referred to in Section 6 of the Mines and Minerals Development Act, but does not include any operations carried out under a prospecting permit or prospecting license or any operations involving only mineral processing. Mining operations are subject to a mineral royalty (see Section D). If the income from a

mining operation exceeds 8% of gross sales, the rate is determined in accordance with the following formula:

$$Y = 30\% + [a - (ab \div c)]$$

The following are the values of the items in the formula:
- Y = the tax rate to be applied per year
- a = 15%
- b = 8%
- c = the percentage ratio of assessable income to gross sales

However, if the base metal produced or recoverable under the license is copper, the mineral royalty payable is at the following rates.

Level	Copper Norm Price Range	Mineral Royalty Rate (%)
1	Less than USD4,500	5.5
2	USD4,500 but less than USD6,000	6.5
3	USD6,000 but less than USD7,500	7.5
4	USD7,500 but less than USD9,000	8.5
5	USD9,000 and above	10

The mineral royalty rate on cobalt and vanadium is 8%. A person that is in possession of minerals extracted in Zambia for which mineral royalty has not been paid is liable to pay mineral royalty at the rates set out in the table above if the mineral is copper. Effective from 2022, a mineral royalty paid is allowed as a deduction in determining taxable income for a mining entity.

A tax incentive is available to companies that are newly listed on the Lusaka Stock Exchange. A two percentage point reduction of each corporate tax rate is granted to such companies. In addition, a reduction of five percentage points (for a total reduction of seven percentage points) of each corporate tax rate is available to companies with more than 33% of their shares owned by Zambians. The incentive applies for one year only, and a company may claim the incentive only once.

Effective from January 2023, the definition of "electronic invoicing system" in the Zambian Income Tax Act is to take on the meaning assigned to the words in the Value Added Tax Act.

Effective from January 2023, the definition of "royalty" in the Zambian Income Tax Act has been revised. According to the act, "royalty" is redefined as a payment of any kind received as consideration for the use of, or the right to use, the following:
- Any copyright of a literary work
- Any artistic or scientific work, including cinematographic films, films, video tapes, sound recordings or any other like medium
- Any computer program or software
- Any patent, trademark, design or model, plan, secret formula, or process
- Any industrial, commercial or scientific equipment
- Any information concerning industrial commercial or scientific experience

Effective from 2023, the Income Tax Act has been amended to provide for the definition of a "public-private partnership" (PPP) project as a project that shall be transferred back to Zambia that involves any of the following:
- Design, finance, construction, development or operation of a new infrastructure, asset or facility
- Provision of social sector services
- Rehabilitation, modernization, expansion, operation or management of an existing infrastructure, asset or facility

With respect to the PPP, effective from 2023, an amendment has been made to the charging schedule of the act and it now provides the following:

- The tax chargeable on the income received by a special purpose vehicle undertaking a PPP project under the Public Private Partnership Act, 2009 for the first five years that a PPP project makes profit shall be 15%.
- The rate of 0% per year applies to dividends paid by an agro-processing business approved by the Zambia Development Agency and carrying on the manufacturing of corn starch in a multi-facility economic zone or an industrial park for the 2023 to 2032 tax years.

A PPP that has been approved may claim, on a straight-line basis, wear and tear at an accelerated rate, not exceeding 100% with respect to a new implement, plant or machinery acquired and used by the special purpose vehicle for the purpose of that PPP. The tax liable on PPP income received by a special purpose vehicle is 15% for the first five years that the PPP makes a profit.

Capital gains. Capital gains are not subject to tax in Zambia.

Administration. The Zambia Revenue Authority administers the Income Tax Act. The tax year runs from 1 January to 31 December. Annual tax returns must be filed by 21 June of the following accounting year.

Companies must make four advance payments of tax, which are due on 10 April, 10 July, 10 October and 10 January. The installments are based on an estimate of the tax due for the year. The balance of tax due must be paid by the due date for filing the annual tax return.

A company may apply to the Commissioner-General to use an accounting year other than the standard tax year. However, the due dates described above for filing returns and advance payments of tax also apply to companies with an accounting year-end other than 31 December.

The following are the Pay-As-You-Earn (PAYE) bands as of January 2024.

Income		
Exceeding ZMW	Not exceeding ZMW	Rate %
0	5,100	0
5,100	7,100	20
7,100	9,200	30
9,200	—	37

Dividends. A 15% withholding tax is imposed on dividends paid to resident companies and individuals. A 20% withholding tax is imposed on dividends paid to nonresident companies and individuals. This is a final tax. Dividends payable by subsidiaries are also subject to withholding tax at a rate of 15%.

The option to offset the tax withheld on dividends received by a Zambian-incorporated company is available against the withholding tax payable on their own dividend distributions.

Foreign tax relief. In the absence of double tax relief under a double tax treaty, unilateral tax relief is available to resident companies for foreign taxes paid on foreign income subject to Zambian tax. The amount of the tax credit is the lower of the Zambian tax payable on the foreign income and the foreign tax paid on the same income.

C. Determination of trading income

General. Assessable income equals the amount of a person's income liable to tax that may be included in an assessment and that remains after allowing the deductions to which that person is entitled under the provisions of the Income Tax Act. Expenses are deductible to the extent they are incurred wholly and exclusively for the purposes of the business.

The deduction of interest is now limited to 30% of the tax earnings before interest, tax, depreciation and amortization (EBITDA). The disallowed interest expense in the tax year may be carried forward up to a maximum of five years. The carryforward period of disallowed interest expense is increased to 10 years for mining operations and electricity generating entities, effective from 1 January 2022. The limitation applies to gross interest arising from loans that are both revenue and capital in nature.

Companies engaged in fishing or farming for two consecutive tax years may elect to calculate taxable income or loss for the two tax years by averaging the taxable income earned or loss incurred in each of the two tax years. This election must be filed with the Commissioner-General before the end of the tax year following the second consecutive tax year. The election is not allowed in certain circumstances.

A deduction of a local content allowance is available. It equals 2% of expenditure incurred, other than that of a capital nature, for the growing or purchase of agricultural products by companies carrying on agro-processing or manufacturing in a tax year. The local content allowance applies to agricultural products grown within Zambia, including cassava, pineapple and mango, and is claimable each year that the expenditure is incurred but may not be claimed for more than three tax years.

An annual allowance of 10% is provided for expenditure incurred for the growing of, among others, rose flowers, tea, coffee and citrus fruit trees. For persons growing the plants mentioned above for the first time, the expenditure incurred is not deductible and may be carried forward to the following tax year up to the first year of production. From 2021, the allowance is extended from a period of three consecutive years to five years.

Inventories. Inventories are valued at the lower of cost or net realizable value.

Provisions. Specific identifiable provisions with proof of steps taken to collect the debt are allowed for tax purposes, but general provisions are not allowed.

Tax depreciation. Annual wear-and-tear allowances, which are calculated using the straight-line method, are available for the following assets.

Asset	Rate (%)
Industrial buildings	
Low-cost housing (buildings used to provide housing for the purposes of a business with a cost per unit of up to ZMW20,000 [USD1,042.33 as of February 2023])	10
Others	5
Commercial buildings	2
Implements and plant and machinery used in farming, tourism, electricity generation and manufacturing	50
Other implements and plant and machinery, and commercial vehicles	25
Non-commercial vehicles	20
Property, plant and equipment investment by companies in the priority sector	100

The amount of depreciation claimed on an asset may be recaptured when the asset is sold. In general, the amount recaptured is the excess of the sales price over the tax value, but it is limited to the amount of depreciation claimed.

The 2021 amendment of Section 34A (2) of the Income Tax Act has increased the period in which the development allowance can be claimed. A development allowance is an allowance that applies to a person growing rose flowers, tea, coffee, bananas, citrus fruit trees, and other similar plants or trees, for the first time. The expenditure incurred is not deductible. The development allowance may be carried forward to the following tax years up to the first year of production. However, the development allowance cannot be carried forward for more than five consecutive years.

Relief for losses. Tax losses may be carried forward five years to offset income from the same source. Mining operations and companies operating in the hydro- and thermo-generation sector may carry forward losses for a period of 10 years. Effective from 1 July 2015, a loss from a mining operation is deducted from 50% of the income of a person from the mining operation. In general, losses may not be carried back.

Groups of companies. No provisions for filing consolidated returns exist in Zambia.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on any supply of goods and services, other than an exempt supply, made in Zambia and on taxable imports; exports are zero-rated	16
National Pensions Scheme Authority (NAPSA; social security system) contributions on monthly wages; maximum contribution of ZMW1,342	

Nature of tax	Rate (%)
per month for both employers and employees	
Employer	5
Employee	5
National Health Insurance Management Authority (NHIMA) contributions on monthly wages per month for both employers and employees	
Employer	1
Employee	1
Property transfer tax on direct transfers of shares (and equivalent rights)	5
Property transfer tax on indirect transfers of shares (and equivalent rights) of companies incorporated in Zambia	5
Property transfer tax on the realized value with respect to a mining right for an exploration license	5
Property transfer tax on the realized value with respect a mining right for a mining license (effective from 1 January 2023)	10
Property transfer tax on the realized value with respect to a mineral processing license (effective from 1 January 2023)	10
Property transfer tax on the realized value with respect to land	5
Property transfer tax on the transfer of mining rights and interests in mining rights	10
Property transfer tax on transfers of mining licenses (effective 1 January 2022)	10
Property transfer tax on intellectual property; effective from 1 January 2018	5
Royalty on the extraction, production and selling of ore; the mineral royalty tax rate varies depending on the type of mineral	Various

E. Miscellaneous matters

Foreign-exchange controls. The Zambian currency is the kwacha (ZMW).

Zambia does not impose foreign-exchange controls.

Transfer pricing. Transfer-pricing rules apply to transactions between related parties. Related-party transactions must be conducted at arm's length. Transfer-pricing rules apply to transactions with nonresident related parties as well as to transactions between local entities. The Zambian transfer-pricing regulations are based on Organisation for Economic Co-operation and Development (OECD) rules, and any price determined in accordance with OECD rules is acceptable. Effective from 1 January 2018, taxpayers must retain transfer-pricing documentation and submit it within 14 days of a request by the tax authority or they will be subject to a penalty of 80 million penalty units (ZMW24 million). Taxpayers are required to have the transfer-pricing document ready at the time of filing of the income tax return (due 21 June).

The required period for the retention of documents and information is 10 years for a business transacting with associated persons. From 2021, the threshold for the preparation of transfer-pricing documentation for local companies is increased from an annual turnover of ZMW20 million to ZMW50 million. The requirement to file a Country-by-Country (CbC) report is introduced. An ultimate parent entity that is tax resident in Zambia, and that had consolidated group revenue of EUR250 million or ZMW4,795,000 in the previous accounting year must file a CbC report with the Commissioner-General 12 months after the last day of the reporting year of the multinational enterprise (MNE) with respect to that reporting accounting year.

Effective from 1 January 2022, the legislation provides clarity with respect to the use of a single currency threshold, denominated in kwacha, for CbC reporting. Previously, the transfer-pricing regulations provided for two currencies at EUR750 million or K4.795 billion. Following this amendment, an MNE group with a consolidated group revenue of K4.795 billion or more is required to file a CbC report.

A non-reporting entity must submit a CbC report notification providing the identity and tax residence of the reporting entity in its MNE group before the close of the financial year (last day of the MNE accounting period).

Permanent establishment. The provision of services, including consultancy services, through employees or other personnel engaged by an entity in Zambia for a period or periods exceeding an aggregate of 90 days in any rolling 12-month period results in a permanent establishment.

Carryforward	6 (o)

(a) Special tax rates apply to certain enterprises. For details, see Section B.

(b) An AIDS levy of 3% is imposed on income tax.

(c) A 20% tax is imposed on capital gains on the disposal of specified assets, such as unlisted marketable securities, immovable property (including rights in residential, commercial or industrial stands and membership interests in condominiums) and intangible property requiring formal registration. See Section B. For specified assets acquired before 22 February 2019, the rate of tax is 5% on gross proceeds except for listed securities that are exempt from capital gains tax if a capital gains withholding tax is withheld. For listed marketable securities held for less than 180 days, capital gains tax was chargeable at the rate of 4% on the gains up to 27 June 2024. The capital gains tax has been repealed for a period of six months effective from 28 June 2024. Effective 1 January 2024, a special capital gains tax is payable on the transfer of mining titles retrospectively from 2014. The tax is chargeable at 20% of the transaction value immediately before the mining title is transferred and is paid by the transferee. A special tax rate of 5% applies if there is an express provision in the Mines and Minerals Act for approval by the Minister of Mines for transfer of the specific mining title. Entities that sold mining titles before 1 January 2024 and had not paid the tax must account for the capital gains tax on or before 1 April 2024. For disposals after 1 January 2024, capital gains tax must be paid within 30 days after the conclusion of the transaction. Mining claims cannot be registered by the Mining Commissioner unless a capital gains tax certificate issued by the Zimbabwe Revenue Authority (ZIMRA) is provided.

(d) A capital gains withholding tax applies on funds held by a depositary on behalf of a seller of a specified asset. The withholding tax on the disposal of securities listed on the Zimbabwe Stock Exchange is 2% of gross proceeds, effective from 28 June 2024. Before the change, the withholding tax rate was 1.5% for listed securities held for a period of at least 180 days. The capital gains withholding tax is a final tax. For securities held for less than 180 days, the withholding tax rate was 40% for the period to 27 June 2024. This was repealed on 28 June 2024 for a period of six months. See Section B.

(e) A 10% rate applies to dividends paid by companies listed on the Zimbabwe Stock Exchange to resident individuals and nonresident individuals and companies. A rate of 5% applies to dividends paid to nonresidents by companies listed on the Victoria Falls Stock Exchange while for residents, the rate is

10%. A 15% rate applies to dividends paid by any other company to resident persons other than companies.

(f) This is a final withholding tax imposed on residents. The following types of interest are exempt from income tax and withholding tax:
- Interest on deposits with a term of more than 12 months
- Interest paid by the People's Own Savings Bank
- Interest on building society Class C (tax-free) shares

The 5% rate applies to interest on fixed-term deposits of at least 90 days with financial institutions. The 0% rate applies to fixed-term deposits of more than 12 months.

(g) This is a final tax imposed on the income on the maturity of treasury bills, bankers' acceptances and discounted instruments traded by financial institutions that are purchased by resident investors who are not financial institutions. The tax is imposed at the time of disposal or maturity of the instrument.

(h) This withholding tax is imposed on nonresident persons. The income may also be subject to income tax.

(i) The withholding taxes are paid to the ZIMRA in local currency.

(j) This is a final tax imposed on remittances transferred from Zimbabwe to nonresidents for allocable technical, managerial, administrative or consulting expenditures with respect to services that were provided to a resident by a nonresident person in relation to trade carried on in Zimbabwe.

(k) A 15% withholding tax rate applies on payments by residents to nonresident persons for technical, managerial, administrative and consulting services. A withholding tax of 20% is imposed on payments of non-executive directors' fees and property and insurance commissions paid to residents and nonresidents who are not employees. The tax withheld is credited to income tax, while for non-executive directors, the 20% is a final tax.

(l) This is a tax on the payee, which is withheld by the payer from all payments made under contracts of USD1,000/ZWG equivalent of USD1,000 or more over the year of assessment to resident suppliers who do not provide a valid tax-clearance certificate at the time of payment.

(m) The tax is withheld by an appointed Value-Added Withholding Tax Agent from payments for taxable supplies to specified noncompliant registered value-added tax (VAT) operators. The tax is offset in the following month against output tax.

(n) The tax is withheld at 2% on amounts exceeding USD5 or the ZWL/ZWG equivalent of USD5 that are mediated by a financial institution. Between 1 June 2023 and 2 May 2024, the rate of intermediated money transfer tax (IMTT) on USD transactions was 1%. The rate was changed, effective from 3 May 2024, to 2%. The maximum tax is USD10,150 or the local currency ZWL/ZWG equivalent for transactions that are equivalent to or exceed USD500,000 or the local currency equivalent of USD500,000. Between 1 January 2024 and 2 May 2024, the rate of IMTT on outbound foreign payments and Zimbabwe gold-backed digital (ZWG) tokens was the following:
- USD0.01 per outbound foreign payment transaction of USD5 and above.
- USD0.005 per transaction on each ZWG token transaction of USD5 and above

The above rates and wording have since since been corrected with the IMTT rate increased to 2% on each outbound foreign payment and ZWG token. The above rates are chargeable on amounts exceeding USD5 or the ZWL/ZWG equivalent of USD5 that are mediated by a financial institution.

(o) Mining losses are ring fenced to specific locations and may be carried forward indefinitely.

B. Taxes on corporate income and gains

Corporate income tax. Income tax is levied on all amounts (other than capital) received or accrued to residents from a Zimbabwean or a deemed Zimbabwean source, less expenditures that are incurred in the production of income or for purposes of trade. Certain specific types of income are exempt.

Nonresident companies that carry on business in Zimbabwe are subject to corporate income tax on all taxable income, wherever arising, attributable to a permanent establishment in Zimbabwe.

Foreign interest and dividends accruing to taxpayers that are ordinarily resident in Zimbabwe are deemed to be from a source in Zimbabwe. A corporation is ordinarily resident in Zimbabwe if it is managed and controlled in Zimbabwe.

Rates of corporate tax. Resident and nonresident companies are subject to income tax at a rate of 25%. Residents are subject to income tax at a rate of 20% on gross foreign dividends receivable.

Special tax rates. Special tax rates apply to the following enterprises.

Type of enterprise	Rate (%)
Investors operating in export-processing zones licensed before 1 January 2007	25
Special mining lease operations	15 (plus additional profits tax)
Build-own-operate-transfer (BOOT) and build-operate-transfer (BOT) projects	
Years 1 through 5	0
Years 6 through 10	15
Year 11 and thereafter	25
Industrial park operators	
Years 1 through 5	0
Licensed power generation projects	
Years 1 through 5	0
Thereafter	25
Taxable income of operator of tourist facility in an approved tourist zone	
Years 1 through 5	0
Thereafter	25
Manufacturing enterprises exporting 31% to 51% of their production	15/17.5/20
Licensed power generation projects	
Years 1 through 5	0
Thereafter	15
Satellite nonresident broadcasting services and electronic commerce platforms; tax is imposed on annual income over USD500,000 that is earned from Zimbabweans	5

Interest received by residents on deposits with Zimbabwean financial institutions with a term of over 12 months is exempt from income tax and withholding tax.

Other interest received by residents from Zimbabwean financial institutions is exempt from income tax, but it is subject to a final withholding tax of 5% or 15% for fixed-term deposits of at least 90 days. A final withholding tax of 15% is also imposed on the income to maturity of treasury bills, bankers' acceptances and discounted instruments traded by financial institutions that are purchased by resident investors other than financial institutions. The tax is imposed at the disposal or maturity of the instrument. No expenses or losses are deductible from the income.

Other interest received by a resident is taxable at the normal corporate tax rate after deducting allowable expenses and losses.

Tax concessions. Previously, tax incentives were available to income generated in designated export-processing zones. These have since been eliminated. Effective from 1 January 2017, income accruing to licensed investors in designated Special Economic Zones (SEZs) is taxed at special rates. Effective from 1 January 2023, the incentive applies only if 100% of the goods

produced are exported. SEZ incentives are no longer available to income from mining operations, effective from 1 January 2023.

SEZ corporate tax. The following are the SEZ corporate tax rates:
- First five years: 0%
- Thereafter: 15%

The 3% AIDS levy is not chargeable.

Employment tax. Income accruing to expatriate employees of licensed investors in SEZs is subject to tax at a rate of 15% plus the AIDS levy.

The following are exemptions from withholding taxes in SEZs:
- Shareholder taxes
- Dividend payments to resident and nonresident shareholders
- Fees and royalties paid to nonresident persons

Other SEZ concessions. The following are other SEZ concessions:
- Zero percent customs duty on imported capital equipment and raw materials to be used in SEZs
- VAT exemption for the items mentioned above

International bodies that provide finance for approved projects for development in Zimbabwe are exempt from income tax and capital gains tax.

Income from mortgage financing accruing to commercial banks is exempt from income tax. The expenses are consequently not tax-deductible.

Capital gains. Withholding tax is charged on the disposal of specified assets, which are marketable securities, immovable property and intangible property requiring formal registration under different pieces of legislation.

Withholding taxes are collected and paid by a depositary (people collecting the proceeds in an agency capacity).

Specified assets acquired before 22 February 2019. The following withholding tax rates apply:
- Listed marketable securities: 1.5% up to 27 June 2024. The withholding tax rate is now 2%, effective from 28 June 2024, for six months, following which the rate will be reviewed.
- Unlisted marketable securities: 5%
- Immovable property: 15%

The following additional withholding taxes apply:
- Securities acquired and disposed of within six months: 40%, between 13 May 2022 and 27 June 2024. The holding period limit and the 40% rate are repealed for six months beginning 28 June 2024.
- Securities acquired and disposed of after six months: 1.5%, effective from 1 January 2022 to 27 June 2024. Thereafter the withholding tax on the disposal of Zimbabwe Stock Exchange-listed securities is 2% of gross proceeds, regardless of the holding period. The 2% withholding tax is a final tax.

This tax is offset against any assessed capital gains tax.

Specified assets acquired on or after 22 February 2019. Tax is chargeable at 20% on capital gains on disposals of immovable property and unlisted shares. For listed shares held for less than 180 days, tax is chargeable at 4% of the gain. Capital gains tax on listed securities is repealed for six months beginning 28 June 2024.

Other rules. For purposes of calculating capital gains tax, the following deductions are available:
- Recoupment chargeable to tax in terms of the Income Tax Act [Cap 23:06].
- Improvements to immovable property.
- An inflationary allowance based on movement of the All Items Consumer Price Index from the date of purchase to the date of disposal. This is applied on the purchase or construction cost and improvements to the asset being disposed of.
- Selling and associated costs of the property.

Any capital gains withholding tax paid is credited with any excess amount being refundable.

The 2% withholding tax on the disposal of listed securities is a final tax.

Capital gains on the disposal of shares to an approved indigenization partner or community share ownership trust or scheme are charged on the amount paid and not the fair market price.

Shares disposed to employees under an approved employee share ownership scheme are exempt from capital gains tax. The disposal of the same shares to the scheme is also exempt from capital gains tax.

Administration. Zimbabwe's tax year ends on 31 December. Tax returns must be filed by 30 April of the following year. However, capital gains tax returns must be submitted within 30 days from date of the transaction. Tax is based on self-assessment except for employees who would have worked for less than a full calendar year.

Corporate and employment tax must be paid in the currency the income was earned, received or accrued.

Income tax is paid in the currency of trade. If income is earned 100% in foreign currency, the tax liability must be paid in that currency. The reverse is true with respect to income earned in local currency. If income is earned in both local and foreign currency, tax must be paid in both currencies based on their relative contributions. Effective from the tax year beginning 1 January 2022, taxpayers must submit two income tax returns if income was earned in local and foreign currency. Earnings in other foreign currencies other than US dollars (USD) must be converted to USD at the international cross rate of exchange. With the new Tax and Revenue Management System (TaRMS), only one return that is divided into USD and ZWG tax computation segments is submitted. This is effective from December 2023.

All expenses must be proportionately apportioned between the USD and Zimbabwean ZWG returns based on the USD and ZWG income tax ratios.

Effective from the tax year beginning 1 January 2022, income tax returns for approved accounting years ending in any period other than 31 December, must be submitted not later than four months after the taxpayer's approved year end.

The following are the quarterly payment dates and applicable portion of tax for a 31 December year-end:
- 25 March: 10% of projected annual tax
- 25 June: 25% of projected annual tax
- 25 September: 30% of projected annual tax
- 20 December: 35% of projected annual tax

Taxpayers with approved tax years pay their quarterly tax three, six, nine and 12 months from the start date of their year.

Taxpayers must estimate their tax correctly subject to a tolerable margin of error of 10% of annual tax. Interest will be charged for underpayments above the 10%. Effective from 1 December 2022, the annual interest rate for ZWL income and capital gains tax underpayments was increased from 25% to 200%. The rate followed movements in the bank policy rate. Effective 5 April 2024, the bank policy interest rate was recalibrated from 130% per year to 20% per year. The interest rate for USD tax remains at 10%. Objections cannot be made to interest assessed by the Commissioner on quarterly payment dates. There is no penalty with respect to this tax.

Any withholding taxes with respect to corporate tax are credited, provided the required evidence is available.

Dividends. Dividends that are paid between two local companies are exempt from tax.

Dividends paid by a listed company are charged at the following rates:
- Company listed on the Zimbabwe Stock Exchange (ZSE): 10%
- Company listed on the Victoria Falls Stock Exchange (VFSE): 5%

Dividends paid by private corporations are subject to a 15% withholding tax.

Dividends received from foreign companies are taxed at 20% of the gross amount with credit being claimed on withholding tax paid in the paying jurisdiction.

Foreign tax relief. Tax relief is provided by treaty or provisions of domestic law. The tax credit cannot exceed the Zimbabwean income tax on the income.

C. Determination of trading income

General. Income tax is levied on all receipts and accruals from a Zimbabwean source or a source that is deemed to be in Zimbabwe. Income includes any recoupment on disposal of assets for which allowances were claimed in earlier years. The recoupment is limited to the capital allowances previously claimed. However, for income from mining operations, the recoupment is equal to sales proceeds for all assets except passenger motor vehicles and staff housing for which allowances were restricted. This excludes income that is proven by the taxpayer to be capital in character or income that is exempt from tax.

Exempt income includes the following:
- Dividends received by a company from another local company
- Interest on deposits with a term of more than 12 months
- Individual's own savings bank interest
- Interest from certain building society investments
- Interest on deposits with financial institutions and treasury bills designated as tax-exempt

Deductions. A taxpayer is entitled to deduct all expenses that were incurred for purposes of trade or in the production of the income except those that are prohibited by statute or that are capital in nature.

The following classes of expenses are not deductible:
- Expenses incurred in the production of exempt income or income not derived or deemed to be derived from Zimbabwe
- Pension fund contributions more than a prescribed amount
- Cost of attending trade missions and conventions exceeding the prescribed amount
- Costs for maintaining idle assets
- Payments in restraint of trade
- Entertainment expenses
- Provisions and accrued but not incurred expenses
- Passenger motor vehicle leasing costs in excess of USD10,000
- IMTT
- Excessive financing costs if debt is more than three times equity
- Group fees exceeding 0.75% or 1% of total allowable deductions that are respectively incurred in the first and subsequent year of trade

Special deductions include the following:
- Donations of up to a specified threshold for the construction, maintenance or operation of hospitals and schools run by the state, local authorities or religious organizations, donations to the Destitute Homeless Persons Rehabilitation Fund to alleviate the condition of destitute homeless persons and donations to local authorities for approved expenditure.
- Allowance equal to the amount of export market development expenditure.
- Amounts contributed to approved scientific and educational bodies for industrial research or scientific experimental work.
- Loans by corporate taxpayers to acquire shares that are repayable from dividends foregone by the taxpayers on those shares. They are deductible in equal annual installments over the period of the loan.

Inventories. Inventory is valued at cost using the first-in, first-out method or the market value as may be appropriate.

Provisions. Provisions are not tax-deductible.

Capital allowances. Taxpayers must deduct capital allowances with respect to qualifying assets that are purchased or acquired for the purposes of trade.

A taxpayer may elect to claim Special Initial Allowance (SIA) of 25% of cost in the first year an asset is used by the business and claim the balance equally over the following three years. Some assets are not eligible for SIA, such as commercial buildings.

The following table lists certain assets, the method used and applicable wear and tear rates.

Asset	Method	Rate (%)
Commercial buildings	Straight-line	2.5
Industrial buildings*	Straight-line	5
Office equipment	Declining-balance	10
Motor vehicles	Declining-balance	20
Plant and machinery	Declining-balance	10

* Toll roads and toll bridges declared to be such under the Toll Roads Act are classified as industrial buildings.

A special rule applies to the rebasing of unredeemed balances on USD purchased assets translated to ZWL. The taxpayer must rebase any balances of qualifying assets that remained unredeemed as of 31 December 2022. The unredeemed USD invoice values that are reported in local currency must be rebased using the Reserve Bank of Zimbabwe auction exchange rate prevailing on 1 January 2023.

On disposal of an asset, capital allowances previously claimed will be included in gross income and taxed at the normal corporate tax rate. The recoupment is limited to allowances that were previously claimed. If proceeds exceed the allowances, the excess amount is not taxable.

Relief for losses. Losses, including assessed tax losses, are tax-deductible. Assessed tax losses can be claimed up to six years from the year they are realized, after which they expire. However, assessed losses for mining operations are perpetual; that is, they do not expire. Losses from one mining operation cannot be claimed by another operation. Assessed losses cannot be carried back.

Groups of companies. Tax is charged on a separate entity approach. No tax is levied on a group.

Transfer of assets between companies under the same control. To avoid recoupment on the transfer of assets between companies under the same control, transferor and transferee may elect to transfer assets at their income tax values. Tax on the recoupment will be charged on the subsequent disposal of the assets to a person outside the group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
VAT; imposed on the supply and importation of goods and services; certain items are exempt, including financial services, medical services, fuel, tobacco, educational or training services, long-term residential leases and transport of passengers by road or rail; also imposed on certain exports; suppliers of qualifying goods and services with an annual value in excess of a specified threshold must register; the annual threshold is currently USD25,000	
Standard rate	15%

Nature of tax	Rate
Exports of unbeneficiated hides	Greater of 75 cents/kg and 15% of the value
Exports of unbeneficiated lithium	5%
Exports of uncut and cut three-dimensional stones	2.5%/5%
Unbeneficiated platinum	Sliding scale based on the degree of beneficiation
Other exports, prescribed drugs and services (excluding accommodation) supplied by designated tourist facilities to tourists that are paid for with foreign currency	
Intermediated Money Transfer Tax (both USD and ZWG)	2%
Presumptive taxes; varies by class	Various

E. Miscellaneous matters

Foreign-exchange controls. The Zimbabwe local currency changed from the Zimbabwean dollar (ZWL) to Zimbabwe gold (ZWG) on 5 April 2024. The country operates strict exchange controls that are regularly fine-tuned. The exchange controls are discussed below in general terms.

A significant shortage of foreign currency exists in Zimbabwe. Foreign currency is obtained through the foreign currency auction floors. It can also be obtained through the willing buyer, willing seller system through the banking system. Amounts procured to import goods and services must be obtained through the banks.

The government imposes broad controls on external payments. Applications are made to the Reserve Bank of Zimbabwe through commercial banks.

The government still imposes broad controls over all transactions involving a nonresident. Applications through commercial banks are required for the approval of most transactions of this nature. Commercial banks refer exceptional items to the Reserve Bank of Zimbabwe.

Foreign investment of up to 35% in primary issues of shares and bonds is permitted if funded by inward transfers of foreign currency. Purchases and disposals by foreign investors in the secondary market require specific approval from the authorities.

Agreements relating to foreign services (including borrowings) must be registered with the Reserve Bank of Zimbabwe through commercial banks. Borrowings of more than specified limits require Reserve Bank of Zimbabwe approval. The approvals are granted based on the merits of the borrowings in accordance with guidelines set by the External Loans Coordinating Committee. Foreign borrowings may be approved only if they are used to fund productive, export-oriented ventures that have the potential to generate sufficient foreign currency for loan principal and interest repayments without recourse to the foreign-currency market. Foreign loans to purchase shares, existing companies or real estate, or to fund private consumption, personal loans or retail inventories, are generally discouraged.

All offshore remittances require preapproval depending on national priorities.

Remittances to related or unrelated nonresident persons are restricted to 3% of audited gross annual revenue of the payer. Payments for good reasons in excess of the 3% are accepted.

Dividends are remitted 100% to nonresident shareholders within one year after the accrual of the profits. Exchange control approval is required. Specific approval is required for dividend remittances with respect to prior years.

After-tax dividends and capital gains derived from investments on the Zimbabwe Stock Exchange are fully remittable.

Debt-to-equity rules. Debt-to-equity rules apply to all companies (see Section C).

Transfer pricing. Zimbabwe introduced transfer-pricing legislation, effective from 1 January 2016. The new transfer-pricing legislation endorses the arm's-length principle and imposes documentary obligations on taxpayers. The legislation covers transactions between all connected persons and applies to both domestic and international transactions. These new provisions are aligned with transfer-pricing principles developed by the Organisation for Economic Co-operation and Development (OECD); consequently, the law recognizes OECD manuals on the subject as relevant sources of interpretation.

F. Treaty withholding tax rates

The rates shown in the table reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends (a) %	Interest %	Royalties %	Fees %
Botswana	5/10	0	10	10
Bulgaria	10	0	10	10
Canada	10	0	10	10
China Mainland	2.5/7.5	0	7.5	0
Congo (Democratic Republic of) (b)	0	0	0	0
France	10	0	10	10
Germany	10	0	7.5	7.5
Iran (b)	5	0	5	5
Kuwait (b)	0/5/10	0	10	0
Malaysia	10	0	10	10
Mauritius	10	0	15	0
Namibia (b)	5/10	0	10	0
Netherlands	10	0	10	10
Norway	10	0	10	10
Poland	10	0	10	10
South Africa	5/10	0	10	5
Sweden	10	0	10	10
United Arab Emirates	5	0	9	6
United Kingdom	5	0	10	10
Non-treaty jurisdictions	10/15	0	15	15

(a) Except for the Iran treaty, the reduced treaty rates apply only if the recipient is a company that controls at least 15% to 25% of the voting power of the payer company.

(b) The entry into force of these treaties has not yet been published.

EY | Building a better working world

EY exists to build a better working world, helping to create long-term value for clients, people and society and build trust in the capital markets.

Enabled by data and technology, diverse EY teams in over 150 countries provide trust through assurance and help clients grow, transform and operate.

Working across assurance, consulting, law, strategy, tax and transactions, EY teams ask better questions to find new answers for the complex issues facing our world today.

About EY's Tax Services
Your business will only succeed if you build it on a strong foundation and grow it in a sustainable way. At EY, we believe that managing your tax obligations responsibly and proactively can make a critical difference. Our 50,000 talented tax professionals, in more than 150 countries, give you technical knowledge, business experience, consistency and an unwavering commitment to quality service — wherever you are and whatever tax services you need.
