Worldwide Corporate Tax Guide

2024

EY
Building a better working world

Preface

Governments worldwide continue to reform their tax codes at a historically rapid rate. Taxpayers need a current guide, such as the *Worldwide Corporate Tax Guide*, in such a shifting tax landscape, especially if they are contemplating new markets.

The content is straightforward. Chapter by chapter, from Albania to Zimbabwe, we summarize corporate tax systems in more than 150 jurisdictions. The content is current as of 1 March 2024, with exceptions noted. Keep up-to-date on significant tax developments around the globe with the EY Global Tax Alert library here.

Each chapter begins with contact information for the key people in that jurisdiction's EY member firm offices. Symbols precede the names of individuals who hold the following functions:

★ National director of the listed tax specialty
◆ Director of the listed specialty in the local office

We then lay out the facts about the jurisdiction's corporate taxes, beginning with an at-a-glance summary. With some variation, the topics covered are taxes on corporate income and gains, determination of trading income, other significant taxes, miscellaneous matters (including foreign-exchange controls, debt-to-equity rules, transfer pricing, controlled foreign companies and anti-avoidance legislation) and treaty withholding tax rates.

At the back of this Tax Guide, you will find a list of the names and codes for national currencies and a list of contacts for other jurisdictions.

For many years, the *Worldwide Corporate Tax Guide* has been published annually along with two companion guides on broad-based taxes: the *Worldwide Personal Tax and Immigration Guide* and the *Worldwide VAT, GST and Sales Tax Guide*. In recent years, those three have been joined by additional Tax Guides on more-specific topics, including the *Worldwide Estate and Inheritance Tax Guide*, the *Worldwide Transfer Pricing Reference Guide*, the *Worldwide R&D Incentives Reference Guide,* and the *Worldwide Capital and Fixed Assets Guide*.

Each of the Tax Guides represents thousands of hours of tax research. They are available free online along with timely *Global Tax Alerts* and other publications on ey.com.

You can keep up with the latest updates at ey.com/globaltaxguides.

The EY organization

EY Global Tax Desk Network

Over the last 40 years, the EY organization has made a significant investment in building a Global Tax Desk Network. It consists of highly integrated teams of more than 300 professionals spanning approximately 60 jurisdictions. The purpose of the Tax Desk Network is to help enable home-country tax experience to be integrated within other jurisdictions and provide services across several of our tax disciplines from hubs in the United States, Brazil, Europe, and Asia-Pacific and China Mainland. The Global Tax Desk Network offers clients a tremendous resource – accessible, timely and integrated tax-planning advice on cross-border investments, providing them worldwide with a forum for information and idea exchange as well as offering cross-disciplinary tax workshops for multinationals. Our Global Tax Desk Network can be contacted at the numbers listed below.

Albania has introduced a new law on income tax, which entered into force on 18 May 2023 and is effective starting from 1 January 2024 with certain exceptions.

A. At a glance

Corporate Profits Tax Rate (%)	15
Capital Gains Tax Rate (%)	15
Branch Tax Rate (%)	15
Withholding Tax (%)	
Dividends	8
Interest	15
Royalties from Patents, Know-how, etc.	15
Rent	15
Services	15
Insurance Services	15
Participation in Management and Administration Bodies	15
Construction, Installation or Assembly Projects and their Supervision	15
Payments for Entertainment, Artistic or Sporting Events	15
Gambling Gains	15
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

B. Taxes on corporate income and gains

Corporate income tax. A company is resident in Albania if it is incorporated in Albania or at any time during the fiscal year the

management and control of the company is exercised there. Resident companies are subject to corporate income tax on their worldwide income. Foreign companies are subject to tax on profits generated from activities performed through a permanent establishment in the country and on income from Albanian sources.

Rates of corporate tax. The corporate income tax rate is 15%. Until 2029, taxpayers with annual turnover up to ALL14 million (approximately EUR140,000) are subject to 0% income tax.

Windfall tax. In January 2023, the Albanian government introduced a temporary windfall tax on the excess sales realized by Albanian power producers due to the increase in energy prices. The windfall tax is imposed at a rate of 50% on excess income on the electricity sale at a price exceeding ALL8.5/kw, equivalent to roughly EUR73/mwh. The tax is applied retroactively for 2022 and should be paid in two equal installments, respectively, on 31 March and on 30 November of the following year. The tax is a deductible expense for corporate income tax purposes and is applicable until 31 December 2024.

Tax incentives. Tax incentives in Albania are described below.

Until 2025, the corporate income tax rate is 5% for software production and development companies registered before 18 May 2023. Until 2029, a reduced corporate income tax rate of 5% also applies to agricultural cooperatives, certified agrotourism businesses and companies operating in the automotive sector.

Investment in and operation of internationally recognized four- to five-star hotels and resorts that are awarded a special status by the Council of Ministers are exempt from corporate income tax for a 10-year period starting from the commencement of the economic activity, but no later than three years from the award of the special status. This exemption applies to four- to five-star hotels and resorts that are awarded the special status in or before December 2024.

Capital gains and losses. Capital gains derived from the disposal of assets, including shares, are subject to tax at the standard rate of 15%. Capital losses are deductible for tax purposes.

Capital gains derived by nonresidents from the alienation of immovable property located in Albania, shares of Albanian resident entities, securities and financial instruments in Albania, exploitation and other rights regarding minerals, hydrocarbons and other natural resources in Albania and information related to these rights are taxed in Albania. Also, capital gains derived by nonresidents from the alienation of shares deriving more than 50% of their value at any time during the last 365 days, directly or indirectly, from immovable property located in Albania or from any the abovementioned rights or information are taxed in Albania.

Capital gains derived from the direct or indirect transfer of shares or voting rights of an entity that owns rights for the exploitation of minerals, hydrocarbons and other natural resources in Albania or information related to these rights, or operates in the telecommunication sector or as a financial institution, are taxed at the

level of the entity whose ownership is transferred, to the extent that the entity meets both of the following conditions:

- It is subject to a direct or indirect change of ownership by more than 20%.
- It has an average turnover of ALL500 million for the last three years.

The entity is treated as having transferred a proportion of its assets before the transfer. The tax liability is computed on the difference between the fair value and cost of the underlying asset, apportioned to the ownership change percentage. This is a final tax, and the transferor of shares is exempt from taxation on capital gains. If the transferred entity is not liable to pay tax in accordance with the above rule, the obligation rests with the transferor of shares.

A nonresident person that is subject to capital gain taxation in Albania must declare the capital gains and pay the tax liability by submitting an annual income tax return by 31 March of the following year.

The Albanian taxpayer should also report these ownership changes with the tax authorities to the extent that the change is more than 20% for all types of companies and more than 10% for companies whose shares derive more than 50% of their value at any time during the last 365 days, directly or indirectly, from immovable property located in Albania or from exploitation and other rights regarding natural resources and information related to these rights.

Failure to comply with these reporting obligations is subject to heavy penalties.

If a tax treaty is in place, capital gains derived from nonresidents arising from the transfer of shares are taxed in accordance with the provision of the treaty.

Administration. The tax year is the calendar year.

Taxpayers subject to corporate income tax make advance payments of corporate income tax on a quarterly basis. The payments must be made by 31 March for January through March, by 30 June for April through June, by 30 September for July through September and by 31 December for October through December. However, taxpayers may opt to make monthly advance payments of corporate income tax by the 15th day of each month. Newly established companies involved in production activities are not required to make quarterly advance payments for either a period of six months or the period until the end of the fiscal year, whichever is shorter. Failure to pay the advance payment of corporate income tax on time is subject to a penalty of 10% of the amount due plus default interest.

The advance payments for January through March are calculated based on the corporate income tax of the tax year before the preceding tax year. The advance payments for April through December are calculated based on the corporate income tax of the preceding tax year. The tax rate for the calculation of the advance payment is 15%. If the company demonstrates to the tax

authorities that the taxable income in the current year will be substantially lower than the taxable income of the reference period, the tax authorities may decide to decrease the advance payments. If the tax authorities determine that the taxable income of the current year will be increased by more than 10%, compared with the taxable income realized in the reference period, they may decide to increase the advance payments. Companies that generated losses in the reference years make advance payments based on their taxable profit projections for the current year.

By 31 March, companies must file the annual tax return and pay the corporate tax due for the tax year less advance payments made.

Companies not complying with the filing and payment deadlines described above are subject to interest and penalties. Late tax payments are subject to interest at a rate of 120% of the interbanking loan interest rate published by Bank of Albania. The interest is not deductible for corporate income tax purposes. Late tax payments and inaccurate tax return filings are charged with a penalty of 0.06% of the amount of the unpaid tax liability and contribution for each day of delay, capped at 21.9%. In addition, a penalty of ALL10,000 (EUR100) for taxpayers subject to corporate income tax or ALL5,000 (EUR50) for other taxpayers can be assessed if the tax return is not filed by the due date. If the unreported tax liability results from tax evasion, the penalty is 100% of the unpaid liability.

Dividends. Dividends paid by Albanian companies are subject to withholding tax at a rate of 8% unless the rate is reduced under an applicable double tax treaty (see Section F). Dividends received by Albanian companies are exempt from corporate income tax, if all the following conditions are satisfied:

- The recipient company (shareholder) must own a minimum participation of 10% of the share capital or voting rights of the distributing entity.
- The shares must be held by the shareholder for an uninterrupted period of at least 24 months.

If an entity receives dividends before the 24-month holding period is completed, but meets the minimum participation requirement of 10%, the dividends can be exempt from corporate income tax, provided that the recipient company deposits a bank guarantee for the amount of tax that would have been payable in absence of the exemption valid until the completion of the 24-month period.

Foreign tax relief. Foreign direct tax on income and gains of an Albanian resident company may be credited against the corporate tax on the same profits. The foreign tax relief cannot exceed the Albanian corporate income tax charged on the same profits. If a company receives income from a country with which Albania has entered into a double tax treaty, other forms of foreign tax relief may apply, as stipulated in the provisions of the treaty.

C. Determination of trading income

General. The assessment is based on the financial statements prepared in accordance with the local standards or International

Financial Reporting Standards (IFRS), subject to certain adjustments for tax purposes as specified in the Albanian Tax Code and other supplementary legal acts.

All necessary and reasonable expenses incurred for the business activity that are properly documented are deductible, except for the following:

- Gifts and donations.
- Penalties and fines paid to a public authority for a legal offense.
- Wages and salaries not paid through the financial system.
- Expenses for cross-border technical services and consultancy and management fees if the corresponding fees and withholding tax has not been paid by 31 March of the year following the year in which the service is provided. These expenses can be deducted in the next year in case they are paid within that year.

Other types of expenses may be deducted up to a ceiling. These expenses include, but are not limited to, the following:

- Representative and entertainment expenses are deductible up to 0.3% of annual turnover. A higher threshold applies to toll manufacturing companies.
- Production waste and losses, including losses from impairment, are deductible to the extent provided by the relevant legislation.
- Sponsorships are generally deductible up to 3% of the income before tax and up to 5% for media, books publishing, cultural and sports activities. Sponsorships made by taxpayers with annual taxable revenue above ALL100 million (approximately EUR1 million) to sports activities can be deductible at three times the amount sponsored.
- Per diems are deductible up to ALL4,000 per day for traveling inside Albania and up to EUR80 per day for traveling abroad, to the extent that the annual total of per diems is less than 50% of the annual gross salary budget.
- Interest is deductible only to the extent that the rate does not exceed the average 12-month banking interest rate published by Bank of Albania, except interest on loans granted by microcredit financial institutions.
- The net interest expense balance (that is, the difference between the interest expenses and interest revenues, exceeding 30% of earnings before interest, tax, depreciation and amortization [EBITDA]) adjusted for tax purposes is not deductible for the tax period. Such interest not deductible in the current period can be carried forward to five consecutive tax periods. Such limitation does not apply to banks, other financial institutions that are not banks, insurance companies, leasing companies and long-term public infrastructure projects.
- Expenses settled in cash are tax deductible if they do not exceed ALL150,000 (approximately EUR1,150).
- Life and health insurance premium costs for the employees exceeding 5% of their salary are tax deductible for that fiscal year.
- Voluntary pension contributions made by employers in favor of their employees to professional pension plans are tax deductible up to the amount of annual minimum salary, currently at ALL480,000 (approximately EUR4,820) per year.
- Expenses related to tax-exempt revenue.

Inventories. The inventory valuation rules stipulated in the accounting law also apply for tax purposes. Inventory is valued

at historical cost, which is determined by using the weighted average, first-in, first-out (FIFO) or other specified methods. The method must be applied consistently. Changes in the method must be reflected in the books of the company.

Provisions. Companies may not deduct provisions, except for certain levels of special reserves specified by regulations regarding insurance companies and provisions of financial service companies created in compliance with International Financial Reporting Standards and certified by external auditors.

Tax depreciation. Assets are depreciated separately for tax purposes at the following rates:

- Buildings and installations with a useful life beyond 15 years: 5%
- Intangible assets: 15%
- Computers, information systems, software and data storage equipment: 25%
- All other assets: 20%

Relief for losses. Losses may be carried forward for five consecutive years. However, if a change of 50% in the entity's ownership occurs accompanied by a change in the business activity, the remaining losses are forfeited. Loss carrybacks are not allowed.

Groups of companies. Each company forming part of a group must file a separate return. The law does not provide for consolidated tax returns or any other group relief.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; exempt supplies include leases of land, supplies of buildings (optional) and financial services	
Standard rate	20%
Reduced rate for the supplies of agricultural inputs (products)	10%
Reduced rate for accommodation, restaurant (except for drinks), supplies from companies having the status of "agritourism certified entity," supplies made from brand-name hotels and resorts having a special status, advertisement services from audiovisual media, supplies of books of any type, certain public transport vehicles and construction of sport facilities	6%
Exports of goods and supplies of services relating to international transportation	0%
Real estate property tax	
Buildings	
Buildings used for business purposes; rate applied to value of building	0.2%
Buildings under construction; rate applied to value of the construction surface of buildings that have not been completed as per the time frame stipulated in the construction permit received	30%

Nature of tax	Rate
Agricultural land	ALL700 to ALL5,600 per hectare
Plots of land	ALL0.14 to ALL20 per square meter
Social security contributions, on monthly salary up to ALL176,416; paid by	
Employer	15%
Employee	9.5%
Health insurance contributions on monthly gross salary; paid by	
Employer	1.7%
Employee	1.7%
Excise duties imposed on specified goods (tobacco products, coffee, alcoholic beverages, petrol, diesel, fuel, kerosene and lubricants); the tax is calculated as a specific amount per unit	Various
Consumption tax for petrol, gas, oil and coal	ALL27 per liter

E. Miscellaneous matters

Foreign-exchange controls. Albania has a free foreign-exchange market. The Albanian currency, the lek (ALL), is fully convertible internally.

Residents and nonresidents may open foreign-currency accounts in Albanian banks or foreign banks authorized to operate in Albania. Residents may also open accounts in banks located abroad. All entities must properly document all of their money transfers to comply with the regulations of Bank of Albania. No limits are imposed on the amount of foreign currency that may be brought into Albania. Hard-currency earnings may be repatriated after the deduction of any withholding tax.

Transfer pricing. Albanian transfer-pricing rules were introduced in June 2014 and are aligned with the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines. Under these rules, taxpayers engaged in controlled transactions are required to maintain transfer-pricing documentation, which must be submitted within 30 days following the tax authorities' request. Failure to prepare transfer-pricing documentation is not sanctioned with penalties, but fulfilling the requirement protects the taxpayer from the assessment of penalties in the event of transfer-pricing-related audit adjustments. Such penalties equal 0.06% of the amount of the unpaid liability for each day of delay, capped at 21.9% (equivalent of 365 days).

Only cross-border and controlled transactions are subject to the transfer-pricing rules. Consequently, domestic transactions are not subject to the rules. Controlled transactions are transactions between related parties, dealings between a permanent establishment and its head office, and transactions with an entity resident in a tax-haven jurisdiction. Two persons are considered related parties if either one of them participates directly or indirectly in the management, control or capital of the other, or the same person(s) participate(s) directly or indirectly in the management,

control or capital of the two parties; that is, the same person owns 50% or more of the share capital of the other person or effectively controls the business decisions of the other person.

The transfer-pricing rules refer to the application of the most appropriate method among the OECD transfer-pricing methods, which are comparable uncontrolled price, resale price, cost-plus, transactional net margin and profit-split. If it can be proved that none of the approved methods can be reasonably applied, taxpayers are allowed to use other more appropriate methods.

Taxpayers are required to submit by 31 March of the following year a Controlled Transaction Notice, which lists the intercompany transactions and the transfer-pricing methods applied to these transactions, if their controlled transactions, including loan balances, exceed in aggregate ALL50 million (approximately EUR363,000).

Failure to timely submit the Controlled Transaction Notice subjects the taxpayer to a penalty of ALL10,000 (approximately EUR70) for each month of delay.

Reorganizations. Business reorganizations between Albanian tax residents, including mergers, divisions or partial divisions, exchanges of shares and transfers of a branch activity are, in principle, tax-neutral transactions, except for any cash payment in excess of a qualified amount. Under the reorganization rules, in the case of a transfer of a branch of activity, the receiving company should continue to use the carrying tax values of the assets transferred for the purposes of calculating tax depreciation and any tax gain or losses related to those assets; the transferring entity should recognize the securities received at their market value at the time of the reorganization. In the case of a merger, division or exchange of shares, the shareholder of the transferring company should not attribute to the securities received in exchange a value for tax purposes greater than the value of the securities they held immediately before the reorganization.

Exit taxation. Under newly introduced rules, when a tax resident transfers its business assets, or its tax residence out of Albania, the transfer shall be subject to Albania capital gains taxation calculated on the difference between the market value of the assets transferred and their tax book value at the time of their exit from Albania.

F. Treaty withholding tax rates

Albania has entered into tax treaties with several jurisdictions. In October 2018, the Albanian Council of Ministers approved for Albania to become a signatory jurisdiction and party to the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (Multilateral Instrument, or MLI), announcing that Albania will enter its reservations and observations. In August 2019, Albania joined the Inclusive Framework on Base Erosion and Profit Shifting. In July 2020, Albania ratified the MLI.

The table below providing the treaty withholding tax rates is for illustrative purposes only. It does not reflect the various special

provisions of individual treaties or the withholding tax regulations in domestic law.

	Dividends %	Interest %	Royalties %
Austria	5/15 (a)	5 (b)	5

(a) The lower rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer. The higher rate applies to other dividends.

(b) Interest on government and central bank loans is exempt from withholding tax.

(c) The 0% rate applies if the beneficial owner of the dividends is a company that holds at least 50% of the payer and that has invested at least USD250,000 in the capital of the payer. The 5% rate applies if the beneficial owner of the dividends is a company that holds at least 25% of the payer. The 15% rate applies to other dividends.

(d) The 5% rate applies to interest paid on loans granted by banks or other financial institutions. The 10% rate applies in all other cases.
(e) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 75% of the capital of the payer. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer. The 10% rate applies to other dividends.
(f) The lower rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer. The higher rate applies to other dividends.
(g) The 0% rate applies if the beneficial owner of the dividends is a government, a government institution or an agency of the other contracting state. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer. The 10% rate applies to other dividends.
(h) The 0% rate applies if the beneficial owner of the dividend is a government, a government institution or an agency of the other contracting state. The 5% rate applies to other dividends.
(i) The 5% rate applies if the beneficial owner of the dividend is a company that holds directly at least 25% of the capital of the payer or is a pension scheme. The 10% rate applies to other dividends.
(j) The 5% rate applies if the license fee is related to industrial, commercial and scientific equipment. The 8% rate applies to other license fees.

Albania has signed tax treaties with Finland, India and Luxembourg, but these treaties have not yet entered into force.

Carryforward	4

(a) For details regarding these rates, see Section B.
(b) These rates apply to capital gains on shares and similar securities. The higher rate applies to payments to nonresident individuals or companies.

B. Taxes on corporate income and gains

Corporate income tax. The following companies are subject to corporate income tax (Impôt sur le Bénéfice des Sociétés, or IBS):
- Resident companies (those incorporated in Algeria)
- Nonresident companies that have a permanent establishment in Algeria

In general, IBS is levied on income realized in Algeria, which includes the following:
- Income derived from trading activities carried out by companies
- Income of representative agents of companies
- Income of companies that do not have an establishment or a representative agent but realize a complete cycle of commercial activities

- Income for which the right to tax is attributed to Algeria, under a tax treaty

Tax rates. The following are the IBS rates:
- 10% (preferential rate) for companies carrying out a production activity if they reinvest during the fiscal year. Reinvestments can be made through acquiring production equipment and shares or equity interests or similar securities of up to at least 90% in the capital of another company.
- 19% for companies carrying out production activities.
- 23% for companies engaged in the construction sector and tourism.
- 26% for companies carrying out other activities, such as importation and resale in the same condition.

Companies carrying out activities that are subject to different rates of IBS are charged an IBS rate for each activity according to its portion (pro rata) of the consolidated turnover.

A complementary tax of 10% on company profits is introduced for tobacco manufacturing companies. The tax base of this tax is the same as the tax base subject to the corporate income tax.

Tax incentives. Law No. 22-18 related to investment, which amended Law 16-09, provides for different levels of investment incentives applicable to national and foreign investments made in the production of goods and services, and investments made within the framework of the granting of a license or a concession.

For purposes of the above law, investments include the following:
- Acquiring tangible or intangible assets that are directly included in the production of goods and services, in the context of the creation of new activities, the extension of production capacities and/or the rehabilitation of the production tool
- Participating in the share capital of an Algerian company in the form of cash or in-kind contributions
- Outsourcing activities from abroad

Before the investments are made, they must be registered with the Algerian Agency for the Promotion of Investment (Agence algérienne de promotion de l'investissement, or AAPI) to benefit from the incentives discussed below. The registration of major investment projects (that is, investments equal to or above DZD2 billion) and foreign investments is carried out at the unique desk for large projects and foreign investments within the AAPI.

The Investment Law provides for the following incentive regimes:
- Sector
- Area
- Structuring projects

Sector regime. Investments in the following areas of activity are eligible for the Sector regime:
- Mines and quarries
- Agriculture, aquaculture and fishing
- Industry and food industry
- Pharmaceutical and petrochemical industry
- Services and tourism

- New and renewable energy
- Knowledge economy and information and communication technologies

Area regime. Investments implemented in the following areas are eligible for the Area regime:
- Highlands, South and Deep South locations
- Localities in development that needs special support from the state
- Localities with natural resource potential to be developed

Executive Decree No. 22-301 has fixed the list of places subject to this regime.

Structuring projects regime. According to Executive Decree No. 22-302, structuring investments are defined as investments with a high potential for creating wealth and jobs likely to increase the attractiveness of the territory and to create a knock-on effect on economic activity for sustainable economic, social and territorial development, with the following objectives:
- Import substitution
- Export diversification
- Integration into global and regional value chains
- The acquisition of technology and expertise

According to Executive Decree No. 22-302, investments that meet the following criteria are eligible as structuring projects:
- The creation of 500 direct jobs
- Am investment amount equal to or greater than DZD10 billion

Implementation and Operational stages. The Investment Law offers the tax incentives described below during the Implementation and Operational stages.

The following tax incentives are available during the Implementation stage:
- Exemption from customs duties for goods imported and used directly in the realization of the investment
- Value-added tax (VAT) exemption for goods and services imported or acquired locally that enter into the investment
- Exemption from transfer duties and land registration tax for real estate acquisitions made in the context of the investment
- Exemption from registration duties for company constitutions and capital increases
- Exemption from registration duties, land registration tax and state remuneration on concessions of built and unbuilt real estate intended for the implementation of investment projects
- Exemption from property tax on investment properties for a period of 10 years from the date of acquisition

The above benefits are applicable to all investment regimes.

The following tax incentives are available during the Operational stage:
- Exemption from corporate income tax
- Exemption from the tax on professional activities

The above Operational stage benefits are applicable for three to five years for the Sector regime and for five to 10 years for the two other regimes.

Guaranties granted to foreign investors. Article 8 of the Investment Law provides for a guarantee of transfer of invested capital and the income derived from it. This article specifies that the reinvestment in capital of profits and dividends declared transferable is admitted as an external contribution. To benefit from these guarantees, the foreign investor must bear at least 25% of the overall cost of the investment.

Disposal and transfer of benefits. The Investment Law provides for the possibility of transferring or disposing of goods that have benefited from the incentives, with the approval of the AAPI, which replaces the National Agency for Investment Development (Agence Nationale pour le Développement des Investissements, or ANDI) in the new Law.

Executive Decree No. 22-299 provides for a repayment of the benefits granted in the event of the transfer of the goods that benefited from these benefits. The repayment of benefits is calculated in proportion to the remaining depreciation period.

It is also possible to transfer an investment that has benefited from tax incentives. The new acquirer will handle all the initial investor's engagements and commitments.

Capital gains. Capital gains are included in ordinary income and taxed at the applicable IBS rate.

Capital gains derived from the sale of fixed assets are taxed differently, depending on whether they are short-term capital gains (on assets held for three years or less) or long-term capital gains (on assets held for more than three years).

The following percentages of capital gains derived from the partial or total sale of assets within the framework of industrial, commercial, agriculture or professional activities are included in taxable profits:
- 35% of long-term capital gains
- 70% of short-term capital gains

Capital gains derived from the sale of shares realized by nationals are taxed at a rate of 15%.

Unless otherwise provided by a double tax treaty, nonresident individuals and companies that derive capital gains from the sale of shares of an Algerian entity are subject to a final withholding tax at a rate of 20%.

Administration. An annual tax return must be filed with the tax administration within four months after the end of the financial year. Foreign companies carrying out activities in Algeria through a permanent establishment are subject to the same filing obligations as companies incorporated in Algeria. These obligations include the filing of an annual corporate tax return (IBS return, named G4 form or G4 Bis form), by 30 April of each year.

The IBS is generally paid in three down payments from 20 February to 20 March, from 20 May to 20 June and from 20 October to 20 November of the year following the financial year, if profit has been realized and used for the base of tax calculation. The amount of each down payment is equal to 30% of

the IBS due on profits realized during the last closed financial year.

Permanent establishments of foreign companies must make an IBS down payment equal to 0.5% of the amounts billed every month. When filing the annual IBS return, these IBS down payments are offset against the IBS due.

Certain listed documents must be attached to the IBS return, including the balance sheet and a summary of the profit-and-loss account.

Taxes withheld at source and those paid in cash must be declared on a monthly tax return ("G 50" form). These taxes include the following:

- Personal income tax (Impôt sur le Revenu Global, or IRG)
- Withholding tax due on passive income and remuneration paid to nonresident service suppliers
- Professional training tax and apprenticeship tax
- IBS down payments
- VAT

This form must be filed within 20 days following the end of the month of payment of the relevant remuneration together with the payment of the related taxes.

Dividends. A withholding tax rate of 15% applies to dividends distributed to resident individuals and to entities that do not have permanent establishment in Algeria, subject to double tax treaties, while a 5% withholding tax applies to income derived from the distribution of dividends between two Algerian entities.

Royalties. Unless otherwise provided by double tax treaties, a 30% withholding tax is imposed on royalties and remuneration for services paid to nonresident entities.

For contracts relating to the use of computer software, a tax allowance at a rate of 30% is applicable on the amount of the royalties. Consequently, the effective rate of the withholding tax is 21%.

A tax allowance at a rate of 60% is applied to the amount of the rent amount paid under an international leasing contract. As a result, the effective rate of the withholding tax is 12%.

For royalties benefiting from allowances or a reduced rate, VAT must be paid in addition to withholding tax.

Foreign tax relief. The Algerian Direct Tax Code does not provide for foreign tax relief.

C. Determination of taxable income

General. The computation of taxable income is based on financial statements prepared according to generally accepted accounting principles, provided they are not incompatible with the provisions of the Algerian Direct Tax Code.

Taxable income is determined on the basis of profits and losses. Taxable income includes operating income and "extraordinary income," such as capital gains, gains from the revaluation of business assets and subventions, subject to certain exclusions and business incentives.

In the determination of taxable income, any expenditure that is wholly, exclusively and necessarily incurred for the purposes of the exploitation of the business and the generation of income is deductible from gross income.

Financial expenses related to overseas loans, royalties, technical assistance fees and other fees payable in foreign currencies may be deducted for tax purposes during only the financial year of their effective payment.

Certain expenses are not deductible for tax purposes, including the following:

- Expenses, costs and rents of any type that are not directly assigned to operations (for example, premises leased for accommodation of members of the company's management).
- Fines, interest on late payments and penalties, interest and increases in duties as a result of defaults or insufficiencies in tax returns or payments.
- Gifts (except those for advertisements, the value of which does not exceed DZD1,000 per unit) in a global amount limit of DZD500,000.
- Subsidies or donations except those made to humanitarian organizations or associations or those made to nonprofit research organizations up to DZD4 million.
- Restaurant, hotel and entertainment expenses not directly linked to the business.
- Expenses fulfilling the conditions of deductibility, whose payment is carried out in cash, when the amount of the invoice exceeds DZD1 million, including tax. The deduction is allowed when the payment is carried out by a payment in cash in a bank or postal account.
- The portion of rental of passenger vehicles exceeding DZD200,000 per year, and maintenance and reparation expenses of passenger vehicles that do not constitute the main tool of the activity that are higher than DZD20,000 per vehicle.
- Amounts allocated to sponsoring, patronage and godfathering of sports activities and the promotion of youth initiatives are allowed as a deduction for the determination of the taxable income, subject to being duly justified up to 10% of the turnover of the exercise and within the limit of a maximum of DZD30 million.
- Remuneration for technical assistance, financial and accounting services rendered by a company established abroad to the extent it exceeds 20% of general expenses of the debtor company and 5% of turnover or, for design and engineering consulting firms, to the extent that it exceeds 7% of turnover.
- Interest paid to partners on account of sums made available to the company, in addition to capital shares, whatever the form of the company, to the extent that it exceeds the effective average interest rate reported by the Bank of Algeria (a deduction for such interest is allowed only if the capital has been fully paid up and if the sums made available do not exceed 50% of the capital).
- Expenses incurred on behalf of third parties without a link to the activities performed by the company.
- Professional training tax and apprenticeship tax.
- Expenses related to the promotion of pharmaceutical and parapharmaceutical products to the extent that they exceed 1% of annual turnover.

Inventories. Inventories are valued at cost in accordance with the new Algerian accounting and financial system.

Provisions. Provisions are generally deductible for income tax purposes if they satisfy the following conditions:
- They are established for losses or charges that are clearly identified and likely to occur.
- They are recorded both in the books and financial statements.
- They are listed on the statement of reserves attached to the annual tax return.

Reserves or the portion of them that are not used in accordance with their intended purposes or no longer have a purpose in the following financial year must be added back to the income in such financial year. Abusive establishment of provisions may result in the provisions being added back to taxable income and related penalties applied.

Depreciation. Under the Algerian Direct Tax Code, depreciation of fixed assets must be calculated in accordance with the following:
- Generally accepted limits
- Applicable practices for each type of industry, business or operations
- Rules provided in tax laws with respect to the depreciation system

The following are the three depreciation methods:
- Straight-line method
- Progressive method
- Declining-balance method

The straight-line method is the standard method, while progressive or declining-balance methods may alternatively be used on election.

Under the Algerian Direct Tax Code, the basis of computation of deductible depreciation is limited for private passenger-type vehicles to a purchase value of DZD3 million. This cap of DZD3 million does not apply if such vehicles constitute the main object of the company's activities.

Relief for losses. Tax losses may be carried forward four years. They cannot be carried back.

Groups of companies. Under the Algerian Direct Tax Code, related companies subject to IBS may elect to form a tax-consolidated group. The parent company must make the election for this regime for a four-year period and the election must be accepted by the affiliated companies.

The group tax consolidation regime is based on the consolidation of the balance sheets of the related companies with the parent company.

A tax consolidation group may consist of an Algerian parent company and Algerian subsidiaries in which the parent company owns directly at least 90% of the capital if both of the following conditions are satisfied:
- The capital of the parent company is not owned partially or totally by the subsidiaries.
- 90% or more of the parent company is not owned by another company eligible to be a parent company.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
VAT; standard rate	19
Apprenticeship tax	1
Training tax	1
Social security contributions (total rate of 35%); paid by	
Employer	26
Employees	9
Registration duties	
On sales of shares in stock companies and private limited companies	2.5
On sales of goodwill	5

E. Miscellaneous matters

Foreign-exchange controls. The currency in Algeria is the Algerian dinar (DZD).

Foreign-exchange regulation in Algeria is based on the principle of the convertibility of the Algerian dinar, solely for current transactions. This results in a foreign-exchange control regulation of international fund transfers between residents and nonresidents.

Under Regulation 7-01 of the Bank of Algeria, payments or transfers made with respect to regular transactions within the meaning of Algerian regulations (including foreign-trade transactions involving goods and services) are free, provided that certain conditions are fulfilled (particularly the bank domiciliation [the procedure under which a local party registers a contract with a local bank] and the delivery of a transfer certificate by the tax authorities). Algerian accredited intermediary banks must operate these transactions.

Dividends, profits and net proceeds from investments or the liquidation of investments can also be freely transferred outside Algeria, subject to compliance with certain requirements (particularly, the delivery of a transfer certificate by the tax authorities).

The realization of foreign investments, directly or in partnership, except for share capital, must be financed through Algerian financing institutions.

An exception is provided for foreign financing through a current-account contribution by a foreign shareholder. Executive Decree No. 13-320 of 26 September 2013 determines the terms and conditions for a current-account contribution by a foreign shareholder.

The 2019 Finance Law provides that only strategic and structuring projects for the national economy are eligible to foreign funding via international development finance institutions, subject to the prior approval of relevant local authorities.

Nonresidents may open bank accounts in Algerian dinars and/or in foreign currencies at Algerian accredited intermediary banks.

These bank accounts are subject to specific conditions on opening and operation.

Transfer pricing. Under the Algerian tax rules, for Algerian taxpayers that are owned or controlled by an enterprise located in Algeria or outside Algeria or that own or control an enterprise located in Algeria or outside Algeria, the income indirectly transferred to the related enterprise, either through an increase or decrease of purchase or sale price or through any other means, may be added back to the Algerian taxpayer's taxable income. In the absence of any relevant information for the reassessment of tax, the taxable income is determined by comparison with income of similar enterprises that are regularly operated.

Transfer-pricing documentation requirements. On request of the tax authorities, in the framework of a tax audit, enterprises or companies operating in Algeria and undertaking cross-border and domestic transactions with related parties are required to provide their transfer-pricing documentation and a benchmark study within 15 days from the date of the notification. Failure to answer or providing an insufficient answer triggers a 25% penalty per fiscal year calculated on the basis of the transfer-pricing reassessments resulting from the tax audit.

Companies subject to transfer-pricing declaration are also subject to the filing of an e-declaration form on the tax administration platform "Jibayatic" before 30 April of each year.

In addition, certain Algerian-based taxpayers (mainly companies belonging to foreign international groups, legal entities or businesses operating in the hydrocarbon industry) must file transfer-pricing documentation with their annual tax returns to the tax authorities. The lack of documentation or insufficient documentation at the time of the tax return filing triggers a DZD2 million tax penalty, and in the case of a tax audit, an additional penalty of 25% of deemed transferred profits applies.

F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %
Austria	5/15 (a)	0/10	10
Bahrain	0	0	0

Yemen	10	10	10
Non-treaty jurisdictions	15	10	30

(a) The 5% rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 10% of the capital of the payer of the dividends. The higher rate applies to other dividends.

(b) The lower rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 25% of the capital of the payer of the dividends.

(c) The lower rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 20% of the capital of the payer of the dividends.

(d) The lower rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 15% of the capital of the payer of the dividends.

(e) The Algerian domestic rate of 10% applies if the rate under the treaty is higher.

(f) The treaty does not include an article regarding interest.

A. At a glance

Corporate Income Tax Rate (%)	25 (a)(b)
Capital Gains Tax Rate (%)	25 (c)
Branch Tax Rate (%)	25 (a)(b)
Withholding Tax (%)	
Dividends	10 (d)
Interest	5/10/15 (e)
Royalties	10
Payments for Services	6.5 (f)
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (g)

(a) The standard Corporate Income Tax rate is 25%. Income from certain activities, such as agriculture, forestry and cattle raising, is subject to tax at a rate of 10%. National oil and gas companies, banks, insurance companies and telecom operators are subject to tax at a rate of 35%.

(b) Tax exemptions or tax reductions are available under the Private Investment Law as well as specific legislation for micro, small- and medium-sized companies. For details, see Section B.

(c) Gains derived from the sale of securities that are not subject to Corporate Income Tax or Personal Income Tax are subject to Investment Income Tax at a rate of 10%. If such gains are derived from treasury bills, treasury bonds and titles issued by the Angolan Central Bank (Banco Nacional de Angola, or BNA) with a maturity of at least three years or from shares of listed companies, a 50% tax relief may apply.

(d) Certain dividends are exempt from tax (see Section B).

(e) In general, interest is subject to a 15% rate. However, certain interest, such as interest on shareholders loans, corporate bonds, bank deposits, treasury bills, treasury bonds and titles issued by the BNA is subject to a 10% rate. Interest on treasury bills and treasury bonds and titles issued by the BNA is subject to a reduced rate of 5% if the maturity is at least three years.

(f) A withholding tax of 6.5% is applicable to amounts paid to local and foreign providers for services. An exception may be available through double tax treaties.

(g) Mining companies may carry forward losses for seven years, up to a limit of 50% of the turnover.

B. Taxes on corporate income and gains

Corporate Income Tax. Companies carrying out industrial and commercial activities in Angola are subject to Corporate Income Tax (Imposto Industrial).

An Angolan company, which is a company that has its head office or effective place of management and control in Angola, is subject to Corporate Income Tax on its worldwide profits.

Foreign entities with a permanent establishment in Angola are subject to Corporate Income Tax only on profits allocated to the Angolan permanent establishment. The tax law provides a force of attraction principle for permanent establishments.

All companies, regardless of whether they have a permanent establishment in Angola, are subject to Corporate Income Withholding Tax on services provided to entities established in Angola for tax purposes.

Corporate Income Tax taxpayers are classified into the following two regimes:
- General Regime: applicable to all companies in general
- Simplified Regime: applicable to companies that are not subject to value-added tax

Rates of corporate tax. The standard Corporate Income Tax rate is 25%.

Income from certain activities, such as agriculture, forestry and cattle raising, is subject to a reduced tax rate of 10%. National oil companies, banks, insurance companies and telecom operators are subject to tax at a rate of 35%.

A Private Investment Law was approved as Law No. 10/18 of 26 June 2018. This law provides that no minimum amount is required for foreign or domestic (national) investments.

Benefits and incentives vary according to the type of regime to which the investment project is subject and the investment zones, among other factors.

The standard regime provides, among other benefits, a reduction of 20% on the final rate for Corporate Income Tax purposes, and a 25% reduction on the Investment Income Tax rate on dividends. Both benefits have a duration of two years.

The special regime applies to investment projects in priority sectors. The benefits vary in accordance with the respective location, and include, among others, the following:
- Reduction of the Corporate Income Tax rate by a percentage ranging from 20% to 90%, for a period varying from two to eight years
- Fifty percent increase of the depreciation rates for an eight-year period
- Reduction of the Investment Income Tax rate on dividends and profits distributed or remitted, by a percentage ranging from 25% and 90%, for a period from two to eight years

The following are the priority sectors:
- Education, technical and professional training, higher education, scientific research and innovation

- Agriculture, food and agro-industry
- Specialized health services
- Reforestation, industrial transformation of forest resources and forestry
- Textiles, clothing and footwear
- Hotel and tourism
- Construction, public works, telecommunications and information technology
- Airport and railway infrastructure
- Production and distribution of electricity
- Sanitation and solid waste treatment

The following are the four investment zones:
- Zone A: Province of Luanda, the capital municipalities of the Benguela and Huíla provinces, and the municipality of Lobito
- Zone B: Provinces of Bié, Bengo, Cuanza-Norte, Cuanza-Sul, Huambo, Namibe and the other municipalities of Benguela and Huíla
- Zone C: Provinces of Cuando Cubango, Cunene, Lunda-Norte, Luanda-Sul, Malanje, Moxico, Uíge and Zaire
- Zone D: Province of Cabinda

The contractual regime applies to investment projects that amount to at least USD10 million and that creates a minimum of 50 jobs for Angolan nationals. The benefits vary in accordance with the specifics of the investment and include, among others, the following:
- Reduction of property tax up to 15 years
- Tax credits up to 50% of the investment value to be recovered during a period of 10 years
- Reduction of corporate income tax up to 15 years
- Deferral of tax payments

Withholding tax. In general, resident and foreign companies are subject to a withholding tax rate of 6.5%.

The following services are excluded from withholding tax:
- Teaching and similar services
- Health services
- Passenger transportation services
- Lease of machinery and equipment subject to Investment Income Tax

A similar exclusion applies to financial and insurance intermediation services, hotel and similar services, and telecommunication services, if the service provider has a taxable presence in Angola. For local service providers, withholding tax does not apply to documented recharges between related parties. Payments for raw materials, parts and other materials used on services provided are also excluded from the withholding tax base if the service provider has a taxable presence in Angola.

The payer must withhold the tax from each payment and remit the withholding tax to the Angolan Revenue Authority. The tax withheld is considered to be an advance Corporate Income Tax payment if the service provider has a residence, head office or permanent establishment in Angola. Excess withholding tax can be carried forward if duly recognized by the Angolan Revenue Authority. If the tax is withheld from a nonresident entity service

provider with no permanent establishment in Angola, these values are considered to be final.

Special taxation regimes. Income from oil and gas extraction is subject to Petroleum Income Tax at a total rate of 50% (under production-sharing agreements) or 65.75% (under other types of joint ventures). Angolan companies benefit from a reduced Petroleum Income Tax rate of 35%. In addition, companies engaged in exploration and production of petroleum oil, gas and similar products must pay Petroleum Production Tax at a total rate of 20%. Petroleum Transaction Tax and a Surface Surcharge may also be levied at rates of 70% and USD300 per square kilometer, respectively. Petroleum Production Tax and Petroleum Transaction Tax are not payable under production-sharing agreements.

Contracts, such as production-sharing agreements, between oil and gas companies and the Angolan government generally override the Petroleum Production Tax and Petroleum Transaction Tax and may set forth different taxes and applicable rates.

Additional taxes and charges apply within the oil and gas and mining industries. Also, specific tax rules apply to the liquefied natural gas project, including withholding tax exemptions on certain interest, dividends, royalties and services income.

Capital gains. Capital gains on profits derived from the sale of fixed assets are subject to Corporate Income Tax at the regular tax rate of 25%. Capital gains derived from the disposal of shares or other instruments generating Investment Income Tax (not taxable for Corporate Income Tax or Personal Income Tax purposes) are subject to Investment Income Tax at a 10% rate.

However, a 50% relief is available for capital gains derived from the disposal of listed shares or from corporate bonds, other securities, treasury bonds, treasury bills and BNA securities, if they are negotiated in a regulated market and if their maturity is of at least three years.

Administration. The tax year is the calendar year.

All companies engaging in activities in Angola must register with the tax department to obtain a taxpayer number.

Companies, including foreign companies with a permanent establishment in Angola, must file an annual Corporate Income Tax return, together with their financial statements and other documentation, by the end of April (Simplified Regime) or May (General Regime) of the following year.

Penalties are imposed for a failure to file tax returns and other required documents. If, on the final assessment, the tax authorities determine that a further payment is required, in addition to the unpaid tax, a penalty of 25% and compensatory interest, assessed daily at a 1% monthly rate, will be due. Late payment interest also applies to nonpayment of the above tax debt.

Dividends. Companies are not subject to Corporate Income Tax on the gross amount of dividends received if the dividends have been subject to Angolan Investment Income Tax.

A 10% Investment Income Tax, which is withheld at source, is imposed on dividends.

The Investment Income Tax Code provides a participation exemption regime that sets an exemption if Angolan parent companies from Angolan subsidiaries subject to Corporate Income Tax hold a minimum of 25% of the share capital for one year and if the company distributing the dividends is listed in the Angolan Stock Exchange Market.

Foreign tax relief. In general, no relief is granted for foreign taxes paid by Angolan taxpayers.

C. Determination of taxable income

General. Taxable income is the income reported in companies' financial statements, subject to certain adjustments. Expenses considered indispensable in the production of income and the maintenance of a production unit are deductible. The following expenses, among others, are not deductible and are added back to taxable income for Corporate Income Tax purposes:

- Provisions and depreciation deemed to be unlawful, excessive or unauthorized by the tax authorities
- Bad or irrecoverable debts
- Input value-added tax not recovered within the timelines foreseen in the law
- Interest on shareholders loans, on the component exceeding the average annual rate published by the BNA
- Personal Income Tax, social security contributions by the employee, Investment Income Tax and Property Tax
- Costs associated with rented property, considered in the computation of Property Tax
- Costs related to previous years
- Donations not covered by the Law of Patronage
- Non-documented expenses and improperly documented expenses
- Confidential expenses (an expense is considered a confidential expense if no valid documentation legally supports the expense and if its nature, function or origin are not materially justifiable)
- Fines and penalties
- Unrealized foreign-exchange losses

Unrealized exchange gains are not part of taxable income.

Rental of immovable property income subject to Property Tax and income subject to Investment Income Tax are excluded from the Corporate Income Tax base.

Stand-alone tax for certain expenses that are nondeductible for Corporate Income Tax purposes. Certain expenses that are nondeductible for Corporate Income Tax purposes are subject to a stand-alone tax. This tax applies currently to confidential expenses (30%, or 50% in certain situations) and donations not made in accordance with the Law of Patronage (15%).

Inventories. Inventories may be valued by any currently acceptable method provided that the method is consistently applied and is based on documented purchase prices.

Provisions. Costs for provisions for the following items are deductible for Corporate Income Tax purposes:

- Bad debts up to 4% (for the annual allowance regarding the booking of a new provision or the increasing of a previous balance) or 10% (accumulated balance) of clients' receivables, if, among other requirements, such credits have been claimed and are due for more than six months and if steps to collect the claim have been undertaken
- Provisions imposed by the public regulatory authorities of financial, insurance and gambling businesses
- Litigation processes regarding facts underlying the litigation claims that would represent costs of that year
- Depreciation in the value of inventory, provided that it does not exceed 0.5% to 3% in the current year (depending on the nature of the activity), up to a limit that can vary between 2.5% and 12% of the value of the inventory

Tax depreciation. Depreciation rates are provided in the law. The following are some of the applicable rates.

Asset	Rate (%)
Vehicles	16.67 to 25
Office buildings	4
Industrial buildings	4 or 6
Machinery, equipment and devices	12.5 to 33.33
Furniture	8.33 to 50

These rates may vary depending on the industry sector.

Relief for losses. Companies may carry forward tax losses for five years. This period is increased to seven years for mining companies (up to a limit of 50% of the turnover). No carryback is allowed.

Groups of companies. The Large Taxpayers Statute establishes that Angolan Large Taxpayers that are integrated in a group of companies may be taxed on the sum of the taxable results obtained by the entities included in the group. For such purpose, a special request through a specific official form must be submitted to the tax authorities by the end of February of the tax year for which the application of this special regime is requested. The Head of the Large Taxpayer's Office must expressly approve this request and, accordingly, the application of the group taxation regime.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax	
General rate	14%
Reduced rates	1%/5%/7%
Excise duties; levied on specific goods provided in Angola or imported into Angola (included in the Excise Duty Code, contained in Law 8/19 of April 24)	2% to 5%

Nature of tax	Rate
Training levy, on oil and gas exploration and production companies and their subcontractors	
Production companies and companies engaged in refining and processing of petroleum	USD0.15 per barrel
Companies owning a prospecting license	USD100,000 a year
Exploration companies	USD300,000 a year
Subcontractors under a contract with a term exceeding one year (levied on annual gross income) and entities engaged in the storage, transport, distribution and trading of petroleum (levied on revenue derived from such activities)	0.5%
Stamp duty	
On the acquisition of real estate	0.3%
On leasing and subleasing of real estate	0.1%/0.4%
On company's share capital	0.1%
On guarantees	0.1% to 0.3%
On financing	0.1% to 0.5%
On financial leasing of real estate	0.3%
On leasing of movable property	0.4%
Custom duties on imports	2% to 70%
Customs emoluments	2%
Property Tax	
Levied on 60% of the gross rent	25%
Levied on property transfers (levied on transaction value)	2%
Social security contributions, on salaries and additional remuneration; the contributions are not payable by expatriates working in Angola if they make contributions to the social security scheme or a similar scheme in their home countries; paid by	
Employer	8%
Employee	3%
Special contribution on foreign-exchange operations; the 2024 State Budget Law approved a special contribution on foreign-exchange operations, which applies to transfers made under contracts for the provision of services, technical assistance, consulting and management, as well as to capital operations and unilateral transfers; the contribution will be in force during 2024; certain payments are exempt from this contribution, including, among others, dividends, interest and capital reimbursements	
Transfers ordered by corporations	10%
Transferred ordered by individuals	2.5%

E. Miscellaneous matters

Foreign-exchange controls. The BNA supervises foreign-exchange operations, which generally must be controlled by commercial

banks that usually act as intermediaries of companies to obtain clearance from the BNA.

BNA issued Bank Order No. 2/20 of 9 January 2020. This order sets out new foreign-exchange procedures to be adopted with respect to current invisible operations carried out by resident companies. The order eliminates the obligation for prior approval of current invisible operations, regardless of their respective amount. Commercial banks are responsible for the evaluation and validation of all current invisible operations.

In general, repatriation of profits is allowed for approved foreign-investment projects if certain requirements are met.

The oil and gas sector is subject to a specific foreign-exchange control regime, which aims primarily to establish uniform treatment in this sector by replacing the multiple exchange regimes that have been applied to oil and gas upstream companies operating in Angola, thereby providing fair treatment to all investors.

These foreign-exchange control rules cover the trade of goods, current invisible operations (according to the Angolan National Bank Instructive, these operations are services, royalties, interest, travel costs and salaries) and capital investments.

For purposes of the rules, exchange operations encompass the following:

- Purchase and sale of foreign currency
- Opening of foreign currency bank accounts in Angola by resident or nonresident entities and the transactions carried out through these bank accounts
- Opening of national currency bank accounts in Angola by nonresident entities and the transactions carried out through these bank accounts
- Settlement of all transactions of goods, current invisible operations and capital movements

Thin-capitalization rules. No thin-capitalization rules are in effect in Angola. However, the deductibility of interest costs with respect to shareholders' loans is limited for Corporate Income Tax purposes. Costs are deductible up to the average annual rate published by the BNA.

Anti-avoidance legislation. The arm's-length principle applies in Angola. Consequently, the tax authorities may adjust the taxable income derived from transactions between related parties.

Related-party transactions. The Large Taxpayers Statute contains specific rules governing "special relations" between taxpayers, which entered into force in October 2013. Under this regime, a special relationship is deemed to occur if one entity exercises, directly or indirectly, a significant influence on the management decisions of another entity. The law also establishes that a taxpayer that has annual turnover exceeding AOA7 billion at the date of closing the accounts must prepare and submit a transfer-pricing file to the Angolan tax authorities. This transfer-pricing file, which must be prepared on an annual basis, must detail the relationships and prices established by the taxpayers with the companies and entities with which they have "special relations." The transfer-pricing file must be submitted by the end of the sixth month following the year-end to which the file

relates. With respect to the economic analysis of the transactions, the new regime provides for the application of the following methods only:

- Comparable uncontrolled price method
- Resale-minus method
- Cost-plus method

Invoice requirements. Requirements are imposed with respect to the keeping and archiving of invoices or equivalent documents by individuals or legal entities with their domicile, registered office, effective management or permanent establishment in Angola. Invoices should be issued through certified software, for certain taxpayers.

Standard Audit File for Tax reporting. Certain companies are required to file, on a monthly basis, a Standard Audit File for Tax (SAF-T). This file follows a standardized template, in an xml format, to be extracted from the accounting software, which must be duly certified. Currently, the monthly reporting corresponds to the sales and purchases carried out in the preceding month.

Tax-neutrality regime for mergers and demergers. A tax-neutrality regime for mergers and demergers applies for Corporate Income Tax purposes at the level of the merged or spun-off companies, but not at the level of the respective shareholders.

F. Tax treaties

Angola has double tax treaties in force with China Mainland, Portugal and the United Arab Emirates, which may allow for the potential reduction of the tax rates applicable to income paid to the relevant countries.

A. At a glance

Corporate Income Tax Rate (%)	25 to 35 (a)
Capital Gains Tax Rate (%)	0/15/25 to 35 (b)
Branch Tax Rate (%)	25 to 35 (a)
Withholding Tax (%)	
Dividends	0/7/35 (c)
Interest	15.05/35 (d)
Royalties from Patents, Know-how, etc.	21/28/31.5 (d)
Branch Remittance Tax	0/7/35 (c)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) For fiscal years starting from 1 January 2021, the corporate tax is calculated through a progressive scale ranging from 25% to 35%. The scale is updated annually based on the consumer price index. For 2024, annual income from ARS0 to ARS34,703,523.08 is subject to a 25% rate; income from ARS34,703,523.08 to ARS347,035,230.79 is subject to a 30% rate; income exceeding ARS347,035,230.79 is subject to a 35% rate. The amounts are updated annually based on the consumer-price index. An increased rate of 41.5% applies for certain gaming activities.

(b) The 15% rate generally applies to capital gains derived by foreign residents from sales of shares, quotas and other participations in entities. Capital gains derived by foreign residents from listed shares and corporate and government bonds, under certain circumstances, can benefit from an exemption. Argentine corporate residents are subject to the regular corporate tax at rates ranging from 25% to 35%.

(c) A 7% dividend withholding tax rate applies to dividends paid out of profits accrued in fiscal years started from 1 January 2018. Such rate applies to distributions made to resident individuals or foreign investors, while distributions to resident corporate taxpayers are not subject to withholding. A 0% dividend withholding tax rate generally applies to dividends paid out of profits accrued during fiscal years that started before 1 January 2018; however, in these cases, a 35% withholding tax (known as "equalization tax") is triggered if the distribution exceeds the after-tax accumulated taxable income of the taxpayer.

(d) These are final withholding taxes imposed on nonresidents only. For details concerning the rates, see Section B.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are taxed on worldwide income. Any profits, including capital gains, are taxable. Companies incorporated in Argentina and branches of foreign companies are considered to be resident companies.

Rates of corporate tax. Corporate tax is payable at a scale ranging from 25% to 35%. For 2024, annual income from ARS0 to ARS34,703,523.08 is subject to a 25% rate; income from ARS34,703,523.08 to ARS347,035,230.79 is subject to a 30% rate; income exceeding ARS347,035,230.79 is subject to a 35% rate. The amounts are updated annually based on the consumer price index. An increased rate of 41.5% applies for certain gaming activities.

Capital gains. Capital gains derived by tax-resident companies are included in taxable income and taxed at the regular corporate tax rate. Capital gains derived by foreign residents from the sale, exchange, barter or disposal of unlisted shares, quotas,

participations in entities and titles are subject to a 15% tax (indirect sales are included under certain conditions). This tax may be calculated on actual net income or on 90% presumed income, thereby resulting in an effective 13.5% tax on the sale price.

Capital gains derived by foreign residents from the transfer of listed shares are covered by an exemption, to the extent that the investor is not resident in, and the funds do not arise from, "non-cooperating" jurisdictions.

Administration. The tax year for a company is its accounting year. Companies are required to make 10 advance payments of corporate income tax. The first payment is equal to 25% of the preceding year's tax and the other payments are each equal to 8.33% of such tax. The payments are due monthly beginning in the sixth month after the end of the accounting year. The due dates depend on the company's taxpayer registration number.

Companies must file their tax returns and pay any balance due by a specified date in the fifth month after their accounting year. If the payment is late, interest is charged.

Dividends. The dividend withholding tax rate is 7% for profits accrued in fiscal years started from 1 January 2018. The rates mentioned above apply to distributions made to resident individuals or foreign investors, while distributions to resident corporate taxpayers are not subject to withholding. A 0% dividend withholding tax rate generally applies for profits accrued during fiscal years that started before 1 January 2018; however, in these cases, a 35% withholding tax (known as "equalization tax") is triggered if the distribution exceeds the after-tax accumulated taxable income of the taxpayer.

Withholding taxes on interest and royalties. Final withholding taxes are imposed on interest and royalties paid to nonresidents.

A withholding tax rate of 15.05% applies to the following types of interest payments:

- Interest on loans obtained by Argentine financial entities
- Interest on loans granted by foreign financial entities located in the following jurisdictions:
  - — Jurisdictions not considered to be low- or no-tax jurisdictions under Argentine rules
  - — Jurisdictions that have signed exchange-of-information agreements with Argentina and have internal rules providing that no banking, stock market or other secrecy regulations can be applied to requests for information by the Argentine tax authorities
- Interest on loans for the importation of movable assets, except automobiles, if the loan is granted by the supplier of the goods

The withholding tax rate for all other interest payments to nonresidents is 35%.

The general withholding tax rate for royalties is 31.5%. If certain requirements are satisfied, a 21% rate may apply to technical assistance payments and a 28% rate may apply to certain royalties.

Foreign tax relief. Resident companies may credit foreign income taxes against their Argentine tax liability, up to the amount of the

increase in that liability resulting from the inclusion of foreign-source income in the tax base.

Foreign tax credits are also available on the tax paid by the foreign entities in which the Argentine shareholder invests. In the case of a direct participation, a 25% minimum ownership is required, while in the case of an indirect ownership, a participation of at least 15% is required.

C. Determination of trading income

General. Tax is applied to taxable income, which is the accounting profit earned in the tax period after adjustments provided for by the tax law. Exemptions are usually insignificant.

Expenses are deductible to the extent incurred in producing taxable income, subject to certain restrictions and limitations, including, among others, those applicable to the following:
- Representation expenses
- Directors' fees
- Royalties for patents and trademarks paid to nonresidents

Depreciation, rental payments and all other automobile expenses, such as license fees, insurance, fuel and maintenance, are also deductible, subject to certain restrictions. In general, certain limitations apply to the deductibility of interest payments to related entities (see Section E).

Any expense incurred by an Argentine company in favor of a foreign related party that is deemed Argentine-source income for the recipient of the payment can be deducted for tax purposes in the year of accrual only if the payment is made by the date when the income tax return for that year is due. Otherwise, such expenses must be deducted in the year of payment. This limitation also applies to expenses paid to individuals or entities located in "non-cooperating" or "low- or no-tax" jurisdictions, regardless of whether they are related parties.

Foreign-exchange losses. Foreign-currency gains and losses arising from customary business transactions are normally treated as business income or expenses for the year in which the exchange fluctuation occurs. In the case of debts with related parties, foreign-exchange losses are subject to the same deduction restrictions as interest, except in those years in which the tax inflationary adjustment applies.

Inventories. Stock is valued according to procedures established by the tax law, which result in values nearly equal to its market value or replacement cost at the end of the tax period, depending on the type of goods.

Provisions. A provision for bad debts is allowed. However, it must be computed according to rules prescribed by the tax law.

Depreciation. Tangible assets may be depreciated using the straight-line method over the assets' expected lives. A method based on effective use may also be acceptable. In general, buildings are depreciated at an annual rate of 2%. However, a higher rate may be acceptable if it is established that, because of the materials used to construct the building, the expected useful life is less than 50 years. The law does not specify rates for movable assets.

Intangible property may be depreciated only if it has a limited life based on its characteristics. Certain assets, such as goodwill and trade names, may not be depreciated.

Inflationary adjustment. Adjustment for inflation is allowed in accordance with the following rules:

- Inflation adjustment of new acquisitions and investments carried out from 1 January 2018 and onward.
- Application of an integral inflation adjustment mechanism for fiscal years beginning on or after 1 January 2018 if the variation of the Consumer Price Index supplied by the National Institute of Statistics and Censuses is higher than 100% for the 36-month period before the end of the fiscal period.

Relief for losses. Tax losses may be carried forward for five tax periods. Loss carrybacks are not permitted. Certain losses have a specific nature and can only offset the same type of income, such as losses from sales of shares and other types of securities, losses from foreign-source activities and losses from gaming activities.

Except for hedge transactions, losses resulting from the rights contained in derivative instruments or contracts may offset only the net income generated by such rights during the fiscal year in which the losses were incurred or in the following five fiscal years. For this purpose, a transaction or contract involving derivatives is considered a hedge transaction if its purpose is to reduce the impact of future fluctuations in market prices or fees on the results of the primary economic activities of the hedging company.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on goods delivered and services rendered in Argentina, on services rendered outside Argentina that are used or exploited in Argentina, and on imports	
Standard rate	21
Other rates	5/10.5/27
Tax on financial transactions; generally imposed on debits and credits with respect to checking accounts; a portion of the tax may be creditable against other taxes	
General rate	0.6
Other rates	0.05/0.075/0.1/ 0.25/0.5/1.2
Various local taxes on gross receipts, real estate and other items	Various
Tax on purchase of foreign currency (impuesto PAIS)	
Import of goods	17.5
Import of services	25
Dividend payments	17.5
Other rates	30

Nature of tax	Rate (%)
Social security taxes (including medical care contributions), on monthly salaries; paid by employer; a portion may be creditable against VAT; the creditable portion varies depending on where the employees render services	24/26.4
Export duties on goods; general rate; other rates apply to certain exports (oil, grains and others)	5
Tax on personal assets; imposed on all legal persons and individuals domiciled abroad holding ownership interests in Argentine companies; tax is calculated based on the equity value of the Argentine company; tax is paid by the Argentine company, but the company may recover the tax paid from the foreign shareholder	0.5

E. Miscellaneous matters

Foreign-exchange controls. From September 2019, the government has reintroduced certain foreign-exchange controls which are periodically reviewed and redefined.

Exporters must repatriate into Argentina the cash derived from exports of goods and services, among other items, within a specified time period.

Funds derived from loans granted from abroad must be settled in the Argentine foreign-exchange market in order to be able to make the repayment using the same mechanism.

Payment of debts to foreign parties can be routed through the foreign-exchange market subject to compliance with certain requirements.

Payments for imports of goods and services can be routed through the foreign-exchange market subject to certain conditions. For goods delivered and services rendered as from 13 December 2023, payments can generally be made according to the following schedule:

- Four installments in the case of goods (30, 60, 90 or 120 days) except for certain specific situations
- After 30 days for non-related party services, and 180 days in the case of related-party services

Payment of dividends is subject to the Central Bank of Argentina's approval. The Central Bank of Argentina's prior approval is also needed to access the foreign-exchange market to make investments abroad.

Interest deductibility limitation. Under general principles, transactions between related parties must be made on an arm's-length basis.

The Argentine income tax law establishes a limit for the deduction of interest arising from financial loans granted by related parties. The limit equals 30% of earnings before interest, taxes, depreciation and amortization (EBITDA) or a certain amount to be determined by the Executive Power (currently ARS1 million), whichever is higher. The limit each year is

increased by the amount unused (if applicable) in the prior three years. In addition, if certain interest was not deductible in a given year due to the application of the limitation, it can be carried forward for five fiscal years. For this purpose, interest includes foreign-exchange differences (however, this last inclusion is not applicable when comprehensive inflationary adjustment is in force).

The law provides exemptions from the deduction limit for certain situations (for example, the interest is derived on loans obtained by Argentine banks and financial trusts or the beneficiary of the interest has been subject to tax on such income in accordance with the Argentine income tax law). In addition, the limitation does not apply to situations in which it is proved that the ratio of interest to EBITDA of the Argentine borrower is equal to or lower than the same ratio for its economic group with respect to debt with unrelated lenders for the same fiscal year.

Transfer pricing. The Argentine law includes transfer-pricing rules that generally apply to transactions between related parties. In addition, transactions between unrelated parties may also be subject to these rules. Transactions with entities and individuals located in "non-cooperating" or "low- or no-tax" jurisdictions are deemed to be not carried out at arm's length.

In addition, the Argentine law includes rules on analyzing transactions involving the import or export of goods with the participation of a foreign intermediary that is not the actual importer at destination or exporter at origin, respectively, if at least one of the foreign parties involved (that is, the intermediary, importer or exporter) is a related party. In these cases, the law requires proof that the foreign intermediary's remuneration is in line with the risks it assumes, the functions it carries out and the assets involved.

The law provides for the following transfer-pricing methods:
- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Profit-split method
- Transactional net margin method

For exports of goods with known prices and with the intervention of an intermediary that is related, or located in "non-cooperating" or "low- or no-tax" jurisdictions, the income tax law requires the Argentine exporter to file the agreements supporting the transactions with the federal tax authorities (Administración Federal de Ingresos Públicos, or AFIP). If the agreements are not filed, the Argentine-source income from the export is determined considering the known prices on the date the goods are loaded into the transportation vehicle, with appropriate comparability adjustments, if applicable.

F. Treaty withholding tax rates

Some of Argentina's tax treaties establish maximum tax rates lower than those under general tax law. To benefit from a reduced treaty withholding tax rate, certain formal requirements must be

met. The following table shows the lower of the treaty rate and the rate under domestic tax law.

	Dividends (a) %	Interest (c) %	Royalties (c) %
Australia	10/15 (b)	0/12	10/15
Belgium	10/15 (b)	0/12	3/5/10/15 (d)
Bolivia	0/7/35	15.05/35	21/28/31.5 (h)
Brazil	10/35 (b)	15	10/15 (e)
Canada	10/15 (b)	0/12.5	3/5/10/15 (d)
Chile	10/15 (b)	4/12/15	3/10/15
Denmark	10/15 (b)	0/12	3/5/10/15 (d)
Finland	10/15 (b)	0/15	3/5/10/15 (d)
France	15	15.05/20	18
Germany	15	10/15	15
Italy	15	15.05/20	10/18 (f)
Mexico	10/15 (b)	0/12	10/15
Netherlands	10/15 (b)	0/12	3/5/10/15 (d)
Norway	10/15 (b)	0/12	3/5/10/15 (d)
Qatar	5/10/15 (g)	0/12	10
Russian Federation	10/15 (b)	15	15
Spain	10/15 (b)	0/12	3/5/10/15 (d)
Sweden	10/15 (b)	0/12	3/5/10/15 (d)
Switzerland	10/15 (b)	0/12	3/5/10/15 (d)
United Arab Emirates	5/10/15 (g)	0/12	10
United Kingdom	10/15 (b)	0/12	3/5/10/15 (d)
Uruguay	0/7/35	15.05/35	21/28/31.5 (g)
Non-treaty jurisdictions	0/7/35	15.05/35 (f)	21/28/31.5 (g)

(a) The rates shown in the table apply only if the corresponding domestic withholding rate is higher than the tax treaty rate. According to the domestic law, the dividend withholding tax rate is 7% for profits accrued during fiscal years starting from 1 January 2018. A 0% dividend withholding tax rate generally applies for profits accrued during previous fiscal years; however, in these cases, a 35% withholding tax (known as "equalization tax") may be triggered if the distribution exceeds the after-tax accumulated taxable income of the taxpayer.

(b) These treaties establish maximum rates of 10% or 15%. The 10% rate applies if the beneficial owner of the dividend is a company that controls, directly or indirectly, at least 25% of the voting power of the payer. The 15% rate applies to other cases.

(c) The rates listed are the lower of the treaty or statutory rates. For details concerning the domestic rates, see Section B.

(d) In general, the rates apply to the following categories of payments:
- 3% for the use of, or right to use, news
- 5% for the use of, or right to use, copyrights of literary, dramatic, musical or other artistic works (but not royalties with respect to motion picture films and works on film or videotape or other means of production for use in connection with television)
- 10% for the use of, or right to use, industrial, commercial or scientific equipment or patents, trademarks, designs, models, secret formulas or processes, or for the use of or information concerning scientific experience, including payments for the rendering of technical assistance
- 15% for other royalties

These categories may differ slightly from treaty to treaty.

(e) The 15% rate applies to royalties for the use of, or right to use, trademarks. The 10% rate applies to other royalties, under certain conditions.

(f) The 10% rate applies to royalties for the use of, or right to use, copyrights of literary, artistic or scientific works. The 18% rate applies to other royalties.

(g) The 5% rate applies if the beneficial owner of the dividend is a government of the other contracting state. The 10% rate applies if the beneficial owner of the dividend is a company that controls, directly or indirectly, at least 25% of the voting power of the payer. The 15% rate applies to other cases.
(h) For details concerning these rates, see Section B.

Because of the rapidly changing economic situation in Armenia, changes are expected to be made to the tax law of Armenia. As a result, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	18
Capital Gains Tax Rate (%)	18
Permanent Establishment Tax Rate (%)	18
Withholding Tax (%)	
Dividends	5
Interest	10
Royalties	10
Insurance Compensation, Reinsurance Payments and Income Received from Freight	5
Income from the Lease of Property, Capital Gains on Property (except Securities) and Other Passive Income	10
Capital Gains on Securities	0/18
Income from Rendering of Services	20
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

B. Taxes on corporate income and gains

Corporate income tax. Resident and nonresident entities pay corporate income tax in Armenia. Resident organizations are organizations that are state registered in Armenia. Nonresident organizations are organizations established in foreign countries. Resident entities are taxed on their worldwide income, which consists of income received from sources in and outside Armenia. Nonresident entities are taxed on Armenian-source income only.

Income earned through a permanent establishment in Armenia, net of tax-deductible expenses, is taxed at the regular corporate income tax rate of 18%. A permanent establishment is defined as a fixed place of business activities in Armenia recognized by the tax authorities through which the enterprise carries on its business. It generally includes organizations or natural persons who represent foreign legal entities conducting commercial activities in Armenia. Domestic tax law and double tax treaties list activities that do not result in a taxable permanent establishment. Foreign legal entities deriving income from the source in Armenia without a permanent establishment are subject to withholding tax on their Armenian-source income at a rate of 0%, 5%, 10%, 18% or 20% (see the withholding tax rates in Section A); the provisions on deductions of expenses as prescribed by the law are not applicable to them and the corporate income tax rate applies to the gross income of the taxpayer.

Armenian law allows foreign investment in various forms, including investment through wholly or partially foreign-owned subsidiaries, share participations in joint stock companies and joint ventures with Armenian legal entities and citizens, permanent establishments and other types of presence.

Tax rates. The regular corporate income tax rate is 18%. For investment funds (except for pension funds and guarantee funds), the corporate income tax rate is 0.01% of net assets. For sole entrepreneurs, the corporate income tax rate is 23%. Sole entrepreneurs and notaries operating in the turnover regime of taxation pay AMD5,000 per month for the respective types of activities. This is considered a final corporate income tax liability.

Capital gains. No separate capital gains tax is imposed in Armenia. Realized capital gains are included in taxable income and are subject to tax at the regular corporate income tax rate. Realized capital gains from the alienation of stocks, shares or equity units held by a legal entity (without a permanent establishment in Armenia) in an organization are taxed at the 0% rate if the sale of stocks, shares or equity units is made after the expiration of two tax years following the tax year, including the date of the acquisition of stocks, shares or equity units.

Realized capital losses can be carried forward together with other losses and be offset against taxable income of future tax years.

Administration. The tax year is the calendar year.

Both Armenian and foreign legal entities conducting business activities in Armenia through a permanent establishment must make advance payments of corporate income tax during the year. The amount payable is the lower of 20% of the amount of corporate income tax calculated for the preceding tax year or 2% of revenue received from the supply of goods, performance of works and/or provision of services during the preceding quarter. The advance payments must be made quarterly by the 20th day of the last month of each quarter.

If the total sum of advance payments exceeds the tax due for the tax year and if the taxpayer applies for a refund, the excess is refunded to the taxpayer. However, in practice, refunds are rare, and accordingly, taxpayers apply overpayments against future tax liabilities.

The annual corporate income tax calculation must be filed and submitted to the Tax Inspectorate by 20 April of the year following the tax year. The corporate income tax must be paid to the state budget by 20 April of the year following the tax year.

Fines are charged on late tax payments at a rate of 0.04% of the tax due for each day of delay, up to a maximum of 730 days. If the taxpayer fails to submit the corporate income tax declaration to the Tax Inspectorate by the due date, a penalty equal to 5% of the total amount of calculated tax is imposed on the taxpayer for each 15-day period. The total amount of the penalties cannot exceed the total amount of the principal tax liability. For the underreporting of taxable income, in addition to the collection of the underreported amount of tax, a penalty equal to 50% of the underreported amount is assessed to the taxpayer.

Corporate income taxpayers also submit annual information on the type of income, date and corporate income taxes withheld from income paid to state-registered companies in the member countries of the Commonwealth of Independent States. This information must be submitted to the Tax Inspectorate by 20 April of the year following the tax year.

Dividends. Dividend withholding tax at a rate of 5% is imposed on dividends paid from Armenian sources to individuals and nonresident legal entities.

For nonresident legal entities, dividends are considered to be paid on the date of the shareholders' decision on distribution of dividends from the reporting year's net profit. This rule applies to dividends attributable to periods after 1 January 2017.

Dividends paid to resident legal entities are not subject to withholding tax. Dividends received by resident taxpayers from participations in the equity of other legal entities or enterprises that do not have the status of a legal entity are not subject to tax.

Interest. Interest withholding tax at a rate of 10% is imposed on interest paid from Armenian sources to individuals and nonresident legal entities. Armenian legal entities receiving interest payments include such payments in their taxable income and are subject to tax on these payments at the regular corporate income tax rate.

Foreign tax relief. The amount of corporate income tax withheld from Armenian residents in foreign countries in accordance with the laws of the foreign countries is credited against the corporate income tax payable in Armenia. However, the amount of the credit may not exceed the amount of the corporate income tax payable in Armenia on the income received in the foreign country. If the amount of the credit exceeds the corporate income tax liability for the tax year, the excess amount may be credited against the corporate income tax in subsequent tax years.

C. Determination of taxable income

General. Taxable income is defined as a positive difference between gross income of the taxpayer and all deductions allowed by the law.

Gross income comprises all revenues of the taxpayer received in the reporting year, except for revenues that are not treated as income according to the law. Gross income includes the following:
- Trading income
- Capital gains
- Income from financial activities
- Gratuitously received assets and income from discounts or remissions of liabilities
- Other items of income

Income received in foreign currency is converted into drams at the daily exchange rate determined by the Central Bank of Armenia for the date of receipt of the income.

Deductible expenses include all documentary supported entrepreneurial expenses. However, certain expenses are nondeductible or partially nondeductible for tax purposes.

Nondeductible expenses include, among others, the following:
- Fines, penalties and other proprietary sanctions transferred to the state and municipal budgets or the funded pension system
- Assets provided, works performed and services provided free of charge and remitted (forgiven) debts
- Depreciation expenses of fixed assets owned by the taxpayer that are provided under leases (in their various forms) if the lease contract stipulates that the right of ownership to the leased property can pass to the lessee on expiration of the term of the contract or prior to such expiration
- Expenses related to the obtaining of income that is deductible from gross income
- Amount of value-added tax (VAT), excise tax and environmental tax that is offset (deducted) in accordance with the procedure established by the Republic of Armenia Tax Code
- The amount of VAT and excise tax calculated and paid in accordance with the procedure established by the Republic of Armenia Tax Code for goods delivered, works performed or services provided free of charge or at a substantially lower value
- For taxpayers other than banks and credit organizations, interest paid on loans and borrowings if such borrowings or loans are provided by the taxpayers to third parties free of interest
- Payments made by taxpayers for leased assets if the assets are provided by them to third parties for free-of-charge use
- Expenses for obtained goods, services received and accepted works from taxpayers considered as micro-entrepreneurs in accordance with the procedure defined by the Republic of Armenia Tax Code

Partially nondeductible expenses include, among others, the following:
- Expenses for business trips outside Armenia that exceed 5% of the gross income for the tax year. The limit of 5% is not taken into account in the tax year of registration.
- Representative expenses exceeding 0.5% (but not more than AMD5 million) of the gross income for the tax year. The limit of 0.5% is not taken into account in the tax year of registration.

- Fees paid by the taxpayer for management services received from nonresident companies and individuals not having a permanent establishment in Armenia, exceeding 2% of the taxpayer's gross income for the reporting year. This measure does not apply to management services rendered to resident companies by their nonresident founders if the companies are engaged in innovative activities in the information technology and computer technique fields, as well as management services rendered to resident companies within the framework of international credit (grant) agreements.
- Payments made by the employer for an employee that are within the terms of voluntary pension insurance in accordance with the legislation and that exceed 7.5% of the employee's remuneration.
- Amounts of financial aid, food provided to individuals, costs for organization of social and cultural events and similar expenses, exceeding 0.25% of the taxable income for the tax year. If there is no gross income during the tax year, the limit is 1% of the total salaries and equivalent payments accrued during the tax year.
- Interest paid on loans and borrowings to the extent that it exceeds twice the bank interest rate defined by the Central Bank of Armenia (currently the deduction is limited to a rate of 24%).
- For taxpayers other than banks and credit organizations, the amount of interest payable on borrowings from entities other than banks and credit organizations in excess of twice the positive amount of equity on the last day of the tax year.
- For banks and credit organizations, the amount of interest payable on borrowings from entities other than banks and credit organizations in excess of nine times the positive amount of equity on the last day of the tax year.
- For taxpayers other than banks and credit organizations, the part of interest paid on loans and borrowings that exceeds the amount of interest received from borrowings made to other taxpayers.
- The part of payments made by taxpayers for leased assets that exceeds the payments received by them for providing the same assets to other taxpayers under subleases.

To calculate taxable income, the taxpayer must account for income and expenses on an accrual basis. Income and expenses are accounted for, respectively, from the moment of the acquisition of the right to receive such income or to recognize the expenses, regardless of the actual period of the deriving of such income or the making of such payments.

Inventories. Inventories are valued at acquisition cost. Costs for storage and transportation must be included in the value of inventory. The first-in, first-out (FIFO) method must be used to value inventory.

Provisions. Bad debts are deductible in accordance with the procedure established by the government of Armenia. Banks, lending organizations, investment companies and insurance companies may deduct bad debts in accordance with the procedure established jointly by the authorized body of the government of Armenia and the Central Bank of Armenia.

In addition, the gross income of banks, lending organizations, stock funds, investment companies or insurance companies may be reduced by a reserve for possible losses in accordance with the procedure established jointly by the authorized body of the government of Armenia and the Central Bank of Armenia.

Tax depreciation. Depreciation (amortization) allowances for fixed and intangible assets are deductible for tax purposes in accordance with the terms and conditions provided by the Republic of Armenia Tax Code.

The annual amount of depreciation (amortization) allowances of fixed and intangible assets is calculated by dividing the acquisition cost or revalued cost (the revaluation is carried out according to the procedure established by the law) of fixed and intangible assets by the number of years in the depreciation period for the appropriate group of fixed assets or for intangible assets. The following are the minimum depreciation periods.

Group	Assets	Minimum depreciation period (years)
1	Buildings and constructions of hotels, boarding houses, rest homes, sanitariums and educational institutions	10
2	Other buildings, constructions and transmission devices	20
3	Production equipment	5
4	Robot equipment and assembly lines	3
5	Computational and communication devices and computers	1
6	Other fixed assets, including growing cattle, perennial plants, and investments intended for improving the land	8

For purposes of the determination of taxable income, taxpayers may choose a depreciation period for fixed assets other than the periods mentioned in the above table, but the chosen period may not be less than one of the abovementioned periods for the appropriate group.

Fixed and intangible assets with a value up to AMD50,000 are depreciated in the tax year of their acquisition.

Intangible assets are amortized over their useful economic lives. If it is impossible to determine the useful life of an intangible asset, the minimum amortization period for the asset is set at 10 years, but it may not exceed the period of the taxpayer's activity.

Notwithstanding the abovementioned rules, taxpayers importing, acquiring, constructing or developing fixed assets between 1 July 2020 and 31 December 2021 may set the depreciation period at their discretion, but not less than one year.

Under the law, land cannot be depreciated.

Relief for losses. Enterprises may carry forward a loss incurred in a tax year to the following five years. Losses may not be carried back.

Groups of companies. Armenian law does not contain any measures allowing members of a group to offset profits and losses.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); imposed on the delivery of goods and rendering of services (including free of charge or partially free of charge), the importation of goods through the "Release for Domestic Consumption" customs procedure and the importation of goods from the Eurasian Economic Union, with the exception of cases specified by law; reverse-charge VAT is imposed on entrepreneurial activities subject to VAT that are performed in Armenia by foreign entities (including the import of goods to be used by such entities)	0/20
Excise tax; imposed on certain goods (tobacco products, alcoholic beverages, petrol, diesel fuel and motor oils imported or produced in Armenia as well as natural gas filled in gas stations); the tax is calculated as a specified amount per unit of the volume, weight or quantity of goods subject to excise tax	Various
Real estate tax; generally imposed at local (municipal) level; applies to:	
Buildings and constructions; tax base is cadastral value (approximately the market value)	Various
Land; tax base is cadastral value (approximately the market value) or calculated net income	0.25 to 15
Vehicles tax; tax base is traction-motor power	Various

E. Foreign-exchange controls

The Armenian currency is the dram (AMD). The dram is a non-convertible currency outside Armenia. Enterprises may buy or sell foreign currencies through specialized entities in Armenia (banks, branches of foreign banks operating in Armenia, credit organizations, payment and settlement organizations, foreign-currency dealers and brokers licensed by the Central Bank of Armenia, foreign-currency exchange offices and foreign-currency auction organizers).

Armenia does not impose restrictive currency-control regulations. Individuals and enterprises may open bank accounts abroad without any restriction. In general, all transactions performed in Armenia between resident legal entities or individuals must be performed in Armenian drams. Transactions between resident legal entities or private entrepreneurs and nonresident legal entities or private entrepreneurs may be conducted in other currencies.

F. Treaty withholding tax rates

Armenia has entered into tax treaties with 51 jurisdictions. The following table lists the withholding tax rates under these treaties. In general, if the withholding tax rate provided in a treaty exceeds the rate provided by the Republic of Armenia Tax Code, the domestic rate applies.

	Dividends %	Interest (1) %	Royalties %
Austria	5/15 (a)	0/10 (v)	5
Belarus	10/15 (b)	10	10
Belgium	5/15 (a)	0/10 (v)	8
Bulgaria	5/10	5/10 (ff)	5/10 (gg)
Canada	5/15 (d)	10	10
China Mainland	5/10 (g)	10	10
Croatia	0/10 (h)	10	5
Cyprus	0/5 (x)	5	5
Czech Republic	10	5/10 (e)	5/10 (f)
Denmark	0/5/15 (jj)	0/5/10 (kk)	5/10 (ll)
Estonia	5/15 (i)	10	10
Finland	5/15 (i)	5	5/10 (j)
France	5/15 (k)	0/10 (v)	5/10 (l)
Georgia	5/10 (g)	10	5
Germany	7/10 (hh)	5	6
Greece	10	10	5
Hungary	5/10 (g)	5/10 (ii)	5
India	10	10	10
Indonesia	10/15 (d)	0/10 (q)	10
Iran	10/15 (m)	10	5
Ireland	0/5/15 (bb)	5/10 (cc)	5
Israel	0/5/15 (oo)	0/10 (pp)	5/10 (qq)
Italy	5/10 (n)	0/10 (w)	7
Kazakhstan	10	10	10
Kuwait	5	5	10
Kyrgyzstan	10	10	10
Latvia	5/15 (i)	10	10
Lebanon	5/10 (g)	8	5
Lithuania	5/15 (i)	10	10
Luxembourg	5/15 (a)	10	5
Malta	5/10 (mm)	5	5
Moldova	5/15 (o)	10	10
Netherlands	0/5/15 (p)	0/5 (v)	5
Poland	10	5	10
Qatar	5/10 (q)	5	5
Romania	5/10 (r)	10	10
Russian Federation	5/10 (s)	10	0
Serbia	8	8	8
Singapore	0/5 (nn)	5	5
Slovak Republic	5/10 (dd)	10	5
Slovenia	5/10 (g)	10	5
Spain	0/10 (y)	5	5/10 (z)
Sweden	0/5/15 (ee)	5	5
Switzerland	5/15 (t)	0/10 (v)	5
Syria	10	10	12
Tajikistan	10	10	10

	Dividends %	Interest (1) %	Royalties %
Thailand	10	10	15
Turkmenistan	5/15 (u)	10	10
Ukraine	5/15 (u)	10	0
United Arab Emirates	3	0	5
United Kingdom	0/5/10/15 (aa)	5	5
Non-treaty jurisdictions	5	10	10

(1) In several treaties, a 0% rate applies to interest paid to governmental entities, political or administrative-territorial subdivisions, local authorities, central banks or financial institutions owned or controlled by the government. This provision is not reflected in the rates shown in the table.

(a) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. The 15% rate applies in all other cases.

(b) The 10% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends. The 15% rate applies in all other cases.

(c) The 5% rate applies if the actual owner of the dividends is a company that has invested in the payer more than USD100,000 (or the equivalent amount in Armenian currency). The 10% rate applies in all other cases.

(d) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the company paying the dividends and if the capital invested by the beneficial owner exceeds USD100,000 (or the equivalent amount in Armenian currency) on the date of declaration of the dividends. The 15% rate applies in all other cases.

(e) The 5% rate applies to interest on loans or credits granted by banks. The 10% rate applies in all other cases.

(f) The 5% rate applies to royalties for the use of, or the right of use, literary, artistic or scientific works, including television or radio content (films and compact discs). The 10% rate applies in all other cases.

(g) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital (assets) of the company paying the dividends. The 10% rate applies in all other cases.

(h) The 0% rate applies if the actual owner of the dividends is a company that directly or indirectly holds at least 25% of the capital of the company paying the dividends for a minimum period of two years before the payment of the dividends and if the dividends are not subject to tax in Croatia. The 10% rate applies in all other cases.

(i) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the assets of the company paying the dividends. The 15% rate applies in all other cases.

(j) The 5% rate applies to the royalties for the use of, or the right of use, computer software, patents, trademarks, designs or models, plans or secret formulas or processes, or for information concerning industrial, commercial or scientific experience (know-how). The 10% rate applies in all other cases.

(k) The 5% rate applies if the actual owner of the dividends is a company that directly or indirectly holds at least 10% of the assets of the company paying the dividends. The 15% rate applies in all other cases.

(l) The 5% rate applies to the royalties for the use of, or the right to use, copyrights. The 10% rate applies in all other cases.

(m) The 10% rate applies if the actual owner of the dividends is a company (other than a partnership) that owns at least 25% of the assets of the company paying the dividends. The 15% rate applies in all other cases.

(n) The 5% rate applies if the actual owner of the dividends is a company that directly holds at least 10% of the capital of the company paying the dividends for a minimum period of 12 months before the date of declaration of the dividends and if the capital invested by the beneficial owner exceeds USD100,000 or the equivalent amount in Armenian currency. The 10% rate applies in all other cases.

(o) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that holds at least 25% of the capital of the company paying the dividends. The 15% rate applies in all other cases.

(p) The 0% rate applies if the profits out of which the dividends are paid have been effectively taxed at the normal rate for profits tax and if the dividends

are exempt from tax in the hands of the company receiving such dividends. The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. The 15% rate applies to dividends in all other cases.

(q) The 5% rate applies if the capital invested by the actual owner of the dividends exceeds USD100,000. The 10% rate applies in all other cases.

(r) The 5% rate applies if the actual owner of the dividends is a company that directly holds at least 25% of the assets of the company paying the dividends. The 10% rate applies in all other cases.

(s) The 5% rate applies if the actual owner of the dividends is a company that directly holds at least 25% of the share capital of the company paying the dividends. The 10% rate applies in all other cases.

(t) The 5% rate applies if the actual owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and if the capital invested by the beneficial owner exceeds CHF200,000 (or the equivalent amount in Armenian currency) on the date of receipt of the dividends. The 15% rate applies in all other cases.

(u) The 5% rate applies if the actual owner of the dividends is a company that owns at least 25% of the capital of the company paying the dividends. The 15% rate applies in all other cases.

(v) The 0% rate applies to interest connected to sales on credit of industrial, commercial or scientific equipment or business assets, and to interest on loans granted by banking enterprises.

(w) The 0% rate applies to the interest on loans granted by banking enterprises. The 10% rate applies in all other cases.

(x) The 0% rate applies if the capital invested by the actual owner of the dividends exceeds EUR150,000. The 5% rate applies in all other cases.

(y) The 0% rate applies if all of the following conditions are satisfied:
- The beneficial owner of the dividends is a resident of the other contracting state.
- The beneficial owner of the dividends has held, directly or indirectly, at least 25% of the capital of the company paying the dividends for at least two years before the date of such payment.
- Such dividends are not liable to profit tax in the other contracting state.

(z) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or films or tapes used for radio or television broadcasting. The 10% rate applies in all other cases.

(aa) The 0% rate applies if the beneficial owner of the dividends is a pension scheme. The 5% rate applies if the beneficial owner of the dividends satisfies all of the following conditions:
- It is a company that is a resident of the other contracting state.
- It holds, directly or indirectly, at least 25% of the share capital of the company paying the dividends at the date of payment of the dividends.
- It has invested at least GBP1 million (or the equivalent amount in any other currency) in the share capital of the company paying the dividends at the date of payment of the dividends.

The 15% rate applies if dividends are paid out of income (including gains) derived directly or indirectly from immovable property within the meaning of Article 6 by an investment vehicle that distributes most of this income annually and if such vehicle's income from this immovable property is exempted from tax. The 10% rate applies in all other cases.

(bb) The 0% rate applies if the beneficial owner is a company (other than a partnership) that satisfies the following conditions:
- It holds directly at least 25% of the capital of the company paying the dividends.
- It owned the holding for a period of at least two years before it made the claim for the 0% rate.
- In the contracting state in which the company is resident, the company is relieved from tax on dividends by an exemption or would, but for this measure in the tax treaty, be entirely relieved by a credit for tax paid with respect to dividends paid by the company paying the dividends.

The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies in all other cases.

(cc) The 5% rate applies if interest is paid with respect to loans granted by banking enterprises. The 10% rate applies in all other cases.

(dd) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

(ee) The 0% rate applies if the beneficial owner is a company (other than a partnership) that satisfies the following conditions:
- It holds at least 25% of the capital or the voting power of the company paying the dividends.
- It has owned the holding for a period of at least two years before it made the claim.
- The dividends are exempt from tax in its hands.

The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds at least 10% of the capital or the voting power of the company paying the dividends. The 15% rate applies in all other cases.

(ff) The 5% rate applies to interest on loans or credit granted by banks or financial institutions. The 10% rate applies in all other cases.

(gg) The 5% rate applies to royalties received as consideration for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting. The 10% rate applies in all other cases.

(hh) The 7% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

(ii) The 5% rate applies if the interest is paid in connection with a loan or a credit granted by a bank. The 10% rate applies in all other cases.

(jj) The 0% rate applies if either of these two conditions is satisfied:
- The beneficial owner is a company that holds directly at least 50% of the capital of the company paying the dividends and that has invested more than EUR2 million or its equivalent in Armenian or Danish currency in the capital of the company paying the dividends at the date of payment of the dividends.
- The beneficial owner is the other contracting state or the central bank of that other state, or any national agency or any other agency (including a financial institution) owned by the government of that other state.

The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and that has invested more than EUR100,000 or its equivalent in Armenian or Danish currency in the capital of the company paying the dividends at the date of payment of the dividends. The 15% rate applies in all other cases.

(kk) The 0% rate applies if the interest is paid to a contracting state or a local authority thereof, including the central bank of that other state, or any institution, agency or fund owned by the government of a contracting state. The 5% rate applies if the interest is paid with respect to a loan of any kind granted by a banking enterprise. The 10% rate applies in all other cases.

(ll) The 5% rate applies to royalties for the use of, or the right to use, computer software; patents; trademarks; designs, models or plans; any secret formulas or processes; or for information concerning industrial, commercial or scientific experience (know-how). The 10% rate applies to royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, or films or tapes for television or radio broadcasting.

(mm) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends and has invested at least EUR1,500,000 (or the equivalent amount in any other currency) in the share capital of the company paying the dividends at the date of payment of the dividends. The 10% rate applies in all other cases.

(nn) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the company paying the dividends or has invested at least USD300,000 (or the equivalent amount in any other currency) in the share capital of the company paying the dividends. The 5% rate applies in all other cases.

(oo) The 0% rate applies if the beneficial owner of the dividends is the other contracting state, the central bank of that other contracting state or a pension plan that is a resident of that other contracting state and does not hold directly or indirectly more than 25% of the capital or 25% of the voting power of the company paying the dividends. The 5% rate applies if the beneficial owner is a company (other than a partnership or a real estate investment company) that holds directly at least 25% of the capital of the company paying the dividends. The 15% rate applies in all other cases.

(pp) An exemption from tax shall apply if the interest is paid to the government of the other contracting state, a local authority or the central bank thereof or if the interest is paid by the government of that contracting state, a local authority or the central bank thereof.

(qq) The 5% rate applies to the use of, or the right to use, patents, trademarks, designs or models or plans; the use of, or the right to use, secret formulas or processes or information concerning industrial, commercial or scientific experience (know-how); and the use of, or the right to use, industrial, commercial, or scientific equipment. The 10% rate applies to the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting.

A. At a glance

Corporate Income Tax Rate (%)	22
Capital Gains Tax Rate (%)	22
Branch Tax Rate (%)	22
Withholding Tax (%)	
Dividends	0/10 (a)
Interest	0
Royalties from Patents, Know-how, etc.	0
Foreign-Exchange Commission	1.3 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) The 0% rate applies to dividends paid to resident holding companies. The 5% rate on dividends paid to nonresident publicly traded companies was abolished as of 1 January 2023. A 5% rate applies to dividends paid on qualifying shareholdings under applicable tax treaties. The 10% rate applies in all other circumstances.

(b) A foreign-exchange commission (FEC) is imposed on all payments by residents to nonresidents. The FEC is withheld by banks on behalf of the Central Bank of Aruba or paid directly to the Central Bank of Aruba by residents.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax is levied on resident and nonresident entities. A domestic entity is an entity that is established in Aruba or incorporated under Aruban law.

Tax is levied on total profits earned from all sources during the company's accounting period. "Profit" means the total of net gains, under any name or in any form. Branches of foreign entities are taxed on Aruban-source income, such as profits earned through a permanent establishment.

Permanent establishment. A permanent establishment is deemed to exist in Aruba in the case of the following:
- A permanent representative in Aruba.
- A foreign enterprise that builds, installs, maintains, cleans or repairs capital assets in Aruba for more than 30 days. These 30 days include, among others, days spent on the technical preparation and cleaning up of the site.
- Foreign shareholders (not natural persons) of Aruba fiscal transparent companies with real economic presence in Aruba.

Rate of corporate income tax. The corporate income tax rate is 22%.

Special tax regimes for certain companies. Special tax regimes available for certain companies in Aruba are described below.

Free-Zone Companies. Companies operating in the free-zone are subject to corporate income tax at a rate of 2% on profits derived from their qualifying activities and to a free-zone facility charge of up to 1% on their annual gross turnover. The free-zone is a defined territory in which no import duties are levied if the goods are not imported for use in the domestic market. On approval, services can be rendered outside of the defined territory. The import duties exemption mentioned above does not apply for service companies established outside the defined territory.

The free-zone law was amended as of 1 January 2020. The following are highlights of the amendments:
- Only services designated in a state decree can be rendered by a free-zone company. No such (draft) decree had been published at the time of writing.
- In addition to financial services (already prohibited prior to 1 January 2020), the following services cannot be rendered by a free-zone company:
  - — Notary, lawyer, accountant, tax advisors and similar services
  - — Intellectual property (IP) activities
  - — Other services designated in a state decree (however, no such [draft] decree had been published at the time of writing)
- Qualifying services can be rendered to both foreign and local customers (so-called "ring-fencing" has been eliminated) at the corporate income tax of 2%.
- Companies engaging in the following geographically mobile activities must perform their so-called "core income generating activities" in Aruba with sufficient substance:
  - — Shipping
  - — Head office
  - — Pure holding
  - — Distribution and other services
  - — Other service-related services

A grandfathering period of up to 30 June 2021 is applicable for free-zone service providers performing IP activities as of

1 September 2018 and other free-zone service providers performing non-IP activities as of 15 November 2018.

In addition, the following benefits are available to free-zone companies:
- Exemption from turnover taxes with respect to the supply of goods outside Aruba and the rendering of services to persons outside Aruba
- On request, exemption from the FEC for payments abroad that are not related to local sales
- A 0% dividend withholding tax rate

Imputation Payment Companies. Imputation Payment Companies (IPCs) were subject to the regular corporate tax rate (see *Rates of corporate income tax*). Under the IPC regime, part of the corporate income tax paid by a company was remitted to its shareholders in the form of an imputation payment. The IPC regime was available to all companies conducting qualifying activities such as hotel, financing, licensing or investment activities. The IPC regime was abolished as of 2016. However, existing IPCs can continue making use of this regime until 2026.

Special Purpose Companies. Special Purpose Companies (SPCs) were introduced as of 2016 for qualifying activities. The SPC regime was abolished as of 1 January 2023. However, SPCs in existence on 31 December 2022 can continue to make use of this regime until the last financial year that started before 1 January 2026. In principle, qualifying SPCs are subject to a corporate income tax rate of 10%; for companies performing qualifying hotel operations, the applicable corporate tax rate can be 10%, 12% or 15%. In addition, SPCs are exempt from dividend withholding tax. As of January 2023, the dividend withholding tax exemption for SPC's applies only insofar as the profits of SPCs (which were subject to the aforementioned corporate income tax rates) are (in)directly distributed prior to 1 January 2028.

Exempt Companies. An Exempt Company is exempt from corporate income tax and withholding tax on dividends paid if it performs one of the following activities:
- Financing (if the company does not qualify as a credit institution)
- Investing, other than in real estate
- Holding of shares and participation rights
- Insuring special entrepreneurial risks (activities of captive insurance companies)

As of 1 January 2020, Exempt Companies performing the abovementioned qualifying activities are prohibited from deriving income from IP activities. In addition, Exempt Companies engaged in the abovementioned geographically mobile activities must perform as of 1 January 2020 their so-called "core income generating activities" in Aruba with sufficient substance. A grandfathering period of up to 1 July 2021 is applicable for Exempt Companies whose activities and assets in terms of nature and size existed already on 15 November 2018.

Fiscal transparency. Aruban limited liability companies can opt for fiscal transparency for Aruban corporate income tax and

dividend withholding tax purposes within one month after incorporation. If fiscal transparency is granted, the limited liability company is treated as a partnership for Aruba income tax, corporate income tax and dividend withholding tax purposes; that is, only the partners are taxed in Aruba on Aruban-source income, unless the entity loses its fiscal transparency status.

As of 9 April 2019, all fiscal transparent entities are required to have real economic presence in Aruba (also referred to as "substance requirements") and as a result have a taxable presence in Aruba. Fiscal transparent companies that existed prior to 9 April 2019 will have until 1 January 2022 to comply with the new real economic presence (substance) requirements.

Fiscal transparent companies engaged certain designated activities must now perform their so-called "core income generating activities" in or from Aruba with sufficient substance. The new substance requirements apply to the following designated geographically mobile activities:
- Head office activities
- Insurance
- Distribution and other services
- Shipping
- Financing and leasing
- Holding
- Asset management
- Banking
- IP activities (fiscally transparent companies engaged in certain so-called "enhanced risk IP activities" have an enhanced burden to prove that their income relates to activities performed in or from Aruba)

The existence of the "core income generating activities" in Aruba may also be determined on a group level, meaning that the required activities can be outsourced to affiliated entities established in Aruba.

If the new substance requirements are not met in a certain year, the fiscal transparent company will no longer be treated as a fiscal transparent company as of that year. Consequently, the formerly fiscal transparent company will become subject to profit and dividend withholding tax in Aruba.

Fiscal transparent companies are required to annually report their financial statements and the identity of their shareholder(s) to the tax authorities within six months after the end of their financial year. Noncompliance with this requirement may result in an administrative fine of a maximum AWG10,000, a monetary fine of AWG25,000, incarceration of a maximum of six months or a loss of the fiscal transparent status.

It is possible to obtain an advance ruling from the local tax authorities on the treatment of the local presence.

Branch profits tax. Branches of foreign companies are taxed at the same rate as resident companies. No additional withholding taxes are imposed on remittances of profits.

Capital gains. Capital gains are taxed as ordinary income. However, certain capital gains are exempt from corporate income

tax under the participation exemption (see *Participation exemption*).

Administration. In principle, the corporate income tax return for the preceding accounting period must be filed and the corresponding corporate income tax due must be simultaneously paid within five months after the end of the accounting period.

Dividends. A 10% withholding tax is imposed on dividends distributed to nonresidents. The rate of 5% for dividends distributed to nonresident publicly traded companies was abolished as of 1 January 2023. A 0% rate applies to dividends distributed to resident companies that qualify for the benefits of the participation exemption.

The Tax Regulation for the Kingdom of the Netherlands provides for special dividend withholding tax rates (see Section E).

Participation exemption. Aruban resident companies are exempt from corporate income tax on dividends and capital gains derived from shares with respect to qualifying participations. A qualifying foreign participation must satisfy both of the following conditions:
- The shares must not be held as inventory or as a portfolio investment.
- The participation must be subject to a tax on profits.

Costs (including interest) related to the acquisition of a participation qualifying for the participation exemption are in principle nondeductible. However, if the acquired participation is established in Aruba, interest expenses for the acquisition will be deductible as of the third fiscal year after the acquisition. The interest for the first and second fiscal year are deductible in equal parts over the third, fourth and fifth years after the acquisition.

Foreign tax relief. Foreign tax relief is available through the Tax Regulation for the Kingdom of the Netherlands. Foreign tax relief is also available under the state decree for the avoidance of double taxation.

C. Determination of trading income

General. Commercial profits must be calculated in accordance with "sound business practice" and generally accepted accounting standards.

General deduction limitation rules. Payments to other entities or persons for the use of material goods or for services provided are fully deductible if the payments are at arm's length and, in addition, either of the following conditions applies:
- The payment is not (in)directly due to an affiliated entity or affiliated individual. In brief, parties are affiliated if there is a(an) (in)direct (shared) interest of at least 25% in both parties.
- The payment is included in the taxable base of the receiving entity and is subject to a nominal tax rate of at least 15%.

Inventories. Inventories are generally valued using the historical-cost, first-in, first-out (FIFO) or weighted average methods.

Depreciation. Depreciation may be calculated by the straight-line, declining-balance or flexible methods.

As of 1 January 2023, depreciation of real estate for tax purposes is limited to the so-called bottom value (*bodemwaarde*). The bottom value is equal to 50% of the value for Ground Tax purposes. If a value for Ground Tax is not available, the market value of the real estate is used. In case of co-ownership of a building, the value for Ground Tax purposes of the building is allocated on a prorated ownership basis. Furthermore, parts of a building, the associated land and attachments (for example, a parking lot) are considered as one business asset for depreciation and devaluation to a lower business value. Equipment that can be removed from a building without causing significant damage to the equipment and that are not considered on a standalone basis as built properties are considered to be separate business assets.

Investment allowance. An investment allowance deduction of 10% is applicable for the acquisition of qualifying fixed assets to the extent that the investment in such assets exceeds AWG5,000. The allowance is deducted from the taxable income in the year of the investment. The investment allowance deduction is recaptured in the year of sale if the asset is sold within six years after the date of the investment.

Groups of companies. On written request, Aruban limited companies and/or limited liability companies may form a fiscal unity (tax-consolidated group) for corporate income tax purposes. To qualify for a fiscal unity, the parent company must own at least 99% of the shares in the subsidiary. A fiscal unity can only include corporations established under Aruban law, and all companies should have their place of effective management in Aruba. The whole group is taxed for corporate income tax purposes as if it were one company, and as a result, the subsidiaries in the fiscal unity are no longer individually subject to profit tax, but they should file nil returns yearly.

Relief for losses. Losses in a financial year may be carried forward for five years. No carryback is available. Losses originated incurred in the 2020, 2021 and 2022 financial years (COVID-19 years) can be carried forward for seven years.

D. Miscellaneous matters

Foreign-exchange controls. The Central Bank of Aruba regulates the foreign-exchange market and carries out the necessary transactions as executor of exchange policy. Remittances abroad require an exchange license issued by the Central Bank of Aruba.

Debt-to-equity rules. Aruba does not impose a debt-to-equity ratio.

Controlled foreign companies. Aruba does not have specific controlled foreign company legislation. However, numerous measures limit tax deductions related to intercompany transactions that are not at arm's length and intercompany transactions with low-taxed entities.

Transfer pricing. If a company or individual participates, directly or indirectly, in the management, supervision or the capital of two or more corporate entities, the conditions that apply to the supply of goods and the rendering of services between these related entities must be at arm's length. These conditions are similar to the conditions that would have applied in transactions with unrelated

parties. Information to substantiate arm's-length transactions must include, among other items, the following:
- The agreement between the entities
- Transfer-pricing method that was chosen and why it was chosen
- How the consideration was determined

Country-by-Country Reporting. Local legislation implementing Country-by-Country Reporting (CbCR) obligations and additional transfer-pricing documentation requirements has been enacted as of 1 January 2020. The Country-by-Country (CbC) report is applicable to Aruba tax resident entities that are members of a multinational enterprise (MNE) group with a consolidated group turnover exceeding AWG1.5 billion (approximately USD833 million) in the fiscal year preceding the fiscal year to which the CbC report applies. In addition, a group entity of an MNE that is tax resident in Aruba should notify the tax authorities by the last day of the financial year of the MNE about the identity and tax residency of the CbC reporting entity.

Aruba tax resident entities of an MNE group are also required to have a master file and local file. This requirement only applies to Aruba tax resident entities of an MNE group that have a consolidated group turnover exceeding AWG100 million (approximately USD56 million) in the fiscal year preceding the year to which the tax return applies. The qualifying MNE group entity should have the master file and local file available at the level of the Aruba entity at the moment of filing the tax return. The Aruba tax authorities can request these files from the Aruba entity.

Noncompliance with the abovementioned transfer-pricing documentation requirements and the obligations to hold a master file and/or a local file may lead to the following:
- A reversal of the burden of proof
- A monetary fine up to AWG25,000
- Criminal charges (including a fine or imprisonment)
- Payment of the amount of taxes that have not been collected as a result of the noncompliance

E. Tax treaties

Provisions for double tax relief are included in the Tax Regulation for the Kingdom of the Netherlands. These provisions avoid double taxation between the countries of the Kingdom of the Netherlands (Aruba, Curaçao, the Netherlands [including Bonaire, Sint Eustatius and Saba; these islands are known as the BES-Islands] and Sint Maarten) regarding taxes on income, capital and other items.

Under the Tax Regulation for the Kingdom of the Netherlands, the general withholding tax rate of 10% on dividend distributions from an entity resident in Aruba may be reduced to the following rates:
- 7.5% if the recipient of the dividends is a company that has capital divided in shares and that has a share interest in the nominal paid-up capital of the Aruba entity of at least 25%
- 5% if such recipient of the dividends is also subject to tax on profit at a rate of at least 5.5%

Effective from 10 October 2010, the Netherlands Antilles (which consisted of five island territories in the Caribbean Sea) was

dissolved as a country. As a result, the island territories of Curaçao and St. Maarten became autonomous countries within the Dutch Kingdom. The island territories of Bonaire, St. Eustatius and Saba (BES-Islands) have become a part of the Netherlands as extraordinary overseas municipalities.

The Tax Regulation for the Kingdom of the Netherlands remains in place until bilateral tax treaties have been concluded between the countries in the Dutch Kingdom.

Aruba has entered into tax information exchange agreements with Antigua and Barbuda, Argentina, Australia, the Bahamas, Belgium, Bermuda, the British Virgin Islands, Canada, the Cayman Islands, the Czech Republic, Denmark, the Faroe Islands, Finland, France, Germany, Greenland, Iceland, Mexico, Norway, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Spain, Sweden, the United Kingdom and the United States.

Aruba is recognized by the Organisation for Economic Co-operation and Development as a jurisdiction that has substantially implemented the internationally agreed tax standard and, as such, is approved-listed.

A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30 (a)
Branch Tax Rate (%)	30
Withholding Tax (%)	
Dividends	
Franked	0 (b)
Unfranked	30 (c)
Conduit Foreign Income	0 (d)
Interest	
General	10 (e)
Interest Paid by Australian Branch of Foreign Bank to Parent	5 (f)
Interest (Debentures, State and Federal Bonds and Offshore Banking Units)	0 (g)
Royalties from Patents, Know-how, etc.	30 (h)
Construction and Related Activities	5 (i)
Fund Payments from Managed Investment Trusts	15 (j)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0 (k)
Carryforward	Indefinite

(a) A 25% company tax rate applies to eligible companies with less than AUD50 million of turnover.
(b) Franking of dividends is explained in Section B.
(c) This is a final tax that is imposed on payments to nonresidents only. A reduced rate (in recent treaties, reduced rates typically are 0%, 5% or 15%, depending on the level of ownership) applies to residents in treaty countries.
(d) An exemption from dividend withholding tax applies to the part of the unfranked dividends that is declared in the distribution statement to be conduit foreign income.
(e) In general, this is a final withholding tax that is imposed on payments to nonresidents only. However, withholding tax is imposed in certain circumstances on interest paid to residents carrying on business overseas through a

permanent establishment (branch). Modern Australian tax treaties exempt certain government and unrelated financial institutions from withholding tax.

(f) Interest paid by an Australian branch of a foreign bank to its parent is subject to a rate of 5% on the notional interest rate based on a reasonable proxy rate in lieu of the London Interbank Offered Rate (LIBOR).

(g) Unilateral exemptions from interest withholding tax are provided for certain publicly offered debentures and for state and federal government bonds. Concessional taxation of offshore banking units (OBUs) ceased on 30 June 2023, and the withholding tax exemption for OBUs was removed from 1 January 2024.

(h) In general, this is a final withholding tax imposed on royalties paid to nonresidents. A reduced rate may apply to residents of treaty countries (the rate is 5% in recent treaties).

(i) The filing of an Australian tax return to obtain a refund may be required if this withholding results in an overpayment of tax. A variation of the rate to mitigate the adverse cash flow impact is available to certain taxpayers that have previously filed tax returns in Australia.

(j) Managed investment trusts that hold only energy-efficient commercial buildings constructed on or after 1 July 2012 may be eligible for a 10% withholding tax rate.

(k) The temporary tax loss carryback tax offset (notionally carry back eligible tax losses incurred in the 2020, 2021, 2022 or 2023 income years to offset taxable income in 2019 or later years) has ceased.

B. Taxes on corporate income and gains

Corporate income tax. An Australian resident corporation is subject to income tax on its non-exempt worldwide income. A nonresident corporation is subject to Australian tax only on Australian-source income.

Corporations incorporated in Australia are residents of Australia for income tax purposes, as are foreign corporations carrying on business in Australia with either their central management and control (CMAC) in Australia or their voting power controlled by Australian residents.

Current guidance from the Australian Taxation Office (ATO) suggests that foreign companies with Australian CMAC might also be carrying on a business in Australia. Extensive scenarios cover the application of the CMAC test for foreign-incorporated companies; relevant factors include the high-level decision-making process of the boards, virtual decision-making and evidence of the decision-making.

In response to the uncertainty created by the ATO's interpretation, the previous government had committed to amend the law to treat a company incorporated offshore as an Australian tax resident if both the company's core commercial activities are undertaken in Australia and CMAC are in Australia, creating a "significant economic connection to Australia." There has been no progress in developing enabling legislation, which is creating uncertainty, but taxpayers were to have the option of applying the new law from 15 March 2017. A transitional period to preserve nonresident status for certain foreign companies when they have been impacted in their efforts to change their governance arrangements to align with the ATO's approach ceased on 30 June 2023.

For corporations, capital gains are taxed at the relevant corporate income tax rate.

Income of a nonresident corporation not operating in Australia through a permanent establishment may be subject to withholding tax, as discussed below.

Rates of corporate tax. The standard tax rate for resident corporations is 30%.

A 25% rate applies to base rate entities. These are defined as corporate tax entities with no more than 80% of their assessable income being passive income and with an aggregate turnover of less than AUD50 million.

Resource taxation

Petroleum resources. The Petroleum Resource Rent Tax (PRRT) is imposed at a rate of 40% on project profits from the extraction of non-renewable petroleum resources. The PRRT applies to offshore petroleum projects in Commonwealth waters. Onshore petroleum projects can reduce taxpayer's PRRT liabilities for offshore projects because of the transfer of exploration expenditure. A bill has been introduced into parliament that will place a cap on the amount of PRRT deductions claimed equal to 90% of PRRT assessable receipts for that year (2023-24 budget announcement). The government has consulted on an exposure draft law for further proposed changes, including changes with respect to PRRT anti-avoidance rules and tolling arrangements.

Minerals exploration. The Junior Minerals Exploration Incentive (JMEI) enables eligible companies to generate tax credits by giving up a portion of their tax losses from greenfield mineral exploration expenditure, which can then be distributed to shareholders. Tax credits can only be generated for shares of stock issued in that income year. The scheme applies until 30 June 2025, and the Australia-wide credit limit is AUD27.15 million in 2023-24 and AUD29.77 million for 2024-25.

Costs of acquiring exploration rights or information first used for exploration that are not eligible for an immediate deduction are depreciated over the lesser of 15 years or the effective life of the mine.

Carbon-pricing mechanism. Effective from 1 July 2014, the previous carbon-pricing mechanism was replaced by a Direct Action Plan, which included implementation of certain government Emissions Reduction Funds.

Capital gains

Income and capital gains. Australia's tax law distinguishes income (revenue) gains and losses from capital gains and losses, using principles from case law. Broadly, capital gains and losses are not assessable or deductible under the ordinary income tax rules.

However, the capital gains tax (CGT) provisions in the tax law apply to gains and losses from designated CGT events. For corporations, capital gains are taxed at the relevant corporate income tax rate. Designated CGT events include disposals of assets, grants of options and leases, and events arising from the tax-consolidation rules (see Section C).

For CGT purposes, capital gains are calculated by identifying the capital proceeds (money received or receivable or the market value of property received or receivable) with respect to the CGT event and deducting the cost base. CGT gains are reduced by amounts that are otherwise assessable.

Special rules apply to assets acquired before 20 September 1985.

CGT deferrals (rollovers). CGT rollover relief may be elected for various transfers, restructures and takeovers, including scrip takeovers. The effect of the relief is to defer taxation until a subsequent disposal or CGT event, if further rollover relief is not available. Transfers within a tax-consolidated group are ignored for tax purposes (see Section C). The Australian Board of Taxation has finalized its review of CGT rollovers and submitted a report to the government advising on legislative reform in 2022. However, at the time of writing, there had not yet been a government response.

Capital losses are deductible only from taxable capital gains; they are not deductible from ordinary income. However, ordinary or trading losses are deductible from net taxable capital gains.

Foreign residents and CGT. Foreign residents are subject to CGT if an asset is "taxable Australian property," which includes broadly the following:

- Taxable Australian real property: real property located in Australia including a leasehold interest in land, or mining and quarrying or prospecting rights, if the minerals, petroleum or quarry materials are located in Australia.
- Indirect Australian real property interest: broadly, a non-portfolio interest in an Australian or foreign entity if more than 50% of the market value of the entity's assets relates to assets that are taxable Australian real property. Integrity rules to prevent the double counting of intercompany assets apply to consolidated and multiple-entry consolidated groups (see *Tax consolidation* in Section C).
- The business assets of an Australian permanent establishment.

Purchasers obligation to make a non-final withholding to support foreign resident CGT regime. Purchasers are required, broadly, to make a non-final 12.5% foreign resident CGT withholding with respect to the purchase of certain direct or indirect taxable Australian property from foreign residents. The obligations apply to direct real property transactions with a value of AUD750,000 or more, to certain indirect property transactions including company and trust interests and to options and rights to acquire such property or interests. Australian resident vendors of direct property must provide an ATO clearance certificate to not be subject to withholding. The Australian government has announced proposed changes to increase the foreign resident CGT withholding rate to 15% and to remove the threshold from 1 January 2025. These rules must be factored into all acquisition and disposal processes and allow for rate variations and declarations in some cases.

CGT participation exemption for disposals of shares in foreign companies. The capital gain or capital loss derived by a company from the disposal of shares in a foreign company may be partly or wholly disregarded to the extent that the foreign company has an underlying active business, if the holder company held a direct voting interest in the foreign company of at least 10% for a period of at least 12 months in the 2 years before the disposal. This participation exemption can also reduce the attributable income arising from the disposal of shares owned by a controlled foreign company in another foreign company (see Section E).

Venture capital. Venture capital investment concessions provide a 20% nonrefundable tax offset on investments in eligible innovation companies, capped at AUD200,000 per investor per year and a CGT exemption up to 10 years (provided that investments are held for at least three years).

Investors receive a 10% nonrefundable tax offset on capital invested in registered Early Stage Venture Capital Limited Partnerships (ESVCLPs).

Startup financial technology businesses can also access the venture capital investment tax concessions.

Administration. The Australian tax year ends on 30 June. For corporate taxpayers with accounting periods ending on other dates, the tax authorities may agree to use a substituted accounting period (SAP).

In general, companies with an income year-end of 30 June must file an annual income tax return by the following 15 January. Companies granted permission to adopt an SAP must file their returns by the 15th day of the 7th month after the end of their income year.

Under a pay-as-you-go installment system, companies with turnover of AUD20 million or less continue to make quarterly payments of income tax within 21 days after the end of each quarter of the tax year. The amount of each installment is based on the income earned in the quarter. The installment obligations for larger companies with turnover in excess of AUD20 million involve monthly payments.

Measures affecting certain corporate tax entities with respect to public disclosures of their tax positions and their tax-governance processes are outlined below.

ATO reporting of selected tax data for larger companies. The ATO is required to publicly report selected tax data for all corporate entities paying PRRT and selected income tax data for large corporate entities (with total income equal to or exceeding AUD100 million for the income year based on information reported to the Commissioner of Taxation in the entity's relevant return for the tax year). The ATO reports are made, broadly, in December and cover the data for the tax returns filed in the year ended 30 June of the preceding year. Some companies might want to consider supplementary disclosures in their own communications channels.

Voluntary Tax Transparency Code. The Australian government encourages larger companies to adopt a Voluntary Tax Transparency Code (TTC) to promote public understanding of businesses' compliance with Australia's tax laws. The TTC, developed by the Board of Taxation, is a set of principles and minimum standards to guide disclosure of tax information by businesses. The disclosures vary by companies' size, with larger businesses to consider, in addition to reconciliations of accounting to tax aggregates, their tax policy, strategy, governance, total tax contribution and foreign related-party dealings. Business groups are encouraging companies to consider compliance, and

over 200 companies and entities are listed on the public register of signatories.

Disclosure of subsidiary information. The Australian government has introduced into parliament a bill proposing that listed and unlisted public companies must disclose additional information on their subsidiaries, including their country of tax residency in their financial statements, from financial years commencing on or after 1 July 2023.

ATO register of foreign ownership of assets. The Register of Foreign Ownership of Australian Assets is a new register that will record foreign interests in most Australian land, entities, businesses and assets, from 1 July 2023.

Public beneficial ownership register. The Australian government announced, as an election commitment, to implement a public register of beneficial ownership of companies and other legal vehicles (trusts and partnerships). The government has consulted on the phased implementation of the beneficial ownership register, commencing with reporting beneficial ownership information of companies.

Some companies to file General Purpose Financial Statements. Significant global entity companies (global turnover greater than AUD1 billion) with an Australian presence that do not file General Purpose Financial Statements (GPFS) with the Australian Securities and Investments Commission (ASIC) are required to file GPFS with the ATO. The ATO is then required to forward such GPFS to the ASIC. GPFS obligations apply to a narrower "country-by-country reporting entity" subset of significant global entities (SGEs; see Section E).

Payment Times Reporting Scheme. From 1 January 2021, the Payment Times Reporting Scheme imposes a mandatory reporting requirement for large businesses to disclose their payment terms and practices with small business suppliers. This scheme broadly applies to entities with a total income of AUD100 million or more, and entities may also voluntarily elect to register and report under the scheme.

ATO New Investment Engagement Service. Starting 1 July 2021, the ATO introduced the New Investment Engagement Service (NIES), an investor-initiated service for businesses planning significant new investments in Australia.

Sharing Economy Reporting Regime. An operator of an electronic distribution platform (EDP) will be required to report certain transactions under the Sharing Economy Reporting Regime (SERR). The SERR applies to both Australian and non-resident EDPs. EDPs will be required to report information on supplies for consideration that are connected with the indirect tax zone and made through the platform. EDPs will need to report on a six-month basis transactions relating to the following starting from the specified date:

- The supply of taxi travel (including ride-sourcing and ride-sharing): from 1 July 2023
- Short-term accommodation: from 1 July 2023

- All other reportable transactions, such as asset sharing and food delivery: from 1 July 2024

Changes to Commonwealth penalty unit amount. From 1 July 2023, the amount of each Commonwealth penalty unit (CPU) increased from AUD275 to AUD313. This increase applies to offenses committed on or after 1 July 2023. The amount of each CPU will be indexed every three years based on the consumer price index. Penalties are increased when they apply to SGEs. On 13 December 2023, the government announced a proposal to further increase the penalty unit to AUD330, but this is not yet law.

Dividends. Dividends paid by Australian resident companies are franked with an imputation credit (franking credit) to the extent that Australian corporate income tax has been paid by the company on the income being distributed. Tax rules constrain companies from streaming imputation credits to those shareholders that can make the most use of the credits, at the expense of other shareholders.

A company may select its preferred level of franking with reference to its existing and expected franking account surplus and the rate at which it franked earlier distributions. However, under the "benchmark rule" for private companies, all distributions made within a franking period must generally be franked to the same extent.

The franking credit is intended to equal the tax paid by the paying company. For base rate entities benefiting from the reduced corporate rate, the imputation rules require them to determine whether they frank at 25% or 30%, based on the prior year's passive income and aggregated turnover.

A New Zealand company may choose to maintain an Australian franking account and attach Australian franking credits to dividends paid to Australian resident shareholders, for Australian company tax paid on that income.

The consequences of receiving a franked dividend vary depending on the nature of the recipient shareholder.

Resident corporate shareholders. Franked distributions received by resident companies from other Australian resident companies are effectively received free from tax. A recipient company receiving franked distributions grosses up the dividend amount received by the amount of its franking credit, and includes the grossed-up amount in its assessable income. The recipient company is entitled to a tax offset (rebate) equal to the amount of the franking credit on the distribution received; the offset may be used against its own tax payable. In addition, the recipient company is allowed a franking credit in its own franking account; the franking credit may be distributed to its own shareholders.

A resident company is subject to tax on unfranked dividends received, but special rules apply for certain income passed to nonresident shareholders (see *Nonresident shareholders: corporate and non-corporate*).

If a company's entitlement to a tax offset exceeds its tax payable, it can convert the excess franking offset into an equivalent amount

of tax loss. The tax loss may then be carried forward indefinitely for deduction in subsequent years.

Resident individual shareholders. The shareholder includes the dividend received plus the full imputation credit in assessable income. The imputation credit can be offset against personal tax assessed in the same year. Excess credits relating to dividends received are refunded to the shareholder.

Nonresident shareholders: corporate and non-corporate. Issues relevant to dividends and foreign shareholders include the following:

- Franked dividends paid to nonresidents are free from dividend withholding tax.
- Refunds of imputation credits are not available for nonresidents.
- A deduction may be available under dividend flow-through rules if an Australian company wholly owned by a nonresident company receives unfranked non-portfolio dividends (from holdings of at least 10% of the voting power in the company paying the dividends) and pays an unfranked non-portfolio dividend to its nonresident parent. Various conditions must be satisfied, and anti-avoidance rules apply.
- "Conduit foreign income" that flows through Australian companies to foreign investors may also achieve flow-through treatment. Broadly, "conduit foreign income" is foreign-source income earned by an Australian company that is not taxed in Australia. A conduit income distribution that an Australian corporate tax entity makes to a foreign resident is not subject to dividend withholding tax and is not assessable income, to the extent that the entity declares it to be conduit foreign income.

Distributions funded by capital raisings. Following recent Royal Assent of legislation, distributions made on or after 28 November 2023 that are funded by certain capital raisings are unfrankable. The distribution is unfrankable if the following conditions are met:

- It is not consistent with the entity's established practice of making distributions.
- There has been an issue of equity interests.
- It is reasonable to conclude in the circumstances that the principal effect of the issue of any equity interests was to directly or indirectly fund part of the distribution or that any entity that issued or facilitated the issue of any equity interests did so for the purpose of funding the distribution or part of the distribution.

Aligning tax treatment of off-market share buy-backs with on-market buy-backs. Off-market share buy-backs (OMSBB) and selective share cancellations undertaken by listed public companies that are first announced to the market after 25 October 2022 will be treated the same as on-market buy-backs such that no part of the buy-back is taken to be a dividend. A franking debit arises in the franking account of the company that undertakes an OMSBB by an amount equal to the part of the buy-back price not debited to the company's share capital account.

Foreign tax relief. Australian residents are subject to Australian tax on their worldwide income, but they may receive a foreign income tax offset (FITO) for foreign taxes paid on foreign-source

income included in assessable income up to a cap. FITOs must be used in the year in which the related foreign-source income is included in assessable income. Otherwise, they are lost without having provided any relief from double taxation. For controlled foreign companies (CFCs; see Section E), a modified system applies.

C. Determination of trading income

General. Taxable income is defined as assessable income less deductions. Assessable income includes ordinary income and statutory income (specifically listed in the tax law as being assessable income). Non-cash business benefits may be included as income in certain circumstances.

Australia's tax law distinguishes income (revenue) gains and losses from capital gains and losses, using principles from case law. Broadly, capital gains and losses are not assessable or deductible under the ordinary income tax rules; however, the CGT provisions in the tax law may apply (see Section B).

Broadly, the following types of income are not included in assessable income:

- Profits from foreign branches of Australian companies (other than, broadly, income that would be attributable under the CFC rules, see Section E).
- Amounts paid out of income previously taxed under the CFC rules (see Section E).
- Foreign equity distributions received by Australian corporate entities on participation interests. This covers dividends or non-share dividends received from a foreign company with respect to an interest in a company classified as equity under Australian tax rules, subject to a 10% participation requirement. Such distributions received through interposed entities, such as trusts and partnerships, may now also be eligible.

Expenses. Losses or outgoings are deductible to the extent they are incurred in gaining or producing assessable income or are necessarily incurred in carrying on a business for the purpose of gaining or producing assessable income. Provisions for amounts not "incurred" (this term is not defined in the law) during the year, such as leave entitlements of employees, are generally not deductible until payments are made.

Expenses of a capital nature (except business black hole expenditure; see *Five-year deduction for black hole business expenditure*) and those incurred in the production of exempt income are not deductible. Apportionment of expenses having dual purposes is possible.

Fringe benefits tax (see Section D) is deductible. Entertainment expenses are not deductible unless they represent fringe benefits provided to employees. Penalties and fines are not deductible.

Under commercial debt forgiveness rules, the net amount of debts forgiven during an income year reduces the debtor's accumulated revenue tax losses, capital losses, certain undeducted expenditure and cost bases of assets.

Research and development. Eligible research and development (R&D) entities can claim an R&D tax offset for R&D expenditure.

Core and supporting R&D activities must be registered. Supporting R&D activities must be directly related to core R&D activities. Activities that result in the production of goods or services are eligible only if they are undertaken for the dominant (or sole) purpose of supporting the core R&D activity (the "dominant purpose" test).

Eligible R&D expenditure is a notional deduction, which is not deductible but gives rise to tax offsets.

For income years commencing on or after 1 July 2021, if notional deductions are between AUD20,000 and AUD150 million, the following are the R&D tax offsets:

- Companies with an aggregated turnover of less than AUD20 million may receive a refundable R&D tax offset equivalent to their corporate tax rate plus an 18.5% premium.
- Companies with an aggregated turnover of AUD20 million or more may receive a non-refundable R&D tax offset equivalent to their corporate tax rate plus an incremental premium. The incremental premium is based on R&D expenditure as a proportion of total expenditure for the year (R&D intensity).

There are two premium increments, which are the following:

- R&D intensity up to 2% allows for a tax offset equivalent to the company tax rate plus an 8.5% premium.
- R&D intensity exceeding 2% allows for a tax offset equal to the company tax rate plus a 16.5% premium.

If eligible expenditure exceeds AUD150 million for an income year, the tax offset is calculated using the company tax rate. If notional deductions for an income year are less than AUD20,000, the tax offset is only available if a registered service provider is used.

Australia's general anti-avoidance rules may apply to certain R&D schemes and there are complex claw-back rules.

R&D tax transparency. The ATO will publish certain information on the R&D claims reported to the ATO by R&D entities, with the first report to be published in 2024 to apply to companies that filed a company tax return with an R&D tax offset and their income year began on or after 1 July 2021.

Debt and equity classification. Specific debt-and-equity rules focus on economic substance rather than on legal form. If the debt test is satisfied, a financing arrangement is generally treated as debt, regardless of whether the arrangement could also satisfy the test for equity. The test is complex and extends well beyond an examination of whether a borrower has a non-contingent obligation to repay an amount of principal.

The debt or equity classification affects the taxation of dividends (including the imputation requirements), payments received from nonresident entities, thin-capitalization regime, dividend and interest withholding taxes and related measures, but does not limit the operation of the transfer-pricing rules.

Hybrid mismatch rules. Australia introduced a law to adopt the Organisation for Economic Co-operation and Development (OECD) hybrid mismatch rules for income years beginning on or after 1 January 2019. Broadly, they prevent entities liable to income tax in Australia from being able to avoid income taxation or obtain a double non-taxation benefit, by exploiting differences between the tax treatment of entities and instruments across different countries. However, the imported mismatch rule (other than when an importing payment is made under a structured arrangement) applies to income years beginning on or after 1 January 2020. Imported mismatches are mismatches whereby receipts are sheltered from tax directly or indirectly by hybrid outcomes elsewhere in a group of entities or a chain of transactions.

A targeted integrity rule seeks to prevent arrangements circumventing the hybrid mismatch rules by routing investment or financing into Australia via an entity located in a no- or low-tax (10% or less) jurisdiction.

Under the rules, an amount is "subject to foreign tax" if income tax is payable under a law of the foreign country with respect to the amount because the amount is included in the tax base of that law for the foreign tax period. This is also the case if income is included under a provision equivalent to Australia's controlled foreign company (CFC) rules (see *Controlled foreign companies* in Section E). However, as far as the US global intangible low-taxed income (GILTI) regime is concerned, the ATO maintains that the regime is not equivalent to Australia's CFC rules.

The ATO expects work to be undertaken to prove that the imported mismatch rules do not apply before a deduction can be taken for any payment made by Australia to foreign group entities and places a substantial burden of proof on taxpayers to demonstrate that an appropriate inquiry has been made to establish that no Australian payments have a nexus with an offshore hybrid mismatch (between non-Australian entities). The ATO has released final guidance providing taxpayers with a risk-zone framework ranging from white zone (the ATO has provided clearance), through green (low risk) to red (very high risk). Taxpayers may be required to self-assess the risk of the imported hybrid mismatch rule.

Financial arrangements. Extensive rules deal with the taxation of "financial arrangements" (as defined) for specified taxpayers.

The default methods are accruals and realization methods. These are supplemented by various methods available at a taxpayer's election, using accounting approaches with respect to certain financial arrangements. The elective accounting methods include hedge treatment, fair-value reporting, retranslation for foreign-currency arrangements and, in certain cases, use of the values in financial reports for the financial arrangements.

Individuals are not mandatorily covered by these rules. Superannuation entities must apply the rules if the value of their assets exceeds AUD100 million. Approved deposit-taking institutions or securitization vehicles must apply the rules if their aggregate turnover exceeds AUD20 million. All other entities must

apply the rules if either their aggregate turnover exceeds AUD100 million or if the value of their assets exceeds AUD300 million. Taxpayers not covered by the rules can nevertheless elect to apply the rules.

Foreign-exchange gains and losses. Rules for the tax treatment of foreign-currency gains and losses provide broadly the following:

- Foreign-currency gains and losses are brought to account when realized, regardless of whether an actual conversion into Australian currency occurs.
- Foreign-currency gains and losses generally have a revenue character.
- Specific translation rules apply to payments, receipts, rights and obligations denominated or expressed in a foreign currency.
- Functional-currency rules allow an entity that operates predominantly in a foreign currency to determine its income and expenses in that currency, with the net results being translated into Australian currency for the purposes of calculating its Australian income tax liability.

Inventories. In determining trading income, inventories may be valued at cost, market-selling value (the current selling value of an article of trading stock in the taxpayer's trading market) or replacement price, at the taxpayer's option. The last-in, first-out (LIFO) method may not be used. If the cost method is elected, inventories must be valued using the full-absorption cost method.

Bad and doubtful debts. Provisions for doubtful trading debts are not deductible until the debt, having been previously brought to account as assessable income, becomes bad and is written off during an income year.

Capital allowances (depreciation)

Uniform capital allowance regime. Capital allowance rules allow a deduction for the decline in value of a "depreciating asset" held during the year.

A "depreciating asset" is an asset with a limited effective life that may be expected to decline in value over the time it is used. Land, trading stock and intangible assets are not specifically included in the regime because they are not considered to be depreciating assets.

The depreciation rate for a depreciating asset depends on the effective life of the asset. Taxpayers may choose to use either the default effective life determined by the tax authorities or their own reasonable estimate of the effective life. A taxpayer may choose to recalculate the effective life of a depreciating asset if the effective life that was originally selected is no longer accurate because of market, technological or other factors.

Taxpayer re-estimation of effective life is not available for certain intangible assets; the law prescribes their effective lives (for example, 15 years for registered designs or 20 years for standard patents). Statutory life caps that result in accelerated rates are provided for certain assets used in the oil and gas, petroleum, agricultural, and transport industries, as well as for Australian-registered ships.

Taxpayers may choose the prime cost method (straight-line method) or the double diminishing value method (200% of the straight-line rate) for calculating the tax-deductible depreciation for all depreciating assets except intangible assets. For certain intangible assets, the prime cost method must be used.

The cost of a depreciating asset is generally the amount paid by the taxpayer plus further costs incurred while the taxpayer holds the asset. The depreciable cost of a motor car is subject to a maximum limit of AUD68,108 for the 2023-24 income year.

Pooling of assets may be chosen for pool assets costing more than AUD300 but less than AUD1,000 as well as assets that have been depreciated to less than AUD1,000. The pool balance is depreciable at a rate of 37.5% (18.75% for additions during the year), applying the declining-balance method. If the choice is not exercised, the relevant assets are depreciated based on their respective effective lives.

Software development expenditure may be allocated to a software development pool. Beginning in the year following the year of the expenditure, the expenditure is deductible at a rate of 30% per year for three years, followed by a 10% rate in the final year.

The temporary full expensing of depreciating assets measure, which broadly allowed eligible businesses to deduct the full cost of eligible depreciating assets first used or installed ready for use for a taxable purpose (and certain capital improvements) ceased on 30 June 2023. A new instant asset write-off is proposed for small businesses, with aggregate turnover of less than AUD10 million, for assets costing less than AUD20,000 between 1 July 2023 and 30 June 2024.

Construction of buildings. Capital expenditure on the construction of buildings and structural improvements may be eligible for an annual deduction of either 2.5% or 4% of the construction expenditure, depending on the type of structure and the date on which construction began.

Disposals of depreciable assets. For assets other than buildings, if the proceeds received on the disposal of an asset exceed its adjustable value, the excess is included in taxable income. If the proceeds received on the disposal of an asset are less than its adjustable value, a deductible balancing adjustment is allowed.

Five-year deduction for black hole business expenditure. Certain types of business expenditure of a capital nature may be deducted under the capital allowance regime to the extent that the expenditure is not taken into account elsewhere in the income tax law and is not expressly nondeductible for tax purposes. This type of expenditure is known as "black hole business expenditure." The deduction is available on a straight-line basis over five years. Expenditure qualifying for the deduction includes expenditure to establish or alter a business structure, expenditure to raise equity and expenditure in an unsuccessful takeover attempt or takeover defense. Eligible small business taxpayers are entitled to an immediate deduction for certain startup costs.

Relief for losses. Tax losses may be carried forward indefinitely against assessable income derived during succeeding years. A loss is generated after adding back net exempt income.

To claim a deduction for past losses, companies must satisfy either a continuity of ownership test (more than one-half of voting, dividend and capital rights) or a continuity of (same or similar) business test. A modified continuity of ownership test applies to widely held companies. The modified rules simplify the application of the continuity test by making it unnecessary to trace the ultimate owners of shares held by certain intermediaries and small shareholdings. An alternative, more flexible "similar business test" is available with respect to losses incurred in income years beginning on or after 1 July 2015.

Losses are generally not transferable to other group members other than within a tax-consolidated group (see *Tax consolidation*).

A temporary loss carryback measure, which allowed corporate tax entities the option to claim a carryback tax offset in their 2020 or 2021 income tax return, ended on 30 June 2023.

Designated infrastructure projects loss concessions. Companies that only carry on activities for certain designated infrastructure projects are not required to test the recoupment of losses incurred in the 2012–13 and following income years under the continuity of ownership or same business tests. The losses are also increased by the long-term government bond rate. Projects must have been designated by Infrastructure Australia by 30 June 2018, and a cap of AUD25 billion on the value for all projects applies.

Tax consolidation. Tax consolidation is available for groups of wholly owned companies and eligible trusts and partnerships that elect to consolidate. Australian resident holding (head) companies and their wholly owned Australian resident subsidiary members of the group are taxed on a consolidated basis. Consolidation is desirable because no grouping concessions (such as the ability to transfer losses to other group members) are otherwise provided.

The head company becomes the taxpayer, and each subsidiary member of the group is treated as if it were a division of the head company. Transactions between members of a consolidated group are generally disregarded for Australian income tax purposes. The head company assumes the income tax liability and the associated income tax compliance obligations of the group.

Tax consolidation is also available for Australian entities that are wholly owned by a single foreign holding company. The resulting group is referred to as a multiple-entry company (MEC) group, which includes the Tier-1 companies (Australian resident companies directly owned by a foreign member of the group) and their wholly owned Australian resident subsidiaries. A Tier-1 company is selected as the head company. The types of entities that may be subsidiary members of an MEC group are generally the same as those for a consolidated group.

The consolidation rules are very significant for merger and acquisition and restructuring transactions. If a tax consolidated group acquires a "joining entity," the tax cost base of the underlying assets of the joining entity is reset, under complex rules, which can affect the tax treatment of those assets (including the calculation of any tax deductions with respect to such assets). If an entity leaves a consolidated group, the group's cost base of shares in

the leaving entity is reset under specific exit rules. MEC groups are subject to cost base pooling rules to determine the cost base of shares in Tier-1 companies.

The tax-consolidation rules have been subject to various complex ongoing changes affecting ongoing tax positions.

Demergers. Tax relief is available if eligible company or fixed-trust groups divide into two separately owned entities. The demerging company (or fixed trust) must dispose of at least 80% of its ownership interests in the demerged entity, and the underlying ownership interests must not change because of the demerger. The rules provide investors optional CGT rollover relief, as well as dividend exemptions, which are available at the option of the demerging entity. The demerger group is also provided with limited CGT relief.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and services tax	10
Fringe benefits tax on non-cash employee benefits	47
Payroll taxes paid by employers (vary by state)	4 to 6.85

Customs duty is levied on imports of various products into Australia. Other significant taxes include stamp duty and land tax.

E. Miscellaneous matters

General anti-avoidance regime. Australia's general income tax anti-avoidance regime (GAAR, or Part IVA) has been expanded by the following measures focused at significant multinational businesses:

- Multinational Anti-Avoidance Law targeting certain schemes to avoid Australian permanent establishments
- Diverted Profits Tax targeting certain international schemes with insufficient economic substance

Part IVA generally applies if, taking into account eight specified matters, it is determined that the dominant purpose of the parties entering into a scheme was to enable the taxpayer to obtain a tax benefit. If the Commissioner of Taxation makes a Part IVA determination, the tax benefit is denied, and significant penalties may be imposed.

The Australian government announced in the 2022-23 Federal Budget that the Part IVA rules will be amended to expand the scope of the rule to apply to the following:

- Schemes that reduce tax paid in Australia by accessing a lower withholding tax rate on income paid to foreign residents
- Schemes that achieve an Australian tax benefit even if the dominant purpose of the scheme was to reduce foreign income tax

The proposed amendments will apply to income years commencing on or after 1 July 2024, regardless of whether the scheme was entered into before that date.

Broader significant global entity definition. Several anti-avoidance and penalty regimes outlined below apply only to SGEs, which broadly are entities with global turnover greater than AUD1 billion. When the SGE definition was broadened from 1 July 2019 to also apply to groups of entities headed by an entity other than a listed company, a "country-by-country reporting entity" became a narrower subset to the SGE definition.

Multinational Anti-Avoidance Law. The Multinational Anti-Avoidance Law (MAAL) expands Part IVA and, broadly, allows the Commissioner of Taxation to potentially target schemes entered into by SGEs if all of the following apply:

- A foreign entity makes a supply of certain goods or services to an Australian customer.
- Activities are undertaken directly in Australia in connection with the supply by an Australian entity or permanent establishment that is an associate of or commercially dependent on the foreign entity.
- The foreign entity making the supply derives income, some or all of which is not attributable to an Australian permanent establishment of the foreign entity.
- Taking into account the relevant factors, it can be concluded that a principal purpose of the transaction is the enabling of a relevant taxpayer to obtain an Australian tax benefit and/or reduce tax liabilities arising under foreign law, including some deferrals of foreign taxes. A principal purpose is a lower threshold than the dominant purpose discussed in *General anti-avoidance regime*. Relevant factors include the role of the parties in the value chain and their capacity, staffing and resources to carry out their designated functions (to distinguish the parties from insubstantial parties).

Diverted Profits Tax. The Diverted Profits Tax (DPT) expands Part IVA. Under the DPT, if SGEs divert certain profits from Australia and the Commissioner of Taxation issues a DPT assessment, the tax payable on the amount of the diverted profits is subject to a penalty rate of 40%. The DPT applies, broadly, if the following conditions are satisfied:

- The relevant Australian entity or permanent establishment is an SGE for the year of income.
- A scheme exists, and the Australian taxpayer obtains a tax benefit in connection with the scheme (considering reasonable alternative situations).
- A foreign entity that is an associate of the relevant taxpayer entered into the scheme or is otherwise connected to the scheme.
- It is concluded that the scheme (or any part of a scheme) was carried out for a principal purpose of enabling the relevant taxpayer (and/or associate) to obtain a tax benefit, or both to obtain a tax benefit and reduce a foreign tax liability of an associate.

Exclusions apply if it is concluded that one of the following tests applies:

- The relevant Australian entity has income of less than AUD25 million.
- The increase of the foreign tax liability is equal to or exceeds 80% of the tax that would have otherwise been paid in Australia.

- The profit derived by each covered entity reasonably reflects the economic substance of the entity's activities in connection with the scheme.

A limited exclusion applies for some entities that carry on predominantly passive activities (for example, managed-investment trusts, pension funds, sovereign-wealth funds and selected collective-investment vehicles). Extensive ATO protocols and approvals are required to be met before the issuance of a DPT assessment.

Transfer pricing. Australia's transfer-pricing rules, updated in recent years, include measures to ensure that Australian taxable income associated with cross-border transactions is based on arm's-length prices. Several methods for determining the arm's-length price are available. The ATO provides guidance in a binding tax ruling on the appropriate methods, and taxpayers can enter into Advance Pricing Arrangements.

For transactions with parties entitled to benefit from foreign tax treaties, the law confirms the ATO view that Australia's tax treaties provide a separate and unconstrained transfer pricing taxing power.

The OECD transfer-pricing guidance material is incorporated into domestic law.

Australia's transfer-pricing rules are integrated into the self-assessment regime and require broad and timely documentation. The risk of transfer-pricing adjustments is magnified for companies that are involved in significant intragroup financing arrangements or business restructurings or that have losses or low levels of profits. Significant aspects include the following:

- The onus is on the taxpayer who signs the income tax return to confirm that the actual conditions are in line with arm's-length conditions. If the actual and arm's-length conditions do not align and if a transfer-pricing benefit is received, the taxpayer must adjust taxable income, tax losses or other tax attributes. Penalties apply for a false or misleading statement.
- As a basic rule, the arm's-length conditions should be based on the form and substance of the actual commercial or financial relations. However, documentation must address reconstruction, which refers to situations in which the transactions or arrangements actually entered into are ignored and (in some cases) other transactions or arrangements are substituted.
- Taxpayers are treated as not having a reasonably arguable position with respect to any international related-party transaction that is not appropriately documented at the time of the filing of the tax return. A transfer-pricing adjustment with respect to such undocumented transactions attracts a penalty of at least 25%. The penalties are doubled for income years beginning on or after 1 July 2015 for tax-avoidance and profit-shifting schemes, with respect to groups that have global turnover of greater than AUD1 billion. It is essential that appropriate transfer-pricing documentation be in place to have a reasonably arguable position.
- Adjustments can only be within seven years of the date on which the ATO gives the notice of assessment.

For business income tax returns, the International Dealings Schedule requires detailed disclosures designed to flag potential risk areas.

ATO transfer pricing practical compliance guides and risk ratings. The ATO strongly emphasizes transfer-pricing issues in relation to international business transactions. It has issued practical compliance guidelines (PCGs), which cover numerous cross-border transactions, to assist taxpayers in identifying if their conditions and pricing are likely to have a low risk of ATO examination (green zone) through to a high risk of ATO scrutiny (red zone). PCGs cover related-party debt including derivatives, offshore marketing, non-core procurement and shipping hubs, as well as inbound distribution arrangements.

Base and Erosion and Profit Shifting 2.0 Pillar Two. As part of the 2023-24 budget, the Australian government announced that it will implement key aspects of Base Erosion and Profit Shifting (BEPS) 2.0 Pillar Two for multinational groups with turnover greater than EUR750 million. The Income Inclusion Rule (IIR) applies to income years starting on or after 1 January 2024 and Global Domestic Minimum Tax (QDMTT) applies from 1 January 2024. The Undertaxed Profits Rule (UTPR) will apply from 1 January 2025. The proposed law had not yet been released as of 1 March 2024. For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (https://www.ey.com/content/dam/ey-unified-site/ey-com/en-gl/services/tax/documents/beps-2-0-pillar-two-developments-tracker.pdf)

Country-by-country reporting. "Country-by-country reporting entities," a subset of SGEs, are required to prepare and file the following with the ATO:

- A Country-by-Country Report (CbCR) in line with the OECD standards
- A Master File in line with the OECD standards
- A Local File with requirements that include providing electronic copies of related-party agreements

Proposed public CbCR. On 12 February 2024, Australian Federal Treasury released a revised Exposure Draft Bill for consultation on mandatory public disclosures of country-by-country (CbC) and other tax information on a jurisdictional basis for Australia and designated tax jurisdictions with disclosure for other jurisdictions allowed on an aggregate basis. Reporting will apply to reporting periods commencing on or after 1 July 2024 (note that the application has been deferred by a year). The measures will apply to CbC reporting parents if the entity or another member of the CbC reporting group is either an Australian resident or a foreign resident that operates an Australian permanent establishment or branch with local operations. The filing obligation applies to the global parent entity regardless of whether that entity is Australian or foreign.

Increased penalties for SGEs. Increased penalties for SGEs are calculated by multiplying the base penalty amount by 500. Although these heavy penalties were introduced to ensure compliance with new GPFS requirements (see *Requirement for some companies to file General Purpose Financial Statements* in Section B) or the filing of documents required for CbCR, they

can also apply to failure to file any ATO-approved form required to be filed by an SGE (for example, a tax return or activity statement), subject to ATO discretion to remit penalties. For example, an SGE filing an income tax return up to 28 days late risks a late filing penalty of AUD156,500, or up to AUD782,500 if it is more than 112 days late (applying applicable penalty unit rate of AUD313 as of 1 March 2024).

Debt-to-equity (thin-capitalization) rules. Thin-capitalization measures apply to limit debt deductions of Australian operations of multinational groups (including foreign and domestic related-party and third-party debt). In addition, the transfer-pricing measures may affect the deductions available.

Thin-capitalization. The thin-capitalization measures apply to the following:

- Foreign-controlled Australian entities and foreign entities that either invest directly into Australia or operate a business through an Australian branch
- Australian entities that control foreign entities or operate a business through an overseas branch

Current legislated rules proposed to be repealed. The following is a brief listing of the current thin-capitalization rules (but note the proposals discussed in *Proposed changes to thin-capitalization rules* to replace them for years starting on or after 1 July 2023):

- Debt deductions are partially denied if the company's adjusted average debt exceeds the maximum allowable debt.
- In most cases, the maximum allowable debt is calculated by reference to the safe harbor debt amount. The safe harbor debt amount approximates a debt-to-equity ratio of 1.5:1 (or 60% debt-to-total-assets ratio). Separate methodologies apply to financial institutions or consolidated groups with at least one member classified as a financial entity.
- Taxpayers can also determine the maximum allowable debt by reference to an arm's-length debt amount that is based on what amount an independent party would have borrowed from an independent lender. This determination requires the consideration of several factors.
- Certain inward investors can also determine the maximum allowable debt of an Australian entity by reference to the group's worldwide gearing debt amount.
- The thin-capitalization measures restrict the use of multi-tiered gearing structures involving flow-through entities. The ownership threshold to be an "associate entity" is reduced in certain circumstances from 50% to 10% and, in determining the arm's-length debt amount, an entity is required to consider the debt-to-equity ratios of any entities in which the entity has a direct or indirect interest that are relevant to the considerations of an independent lender or borrower.
- The transfer-pricing provisions apply to the pricing of related-party debt, even if an arrangement complies with the thin-capitalization rules.
- The ATO can substitute a hypothetical arm's-length capital structure to set an arm's-length interest rate if the amount of debt is considered not to be arm's length, even if the taxpayer is within the thin-capitalization safe harbor debt levels.

Proposed changes to thin-capitalization rules. On 22 June 2023, the government introduced a bill into parliament to make proposed changes to the thin-capitalization rules for income years commencing on or after 1 July 2023. Proposed amendments to the bill were introduced in November 2023 and the measures are expected to be enacted by the end of the 2023-24 income year.

The proposed amendments include the following:

- The current asset-based rules for general class investors (non-financial entity or authorized deposit-taking institution [ADI]) will be replaced with the following three alternative new tests:
  - A default fixed ratio test based on 30% of tax earnings before interest, tax, depreciation and amortization (EBITDA), with certain adjustments (essentially replaces the safe harbor test)
  - A group ratio test (rather than the worldwide gearing test) by irrevocable election
  - A third-party debt test for general class investors and financial entities that are not ADIs by irrevocable election
- The fixed ratio test will allow the carryforward of denied deductions for up to 15 years if a modified continuity of ownership test or business continuity test is met.
- Accompanying changes will apply the transfer-pricing rules to the amount of the entity's debt not just whether the interest rate used is arm's length.
- For both the fixed ratio test and group ratio test, a "net debt deductions" definition will apply. The debt deduction definition will also be expanded.
- There will be limited exemptions for the following:
  - Certain outward investing entities (non-ADIs) in certain circumstances (90% of Australian assets test)
  - Certain insolvency remote special purpose entities
  - The debt deductions of the entity and its associates combined are AUD2 million de minimis

Existing special rules for ADIs and financial entities will remain. However, there will be some modifications to the definition of a financial entity and the arm's-length debt test will be replaced with the third-party debt test for financial entities that are not ADIs.

The bill also introduced an anti-avoidance rule to deny interest deductions related to certain debt-creation activities. From 1 July 2024, businesses will no longer be able to deduct interest expenses on related-party debt from debt creation related to the acquisition of CGT assets from associates or debt created to fund payments to associates (for example, dividends to associates). The debt-creation rules will apply before the thin-capitalization rules. There will be limited exemptions and exclusions and specific anti-avoidance rules designed to address schemes seeking to avoid the debt-creation rules. Once the rules commence, they may apply with respect to arrangements that occurred on or before and after 1 July 2024.

Proposed denial of interest deductions incurred to derive non-assessable non-exempt income. Proposals to remove interest deductions incurred to derive non-assessable, non-exempt (NANE) income (for example, dividends from foreign subsidiaries

and branch profits) from income years commencing on or after 1 July 2023 have been deferred and will be considered via a separate consultation process.

Proposed denial of deductions for payments relating to intangibles to low-tax jurisdictions. On 31 March 2023, the Australian Federal Treasury released an Exposure Draft Bill to introduce a rule that denies deductions for payments that an SGE (entity with global revenue of at least AUD1 billion) makes to its associates that is attributable to a right or permission to exploit an intangible asset if, due to the arrangement or a related arrangement, the associate directly or indirectly derives income from exploiting those or related intangible assets in a "low corporate tax jurisdiction." The proposed rule will apply to payments made after 1 July 2023. "Low corporate tax jurisdictions" captures the following:

- Foreign countries where the lowest corporate income tax rate applicable to the SGE is less than 15% (or nil)
- Foreign countries with a preferential patent box regime without sufficient economic substance (as determined by the Minister)

Proposed denial of deductions for shortfall interest charges and general interest charges. The Australian government proposed the denial of deductions to companies and individuals for shortfall interest charges (SICs) and general interest charges (GICs) incurred on or after 1 July 2025.

Cross-border related-party financing arrangements. ATO guidance sets out the ATO's compliance approach with respect to cross-border related-party financing arrangements. This guidance provides a self-assessment tool for taxpayers to determine their risk profiles, and the taxpayer determination must be disclosed broadly to the ATO. A second schedule to the guidance applies from 1 January 2019 and sets out 14 specific risk indicators for cross-border related-party derivative arrangements used to hedge or manage the economic exposure of a company or group of companies. A third schedule on outbound interest-free loans applies from 1 January 2020 (with no guidance for inbound interest-free loans). The final compliance approach to the thin-capitalization arm's-length debt test took effect from 1 January 2019, however, in practice the analytical approach and level of evidence outlined should guide prior years to meet the ATO's expectation. (Updates to the guidance are expected for the proposed changes to the thin-capitalization rules from 1 July 2023.)

Controlled foreign companies. A foreign company is a CFC if five or fewer Australian residents hold at least 50% of the company or have de facto control of it, or if a single Australian entity holds a 40% interest in the company, unless it is established that actual control does not exist.

The tainted income of a CFC is attributed to its Australian resident owners, which are required to include such income in their assessable income. In general, the tainted income of a CFC is its passive income and income from certain related-party transactions.

Income is generally not attributable if the CFC passes an active-income test. To pass this test, the CFC's tainted income may not exceed 5% of the CFC's gross turnover.

Whether an amount earned by a CFC is attributable to Australian residents depends on the country in which the CFC is resident. The CFC rules identify "listed countries," which have tax systems that are considered to be closely comparable to the Australian system. The following are the "listed countries:"

- Canada
- France
- Germany
- Japan
- New Zealand
- United Kingdom
- United States

All other countries are "unlisted countries."

Certain amounts are unconditionally attributed regardless of whether the CFC is resident in a listed or unlisted country.

If a CFC resident in a listed country fails the active-income test, its attributable income includes "adjusted tainted income," which is eligible designated concession income prescribed by the regulations on a country-by-country basis. This income includes items such as income subject to tonnage taxation or concessionally taxed capital gains.

If a CFC resident in an unlisted country fails the active-income test, its attributable income includes all of its adjusted tainted income, such as passive income (including tainted interest, rental or royalty income) and tainted sales or services income.

Income derived by a CFC is exempt from Australian income tax if it is remitted as dividends or non-share dividends made with respect to an interest in the company classified as equity under Australian tax rules to an Australian company.

Value shifting. A general value-shifting regime applies to counter certain transactions involving non-arm's-length dealings between associated entities that depress the value of assets for certain income tax and CGT purposes.

Withholding taxes. Interest, dividends and royalties paid to non-residents are subject to Australian withholding tax (also, see Section F for treaty withholding tax rates).

The 10% withholding tax rate on interest is generally the same as the rate prescribed by Australia's treaties (see Section F). However, modern treaties provide for a 0% rate for government and unrelated financial institutions. The interest paid by an Australian branch of a foreign bank to its parent is subject to a rate of 5% of the notional interest paid by the branch on internal funds of the foreign bank entity; the notional interest is limited by reference to reasonable proxy rates in lieu of the LIBOR. Unilateral exemptions from interest withholding tax are provided for certain publicly offered debentures and state and federal government bonds. From 2023-24, the taxable income of an OBU on its offshore borrowing activities is subject to the relevant corporate tax rate and the OBU withholding tax exemption is ceased from 1 January 2024. The ATO has expressed concerns about financing arrangements involving related-party foreign currency-denominated financing with related-party cross-currency interest rate swaps to reduce withholding taxes.

For dividends paid, the withholding tax rate of 30% applies only to the unfranked portion of the dividend. A reduced rate applies if dividends are paid to residents of treaty countries. An exemption from dividend withholding tax applies to the part of the unfranked dividends that is declared in the distribution statement to be conduit foreign income.

A final withholding tax at a rate of 30% is imposed on gross royalties paid to nonresidents. The withholding tax rate is typically reduced under a double tax treaty.

A concessional withholding tax regime applies to distributions by eligible managed investment trusts (MITs) to nonresidents, other than distributions of dividends, interest and royalties. The withholding tax rate is 30%, but a reduced 15% rate applies if the nonresident's address or place of payment is in a country that is listed in the regulations as an "information exchange country" (see *Countries listed as "information exchange countries"*). MITs that hold only newly constructed energy efficient commercial buildings may be eligible for a 10% withholding tax rate. It is proposed to extend the 15% MIT rate to payments with respect to investment in certain newly constructed residential build-to-rent projects from 1 July 2024.

The concessional MIT withholding tax rates are no longer available for certain cross-stapled structure income (see *Companies "stapled" to trusts and sovereign wealth funds*) and for funds with trading trust income or income from residential housing (other than "affordable housing" and under the proposed build-to-rent extension noted above) or agricultural land investments, from 1 July 2019, with transitional rules. In addition, new conditions apply when accessing foreign pension fund withholding tax exemptions and tax exemptions for sovereign wealth funds are codified and limited, also from 1 July 2019.

An optional attribution managed investment trust (AMIT) regime uses an "attribution model" to determine tax distributions from MITs that meet certain criteria. Specific rules deal with how this system interacts with withholding tax obligations.

Australian investment manager regime (IMR) rules allow certain foreign managed funds that have wide membership or use Australian fund managers, and their nonresident investors to qualify for income exemptions for certain income from qualifying investments (in particular, the income exemptions do not apply to income subject to withholding taxes).

The government has established the Australian Corporate Collective Investment Vehicle (CCIV) regime, which has broadly the same tax outcomes as AMITs, including concessional withholding tax rates. The amendments to corporate and financial services law and taxation law apply from 1 July 2022.

Countries listed as "information exchange countries." The concessional withholding tax rates for eligible MITs are restricted to investors in jurisdictions listed in the relevant regulation as an "information exchange country." The regulation lists 137 jurisdictions, including treaty jurisdictions and financial services centers like the Hong Kong Special Administrative Region (SAR), Lichtenstein and Luxembourg.

Common Reporting Standard. Australia adopted the international Common Reporting Standard (CRS) for financial institutions, such as banks, asset managers, funds, custodians and certain insurance companies.

Foreign-exchange controls. The Financial Transaction Reports Act 1988 requires each currency transaction involving the physical transfer of notes and coins in excess of AUD10,000 (or foreign-currency equivalent) between Australian residents and overseas residents, as well as all international telegraphic and electronic fund transfers, to be reported to the Australian Transaction Reports and Analysis Centre. This information is then available to the Commissioner of Taxation, Federal Police, Australian Customs Service and other prescribed law enforcement agencies.

Companies "stapled" to trusts and sovereign wealth funds. Structures using companies and linked trusts ("stapled structures" with similar investors) have long been accepted in the real estate sector. Certain trusts flow eligible income through to lower-taxed investors and foreign entities benefiting from the 15% MIT withholding tax rules; stapled companies generate trading income for the same investors, after deducting cross-staple payments to the trusts. The tax law was amended with application from 1 July 2019 to limit access to the lower MIT withholding tax rate for certain stapled structures income, with substantial transitional rules for certain existing infrastructure projects and a rolling 15-year exemption for approved "nationally significant" infrastructure projects.

Strong focus of the Foreign Investment Review Board on tax issues. The Foreign Investment Review Board (FIRB) approval process for relevant foreign investments involves tax issues, and the ATO is playing an influential role. The national interest test contains standard tax conditions, which are imposed on a case-by-case basis. Additional conditions may be imposed if a significant tax risk is identified by the FIRB and ATO. The requirements affect new and existing inbound investors undertaking certain reorganizations. Tax discussions in FIRB approval processes may add time, particularly if the ATO requires further actions. The framework was strengthened in legislation passed in 2020, enhancing the national security review of sensitive acquisitions and providing extra powers and amendments to streamline investment in non-sensitive areas.

Multilateral Instrument to update Australia's tax treaties. Australia has ratified the Multilateral Instrument (MLI), and deposited final positions adopted with the OECD. As of 1 January 2019, the MLI commenced to alter Australia's covered tax arrangements.

Taxation of the digital economy. Various reviews are being conducted, including a Board of Taxation review (submitted to the government in February 2024), of the tax treatment of digital assets and transactions in Australia.

Digital currencies not taxed as foreign currency. For income years beginning from 1 July 2021, digital currencies, such as cryptocurrency, are excluded from the income tax treatment of foreign currency. Income tax treatment of digital currencies depends on the taxpayer's individual circumstances.

Digital games tax offset. From 1 July 2022, eligible companies that incur qualifying Australian development expenditure of at least AUD500,000 on developing eligible digital games can claim an offset equal to 30% of total qualifying Australian development expenditure up to a AUD20 million claim per year.

F. Treaty withholding tax rates

The table below provides treaty withholding tax rates for dividends, interest and royalties paid by Australian companies to nonresidents.

Under Australian domestic law, certain dividends and interest payments to nonresidents are exempt from withholding tax.

For dividends, Australian domestic law provides that no withholding tax is imposed on dividends to the extent they are franked under Australia's imputation system introduced in 1987 (see Sections B and E). Some of Australia's double tax treaties specifically refer to withholding taxes imposed on franked dividends in some circumstances but, under the domestic tax law, dividend withholding tax is not imposed with respect to franked dividends.

For interest, Australia does not impose withholding tax on interest paid to nonresidents on certain publicly offered company debentures or on interest paid on state and federal government bonds.

	Unfranked dividends %	Interest %	Royalties %
Argentina	10/15 (b)	12	10/15 (c)
Austria (u)(w)	15	10	10
Belgium	15	10	10
Canada	5/15 (k)	10	10
Chile (z)	5/15 (aa)	5/10 (bb)	5/10 (cc)

United Kingdom (t)	0/5/15 (a)	0/10 (g)	5
United States	0/5/15 (a)	0/10 (g)	5
Vietnam	15	10	10
Non-treaty jurisdictions	30	10	30

(a) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate is 0% or 5%, if the beneficial owner of the dividends is a company that holds at least 80% or 10%, respectively, of the voting power in the payer. In all other cases, the rate is generally 15%.

(b) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 10% for franked dividends paid to a person holding directly at least 10% of the voting power in the payer). To the extent dividends are unfranked, the withholding tax rate is 15%, regardless of voting power.

(c) The 10% rate applies to specified types of royalties.

(d) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate is 25%, or 15% if a tax rebate or credit is granted against Australian tax to the beneficial owner of the dividends.

(e) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for dividends paid out of fully taxed profits if the recipient is a company that holds directly at least 10% of the capital of the payer). To the extent dividends are unfranked, the withholding tax rate is 15%, regardless of voting power.

(f) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 20% rate applies to dividends paid to a company that holds directly at least 25% of the capital of the payer of the dividends. The 15% rate applies if the condition described in the preceding sentence is satisfied and if the payer is engaged in an industrial undertaking.

(g) The 0% rate applies to government institutions and unrelated financial institutions.

(h) The 10% rate applies if any of the following conditions are satisfied:
- The recipient is a bank or insurance company.
- The interest is derived from bonds and securities traded on a recognized securities market.
- The payer is a bank or the purchaser of machinery and equipment with respect to a sale on credit.

(i) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 0% rate applies if the recipient of the dividends is a company holding directly at least 10% of the voting power in the payer, and the 15% rate applies in all other cases.

(j) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for dividends paid out of fully taxed profits to a company that holds at least 10% of the capital of the payer and that has invested at least AUD700,000 [or the equivalent in Russian rubles] in the payer). To the extent dividends are unfranked, the withholding tax is 15%, regardless of voting power.

(k) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for franked dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer). To the extent dividends are unfranked, the rate is 15%, regardless of voting power.

(l) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for franked dividends). To the extent dividends are unfranked, the rate is 15%.

(m) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 10% for franked dividends). To the extent dividends are unfranked, the rate is 15%.

(n) The 10% rate applies to interest derived by financial institutions or insurance companies.

(o) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate is 0% or 5% if the recipient holds at least 80% or 10%, respectively, of the voting power in the payer and 10% in other cases. However, a 15% withholding tax rate applies to fund payments from managed investment trusts but, under Australian law, this rate is reduced to 10% for funds payments by clean building managed investment trusts.

(p) The withholding tax rates listed in the table apply to income derived by non-residents on or after 1 January 2015.

(q) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a 0% rate if the dividends paid out of profits that have borne the full company tax and if the recipient is a company that holds directly at least 10% of the voting power of the payer). To the extent dividends are unfranked, the rate is 15%, or it is 5% if the dividends are paid to a company that holds at least 10% of the voting power of the payer.

(r) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate on unfranked dividends is 15%, or 5% if the beneficial owner of the dividends is a company that holds directly at least 10% of the voting power of the company paying the dividend.

(s) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 5% rate applies to dividends paid by a company that is resident in Australia to a company (other than a partnership) that holds directly at least 10% of the voting power in the company paying the dividends. The 15% rate applies in all other cases.

(t) Australia is renegotiating its double tax treaty with the United Kingdom. An exemption from withholding tax for interest payments to related financial institutions is one area for potential change. However, further details are not yet available.

(u) These countries are not currently listed as "information exchange countries" (see Section E).

(v) Interest derived from the investment of official reserve assets by the government of a contracting state, its central bank or a bank performing central banking functions in that state is exempt from tax in the other contracting state. The 10% rate applies in all other cases.

(w) Australia has most-favored-nation clauses in its treaties with Austria, Finland, France, Italy, Korea (South), Malaysia, the Netherlands, Norway and Switzerland. Under the most-favored-nation clause, Australia and the other treaty country must try to renegotiate their tax treaties if the withholding tax rates in another of Australia's tax treaties are lower.

(x) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 0% rate applies if the recipient holds at least 80% of the payer or if the dividends are paid with respect to portfolio investments by government bodies including government investment funds. The 5% rate applies if the recipient holds at least 10% of the payer. The 15% rate applies to other dividends.

(y) The 0% rate applies to interest paid to government institutions and unrelated financial institutions. The 10% rate applies in all other cases.

(z) The withholding tax rates listed in the table apply to income derived on or after 1 April 2013.

(aa) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 5% rate applies if the recipient beneficially owns at least 10% of the voting power in the company paying the dividends. The 15% rate applies in all other cases.

(bb) The 5% rate applies if the recipient is a financial institution that is unrelated to and dealing wholly independently with the payer. The 10% rate applies in all other cases.

(cc) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies to other royalties.

(dd) An amending protocol to the treaty signed on 16 December 2011 entered into force on 2 April 2013. It updates various aspects of the agreement including cross-border services, source-country taxation and assistance in collection of taxes. However, it does not contain any changes to withholding tax rates. For income years starting on or after 29 December 2022, payments or credits paid to entities that are Indian residents for tax purposes by Australian customers for technical services provided remotely (not through a permanent establishment in Australia), that are covered by the Australia-India double tax treaty and that are not royalties within the meaning of Australian tax law are not deemed to have an Australian source.

(ee) Australia and Switzerland signed a revised tax treaty, which entered into force on 14 October 2014. It applies to withholding taxes on income that is derived by a resident of Switzerland on or after 1 January 2015.

(ff) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, a 0% rate applies to dividends paid to the following:
- Publicly listed companies or subsidiaries thereof, and unlisted companies in certain circumstances, that hold 80% or more of the paying company
- Complying Australian superannuation funds and tax-exempt Swiss pension schemes that did not hold more than 10% of the direct voting power or capital in the company, respectively, during the preceding 12-month period

The 5% rate applies to dividends paid to companies that hold 10% or more of the paying company. The 15% rate applies in all other cases.

(gg) Under the revised treaty, the 0% rate applies to interest paid to the following:
- Bodies exercising governmental functions and banks performing central banking functions
- Banks that are unrelated to, and dealing independently with, the payer
- Complying Australian superannuation funds and tax-exempt Swiss pension schemes

The 10% rate applies in all other cases.

(hh) Under the revised treaty, royalties are taxed in the source (of the royalty) country at a rate of up to 5%. The revised definition of "royalties" in the revised tax treaty excludes the right to use industrial, commercial or scientific equipment from the definition, and accordingly, may lower the costs for companies that lease such equipment.

(ii) The revised treaty between Australia and Germany entered into force on 7 December 2016 and applies for withholding taxes from 1 January 2017.

(jj) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rates are 0% if the recipient holds at least 80% of the voting power in the payer for at least 12 months, 5% if the recipient holds at least 10% for at least 6 months (including the date of payment) and 10% in other cases. However, a 15% withholding tax rate applies to fund payments from managed investment trusts but, under Australian law, this rate is reduced to 10% for funds payments by clean building managed investment trusts.

(kk) The 0% rate applies if the interest is derived by bodies exercising governmental functions or performing central banking functions or by financial institutions unrelated to and dealing wholly independently with the payer. The 10% rate applies in all other cases.

(ll) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, a 0% rate applies to dividends paid to the following:
- Governments (including government investment funds)
- Central banks
- Tax-exempt pension funds or Australian residents carrying out complying superannuation activities on direct holdings of no more than 10%

The 5% rate applies to companies that hold 10% or more of the paying company throughout a 365-day period. The 15% rate applies in all other cases.

(mm) The 0% rate applies to interest paid to government bodies (including government investment funds) and central banks. The 5% rate applies to interest paid to recognized pension funds, Australian residents carrying out complying superannuation activities and unrelated financial institutions. The 10% rate applies to all other interest payments.

(nn) These rates are applicable from 1 January 2024. The 5% rate applies to the gross amount of the dividends if the beneficial owner is a company that holds directly at least 10% of the voting power in the company paying the dividends

throughout a 365-day period that includes the day of payment of the dividend. The 15% rate applies to the gross amount of the dividends in all other cases.

(oo) This treaty was signed on 30 November 2023 with formal processes to enact into law and ratify pending. The following are applicable rates under the treaty:
- For dividends, the general rate is 10%. The rate is 5% for portfolio dividends derived by governments (including government investment funds), central banks, tax exempt Portuguese pension funds, and Australian superannuation funds or other Australian residents carrying out complying superannuation activities. The rate is also 5% for intercorporate dividends on non-portfolio holdings of at least 10%.
- For interest, the general rate for interest is 10%. The rate is 0% for interest derived by governments (including government investment funds) and central banks. The rate is 5% for tax-exempt Portuguese pension funds, Australian superannuation funds or other Australian residents carrying out complying superannuation activities, and independent financial institutions.

(pp) It has been reported that on 8 August 2023, the Russian Federation suspended specified articles of the Russian Federation's double tax agreements with 38 jurisdictions, including Australia. At the time of writing, the Australian Treasury still listed the treaty as being "In Force."

A. At a glance

Corporate Income Tax Rate (%)	23 (a)
Capital Gains Tax Rate (%)	23
Withholding Tax (%)	
Dividends	23/27.5 (b)
Interest (from Bank Deposits and Securities only)	0/25 (c)
Royalties from Patents, Know-how, etc.	20 (d)
Net Operating Losses (Years)	
Carryback	0 (e)
Carryforward	Unlimited (f)

(a) This rate applies to distributed and undistributed profits.
(b) In general, this withholding tax applies to dividends paid to residents and nonresidents. An Austrian corporation is generally required to withhold tax at a rate of 27.5%. However, if the distributing company has evidence of the corporate status of the investor, it may withhold tax at a rate of 23%. Certain dividends paid to Austrian and European Union (EU) companies are exempt from tax (see Section B). In addition, a reduction in or relief from dividend withholding tax may be possible under double tax treaties.
(c) For details, see Section B.
(d) This withholding tax applies to nonresidents.
(e) There is an exception for losses from 2020. For details, see *Relief for losses* in Section C.
(f) The offset of loss carryforwards against taxable income is limited to 75% of taxable income in most cases (see Section C).

B. Taxes on corporate income and gains

Corporate income tax. In general, all companies resident in Austria and foreign companies with Austria-source income are subject to corporate income tax. (For the scope of income subject to tax, see *Foreign tax relief*.) A company is resident in Austria if it has its legal seat or its effective place of management in Austria.

Rates of corporate income tax. The corporate income tax rate is generally 23%.

All companies, including those incurring tax losses, are subject to the minimum tax. In general, the yearly minimum tax is EUR500 for an Austrian private limited company (Gesellschaft mit beschraenkter Haftung, or GmbH; and flexible Kapitalgesellschaft, or FlexCo), EUR3,500 for a stock corporation (Aktiengesellschaft, or AG) and EUR6,000 for a European stock corporation (Societas Europea, or SE). For banks and insurance companies, the minimum tax is EUR5,452. Minimum tax may be credited against corporate tax payable in future years.

Participation exemptions. The Austrian tax law provides for national and international participation exemptions.

National. Dividends (including hidden profit distributions) received by an Austrian company from another Austrian company are exempt from corporate income tax (no minimum holding is required). Capital gains derived from the sale of shares in Austrian companies are treated as ordinary income and are subject to tax at the regular corporate income tax rate. In general, capital losses on and depreciation of the participation may be deducted from taxable income, spread over a period of seven years.

International participation. An Austrian company is entitled to the international participation exemption if it holds at least 10% of the share capital of a foreign corporation that is comparable to an Austrian corporation for more than one year. The one-year holding period begins with the acquisition of the participation. The international participation exemption applies to dividends and capital gains.

A decrease in the value of an international participation is generally not tax deductible, but an Austrian company can irrevocably opt for such tax deductibility in the annual tax return for the year of acquisition. If this irrevocable option is exercised, capital gains are subject to tax, and decreases in value and capital losses are tax deductible. In general, capital losses and depreciation of the participation may then be deducted from the taxable income, spread over a period of seven years. In the event of insolvency or liquidation, final losses may be deducted even if the option for tax effectiveness was not exercised. The option does not affect the tax treatment of dividends (that is, they remain tax exempt).

International portfolio participation. Dividends from participations that do not meet the criteria for international participations are subject to the general corporate income tax rate of 23%. However, shareholdings in EU corporations, certain European Economic Area (EEA) corporations (currently only Liechtenstein and Norway) and corporations that are resident in third countries and that have agreed to exchange tax information qualify as international portfolio participations and may benefit from exemptions. Dividends from such international portfolio participations are exempt from tax. Capital gains (and losses) are tax effective (the treatment corresponds to the treatment of national participations; that is, they are tax effective).

The tax exemptions for international participations and international portfolio participations do not apply if the participation is in a company that generates mostly passive income and is located in a low-tax country (low taxation as defined in the controlled foreign company [CFC] regime; see Controlled foreign companies and anti-abuse rules in Section E). Instead, they are taxed at the general Austrian corporate income tax rate of 23%. For international participations and international portfolio participations of at least 5%, foreign tax is credited (switchover to credit method). If the income has already been attributed to the Austrian controlling entity according to the CFC rules, no switchover to the credit method is allowed.

Controlled foreign company and anti-abuse rules. On 1 January 2019, CFC rules entered into force. For details about the CFC rules and anti-abuse rules, see *Controlled foreign companies and anti-abuse rules* in Section E.

Hybrid financing. Dividends from international participations (including international portfolio participations) are not exempt from tax in Austria if such payments are deductible for tax purposes in the country of the distributing company. Also, see *Hybrid mismatches* in Section E.

Expenses. Business expenses are generally deductible. However, an exception applies to expenses that are related to tax-free income. Although dividends from national and international participations and international portfolio participations are tax-free under the Austrian participation exemption, interest incurred on the acquisition of such participations is deductible for tax purposes. However, interest from debt raised to finance the acquisition of participations from affiliates is generally not deductible. In addition, interest and royalty payments to domestic and foreign-affiliated corporations are not tax deductible if the income of the recipient corporation is not subject to tax or taxed at a (nominal or effective) rate of less than 10%. If the recipient corporation is not the beneficial owner, the taxation of the beneficial owner is relevant. An exception applies to payments to entities that meet the EU law privileges for risk capital measures, which are contained in Regulation (EU) No. 345/2013 of the European Parliament and of the Council of 17 April 2013 on European venture capital funds. If these specific rules of EU law are fulfilled and if the income of the recipient corporation is taxed at a rate of less than 10%, interest and royalty payments to domestic and foreign affiliated corporations remain deductible for tax purposes.

Capital gains. Capital gains derived from sales of shares in Austrian companies are treated as ordinary income and are subject to tax at the regular corporate income tax rate. Capital gains derived from sales of shares in non-Austrian companies may be exempt from tax under the international participation exemption; otherwise, they are treated as ordinary income and subject to tax at the regular corporate income tax rate (*see International participation*).

Withholding taxes on dividends and interest

Dividends. Effective from 1 January 2016, the general withholding tax rate for dividends is 27.5% if the distribution does not constitute a repayment of capital. The withholding tax rate may be reduced to 23% if the investor is a corporation. In practice, this means that if the distributing entity lacks information on the status of an investor (corporate or individual), the 27.5% rate applies. In general, the 27.5% rate applies to dividends paid with respect to portfolio investments, including those paid to corporate investors. If the person required to withhold has information that the investor is a corporation, the 23% tax rate can be applied at source (for example, intercompany dividends). If 27.5% is withheld, corporate investors may reduce their tax burden in Austria to 23% in an assessment and refund procedure, based on their corporate status.

However, this withholding tax does not apply to dividends (other than hidden profit distributions) paid to either of the following:

- An Austrian parent company (fulfilling certain criteria) holding directly or indirectly an interest of at least 10% in the distributing company.
- A parent company (fulfilling certain criteria) resident in another EU country holding directly or indirectly an interest of at least 10% in the distributing company for at least one year.

Furthermore, the withholding tax rate may be reduced for dividends paid to foreign shareholders in accordance with double tax treaties. Depending on the situation, this reduction may be in the form of an up-front reduction at source or a refund of withholding tax.

For dividends paid to parent companies resident in the EU or EEA (if the EEA country grants full administrative assistance; currently only Liechtenstein and Norway meet this condition) that are subject to tax in Austria, Austrian withholding tax is refunded if the shareholder can prove that the withholding tax cannot be credited in the state of residence of the shareholder under tax treaty law. In a court case, this possibility was extended to comparable non-EU resident companies, but this extension has not yet been integrated into the law.

Interest. Interest paid on loans (for example, intercompany loans) is generally not subject to withholding tax in Austria. A 27.5% withholding tax is imposed on interest income paid by Austrian banks, Austrian branches of foreign banks or Austrian paying agents. An exception from the 27.5% rate applies to interest on bank savings and other non-securitized loans from banks (except for compensation payments and lending fees), which are subject to a 25% tax rate. Interest paid to nonresident companies is generally exempt from Austrian withholding tax if certain evidence is provided. In addition, interest income is exempt from withholding tax if the debtor has neither an ordinary residence nor a registered office in Austria and if it is not a domestic branch of a foreign bank. EU withholding tax is abolished, effective from January 2017.

Interest income earned by a company engaged in business in Austria through a permanent establishment is considered business income and must be included in the taxable income of the permanent establishment. For such companies, the withholding tax (if due) is credited against the corporate income tax. If the withholding tax exceeds the tax due, it is refunded. The withholding tax is not imposed if a declaration of exemption stating that the interest is taxed as business income is filed with the Austrian bank.

Cryptocurrencies. As of 1 March 2022, current income and capital gains from cryptocurrencies derived by natural persons are subject to the tax rate for capital assets of 27.5%. For corporations, the corporate income tax rate of 23% applies.

Administration. In principle, the Austrian tax year corresponds to the calendar year. However, other fiscal years are possible. The tax base is the income earned in the fiscal year ending in the respective calendar year. Annual tax returns must be filed by 30 April (30 June, if submitted electronically) of the following

calendar year. Extensions may be granted. A general extension to 31 March (or 30 April) of the second following year is usually granted if a taxpayer is represented by a certified tax advisor (tax returns may be requested earlier by the tax office).

Companies are required to make prepayments of corporate income tax. The amount is generally based on the (indexed) amount of tax payable for the preceding year, and payment must be made in equal quarterly installments on 15 February, 15 May, 15 August and 15 November.

Interest is levied on the amount by which the final tax for the year exceeds the total of the advance payments if this amount is paid after 30 September of the year following the tax year. To prevent interest, companies may pay the amount due as an additional advance payment by 30 September of the year following the tax year.

Foreign tax relief. In general, resident companies are taxed in Austria on their worldwide income, regardless of where that income is sourced. However, the following exceptions exist:

- The Finance Ministry may, at its discretion, allow certain types of income that have their source in countries with which Austria has not entered into a double tax treaty to be excluded from the Austrian tax computation, or it may allow foreign taxes paid to be credited against Austrian corporate income tax. Under a decree of the Ministry of Finance, an exemption is granted in case of active income and taxation of at least 15%. Otherwise, only a credit of foreign taxes is allowed.
- Income earned in countries with which Austria has a double tax treaty is taxable or exempt, depending on the treaty.
- Dividends and capital gains derived from participations of 10% or more in foreign subsidiaries can be exempt from corporate income tax under the international participation exemption (see *Participation exemptions*).
- Dividends from foreign portfolio shareholdings in companies resident in countries that have agreed to exchange tax information are exempt from tax unless the subsidiary is low-taxed (see *Participation exemptions*).

C. Determination of trading income

General. In general, taxable income is based on the profit or loss shown in the financial statements prepared in accordance with Austrian generally accepted accounting principles. The financial statement profit or loss must be adjusted in accordance with special rules set forth in the tax acts. Taxable income is calculated as follows:

Profit per financial statements	X
+ Nondeductible taxes (such as corporate income tax)	X
+ Nondeductible expenses (such as certain interest)	X
– Special allowances and nontaxable income (intercompany dividends and loss carryforwards)*	(X)
= Taxable income	X

* The offset of loss carryforwards against taxable income is limited to 75% of taxable income in most cases.

General interest expense limitation. The interest expense limitation rule applies as of 1 January 2021 to all loans (that is, group and third-party loans, regardless of recourse) and to companies resident in Austria, companies residing abroad with a permanent establishment in Austria and partnerships with an Austrian branch.

Under the interest expense limitation rule, the deduction of interest expense exceeding interest income (net tax deductible interest expense) is limited to 30% of taxable earnings before (net) interest, tax, depreciation and amortization (EBITDA). Tax-exempt income and partnership income should not be considered in the calculation of the taxable EBITDA.

Unused EBITDA can be carried forward over a five-year period. However, the carryforward does not apply if one of the exemptions from the interest expense limitation rule mentioned below applies or if a positive net interest balance exists. Nondeductible interest expense can be carried forward indefinitely but is subject to the change of ownership rules (see *Relief for losses*). A deduction is possible in the following years in accordance with the interest expense limitation rules.

The limitation rule does not apply if one of the following exemption rules applies:

- Exemption threshold. The annual net interest expense is less than EUR3 million.
- Group clause. The company is a member of a tax group (see *Groups of companies*). In the case of tax groups, the interest limitation rule is only to be applied at the level of the head of the tax group when determining the combined taxable profit. In principle, tax groups are also entitled to an allowance of EUR3 million (group allowance), but this amount applies to the entire group of companies (that is, to the head of the tax group and all group members together). Any group interest surplus exceeding the allowance of EUR3 million is in turn only deductible to the extent that it is covered by the offsettable group EBITDA (30% of the taxable group EBITDA). Any group interest surplus or offsettable group EBITDA can be carried forward in accordance with the general rules and can be offset in subsequent years. The head of the tax group that is fully included in consolidated financial statements can deduct the interest surplus for tax purposes without restriction if the equity ratio equals or exceeds the equity ratio of the group.
- Equity ratio escape clause. This clause applies to entities that are fully included in consolidated financial statements prepared in accordance with Austrian generally accepted accounting principles (GAAP), International Financial Reporting Standards (IFRS) or other comparable accounting standards, such as US GAAP. For these companies, interest expense may be fully deducted if the equity ratio (ratio between equity and total assets) of the entity equals or exceeds the equity ratio of the consolidated group, whereby a shortfall of up to two percentage points (rule of tolerance) is not harmful. The equity ratios are determined on the basis of the consolidated and the individual financial statements, but in both cases based on the accounting standards used in the consolidated financial statements. In the case of a tax group, the equity ratio is determined based on a

fictitious subgroup financial statement ("group financial statement") in which all group members must be fully included.
- Grandfathering rule: Interest expenses arising from contracts concluded prior to 17 June 2016 will not be affected by the interest barrier rules. However, such grandfathering exemption is temporary and may finally be applied in the course of the tax assessment for 2025.

Inventories. In determining trading income, inventories must be valued at the lower of cost or market value. Cost may, at the taxpayer's option, be determined using any of the following methods:
- Historical cost
- Average cost
- First-in, first-out (FIFO)
- Under certain circumstances, last-in, first-out (LIFO)

The highest-in, first-out (HIFO) method is not allowed.

Provisions. Accruals for severance payments and pension costs are allowable to a limited extent. Accruals for corporate income tax are not deductible for tax purposes. Provisions with a term of 12 months or more are subject to a mandatory fixed discounting rate of 3.5%, except for accruals for severance payments and pension costs, which are tax deductible to the extent of 100% of their tax value.

For financial years beginning after 31 December 2020, the formation of lump-sum value adjustments and lump-sum accruals is now also recognized for tax purposes. The prerequisite is a prudent assessment of the amount of the lump sum value adjustment or accrual. In addition, general bad debt provisions are accepted for tax purposes for financial years ending after 31 December 2020.

Depreciation. In general, depreciable assets are depreciated over the average useful life. For certain assets, such as buildings and passenger cars, the tax law provides depreciation rates. The following are some of the applicable annual rates.

Asset	Rate (%)
Buildings	1.5/2.5*
Office equipment	10 to 25
Motor vehicles	12.5
Plant and machinery	10 to 20

* The rate of 1.5% applies to buildings that are leased for residential use.

For buildings acquired or constructed after 30 June 2020, an accelerated straight-line depreciation up to a maximum amount of three times the statutory percentage rate is allowed in the first year, and two times the statutory percentage rate is allowed in the second year. Furthermore, in the first year, the half-year depreciation does not apply to buildings.

A declining-balance method for depreciation is optional and allows companies to depreciate fixed assets by up to 30% of the residual book value per year. However, the regime is only applicable for fixed assets purchased or constructed after 30 June 2020. The declining-balance method does not apply to intangible assets; used assets; buildings; goodwill; certain kinds of passenger vehicles and estate cars; station wagons; fixed assets used for

promotion, transport or storage of non-renewable energy sources; and fixed assets that make direct use of non-renewable energy sources (for example, planes). A change from the declining-balance method to the straight-line method during the useful life is permissible, but not vice versa. For fixed assets purchased or constructed on or after 1 January 2023, the declining-balance method is only permissible if it follows the depreciation method in the financial statements.

Research and development. Companies may claim a research and development (R&D) bonus (cash payment) equal to 14% of certain expenses for research and experimental development (according to the Frascati manual, these expenses consist of material costs, labor costs, energy costs and attributed interest). The R&D must be conducted by an Austrian company in Austria or by an Austrian permanent establishment of a foreign company.

Relief for losses. Losses incurred by resident companies may be carried forward without time limit. The offset of loss carryforwards against taxable income is in most cases limited to 75% of the taxable income. The remaining balance of the loss carryforward may be offset against income in future years, subject to the same 75% limitation.

The loss carryforward is attributable to the corporation, not to the shareholders. Consequently, a change in shareholders does not affect the loss carryforward, provided no corresponding substantial change in the business and management of the company occurs (otherwise losses are endangered). Foreign companies with permanent establishments in Austria may claim tax losses only under certain circumstances.

Groups of companies. The group taxation regime allows parent and subsidiaries to consolidate their taxable income. Under the Austrian law, the head of the tax group must be an Austrian corporate entity or branch of an EU/EEA corporate entity that has held more than 50% of the capital and voting rights in the subsidiary since the beginning of the subsidiary's fiscal year. The shareholding can be direct, or it can be held indirectly through a partnership or a group member. Only corporations (not partnerships) qualify as group members. If the holding requirement is satisfied, 100% of the taxable income (profit or loss) of domestic group members is allocated to the taxable income of the group parent, regardless of the percentage of the shareholding in the subsidiary. No actual profit or loss transfer takes place (only an agreement on the split of the tax burden is required). The tax group must exist for at least three full financial years. Otherwise, retroactive taxation on a stand-alone basis applies.

Group taxation also allows a cross-border tax consolidation if the foreign subsidiary is directly held by an Austrian parent (first foreign tier only) and if the type of entity is comparable to an Austrian corporation from a company law perspective. Effective from 1 March 2014, certain companies are excluded from the group taxation regime. Only corporations resident in the EU and in countries with which Austria has agreed on comprehensive administrative assistance can be included in a tax group. The Austrian Ministry of Finance has published a list of all qualifying third countries.

Foreign losses must be recalculated under Austrian tax law. In addition, the deductibility of foreign losses is limited to the lower of the amount according to Austrian tax law and actual losses calculated under foreign tax law. Losses from foreign group members can be deducted from the Austrian tax base in proportion to the shareholding only. Beginning with the 2015 tax year, the utilization of losses of foreign group members is limited to 75% of the domestic group income. Excess losses are included in the loss carryforwards for subsequent years. Profits of a foreign group member are generally not included in the Austrian group parent's income.

To avoid double utilization of losses of a foreign group member, foreign losses that have been imported into the Austrian tax group are added to the Austrian profit if the losses can be offset in the foreign jurisdiction in subsequent years. Foreign losses must also be added to the Austrian income tax base if the foreign subsidiary leaves the group. A recapture is also required if a significant reduction occurs in the size of the foreign subsidiary's business. This measure is designed to prevent dormant foreign entities from remaining in the group to avoid the recapture of foreign losses. Relief for capital losses is provided only in the event of a liquidation or insolvency.

Depreciation to the fair market value of a participation within the group is tax-neutral.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard	20
Reduced	10/13
Payroll taxes, paid by employer	
Family allowance fund; varies by state (under certain circumstances, the range of rates is reduced to 4.02% to 4.1%)	4.22 to 4.30
Community tax	3
Real estate sales tax (including 1.1% registration fee)	4.6
Stamp duties, on certain legal transactions, such as leases and hire contracts	0.8 to 2
Environmental taxes; comprising energy taxes, transport taxes, resource taxes and pollution taxes; according to the Eco Social Tax Reform Act, a new carbon tax was introduced beginning on 1 October 2022 (starting with EUR30 per ton and increased annually up to EUR55 per ton in 2025); a carbon leakage rule prevents companies from relocating; a hardship clause is in place for companies with high energy intensity	Various

E. Miscellaneous matters

Foreign-exchange controls. No restrictions are imposed on the transfer of nominal share capital, interest and the remittance of dividends and branch profits. Royalties, technical service fees

and similar payments may be remitted freely, but routine documentation may be required.

Debt-to-equity rules. Austrian tax law does not provide a special debt-to-equity ratio. Although, in general, shareholders are free to determine whether to finance their company with equity or loans, the tax authorities may reclassify loans granted by shareholders, loans granted by group companies, and loans granted by third parties guaranteed by group companies as equity, if funds are transferred under legal or economic circumstances that typify equity contributions, such as the following:

- The equity of the company is insufficient to satisfy the solvency requirements of the company, and the loan replaces equity from an economic point of view.
- The company's debt-to-equity ratio is significantly below the industry average.
- The company is unable to obtain any loans from third parties, such as banks.
- The loan conveys rights similar to shareholder rights, such as profit participations.

If a loan is reclassified (for example, during a tax audit), interest is not deductible for tax purposes and withholding tax on hidden profit distributions may become due. Capital duty was abolished, effective from 1 January 2016.

In addition, under Austrian corporate law there is the requirement of a minimum equity ratio of above 8% (and in addition, a notional debt repayment period of less than 15 years). If these criteria are not fulfilled, a defined (insolvency mitigation) procedure must be initiated.

Transfer pricing. Austria has accepted the Organisation for Economic Co-operation and Development (OECD) transfer-pricing guidelines and published a summary of the interpretation of the OECD guidelines by the Austrian tax administration in 2010. Under these guidelines, all transactions with related parties must be conducted at arm's length. If a transaction is considered not to be at arm's length, the transaction price is adjusted for corporate income tax purposes. This adjustment may be deemed to be a hidden profit distribution subject to withholding tax or a capital contribution. The Austrian transfer-pricing guidelines were updated in 2021. They take into account the changes that have occurred since 2010 in the area of the interpretation of the arm's-length principle at the OECD level, particularly in the context of the Base Erosion and Profit Shifting (BEPS) project.

In 2016, Austria introduced the Transfer Pricing Documentation Law (TPDL), which follows the three-tier documentation approach consisting of a Country-by-Country Report (CbCR), the master file and the local file. The master file and local file must be prepared if an Austrian constituent entity generated over EUR50 million turnover in the two preceding fiscal years. A CbCR must be prepared if the whole multinational group exceeded a threshold of consolidated turnover of EUR750 million in the preceding fiscal year. By the last day of the fiscal year for which a CbCR is prepared, each Austrian constituent entity of a multinational group exceeding the threshold must inform the competent Austrian tax office of the entity that is preparing or filing the CbCR and where this entity is a resident. Starting from 2022, the

notification by the Austrian constituent entity is only required in the case of changes since the last notification. An Austrian entity that does not reach the threshold for filing a master file and a local file still must file a master file if the multinational group is required to prepare one by another country. In addition, the TPDL clarifies that documentation obligations existing in addition to the TPDL (for example, accounting and filing obligations imposed by the Austrian Federal Fiscal Code [FFC]) are not affected by the TPDL. Therefore, it is strongly suggested that constituent entities resident in Austria of multinational groups that do not exceed the stipulated turnover of the TPDL prepare Transfer Pricing Documentation Reports in accordance with the FFC.

Controlled foreign companies and anti-abuse rules. On 1 January 2019, CFC rules entered into force. The CFC regime (in line with the EU Anti-Tax Avoidance Directive [ATAD; 2016/1164 of 12 July 2016]) applies if more than one-third of the income of a low-taxed foreign company is passive income and if the entity is lacking sufficient economic functions and substance.

Passive income is defined in line with the ATAD as consisting of the following:

- Interest or other income from financial assets
- Royalties and other income from intellectual property
- Dividends and capital gains from the disposal of shares, insofar as they would have been taxable at the level of the Austrian shareholder
- Income from capital leasing
- Income from activity as an insurance company, bank and other financial activities
- Income from invoicing companies, which derive income by selling goods and services that generate no or little economic value from and to affiliated companies

Low taxation means that the effective actual tax burden of the foreign company does not exceed 12.5%. The basis of assessment for the tax burden must be calculated according to Austrian tax law and compared to the actual foreign tax paid. For purposes of the CFC regime, low taxation does not exist if the low taxation stems only from a shorter depreciation period or a more favorable use of losses under the foreign tax law.

An Austrian company controls a foreign company if it holds alone or together with an associated entity directly or indirectly a participation of more than 50% in the foreign company. An associated entity is an entity in which the Austrian entity holds directly or indirectly a participation of at least 25%, as well as any entity that is held by the same entity or person that owns directly or indirectly a participation of at least 25% of the Austrian entity and the other entity. If more than one-third of the income of a low-taxed controlled foreign entity is passive income, the passive income is attributed to its controlling entity or entities to the extent of their participation, unless the foreign entity carries out substantial economic activity based on personnel, equipment, assets and premises. Foreign tax on the attributed passive income can be credited against the Austrian tax.

Hybrid mismatches. To implement the Anti-Tax Avoidance Directive 2 (ATAD 2), which amends the ATAD, into Austrian domestic law, a special regulation for hybrid mismatches entered into force on 1 January 2020. A hybrid mismatch occurs if expenses are deducted in one state and there is no taxation of the corresponding revenue in the other state (deduction/no inclusion) or if expenses can be deducted in more than one state (double deduction). Under the new Austrian anti-hybrid provision, tax effects of hybrid mismatch arrangements must be neutralized if a certain type of defined tax discrepancy occurs in a group of companies or a structured arrangement. The neutralization is achieved either by non-deductibility of the expenses in Austria or inclusion of the corresponding revenue in Austria.

DAC6. The EU directive on cross-border tax arrangements (DAC6) introduces mandatory disclosure requirements for certain cross-border tax arrangements, provided that the main benefit of such arrangements is the expectation of a lower tax burden and/or of other specific characteristics (so-called "hallmarks") defined in the EU-Meldepflichtgesetz, which implements the EU Directive on Administrative Cooperation.

BEPS 2.0 – Pillar Two. On 1 January 2024, Pillar Two measures entered into force. The new "Mindestbesteuerungsgesetz" implements the EU directive on ensuring a global minimum taxation for multinational enterprise groups and large-scale domestic groups in the EU (2022/2523 of 14 December 2022). For the latest information on Pillar Two, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (ey-beps-2-0-pillar-two-developments-tracker.pdf).

F. Treaty withholding tax rates

The following summary is intended purely for orientation purposes; it does not reflect the various special provisions of individual treaties or the withholding tax regulations in domestic tax law.

	Dividends		Interest (a)		Royalties	
	A	B	C	D	E	F
	%	%	%	%	%	%

A General.
B Dividends received from subsidiary company. Shareholding required varies from 10% to 95%, but generally is 25%.
C General.
D Mortgages.
E General.
F Royalties from 50% subsidiary.

(a) Under domestic tax law, a 25% withholding tax is imposed only on interest income from bank deposits and securities. However, interest paid to nonresidents is generally not subject to withholding tax. For details, see Section B.

(b) No reduced rate applies.

(c) No withholding tax is imposed, but the income is subject to tax at the regular corporate rate.

(d) Austria is honoring the USSR treaty with respect to the republics comprising the Commonwealth of Independent States (CIS), except for those republics that have entered into tax treaties with Austria. Austria has entered into tax treaties with Armenia, Azerbaijan, Belarus, Kazakhstan, Kyrgyzstan, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan. The withholding tax rates under these treaties are listed in the above table.

(e) Interest paid by banks is subject to a 4.95% withholding tax.

(f) Trademark royalties are subject to a 25% withholding tax. The withholding tax rate is 15% for royalties paid for literary, artistic and scientific items.

(g) The rate is 10% for royalties paid for the use of films or other means of production used for radio or television.

(h) The 5% rate applies if the participation of the recipient of the dividends exceeds USD250,000. The 10% rate applies if the participation of the recipient of the dividends exceeds USD100,000 but does not exceed USD250,000.
(i) The rate is 5% for royalties paid for technologies not older than three years.
(j) The rate is 0% for royalties paid for literary, artistic and scientific items.
(k) Royalties paid for computer software, patents and know-how are exempt if the royalties are taxed in the state of residence of the recipient.
(l) The rate is 5% for royalties paid to licensors engaged in industrial production.
(m) This rate applies to dividends received from a 10%-subsidiary.
(n) The rate is 2% for amounts paid for the use of commercial or scientific equipment.
(o) The rate is 20% for dividends paid by non-industrial Pakistani corporations.
(p) The rate is 10% for royalties paid for literary, artistic and scientific items.
(q) The 5% rate applies to amounts paid for the use of industrial or scientific equipment.
(r) The 5% rate applies to dividends received from a 25%-subsidiary; the 10% rate applies to dividends received from a 10%-subsidiary.
(s) The rate is 10% for interest paid to a bank if the interest arises from the transacting of bank business and if the recipient is the beneficiary of the interest.
(t) The 5% rate applies to participations of at least 70%. The 10% rate applies to participations of at least 25%.
(u) The rate is 7.5% for technical services.
(v) The rate is reduced to 10% for interest received from a bank. Interest on loans granted by the Österreichische Kontrollbank to promote exports or similar institutions in Türkiye is subject to a withholding tax rate of 5%.
(w) A shareholding of at least 5% is required.
(x) The 10% rate applies to industrial royalties.
(y) See Section B.
(z) The 4% rate applies if the beneficiary is one of the following:
- A bank
- An insurance company
- A company that derives its gross income principally from the active and regular conduct of a credit or financing business in connection with business transactions with persons in which the entity is not affiliated with the payer of the interest
- A company that has sold machinery and equipment if interest is paid on a debt incurred as a result of the sale of that machinery and equipment on credit
- Any other company, provided that in the three tax years preceding the tax year in which the interest is paid, the company finances more than 50% of its liabilities from the issue of bonds on the financial markets or the receipt of interest-bearing deposits, or that more than 50% of the company's assets consist of receivables from unrelated persons

The 5% rate applies to interest related to bonds or debentures that are regularly and mainly traded on a recognized stock exchange.
(aa) The 5% rate applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment.
(bb) No withholding tax is imposed if any of the following circumstances exist:
- The interest is paid to the government of the other contracting state, or a political subdivision, a local authority or the central bank thereof.
- The interest is paid by the government of the other contracting state, or a political subdivision, a local authority or the Central Bank thereof.
- The interest is paid to a pension fund or similar arrangement that is a resident of the other contracting state.
- The interest is paid to a resident of the other contracting state on corporate bonds that are traded on a stock exchange in the first-mentioned state (state of source) and that were issued by a company that is a resident of that state.
- The interest is paid with respect to a loan, debt claim or credit that is owed to or made, provided, guaranteed or insured by the first-mentioned state (state of source), or political subdivision, local authority or export financing agency thereof.

(cc) In general, no withholding tax is imposed. However, in the case of Austria, income derived from debt claims carrying a right to participate in profits, including income derived from profit-participating loans and profit-participating bonds, may also be taxed in Austria according to the laws of Austria if it arises in Austria; in the case of Japan, interest arising in Japan that is determined by reference to receipts, sales, income, profits or other cash flow of the debtor or a related person, to any change in the value of any property of the debtor or a related person, to any dividend, partnership distribution or similar payment made by the debtor or a related person, or to

any other interest similar to such interest arising in Japan may also be taxed in Japan according to the laws of Japan.

(dd) The 15% rate applies if the dividend is paid by a relevant investment vehicle. If the dividend is paid by any other entity, the general withholding tax rate is 10%.

(ee) This rate applies if the beneficial owner is either of the following:
- The other state itself, a political subdivision or local authority thereof or a Qualified Government Entity
- A company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends

(ff) The rate is 10% for royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or copyrights of scientific works, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial or scientific experience. The rate is 15% for the use of, or the right to use, cinematographic films, or tapes for radio or television broadcasting or any copyrights of literary or artistic works.

Amendments to the treaties with Germany and Korea (South) are applicable from 2024. Amendments to the treaty with the United Arab Emirates are applicable from 2023 (among the changes is the switch from the exemption method to the credit method in Austria).

On 14 September 2023, a protocol amending the treaty with China Mainland was signed. Likewise, on 12 September 2023, a protocol amending the treaty with New Zealand was signed.

In 2021, for the treaties with Tajikistan and Ukraine, protocols implementing Austria's international obligation to align its double tax treaties with the new OECD standard on tax transparency and administrative assistance entered into force.

The tax treaty with the Russian Federation was suspended by the Russian Federation, effective from 7 December 2023. The tax treaty with Argentina was suspended by Argentina, effective from 1 January 2009.

Austria signed and ratified the Multilateral Instrument in 2017. It entered into force in 2018.

Because of the rapidly evolving economic situation in Azerbaijan, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Profits Tax Rate (%)	20
Capital Gains Tax Rate (%)	20
Permanent Representation Tax Rate (%)	20
Withholding Tax (%)	
Dividends	5 (a)
Interest or Financial Lease Payments	10 (b)
Royalties from Patents, Know-how, etc.	14 (b)
Management Fees	10 (b)
Income from International Transportation and Telecommunication Services	6 (b)
Insurance Payments	4 (b)
Payments of other Azerbaijani-Source Income to Foreign Companies	10 (b)
Payments to Countries and Territories with a Preferential Tax Regime	10 (b)(c)
Transfers of Funds to Accounts Created in the Electronic Wallets of Nonresidents	10 (b)(d)
Branch Remittance Tax	10 (b)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) These are final withholding taxes applicable to payments to Azerbaijani and foreign legal entities.

(b) This is a final withholding tax applicable to payments to foreign legal entities unless the payment is made to foreign legal entities incorporated or registered in jurisdictions with a preferential tax regime or payments made to bank accounts located in such jurisdictions.

(c) Direct or indirect payments made by residents of Azerbaijan or permanent establishments of nonresidents located in Azerbaijan to persons incorporated or registered in jurisdictions with a preferential tax regime or payments made to bank accounts located in such jurisdictions are considered to be income from an Azerbaijani source and are subject to a 10% withholding tax on the gross amounts of the payments. The list of jurisdictions with a preferential tax regime is approved by the President of Azerbaijan on an annual basis. Certain payments are specifically excluded from the list of payments considered to be made to the countries and territories with preferential tax regimes

(principal amount of a loan, dividends derived from investments to Azerbaijan, interest from deposits held in financial institutions of Azerbaijan and purchase of bonds, remittances of net profit of permanent establishments of a nonresident to that nonresident, and others).

(d) Transfers of funds to accounts created in the electronic wallets of nonresidents (online payment systems) by residents of Azerbaijan not registered for tax purposes are subject to a 10% withholding tax. This tax must be withheld by a local bank, branch of a foreign bank located in Azerbaijan or national postal operator from the residents making the transfers.

B. Taxes on corporate income and gains

Corporate profit tax. Enterprises carrying on activities in Azerbaijan, including enterprises with foreign investment, joint ventures and legal entities operating through a permanent representation, are subject to tax.

Azerbaijani resident legal entities are subject to tax on their worldwide income. For tax purposes, Azerbaijani resident legal entities are entities incorporated in Azerbaijan and entities that have their effective management located in Azerbaijan, including 100%-owned subsidiaries of foreign companies.

Nonresident legal entities are subject to tax on profits earned through a permanent representation only. A permanent representation is defined as a place where the entrepreneurial activities of a nonresident are carried out in Azerbaijan for a period amounting to or exceeding 90 days in the aggregate. The term permanent representation includes, but is not limited to, the following:

- Persons who are performing the function of a permanent establishment of a nonresident legal entity or a person acting on their behalf, accumulating a client base for their benefit and organizing works with their clients, entitled to prepare and conclude contracts in the name thereof and commonly carrying out the enlisted responsibilities
- A place of management, a bureau, an office, a branch or an agency
- Construction and repair sites, installation, commissioning or assembly object, as well as supervisory activities associated therewith
- A place of exploration, exploitation or extraction of natural resources or drilling equipment or a vessel used for such purposes, as well as supervisory activities over such items
- A place where the business activity of a nonresident is carried out, including a place where goods are produced or services, including consulting services, are performed
- A person who acts in Azerbaijan on behalf of a nonresident and who has and habitually exercises an authority to negotiate and conclude contracts on behalf of that nonresident

The Azerbaijan Law on the Protection of Foreign Investments allows foreign investment in various forms, including investment through 100% foreign-owned subsidiaries, share participations in joint stock companies and in joint ventures with Azerbaijani legal entities, individuals and establishments of branches and representative offices.

Tax rate. All entities operating in Azerbaijan are subject to corporate profit tax at a rate of 20%.

Capital gains. Capital gains are included in taxable income and taxed at the regular rate.

Administration. The tax year is the calendar year. The tax year for newly created enterprises or permanent representations of foreign legal entities runs from the date of formation through 31 December of the year of formation.

All entities operating in Azerbaijan must make advance payments of corporate profit tax by the 15th day following the end of each quarter. Each advance payment must equal at least one-quarter of the profit tax liability for the prior tax year. Alternatively, the amounts of the advance payments may be determined by multiplying the company's revenues for the quarter by the company's effective tax rate for the prior year. Advance tax payments for corporate profit tax of taxpayers that did not have an activity or taxable profit (income) in the prior tax year is calculated only based on the second option. The effective tax rate is equal to tax as a percentage of revenues.

If, at the end of the tax year, it is determined that the total of the advance payments exceeds the tax due for the year, the excess may be credited against future tax obligations or refunded. In practice, however, the tax authorities rarely, if ever, issue refunds. Consequently, entities generally credit overpayments against future taxes.

Dividends. Dividends paid are subject to income tax withholding at a rate of 5%. This is considered a final tax, and companies do not include the dividends in taxable profits. An allocation to a shareholder as a result of the liquidation of a company of its share of undistributed net profit or any asset sourced from such undistributed profit is also treated as a dividend distribution.

Foreign tax relief. Corporate income taxes paid by residents of Azerbaijan in foreign countries on their income derived from those foreign countries may be credited against Azerbaijani profit tax imposed on the same corporate income. However, the amount credited may not exceed the tax calculated on such income under the tax legislation of Azerbaijan.

C. Determination of trading income

General. Taxable profit is determined by computing the profit or loss from business activities and then adding income from non-trading operations, such as leasing income and capital gains, but excluding dividends received. Income received in foreign currency is converted into manats (AZN) at the daily exchange rate determined by the Central Bank of Azerbaijan.

Statutory norms limit the deductions for certain categories of expenses, such as business travel expenses, repair expenses, interest paid on foreign borrowings and interest paid between related parties. Expenses for meals and entertainment as well as for the providing of food and housing to employees are disallowed except for representation expenses, accommodation and meal expenses for employees, as well as healthful and dietary meals, milk, and other equivalent products and means provided to employees working in harsh and hazardous conditions, including those engaged in underground work. Such deductions are allowed within norms approved by the Cabinet of Ministers.

Foreign legal entities doing business through a permanent representation in Azerbaijan are taxed on actual profits. If actual

profits cannot be determined, the tax authorities may determine taxable profits based on either income or expenses, with a deemed profit margin of 20%.

Tax depreciation. Fixed assets, other than buildings, are subject to depreciation by a group method. Under this method, fixed assets are allocated to groups, and the groups are depreciated in aggregate. Depreciation rates, which are specified by law, are applied to the aggregate book values for each of the groups. The depreciable balance for a group is reduced by the depreciation accrued for the year by the group. If any assets of a group are sold during the year, the depreciable balance of the group is reduced by the residual value of such assets. The profit or loss on the sale of such assets is separately determined.

An acquisition of assets under a finance lease is treated as a loan from the lessor to the lessee and a purchase of assets by the lessee. The lessee may then claim depreciation on the assets.

The costs incurred for the repair of fixed assets that are not accounted for on the lessee's balance sheet, not reimbursed at the expense of the rent or not reimbursed by the lessor are capitalized by the lessee are deductible during the contractual term, but not less than five years, with proportionate amortization over the years. The expenses incurred for the repair of leased fixed assets are capitalized separately for each year.

Relief for losses. An enterprise incurring a loss in a tax year may carry forward the loss to the following five years, without limitation on the amount, to offset the profit in such following years. The amounts resulting from the application of lower depreciation and repair expense rates during a period when a taxpayer is eligible for profit (income) tax exemption are not added to the deductible amount for the years following the expiration of the exemption entitlement.

Groups of companies. There are no provisions permitting related enterprises to offset profits and losses among members of a group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on goods sold and services rendered, in Azerbaijan; the tax law contains specific rules for determining when services are deemed to be provided in Azerbaijan; Azerbaijani taxpayers that make payments to entities that are not registered taxpayers in Azerbaijan for services provided in Azerbaijan must calculate VAT on the payments	18
VAT, on provision of electronic commerce works and services to residents by nonresidents engaged in electronic commerce through the internet information resource; these nonresidents should electronically register for VAT purposes and respectively report and pay their VAT liabilities; the requirement to undergo electronic VAT registration is not mandatory;	

Nature of tax	Rate (%)
if a nonresident provides electronic commerce services to a person not registered as a VAT payer, the bank, branch of a foreign bank located in Azerbaijan or national postal operator from the resident making the transfer is obliged as tax agent to withhold VAT from the payer and remit it to the state budget; if a nonresident provides electronic commerce services to a person registered as VAT payer, the respective person acts as a tax agent and accrues VAT on payment made to the nonresident.	18
Assets tax, on the annual average net book value of fixed assets or the market price of the asset if the insurance value of assets exceeds the net book value	1
Import tariffs	0 to 15

E. Miscellaneous matters

Foreign-exchange controls. The manat (AZN) is a non-convertible currency outside Azerbaijan. Enterprises may buy or sell foreign currency through authorized banks or foreign-exchange offices in Azerbaijan.

To receive foreign-currency income in Azerbaijan, an enterprise must obtain a license issued by the Central Bank of Azerbaijan.

Transfer pricing. Recent legislative amendments to the Tax Code of the Republic of Azerbaijan introduced transfer-pricing rules, effective from 1 January 2017. These rules are conceptually based on the arm's-length principle outlined in the transfer-pricing guidelines developed by Organisation for Economic Co-operation and Development (OECD). The new rules apply to Controlled Transactions, as defined in the rules. The following are Controlled Transactions:

- Transactions between residents of Azerbaijan and nonresident related parties of such residents, as well as between the same residents and any of their establishments, branches or other subsidiaries located in another country or territory
- Transactions between permanent establishments of nonresidents and such nonresidents, as well as representative offices, branches and other establishments of such nonresidents in other countries and any other persons located in other countries that are related parties of such nonresidents
- Transactions between residents of Azerbaijan and/or permanent establishments of nonresidents in Azerbaijan and persons incorporated or registered under the laws of the jurisdictions recognized as preferential tax regime countries under the laws of Azerbaijan
- Transactions between a resident of Azerbaijan or a permanent establishment of a nonresident in Azerbaijan and an unrelated nonresident party if the following conditions are met:
  - The transaction involves sales commodities traded on international commodity exchanges.
  - The total turnover of a resident of Azerbaijan or a permanent establishment of a nonresident in Azerbaijan exceeds AZN30 million and the share of a transaction with any nonresident exceeds 30% of total revenue or expenses, respectively.

Except for the last two abovementioned listed transactions, Controlled Transactions are subject to reporting requirements if the annual turnover of transactions per each counterparty exceeds AZN500,000 (approximately USD294,100).

For the last two abovementioned listed transactions, there is no annual turnover threshold for the reporting requirement. Therefore, they should be reported regardless of the annual turnover. Reporting is achieved through the submission of a Notification on Controlled Transactions by 31 March of the year following the reporting year. Notification should provide details of controlled transactions as well as transfer-pricing-related, self-adjustment amounts, if any. Therefore, a transfer-pricing analysis should be conducted by taxpayers by 31 March in order to reach a conclusion as whether transfer-pricing-related, self-adjustments are to be made, if any. There is a penalty for incorrect presentation of information in the notification. There is an AZN2,000 (approximately USD1,200) penalty for incorrect presentation of information in the notification.

There is a requirement to prepare transfer-pricing documentation with a deadline for such documentation to be provided within 15 days after the date of a request of the tax authorities during a tax audit. There are certain differences between an OECD Local File and a Local File as per country transfer pricing local regulations in terms of required additional documents (that is, a Local File in Azerbaijan is a combination of the OECD's Master File and Local File), economic analysis specifics (benchmarking search strategy and manual check) and tax audit readiness assessment. In most tax audits, an OECD Local File is insufficient since an extensive "defense package" should be prepared as part of the transfer-pricing analysis.

If information provided by a taxpayer is insufficient, the tax authorities have a right to perform their own transfer-pricing analysis and, if relevant, assess additional profit tax liability. Therefore, an OECD Local File can be considered insufficient by the tax authorities during a tax audit if the specified above localization work was not performed. If the tax authorities make a price correction during the on-site tax audit, the additional tax accrual could be subject to a 50% financial sanction.

Country-by-country reporting. Effective from 1 January 2020, constituent entities of a Multinational Enterprise Group (MNE Group) that are residents of Azerbaijan should report their operations in the established form to the tax authorities for country-by-country reporting purposes. An MNE Group is a group of two or more enterprises that are resident in different jurisdictions or a group that includes an enterprise resident in one jurisdiction that carries out business activities through a permanent establishment located in another jurisdiction. A constituent entity of an MNE group consists of the entity and its subsidiaries, affiliates, branches and representative offices. Reporting obligations are imposed on constituent entities of MNE Groups whose overall income within a financial year exceeds EUR750 million.

F. Treaty withholding tax rates

The withholding rates under Azerbaijan's ratified treaties are listed below. Because of recent reductions in domestic withholding tax

rates, the tax treaties may now specify rates that are the same as, or in excess of, domestic rates and, consequently, offer little or no savings with respect to withholding taxes. The rates in the table reflect the lower of the treaty rate and the rate under domestic tax law.

A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

B. Taxes on corporate income and gains

No taxes are currently levied on corporate income or capital gains.

On 21 February 2024, in his midyear budget statement, the Prime Minister of The Bahamas (in his capacity as Minister of Finance) announced the government's intention to introduce a Qualified Domestic Minimum Top-Up Tax (QDMTT) at a rate of 15%. This QDMTT would be imposed on Bahamian entities that are part of multinational entity groups if the group's revenue exceeds EUR750 million (referred to as "Pillar Two entities"). It was also noted that the proposed QDMTT may entail certain Pillar Two Entities accruing Bahamian corporate income tax with respect to 2024. For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (https://assets.ey.com/content/dam/ey-sites/ey-com/en_gl/topics/tax/tax-pdfs/ey-beps-2-0-pillar-two-developments-tracker.pdf).

C. License fees and other duties

Business license fees. All individuals and resident and nonresident entities seeking to do business within The Bahamas must apply with the regulating authorities and be granted approval for a business license to conduct such activities. Application requirements differ depending on the business activity and entity. The entity must seek approvals from the regulatory authorities, and when applicable, provide the requisite supporting documents, and remit applicable fees to meet the business license application criteria. Foreign entities with no physical presence within The

Bahamas conducting business in The Bahamas, including the provision of digital and/or e-commerce services, are also subject to business license compliance requirements.

For corporations designated as residents for exchange-control purposes, their business revenue in The Bahamas is subject to an annual license fee, which varies according to annual revenue or turnover. Businesses that have annual turnover not exceeding BSD100,000 are no longer required to pay a business license fee. If the turnover exceeds BSD100,000 per year, the fee varies from 0.5% to 1.25%, based on the business annual revenue or gross turnover. Instead of the regular fees, businesses that are insurance companies are subject to a business license fee of 2.25% of gross turnover.

There is a specific exemption in the 2023 Business Licence Bill for investment funds regulated under the Investment Funds Act, 2019 (No. 2 of 2019), and businesses that are pure equity holding entities. For those businesses that are not doing business in or from within The Bahamas, businesses that operate as an investment fund or a pure equity holding company do not require a business license as the 2023 Business License Bill does not specifically apply to them. Financial services entities doing business in or from within The Bahamas are subject to business license fees between 0.25% and 2.25% of gross turnover depending on how they are regulated.

Annual business licenses are renewed annually. Businesses with turnover of BSD250,000 but less than BSD5 million are required to submit a report of turnover prepared by a Bahamas Institute of Chartered Accounts (BICA) licensee in accordance with International Standards on Review Engagements. Businesses with turnover of BSD5 million or greater are required to submit audited financial statements prepared by a BICA licensee.

The occasional business license, which is mainly for approved events, is granted for a period of seven days at a fee of BSD25 per application. The temporary business license is granted to foreign individuals or companies for a fee that equals 1.5% of gross turnover.

As an anti-tax avoidance measure, a subsidiary in The Bahamas is subject to the same business license tax rate as is its parent in The Bahamas.

The deadline for the submission of business license renewal applications is one month following the end of the calendar year of the business. Effective 1 July 2022, subject to transitional provisions, all businesses are required to file on a calendar-year basis. The payment of business license fees must be made within three months following the end of the calendar year (31 March). Together with the payment of business license fees, proof of payment of real property tax must be produced before the license is issued.

Corporations regulated by other specified legislation may not be subject to this fee.

Bank and trust company license fees. Offshore banks and trust companies licensed under the Bank and Trust Companies Regulation Act are subject to license fees, which vary depending

on the value of the assets under management. The Banks and Trust Companies Regulations (Amendment) Act, 2019 revised the license fee structure for Domestic Systemically Important Institutions (DSIIs), which include all retail banks in The Bahamas. DSIIs are assessed a levy of 0.3% and are subject to annual license fees ranging from BSD80,000 to BSD2 million per license. The 0.3% levy is calculated as follows: 0.3% is multiplied by the consolidated total domestic liabilities amount of the DSII less the levy threshold plus the regulatory capital amount equivalent to 16% of the DSII's risk-weighted assets.

International business companies. IBCs pay an annual license fee based on authorized capital. Government fees related to the creation of an IBC equal BSD400 for capital up to BSD50,000 and BSD1,200 for capital over BSD50,000. IBCs were previously not subject to business license fees because their return corresponds to export turnover. However, as of 1 July 2022, export turnover is included in the calculation of turnover. Business license tax is now calculated based on total revenues accruing to businesses from their activities in The Bahamas with no exclusions. In addition, IBCs must obtain an annual business license if they carry on a business in or from The Bahamas, and they may also be subject to value-added tax (VAT) registration if they exceed the BSD100,000 threshold of gross turnover. Generally, IBCs were exempt from all other taxes and stamp duties for a period of 20 years, excluding transactions involving real estate within The Bahamas. However, The Bahamas government enacted the Removal of the Preferential Exemption Act, 2018 in an effort to adhere to international tax leading practices, avoid ring-fencing and remove preferential tax treatment. The previous tax exemptions enjoyed by IBCs expired on 31 December 2021. With the expiration of this legislation, the treatment of IBCs is comparable to domestic companies in that IBCs are subject to compliance and reporting requirements, such as stamp duty and other nominal taxes. IBCs are normally created through corporate service providers that charge separate fees for their services.

Limited duration companies. Limited duration companies (LDCs) pay an application fee of BSD850 and an annual license fee based on authorized capital. LDCs may be classified as partnerships for US tax purposes. By complying with certain formalities, an existing IBC may change its status to an LDC.

Insurance companies. Insurance companies that are incorporated in The Bahamas pay stamp tax on authorized capital (for details, see Section D). They also pay the fees described below.

Resident insurance companies that write local business pay an initial registration fee of BSD1,000.

Restricted offshore insurance companies pay an initial registration fee of BSD2,500 and an annual fee of BSD2,500 in subsequent years. Unrestricted companies pay an initial registration fee of BSD3,500 and an annual fee of BSD3,500 in subsequent years. Offshore insurance companies also pay an annual fee of BSD1,000 for each licensed resident insurance manager who provides underwriting as a service. Offshore insurance

companies are exempt from all other taxes for a period of 20 years from the date of registration.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
VAT on any taxable supply of goods and services, as well as importations; applied at the standard rate, unless an exception applies such as a zero-rating or a VAT exemption; standard and zero-rated supplies allow input VAT recovery on purchases made, but VAT exemption results in input VAT being a cost; the government mandates that nonresident entities who provide e-commerce and/or digital services for which the benefit is obtained in The Bahamas are subject to the provisions of the VAT Act; as a result, they are responsible for charging, collecting, reporting, and paying the relevant VAT at the standard rate in accordance with the VAT Act; this applies to business-to-business (B2B) and business-to-consumer (B2C) transactions; the VAT Act does not differentiate between B2B and B2C transactions the legislation provides limited exceptions; VAT registration is mandatory for a person or business making taxable supplies or taxable importations and having turnover exceeding BSD100,000 in any period of 12 months or less; the legislation also provides for voluntary registration; standard rate	10%
VAT on conveyances, long-term leases and other real property transactions; VAT rate based on value of an assignment or transfer of personality or realty	
BSD100,000 and under	2.5%
BSD100,001 and above	10%
VAT flat rate scheme; suppliers charge standard rate for output and apply flat rate to determine input tax	7.5%
Customs duties, on imported items; exemptions may be granted to businesses licensed under certain legislation; rate varies by type of item	Various
Stamp duty (some of the most common)	
A resolution increasing the capital of a domestic limited company; for every BSD50,000 or fraction thereof	BSD10
Repatriation of substantial profits generated in The Bahamas by trading concerns; tax is imposed on each transfer of funds exceeding BSD500,000 per year if the transfer represents dividends, profits or payments for services rendered by a related party	
Repatriated foreign currency	5%
Repatriated Bahamian dollars	1.5%

Nature of tax	Rate
Transaction, instrument or receipt whereby funds are converted into foreign currency regardless of whether such funds are remitted or transferred out of The Bahamas	1.5%
Leasing, subleasing or licensing of marina slips; tax rate applied to value	
BSD0 to BSD100,000	2.5%
BSD100,001 and above	10%
Real property tax; application of tax varies depending on appraised value, location, nationality of owner and development of property; different categories at progressive rates	Various
National insurance contributions on weekly wages up to BSD710, on monthly wages up to BSD3,077, or on annual wages up to BSD36,924; paid by	
Employer	5.9%
Employee	3.9%

E. Miscellaneous matters

Foreign-exchange controls. Corporations doing business in The Bahamas fall into the categories of resident or nonresident.

A resident company is a company that deals in or holds assets in The Bahamas. Business is carried out in Bahamian dollars. Specified transactions requiring foreign currency need prior approval of the Central Bank of The Bahamas to convert Bahamian dollars into another currency.

A nonresident company is one whose shareholders are not designated residents of The Bahamas and whose principal business activity takes place outside The Bahamas. Bank accounts in all currencies other than the Bahamian dollar can be operated free of any exchange controls. Shares of nonresident companies incorporated under the Companies Act cannot be transferred without the prior permission of the Central Bank of The Bahamas. Exchange-control regulations generally do not apply to companies incorporated under the International Business Companies Act.

Economic substance. The Bahamas enacted economic substance legislation, named the Commercial Entities (Substance Requirements) Act 2018 (CERSA) to comply with the global compliance standards under the Organisation for Economic Co-operation and Development (OECD) Action 5, effective from 1 January 2019. CERSA applies to all entities registered in The Bahamas and captures companies incorporated or registered under the following legislation:

- The Company Act
- International Business Company Act
- Partnership Act
- Partnership Limited Liability Act
- Exempt Limited Partnership Act

CERSA further provides that the following activities serve to qualify for CERSA:

- Banking business
- Insurance business
- Fund management business
- Finance and leasing business
- Headquarters' business
- Distribution and service center business
- Shipping business
- Commercial use of intellectual property
- Holding company or one or more of the company's subsidiaries is engaged in one of the activities mentioned above

The new substance requirements apply to entities that perform certain activities, generally described as relevant activities. These requirements apply to entities engaged in banking, insurance or fund management; headquarter companies; companies engaged in financing and leasing; companies engaged in distribution; service centers; shipping companies; and intellectual property businesses, among others. An included entity carrying on relevant activities must conduct core income generating activities (CIGA) in The Bahamas, which presupposes adequate amounts of annual operating expenditure, levels of qualified full-time employees, physical offices, and levels of board management and control in The Bahamas.

In addition, no included entity may outsource any of its CIGA to an entity or person outside of The Bahamas. Special considerations must be taken into account for holding companies and intellectual property companies. Entities are required to file the requisite form or forms with the Department of Inland Revenue within nine months after the end of the fiscal year in the manner specified by the CERSA. The reporting for 2021 and future years must be submitted within nine months after the fiscal year end of the entity as per the CERSA.

Country-by-Country Reporting. The Multinational Entities Financial Reporting Act, 2018, outlined potential Country-by-Country Reporting (CbCR) requirements for the 2018 year-end. Under Sections 4(1) and 4(2) of this act, constituent entities resident in The Bahamas whose reporting fiscal year began during 2018 were required to provide a certain notification to the competent authority by 31 May 2019. The Country-by-Country Exchange of Information portal was reopened on 16 December 2021 for approximately one month to account for any outstanding year-end filings and notifications. Opening and closing dates for 2021 reporting have not yet been made available. CbCR XML Schema Version 2.0 is also in effect from 1 February 2021. Following the Guidance Notes released in December 2020, only Bahamas-based Ultimate Parent Entities (UPE) and Surrogate Parent Entities of multinational enterprise groups are required to notify and prepare Country-by-Country (CbC) Reports. Constituent Entities in The Bahamas of UPEs elsewhere need only notify the competent authority. Notification is a one-off process and does not need to be submitted annually except that changes must be notified by email before the end of the year in which the change occurred.

Beneficial ownership reporting. Registration under the Beneficial Ownership Act, 2018 (BOSS) was implemented to foster greater

transparency within the global financial sector and align with the OECD and Financial Action Task Force (FATF) recommendations. BOSS provides for a "private" searchable register of beneficial owners, domestic and international companies that operate within The Bahamas and is only accessible to approved authorized persons. Licensees are required to notify the Registered Agent or Registrar General of beneficial owners and provide updated information within 15 days of becoming aware of a change in the beneficial owners and registrable legal entities. Licensees under the following acts are required to comply with the BOSS:

- Bank and Trust Regulations Act
- Investment Funds Act
- Security Industry Act 2011
- The Insurance Act
- The Financial and Corporate Service Providers Act

The following facilities are exempted from the obligation of identifying the beneficial owner:

- A legal entity the securities of which are listed on a regulated securities exchange
- An entity incorporated, registered, continued or otherwise established in accordance with Companies Act (Ch. 308) or International Business Companies Act (Ch. 309) as well as any licensees previously defined (licensees or registrants under the Bank and Trust Regulations Act [Ch. 316], the Investment Funds Act [Ch. 369A], the Security Industry Act 2011 [No. 10 of 2011], the Insurance Act [Ch. 347], the External Insurance Act [Ch. 347], or the Financial and Corporate Service Providers Act [Ch. 363])
- Any other legal entity the Attorney general may exempt by regulations

Failure to comply may result in fines ranging from BSD5,000 to BSD40,000 on summary of conviction and BSD10,000 to BSD250,000 on conviction on indictment. Summary of conviction is only triable in the Magistrate's Court (no jury and limited sentences); however, summary of conviction is triable in the Crown Court with a jury after committal proceedings in the Magistrate's Court and may result in higher penalties if the person is found guilty.

F. Tax treaties

The Bahamas does not have any existing tax treaties. The Bahamas has entered into tax information exchange agreements with various countries.

On 3 November 2014, The Bahamas and the United States signed and released a Model 1 Intergovernmental Agreement (IGA) for the implementation of the US Foreign Account Tax Compliance Act (FATCA).

The Bahamas has committed to adopting the OECD Common Reporting Standard (CRS). Reporting Financial Institutions were expected to report to The Bahamas Competent Authority by 31 August 2018 for the reporting year ended 31 December 2017. The reporting deadline for these submissions is August following the calendar year end; however, the deadline does not presently have a fixed date.

Bahamian-domiciled financial institutions are required to remain compliant with both the FATCA and CRS tax regimes as per the IGAs signed by the Bahamian government.

A. At a glance

Corporate Income Tax Rate (%)	0*
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

* Oil and gas companies are subject to a special income tax (see Section B).

B. Taxes on corporate income and gains

Except for the income tax levied on oil and gas companies, no taxes are levied on corporate income or gains. Oil and gas companies are subject to tax on income derived from the sale of finished or semifinished products manufactured from natural hydrocarbons in Bahrain and from the sale of such raw materials if produced from the ground in Bahrain. The rate of tax is 46%.

C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); the scope of VAT includes supplies of all goods and services made in Bahrain as well as imports; certain supplies are zero-rated or exempt	
Standard rate	10%
Customs duties; effective from 1 January 2003, the customs duties of the Gulf Cooperation Council (GCC) countries (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates) are unified; Bahrain applies the unified tariff in accordance with the Harmonized System codes, issued by the World Customs Organization (WCO); under the unified customs tariff, for all products, except for tobacco and tobacco-related products, customs duties are calculated by applying percentage rates; for tobacco and tobacco-related products, the customs duty equals the higher of an amount calculated by applying a rate of at least 100% to the value of the product or an amount based on the quantity or weight; in general, products are divided into four groups	
Rates for the four groups	Free duty/ 5%/20%/100%/125%
Excise duty; imposed on goods harmful to human health and the environment that are listed by the GCC Financial and Economic	

Nature of tax	Rate
Cooperation Committee	
Carbonated drinks	50%
Energy drinks	100%
Tobacco	100%
Social insurance contributions; collected by the Bahraini social security authorities (the Social Insurance Organization [SIO]); payable on compensation of up to BHD4,000 per month for each employee	
Pension fund contributions; applicable to base salaries and fixed allowances of Bahraini nationals; paid by	
Employer	13%
(The contribution rate for the employer is being increased by 1% on a yearly basis from January 2023 until 2028, when it will reach a rate of 17%.)	
Employee	7%
Insurance against occupational hazard; applicable to base salaries of Bahraini nationals and expatriates; paid by employer	3%
Insurance against unemployment; applicable to base salaries of Bahraini nationals and expatriates; paid by employee	1%
(Non-Bahraini GCC nationals are not covered by the Bahraini social security scheme, as they will continue to be subject to their home country's social security scheme based on the framework agreement signed between all GCC countries (Unified Law of Insurance Protection Extension for the GCC States Citizens Working Outside their Countries in any of the Council State Members). The home country social security contributions will be collected by the SIO and transferred to the home country's social security authorities (details of the process depend on the specific home country.)	
Municipal tax; payable by companies and individuals renting property in Bahrain; the tax rate varies according to the nature of the property and the payer of the utilities (that is, landlord or tenant)	10%
Foreign workers levy; payable monthly by all private and public companies with respect to each employed expatriate	BHD5 for the first five expatriate employees and BHD10 for each additional expatriate employee

D. Miscellaneous matters

Foreign-exchange controls. Bahrain does not impose foreign-exchange controls.

Base Erosion and Profit Shifting. On 11 May 2018, the Organisation for Economic Co-operation and Development (OECD) announced that Bahrain has joined the Base Erosion and Profit Shifting (BEPS) Inclusive Framework (BEPS IF). As a BEPS Associate, Bahrain will be able to work alongside the OECD and G20

countries on developing standards on BEPS-related issues and the implementation of monitoring processes. Bahrain is also now committed to implementing the minimum standards of the BEPS plan, which are Actions 5, 6, 13 and 14. In addition, in line with BEPS Action 5, Bahrain enacted legislation concerning economic substance requirements for certain regulated financial activities, effective from 1 January 2019, as well as for certain non-regulated activities, effective from 1 July 2019. Companies engaged in banking, insurance, fund management, investment holding, financing and leasing, distribution and service center, headquarter companies and intellectual property activities in Bahrain should meet the substance requirements. All in-scope entities are required to file an annual report to the authorities within three months after the end of their financial year. Failing to do so may result in penalties, fines, spontaneous exchange of information and potential deregistration.

In line with the Pillar Two rules on global minimum tax, Bahrain has announced a general intent to introduce corporate income tax beyond the oil and gas sector, as well as Pillar Two laws. There is no public information on the structure or content of such legislation as of now. Additionally, regardless of whether Bahrain introduces corporate income tax/Pillar Two rules, multinationals operating in Bahrain may be exposed to Pillar Two implications in those jurisdictions in which they are present if the jurisdictions have introduced such rules.

Country-by-Country Reporting. In accordance with BEPS Action 13, Bahrain introduced Country-by-Country (CbC) Reporting legislation, which is applicable for fiscal years beginning on or after 1 January 2021. The rules apply to multinational groups with consolidated revenue above BHD342 million (USD907 million). Bahrain-headquartered multinational groups are required to file their CbC Report and notification in Bahrain. Bahrain entities belonging to foreign multinational groups may be subject to CbC notification requirements.

End of service benefit changes for non-Bahrainis/non-GCC nationals. Bahrain implemented a new system for the payment of end-of-service benefits for non-Bahraini employees. The new system requires private sector employers to update their employees' salary details on the SIO portal.

As of 1 March 2024, the end-of-service benefit amounts should be paid to and collected by the SIO on a monthly basis.

The following are the monthly percentages to be collected by the SIO for the end-of-service benefits:
- 4.2% per month in the first three years of employment (zero to three years); that is, half a month's wage per year
- 8.4% per month for each subsequent year of employment (three-plus years); that is, one month's wage per year

The SIO will issue the following two separate monthly invoices to the employer:
- One for the monthly contributions of Bahraini and GCC workers (which is issued under the traditional system and remains unchanged)

- Another invoice for the end-of-service benefits for non-Bahraini and non-GCC employees (per the new end-of-service benefit system)

E. Tax treaties

Bahrain has entered into tax treaties with Algeria, Austria, Bangladesh, Barbados, Belarus, Belgium, Bermuda, Brunei Darussalam, Bulgaria, China Mainland, Cyprus, the Czech Republic, Egypt, Estonia, France, Georgia, Hungary, Iran, Ireland, Isle of Man, Jordan, Korea (South), Lebanon, Luxembourg, Malaysia, Malta, Mexico, Morocco, the Netherlands, Pakistan, Philippines, Portugal, Seychelles, Singapore, Sri Lanka, Sudan, Switzerland, Syria, Tajikistan, Thailand, Türkiye, Turkmenistan, the United Kingdom, Uzbekistan and Yemen.

On 27 November 2020, Bahrain signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (Multilateral Instrument or MLI) and deposited its instrument of ratification of the MLI on 23 February 2022. The MLI will amend tax treaties between Bahrain and other countries listed as Covered Tax Agreements (CTAs), subject to the ratification of the MLI by both Bahrain and the other CTA party and the subsequent entry into force of the MLI. An in-force tax treaty is considered a CTA if both Bahrain and the other treaty jurisdiction are parties to the MLI and have indicated that they wish to modify the agreement using the MLI. The most important impact will be introduction of (or amendments of the existing) clauses related to the principal purpose test and prevention of treaty abuse as well as an enhancement of dispute resolution processes through the mutual agreement procedure to implement BEPS Actions 6 and 14.

Bahrain currently has 26 tax treaties that are CTAs, namely its tax treaties concluded with Barbados, Belgium, Bulgaria, China Mainland, Cyprus, Egypt, Estonia, France, Hungary, Ireland, the Isle of Man, Jordan, Korea (South), Luxembourg, Malaysia, Malta, Mexico, Morocco, the Netherlands, Pakistan, Portugal, Seychelles, Singapore, Thailand, Türkiye and the United Kingdom.

The list of CTAs and MLI effects can be changed, subject to the signing of the MLI by other jurisdictions and/or changes in positions by Bahrain and/or other jurisdictions.

Bahrain has signed tax treaties with the United Arab Emirates and the Hong Kong Special Administrative Region (SAR) in February 2024 and March 2024, respectively. The treaties are not yet in force.

In addition, Bahrain has initialed tax treaty agreements with Guernsey, Liechtenstein and Spain. It is currently in tax treaty negotiations with Jersey, Kyrgyzstan and Latvia. It was also announced in April 2024 that Iraq will start to negotiate a tax treaty with Bahrain.

A. At a glance

Domestic Company Income Tax Rate (%) (a)	
General Rate (b)	
Publicly Traded	20/22.5 (c)
Non-Publicly Traded	27.5 (c)
Banks, Insurance Companies and Financial Institutions	
Publicly Traded	37.5
Non-Publicly Traded	40
Capital Gains Tax Rate (%)	15
Branch Tax Rate (%)	27.5 (c)
Withholding Tax Rate (%) (d)	
Dividends	
Paid to Domestic and Nonresident Companies	20 (e)
Paid to Residents Other than Domestic Companies	10/15
Paid to Nonresident Funds and Trusts	20 (e)
Paid to Nonresidents Other than Companies, Funds and Trusts	30 (e)
Interest	
Paid to Residents	10
Paid to Nonresidents	20 (e)
Royalties from Patents, Know-how, etc. and Technical Services Fees	
Paid to Residents	10/12 (f)
Paid to Nonresidents	20 (e)
Branch Remittance Tax	20
Net Operating Losses (Years)	
Carryback	0
Carryforward	6 (g)

(a) For other corporate income tax rates, see *Rates of corporate tax* in Section B.
(b) A surcharge of 2.5% is imposed on the business income of manufacturers of cigarettes, bidi, zarda, gul and other tobacco products.
(c) The 20% rate applies to publicly traded companies that have had more than 10% of their paid-up capital transferred through an initial public offering (IPO). The 22.5% rate applies to publicly traded companies that have had 10% or less of their paid-up capital transferred through an IPO. Each tax rate will be 2.5% higher if income, receipts, expenses and investments over

BDT500,000 per transaction and totaling over BDT3,600,000 annually are not received or paid through a banking channel.

(d) A Tax Identification Number (TIN) is a unique number assigned to a taxpayer in Bangladesh on registration with the Bangladesh tax authorities. The TIN is a unique 12-digit code allotted to each person. The TIN is a mandatory requirement for filing a tax return in Bangladesh. If an income recipient fails to furnish its TIN, tax must be withheld at a rate of 50% higher of the rate specified in the relevant provision of the Income Tax Act, 2023 (ITA).

(e) Taxes withheld from dividends, interest, royalties and technical services fees paid to nonresidents are treated as a minimum discharge of tax liability on such income under the domestic tax laws and no refunds, adjustments or set-offs of such taxes are permitted. The ITA provides that in determining corporate income tax liability in Bangladesh, a nonresident company may apply the tax treaty rate if it is more beneficial to the nonresident, subject to receiving a specific tax withholding order from Bangladesh tax authorities.

(f) For residents, the withholding tax rate on royalties and technical services fees is 10% if the base amount does not exceed BDT2,500,000 and 12% if the base amount exceeds BDT2,500,000. For this purpose, the base amount is the higher of the contract value, the bill or invoice amount, or the payment amount.

(g) Losses may be carried forward (except in the case of minimum tax payable or exemption/reduced tax rate). Unabsorbed depreciation may be carried forward indefinitely to offset taxable profits in subsequent years.

B. Taxes on corporate income and gains

Corporate income tax. For corporate income tax purposes, a "company" is defined in the Companies Act, 1994 (Act No. 18 of 1994), and includes the following:

- The liaison office, representative office or branch office of a foreign establishment
- Any permanent establishment of any foreign entity or person
- Any association or organization registered by or under the laws of any country outside Bangladesh
- Any bank, insurance or financial institution
- Any industrial and commercial organization, foundation, society, co-operative society and any educational institution
- Any organization registered with the Non-governmental Organization (NGO) Affairs Bureau or the Microcredit Regulatory Authority
- Any firm, partnership, joint venture or association of persons, by whatever name called, if any such person is a company or foreign entity within the meaning of the Companies Act, 1994
- Statutory public authorities, local authorities and autonomous bodies
- Any entity established or constituted by or under any law for the time being in force
- All entities other than natural persons, firms, associations, trusts, Hindu undivided families and funds
- Not incorporated by or under any act, any foreign associations or bodies that may, by the National Board of Revenue (NBR), by general or special order, be declared a company for the purposes of the Companies Act, 1994

For Bangladesh income tax purposes, company income comprises the following:

- Income from rent
- Agricultural income
- Income from a business or profession
- Capital gains
- Income from financial assets
- Income from other sources

A company is considered to be resident for tax purposes if it is a Bangladeshi company (that is, the company registered in Bangladesh or if a company's control and management of its affairs is situated wholly in Bangladesh in that year).

A company resident in Bangladesh is subject to tax on its worldwide income, unless the income is specifically exempt. A company not resident in Bangladesh is subject to Bangladesh tax on Bangladesh-source income and on income received or deemed to be received in Bangladesh.

Rates of corporate tax. The following are the corporate income tax rates in Bangladesh.

Nature of company	Rate (%)
Resident companies	
Publicly traded companies	
General rates	20/22.5
Banks, insurance companies and financial institutions	37.5
Non-publicly traded companies (private limited companies)	
General rate	27.5/30 (a)
Banks, insurance companies and financial institutions	40
Mobile phone operator companies	45
Merchant banks	37.5
Cigarette manufacturing companies	45
Tobacco goods manufacturing companies (including Bidi, Gul and Jorda)	45
One-person companies	27.5/30 (a)
Nonresident companies	27.5 (b)

(a) The 27.5% rate applies if required conditions are satisfied.
(b) A branch profit tax is imposed on profit remittances of nonresident companies.

The ITA provides that in determining corporate tax liability in Bangladesh, a nonresident company may apply the tax treaty rate if it is beneficial to the nonresident, subject to receiving a specific tax withholding order from Bangladesh tax authorities.

Tax incentives. Tax incentives available in Bangladesh are described below.

Tax holidays or exemptions are available for the following:
- Newly set up industrial undertakings
- Identifiable expansion units
- Physical infrastructure facilities (for example, water treatment plants, solar energy plants and compressed natural gas and liquefied national gas transmission and terminal lines)
- Computer hardware
- Compressors, including spare parts
- Active pharmaceuticals ingredients and radio pharmaceuticals
- Agricultural machinery
- Automatic brick
- Barrier contraceptives and rubber latex
- Biotechnology-based agricultural products/agro-products
- Furniture

- Home appliances (for example, rice cookers, blenders and washing machines)
- Insecticides and pesticides
- Mobile phones
- Toys
- Leather and leather goods
- Light emitting diode (LED) televisions
- Plastic recycling
- Electrical transformers
- Petrochemicals
- Pharmaceuticals
- Textile machinery
- Tissue grafting
- Processing of locally produced fruits and vegetables
- Artificial fiber or manmade fiber manufacturing
- Automobile parts and components manufacturing
- Automation and robotics design manufacturing, including parts and components thereof
- Artificial intelligence-based system design and/or manufacturing
- Nanotechnology-based products manufacturing
- Aircraft heavy maintenance services, including parts manufacturing

The following are rules for the taxation of income from exports until 30 June 2028:

- For an individual, firm (persons who have entered into partnership with one another are called individually "partners" and collectively "a firm") and a Hindu Undivided Family, 50% of the export income is exempted.
- For other taxpayers, the general tax rate is 12%. If the goods are manufactured in a Leadership in Energy and Environmental Design (LEED) certified factory, the tax rate is 10%.
- Tax at a normal rate is applied to export income if a financial penalty is imposed by any government authority for breaching environmental rules.
- The exporter is a TIN holder.
- The above tax exemption facility is not applicable for all types of transportation services, mobile telecommunication services, and internet and internet-related services.

A company registered under the Companies Act that is engaged in garment production, including thread production, dyeing, finishing, coning, cloth making and printing, may qualify for a reduced tax rate of 15% on the income earned from these activities. This benefit is available until 30 June 2025.

Capital gains arising from the sale of government securities are now chargeable to tax (previously exempt from tax before the 2022 Finance Act). If capital gains arise from the transfer of capital assets under a scheme of amalgamation, no tax is charged (subject to conditions prescribed).

Income from the export of handicraft between July 2022 and June 2024 is entitled to tax exemption.

Income from the business of certain information technology services, such as software development, information technology process outsourcing, information technology support and

software maintenance services, and cybersecurity services, is exempt from tax until June 2024.

Tax exemption. Dividend income received by a company resident or nonresident in Bangladesh is exempt from tax if the company distributing such taxed dividend has maintained a separate account for the taxed dividend.

Minimum tax. The tax deducted or collected under specified sections of the ITA is considered minimum tax.

The minimum tax for all companies and for firms with annual gross receipts of more than BDT5 million are calculated by applying the following percentages to the annual gross receipts.

Type of company	Percentage
Manufacturers of cigarettes, bidi, chewing tobacco, smokeless tobacco or other tobacco products	3%
Carbonated beverages	3%
Mobile phone operators	2%
All other companies	0.6%

In addition, the 2022 Finance Act has extended the applicability of minimum tax to certain taxes, which should be deducted on receipts (that is, the person responsible for the sale of goods or services is liable to collect tax from the buyer at the time of such sale of goods or services and deposit it with the tax authorities). The following are the relevant taxes:

- Tax collected on income remitted from abroad: 10% rate (7.5% for consideration received for contracts on manufacturing, process or conversion, civil work, construction, engineering or works of a similar nature)
- Tax collected from motor vehicles plying commercially: rates are various fixed amounts
- Tax collected from the wheeling charges on electricity: 3% rate
- Tax collected from inland ships: rates are certain amounts of BDT per passenger or gross tonnage

The rate of minimum tax for industrial undertakings engaged in the manufacturing of goods is 0.1% of gross receipts for the first three years of production.

If the taxpayer has income that is exempt from tax or is subject to a reduced rate, special rules apply.

If the regular tax is higher than the minimum tax, the regular tax is payable.

No refunds, adjustments or setoffs of minimum tax is allowed.

Capital gains. Capital gains derived from the transfer of capital assets is taxable at a rate of 15%.

Capital assets include property of any kind held by a taxpayer, regardless of whether the asset is connected to a taxpayer's business or profession, with the exception of the following:

- Any stock in trade (not stocks and shares)
- Personal effects

The transfer of a share in a company that is not a resident of Bangladesh is deemed to be the transfer of an asset located in Bangladesh to the extent that the value of the share transferred is

directly or indirectly attributable to the value of any assets in Bangladesh. Under the circular, "The Offshore Indirect Transfer Rules 2022," detailed provisions have been introduced for indirect transfers.

In computing capital gains, deductions are made from the sales proceeds or the fair market price (whichever is higher) of the capital assets.

Capital gains arising on shares listed in the stock exchange and unlisted shares are taxable at a rate of 15% for nonresidents.

The transfer of shares of a company may not take place unless the relevant tax on capital gains, if any, arising on such transaction is paid.

Capital losses can be carried forward and set off against income from capital gains derived during the next six successive tax years.

The tax deducted by the local custodian (at a rate of 15%) from capital gains of nonresident investors is generally deemed to be the minimum tax applicable to such nonresidents in Bangladesh. Before the 2022 Finance Act, such nonresidents were not subject to any other compliance obligations, such as tax registration and filing of an income tax return, if they did not have a permanent establishment in Bangladesh.

The 2022 Finance Act removed provisions under the Bangladesh income tax law that relaxed the obligation of nonresident companies without a permanent establishment in Bangladesh to file an income tax return in Bangladesh. For further details regarding the changes introduced by the 2022 Finance Act, see *Administration*.

Withholding tax. Payment to resident companies are subject to the following withholding taxes.

Payment	Rate (%)
Dividends	20
Interest	10 (a)
Royalties	10/12 (b)
Fees for technical services	10 (c)
Payments on the supply of goods and the execution of contracts	3/5/7 (d)
Other miscellaneous services not specifically mentioned in the ITA	10 (c)

(a) Withholding is not applicable in the case of interest on loans taken from banks or nonbanking financial institutions.
(b) The 10% rate applies if the amount of the payment does not exceed BDT2,500,000. The 12% rate applies to other payments.
(c) The limit of BDT2,5000,000 has been removed by the 2022 Finance Act and the rate is now dependent on the nature of the transaction.
(d) The applicable rate depends on the amount of the payments.

Payments to nonresident companies are subject to the following withholding taxes.

Payment	Rate (%)
Dividends	20
Companies, funds or trusts	20
Other than companies, funds or trusts	30
Interest	20

Payment	Rate (%)
Royalties and fees for technical services	20
Supply of goods and execution of contract	7.5
Payments for services not mentioned above	20
Any other payments	20

No tax is deducted at source from interest on foreign loans up to 31 December 2024 as per circulars issued.

Taxes withheld from the income of nonresidents is the minimum tax liability for such payments, and no refunds, adjustment or setoffs of such taxes are allowed.

If a nonresident believes that because of a tax treaty or any other reason, the nonresident is not liable to pay any tax in Bangladesh, or is liable to pay tax at a reduced rate, the Bangladeshi tax authorities may issue a certificate to the effect that the payments to the nonresident shall be made without any deduction or, in applicable cases, with a deduction at reduced rate as mentioned in the certificate.

A recommended timeline of 30 days is prescribed by the tax authorities for the issuance of a nil or lower withholding certificate with respect to an application filed by a nonresident for obtaining treaty benefits or for any other reason.

Administration

Tax year. Under the ITA, the mandatory income year is the 12-month period commencing from the first day of July of the relevant year. However, for the purpose of consolidation of accounts, if a subsidiary company or a liaison or branch office in Bangladesh desires to follow the financial year of its parent company, the approval of the Jurisdictional Tax Officer is required.

Income tax filing and payment process. The ITA requires that the income tax return be filed by the 15th day of the 7th month following end of income year (or 15 September following the end of the income year if such 15th day falls before 15 September). Consequently, companies with an income year running from 1 July through 30 June must file the income tax return by 15 January of the subsequent year.

There are no provisions for obtaining an extension for filing an income tax return.

Before the 2022 Finance Act, a nonresident company without a permanent establishment in Bangladesh was exempt from the obligation of filing an annual income tax return in Bangladesh.

The 2022 Finance Act removed provisions under the Bangladesh income tax law that relaxed the obligation of nonresident companies without a permanent establishment in Bangladesh to file an income tax return in Bangladesh. For further details regarding the changes introduced by the 2022 Finance Act, see *Administration*.

There were expectations that tax authorities would issue certain clarifications or guidance on the applicability of the above provisions to nonresidents; however, no guidance has yet been issued by the tax authorities. In the absence of any clarifications, there are contrary views and interpretations regarding filing income

tax returns in Bangladesh by a nonresident without a physical presence in Bangladesh.

In addition, under the ITA, a person is required to furnish, among other items, proof of an income tax return submission for opening and maintaining fixed deposits exceeding BDT1 million.

An electronically generated tax identification number (eTIN) is a prerequisite for filing an income tax return in Bangladesh. Practical challenges currently exist for nonresidents without a physical presence in Bangladesh (for example, a liaison office or branch office) to obtain an eTIN. The Bangladesh tax administration has neither issued any explanation nor amended the current mechanism for nonresidents obtaining an eTIN without a physical presence in Bangladesh.

Advance payment of tax. Every taxpayer is required to pay advance tax in four equal installments on 15 September, 15 December, 15 March and 15 June of each year if the most recently assessed income exceeded BDT600,000. A penalty and interest are imposed for default in payment of an installment of advance tax. If advance tax paid is less than 75% of the assessed tax, the taxpayer must pay simple interest at a rate of 10% per year on the difference between 75% of assessed tax and the advance tax paid.

Foreign tax relief. Foreign tax relief for the avoidance of double taxation is governed by tax treaties with several countries. If no such treaties apply, resident companies may claim a foreign tax credit for the foreign tax paid under domestic law provisions.

The amount of the credit allowed for foreign tax against Bangladesh tax with respect to any type of income may not exceed the amount calculated by applying the average rate of such tax to the doubly taxed income.

A claim for a foreign tax credit must be made to the Deputy Commissioner of Tax of the district in which the claimant is subject to income tax.

The average rate of tax is the rate arrived at by dividing the amount of tax calculated on total income by such income.

C. Determination of trading income

General. All income classifiable under the head "Income from business or profession" is computed in accordance with the method of accounting regularly employed by the business or profession.

The company determines the income from business or profession and resulting tax liability based on its financial result reported in statutory profit and loss account, and after applying adjustments (upward and downward) as provided by the ITA.

The tax under the head "Income from house property" is payable with respect to the annual value of any property, whether used for commercial or residential purposes, consisting of any buildings, furniture, fixtures, fittings and similar items, and lands appurtenant thereto, of which the taxpayer is the owner, other than such portions of the property as the taxpayer may occupy for the

purposes of any business or profession carried on by the taxpayer, the income from which is assessable to tax under the ITA.

Business-related expenses are deductible; capital expenditures and personal expenses are not deductible.

Expenses from which taxes are required to be withheld are not allowable as deductions until the required taxes have been withheld and paid to the government.

Salary and remuneration, other than by crossed check or bank transfer, paid to an employee are disallowed in determining the taxable income of the employer.

An expenditure exceeding BDT1 million paid by an employer with respect to perquisites, as defined in the domestic tax law, to an employee is disallowed in determining the taxable income of the employer.

An expenditure exceeding 10% of the net trading profits disclosed in the statement of accounts as "head office expenses" or "intra-group expenses," or under another name, by a company not incorporated in Bangladesh under the Companies Act is disallowed.

Any "promotional expenditure" exceeding 0.5% of business turnover is disallowed. "Promotional expenditure" is defined as business expense claimed against provision of goods, money or other benefits to any person for the purpose of business but does not include advertising expenses.

An expenditure for overseas traveling exceeding 0.5% of the turnover disclosed in the statement of accounts is disallowed. However, the disallowance does not apply if evidence is produced in support of the additional figure calculated under the relevant provisions of Bangladesh income tax laws and the commercial reasonableness thereof is proved.

Payments of royalties, technical service fees and certain other payments exceeding 10% of the "net business profit" disclosed in the statement of accounts are disallowed. For this purpose, the term "net profit" means net profit from a business or profession, excluding any profit or income of a subsidiary, associate or joint venture.

Depreciation allowances. Business fixed assets that are depreciable for financial accounting purposes are also depreciable for corporate income tax purposes, subject to the tax rules discussed below.

A depreciation allowance may be claimed for any asset owned by a taxpayer and used for the purpose of the business or profession carried on by the taxpayer.

For building, machinery, plant or furniture not wholly used for the purpose of the business or profession, the depreciation allowance is restricted to the proportional part of the amount that could be claimed if such building, machinery, plant or furniture were wholly so used for such purpose.

A depreciation allowance may not be claimed for assets unless the particulars substantiating such claim are filed with the tax

authority at the time of the filing of the income tax return and if such assets are used during the year.

Depreciation is calculated using the declining-balance method and is allowed on classes of assets. Depreciation rates vary according to the class of assets. The following are the general rates.

Class of asset	Rate (%)
Plant and machinery*	10
Office equipment	10
Buildings*	
General	5
Factory	10
Furniture and fittings	10
Computer and computer equipment	25
Imported computer software	10
Bangladesh computer software	20

* Subject to the fulfillment of prescribed conditions, initial depreciation equal to 10% of the actual cost is allowed in the first year with respect to buildings and 25% with respect to plant and machinery (other than ships and motor vehicles) if they are not used for hire.

For passenger motor vehicles or sedan cars not used for hire, the actual cost to the taxpayer is deemed not to exceed BDT3,000,000.

Relief for losses. Business losses, excluding losses resulting from unabsorbed depreciation of business assets (see below), may be carried forward to be set off against taxable income derived from business in the following six years.

Unabsorbed depreciation may be carried forward indefinitely to be set off against taxable income of subsequent years.

Losses under the heading "Capital Gains" (that is, resulting from transfers of capital assets) may be set off against capital income only and can be carried forward for six years to be set off against capital gains.

Taxability of the disallowances made under specified sections of the ITA are deemed as business income, regardless of whether the entity has incurred an overall business loss or has business profits and regardless of the minimum tax paid by the entity. Consequently, in the case of a loss-making entity, tax is separately payable on the amount of the disallowances made under specified sections of the ITA.

Loss sustained by an Association of Person (AOP) under any head of income is permitted to be set off only against the income of the AOP under any other head and may not be set off against the income of the members of the AOP. In addition, any member of AOP is not entitled to carry forward and set off his or her income against any loss sustained by the AOP.

D. Tax for owners of private motor cars

The tax authorities collect advance tax on the registration or renewal of fitness of cars (in the case of vehicles, the transport authorities issue a certificate mentioning the duration for which the vehicles are legally permitted to be used) in the following amounts.

The following are the amounts of the tax for cars and jeeps, which are based on engine capacity.

Engine capacity	Amount of tax (BDT)
Not exceeding 1,500 cc	25,000
More than 1,500 cc but not more than 2,000 cc	50,000
More than 2,000 cc but not more than 2,500 cc	75,000
More than 2,500 cc but not more than 3,000 cc	125,000
More than 3,000 cc but not more than 3,500 cc	150,000
More than 3,500 cc	200,000

The amount of the tax for a microbus is BDT30,000.

The tax is 50% higher for persons who own more than one car in their name or in a joint name. The minimum tax liability for such persons subject to regular income tax is at least equal to the tax collected for the motor car. Tax collected above that amount is not refunded.

E. Miscellaneous matters

Foreign-exchange controls. All cross-border transactions with nonresidents are subject to foreign-exchange controls contained in the Foreign Exchange Regulation Act.

Transfer pricing. Under the transfer-pricing rules, the amount of any income or expenditure arising from an international transaction must be determined based on the arm's-length price.

For this purpose, an international transaction is a transaction between associated enterprises, either or both of which are nonresidents, in any nature of purchase, sale or lease of tangible or intangible assets, provision of service, lending or borrowing of money, or any other transaction having a bearing on the profits, income, losses, assets, financial position or economic value of the enterprise.

Under the transfer-pricing rules, companies having international transactions with associated enterprises must determine the arm's-length price and maintain certain documents if the value of the transactions exceeds BDT30 million in a year. Such companies also need to submit statements of international transactions to the tax authority with the annual income tax return, regardless of the volume of the international transactions. If any transaction is determined not to be at an arm's-length price, the tax authority may determine the price.

A report of chartered accountants or chartered cost and management accountants may be required on notice of the Deputy Commissioner of Taxes in writing if the value of international transactions exceeds BDT30 million in the books during the income year.

F. Treaty withholding tax rates

The table below contains the withholding tax rates that apply to dividends, interest and royalties paid from Bangladesh to nonresidents under the tax treaties in force as of the time of writing. If the treaty provides for a rate lower than the domestic rate, the reduced treaty rate may be applied at source.

	Dividends A %	Dividends B %	Interest (a) %	Royalties %
Bahrain	15	15 (p)	10 (q)	10 (q)
Belgium	15	15	15	10
Canada	15	15	15	10

Non-treaty jurisdictions				
Companies	20	20	20	20
Individuals	10/30	N.A.	0/20/30	20

A Individuals and companies
B Qualifying companies

(a) Some of the treaties provide for an exemption or a reduced rate for certain types of interest, such as interest paid to public bodies and financial institutions, including specified financial institutions, or interest with respect to sales on credit or approved transactions. Such exemptions are not reflected in this column.

(b) The rate applies to dividends paid to a beneficial owner that is a company holding directly at least 10% of the capital of the payer.

(c) The rate applies to dividends paid to a beneficial owner that is a company holding directly at least 25% of the capital of the payer.

(d) The lower rate applies to interest derived by a bank or other financial institution (including an insurance company).

(e) The rate applies to dividends paid to a beneficial owner that is a company owning at least 25% of the voting shares of the payer during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.

(f) The lower rate applies if interest is paid with respect to a sale on credit of industrial, commercial or scientific equipment.

(g) A most-favored-nation clause applies. Under this clause, if Bangladesh enters into a tax treaty with another country subsequent to entering into the treaty with Mauritius and if this treaty provides for a lower rate for dividends than the 10% rate specified under the treaty with Mauritius, such lower rate applies under the Mauritius treaty.
(h) The domestic rate applies. The treaty does not provide a reduced rate.
(i) Interest related to the construction of industrial, commercial or scientific installations or public works is exempt. The 7.5% rate applies to interest received by a bank or other financial institution (including an insurance company), as long as the Netherlands does not levy a withholding tax on interest.
(j) The rate applies to dividends paid to a beneficial owner that is a company holding directly at least 20% of the capital of the payer.
(k) A most-favored-nation clause may apply with respect to royalties.
(l) The rate applies to dividends paid to a beneficial owner that is a company owning at least 3% of the shares of the payer.
(m) The lower rate applies to interest derived by a bank or other financial institution (including an insurance company) and interest paid with respect to a sale on credit of industrial, commercial or scientific equipment or merchandise.
(n) On 15 January 2021, a double tax treaty between Bangladesh and the Czech Republic entered into force. The treaty is effective from 1 July 2021 in the case of Bangladesh and 1 January 2022 in the case of the Czech Republic.
(o) On 30 August 2023, a double tax treaty between Bangladesh and the Hong Kong Special Administrative Region (SAR) entered into force. The treaty is effective from 1 July 2024 in the case of Bangladesh.
(p) The tax charged shall not exceed 10% if the recipient is a beneficial company that directly holds at least 10% of the capital of the company paying the dividends.
(q) The tax charged shall not exceed 10% if the recipient is the beneficial owner.

Barbados is a member country of the Organisation for Economic and Co-operation and Development (OECD)/G20 Inclusive Framework on Base Erosion and Profit Shifting (BEPS) to tackle tax avoidance, improve the coherence of international tax rules, ensure a more transparent tax environment and address the tax challenges arising from the digitalization of the economy. As part of the new two-pillar plan to reform international taxation rules, which includes the proposal of a global minimum tax of 15%, to address the incentives to shift profits to lower tax regimes and ensure that multinational enterprises pay a fair share of tax wherever they operate, Barbados is in the process of reforming its tax system. In view of the pending changes to the local law, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	9 (a)
Capital Gains Tax Rate (%)	0
Withholding Tax (%)	
Payments to Nonresidents	
Dividends	5
Dividends from Untaxed Profits	25
Dividends from Foreign-Source Income	0
Interest	0
Royalties	0

Branch Remittance Tax	
Paid Out of Domestic-Source Income	5
Paid Out of Foreign-Source Income	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (b)

(a) This rate applies to all companies generally (including branches of nonresident companies). However, a special regime applies to approved small businesses and certain Constituent Entities of Multinational Enterprise (MNE) Groups. See *Rates of corporate tax* in Section B for further information.

(b) Losses incurred prior to the 2025 income year continue to be available for carryforward up to seven years after the end of the relevant income year.

B. Taxes on corporate income and gains

Corporate income tax. Companies and societies with restricted liability that are resident in Barbados are subject to corporation tax. Resident and domiciled companies are subject to corporation tax on their worldwide income, regardless of whether the income is remitted to Barbados. Resident companies that are not domiciled in Barbados are subject to corporation tax on income derived from Barbados and income from foreign sources to the extent that such foreign income is remitted to Barbados. Nonresident companies carrying on business through a branch pay tax on Barbados-source income only. Income is considered to be Barbados-source if the property that constitutes the source is physically located in Barbados.

A company is considered to be resident in Barbados if its management and control are located in Barbados. The domicile of a company is based on the country of incorporation. Consequently, a company incorporated in Barbados is domiciled there.

Rates of corporate tax. As of the 2024 income year and with effect from 1 January 2024, the following tax rates apply to non-insurance businesses:

- All domestic companies, including branches of nonresident companies, are generally subject to income tax at a rate of 9%.
- Approved small businesses are subject to income tax at a rate of 5.5%.
- Income earned from international shipping is taxed at the following rates:
  - Taxable income up to USD500,000: 5.5%
  - Taxable income between USD500,000 to USD10 million: 3%
  - Taxable income between USD10 million and USD15 million: 2.5%
  - Taxable income over USD15 million: 1%
- A Constituent Entity of an in-scope MNE Group is subject to the following rates if the ultimate parent entity or intermediate

parent entity is located in a jurisdiction that has not implemented top-up tax legislation:
— Taxable income up to USD500,000: 5.5%
— Taxable income between USD500,000 to USD10 million: 3%
— Taxable income between USD10 million and USD15 million: 2.5%
— Taxable income over USD15 million: 1%

Income derived from Barbados government securities by domestic companies is taxed at a rate of 15%.

A branch operating in Barbados pays an additional 5% on its after-tax profits if those profits are remitted or deemed to be remitted to the branch's head office. Branches earning foreign-source income are subject to branch profits tax at a rate of 0%.

Insurance sector. The following are the three classes of licenses for the insurance sector and the rates at which they are taxed:

- Class 1: Insurance companies that restrict the business underwritten by them to related-party business. These insurance companies are taxed at a rate of 0%.
- Class 2: Insurance companies that can underwrite risks of third parties. These companies are taxed at a rate of 2%.
- Class 3: This class includes entities, such as brokers, intermediaries, insurance management companies and insurance holding companies. These entities are taxed at a rate of 2%.

Change in tax base for life insurance companies. Life insurance companies were previously taxed on gross investment income. Effective from the 2020 income year, they are taxed based on net profit before tax, plus or minus certain adjustments for tax purposes. For example, depreciation is added back but capital allowances can be claimed. Changes in actual reserves are now either allowed as a deduction (increases) under Section 10 of the Barbados Income Tax Act or taxable (decreases) under Section 8 of the Act.

Increases in actual reserves are usually capped at an "appropriate amount" for the purpose of the deduction under the provisions of Section 10. Any excess is not deductible in computing taxable income.

There is a one-time, irrevocable election in which unrealized gains and losses arising on mark-to-market securities held by the company can be treated as taxable or deductible when computing taxable income.

Tax incentives. Tax incentives available in Barbados are described below.

Foreign Currency Permit. All entities that earn 100% of their income in foreign currency are entitled to apply for a Foreign Currency Permit, which provides the following benefits:
- Exemption from exchange controls
- Reduced stamp duty and certain property transfer tax exemptions
- Exemption from payment of value-added tax and duties on the importation of plant, machinery and raw materials
- Income tax concessions for specifically qualified individuals

Small Business Development Act. Under the Small Business Development Act, small businesses qualify for the following tax benefits:
- Exemption from withholding tax on dividends or interest paid
- Exemption from import duty on plant and equipment
- Exemption from stamp duty on the execution and registration of financial documents

Only income directly related to the business qualifies for the above tax benefits.

To qualify as a small business, a company must meet the following requirements:
- Its authorized capital does not exceed BBD1 million.
- Its annual sales do not exceed BBD2 million.
- It does not have more than 25 employees.
- It is not a wholly owned or majority-owned subsidiary in a group of companies.

Tourism Development Act. Under the Tourism Development Act, duty-free and income tax concessions are available for approved tourism projects and certain tourism entities. These concessions include the following:
- Exemption from the payment of customs duty on specified items
- Tax deduction equal to 100% of expenditure incurred with respect to the development of a tourism product, tourism research, an apprenticeship scheme or the organization and hosting of tourism exhibitions and trade fairs
- Offset of approved capital expenditure against assessable income
- An investment tax credit (subject to conditions)
- Exemption from withholding tax on dividends paid to shareholders

Special Development Areas Act. Under the Special Development Areas Act, persons carrying out work in designated special development areas in Barbados, as well as persons financing such work, are entitled to certain tax relief. An approved developer is entitled to a reduced corporation tax rate of 30% and exemption from certain taxes, such as the following:
- Import duty, environmental levy and value-added tax on inputs for the construction of new buildings and the renovation or refurbishment of existing buildings
- Charges on the repatriation of interest and capital
- Land tax on the improved value of land
- Property transfer tax on the initial purchase of property

Renewable Energy Incentives. Persons engaged in the development, manufacturing, installation or repair of renewable energy systems and energy-efficient products may be entitled to one or more of the following tax benefits if the required criteria are met:
- 10-year income tax holiday
- Tax deduction of 150% for the following expenditure with respect to the generation, supply and sale of renewable energy, or the installation or supply of renewable energy systems or energy-efficient products:
  - — Interest paid on loans with respect to the construction or upgrading of a property
  - — Expenditure on the training of staff

  — Expenditure on the marketing of products
  — Expenditure on research and development
- 10-year exemption from withholding tax on dividends paid to shareholders

In addition, interest earned by financial intermediaries from financing the development, manufacturing and installation of renewable energy systems and energy-efficient products is exempt from tax for 10 years.

Capital gains. Capital gains are not taxed in Barbados.

Administration. The fiscal (income) year is the period for which the accounts of the business are normally prepared. Tax is calculated on the profits for the accounting period that ends during the fiscal year.

A corporation is required to determine its own tax liability and to prepare and file a corporation tax return. Corporations with year-ends from 1 January to 30 September must prepay tax on or before 15 September and file their returns by 15 March of the following year. If the year-end is after 30 September, the tax must be prepaid on or before 15 December of the income year and 15 March of the following year. The return is filed by 15 June of the following year. Each tax prepayment is based on 50% of the preceding year's tax. Any balance of tax due is paid when the return is filed. Tax returns may be filed using the Barbados Revenue Authority's electronic filing system.

The Revenue Commissioner of the Barbados Revenue Authority may levy a penalty of BBD500 plus 5% of tax payable for failure to file a return. A further penalty of 5% and interest at 1% per month is charged for a failure to pay any tax payable. If a person fails to make a required prepayment of tax, a penalty of 10% and interest at 0.5% per month is charged on the amount of the prepayment.

From the 2024 income year and commencing 1 January 2024, some companies will move to a monthly prepayment cycle. This requirement applies to any company that is part of an MNE Group that has annual revenues of EUR750 million or more in its consolidated financial statements in at least two of the last four fiscal years and whose ultimate parent entity or intermediate parent entity is located in a jurisdiction that has implemented legislation in accordance with the Global Anti-Base Erosion (GloBE) Rules.

Under the monthly prepayment cycle, such companies must prepay corporation tax at a rate of 9% on their taxable income. In this context, taxable income means the taxable income for the income year before the preceding income year, as reported in the company's filed corporate tax returns. The monthly prepayment is calculated as the taxable income multiplied by 9%, net of tax credits, divided by 12. The prepayment is due on the 15th of each month.

Dividends. Dividends received by a resident company from another resident company are not taxable.

Dividends received from a nonresident company are not subject to tax in Barbados if the Barbados company owns 10% or more

of the share capital of the nonresident company and if the shareholding in the nonresident company is not held as a portfolio investment.

Foreign tax relief. A tax credit is allowed for taxes paid to foreign jurisdictions by Barbados resident companies on profits, income or gains earned from such foreign jurisdictions, regardless of whether Barbados has entered into a double tax treaty with the foreign jurisdiction. This credit is allowed up to the amount of the Barbados taxes payable on the income. The foreign tax credit is not permitted to reduce the total tax payable by an entity in Barbados for an income year to less than 1% of its taxable income for that income year. An underlying tax credit is also allowed with respect to foreign dividends if the Barbados company owns at least 10% of the capital of the foreign company. Some form of unilateral relief may be granted on income arising from British Commonwealth countries that provide reciprocal relief.

C. Determination of trading income

General. Taxable income is determined on the basis of accounts prepared in accordance with International Financial Reporting Standards, subject to specific adjustments identified in the Income Tax Act.

Management fees. Management fees paid or payable to nonresidents are not deductible for tax purposes. Management fees include fees for management and/or administrative services provided by a member of a group of companies to other members of the group.

Inventories. The authorities generally accept a method of valuation of inventory that conforms to standard accounting practice in the trade or business, provided it is applied consistently. Average cost or first-in, first-out (FIFO) are the generally accepted methods.

Provisions. Reserves or provisions of a general nature for doubtful accounts receivable are not allowable. However, write-offs of specific amounts or balances are generally allowed.

Tax depreciation. Depreciation and amortization reported in the financial statements are not allowed as deductions in calculating taxable income. However, a company may claim capital allowances. Annual allowances of between 5% and 33$^{1}/_{3}$% are given on the original cost of fixed assets, calculated on a straight-line basis. An annual allowance of 100% is granted with respect to capital expenditure on software. Fifty percent of expenditure on intellectual property is deductible over a 10-year period. In addition, 20% of expenditure on energy audits and the retrofitting of buildings or on the installation of systems to provide electricity from sources other than fossil fuels is deductible over a period of five years.

Relief for losses. With effect from the 2025 income year, losses may be carried forward five years to offset taxable income derived in those years. Tax losses available for offset are restricted to 50% of taxable income in the current year. Losses may not be carried back.

Groups of companies. Group relief will be reintroduced when both the surrendering and claimant company are members of the same group. However, the following companies will be ineligible for group relief:

- Approved small businesses
- Companies granted tax concessions or exemptions under any enactment
- Authorized or exempt mutual funds
- Companies carrying on international shipping business
- Companies carrying on insurance business
- A Constituent Entity whose ultimate parent or intermediate parent is not subject to top-up tax

Group relief will only be available to companies that are subject to a tax rate of 9%.

In general, group relief will be available from the 2025 income year. However, a company with trading losses in excess of BBD100 million that are brought forward from income years prior to 2024 may be eligible to surrender those losses for group relief from the 2024 income year.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on the supply of goods and services in Barbados and on goods imported into Barbados; these include digital services (that is, goods or services purchased by electronic means on the Internet and are for use or consumption in Barbados)	
Standard rate	17.5
Hotel accommodation and supplies related to tourism (The 10% rate was announced by a policy note issued by the Barbados Revenue Authority but has not yet been legislated. It is being applied in practice.)	10
Mobile voice, data and text messaging services	22
Basic food items and exports of goods and services	0
Excise tax, on imports of vehicles; this tax is imposed in addition to the VAT	46.95 to 120
Import duty	5 to 20
National insurance contributions, on monthly insurable earnings up to BBD5,120; paid by	
Employer	12.75
Employee	11.1
Self-employed individual	17.1

E. Miscellaneous matters

Foreign-exchange controls. Foreign-exchange controls in Barbados are administered by the Central Bank, which considers all applications. Certain transactions and routine commercial matters

are delegated to the commercial banks. The Central Bank generally allows the repatriation of funds previously registered as an investment if it has been established that all local tax liabilities have been met. Entities that hold a Foreign Currency Permit are exempted from foreign-exchange controls.

Debt-to-equity rules. Barbados has thin-capitalization rules, which provide for a maximum debt-to-equity ratio of 1.5 to 1. If the debt-to-equity ratio is in excess of the prescribed maximum, restrictions are imposed on the deductibility of interest expense. This applies to interest expenses payable to nonresident entities if the shareholding in the Barbados entity exceeds 10%.

Anti-avoidance legislation. Anti-avoidance provisions may be applied to transactions between related persons that are not carried out at arm's length and to artificial transactions if the primary purpose of the transaction is the reduction of taxable income.

Economic substance. Barbados has economic substance legislation that provides for the imposition of an economic substance test on companies carrying on business in Barbados.

Under this legislation, a resident company that derives income from carrying on certain defined relevant activities must satisfy the economic substance test. For the purposes of the economic substance legislation, a company is resident in Barbados if it meets any of the following conditions:

- It is managed and controlled in Barbados, regardless of its place of incorporation.
- It is a company incorporated outside Barbados and is registered in Barbados as an external company, but it is not regarded as tax resident in the jurisdiction of incorporation.
- It is incorporated in Barbados but is not tax resident in any other jurisdiction.

A resident entity under the economic substance legislation also includes a partnership formed in Barbados that is carrying on one or more relevant activities.

Under the legislation, relevant activities include, but are not limited to, the following:

- Banking business
- Insurance business
- Fund management business
- Finance and leasing business
- Headquarters business
- Shipping business
- Holding company business
- Intellectual property business
- Distribution and service center business

A resident company meets the economic substance test in relation to a relevant activity carried on by a company if it conducts its core income-generating activity (CIGA) in Barbados, and the company is directed, managed and controlled in Barbados in relation to that activity.

A company is considered to conduct its CIGA in Barbados if, having regard to the level of income derived from carrying on of the relevant activity, the following conditions are satisfied:

- There is an adequate number of qualified full-time employees in relation to that activity in Barbados.
- There is an adequate number of employees who are physically present in Barbados in relation to that activity.
- There is adequate operating expenditure incurred in Barbados.
- There are adequate physical assets in Barbados.

In the case of the banking business sector, CIGAs include, but are not limited to, the following:

- Raising funds and managing risk, including credit risk, currency risk and interest risk
- Taking hedging positions
- Providing loans, credit or other financial services to customers
- Managing capital and preparing reports and returns to the Central Bank of Barbados

Entities conducting intellectual property business with high-risk intellectual property (that is, intellectual property acquired from a related party and licensed to other related parties) are presumed to fail the economic substance test. However, this presumption is rebuttable.

Entities in Barbados must file an economic substance declaration annually with the Ministry of International Business within 12 months after the end of each fiscal period.

If an entity fails to meet economic substance requirements, the Ministry of International Business in Barbados may impose a penalty of up to USD150,000 and, if there is a continued failure to meet the requirements, the entity may be removed from the Register of Companies in Barbados.

Country-by-Country Reporting. Barbados has enacted Country-by-Country Reporting requirements, effective from 31 December 2021. Any MNE Group that has a total consolidated group revenue of more than USD850 million as reflected in its consolidated financial statements during the fiscal year, immediately preceding the reporting fiscal year, is required to file a Country-by-Country Report (CbCR) with the competent authority.

A group that has a total consolidated group revenue of less than USD850 million during the fiscal year immediately preceding the reporting fiscal year is considered an "excluded" MNE, which means it is not required to file a CbCR.

The legislation requires each ultimate parent entity of an MNE Group that is resident for tax purposes in Barbados to file a CbCR. Subject to the conditions prescribed in the legislation, the MNE Group may designate one of the constituent entities as a surrogate parent. The surrogate parent entity would then be responsible for filing the CbCR on behalf of all the Barbados tax resident constituent entities of that MNE Group.

An MNE Group includes the following:

- Two or more enterprises for which the tax residences of the enterprises are in different jurisdictions, and are not part of an excluded MNE Group as defined by the legislation
- An enterprise that is resident for tax purposes in one jurisdiction and is subject to tax with respect to the business carried out

through a permanent establishment in another jurisdiction; and is not an excluded MNE Group as defined by the legislation

Any constituent entity of an MNE Group that is resident for tax purposes in Barbados is required, when applicable, to notify the competent authority whether it is the ultimate parent entity or the surrogate parent entity of the MNE Group no later than the last day of the reporting fiscal year of the MNE Group. If a constituent entity of an MNE Group that is resident for tax purposes in Barbados is not the ultimate parent entity nor the surrogate parent entity, it is required to notify the competent authority of the identity and tax residence of the reporting entity no later than the last day of the reporting fiscal year of the MNE Group.

A CbCR must be filed with the competent authority no later than 12 months after the last day of the reporting fiscal year of the MNE group. The first reporting fiscal year is any fiscal year beginning on or after 1 January 2021. Therefore, if an MNE Group's fiscal year end is 31 December, the first reporting fiscal year would run from 1 January to 31 December 2021. The first CbCR will be due for filing on 31 December 2022, and subsequent CbCRs should be filed annually on every 31 December thereafter.

Written guidelines containing directions or specifications with respect to the content, format and method of filing the CbCR have been issued by the competent authority to facilitate the filings.

For making or submitting a false CbCR, there is a penalty of USD25,000 or 10 years of imprisonment or both. A fine of USD5,000 or one year of imprisonment or both in each separate instance of tampering or destroying a report without written authorization from the competent authority and of obstruction of the competent authority in its functions.

There is a penalty of USD5,000 for a failure of an enterprise to comply with the requirements under the legislation and for a failure to pay the penalty within 30 days after receiving notice of a penalty for failure to comply with the requirements under the legislation. The enterprise is liable to a further penalty of USD2,500 for each day or part thereof for which the failure continues after the date on which the original penalty became due and payable.

Qualified Domestic Minimum Top-up Tax. Barbados has introduced a Qualified Domestic Minimum Top-up Tax (QDMTT), which will increase the effective tax rate on the income of qualifying entities to 15%. An entity is a qualifying entity if it satisfies all of the following conditions:

- It is located in Barbados.
- It is a constituent entity of an MNE Group.
- The MNE Group had an annual revenue of EUR750 million or more in the consolidated financial statements of the ultimate parent entity in at least two of the four fiscal years immediately preceding the tested fiscal year.
- It is not an excluded entity.

For the 2024 fiscal year, the QDMTT will only be applicable if the in-scope MNE Group is subject to a top-up tax in another jurisdiction.

Transfer pricing. Barbados is currently developing transfer pricing legislation with an intention to enact such in the short term.

F. Treaty withholding tax rates

The withholding tax rates in the table below apply to payments made to nonresidents of Barbados under the various treaties entered into by Barbados. The treaty rates indicated below represent the maximum rates under the treaties. However, if a lower domestic tax rate exists, the lower rate should be applied. The domestic withholding tax rates are under review and may be subject to change.

	Dividends %	Interest %	Royalties %
Austria	15 (a)	0	0

United States	15 (a)	5	5
Venezuela	10 (h)	15 (p)	10
Non-treaty jurisdictions	5 (q)	0	0

(a) The rate is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payer of the dividends.

(b) The rate is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payer of the dividends.

(c) The Caribbean Community and Common Market (CARICOM) multilateral treaty has been entered into by 10 Member States of CARICOM. The treaty

follows a source-based model of taxation, with double tax relief typically provided in the form of an income exemption in the state of residence.

(d) The rate is reduced to 5% if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.

(e) This treaty is awaiting ratification and entry into force. Consequently, the provisions of the treaty are not yet in effect.

(f) The rate is reduced to 5% if the interest is derived by a bank that is resident in Ghana.

(g) The rate is reduced to 0% if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months before the decision to distribute the dividends.

(h) The rate is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 5% of the capital of the payer of the dividends.

(i) The term "royalties" includes payments derived from the alienation of rights or property that are contingent on the productivity, use or disposition of such property.

(j) The rate is reduced to 0% if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payer of the dividends and if the recipient of the dividends is a company resident in the Netherlands that is not subject to Netherlands company tax on the dividends.

(k) The rate is reduced to 0% for royalties paid for the use of, or the right to use, literary, artistic or scientific works, including royalties with respect to cinematographic films, and films, discs or tapes for radio or television broadcasting.

(l) The rate equals 75% of the statutory nominal rate applicable at the time of the dividend distribution. It is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payer of the dividends.

(m) The rate is reduced to 5% if the interest is derived by a bank that is resident in Panama.

(n) The treaty does not contain an interest article. Consequently, the normal tax rate applies.

(o) The rate is 15% for royalties paid for motion picture or television films.

(p) The rate is reduced to 5% for interest paid to banks.

(q) The rate is reduced to 0% if the dividends are paid out of income earned from foreign sources.

(r) The treaty language is unclear and may be read either as providing an exemption from Barbados withholding tax, or as providing no restriction of Barbados withholding tax. The government has not yet issued guidance as to the correct interpretation.

(s) The rate is reduced to 5% if the beneficial owner of the dividends is a company that directly owns at least 25% of the capital of the company paying the dividends.

(t) The rate is reduced to 0% if the beneficial owner of the dividends is a company that directly owns at least 25% of the capital of the company paying the dividends.

(u) The rate is reduced to 5% for royalties paid for copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for radio or television broadcasting.

(v) The rate is reduced to 0% if the interest is paid to the government of the other contracting state or any agency or instrumentality thereof, including the central bank of that contracting state (subject to certain restrictions).

A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	
Tangible and Intangible Assets	20/25
Shares	20/25 (b)
Branch Tax Rate (%)	25
Withholding Tax (%)	
Dividends	5/10/15/20/30 (c)
Interest	15/30 (d)
Royalties from Patents, Know-how, etc.	30
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (e)

(a) For further details, see Section B.
(b) Certain capital gains are exempt from tax (see Section B).
(c) The standard withholding tax rate for dividends is 30%. For further details, see Section B.
(d) The standard withholding tax rate for interest is 30%.
(e) For further details, see Section C.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their annual worldwide income. Nonresident companies are subject to tax on their annual Belgian-source income only. A company is resident in Belgium if its central management is located in Belgium.

Rates of corporate income tax. The corporate tax rate is 25%. A reduced rate of 20% on the first EUR100,000 of taxable income applies to small companies, as defined under corporate law; above this amount, the normal rate applies. One of the principal conditions for the reduced rate is that the company must pay an annual remuneration of at least EUR45,000 to at least one director. For salaries lower than EUR45,000, the salary should at least be equal to the taxable income. The minimum salary requirement does not apply to startup companies incorporated less than four years prior to 1 January of the tax year.

Minimum taxation (Pillar Two). Belgium implemented the European Union (EU) Pillar Two Directive, in force as from 1 January 2024, applicable for tax years starting on or after 31 December 2023. The new legislation includes the following:

- A Qualified Domestic Minimum Top-up Tax
- An Income Inclusion Rule and Undertaxed Profits Rule (UTPR)
- A transitional Country-by-Country Reporting Safe Harbor as well as transitional UTPR Safe Harbor
- Amendments to certain existing provisions, in particular in relation to the research and development (R&D) tax credit regime, in order to meet the definition of a Qualified Refundable Tax Credit

For further information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (ey-beps-2-0-pillar-two-developments-tracker.pdf).

Notional interest deduction. The notional interest deduction (NID) regime is abolished for tax periods ending on or after 31 December 2023. Changes to the financial year-end (as from 11 October 2022, which is the date on which the budgetary measures were announced) will have no effect on the entry into force of this measure. Carried-forward NID, accumulated in previous taxable periods, may still be deducted going forward.

Tax regime for the diamond industry. Belgian tax law provides for a special lump-sum tax regime for the diamond industry.

The gross taxable result of the company equals 2.1% of the diamond trade turnover. This taxable result is subsequently subject to the application of the common corporate tax rules.

However, the net taxable result cannot be lower than 0.55% of the diamond trade turnover.

The special tax regime is subject to the condition that the company manager's salary paid during the tax period be higher than a certain threshold (also depending on the diamond trade turnover of the company).

Tax incentive for audiovisual investments. Belgian tax law includes a tax incentive to attract investments of Belgian companies or branches in audiovisual productions.

Companies planning to invest in a European audiovisual production (to be recognized by the competent departments of the French, Flemish or German communities) and who want to benefit from the tax incentive must conclude a framework agreement with a qualifying audiovisual production company (including a television channel). In this framework agreement, the expected tax value for the production, which is based on the budgeted production expenses (direct as well as indirect expenses, including expenses incurred up to six months before the conclusion of the framework agreement), needs to be included. The estimated tax exemption is based on this tax value. The framework agreement needs to be notified to the tax authorities within one month after it is signed and before completion of the qualifying work.

The invested amounts must be effectively paid to the production company within three months after the contract is signed. They do not create a receivable, nor exploitation rights linked to the underlying project. The invested amount is irrevocably paid to the production company (as an expense; the expense as such is not tax deductible) and is not regarded as an asset. Except for commercial gifts with limited value (under reference of value-added tax [VAT] legislation), no other economic or financial benefit can be granted to the investor.

The investors are entitled to a tax exemption of 421% of the invested funds. For a specific project, the exemption is limited to 203% of the expected final tax value of the tax-shelter certificate as specified in the framework agreement.

However, the exemption in a given tax year remains limited to a maximum of 50% of the investor's increase of taxable reserves (mainly the net accounting profit before application of the tax-shelter exemption but after deduction of distributed dividends and other tax corrections) during that same tax year, with an absolute maximum of EUR1 million.

In the financial statements of the investor, the exempt amounts must be recorded as an "unavailable reserve," which needs to be maintained until the date the tax-shelter certificate is received.

In principle, the exemption is granted in the year in which the framework agreement is concluded or the payments are made. Excess exemptions (exemptions that could not be used based on the above maximum) can be carried forward to the end of the fourth tax period following the year in which the framework agreement is signed.

The tax exemption is obtained immediately but is not definitive, and only becomes final if a number of conditions are met. The exemption only becomes final when a tax-shelter certificate confirming the tax value of the investment is issued by the tax authorities on request of the production company as soon as the production is finalized. The certificate must be sent to the tax authorities of the investor as an enclosure to the investor's corporate income tax return. The certificate needs to be received by the

investor by 31 December of the fourth year following the year in which the framework agreement is signed.

In addition, the final exemption is only granted to the extent that the tax value of the certificate corresponds to the value that was included in the agreement and to the extent that the limits and maximum amounts per tax period are respected. If the tax-shelter exemption is claimed incorrectly, corporate income tax on the difference becomes due, increased with late payment interest.

For the period between the first payment after the conclusion of the framework agreement and the receipt of the tax-shelter certificate, interest can be granted. This period is legally limited to 18 months, and the maximum interest rate that is allowed is fixed at the 12-month Euribor (increased by 450 basis points).

Tax incentive for stage art performances. The tax incentive for audiovisual investments also applies to "European stage art performances" (productions recognized as such by the competent authorities of the French-, Flemish- or German-speaking communities).

To qualify, the production expenses must be incurred within a maximum time limit of 24 months from the date of the signing of the framework agreement and no later than one month after the premiere (being the first performance in the European Economic Area (EEA) taking place no later than two months after the first tryout for framework agreements concluded after 1 August 2022). Expenses incurred before the signing of the framework agreement are not considered eligible production expenses (in contrast to the audiovisual productions' time frame of six months).

In addition, as is the case for audiovisual productions, limitations apply with respect to the maximum amount that can be financed through tax-shelter funding. This amount is calculated based upon the eligible direct and indirect expenses incurred in Belgium and/or the EEA.

From the investor's side, the same limitations apply with respect to the maximum amount of the exemption in a given tax year (an absolute maximum of or EUR1 million and limited to 50% of the increase in taxable income). In this respect, investments in audiovisual productions and stage art performances should be counted together and offset against these limitations.

The entity that is using the tax-shelter funding is subject to corporate income tax. This is particularly important for entities (such as nonprofit organizations) that are in principle only subject to a so-called legal entity tax. These entities are subject to corporate income tax in the tax year in which the first framework agreement is concluded and in the three following tax years.

Tax incentive for video games. The tax-shelter regime for the audiovisual sector and the performing arts is extended to the gaming industry and applicable to framework agreements signed as from 1 January 2023.

To qualify, the production expenses must be incurred within a maximum time limit of 24 months since the date of the signing of the framework agreement and no later than three months after

realization of the final version, as it is first offered for sale. Expenses incurred up to six months before the conclusion of the framework agreement are not eligible.

The exemption in a given tax year remains also limited to a maximum of 50% of the investor's increase of taxable reserves during that same tax year, with an absolute maximum of EUR1 million.

For video games, the total amount of all tax shelter attestations is limited to a maximum of EUR2,500,000 per video game with a maximum development period of four years.

Capital gains. Capital gains derived from the disposal of tangible and intangible assets are taxed at the ordinary rate. Tax deferral is possible if certain conditions are met.

Capital gains on shares are exempt if all of the following conditions are met:
- The subject-to-tax (STT) requirement for the application of the dividend-received deduction (DRD) (see *Dividends*)
- The minimum holding requirement (uninterrupted period or at least one year) of the DRD (see *Dividends*)
- The minimum shareholding requirement of at least 10% or EUR2,500,000

If there is at least one condition not met, the ordinary tax rate of 25% (20% for SMEs) applies.

A reduced rate of 15% applies to capital gains on shares in companies holding real estate (unless the general anti-avoidance rule applies). Any capital losses on these shares are generally not tax deductible, except to the extent of the loss of fiscally paid-up capital in a liquidation.

Capital gains realized on an exchange of shares in a tax-neutral restructuring are exempt from tax under certain conditions.

Administration. A tax year refers to the year following the financial year if the financial year ends on 31 December. If the financial year ends before 31 December, the tax year refers to the year in which the financial year closes. Consequently, the 2024 tax year relates to a financial year ending between and including 31 December 2023 and 30 December 2024.

To avoid a surcharge (6.75% for the 2024 tax year and 9% for the 2025 tax year), tax must be paid in advance in quarterly installments. The balance of tax payable is due within two months after receipt of the notice of assessment. A similar tax prepayment system has been installed for the tax due under the Qualified Domestic Minimum Top-up Tax and/or the Income Inclusion Rule.

Reporting obligation for payments to tax havens. Both resident and nonresident companies are required to report all direct or indirect payments (regardless whether these payments are expenses) in excess of EUR100,000 made to beneficiaries with an address or financial account in "tax havens." To avoid abuse, short-term debts are also considered when calculating the threshold.

For the purpose of this obligation, a country is considered to be a "tax haven" if it is mentioned on one of the following lists:

- Belgian prohibited list of countries with zero or low taxation
- European prohibited list of non-cooperative jurisdictions
- List of the Organisation for Economic Co-operation and Development (OECD) Global Forum on Transparency and Exchange of Information for Tax Purposes, including countries that are "non-compliant" or "partially compliant" with the minimum OECD standards regarding the exchange of information on request (EOIR or transparency standard)

It is sufficient for the reporting obligation to be triggered when the country is on one of the above prohibited lists at the moment the payment is made. It is therefore not required for the country to be qualified as a tax haven during the entire tax period in which the payment is made.

The rules apply to payments to the following:

- Branches located in a tax haven, but with a head office in a listed state.
- Permanent establishments located in such jurisdictions. Payments made to an establishment in a non-tax haven are also targeted if the head office of that establishment is located in a tax haven.
- Bank accounts managed by or held with individuals or permanent establishments located in such jurisdictions.
- Accounts managed by or held with credit institutions or their permanent establishments located in such jurisdictions.

A specific reporting obligation for financial institutions requires financial institutions to automatically and periodically notify their operations with and payments to tax havens.

The payments must be reported in euros on a special form, which must be annexed to the annual corporate income tax return. These payments are tax deductible only if they relate to real and genuine transactions and if they are made to persons that are not artificial constructions.

Extended investigatory and assessment periods up to 10 years apply in cases in which use was made of legal structures in tax havens, aimed at hiding the origin or the existence of capital.

Country-by-Country Reporting. Qualifying multinationals must fulfill transfer-pricing documentation requirements (Master File, Local File and Country-by-Country Reporting [CBCR]).

Public CBCR. Belgium has introduced CBCR, applicable to financial years starting on or after 22 June 2024. The new rules are implemented through incorporation in the Belgian Code for Companies and Associations (BCCA), although some key elements are yet to be addressed through a Royal Decree. To a large extent, the new law mirrors the provisions of the EU Public CbCR Directive in terms of the scope of the Public CbCR requirements for (Belgian) undertakings, as well as the specific publication requirements (that is, by when, where and by whom the publication should be made). Furthermore, the BCCA also provides a new set of penalties for noncompliance with the new Public CbCR requirements and requires auditors to include a statement in their audit report with respect to Public CbCR.

Reporting obligation for remuneration paid or attributed by foreign entities. Belgium has introduced additional reporting and withholding tax requirements for all Belgian employers with respect to remuneration paid or attributed by a foreign parent company or affiliate (mostly share-based incentive programs).

Reporting obligations for digital platforms. The DAC7 transparency rules are implemented into Belgian domestic law. As from 1 January 2023, digital platform operators have an obligation to report revenue (including royalties) earned by sellers and services through a digital platform. The information will be exchanged automatically between all of the impacted EU Member States.

Advance rulings. An advance decision in tax matters (tax ruling) is a unilateral written decision by the Belgian tax authorities at the request of a (potential) taxpayer about the application of the tax law in a specific situation that has not yet occurred, as described by the taxpayer. The purpose of such a ruling is to provide up-front certainty to the taxpayer.

The tax authorities must respond to a ruling request within a three-month period, which may be extended by mutual agreement. A ruling may be valid for a period of five years, except innovation deduction rulings for software that are only valid for three years.

However, advance rulings are not issued in certain circumstances such as the following:
- Transactions that have already been implemented or that are in a tax litigation phase
- Transactions that lack economic substance in Belgium
- Transactions, essential parts of which involve tax havens that do not cooperate with the OECD
- Application of the minimum taxation (Pillar Two) rules

Ruling requests filed with the Belgian tax authorities that relate to multinational investments and transactions must disclose other ruling requests filed in EU or treaty countries regarding the same matters.

In principle, the advance rulings are published.

Belgium also implemented the directives relating to the automatic and compulsory exchange of cross-border tax rulings and advance pricing arrangements (DAC3).

Dividends. A 100% DRD applies to dividends received by a qualifying Belgian company or Belgian branch. To qualify for the DRD, dividends must meet all of the following requirements:
- The recipient company (shareholder) must own a minimum participation of 10% of the share capital or a participation with an acquisition value of at least EUR2,500,000.
- The shares must be held by the shareholder (in full ownership) for an uninterrupted period of at least one year.
- The company distributing the dividends must be a normally taxed company. Companies located in countries applying a significantly more advantageous tax regime are explicitly excluded from the DRD, as well as companies located in countries included in the EU prohibited list of non-cooperative tax jurisdictions (for dividends paid or attributed on or after January 2021).

In the case of insufficient profits, the excess DRD can be carried forward indefinitely to the extent that it relates to qualifying dividends. However, a general limitation on certain tax deductions, including the carried forward excess DRD applies (see *Limitation on certain tax deductions* in Section C). In addition, limitations may apply in cases of restructurings and changes of control. The DRD cannot be offset against several types of disallowed expenses as well as against part of the taxable basis, derived from abnormal or benevolent advantages, by a resident company or branch from a related entity.

The standard withholding tax rate for dividends is 30%, but exemptions and reduced withholding tax rates are applicable under Belgian law or tax treaties.

As a consequence of the implementation of the EU Parent-Subsidiary Directive, no withholding tax is due on dividends distributed to a Belgian company or a company, resident of another EU Member State or a country with which Belgium has concluded a tax treaty containing an exchange-of-information clause, that owns at least 10% of the shares for an uninterrupted period of one year.

A 30% withholding tax is also imposed in the event of the liquidation of a company.

However, small and medium-sized enterprises (SMEs) may allocate all or a part of their taxed profits to a liquidation reserve, booked to a separate account, at a tax charge of 10%. If the liquidation reserve is maintained until the liquidation of the company, no additional tax is levied on these funds. The distribution of the funds to the shareholders before the liquidation of the company is subject to an additional but favorable withholding tax rate of 5% (distribution of a dividend after five years following the last day of the tax period in which the reserve is formed) or 20% (distribution within five years).

Capital reductions, as well as qualifying reimbursements of share premiums and profit certificates, are pro rata allocated to the paid-in capital and to the reserves. The portion allocated to the reserves is considered a dividend for tax purposes that is in principle subject to withholding tax. That portion is first allocated to the taxed reserves (whether or not incorporated in capital; no withholding tax is imposed) and then to the tax-exempt reserves (if any) incorporated in capital. Therefore, to the extent taxed reserves are available, the tax-exempt reserves (if any) are not affected. Non-distributable reserves and other (non-incorporated) tax-exempt reserves (for example, provisions) fall out of scope of this new pro rata rule.

Foreign tax relief. Income derived from a permanent establishment abroad may be exempt under the provisions of a tax treaty. A Belgian company that receives foreign-source interest income and royalties subject to a foreign withholding tax can claim a foreign tax credit in Belgium if certain conditions are satisfied.

C. Determination of trading income

General. Taxable income is based on income reported in the annual financial statements and includes all gains, profits, costs, dividends, interest, royalties and other types of income.

Deductible expenses. Certain business expenses are not deductible for tax purposes, such as certain car expenses, 31% of restaurant expenses and 50% of entertainment expenses.

Decrease and abolition of tax deductions for carbon-emitting company cars. The tax treatment of company cars will evolve, and as of 2026, costs related to company cars will only be eligible for tax deductions in case of a zero-emission company car. A grandfathering rule is foreseen for tax deductions related to non-hybrid company cars purchased, rented or leased before 1 July 2023 as well as a transitional regime for non-hybrid company cars purchased, leased or rented between 1 July 2023 and 31 December 2025 (phasing-out principle).

The electrification of the Belgian company car fleet will increase the need for infrastructure to charge electric cars. Companies are encouraged to invest in publicly accessible (to third parties) charging infrastructure by introducing an increased cost deduction for the depreciation of newly installed publicly accessible charging stations, applicable conditionally on eligible investments made from 1 September 2021 until 31 August 2024. The following rates apply:

- Investments made between 1 September 2021 and 31 March 2023: 200%
- Investments made between 1 April 2023 and 31 August 2024: 150%

Limitation on certain tax deductions. The use of certain deductions is limited to EUR1 million plus 70% of the taxable income in excess of EUR1 million. Therefore, 30% of the tax base in excess of EUR1 million cannot be offset and is a minimum tax base. The limitation applies to the following:

- Carried forward tax losses
- Carried forward DRD
- Carried forward innovation income deduction
- Carried forward NID (calculated before the 2019 tax year) (see *Notional interest deduction* in Section B)
- Incremental NID (calculated as of the 2019 tax year)

However, other deductions can be applied without the limitation, including the following:

- Nontaxable items (for example, gifts and exemptions in accordance with double tax treaties)
- Current year DRD
- Patent income deduction
- Current year innovation deduction
- Current year and carried forward investment deduction
- Group contributions in the context of the new tax consolidation regime

The limitation does not apply to startup companies for the first four tax years.

For the 2024 tax year (financial years starting on or after 1 January 2023), the threshold is reduced from 70% to 40% of the taxable income exceeding the amount of EUR1 million. Consequently, this measure increases the amount of the minimum taxable base to 60% of the taxable income exceeding the amount of EUR1 million. Following the implementation of the Pillar Two legislation, as of the 2025 tax year (financial years

starting on or after 1 January 2024), the 40% threshold will be increased to 70%.

Inventories. Stock values may not exceed the lower of cost or market value; cost is defined as the purchase price of raw materials plus direct and indirect production costs. However, the inclusion of indirect production costs is optional. Accepted valuation methods are first-in, first-out (FIFO); last-in, first-out (LIFO); and weighted average. Valuation of stocks at replacement cost is not allowed.

Provisions. Provisions for liabilities and charges are exempt from tax if they relate to contractual, legal or regulatory obligations existing at the end of the financial year.

Depreciation. In principle, depreciation rates are determined based on the anticipated useful economic life of the assets. The following straight-line rates are generally accepted.

Asset	Rate (%)
Office buildings	3
Industrial buildings	5
Chemical plants	8 to 12.5
Machinery and equipment (including information technology)	10 to 20
Office furniture and equipment	10 to 15
Rolling stock (motor vehicles)	20 to 33
Small tools	33 to 100

R&D investments must be amortized for tax purposes using the straight-line method over a period of at least three years. All other intangible assets must be amortized for tax purposes using the straight-line method over a period of at least five years.

Investment deduction. For the 2024 tax year, a 20.5% investment deduction is available for specific investments and under certain conditions (for example, investments in environmentally friendly R&D, energy savings and related patents) and a 3% investment deduction is available for reusable packaging. A company can opt for a spread investment deduction of 27.5% and can accordingly deduct each year 2.5% of the annual amortization. SMEs are also entitled to a specific investment deduction of 20.5% for investments in fixed digital assets, such as payment systems and cybersecurity systems, and a 20.5% investment deduction for security-related investments. If the company has insufficient taxable income, the investment deduction can be carried forward to the subsequent tax year.

For investments in R&D, a company can irrevocably opt for a tax credit instead of a deduction at the same rate as the investment deduction. As opposed to the investment deduction, this tax credit is effectively paid out if a company has insufficient taxable income for five consecutive tax years (four years as of the 2025 tax year), to align with the definition and conditions of "qualified refundable tax credit" as defined in Article 10 of the OECD Global Anti-Base Erosion Model Rules (also referred to as Pillar Two).

Tax incentives exist for investment in Belgian audiovisual works (see Section B) and for the shipping industry (tonnage tax).

For investments in newly acquired zero-emission trucks, charging stations for zero-emission trucks and infrastructure for hydrogen, the following increased investment deduction is available:
- 42% for investments made between 1 January 2022 and 31 December 2023
- 36.5% for investments made between 1 January 2024 and 31 December 2024

The total investment deduction for these investments is limited to EUR60 million and a company can only benefit from this increased investment deduction under certain conditions (among other conditions, no social security debts and no regional grants received for the investment).

Innovation deduction. Under the innovation deduction regime, the taxpayer should be owner, co-owner, licensee, usufruct or (economic) rights holder of intellectual property (IP) rights. The regime (under conditions) applies to, among others, patents, medicinal products, software and plant-variety rights. The IP should not be recorded as an asset on the balance sheet in order to qualify for the innovation deduction, unless the taxpayer will apply the innovation deduction to capital gains.

The innovation deduction provides for a deduction of 85% of the qualifying net income from IP, effectively reducing the related maximum effective corporate tax rate to 3.8%.

The income derived from the qualifying IP should be included in the Belgian tax base and should be at arm's length. The following is the equation for calculating the innovation deduction:

$$\text{Innovation deduction} = \text{Net IP income} \times \text{nexus ratio} \times 85\%$$

In the above equation, "net IP income" means the income after deduction of overall expenditures incurred for the development or acquisition of the IP right to the extent included in expenses. In addition, a recapture of prior year expenses (incurred after 30 June 2016) up to seven years is possible.

The following is the "nexus ratio":

$$\frac{\text{Qualifying expenditures} \times 130\%}{\text{Overall expenditures}}$$

"Qualifying expenditures" relate to R&D expenditures incurred by the taxpayer, including outsourcing to unrelated parties and excluding expenditures for the acquisition of IP or outsourcing to related parties.

The following are other significant features of the innovation deduction:
- Carryforward of unused innovation deductions to subsequent tax periods (however, see *Limitation on certain tax deductions*)
- Tax neutrality in the context of reorganizations
- Possible combination with other R&D incentives
- No R&D center requirement
- No limitations in time or amounts

When applying the innovation deduction, a taxpayer should keep specific information and documentation available for the tax authorities, such as the following:
- Determination of the gross innovation income (for example, transfer-pricing methods)

- Determination of the costs that must be deducted from the gross innovation income
- Methodology used to calculate the nexus ratio

A set of analytical accounts should be the basis for certain information.

Taxpayers may request tax rulings to obtain legal certainty regarding the conditions and the calculation of the innovation deduction (see *Advance rulings* in Section B).

Relief for losses. In general, companies may carry forward tax losses without limitations. However, a general limitation on certain deductions, including carried forward tax losses, applies (see *Limitation on certain tax deductions*) and certain limitations may apply in cases of restructurings and changes of control.

Tax losses cannot be carried back.

It is also possible to offset losses suffered by a group company for tax purposes with profits from another group company (see *Groups of companies*). Tax losses incurred by a foreign permanent establishment of a Belgian company of which the income is treaty exempt in Belgium is no longer tax deductible from the tax base of the Belgian company. The losses remain deductible only if they cannot be used to offset the profits of the Belgian branch abroad and are considered as final losses incurred in a branch located in the EEA. If such losses cannot be fully used, they are in principle transferable and can be deducted in a later tax period to the extent that they exceed the profits exempted by the double tax treaty. These losses will not be considered final if the company resumes (the same or other) activities in the permanent establishment state within three years after terminating the initial activities and deducting the losses (recapture rule applies in the financial year in which the activities are recommenced).

Groups of companies. Under the group contribution regime, a group company that is in a taxpaying position can make a tax-deductible group contribution to another group company that is in a loss position. This group contribution is taxable in the hands of the receiving group company and may be offset with the current year tax loss. The receiving group company is remunerated for the use of its tax loss by the contributing company for the amount of the tax saving realized by the latter.

Group contributions are available for Belgian resident group companies and Belgian establishments of EEA group companies. They may be made between parents and subsidiaries with direct 90% participation and between sister companies with a direct joint 90% (Belgian or foreign) resident parent. The minimum participation must have been maintained for an uninterrupted period of at least five years as of 1 January of the fourth calendar year before the tax year. As a result, newly established group companies must wait five years before group contributions are possible.

A group contribution agreement (template agreement provided by the Belgian tax authorities) should be concluded by the contributing and receiving company. The agreement is a mandatory attachment to the corporate income tax return.

Specific rules apply if, during the five-year period, one of the parties to a group contribution agreement was involved in, or incorporated pursuant to, a restructuring (regardless of whether it was tax-neutral).

Group contributions are not possible by or with an entity that benefits from a special tax regime (for example, tonnage tax regime).

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, standard rate	21
Social security contributions, on gross salary	
Employer (approximately)	35
Employee	13.07
Real estate tax; rate depends on location (allowed as a deductible expense for corporate income tax purposes)	Various
Environmental tax; rate depends on the location and the activity or product; tax is not deductible for corporate income tax purposes	Various
Registration duties, on contributions to companies	0
Registration duties on the transfer of immovable property	6/12.5

E. Miscellaneous matters

Foreign-exchange controls. Payments and transfers do not require prior authorization. However, for statistical purposes, financial institutions are required to report all transactions with foreign countries to the National Bank of Belgium. Resident individual enterprises are also subject to this reporting obligation if they conclude the transactions through nonresident institutions or directly.

As of 1 January 2024, financial institutions and payment service providers are obliged to electronically report all cross-border payments (EU and non-EU) and to exchange the data in a central EU database.

Transfer pricing. The Belgian Income Tax Code (ITC) contains anti-avoidance provisions that relate to specific aspects of transfer pricing. "Abnormal and gratuitous advantages" granted by a Belgian enterprise are added to the tax base of the Belgian enterprise, unless the advantages are directly or indirectly part of the taxable income of the recipient in Belgium. The ITC also contains anti-avoidance provisions concerning royalties, interest on loans and other items, as well as a provision on the transfer of certain types of assets abroad. Under these provisions, the taxpayer must demonstrate the bona fide nature of the transaction.

Qualifying multinationals must fulfill transfer-pricing documentation requirements (Master File, Local File and Country-by-Country Reporting).

A Transfer Pricing Circular provides the Belgian interpretation of the OECD Guidelines, without the intention to deviate from it. The Transfer Pricing Circular also states that any future changes to the OECD Guidelines can be assumed to be generally followed by the Belgian tax authorities.

Interest limitation rule. Under the interest limitation rule, the tax deductibility of net interest charges ("exceeding borrowing cost") is limited to the higher of the following:

- 30% of the taxable earnings before interest, taxes, depreciation and amortization (EBITDA) of the Belgian company or permanent establishment.
- Minimum threshold of EUR3 million. The EUR3 million threshold is the total amount for all Belgian group companies and permanent establishments and should be divided proportionally between all the Belgian group companies and permanent establishments. Multiple alternatives to proportionally allocate this amount are available.

The net interest charges are equal to the positive difference between interest expenses (interest and economically equivalent expenses) and interest income (interest and economically equivalent income). Economically equivalent income and expenses are, for example, foreign-exchange differences related to interest payments in the framework of a loan agreement, guarantee provisions and discounts on interest-free or abnormally low-interest loans.

Calculating the taxable EBITDA requires the application of a specific and very technical methodology, particularly if the group has more than one Belgian company or permanent establishment.

Positive taxable EBITDA should be compensated with negative taxable EBITDA within the Belgian group, which may significantly reduce the overall deduction capacity. However, companies are allowed to opt out of the calculation of the taxable EBITDA if the exceeding borrowing cost is below EUR3 million.

Excess deduction capacity can be shared by a Belgian company or permanent establishment with another Belgian company or permanent establishment of the group. The shared amount is added to the threshold of one company and deducted from the threshold of the other company. This transfer requires the conclusion of a compulsory yearly agreement (template provided by the Belgian tax authorities), to be attached to the corporate income tax return.

The net interest charges, to the extent that they are disallowed under the 30% EBITDA rule (resulting from a lack of sufficient deduction capacity), can be carried forward to future tax periods.

The interest limitation rule does not apply to interest on loans concluded for the purpose of long-term public infrastructure projects and to interest related to grandfathered loans (loans concluded before 17 June 2016 that have not fundamentally changed since that date). These grandfathered loans remain subject to the old 5:1 thin-capitalization rules (if applicable). The tax authorities have clarified the notion "fundamentally modified" and

identified a number of fundamental modifications and non-fundamental modifications (non-exhaustive).

Controlled foreign companies. From the 2024 tax year (financial years ending on or after 31 December 2023), Belgium adopted new rules governing the taxation of non-distributed profits of controlled foreign companies (CFCs).

The previous CFC regime (Model B rules), which has been in effect since the 2020 tax year, aimed to tax undistributed profits from controlled low-taxed subsidiaries or branches resulting from an artificial arrangement or a series of arrangements set up with the essential purpose to obtain a tax benefit. This approach required the significant people functions generating income for the CFC to be based in Belgium. The new rules (Model A) mainly focus on the taxation of passive profit of a CFC that is directly owned by the Belgian controlling company and that is subject to low taxation abroad, unless the CFC has sufficient economic substance.

To assess whether a portion of the profit of a foreign company should be included in the taxable base of the Belgian controlling company, it must first be determined whether the foreign company qualifies as a CFC. A foreign company qualifies as a CFC if both the participation and taxation condition are met.

The participation condition is met when a Belgian company, either on a standalone basis or together with its associated companies, satisfies any of the following requirements:
- It has the majority of voting rights on all shares.
- It holds at least 50% of the capital.
- It is entitled to at least 50% of the profits of a foreign company.

A foreign permanent establishment (PE) automatically satisfies the participation condition. Because the test is to be done at group level, considering the rights of "associated companies" as well, it can imply that a company that is held for only 10% by a Belgian company qualifies as a CFC because at least 40% is held by other associated companies. This is an important change and broader compared to the previous legislation.

The taxation condition is met for a foreign company or PE that satisfies either of the following requirements:
- It is not subject to income tax.
- It is subject to income tax that is less than half of the Belgian corporate income tax that would have been due be if the foreign company or PE would have been established in Belgium.

The taxation condition is presumed to be met by entities established in jurisdictions listed as tax havens by the EU or Belgium, but this is rebuttable.

Subsequently, it must be assessed whether the CFC is eligible for one of the following safe harbors:
- The Belgian controlling company provides evidence that the CFC is carrying out a substantial economic activity supported by personnel, equipment, assets and buildings, defined as "the offering of goods or services on a particular market." In this regard, the Memorandum of Understanding (this document explains the intent and purpose of a draft law) clarifies that the offering of intercompany services does not meet this definition,

unless the respective transactions are carried out at arm's length.
- Less than 1/3 of the total income of the CFC originates from so-called "passive income."
- The CFC is a regulated financial institution to which the EBITDA interest deduction limitation (see *Interest limitation rule*) does not apply and for which 1/3 or less of the total income is derived from transactions with the Belgian controlling company or entities associated with the latter.

If a CFC is eligible for a safe harbor, its profits are not included in the taxable base of the Belgian controlling company. If no safe harbor applies, the amount of the CFC's undistributed profit to be included in the tax base of the Belgian controlling company should be computed.

Belgian companies are required to disclose the existence of a CFC in their corporate income tax return. This requirement for disclosure becomes effective as soon as both the participation and taxation condition have been met, even if no CFC profit is included in the Belgian taxable base.

Hybrid mismatches. Belgian tax legislation includes a complex set of domestic rules targeting so-called hybrid mismatches (transposition of the EU Anti-Tax Avoidance Directive [ATAD] I and II).

The anti-hybrid rules distinguish between hybrid entities, hybrid transfers, reverse hybrids, hybrid PEs and dual residents, targeting so-called double deduction and deduction non-inclusion outcomes.

Exit taxation. In addition to a step-up to market value on inbound relocations of assets, migrations and restructurings, the exit tax regime also captures the transfer of assets from a Belgian head office to a foreign permanent establishment as a taxable event.

Broadened Belgian permanent establishment definition. To tackle the artificial avoidance of permanent establishment status through commissionaire arrangements and similar strategies, a more economic approach is implemented for the recognition of permanent establishments for domestic purposes, further aligning the Belgian permanent establishment definition with Base Erosion and Profit Shifting (BEPS) Action 7. In particular, the rules on independent agents target a broader range of situations. For example, a Belgian permanent establishment exists if an independent agent acts on behalf of foreign company, even if there is no authority to conclude contracts on behalf of that company. Because these new rules may result in a higher risk of having a permanent establishment in Belgium, foreign companies should review potential permanent establishment situations and re-evaluate past assessments. They should also consider the impact of the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS in this respect (Multilateral Instrument, or MLI; see *Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS*).

Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS. The MLI entered into force for Belgium 1 October 2019 and is effective with respect to taxes withheld at

source from 1 January 2020 and with respect to all other taxes levied as of tax periods beginning on or after 1 April 2020.

Mandatory disclosure regime. Belgium transposed EU Directive (2018/822) (DAC6), and the Belgian Mandatory Disclosure Rules (MDR) legislation is broadly aligned to the requirements of the directive. EU intermediaries and relevant taxpayers must report cross-border arrangements that meet at least one of the hallmarks listed in the directive. The Belgian tax authorities published Frequently Asked Questions with respect to the interpretation of certain DAC6 requirements and terminology. The reporting obligations were already challenged before the Belgian Constitutional Court because the definition of an intermediary is broad, capturing lawyers and advisers who must maintain professional secrecy. In this respect, preliminary ruling requests were introduced before the European Court of Justice (Case C-694/20 and Case C-623/22).

Tax dispute resolution mechanism. EU Directive 2017/1852 on tax dispute resolution mechanisms in the EU is implemented in Belgian law. More specifically, in addition to the current procedures relating to transfer-pricing disputes and the allocation of profits to permanent establishments, Belgian law provides for a specific procedure for the settlement of disputes between Member States arising from interpretational differences regarding double tax treaties when these differences result in double taxation.

Reconstitution reserve. The reconstitution reserve is introduced as a COVID-19 pandemic tax measure and intends to help companies reconstitute their solvency that has suffered due to the COVID-19 pandemic. In practice, this reserve would allow companies, during three consecutive tax periods relating to the 2022, 2023 and 2024 tax years (financial years starting on or after 1 January 2021, 1 January 2022 and 1 January 2023), to exempt profits corresponding to the amount of losses they incurred in 2020 (COVID-19-year), under the conditions of maintaining their equity position as well as at least 85% of their existing employment spending. The reserve is subject to the intangibility condition, meaning that the reserve may become taxable on the liquidation of the company or when the reserve is used for distribution.

The measure does not apply to the following:
- Companies performing a capital decrease or a share buyback or paying dividends in the period from 12 March 2020 until the day of filing the tax return relating to a tax year in which a reserve is built up
- Companies making payments to companies located in tax havens (unless supported by valid business reasons and unless they do not exceed EUR100,000) or having share participations in companies located in tax havens
- Companies that benefit from a special tax regime such as cooperative participation companies, companies subject to the special tax regime for shipping companies and real estate investment companies

For each tax year concerned, a special form must be annexed to the annual corporate income tax return.

Expatriate tax regime. For foreign executives and researchers, a special tax regime applies.

Individuals assigned to Belgium (or recruited from abroad) and living in Belgium are considered Belgian tax residents and are taxable in Belgium on their worldwide income. The regime is applicable conditionally.

An employer can reimburse or compensate the employee for recurring additional "costs proper to the employer" (for example, cost of living and housing and home leave) resulting from the assignment or recruitment from abroad. The tax-free character of the reimbursement is limited to 30% of the employee's gross remuneration (excluding the cost reimbursements itself), limited to a maximum amount of EUR90,000 per year. In addition, some costs can be reimbursed tax free by the employer without any specific cap (for example, moving and relocation costs, costs for furnishing the accommodation in Belgium [up to one month of rent] and certain school fees [from the age of 5]).

The special tax regime and its benefits will be available for a fixed period of five years, with a possible extension of three years.

F. Treaty withholding tax rates

The rates in the table below reflect the lower of the treaty rate and the rate under domestic tax law on outbound dividends. Belgium provides an exemption from dividend withholding tax for companies located in jurisdictions with which Belgium has entered into a tax treaty. The exemption is subject to the same conditions as those contained in the EU Parent-Subsidiary Directive. However, the treaty must contain an exchange-of-information clause. As a result, certain jurisdictions are excluded.

With respect to taxes withheld at source, from 1 January 2020, the applicability of the Principle Purpose Test (PPT) as embedded in the MLI (see *Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS* in Section E) to individual treaties must be reviewed. In addition, Belgium has elected the optional inclusion of a discretionary relief provision of Section 4 of Article 7 of the MLI when treaty benefits are denied under the PPT.

Non-treaty jurisdictions	30	30	30	30

(a) Reduced rates apply to outbound dividends if the recipient holds directly or indirectly the level of participation indicated in the treaty. The level of participation is generally 25% of the capital or voting power, unless stated otherwise in a footnote.

(b) The lower rate applies if the foreign company owns directly at least 25% of the paying company's capital.

(c) The lower rate applies conditionally to interest paid on commercial debt claims and to banks.

(d) The lower rate applies to copyright royalties (excluding royalties with respect to copyrights on films and certain other items).

(e) A most-favored-nation clause may be applicable.

(f) The rates are 3% for news items, 5% on copyrights (excluding copyrights on films and certain other items) and 10% on computer software, patents, trademarks, equipment leasing and know-how.

(g) The minimum holding requirement is 10%.

(h) The 0% rate applies under the EU Interest and Royalties Directive. The 10% rate applies if the Austrian company owns more than 50% of the capital in the Belgian company. In other cases, the non-treaty rate of 30% applies.

(i) The rate is 5% if either of the following circumstances exist:
- The Azerbaijani company owns at least 30% of the capital in the Belgian company and has invested at least USD500,000 in that company.
- The Azerbaijani company has invested at least USD10 million in the Belgian company.

The rate is 10% if the Azerbaijani company owns at least 10% of the capital in the Belgian company and has invested at least USD75,000 in that company.

(j) The 0% rate applies to interest paid to government organizations and banks and on commercial debt claims.

(k) The lower rate applies to copyright royalties with respect to films and certain other items.

(l) The tax treaty between Belgium and the former Yugoslavia is applicable.

(m) The 10% rate applies to copyright royalties with respect to films and certain other items. The 20% rate applies to royalties with respect to trademarks and commercial names. The 15% rate applies to other royalties.

(n) The lower rate applies conditionally to interest paid to government organizations and on bank deposits.

(o) The lower rate applies to royalties with respect to copyrights (excluding copyrights on films and certain other items), computer software, patents and know-how.

(p) The minimum holding requirement is 10% for an uninterrupted period of 12 months.

(q) The 5% rate applies to interest on loans granted by banks and insurance companies, and interest on bonds or securities that are regularly and substantially traded on a regulated securities market.

(r) The rates under the treaty are in principle 5% and 15%, but by application of the most-favored-nation clause, the applicable rate can differ (tax treaties with Australia and Japan).

(s) The rates under the treaty are in principle 5% and 10%, but by application of the most-favored-nation clause, the applicable rate can be 2% (Chile-Japan tax treaty).

(t) The rate under the treaty is 10%, but by application of the most-favored-nation clause, the applicable rate can differ (tax treaties between the Czech Republic and the Slovak Republic, and between Austria and Belgium).

(u) The rate under the treaty is 15%, but by application of the most-favored-nation clause, the applicable rate can differ (China Mainland-Ecuador tax treaty).

(v) The 25% rate applies to royalties with respect to trademarks.

(w) The rates under the treaty are 5% (equipment leasing) and 10%, but by application of the most-favored nation clause, the rates can be reduced to 0% for royalties (as defined).

(x) The lower rate applies to interest on current accounts and on advance payments between banks.

(y) The 5% rate applies if the beneficial owner is an enterprise of Georgia.

(z) The 0% rate applies if the recipient is an enterprise. This does not apply to the following:
- Interest on bonds
- Interest paid by a company to a company owning at least 25% of the paying company's voting power or shares

(aa) The 0% rate applies if the Hong Kong company has owned directly at least 25% of the capital in the Belgian company continuously for at least 12 months. The 5% rate applies if the Hong Kong company owns directly at least 10% of the capital in the Belgian company.

(bb) The rate under the treaty is 20%, but by application of the most-favored-nation clause, the applicable rate can differ.

(cc) These are the rates under a new treaty between Belgium and Japan, which is effective from 1 January 2020.
- It has owned directly or indirectly at least 10% of the voting power of the paying company for at least six months ending on the date on which entitlement to the dividends is determined (excluding dividends that are deductible in computing the taxable income of the company paying the dividends in its resident state).
- It is a qualifying pension fund.

The general withholding tax for interest will be 10%. This rate can be conditionally reduced to 0% (for application of the lower rate, consult the tax treaty). A 0% withholding tax rate will apply to royalties.

(dd) This rate applies to dividends paid to the Kuwaiti government or to a company that is at least 25%-owned by the Kuwaiti government.

(ee) The tax treaty between Belgium and the former USSR applies.

(ff) The rates for royalties under the treaty are 5% for equipment leasing and 10% in all other cases. A most-favored-nation clause may be applicable under which the rate is reduced to 0% (Japan-Latvia tax treaty).

(gg) The rates for royalties under the treaty are 5% for equipment leasing and 10% in all other cases. A most-favored-nation clause may be applicable under which the rate is reduced to 0% (Japan-Lithuania tax treaty).

(hh) The minimum holding requirement is 25% or a purchase price of at least EUR6,197,338.

(ii) The 0% rate applies if the North Macedonian company has owned directly at least 25% of the capital in the Belgian company continuously for at least 12 months. The 5% rate applies in the case of a 10% shareholding.

(jj) The domestic rate applies, unless the interest is paid by an enterprise engaged in an industrial undertaking. In that case, the rate may not exceed 10%.

(kk) The domestic rate applies to artistic copyright royalties (including royalties with respect to films and certain other items). For other royalties, the rate may not exceed 10%.

(ll) The lower rate applies to dividends paid to the following:
- A company that holds at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months
- A qualifying pension fund

(mm) The minimum holding requirement is 25%.

(nn) The 5% rate applies if the beneficial owner is a pension fund. Conditions apply. The 0% rate applies if the beneficial owner is either of the following:
- A company that holds directly at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months
- A Norwegian political subdivision or local authority, the Central Bank of Norway, the Norwegian Government Pension Fund Global, a statutory body or any institution wholly or mainly owned by the government of Norway, or a political subdivision or local authority thereof

(oo) The 5% rate applies to royalties on patents and industrial and scientific know-how. The 10% rate applies to royalties on trademarks and commercial know-how.

(pp) The general withholding tax for interest is 10%. This rate can be conditionally reduced to 0% (for application of the lower rate, consult the tax treaty).

(qq) The rate is 0% royalties on copyrights (excluding royalties with respect to films and certain other items.). The rate is 15% with respect to royalties on know-how.

(rr) The 0% rate applies to interest on government bonds or on guaranteed or insured loans or credits.

(ss) The 0% rate applies if the beneficial owner is a company that satisfies either of the following conditions:
- It has owned directly or indirectly at least 10% of the voting power of the paying company for at least six months ending on the date on which entitlement to the dividends is determined (excluding dividends that are deductible in computing the taxable income of the company paying the dividends in its resident state).
- It is a qualifying pension fund.

(tt) The 0% rate applies to dividends paid to the following:
- A Polish company that owns directly at least 10% of the capital of the Belgian company for a for an uninterrupted period of at least 24 months
- A qualifying pension fund

(uu) The 0% rate applies to interest on loans granted by banking enterprises, excluding loans represented by bearer securities, and to interest paid to qualifying pension funds.

(vv) The 0% rate applies if the Rwanda company has owned directly at least 25% of the capital in the Belgian company continuously for at least 12 months and does not enjoy the benefit of special measures to promote economic development.

(ww) The lower rate applies if both of the following conditions are satisfied:
- The Rwanda company holds directly or indirectly at least 35% of the capital in the Belgian company.
- The amount of the loan(s) granted by the Rwanda company does not exceed the amount of the equity of the Belgian company.

(xx) The 0% rate applies if the San Marino company has owned directly at least 25% of the capital in the Belgian company continuously for at least 12 months. The 5% rate applies if the San Marino company has owned directly at least 10% but less than 25% of the capital in the Belgian company continuously for at least 12 months.

(yy) The 0% rate applies if the company receiving the dividends holds shares representing directly at least 25% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months. The 5% rate applies if the company receiving the dividends holds directly at least 10% of the capital of the company paying the dividends.

(zz) In the case of equipment leasing, the 5% rate is levied on 60% of the gross amount of the royalties.

(aaa) The 0% rate applies to dividends paid to the following:
- A Swiss company that owns directly at least 10% of the capital of the Belgian company for an uninterrupted period of at least 12 months
- A pension fund

(bbb) The 0% rate applies to interest on loans and credits granted by a company and to interest paid to a pension fund.

(ccc) The 10% rate applies to interest paid to a financial institution.

(ddd) Under the protocol to the treaty, the rate is 5% dividends paid to Turkish companies provided that the dividends received by a Belgian company from a Turkish company are exempt, which is currently the case (the general participation exemption). Otherwise, the treaty rate is 15% if the Turkish company owns directly at least 10% of the capital of the Belgian company and 20% in other cases.

(eee) The minimum holding requirement is 20%.

(fff) The higher rate applies to copyright royalties (including royalties with respect to copyrights on films and certain other items).

(ggg) The 0% rate applies to payments to financial institutions and public bodies.

(hhh) The higher rate applies to dividends paid out of income derived directly or indirectly from immovable property by an investment vehicle that distributes most of this income annually and whose income from such immovable property is exempted from tax.

(iii) The lower rate applies to dividends paid to the following:
- A company that holds at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months
- A pension scheme (conditionally)

(jjj) The 0% rate applies to interest paid on loans or credits granted by an enterprise to another enterprise and to interest paid to pension funds.

(kkk) The 0% rate applies if the United States company owns at least 80% of the voting power in the Belgian company for a 12-month period ending on the date on which the dividends are declared. The 5% rate applies if the United States company owns directly at least 10% of the voting power in the Belgian company.

(lll) The 15% rate applies to interest on profit-sharing bonds.

(mmm) The 0% rate applies to interest paid to pension funds in the context of administering or monitoring pension schemes.

(nnn) The 5% rate applies if the Vietnamese company owns directly or indirectly at least 50% of the capital in the Belgian company. The 10% rate applies if the Vietnamese company owns directly or indirectly at least 25%, but less than 50%, of the capital of the in the Belgian company.

(ooo) The 5% rate applies if the beneficial owner is a pension fund. Conditions apply.

(ppp) The lower rate applies if a company in Pakistan is engaged in an industrial undertaking and pays dividends to a Belgian company of which it owns not less than 20% of the voting shares during a 365-day period that includes the day of the payment of the dividends (for the purpose of computing that period, no account shall be taken of changes of ownership that would directly result from a corporate reorganization, such as a merger or divisive reorganization, of the company that holds the shares or that pays the dividends).

(qqq) Consult the tax treaty for more information.

(rrr) The Russian Federation has suspended its tax treaty with Belgium with effect from 8 August 2023.

(sss) The lower rate applies if the foreign company owns directly or indirectly at least 25% of the paying company's capital.

(ttt) The lower rate applies to interest paid to a government organization, or with respect to either of the following:
- Bank loans not represented by bearer instruments
- Sales on credit

(uuu) The 0% rate applies to interest paid with respect to commercial debt claims resulting from deferred payments for goods, merchandise or services.

(vvv) The 0% rate applies if the interest is paid to the government or the central bank.

A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

B. Taxes on corporate income and gains

Bermuda does not currently impose income, withholding or capital gains taxes.

On 27 December 2023, the Government of Bermuda enacted the Corporate Income Tax Act, 2023 (CITA). The CITA imposes a statutory rate of 15% in relation to tax periods beginning on or after 1 January 2025 (commencement date).

Bermuda corporate income tax applies to Bermuda Constituent Entities that are part of multinational entity (MNE) groups if the group revenue as reported in the consolidated financial statements of the ultimate parent company is EUR750 million or more for at least two of the four fiscal years immediately preceding such fiscal year.

The Bermuda corporate income tax includes several significant items that are relevant to MNEs prior to the commencement date. The items most commonly considered in relation to 2023 matters are discussed below.

Economic Transition Adjustment. The Economic Transition Adjustment (ETA) allows certain in-scope entities to revalue assets and liabilities, other than goodwill, from carrying value to fair market value as of 30 September 2023. The amount amortized as an adjustment to taxable income can only offset up to 80% of taxable income (determined prior to the application of tax-loss carryforwards), with any unamortized amounts treated

as a loss carryforward. The step-up under the ETA is mandatory and applies by default, but it is possible to elect out of the ETA.

Inclusion of a provision for losses carried forward. Bermuda Constituent Entity Groups may deduct losses occurring during the five fiscal years preceding the commencement date of the corporate income tax (that is, 2020 through 2024) and determined in the same manner as if the group had been subject to the corporate income tax in the five pre-commencement date fiscal years. If the ETA is applied to a Bermuda Constituent Entity (that is, an ETA Opt-Out Election is not made), the net taxable loss arising with respect to the Bermuda Constituent Entity prior to 1 October 2023 is deemed nil.

Latest information. For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (https://assets.ey.com/content/dam/ey-sites/ey-com/en_gl/topics/tax/tax-pdfs/ey-beps-2-0-pillar-two-developments-tracker.pdf).

C. Fees and other taxes

Annual fee. An annual government fee, based on the assessable capital, is imposed on companies. The following is a schedule of the fees for exempted companies (see Section D).

Capital of company		
Exceeding BMD	**Not exceeding BMD**	**Annual fee BMD**
0	12,000	2,095
12,000	120,000	4,275
120,000	1,200,000	6,590
1,200,000	12,000,000	8,780
12,000,000	100,000,000	10,980
100,000,000	500,000,000	19,605
500,000,000	—	32,676

Certain types of entities are not subject to the annual fee described above. These entities are required to pay the following annual fees.

Entity	**Annual fee (BMD)**
Overseas (Permit) company whose principal business is	
Finance, insurance or operation of an open-end mutual fund	4,335
Any other business	25,000

Entity	**Annual fee (BMD)**
Overseas (Permit) company with a physical presence in Bermuda	2,095
Overseas (Permit) company that does not have a physical presence in Bermuda whose principal business falls within one of the specified categories	2,095
Unit trust management company	3,050
Exempted and overseas partnerships	2,350
Segregated accounts companies	295

Payroll tax. Payroll tax is imposed on all employers on the remuneration paid in their business. Taxable remuneration equals the

sum of wages, salaries and benefits paid in cash or in kind to employees for services rendered during the tax period.

For payroll tax compliance purposes, the fiscal year in Bermuda runs from 1 April through 31 March.

The Payroll Tax Amendment Act 2023 took effect on 1 April 2023. It increased the tax cap on gross earnings from BMD900,000 to BMD1 million, effective from 1 April 2023. It also changed the structure of the payroll tax into the following two separate portions:
- Employer portion
- Employee portion

These two portions must be calculated separately and reported by employers on the quarterly payroll tax returns. The sum of the two portions is the total payroll tax payable.

The employers remain responsible for the payment of both portions. However, they have the option of deducting the employee portion from employee remuneration in full or in part.

The employers are responsible for calculating the full employee portion regardless of whether they deduct it from the employees.

The following are the payroll tax rates for the employer portion, which are based on gross annual remuneration:
- Annual payroll greater than BMD1 million: 10%
- Annual payroll from BMD500,001 to BMD1 million: 7.5%
- Annual payroll from BMD350,001 to BMD500,000: 5.25%
- Annual payroll from BMD200,000 to BMD350,000: 2.5%
- Annual payroll less than BMD200,000: 1%

Effective from 1 April 2023, the employee portion of payroll tax is a separate amount and must be calculated separately from the employer portion.

Although as noted above, employers have the option to deduct the employee portion of payroll tax from employee remuneration, the responsibility to pay the full amount of tax (employer and employee portions) to the Office of the Tax Commissioner still rests with the employers.

Effective from 1 April 2023, the employee portion is calculated using the following marginal tax rate structure:
- On the first BMD48,000 of annual payroll: 0.5%
- On the next BMD48,000: 9.25%
- On the next BMD104,000: 10%
- On the next BMD300,000: 11.5%
- On the next BMD500,000: 12.5%

The maximum taxable remuneration is BMD1 million.

Items exempt from the payroll tax base include employers' contributions to social insurance, the Hospital Insurance Plan, approved retirement plans, hospital and health schemes, life insurance schemes, and workers' compensation schemes.

Social security. All employers and employees must contribute to the national insurance scheme. The social insurance contribution rate is BMD71.84 per employee per week (based on a 52-week

year). The cost is typically shared equally between the employee and the employer. As a result, BMD179.60 is generally deducted from each employee's monthly paycheck in a five-week month and BMD143.68 is deducted from each employee's monthly paycheck in a four-week month. This amount, together with the employer's matching contribution, is remitted to the Bermuda Social Insurance Department.

Incorporation fees. The Bermuda Monetary Authority charge for an application to register a company is BMD340. The government fee for registering a memorandum of association is BMD100.

Financial Services Tax. Effective from 1 April 2019, Financial Services Tax (FST) is imposed on the following financial services providers:

- Banks: 0.0075% on consolidated gross assets at the end of a tax period
- Domestic insurers: 3.5% of gross premiums written in a tax period, excluding premiums relating solely to health insurance
- Money service businesses: 1% of aggregated income and outgoing money transmission volume in a tax period

For purposes of the FST, the tax period is each period of three calendar months beginning with the months of April, May and June 2017.

Every financial services provider subject to FST must within 30 days after the end of each tax period submit to the Office of the Tax Commissioner a return specifying the consolidated gross assets, gross premiums or aggregated income, and outgoing money transmission volume and pay the FST due with respect to that tax period.

General Services Tax. Under a proposal, a General Services Tax (GST) would be levied on turnover from the provision of most services by service providers to the public. It is proposed that the GST would be levied at a rate of 7%. This proposed tax would not be implemented until 1 April 2019, at the earliest. Notable exceptions to the GST would be in the sectors of banking, insurance and health care. Small service providers would also be exempt from GST.

D. Stamp duty

Stamp duty is charged on various legal instruments, including those detailed below.

Conveyance or transfer on sale of land or property. The following are the rates of stamp duty for the sale of Bermuda land or property:

- On the first BMD100,000 of the amount or value, or any part thereof: 2.10%
- On the next BMD400,000 of the amount or value (up to BMD500,000), or any part thereof: 3.15%
- On the next BMD500,000 of the amount (up to BMD1 million) or value, or any part thereof: 4.20%
- On the next BMD500,000 of the amount (up to BMD1.5 million) or value or any part thereof: 6.30%
- Amount in excess of BMD1.5 million: 7.35%

For non-Bermuda property, the rate is 1%.

First-time homebuyers are exempt from stamp duty charges on the first BMD1 million of value in relation to Bermuda real estate.

Lease or agreement for lease. The following are the amounts of stamp duty for a term lease:
- Term of up to three years: 1.05% of the aggregate rent
- Term of more than three years: 1.05% of the aggregate rent payable for the first three years of the lease, plus 0.5% of the aggregate rent payable for any additional period beyond three years

E. Miscellaneous matters

Types of companies. The limited liability company is the most common form of business entity in Bermuda. Limited liability companies may be local, exempted or permit, as described below.

Local companies. Local companies are required to have at least 60% of their issued share capital beneficially owned and controlled by Bermudians. Because this type of company is usually formed for the benefit of residents of Bermuda, the local companies may transact business worldwide or in Bermuda only.

Exempted companies. An exempted company is the most common form used by international businesses to transact business from Bermuda. Exempted companies are exempted from the requirement imposed on local companies that at least 60% of the equity be owned and controlled by Bermudians, as provided for by the Companies Act of 1981. In general, exempted companies may not compete with local companies in the Bermuda market nor own real estate in Bermuda. However, they may carry on business outside Bermuda or with other exempted undertakings in Bermuda. Examples of exempted companies include investment holding companies, trading companies, mutual fund companies, insurance companies and foreign sales corporations.

Permit overseas companies. Permit overseas companies are companies incorporated in jurisdictions other than Bermuda but have a permit to transact business from Bermuda. Permits are obtained through a license granted by the Ministry of Finance. An example of a permit overseas company is a ship-owning company that is incorporated and has ships registered in another country, but by permit conducts business from Bermuda.

Exempted Undertakings Tax Protection Act, 1966. Under the Exempted Undertakings Tax Protection Act, 1966, as amended, all exempted undertakings in Bermuda, such as exempted and permit companies, partnerships and unit trusts, may apply for an undertaking by the government that taxation introduced in Bermuda will not apply to the exempted company until 28 March 2016. Under a recent amendment to this act, the assurance of tax-neutrality is extended from 28 March 2016 until 31 March 2035 if proper application is made with the Registrar of Companies and if a fee of BMD160 is paid.

Foreign-exchange controls. Exempted companies and permit companies are designated as nonresident for exchange control purposes. The nonresident designation allows these entities to operate free of exchange control regulations and enables them, without reference to the Bermuda Monetary Authority, to make payments of dividends, distribute capital, open and maintain foreign bank accounts, maintain bank accounts in any currency and purchase securities. However, the issuance and transfer of shares and the change of beneficial ownership of shares in a Bermuda exempted company must be approved by the Bermuda Monetary Authority. The remittance and repatriation of funds by exempted companies and permit companies are not subject to exchange controls. Similarly, trust settlements on behalf of nonresidents are generally free from exchange controls. Under the Exchange Control Act 1972 and the Exchange Control Regulations 1973, certain exchange controls apply to Bermuda residents and to local companies. No capital or exchange control regulations apply to nonresidents.

The Bermuda dollar (BMD) is pegged to the US dollar at an equal exchange rate, and the two currencies are used interchangeably in Bermuda.

The Bermuda-dollar accounts of residents and local companies are subject to a 1.25% tax on the purchase of a foreign currency.

Transfer of shares. Although the consent of the Bermuda Monetary Authority is ordinarily required for the issue or transfer of any share or security, blanket permission for share issues and transfers may be granted, such as for publicly traded securities.

Common Reporting Standard. On 17 April 2019, Bermuda published *The Common Reporting Standard for Automatic Exchange of Financial Account Information in Tax Matters Regulations*, Version 2.0, for the implementation of the Common Reporting Standards (CRS) Regulations. The CRS Regulations, which entered into force on 1 January 2016, require financial institutions to complete due diligence and reporting on investors, depending on their underlying classifications and tax residency.

United States Foreign Account Tax Compliance Act. On 19 December 2013, Bermuda and the United States signed and released a Model 2 Intergovernmental Agreement (IGA) for the implementation of the US Foreign Account Tax Compliance Act (FATCA). All Bermudian foreign financial institutions (FFIs) and trustee documented trusts must comply with FATCA per those regulations and report FATCA-required information directly to the Internal Revenue Service.

Country-by-Country Reporting. Bermuda has adopted Country-by-Country Reporting (CbCR) in accordance with the Organisation for Economic Co-operation and Development (OECD) Base Erosion and Profit Shifting (BEPS) Action Plan. The CbCR regulations and guidelines were issued in July 2018. The regulations require certain multinationals to submit Country-by-Country Reports to the Bermuda tax authority.

Economic substance. As a member of the OECD Inclusive Framework on BEPS, Bermuda enacted the International Tax

Co-operation (Economic Substance) Act on 31 December 2018, which is effective from 1 January 2019. Legislation requires "relevant entities" conducting "relevant activities" to complete notifications and reporting on an annual basis and maintain substance in the jurisdiction.

A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	25 (a)
Branch Tax Rate (%)	25
Withholding Tax (%) (b)	
Dividends	12.5
Interest	12.5
Royalties	12.5
Professional Services	12.5 (c)
Branch Remittance Tax	12.5
Net Operating Losses (Years)	
Carryback	0
Carryforward	3/5 (d)

(a) See Section B.
(b) A 12.5% withholding tax is imposed on all payments of Bolivian-source income to foreign beneficiaries that carry out the work outside the country (see Section B).
(c) This withholding tax applies to services fees received for specified professional services, including consulting, expert services, and technical, commercial or other advice.

(d) A Bolivian-source loss incurred in a year may be carried forward to offset taxable income derived in the following three years. Loss carryforwards are not subject to inflation adjustment. For the oil and mining production sector and new projects with a minimum capital investment of BOB1 million, the carryforward period is five years. On the reorganization of companies, the carryforward period is four years.

B. Taxes on corporate income and gains

Corporate income tax. Bolivian companies and foreign companies with permanent establishments in Bolivia are subject to income tax on their Bolivian-source income.

Rates of corporate tax. The standard rate of corporate income tax is 25%.

Mining operations. Act No. 535 (New Mining Code), dated 28 May 2014, confirms the additional rate of corporate income tax of 12.5% (previously established by Act. No. 3787, dated 24 November 2007). This additional rate applies to additional taxable profits resulting from favorable price conditions for minerals and metals. The following are significant aspects of this additional rate:

- The 12.5% tax rate applies if mineral and metal quotations are equal or higher than the base quotations established by law.
- The 12.5% tax does not apply to taxable profits attributable to sales that have lower quotations than the base quotations.

The tax referred to above must be paid on a monthly basis. The date of payment depends on the last digit of the Tax Identification Number. The monthly payments are considered advance payments of the tax determined at the end of the year. If the total of the advance payments is less than the amount determined at the end of the year, this difference must be paid. If the total of the advance payments exceeds the amount determined at the end of the year, the difference can be claimed as a tax credit against the standard corporate income tax for the year or the additional amount of corporate income tax for the following year.

Surtax. A 25% surtax is imposed on net income derived from mining, reduced by the following two special deductions:

- A percentage of up to 33%, which varies according to the type of business, of accumulated investment in exploration, development, assets that qualify for environmental incentives and environmental protection, which is directly related to mining extractive activities performed after the 1991 tax year.
- 45% of net income derived from minerals and/or metals extractive activities. This deduction is limited to BOB250 million (USD35.9 million). This limit was established by Supreme Decree No. 24780 and is adjusted by inflation on an annual basis.

For mineral-producing companies, the net income for an extraction operation is the value of the commercialized product in the mining market.

Hydrocarbon Direct Tax. The Hydrocarbon Direct Tax is imposed at a rate of 32% on hydrocarbon production in oil wells located in Bolivia. The Hydrocarbon Direct Tax is calculated and paid in the same manner as the 18% royal prerogatives, which apply to

all extractive fields. The 18% royal prerogatives consist of the following:

- A regional royal prerogative equal to 11% of the gross hydrocarbon production from oil wells, which is paid to the region where the hydrocarbons are produced
- A national royal prerogative equal to 1% of the gross hydrocarbon production
- An amount equal to 6% of the gross hydrocarbon production in oil wells, which is paid to the National Treasury after the deduction of the necessary amounts for the management of the contracts

Capital gains. In general, capital gains are taxed in Bolivia.

Administration. The law specifies the following tax year-ends, which vary according to the type of business.

Business	Tax year-end
Industry (including oil and gas)	31 March
Agriculture and agribusiness	30 June
Mining	30 September
All other businesses	31 December

Annual tax returns and financial statements must be filed with the Internal Revenue Service (IRS) and income tax paid within 120 days after the end of the tax year. Advance payments are not required except for mining companies, which must make payments of income tax when they export minerals or metals.

Debts owed to and credits due from the state are adjusted to reflect changes in the Unidad de Fomento de Vivienda (UFV), which is the inflation index established by the Central Bank of Bolivia.

Fines and interest charges apply to late tax payments and other non-compliance with tax obligations. Under Act No. 812, the interest is calculated based on the age of the debt. The following are the interest rates:

- 4% until the last day of the fourth year
- 6% until the last day of the seventh year
- 10% until the last day of the eighth year

The tax code provides that fraud exists if a tax debt exceeds an amount equal to 10,000 UFV, calculated as of the date of determination of the fraud.

Under Act No. 812, dated 30 June 2016, the statute of limitation for tax audits is eight years.

The statute of limitation period may be increased by two years if the entity does not comply with the obligation to register, registers under a different tax regime, commits tax crimes or carries out commercial and/or financial operations with companies located in countries with low or null taxation (there is a list of countries and regions that is periodically updated).

Withholding taxes. Local entities, including Bolivian permanent establishments of foreign companies, that pay Bolivian-source income to foreign beneficiaries must withhold 12.5% of the amounts paid. For this purpose, Bolivian-source income includes

all dividends, interest payments, branch remittances, royalties, professional service fees (includes consulting, expert services, and technical, commercial or other advice), commissions and other income. In general, Bolivian-source income is revenue that is derived from assets located, placed or economically used in Bolivia, or from activities developed in Bolivia. This rule applies regardless of the nationality, address, or residence of the recipient of the income or the parties involved in the activities, or where the relevant contract is executed. For services, the withholding is applied to beneficiaries who carry out the work outside of Bolivia.

For dividends paid by Bolivian companies, the withholding tax is payable when the dividends are actually paid, remitted or credited. However, branch profits are deemed remitted when the corporate income tax return is due (120 days after the end of the tax year; see *Administration*).

Dividends. The 12.5% withholding tax on payments to foreign beneficiaries applies to dividends paid by Bolivian companies (see *Withholding taxes*). Dividends received from Bolivian companies subject to Bolivian corporate income tax are not taxed.

Foreign tax relief. The Bolivian tax code does not provide foreign tax relief.

C. Determination of taxable income

General. Taxable income is the revenue reported in the companies' financial statements prepared in accordance with generally accepted accounting principles in Bolivia, subject to certain adjustments for tax purposes. In general, all expenses necessary to generate income and to maintain the existence of the company (for example, contributions to regulatory-supervisory organizations, contributions for social benefits and certain national and municipal taxes) are deductible. Donations and other gratuitous transfers to nonprofit organizations that are exempt from income tax may be deducted up to a maximum limit of 10% of taxable income derived in the year of the donation or gratuitous transfer.

Certain expenses are not deductible, including the following:
- Personal withdrawals by owners or partners
- Corporate income tax
- Bonuses and other benefits that are not paid to employees within the time period in which the annual form must be presented for the year of payment
- Interest paid to related parties, to the extent it exceeds, for foreign loans, the London Interbank Offered Rate, plus 3%, or, for local loans, the official lending rate. In addition, interest paid to related parties may not exceed 30% of the interest paid to third parties

Royalties paid with respect to mining activities are creditable or deductible, depending on the price of the minerals and subject to certain limits established by law.

Revenue and expenses are reflected in the year they are accrued.

Documentation for deduction of expenses. To deduct expenses in an amount of BOB50,000 or greater, the taxpayer must have payment supports issued by a financial intermediation entity regulated by the Authority of Supervision of the Financial System (Autoridad de Supervisión del Sistema Financiero, or ASFI). These documents must have the following information:
- Financial institution (issuer) business name
- Transaction or operation number
- Transaction date
- Transaction amount

In June 2015, the IRS issued Normative Resolution No. 10-0017-15, which states that payment supports of transactions equal or greater than BOB50,000 (the Banking Report) must be prepared on an annual basis and must be sent to the IRS between the fifth and ninth day of the following February; the due date depends on the last digit of the taxpayer's Tax Identification Number.

Inventories. Inventories are valued at the lower of market value or replacement cost.

Provisions. Provisions and reserves are not deductible for tax purposes, with the exception of the following:
- Technical reserves in insurance companies
- Mandatory provisions for financial entities
- Severance provisions
- Bad debt provisions
- Provisions for environmental restoration

To claim deductions, certain conditions must be satisfied.

Depreciation and amortization. Fixed assets are generally depreciated using the straight-line method at rates specified by law. The following are some of the annual depreciation rates.

Assets	Rate (%)
Buildings	2.5
Machinery, equipment and installations	12.5
Vehicles	20
Furniture and office equipment	10
Computer equipment	25

Trademarks and similar intangible assets may be amortized in five years if they are valued using the purchase price.

Depreciation charges resulting from changes in value based on professional appraisals carried out after 31 December 1994 are not deductible for tax purposes.

Groups of companies. Groups of companies may not file consolidated returns in Bolivia.

Relief for losses. A Bolivian-source loss incurred in a year may be carried forward to offset taxable income derived in the following three years. Loss carryforwards are not subject to inflation adjustment. For the oil and mining production sector and new projects with a minimum capital investment of BOB1 million, the carryforward period is five years. On the reorganization of companies, the carryforward period is four years.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT), on all sales of goods and services and on imports; VAT on capital goods imported by companies in the agriculture and cattle raising industries and non-extractive industries that will be used to produce goods for export may be deferred for up to 3 years if an advance payment of 10% is made	13%
Transactions Tax, on gross revenue; corporate income tax from the preceding year may be credited against Transactions Tax; sales of a limited liability partnership's capital quota are exempt	3%
Real estate tax, imposed annually on the assigned value of real property and vehicles	Various
Excise tax, on the production or importation of specified goods	
Beer	BOB4.13 per liter plus 1%
Wine	BOB3.78 per liter plus 5%
Tobacco products; rate applied on the price	50%
Blond tobacco cigarettes	BOB153.76 per 1,000 units
Black tobacco cigarettes	BOB81.86 per 1,000 units
Cigar	BOB153.76 per 1,000 units
Vehicles; rate applied on the price	5% to 50%
Electric motor vehicles	0%
Special Tax on Hydrocarbons and Derived Products; as of December 2023, the maximum rate is BOB8.45; prices that include the tax rate	
Vehicular natural gas	BOB1.66 per cubic meter
Petroleum liquid gas	BOB2.25 per kilogram
Special gasoline	BOB3.74 per liter
Premium gasoline	BOB4.79 per liter
Aviation gasoline	BOB4.57 per liter
Kerosene	BOB2.72 per liter
National jet fuel	BOB2.77 per liter
Fuel oil	BOB3.72 per liter
Mining royalty; imposed on gross revenue; rates vary according to the type of mineral	Various
Financial Transactions Tax (Impuesto a las Transacciones Financieras, or ITF); levied on bank transactions in foreign currency (deposits or transfers of funds) carried out within the domestic financial system;	

Nature of tax	Rate
in December 2023, Law 1546 was enacted to approve the government budget for the 2024 fiscal year; this law extended the application of the ITF until 31 December 2028;	0.3%
Additional financial aliquot (tax rate) for corporate income tax; applicable to financial entities, financial leasing companies, general deposit warehouses, investment fund management companies, brokerage firms and securitization companies, regulated by the ASFI, insurance and reinsurance companies, regulated by the Autoridad de Fiscalización y Control de Pensiones y Seguros (APS); tax applicable if return on equity exceeds 6%; tax is neither deductible nor able to be offset	25%
Social security contributions	
Employer	
Health care; on monthly gross revenue per employee	10%
Housing fund; on monthly gross revenue per employee	2%
Professional risk insurance; on monthly gross revenue per employee	1.71%
Solidarity Fund	3%
Solidarity Fund for mining entities	2%
Employees	
Retirement fund	10%
Common risk insurance	1.71%
Solidarity Fund (fixed contribution)	0.5%
Solidarity Fund (variable and cumulative contribution)	
Difference between the total salary and BOB35,000	10%
Difference between the total salary and BOB25,000	5%
Difference between the total salary and BOB13,000	1%
Christmas bonus (Aguinaldo); general paid between 1 December and 20 December each year; if employment is less than a year, the bonus is reduced pro rata	One month's salary
Second Christmas bonus (second Aguinaldo); must be paid if Bolivian gross domestic product increases by more than 4.5%	One month's salary
Termination compensation; bonus for termination of employment; amount depends on length of employment and whether the employee was fired or resigned	Various

E. Miscellaneous matters

Foreign-exchange controls. The Bolivian currency is the boliviano (BOB).

No restrictions are imposed on foreign-exchange transactions, including the repatriation of capital and the remittance of

dividends and royalties abroad. A system of free-floating exchange rates exists in Bolivia. No special registration requirements apply to foreign investment.

The current exchange rate is BOB6.96 = USD1.

Transfer pricing. In July 2014, Act No. 549 introduced a transfer-pricing regime in Bolivia, effective from the 2015 fiscal year. Under this regime, commercial and/or financial transactions performed between related parties must be valued using the arm's-length principle. The transactions must be valued as if they were performed between unrelated parties in comparable markets.

The following methods may be used to value transactions between related parties:
- Comparable uncontrolled price
- Resale price
- Cost-plus
- Profit-split
- Transactional net margin
- Notorious price in transparent markets (applicable to the import or export of commodities)

For this purpose, the IRS may verify if the transactions are valued according to the above methods and make any adjustments or revaluation if the agreed value, regardless of the adopted legal form, does not conform to the economic reality or causes lower taxation in Bolivia.

In April 2015, the IRS issued Normative Resolution No. 10-008-15, which imposes the following obligations:
- If annual operations with related parties are greater than BOB15 million (USD2,155,172), a transfer-pricing study and Form No. 601 must be delivered to the IRS.
- If annual operations with related parties are between BOB7,500,000 (USD1,077,586) and BOB15 million (USD2,155,172), only Form No. 601 must be delivered to the IRS.
- If annual operations with related parties are less than BOB7,500,000 (USD1,077,586), the company must retain information to demonstrate that the operations were made at market values.

In January 2017, the IRS issued Normative Resolution No. 101700000001, which established a tax-haven list that included 76 "low tax countries and regions." This list was updated in March 2018 by Normative Resolution No. 101800000006, and then included 82 "low tax countries and regions." In February 2019, Normative Resolution No. 101900000002 added Curaçao to the tax-haven list of "low tax countries and regions." Parties from these jurisdictions must be considered related parties if any commercial or financial transaction occurs with them.

In Bolivia, the interquartile formula is not applied to calculate the range of value differences. Normative Resolution No. 10-0008-15 established certain formulas to calculate the ranges.

Reorganizations. Profits arising from company reorganizations, which are mergers, divisions or transformations, are not subject to corporate income tax. Regulations on reorganizations are expected to be issued in the near future.

F. Tax treaties

Bolivia has entered into tax treaties with Argentina, France, Germany, Spain, Sweden, the United Kingdom and the United States (income tax with respect to income derived from the international operation of ships and aircraft). It has also signed the Andean Pact, which includes a tax treaty, with Colombia, Ecuador and Peru. However, the government is reviewing these treaties to determine whether they accomplish new government policies. As a result, these treaties may be ratified or revoked.

On December 2017, Normative Resolution No. 1017000030 implemented a procedure and requirements for applying tax-treaty benefits. The Tax Residence Certificate of the foreign company must be obtained, and the local company must report transactions subject to any benefit to the tax authority through the applicable web page.

Bonaire, Sint Eustatius and Saba (BES-Islands; extraordinary overseas municipalities of the Netherlands)

On 10 October 2010, the country Netherlands Antilles, which consisted of five island territories in the Caribbean Sea (Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten), was dissolved. On the dissolution of the Netherlands Antilles, the islands of Bonaire, Sint Eustatius and Saba (BES-Islands) became part of the Netherlands as extraordinary overseas municipalities. Curaçao and Sint Maarten have both become autonomous countries within the Kingdom of the Netherlands. In connection with the dissolution, a complete overhaul of the tax framework in the BES-Islands

was implemented, becoming effective on 1 January 2011. The following chapter provides information on taxation in the BES-Islands only. Chapters on Curaçao and Sint Maarten appear in this guide.

A. At a glance

Profit Tax	– (a)
Capital Gains Tax	– (a)
Real Estate Tax Rate (%)	10/17.5 (b)
Yield Tax Rate (%)	5 (c)

(a) The BES-Islands do not have a profit tax or capital gains tax.

(b) The profit is fixed at 4% of the fair market value of the real estate. The standard rate of the real estate tax is 17.5% of the fixed profit. Consequently, in principle, the effective annual tax rate is 0.7% of the fair market value of the real estate. A reduced rate of 10% applies to hotels, unless the hotel is owned by an individual. Consequently, the effective annual tax rate with respect to hotels is 0.4%. In addition, a 30% surtax is levied over the real estate tax due. Real estate tax applies if an entity using the real estate, by virtue of ownership, possession or a limited right, is deemed to be resident in the BES-Islands. If the entity is deemed to be resident in the Netherlands, the Dutch corporate income tax and the Dutch dividend withholding tax apply instead. For further details, see Section B.

(c) This tax applies if the entity from which distributions of profits are derived is deemed to be resident in the BES-Islands. If the entity is deemed to be resident in the Netherlands, the Dutch corporate income tax and the Dutch dividend withholding tax apply instead. For further details, see Section B.

B. Taxes on corporate income and gains

BES-Islands tax regime. The tax regime in the BES-Islands does not include a profit tax. However, it does include a yield tax and a real estate tax.

Pillar Two. The Pillar Two Global Anti-Base Erosion (GloBE) Model Rules stipulate that multinational enterprises (MNEs) with a (worldwide consolidated) turnover of more than EUR750 million are subject to a global minimum tax rate of at least 15% in each jurisdiction where they have a Constituent Entity (the minimum tax rate is in principle calculated based on the GloBE Model Rules provided by the Organisation for Economic Co-operation and Development [OECD]). The BES-Islands have implemented Pillar Two legislation through a linking provision connected to the Dutch Pillar Two legislation. As a result, Constituent Entities of in-scope MNEs that are located in the BES-Islands should consider the possible application of Pillar Two legislation, including the Income Inclusion Rule and the Qualifying Domestic Minimum Top-up Tax. However, in the BES-Islands, certain provisions, most notably the application of the Under-Taxed Profits Rule, are not included.

Residency fiction. The yield tax and real estate tax mentioned above are not automatically applicable as a result of a residency fiction. In principle, all entities established on the BES-Islands are deemed to be established in the Netherlands for tax purposes and accordingly subject to Dutch corporate income tax (up to 25.8%) and Dutch dividend withholding tax (in principle, 15%). For details on the Dutch taxes, see the chapter on the Netherlands in this guide.

However, on request, entities that have sufficient nexus with the BES-Islands may be subject to the fiscal system of the BES-Islands. In such case, no Dutch corporate income tax applies, but the yield tax and real estate tax apply. Entities are deemed to have

sufficient nexus with the BES-Islands if any of the following circumstances exist:
- The entity is a foundation or trust that is a resident of the BES-Islands.
- The entity has been admitted to a special trade and service depot.
- On request, the entity has obtained a ruling from the tax authorities that, for tax purposes, the entity is deemed to be a resident of the BES-Islands. A request for such a ruling should be made with the tax authorities within six months after the beginning of the calendar year.

The ruling referred to above is issued in the following cases:
- The assets of the entity in the BES-Islands consist of less than 50% of mobile assets, including, among other portfolio investments, participations and cash.
- An entity that does not meet the requirement above can still obtain a ruling if it employs at least three residents of the BES-Islands that manage the entity's assets and if it has at its disposal business premises in the BES-Islands for a period of at least 24 months with a value of at least USD50,000.
- The entity is a holding company that holds at least 50% of the shares in an entity that is admitted to a special trade and service depot or already has obtained such a ruling.
- The entity has a small business with a turnover of no more than USD80,000, the assets of the company in general do not exceed USD200,000, and the company does not carry out financial services, insurance or trust (fiduciary) activities.

Yield tax. The yield tax is levied on distributions (in whatever form) of profits by entities resident in the BES-Islands. The rate of the yield tax is 5%. The entity making the distribution acts as withholding agent. Interest and royalty payments are not subject to the yield tax. The yield tax is not levied on the remittances of profits by branches to their foreign head offices.

Real estate tax. The real estate tax is levied on gains derived from real estate located in the BES-Islands. The real estate tax is levied on a taxpayer (person or entity) that, at the beginning of the year, has the use of real estate by virtue of ownership, possession or a limited right.

The profit is fixed at 4% of the fair market value of the real estate. The rate of the real estate tax is 17.5% of the fixed profit. Consequently, the effective annual tax rate is 0.7% of the fair market value of the real estate. A reduced rate of 10% applies to hotels, unless the hotel is owned by an individual. Consequently, the effective annual tax rate with respect to hotels is 0.4%. In addition, a 30% surtax is levied over the real estate tax due. The value of the real estate is determined by the Tax Inspector. The value is set at the beginning of the period for which the value is determined and is in principle determined for five consecutive calendar years.

Real estate tax is not levied on owner-occupied homes, real estate included in the business assets of a privately run enterprise (that is not operating in the form of an entity) and real estate with a value of less than USD70,000, if the person having use of the real estate is a resident of the BES-Islands.

In addition, entities that are deemed to be residents of the Netherlands (see *Residency fiction*) are exempt from real estate tax.

Administration

Real estate tax. The real estate tax is levied over a period of one calendar year. The Tax Inspector imposes a tax assessment, and the filing of a tax return is not required.

Yield tax. The withholding agent must withhold the yield tax at the time the profit distribution is put at the disposal of the recipient. The withholding agent must file a quarterly tax return and remit the yield tax due within 15 days after the end of the quarter. The tax return does not need to be filed for periods in which no distributions take place.

C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
General expenditure tax; levied on the delivery of manufactured goods in the BES-Islands by a manufacturer as part of its business, on the rendering of services in the BES-Islands by an entrepreneur as part of its business and on imports of goods	
Bonaire	
Delivery of goods (different rates apply to passenger cars)	8
Insurance	7
Other taxable activities	6
St. Eustatius and Saba	
Delivery of goods (different rates apply to passenger cars)	6
Insurance	5
Other taxable activities	4
Real estate transfer tax	5
Customs duties	0

D. Tax treaties

The Dutch treaty network does not apply to entities deemed to be residents of the BES-Islands. However, the Dutch standard treaty does not exclude entities deemed to be residents of the Netherlands (by the residency fiction) from the application of the treaty.

Provisions for double tax relief are included in the Tax Regulation for the Netherlands. Under a measure in the Tax Regulation for the Netherlands, on request, dividend distributions by a qualifying Dutch subsidiary to its BES-Islands parent company can be exempt from Dutch dividend withholding tax.

A. At a glance

Corporate Income Tax Rate (%)	22 (a)
Capital Gains Tax Rate (%)	22 (b)
Branch Tax Rate (%)	30
Withholding Tax (%)	
Dividends	10
Interest	15
Royalties	15
Management and Technical Fees	15
Payments to Entertainers	10
Payments under Construction Contracts	3 (c)
Brokerage Commission	10 (d)
Rent Paid for Use of Buildings and Land	5 (d)
Purchases of Livestock	4 (e)
Directors' Fees	10 (f)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) For approved manufacturing companies, the rate is 15%.
(b) See Section B.
(c) This tax is imposed on gross receipts derived from construction contracts. This tax is an advance payment that may be offset against the actual tax due.
(d) This tax is an advance payment that may be offset against the actual tax due.

(e) This withholding tax applies to payments for purchases of livestock for slaughter or for feeding for slaughter.
(f) The rate is 15% for fees paid to a nonresident director, unless a double tax treaty provides otherwise.

B. Taxes on corporate income and gains

Corporate income tax. All companies operating in Botswana are subject to tax on earnings in Botswana.

Rates of corporate tax. The corporate tax rate for companies other than manufacturing companies is 22%. Approved manufacturing companies are subject to tax at a reduced tax rate of 15%.

The tax rate for a branch is 30%. Botswana does not impose a branch remittance tax.

International Financial Services Centre (IFSC) companies (as defined) are taxed at a rate of 15%.

Accredited Innovation Hub business taxable income is taxed at 15%.

Special Economic Zone accredited businesses are taxed at 5% for the first 10 years and 10% thereafter.

Diamond-mining companies are taxed in accordance with tax agreements entered into by the companies with the government. Other mining companies are taxed at a rate of 22% or at a rate determined by a formula, whichever is higher. The following is the formula:

$$70 - \frac{1{,}500}{x}$$

$$x = \frac{\text{Taxable income}}{\text{Gross income}} \times 100$$

Capital gains. The capital gains tax applies to gains on the sale of capital assets of a business carried on in Botswana and on the sale of corporate shares and debentures of private companies.

For computing gains on sales of immovable property acquired before 1 July 1982, the cost of acquisition and improvements is first increased by a 10% rate, compounded for each complete 12-month period from the date of acquisition to 1 July 1982. It is then indexed for inflation from 1 July 1982 to the date of sale. For computing gains on immovable property acquired on or after 1 July 1982, the cost of acquisition and improvements is indexed for inflation during the period of ownership.

Only 75% of the gain derived from the sale of shares is subject to capital gains tax. Gains on the sale of shares held for at least one year that are listed on the Botswana Stock Exchange are exempt from capital gains tax if the shares are actually traded on the Botswana Stock Exchange or if the company has released for trading 49% or more of its equity shares on the Botswana Stock Exchange. Sales of shares in IFSC companies are exempt from capital gains tax.

Taxable capital gains are subject to tax at a rate of 22% for resident companies and 30% for nonresident companies.

Administration. The tax year ends on 30 June. Companies are taxed on the profits reported in their latest completed accounting period.

Under an advance payment of tax and self-assessment system, companies must estimate their tax in advance and pay the estimated tax in four equal quarterly installments. The first payment is due three months after the beginning of the accounting period and the subsequent payments are due at the end of every subsequent three-month period. Tax returns must be filed, and any balance of tax due must be paid, within four months of the end of the tax year, or in the case of a company with an accounting period that is different from the tax year, within four months from the end of such accounting period. Underpayments and late payments are subject to interest at a rate of 1.5% per month or part of a month (compounded).

Dividends. A withholding tax of 10% is imposed on dividends paid to residents and nonresidents. It is a final tax.

Dividends distributed by investment or similar companies are exempt from tax if they are paid out of dividends received that suffered withholding tax.

C. Determination of trading income

General. Taxable income is net income reported in the financial statements, modified by certain provisions of the tax law. Expenses are deductible to the extent incurred in producing assessable income.

The rules for determining taxable income for an IFSC company are different from those for a normal company.

Collective-investment undertakings (as defined) are subject to tax on their undistributed income only.

Interest deductibility. Interest expenses claimed as deductions are limited to 30% of the earnings before interest, tax, depreciation and amortization. The excess is claimable over 10 years for mining companies and three years for the non-mining entities. However, the limitation does not apply to companies whose main business is banking or insurance or are variable rate loan stock entities.

Inventories. For tax purposes, inventory is valued at the lower of cost or net realizable value.

Provisions. Specific identifiable provisions are allowable for tax purposes; general provisions are not allowed.

Depreciation. Depreciation is computed using the straight-line method. Official rates vary according to the type of asset. The following are some of the official straight-line rates.

Asset	Rate (%)
Industrial buildings	2.5*
Commercial buildings	2.5
Office equipment	10
Motor vehicles	25
Plant and machinery	15 to 25

* An initial allowance of 25% is also granted.

Capital allowances are subject to recapture on the sale of an asset to the extent that the sales proceeds exceed the tax value after depreciation.

Mining companies may deduct 100% of their mining capital expenditure (as defined) in the year in which the expenditure is incurred.

Relief for losses. In general, tax losses may be carried forward for five years. Mining and prospecting losses may be carried forward indefinitely.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on almost all supplies of goods and services consumed in Botswana	14
Capital transfer tax, paid by the recipient on all gratuitous receipts of property, corporate shares and inheritances, less allowable deductions	12.5

E. Miscellaneous matters

Foreign-exchange controls. No foreign-exchange controls are imposed in Botswana. However, certain forms must be completed for statistical purposes.

Transfer pricing. Botswana introduced transfer-pricing legislation in December 2018 that is effective from 1 July 2019. The regulations, which are based on the Organisation for Economic Co-operation and Development (OECD) Guidelines, cite the OECD guidelines as a relevant source of interpretation of the regulations.

F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %	Management and technical fees %
Barbados	5/12 (a)	10	10	10 (f)
China (Mainland)	5	7.5	7.5	15
Eswatini	10/15 (e)	10	10	10
France	5/12 (a)	10	10	7.5
India	7.5/10 (c)	10	10	10
Ireland	5	7.5	5/7.5 (h)	—
Lesotho	10/15 (e)	10	10	10

Mauritius	5/10 (b)	12	12.5	15
Mozambique	10/12 (j)	10	10	10
Namibia	10 (c)	10	10	15
Russian Federation	5/10 (b)	10	10	10
Seychelles	5/10 (b)	7.5	10	10
South Africa	10/15 (e)	10	10	10
Sweden	15 (d)	15 (d)	15 (d)	15
United Arab Emirates	5/7.5 (k)	7.5	7.5	5

	Dividends %	Interest %	Royalties %	Management and technical fees %
United Kingdom	5/12 (a)	10	10	7.5
Zambia	5/7 (g)	10	10	10
Zimbabwe	5/10 (b)	10	10	10
Non-treaty jurisdictions	10	15	15	15

(a) The 5% rate applies if the recipient is a company that holds at least 25% of the share capital of the payer. The 12% rate applies in all other cases. (Although the treaty provides for a 12% rate in all other cases, the domestic rate of 10% applies because it is lower than the treaty rate of 12%.)

(b) The 5% rate applies if the recipient holds at least 25% of the shares of the payer. A 10% rate applies in all other cases.

(c) The 7.5% rate applies if the recipient is a company that holds at least 25% of the capital of the payer of the dividends. The 10% rate applies in all other cases.

(d) If a lower rate is negotiated with any other state in a future treaty, such rate also applies under the Sweden treaty.

(e) The 10% rate applies if the recipient is a company that holds at least 25% of the capital of the payer of the dividends. The 15% rate applies in all other cases. (Although the treaty provides for a 15% rate in all other cases, the domestic rate of 10% applies because it is lower than the treaty rate of 15%.)

(f) If a lower rate is negotiated with any other state in a future treaty, such rate also applies under the Barbados treaty.

(g) The 5% rate applies if the recipient is a company that holds at least 25% of the capital of the payer of the dividends. The 7% rate applies in all other cases.

(h) The 5% rate applies for royalties paid with respect to the use of, or the right to use, industrial, commercial or scientific equipment. The 7.5% rate applies in all other cases.

(i) The 5% rate applies if the recipient is a company that holds at least 25% of the capital of the payer of the dividends. The 8% rate applies in all other cases.

(j) The 10% rate applies if the recipient is a company that holds at least 25% of the share capital of the payer. The 12% rate applies in all other cases. (Although the treaty provides for a 12% rate in all other cases, the domestic rate of 10% applies because it is lower than the treaty rate of 12%.)

(k) The 5% rate applies if the beneficial owner is a company holding at least 10% of the capital of the company. The 7.5% rate applies in all other cases.

A possible income tax reform is expected to be discussed in Brazil during 2024, which could affect the dividend withholding tax rate and the corporate income tax rate. For details, see Section B.

A. At a glance

Corporate Income Tax Rate (%)	15 (a)
Capital Gains Tax Rate (%)	15 to 25 (a)(b)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%)	
Dividends	0
Interest	15 (c)(d)
Royalties from Patents, Know-how, etc.	15 (c)(d)(e)
Services	15 (c)(d)(e)(f)(g)(h)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (i)

(a) A 10% surtax is also levied (see Section B). As detailed in Section B, a Social Contribution Tax (SCT) is also imposed at the general rate of 9%. In view of the surtax and the SCT, the corporate income tax (CIT) rate in Brazil is generally considered to be 34%.

(b) Under Law 13,259/16, which applies to capital gains derived by Brazilian individuals, effective from 2017, the capital gains tax rate is increased from a 15% flat rate to a progressive rate system with rates ranging from 15% to 22.5%. According to Normative Instruction 1732/17, such increased rates also apply to capital gains derived by nonresident companies and individuals. A 25% rate applies to nonresidents located in low-tax jurisdictions.

(c) The withholding tax is imposed on payments, credits, deliveries or remittances abroad, and on the use of amounts in Brazil for the benefit of nonresidents.

(d) The withholding tax rate may increase to 25% if the recipient is resident in a prohibited list jurisdiction, which means a jurisdiction that taxes income at a rate lower than 20% (or 17% if the jurisdiction or regime complies with the international standards of tax transparency) and/or the jurisdiction's legislation does not allow access to information on the shareholders of legal entities or on the effective beneficiaries of income of nonresidents.

(e) A 10% Contribution for Intervention in the Economic Domain (Contribuição de Intervenção no Domínio Econômico, or CIDE) is imposed on royalties and on technical and administrative service payments. CIDE is payable by the Brazilian payer, and it is not a withholding tax.

(f) The withholding tax rate may increase to 25%, depending on the type of service rendered.

(g) Based on interpretations of tax treaties by the Brazilian tax authorities, it may be possible to claim that withholding income tax is not due on payments for technical services to Austria, Finland, France, Japan and Sweden.

(h) Imports of services generally also trigger the Social Integration Program (Programa de Integração Social, or PIS) tax and the Social Security Financing Contribution (COFINS), at a combined rate of 9.25%, as well as the Municipal Tax on Services (ISS), which is imposed at rates ranging from 2% to 5%, depending on the municipality and the service.

(i) For details, see Section C.

B. Taxes on corporate income and gains

Corporate income tax. Brazilian resident companies are subject to CIT on their worldwide income. Companies resident in Brazil are those incorporated under the Brazilian laws and managed in Brazil.

Foreign branches, agencies or representative offices of Brazilian companies are also subject to Brazilian tax on their income earned overseas. In general, foreign-source losses may not offset Brazilian-source income. A foreign tax credit is available (see *Foreign tax relief*).

In addition to CIT, SCT is imposed on worldwide income (see *Rates of tax*).

Rates of tax

Corporate income tax. The basic rate of CIT is 15%, increased by a surtax of 10% on annual taxable profits exceeding BRL240,000 (approximately USD46,200).

Exemption from, or reduction of, CIT is granted to businesses in certain underdeveloped areas.

Social Contribution Tax. SCT is levied at a general rate of 9%. For financial institutions, private insurance companies and capitalization companies, the SCT rate is 15%. For all banks, the rate is 20%.

SCT is not deductible in calculating CIT. The tax bases for SCT and CIT are basically the same. The total effective tax rate on corporate profits is 34% (25% CIT [including the 10% surtax] plus 9% SCT).

Losses for SCT purposes are subject to the same tax rules applicable to losses for CIT purposes.

At the time of writing, the Brazilian federal government had assumed the compromise to reform the income tax system in Brazil. While there is already a tax reform bill in Congress (approved by the House of Deputies but still pending approval by the Senate), which proposes that the CIT be reduced from 34% to 26% (potentially 27%, depending on other factors under discussion), the likelihood of this bill being approved is uncertain because it was proposed by the former government. It is also uncertain whether the current government would propose a large reform all at once or deliver changes through amendments in several pieces of legislation throughout the year.

Capital gains. Capital gains are treated as ordinary income for Brazilian resident companies and, accordingly, are subject to CIT and SCT.

Capital gains derived by nonresidents on shares and other assets located in Brazil (Foreign Direct Investment [Investimento Estrangeiro Direto, or IED]) are subject to capital gains tax at progressive rates ranging from 15% to 22.5%.

Such increased rates result from Law 13,259/16, which refers only to the capital gains tax rate for Brazilian individuals but is generally applied to nonresident companies and individuals. In Normative Instruction 1732/17, the Brazilian tax authorities confirmed their understanding that the progressive rates also apply to nonresident investors.

A 25% rate applies to nonresidents located in prohibited list jurisdictions.

Investments in the Brazilian financial and capital markets through the regulated market are subject to specific tax rules.

Administration

Filing and payment. The fiscal year is the calendar year. In general, companies must file returns called Escrituração Contábil-Fiscal (ECF) in an electronic format by the last working day of

July of the following year. Extensions to file returns are generally not available.

Companies may elect to pay CIT and SCT on an annual or quarterly basis. In general, this election may not be changed during the calendar year. Companies that elect the annual basis must make advance monthly payments of CIT and SCT. The advance payments are equal to the income tax applicable to either the company's actual taxable income or the company's income calculated in accordance with an estimated method, whichever is lower.

For monthly payments of CIT that are calculated based on the estimated method, the tax base is generally 8% of the company's gross income. Different percentages apply to specific industries, such as the following:

- 16% for financial institutions and transportation services
- 32% for services in general
- 1.6% for gas distribution

For the purpose of computing the advance income tax payments, the applicable rate is 15%. An additional 10% rate is applied to monthly taxable income in excess of BRL20,000 (approximately USD4,050).

The tax base for monthly estimated payments of SCT is generally 12% of gross income plus capital gains and other income, including financial income. This percentage is increased to 32% for service companies. SCT payments must be made at the same time as the income tax payments. The applicable tax rate is generally 9%.

The difference between the tax shown on the annual tax return and the amounts paid in advance must be paid by the last working day of March following the end of the fiscal year. If the amounts paid in advance exceed the tax shown on the annual tax return, the excess may be used to offset the tax due in a month following the fiscal year-end. A refund may be requested from the tax authorities within five years of the tax payment.

Alternatively, companies may pay tax quarterly based on actual quarterly income, computed under the accrual method.

Interest and penalties for late payments. The late payment of taxes is generally subject to the following:

- Interest calculated at the rate applicable to the Special Liquidation and Custody System (Sistema Especial de Liquidação e Custódia, or SELIC), which is published each month by the government
- A daily fine of 0.33% of the tax due, up to a maximum penalty of 20% of the tax due (excluding interest)

In general, assessments resulting from a tax audit are subject to a penalty of 75% on the tax due. The penalty increases to 150% in the case of fraud. These penalties can be reduced by 50% if the payment is made by the last day of the appeal period (other penalty reductions are available during the appeal process). In such case, the effective penalty is 37.5%.

Dividends. Withholding tax is not imposed on dividends paid to residents and nonresidents out of profits generated on or after 1 January 1996.

For earnings recognized in 2014, the excess of dividends paid based on the statutory financial statements over the dividends determined under a "tax balance sheet" is subject to tax. A 15% withholding tax applies to such excess dividends paid to nonresidents. Dividends generated before 2014 are not subject to tax even if they are in excess of the dividends determined under the "tax balance sheet." Dividends generated after 2014 are not subject to tax because the concept of "tax balance sheet" has ceased to exist.

Brazilian companies are allowed to pay a "deductible dividend," which is called interest on net equity (INE), to their shareholders. INE is calculated by applying a benchmark interest rate called Taxa de Juros de Longo Prazo (TJLP) to the net equity of the Brazilian company, followed by certain adjustments provided by the tax law. INE is treated as deductible interest for tax purposes, which is subject to a 15% withholding tax when paid to residents and nonresidents. A 25% rate applies to nonresidents located in prohibited list jurisdictions. Payments to Brazilian residents are fully taxable and are also subject to the PIS and COFINS taxes. (For details regarding the PIS and COFINS taxes, see Section D.)

Newly published Law 14,789/23 modified the INE calculation basis by providing for the exclusion of certain values from the calculation basis of INE, such as equity increases that do not represent an effective inflow of assets into the company, goodwill for future profitability, and intangible assets or options granted. This limitation will likely reduce the distributable INE amounts for each year starting from 2024.

At the time of writing, additional changes to the tax law are being discussed to the tax law, such as to impose withholding tax on dividends and to eliminate INE. At the time of writing, the likelihood of this bill being approved is uncertain (see *Rates of tax*).

Foreign tax relief. A foreign tax credit is available to Brazilian companies on income taxes paid overseas. In general, the foreign tax credit is limited to the amount of Brazilian CIT and SCT on the foreign-source income. Compliance with certain formalities is required to support the foreign tax credit.

C. Determination of taxable income

General. CIT and SCT are due on a company's taxable income, which is the net book income, as adjusted by the tax law. In general, operating expenses are deductible if the following conditions are satisfied: they are necessary, usual and common to the company's activity; they are actually incurred; and they are supported by proper documentation. However, the following expenses, among others, are not deductible:

- Expenses related to fixed assets, including financial and operating lease payments, depreciation and amortization, if the assets are not directly used in the production or commercialization of products and services.
- Fringe benefits furnished to shareholders and officers if the beneficiaries are not identified and individualized (a 35% [effective

rate of 53.84%] withholding tax is imposed on such payments). Neither the fringe benefits nor the withholding tax is deductible.
- Donations in general, gifts and other non-compulsory payments.

Simplified methods are available for calculating the tax liability applicable to small businesses.

Inventories. Companies that have an integrated cost system must value inventory for tax purposes at the lower of cost or market value, using either the average cost or the first-in, first-out (FIFO) method. Direct cost and last-in, first-out (LIFO) methods cannot be used. In general, companies that do not have an integrated cost system must value finished products at 70% of the highest sales price of the product sold in the tax period. Work-in-process must be valued at either 80% of the finished product cost or 1.5 times the highest cost of the material content. Supermarkets and similar enterprises that sell a large number of goods may use a specific system for inventory valuation based on periodic and simplified counting.

Provisions. In general, the only deductible provisions are those for vacation pay and the 13th month salary (annual bonus).

Depreciation. Fixed assets may be depreciated using the straight-line method at rates provided by the Brazilian tax authorities. The following are some of the annual depreciation rates:
- Real estate assets: 4%
- Machinery and equipment: 10%
- Vehicles: 20%
- Computer hardware and software: 20%

Companies that operate two work shifts per day may depreciate machinery and equipment at 1.5 times the normal rate. If the company operates three shifts, it may double the normal rate.

For accounting purposes, companies may calculate depreciation at different rates (taking into account International Financial Reporting Standards [IFRS] criteria, which can affect, in addition to depreciation rates, inventory and other items).

Tax losses. Tax losses may be carried forward indefinitely, but can only offset up to 30% of the company's taxable income for a tax period. No carryback is allowed.

Tax losses may be jeopardized if a company experiences a change in business activity and ownership control between the period in which losses were generated and the period in which losses would otherwise be used to offset taxable income. In general, non-operating tax losses can be offset only against non-operating gains if certain conditions are met. In a corporate restructuring involving a merger, the tax losses of the merged company must be forgone.

D. Other significant taxes

A major tax reform on indirect taxes was approved in 2023, which will affect the summary table below dependent on complementary laws regulating in more detail the new rules, and on a progressive transition period in the following years. See *Indirect tax reform* in Section E. The following table summarizes other significant taxes currently in effect.

Nature of tax	Rate (%)
State value-added tax (ICMS)	0 to 25
General rate for intrastate transactions	17/20
General rate for interstate transactions	12
General rate for interstate resale transactions involving imported goods	4
Transactions in which taxpayers located in the South or Southeast (except for Espírito Santo State) regions that remit goods and services taxable under ICMS to taxpayers resident in the states of the North, Northeast or Centre-West regions or Espírito Santo State	7
Exports	Exempt
Federal value-added tax (IPI); the top rate applies to luxury or superfluous goods, such as alcoholic beverages and cigarettes	0 to 330
Tax on Financial Operations (IOF); imposed on credit transactions, foreign-exchange transactions, insurance operations and financial investments	
Loan operations	
Daily rate (maximum annual rate of 1.5%) for corporations	0.0041
Daily rate (maximum annual rate of 3%) for individuals	0.0082
Additional rate	0.38
Foreign-exchange transactions	0.38 to 6.38
Insurance operations	0.38 to 7.38
Financial investments	Various
Social Integration Program (Programa de Integração Social, or PIS) tax; levied on gross income at a rate of 1.65%; the tax is a non-cumulative (value-added tax [VAT]-type) tax for certain taxpayers; under the non-cumulative regime, some companies are subject to the "single-phase" regime, with the manufacturer being responsible for the contribution collection, usually at a higher rate (2.1% for pharmaceuticals; 2.2% cosmetics and 2.3% auto parts); certain companies, including local financial institutions and companies that manufacture goods in the Manaus Free Trade Zone, are subject to the cumulative regime and make the contribution at a 0.65% rate; the tax is also levied on imports of goods at a rate of 2.1% and on services at a rate of 1.65%, in most cases; however, for certain imported, goods, different rates apply; in certain cases, the rate is reduced to 0%	0/0.65/1.65/2.1 to 3.52
Social Security Financing Contribution (Contribuição para o Financiamento da Seguridade Social, or COFINS); levied on gross income at a rate of 7.6%; the tax is a non-cumulative (VAT-type) tax for certain taxpayers; under the non-cumulative regime, some companies are subject to the "single-phase" regime, with the manufacturer being responsible	

Nature of tax	Rate (%)
for the contribution collection, usually at a higher rate (9.9% for pharmaceuticals; 10.3% for cosmetics and 10.8% for auto parts); certain companies, including local financial institutions and companies that manufacture goods in the Manaus Free Trade Zone, are subject to the cumulative regime and make the contribution at a 3% rate; the tax is also levied on imports of goods at a rate of 9.65% and on services at a rate of 7.6%, in most cases; however, for certain imported goods, different rates apply; in certain cases, the rate is reduced to 0%	0/3/7.6/9.65 to 16.48
Municipal Tax on Services (ISS)	2 to 5
Social security contributions (INSS), on monthly salary; paid by	
Employer	Approximately 28.8
Employee; rate varies depending on amount of remuneration (amount of employee contribution may not exceed BRL642.34 [approximately USD155] a month)	8 to 11
Severance Pay Indemnity Fund (FGTS), on monthly salary	8
Withholding tax on local payments of professional service fees (creditable by the recipient against income tax)	Up to 27.5
Contribution for development of cinematographic and video phonographic works (Condecine); in general, tax rate applied to amounts paid to producers, distributors and intermediaries abroad for the exploitation of cinematographic and video phonographic works	11

E. Miscellaneous matters

Indirect tax reform. A major tax reform on indirect taxes was approved, which will result in a simplification in rates, incidence and VAT returns streamlining the five existing indirect taxes into just two main taxes (Contributions on Goods and Services [Contribuição sobre Bens e Serviços, or CBS; federal tax] and Goods and Services Tax [Imposto sobre Bens e Serviços, or IBS; state and municipal tax]), plus an excise tax and a possible state contribution applied upon primary and semifinished products. In addition to significantly simplifying the current tax system, the new rules are expected to generate a wide range of changes in markets and relative prices of products, and might also reduce the "weight" of tax factors in allocation decisions for productive and commercial investments. The changes will now depend on complementary laws regulating in more detail the new rules and will require considerable transition time.

Foreign investment. As a general rule, all foreign investments, such as equity or debt investments, must be registered with the Central Bank of Brazil (Banco Central do Brasil, or BACEN) to assure the payment of dividends, principal and interest, or the repatriation of capital. Nonresidents holding assets and rights in Brazil, such as equity investments, portfolio investments and

debt investments, must be registered with the Brazilian tax authorities. On registration, the nonresidents obtain a tax identification number (CNPJ for entities or CPF for individuals). Failure to comply with the foreign-exchange regulations and associated requirements is subject to significant penalties. This particularly applies to evasion, false statements and private offsetting transactions.

Until December 2023, to allow Brazilian companies to pay and deduct the royalties up to the amounts prescribed by law related to contracts for the supply of technology and technical services with the transfer of technology, and for the use of trademarks and patents between residents and nonresidents, it was required that these contracts be registered with the National Institute of Industrial Property (Instituto Nacional da Propriedade Industrial, or INPI) and under the Financial Operations Registration – ROF module of the Electronic Declaratory Registration (Registro Declaratório Eletrônico, or RDE) of BACEN's electronic system (SISBACEN). However, from 1 January 2024, royalties paid abroad are subject to the new Brazilian transfer-pricing rules based on new Law 14,596/23, and therefore, their deductibility is now determined by the arm's-length principle. In addition, the registration with INPI and BACEN as a condition for the deductibility was repealed. See *Transfer pricing* for details on the new rules.

Transfer pricing. Brazilian transfer-pricing rules apply only to cross-border transactions entered into between Brazilian companies and foreign related parties. A transaction entered into between a Brazilian company and a resident of a low-tax jurisdiction or a resident in a jurisdiction with a privileged tax regime is also subject to the transfer-pricing rules, even if the parties are not related.

After several years of joint work between the Brazilian Federal Revenue Service (Receita Federal do Brasil, or RFB) and the Organisation for Economic Co-operation and Development (OECD), on 29 December 2022, the Brazilian government published Provisional Measure No. 1,152 (PM 1,152), which introduces new transfer-pricing rules in Brazil.

PM 1,152 was converted to Law 14,596/23 on 14 June 2023, and the RFB issued Normative Instruction 2,161/23 on 19 September 2023 regulating the law, establishing a transfer-pricing framework in Brazil that is aligned with the guidelines provided by the OECD.

The new law and normative instruction address key issues, including the following:

- Introducing the arm's-length principle following international principles stated by the OECD
- Expanding the related-party definition
- Applying this new transfer-pricing system to all cross-border intercompany transactions (including royalties)
- Introducing cost contribution agreements
- Including all cross-border financial transactions, such as intercompany loans, guarantees, cash pooling and insurance
- Implementing transfer-pricing methods according to the OECD standard
- Establishing the need for a functional (risks, functions and assets) and economic analysis

- Introducing penalties for noncompliance with the requirements for transfer-pricing documentation
- Introducing unilateral transfer-pricing agreements similar to advance pricing agreements (APAs)

The publication of the Normative Instruction 2,161/23 represented an important milestone toward the adoption of the arm's-length principle, effective from 1 January 2024. In addition, the RFB will likely publish additional regulations on other related topics not included within Normative Instruction 2,161/23, such as commodities, intangibles, financial operations, cost contribution agreements, business restructurings and APA submissions.

Low-tax jurisdiction and privileged tax regime. The Brazilian low-tax jurisdiction (LTJ) list (prohibited list) and privileged tax regime (PTR) list (gray list) are contained in regulations issued by the Brazilian tax authorities. New definitions of LTJ and PTR were introduced in 2015 and in 2016. In 2016, Ireland was added to the prohibited list, and Austria holding companies without substantial economic activity were added to the gray list. In addition, new rules on the meaning of substantial economic activity were issued in 2016. As of 2018, Costa Rica, Madeira and Singapore were removed from the prohibited list; however, specific regimes in all three jurisdictions were added to the gray list. In 2019, Brazil removed San Marino from the prohibited list. There have been no changes since then.

Thin-capitalization. Under thin-capitalization rules, interest expense arising from a financial arrangement with a related party is deductible only if the related Brazilian borrower does not exceed a debt-to-net equity ratio of 2:1. In addition, interest expense arising from a financing arrangement executed with a party established in a LTJ or benefiting from a PTR is deductible only if the Brazilian borrower does not have a debt-to-net equity ratio of greater than 0.3:1.

Controlled foreign companies. Profits realized by a controlled foreign company (CFC) of a Brazilian company are subject to income taxation on 31 December of each year regardless of any actual distribution by the CFC. Law 12,973/2014 introduced a new CFC regime. Under the new regime, qualifying CFCs are taxed on an entity-by-entity basis (that is, individually regardless of the design of the corporate structure outside of Brazil). If certain conditions are met, a tax consolidation of CFCs can be performed at the level of the Brazilian shareholder, through which the accounting losses of a qualifying CFC may offset taxable income of another CFC.

The earnings of CFC entities whose business is connected to oil and gas activities are exempt from tax in Brazil. Foreign tax credits of CFCs can be used against Brazilian corporate income tax, limited to the Brazilian corporate income tax due on CFC income. Under regulations issued by the Brazilian tax authorities (Normative Instruction 1,520/2014), the Brazilian shareholder can elect which non-Brazilian entities are subject to tax consolidation. Qualifying non-CFC entities are subject to tax in Brazil on an actual or deemed dividend distribution to a Brazilian shareholder. A deemed credit of 9% of the CFC income subject to tax in Brazil is available for qualifying entities.

The Brazilian corporate income tax on CFC income may be subject to installment payments over a period of eight years (12.5% payment per year), but the deferred tax liability is subject to adjustment based on London Interbank Offered Rate plus the US dollar currency exchange variation.

Digital bookkeeping. The Public System of Digital Bookkeeping (Sistema Público de Escrituração Digital, or SPED) is a unified electronic storage of accounting and tax bookkeeping. It is intended to replace bookkeeping prepared on paper and to unify the preparation, storage, and certification requirements of the Board of Trade and of the tax authorities at the municipal, state and federal levels. Most companies are now required to comply with the SPED.

International Financial Reporting Standards. Law 11,638/07 introduced changes to the Brazilian Corporate Law (Law 6,404/76) with respect to the preparation of financial statements for corporations as well as for large companies, regardless of whether they are organized as corporations. This law represented a major step in the process toward harmonization of Brazilian GAAP with IFRS. Under this law, which took effect on 1 January 2008, large companies must prepare their financial statements under Brazilian GAAP, which is consistent with IFRS principles.

Special tax benefits. The Brazilian government has issued laws providing tax incentives to increase investments in Brazil. The following are the main programs:

- Law 11,196/2005: tax benefits for investments in infrastructure and research and development (R&D).
- Special Tax Regime for the Renewal and Expansion of Port Structures (Regime Tributário para Incentivo à Modernização e à Ampliação da Estrutura Portuária, or REPORTO): suspension of IPI, PIS, COFINS and import tax for investments in ports, warehousing and surveillance and monitoring systems.
- RECOF-SPED: a special customs regime that enables companies to import or acquire in the local market with suspended taxes (Import Duty [II], IPI, PIS, COFINS, Marine Fee (AFRMM) and ICMS (only the states of São Paulo [SP], Rio de Janeiro [RJ] and Parana [PR]) goods that will be used in the industrial process for export destination or sales in the local market.
- Tax credit for implementation or expansion of economic ventures. Effective from 1 January 2024, the rules of tax subsidies for investments (*subvenção para investimentos*) provided by Law 12,973/14 were repealed by Law 14,789/23. According to the revoked rules, in general, gains deriving from tax subsidies (for example, VAT presumed credits, and exemption and reduction in the computation basis) could be excluded from CIT and SCT calculation bases, contingent on the amounts of the subsidies being registered in the companies' equity accounts. The amounts of the subsidies also were not subject to PIS and COFINS. Currently, under Law 14,789/23 the amounts of the subsidies are subject to CIT, SCT, PIS and COFINS. An exception is for expansion or modernization projects agreed upon with the governmental bodies (federal, state and municipal). For such cases, a tax credit may be potentially granted only for CIT purposes and is reliant on pre-approval by the RFB.

Consequently, such modifications in the tax treatment of subsidies could increase the tax liabilities for companies that benefited from the previous rules.

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends %	Interest %	Royalties (k) %
Argentina	0 (n)	15 (d)(n)	10/15 (n)

Türkiye	0	15 (q)	15 (i)
Ukraine	0	15 (d)	15
United Arab Emirates	0	15 (v)	15
Uruguay	0	15 (d)	10 (c)(o)
Venezuela	0	15 (d)	15
Non-treaty jurisdictions	0	15 (j)	15 (j)

(a) The withholding rate is 10% for interest on certain bank loans with a minimum term of seven years.

(b) The withholding rate is 10% for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, excluding cinematographic films and films or tapes for television or radio broadcasting, produced by a resident of a contracting state.

(c) The withholding rate is 10% for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works or for the use of, or the right to use, cinematographic films or television or radio films or tapes produced by a resident of a contracting state.

(d) Interest paid to the government of the other contracting state, a political subdivision thereof or an agency (including a financial institution) wholly owned by that government or political subdivision is exempt from tax.

(e) The withholding rate is 15% for royalties with respect to copyrights of cinematographic films and films or tapes for radio or television broadcasting.
(f) The withholding rate is 10% for interest on certain long-term (at least 10 years) bank loans.
(g) The withholding rate is 10% for interest on certain long-term (at least eight years) bank loans.
(h) Brazil is honoring the Czechoslovakia treaty with respect to the Czech and Slovak Republics.
(i) This rate applies to royalties related to the use of, or the right to use, trademarks. For other royalties, including payments for technical assistance and technical services, the rate is 10%.
(j) The withholding tax rate may increase to 25% if the recipient is resident in a low-tax jurisdiction or benefits from a privileged tax regime (see Section E).
(k) The tax treaties do not apply to the CIDE (see footnote [d] to Section A).
(l) The withholding tax rate is 25% for royalties paid for the use of trademarks.
(m) The withholding tax rate is 20% for royalties paid for the use of trademarks.
(n) Argentina and Brazil signed a protocol amending the treaty, which entered into force on 1 January 2019. The protocol provides for new maximum rates for dividends (10% and 15%), interest (15%) and royalties (10% and 15%), as well as other changes. The previous wording of the treaty did not provide a maximum rate for royalties, but provided that the domestic rate applied.
(o) The withholding rate is 15% for royalties for the use of, or the right to use, trademarks.
(p) The withholding tax rate applicable to royalties was reduced as a result of the most favorable nation clause contained in the protocol to the treaty. This clause provides for a rate reduction if a future treaty establishes a lower rate. Because of the treaty between Brazil and Israel, the withholding tax rate on royalties was reduced to 10% (except for trademark royalties).
(q) Interest paid from Türkiye to the Brazilian government, Central Bank of Brazil or the National Economic and Social Development Bank (BNDES) are exempt from Turkish tax. Interest paid from Brazil to the Turkish government, the Central Bank of the Republic of Türkiye (Türkiye Cumhuriyet Merkez Bankasi) or the Turkish Bank of Exportation and Importation (Eximbank) are exempt from Brazilian tax.
(r) The protocols of these treaties do not expressly classify payments for technical services as royalties. Based on recent interpretations of the Brazilian tax authorities, it may be possible to claim that technical services fees paid to beneficiaries located in these countries are not subject to withholding income tax.
(s) Brazil's Superior Administrative Court has ruled that under the Brazil-Austria double tax treaty, Brazilian CFC rules do not violate the OECD model tax treaty.
(t) Brazil has published Decree 75.106/74/2019, which approves a protocol to the Brazil-Denmark double tax treaty. The protocol changes the previous methodology used to prevent double taxation (that is, exemption to credit methodology).
(u) Brazil's Superior Administrative Court has ruled that the Brazil-Netherlands double tax treaty does not prevent the application of Brazilian CFC rules.
(v) The withholding rate is 10% if the beneficial owner is a bank and the loan has been granted for a minimum of five years for the financing of the purchase of equipment or of investment projects.
(w) The withholding rate is 10% for interest on certain bank loans with a minimum term of five years.

In 2019, an agreement between Brazil and the United Kingdom for the exchange of information entered into force. In 2022, such countries signed a double tax treaty for which the internal approval measures are still pending. Therefore, the treaty is not yet in force.

In 2022, Brazil also signed a new double tax treaty with Norway, for which the internal approval measures are still pending. Therefore, the revised treaty is not yet in force.

A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

B. Taxes on corporate income and gains

The BVI Business Companies Act, 2004 (BVI BC Act) entered into force on 1 January 2005. Under the BVI BC Act, companies incorporated under the British Virgin Islands (BVI) Companies Act are exempt from all taxes provided under the BVI Income Tax Ordinance. The BVI BC Act is essentially an amalgamation of the International Business Companies (IBC) Act and the BVI Companies Act, which contained a regime under which all domestic companies incorporated in the BVI were governed. In addition, on 1 January 2007, all International Business Companies on the companies register in the BVI were automatically reregistered under the BVI BC Act and, consequently, the IBC Act was repealed in full.

All Business Companies (BCs) are statutorily exempt from BVI taxes. However, such companies must pay an annual license fee (see Section C). In general, a BC may not transact business with persons resident in the BVI or own interests in real property located in the BVI unless it obtains the relevant trade license from the BVI government. In addition, a BC may not carry on business as a bank, trust company, insurance company or reinsurance company without a license from the BVI Financial Services Commission.

C. Other taxes

Payroll tax. Payroll tax is imposed on every employer and self-employed person who carries on business in the BVI. The tax rates are 10% for Class 1 employers and 14% for Class 2 employers. The tax is applied to the remuneration paid or deemed to be paid, 8% of which may be reclaimed and paid by the employees or deemed employees. Class 1 employers are those meeting the following conditions:

- Payroll during the financial year that does not exceed USD150,000
- Annual turnover that does not exceed USD300,000
- A total of seven or less employees and deemed employees

All employers not falling within the Class 1 category are deemed to be Class 2 employers.

The first USD10,000 of actual remuneration paid to an employee, deemed employee or self-employed person is exempt from tax.

Social tax. Social tax requires both the employer and employee contribute to the mandatory National Insurance Scheme. The total contribution rate is 8.5%, of which 4.5% is paid by the employer and the remaining 4% can be passed on to the employees. These contributions are based on the amount of weekly wages up to a maximum of USD942.31 or monthly wages up to a maximum of USD4,083.33. The maximum annual insurable earnings is USD49,000.

National health insurance. BVI implemented a national health insurance regime, effective from 1 January 2016. This regime requires employers and employees to pay 3.75% each on the employees' monthly income. The maximum income on which national health insurance premiums is assessed is two times the upper wage limit for social security contributions, which currently equals USD8,166.67 per month. Consequently, the maximum amount payable monthly by employees and employers is USD306.25 each. Employees are also required to contribute an additional 3.75% on behalf of an unemployed spouse.

D. Fees and stamp duties

The following table summarizes the fees and stamp duties payable in the BVI.

Nature of fees and duties	Rate
Annual license fees	
BCs incorporated under the BVI BC Act, with authorized share capital of	
Up to USD50,000 or foreign-currency equivalent or authorized to issue up to 50,000 shares	USD550
Exceeding USD50,000 or foreign-currency equivalent or authorized to issue more than 50,000 shares	USD1,350
Restricted Purpose Company	USD8,000
General banking license	USD250,000
Restricted Class I banking license	USD150,000
Restricted Class II banking license	USD150,000
Insurance company license	Up to USD10,000
Class I trust license	USD19,200
Class II trust license	USD16,800
Class III trust license	USD14,400
Class IV trust license	USD7,000
Class V trust license	USD5,000
Restricted Class II trust license	USD1,200 to USD3,600
Restricted Class III trust license	USD600
Stamp duties, on various instruments and transfers of ownership	
Real estate, on higher of consideration or market value	

Nature of fees and duties	Rate
Sales to belongers (individuals born in the BVI or those granted BVI status and BVI companies that are at least 67% owned by such persons and do not have any non-belongers as directors)	4%
Sales to non-belongers	12%
Leases	1% to 1.5%
Other instruments and transfers	0.2% to 5%

E. Foreign-exchange controls

The BVI does not have any foreign-exchange control regulations.

F. Tax treaties

Although the United Kingdom's double tax treaties with Japan and Switzerland have been extended to the BVI, these treaties are not used in practice. The BVI has not entered into any other tax treaties. However, the BVI has entered into tax information exchange agreements with various jurisdictions, including Canada, China Mainland, Japan and the United States, and with 16 European countries, including France, Germany, Ireland, the Netherlands and the United Kingdom.

Foreign Account Tax Compliance Act and Common Reporting Standard. On 30 June 2014, the BVI and the U.S. Treasury signed and released a Model 1 Intergovernmental Agreement for the implementation of the US Foreign Account Tax Compliance Act (FATCA).

All BVI institutions must comply with FATCA regulations. In addition, if required, they must report to the BVI International Tax Authority via the authority's Automatic Exchange of Information website.

The BVI was an early adopter of the Common Reporting Standard (CRS). The BVI issued its initial CRS regulations, which took effect on 1 January 2016. The first reporting for the 2016 tax year was due by the end of July 2017. The expected deadline for subsequent years is 31 May. All BVI institutions must comply with the CRS.

Economic substance. The BVI has adopted Economic Substance regulations in response to the work of the Organisation for Economic Co-operation and Development (OECD) and the EU with respect to fair taxation and has implemented them as of 1 January 2019. All BVI entities must comply with the Economic Substance regulations as applicable.

Net Operating Losses (Years)	
Carryback	0
Carryforward	6

(a) This is the standard rate. The rate of petroleum income tax is 55%.
(b) For a listing of withholding taxes, see Section D.

B. Taxes on corporate income and gains

Corporate income tax. Limited companies, regardless of whether they are incorporated overseas or locally or are registered as a branch of a foreign company, are subject to a tax on income accruing in, derived from or received in Brunei Darussalam.

Branches of foreign companies are taxed on their profits arising in Brunei Darussalam at the same rates as corporations.

Rate of corporate income tax. The income tax rate is 18.5% for resident and nonresident companies, except for those engaged in petroleum operations. The rate of petroleum income tax is 55%.

For non-petroleum operations, the first BND100,000 of chargeable income is taxed at a reduced rate of one quarter of the full rate, while the next BND150,000 is taxed at half the full rate. The balance of chargeable income is taxed at the full rate. For a new company, the first BND100,000 of chargeable income is exempt from tax. This exemption applies for a company's first three consecutive years of assessment.

Certain enterprises and industries may be exempted from taxation if they are considered essential for the development of the country.

Companies that have gross sales or turnover of BND1 million or less are exempted from corporate income tax or charged with a 0% corporate income tax.

Capital gains. Capital gains are not taxed. Capital losses are not deductible. However, if assets have been acquired for resale rather than for a company's use, any profit from the sale is regarded as taxable income.

Administration. The tax year is the calendar year.

Tax returns must be filed by electronic means.

Corporations must file an annual tax return by 30 June of each year and pay any tax due by the same date. Corporations must also file an Estimated Chargeable Income (ECI) return within three months after their accounting year-end if they are unable to file their annual tax return within this period. Any tax due under an ECI return must be paid by the due date for filing the ECI return. If tax is paid under an ECI return, the tax is adjusted accordingly in the annual tax return. In general, extensions of time are not granted.

Foreign tax relief. Foreign income that is not received in Brunei Darussalam is free from tax. For details regarding Brunei Darussalam's double tax treaties, see Section D.

C. Determination of trading income

General. The following sources of income are subject to tax:

- Gains or profits from any trade, business, profession or vocation
- Gains or profits from employment
- Net annual value of land and improvements occupied or used rent-free for residential or enjoyment purposes
- Dividends, interest or discounts
- Pensions, charges or annuities
- Rents, royalties, premiums and any other profits arising from property

In computing taxable income, normal business expenses may be deducted.

Interest expenses are allowed as a deduction only if the loan generating the charge is used for the production of taxable income.

Provisions. A provision for doubtful debts is not tax-deductible. Trade debts written off as bad are generally allowable as tax deductions when there is sufficient evidence of reasonable steps taken for recovery.

Tax depreciation. Depreciation charged in the financial accounts is not deductible for tax purposes. Instead, capital allowances (tax depreciation) are permitted.

Industrial buildings. An initial allowance of 40% of the qualifying expenditure is given on industrial buildings in the year of expenditure, with a further annual allowance of 20% of qualifying expenditure provided on a straight-line basis until the total expenditure is written off.

Plant and machinery. An initial allowance of 40% of the cost of plant or machinery is given on the qualifying expenditure, and an annual allowance is given on the declining value of the asset. Effective from 1 January 2016, the rates of the annual allowance for all types of assets were changed to 25%. Alternatively, a company may choose to write off such expenditure over three years on a straight-line basis. For plant and machinery not exceeding BND2,000 per item, a company may choose to write off such expenditure fully in the year of acquisition subject to an aggregate cap of BND30,000 per year. For computer and office automation equipment, a company may also choose to write off such assets fully in the year of acquisition.

Effective from 1 January 2014, the capital allowance rate was increased to 150% for assets categorized as plant and machinery for companies in the manufacturing sector. This capital allowance applies only to plant and machinery installed between 1 January 2014 and 31 December 2019.

Mining. All expenditure incurred in connection with the working of a mine or other source of mineral deposit of a wasting nature is considered qualifying mining expenditure. An initial allowance of 10% of the qualifying expenditure is given in the year of expenditure, with annual depletion allowances deductible over the life of the mine. These are determined by multiplying the residue of the capital expenditure by the greater of the fraction of 1/20 and the following fraction:

$$\frac{\text{Output for the year}}{\text{Output for the year plus estimated future output}}$$

Disposals. When an asset is sold, scrapped or destroyed, a balancing allowance or charge is made, based on the difference between the disposal price and the depreciated value on disposal. The balancing charge may be deferred if the plant and machinery disposed of are replaced by similar assets.

Relief for losses. Losses may be carried forward for up to six years to offset future profits. Continuity of trade or ownership is not required to carry forward losses. Losses in one trade or business may be set off against other sources of income for the same year of assessment.

Unabsorbed capital allowances may be carried forward indefinitely, provided the company continues to carry on the same trade or business.

Groups of companies. No special rules or reliefs apply to groups of companies; each company is taxed on its own income as appropriate.

D. Domestic and treaty withholding tax rates

Brunei Darussalam's domestic tax law imposes withholding tax on various payments made to nonresident persons, which include companies and bodies of persons. A company is considered to be a nonresident company if the control and management of its business are not exercised in Brunei Darussalam. The following are the withholding tax rates.

Type of payment	Rate (%)
Interest, commissions, fees or other payments with respect to loans or indebtedness	2.5
Royalties or other lump-sum payments for the use of movable properties	10
Payments for the use of, or the right to use, scientific, technical, industrial or commercial knowledge or information	10
Technical assistance and service fees	10
Management fees	10
Rent or other payments for the use of movable properties	10
Nonresident directors' remuneration	10

The above withholding tax rates may be reduced under tax treaties. Brunei Darussalam has entered into double tax treaties with Bahrain, Cambodia, China Mainland, the Hong Kong Special Administrative Region (SAR), Indonesia, Japan, Korea (South), Kuwait, Laos, Luxembourg, Malaysia, Oman, Pakistan, Qatar, Singapore, the United Arab Emirates, the United Kingdom and Vietnam. In addition, Brunei Darussalam has signed tax treaties with the Philippines and Tajikistan, but these treaties have not yet been ratified. Both resident and nonresident companies may also apply for unilateral relief on income arising from British Commonwealth jurisdictions offering reciprocal relief. However, the maximum relief cannot exceed half the Brunei Darussalam rate.

A. At a glance

Corporate Income Tax Rate (%)	10
Capital Gains Tax Rate (%)	10 (a)
Branch Tax Rate (%)	10
Withholding Tax (%)(b)	
Dividends	5 (c)(d)
Interest	0/10 (e)(f)(g)
Royalties from Patents, Know-how, etc.	0/10 (e)(f)
Fees for Technical Services	10 (f)
Rent and Payments Under Lease, Franchising and Factoring Agreements Derived from Sources in Bulgaria	10 (f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) Capital gains are exempt from tax if they are derived from the following:
- Shares, rights and government bonds through the Bulgarian stock market or stock exchanges in EU or EEA countries
- Shares through a third country market that is considered equivalent to a regulated market and for which the European Commission has adopted a decision on the equivalence of the third country's legal and supervisory framework in accordance with Directive 2014/65/EU

(b) An EU/EEA recipient of Bulgarian-source income that is subject to withholding tax may claim a deduction for expenses incurred in earning that income by filing an annual tax return. The return must be filed by 31 December of the year following the year of accrual of the income.

(c) This tax does not apply to payments to entities that are resident for tax purposes in Bulgaria or EU/EEA countries (no requirements for participation percentage and minimum holding period are imposed). However, under the general anti-tax avoidance rule provided in the domestic corporate income tax law, no exemption from withholding tax is granted to an arrangement or a series of arrangements that, taking into account all of the relevant facts and circumstances, are not genuine and result in tax avoidance.

(d) This rate may be reduced by tax treaties for dividends distributed to entities not resident for tax purposes in EU/EEA countries.

(e) The zero rate applies to Bulgarian-source interest or royalty income accrued to EU associated companies (a minimum holding of 25% of the share capital must be maintained for at least two years) if the income recipient is its beneficial owner. The zero rate can be availed before the expiration of the two-year period if the minimum 25% share capital holding is not interrupted as of the moment of the income accrual (if the share capital holding is interrupted before the expiration of the two-year period, a 10% withholding tax is due together with penalty interest for delay). The exemption from tax does not apply to income accrued on hybrid financial instruments. The zero rate is disallowed if the Bulgarian-source payment is, in substance, a profit distribution or capital decrease or aims at tax avoidance or tax evasion.

(f) This tax applies to payments to nonresidents only and may be reduced in accordance with an applicable tax treaty. In certain cases, the withholding tax applies to income accrued by a nonresident entity through its Bulgarian permanent establishment to other parts of the same entity located outside Bulgaria. Advance payments are not subject to the withholding tax.

(g) Interest on debt (other than government or municipality bonds) extended to the Bulgarian state or a municipality is exempt from withholding tax. Interest income on bonds or other debt instruments issued by Bulgarian resident companies, the Bulgarian state or municipalities on a regulated EU/EEA market is exempt from withholding tax. The exemptions mentioned in the two preceding sentences are granted to all corporate investors, regardless of their tax residency. Interest income paid to nonresident issuers of bonds or other debt instruments is not subject to withholding tax in Bulgaria if all of the following conditions are met:
- The issuer of these bonds or debt instruments is a tax resident of an EU/EEA Member State.
- The purpose for the issuance of the bonds or other debt instruments is that the proceeds will be used for granting a loan to a Bulgarian tax resident company.
- The bonds or other debt instruments are issued on a regulated market in Bulgaria or another EU/EEA Member State.

B. Taxes on corporate income and gains

Corporate income tax. Bulgarian companies are subject to corporate tax on their worldwide income. Bulgarian companies are companies incorporated in Bulgaria. Foreign companies are taxed in Bulgaria on their profits generated from activities conducted through a permanent establishment in the country and on income from Bulgarian sources.

If one or more nonresident entities that are associated or related parties hold in aggregate directly or indirectly 50% or more of the voting rights, capital interests or rights to a share of profit in a hybrid entity that is incorporated or established in Bulgaria, but not a taxable person under the Bulgarian Corporate Income Tax Act, and if these nonresident entities are located in a jurisdiction or jurisdictions that regard the hybrid entity as a taxable person

in Bulgaria, then such hybrid entity should be equated to a legal person. The profits and income of any hybrid entity referred to in the above sentence are taxed according to the rules established by the Bulgarian Corporate Income Tax Act to the extent that such profits and income are not otherwise taxed in the country or according to the legislation of any other jurisdiction. This rule does not apply to a collective-investment vehicle, which is an investment fund or vehicle that fulfills the following conditions:
- It is widely held.
- It holds a diversified portfolio of securities.
- It is subject to investor-protection regulation.

Standard rate of corporate tax. The corporate tax rate is 10%.

A 10% tax is imposed on certain expenses, such as employee-related, in-kind fringe benefits and representation-related expenses, thereby increasing the effective tax rate for companies incurring such expenses (see Section D).

Global minimum tax. Pillar Two of the Base Erosion and Profit Shifting (BEPS) initiative of the Organisation of Economic Co-operation and Development (OECD), started in 2021, envisages a global minimum effective tax rate of 15% for large multinational groups (MNEs) and large-scale domestic groups. In 2022, the EU adopted the Pillar Two rules through Council Directive (EU) 2022/2523 (EU Minimum Tax Directive). As a result, on 22 December 2023, Bulgaria adopted amendments to the Corporate Income Tax Act (CITA), transposing the EU Minimum Tax Directive.

The CITA provides for a top-up tax regime to bridge the gap between the standard corporate tax rate of 10% and the 15% effective tax rate of the EU Minimum Tax Directive. In the scope of the rules, constituent entities (companies and permanent establishments) are part of an MNE and domestic group with a consolidated revenue exceeding EUR750 million in at least two of the four preceding years.

The Bulgarian top-up tax regime includes the following taxes:
- Primary additional tax (the Income Inclusion Rule [IIR]): Taxation of Ultimate and Intermediate Parent Entities in Bulgaria when they or their constituent entities in other jurisdictions are taxed with an effective tax rate less than 15%. It entered into force from 1 January 2024.
- Secondary additional tax (the Undertaxed Profit Rule): Taxation of constituent entities of an MNE when the Ultimate Parent Entity is excluded from taxation with a global minimal tax or is located in a jurisdiction that does not levy such tax. It will enter into force from 1 January 2025.
- National additional tax (Qualified Domestic Top-up Tax): Taxation of constituent entities located in Bulgaria that are taxed at an effective tax rate below 15%. It entered into force from 1 January 2024.

The following are the reliefs from the primary and secondary top-up tax:
- De minimis exclusion: This is applicable when the average allowed revenue of all constituent entities of a group in Bulgaria is less than EUR10 million and the average allowed profit is less than EUR1 million for the four-year period.

- Substance-based relief: This represents a reduction in the tax base by a percentage of the carrying value of certain tangible assets and payroll costs.
- Exclusion for Ultimate and Intermediate Parent Entities in Bulgaria in initial phase of international activities for the first five years of this phase.

The only relief from the national additional tax is the substance-based relief with respect to the tangible assets.

The top-up tax regime will be applied in addition to the ordinary corporate income tax system, which is not adjusted and is applicable for all local Bulgarian entities.

For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (ey-beps-2-0-pillar-two-developments-tracker.pdf).

Capital gains and losses. Capital gains from disposals of assets, including shares, derived by Bulgarian tax residents are included in the current year tax base and are subject to tax at the standard corporate tax rate of 10%. No rollover relief is provided. Capital losses are deductible for tax purposes.

Capital gains are exempt from tax if they are derived from the following:

- Shares, rights and government bonds through the Bulgarian stock market or stock exchanges in European Union (EU) or European Economic Area (EEA) countries
- Shares through a third country market that is considered equivalent to a regulated market and for which the European Commission has adopted a decision on the equivalence of the third country's legal and supervisory framework in accordance with Directive 2014/65/EU

Similarly, losses from the sale of shares, rights and government bonds through such stock exchanges are not deductible for tax purposes.

Administration. The tax year is the calendar year. Annual tax returns must be filed by 30 June of the year following the tax year. The tax return must be accompanied by an activity report for statistical purposes. Taxpayers that did not carry on business activity during the respective year are not required to submit annual tax returns and activity reports.

Companies subject to tax must make advance payments of tax. Only persons that have net sales revenue from the year preceding the previous year above BGN3 million must make monthly advance payments. Newly established companies and companies with sales of less than BGN300,000 for the year preceding the previous year are not required to make advance payments. These taxable persons may opt for quarterly advance payments. Companies with sales ranging from BGN300,000 to BGN3 million for the year preceding the previous year must make quarterly advance corporate tax payments. The tax base for the monthly advance payments is one-twelfth of the company's forecasted annual taxable income for the tax year. The tax base of the quarterly advance payments is one-fourth of the company's forecasted annual taxable income for the tax year. The tax rate for calculating the advance payments is 10%.

The monthly advance payments for January, February and March are due on 15 April of the current tax year. For the months from April through November, the monthly advance payments are due on the 15th day of the respective month; the only exception is that for December the monthly advance payment is due on 1 December. The quarterly advance payments for the first and second quarters are due on the 15th day after the end of the respective quarter. For the third quarter, the advance payment is due by 1 December. No quarterly payment is required for the last quarter. Changes in the amount of the initially reported advance corporate income tax payments can be made with a declaration for adjustment of the advance payments under Article 88 of the Corporate Income Tax Act (CITA) until 15 November of the respective year. Companies must pay the corporate tax due for the tax year, less the advance installments, by 30 June of the following year.

In the case of errors (including accounting errors) related to the prior year for which the tax return was filed, companies can file a one-off corrective corporate income tax return by 30 September of the year.

The tax on certain expenses (see Section D) is payable on an annual basis by 30 June of the following year.

Dividends. A 5% withholding tax is imposed on dividends paid by Bulgarian companies to companies resident for tax purposes in non-EU/EEA countries, as well as on hidden profit distributions to residents of EU/EEA countries.

Remittances of profits by branches to their home countries are not subject to withholding tax.

Foreign tax relief. Bulgarian companies are entitled to a tax credit for identical or similar foreign taxes imposed abroad. The tax credit is limited to the amount of the Bulgarian tax that would have been paid in Bulgaria on the income subject to the foreign tax. In addition, a per-country limitation applies. Bulgarian tax treaties normally provide an exemption from Bulgarian taxation for income from foreign real estate and foreign permanent establishments.

C. Determination of taxable income

General. Taxable income is based on annual accounts prepared in accordance with International Financial Reporting Standards (IFRS) or, for small and medium-sized enterprises, Bulgarian accounting standards. However, taxable income does not equal the profit shown in the accounts, because certain adjustments to revenue and expenses are required for tax purposes with respect to items such as accrual for bonuses, unused leave, depreciation and impairment of assets.

The write-down of assets as a result of impairment is not deductible for tax purposes. The loss is deductible on realization.

IFRS 16 (Leases) related amendments. The expenses and revenues related to operating lease contracts, according to the International Accounting Standards (IAS), and accrued for accounting purposes by the lessee are not recognized for tax

purposes. In addition, the assets that the lessee has a right to use under the operating lease contract, according to the International Accounting Standards, are not recognized as tax-depreciable assets.

The measure also provides that the expenses or revenues determined under the National Accounting Standard 17 (Leasing) with respect to operating lease contracts are recognized for tax purposes. These amounts are treated as accounting expenses or revenues for corporate tax purposes.

The expenses, income, gains and losses realized from the sale-and-leaseback contracts classified as operating leases in accordance with the IAS at the lessee sellers are not recognized for tax purposes. The right-of-use assets arising from the sale-and-leaseback contracts, classified as an operating lease under the IAS and recognized at the lessee sellers, are not tax-depreciable assets.

Also recognized for tax purposes are expenses, income, gains and losses determined in accordance with the rules of the National Accounting Standard 17 (Leasing) with respect to sale-and-leaseback contracts classified as operating leases, attached to the relevant contracts.

Inventories. All cost methods that are applicable under IFRS may be used for tax purposes. For manufacturing entities, the quantity of raw material exceeding the usual quantity of raw materials required for the production of a particular unit is treated as avoidance of taxation and is subject to adjustment for tax purposes.

Impairment of receivables and provisions. Impairments and write-offs of receivables are not deductible for tax purposes until their materialization or the expiration of the five-year statute of limitation to pursue the claim at court. This rule does not apply to financial institutions, which may deduct impairments and write-offs of receivables in the year in which they are booked. Provisions for payables are not deductible for tax purposes until their materialization.

Tax depreciation. The law provides the following maximum tax depreciation rates for categories of assets.

Category	Assets	Rate (%)
1	Buildings, facilities, communication devices, electricity carriers and communication lines, as well as accounting expenses incurred after or on 1 January 2020, for the construction or improvement of the elements of the technical infrastructure (public state or municipal property) that are related to the business activity of the taxpayer and wholly or partially unrecognized for tax purposes	4 (a)
2	Machines, manufacturing equipment and other equipment	30 (b)

Category	Assets	Rate (%)
3	Transportation vehicles, excluding automobiles, road coverings and aircraft runways	10
4	Computers, mobile phones, software and the right to use software	50/100 (c)
5	Automobiles	25
6	Intangibles and other tangible assets that are legally protected for a limited time period	– (d)
7	Other tangible assets	15

(a) The rules in the CITA for accounting expenses related to the repair, construction or improvement or elements of the technical infrastructure (public state or municipal property) are applicable since 1 January 2020. However, the transitional provisions were adopted in the CITA, which state that the Bulgarian entities can treat such accounting expenses incurred or booked in the period of 1 January 2015 to 31 December 2019 in the same manner if the following conditions are met:
- The expenses were treated as tax nondeductible expenses for donations or tax nondeductible expenses for non-business-related activities in this prior period.
- The construction, improvement or repair of elements of the technical infrastructure was actually related to the business activity of the company.

(b) The rate may increase to as high as 50% for new machines for investment purposes.

(c) The upper limit of 100% is applicable for the following:
- Software for management of sales in stores or trade premises (under Article 118, Paragraph 16 of the Value-Added Tax Act (VATA)
- The right to use such software: computers, peripherals for them or mobile phones on which such software is installed

(d) The depreciation rate is determined by dividing 100 by the number of years of the legal restriction. The maximum rate is 33⅓%.

The CITA contains measures requiring companies to prepare tax depreciation plans.

Goodwill arising from business combinations is not treated as a depreciable asset for tax purposes.

Relief for losses. Tax losses may be carried forward to the next consecutive five years, after the year in which the loss was realized. Losses may not be carried back.

Groups of companies. Bulgarian law does not include measures for filing consolidated returns or relieving losses within a group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on all domestic supplies of goods and services, imports and intra-EU acquisitions in Bulgaria (apart from reduced rates for certain supplies)	20
Tax on expenses; imposed on payers for representative and social expenses; the amount of the representative and social expenses is not subject to tax in the hands of the recipient	10

Nature of tax	Rate (%)
Tax on expenses; imposed on expenses for fringe benefits resulting from the provision of company assets and personnel to employees, directors and shareholders; companies have the option to apply the 3% tax on corporate expenses triggered by the personal use of company assets and personnel by employees, directors and shareholders or to treat them as fringe benefits taxed at the personal level; companies must choose the method for taxation in their annual corporate tax return	3
Real estate property tax; rate varies by municipality	0.01 to 0.45
Real estate transfer tax; rate varies by municipality	0.1 to 3

E. Miscellaneous matters

Foreign-exchange controls. The Bulgarian currency is the leva (BGN). The exchange rate of the leva against the euro (EUR) is fixed at BGN1.95583 = EUR1.

Bulgaria does not impose foreign-exchange controls. However, some reporting requirements exist.

Each business transaction between local and foreign persons that involves financial credits or direct investment of a local company or sole proprietor abroad, must be declared for statistical purposes to the Bulgarian National Bank (BNB) within 15 days after the date of the transaction.

Under the Foreign Exchange Act, bank payments of up to BGN30,000 may be made freely after the payer declares the purpose of the payments. For payments over BGN30,000, certain requirements must be satisfied, including the submission of certain documents to the bank.

The act does not restrict the amount of foreign currency that may be purchased or imported into Bulgaria. Bulgarian and foreign individuals may export foreign currency of up to the equivalent of EUR10,000 without filing a declaration. The individual must file a declaration for exports exceeding EUR10,000. For exports of cash exceeding EUR15,000 or the equivalent in another currency, the customs authorities should check in the National Revenue Agency's system to determine whether the individual has any outstanding tax liabilities.

Debt-to-equity rules. An interest-limitation rule and thin-capitalization provisions regulate the deductibility of interest expenses, as well as other expenses related to loans.

An interest-limitation rule is applied to corporate taxpayers that incur net interest and other borrowing costs exceeding EUR3 million for the calendar year. The tax deduction of such costs is limited to 30% of the respective entity's tax-adjusted earnings before interest, tax, depreciation and amortization (tax EBITDA). The borrowing costs include the following:

- Interest on all types of debt arrangements, regardless of the creditor status

- Interest-like items, such as depreciation of real estate that includes capitalized borrowing cost and currency losses

All taxpayers (including those below the threshold of EUR3 million) should also adhere to the thin-capitalization regime. This regime is triggered when a company's total debt exceeds three times its equity (both figures should be calculated as an average of the opening and closing balances for the year).

Thin-capitalization provisions regulate the deductibility of interest expenses related to certain transactions, such as the following:
- Nonbank loans from related parties
- Financial leases entered into with related parties
- Bank loans obtained from related parties or guaranteed/collaterized by related parties (special rules on the deductibility of expenses apply if both the third party and the borrower provided a security or guarantee for the loan)

The tax deductibility for the net amount of the regulated interest expenses subject to the thin-capitalization provisions (after deduction of any interest income) is limited to 75% of earnings before interest and tax (EBIT). If the financial result before taking into account the interest expense is a loss, the entire amount of the interest expense is not deductible.

Taxpayers that are both thinly capitalized and that have net borrowing costs of more than EUR3 million should apply both tests and limit their deduction to the outcome that is more restrictive.

The interest not deducted under both regimes can be carried forward indefinitely.

Hidden distributions of profit. Adjustments to taxable income as a result of violations of the arm's-length principle are treated as hidden distributions of profit. The definition of hidden profit distribution also includes the following:
- Amounts not related to the business activity or amounts exceeding the customary market levels, which were accrued, paid or distributed in any form in favor of shareholders, partners or persons related to them, excluding dividends
- Interest on certain hybrid instruments (debt contracts that, subject to a specific test provided for in the CITA seem to be more akin to equity)

Hidden distributions are treated like dividends. Accordingly, they are disallowed for corporate income tax purposes and subject to a 5% withholding tax (if distributed to nonresidents).

In addition, an administrative sanction in the amount of 20% of the distributed amount is imposed. However, voluntary disclosure of hidden profit distributions in the annual corporate income tax return relieves taxpayers of this penalty.

Exit taxation. The CITA provides that when a taxpayer transfers assets or an activity to outside Bulgaria or ceases being a tax resident of Bulgaria, the amount of potential capital gain generated in Bulgaria is taxed, but such gain is not realized at the moment of the transfer. The taxation takes place when Bulgaria loses in whole or in part its right to tax the result of subsequent disposal of the transferred assets or activity.

The new rule covers the following cases:
- Transfer of assets or activity from a Bulgarian headquarter to a permanent establishment of the same entity located outside the country
- Transfer of assets or an activity from a permanent establishment in Bulgaria to another part of the entity located out of the country
- Transfer of assets or an activity in the case of a change in the tax residence from Bulgaria to another country (not applicable if the assets continue to be effectively connected to a permanent establishment in Bulgaria)
- Transfer of an activity conducted through a permanent establishment in Bulgaria to another jurisdiction

In case of an assets transfer, the accounting financial result should be adjusted with the difference between the fair market value and the tax value of the transferred asset as of the time of the transfer. In case of transfer of activity, the result is to be adjusted with the difference between the fair market value of the transferred activity and its tax value decreased by the tax value of the transferred liabilities as of the time of the transfer.

Temporary solidarity contribution. According to provisions in the Bulgarian CITA, companies and permanent establishments from an EU Member State, including Bulgaria, generating at least 75% of their turnover from economic activities in the crude petroleum, natural gas, coal and oil refinery sectors are obligated to pay a mandatory temporary solidarity contribution at a rate of 50% on their surplus profit in the 2022 and 2023 fiscal years. Surplus profit is the basis for the temporary solidarity contribution and is calculated as the taxable profit for the 2022 and/or 2023 fiscal year that is above a 20% increase of the average taxable profit determined under the Bulgarian CITA for the preceding four years (2018 fiscal year through 2021 fiscal year).

The temporary solidarity contribution must be declared and paid in accordance within the statutory deadlines for submitting the annual corporate income tax return. It is recognized as a current expense for corporate income tax purposes. According to the Bulgarian CITA, advance payments can be made for the temporary solidarity contribution.

Interest is due for delay in the payment of the temporary solidarity contribution.

The temporary solidarity contribution has been adopted in the EU with Council Regulation (EU) 2022/1854 of 6 October 2022 on an emergency intervention to address high energy prices. The provisions in the Bulgarian CITA closely follow the text of the regulation.

F. Treaty withholding tax rates

On 7 June 2017, Bulgaria signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (the Multilateral Instrument or MLI) and provided its provisional list of expected reservations and notifications. The law for ratification of the MLI was adopted by the Bulgarian parliament on 10 June 2022, and it was promulgated in the State Gazette from 24 June 2022. On 16 September 2022,

Bulgaria deposited its instrument of ratification of the MLI and the final list of reservations and notifications with the OECD.

The adopted MLI covers 64 of Bulgaria's double tax treaties. Bulgaria has excluded from the MLI's scope the double tax treaties with seven jurisdictions, which are Finland, Germany, Malta, the Netherlands, Pakistan, Switzerland and Uzbekistan, because an agreement has been reached with most of these counterparties to initiate negotiations for a new double tax treaty or to amend the current double tax treaties via protocols, while the double tax treaties with the Netherlands and Pakistan have been excluded as a result of recently renegotiated double tax treaties.

The MLI applies with respect to withholding tax in the covered double tax treaties from 1 January 2023 and with respect to the other taxes in these agreements from 1 January 2024.

The rates of withholding tax in Bulgaria's tax treaties are described in the following table.

	Dividends (y) %	Interest (ss) %	Royalties %
Albania	5/15 (h)	10	10
Algeria	10	10	10
Armenia	5/10 (m)	5/10 (ll)	5/10 (mm)
Austria	0/5 (tt)	0/5 (uu)	5 (vv)

United Kingdom	0/5/15 (jjj)	0/5 (kkk)	5
United States	0/5/10 (bb)	0/5/10 (cc)	5
Uzbekistan	10	0/10 (yy)	10
Vietnam	15	10	15
Yugoslavia (former Yugoslavia [Serbia and Montenegro])	5/15 (h)	10	10
Zimbabwe	10/20 (k)	10	10
Non-treaty jurisdictions	5	10	10

(a) The 7% rate applies to royalties for the right to use industrial, commercial and scientific equipment; the 10% rate applies to other royalties.

(b) The 5% rate applies if the beneficial owner is a company, other than a partnership, holding directly more than 25% of the capital of the payer.

(c) This rate applies to dividends paid from Finland to Bulgaria. The treaty does not provide a withholding rate for dividends paid from Bulgaria to Finland.

(d) The 5% rate applies to royalties for specified types of intellectual property. The rate for other royalties is 0%.

(e) The 5% rate applies if the beneficial owner of the dividends is a company, other than a general partnership, that holds directly at least 15% of the capital of the payer; the 15% rate applies to other dividends.

(f) The 10% rate applies if the recipient is a legal person owning at least 25% of the voting shares of the payer for at least six months before the end of the accounting period for which the distribution of profits is made. The 15% rate applies to other dividends.

(g) The rate is 0% for dividends paid from Bulgaria to Malta. For dividends paid from Malta to Bulgaria, the withholding tax is the lower of 30% of the gross dividend or the tax imposed on the profits out of which the dividends are paid.
(h) The 5% rate applies if the recipient is a company owning directly at least 25% of the capital of the payer; the 15% rate applies to other dividends.
(i) The 5% rate applies if the recipient is a company, other than a general partnership, owning directly at least 25% of the payer. The 15% rate applies to other dividends.
(j) The 5% rate applies if the recipient is a company that is the beneficial owner of the dividends and holds at least 15% of the capital of the payer. The 10% rate applies to other dividends.
(k) The 10% rate applies if the beneficial owner of the dividends is a company that holds at least 25% of the capital of the payer. The 20% rate applies to other dividends.
(l) The Bulgarian Council of Ministers authorized the signing of a new tax treaty between Bulgaria and Italy. After the new treaty is signed, enters into force and takes effect, it will replace the 1988 income and capital tax treaty between the countries.
(m) The 5% rate applies if the beneficial owner of the dividends has invested at least USD100,000 or an equivalent amount in another currency in the capital of the payer. The 10% rate applies to other dividends.
(n) The 10% rate applies to dividends paid by a Canadian investment company of which at least 10% of the voting shares are controlled directly or indirectly by a foreign company. The 15% rate applies to other dividends. If pursuant to an agreement or convention concluded with a country that is a member country of the OECD after the date of signature of this convention, Bulgaria agrees to a tax rate on dividends that is lower than 10%, such lower rate (but not in any event a rate below 5% for dividends) shall apply for the purpose of this treaty with respect to dividends.
(o) The 10% rate applies if the beneficial owner of the dividends is a company, other than a general partnership, that holds at least 25% of the payer. The 15% rate applies to other dividends.
(p) The 5% rate applies if the beneficial owner of the dividends is a company, other than a partnership, holding directly at least 25% of the payer. The 15% rate applies to other dividends.
(q) The 7% rate applies if the beneficial owner of the dividends is a company, other than a partnership, holding directly at least 25% of the capital of the payer. The 10% rate applies to other dividends.
(r) The 5% rate applies if the recipient is a company owning directly at least 25% of the payer. The 10% rate applies to other dividends.
(s) The 10% rate applies to interest paid to financial institutions, including insurance companies. The 15% rate applies to other interest payments.
(t) The 5% rate applies to royalties received for the use of, or the right to use, copyrights. The 15% rate applies to other royalties.
(u) The 5% rate applies to interest on loans from banks or financial institutions. The 10% rate applies to other interest payments.
(v) The 0% rate applies if the beneficial owner is the government of the other contracting state or any governmental institution or other entity thereof or a company, other than a partnership, holding directly more than 25% of the capital of the payer.
(w) The 7% rate applies to royalties received for the use of, or the right to use, copyrights, patents, logos, models, plans, secret formulas or processes. The 5% rate applies to other royalties.
(x) The 5% rate applies to royalties received for the use of, or the right to use, copyrights (except for cinematographic movies), or scientific, commercial or industrial equipment. The 10% rate applies to other royalties.
(y) A 0% rate applies to dividends paid to entities from EU countries if certain conditions are satisfied.
(z) The 5% rate applies to copyright royalties and other similar payments with respect to the production or reproduction of cultural, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films and works on film or videotape or other means of reproduction for use in connection with television) and to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
(aa) The 0% rate applies if the beneficial owner of the dividends is a company, other than a general partnership, that holds at least 10% of the payer. The 10% rate applies to other dividends.
(bb) The 5% rate applies if the beneficial owner is a company that owns directly at least 10% of the voting stock of the company paying the dividends. The 0% rate applies if the beneficial owner is a pension fund resident for tax purposes in the United States. Other conditions must also be observed. If the

dividends are paid by a U.S. Regulated Investment Company, U.S. Real Estate Investment Trust or Bulgarian companies, similar specific provisions apply.

(cc) The 0% rate applies if any of the following circumstances exist:
- The beneficial owner is an institution wholly owned by the state.
- The beneficial owner is a financial institution, provided the interest is not paid with respect to a back-to-back loan.
- The beneficial owner is a pension fund, provided that the interest is not derived from the carrying on of a business, directly or indirectly, by such pension fund.
- The interest concerns debt claims guaranteed, insured or financed by the state.

The 10% rate applies to the following payments:
- Contingent interest arising in the United States that does not qualify as portfolio interest under US law
- Interest arising in Bulgaria that is determined with reference to receipts, sales, income, profits or other cash flow of the debtor or a related person, to a change in the value of any property of the debtor or a related person or to a dividend, partnership distribution or similar payment made by the debtor or a related person

The 5% rate applies to other cases.

(dd) The 0% rate applies if either of the following applies:
- The payer or the recipient of the interest is the government, an administrative territorial subdivision or a local authority thereof, the national bank of either contracting state, the state or the State Oil Fund of Azerbaijan.
- The interest is paid with respect to a loan guaranteed by any of the institutions mentioned in the first bullet.

The 7% rate applies to other cases.

(ee) The 5% rate applies to royalties received for the use of patents, designs or models, plans, secret formulas or processes, or for information, regarding industrial, commercial and scientific experience (know-how). The 10% rate applies in all other cases.

(ff) The 0% rate applies if the beneficial owner of the dividends is a company holding directly at least 10% of the capital of the payer. The 5% rate applies in all other cases.

(gg) The 0% rate applies if any of the following circumstances exists:
- The interest is paid to the government, local authority or the central bank of a contracting state.
- The interest is paid on a loan granted, insured or guaranteed by any of the institutions mentioned in the first bullet.
- The interest is paid with respect to the sale on credit of industrial, commercial or scientific equipment.
- The interest is paid on a loan granted by a bank.

(hh) The 0% rate applies to interest originating from one of the contracting states that is paid to the government or the central bank of the other state.

(ii) The 0% rate applies if the beneficial owner of the income derived from one of the contracting states is any of the following:
- The other state or a political subdivision, local government, local authority or the central bank of the other state
  - The Abu Dhabi Investment Authority, Abu Dhabi Investment Council, International Petroleum Investment Company or any other institution created by the government, a political subdivision, a local authority or a local government of the other state, which is recognized as an integral part of the government, as agreed in an exchange of letters between the competent authorities of the contracting states

(jj) The 0% rate applies to income originating from one of the contracting states that is paid to any of the following:
- The other state, a political subdivision, a local government, a local authority or the central bank of the other state
- The Abu Dhabi Investment Authority, Dubai Investment Office, International Petroleum Investment Company, Abu Dhabi Investment Council or any other institution created by the government, a political subdivision, a local authority or a local government of the other state, which is recognized as an integral part of the government, as agreed through the exchange of letters between the competent authorities of the contracting states

(kk) The 0% rate applies if any of the following circumstances exists:
- The interest is paid with respect to the sale on credit of industrial, commercial or scientific equipment.
- The interest is paid with respect to the sale on credit of goods or merchandise delivered by an enterprise to another enterprise.
- The interest is paid on a loan, not represented by bearer shares, granted by a financial institution or by the government.

(ll) The 5% rate applies to interest paid on loans granted by banks or financial institutions. The 10% rate applies to the gross amount of interest in all other cases.

(mm) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting. The 10% rate applies to the gross amount of royalties in all other cases.

(nn) The 0% rate applies to dividends paid to the government, a local authority, statutory body, agency, the national bank or a wholly owned company of a contracting state.

(oo) The 0% rate applies to royalties paid to the government, a local authority, statutory body, agency, the national bank or a wholly owned company of a contracting state.

(pp) The 0% rate applies to interest paid to the government, a local authority, statutory body, agency, the national bank or a wholly owned company of a contracting state.

(qq) The 5% rate applies if the recipient of the income (other than partnership or a German Real Estate Investment Trust Company) owns at least 10% of the capital of the company paying the dividends.

(rr) The 0% rate applies to interest paid on the following loans:
- Loans granted or guaranteed by the Bulgarian government or municipal and state institutions
- Loans guaranteed by Germany with respect to exports or foreign direct investment or granted by the government of Germany, the Deutsche Bundesbank, the Kreditanstalt für Wiederaufbau or the Deutsche Investitionsund Entwicklungsgesellschaft
- Loans related to the sale on credit of equipment and merchandise
- Loans granted by banks

(ss) A 0% rate (unless explicitly indicated otherwise in the table) broadly applies to interest paid to governments, statutory bodies or central banks. Under certain treaties, it may also extend to other financial institutions and/or local authorities, subject to explicit reference in the respective double tax treaty.

(tt) A 0% rate applies to dividends distributed to beneficial owners that are companies (other than partnerships). A 5% rate applies to distributions to partnerships and in all other cases.

(uu) A 0% rate applies to interest paid on the following loans:
- Loans granted by banks
- Loans granted to the government of Austria or to the government of Bulgaria
- Loans granted, insured or guaranteed by the Oesterreichische Kontrollbank AG or any comparable Bulgarian institution for purposes of promoting exports
- Loans granted in connection with the sale on credit of industrial, commercial or scientific equipment

A 5% rate applies in all other cases.

(vv) A 5% rate applies to royalties.

(ww) The 0% rate applies to interest paid on loans granted by the Bulgarian National Bank, the Qatar Central Bank, the Qatar Investment Fund, the capital pension authority of Qatar, administrative authorities, the Qatar Development Bank, other financial institutions wholly owned by the government of Qatar and other banks or institutions mutually agreed on by the contracting states.

(xx) A 0% rate applies to dividends distributed to the following beneficial owners:
- Resident companies holding directly at least 10% of the capital in the company paying the dividend for at least one year before the payment of the dividend. According to the protocol to the double tax treaty with Switzerland, if the minimum period of one year was not met at the time of the payment of the dividend and, therefore, the respective tax was withheld at the moment of the payment and the tax condition of minimum holding period is met afterward, the beneficial owner of the dividend shall be entitled to a refund of the tax withheld.
- Pension schemes.
- The central bank of the other contracting state.

A 10% rate will apply to distributions to partnerships and in all other cases. The above is according to the provisions of the double tax treaty between Bulgaria and Switzerland, and not the agreement between the EU and Switzerland providing for measures equivalent to those laid down in Council Directive 2003/48/EC on taxation of savings income in the form of interest payments.

(yy) A 0% rate applies to interest paid on loans granted by the Bulgarian National Bank or, in the case of Uzbekistan, by the Central Bank or the National Bank of the Foreign Economic Activity of the Republic of Uzbekistan, or any other similar financial institution as agreed through an exchange of letters between the competent authorities of the contracting states.

(zz) A 0% rate applies to interest paid on the following loans:
- Loans related to the sale on credit of equipment, merchandise or services.
- Loans granted by financial institutions.
- Loans granted to pension schemes.
- Loans granted to the government of Bulgaria or the government of Switzerland, a political subdivision or local authority, or the central bank of Bulgaria or Switzerland.
- Loans granted by a company to a company of the other contracting state if such company has directly held 10% of the capital for at least one year before the payment of the interest or if both companies are held by a third company and such company has directly held at least 10% of the capital of the first company and 10% of the capital of the second company, for at least one year before the payment of the interest. According to the protocol to the double tax treaty with Switzerland, if the minimum period of one year was not met at the time of the payment of the interest and, therefore, the respective tax was withheld at the moment of the payment and the tax condition of minimum holding period of one year is met afterward, the beneficial owner of the interest shall be entitled to a refund of the tax withheld. The above is according to the provisions of the double tax treaty between Bulgaria and Switzerland, and not the agreement between the EU and Switzerland providing for measures equivalent to those laid down in Council Directive 2003/48/EC on taxation of savings income in the form of interest payments.

(aaa) The 0% rate applies to interest paid on the following loans:
- Bonds or similar obligations of the government, political subdivisions or local authorities
- Loans granted by the government or state-owned central banks
- Loans and credits made, guaranteed or insured by the Export Development Corporation
- Loans made, guaranteed or insured by the Bulgarian National Bank, the Bulgarian Foreign Trade Bank or other entity as agreed through an exchange of letters between the competent authorities of the contracting states

(bbb) The 0% rate applies to interest paid on the following loans:
- Loans granted by the government, political subdivisions, local authorities or the central banks
- Loans and credits extended or endorsed by the Bulgarian Foreign Trade Bank and the Export-Import Bank of India (Exim Bank) to the extent such interest is attributable to financing of exports and imports only, as well as by other institutions in charge of public financing of external trade
- Loans and credits extended or endorsed by other persons to the extent that the loan or credit is approved by the government

(ccc) The 15% rate applies to royalties relating to copyrights of literary, artistic or scientific works, other than cinematographic films or films or tapes used for radio or television broadcasting. The 20% rate applies to other royalties and technical service fees.

(ddd) The 10% rate applies if the beneficial owner held directly 25% of the capital of the paying entity for an uninterrupted period of at least two years before the payment of the dividend.

(eee) The 0% rate applies to interest paid on the following loans:
- Loans granted by the government, political subdivisions, local authorities or the central banks
- Loans or credits made or guaranteed by the Export Import Bank of Korea and Korea Development Bank, as well as by the Bulgarian Foreign Trade Bank, or any other institution as agreed through an exchange of letters between the competent authorities of the contracting states
- Loans related to the sale on credit of industrial, commercial or scientific equipment

(fff) The existing treaty is being renegotiated.

(ggg) The 0% rate applies if the interest income is accrued and beneficially owned by the state, a local authority, the central bank or other state-owned institution or bank or if the loan receivable is guaranteed, insured or financed by an institution that is wholly owned by the state.

(hhh) The 0% rate applies if the Bulgarian-source dividends are distributed to the Central Bank of Norway, the global government pension fund or an institution in which the government participation is more than 75%. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The rate is 15% in all other cases.

(iii) The rate is 0% for interest on the following loans:
- Loans granted by a bank, the government, a political subdivision or local authority
- Loans granted, insured or guaranteed by a governmental institution for the purpose of promoting exports or loans in connection with the sale on credit of industrial, commercial or scientific equipment
- Loans granted by banks

(jjj) The 0% rate applies to dividends distributed to companies and pension funds. The 15% rate applies if the dividends are paid out of income (including gains) derived directly or indirectly from immovable property by investment vehicles. In all other cases, the withholding tax rate is 5%.

(kkk) The rate is 0% for interest on loans other than loans granted by financial institutions or pension schemes, the government, a political subdivision or local authority, loans by the central bank, loans between associated companies (that is, a direct holding relationship of at least 10% was maintained for at least one year before the payment of the interest) and loans in connection with the sale on credit of any equipment, merchandise or services.

(lll) The term "dividends" as used in Article 10 of the double tax treaty means income from shares, "jouissance" shares or "jouissance" rights, mining shares, founders shares or other rights, not being debt-claims, participating in profits, as well as income from other rights that is subject to the same taxation treatment as income from shares by the laws of the state of which the company making the distribution is a resident. With reference to Article 10 of the double tax treaty, the following is understood:
- The term "dividends," as defined in Paragraph 3 of Article 10, also includes income derived from full or partial liquidation of a company.
- If profits derived by an enterprise of a contracting state through a permanent establishment situated in the other contracting state have been taxed under Article 7 of the double tax treaty, the remaining amount of such profits may be taxed in that other contracting state, and the tax so charged shall not exceed 5%.
- Dividends that are hidden profit distribution under the law in force in Bulgaria shall be taxed according with the laws of Bulgaria.

(mmm) Article 11 of the double tax treaty is applicable for "income from debt-claims." The term "income from debt-claims" as used in this Article means income from debt-claims of every kind, whether secured by mortgage and whether carrying a right to participate in the debtor's profits and, in particular, income from government securities and income from bonds or debentures, including premiums and prizes attaching to such securities, bonds or debentures. Penalty charges for late payment shall not be regarded as income from debt-claims for the purpose of this Article. With reference to Article 11 of the double tax treaty, it is understood that income from debt-claims arising in a contracting state and paid to a pension fund that is a resident of the other contracting state and a beneficial owner of that income shall be taxable only in that other contracting state.

(nnn) The 5% rate applies to royalties received for the use of, or the right to use, industrial, commercial or scientific equipment. A 10% rate applies to royalties in all other cases.

(ooo) The 12.5% rate does not apply to dividends that are hidden profit distribution or other similar arrangements under the laws in force in either of the contracting states. In such cases, each contracting state shall apply its own domestic legislation to such income.

(ppp) The 0% rate applies for interest on the following loans:
- Loans granted by the government, a political subdivision or local authority, or the central bank
- Loans granted, guaranteed or insured by the government or any entity or financial institution wholly owned by the government. The competent authorities shall notify each other of such existing organizations and any subsequent changes thereof. For purposes of the above, the entities and financial institutions wholly owned by the government in Pakistan are the State Bank of Pakistan, the Export-Import Bank of Pakistan and the National Bank of Pakistan, while the entities and financial institutions wholly owned by the government in Bulgaria are the Bulgarian National Bank and the Bulgarian Development Bank.

(qqq) The 10% rate applies to "fees for technical services." The term "fees for technical services" for the purposes of this rate means payments of any kind received as a consideration for the rendering of any managerial, technical or consultancy services, including the services of technical or other personnel, but does not include the following:
- Consideration for any construction, assembly or similar project undertaken by the recipient
- Consideration that would be income of the recipient from employment

(rrr) The 0% rate applies to the following types of interest:
- Interest received, on its own account, by a contracting state or by an institution of which the capital is wholly owned by that state
- Interest from commercial debt-claims, including claims represented by commercial documents, relating to installment payments for supplying merchandise, goods or services
- Interest on loans, prepayments or credits of any kind, not represented by bearer instruments, from banks
- Credit interest on current accounts opened with banks, or interest on cash deposits, not represented by bearer instruments, with such institutions

(sss) The 0% rate applies to copyright royalties and similar payments with respect to the production or reproduction of cultural, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films and works on film or videotape or other means of reproduction for use in connection with television). If pursuant to an agreement or convention concluded with a country that is a member country of the OECD after the date of signature of this convention, Bulgaria agrees to a tax rate on royalties that is lower than 10%, such lower rate shall apply for the purpose of this treaty with respect to royalties for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (but not including any such information provided in connection with a rental or franchise agreement).

(ttt) The 0% rate applies to the following types of interest:
- Interest derived and beneficially owned by the government of the other contracting state, including any local authority thereof, the central bank or any financial institution wholly owned by that government or a resident of the other contracting state in connection with a loan or credit guaranteed by the government of that other state
- Interest paid in connection with the sale on business credit of equipment or merchandise.

(uuu) These are the rates under a new treaty with the Netherlands, which is effective from 1 January 2022.

(vvv) The 0% rate applies to dividends if the beneficial owner is either of the following:
- A company (other than a partnership) that is a resident of the other contracting state and holds directly at least 10% of the capital of the company paying the dividends throughout a 365-day period that includes the day of the payment of the dividend (for the purpose of computing that period, no account should be taken of changes of ownership that would directly result from a corporate reorganization, such as a merger or divisive reorganization, of the company that holds the capital or that pays the dividend)
- A pension fund

(www) The 0% rate applies to interest if one of the following conditions is met:
- The recipient of the interest is a contracting state or a political subdivision or local authority thereof, a public body or the central bank of a contracting state.
- The interest is paid in connection with a loan granted, approved, guaranteed or insured by a contracting state, the central bank of a contracting state, or an agency or entity (including a financial institution) controlled by a contracting state.
- The recipient of the interest is Atradius Dutch State Business NV (or its legal successor) with respect to loans granted, approved, guaranteed or insured by the Netherlands or the recipient of the interest is the Netherlands' Finance Company for Developing Countries (de Nederlandse Financierings-Maatschappij voor Ontwikkelingslanden NV) (or its legal successor).
- The recipient of the interest is a pension fund.
- The interest is paid in connection with a loan granted by a bank or an insurance company.
- The interest is paid in connection with the sale on credit of any industrial, commercial or scientific equipment.
- The interest is paid in connection with the sale on credit of merchandise by one enterprise to another enterprise.

(xxx) According to the protocol to the double tax treaty with Switzerland, as long as Switzerland, in accordance with its domestic legislation, does not levy a withholding tax on royalties paid to nonresidents, royalties shall be taxable only in the state of residence of the beneficial owner of the royalties. The above is according to the provisions of the double tax treaty between Bulgaria and Switzerland, and not the agreement between the EU and Switzerland providing for measures equivalent to those laid down in Council Directive 2003/48/EC on taxation of savings income in the form of interest payments.

(yyy) A 10% rate applies if the dividends are paid by a company that is a resident of a contracting state out of profits that, by virtue of provisions for the encouragement of investments, are exempted from tax or subject to tax at a rate that is lower than the standard rate levied on the profits of a company resident in that state. In all other cases, a rate that is 50% of the rate that would have been imposed but for this provision applies; however, in any case the rate shall not exceed 12.5% and shall not be less than 7.5%.

(zzz) Profits derived by participants in joint ventures set up under Decree No. 535/1980 of the State Council of the Republic of Bulgaria and distributed according to their rights shall not be regarded as dividends.

(aaaa) On 19 December 2023, the Russian Federation unilaterally adopted a law on the suspension of Articles 5-22 and 24 of the treaty.

A. At a glance

Tax on Income Rate (%)	20
Capital Gains Tax Rate (%)	20
Withholding Tax (%) (a)	
Dividends	14
Interest	14
Royalties	14
Income from Movable and Immovable Property	14
Fees for Services Performed in Cambodia	14
Technical, Management and Consultation Fees	14
Insurance Premiums	14 (b)
Branch Remittance Tax	14
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (c)

(a) These withholding tax rates apply to payments to nonresidents only. For a listing of withholding taxes applicable to payments to resident taxpayers, see Section B.
(b) This does not apply to reinsurance of risks in Cambodia.
(c) See Section C.

B. Taxes on corporate income and gains

Tax on income. Tax on Income (ToI) is calculated on taxable income inclusive of capital gains and passive income, such as interest, royalties and rent.

The ToI is imposed on the worldwide income of resident taxpayers. It is imposed on the Cambodian-source income of nonresident taxpayers. For companies, resident taxpayers are enterprises organized, managed or having a principal place of business in Cambodia. A company that is not a resident taxpayer and that receives income from a Cambodian source is considered to be a nonresident taxpayer.

ToI rates. The standard rate of ToI for legal persons is 20%.

A tax rate of 30% applies to income derived from oil or natural gas production sharing contracts and from the exploitation of natural resources including timber, ore, gold and precious stones.

A tax rate of 5% is imposed on the gross premium income of insurance companies providing insurance or reinsurance products for property or other risks. However, insurance companies providing life insurance or reinsurance in the form of a savings product are taxed at a rate of 20%.

Minimum tax. Minimum tax is a separate annual tax imposed at a rate of 1% of annual turnover inclusive of all taxes, except value-added tax (VAT). If the ToI liability exceeds the amount of the minimum tax, the taxpayer is not liable for the minimum tax. If taxpayers' accounting records meet the criteria set by the tax authorities for the maintenance of proper accounting records, these taxpayers are exempt from the minimum tax.

Advance Income Tax on Dividend Distribution. The Advance Income Tax on Dividend Distribution (AITDD) is imposed on the distribution of retained earnings to local and overseas shareholders before ToI is declared to the tax department. The AITDD is payable by the distributing company. It is calculated based on the following gross-up calculation of the annual ToI rate:

- Step 1: Divide the amount of the dividend by 0.8.
- Step 2: Apply a rate of 20% to the result of Step 1.

The AITDD becomes a tax credit to utilize against annual ToI. Any excess tax credit can be carried forward to offset against the annual ToI liability in the following year.

From 2020, dividends distributed by Qualified Investment Projects (QIPs) during the tax holiday period are exempt from AITDD.

Investment incentives. A QIP registered and approved by the Council for the Development of Cambodia is entitled to the incentives described below.

Based on the former Law on Investment (old LoI), an exemption from ToI applies to the trigger period and the priority period. The trigger period begins on the date of final registration and ends on the earlier of the end of the third year after the first revenue is earned or the end of the year preceding the year in which the first taxable income is earned. The priority period, which is specified in the Finance Law and varies by project, may have a duration of up to three years. Under the new Law on Investment (new LoI) issued in October 2021, ToI exemption shall be provided for three to nine years, depending on the sector and investment activities, from the time the first income is earned. Also, the new LoI further states that after the ToI exemption period ends, a QIP will continue to be entitled to a reduced ToI rate for six years. The reduced rates are 25% of the standard rate for the first two years, 50% of the standard rate for the next two years and 75% of the standard rate for the last two years.

The taxpayer is entitled to an exemption from the minimum tax if it is confirmed by the tax authorities that the taxpayer is maintaining proper accounting records. Under the new LoI, a QIP is exempt from minimum tax if its accounts are audited by an independent auditor.

QIPs can import construction materials, construction equipment, production equipment and production inputs with customs duty, Specific Tax and VAT borne by the government. However, the incentives of production inputs for domestically oriented QIPs are determined by the Law on Financial Management and/or a Sub-Decree.

Other incentives include a VAT exemption on the local purchase of production inputs, a deduction of 150% of expenses for certain expenses, an exemption from income tax for QIP expansion and additional special incentives for certain potential investments that will contribute to develop Cambodia's economy. These additional incentives are determined by the Law on Financial Management and/or a Sub-Decree.

Capital gains. All realized gains (including capital gains) are considered to be taxable income. Prior to 1 January 2025, tax on capital gains is not separately imposed in Cambodia. Capital gains derived by a legal person from the disposal of fixed assets are treated as ordinary income and generally taxed at the standard ToI rate of 20%.

Administration. Resident taxpayers must file annual ToI or minimum tax returns within three months after the end of the tax year.

Resident taxpayers must make monthly prepayments of ToI, which are each equal to 1% of monthly turnover inclusive of all taxes, except VAT. The tax payments can be used to offset the annual ToI or minimum tax liability. Prepayments of ToI are not required during the period of exemption from ToI.

Effective from the December 2020 monthly tax return, the prepayments must be made by the 25th day of the following month in which the tax liability arose through an e-filing system. Hard-copy tax returns are accepted by 20th day of the following month if the taxpayer has received approval from the tax authorities to submit hard-copy tax returns as a result of difficulties in implementing the e-filing system.

Dividends. Dividends paid to nonresident taxpayers are subject to withholding tax at a rate of 14%.

Withholding taxes

Payments to resident taxpayers. Resident taxpayers carrying on business in Cambodia must withhold tax from payments made to other resident taxpayers at the following rates.

Payment	Rate (%)
Interest paid to recipients other than domestic banks	15
Interest paid on non-fixed term saving accounts by domestic banks	4
Interest paid on fixed-term saving accounts by domestic banks	6
Royalties	15 (a)
Rent paid for movable and immovable property	10 (b)
Payments to individuals for services, including management, consulting and similar services	15 (c)

(a) This withholding tax is not applied to payments made to registered resident taxpayers with valid value-added tax (VAT) invoices on shrink-wrap

software, site licenses, downloadable software and software bundled with computer hardware.

(b) This withholding tax is not applied to payments made to registered resident taxpayers with a valid VAT invoice.

(c) This withholding tax is not applied to payments if the amount is lower than KHR50,000 (approximately USD12.5).

Payments to nonresident taxpayers. Resident taxpayers must withhold tax at a rate of 14% on payments to nonresidents that earn Cambodian-source income, which is defined to include the following:

- Interest paid by resident enterprises, resident pass-through entities or Cambodian governmental institutions
- Dividends distributed by resident taxpayers
- Income from services performed in Cambodia
- Compensation for management and technical services paid by resident persons
- Income from movable or immovable property, if the property is located in Cambodia
- Royalties from the use of, or the right to use, intangible property paid by residents or by nonresidents through a permanent establishment that the nonresident maintains in Cambodia
- Gains from sales of immovable property located in Cambodia or from transfers of interests in immovable property located in Cambodia
- Insurance premiums paid on the insurance of risks in Cambodia
- Gains from the sale of movable property that is part of the business property of a permanent establishment maintained by a nonresident taxpayer in Cambodia
- Income from business activities carried on by nonresidents through a permanent establishment in Cambodia (branch remittance tax)

In general, the above withholding taxes are considered a final tax.

If withholding tax is not withheld from the recipient, it is borne by the payer. Accordingly, the withholding tax is not deductible for purposes of the ToI.

Withholding tax returns and payments. Effective from the December 2020 monthly tax return, resident taxpayers must submit withholding tax returns and remit withholding taxes to the tax authorities by the 25th day of the following month through an e-filing system. Hard-copy tax returns are accepted by the 20th day of the following month if the taxpayer obtains specific approval from the tax authorities to submit hard-copy tax returns as a result of difficulties in implementing the e-filing system.

Foreign tax relief. Cambodia allows a credit against the ToI for foreign taxes paid on foreign-source income if supporting documentation exists.

C. Determination of trading income

General. Taxable income equals the difference between total income and allowed expenses that are incurred to carry on the business.

Allowable deductions include most expenses incurred in the course of carrying on a business enterprise with certain limitations. These limitations include the following:

- The deduction of charitable contributions to specified organizations is limited to 5% of taxable income before deducting the amount of the charitable contributions.
- Depreciation is allowed as a deduction in accordance with rates and methods set forth in the tax regulations.
- Deductions for interest are limited to interest income plus 50% of taxable income excluding interest income and expenses. The disallowed interest may be carried forward to the subsequent five years and deducted subject to the same limitations (also, see *Special rules for loans*).

Nondeductible expenses include the following:

- Expenses incurred on activities generally considered to be amusement, recreation, entertainment or on the use of any means with respect to such activities
- Losses on direct or indirect sales or exchanges of assets between related parties that do not comply with the arm's-length principle
- Penalties, additional tax and late payment interest imposed for violation of the tax regulations
- Donations, grants or subsidies
- Salary and related-party expenses unpaid within 180 days of the next tax year
- Extravagant expenses
- Non-business related expenses
- Prior-year expenses
- Expenses without supporting documents
- Loss arising from giving up on a receivable due to an abnormal act of management or without supporting documents to support the impossibility of recovering the loss

Special rules for loans. According to Cambodia's tax regulations, a limitation of interest rates on loans obtained from banks and other enterprises should be determined in accordance with the following rules:

- A taxpayer cannot get a tax deduction for interest to the extent the rate on loans from third parties exceeded 120% of the market rate at the time of the loan transaction.
- The interest rate for loans from related parties should not exceed the market rate at the time of the loan transaction.

In this context, the term "market rate" is the average interest rate on loans from at least five of the largest commercial banks in Cambodia to their customers. The market rate is published annually by the General Department of Taxation (GDT) for the preceding year.

For loans referred to in the first bullet above, the taxpayer is required to notify and submit the agreements and other supporting documents to the tax authorities within 30 days after entering into the transaction. If the taxpayer fails to notify the tax authorities by providing it with the supporting documents, the loan amount may be added to the taxpayer's taxable income for that year.

For loans referred to in the second bullet above, a copy of the loan agreement is not required to be submitted to the GDT. However, the taxpayer is required to maintain the following supporting documents to provide to the GDT on request:

- Loan agreement that clearly states the length and repayment terms
- Business plan or current and forecasted financial statements and supporting documents with respect to the purpose of borrowing and the explanation relating to the loan
- Board of directors' resolution (for enterprises that are not single private limited companies)

In addition, deductions for interest are limited to interest income plus 50% of taxable income excluding interest income and expenses. Any disallowed interest may be carried forward and a deduction can be claimed in the subsequent five years, subject to the same limitations.

Provisions. Provisions for losses or expenses that have not occurred are not allowed for tax purposes even if the incurrence of such losses or expenses is probable. However, domestic financial institutions may establish provisions for bad debts within the threshold provided by the GDT.

Tax depreciation and amortization. The tax regulations divide fixed assets into four classes for purposes of depreciation and specify the depreciation methods and rates for the classes. The following are the classes.

Classes	Assets	Method	Rate (%)
1	Concrete buildings and structures	Straight-line	5
	Non-concrete buildings	Straight-line	10
2	Computers, electronic information systems and data handling equipment	Declining-balance	50
3	Automobiles, trucks, office furniture and equipment	Declining-balance	25
4	Other tangible property	Declining-balance	20

Intangible assets with a limited useful life, such as patents, copyrights, drawings, models, and franchises, can be amortized over their useful life on a straight-line basis. If the life of intangible assets cannot be determined, the assets are amortized using the straight-line method at a rate of 10%.

A QIP (see Section B) may apply a special depreciation rate of 40% in the year of purchase or in the first year the tangible assets are placed into operation, if later. If the enterprise elects to use the exemption period for the ToI, the special depreciation rate does not apply.

Relief for losses. Losses can be carried forward to offset future taxable income for the following five years. The carryback of losses is not allowed.

The carryforward of losses is not forfeited by a change of ownership. However, it is required that there be no change in the business objectives and activities of the entity.

Groups of companies. Cambodia does not allow consolidated tax filing or provide other group tax relief.

D. Other significant taxes

Value-added tax. Resident taxpayers providing taxable supplies must register for VAT. Taxable supplies include supplies of goods or services by taxable persons in Cambodia.

Effective from 1 April 2022, legal persons that make payments to nonresident suppliers on supplies of digital goods or services to Cambodia are required to apply 10% reverse-charge VAT.

The standard rate of VAT is 10%. A 0% rate of VAT applies to exports of goods and services including international transportation of passengers and goods and services with respect to such transportation. It also applies to enterprises in supporting industries and subcontractors that supply certain goods and services to exporters.

The tax law specifies certain nontaxable supplies.

A resident taxpayer must complete the registration for VAT within 30 days after the date on which it becomes a taxable person. The filing of VAT returns and payment of VAT must be made by the 25th day of the following month, effective from December 2020. Hard-copy tax returns are accepted by 20th day of the following month if the taxpayer has received approval from the tax authorities to submit hard-copy tax returns as a result of difficulties in implementing the e-filing system.

Other taxes. Cambodia imposed various other taxes, including the following:
- Specific Tax on Certain Merchandises and Service
- Tax for Public Lighting
- Accommodation Tax
- Patent Tax
- Registration Tax (property transfer tax)
- Fiscal Stamp Tax
- Tax on Immovable Property
- Tax on Unused Land
- Tax on Means of Transportation

E. Foreign-exchange controls

The Cambodian currency is the Khmer riel (KHR).

Cambodia does not impose any restrictions on the purchase of foreign currencies through authorized financial institutions.

From 28 October 2022, monthly and annual tax declarations must comply with the following exchange rates:
- Daily exchange rate: Taxpayers must use the daily official exchange rate issued by the National Bank of Cambodia (NBC) for the KHR on the total price on the invoice. If the NBC has not issued an official exchange rate for a particular day, a taxpayer must use the official exchange rate of the preceding day.
- Exchange rate for Tax on Salary (ToS)/Tax on Fringe Benefits (ToFB): Taxpayers must use the official exchange rate issued by the NBC on the 15th of each month for their ToS and ToFB calculation. If the NBC has not issued an official exchange rate

on this day, the taxpayer must use the official exchange rate of the preceding day.
- Monthly tax exchange rate: Taxpayers must use the exchange rate on the last day of the month issued by the NBC for their monthly tax calculation.
- Annual tax exchange rate: Taxpayers must use the exchange rate issued by the NBC on the last day of December of each year for which annual tax is calculated.

F. Tax treaties

Double tax treaties with Brunei Darussalam, China Mainland, the Hong Kong Special Administrative Region (SAR), Indonesia, Korea (South), the Macau SAR, Malaysia, Singapore, Thailand and Vietnam have been ratified. A treaty with Türkiye has been agreed but is not yet effective. The treaties reduce the withholding tax rate from 14% to 10% on dividends, interest, technical services and royalties paid to residents of treaty jurisdictions. An application to apply treaty relief must be made to the Cambodian tax authorities.

A. At a glance

Federal Corporate Income Tax Rate (%)	15 (a)
Federal Capital Gains Tax Rate (%)	7.5 (a)(b)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%)	
Dividends	25 (c)
Interest	0/25 (d)
Royalties from Patents, Know-how, etc.	25 (c)
Branch Remittance Tax	25 (e)
Net Operating Losses (Years)	
Carryback	3
Carryforward	20

(a) These 2024 rates are applied to general income that is not eligible for the manufacturing and processing deduction or the small business deduction. The calculation of the rate is discussed in Section B. Additional tax is levied by the provinces and territories of Canada, and the combined federal and provincial or territorial rates on general income may vary from approximately 23% to 31%.

(b) 50% of capital gains is subject to tax. As part of the annual federal budget announced on 20 April 2024 (Budget 2024), it was proposed to increase the capital gain inclusion rate from 50% to 66 2/3% for corporations for capital gains realized on or after 25 June 2024. As of the date of writing, the rules have not yet been enacted.

(c) Final tax applicable only to nonresidents. This rate may be reduced by a tax treaty (see Section F).

(d) In general, no withholding tax is imposed on interest paid to payees who are dealing at arm's length with the payer. However, withholding tax at a rate of 25% typically applies to interest paid or credited to related nonresidents (the rate may be reduced by a tax treaty). Other specific exemptions or specific inclusions may apply to change the general rules noted above.
(e) This tax is imposed in addition to the regular corporate branch tax rate. For details, see Section B. The rate may be reduced by a tax treaty.

B. Taxes on corporate income and gains

Corporate income tax. Corporations resident in Canada (whether owned by Canadians or nonresidents) are taxed on their worldwide income from all sources, including income from business or property and net taxable capital gains. Nonresident corporations are taxed only on certain Canadian-source income. In general, a corporation is deemed to be resident in Canada if it is incorporated in Canada or has its central management and control located there.

If a tax treaty exists between Canada and the country in which a nonresident corporation is resident, the determination of whether a nonresident is taxable in Canada may be restricted or modified, and lower rates may apply. In general, Canada's tax treaties provide that a nonresident that is resident in a treaty country is subject to Canadian tax on income derived from carrying on business in Canada only if the nonresident has a Canadian permanent establishment.

Rates of income tax. Corporations are taxed by the federal government and by one or more provinces or territories. The basic rate of federal corporate tax for 2024 is 38%, but it is reduced to 15% by an abatement of 10 percentage points on a corporation's taxable income earned in a province or territory and a general rate reduction of 13 percentage points on a corporation's full-rate taxable income. Provincial and territorial tax rates are added to the federal tax and generally vary between 8% and 16% of taxable income.

The federal government and the provincial and territorial governments may apply lower rates of tax to active small business earnings and earnings derived from manufacturing and processing.

Nonresident corporations carrying on business in Canada through a branch are taxable at the full corporate branch tax rate plus applicable provincial tax rate on their net-business income earned in Canada, and they must pay an additional tax (branch tax) of 25% on their after-tax income, subject to an allowance for investment in Canadian property. This branch tax may be reduced by treaty.

Capital gains and losses. For capital gains and losses realized before 25 June 2024, the taxable portion of capital gains and the deductible portion of capital losses is 50%. However, as announced in Budget 2024, the government plans to increase the capital gains inclusion rate from 50% to 66 2/3% for capital gains or losses realized on or after 25 June 2024. As of the date of writing, the rules have not yet been enacted. See Section E for details concerning the taxation of capital gains of nonresidents.

The deductible portion of capital losses (other than allowable business investment losses) in excess of taxable capital gains is termed "net capital loss" and may be carried back three years and carried

forward indefinitely, but may be applied only against taxable capital gains.

Proceeds from the disposition of capital property that exceed the tax cost of such property are generally taxed as capital gains. For depreciable property, tax depreciation previously claimed that is recovered on disposition is generally fully included in income.

If control of a corporation is acquired by a person or group of persons, net capital losses incurred before the change of control cannot be deducted in a year after the acquisition of control. Also, the carryback of capital losses to years prior to such change of control is prohibited. A flow through of net capital losses is provided for on certain amalgamations and liquidations.

If a sale of what might otherwise be capital property is regarded as a sale in the course of a taxpayer's business (such as dealers in real estate, securities or art) or as an adventure in the nature of trade, any resulting gain or loss is fully taxable or deductible.

Administration. A corporation's tax year usually ends on the same date as the financial statement year-end. If an acquisition of control occurs, the corporation is deemed to have a tax year ending immediately before the acquisition of control.

Corporate income tax returns are required to be filed within six months following a corporation's tax year-end. Subject to certain exceptions, nonresident corporations must file a Canadian income tax return if they carry on business in Canada or dispose of taxable Canadian property during the tax year. Nonresident corporations claiming relief from Canadian tax under a tax treaty with another country must disclose detailed information regarding their activities in Canada.

A penalty is levied on returns that are filed late, equal to 5% of the unpaid tax at the required filing date, plus an additional 1% per month (not exceeding 12 months) of such unpaid tax for each month that the return remains unfiled. Repeat offenders may be liable for additional penalties. Nonresident corporations that are required to file Canadian tax returns may be subject to another penalty of up to CAD2,500 even if no tax is payable.

Federal and provincial corporate tax installments must be made monthly during the corporation's tax year. The remaining balance of taxes owed must be paid by the end of the second month following the tax year-end (third month for Canadian-controlled private corporations that carry on an active business and claim a small business deduction).

Interest is charged on late or deficient tax payments based on the prescribed rate. The prescribed rate can vary each quarter. A penalty may apply to late or deficient tax installments.

Dividends. In general, dividends received by one Canadian corporation from another Canadian corporation are fully deductible. However, to prevent the use of private companies to obtain significant tax deferrals on portfolio dividend income, such corporations are subject to a special 38⅓% refundable tax on dividends received from portfolio investments. Additional taxes may be imposed on dividends paid on certain preference-type shares.

Dividends paid by a Canadian corporation to a Canadian resident individual are generally taxable, but the individual also receives a tax credit because the income has already been taxed within the corporation. A dividend received from a nonresident corporation that is a foreign affiliate of a Canadian taxpayer may be exempt from tax (see Section E).

Foreign tax relief. In general, taxpayers resident in Canada may deduct from their Canadian tax liability a credit for income or profits tax and for withholding tax paid to another country. The foreign tax credit is calculated separately for foreign business tax and foreign nonbusiness tax on a country-by-country basis.

If a Canadian corporation receives dividends from a foreign affiliate, the normal foreign tax credits are replaced by either a complete or partial deduction for such dividends (see Section E).

C. Determination of taxable income

General. Taxable profits are computed in accordance with generally accepted commercial principles, modified by certain statutory provisions in the Canadian Income Tax Act.

In general, only 50% of meal and entertainment expenses is deductible for income tax purposes.

Inventories. For tax purposes, inventories may be valued at the lower of cost or fair market value. The last-in, first-out (LIFO) basis is not permitted for tax purposes, despite its acceptability for accounting purposes in certain instances. Corporations may use a different inventory valuation method for tax purposes than the one used for accounting purposes.

Provisions. In general, provisions, such as warranty reserves, are not deductible for income tax purposes. Only actual expenses incurred are tax-deductible.

Depreciation and amortization. Depreciation or amortization included in the financial statements is added back, and tax depreciation, generally calculated on a declining-balance basis at prescribed rates, beginning when the asset is available for use, is deducted for tax purposes. The deduction is generally limited in the first year the asset is available for use. Tax depreciation may be fully or partially claimed at the taxpayer's discretion.

The following are the depreciation rates under the declining-balance method for major categories of assets.

Asset	Rate (%)
Commercial and industrial buildings	4 (a)
Computers	55
Office equipment	20
Motor vehicles	30
Machinery and equipment	20 (b)

(a) Certain eligible nonresidential buildings may qualify for a rate of 6% or 10% (election required).

(b) For machinery and equipment used primarily in manufacturing and processing, the rate is generally 30%. A straight-line rate of 50% applies if the machinery and equipment is acquired after 18 March 2007 and before 2016.

Certain temporary tax measures provide for an enhanced first-year depreciation claim with respect to capital property of a taxpayer (for example, accelerated investment incentive property). These temporary measures apply to certain depreciable capital assets acquired after 20 November 2018 that become available for use before 2028.

Depreciable capital assets are generally pooled into various classes, but, in certain cases, a corporation may elect to include individual pieces of certain types of equipment in separate classes. In general, if an asset is disposed of, the balance of the assets in the class is reduced by the proceeds from the disposition. However, if the proceeds from the disposition of an asset exceed the tax value of the class after depreciation, the excess is recaptured and is subject to tax at the regular corporate tax rates. If the asset is the only asset in the class and if a balance remains after the proceeds of disposition are charged to the class, the balance may be deducted as a terminal loss, subject to certain loss denial rules.

Groups of companies. Canada does not allow consolidated tax reporting for related companies and does not provide relief for group losses.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and Services Tax (GST), a value-added tax, applies to a broad range of goods and services	5
Harmonized Sales Tax, a value-added tax, applies to a broad range of goods and services in certain provinces	Up to 15
Part VI tax on financial institutions, effectively a minimum tax, which is reduced by income taxes paid; applies on a non-consolidated basis to capital in excess of CAD1 billion	1.25
Provincial/territorial income taxes, on taxable income allocated to jurisdictions in which corporations have permanent establishments (lower rates may apply to manufacturing or processing earnings and active small business earnings)	8 to 16
Provincial payroll taxes; varies by province; paid by employers	Up to 4.3
Canada Pension Plan, on pensionable earnings between CAD3,500 and CAD68,500 (amounts in effect for 2024)	
Employer	5.95
Employee	5.95
Self-employed individual	11.9
(The Province of Quebec offers a similar plan for residents of Quebec.)	
Employment Insurance, on insurable earnings up to a maximum of CAD63,200 (amount in effect for 2024)	

Nature of tax	Rate (%)
Employee	1.66
Employer (1.4 times the employee rate)	2.324
(Employment Insurance premiums for residents of the Province of Quebec are reduced, because residents of Quebec also must pay premiums for Quebec Parental Insurance. The aggregate amount for both is similar to the total Employment Insurance premiums computed with respect to persons resident outside Quebec.)	

E. Miscellaneous matters

Foreign-exchange controls. Canada does not impose foreign-exchange control restrictions.

Interest deductibility. Interest paid in Canada is generally deductible if all of the following conditions are satisfied:
- It is paid or payable in the year.
- It is paid or payable pursuant to a legal obligation to pay interest thereon.
- The interest is not in excess of a reasonable amount.
- The interest relates to borrowed money used for the purpose of earning income from a business or property.

In addition, interest paid or payable to a non-arm's-length person and deducted by a Canadian resident or nonresident corporation or trust is also subject to Canada's transfer-pricing rules, which require the terms and conditions made or imposed with respect of the loan to be similar to those that would have been made between persons dealing at arm's length. The transfer-pricing rules apply before the thin capitalization rules and the excessive interest and financing expenses limitation rules (referred to as the EIFEL rules), each of which are discussed below. However, an exception may be available to the application of the transfer-pricing rules in certain cases with respect to loans made to a controlled foreign affiliate, provided that certain conditions are met.

Canada imposes a thin-capitalization rule limiting the ability of nonresidents to withdraw profits through deductible interest charges. These rules apply to Canadian resident and nonresident corporations and trusts. The thin-capitalization rules may also apply to certain back-to-back (BTB) loan arrangements that would otherwise circumvent the application of the thin-capitalization rules. Special rules apply to partnerships to attribute the debts, activities and property of the partnership to its members.

In general, these rules restrict the deductibility of interest paid or payable by a corporation or trust to a specified nonresident shareholder or beneficiary (or to a nonresident person who does not deal at arm's length with a specified shareholder) on debts exceeding 1.5 times the "equity amount" of such corporation or trust. A specified shareholder is a shareholder who, either alone or together with persons with whom the shareholder does not deal at arm's length, owns shares that satisfy either of the following conditions:
- They give the shareholder 25% or more of the votes that could be cast at an annual meeting of shareholders.

- They have a fair market value representing 25% or more of the fair market value of all of the issued and outstanding shares of the corporation.

In general, the BTB rules apply to arrangements whereby a nonresident corporation (parent), or a person related to the parent, of a corporation resident in Canada (Canco) grants a loan (intermediary debt) or a specified right in a particular property (specified right) to an intermediary and the intermediary debt and/or specified right is "connected to" a debt owed by Canco to the intermediary (primary debt), provided that the amount of the intermediary debt and/or fair market value of the property subject to the specified right is not less than 25% of the amount of the primary debt. When applicable, the BTB rules deem the primary debt to be a debt between Canco and the parent for thin-capitalization purposes. The rules also deem interest payments from Canco to the intermediary to be interest payments from Canco to the parent.

BTB rules also apply to royalties and similar payments for withholding tax purposes (discussed below in *BTB rules and interest payments*).

After the general interest deductibility rules, transfer-pricing rules and thin-capitalization rules have been applied, the EIFEL rules should be considered. The EIFEL rules generally follow recommendations in the Organisation for Economic Co-operation and Development (OECD)/G20 Base Erosion and Profit Shifting (BEPS) Action 4 report. The EIFEL rules have two separate sets of provisions that determine the amount by which to restrict the deductibility of net interest and financing expenses, being the amount by which "interest and financing expenses" (IFE) exceed "interest and financing revenues" (IFR). Very generally, under the Fixed Ratio Rules, net interest and finance expenses may be deducted in an amount that does not exceed a fixed percentage of the taxpayer's "adjusted taxable income" (ATI, which approximates tax-adjusted earnings before interest, taxes, depreciation and amortization [EBITDA]) for the year. Alternatively, if certain conditions are met and if a group of corporations and/or trusts so elects, a higher "group ratio" may be applied in lieu of the Fixed-Ratio Rules (the Group Ratio Rules). The rules are currently proposed to be effective for tax years beginning on or after 1 October 2023. The ratio of permissible expenses will be 40% until 1 January 2024 and then will be reduced to 30% for all tax years beginning on or after 1 January 2024. As of the date of writing, the rules have not yet been enacted.

Foreign affiliates. A nonresident corporation is considered a foreign affiliate of a Canadian corporation if the Canadian corporation directly or indirectly owns at least 1% of any class of shares of the nonresident corporation and if the Canadian corporation and related persons directly or indirectly own together at least 10% of any class of shares of that nonresident corporation. Dividends received by a Canadian corporation from a foreign affiliate are fully deductible in Canada if the dividends are derived from income from an active business earned in a country with which Canada has entered into a tax treaty or a Tax Information Exchange Agreement (TIEA). Dividends are taxable

in Canada if they are derived from passive operations (with certain exceptions) or any operations in a non-treaty or non-TIEA country, with relief for foreign tax on such income.

Foreign affiliate dumping rules. Rules, commonly known as the "foreign affiliate dumping (FAD) rules," are aimed at "surplus stripping" on the part of a corporation resident in Canada (CRIC) that is controlled by a nonresident corporation. The FAD rules broadly apply to certain investments in foreign affiliates. They apply to an "investment" in a nonresident corporation (a "subject corporation") by a CRIC if the following two conditions are met:

- The subject corporation must be a foreign affiliate of the CRIC or a foreign affiliate of another corporation resident in Canada that deals at non-arm's length with the CRIC immediately after the investment is made.
- The CRIC must be controlled by one nonresident person or, if no single nonresident person controls the CRIC, by a group of nonresident persons not dealing at arm's length with each other (referred to herein as parent or group of parents, respectively) at the time the investment is made.

The concept of "investment" is broadly defined and includes equity and debt investments in foreign affiliates, as well as the acquisition of shares of another corporation resident in Canada if the fair market value of all of the foreign shares owned directly or indirectly by the Canadian corporation comprises more than 75% of the total fair market value of all the properties owned by the Canadian corporation.

If applicable, the FAD rules deem dividends to have been paid to the parent by the CRIC or cause the paid-up capital (PUC) of the shares of the CRIC to be reduced. If a deemed dividend arises and the CRIC has PUC, the CRIC must file certain prescribed information to reduce PUC instead of triggering a deemed dividend. Otherwise, the CRIC may realize a deemed dividend as well as a corresponding PUC reduction. In an instance in which PUC has been reduced, PUC reinstatement rules may be available if the shares of the subject corporation (or substituted property) are later distributed (or sold) by the CRIC.

Certain exemptions limit the application of the FAD rules. The three most common exemptions are the following:

- For certain internal reorganizations
- If the business activities are more closely connected to the subject corporation than the business carried on by any related nonresident corporation (the more closely connected exception)
- If the debt owed by the foreign affiliate is a pertinent loan or indebtedness (the PLOI exception)

For the more closely connected exception, the officers of the CRIC must have and exercise the principal decision-making authority with respect to the investment, and additional conditions need to be met regarding the officers of the CRIC. In particular, the officers of the CRIC must be residents of Canada and work principally in Canada. To qualify for the PLOI exception, the CRIC and the parent need to jointly elect to treat the debt obligation as a PLOI. In addition, the PLOI needs to generate a minimum amount of income for the CRIC in Canada (namely, interest computed based on the current government of Canada three-month Treasury bill rate plus 4%).

In view of the complex nature of the rules, taxpayers are advised to reach out to their tax advisor to determine whether they could be affected by the rules.

Passive income of controlled foreign affiliates. Any Canadian taxpayer that controls (as defined) a foreign affiliate is taxed on its share of that entity's passive investment income (with certain exceptions) in the year such income is earned, regardless of whether such income is currently paid to the shareholder, except in certain specified circumstances. In addition, any taxpayer is taxed on its shares of any other type of income if the income is earned through a permanent establishment located in a non-treaty or non-TIEA country (except a country with which Canada has entered into negotiations for a TIEA or has sought to enter into such negotiations within the last 60 months).

Upstream loans from foreign affiliates. The upstream loan rules are essentially anti-avoidance measures that are intended to prevent taxpayers from making synthetic dividend distributions from foreign affiliates to avoid what would otherwise be an income inclusion in Canada that would not be fully offset by a corresponding dividends-received deduction as described in *Foreign affiliates*.

The rules have a very broad application. In general, Canadian taxpayers may be required to include in their income a portion of the principal amount (referred to as the "specified amount") of loans made to them by their foreign affiliates. In addition, Canadian taxpayers may be required to include in their income a portion of the principal amount of loans made by their foreign affiliates to certain non-arm's-length persons (other than controlled foreign affiliates that are effectively Canadian controlled). If loans are made to other foreign affiliates, taxpayers may be required to include in their income the portion of such loans to the extent that the taxpayer's surplus entitlement percentage (SEP) in the creditor affiliate exceeds its SEP in the borrowing affiliate. Accordingly, a loan from one foreign affiliate to another foreign affiliate that is not a Canadian controlled foreign affiliate results in an income inclusion only to the extent that the taxpayer has a lower SEP in the borrowing affiliate than in the creditor affiliate.

Similar to the domestic shareholder loan rules, exceptions exist for indebtedness repaid within two years after the date on which the indebtedness arose, provided that the repayment is not part of a series of loans or other transactions and repayments, and for indebtedness arising in the ordinary course of business of the creditor.

Upstream loan continuity rules apply to certain reorganizations of corporations or partnerships. These continuity rules apply to transactions and events that occur on or after 16 September 2016. However, it is possible to elect to have the rules apply as of 20 August 2011.

The income inclusion arising under the upstream loan rules may essentially be offset in whole or in part by a deduction if the taxpayer demonstrates that a hypothetical dividend paid the year the loan is made would have enjoyed a full deduction from the income of the Canadian taxpayer with respect to the exempt,

taxable and/or hybrid surplus of a foreign affiliate of the taxpayer. In addition, the rules provide for a deduction equal to amounts previously included in income in the year that the loan is eventually repaid. The rules also extend the application of the reserve mechanism in certain circumstances to include a deduction for pre-acquisition surplus dividends (essentially equivalent to returns of tax basis), but only to the extent of the taxpayer's Canadian tax basis in the shares of the top-tier foreign affiliate. However, this particular deduction is not available if the taxpayer is a partnership or if the borrower under the relevant loan is a nonresident person with whom the taxpayer does not deal at arm's length, which for example, includes a foreign parent or sister company. As a result, this deduction is normally only available regarding upstream loans from the foreign affiliate to the Canadian taxpayer.

Cross-border cash redeployment and pooling using PLOI. As noted in *Foreign affiliate dumping rules*, the FAD rules include an elective exception for certain foreign affiliate indebtedness (a pertinent loan or indebtedness [PLOI]). Under a similar exception to the shareholder loan rules, loans are allowed to be made without triggering deemed dividends and withholding taxes, if they result in interest income inclusions at the higher of the prescribed rate (the prescribed rate for PLOI is equal to the three-month government of Canada treasury bill rate plus 4%) and essentially, any funding costs incurred by the CRIC to make the loan. The rules are relevant to all CRICs that are part of a foreign-based multinational group, not only to CRICs having foreign affiliates. In many cases, these proposals should facilitate commercially efficient and tax-neutral cross-border redeployments and pooling of cash among members of foreign-based multinational groups that include CRICs.

BTB rules and interest payments. As discussed in *Interest deductibility,* the BTB rules apply to interest paid by a person resident in Canada if the following conditions are met:

- The taxpayer pays or credits an amount of interest in with respect to a debt or other obligation to pay an amount to a person or partnership (the immediate funder).
- The immediate funder/intermediary is not a person resident in Canada that does not deal at arm's length with the taxpayer or a partnership each member of which is not a person resident in Canada that does not deal at arm's length with the taxpayer.
- At any time during which the interest accrued on the debt, there is an amount outstanding as or on account of a debt or other obligation to pay an amount to a person or partnership (the ultimate funder) where it can reasonably be concluded that all or a portion of the debt was entered into or permitted to remain in effect because the debt was entered into or permitted to remain outstanding.
- The amount of withholding tax payable by the taxpayer is less than the amount of withholding tax that would have been payable had the interest payment been made to the ultimate funder rather than the immediate funder.
- The amount of the loan to the ultimate funder and/or fair market value of the property subject to the specified right is not less than 25% of the amount of the debt.

If the above conditions are met, the rules will generally deem the interest payments to have been made to the ultimate funder rather than to the immediate funder. These rules can also apply in instances with multiple intermediaries. If applicable, specific rules apply for determining the amount of interest deemed to have been paid to the ultimate funder.

The BTB rules also apply to payments with respect to rents, royalties and similar payments for withholding tax purposes.

Because these rules are complex, taxpayers should reach out to their tax advisor to determine whether they could be affected by the rules.

Corporate reorganizations. In general, transactions between related corporations must be recognized at fair market value. However, certain common types of domestic and foreign corporate reorganizations may be accomplished with little or no immediate Canadian tax cost.

Anti-avoidance legislation. The Canada Revenue Agency (CRA) may apply a general anti-avoidance rule (GAAR) to challenge transactions that it perceives to result in abusive tax avoidance. This rule does not apply to a transaction that may reasonably be considered to have been undertaken or arranged primarily for bona fide purposes other than to obtain a tax benefit. The application of the rule may cause certain transactions to be ignored or recharacterized.

On 28 March 2023, the Finance Minister issued the annual federal budget for 2023-2024 (Budget 2023). This budget introduced certain measures to amend the GAAR rules, which include a proposed preamble to help address interpretive issues and an economic substance provision to clarify that a transaction that lacks economic substance tends to indicate abusive tax avoidance. The rules are available for consultation until 31 May 2023. Following the consultation, the government intends to publish revised legislative proposals and announce the application date of the amendments.

Transfer pricing. Under Canada's transfer-pricing rules, acceptable transfer-pricing methods are those recommended by the OECD. Other methods may be used if the result obtained is similar to the result that would be obtained from an arm's-length transaction.

Following the OECD's BEPS project, a Country-by-Country Report will need to be filed in a prescribed form with the Minister of National Revenue by entities of multinational enterprises (MNEs; more than EUR750 million in consolidated group revenue) for their fiscal years beginning in 2016 and future years.

Annual information reporting is required for related-party transactions on a T106 information return. In addition, taxpayers are obligated to prepare annual transfer-pricing documentation that meets the requirements set out in Subparagraphs 247(4)(1)(i) to (vi) of the Income Tax Act (Canada). These requirements are not equivalent to the "Local File" as defined by Action 13 of the BEPS project, and taxpayers may be subject to penalties for failure to comply with these Canada-specific requirements on a

contemporaneous basis (that is, contemporaneous with filing of the taxpayer's annual return).

In general, the CRA has a high level of audit coverage on transfer pricing and frequently makes adjustments to taxpayers' pricing. Dispute resolution for transfer-pricing disputes is available domestically through the CRA Appeals Branch, or bilaterally through the Mutual Agreement Procedure under Canada's tax treaties. It is possible to enter into Advance Pricing Agreements with the CRA.

Acquisition of control considerations. If control of a corporation has been acquired, the target corporation is deemed to have a year-end immediately before the acquisition of control. A new tax year begins immediately thereafter, and a new year-end may be selected by the target corporation. If an acquisition of control occurs, special rules apply to the determination and treatment of capital losses, business losses, and certain tax attributes with respect to foreign affiliates.

Capital gains realized by nonresidents. Subject to applicable tax treaties, nonresidents must pay Canadian tax on their net taxable capital gains derived from the disposition of "taxable Canadian property" (TCP). Such property includes, but is not limited to, the following:

- Real or immovable property situated in Canada
- Shares of private corporations or interests in partnerships or trusts that, within the preceding 60 months at any particular time, derived more than 50% of their value from real or immovable property situated in Canada, Canadian resource property, timber resource property, an option with respect to any of the foregoing or any combination thereof
- Shares of Canadian public corporations (in limited circumstances)
- Property used in a business carried on by the nonresident in Canada
- Any option or interest in the above property

A nonresident vendor of TCP (other than property that qualifies as excluded property), Canadian resource property or timber resource property must obtain a tax clearance certificate from the CRA. To obtain such certificate, the nonresident vendor must provide the CRA with acceptable security or must pay tax on the disposition at the time of sale. Excluded property includes, among other items, property that is treaty-protected property of the vendor. In the case of a disposition between a purchaser and a seller not dealing at arm's length, for treaty-protected property to qualify as excluded property, a notice in a prescribed form must be sent to the CRA.

The purchaser must generally withhold and remit to the Receiver General up to 25% (50% in certain circumstances) of the amount by which the cost to the purchaser of the property (other than excluded property) exceeds the amount stipulated in the CRA clearance certificate on account of the nonresident's potential tax liability resulting from the disposition. In the absence of a clearance certificate, the purchaser must generally withhold and remit 25% of the purchase price (50% in certain circumstances). The withholding and remittance obligation is referred to as the

"source deduction." Similar requirements apply for the province of Quebec.

The purchaser remains liable for any source deduction not made in the event it is later determined that the property disposed of does not qualify as excluded property, unless one of the safe harbor rules described below applies. The first safe harbor rule provides that a purchaser is not liable for any source deduction if the purchaser had no reason to believe that the vendor was not resident in Canada after reasonable inquiry. Similarly, a purchaser is not held liable for any source deduction if the property is acquired from a nonresident vendor and if all of the following conditions are satisfied:

- After reasonable inquiry, the purchaser concludes that the vendor is a resident of a country with which Canada has a tax treaty.
- The property is treaty-protected property of the vendor under the tax treaty with the particular treaty country.
- The purchaser sends a notice in a prescribed form to the CRA within 30 days after the acquisition, setting out the date of acquisition, the name and address of the nonresident vendor, a description of the property, the amount paid or payable by the purchaser of the property and the name of the particular treaty country.

In addition, the requirement for the nonresident vendor to file a Canadian tax return may be removed. In general, a nonresident vendor is exempt from filing a Canadian tax return with respect to taxable Canadian properties if all of the following criteria are satisfied:

- No Canadian "corporate income tax" is payable for the tax year.
- The nonresident is not currently liable to pay any Canadian tax with respect to any previous tax year.
- Each TCP that is disposed of during the year is "excluded property," which now includes treaty-exempt property in certain circumstances (see above) and property with respect to which the Minister of National Revenue has issued a nonresident clearance certificate.

Functional currency reporting. In general, all Canadian taxpayers are required to use the Canadian dollar as their reporting currency for tax purposes. However, a corporation may also elect to determine its "Canadian tax results" in a currency other than the Canadian dollar if the currency is a "qualifying currency" and if such currency is the primary currency in which the taxpayer maintains its records and books of account for financial reporting purposes.

The currency is a "qualifying currency" if it is the US dollar, the euro, the British pound, the Australian dollar or a prescribed currency (there are currently no currencies prescribed by regulation). In addition, it is currently proposed to include the currency of Japan which would be applicable to tax years that begin after 2019.

Digital Services Tax. The Federal Government of Canada introduced legislative proposals to implement a Digital Services Tax (DST) with effect from 1 January 2024. The proposals implement a tax of 3% on revenues derived by residents and nonresidents of Canada from certain digital services provided by

them. The 3% tax will apply on taxable "Canadian digital services revenue" to the extent that an entity has the following:
- Group revenue exceeding EUR750 million globally
- Canadian in-scope revenue exceeding CAD20 million

The "Canadian digital services revenue" comprises the following sources of revenue:
- Canadian online marketplace services revenue
- Canadian online advertising services revenue
- Canadian social media services revenue
- Canadian user data services revenue

With respect to the definition of the "online marketplace" in the context of determining the "Canadian online marketplace service revenue," there are a few exclusions from the definition. These exclusions include the following:
- Digital interfaces that have as their main purpose the provision of payment services, the granting of credit or the facilitation of supplies of financial instruments (that is, services rendered by credit card processors, credit card providers and investment trading platforms)
- A digital interface with a single supplier (that is, the website of a traditional retailer that sells its products directly to customers)

Hybrid mismatch rules. On 19 April 2021, the Finance Minister issued the annual federal budget for 2021-2022 (Budget 2021). As part of Budget 2021 the federal government proposed to implement rules consistent with the Action 2 recommendation of the BEPS Action Plan with appropriate adaptations to the Canadian income tax context. The federal government announced that it intends to introduce the rules to neutralize hybrid mismatch arrangements in two separate legislative packages. The first package addresses rules specific to hybrid instruments and will rely on recommendations in Chapters 1 and 2 of the Action 2 report and apply as of 1 July 2022. The second legislative package is intended to address hybrid mismatch arrangement rules not addressed in the first package (branch mismatch arrangements, imported hybrid mismatch arrangements and reverse hybrids) and will apply no earlier than 2023.

On 29 April 2022, the federal government released draft legislative proposals on the first package, which were revised on 28 November 2023. The proposals included rules that target certain notional interest deductions, which go beyond the recommendation of the BEPS Action 2 report. As of the date of writing, the rules have not yet been enacted. As of the date of writing, the DST rules have not yet been enacted.

Pillar One rules. Further to the OECD draft rules consolidated in two major progress reports released in July and October of 2022, countries are working toward completing multilateral negotiations so that the convention to implement Pillar One can be signed by mid-2023, with a view to it entering into force in 2024. Budget 2023 announced that the DST could be imposed as of 1 January 2024, but only if the multilateral convention implementing the Pillar One framework has not come into force. In that event, the DST would be payable as of 2024 with respect to revenues earned as of 1 January 2022.

Pillar Two rules. As part of Budget 2023, the federal government announced the government's intention to introduce legislation implementing the Income Inclusion Rule (IIR) and a domestic minimum top-up tax applicable to Canadian entities of MNEs that are within scope of Pillar Two, with effect for fiscal years of MNEs that begin on or after 31 December 2023. The government also intends to implement the Undertaxed Profits Rule (UTPR) with effect for fiscal years of MNEs that begin on or after 31 December 2024. The government released the second draft legislative proposals for the IIR and domestic minimum top-up tax on 30 April 2024, with draft legislative proposals for the UTPR to follow at a later time. As of the date of writing, the IIR and domestic minimum top-up tax rules have not been enacted.

F. Treaty withholding tax rates

As noted in Section A, in general, Canada's domestic tax law provides exemptions from Canadian withholding tax on interest paid or credited to arm's-length nonresident persons, regardless of their country of residence. In addition, withholding tax does not apply to interest that is considered "fully exempt interest," regardless of the recipient's relationship to the payer. "Fully exempt interest" generally includes the following:

- Interest paid by a government body or crown corporation
- Interest on a mortgage or hypothecary obligation with respect to real property located outside of Canada (certain conditions apply)
- Interest paid to a prescribed international institution or agency
- Deemed interest amounts pertaining to securities lending arrangements (certain conditions apply)

However, regardless of the above general rules, a 25% withholding tax applies to all "participating debt interest." "Participating debt interest" is generally interest, other than fully exempt interest, which satisfies either of the following conditions:

- It is paid or payable on an obligation, other than a prescribed obligation, and all or any portion of the interest is contingent or dependent on the use of or production from property in Canada.
- It is computed by reference to revenue, profit, cash flow, commodity price or any other similar criterion or by reference to dividends paid or payable to shareholders of any class of shares of the capital stock of a corporation.

Similarly, withholding tax applies to the following:

- Interest that is not "fully exempt interest" and is paid or payable to a person with whom the payer is not dealing at arm's length
- Interest with respect to a debt or other obligation to pay an amount to a person with whom the payer is not dealing at arm's length
- Dividends, including dividends deemed to be paid on assessment of a transfer-pricing adjustment
- Rents, royalties or similar payments

Canada has enacted legislation to implement the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI). The MLI entered into effect for any particular covered tax treaty in accordance with the provisions set forth in its "entry into effect" articles and applies to some of Canada's tax treaties with effect as early as 1 January 2020.

The MLI does not operate to modify the application of Canada's tax treaties at the same time. For the MLI to come into effect for a particular bilateral tax treaty, both Canada and the other party to the treaty must have listed the treaty and ratified the MLI. Further, the impact of the MLI on any particular tax treaty will depend on the notifications and reservations made, as well as certain positions taken, by the parties to that treaty under the MLI.

The rates in the table below generally reflect the lower of the treaty rate and the rate under domestic tax law for dividends, interest and royalties paid from Canada to residents of various treaty jurisdictions. Certain exceptions or conditions may apply, depending on the terms of the particular treaty. The following table includes tax treaties currently in force and tax treaties that are signed but not yet in force.

Residence of recipient	Dividends %	Interest %	Royalties (b)(c) %
Algeria	15	15/0	15/0 (ii)
Argentina	15/10 (qq)	12.5/0	15/10/5/3 (sss)

Non-treaty jurisdictions (k)	25	0	25

(a) A 0% rate generally applies to royalties relating to computer software.

(b) The lower rate usually applies to royalties on cultural works or to royalties relating to computer software, patents and know-how.

(c) Withholding tax of 25% applies if the royalties relate to the use of real or immovable property, including resource property.

(d) The treaty provides that the lower rate applies to dividends paid to a company that controls directly or indirectly at least 10% of the voting power in the payer. Interest on certain government-assisted debt and certain other categories of interest are exempt from withholding tax.

(e) Belarus is honoring the USSR treaty, and consequently that treaty continues to be in force with respect to Belarus. Canada has entered into tax treaties with Estonia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, the Russian Federation, Ukraine and Uzbekistan. Canada has signed tax treaties with Azerbaijan and Armenia, but these treaties have not yet been ratified. The withholding rates under these treaties are listed in the above table. Tajikistan and Turkmenistan have announced that they are not honoring the USSR treaty, but negotiations for new treaties with these countries have not yet begun.

(f) Mortgage interest on Egyptian property is not eligible for reduced rates under the treaty. As a result, the higher rate applies if such interest is not exempt under Canadian domestic law.

(g) The 0% rate applies to certain copyright royalties and to royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

(h) The 5% rate applies to dividends paid to corporate shareholders owning at least 10% of the voting shares of the Canadian company. The 15% rate applies to other dividends.

(i) The fifth protocol to the 1980 tax treaty between Canada and the United States, which entered into force on 15 December 2008, generally provides for a gradual reduction to the withholding tax rate on interest paid or credited to non-arm's-length US residents. Under the protocol, the following withholding tax rates apply:
- 7% for interest paid during the 2008 calendar year
- 4% for interest paid during the 2009 calendar year
- 0% for interest paid after the 2009 calendar year

The reduced rates retroactively apply for the entire calendar year in which the protocol was ratified (that is, effective for interest paid as early as 1 January 2008). For further information regarding the protocol, see footnote (dddd). Withholding tax is not imposed on interest paid or credited to arm's-length nonresidents after the 2007 calendar year.

(j) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 20% of the voting power in the payer.

(k) In general, no withholding tax is imposed on interest paid to payees who are dealing at arm's length with the payer. However, withholding tax at a rate of 25% typically applies to interest paid or credited to related nonresidents (the rate may be reduced by a tax treaty). Other specific exemptions or specific inclusions may apply to change the general rules. In addition, most copyright royalties are exempt from withholding tax.

(l) The 6% rate applies to royalties paid on cultural works, copyrights, computer software, patents and certain types of information.

(m) The 5% rate applies if the dividends are paid by a Canadian corporation to a French corporation that controls directly or indirectly at least 10% of the votes of the payer. The 10% rate applies if the dividends are paid by a nonresident-owned investment corporation that is a resident of Canada to a French corporation that controls directly or indirectly at least 10% of the votes of the payer. The 15% rate applies in all other cases.

(n) The 5% rate applies to dividends paid to corporations owning at least 10% of the voting shares and capital of the payer. The 15% rate applies to other dividends. A protocol amending the tax treaty between Canada and Switzerland entered into force on 19 December 2011. The protocol provides that no tax will be withheld if a dividend is paid by a resident of a contracting state to a resident of the other contracting state that operates or administers pension or retirement plans for individuals who are resident in that other contracting state and if the dividend is not derived from the carrying on of a trade or a business.

(o) The general rate is 15%, and payments for the use of, or the right to use, certain industrial, commercial or scientific equipment may qualify for a 10% rate.

(p) The 0% rate applies to royalties on cultural works as well as to payments for the use of, or the right to use, computer software, patents and information concerning industrial, commercial and scientific experience.

(q) The 5% rate applies if the beneficial owner of the dividends is a corporation that holds directly at least 25% of the capital of the payer. The 10% rate applies if the dividends are paid by a nonresident-owned investment corporation that is a resident of Canada to a beneficial owner that is a resident of Denmark and that holds directly or indirectly at least 25% of the capital of the company paying the dividend. The 15% rate applies in all other cases.

(r) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power of the payer.

(s) The 5% rate applies if the beneficial owner of the dividends controls at least 70% of the voting power of the payer. The 10% rate applies if the beneficial owner of the dividends controls at least 25% but less than 70% of the voting power of the payer.

(t) The 10% rate applies if the recipient of the dividends is a company that controls directly or indirectly at least 10% of the voting power of the payer.

(u) The 10% rate applies if the beneficial owner of the dividends is a corporation that controls directly or indirectly at least 25% of the voting power of the payer.

(v) The 12.5% rate applies if the recipient is a company that controls directly or indirectly at least 10% of the votes of the payer.

(w) The 5% rate applies to dividends paid to a resident of Croatia that controls at least 10% of the voting power of the payer or that holds at least 25% of the capital of the payer.

(x) The 5% rate applies if the beneficial corporate owner of the dividends controls directly at least 25% of the voting power of the payer of the dividends.

(y) The 0% rate generally applies to royalties for certain cultural works and copyrights. It also applies to royalties for computer software, patents and information concerning industrial, commercial and scientific experience, if the payer and recipient are not associated persons (as defined).

(z) The 10% rate applies to dividends paid to a company holding at least 25% of the capital of the payer.

(aa) The 5% rate applies if the recipient of the dividends controls directly or indirectly at least 10% of the voting power of the payer. The 10% rate applies to dividends that are paid by a nonresident-owned investment corporation resident in Canada to a company that is a resident of Hungary and that controls at least 25% of the voting power in the company paying the dividends and the beneficial owner of such dividends. The 15% rate applies to all other cases.

(bb) The 5% rate applies if the beneficial owner of the dividends is a corporation that controls directly at least 10% of the voting power of the payer or that holds directly at least 25% of the capital of the payer. The 10% rate applies to dividends paid by a nonresident-owned investment corporation resident in Canada to a beneficial owner resident in Sweden that controls directly at least 10% of the voting power, or holds at least 25% of the capital, of the corporation paying the dividends. The 15% rate applies to other dividends.

(cc) The 0% rate applies to copyright royalties and similar payments with respect to cultural, dramatic, musical or other artistic works.

(dd) The 5% rate applies to dividends paid to a company that owns at least 25% of the voting shares of the payer for the last six months of the accounting period for which the distribution of profits takes place.

(ee) The 10% rate applies if the recipient is a company that controls at least 10% of the votes of the payer.

(ff) The treaty was signed on 29 December 1998, but it is not yet in force. The 5% rate for dividends will apply if the recipient is a company that controls at least 10% of the votes of the payer. The 5% rate for royalties will apply to royalties for certain cultural works, and royalties for certain computer software, patents and know-how if the payer and the payee are not related.

(gg) The 10% rate applies if the recipient is a company that controls at least 25% of the voting power of the payer directly or indirectly.

(hh) The 5% rate applies if the recipient is a company that controls at least 10% of the voting power in the payer.

(ii) The 0% rate generally applies to royalties relating to computer software or patents.

(jj) The lower rate applies to royalties for certain cultural works, and generally to royalties for computer software, patents and know-how.

(kk) The 5% rate applies if the beneficial owner of the dividends owns at least 25% of the capital or controls, directly or indirectly, 10% of the voting power of the payer. The 10% rate applies to dividends paid by a nonresident-owned investment corporation that is a resident of Canada to a beneficial owner that is a company (other than a partnership) resident of the Netherlands and that owns at least 25% of the capital of, or controls directly or indirectly at least 10% of the voting power in, the company paying the dividends. The 15% rate applies to other dividends.

(ll) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer.

(mm) The 5% rate applies if the recipient is a company that controls directly or indirectly at least 25% of the voting power in the payer.

(nn) The 10% rate applies if the recipient is a company that controls directly or indirectly at least 10% of the voting power in the payer.

(oo) The 5% rate applies if the recipient is a company holding directly or indirectly at least 10% of the capital of the payer.

(pp) The 5% rate for dividends applies if the recipient is a company that controls directly or indirectly at least 10% of the voting power in the payer.

(qq) The 10% rate applies if the recipient of the dividends is a company that holds directly 25% of the capital of the payer. The 15% rate applies in all other cases.

(rr) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer. The 15% rate applies in all other cases.

(ss) The 5% rate applies if the recipient of the dividends is a company that owns at least 10% of the voting shares, or at least 25% of the value of the shares, of the payer.

(tt) The 5% rate applies if the dividends are paid to a company that controls at least 10% of the voting power in the payer.

(uu) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that owns directly at least 10% of the voting stock of the payer. The 15% rate applies to other dividends.

(vv) The 5% rate for dividends applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the payer.

(ww) Under the fourth protocol to the treaty, which was signed on 21 July 2014 but is not yet in force, interest paid to an arm's-length party is exempt from withholding tax.

(xx) The 5% rate applies to dividends if the beneficial owner is a company that holds directly at least 10% of the voting power in the company paying the dividends.

(yy) The 5% rate applies to dividends paid to a company (other than a partnership) that is a beneficial owner and controls directly at least 25% of the voting power in the payer.

(zz) The 5% rate for dividends applies if the beneficial owner of the dividends is a company that controls at least 25% of the voting power in the payer.

(aaa) The 10% rate applies to royalties for the use of, or the right to use, industrial, commercial, or scientific equipment.

(bbb) The 5% rate applies to dividends paid to a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies to other dividends. The 10% rate applies to dividends paid by a nonresident-owned investment corporation resident of Canada to a resident of the United Arab Emirates that holds directly or indirectly at least 10% of the voting power of the payer.

(ccc) The 5% rate applies if the beneficial owner is a company that controls directly or indirectly at least 25% of the voting power in the company paying the dividend. The 15% rate applies in all other cases.

(ddd) The 5% rate applies to dividends paid to a company that controls at least 10% of the voting power of the payer.

(eee) The 0% rate applies to royalties pertaining to certain cultural works, computer software, patents or know-how.

(fff) Payments for the use of computer software, patents and certain know-how are exempt.

(ggg) The 10% rate applies if the recipient is a company holding directly or indirectly at least 10% of the voting power of the payer.

(hhh) The 5% rate applies to certain royalties pertaining to certain computer software, patents or know-how.

(iii) The general withholding tax rate for royalties is 10%. A 5% rate applies to royalties pertaining to certain cultural works, computer software, patents and know-how.

(jjj) The general withholding tax for royalties is 10%. Royalties pertaining to certain cultural works, computer software, patents and know-how are exempt.

(kkk) The general withholding tax rate is 10%. Royalties pertaining to certain cultural works, computer software, patents and know-how are exempt.

(lll) The general withholding tax rate for royalties is 10%. Royalties pertaining to certain cultural works, computer software, patents and know-how are exempt from withholding tax.

(mmm) The 5% rate applies to dividends paid to a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies to other dividends.

(nnn) The 5% rate applies to dividends paid to a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies to other dividends.

(ooo) The 15% rate applies if the recipient is a company that holds an equity percentage of at least 10% in the payer of the dividends.

(ppp) The 10% rate applies if the recipient is a company that controls directly or indirectly at least 25% of the voting power in the payer.

(qqq) The 5% rate applies to royalties with respect to certain cultural works, and to royalties for certain computer software, patents and know-how if the payer and payee are not related.

(rrr) The general withholding tax for royalties is 10%. Royalties pertaining to certain cultural works and computer software and royalties for information concerning industrial, commercial or scientific experience are exempt.

(sss) The 3% rate applies to royalties paid for rights to use news. The 5% rate applies to royalties pertaining to certain cultural works. The 10% rate applies to royalties pertaining to patents, trademarks, designs or models, plans, secret formulas and technical assistance.

(ttt) The general rate for royalties is 15%. The 25% rate applies to royalties pertaining to the use of trademarks.

(uuu) The 10% rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the voting power in the payer of the dividends.

(vvv) A protocol between Canada and Spain entered into force on 29 September 2015. The rates under the protocol are reflected in the above table.

(www) The 15% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the payer.

(xxx) The 15% rate applies to dividends paid to a company that owns at least 10% of the voting shares of the payer during the six-month period immediately preceding the date of payment of the dividend.

(yyy) The 5% rate applies to royalties pertaining to cultural works.

(zzz) The 20% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 15% of the voting power in the payer.

(aaaa) The 20% rate applies to the following:

- Patent royalties
- Royalties for the use of, or the right to use, trademarks, motion picture films and films or videotapes for use in connection with television
- Payments for the use of, or the right to use, industrial, commercial, scientific or harbor equipment

(bbbb) The 7.5% rate applies to fees for technical services.

(cccc) The 5% rate applies if, at the time the dividend is declared, the recipient is a company holding directly at least 25% of the capital of the payer and if the capital invested by the recipient exceeds USD100,000. The 15% rate applies in all other cases.

(dddd) On 15 December 2008, the fifth protocol to the 1980 tax treaty between Canada and the United States entered into force. The following are amendments contained in the protocol that affect cross-border payments:

- The withholding tax on cross-border interest payments will be eliminated. The protocol provides that the withholding tax rate on interest payments is reduced to 0% (phased out over a three-year period with respect to debt between parties that are "related"). For further details, see footnote (i).
- A "Hybrid Entity Clause" is introduced with respect to income, profits or gains derived through or from certain "fiscally transparent" entities. The protocol can extend treaty relief to income earned through certain "fiscally transparent" entities, such as limited liability corporations and certain other hybrid entities. The protocol may also deny treaty benefits with respect to income derived through or from certain "fiscally transparent" entities.
- The protocol provides that the existing limitation on benefits (LOB) provisions, which are currently applicable for US tax purposes only, will also become operative for Canadian tax purposes. The comprehensive LOB article, designed to counter "treaty shopping" abuses, is a significant development in the Canadian tax landscape and could operate to deny treaty benefits in many situations in which treaty entitlement had never come under question, including situations in which treaty shopping was not a consideration. Consequently, an analysis is required in each case in which payments are made to an entity that may have non-qualifying US or Canadian owners or owners that are residents of other countries, including in certain circumstances, public companies.

(eeee) The 0% rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or artistic works.

(ffff) A renegotiated tax treaty between Canada and Israel was signed on 21 September 2016 and entered into force on 21 December 2016. In general, for withholding taxes, the treaty is generally effective in Canada for amounts paid or credited to nonresidents on or after 1 January 2017; for other taxes, the treaty is effective for tax years beginning on or after 1 January 2017. The new tax treaty replaces the tax treaty signed on 21 July 1975.

(gggg) The 5% rate applies if, at the time the dividend is declared, the recipient is a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies in all other cases.

(hhhh) The withholding tax rate is 5% for copyright royalties and other similar payments with respect to literary, dramatic or artistic works and royalties for right-to-use patents or know-how. A 10% rate applies to royalties in all other cases.

(iiii) The 5% rate applies if, at the time the dividend is declared, the recipient is a company holding directly or indirectly at least 25% of the capital of the payer. The 15% rate applies in all other cases.

(jjjj) The 0% rate applies to copyright royalties and similar payments with respect to the production or reproduction of cultural or artistic works (excluding royalties with respect to motion picture films and royalties with respect to works on film or videotape or other means of reproduction for use in connection with television broadcasting).

(kkkk) The 5% rate applies to copyright royalties and other similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but does not include royalties with respect to motion picture films and works on film or videotape or other means of reproduction for use in connection with television), and royalties with respect to computer software, patents or information concerning industrial, commercial or scientific experience (but not including any such royalties provided in connection with rental or franchise agreements).

(llll) The 5% rate applies if the recipient of the dividends is a company that controls directly or indirectly 25% of the voting power of the payer company that is a resident of Canada.

(mmmm) A protocol to the tax treaty between Canada and Switzerland entered into force on 19 December 2011. It provides that interest payments made to a beneficiary in the other contracting state are not subject to withholding tax if the beneficiary is not related to the payer.

(nnnn) The general withholding tax rate for royalties is 10%. The 5% rate applies to certain royalties pertaining to computer software and information concerning industrial, commercial or scientific experience. The withholding tax rate is 0% for copyright royalties and for similar payments with respect to literary, dramatic or artistic works.

(oooo) The 15% rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the voting power in the payer of the dividends.

(pppp) The 0% rate applies to royalties pertaining to certain cultural works.

(qqqq) The last paragraph of the royalties article contains a most-favored nation clause in favor of Canada.

(rrrr) The 5% rate applies if the beneficial owner of the dividends is a corporation that holds directly at least 10% of the voting power of the payer. The 10% rate applies if the dividends are paid by a nonresident-owned investment corporation that is a resident of Canada to a beneficial owner that is a company (other than a partnership) resident in Luxembourg and that holds directly or indirectly at least 25% of the capital of the company paying the dividends. The 15% rate applies in all other cases.

(ssss) Tax treaty negotiations with the government of China Mainland began on 6 December 2010. The tax treaty is currently being renegotiated.

(tttt) Negotiations to update the tax treaty with the United Kingdom began on 1 October 2011. On 21 July 2014, the fourth protocol to the treaty was signed, but it is not yet in force.

(uuuu) The withholding tax rate for dividends is 5% if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends. A 15% rate applies to dividends in all other cases.

(vvvv) A renegotiated tax treaty between Canada and New Zealand was signed on 26 June 2015 and entered into force on 1 August 2015.

(wwww) The 5% rate applies to dividends with respect to a direct holding of 10% or more of the voting power. The 15% rate applies to other dividends.

(xxxx) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer. A 15% rate applies to other dividends.

(yyyy) Interest on certain government or government-assisted debt is exempt from withholding tax.

(zzzz) The 0% rate applies to copyright royalties and other similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works, but not including royalties with respect to the following:
- Computer software
- Motion picture films
- Works on film or videotape or other means of reproduction for use in connection with television broadcasting

(aaaaa) The 5% rate applies to dividends paid with respect to holdings of 10% or more of the voting power. The 0% rate applies if the dividend is paid to the central bank that is a portfolio shareholder. The 15% rate applies to other dividends.

(bbbbb) The 5% rate applies to royalties for literary works, computer software, patents and information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

(ccccc) The tax treaty is currently being renegotiated.

(ddddd) The tax treaty is currently being renegotiated. The negotiations began on 26 November 18.

(eeeee) The 0% rate applies to copyright royalties and other similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works, but does not apply to royalties with respect to motion picture films and works on film or videotape or other means of reproduction for use in connection with television.

(fffff) The tax treaty is currently being renegotiated. The negotiations began in June 2017.

(ggggg) The treaty was signed on 25 March 2010, but is not yet in force.

(hhhhh) The 10% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 20% of the capital of the payer. The 15% rate applies in all other cases.

(iiiii) The treaty was signed on 24 November 2016 but is not yet in force.

(jjjjj) The tax treaty is currently being renegotiated. The negotiations began in June 2017.

(kkkkk) The rates under the treaty are 0% and 10%. However, by virtue of a most-favored-nation clause, the rates are reduced to 0% and 5%.

(llllll) The 5% rate applies to interest if the beneficial owner is a financial institution and it deals at arm's length with the payer.

(mmmmm) The rate under the treaty is 10%. However, by virtue of a most-favored-nation clause, the rate is reduced to 5%. Under the Bulgaria and Estonia treaty, the rate is 0%; however, due to a restriction in the most-favored-nation clause, the rate for dividends cannot be reduced below 5%.

(nnnnn) The rate under the treaty is 10%. However, by virtue of a most-favored-nation clause, the rate is reduced to 5% with respect to participations of at least 20% of voting power.

(ooooo) The rate under the treaty is 15%. However, by virtue of a most-favored-nation clause, the rate is reduced to 10%.

(ppppp) The rate under the treaty is 15%. However, by virtue of a most-favored-nation clause, the rate is reduced to 10%.

(qqqqq) The general rate under the treaty is 15%. However, by virtue of a most-favored-nation clause, the general rate is reduced to 12%.

(rrrrr) The rate under the treaty is 15%. However, by virtue of a most-favored-nation clause, the rate is reduced to 10% where if either of the following conditions is satisfied:

- The beneficial owner is a contracting state or a political subdivision thereof, the central bank of a contracting state, and banks whose capital is 100% owned by the contracting state, which has granted loans for a period of three years or more. In this latter case, the interest received by such banks is taxed in the state of residence.
- The interest is paid by any of the entities referred to in the first bullet.

(sssss) The 5% rate applies if the dividend is paid to a substantial corporate shareholder. As a result of the intercompany clause, the general rate of 15% may be reduced to 10%.

(ttttt) The general rate under the treaty is 15%. As a result of the intercompany clause, the general rate may be reduced to 10%. The 0% rate applies to interest paid to a government.

(uuuuu) The 0% rate applies to software royalties.

(vvvvv) The 0% rate applies if the dividend is paid to a recognized pension plan.

(wwwww) The 10% rate applies if the dividend is paid by a nonresident-owned investment corporation that is a resident of Canada to the beneficial owner with 10% or more of the voting stock.

(a) Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or IRPC) applies to resident companies and nonresident companies with permanent establishments (PEs) in Cape Verde. Micro and small-sized companies can benefit from a 4% reduced rate, which is applied to their turnover. See Section B for details of other rates.

(b) Depending on the situation, a 1% withholding tax is imposed on the consideration or a 20% tax is imposed on the capital gain, provided that the taxpayer is subject to the small-sized companies simplified regime. Also, see Section B.
(c) These rates may be reduced or eliminated by tax treaties.
(d) The 0% rate applies to dividends distributed by companies subject to and not exempt from IRPC.
(e) A withholding tax waiver is foreseen for income obtained from entities within a tax group.
(f) Income must be declared and is subject to the normal tax rates. Amounts withheld may be credited against IRPC due. See Section B.
(g) A withholding tax exemption is available regarding interest from shareholder loans and corporate bonds if the shareholder is a pure holding company (*sociedade gestora de participações sociais*, or SGPS) with voting rights in the subsidiary (this also applies if the participation is held jointly with other entities in which the holding company is dominant).
(h) The 15% rate applies to most services and commissions and may be eliminated under a tax treaty.
(i) Tax losses can be carried forward without any time limit. The amount deductible each year is capped at 50% of the taxable profit for the year.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or IRPC) is levied on resident and nonresident entities.

Resident entities. Companies and other entities, including non-legal entities, whose principal activity is commercial, industrial or agricultural, are subject to IRPC on worldwide profits, but a foreign tax credit may reduce the amount of IRPC payable (see *Foreign tax relief*).

A 50% IRPC exemption applies to entities exclusively engaged in agricultural and fishing activities.

Companies and other entities, including non-legal entities, that do not carry out commercial, industrial or agricultural activities, are generally subject to tax on their worldwide income (for details regarding the calculation of the taxable profit of these entities, see Section C).

Nonresident entities. Companies or other entities that operate in Cape Verde through a PE are subject to IRPC on their profits attributable to the PE.

Companies or other entities without a PE in Cape Verde are subject to IRPC on their income deemed to be derived in Cape Verde.

The transfer of shares in a foreign or Cape Verdean company is subject to tax in Cape Verde if more than 50% of the assets owned by the company being transferred are composed directly or indirectly of immovable property located in Cape Verde.

For tax purposes, companies or other entities are considered to have a PE in Cape Verde if they have a fixed installation or a permanent representation in Cape Verde through which they engage in a commercial, industrial or agricultural activity, including the supply of services. Under rules that generally conform to the Organisation for Economic Co-operation and Development (OECD) model convention, a PE may arise from, among others, the following:

- A building site or installation project, including coordination, inspection and supervision activities

- The performance of services (including consultancy) that last for more than 183 days
- The existence of a dependent agent

Double tax treaties may limit the scope of a PE in Cape Verde.

Tax rates. For 2024, IRPC is levied at the following rates.

Type of enterprise	Rate (%)
Companies or other entities with a head office or effective management control in Cape Verde, whose principal activity is commercial, industrial or agricultural	21
Micro and small-sized companies with a head office or effective management control in Cape Verde	4
Entities other than companies with a head office or effective management control in Cape Verde, whose principal activity is not commercial, industrial or agricultural	21
PEs	21
Nonresident companies or other entities without a head office, effective management control or a PE in Cape Verde	
Income subject to withholding tax	10/20
Income not subject to withholding tax	21

Certain types of income earned by companies in the last category of companies listed above are subject to the following withholding taxes.

Type of income	Rate (%)
Interest payments	10/20
Royalties	20
Technical assistance	15
Income from shares (dividends)	0/10
Income from government bonds	10
Revenues derived from the use of, or the right to use, equipment	20
Other revenues from the application of capital	20
Payments for services rendered or used in Cape Verde	20

Applicable double tax treaties may reduce the above withholding tax rates.

A fire brigade surcharge (*imposto de incêndio*) is imposed on resident companies and nonresident companies with a PE in the municipalities of Mindelo (Island of São Vicente) and Praia (Island of Santiago). The fire brigade surcharge is applied at a rate of 2% to the taxable profit determined for IRPC purposes.

Companies licensed under the Cape Verdean International Business Centre (IBC) regime benefit from a reduced rate of IRPC. This tax benefit applies until 2030 and depends on the creation of a minimum of 10 jobs at the International Industry Center (CII) and the International Trade Center (CIC). The following are the reduced rates of IRPC:

- 5% for entities with 10 or more dependent workers
- 3.5% for entities with 20 or more dependent workers
- 2.5% for entities with 50 or more dependent workers

For companies operating in the International Services Center, the IRPC rate is 2.5% if the entity has at least four dependent workers.

The shareholders of the companies that are licensed under the IBC regime may benefit from exemptions on dividends received and on interest derived from shareholder loans. Customs duties exemptions may also be available to entities licensed under the IBC regime.

A tonnage tax applies to entities licensed in the IBC that develop activities related to the international maritime transport of cargo and passengers, provided that the following conditions are met:
- All the ships and similar vessels owned by the taxpayer are registered in Cape Verde's International Register of Ships, and the total activity developed falls within the scope of this regime.
- At least 85% of the income results from activities with other entities installed and functioning in the IBC or with foreign entities.

The tonnage tax profit is calculated using a notional daily profit per ship based on a sliding tariff by reference to the net tonnage of the ship. The following table shows the amounts of daily taxable income.

Net tonnage	Daily taxable income for each 100 net tonnes (CVE)
Up to 1,000	646
From 1,001 to 10,000	566
From 10,001 to 25,000	307
Greater than 25,000	103

Significant incentives are also available for qualifying investment projects under the Investment Law. Qualifying projects may enjoy the following tax benefits:
- A tax credit equal to 20% of relevant investments
- An exemption from municipal real estate holding tax for buildings used in the project
- An exemption from property transfer tax for buildings used in the project
- An exemption from stamp duty with respect to financing necessary for the investment project
- An exemption from customs duties for certain goods and equipment

The abovementioned tax credits can be used in the year of investment for up to 50% of the IRPC liability. Any excess can be carried forward for 15 years.

Further incentives may be available for investment projects that meet the following conditions:
- They have a value exceeding CVE3 billion and create at least 20 jobs (CVE1.5 billion and 10 jobs in the case of investments located in a municipal area whose average gross domestic product [GDP] per capita is lower than the national average, with reference to the last three years).
- They are relevant for the promotion and acceleration of the development of the Cape Verdean economy.
- The promoter of the investment possesses technical and managerial capacities.

The exemptions granted cannot exceed five years (some exceptions are foreseen for projects that are declared by the government as of exceptional investment interest and that meet certain conditions).

Certain customs duties incentives are also available for fishing and industry activities, as well as for, among others, transportation activities and social communication activities.

In addition, tax benefits (IRPC, stamp duty and property transfer tax exemptions) are also available with respect to recovery and insolvency processes.

To promote the regular registration of immovable property in Cape Verde, significant stamp duty and real estate tax exemptions have been introduced.

Certain tax benefits applicable to startups are available, notably a reduction of IRPC, as well as customs duties, VAT and stamp duty exemptions, which are subject to the fulfillment of some conditions.

Corporate shareholders that make cash contributions to the share capital of, among others, startups, and micro and small-sized companies, may benefit from a tax credit limited to 2% of the preceding year's tax liability, provided that certain conditions are met. This regime is not cumulative with the new incentive for the capitalization of companies (see *Notional interest deduction*).

A tax incentive for research and development (R&D) activities was introduced, which, provided all the requirements are met, foresees the possibility of an increment in the deduction of qualified expenses.

Technological companies authorized to operate in the Special Economic Zone for Technological Companies can benefit from a IRPC exemption on profits reinvested.

Resident companies and PEs of foreign companies that perform capital increases in cash in eligible startups or in companies located in a municipality with a low per capita GDP, as well as in micro or small companies, may deduct for tax purposes a portion of such capital contributions up to 2% of the tax liability. This incentive cannot be applied together with the notional interest deduction (see *Notional interest deduction*).

Several incentives exist regarding the creation of jobs and professional internships.

Limitation of benefits. The amount of tax payable cannot be lower than 90% of the amount that would be assessed if the taxpayer did not benefit from certain tax incentives and deduction of tax losses carried forward.

Notional interest deduction. A new incentive for the capitalization of companies was introduced. It consists of an allowance deductible from taxable profit that is available for seven fiscal years. It is computed by the application of a certain rate to the "eligible net equity increases." The "eligible net equity increases" consist of the positive or negative difference between the sum of the "eligible equity increases" (notably share capital increases, including share premium and retention of profits) and the sum of

the "outflows" to shareholders (on reduction of capital, distributions of reserves and retained earnings). The applicable rate from 2024 onward is 10%. In each fiscal year, the deduction shall not exceed CVE20 million. Any excess amount can be carried forward for five years. This regime is not available for financial or insurance entities. Several anti-abuse provisions exist that may prevent the application of the deduction.

Simplified regime of taxation. Micro and small-sized resident companies that have annual turnover not exceeding CVE10 million or no more than 10 employees and that meet certain other conditions may opt to be taxed under a simplified regime of taxation. Companies under the simplified regime of taxation are subject to a rate of 4% levied on the turnover.

Capital gains. Capital gains derived from the sale of investment properties, tangible fixed assets, intangible assets, noncurrent assets held for sale and financial assets are included in taxable income subject to IRPC. The capital gain equals the difference between the sales value, net of expenses incurred on the sale, and the acquisition value, adjusted by depreciation, impairment relevant for tax purposes and an official index.

Fifty percent of the capital gains derived from disposals of certain assets held for more than one year may be exempt if the sales proceeds are invested in tangible fixed assets, intangible assets, investment property and shares during the period beginning one year before the year of the disposal and ending two years after the year of the disposal. A statement of the intention to reinvest the gain must be included in the annual tax return for the year of disposal. The remaining 50% of the net gain derived from the disposal is subject to tax in the year of the disposal.

If only a portion of the proceeds is reinvested, the exemption is reduced proportionally. If, by the end of the second year following the disposal no reinvestment is made, the net capital gain that remains untaxed (50%) is added to taxable profit for that year, increased by 15% and compensatory interest applies. A similar adjustment occurs if the assets in which reinvestment is made are not maintained by the taxpayer for at least two years from year-end of the tax period in which the reinvestment is made.

Losses from the transfer for consideration of shareholdings in tax-haven entities are not allowed as deductions. Losses resulting from shares are also not deductible if the seller has resulted from a transformation, including a change of the business purpose, of an entity for which such losses would not be deductible and if less than three years have elapsed since the date of transformation.

There is also an exclusion from taxable income for capital gains (or losses) realized by resident entities and nonresident entities with a PE in Cape Verde that are derived from the disposal of shares (and other equity instruments), provided the shares have been held for a period of at least 12 months. Such exclusion does not apply to capital gains realized on the transfer of shares acquired from entities domiciled or with a place of effective management in a territory subject to a more favorable tax regime. In addition, the exclusion cannot be applicable if real estate located in Cape Verde accounts for directly or indirectly more than

50% of the assets of the entity whose shares are being transferred.

In addition, an exemption is available for gains realized by nonresident entities without a PE in Cape Verde on the disposal of shares and other securities.

Nonresident companies that do not have a head office, effective management control or a PE in Cape Verde are taxed at a 1% rate on the sales proceeds derived from disposals of real estate, shares and intellectual property. In general, the tax due is paid through withholding tax. Certain gains may be taxed at a 21% rate and require filing of a tax return.

Administration. The tax year is the calendar year.

All companies engaging in activities in Cape Verde must register with the tax department to obtain a taxpayer number. Companies, including foreign companies with a PE in Cape Verde and foreign companies without a PE that had not been subject to withholding tax, must file an annual tax return, together with their financial statements and other documentation, by 31 May in the year following the tax year.

Companies with a head office, effective management control or a PE in Cape Verde must make advance payments of IRPC. Companies whose principal activity is commercial, industrial, agricultural or fishing must make payments in March, August and November of the current tax year. The tax base for the payments is 30%, 30% and 20%, respectively, of the preceding year's tax liability. The tax rate of 21% is applied to this tax base to compute the amount of the advance payment.

Companies with a head office, effective management control or a PE in Cape Verde that have adopted a financial year other than the calendar year must make estimated payments as outlined above, but in the third, seventh and 11th months of their financial year. They must file a tax return by the end of the fifth month following the end of that year.

Companies under the simplified regime of taxation must make advance payments at the end of April, at the end of July, at the end of October and at the end of January of the following year. The IRPC rate of 4% is applied to the preceding quarter's turnover.

If the total amount of the advance payments exceeds the tax due for the tax year, the excess may be carried forward as a tax credit against the tax payable in the following four years or refunded on the occurrence of certain events.

A nonresident company without a PE in Cape Verde must appoint an individual or company, resident in Cape Verde, to represent it with respect to its tax liabilities.

Penalties are imposed for the failure to file tax returns and satisfy other compliance obligations. If, on the final assessment, the tax authorities determine that a further payment is required and that the taxpayer is at fault, interest is imposed on the amount of the additional payment. Fines, which are generally based on the amount of tax due, are also imposed. If the tax due is not paid,

additional interest is imposed from the date of the tax authorities' notice that an additional payment is due.

Binding rulings. The General Tax Code provides the taxpayer the possibility of obtaining a binding ruling. The biding ruling is limited to a certain time period, which is determined on a case-by-case basis by the tax authorities. The ruling is subject to the payment of a fee.

Dividends. Dividends paid by companies to residents and nonresidents are generally subject to withholding tax at rates of 20% and 10%, respectively.

On distributions to resident parent companies, the 20% withholding tax is treated as a payment on account of the final IRPC due.

The 20% rate applies, as a general rule, if dividends are distributed to entities resident in Cape Verde. If the entity distributing the dividends is subject to and not exempt from IRPC, a 0% rate applies.

The 10% rate is exclusively applicable to dividends paid to nonresident entities. Likewise, a 0% rate applies if the distributing entity (resident in Cape Verde) is subject to and not exempt from IRPC.

A resident company or a nonresident company with a PE subject to and not exempt from IRPC may deduct 100% of dividends received from another resident company.

The above regime also applies, under similar conditions, to dividends distributed by foreign affiliates if the underlying profits have been subject to and not exempt from income tax.

If the recipient benefits from a reduced IRPC rate, the recipient may deduct only 50% of the dividends.

If a recipient qualifies for the 100% deduction, the payer of the dividends does not need to withhold tax.

A withholding tax exemption applies to dividends distributed to nonresident companies if the requirements described above are met.

Positive liquidation proceeds are treated as deemed dividends in the portion corresponding to the difference between the liquidation proceeds attributed and the associated capital contributions. Any excess is treated as a capital gain. If the amount is negative, it is treated as a capital loss. Losses from the liquidation of subsidiaries are deductible only if the shares have been held for at least three years.

Foreign tax relief. Foreign-source income is taxable in Cape Verde. However, direct foreign tax may be credited against the Cape Verdean tax liability, limited to the lower of the following amounts:
- The amount of tax incurred in the foreign country
- The amount of IRPC attributable to the foreign-source income

If an applicable double tax treaty reduces the withholding tax rates, the tax credit is limited by the applicable treaty clause. The foreign tax credit cannot be carried forward.

C. Determination of trading income

General. Taxable profit is determined according to the following rules:

- For companies with a head office or effective management control in Cape Verde that are principally engaged in commercial, agricultural or industrial activities, the taxable profit is the net accounting profit calculated in accordance with Cape Verdean generally accepted accounting principles, as adjusted by the IRPC Code.
- For companies with a head office or effective management control in Cape Verde that do not principally engage in commercial, industrial or agricultural activities, the taxable profit is the net total of revenues from various categories of income described in the Personal Tax (Imposto sobre o Rendimento das Pessoas Singulares, or IRPS) Code, less expenses.
- For PEs, the taxable profit is determined as outlined in the first bullet above. In calculating taxable profit, general administrative expenses that are attributable to the PE may be deducted as a cost if justified and acceptable to the tax authorities.

Expenses that are considered essential for the generation or maintenance of profits are deductible. However, certain expenses are not deductible for IRPC purposes including, but not limited to, the following:

- Illicit expenses
- Depreciation and amortization claimed that exceed the rates fixed in the Cape Verdean tax law
- Provisions and impairments (except for those contained in the Cape Verdean tax law)
- IRPC, stand-alone taxes and surcharges
- Penalties and interest charges
- Improperly documented expenses
- Health or personal injury insurance premiums, and expenses or losses with respect to life insurance, contributions to pension funds or supplementary social security systems, except when they are taxed under the IPRS Code or when they are mandatory by law or contracts
- Real estate taxes (except for companies engaged in real estate trading activities)
- Expenses concerning pleasure boats and tourism airplanes, except for those allocated to public transportation companies or used for rental purposes as part of the company's normal activities

Twenty percent of the expenses with personnel with health and illness insurance premiums may be deductible as long as they cover all the employees and have the same coverage for all employees.

Taxpayers with organized accounting may deduct 130% of the costs incurred in the acquisition of water and electricity. A deduction of 130% of the costs is allowed with respect to the certification of products and systems and the acquisition of equipment and software for accounting and invoicing.

Assets under financial leases are deemed to be owned by the lessee. Consequently, the lessee may deduct only applicable tax depreciation and any interest included in the rent payments. Special rules apply to sale-and-leaseback transactions.

Thirty percent of expenses related to passenger or mixed-use vehicles, except when these vehicles are allocated to public service, which are depreciation, rent, insurance, repairs and fuel, and 50% of representation expenses, are not deductible for tax purposes.

Although representation expenses and expenses related to private cars are deductible with some limits, they are subject to a special stand-alone tax at a rate of 10% (this stand-alone tax may not apply in certain cases).

A 10% stand-alone tax rate also applies to tax-deductible daily allowances and compensation for costs incurred by employees when traveling in their own vehicles at the service of the employer if these amounts are not charged to clients and not subject to IRPS.

Undocumented expenses are not deductible. In addition, these expenses are subject to a special stand-alone tax rate of 40%.

A stand-alone tax at a rate of 10% also applies to certain fringe benefits attributed to the employer (if the amount exceeds CVE15,000), which are gifts made to employees, sales of vehicles to employees below market value, travel expenses paid to employees if not related to the company's activities and interest-free or low-interest-rate loans to employees.

The above stand-alone taxes are imposed regardless of whether the company earns a taxable profit or suffers a tax loss in the year in which it incurs the expenses. In addition, all stand-alone tax rates are increased by 10 percentage points if the taxpayer benefits from a privileged tax regime or incurs a tax loss in two consecutive years (with some exceptions).

Inventories. Inventories must be consistently valued by any of the following criteria:

- Effective cost of acquisition or production
- Standard costs in accordance with adequate technical and accounting principles
- Cost of sales less the normal profit margin
- Cost of sales of products cropped from biological assets, which is determined at the time of cropping, less the estimated costs at the point of sale, excluding transportation and other costs required to place the products in the market

Changes in the method of valuation must be justifiable and acceptable to the tax authorities.

Provisions. The following provisions, among others, are deductible:

- Bad and doubtful debts, based on a judicial claim or on an analysis of the accounts receivable
- Inventory losses (inventory values in excess of market value)
- Technical provisions imposed on insurance companies and financial institutions by the competent Cape Verdean regulatory authorities

Depreciation. In general, depreciation is calculated using the straight-line method. The declining-balance method may be used for new tangible fixed assets other than buildings, office furniture and automobiles not used for public transport or rental. Maximum

depreciation rates are established by law. If rates that are less than 50% of the official rates are used, total depreciation will not be achieved over the life of the asset. The following are the principal official straight-line rates.

Asset	Rate (%)
Commercial buildings	3
Industrial buildings	5
Office equipment	12.5 to 33.33
Motor vehicles	12.5 to 20
Plant and machinery	16.66 to 20

Companies may request the prior approval of the tax authorities for the use of depreciation methods other than straight-line, declining-balance or rates increased up to 50%. Approval is granted only if the request is justified by the company's business activities.

Relief for losses. Tax losses may be carried forward without any time limit. The amount deductible each year is capped at 50% of the taxable profit for the year. Loss carrybacks are not allowed.

Companies under the simplified tax regime cannot benefit from the relief for losses. Tax loss carryforwards are forfeited if the taxpayer states a zero annual turnover and does not obtain any income from its normal business activity for two consecutive tax years.

Groups of companies. Resident groups of companies may elect to be taxed on a tax group basis. To qualify for tax grouping, a group must satisfy certain conditions, including the following:

- The parent company must hold, directly or indirectly, at least 75% of the subsidiaries' registered capital, provided that the holding accounts for more than 50% of the voting rights.
- The parent company may not be deemed to be dominated by the other resident company.
- All companies belonging to the group must have their head office and place of effective management in Cape Verde.
- The parent company must hold the participation in the subsidiary for more than one year beginning from the date on which the regime begins to be applied.
- All group companies must be subject to IRPC at the standard rate of 21%.

Applications for consolidated reporting must be filed with the Cape Verdean tax authorities before the end of the third month of the year for which the application is intended to take effect.

Losses of individual group companies may be offset against taxable profit within the consolidated group in accordance with the following rules:

- Losses of individual group companies incurred in years before the tax group can only be offset up to the amount of the taxable profit derived by the company that incurred such losses.
- Tax group losses may be offset against tax group profits only.
- Tax group losses may not be offset against profits generated by companies after they leave the tax group.
- The tax group may not deduct losses incurred by companies after they leave the tax group.

The cap of 50% of the taxable profit with respect to deductible losses also applies for tax group purposes.

The tax group taxable profit equals the sum of the group's companies' taxable profits or losses, as shown in each of the respective tax returns.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; levied on goods and services, other than exempt services	15%
Excise duties	
General rate	10%
Other rates	0% to 50%
Social security contributions; on salaries; paid by	
Employer	16%
Employee	8.5%
Self-employed workers	11%/19.5%
Property transfer tax; payable by purchaser	1.5%
Municipal real estate holding tax; local tax; imposed annually on the assessed tax value of the property on 31 December; tax payable by the owner of the property	1.5%
Stamp duty	
Credit operations	0.5%
Interest on bank loans and bank services	3.5%
Guarantees	0.5%
Insurance premiums	3.5%
Bills of exchange, promissory notes and other negotiable debt securities	0.5%
Notarial acts of registrations and procedures	15%
Administrative acts and contracts	CVE1,000
Touristic contribution; for every overnight stay in a touristic establishment, up to a maximum of 10 nights; children under 16 years old are not subject to this contribution	CVE220 per night
Ecologic charge; imposed on some products imported or produced domestically that are non-biodegradable or made out of metal, glass or plastic; charge varies depending on the quantity or weight of the goods; payable by the local producer or importer; exemptions are available, including packing material used in medicine or for packing essential food, such as corn, rice, sugar, flour and milk	CVE2 to CVE200 per kilogram

E. Foreign-exchange controls

Foreign-exchange controls. The currency in Cape Verde is the escudo (CVE).

Cape Verde imposes foreign-exchange controls in certain situations.

Mergers and reorganizations. Mergers and other type of corporate reorganizations may be tax neutral in Cape Verde if certain conditions are met.

Controlled foreign entities. A Cape Verdean resident owning, directly or indirectly, at least 25% in the capital, voting rights or rights to income or estate of a controlled foreign entity (CFE) is subject to tax on its allocable share of the CFE's net profit or income. For computing the 25% threshold, the capital and rights owned, directly or indirectly, by related parties are also considered.

Several rules, which are based on the nature of the activity and whether the activity is predominantly directed to the Cape Verdean market, may result in the non-imputation of profits or income.

Payments by residents to nonresidents subject to a more favorable tax regime. In general, payments made by Cape Verdean residents to nonresidents subject to a more favorable tax regime as provided by the General Tax Code are not deductible for tax purposes, and the payers are subject to a stand-alone tax rate of 60%. However, these payments may be deducted and are not subject to stand-alone taxation if the payer establishes the following:
- The payments were made in real transactions.
- The payments are normal.
- The amounts of the payments are not unreasonable.

Related-party transactions. For related-party transactions (transactions between parties with a special relationship), the tax authorities may make adjustments to taxable profit that are necessary to reflect transactions on an arm's-length basis.

A special relationship is deemed to exist if one entity has the capacity, directly or indirectly, to influence in a decisive manner the management decisions of another entity. This capacity is deemed to exist in the following relationships:
- Between one entity and its shareholders, or their spouses, ascendants or descendants, if they possess, directly or indirectly, 20% of the capital or voting rights of the entity
- Between two entities in which the same shareholders, their spouses, ascendants or descendants hold, directly or indirectly, a participation of not less than 20% of the capital or voting rights
- Between any entities bound by dominance relations
- Between a nonresident entity and its Cape Verdean PE
- Between a resident entity and an entity located in territory with a favorable tax regime according to the General Tax Code

Foreign PE profits. Transactions between the head office and a foreign PE must respect the arm's-length principle.

Debt-to-equity rules. A limitation to the deduction of interest expenses (net of interest revenues) applies. The tax deduction for net financial expenses is capped by the higher of the following amounts:
- CVE110 million
- 30% of the earnings before interest, taxes, depreciation and amortization

The nondeductible excess, as well as the unused fraction of the 30% threshold, may be carried forward to the following seven years.

It is possible to consider the 30% threshold on a group basis if tax grouping is being applied.

F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %
Macau SAR	10	10	10
Mauritius	0/5 (a)	0/10 (b)	7.5
Portugal	10	0/10 (c)	10
Spain	0/10 (d)	0/5 (e)	5
Non-treaty jurisdictions	0/10	10/20	20

(a) The 5% rate applies if the beneficial owner of the dividends is a resident of a contracting state and owns directly less than 25% of the capital stock of the company paying the dividends.

(b) The 0% rate applies if the debtor or payee is the government of a contracting state, a political or administrative subdivision, a local authority or a statutory body thereof, or if the interest is paid to an institution (including a financial institution) in connection with any financing granted by it under an agreement between the governments of the contracting states.

(c) The 0% rate applies to interest paid by the government of one contracting state or derived by the government of the other contracting state.

(d) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.

(e) The 0% rate applies if any of the following circumstances exist:
- The beneficial owner is the state or the central bank, or a political subdivision or local authority or statutory body.
- The interest is paid by the state in which the interest arises or by a political subdivision or local authority or statutory body thereof.
- The interest is paid with respect to a loan or credit owed to, or granted, made, guaranteed or insured by, the state or a political subdivision, local authority or export financing agency thereof.
- The beneficial owner is a financial institution.
- The interest is paid in connection with the sale on credit of equipment, goods or merchandise, or services.
- The beneficial owner is a pension fund and the income of the fund is exempt from tax.

Cape Verde has also signed double tax treaties with Angola, Equatorial Guinea, Guinea-Bissau, Luxembourg, Morocco, São Tomé and Príncipe, Senegal, and Singapore, but these treaties are not yet in force.

Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	
Dividends	0
Interest	0
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0

B. Taxes on corporate income and gains

The Cayman Islands does not impose taxes on income, profits, wealth or capital gains.

C. Corporate license fees

Ordinary resident company. An ordinary resident company may transact foreign and domestic business from within the Cayman Islands. A Trade and Business License is required if business is to be conducted within the Cayman Islands unless the business is exempted (see Section D). If Caymanians or persons with Cayman status do not own at least 60% of the issued share capital, hold 60% of board positions or otherwise control such a company, the company must also obtain a Local Companies (Control) Act License before it can do business in the Cayman Islands, unless the business is exempt from this requirement.

Incorporation fees range from a minimum of KYD300 to a maximum of KYD500. Annual fees range from a minimum of KYD300 to a maximum of KYD500. The fees are based on authorized capital.

Ordinary nonresident company. An ordinary nonresident company is similar to a resident company, but it is not permitted to conduct business within the Cayman Islands. However, it may transact within the Islands all matters necessary to conduct its business outside the Islands; for example, it can negotiate contracts or open bank accounts.

Incorporation fees range from a minimum of KYD675 to a maximum of KYD915. Annual fees range from a minimum of KYD800 to a maximum of KYD1,040. The fees are based on authorized capital.

Exempted company. An exempted company is the most common form of company used by the offshore investor. An exempted company, similar to an ordinary nonresident company, may not conduct business within the Cayman Islands, but may transact from within the Islands all the matters necessary to conduct its business outside the Islands. An exempted company has certain advantages over an ordinary resident or nonresident company, including the availability of a Tax Exemption Certificate, which make the exempted company attractive to an offshore investor. A Tax Exemption Certificate provides that no law enacted in the Cayman Islands imposing any tax on income, profits, capital gains or appreciations will apply to the exempted company and that no such tax, estate duty or inheritance tax will be payable on or with respect to the shares, debentures or other obligations (or the income derived from such instruments) of the exempted company. The exemptions provided in the certificate are for a renewable 20-year period.

Incorporation fees range from a minimum of KYD700 to a maximum of KYD2,568. Annual fees range from a minimum of KYD825 to a maximum of KYD2,693. The minimum fee applies to companies with authorized capital of up to KYD42,000; the fee increases on a sliding scale for authorized capital in excess of this amount until it reaches the maximum of KYD2,693, which applies to companies with authorized capital exceeding KYD1,640,000.

An exempted company, through its memorandum and articles of association, may be established as a company limited by shares, a company limited by guarantee or a limited duration company (LDC). LDCs may be treated by the authorities of the United States and other jurisdictions as partnerships for tax and other purposes. An exempted company is classified as an LDC if its corporate existence terminates on the happening of one or more specified events and if it has a maximum life of 30 years. If a company limited by shares has more than one share class, it may be established on the basis that some of its classes will have limited liability and some will have unlimited liability. LDCs must pay a fee of KYD200 on registration in addition to the regular fees described above.

D. Miscellaneous matters

Foreign-exchange controls. The currency of the Cayman Islands is the Cayman Islands dollar (KYD). The exchange rate of the US dollar against the Cayman Islands dollar is fixed at USD1.2 = KYD1.

The Cayman Islands has no foreign-currency exchange control regulations.

Business licenses. Unless exempted, every person or company carrying on a trade or business must have an annual license for each place where such trade or business is carried on. The amount of the fee depends on the type and location of the business, as well as on the number and type of employees.

Companies that engage in certain types of business, such as banking and insurance, may be required to be licensed or registered under relevant laws. These laws may expressly eliminate the requirement that a company obtain a Trade or Business License or a Local Companies (Control) Act License.

The following are the annual license renewal fees payable by insurance companies and banks registered in the Cayman Islands.

	Insurance companies (KYD)
Class A (locally incorporated)	75,000
Class A (approved external insurer)	75,000
Class B(I) (at least 95% of the net premiums written originate from the insurer's related business)	8,500
Class B(II) (over 50% of the net premiums written originate from the insurer's related business)	9,500
Class B(III) (50% or less of the net premiums written originate from the insurer's related business)	10,500

	Banking and trust companies (KYD)
Class A (unrestricted)	1,000,000
Class A (restricted)	300,000 or 350,000
Class B (unrestricted)	60,000 to 100,000
Class B (restricted)	37,000 or 40,000

The fees for Class B banking and trust licenses depend on the corporate structure of the relevant bank (the structures are branches, subsidiaries and private/affiliated companies) and slightly higher fees may be payable on the application and grant of the license. Restricted trust companies must pay an annual fee of KYD7,000 for a restricted trust license alone.

Mutual funds and private funds registered or licensed under the Mutual Funds Act and Private Funds Act, respectively, must pay an annual license fee of KYD3,500. Mutual fund administrators must pay the following license renewal fees:

- Restricted license: KYD7,000
- Unrestricted license: KYD30,000 or KYD35,000 (depending on the number of funds under administration)

Company managers and corporate service providers licensed under the Companies Management Act must pay an annual license fee. For managers, the annual license fee ranges from KYD750 to KYD20,000 (depending on the number of companies under management), plus KYD150 per managed company. For corporate service providers, the annual license fee ranges from KYD500 to KYD10,000, plus KYD75 per company.

Entities registered under the Securities Investment Business Act must pay an annual license fee ranging from KYD2,000 to KYD8,000.

Stamp duties. Stamp duties are charged on the sale, liquidation or transfers of real property, leases, mortgages and shares of underlying real estate, and the execution of various other documents within the Cayman Islands. Transfer duty is payable on transfers of shares in Cayman Islands companies that hold real property in the Cayman Islands, subject to certain exemptions.

Common Reporting Standard. On 16 October 2015, the Cayman Islands published The Tax Information Authority (International Tax Compliance) (Common Reporting Standards) Regulations, 2015, for the implementation of the Common Reporting Standards (CRS) Regulations. The CRS Regulations, which entered into force on 1 January 2016, require financial institutions to complete due diligence and reporting on investors, depending on their underlying classifications and tax residency.

Foreign Account Tax Compliance Act. On 29 November 2013, the Cayman Islands and the United States signed and released a Model 1 IGA for the implementation of the US Foreign Account Tax Compliance Act (FATCA). All Cayman Islands financial institutions and trustee documented trusts must comply with FATCA per those regulations and, if required, must report to the local tax authority on the Cayman Department for International Tax Cooperation Portal.

Country-by-Country Reporting. The Cayman Islands has adopted Country-by-Country Reporting (CbCR) in accordance with the Organisation for Economic Co-operation and Development (OECD) Base Erosion and Profit Shifting (BEPS) Action Plan. The CbCR regulations and guidelines were issued in December 2017. The regulations require certain multinationals to submit Country-by-Country Reports to the Cayman Islands tax authority.

Economic substance. As a member of the OECD Inclusive Framework on BEPS, the Cayman Islands enacted the International Tax Co-operation (Economic Substance) Act on 21 December 2018, which is effective from 1 January 2019. Legislation requires "relevant entities" conducting "relevant activities" to complete notifications and reporting on an annual basis and maintain substance in the jurisdiction.

E. Tax treaties

As of February 2024, the Cayman Islands has entered into bilateral tax information arrangements with Argentina, Aruba, Australia, Belgium, Brazil, Canada, China Mainland, Curaçao, the Czech Republic, Denmark, the Faroe Islands, Finland, France, Germany, Greenland, Guernsey, Iceland, India, Ireland, Isle of Man, Italy, Japan, Malta, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, Qatar, Seychelles, Sint Maarten, South Africa, Sweden, the United Kingdom and the United States.

The Cayman Islands has also entered into a double tax treaty with the United Kingdom and is a participating jurisdiction to the Multilateral Convention on Mutual Administrative Assistance in Tax Matters via extension by the United Kingdom.

A. At a glance

Corporate Income Tax Rate (%)	25/30 (a)
Capital Gains Tax Rate (%)	20/30 (b)
Branch Tax Rate (%)	5/10/18 (a)(c)
Withholding Tax (%)	
Dividends	5/10/18 (d)
Interest	5/18 (e)
Royalties from Patents, Know-how, etc.	7.5/18 (f)
Fees for Technical Services, Professional Activities and All Other Services Paid Abroad	7/7.5/18 (g)
Certain Payments to Resident Individuals	7/20 (h)
Rent under Leases Paid to Individuals	15 (i)
Branch Remittance Tax	5/10/18 (j)
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

(a) The minimum tax equals 2% of turnover. For further details, see Section B.
(b) In certain circumstances, the tax is deferred or reduced (see Section B).
(c) An optional final withholding tax is available for CIE Petroleum Contractors and Subcontractors (foreign companies that have entered into subcontracts with oil companies registered in Chad). The rate of this final withholding tax is 18% of the net amount of the contract.
(d) This withholding tax also applies to directors' allowances, nondeductible expenses and adjustments or reinstatements following a tax reassessment. This withholding tax applies to residents and nonresidents. The 5% and 10% rates apply to transactions between Chad and Central African Economic and Monetary Community (Communauté Économique et Monétaire de l'Afrique Centrale, or CEMAC) countries.
(e) The rate of this withholding tax is 20% if the relevant interest is paid to a resident and 18% if it is paid to a nonresident. The 5% rate applies to transactions between Chad and CEMAC countries.
(f) The 7.5% rate applies to transactions between Chad and CEMAC countries.

(g) This withholding tax applies to payments by Chadian resident companies to nonresidents. The 7.5% rate applies to transactions between Chad and CEMAC countries.
(h) This withholding tax applies to payments made to individuals in the self-employed professions, trade intermediaries, door-to-door salespersons and representatives of the law (attorneys, bailiffs and notaries).
(i) The withholding tax rate is 15% if the beneficiary of the landlord is a tax resident or a tax nonresident.
(j) The income subject to tax corresponds to the net profit after corporate income tax. The 5% and 10% rates apply to transactions between Chad and CEMAC countries.

B. Taxes on corporate income and gains

Corporate income tax. Chadian companies are taxed on the territoriality principle. As a result, Chadian companies carrying on a trade or business outside Chad are not taxed in Chad on their foreign-source profits. Chadian companies are those registered in Chad, regardless of the nationalities of their shareholders or where they are managed and controlled. Foreign companies with activities in Chad are subject to Chadian corporate tax on Chadian-source profits.

Under the 2020 Finance Law, income tax in Chad is imposed on undertakings deemed to be operating in Chad, which are the following:
- Undertakings headquartered in Chad or with an effective management office in Chad
- Undertakings that have a permanent establishment in Chad
- Undertakings that have a dependent representative in Chad

The profits of undertakings that do not fulfill the conditions referred to above are taxed in Chad if they carry out activities that form a full business cycle in Chad.

Tax rates. Under the General Tax Code, the standard corporate income tax rate applicable to all companies is a flat rate of 30% of taxable income. Corporate income tax is calculated by applying the tax rate to taxable income, which is based on income reported in the audited financial statements. The corporate tax rate is reduced to 25% for companies operating in the industrial and energy sector.

Oil and gas companies are subject to higher rates.

The minimum tax is paid on a monthly basis at a rate of 2% of the turnover of the previous month. The payment must be made by the 15th day of the month following the month of realization of the turnover.

Sales made by wholesale dealers to individuals are subject to withholding tax at a rate of 4%. Wholesale dealers must pay the amount due to the tax authorities by the 15th day of the following month. Purchases made by companies from individuals are also subject to withholding tax at the same rate.

As of 1 January 2024, a special withholding tax of 7% is introduced with respect to amounts paid by operators in the petroleum, mining, petrochemical and refining sector to resident and nonresident subcontractors in these sectors, whether natural or legal persons. The withholding tax is based on the invoice amount paid. Subcontracting companies are allowed to set off the

withholding tax amounts against the amounts of corporate income tax to be paid at the end of the fiscal year.

Profits realized in Chad by branches of foreign companies are subject to a branch withholding tax of 18% levied on the net profit after corporate income tax. The rate is 5% or 10% if paid to companies located in CEMAC countries.

Newly incorporated companies or new businesses conducted by existing companies can be exempt from corporate income tax for five years if they satisfy the following conditions:
- The newly incorporated company or new business must be operating in specific sectors, which are the industry, mining, agriculture, forestry and real estate sectors.
- The newly incorporated company or new business must demonstrate a particular interest for Chad development.
- The newly incorporated company or new business must not compete in any way with existing companies.
- The newly incorporated company must have a regular accounting conducted in Chad.

If the abovementioned conditions are met, the application can be submitted to the Ministry of Finance and Budget.

As of 1 January 2024, new companies under Chadian law that operate in the fields of agriculture, agro-industry, market gardening, livestock, renewable energies, and information and communication technologies benefit for a period of 10 years, from a 50% reduction in the registration fee and the corporate tax base, and they are exempt from the following:
- The business license fee
- The flat-rate minimum tax
- The flat-rate tax
- The apprenticeship tax

However, the amount of corporate tax paid after the allowance must not be less than 15% of the corporate tax rates in force.

A special tax incentive is granted for newly incorporated companies in the following sectors:
- Agriculture
- Breeding
- Education
- Fishing
- Hotels
- Industry
- Information and communication technologies
- Mining and exploration
- Renewable energies
- Sports
- Tourism
- Transport
- Water

These categories of companies benefit from the following for 10 years from the beginning of their activities:
- 50% reduction of the tax base for corporate income tax.
- 50% reduction of the amount of a business license fee.
- 50% reduction in the registration fee for deeds.

- 50% reduction in the amount of the tax on the value of business premises (TVLP).
- Exemption from value-added tax (VAT) on the acquisition of production tools whose acquisition cost, excluding VAT per unit is equal to or greater than XAF50 million.
- Allowance of 50% of the corporate income tax base on eligible investments. However, the amount of corporate income tax paid after the allowance must be less than 15% of the corporate income tax rates in force.
- Exemption from specific excise duty on production in the territories.
- 50% exemption from IRVM (dividends)

For agropastoral companies, 25% of the minimum tax base is exempt.

To be eligible for the abovementioned benefits, beneficiaries must satisfy the following conditions:
- They must be registered in the register of the Directorate General of Taxes (NIF).
- They must have an exemption certificate issued by the DGI.
- They must be under 35 years of age and have a duly justified financing contract.
- They must make declarations and keep accounts.

Capital gains. Capital gains are taxed at the regular corporate rate. For this purpose, capital gains include gains on the sale of real estate and business assets. However, the tax can be deferred or eliminated in the event of a merger under certain conditions.

From 2024, overall net capital gains realized in Chad or abroad by individuals or legal entities on the sale, even indirect, of shares, bonds or equity interests in companies incorporated under Chadian law are taxed at the capital gain tax rate of 18%.

For a business that is totally or partially transferred or discontinued (such as through a liquidation or sale of the business), only one-third of the net capital gains is taxed if the event occurs more than five years after the beginning or purchase of the business, and only one-half of the gains is taxed if the event occurs within the five years following the beginning or purchase of the business.

Administration. The fiscal year runs from 1 January to 31 December.

Companies must file income tax returns by 30 April of the year following the fiscal year. Late returns are subject to a penalty of 1.5% per month, up to 50% of the tax due. An additional penalty of 100% or 150% applies in case of bad faith or in case of fraud discovered through a tax audit. Corporate income tax must be paid by the deadline for filing tax returns. Late payments are subject to a penalty of 2% per month of delay, excluding the application of an additional penalty.

Companies that started operating during the six-month period before the prescribed closing date of 31 December can report their first results at the end of the fiscal year following the fiscal year in which they began activities.

At the same time as the filing of the annual tax return, the company is required to submit a transfer-pricing report for all transactions carried out with its head office or affiliate entities located

outside Chad. Noncompliance with this transfer-pricing documentation requirement (failure to submit the report or the submission of incomplete or incorrect information) is subject to the following sanctions:

- The rejection of relevant intercompany expenses as deductible costs
- A fine of 5% of the gross amount of the concerned transactions, with a minimum of XAF50 million

Late filing of the transfer-pricing report is subject to a fine of XAF10 million the first month of lateness, XAF 20 million for the second month and XAF25 million for any additional months of lateness beginning with the third month.

The 2022 Finance Law introduced a provision exempting from penalties taxpayers who spontaneously proceed to the regularization of their previous situation regarding taxes, duties and fees before 31 December 2022.

Dividends. Dividends paid to resident individuals in Chad are subject to an 18% withholding tax. Resident individuals must include the gross dividend in taxable income, but they receive a corresponding 18% tax credit to prevent double taxation. Dividends received by resident companies are included in their taxable income and are subject to corporate income tax at the regular rate of 30%. Dividends paid to nonresidents are subject to a final 18% withholding tax.

The participation exemption regime may exempt up to 90% of the dividends received from a 50%-owned subsidiary if the parent company and the subsidiary have their registered offices in a CEMAC Member State. The CEMAC Member States are Cameroon, Central African Republic, Chad, Congo (Republic of), Equatorial Guinea and Gabon.

Foreign tax relief. In general, foreign tax credits are not allowed. The income of residents and nonresidents subject to foreign tax that is not exempt from Chadian tax under the territoriality principle is taxable, net of the foreign tax.

C. Determination of trading income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the Organization for the Harmonization of Business Law in Africa (L'Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA) standard statements.

Business expenses are generally deductible unless specifically excluded by law. Expenses that are not deductible include the following:

- Head office overhead, research costs, and technical, financial and administrative assistance fees paid to nonresidents that exceed 10% of taxable profits before their deduction. Local service providers are not subject to this limitation. This limitation does not apply to technical assistance fees related to the assembly of a factory, which are deductible in their entire amount. In addition, if the payments are made in a tax-haven country or territory, the deductible head office overhead cannot exceed 50% of the gross amount reported as a charge. The tax-haven countries and territories are jurisdictions that are defined with reference to the

prohibited lists of noncooperative or privileged taxation countries and territories published by the Organisation for Economic Co-operation and Development, the European Union or the Minister of Finance of Chad and that do not have a tax treaty with Chad providing for the mutual exchange of information for tax purposes. The privileged taxation countries or territories are defined as those not applying a tax on companies' revenue or those applying a tax rate lower than half of the Chadian corporate income tax rate under the common regime. Interest paid to the head office with respect to intercompany loans are included in the calculation of head office overhead deductible costs.

- Charges from transactions with related parties, if the appropriate transfer-pricing documentation is not filed.
- Rent expenses for movable equipment paid to a shareholder that manages the company in fact or by right and holds, directly or indirectly, more than 10% of the capital.
- Interest paid to shareholders in excess of the central bank annual rate plus two points.
- Commissions and brokerage fees for services on behalf of companies located in Chad that exceed 5% of purchased imports and sales of exports.
- Liberalities, gifts and subsidies exceeding 0.5% of turnover.
- Amounts set aside for self-insurance.
- Certain specific charges (such as contributions other than those for retirement paid to a foreign social security organization, which are deductible up to 15%, and health insurance premiums paid to companies located abroad), gifts, subsidies and penalties (to some extent).
- Expenses paid to local suppliers without reference to a Chadian tax identification number of two parties and expenses paid in cash of XAF500,000 or more.
- Disallowed expenses, such as personal expenses, family expenses, nonbusiness-related expenses, provisions for redundancy for economic purposes and for self-insurance and unsupported expenses.

Inventories. Inventory is normally valued at the acquisition cost or at the lower of cost or market value. Cost must be determined on a weighted-average cost-price method. The first-in, first-out (FIFO) method is also generally acceptable.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Insurance companies may deduct technical provisions provided by the Conférence Interafricaine des Marchés d'Assurance (CIMA) Code to the extent that the General Tax Code does not contain any limitation for such deduction.

Credit institutions may deduct provision for bad debts. Such deduction is limited to 25% for the first year, 50% for the second year and 25% for the third year, if the concerned debt is not covered by a guarantee. If the bad debt is covered by a real guarantee, the deductibility is limited to 15% for the first year, 30% for the second year, 30% for the third year and 25% for the fourth year.

Capital allowances. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by the tax law. Accordingly, if the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed for tax purposes.

Relief for tax losses. Losses may be carried forward for three years. However, losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. The Chadian tax law does not provide for the fiscal integration of Chadian companies equivalent to a consolidated filing position.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on transactions carried out in Chad; certain transactions are exempt	
Standard rate	19.25
Reduced rate	9.9
Exports	0
African Union Tax; on imports from outside Africa	0.2
Business license; rate varies depending on the amount of turnover	Various
Registration duties, on transfers of real property or businesses	3 to 10
Social security contributions on an employee's annual gross salary, limited to XAF6 million	
Family allowances, paid by employer	7.5
Old age, disability and survivor's pension; paid by	
Employer	5
Employee	3.5
For job-related accidents; paid by employer	4
Inclusive tax; on gross salary and effective value of benefits in kind; paid by employer	7.5
Training tax; on gross salary and effective value of benefits in kind; paid by employer	1.2

E. Foreign-exchange controls

Exchange-control regulations exist in Chad for financial transfers outside the franc zone, which is the monetary zone that includes France and its former overseas colonies. A CEMAC rule (No. 02/18/CEMAC/UMAC/CM, dated 21 December 2018) applies to all of the CEMAC countries.

F. Treaty withholding tax rates

Chad has a limited tax treaty network. Chad has only entered into the CEMAC multilateral tax treaty, dated 13 December 1966 and revised in March 2019. Under this treaty, the following are the withholding tax rates.

	Dividends %	Interest %	Royalties %
Cameroon	5/10*	5*	7.5*
Central African Republic	5/10*	5*	7.5*
Congo (Republic of)	5/10*	5*	7.5*
Equatorial Guinea	5/10*	5*	7.5*
Gabon	5/10*	5*	7.5*
Non-treaty jurisdictions	18	18	18

* Payments from a Chadian source are subject to withholding tax under Chadian domestic tax law.

A. At a glance

Corporate Income Tax Rate (%)	27 (a)
Capital Gains Tax Rate (%)	27/35 (b)
Branch Tax Rate (%)	27 (a)
Withholding Tax (%)	
Dividends	35 (a)(c)(d)
Interest	35 (c)(e)
Royalties from Patents, Trademarks, Formulas and Similar Items	0/15/20/30 (c)(f)
Technical Services	0/15/20 (g)
Other Fees and Compensation for Services Rendered Abroad	35 (c)
Branch Remittance Tax	35 (a)(h)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

(a) For further details, see Section B.

(b) For domestic operations between two Chilean residents, capital gains are subject to income tax under general provisions (27% rate). Capital gains derived by nonresidents are subject to the general 35% withholding tax rate (treaty provisions may lower the rate).

(c) The tax applies to payments to nonresidents.

(d) The 35% tax applies to the amount of the grossed-up dividend. One hundred percent of the corporate tax paid by the company can be used as a credit against the withholding tax if the shareholder is a resident in a treaty jurisdiction. In the case of non-treaty jurisdictions, only 65% of the corporate tax credit may be used (resulting in a 44.45% effective tax burden).

(e) A reduced rate of 4% applies to certain interest payments including, but not limited to, interest paid on loans granted by foreign banks, insurance companies and financial institutions, and interest paid with respect to import operations. The 4% rate depends on whether the company meets a certain thin-capitalization standard.

(f) No withholding tax is imposed on payments related to standard software if certain requirements are met. A reduced withholding tax rate of 15% applies to payments with respect to the following:
- Invention patents
- Models
- Industrial drawings and designs
- Layout sketches or layouts of integrated circuits
- New vegetable patents
- Use or exploitation of computer programs (software)

The reduced tax rate does not apply to payments made to companies resident in jurisdictions considered to be preferential regimes. As a result, the withholding tax rate for such payments is 30%. A reduced withholding tax rate of 20% applies to payments for television broadcasting and cinematographic materials.

(g) A 15% rate applies to payments for engineering, technical assistance, professional and other technical services rendered in Chile or abroad. However, if the payments are being made to a company domiciled in a jurisdiction considered to be a preferential regime, the withholding tax rate is 20%. Exceptionally, payments abroad made as consideration for technical assistance may be exempted from withholding tax if ruled by the Customs agency to be linked to the exportation of services.

(h) The 35% tax applies to the amount of the grossed-up dividend. One hundred percent of the corporate tax paid by the branch can be used as a credit against the withholding tax if the shareholder is a resident in a treaty jurisdiction. In the case of non-treaty jurisdictions, only 65% of the corporate tax credit may be used (resulting in a 44.45% effective tax burden).

B. Taxes on corporate income and gains

Corporate income tax. Chilean resident entities and branches of foreign entities are subject to income tax on their income from worldwide sources. A resident entity is one that is incorporated in Chile. Corporate income tax is applied annually to accrued net income, with the exception of foreign-source income, which is generally computed on a cash basis. Taxable results of foreign branches and passive income of controlled foreign corporations (see Section E) are recognized on an accrual basis.

Rates of corporate tax. The corporate income tax rate is 27%. Small and medium-sized entities (SMEs) are subject to corporate income tax at a rate of 25%.

Corporate tax paid by a company is creditable against the withholding tax applicable to the distribution of profits to the company's partners or shareholders. The amount of the credit (100% or 65% of the paid corporate income tax) depends on several factors. One hundred percent of the corporate tax credit is available only to shareholders of SMEs and residents of jurisdictions that have a double tax treaty in force with Chile (see below).

Dividends. Dividends received from foreign subsidiaries are taxed as ordinary income. A foreign tax credit is available with respect to such dividends.

Dividend distributions between resident entities are exempt from tax.

Dividends paid by a Chilean company to a nonresident shareholder or partner (entity or individual) are subject to a 35% withholding tax.

Corporate tax paid by the company is creditable against the dividend withholding tax.

For distributions abroad, it is possible to use 100% of corporate tax paid by the company (27%) with the following distinctions:

- On dividend distributions to shareholders or partners who are resident in a non-tax treaty jurisdiction, 35% of the corporate tax credit is not available to be used (in the manner of a higher resulting withholding tax), which translates to an overall tax of 44.45%.
- On dividend distributions to shareholders or partners resident of a tax treaty jurisdiction, no corporate tax credit reduction is applicable, which translates to an overall tax of 35%.

For these purposes (that is, the reduction of 35% of the corporate tax credit depending on jurisdiction of residence of shareholder

or partner), tax treaties signed before 1 January 2020 but not yet enforced will be deemed valid tax treaties until 2026.

For SMEs, it is possible to use 100% of the corporate tax paid by the company with no corporate tax credit reduction, regardless of the jurisdiction of the residence of the shareholder or partner (overall corporate tax of 35%).

This withholding tax rate and structure is not reduced or otherwise modified by Article 10 of valid tax treaties ("the Chile clause").

Mining Royalty. The Mining Royalty comprises the following two components:
- The Ad-Valorem Component
- The Mining Margin Component

The above components are calculated based on the sales volume and the type of minerals extracted.

The sum of these components forms the Mining Royalty. However, this amount is subject to a cap due to a maximum taxation threshold, which takes into account the Mining Royalty, corporate income taxes, and final taxes. The components are discussed below.

Ad Valorem Component. Mining exploiters with annual copper sales exceeding 50,000 metric tons of fine copper (MTFC) are subject to a 1% rate on its sales. This rate specifically applies to revenues derived solely from copper sales, excluding those from other minerals (such as molybdenum, silver and gold).

Margin Component. Mining exploiters whose income derives 50% or more from copper sales and whose sales are equivalent to more than 50,000 MTFC are subject to progressive and marginal tax rates ranging from 8% to 26%. The applicable rate within this range is determined based on the Mining Operating Margin (MOM) of the taxpayer. However, this component does not apply if the Adjusted Mining Operational Taxable Income (RIOMA; the acronym for the Spanish translation) is negative. The RIOMA is determined by taking the corporate income tax base with certain adjustments, so that it reflects only the mining operational taxable income.

Mining exploiters whose income derives less than 50% from copper sales is subject to the following tax rates based on their annual sales:
- Up to the equivalent of 12,000 MTFC: exempt
- More than the equivalent of 12,000 MTFC but not exceeding 50,000 MTFC: tax rate ranges between 0.4% and 4.4%
- More than the equivalent of 50,000 MTFC: progressive tax rates ranging from 5% and 14%, depending on the MOM

Mining exploiters shall apply the respective tax rates over the RIOMA.

Cap. The Mining Royalty is also subject to a cap equal to the combined tax burden of the corporate income tax, the Mining Royalty, and shareholder taxation on profits distributions. If the maximum potential tax burden exceeds such cap, the Mining Royalty is reduced accordingly. Such limit will be set at 46.5% for exploiters with annual sales equal or greater than the

equivalent to 80,000 MTFC and at 45.5% for exploiters with annual sales lower than the equivalent to 80,000 MTFC.

Capital gains. In general, capital gains recognized by foreign investors are subject to a 35% tax. As a general rule, direct or indirect transfers of Chilean shares must be done at fair market value.

Transfers of shares of companies listed on the stock exchange are subject to a sole tax of 10%. Institutional investors are exempt from income tax under certain conditions. Under certain double tax treaties, the tax rate on capital gains related to direct transfer of shares may be reduced to 20%, 17% or 16%.

Indirect transfers of Chilean shares are subject to capital gains tax at a rate of 35% if a nonresident entity transfers its indirect interest in Chile under either of the following conditions:

- The nonresident seller transfers at least 10% of its shares in the indirect holding entity and either of the following circumstances exists:
  - — At least 20% of the fair market value of the total shares held by the seller derives from the fair market value of the Chilean underlying assets.
  - — If, at the date of the transfer, the fair market value of Chilean underlying assets is equal to or greater than approximately USD180 million proportionally.
- The seller is incorporated in a jurisdiction considered preferential (with certain exceptions).

Tax-free reorganization rules (among the same economic group) are available for both direct and indirect transfers if certain requirements are met.

Administration. All accounting periods in Chile must end on 31 December. Income taxes must be paid during the month of April.

Provisional payments on account of final annual income tax are due on a monthly basis.

Foreign tax relief. A foreign tax credit may be claimed up to a limit of 35% of the foreign-source income, depending on the nature of the income and the existence of a tax treaty.

C. Determination of trading income

General. Taxable income, determined in accordance with generally accepted accounting principles, includes all profits, with the exception of specified items that are not considered income for tax purposes.

In general, all expenses that have the capability of producing income (in the corresponding calendar year or potentially in the future), duly sustained and justified, may be deducted to determine taxable income. Disbursements related to transaction contracts between unrelated parties (to prevent litigation or settle an existing one) are deductible. A bad debt over 365 days between unrelated parties is deductible.

Interest associated with investment in Chilean companies is deductible for corporate tax purposes.

In general terms, expenses are deducted on an accrual basis. However, cross-border disbursements to foreign related parties are deductible on a cash basis and only after the respective withholding tax is declared and paid.

Royalty payments to a related party abroad (a relationship strictly for the purposes of the application of this rule) may be subject to additional deductibility restrictions.

Inventories. For inventory valuation, the first-in, first-out (FIFO) method and the weighted average cost method are accepted by law. A corresponding monetary correction (inflation adjustment) must be added to cost.

Monetary correction. The Income Tax Law contains monetary adjustment rules to reflect inflation in tax accounting. These rules, known as monetary correction, require taxpayers to revalue certain assets and liabilities annually based on the changes reflected in the consumer price index (CPI) and in foreign-exchange rates. The different indices that are used to adjust assets and liabilities may result in taxable profits or losses.

The following adjustments must be made for monetary correction purposes:

- The initial net value of fixed tangible assets is restated based on the change in the CPI, which is fixed monthly by the National Statistical Service. Depreciation is computed on the value of the assets after restatement.
- Inventories existing at the balance-sheet date are restated to their replacement cost.
- Credits, rights and liabilities that are in a foreign currency or linked to price indices are adjusted based on the change in the foreign-exchange rate or the relevant index. Investments in foreign entities are treated as foreign-currency denominated assets.

Depreciation. Depreciation must be calculated using the straight-line method. The tax authority has established the following normal periods of depreciation.

Manufacturing industry and trade	**Years**
Machinery	15
Heavy tools	8
Light tools	3
General installations	10

Manufacturing industry and trade	**Years**
Trucks	7
Cars, pickups, station wagons and buses	7
Computers, computer systems, peripherals and similar items	6

Building and mining industries	**Years**
Solid buildings	80
Semisolid buildings	20 to 50
Buildings of light materials	10
Bulldozers, tractors, Caterpillars and other machines employed in heavy construction	8
Drilling equipment, internal combustion engines, soldering equipment and similar equipment	6
Machines employed in mining activities (general rate)	9

Annual depreciation rates must be applied after the revaluation of fixed assets according to the rules of monetary correction (see *Monetary correction*). Accelerated depreciation may be applied to new or imported fixed assets and to imported fixed assets with normal useful lives of three years or more. The accelerated method allows the calculation of depreciation based on a useful life for an asset equivalent to one-third of the normal useful life established by the Chilean tax authorities. However, accelerated depreciation may be used only in determining trading income for corporate tax purposes.

One hundred percent of the value of fixed assets acquired during the period of 1 June 2020 to 31 December 2022 may be claimed as depreciation in the first year of the assets' useful life. Other transitory depreciation regimes and depreciation benefits are available depending on the size of the company and nature of the assets.

Relief for losses. Losses may be carried forward without a time limit. If a qualified change of ownership occurs, accumulated tax losses may not be deducted from income generated after the ownership change.

The carryback of losses is not available.

D. Value-added tax

Value-added tax (VAT) applies to sales and other transactions regarding tangible personal property, as well as to payments for all types of services, except those expressly exempted in the law. It also applies to the habitual sale of real estate. The general tax rate is 19%. VAT is imposed under a credit-debit system.

E. Miscellaneous matters

Foreign-exchange controls. The Central Bank of Chile must be informed of all transactions exceeding USD10,000. Other annual information requirements are imposed.

Taxpayers must report annually (by a sworn statement that must be filed each year) their permanent investments in foreign companies, investments in foreign branches and details regarding their foreign-source income.

Individuals or entities domiciled or resident in Chile must inform the Chilean Internal Revenue Service (IRS) if they become trustees or administrators of trusts created in accordance with foreign law.

Transfer pricing. Chilean transfer-pricing regulations are in line with the Organisation for Economic Co-operation and Development (OECD) guidelines.

Acceptable transfer-pricing methods include the following:
- Comparable uncontrolled price
- Resale price
- Cost-plus
- Profit-split
- Transactional net margin

Any other method may be used if none of the above methods applies to the transaction. The most suitable method should be used, taking into account the facts and circumstances of each related-party transaction.

Taxpayers must file an annual sworn statement identifying related-party transactions and transfer-pricing methods, and providing other information requested by the Chilean IRS through regulations. In addition, taxpayers must keep all relevant information supporting compliance with the transfer-pricing rules.

County-by-Country (CbC) regulations have been in force in Chile since 2017.

In addition, Master File and Local File Sworn Statements must be submitted to the Chilean IRS if certain conditions are met.

Debt-to-equity rules. Excess indebtedness exists if the "debt" of a Chilean entity exceeds three times its tax equity (*capital propio tributario*; financial equity with certain adjustments). "Debt" includes all debt, regardless of whether it is foreign or local or related or unrelated, as well as the debt at the level of the company's permanent establishments abroad.

If excess indebtedness is triggered, a 35% surtax applies on interest if both of the following circumstances exist:
- The interest is paid abroad due to related-party (or deemed related-party) debt.
- The interest benefits from a reduced withholding tax rate (4% under domestic law or tax treaty rate).

In this case, the applied withholding tax may be used as a credit by the Chilean debtor who must bear the 35% penalty tax. The concept of relationship also includes any type of guarantee.

Controlled foreign corporations. In general, foreign-source income is taxed on a cash basis. However, under the controlled foreign corporation (CFC) rules, Chilean resident taxpayers are taxed on an accrual basis on passive income received or accrued by a CFC.

Under the CFC rules, passive income includes the following:
- Dividends or profit distributions from non-controlled entities
- Interest (unless the controlled entity is a bank or financial institution)
- Royalties (unless derived from research and development projects)
- Capital gains
- Income from the lease of real property (unless the exploitation of real property is the principal activity of the controlled entity)
- Income from the assignment of certain assets
- Specified Chilean-source income

Control of a foreign entity is deemed to exist in any of the following circumstances:
- 50% or more of the capital, profit or voting rights is directly or indirectly owned by a Chilean taxpayer.
- The Chilean taxpayer has a decisive influence on the administration of the foreign entity.
- The foreign entity is domiciled in a country or territory with a preferential tax regime, unless proven otherwise (that is, a

foreign entity is deemed controlled if it is domiciled in a tax haven or preferred jurisdiction, unless the Chilean taxpayer demonstrates that it does not control it).

F. Treaty withholding tax rates

The table below lists the withholding tax rates under the Chilean treaties in force. All of these treaties are based on the OECD model convention.

	Dividends %	Interest (f) %	Patent and know-how royalties %
Argentina	10/15 (a)	4/12 (b)(d)	3/10/15
Australia	15 (a)	5/10 (b)(d)	5/10 (c)
Austria	15 (a)	4/5/10 (b)(d)	2/10 (c)(d)
Belgium	15 (a)	4/5/15 (b)	5/10 (c)
Brazil	10/15 (a)	15	15
Canada	10/15 (a)	10 (b)(d)	10 (c)(d)
China Mainland	10 (a)	4/10 (b)(d)	2/10
Colombia	0/7 (a)	5/15	10 (c)
Croatia	5/15 (a)	5/15	5/10
Czech Republic	15 (a)	4/10 (b)(d)	5/10
Denmark	5/15 (a)	4/5/10 (b)(d)	2/10 (c)(d)
Ecuador	5/15 (a)	4/10 (b)(d)	10 (c)
France	15 (a)	4/5/10 (b)(d)	2/10 (c)(d)
India	10 (a)	10	10
Ireland	5/15 (a)	4/5/10 (b)(d)	2/10 (c)(d)
Italy	5/10 (a)	4/10 (b)(d)	2/10 (c)(d)
Japan	5/15 (a)	4/10 (b)	2/10 (c)
Korea (South)	5/10 (a)	4/5/10 (b)(d)	2/10 (c)(d)
Malaysia	5/15 (a)	15 (b)	10
Mexico	5/10 (a)	5/10 (b)(d)	10 (c)(d)
Netherlands	5/15 (a)	4/10 (b)	2/10 (d)
New Zealand	15 (a)	10 (b)	5/10 (c)
Norway	5/15 (a)	4/5/10 (b)(d)	2/10 (c)(d)
Paraguay	10 (a)	10/15 (b)	15 (c)
Peru	10/15 (a)	15	15 (c)
Poland	5/15 (a)	4/5/10 (b)(d)	2/10 (c)(d)
Portugal	10/15 (a)	5/15 (b)	5/10 (c)
Russian Federation	5/10 (a)	15	5/10
South Africa	5/15 (a)	5/15	5/10
Spain	5/10 (a)	4/5/10 (b)(d)	2/10 (c)(d)
Sweden	5/10 (a)	4/5/10 (b)(d)	2/10 (c)(d)
Switzerland	15 (a)	4/5/10 (b)(d)	2/10 (c)(d)
Thailand	10 (a)	10/15	10/15
United Arab Emirates	5/10 (a)	4/10	2/10
United Kingdom	5/15 (a)	4/5/10 (b)(d)	2/10 (c)(d)
United States	5/15 (a)	4/10/15	2/10
Uruguay	5/15 (a)	4/15 (b)	10
Non-treaty jurisdictions	35 (f)	4/35 (g)	15/30 (e)

(a) With respect to Chile, the treaty withholding tax rates for dividends do not apply to the 35% withholding tax applicable under domestic law as long as the corporate tax is creditable against the withholding tax. The 35% tax applies to the amount of the grossed-up dividend. One hundred percent of the corporate tax paid by the Chilean company is creditable against the withholding tax borne by a nonresident shareholder.

(b) These treaties have a most-favored nation (MFN) clause with respect to interest.

(c) These treaties have an MFN clause with respect to royalties. In the case of the Peru treaty, the clause applies after a five-year period beginning on the effective date of the Chile-Peru treaty.

(d) The rates have been expressly ratified by respective countries as a result of the applicability of an MFN clause.

(e) The withholding tax rate is reduced to 15% for payments with respect to the following:
- Invention patents
- Models
- Industrial drawings and designs
- Layout sketches or layouts of integrated circuits
- New vegetable patents
- The use or exploitation of computer programs (software)

The reduced tax rate does not apply to payments made to companies resident in jurisdictions considered to be preferential regimes. The withholding tax rate for such payments is 30%.

(f) The 35% tax applies to the amount of the grossed-up dividend. Up to 100% of the corporate tax paid by the Chilean company is creditable against the withholding tax borne by the nonresident shareholder, depending on the tax regime of the Chilean company.

(g) Under Chilean domestic law, a reduced 4% tax rate applies to the following interest payments:
- Interest paid on loans granted by foreign banks, financial institutions and insurance companies
- Interest paid on bonds
- Interest paid with respect to import operations

This chapter refers only to the taxation of entities under the tax laws of the Mainland China tax jurisdiction.

A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	25 (a)
Branch Tax Rate (%)	25
Withholding Tax (%) (b)	
Dividends	10 (c)
Interest	10
Royalties from Patents, Know-how, etc.	10
Branch Remittance Tax	0

Net Operating Losses (Years)	
Carryback	0
Carryforward	5/10 (d)

(a) Capital gains derived by foreign enterprises from disposals of interests in foreign investment enterprises are subject to a final withholding tax of 10% instead of income tax. This rate may be reduced by applicable tax treaties.
(b) The statutory rate is 20%, which is reduced to 10% by the Enterprise Income Tax Law Implementation Regulations.
(c) Effective from 1 January 2017, foreign investors are eligible for dividend withholding tax deferral treatment if they directly reinvest the attributable or distributable profits from its Chinese tax resident investees or portfolio companies in China, subject to meeting certain required conditions (see Section B).
(d) Effective from 1 January 2018, for qualifying High and New Technology Enterprises (HNTEs) and technology-based small and medium-sized enterprises, the time period for carrying forward net operating losses can be extended to 10 years (see Section C).

B. Taxes on corporate income and gains

Corporate income tax. Corporate residents of China are taxed on their worldwide income, including income from business operations, investment and other sources. A foreign tax credit is allowed for income taxes paid in other countries. This credit is capped at the China income tax payable on the same income calculated under the corporate income tax law.

In general, a company is regarded as tax resident in China if it is incorporated in China or effectively managed in China. "Effective management" is defined as overall management and control over the production, business, personnel, accounting, and assets of a company.

Nonresident companies are taxed on China-source income only. However, if the nonresident company has an establishment in China, non-China source income effectively connected with the China establishment is also taxed.

The term "establishment" is broadly defined to include the following:
- A place of management
- A branch
- An office
- A factory
- A workshop
- A mine or an oil and gas well or any other place of extraction of natural resources
- A building site
- A construction, assembly, installation or exploration project
- A place for the provision of labor services
- A business agent

Rates of corporate tax. The statutory rate of enterprise income tax is 25%. The withholding tax rate on passive income (including dividends, interest, royalties and capital gains) of non-China tax residents is 10%.

A reduced tax rate applies to the following enterprises, subject to the satisfaction of certain conditions:
- During the period from 1 January 2022 to 31 December 2024, for qualifying small and less-profitable enterprises, a 20% rate and 75% reduction of annual taxable income apply to the annual

taxable income exceeding CNY1 million but not exceeding CNY3 million. A qualifying small and less-profitable enterprise refers to an enterprise that is engaged in an industry not restricted or prohibited by China and that meets the following three conditions:
— Its annual taxable income does not exceed CNY3 million.
— The number of its employees does not exceed 300.
— Its total assets do not exceed CNY50 million.
- 15% for HNTEs.
- 15% for qualifying Technologically Advanced Service Companies nationwide (effective from 1 January 2017). Effective from 1 January 2018, companies engaging in the service trade should refer to the Scope of Recognition of Technology Advanced Services for Service Trade as stipulated in the attachment of Circular Caishui [2018] No. 44.
- 10% for key software enterprises, key animation and comics enterprises and integrated circuit designing enterprises.
- 15% for western region enterprises and enterprises in Ganzhou in Jiangxi Province engaging in and deriving 60% of their total income from certain encouraged industries as stipulated in a new western region catalog (from 1 January 2021 to 31 December 2030).
- 15% for qualifying enterprises that are registered in the Guangdong-Macao In-depth Cooperation Zone in Hengqin, the Fujian Pingtan Comprehensive Pilot Zone (Pingtan) or the Qianhai Shenzhen-Hong Kong Modern Service Industry Cooperation Zone (Qianhai) (for further details, see below).
- 15% for qualifying enterprises in encouraged industries registered in the Hainan Free Trade Port and engaged in substantive operations.
- 15% for qualifying third-party enterprises that are engaged in pollution prevention and abatement as entrusted by pollution-discharging enterprises or governments.

Tax incentives. A five-year tax holiday (exemption for the first two years and 50% reduction for the next three years) is granted to newly established and qualified HNTEs that are incorporated after 1 January 2008 and that are located in the Shanghai Pudong New Area or one of the five Special Economic Zones (SEZs), which are Hainan Province, Shantou, Shenzhen and Zhuhai in the Guangdong Province, and Xiamen in the Fujian Province.

A five-year tax holiday also applies to qualifying software enterprises, animation and comics enterprises, integrated circuit designing enterprises and qualified integrated circuit production enterprises (or qualified projects in which investments are made on or after 1 January 2018).

For qualified integrated circuit production enterprises (or qualified projects), the tax holiday can be extended to 10 years (up to an exemption for 10 years) under certain conditions. The five-year or 10-year tax holiday starts from the tax year in which a qualifying enterprise begins making profits or when a qualifying project generates its first business operating income. If a software enterprise, animation and comics enterprise or integrated circuit designing or production enterprise cannot satisfy the relevant requirements in a profit-making tax year, the enterprise enjoys the remaining tax holiday from its initial tax year in which

it satisfies the relevant requirements. If qualifying integrated circuit designing enterprises and software enterprises did not have their first profit-making year by 2019, they can enjoy the above tax holiday subject to the newest requirements as listed in the regulations issued in 2020. Qualifying integrated circuit designing enterprises and software enterprises enjoying the tax holiday pursuant to the policies issued prior to 2020 are eligible for the original tax holiday or the newly regulated tax holiday (if more beneficial), provided that they also meet the provisions of the newly issued regulations.

Effective from 1 January 2020 to 31 December 2024, qualified income derived by enterprises in the tourism industry, modern service industry and high-tech industry established in the Hainan Free Trade Port from newly increased overseas direct investment may be exempted from corporate income tax.

Effective from 1 January 2020, eligible corporate enterprises that engage in relevant products (technology) business of the core links in such key areas as integrated circuits, artificial intelligence, biomedicine and civil aviation in the Lingang New Area in Shanghai and that carry out a substantive production or research and development (R&D) activities are subject to the enterprise income tax at a reduced rate of 15% within five years from the date of their establishment.

During the period from 2021 to 2030, certain specified industries in selected areas of Xinjiang, such as agriculture and forestry, irrigation, coal production and related industries, electricity, new energy, oil and gas, production of certain metals and related industries, petrochemical, pharmaceutical, transportation, modern logistics, environmental protection and resources conservation, can also benefit from a five-year tax holiday based on the statutory rate of 25%. A five-year exemption, starting from the year enterprises generate their first business operating income, applies to qualifying enterprises located in the Kashi and Huoerguosi Special Economic Development Zones of Xinjiang.

During the period of 1 January 2021 through 31 December 2025, enterprises that are established in Pingtan or Qianhai (the covered areas) and that engage in encouraged industries can be subject to a reduced corporate income tax rate of 15%. Enterprises engaging in encouraged industries are enterprises that satisfy the following conditions:

- They have their core businesses in the covered area.
- Their businesses relate to industries and projects stipulated in preferential corporate income tax catalogs.
- Their income derived from such core businesses account for more than 60% of their total income.

Effective from 1 January 2021, industrial enterprises that are established in Guangdong-Macao In-depth Cooperation Zone in Hengqin and that satisfy certain criteria can be subject to a reduced corporate income tax rate of 15%. Enterprises entitled to this preferential policy are enterprises that satisfy the following criteria:

- They have their core businesses in the covered area.

- Their businesses relate to industries and projects stipulated in preferential corporate income tax catalogs.
- Their income derived from such core businesses account for more than 60% of their total income.

Effective from 1 January 2021, income derived by enterprises in the tourism industry, modern service industry and high-tech industry established in the Guangdong-Macao In-depth Cooperation Zone in Hengqin from newly increased overseas direct investment shall be exempted from corporate income tax. Income derived from newly increased overseas direct investment must satisfy the following criteria:

- Business profit is obtained from the newly established overseas branches or dividend income corresponding to the newly increased overseas direct investment is obtained from the overseas subsidiaries in which more than 20% (inclusive) of the shares are held.
- The statutory corporate income tax rate of the invested country (region) is not less than 5%.

Effective from 1 January 2023, China temporarily has raised the general pretax super deductions rate from 175% to 200% on an expanded scope of qualifying research and development expenditures (RDEs) incurred by China tax resident enterprises during the year; alternatively, if related qualifying RDEs are incurred for developing intangible assets, the companies may amortize the capitalized intangible assets based on 200% (also increased from the general super deduction rate of 175%) of the actual cost incurred on developing the intangible assets. The super deduction rate for the integrated circuit enterprises and industrial master machine enterprises was increased to 220% from 1 January 2023 to 31 December 2027.

Effective from 1 January 2018, when an enterprise outsources its R&D activities to overseas entities (not including overseas individuals), the enterprise as consignor is eligible for a 100% super deduction based on 80% of expenses incurred for the R&D activities outsourced to overseas entities, provided that the expenses do not exceed two-thirds of the enterprise's total eligible R&D expenses incurred domestically. The actual amount of R&D expenses should be determined in accordance with the arm's-length principle. If the consignor and consignee are related parties, the consignee should provide the consignor with detailed R&D expense statements. The corporate income tax super deduction for expenses incurred for outsourcing R&D activities to overseas entities was not allowed under the rules.

Other tax incentives are available to enterprises engaged in industries, projects, or activities encouraged by national policies. The incentives granted to these encouraged industries, projects and activities typically include the following:

- Income from agriculture, forestry, animal husbandry and fishery projects is eligible for a full tax exemption or 50% reduction of tax, depending on the type of projects.
- Income from infrastructure projects is eligible for a full tax exemption for the first three years and a 50% reduction of tax for the next three years beginning with the first income-generating

year. If certain requirements are met, enterprises that invest in a qualifying public infrastructure project and are approved to perform the project in phases are allowed to calculate the corporate income tax based on the taxable income of each phase and enjoy the tax holiday for different phases of the project separately.
- Income from environmental protection or water or energy conservation projects is eligible for a full tax exemption for the first three years and 50% reduction of tax for the following three years.
- Income from technology transfer is eligible for a tax exemption for the first CNY5 million and a 50% reduction for the amount over that threshold.
- 200% of qualified wages for disabled people can be tax deductible.
- A venture capital company that makes equity investments in qualifying fledgling science and technology enterprises (QFSTEs) for at least 2 years (or 24 months) may offset 70% of its investments against its taxable income. Any excess amount can be carried forward and offset against the taxable income in the subsequent tax years.
- A corporate partner of limited partnership venture capital companies (LPVCCs) that makes equity investments in QFSTEs for at least 2 years (or 24 months) may offset 70% of its investments against its taxable income generated from the LPVCC. Any excess amount can be carried forward and offset against the taxable income generated from the LPVCC by the corporate partner in the following tax years.
- Income derived from recycling business is eligible for a 10% reduction in calculating taxable income.
- Income derived from the provision of community care, childcare and housekeeping services is eligible for a 10% reduction in calculating taxable income from 1 June 2019 to 31 December 2025.
- Interest income derived by company investors from railway bonds issued by China Railway Corporation during the period from 2024 to 2027 is eligible for a 50% reduction in calculating taxable income.
- 10% of the cost incurred in purchasing environmental protection, water and energy saving or production safety equipment can be credited against income tax payable for the year of the purchase.

Capital gains and losses. In general, capital gains and losses are treated in the same manner as other taxable income and losses, and are taxed at the normal income tax rate of 25%. However, China-source capital gains derived by nonresident enterprises, such as gains from the disposal of a foreign investment enterprise (FIE), are subject to a 10% withholding tax. In addition to income tax, real property gains tax is imposed on gains derived from transfers of real properties (see Section D).

Administration. The tax year in China is the calendar year.

An annual corporate income tax return, together with audited financial statements issued by a certified public accountant registered in China and a set of annual reporting forms for related-party transactions, is due within five months after the end of the tax year. Enterprises must settle all outstanding tax liabilities within the same period.

In addition, enterprises must also file quarterly provisional corporate income tax returns within 15 days after the end of each quarter, together with payments of provisional tax based on actual profits. If an enterprise has difficulty in filing a provisional tax return based on the actual quarterly profits, it may pay tax based on estimated profits. The estimated profits are normally computed by reference to one-quarter of the enterprise's actual taxable profits for the preceding year. Otherwise, they are computed under other methods approved by the tax bureau.

Late filing or late payment triggers a surcharge of 0.05% per day and a discretionary penalty of 50% to 500% of the unpaid tax liabilities. For adjustments made under anti-avoidance provisions, such as adjustments with respect to transfer pricing, thin capitalization and controlled-foreign corporations (see Section E), an interest charge is imposed on a daily basis, beginning on 1 June of the year following the tax year to which the tax underpayment is related and ending on the day the tax underpayment is settled. This charge is based on the renminbi yuan (CNY) loan base rate published by the People's Bank of China (PBOC) plus 5%. If contemporaneous documentation and other prescribed documentation are provided or if the contemporaneous documentation is not needed in accordance with the relevant regulations but other relevant documents are provided as required by the tax authorities, the interest charge may be reduced to an amount based only on the CNY loan-based rate published by the PBOC.

Effective from 1 January 2015, the administrative approval requirements for tax incentives were removed and replaced by a record-filing mechanism.

Dividends. Profits of FIEs distributed as dividends are subject to withholding tax at a rate of 10% (this rate may be reduced under a tax treaty or arrangement) when the dividends are actually paid. Effective from 1 November 2015, the investor may determine and enjoy the treaty benefits itself when filing a tax return or making a withholding declaration through a withholding agent, keep relevant information and accept the subsequent post-filing administration from the in-charge tax authorities. Dividends paid between qualified resident companies may be exempted. For this purpose, resident companies are qualified if one tax resident has made a direct investment in the other tax resident. Dividends attributable to publicly traded shares are also treated as tax-exempt investment income if the holding period of the shares is longer than 12 months.

Effective 1 January 2017, if a foreign investor makes an investment directly with the profits that it obtains from a Chinese resident enterprise in an investment project in one of the designated encouraged industries listed under the Foreign Investment Industrial Guidance Catalogue and/or the Catalogue of Priority Industries for Foreign Investments in the Central and Western Regions, the withholding tax deferral policy applies, provided that certain requirements are fulfilled. Effective from 1 January 2018, the qualified application scope for dividend withholding tax deferral policy was expanded from encouraged industries to all non-prohibited industries. If the foreign investor recovers the investment by means of equity transfer, repurchase, liquidation or other ways from a direct investment that has enjoyed benefits

from the withholding tax deferral policy, it must declare and pay the deferred tax amount to the tax authority within seven days after actually receiving the relevant payments.

Interest income derived from perpetual bonds can be deemed as dividends for corporate income tax purpose; that is, if both the issuer and the investor are resident enterprises in China, the interest income received by the investor can be exempted from corporate income tax, while the interest expenses incurred by the bond issuer cannot be deducted for corporate income tax purposes. Alternatively, the interest income derived from perpetual bonds can also be included in the taxable income of the investor for corporate income tax purpose while the interest expenses incurred by the bond issuer can be deducted for corporate income tax purposes. The issuer shall notify the investors which of the two approaches mentioned above will be adopted when issuing the bonds.

Foreign tax relief. A tax credit is allowed for foreign income taxes paid, or indirectly borne, by China resident enterprises, but the credit is generally limited to the amount of China corporate income tax payable on the foreign-source portion of an enterprise's worldwide taxable income. A nonresident enterprise with an establishment or place of business (generally referred to as a permanent establishment [PE]) in China that derives foreign-source income effectively connected to the PE can also claim a tax credit for income taxes paid in foreign jurisdictions, but the credit is limited to China corporate income tax payable on such income. Excess foreign tax credits may be carried forward for a period of five years. Effective from 1 January 2017, Chinese companies may claim an indirect foreign tax credit with respect to five tiers of controlled overseas subsidiaries (previously three tiers). Also, effective from the 2017 tax year, Chinese companies may adopt a comprehensive basis instead of the current country-by-country basis to calculate its foreign tax credit limit. The comprehensive basis is perceived to be more favorable to taxpayers than the country-by-country basis in many cases. Under the country-by-country method, the tax credit limit for each country is calculated by apportioning the total income tax on worldwide taxable income through the application of an apportionment ratio of the taxable income sourced in the relevant country to worldwide taxable income. Under the comprehensive method, the tax credit limit is calculated based on the taxable income derived from all foreign jurisdictions. The enterprise may not change the method within five years after adopting one of the methods.

C. Determination of trading income

General. Taxable income is defined as total revenue less the following:

- Non-taxable income
- Tax-exempt income
- Allowable deductions
- Tax losses

No major differences exist between tax and accounting methods for income computation purposes. Dividends, bonuses, interest, royalties, rent and other income are included in taxable income.

In general, all necessary and reasonable expenses incurred in carrying on a business are deductible for tax purposes. However, specified limits apply to the deductibility of advertisement expenses, entertainment expenses, union fees, employee welfare costs, employee education expenses, commissions and handling fees, supplementary pensions and supplementary medical insurance. Charitable donations of up to 12% of the total annual profit are deductible. Effective from 1 January 2019 to 31 December 2025, qualified donations aiming to reduce poverty shall be fully deducted for corporate income tax purposes and excluded when calculating the annual deduction limitation of charitable donations. Effective from 1 January 2017, charitable donations exceeding the deduction limitation can be carried forward for up to three years following the year in which the charitable donations are made for future deduction.

Management fees paid between enterprises, rental and royalty fees paid between business units of an enterprise, and interest paid between business units of nonbank enterprises are not deductible. Interest paid on related-party borrowing that does not meet debt-to-equity ratio rules (see Section E) may not be deductible. Other nondeductible expenses include the following:

- Sponsorship expenses
- Dividends and returns on equity investments
- Income tax payments including penalties and surcharges
- Donations not fulfilling prescribed requirements
- Provisions not yet approved
- Other expenses not related to production or business operations

For an establishment in China of an enterprise that is not a resident for tax purposes, reasonable expenses allocated from the overseas head office are deductible if these expenses are incurred by the head office for the production or business operations of such establishment and are supported by proper documents issued by the head office.

Inventories. For tax purposes, the cost of inventories is determined in accordance with the following rules:

- The cost of inventories that are paid for in cash is the sum of the purchase price and the related taxes and charges actually paid.
- The cost of inventories that are not paid for in cash is determined based on the fair market value of the consideration and the related taxes and charges actually paid.
- The cost of agricultural products generated from biological assets (for example, animals or woods) is determined based on the necessary raw material, labor and relevant overhead expenditure actually incurred.

Cost may be determined on a first-in, first-out (FIFO), weighted average, or specific identification basis. The last-in, first-out (LIFO) basis is not acceptable for tax purposes. The method chosen must be applied consistently.

Provisions. Provisions that have not been approved by the tax authorities are generally not deductible. These include various provisions and allowances for asset impairment and risk reserves.

Tax depreciation. Depreciation of tangible assets is generally computed using the straight-line method. The following are minimum useful lives for various assets.

Asset	Years
Buildings and structures	20
Aircraft, trains, vessels, machinery, equipment and other production plants	10
Appliances, tools, furniture and other assets related to production and business operations	5
Means of transport other than aircraft, trains and vessels	4
Electronic equipment	3
Productive biological assets in the nature of trees	10
Productive biological assets in the nature of livestock	3
Acquired software (subject to approval)	2

Accelerated depreciation is allowed with respect to certain fixed assets subject to rapid technological obsolescence and fixed assets exposed to constant shock and erosion. A qualified company can follow either the general depreciation rule or the accelerated depreciation rule.

Enterprises engaging in six specific industries may adopt a shortened depreciation life or accelerated depreciation method for corporate income tax purposes for fixed assets acquired on or after 1 January 2014. An additional four specific industries were added to the list, and enterprises in these industries are eligible to choose either a shortened depreciation life or accelerated depreciation method, effective from 1 January 2015.

Effective from 1 January 2019, the industry scope of accelerated depreciation for fixed assets is further extended to the whole manufacturing industry, instead of restricting it to the six and four industries referred to above.

Small and micro-sized enterprises engaging in the 10 specific industries mentioned above can claim a deduction for corporate income tax purposes in the year of acquisition for the cost of devices and equipment with a unit value not exceeding CNY1 million that are acquired on or after 1 January 2014 and used for R&D, as well as for production and business operations; these enterprises are no longer required to depreciate the fixed assets mentioned above over their useful lives. (For accounting purposes, the entire cost must still be depreciated over several years in accordance with accounting rules.) For those fixed assets with a unit value exceeding CNY1 million, the above enterprises may adopt a shortened depreciation life or accelerated depreciation methods for corporate income tax purposes.

Enterprises in various industries can claim a deduction for corporate income tax purposes in the year of acquisition for the cost of devices and equipment with a unit value not exceeding CNY1 million that are acquired on or after 1 January 2014 and used for R&D purposes only; these enterprises are no longer required to depreciate these fixed assets over their useful lives. (For accounting purposes, the entire cost must still be depreciated over several years in accordance with accounting rules.) For fixed assets with a unit value exceeding CNY1 million, the above enterprises may adopt a shortened depreciation life or accelerated depreciation methods for corporate income tax purposes.

Enterprises in various industries can claim a deduction for corporate income tax purposes in the year of acquisition for the cost of

fixed assets with a unit value not exceeding CNY5,000. Enterprises are no longer required to depreciate these fixed assets over their useful lives. (For accounting purposes, the entire cost must still be depreciated over several years in accordance with accounting rules.)

Effective from 1 January 2018 to 31 December 2023, an enterprise may claim a deduction for corporate income tax purposes in the year of acquisition for the cost of newly acquired equipment or appliances (referring to any fixed assets except for real estate or constructions) if the unit value of the equipment or appliance does not exceed CNY5 million. (For accounting purposes, the entire cost must still be depreciated over several years in accordance with accounting rules.) If an enterprise acquires any equipment or appliance with a unit value exceeding CNY5 million, the taxpayer may still choose the general depreciation method or the accelerated depreciation methods according to the old tax rules mentioned above.

Intangible assets, including technical know-how, patents and trademarks, are amortized over the contractual term or over a period of no less than 10 years if a time period is not specified. Self-developed goodwill cannot be amortized or deducted. Acquired goodwill is deductible only if the entire business is transferred or liquidated.

Micro, small and medium-sized enterprises may voluntarily opt for pre-tax deduction at a certain percentage of the unit value of equipment and appliances that are newly acquired during the period from 1 January 2022 to 31 December 2022 with a unit value of CNY5 million or above for corporate income tax purposes. Specifically, for equipment and appliances with a minimum depreciation period of three years as stipulated in the Implementation Regulations for the Corporate Income Tax Law, 100% of the unit value of such equipment and appliances may be deducted on an one-off basis for the current year; and for equipment and appliances with a minimum depreciation period of four, five or 10 years, 50% of the unit value of such equipment and appliances may be deducted on an one-off basis for the current year, and the remaining 50% may be depreciated in the remaining years pursuant to the provisions for pre-tax deduction.

Relief for losses. Tax losses may be carried forward for up to five years. Effective from 1 January 2018, qualifying HNTEs and technology-based small and medium-sized enterprises may carry forward for 10 years for future deduction the losses incurred in the five years preceding the year in which the enterprises gain the qualification, to the extent that the losses have not yet been offset. Carrybacks are not allowed.

Groups of companies. In general, consolidated returns of enterprises are not allowed, and all companies must file separate tax returns, unless specifically approved by government authorities. Tax resident enterprises in China must adopt combined filing for units (branches and establishments without legal person status) operating in different areas of China. On approval by the relevant tax authorities, nonresident enterprises that have two or more establishments in China may select a main establishment to file a combined tax return.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate (rate implemented from 1 April 2019)	13
Rate on specified products (primarily basic necessities), agricultural products and utility services (rate implemented from 1 April 2019)	9
Nationwide VAT pilot reform, effective from 1 May 2016, with expanded scope to cover the construction industry, real estate industry, finance industry and lifestyle services industry (China Business Tax has been phased out)	
Leasing of tangible properties (rate implemented from 1 April 2019)	13
Transportation services, postal services, basic telecommunication services, construction services, immovable property (operating and financial) leasing services, sales of immovable property and transfers of land-use rights (rate implemented from 1 April 2019)	9
Modern services (including R&D and technology services, information and technology services, cultural and creative services, logistics auxiliary services, verification and consulting services, radio, film and television services, business supporting services and other modern services), value-added telecommunication services, financial services (including loan services, financial services with direct service charges, insurance services and trading of financial instruments), lifestyle services (including cultural and sports services, education and medical services, tourism and entertainment services, catering and accommodation services, residents, daily services and other life services) and sales of intangible assets other than land-use rights	6
Other reduced levy rates (applicable to small-scale VAT payers other than those in the real estate industry and the construction industry [3%] or general VAT payers in the real estate industry and construction industry who choose to adopt the simplified computation method [5%]; a levy rate of 5% can be chosen for the supply of certain services)	3/5
Temporarily reduced levy rate (applicable to small-scale VAT payers; currently effective until the end of 2027)	1
International transportation and space transportation services, some specific cross-border VAT-payable supplies conducted by domestic entities or individuals for overseas entities that are consumed entirely outside China (the entities or individuals can elect the VAT exemption instead of the 0% rate)	0

Nature of tax	Rate (%)
(VAT previously paid on the purchase of raw materials, parts and taxable services that are used in the production of export goods or in the provision of certain export services is refundable; applicable refund rates depend on types of goods or services that are exported.)	
Postal and collection and delivery services and insurance services provided for the exportation of goods, specified supplies of services and intangible assets that are provided to foreign entities and consumed entirely outside China, international transportation services provided by non-transport operating carriers (transportation operators that enter into transportation service agreements with their customers, charging freight and assuming carriers' responsibilities, and then subcontract the transportation services to real carriers that perform the transportation services for the customers), financial services with direct service charges provided between foreign entities that are not related to any goods, intangible assets or real estate in China;	Exempt
Consumption tax (CT); on the production and importation of certain luxury items, such as cigarettes (including e-cigarettes), gasoline, alcoholic beverages, jewelry, high-end cosmetics (including high-end beauty and makeup cosmetics, high-end skin care cosmetics and cosmetics sets), motor vehicles, motor vehicle tires, golf balls and equipment, luxury watches and yachts	Various
Real property gains tax; imposed on real property transfers (after various deductions)	30 to 60
City construction tax (CCT); based on indirect taxes (including VAT and CT) actually paid (effective from 1 September 2021, no CCT is due for the imported supply of services)	
Taxpayers located in urban areas	7
Taxpayers located in county or township areas	5
Taxpayers located in rural areas	1
Education surcharge (ES); based on indirect taxes (including VAT and CT) actually paid (effective from 1 September 2021, no ES is due for the imported supply of services)	3
Local education surcharge (LES); based on indirect taxes (including VAT and CT) actually paid (effective from 1 September 2021, no LES is due for the imported supply of services)	2

E. Miscellaneous matters

Foreign-exchange controls. In general, the Chinese government permits the free convertibility of current account items of China incorporated enterprises. Current account items are defined as transactions occurring daily that involve international receipts and payments. Current account foreign-exchange receipts and payments include trading receipts and payments, service receipts

and payments, unilateral transfers and dividends paid from after-tax profits.

In addition, China has been further relaxing its foreign-exchange controls in phases by permitting settlement in renminbi yuans (CNY) for all cross-border transactions that were allowed to be settled in foreign currency, including cross-border trades in commodities, services and other current account items, as well as certain capital account items, on a nationwide basis and then extending the CNY settlement to both inbound and outbound transactions. Remittances of dividends to foreign investors and other items including income derived from share transfers, capital reductions, liquidations and early withdrawals of investments may be settled in renminbi yuans.

Remittances of dividends and profits. Remittances of after-tax profits or dividends to foreign investors in FIEs must be supported by written resolutions of the board of directors and audited financial statements, and may not be made until a tax record filing form is issued by the tax authorities.

Remittances of interest and principal. Interest payments on foreign loans are considered current account items. In general, after performing a tax-record filing with the tax authorities, these payments may be made through the enterprise's special foreign-exchange bank account or through conversion at designated foreign-exchange banks.

Since 13 May 2013, enterprises are not required to submit any formal application to the State Administration for Foreign Exchange (SAFE) for the approval of principal repayments. In general, the enterprise may repay the principal from its special foreign-exchange bank account or through conversion at designated foreign-exchange banks. Since 23 October 2019, non-bank debtors are not required to perform foreign loans de-registration (to indicate the termination of foreign debt) at the local SAFE. Such de-registration of the foreign loans can be performed at designated foreign-exchange banks in the same location. In the meantime, nonfinancial enterprises in the pilot areas (the Guangdong-Hong Kong-Macao Greater Bay Area and Hainan province) are not required to register foreign loans with the local SAFE on a case-by-case basis.

Remittances of royalties and fees. Instead of applying for tax clearance for settling outbound payments that exceed USD50,000, effective from 1 September 2013, enterprises can file a record with the in-charge tax authorities by submitting copies of contracts (stamped by the official seal) together with registration forms before making payments of royalties and fees, either out of the enterprise's special foreign-exchange bank account or through currency conversion and payment at a designated foreign-exchange bank. With respect to royalties, the investor may determine and enjoy the treaty benefits when filing a tax return or making a withholding declaration through a withholding agent, and accept the subsequent post-filing administration from the in-charge tax authorities. Proper documentation (such as royalty agreements, invoices and other tax and business documents) is required for all payments of royalties and fees.

Debt-to-equity requirements. Foreign debt quota (including both the debt borrowed from related parties or from third parties) can be either the difference between the total investment and registered capital (refer to the following corporate law requirements) or no more than 2.5 times the net asset value effective from 11 March 2020. In general, FIEs can select one method and it cannot be changed randomly. If the latter method is selected, the FIE must provide the local SAFE with audited financials to support the net asset value.

For FIEs in China, the following debt-to-equity ratios are applicable for the purpose of obtaining foreign-currency loans from foreign parties (including foreign related parties) and meeting corporate law requirements:

- For investment projects of up to USD3 million, the capital contribution must equal or exceed 70% of the total investment.
- For investment projects of over USD3 million but not exceeding USD10 million, the minimum capital requirement is 50% of the total investment, but not less than USD2,100,000.
- For investment projects of over USD10 million but not exceeding USD30 million, the minimum capital requirement is 40% of the total investment, but not less than USD5 million.
- For investment projects in excess of USD30 million, the minimum capital requirement is 33.3% of the total investment, but not less than USD12 million.

The New Law provides for a separate set of debt-to-equity rules for tax purposes. Subject to certain exceptions, in general, the debt-to-equity ratio for financial institutions is 5:1 and the ratio for non-financial institutions is 2:1. The interest expense on funds loaned by a related party that exceed the maximum debt calculated under the debt-to-equity ratio is not deductible for tax purposes.

In addition, the deduction of expenses on a loan from an investor may be limited if the investor has not yet paid up its committed investment capital. The nondeductible interest expense is calculated by apportioning the total interest expenses based on the ratio of the outstanding capital commitment to the total loan balance.

Transfer pricing. China has introduced transfer-pricing rules under which all amounts paid or charged in business transactions between related parties must be determined based on an arm's-length standard. If the parties fail to meet this requirement, the tax bureau may make reasonable adjustments by using one of the following methods:

- Comparable uncontrolled price (CUP)
- Resale price method (RPM)
- Cost-plus method (CPM)
- Transactional net margin method (TNMM)
- Profit split method (PSM)
- Other methods, including asset valuation methods, such as the cost-based method, market-based method and income-based method, and other methods that are consistent with the arm's-length principle

On 29 June 2016, the State Taxation Administration (STA) issued STA Notice [2016] No. 42 (Bulletin 42), replacing the following

items of 2009's Implementation Measures for Special Tax Adjustments (Trial Version; Guoshuifa [2009] No. 2 (Circular 2):
- Chapter 2: Related-Party Transaction (RPT) Reporting
- Chapter 3: Documentation Requirements
- Article 74: Cost Sharing Agreements (CSAs) Documentation
- Article 89: Thin Capitalization Documentation

It also replaced the Annual RPT Forms of Enterprises of the People's Republic of China (Guoshuifa [2008] No. 114), governing RPT disclosure in annual income tax filings. The provisions in Bulletin 42 apply for the 2016 fiscal year and thereafter.

Chinese enterprises must disclose RPTs in RPT forms, which should be submitted to the in-charge tax bureau together with the annual tax return by the due date for the annual return (that is, before 31 May of the following year).

Bulletin 42 replaces Circular Guoshuifa [2008] No. 114 and introduces significant new disclosure requirements with respect to RPTs. The major changes introduced by Bulletin 42 are described below.

RPT forms disclosure. Bulletin 42 increases the number of disclosure forms from 9 to 22, including the following:
- Reporting Entity Information Form
- Summary of Annual Related Party Transaction Forms
- Related Party Relationship Form
- Ownership Transfer of Tangible Asset Transaction Form
- Ownership Transfer of Intangible Asset Transaction Form
- Use Right Transfer of Tangible Asset Transaction Form
- Use Right Transfer of Intangible Asset Transaction Form
- Financial Assets Transaction Form
- Financing Transaction Form
- Related Party Service Transaction Form
- Equity Investment Form
- CSA Form
- Outbound Payment Form
- Overseas Related Party Information Form
- Financial Analysis Form of Annual Affiliated Transactions between Enterprises (unconsolidated)
- Financial Analysis Form of Annual Affiliated Transactions between Enterprises (consolidated)
- Three forms related to Country-by-Country Reporting (CbCR) (the CbCR forms need to be completed in both Chinese and English)

Documentation structure. Bulletin 42 adopts the three-tiered documentation structure set out in the final reports under Action 13 of the Organisation for Economic Co-operation and Development (OECD) Base Erosion and Profit Shifting (BEPS) Action Plan.

This structure consists of a CbCR (disclosed as part of the RPT Forms), a Master File and a Local File. In addition, special item files are required for taxpayers entering or implementing CSAs or falling under the thin-capitalization requirements.

Taxpayers that meet the conditions outlined below need to prepare a Master File and a Local File.

A Master File is required if annual RPTs exceed CNY1 billion, or if any cross-border RPTs occur and the entity's ultimate parent already prepares a Master File.

A Local File is required if RPTs during the year meet any of the following conditions:

- Annual RPTs of physical goods exceed CNY200 million (in the case of toll manufacturing [toll manufacturing refers to an arrangement under which raw materials or component parts are mainly purchased in the name of a foreign principal for use by a Chinese manufacturer in the production of finished goods], the value is based on annual import and export prices for customs purposes)
- Annual RPTs involving the transfer of financial assets exceed CNY100 million
- Annual RPTs involving the transfer of rights to intangibles exceed CNY100 million
- Annual RPTs of other types (for example, related-party service transactions, royalties for use of intangibles and related-party financing transactions) in aggregate exceed CNY40 million

Taxpayers that only deal with domestic related parties can be exempted from preparing the Master File, the Local File and any special item file.

Local Files and special item files are not required for RPTs that are covered under an Advance Pricing Agreement (APA). Furthermore, the amount of these covered transactions is not included when calculating Local File thresholds.

Bulletin 42 provides that resident enterprises that meet one of the following criteria should submit CbCR:

- The resident enterprise is the ultimate parent company of the multinational enterprise group, and total revenue of all kinds from the last fiscal year's consolidated financial statement was over CNY5,500,000,000.
- The resident enterprise is designated to submit CbCR by the multinational enterprise group.

If multinational enterprises are required to prepare CbCR according to relevant provisions of other countries' laws, the Chinese tax authorities can ask for CbCR from the Chinese subsidiaries when undertaking a special tax investigation under the following circumstances:

- The multinational enterprise has not submitted a CbCR to any country.
- The multinational enterprise has submitted a CbCR to another country, but China has not established an Information Exchange Mechanism with that country.
- The multinational enterprise has submitted a CbCR to another country, and China has established an Information Exchange Mechanism with that country, but CbCR has not in fact been successfully exchanged with China.

Bulletin 42 stipulates the deadline for the Master File is 12 months after the close of the financial year of the ultimate parent company; the deadline for the Local File and any special item file is 30 June of the year following the close of the financial year.

Bulletin 42 provides that contemporaneous documentation should be submitted to the tax authorities within 30 days on the request of the tax authorities.

Taxpayers may apply for APAs in China. An APA is an agreement between a taxpayer and one or more tax authorities regarding how transfer prices will be calculated in the future. Effective from 1 December 2016, STA Notice [2016] No. 64 (Notice 64) governs the administration of APAs in China. The APA process has the following six steps:

- Pre-filing meeting
- Intention discussion
- Analysis and evaluation
- Formal application
- Negotiation and conclusion of the arrangement
- Execution monitoring

In contrast to Circular 2, Notice 64 does not allow the pre-filing meeting to be anonymous and does not specify the time periods between each of the steps. It is noteworthy that extensive interactions between the taxpayer and the tax authorities occur well before the APA application is formally accepted. Taxpayers must be prepared to perform significant analysis and provide extensive documentation during the process.

Notice 64 makes numerous references to the analysis of the value chain and of Location Specific Advantages (LSAs), such as location savings and market premiums. This is in keeping with the contemporaneous documentation requirements that the STA put in place under Bulletin 42. Notice 64 provides that the role of LSAs is one of the topics for discussion at pre-filing meetings. Both value-chain analysis and analysis of LSAs are required elements of the draft application materials submitted before the intention discussion.

To further promote APAs, the STA issued STA Notice [2021] No. 24 (Notice 24), "Simplified Procedures for Unilateral Advance Pricing Arrangements," on 26 July 2021. Notice 24 entered into force on 1 September 2021. Notice 24 provides a simplified procedure for a unilateral APA in which the tax authorities should decide whether to accept the application within 90 days, and once accepted, the tax authorities should complete the negotiation within six months (excluding the additional time that may be needed for collecting further information).

On 17 March 2017, the STA issued STA Notice [2017] No. 6 (Notice 6), "Supervisory Measures for Special Tax Investigation Adjustments and Mutual Agreement Procedures." Notice 6 entered into force on 1 May 2017.

Notice 6 contains long-awaited guidance on the application of the arm's-length principle, including guidance with respect to intangible property transactions, intercompany service transactions, location-specific advantages, transfer-pricing methods and various procedural matters. Detailed guidance on mutual agreement procedures (MAPs) under double taxation treaties is provided.

Notice 6 reflects the importance that the STA places on double taxation treaties and on the international consensus that has developed over the course of the BEPS project led by the OECD.

Notice 6 moves Chinese transfer-pricing rules and proposed rules into closer alignment with the new international standards developed during the BEPS project in a number of aspects.

Anti-avoidance rules. The general anti-avoidance rules (GAAR) apply to transactions if the transactions may be considered to have been undertaken or arranged primarily for other than bona fide purposes and if the sole and dominant purpose for a company to enter into such transactions was the obtaining of tax benefits. The Administration Measures of GAAR, which are procedural guidelines on the application of the GAAR, are effective from 1 February 2015.

Controlled foreign corporations. The corporate income tax law contains controlled foreign corporation (CFC) rules, which are designed to counter income deferral strategies. A resident company that holds an interest in a CFC incorporated in a jurisdiction with an effective tax rate of lower than 12.5% may be taxed on its share of profits of the CFC, regardless of whether a dividend has been declared. A nonresident company is considered to be controlled by a China resident company if either of the following conditions is satisfied:

- The China resident company directly or indirectly holds 10% or more of the voting shares in the nonresident company and jointly holds an interest of 50% or more in the nonresident company.
- The China resident company exercises effective control over the nonresident company by means of shares, capital, business operations, purchases and sales or other mechanisms.

China has issued an approved list showing jurisdictions that are not subject to CFC rules, including Australia, Canada, France, Germany, India, Italy, Japan, New Zealand, Norway, South Africa, the United Kingdom and the United States. The CFC rules do not apply if one of the following conditions is satisfied:

- The CFC is located in one of the jurisdictions in the approved list.
- The CFC carries out substantial and positive business activities.
- The CFC reports an annual profit of CNY5 million or less.

F. Treaty withholding tax rates

The following table provides Chinese withholding tax rates for dividends, interest and royalties paid from Mainland China to residents of various treaty jurisdictions and arrangement jurisdictions (Hong Kong and Macau Special Administrative Regions [SARs]). The rates reflect the lower of the treaty rate and the rate under domestic law. The following table is for general guidance only.

	Dividends %	Interest %	Royalties %

(a) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.

(b) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends. The higher rate applies to other dividends.

(c) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting shares of the company paying the dividends. The 10% rate applies to other dividends.

(d) The 7% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting shares of the company paying the dividends. The 10% rate applies to other dividends.

(e) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the company paying the dividends and that has invested more than EUR2 million in the capital of the company paying the dividends. The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the capital of the company paying the dividends and that has invested more than EUR100,000 in the capital of the company paying the dividends. The 10% rate applies to other dividends.

(f) The 5% rate applies if the beneficial owner of the dividends is a company that, before the moment of the payment of the dividends, directly held for an uninterrupted period of at least 12 months at least 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.

(g) The 5% rate applies to interest paid to banks. The 10% rate applies to other interest payments.

(h) The 7% rate applies to interest paid to banks or financial institutions. The 10% rate applies to other interest payments.

(i) Payments for the use of industrial, commercial or scientific equipment are taxed on the basis of 60% of the gross payments. Consequently, the effective rate for such payments is 6%.

(j) Payments for the use of industrial, commercial or scientific equipment are taxed on the basis of 70% of the gross payments. Consequently, the effective rate for such payments is 7%.

(k) The 7% rate applies to royalties paid for the use of, or the right to use, industrial, commercial and scientific equipment. The 10% rate applies to other royalties.

(l) The 5% rate applies to royalties paid for technical or economic studies or for technical assistance. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works including cinematographic films, films or tapes for radio or television broadcasting, patents, trademarks, designs or models, plans, or secret formulas or processes, or for the use of, or the right to use, industrial, commercial or scientific experience.

(m) China is honoring the Czechoslovakia treaty with respect to the Slovak Republic until a new treaty is signed.

(n) After the partition of the former Yugoslavia, China is honoring the double tax treaty with the former Yugoslavia with respect to Bosnia and Herzegovina.

(o) China entered into a treaty with the Federal Republic of Yugoslavia. It has been indicated that China considers Serbia to have inherited the Yugoslavia treaty and that China is also honoring the treaty with respect to Montenegro. However, it is suggested that taxpayers check with the relevant tax authorities before relying on this treaty.

(p) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the company paying the dividends. The 15% rate applies if the dividends are paid out of income or gains derived directly or indirectly from immovable property and such income or gains from such immovable property is exempted from tax. The 10% rate applies to other dividends.

(q) The tax treaty with Romania entered into force on 4 July 2016 and applies to income derived on or after 1 January 2018.

(r) On 10 March 2014, the STA released STA Announcement [2014] No. 16, which announced that the new tax treaty with Ecuador and its protocol, which were signed on 21 January 2013, entered into force on 6 March 2014. The Ecuador treaty and its protocol apply to income derived on or after 1 January 2015. The withholding tax rates under the new treaty are reflected in the table. In addition, the protocol states that the term "interest" also includes other income treated as income from money lent by the tax law of the contracting state in which the income arises if the income is from some type of debt-claim. In the case of divergence of interpretation, the contracting states must resort to the mutual-agreement procedure.

(s) The 5% rate applies to royalties paid to aircraft and ship leasing businesses. The 7% rate applies to other royalties.

(t) The 4% rate applies to interest paid to banks, insurance companies and other financial institutions. The 5% rate applies to interest derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies to other interest payments.

(u) The 2% rate applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies to other royalties.

(v) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital, valued at least EUR80,000, of the company paying the dividends. The 10% rate applies to other dividends.

(w) The 2.5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 25% of the company paying the dividends. The 7.5% rate applies to other dividends.

(x) The 5% rate applies if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends throughout 365 days, which includes the day of the payment of the dividend. The 10% rate applies to other dividends.

Mainland China has signed tax treaties with Uganda (11 January 2012), Kenya (21 September 2017), Gabon (1 September 2018), Argentina (2 December 2018), Italy (23 March 2019), Norway (12 May 2023), Senegal (17 October 2023) and Cameroon (17 October 2023), but these treaties have not yet been ratified. On 25 August 2015, Mainland China signed a double tax agreement with Taiwan, which has not yet been ratified.

A. At a glance

Corporate Income Tax Rate (%)	35 (a)
Capital Gains Tax Rate (%)	15
Branch Tax Rate (%)	35 (a)
Withholding Tax (%)	
Dividends	0/10/20 (b)
Interest	0/5/15/20 (c)
Royalties	20
Technical Services, Technical Assistance and Consulting Services	20
Management and Direction (Overhead) Charges	33
Branch Remittance Tax	20 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	12 (e)

(a) The general corporate income tax rate is 35%. Some surtaxes can apply to certain companies, such as some financial institutions and the like (five percentage points until 2027, for a total of 40%), some companies engaged in the power generation from hydric resources (3 percentage points until 2026 for a total of 38%), oil companies (between 0 and 15 percentage points for a total of 35% to 50%) and coal mining companies (between 0 and 10 percentage points for a total of 35% to 45%).

(b) Dividends paid to nonresidents are subject to a 20% dividend withholding tax. In the case of dividends paid to resident individuals, the effective dividend tax rate is between 0% to 20% depending on the amount distributed (and after some tax credits are applied to cap the rate up to 20%). Distributions made out of pre-2017 accumulated profits are not subject to this dividend tax. In addition, if the dividends are paid out of profits that were not subject to income tax at the corporate level, a recapture tax applies at a rate of 35%; in this case, for nonresidents, the 20% dividend tax is applied to the amount of the distribution after it is reduced by the recapture tax. A 10% dividend withholding tax on distributions between Colombian companies applies (for further details, see *Dividends* in Section B).

(c) Interest paid or accrued on loans payable to foreign entities is generally subject to a 20% withholding tax. Interest paid on loans that have a term equal or greater than one year is subject to a 15% withholding tax. Interest paid on loans that have a term equal or greater than eight years and that are related to certain infrastructure projects are subject to a 5% withholding tax. Interest paid by Colombian financial institutions and interest paid by Colombian residents to foreign entities with respect to certain international trade operations are deemed to be foreign-source income and are accordingly exempt from withholding tax. Certain qualified loans executed before 31 December 2010 do not generate Colombian-source income. As a result, interest on such loans is exempt from withholding tax.

(d) The remittances of profits out of a branch are subject to the same tax treatment as dividends. Consequently, if the distribution is made out of profits that were not subject to tax at the entity level, a recapture tax applies at a rate of 35%). In this case, the dividend tax (20%) is applied to the amount of the distribution after it is reduced by the recapture tax.

(e) For net operating losses generated until 2016, a grandfathering rule allows an unlimited carryforward.

B. Taxes on corporate income and gains

Corporate income tax. National corporations are taxed on worldwide income and capital gains. National corporations are corporations that have their principal domicile in Colombia or

are organized under Colombian law or that during the respective tax year or period have their effective place of management in Colombia. Beginning in 2023, to determine the effective place of management, taxpayers should consider the place where day-to-day activities of the legal entity are developed by its managers.

Foreign companies that obtain more than 80% of their income (other than passive income) in the jurisdiction of incorporation are not considered to have their effective place of management in Colombia. These companies are known as "80% Foreign Income Companies." Foreign companies that have issued stock or bonds in the Colombian stock exchange or in a recognized foreign stock exchange are not considered to have their effective place of management in Colombia. The subsidiaries of such companies are also not considered to have their effective place of management in Colombia to the extent they are consolidated in the financial statements of its parent; however, such subsidiaries can elect to be treated as a national corporation unless they are 80% Foreign Income Companies.

Branches of foreign corporations and permanent establishments are taxed on attributable worldwide income and capital gains. Attribution is generally based on accounting records, which should be supported by an analysis of functions, assets, risks and personnel.

Indirect transfers of Colombian assets or shares are subject to income tax in Colombia if the Colombian assets or shares account for 20% or more of the book value and/or the fair market value of the assets of the foreign entity that is being transferred.

Corporate income tax rates. The standard corporate income tax rate is 35%. Financial institutions, insurance and reinsurance entities, stockbrokers, among others, with taxable income of more than 120,000 tax units (approximately USD1,448,000) are subject to a tax surcharge of five percentage points until 2027 (combined nominal rate of 40%). Companies devoted to power generation from hydric resources with taxable income higher than 30,000 tax units (approximately USD362,000), including the taxable income from related parties, are subject to a surtax of three percentage points (combined nominal rate of 38%) until 2026. Companies receiving income derived from the development of certain extraction activities of non-renewable resources, and whose taxable income is higher than 50,000 tax units (approximately USD603,000), including the taxable income of related parties, are subject to the following permanent surtax:

- Zero to 15 percentage points for oil companies (combined nominal rate from 35% to 50%)
- Zero to 10 percentage points for coal mining companies (combined nominal rate from 35% to 45%)

The surtax applicable depends on the average price of the product in the year in which the calculation is made, in comparison with the average coal or oil prices within the 10 years prior to the year in which the surtax is determined.

Foreign companies receiving Colombian-source income that is not attributable to a branch office or permanent establishment and that is not fully taxable through withholding tax are generally subject to the standard income tax rate.

A reduced corporate income tax rate of 20% applies to legal entities qualified as Industrial Users of Goods and/or Services in a free-trade zone. Beginning in 2024, industrial users of the free-trade zone will keep benefiting from the 20% tax rate in relation to income derived from exportation of goods or services and to the extent they have agreed on an internationalization plan (with certain exportation targets). However, a 35% rate will apply to income derived from other types of activities. For industrial users that, for 2022, obtained a 60% increase on their gross income, compared with its 2019 gross income, the 20% rate over their income should apply until 2025. Based on a Constitutional Court decision of 2023, industrial users that complied with the requirements to apply the reduced corporate income tax rate before 13 December 2022 should have a grandfathering treatment to keep applying the reduced corporate income tax rate to local sales income (not only to exportation income). Commercial Users in a free-trade zone are subject to the general corporate income tax rate.

Subject to certain conditions and requirements, a special reduced rate of 15% applies to certain activities, such as hotel services, ecotourism parks and/or agritourism parks, services provided in new or refurbished hotels, parks development in certain municipalities, and publishing companies that fulfill certain requirements.

Reduced and gradual corporate income tax rates (8.75% to 26.25%) are available until 2027 for some companies whose main domicile and whole activity is carried out in zones most affected by armed conflict (ZOMAC). Also, reduced and gradual rates (0% to 17.5%) apply to companies whose main domicile and whole activity is carried out in so-called Special Economic and Social Zones (ZESE) and generate certain increases in employment. It is still possible to apply for a ZESE benefit in certain municipalities until the end of 2024.

Certain tax credits are available (see *Foreign tax relief*).

Colombian Holding Company regime. The Colombian Holding Company (CHC) regime applies to Colombian entities as long as they comply with the following requirements:

- They hold at least 10% of the capital of two or more Colombian or foreign entities during at least 12 months.
- They have three or more employees and have human and material resources in Colombia.

To be included in the CHC regime, a request must be made to the tax authority.

Dividends distributed by foreign entities to CHCs are not taxed. When such dividends are distributed in turn by CHCs to Colombian residents, they are taxed, but when such dividends are distributed in turn to nonresidents, they are not taxed.

Income derived from the sale of shares or quotas in a CHC is generally exempt from income tax on the portion that relates to activities performed abroad. In addition, gain on the sale of foreign entities by the CHC is exempted in the hands of the CHC.

Minimum corporate income tax rate. Income taxpayers are subject to a 15% minimum tax rate (adjusted tax rate or ATR). The ATR

is determined based on the ratio between the adjusted income tax (AIT), which is based on the current tax with some adjustments, over the adjusted income (AI), which is based on the accounting profit with some adjustments calculated under local rules. If the ATR is lower than 15%, it should be adjusted to achieve the 15% rate. For companies that file consolidated financial statements in Colombia, the calculation of the ATR should be made at the level of the group, comparing the sum of the AIT with the sum of AI of the companies' part of the consolidation.

This rule does not apply to, among others, nonresidents, companies benefiting from the ZESE regime over the period in which such companies are subject to a 0% rate, companies benefiting from the ZOMAC regime, companies engaged exclusively in publishing activities, hotel services subject to a 15% tax rate and concession agreements. Companies with negative (a loss) in AI are not subject to minimum corporate income tax rate.

Capital gains. The following gains are considered capital gains, which are subject to tax at a rate of 15%:

- Gains on the transfer of fixed assets owned for more than two years
- Gains resulting from the receipt of liquidation proceeds of corporations in excess of capital contributed if the corporation existed for at least two years

Administration. The tax year is the calendar year.

Each year, the Colombian government sets the due dates for the filing of income tax returns and payment of taxes due. Tax payments are made in three installments between February and June for Large Taxpayers (large corporations, according to conditions set by the tax authorities) and in two installments between May and July for other legal entities.

Interest on the late payment of taxes is accrued at the daily effective rate of usury certified by the Superintendency of Finance for the consumption credits, less two points. A penalty for late filing is levied on the amount of tax assessed in the corresponding tax return at a rate of 5% or 10% for each month or a fraction thereof. The penalty for late filing cannot exceed 100% or 200% of the difference of the tax to be paid or the balance in favor, depending on the timing of the filing. The penalty for amending a return may be 10% or 20% of the difference between the amount shown on the original tax return and the correct amount, depending on the timing of the amendment.

Under certain circumstances, the applicable tax penalty can be reduced.

Dividends. Distributions of dividends to nonresidents are subject to dividends tax at a rate of 20%. Distribution of dividends to resident individuals are taxed at progressive income tax rates (up to 39%). However, a 19% tax credit on the value of the dividends would be granted (therefore, the dividends themselves would be subject to a tax rate of up to 20%). Distributions made out of pre-2017 accumulated profits are not subject to this dividend tax. A withholding tax from 0% to 15% is applicable to the amount of the distribution to resident individuals, which is creditable against the individual's income tax liability. A 10% dividend

withholding tax applies to distributions between Colombian companies. This dividend tax is charged only on the first distribution of dividends between Colombian entities and may be credited against the dividend tax due once the ultimate Colombian company (the last Colombian company in an ownership chain) makes a distribution to its shareholders (nonresident entity or individual shareholders or Colombian resident individual shareholders). The dividend tax on local distributions does not apply if the Colombian companies are part of an economic group or controlled companies duly registered with the Chamber of Commerce or if the distribution is to a Colombian entity qualifying for the new CHC regime.

In addition, if the dividend distribution is made out of profits that were not taxed at the entity level, the distribution is subject to withholding tax at the applicable corporate income tax rate of the specific period of the distribution (recapture tax). For 2024, the recapture tax rate is 35%. In this case, the 20% dividends tax applies to the distributed amount after it is reduced by the recapture tax. This results in a combined tax rate of 48%.

If the profits subject to tax at the corporate level in a given year are higher than the commercial profits of that year, the difference can be carried back for two years or carried forward for five years to offset the profits of such periods, in order to reduce or eliminate the amount of the distribution subject to the recapture tax. These periods have a duration of 10 years for taxpayers engaged in concession agreements or public-private associations.

Significant economic presence. From 2024, nonresidents with significant economic presence (SEP) in Colombia will be subject to 10% income tax withholding (unless another withholding tax rate applies) on the sale of goods and the provision of certain listed services (generally digital services) to Colombian customers and users, even if the nonresidents do not have any physical presence in the country. Nevertheless, the nonresident entity or individual may opt to assess its income tax liability at a 3% rate over the gross income. For such purposes, the nonresident should file an income tax return in Colombia.

SEP would be triggered if the following criteria are met:

- The nonresident entity has a deliberate and systematic interaction with the Colombian market. This type of interaction would be presumed to exist when the nonresident has interaction or marketing activities with more than 300,000 customers or users in Colombia during the prior year, or within the relevant tax year, or displays the price in Colombian pesos or allows the payments in Colombian pesos.
- The nonresident entity's gross income from transactions with customers in Colombia is higher than 31,300 tax units (approximately USD377,000) during the prior year or the current tax year.

If the activities in Colombia are developed by different related parties, the above criteria will consider the transactions of all related entities.

Double tax treaties generally prevent a trigger taxation under SEP. If Colombia signs an international agreement that forbids this form of taxation, the rules mentioned above would be

inapplicable from the tax year following the one when the international agreement enters into force (this rule is related with Pillar One of the Base Erosion and Profit Shifting (BEPS) 2.0 project of the Organisation for Economic Co-operation and Development [OECD]).

Foreign tax relief. For national corporations and resident individuals, a credit for foreign taxes paid on foreign-source income is granted, up to the amount of Colombian corporate income tax payable on the foreign-source income.

An indirect tax credit is also granted for foreign taxes paid on income at the level of the foreign company that is distributing corresponding dividends to Colombian shareholders or quota holders. This tax credit equals the amount resulting from the application of the effective income tax rate of the foreign company to the amount of distributed dividends. The sum of the direct tax credit and indirect tax credit may not exceed the corporate income tax payable in Colombia on such dividends.

To be entitled to the direct and indirect tax credit, the domestic taxpayer must prove that the corresponding tax was effectively paid in each relevant jurisdiction. In addition, for the indirect tax credit, the investments must be qualified as fixed assets for the taxpayer. Consequently, indirect tax credits cannot be claimed on portfolio investments.

The tax credit may be claimed in the tax year in which the foreign tax is paid or in any of the following years.

C. Determination of taxable income

General. Taxable income is determined in accordance with the following calculation: gross income, minus non-taxable income, returns, rebates and discounts, equals net income, minus costs and expenses, equals taxable income. In the first instance, such values must be determined in accordance with the Colombian generally accepted accounting principles, which generally follow International Financial Reporting Standards and are subject to several adjustments provided in the tax rules.

In general, to be deductible, expenses must be related to the activity that generates taxable income and must be proportional and necessary with respect to the productive activity of the taxpayer. Some limitations and prohibitions may apply to the deductibility of certain expenses.

In determining taxable income, taxpayers may deduct all paid taxes related to their economic activity, except for certain items such as the debit tax (only 50% is deductible, regardless of whether the tax relates to an income-producing activity) and the equity tax or the single-use plastic tax, which are not deductible.

Payments to entities resident outside Colombia are deductible if they meet the general rules above and, for expenses related to Colombian-source income, if the applicable withholding tax is paid. In general, if no withholding tax applies, the expenses are allowed as deductions, up to a maximum of 15% of the taxpayer's net income before considering all costs and expenses abroad not subject to Colombian withholding tax. Costs or expenses incurred abroad that are related to foreign-source income subject to

income tax in Colombia are deductible if the general requirements are met, even if withholding tax is not imposed, and the 15% limitation mentioned above does not apply.

Royalty payments between related parties for the use of intangibles that were formed in Colombia and royalty payments related to the acquisition of finished goods are not deductible. However, in the latter case, deductibility can be accepted to the extent it is established that the royalty is not already included in the value of the acquired finished good.

Imported technology agreements should be registered with the tax authority to allow the deductibility of the expense. The registration should be made within six months for its subscription (three months when it is an amendment).

Interest and other financial expenses resulting from liabilities owed to foreign related companies are deductible if they comply with the transfer-pricing rules (see Section E) and thin-capitalization provisions.

Payments made to foreign related parties that comply with the transfer-pricing rules (see Section E) may be deductible even if no income tax withholding is required. However, the 15% limitation described above applies to such payments.

Management and direction (overhead) expenses are deductible for Colombian tax purposes if all of the following conditions are satisfied:
- They are related to services rendered.
- The withholding tax has been applied.
- They are supported by transfer-pricing studies.

Certain nontaxable income, special deductions, exempt income and tax credits are limited to an amount equal to 3% of net taxable income, calculated without applying the special deductions subject to the limitation. Items subject to the limitation, among others, include the following:

- Special deduction related to payments made by the employer for the employee's education (or the employee's family)
- Tax credit for investments in environmental control, conservation and improvement
- Special deduction related to labor payments made to female employees who are victims of domestic violence

Income generated from the following activities is exempt from income tax (specific requirements, conditions and limitations apply in each case):
- Income received from another country in the Andean Community (Bolivia, Ecuador and Peru)
- Energy generated from nontraditional sources
- Certain income related to low-income housing projects, including the sale of property devoted to the development of these projects, the first sale of low-income houses, and certain interest on loans for the acquisition of low-income housing (under certain requirements)

Some activities that were exempted in the past, may be still grandfathered for those taxpayers that complied with the requirements to benefit from them.

Foreign-exchange gains or losses. Foreign-exchange gains or losses are recognized for tax purposes at the time of actual realization.

Inventories. Inventories are generally valued using the permanent or periodic inventory methods.

Provisions. Provisions are not allowed as deductions in determining taxable income, except for provisions for accounts receivables and pensions assumed by the employer (in the cases where applicable), which are subject to special tax rules.

Depreciation. Depreciation for tax purposes should follow the depreciation for accounting purposes. However, the annual depreciation rate for tax purposes cannot exceed certain percentages, depending on the type of asset.

If machinery and equipment are used daily in 16-hour shifts, the taxpayer may request an additional 25% on the depreciation rate. If the use exceeds 16 hours, proportional additional depreciation can be requested. Land is generally not depreciable or amortizable.

The balance of the assets pending to be depreciated as of 31 December 2016 should be depreciated under the old rules applicable before 2017.

Amortization. In general, amortization of ordinary and necessary investments used for the purposes of the business is allowed under certain requirements. The amortization of the investments should be made during the time that the related income is expected to be earned, but the amortization period may not be less than five years.

Advance payments should be amortizable as the prepaid services are received.

Acquired identifiable intangibles can be generally amortized to the extent they have a useful limited life. Certain limitations on amortization may apply to identifiable intangibles acquired from related parties.

Goodwill is not amortizable.

Amortizable costs and expenses for the oil industry can be amortized using the units-of-production method. If investments in exploration are unsuccessful, the costs and expenses may be claimed as deductions in the year in which this is determined or in the following two years. Investments made between 2017 and 2022 with respect to the evaluation and exploration stages are amortizable using a five-year, straight-line method. Beginning in 2023, the five-year accelerated amortization for investments in exploratory activities carried out for oil, gas and mining investments is repealed.

Assets and investments pending to be amortized as of 31 December 2016 should be amortized under the old rules applicable before 2017.

Relief for tax losses. Tax losses may be carried forward for 12 years. Tax losses generated up to 2016 can be carried forward with no time limitation.

Restrictions apply to the transfer of losses in mergers or spin-offs (tax-free events for the participating companies for Colombian tax purposes if certain requirements are observed). The surviving entity can offset losses originated in the merged entities (including the surviving entity itself), but only up to the percentage of the equity participation of the merged entities in the surviving entity's equity. Similar rules apply to spin-offs of companies.

The special treatment of tax losses in mergers and spin-offs applies only if the economic activity of the companies involved remains the same after the merger or spin-off occurs.

Inflation adjustment. An optional tax readjustment of fixed assets may be applied. This readjustment is calculated by applying the percentage certified by the government for the adjustment of the tax unit. The readjustment affects the tax basis for the transfer of fixed assets and the determination of taxable net equity. Although the inflation adjustments were eliminated, the accumulated inflation adjustments can be depreciated.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; imposed, unless expressly excluded by law, on sales of tangible assets and intangibles related to industrial property, on imports of movable tangible assets and on most services rendered in Colombia or from abroad to a Colombian recipient of the services	
General rate	19%
Basic products, such as coffee and wheat	5%
National consumption tax; imposed on, among other items, food services in restaurants, mobile phone services and certain cars	4% to 16%
Industry and commerce tax; a municipal tax on annual or bimonthly gross revenue (other tax periods may apply, depending on the jurisdiction); rates vary depending on the company's activity and municipality; tax effectively paid during the year is a 100% deductible expense	
Bogotá	0.414% to 1.4%
Municipalities other than Bogotá	0.2% to 1%
Signs and Posters Tax; imposed on enterprises with advertisements in public places; tax rate applied to the industry and commerce tax due	15%
Tax on Visible Advertisement Hoardings; imposed on each advertisement on hoardings or billboards with a size equal to or larger than 8 square meters (86,111 square feet)	5 minimum wages
(The minimum wage for 2024 is COP1,300,000 [approximately USD333].)	

Nature of tax	Rate
Debit tax (financial transactions tax); imposed on the amount of each financial, transaction such as disposals of funds from savings accounts, current bank accounts and deposit accounts, which involve cash withdrawals by checks and through other mechanisms, and on the amount of certain accounting entries	0.4%
Equity Tax; Colombian individuals and nonresident (entities and individuals) are subject to this tax if their net equity for tax purposes is equal to or higher than 72,000 Unidad de Valor Tributario (UVT, tax value unit) (approximately USD869,000) as of 1 January of each year; for nonresidents, only Colombian assets should be considered; for nonresidents, shares in Colombian companies, account receivables from Colombian residents, portfolio investment and/or leasing agreements with Colombian lessees are not part of the equity tax base	0.5% to 1.5% (up to 2026) 0.5% to 1% (from 2027)
Tax on single-use plastics; this tax is levied on the sale, self-consumption and importation of single-use plastics used for packaging, wrapping or packing goods	0.00005 tax units (approximately COP2.4) for each gram
Tax on sugary beverages; from 1 November 2023, this tax will apply to ultra-processed sugary beverages, as well as concentrates, syrups and powders that after being mixed or dissolved produce sugary beverages	COP28 to COP55 for each 100ml (for 2024)
Tax on ultra-processed food; from 1 November 2023, some ultra-processed foods will be subject to tax when they have added sugar, salt, sodium and/or fats; tax will be determined over the sale price	10% (2023) 15% (2024) 20% (from 2025)
Social security contributions and payroll taxes	
Pension (foreigners who remain in Colombia in accordance with an employment agreement may voluntarily enroll in the pensions system); contributions calculated on the monthly ordinary salary of the employee; if the monthly salary is more than 25 times the minimum wage, contributions to the social security regime are	

Nature of tax	Rate
calculated on a maximum base of 25 minimum wages; for employees earning integral (all-inclusive) salary, 70% of the salary is the base, but the maximum limit described above applies	
Employer	12%
Employee	4%
Health; contribution calculated on the monthly ordinary salary of the employee; subject to the same maximum limitation and integral salary rules as the pension contributions	
Employer	8.5%
Employee	4%
(Employers are not required to pay the 8.5% health contribution for employees earning less than 10 minimum legal wages.)	
Solidarity Fund; payable by employees on their monthly ordinary salary; contribution required only for employees who earn a monthly salary greater than four minimum wages; subject to same maximum limitation and integral salary rules as pension contributions; rates vary according to the amount of monthly salary earned by employee	
Employees earning up to 16 minimum wages	1%
Employees earning between 16 and 17 minimum wages	1.2%
Employees earning between 17 and 18 minimum wages	1.4%
Employees earning between 18 and 19 minimum wages	1.6%
Employees earning between 19 and 20 minimum wages	1.8%
Employees earning between 20 and 25 minimum wages	2%
Labor risk; payable by employer on monthly ordinary salary; rate depends on a legally established scale based on the degree of risk represented by the economic activity of the company; the Social Security office makes the classification at the time of enrollment; subject to same maximum limitation and integral salary rules as pension contributions	0.522% to 6.96%
Payroll taxes to National Learning Service (SENA), Colombian Family Welfare Institute (ICBF) and Family Compensation Fund; payable by employer on the monthly ordinary salary earned by the employee; no ceiling applies; subject to same integral salary rules as pension contributions; reduced and progressive rates apply to small businesses (Employers are not required to pay the SENA [2%] and ICBF [3%] contributions with respect to employees earning less than 10 minimum legal wages. However, for these	

Nature of tax	Rate
employees, employers are still required to pay the Compensation Fund contribution [4%].)	9%
Custom duty, on Cost, Insurance, Freight (CIF) value; general rates	0% to 15%
Real estate tax; municipal tax imposed on the ownership of land or immovable property; tax rate is applied to the commercial value of the property; rate set by the municipality and varies according to the location and use of the property; general range of rates	0.1% to 3.3%

E. Miscellaneous matters

Foreign-exchange controls. Colombia has a flexible foreign-exchange regime. However, the foreign-exchange regulation provides that some operations must be channeled through the foreign-exchange market (controlled operations). These operations have special reporting procedures and obligations. Any other operation is considered a free-market operation and consequently channeling through the foreign-exchange market is not mandatory. The following are the controlled operations:

- Foreign loans
- Foreign investment in Colombia and Colombian investment abroad
- Foreign-trade operations (imports and export of goods)
- Derivatives transactions
- Endorsements and warranties

The operations under the controlled exchange market must be channeled through authorized foreign-exchange intermediaries (financial institutions and commercial banks) or compensation accounts (foreign bank accounts that are registered with the Colombian Central Bank [Banco de la República de Colombia]).

Exchange operations that are not covered by the controlled market are conducted through the free market. These operations include the purchase of foreign currency that is used to open free-market bank accounts abroad.

Foreign investors may receive abroad, without limitation, annual profits derived from an investment that is registered with the Colombian Central Bank. This operation must be reported to the Colombian Central Bank within the legal term and the report must follow the procedures set forth in the law.

Nonresident individuals are not allowed to grant foreign loans to Colombian residents. However, some exceptions to this prohibition applies. The loans must be registered with a foreign-exchange intermediary, prior or simultaneously to the disbursement of the loan, and the cash flow of foreign currency related to the foreign loans must be channeled. These loans can be stipulated, disbursed and paid in Colombian or foreign currency, as agreed by the parties.

Controlled foreign companies. The controlled foreign company (CFC) regime applies to Colombian tax residents (individuals or entities) that directly or indirectly hold an interest equal to or greater than 10% of the capital or of the profits of a foreign entity that is considered a CFC.

CFCs are corporations, as well as investment vehicles, such as trusts, collective-investment funds, and private interest foundations, which meet the conditions to be considered a related party for transfer-pricing purposes.

For income tax purposes, Colombian taxpayers should immediately recognize the net profits of the CFC derived from passive income, in proportion to their participation in the CFC's capital or profits, without the need to wait to receive a distribution of profits in Colombia.

Under this regime, passive income generally includes the following:
- Dividend and profit distributions from a company or investment vehicle
- Interest
- Income derived from the exploitation of intangibles
- Income originated from the sale of assets that generates passive income
- Income from the sale or lease of immovable property
- Income derived from the sale or purchase of tangible goods acquired from (or sold to) a related party if the manufacturing and consumption of the goods occurs in a jurisdiction different from the one in which the CFC is located or is tax resident
- Income from the performance of certain services in a jurisdiction different from the one in which the CFC is located or is tax resident

A Colombian tax resident that recognizes taxable income under the application of the CFC regime may request a tax credit for taxes paid abroad with respect to the passive income.

Dividends and benefits that are distributed by a CFC and that have been already taxed in Colombia, should be considered nontaxable income for the Colombian taxpayer.

Debt-to-equity rules. Interest paid on direct or indirect loans with related parties that in average exceeds a 2:1 debt-to-equity ratio is not deductible. For this purpose, the equity taken into account is the taxpayer's net equity for the preceding year, and the debt taken into account is debt that accrues interest.

Transfer pricing. The transfer-pricing regime includes several of the methods contained in the OECD rules. Significant aspects of the transfer-pricing system in Colombia include the following:
- All events that create economic linkage are specifically mentioned in the tax code.
- The rules do not cover local operations between related companies established in Colombia, except for transactions between local entities and free-trade zone users.
- Parties that have gross equity exceeding 100,000 tax units (approximately USD1,207,000) as of the last day of the tax year or gross revenues for the year in excess of 61,000 tax units (approximately USD736,000) must prepare and file transfer-pricing information returns.
- For supporting documentation purposes, transactions above 45,000 tax units (approximately USD543,000) threshold, by type of transaction, are subject to transfer-pricing analysis. For financing transactions with related parties, the amount of the

debt must be considered when determining the total transaction amount.
- Transactions with residents or those domiciled in tax havens or in preferential regimes are subject to transfer-pricing analysis if the amount, by type of transaction, exceeds 10,000 tax units (approximately USD120,000). The tax haven jurisdiction list is issued by the Colombian government. The preferential regime determination should be made based on certain criteria provided in the regulations.
- Penalties are imposed for not meeting filing requirements, submitting erroneous or incomplete reports or failing to meet other requirements.

Transfer-pricing documentation includes the Local File and the Master File with the multinational group's global relevant information.

In addition, for multinational groups with a Colombian parent entity, a Country-by-Country Report (CbCR) must be completed under the following circumstances:
- The parent is resident in Colombia.
- The parent has affiliates, subsidiaries, branches or PEs abroad.
- The parent is not a subsidiary of another entity resident abroad.
- The parent is required to prepare, submit and disclose consolidated financial statements.
- The parent has annual consolidated revenue equal to or exceeding 81 million tax units (approximately USD978 million).

A non-Colombian parent can designate an entity resident in Colombia or a resident abroad with a PE in Colombia as the responsible party for providing the CbCR to the Colombian tax authority.

Colombian taxpayers that do not provide a CbCR must file a notification indicating which entity of the multinational group is providing this report and the jurisdiction in which the report is being provided.

Anti-abuse rules. Under anti-abuse rules, tax abuse is defined as the use or implementation of a transaction or several transactions without apparent commercial or economic purpose and with the aim of obtaining a tax benefit.

The tax authority can recharacterize any abusive transaction. It is understood that a transaction has no commercial or economic purpose if the following circumstances exist:
- The transaction is developed in a way that is not economically or commercially reasonable.
- The transaction gives rise to a high tax benefit that is not in line with the economic or business risks assumed by the taxpayer.
- The legal agreement is not aligned with the real will of the parties.

F. Tax treaties

Colombia has entered into a multilateral tax treaty with Bolivia, Ecuador and Peru, which follows the source criteria. In addition, Colombia has double tax treaties in effect with Canada, Chile, the Czech Republic, France, India, Italy, Japan, Korea (South), Mexico, Portugal, Spain, Switzerland and the United Kingdom that are based on the OECD model convention.

Colombia has entered into tax treaties covering certain international air transportation services with several countries, including Argentina, Brazil, France, Germany, Italy, Panama, Türkiye, the United States and Venezuela.

Colombia has also signed double tax treaties with Brazil, Luxembourg, the Netherlands, the United Arab Emirates and Uruguay, which are not yet in effect.

The following table presents the withholding tax rates for dividends, interest and royalties under Colombia's double tax treaties.

	Dividends %	Interest %	Royalties %
Canada	5/15	10	10
Chile	0/7/35 (a)	5/15	10
Czech Republic	5/15/25	0/10	10
France	5/15	0/10	10
India	5/15	0/10	10
Italy	5/15	0/5/10	10
Japan	0/5/10/15	0/10	2/10
Korea (South)	5/10/15	0/10	10
Mexico	0/33	0/5/10	10
Portugal	10/33	10	10
Spain	0/5/35 (a)	0/10	10
Switzerland	0/15	0/10	10
United Kingdom	0/5/15	0/10	10
Non-treaty jurisdictions (b)	20/35	0/5/15/20	20

(a) Dividends that are not taxed at the corporate level are subject to a tax rate of 35% (for 2024) at the shareholder level. However, the 35% rate may be reduced if the dividends are exempt from income tax at the corporate level and are reinvested for a three-year term.

(b) For details regarding these rates, see Section A.

A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30
Special Capital Gains Tax Rate for Mining Companies	30 (b)
Branch Tax Rate (%)	30
Withholding Tax (%) (b)	
Dividends	20 (c)
Interest	20 (d)
Royalties	20 (e)
Services	14 (f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (g)

(a) The corporate income tax rate is 30% for all companies registered in the Democratic Republic of Congo (DRC).
(b) See Section B.
(c) The rate of dividend withholding tax for mining companies is 10%.
(d) Under the amended Mining Code, dated 9 March 2018, interest on loans abroad to mining companies is not subject to withholding tax if the following conditions are satisfied:
- The loan is exclusively used for the mining project.
- The interest rates and other borrowing terms for carrying out the projects are established in accordance with the arm's-length principle.

(e) The net amount of royalties is subject to tax. For this purpose, net royalties equal gross royalties minus professional expenses, or 30% of gross royalties (resulting in an effective tax rate of 20%).
(f) This withholding tax applies to payments for services provided to Congolese companies by foreign companies and individuals without a permanent establishment in the DRC. The tax base is the gross amount of the applicable invoice.
(g) Under the amended Mining Code, dated 9 March 2018, the carryforward period for mining companies is limited to five years following the year of the loss.

B. Taxes on corporate income and gains

Corporate income tax. Congolese companies are taxed on the territoriality principle. As a result, companies carrying on a trade or

business outside the Democratic Republic of Congo (DRC) are not taxed in the DRC on the related profits. Congolese companies are those registered in the DRC, regardless of the nationality of the shareholders or where the company is managed and controlled. Foreign companies (for example, branches) engaged in activities in the DRC are subject to Congolese corporate tax on Congolese-source profits only.

A company is considered to have a permanent establishment in the DRC if it satisfies either of the following conditions:

- It has a fixed place of business in the DRC, including an effective place of management, branch, office, factory, plant, workshop, agency, store, offices, laboratory, buying and selling counter, warehouse, real estate property under rental agreement, a mine, an oil or gas well, a quarry or any other place of exploitation and extraction of natural resources or any other fixed or permanent place of business, or in absence of a fixed place of business, it carries out a professional activity directly, under its own name, during a period of at least six months.
- It provides services, including advisory services, through employees or other individuals engaged by a company for that purpose, and the activities of this nature continue for a period or periods that represent a total of more than six months within any 12-month period.

Foreign companies are taxable on the benefits that they realize through their permanent establishment in the DRC. It further states that "when a person other than an agent with an independent status acts on behalf of a foreign company, that person is considered as having a permanent or fixed establishment in the DRC for all activities that this person carries out for this company, if the said person:

- has power in the DRC, which he usually exercises to allow it to enter into contracts on behalf of that company;
- does not have such power, he usually keeps in the DRC a regular stock of goods for delivery on behalf of the foreign company."

Rates of corporate tax. The regular corporate income tax rate is 30%.

The minimum tax payable is 1% of the annual turnover for larger corporations.

For small corporations with annual revenues of less than CDF10 million, the corporate income tax is set at CDF30,000. For average-sized corporations with annual revenues between CDF10 million and CDF80 million, the corporate income tax rate is 1% of the annual revenue for sales of goods and 2% for the provision of services.

Capital gains. Increases resulting from capital gains and depreciation that are realized and either realized or expressed in the accounts or inventories are included in profits and are subject to tax at a rate of 30%.

Increases resulting from unrealized capital gains that are expressed in the accounts or inventories and that are not treated as profits are not yet taxable. This rule applies only if the taxpayer holds a regular accounting and if it fulfills its declarative obligations.

Increases resulting from realized capital gains on buildings, tools, materials and movable assets (regardless of whether they result from rent payments), as well as on participations and portfolios, are taxable to the extent that the sales price exceeds the acquisition price or cost. A deduction is made from the amount of the depreciation that has already been claimed for tax purposes.

Special tax on capital gains for mining companies. Law No. 007/2002 of 11 July 2002 on Mining Code and Decree No. 038/2003 of 26 March 2003 regarding the Mining Regulations, as amended and completed to date by the Law No. 18/001 of 9 March 2018, and Decree No. 18/024 of 8 June 2018, introduced a special tax at a rate of 30% on capital gains from the sale of shares (Article 253 bis of the Mining Code and Article 529 bis of the Mining Regulations). Ministerial Order No. CAB/MIN/FINANCES/2020/021 of 3 December 2020 set out the terms of calculation, filing and settlement of the special tax on capital gains from the sale of shares.

Administration. The fiscal year extends from 1 January to 31 December. Tax returns must be filed by 30 April.

Under the 2024 Financial Law corporate tax installments, each representing 30% of the previous year's tax base for the first two installments, and 20% for the third installment, must be paid before 1 August, 1 October and 1 December of the year in which taxable income is generated, using a provisional installment payment slip according to the model set by the tax administration. The balance of tax due must be paid by the following 30 April.

A penalty of 2% per month is assessed for late payment of tax. Tax is fixed automatically if a tax return is not filed.

Dividends. In principle, dividends paid are subject to a 20% withholding tax. The rate of dividend withholding tax for mining companies is 10%. A dividend withholding tax applies to branches.

Foreign tax relief. In general, foreign tax credits are not allowed. Income subject to foreign tax that is not exempt from Congolese tax under the territoriality principle is taxable.

C. Determination of trading income

General. Taxable income is based on financial statements prepared in accordance with principles set by the Organization for the Harmonization of Business Law in Africa (Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA) Accounting Act, except for banks and insurance companies. The net amount of income is taxed. This amount equals gross income minus business expenses incurred during the tax year to acquire and retain the income. Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Head office, remuneration or management fees for services paid to nonresidents that are not justified
- Head office overhead or remuneration for certain services (studies and technical assistance) paid to nonresidents
- Expenditure of a personal nature, such as maintenance of household, appraisal fees, holidays and other expenses not necessary for the profession

- Corporate income tax, as well as real tax (tax on movable assets, tax on vehicles or tax on mining concessions), to the extent that the real tax does not constitute an operating expense
- All judicial or administrative fines, and fees and charges relating to breaches by income beneficiaries
- Certain specific charges, gifts, subsidies and penalties
- Directors' fees allocated under the Corporations Act to members of the General Council
- Expenditures on leased property, including depreciation of the property
- Provisions for losses, expenses or depreciation of assets, excluding provisions for the recovery of mineral deposits and provisions for the recovery of bank capital
- Commissions and brokerage fees if it cannot be proven that the tax on turnover (see Section D) has been paid for these items
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director)

Donations and subventions. Under the 2023 Financial Law, donations and subventions are deductible if paid to the Social Fund of the DRC (Fonds Social de la République), to research organizations, to public interest organizations of philanthropic and social purposes, and to sport associations located in the DRC, up to a limit of 0.5% of the annual turnover, and if justified or documented.

Telecommunications costs. Fifty percent of telecommunication costs are deductible. The 2023 Finance Law adds that the internet costs are 100% deductible provided the internet connection is used for professional purposes only.

Entertainment costs. Forty percent of entertainment costs remain deductible.

Interest paid to shareholders. Under the 2023 Finance Law, interest paid to the shareholders that legally or factually have the power to manage the company are deductible only if the sums put at the disposal of the company do not exceed, for all the shareholders, the amount of the paid share capital.

Inventories. Inventories are normally valued at their historical cost or acquisition cost.

Provisions. In determining accounting profit, companies must implement certain provisions, such as a provision for risk of loss or for certain expenses. These provisions are not deductible for tax purposes. However, provisions for recovery of bank capital and provisions for the recovery of the mineral deposit are deductible for tax purposes.

Tax depreciation. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by tax law. The following are some of the specified annual rates.

Asset	Rate (%)
Buildings	2 to 5
Office equipment	10
Motor vehicles	20 to 25
Plant and machinery	10

Companies can also opt for a regressive method for tax depreciation of specific assets with an annual rate of two to three times the straight-line rate.

Relief for tax losses. Tax losses incurred in a tax year may be carried forward indefinitely. However, the deduction of the available tax losses is capped at 60% of the annual taxable income.

Under the amended Mining Code, dated 9 March 2018, the carryforward period for mining companies is limited to five years following the year of the loss.

Groups of companies. The DRC does not have a fiscal integration system equivalent to a consolidated filing position.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	
Standard rate	16
Reduced rate	8
Payroll taxes	
Annual income not exceeding CDF43,200,000; progressive rates	3 to 40
Annual income exceeding CDF43,200,000; flat rate	30
Exceptional income tax for expatriates (IERE)	
Mining companies; Article 244 bis of Law No. 18/001 of 9 March 2018, which reformed the Mining Code, increases the exceptional income tax rate to 12.5% for the first 10 years of the project and provides for the common rate of 25% for the following years	12.5
Other companies	25
Social Security National Institute (Caisse national de sécurité sociable, or CNSS) contributions; payable monthly	
Employers	13
Employees	5
National Institute for Professional Preparation (Institut national de préparation professionnelle, or INPP); payable monthly by employers	1 to 3
National Agency for Labor (Office National de l'Emploi or ONEM); payable monthly by employers	0.2

E. Miscellaneous matters

Foreign-exchange controls. The currency in the DRC is the Congolese franc (CDF). The exchange rate is variable.

In the DRC, the Central Bank of Congo regulates foreign-exchange controls. It also supervises the regulation on the transfer of currency. Cash transfers from or into the DRC are not subject to restrictions if they do not exceed the equivalent of USD10,000. An exchange control fee of 0.2% is levied on payments to or from abroad.

Debt-to-equity rules. The DRC does not have any thin-capitalization rules, but several measures may apply to related-party transactions (see *Transfer pricing*).

Transfer pricing. The DRC has several measures applicable to related-party transactions that are not conducted on an arm's-length basis.

These provisions include the disallowance of loan interest with respect to rates exceeding the annual average of the effective rates charged by the credit institutions of the country in which the lending company is established and the repayment of principal beyond five years.

Management fees paid to a related party may be deducted from the corporate income tax base if the following conditions are satisfied:

- The services rendered can be clearly identified (that is, they are genuine services that are effectively rendered and directly related to operating activities).
- The services cannot be rendered by a local company (that is, overhead expenses recharged to the local entity are excluded).
- The amount paid for the services corresponds to the remuneration paid in identical transactions between independent companies.

These arm's-length requirements are consistent with those set forth in the Mining Code.

Transfer-pricing documentation requirements also apply in the DRC. As a result, companies must put at the disposal of the tax administration during a tax audit, general and specific information on an affiliated group of companies (Master File and Local File), including the following:

- General description of the deployed activity, including changes that occurred during the year
- A general description of the legal or operational structures of the affiliated group of companies, including identification of the related companies engaged in transactions involving the company established in the DRC (local company)
- A general description of the function performed and risk assumed by the affiliated companies as soon as they affect the local company
- A list of the main intangible assets owned, including patents, trademarks, trade names and know-how, relating to the local company
- A general description of the group's transfer-pricing policy
- A description of transactions made with other affiliated companies, including the nature and amount of cash flows, such as royalties
- A listing of the cost-sharing agreement, copies of preliminary agreements related to transfer pricing that are concluded under the conditions of the regulation, and the prescription relating to the determination of transfer pricing, affecting the results of the local company
- Presentation of the method or methods for determining transfer pricing, in compliance with the arm's-length principle, including an analysis of the functions performed, assets used and risks

assumed, and an explanation concerning the selection and application of the methods used
- An analysis of comparative elements considered as relevant by the company if the selected method requires it

The transfer-pricing documentation (a condensed version) must be filed with the tax administration within two months after the filing of the corporate income tax return.

In addition, the corporate income tax law disallows branches from deducting overhead charges incurred by the parent company and charged back to the branch.

Certification of the financial statements. Before 2023, annual financial statements had to be certified as correct by the taxpayer or its representative and countersigned by either the accountant or advisor. From 2023, to be accepted by the tax administration, the financial statements must be certified by a chartered accountant duly registered at the national association of the chartered accountants in accordance with the conditions defined by a decree from the Minister of Finance.

Companies subject to the certificate are all companies established in the DRC, including those required by law to use a specific accounting framework other than SYSCOHADA (for example, banks, microfinance institutions, insurance companies and social security). Exceptions are provided for small businesses that have a turnover of less than CDF80 million and that, in accordance with tax legislation, must keep their accounts using the minimal cash system.

F. Tax treaties

The DRC has entered into double tax treaties with Belgium and South Africa. The following are the withholding tax rates under the treaties.

	Dividends %	Interest %	Royalties %
Belgium	10/15 (a)	10	10
South Africa	5/15 (b)	10	10
Non-treaty jurisdictions (c)	20	20	20

(a) The 10% rate applies if the Belgian recipient company was eligible under the Investment Code or another investment incentive and if it holds at least 25% of the capital of the payer. Otherwise, the rate is 15%.
(b) The 5% rate applies if the South African recipient company holds at least 25% of the capital of the payer. Otherwise, the rate is 15%.
(c) For further details, see Section A.

A. At a glance

Corporate Income Tax Rate (%)	28 (a)
Capital Gains Tax Rate (%)	20/28 (b)
Branch Tax Rate (%)	15 (c)
Withholding Tax (%)	
Dividends	15 (d)
Interest	15
Royalties from Patents, Know-how, etc.	20
Payments for Non-commercial Services and Activities	10

Revenues Earned by Certain Foreign Companies	7.26/20 (e)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

(a) The minimum tax is 1% of turnover. The corporate income tax rate is 25% for agricultural companies.
(b) In certain circumstances, the tax is deferred or reduced (see Section B). For foreign companies, a special capital gains tax rate of 20% applies.
(c) The branch tax is calculated based on the net profit decreased by the amount of the corporate income tax, to which a tax rebate of 30% is applied.
(d) This tax also applies to directors' fees, nondeductible expenses and adjustments of profits following a tax examination. For directors' fees, the rate is 17%.
(e) For details, see Section B.

B. Taxes on corporate income and gains

Corporate income tax. Congolese companies are taxed on the territoriality principle. As a result, Congolese companies carrying on a trade or business outside Congo are not taxed in Congo on the related profits. Congolese companies are those registered in Congo, regardless of the nationality of the shareholders or where the company is managed and controlled. Foreign companies engaged in activities in Congo are subject to Congolese corporate tax on Congolese-source profits only.

Tax rates. The regular corporate income tax rate is 28%.

The minimum tax payable is 1% of the annual turnover and cannot be less than XAF1 million (or XAF500,000 if turnover is less than XAF10 million a year). For petroleum products retailers and businesses, the tax base for the minimum tax is the margin because the sales prices are regulated and capped by the state. For companies specializing in brokerage activities, the tax base consists of the commissions (brokerage fees). The minimum tax is fully deductible for corporate income tax purposes, unless the amount of the minimum tax exceeds the corporate income tax.

Under the 2024 Finance Law, the rate of minimum tax is increased to 2% for companies that incur tax losses two years in a row. This surcharge is not deductible for corporate income tax purposes. However, in the company's first profit-making year after incurring the losses, one-half of the 2% tax is deductible.

The corporate income tax rate is 25% for agricultural companies, micro-finance companies and private educational institutions registered as companies.

The branch tax is imposed at a rate of 15%. It is calculated based on the net profit decreased by the amount of the corporate income tax, to which a tax rebate of 30% is applied.

A withholding tax at a rate of 7.26% is imposed on the turnover of foreign companies that are engaged in activities in Congo on a temporary basis (that is, for a maximum duration of one year) if they are covered by a Temporary Authorization to Operate (the French acronym is ATE) issued by the trade authorities. A 20% withholding tax is imposed on income sourced in Congo that is derived by foreign companies not established in Congo, unless

otherwise provided by a double tax treaty between Congo and the residential country of the beneficiary.

Corporations may apply for various categories of priority status and corresponding tax exemptions. The priority status varies depending on the nature of the project and the level of investments.

The Charter of Investments may grant a tax exemption for a three-year period for new activities in industry, agriculture, forestry and mining. In addition, under the General Taxes Code, a tax exemption for a two-year period may be granted for such new activities.

Capital gains. Capital gains are taxed at the regular corporate rate. The tax, however, can be deferred if the proceeds are used to acquire new fixed assets in Congo within three years or in the event of a merger.

If the business is totally or partially transferred (directly or indirectly) or discontinued, only one-half of the net capital gains is taxed if the event occurs less than five years after the startup or purchase of the business, and only one-third of the gains is taxed if the event occurs five years or more after the business is begun or purchased. The total gain is taxed, however, if the business is not carried on in any form by any person.

Capital gains derived by natural or legal entities domiciled abroad on the sale of all or part of their shares in the capital of companies registered under Congolese laws are subject to a special tax at a rate of 20%. This withholding tax is payable at the time of registration of the deed of disposal.

Administration. The fiscal year extends from 1 January to 31 December. Financial statements must be filed by 20 May.

Companies must pay the minimum tax between 10 March and 20 March, and corporate tax must be paid in four installments between the 10th and 20th days of February, May, August and November. Each installment must be equal to 20% of the preceding year's tax. The balance of tax due must be paid by the following 20 May.

A 50% penalty is assessed for late payment of tax.

Dividends. Dividends paid are subject to a 15% withholding tax. Resident corporations are taxed on the gross dividend; a corresponding 15% tax credit is available for double tax relief.

After three years, business profits credited to the non-compulsory reserve are deemed to be dividends and are accordingly subject to the 15% withholding tax on dividends.

A parent corporation may exclude from taxation the net dividends received from a Congolese or foreign subsidiary if the following conditions are satisfied:

- The parent company is a Congolese public limited company or limited liability company that holds 30% or more of the capital of the subsidiary that is also a public limited company or a limited liability company.
- The subsidiary carries on only industrial, agricultural, mining, forestry, large-scale fishing or stock-breeding activities.

No withholding credit is allowed if the net dividends are excluded from taxation.

A Congolese public limited company or limited liability company may exclude from taxation 90% of the net dividends received from a public limited company or limited liability company located in Congo or in another Central African Economic and Monetary Community (CEMAC) country if the parent company holds 25% or more of the capital of the payer of the dividends.

Foreign tax relief. In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from Congolese tax under the territoriality principle is taxable net of the foreign tax. A tax treaty with France, however, provides a tax credit on dividends.

C. Determination of trading income

General. Taxable income is based on financial statements prepared in accordance with generally accepted accounting principles and the standard statements of the Organization for Harmonization of Business Law in Africa (OHADA) treaty. The members of OHADA are Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic Republic of), Congo (Republic of), Côte d'Ivoire, Equatorial Guinea, Gabon, Guinea, Guinea-Bissau, Mali, Niger, Senegal and Togo.

Business expenses are generally deductible unless specifically excluded by law. To be deductible, these expenses must meet the following specific conditions:

- They must relate to the direct interest of the company.
- They must result in an effective cost and be accompanied by supporting documents.
- They must impact the net assets of the company.
- They must be accounted among the costs of the financial year in which they are incurred.
- They must reflect a relevant management of the company. Otherwise, they are considered as abnormal management acts.

Nevertheless, there are some expenses that are not deductible by virtue of the law. For example, the following expenses are not deductible:

- Head office overhead or remuneration for services paid to nonresidents that exceeds 20% of taxable income before the deduction of such items.
- Head office fees or remuneration for certain services (studies and technical assistance) paid to nonresidents by companies engaged in building and public works, by engineering firms and by accounting firms, to the extent that the expenses exceed 2% of turnover.
- Royalties from patents, brands, models or designs paid to a nonresident corporation participating in the management of, or owning shares in, the Congolese corporation.
- Interest paid to a shareholder in excess of the central bank annual rate plus three points and, if the shareholder is in charge of management, interest on the portion of the loan exceeding one-half of the capital stock. The same rule applies to interest

paid to companies or financial institutions that are part of the same group.
- Interest paid on loans that are contracted with nonresident companies and that are not declared to the competent services of the Ministry of Finance in accordance with the foreign-exchange regulations.
- Payments made from banks accounts in foreign currency held in or out of the CEMAC area, without a proper authorization of the central bank.
- Commissions and brokerage fees exceeding 5% of purchased imports.
- Certain specific charges, gifts, subsidies and penalties.
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director).
- Corporate income tax.

Inventories. Inventory is normally valued at the lower of cost or market value.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they are linked to clearly specified losses or expenses that are likely to occur and if they appear in the financial statements and in a specific statement in the tax return.

Provisions established for annual leaves of employees, retirement indemnities and receivables against the state are never deductible.

Tax depreciation. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by tax law. The following are some of the specified annual rates.

Asset	Rate (%)
Commercial and industrial buildings	5
Office equipment	15
Motor vehicles	20 to 33.33
Plant and machinery	10 to 33.33

Heavy new assets acquired for manufacturing, transformation, transport and handling qualify for a special depreciation scheme at a rate of 40% in the year of acquisition if all the following conditions are satisfied:
- The assets are used only in industrial, mining, hydrocarbons, forestry or agricultural activities. For mining, hydrocarbons and forestry activities, the various types of assets eligible for the special depreciation scheme are listed in the joint circular signed by the Minister of Finance and the minister of the concerned sector of activity.
- The assets can be used for a period exceeding three years.
- The total value of the assets exceeds XAF40 million.
- The assets will be intensively used.

The request for the special depreciation scheme must be addressed to the General Director of Taxes within three months following the acquisition of the asset. The authorization to use this scheme is granted by the Minister of Finance.

Relief for tax losses. Losses may be carried forward for three years. Losses attributable to depreciation may be carried forward indefinitely, but they must be reported on the depreciation table. Losses cannot be carried back.

Groups of companies. The Congolese tax law provides for a fiscal integration system and a fiscal regime for holding companies with tax exemptions, particularly with respect to capital gains, dividends and interest on loans.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	18.9
Business activity tax (*patente*); calculated based on annual turnover according to sliding scale	0.040
Registration duties	
On commercial deeds	1
On transfers of real property or businesses	4 to 10
Tax on salaries (TUS)	7.5
Social security contributions, on annual salaries; paid by	
Employer	
Family allowance contribution	10.035
Work accident insurance	2.25
Old-age pension	8
Universal Health Insurance contribution (on total of gross monthly salaries)	4.55
Employee	
Old-age pension	4
Universal Health Insurance contribution (on gross monthly salary)	2.27

E. Miscellaneous matters

Foreign-exchange controls. The Congolese currency is the CFA franc BEAC (XAF). The fixed exchange rate for the CFA franc BEAC is XAF655,957 = EUR1.

Exchange-control regulations exist in Congo for financial transfers outside the franc CFA zone (XAF zone), which is the monetary zone made up of the central African states.

Transfer pricing. The Congolese tax law contains the transfer-pricing measures described below.

From a general perspective, Congolese transfer pricing regulations are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines. Regarding the materiality limit or thresholds for the transfer-pricing documentation, the entities that generate more than or equal to XAF500 million of turnover or have at least XAF500 million of gross assets on the balance sheet at the end of the year must prepare a Local File together with the transfer-pricing return and Country-by-Country Report (CbCR). Transfer-pricing documentation is mandatory and must be filed with the tax authorities every year no later than 20 November (statutory deadline for submission).

Amounts paid by a Congolese company to another entity or a group of companies located outside Congo are considered indirect transfers or profits if the payer is dependent *de jure* or *de facto* on the recipient of the payments and if the tax authorities establish that the payments are excessive or unjustified. This measure applies to certain transactions, including the following:

- Overcharges for purchases
- Payments of excessive royalties
- Loans that are interest-free or have unjustifiable rates
- Discounts of debts
- Advantages granted out of proportion with the benefit provided by a service provider

Payments for the use of patents, marks, drawings and models, interest payments and payments for services made by a Congolese company to a nonresident company located in a country with low or no taxation (for example, tax haven or fiscal noncooperative states), are considered indirect transfers of benefits.

F. Treaty withholding tax rates

The following table lists the withholding rates applicable under Congo's international tax treaties.

	Dividends %	Interest %	Royalties %
France	15	0 (a)	15
Italy	8/15 (b)	0	10
Mauritius	0/5 (c)	5	0
CEMAC countries	5/10 (d)	10	10
Non-treaty jurisdictions	15	15	20

(a) Interest is subject to tax in the recipient's country. Withholding tax is not imposed in the country of source.

(b) The 8% rate applies if the beneficiary holds at least 10% of the registered share capital of the payer. The 15% rate applies in all other cases.

(c) No withholding tax is imposed if the beneficiary holds at least 25% of the registered share capital of the payer. The 5% rate applies in all other cases.

(d) The 5% rate applies if the beneficiary holds at least 25% of the registered share capital of the payer. The 10% rate applies in all other cases.

Reinsurance	5.5 (e)(g)
News Services, Videos and Films	20 (e)(g)
Advance Payments	
Credit and Debit Card Payments	2 (h)
Payments for Professional Services Made by Insurance Companies	2 (i)
Other	30 (e)
Branch Remittance Tax	15
Net Operating Losses (Years)	
Carryback	0
Carryforward	3/5 (j)

(a) The 30% rate is reduced to 20%, 15%, 10% or 5% for companies whose annual gross income does not exceed specified amounts (for further details, see Section B).

(b) The ordinary Capital Gains Tax rate is 15%. For the first sale of goods and rights acquired before 1 July 2019, an alternative rate of 2.25%, assessed on the gross transaction value, is available. However, capital gains are subject to corporate income tax if they are derived from depreciable assets, goods or rights that are part of the taxpayer's activities or if the transaction is part of the ordinary trade or business of the company (for further details, see Section B).

(c) The ordinary Capital Income Tax rate is 15%. However, capital income is subject to corporate income tax if it derives from goods or rights that are part of the taxpayer's activities, or if the transaction is part of the ordinary trade or business of the company (for further details, see Section B).

(d) Dividends may be exempt if the recipient is a local entity that carries out an economic activity and is subject to income tax (for further details, see Section B). The withholding tax is considered a final tax.

(e) This is a final withholding tax that is imposed on non-domiciled companies and non-domiciled individuals.

(f) For further details regarding withholding tax on interest, fees and commissions, see Section B.

(g) Non-domiciled companies engaged in these types of activities through a permanent establishment in Costa Rica that do not comply with requirements to report income or to file an income tax return may be subject to an imputed amount of taxable income equivalent to 10.5%, 15% or 30% of their total gross income derived from Costa Rica. Imputed taxable income is subject to the ordinary corporate income tax rate. For further details, see Section C.

(h) Resolution DGT-R-036-2014 established a 2% withholding requirement for debit or credit card payments processed by financial institutions in Costa Rica. The amounts withheld by the financial institutions are treated as advance payments of the recipient's final income tax liability. The 2% withholding requirement applies only to 88% of the amount of the transaction made with a debit or credit card. The following persons are exempted from this withholding requirement:
- Entities not subject to income tax
- Companies under the simplified tax regime
- Transporters of persons or goods
- Gas stations
- Taxpayers engaged in agricultural activities that do not have an obligation to make partial income tax payments
- Taxpayers that generally do not have an obligation to make partial income tax payments

(i) Resolution DGT-R-55-2017 established that insurance companies must withhold 2% on payments made for "professional services" paid to individuals or companies selling their services through direct contracting or public bid.

(j) Net operating losses may be carried forward for three years. Agricultural companies may carry forward net operating losses for five years. Initial costs (pre-operational expenses) incurred by a local entity may be deducted for corporate income tax purposes within the first five fiscal years from the date the company becomes operational.

B. Taxes on corporate income and gains

Corporate income tax. The Costa Rican tax system operates on the territoriality principle. Therefore, corporations are taxed on local-source income, defined as income derived from services rendered, goods located or investments used within Costa Rica. Significant modifications were introduced through Law No. 10.381 and Executive Decree No. 44262-H. Although these measures included a reinforcement of the territorial principle, which stated that only income from within the Costa Rica's geographical limits is taxable, they also provided exceptionally that foreign-source income will be taxed if it is earned by a nonqualified entity within a multinational group. To be considered a qualified entity, a company must have adequate economic substance in Costa Rica and comply with specific substance requirements.

Corporate income tax rates. The corporate income tax rate is 30%. However, for companies with annual gross income of up to CRC120,582,000 (approximately USD236,509.49), the following progressive rates are applicable:
- 5% for annual net income (taxable income) up to CRC5,687,000 (approximately USD11,154.47)
- 10% for annual net income between CRC5,687,000 and CRC8,532,000 (approximately USD16,734.66)
- 15% for annual net income between CRC8,532,000 and CRC11,376,000 (approximately USD22,312.88)
- 20% on the amount of annual net income exceeding CRC11,376,000 (approximately USD22,312.88)

The amount of the applicable annual gross income is adjusted on a yearly basis.

Free Trade Zone Regime. The Free Trade Zone Regime is an incentive system offered by the Costa Rican government to companies that invest in the country and meet the requirements and

obligations set forth in the Free Trade Zone Law and its regulations. The regime is granted discretionally by the government, mainly based on the proposed investment value for the country's economic development.

Companies operating under the Free Trade Zone Regime that are in the Great Metropolitan Area (GMA) benefit from an income tax exemption of 100% for the first eight years and of 50% for the next four years. Companies located outside the GMA benefit from an income tax exemption of 100% for the first 12 years and of 50% for the next 6 years. The Ministry of National Planning and Economic Policy specifies which areas are considered part of the GMA.

On 22 January 2010, the executive branch of the Costa Rican government published Law No. 8794, which amends and adds certain sections to the Free Trade Zone Regime Law No. 7210. This law created a new category of companies that can apply for the Free Trade Zone Regime. This category is for companies that produce or process goods, regardless of whether the goods are for exportation. Companies in this category are subject to income tax at reduced rates (0%, 5%, 6% or 15%) for a specified number of years depending on whether the company is located inside or outside the GMA or depending on the amount of the investment.

To comply with the international standard of Base Erosion and Profit Shifting (BEPS) Action 5, the Free Trade Zone Regime Law was modified to include the Strategic Eligibility Index for Service Companies as a condition of entry and permanence with respect to the Free Trade Zone Regime for service companies. Therefore, services companies do not have any limitations on the selling of their services to the local market, and the income derived from these sales should be covered by the income tax and dividend tax incentives.

Capital gains. Capital gains are subject to the Capital Gains Tax at a 15% rate that is levied on the sale of tangible or intangible assets. For the first sale of goods and rights acquired before 1 July 2019, taxpayers are allowed to apply a capital gains tax of 2.25% to the gross purchase price.

Capital losses should be deductible against gains subject to Capital Gains Tax if requirements under the Capital Gains Tax rules are met.

The gains are subject to corporate income tax at a general 30% rate if any of the following circumstances exist:
- The sale of the assets is considered to be part of the company's ordinary trade or business.
- The goods or rights are used to generate taxable income.
- The asset being transferred is a depreciable asset.

Capital Income Tax. For purposes of the Capital Income Tax, capital income is classified as "Movable Capital Income" or "Immovable Capital Income."

"Immovable Capital Income" includes income derived from real estate, such as leases, subleases and the creation or assignment of any right of use and enjoyment of immovable property.

"Movable Capital Income" includes, among others, the following types of income:

- Income derived from the transfer of funds to third parties, including repurchases of securities, such as interest derived from financing and loans
- Income derived from leases, subleases and the creation or assignment of any right of use and enjoyment of movable property, intangible assets and other rights such as intellectual property
- Dividends received and other income similar to dividends

As a general rule, income characterized as Immovable Capital Income is subject to a 15% tax rate, which is assessed on 85% of the gross income received by the taxpayer without the possibility of additional expense deductions.

For Movable Capital Income, the applicable tax rate is 15% assessed on the gross income received by the taxpayer, with no deductions allowed.

Alternatively, taxpayers that generate capital income and that have at least one employee engaged in this business activity may elect to characterize this type of income as ordinary taxable income and, accordingly such income is subject to corporate income tax that is assessed on the net taxable income. The corresponding election must be notified to tax authorities before the beginning of the fiscal year and remains mandatory for a minimum of five years.

Capital income is subject to corporate income tax at a general 30% rate if either of the following circumstances exist:

- The capital income is considered to be part of the company's ordinary trade or business
- The assets generating the capital income are part of the taxpayer's activities (that is they are used to generate ordinary income)

Administration. The statutory tax year runs from 1 January through 31 December. Companies must file annual corporate income tax returns and pay any tax due within two months and 15 days after the end of the tax year. Taxpayers that report under the statutory tax year have a filing deadline of 15 March. On request, tax authorities may authorize a different tax year in special circumstances.

The current year tax liability must be paid in quarterly installments, which are based on the preceding year's income tax paid or the average of the last three years' tax liability, whichever is higher. If a company did not file a return for the last three years, the installment payments are calculated based on the tax liability from the last year a return was filed. New companies must make quarterly payments based on their first-year projected income, which must be reported to the tax authorities on or before the last day of January. If no projected income is reported, the tax authorities may determine the quarterly tax payments based on an imputed income amount.

Companies defined by the tax authorities as National Large Taxpayers must file audited financial statements on request from the tax authorities. The audited financial statements must be

submitted within three months after the request of the tax authorities. The period to respond may be extended by three months if approved by the tax authorities. National Large Taxpayers who declare losses or zero tax liability (*cuota tributaria cero* in Spanish) must submit their audited financial statements within three months following the close of the corporate income tax fiscal year. An extension of this deadline may be granted for an additional three months if approved by the tax authorities.

In addition, Resolution No. DGT-R-30-2014 requires National Large Taxpayers to update their relevant tax information using a web-based platform called AMPO within one month from the end of their fiscal year. Taxpayers that become classified as National Large Taxpayers must submit the tax information within two months after being notified of their National Large Taxpayer status by the tax authorities. The relevant tax information to be provided includes, among other items, the following:

- Agencies
- Branches or commercial premises
- Mergers
- Royalty payments for the use of intangible assets
- Equity participation in other entities
- Participations in economic groups

Dividends. In general, dividends paid or credited by corporations to individuals or entities are subject to a 15% withholding tax. Dividend distributions paid to another entity domiciled in Costa Rica are exempt, provided that the recipient is an entity that carries out an economic activity and is subject to income tax or is the holding company of a financial conglomerate or group duly supervised in Costa Rica.

Dividend distributions by companies of their own shares are also exempt.

Domiciled companies include companies incorporated in Costa Rica and companies that have a permanent establishment in Costa Rica.

Interest withholding tax. Interest, commissions, financial expenses and lease payments for capital assets paid to non-domiciled individuals or legal entities are subject to a 15% withholding tax. Interest, commissions and financial expenses paid by entities regulated by the Superintendence of Financial Entities (Superintendencia General de Entidades Financieras, or SUGEF) to foreign entities that are also regulated and supervised in their jurisdictions are subject to a 5.5% withholding tax rate. An exemption applies to interest, commissions and financial expenses paid to multilateral development banks and other institutions of multilateral or bilateral development, as well to other nonprofit entities that are not subject to tax.

The Income Tax Law limits the deductibility of financial expenses from debts with nonbanking entities (for details, see *Limitations on the deductibility of financial expenses* in Section E).

Foreign tax relief. The current position of the tax authorities is that Costa Rican taxpayers cannot deduct foreign taxes paid abroad in calculating their taxable income.

C. Determination of trading income

General. Income tax is determined in accordance with International Accounting Standards (IAS), subject to adjustments required under the Costa Rican Income Tax Law and general resolutions issued by the tax authorities. Taxable income includes all income derived from Costa Rican sources, such as income from industrial, agricultural and trade activities in Costa Rica, income from services rendered in Costa Rica and income derived from real estate transactions, assets, capital, goods and rights invested or used in Costa Rica.

Imputed income. The tax authorities may assess imputed income in the cases described below.

Non-domiciled companies that do not file tax returns. Non-domiciled companies engaged in certain types of activities in Costa Rica through a permanent establishment that do not comply with requirements to report income or file income tax returns are subject to an imputed income assessment equal to a specified percentage of their Costa Rican gross income, unless they provide evidence of a lower amount of actual income. For example, documentation supporting an allocation of income between Costa Rica and other countries would prove that all income is not Costa Rican source. The amount of the imputed income assessment is subject to tax at the normal income tax rate. The following are some of the presumed amounts of taxable income:

- Transport and telecommunications: 15% of gross income
- Reinsurance: 10.5% of the net value of the reinsurance undertakings, guarantees and premiums of any type
- Media, cinema and international news: 30% of gross income

Airlines, maritime shipping, transportation and communication companies. Airlines, maritime shipping, transportation and communication companies may enter into an agreement with the tax authorities to compute Costa Rican taxable income using a special formula based on the company's worldwide and local revenues.

Loan and financing transactions. Unless the taxpayer provides evidence to the contrary, loan and financing transactions are deemed to derive a minimum amount of interest based on the highest active interest rate fixed by the Banco Central de Costa Rica (central bank) for lending and financial transactions or, if this rate is not available, on the average market rate being charged in the Costa Rican banking system. The tax authorities do not allow any exceptions to this rule unless the parties entered into a formal written loan or financing agreement.

Inventories. The Costa Rican Income Tax Regulations provide that acquisition cost must be used to record assets. The acquisition cost may be computed using several valuation methods, such as the first-in, first-out (FIFO) and weighted average cost methods. The tax authorities eliminated last-in, first-out (LIFO) as a valid inventory valuation method for tax purposes as of 3 February 2015.

Provisions. In general, provisions, including provisions for contingent liabilities such as doubtful accounts and severance pay, are not deductible expenses. However, actual payments of such liabilities are considered to be deductible expenses.

Tax depreciation. Depreciation may be computed using the straight-line or the sum-of-years' digits method. The tax authorities may allow a special accelerated depreciation method in certain cases. The tax authorities may authorize other methods based on the type of asset or business activity. The method chosen must be applied consistently. Depreciation is computed based on the useful life of the asset as specified in the Income Tax Regulations. The following are some of the straight-line rates.

Asset	Rate (%)
Buildings	2/4/6
Plant and machinery	7/10/15
Vehicles	10/15/34
Furniture and office equipment	10/20
Tools	10

Relief for losses. Taxpayers may carry forward net operating losses for three years.

Agricultural companies may carry forward net operating losses for five years.

Initial costs (pre-operational expenses) incurred by a local entity may be deducted for corporate income tax purposes within the first five fiscal years from the date the company becomes operational.

Groups of companies. Costa Rican law does not allow the filing of consolidated income tax returns or provide any other tax relief to consolidated groups of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (reduced rates may be applicable)	13%
Real estate transfer tax; the definition of "transfer" includes indirect transfers in addition to direct transfers of immovable property; indirect transfers are the transfer of control over the legal owner of immovable property	1.5%
Vehicle transfer tax	2.5%
Customs duties	
Agricultural products; average rate	12.5%
Industrial products; average rate	3.9%
Certain raw materials and machinery and equipment (Certain specified goods and merchandise are subject to higher rates of customs duty.)	0%
Real estate tax (assessed and collected by the municipalities)	0.25%
Payroll taxes; withheld by employers; paid by employee; rate depends on compensation level	10%/15%/ 20%/25%
Social security contributions	
Employer	26.67%
Employee	10.67%

Nature of tax	Rate
Municipal taxes (varies by municipality)	Various
Solidarity Tax for the Strengthening of Housing Programs; (Solidarity Tax) contained in Law No. 8683; purpose of the tax is to finance public housing programs; tax applicable to residential property that is used habitually or occasionally or for recreational purposes, that the taxpayer owns or has the right to use and that is located in Costa Rica; taxpayers are subject to the tax if the value of the infrastructure (permanent structures, such as houses, swimming pools and parking lots) exceeds CRC145 million (approximately USD284,402.94); the value of the infrastructure must be updated every three years starting from 2016 (for example, 2016, 2019 and so forth) and is due on 15 January of the corresponding year in accordance with the parameters established by the tax authorities; if the taxpayer is subject to the tax (that is, meets value threshold for the infrastructure) the tax base is computed as the total value of the infrastructure (not just the excess of CRC145 million) plus the value of the land as of 1 January, based on a specific zoning model determined by tax authorities; hotel businesses may be subject to the tax depending on their operating model and the type of infrastructure; the tax is paid annually and is due on 15 January of every year (for example, for a fiscal year-end of 31 December 2022, the tax is due by 15 January 2023); Solidarity Tax is independent from the other real estate taxes and is not deductible for income tax purposes; the tax rates are progressive	0.25% to 0.55%
Annual Tax on Legal Entities; applies to all business entities and branches that are registered in the Mercantile Registry; amount of tax depends on whether the entity is registered as a taxpayer and on its gross income in its last corporate income tax return if so registered; tax rate is applied to a base salary; base salary is a monetary point of reference updated each year by the Ministry of Finance and is typically used in certain laws as a reference for tax computations (for example, tax penalties); in 2024, the base salary is CRC462,200 (approximately USD906.55); payable by 30 January of each year	
Entities not registered as taxpayers or inactive	15%
Entities with gross income of less than 120 base salaries	25%

Nature of tax	Rate
Entities with gross income between 120 and 279 base salaries	30%
Entities with gross income equal to or in excess of 280 base salaries	50%

E. Miscellaneous matters

Foreign-exchange controls. The currency in Costa Rica is the colón (CRC). As of 1 March 2024, the exchange rate of the colón against the US dollar was CRC509.84 = USD1.

No restrictions are imposed on foreign-trade operations or foreign-currency transactions.

Limitations on the deductibility of financial expenses. The Income Tax Law will limit the deductibility of financial expenses from debts with nonbanking entities.

The annual interest deduction cannot exceed a certain percentage (see next paragraph) of the company's earnings before interest, taxes, depreciation and amortization (EBITDA). Interest paid on loans with local financial institutions supervised by the SUGEF or foreign financial institutions supervised in their country are not subject to this limitation. The interest expense that exceeds this threshold will be considered to be non-deductible for income tax purposes and can be taken as a deducible expense in the following tax periods, provided that interest expenses in each year does not exceed the specified percentage of the company's EBITDA.

This limitation will apply from the 2021 fiscal year with a 30% percentage for the first two years. The percentage will then be adjusted downward by 2% each year until reaching 20%.

F. Tax treaties

Costa Rica has income tax treaties in effect with Germany, Mexico, Spain and the United Arab Emirates.

The following are the withholding tax rates under Costa Rica's tax treaties.

	Dividends %	Interest %	Royalties %
Germany	5/15 (a)	5 (b)	10
Mexico	5/12 (a)	10 (d)	10
Spain	5/12 (a)	5/10 (c)	10
United Arab Emirates	5/12 (a)	5/10 (e)	12
Non-treaty jurisdictions (f)	15	15	25

(a) The 5% rate applies if the beneficial owner of the dividends is a company that owns directly at least 20% of the capital of the entity paying the dividends.

(b) Interest paid from Germany to the Costa Rican government is exempt from German taxes. Interest paid from Costa Rica under a loan guaranteed by Germany for exportation or foreign direct investment or paid to the German government, the Deutsche Bundesbank, the Kreditanstalt für Wiederaufbau or the Deutsche Investitions-und Entwicklungsgesellschaft is exempt from Costa Rican taxes. Interest can only be taxed in the contracting state of which the recipient is a resident if the interest is paid in connection with any of the following:
- The sale of commercial or scientific equipment on credit
- The sale of goods by an enterprise to another enterprise on credit
- A loan of any type made by a bank resident in one of the contracting states

(c) The 5% rate applies if the term of the loan agreement under which the interest is derived is five years or longer.

(d) Interest derived from Costa Rica and paid to a resident of Mexico is exempt from withholding tax if the recipient of the interest is the beneficial owner and if one of the following circumstances exists:
- The beneficial owner is the Mexican state, one of its political subdivisions or one of its local entities, or the Central Bank of Mexico.
- The interest is paid by the Costa Rican state, one of its political subdivisions or one of its local entities, or the Central Bank of a Costa Rica.
- The interest is derived from Costa Rica and is paid on a loan with at least a three-year term granted by the Banco Nacional de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C., the Banco Nacional de Obras y Servicios Públicos, S.N.C. or by any other institution agreed upon by the competent authorities.

(e) Under the treaty, a 5% rate applies if the loan maturity is at least five years. A 10% rate applies if the maturity of the loan is less than five years.

(f) For further details, see Section A.

(a) See Section B.

(b) These are prohibited list jurisdictions with which Croatia does not have a double tax treaty in place. The prohibited list jurisdictions are currently American Samoa, Anguilla, Fiji, Guam, Palau, Panama, Samoa, Trinidad and Tobago, the United States Virgin Islands, and Vanuatu.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their worldwide income. A company is resident in Croatia if its legal seat or its place of management and supervision is located in Croatia. Branches of foreign companies are subject to tax only on their profits derived from Croatia. Investment funds without legal personalities established and operating in accordance with the law for investment funds are not corporate income taxpayers.

Tax rates. The standard rate of corporate income tax is 18%. A lower corporate income tax rate of 10% applies to taxpayers that realized revenue of less than EUR1 million in the respective tax period.

Tax incentives. Tax exemptions and other tax reliefs are available in accordance with the Croatian Corporate Income Tax Act and special legislation regulating incentives. For example, the Investment Promotion Act provides incentives for investments in new business activities and new workplaces.

Capital gains and losses. Capital gains and losses from the sale of assets are considered regular taxable income and tax-deductible expenses, respectively. No separate capital gains tax applies; capital gains are subject to the regular corporate income tax rates of 18% or 10%. Specific rules apply to unrealized gains and losses on certain types of assets. Depending on the type of asset, such gains or losses may be not taxable or not tax deductible, and may be recognized for tax purposes in the period of the realization of the asset.

Administration. The regular tax year is the calendar year, but a company may apply for a different tax year.

Annual tax returns must be filed by the end of the fourth month following the tax year. However, in the case of the winding up of a company by applying shortened procedure, the tax period is aligned with such shortened procedure. The corporate income tax return submission deadline for bankruptcy is shortened to 30 days from the ending date of the tax year. The final corporate income tax return submission deadline for winding-up liquidation or other proceedings in accordance with special regulations is eight days from the date when the tax period ends.

Companies must make monthly advance payments of tax. In principle, each monthly advance payment is equal to 1/12 of the tax due for the preceding year. The balance of tax due must be paid by the end of the fourth month following the tax year. If the total of the advance payments exceeds the tax due for the year, the company may claim a refund.

Dividends. Dividends paid to foreign shareholders are taxable at a rate of 10%.

Foreign tax relief. A foreign tax credit is available to resident companies for foreign tax paid on income earned directly or through permanent establishments abroad. The amount of the credit is the

lower of the Croatian corporate tax payable on the foreign income and the foreign tax paid.

C. Determination of trading income

General. The corporate income tax base is determined in accordance with the accounting regulations (Croatian Financial Reporting Standards [CFRS]/International Financial Reporting Standards [IFRS]), adjusted for certain items that increase or decrease the tax base.

The following items decrease the tax base:
- Revenues from dividends and profit shares under certain conditions
- Unrealized profits from value adjustments of shares if they were previously taxed
- Revenues from collected written-off receivables that were taxed in previous periods
- Depreciation expenses carried forward from previous periods
- Tax incentives in accordance with special laws
- Expenses from previous tax periods that were previously taxed (that is, expenses that had been nondeductible)
- Government subsidies for the COVID-19 pandemic

The following items increase the tax base:
- Depreciation expenses exceeding the maximum allowable amounts and rates (excess may be carried forward).
- Penalty interest paid between related parties.
- Privileges and other benefits granted to individuals and legal persons to execute certain actions in favor of the company.
- Nondeductible interest on loans between related parties.
- The costs of forced collection of tax and other levies.
- Unrealized losses from value adjustments of shares, if these were included in the expenses.
- Unrealized losses from value adjustments of depreciable assets except in the case of extraordinary damages.
- Fifty percent of entertainment expenses resulting from a business relationship with a business partner, including related value-added tax (VAT). These expenses include the following:
  — Gifts, regardless of whether they include the mark of the company or product
  — The cost of holidays, sports, recreation and leisure
  — Rental of airplanes, automobiles, vacation homes and vessels
- Fines imposed by competent bodies.
- Fifty percent of expenses, including related VAT but not including insurance and interest costs, incurred with respect to owned or rented motor vehicles or other means of personal transportation (for example, personal car, vessel, helicopter and airplane) used by managerial, supervisory and other employees, if the personal use of the means of personal transportation is not taxed as a benefit in kind.
- Inventory shortages above the amount prescribed by the Croatian Chamber of Economy, if the shortages are not subject to personal income tax.
- Donations in cash or in kind exceeding 2% of the preceding year's revenue. The limitation does not apply to donations made in accordance with the competent ministry's decisions on special programs and actions undertaken outside the regular business activities of the beneficiary. The donations also include financing of health care expenses (surgery, purchases of medicines or

orthopedic devices, and transport and accommodation costs with respect to health care institutions) for individuals who are not covered by primary, additional or private health insurance. The donations can also include donations of food producers or traders that donate food for social, humanitarian and other helpful purposes or that donate food to people hit by natural disasters. The food donations must be in line with special provisions of the Ministry of Agriculture.
- Expenses identified in the course of a tax audit, including VAT personal income tax and obligatory contributions incurred with respect to hidden profit payments, including payments of private costs of shareholders, company members and individuals and persons related to these individuals.
- Other expenses not incurred for the purpose of earning profit.

The expenses mentioned above, except privileges and other benefits granted to individuals and legal persons to execute certain actions in favor of the company and expenses identified in a tax audit, do not increase the tax base if they are subject to personal income tax.

Legislation that entered into force from 2017 introduced the possibility of determining the tax base based on the cash principle for taxpayers that realized revenue of less than EUR1 million in the preceding tax period. The Corporate Income Tax Act provides detailed rules for determining such tax base. Corporate income taxpayers that are also VAT taxpayers may also determine the tax base based on the cash principle if they have, based on VAT rules, already chosen to pay VAT based on realized income.

Inventories. Inventories are valued in accordance with CFRS or International Accounting Standards (IAS)/IFRS. In general, inventories are valued at the lower of cost or net realizable value. Costs include all acquisition costs, conversion costs and other costs incurred in bringing inventories to their current location and condition. In general, the cost of inventories must be determined using the first-in, first-out (FIFO) or weighted average method.

Losses from value adjustments of inventories are recognized as tax-deductible expenses at the time of disposal of the inventories.

Specific rules deal with allowable limits of inventory shortages.

Provisions. The following provisions are deductible for tax purposes:
- Provisions for severance payments to be paid in the following year according to the prepared restructuring plan
- Provisions for costs of renewing natural resources
- Provisions for costs incurred during guarantee periods
- Provisions for costs related to court disputes that have already been initiated against the taxpayer (excluding interest)
- Provisions for the risk of potential loss in banks, up to the amount prescribed by the Croatian special regulations
- Provisions in insurance companies, up to the obligatory amount prescribed by the law governing the insurance
- Provisions for the unused vacation in accordance with accounting principles

Trade receivables. Value adjustments of trade receivables are deductible if the receivables are overdue for more than 60 days as

of the end of the tax year and if they are not collected by the 15th day before the filing of the tax return. However, if a taxpayer does not take measures for debt collection (for example, sue the debtor) before the receivables are barred by the statute of limitations, the receivables treated as deductible for tax purposes in prior years must be included in taxable income. In addition, value adjustments are deductible for tax purposes in the following circumstances:

- The receivables do not exceed EUR665 per debtor (corporate income taxpayers or sole proprietors subject to personal income tax).
- The receivables do not exceed EUR40 per unrelated individuals if the total receivables per individual do not exceed this amount on the last day of the tax period.
- The company is suing the debtor or a foreclosure is being conducted.
- The receivables are reported in a bankruptcy proceeding of the debtor.
- The debt has been settled in the pre-bankruptcy or bankruptcy proceedings of the debtor.
- The taxpayer proves that costs of initiating certain collection procedures exceed receivables or the taxpayer proves it used the duty of care to initiate collection of the debt (which ultimately could not be collected).
- The debt is written off based on special provisions related to the consumer's bankruptcy.

The write-off of receivables confirmed in the settlement procedure (based on the Act on Compulsory Administration Procedure in Companies of Systemic Importance for the Republic of Croatia [Lex Agrokor]) should be treated as tax-deductible expense (applicable for 2018 and future corporate income tax returns).

Credit institutions may treat as tax deductible the write-off of receivables from unrelated individuals and legal entities that were previously impaired and recorded as a provision in accordance with the regulations of the Croatian National Bank. In that case, the credit institution should waive the right to collect the written-off amount of the receivable and should submit a written statement to the debtor and guarantor on the termination of their obligation in the amount of write-off. With respect to the debtor and guarantor, the amount of the written-off liability is not considered to be taxable income and has no impact on other prescribed thresholds. The credit institution should submit together with the corporate income tax return an overview of write-offs performed in line with these provisions, with an indication of the total amount of write-offs and a breakdown by individual placement (individual loan receivable) and loan borrower.

Tax depreciation. Depreciation is calculated by using the straight-line method. The following are the maximum annual depreciation rates prescribed by the Corporate Income Tax Act.

Asset	Rate (%)
Buildings and ships over 1,000 gross registered tons	10
Primary herd and personal cars	40
Intangible assets, equipment, vehicles	

Asset	Rate (%)
(except personal cars), and machinery	50
Computers, computer hardware and software, mobile telephones and computer network accessories	100
Other assets	20

The deduction for tax depreciation cannot exceed the expense for accounting depreciation. If maximum allowable tax depreciation exceeds accounting depreciation, the accounting depreciation prevails for tax purposes. If accounting depreciation exceeds maximum allowable tax depreciation, the excess may be deducted in future periods.

Depreciation expenses for personal cars and other vehicles used for personal transportation are deductible up to the amount calculated on the purchase cost of EUR54,000 per vehicle. The limitation does not apply to vehicles used exclusively for rental or transportation activities.

Depreciation of assets that are not used in the performance of ordinary business activities is not deductible for tax purposes.

If the accounting records of a taxpayer include vessels, airplanes, apartments or resort houses and if the taxpayer uses these assets in its regular business activities, the depreciation of such assets may be claimed as deductible expenses for tax purposes if the following conditions are met:
- The taxpayer is registered for the activity of renting such assets.
- The revenue realized from the use of the vessels and airplanes is at least 7% of the purchased value of the vessels or airplanes.
- The revenue from the use of apartments and resort houses is at least 5% of the purchase value of the apartments or resort houses.

Relief for losses. Tax losses may be carried forward for five years, but they may not be carried back.

The legal successor may lose the right to a loss carryforward after a legal change (business combination) and/or change in ownership of the company of more than 50% if one of the following circumstances exists:
- The taxpayer did not perform its business activity for the two tax periods before the occurrence of the legal change and/or change in ownership.
- Within two tax periods after the occurrence of the legal change and/or change in ownership, the business activity of the taxpayer substantially changes.

Groups of companies. Croatia does not allow consolidated returns or provide any other tax relief for groups of companies. Each company within a group is taxed separately.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	5/13/25
Real estate tax, on the value determined by the tax authorities	3

Nature of tax	Rate (%)
Social security contributions; paid by	
Employer	16.5
Employee	20
Personal income tax; the withholding liability lies with the employer	
Up to EUR4,200 per month	15 to 23.6
In excess of EUR4,200 per month	25 to 35.4
(The rate ranges are defined by each municipality.)	

E. Miscellaneous matters

Foreign-exchange controls. The Croatian currency is the euro (EUR).

The Croatian National Bank is responsible for foreign-exchange regulations.

The Foreign Exchange Act generally imposes restrictions on payments abroad that do not have a legal basis. No restrictions are imposed on transfers of paid-in share capital, dividends, profits, interest, royalties, fees for know-how and similar payments.

Under the Foreign Exchange Act, Croatian resident companies may acquire foreign securities, provide long-term and short-term loans to nonresident companies, acquire real estate abroad and engage in certain other specified transactions. Such transactions are allowed if they are reported to the Croatian National Bank.

Natural persons may make direct investments abroad, acquire foreign securities, provide long-term loans to nonresidents, acquire real estate abroad and provide short-term loans to nonresidents who are related parties (family members).

Transfer pricing. Croatia has transfer-pricing rules that apply to transactions between Croatian residents and nonresidents. Under these rules, the tax authorities may adjust the taxable income of Croatian taxpayers derived from transactions with foreign related companies if they deem the prices and agreed conditions to be different than arm's-length prices and conditions. In such circumstances, taxable income is increased (or expenses decreased) by the difference between prices stated in the financial statements and arm's-length prices. These rules also apply to transactions between two Croatian residents if one of the related parties has special tax status (pays corporate income tax at reduced rates) or has a tax-loss carryforward.

A company may apply one of the following methods for establishing an arm's-length price:
- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Profit-split method
- Transactional net margin method

Under the Croatian excessive interest rate rule, the deduction of interest on a loan received by a Croatian taxpayer from a related party is limited to a maximum deductible interest rate published by the Croatian Minister of Finance before the beginning of the

relevant tax year (2.4% per year for 2023 and 3.25% per year for 2024).

The abovementioned interest rate is calculated as the average of the interest rates on the outstanding balances of loans that are granted for a period longer than one year to nonfinancial companies and that are published by the Croatian National Bank in the current calendar year.

Instead of the rate prescribed by the Minister of Finance, taxpayers can apply the abovementioned transfer pricing methods for establishing an arm's-length interest rate, subject to the condition that such method apply to all agreements.

Taxpayers can enter into an agreement in the area of transfer pricing and contractual relations between related companies with the Croatian tax authorities and tax authorities in other jurisdictions if applicable (resident jurisdictions of related companies or permanent establishments through which the business activities are carried out). Advance pricing agreements (APAs) enable parties to determine a set of criteria for determining transfer prices (for example, methods, adjustments and key assumptions) before beginning related-party transactions during a tax period.

Debt-to-equity ratios. Under thin-capitalization rules, interest on loans received from foreign shareholders owning 25% or more of the shares, capital or voting rights of the borrower, on loans guaranteed by such shareholders or on loans received from related parties, is not deductible if the loan balance exceeds four times the shareholders' share in the equity of the borrower.

Prepayments of dividends. If the dividends or profit shares are prepaid to an individual during a tax year and if the realized profit at the end of a tax year is insufficient to cover such prepayment, the prepayment is considered to be income subject to personal income tax. The taxpayer must maintain documentary evidence of dividend prepayments and submit it with the tax return.

Anti-Tax Avoidance Directive. The Anti-Tax Avoidance Directive contains rules regarding interest deductibility, controlled foreign companies (CFCs), hybrid mismatches and exit taxation.

Under the interest deductibility rule, to calculate the tax-deductible expense, the taxpayer may determine the exceeding borrowing costs incurred in the tax period to be up to 30% of earnings before interest, taxes, depreciation and amortization (EBITDA) or EUR3 million, whichever is higher. The exceeding borrowing costs are considered to be costs exceeding the taxable interest income or other economically equivalent taxable income. The amount of nondeductible exceeding costs is reduced for the amounts for which the tax base is increased under Article 8 (thin-capitalization rules) and Article 14 (interest on loans between related parties) of the Corporate Income Tax Act.

Under the CFC rule, a CFC of a taxpayer is an entity that exists in any organizational legal form or as a permanent establishment located in another country whose income is not liable to tax or is non-taxable in that country if both of the following conditions are met:

- The taxpayer alone or together with the related parties participates directly or indirectly with more than 50% of the voting rights, is the direct or indirect owner of more than 50% of the capital or realizes the right to receive more than 50% of the profit of the entity.
- The actual profit tax that the company or a permanent establishment paid abroad in another EU state is less than the difference between the income tax that would be charged to company or the permanent establishment in Croatia and the actual profit tax paid by the company or permanent establishment.

If the entity or the permanent establishment is considered a CFC, the Croatian taxpayer is required to include the following CFC income in its tax base:

- Interest or other financial asset income
- License fees or other income from intellectual property
- Dividends, shares in profits and revenues from the disposal of shares
- Financial leasing income
- Income from insurance, banking and other financial activities
- Income derived from goods and services purchased from related parties and sold to related parties, with little or no added economic value

Hybrid entities are entities that have a difference in legal definition and are not considered taxpayers in one tax jurisdiction, while the same entities are considered taxpayers in another tax jurisdiction. Payments between such entities may lead to recognition of double deduction or deduction without inclusion, leading to an erosion of the tax base. A hybrid mismatch arises between related parties, between the taxpayer and an affiliate, between the head office and a permanent establishment, between two or more permanent establishments of the same entity or under a structured arrangement.

Regarding exit taxation, the capital gain is taxed at the moment of the transfer of assets from headquarters to a permanent establishment or vice versa, transfer of residence or transfer of activities, whereby the legal taxation of those assets in Croatia ceases. However, the transfer of assets, including cash, between the parent company and the subsidiary is not taxed. Also, exit taxation does not apply if any of the following circumstances exist:

- The assets are temporarily transferred and are designated to be returned to the transferor's Member State within 12 months.
- The transfer is carried out to meet prudential capital requirements for liquidity management purposes.
- The transfer of the asset is related to financing of securities or an asset is given as a guarantee.

F. Tax treaties

Croatia has entered into double tax treaties on avoidance of double taxation with many jurisdictions (see the withholding rate table below).

Croatia has signed a tax treaty with Egypt, but this treaty is not yet effective. Croatia is engaged in negotiations on treaties with Australia, the Hong Kong Special Administrative Region (SAR), Saudi Arabia and the United States.

Croatia has adopted the double tax treaties entered into by the former Yugoslavia with Finland, Norway and Sweden.

The withholding tax rates for payments by Croatian companies under Croatia's double tax treaties and under the former Yugoslavia's double tax treaties adopted by Croatia are listed in the table below.

Croatia became a member of the EU on 1 July 2013. As of that date, provisions of the Interest and Royalty Directive and Parent-Subsidiary Directive adopted by Croatian corporate income tax legislation became applicable to payments to recipients within the EU.

(a) The 0% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly holds at least 25% of the payer. The 10% rate applies to other dividends.

(b) The 0% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 10% of the payer. The 15% rate applies to other dividends.

(c) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 15% rate applies to other dividends.

(d) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly or indirectly at least 10% of the payer. The 15% rate applies to other dividends.

(e) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies to other dividends.

(f) The 5% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly controls at least 10% of the voting power of the payer, or holds directly at least 25% of the payer. The 15% rate applies to dividends paid by investment corporations that are resident in Canada but are owned by non-residents and in all other cases.

(g) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 20% of the payer. The 15% rate applies to other dividends.

(h) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer or if the recipient (beneficial owner) is a pension fund or similar institution that provides insurance services or pension benefits. The 10% rate applies to other dividends.

(i) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 15% rate applies to other dividends.

(j) The 0% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly holds at least 10% of the payer. The 15% rate applies to other dividends.

(k) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 15% rate applies to other dividends.

(l) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies to other dividends.

(m) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 10% rate applies to other dividends.

(n) The 5% rate applies if the recipient (beneficial owner) is an entity that directly controls at least 10% of the voting power of the payer. The 10% rate applies to other dividends.
(o) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer and if the entity is a resident of Israel. The 15% rate applies to other dividends.
(p) The 5% rate applies if the recipient (beneficial owner) is an entity that holds at least 25% of the payer and if this ownership is not achieved for the purposes of exploiting these provisions. The 10% rate applies to other dividends.
(q) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 15% rate applies to other dividends.
(r) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 10% rate applies to other dividends.
(s) The 5% rate applies if the dividends are paid by a Croatian resident to a Maltese resident (beneficial owner). If dividends are paid by a Maltese resident to a Croatian resident (beneficial owner), the applicable rate is the rate used to tax the profits out of which the dividends are paid.
(t) The 0% rate applies if the recipient is an entity that holds directly at least 25% of the payer and if the dividends are paid to a company whose assets are fully or partially divided into shares. The 15% rate applies to other dividends.
(u) The 5% rate applies if the recipient is an entity that directly holds at least 25% of the voting power of the payer. The 15% rate applies to other dividends.
(v) This treaty applies to Montenegro and Serbia.
(w) The 8% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies to other dividends.
(x) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer and its respective share in capital amounts to at least EUR150,000. The 10% rate applies to other dividends.
(y) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer and its respective share in capital amounts to at least USD100,000. The 10% rate applies to other dividends.
(z) The 5% rate applies if the recipient (beneficial owner) is an entity that controls directly or indirectly at least 25% of the payer. The 15% rate applies if the dividends are paid out of income (including gains) derived directly or indirectly from immovable property by an investment vehicle that distributes most of this income annually and if this income is exempt from tax. The 10% rate applies to other dividends.
(aa) The 0% rate applies if the recipient (beneficial owner) is an entity that is a resident of the other contracting state and that holds directly or indirectly at least 25% of the voting power of the payer throughout a 365-day period that includes the date on which entitlement to the dividends is determined. Dividends that are tax deductible for the payer in the country of its residence may be taxed in the country of its residence, but if the recipient-resident of the other contracting state is the beneficial owner of the dividend, the withholding tax rate may not be higher than 10%. The 5% rate applies to other dividends.

On 10 October 2010, the country Netherlands Antilles, which consisted of five island territories in the Caribbean Sea (Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten), was dissolved. On dissolution of the Netherlands Antilles, the islands of Bonaire, Sint Eustatius and Saba (BES-Islands) became part of the Netherlands as extraordinary overseas municipalities. Curaçao and Sint Maarten have both become autonomous countries within the Kingdom of the Netherlands. The former Netherlands Antilles tax laws remain applicable to Curaçao, with the understanding that references in the laws to "the Netherlands Antilles" should now read "Curaçao." The following chapter provides information on taxation in Curaçao only. Chapters on BES-Islands and Sint Maarten appear in this guide.

A. At a glance

Corporate Income Tax Rate (%)	15/22
Capital Gains Tax Rate (%)	15/22
Branch Tax Rate (%)	15/22
Withholding Tax (%)	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10*

* Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in business in the shipping or aviation industry may be carried forward indefinitely.

B. Taxes on corporate income and gains

Profit tax. Profit tax is levied on resident and nonresident entities. Resident entities are those incorporated under former Netherlands Antilles or current Curaçao laws, even if their management is located abroad, as well as entities incorporated under foreign law, but effectively managed in Curaçao.

For resident entities, profit tax is, in principle, levied on the aggregate amount of net profits earned from a domestic enterprise during the entity's accounting period. Income that is considered to be derived from foreign entrepreneurial activities is effectively not taxed. Nonresident entities are subject to profit tax on specific Curaçao income items, such as profits earned through a permanent establishment and income related to real estate property in Curaçao, including interest derived from a mortgage on such real estate property.

Tax rates. Resident and nonresident entities, including branches of foreign companies, are subject to a profit tax rate of 15% with respect to the first ANG500,000 (USD280,000) of taxable income, while the taxable income exceeding ANG500,000 (USD280,000) is subject to a profit tax rate of 22%. However, different rates may apply with respect to the innovation box, tax holiday, Curaçao Investment Companies (CICs) and the regime for designated activities.

Withholding taxes are not imposed on remittances of profits by branches to their foreign head offices.

Tax incentives. Reduced tax rates and other tax incentives (tax holidays) are available to new business enterprises that engage in certain activities, including tourism, land development, retail and wholesale.

The G20 and the Organisation for Economic Co-operation and Development (OECD) finalized work on the Base Erosion and Profit Shifting (BEPS) Project and published their report in October 2015. Based on a 15-point action plan issued in July 2013, the project has created uncertainty in the global tax landscape as many countries have begun to make BEPS-driven changes to their tax laws and administrative practices. Changes in legislation and policy both locally and internationally due to BEPS have impacted, among others, tax-exempt status and the E-zone facility, which are discussed below.

Reduced profit tax rate for designated activities. Income from the following activities may be subject to the reduced profit tax rate of 3%:

- The building or improvement of aircraft and vessels as well as the maintenance and repair of aircraft and vessels with a length of at least 10 meters and machinery and other materials used onboard these vessels and aircraft
- Support services, such as administrative service, back-office services, and call or data centers, if these activities are rendered to an enterprise with a turnover of at least ANG50 million (USD28 million)
- Warehousing and ancillary logistic services performed for third parties
- Fund management and fund administration services in Curaçao provided to unaffiliated investment funds and the managers of such investment funds

Companies that conduct the aforementioned activities under the reduced profit tax rate of 3% must have real presence (substance) in Curaçao, which includes the requirement that the core income-generating activities be performed in Curaçao.

Curaçao Investment Companies. As of 1 July 2018, CICs became subject to Curaçao profit tax. They were previously exempt from Curaçao profit tax. Private and public limited liability companies incorporated under former Netherlands Antilles or current Curaçao laws may qualify as CICs. CICs are only allowed to exclusively (100%) or almost exclusively (90% or more) engage in the extending of loans, investing in securities and deposits, and developing and exploiting of intellectual and industrial property rights and similar property or user rights. The exploitation of intellectual property rights can in principle only benefit from the reduced profit tax rate of 0% to the extent that it concerns "qualifying intellectual property" and to the extent that the intellectual property was developed by the taxpayer in Curaçao or on behalf and for the account of the taxpayer in Curaçao (nexus approach). To qualify as a CIC, a company must submit a written request to the Tax Inspector, and certain conditions must be satisfied. In addition, the company should have real presence (substance) in Curaçao. CICs are not eligible for benefits under the bilateral regulation for the avoidance of double taxation between the Netherlands and Curaçao, the Tax Regulation for the Kingdom of the Netherlands or any other double tax treaty of the

former Netherlands Antilles or Curaçao. However, exchange-of-information provisions in the tax regulation, tax treaties and tax information exchange agreements apply to CICs. If a CIC loses its status, it is treated as a regularly taxed company and it receives a tax-free step-up.

Taxed private foundations and trusts. The 2011 tax reform of the Curaçao profit tax legislation introduced the option for private foundations and trusts to be subject to a reduced effective profit tax rate of 10%. In principle, the profit of Curaçao private foundations and trusts is exempt from profit tax, to the extent that the profit realized is not derived from a business enterprise. After the option is exercised, the reduced effective rate of 10% applies for a period of at least three full fiscal years. After this three-year period, the private foundation can request to discontinue being subject to the reduced effective rate of 10%.

Transparent companies. Curaçao public limited liability companies or private limited liability companies or similar companies with a capital divided in shares can opt for fiscal transparency for Curaçao profit tax and individual income tax purposes. To qualify as a transparent company, a written request must be filed and certain conditions must be satisfied. If fiscal transparency is elected, the company is treated for tax purposes as a partnership; that is, only the partners can be taxed in Curaçao on Curaçao sources of income. If a transparent company loses its transparent status, it is treated as a regularly taxed company that is subject to tax. In addition, as of January 2015, rules were introduced regarding the valuation of assets and liabilities of a company that acquires or loses tax transparent status.

Ruling policy. Curaçao has an extensive advance tax ruling practice. These rulings include, among others, the following:
- Cost-plus (informal capital) rulings for intercompany activities
- Minimum gross margin rulings for finance activities
- Royalties and dividends (holding activities) ruling
- Substance rulings

On 13 July 2023, the Curaçao tax authorities adopted a formal ruling policy that primarily provides guidelines concerning requests with both an international and local character. This policy was necessitated by, among others, the significant modifications introduced to the Profit Tax Ordinance 1940 over the years, including several new provisions, requiring or making it advisable for contact between the taxpayer and the Tax Inspector to obtain certainty in advance. These revisions either require or advise pre-emptive contact between the taxpayer and the Tax Inspector through a ruling request to obtain certainty in advance. The ruling policy provides tools for evaluating and responding to these requests.

Other incentives. Curaçao also offers other incentives for specific activities, such as the international use of aircraft and ships and the insurance of risks outside Curaçao.

Capital gains. Under the current profit tax rules, in general, no distinction is made between the taxation of capital gains and the taxation of other income. Both realized capital gains and other income are in principle subject to the regular profit tax rates. The

taxation of capital gains that are realized on qualifying share interests is discussed in *Participation exemption* in Section C.

Administration. The standard tax year is the calendar year. However, on request and under certain conditions, a company may use a different financial accounting year as its tax year.

Taxpayers must file a provisional tax return within three months after the end of the financial year. In principle, this return must show a taxable profit that is at least equal to the taxable profit shown on the most recently filed final tax return. Any tax due must be paid at the time of filing of the provisional tax return. An extension of the filing and payment deadline for the provisional return is not possible. On request of the taxpayer, the Tax Inspector may consent to the reporting of a lower taxable profit than the taxable profit shown on the most recently filed final tax return.

The final tax return must be filed within 12 months after the end of the financial year. Any difference between the tax due based on the provisional return and the tax due based on the final return must be settled at the time of the filing of the final return.

To ensure compliance with the rules described above, penalties may be imposed. The tax authorities may impose arbitrary assessments if the taxpayer fails to file a tax return. Additional assessments, including a penalty, may be imposed if insufficient tax is levied. A penalty of up to 100% of the additional tax due may be imposed. Depending on the degree of fault, this penalty may vary from 25% to 100%.

Taxpayers that do not meet the requirement of regular accounting or regular annual closing are considered to have derived all their income from a domestic enterprise. As a result, such income will be subject to profit tax in Curaçao.

Dividends. Curaçao does not levy dividend withholding tax on dividend distributions.

Withholding taxes. Curaçao does not levy withholding taxes on dividends, interest or royalties.

C. Determination of taxable income

General. Taxable profit must be calculated in accordance with the so-called principles of sound business practices.

As described above, Curaçao has a territorial profit tax regime. Income from a foreign enterprise is effectively not taxed. To determine whether the income is generated through a domestic or foreign enterprise, the income (except for financial or insurance companies) is allocated based on the ratio between the local causal costs versus the total causal costs of the taxpayer but excluding the costs of material (in general: the costs of goods sold).

Passive income, which is income not generated through an enterprise, is considered income from a domestic enterprise. This may include interest, rental income and portfolio dividend income. Royalty income is always considered passive income (however, under stringent conditions, such income may be subject to a profit tax rate of 0% in Curaçao). For financial and insurance

companies, foreign financing income and insurance income are considered foreign income (effectively not taxed) to the extent that the activities of the company constitute an active business activity.

On 4 March 2021, a national decree was published. The content of the decree has retroactive effect to 1 January 2020 and contains further guidelines for determining the taxable base of a taxpayer under the territorial profit tax rules. The decree is mostly a codification of the explanatory notes to the new legislation and contains minor changes to it.

Taxpayers deriving income that is not generated from a domestic enterprise must have real presence in Curaçao. Their presence should also arise to the level of a permanent establishment if the activities had been conducted by a foreign enterprise. Failure to meet these substance requirements can result in penalties ranging from ANG50,000 (USD28,000) to ANG500,000 (USD280,000).

All expenses incurred with respect to conducting a domestic enterprise are, in principle, deductible. However, if expenses exceed normal arm's-length charges and are incurred directly or indirectly for the benefit of shareholders or related companies, the excess is considered to be a nondeductible profit distribution (dividend). In addition, certain expenses, such as fines, penalties and expenses incurred with respect to crimes, are not deductible. The costs of representation, including receptions, festive meetings and entertainment, excursions, and study trips (including the related costs of travel and accommodation), are no longer deductible. Only 80% of expenses incurred on food, beverages and goodies (for example, tobacco) is deductible. Costs of donations, promotional gifts, courses, conferences, seminars and symposiums are 100% deductible. However, travel expenses related to these items are 80% deductible.

In principle, interest expenses of domestic enterprises are deductible for tax purposes if the interest rate is determined on an arm's-length basis. However, certain restrictions apply to the deduction of interest on loans connected to certain tax-driven transactions and intragroup reorganizations. Under thin-capitalization rules, the deductibility of interest accrued or paid directly or indirectly to an affiliated TEC may be restricted. As of 1 January 2015, the thin-capitalization rules were extended to loans received from nonresident TECs belonging to the same "concern" ("concern" is specifically defined in the tax law).

Participation exemption. In principle, a 100% participation exemption applies for all qualifying share interests held by Curaçao corporate taxpayers.

In general, a share interest qualifies for the participation exemption if it represents at least 5% of the share capital or voting power in a company or if the amount paid for the shareholding amounts to at least ANG890,000 (USD500,000). In addition, any member of a cooperative association can apply for the participation exemption. Effective from 1 January 2015, the participation exemption was extended to participations in mutual funds that are considered to be special-purpose capital and to participations in

nonresident mutual funds that are subject to profit tax in their country of residency.

For dividend income, additional requirements are imposed for a participation to be considered a qualifying participation. To apply the 100% exemption on dividends, either of the following conditions must be met:

- The gross income of the participation consists of 50% or less of dividends, interest or royalties received other than out of the enterprise of the participation ("non-portfolio investment clause").
- The participation is subject to a statutory profit tax rate of at least 10% or the participation is subject to a foreign tax regime, as referred to in Article 1A, Paragraph 11 of the profit tax legislation ("subject-to-tax clause"). In this respect, foreign tax regimes as defined in Article 1A, Paragraph 11 of the profit tax legislation includes the tax regimes applicable in European Union (EU) Member States or its outermost regions, Member States of the OECD, or countries with which Curaçao has concluded a treaty for the avoidance of double taxation.

The above conditions may be met on a consolidated basis. If neither of the above conditions is met, a lower limited participation exemption applies to dividends. The limited participation exemption was amended as of 1 January 2015. Instead of calculating an exemption on the reported income, a formula is used to calculate the income to be reported. The income to be reported is calculated using the following formula:

$$\text{Income} \times \frac{10}{T}$$

For purposes of the above formula, "T" represents the tax rate applicable for the year in which the income is reported. Consequently, an effective tax rate of 10% applies to non-qualifying participations.

The subject-to-tax clause and the non-portfolio-investment clause do not apply to the 100% participation exemption on capital gains and income received from participations that exclusively or almost exclusively hold immovable property.

Expenses that are connected with the participation, including financing expenses, are deductible if the expenses are directly or indirectly related to income that is taxable in Curaçao.

Deemed dividends by bank-held CICs and passive foreign investment companies. As of 1 January 2020, passive investment companies held by banks or other regulated credit institutions are considered to have distributed their annual profits to the extent of the bank's interest in the passive investment company. This deemed distribution is 50% for domestic passive investment companies and 100% for foreign passive investment companies, resulting in an effective tax rate of 5% or 10%, respectively, for domestic and foreign passive investment companies.

Tax depreciation. In general, assets are depreciated using the straight-line method, with the residual value taken into consideration. The following are some of the applicable rates.

Asset	Rate (%)	Residual value (%)
Buildings	2 to 2.5	50
Office equipment	10 to 50	Nil
Motor vehicles	10 to 33	15
Plant and machinery	10	10

The rates listed above provide a general overview of the depreciation rates. The actual depreciation rate depends on the type of asset used by the company. The depreciation of buildings is limited. Buildings can be depreciated to 50% of the value of the building as stipulated in the assessment for the National Ordinance on Immovable Property Tax (*Landsverordening onroerendezaakbelasting 2014*). For pre-owned buildings that have been depreciated by 1 January 2016 for less than three years, the limitation on the depreciation will become effective in the fourth year. For buildings that have already been depreciated to an amount that exceeds the limit, no clawback occurs. In such case, the depreciated value is respected.

An investment allowance deduction of 10% is granted for acquisitions of fixed assets to the extent that the investment in such assets exceeds ANG5,000 (USD2,800). The allowance is deducted from taxable income in the year of the investment. The investment allowance deduction is recaptured in the year of sale if the asset is sold within six years (15 years for buildings) after the date of the investment. For investments in the maintenance and restorations of monuments listed in the Curaçao Monuments Ordinance, the allowance is increased to a one-time investment deduction of 25%.

Groups of companies. On written request, Curaçao resident taxpayers may form a fiscal unity (tax-consolidated group) for profit tax purposes. To qualify for a fiscal unity, the parent company must own at least 99% of the shares in the subsidiary. A fiscal unity may include, among others, a company incorporated under Dutch law that has its place of effective management in Curaçao. The whole group is taxed for profit tax purposes as if it were one company and, as a result, the subsidiaries in the fiscal unity are no longer individually subject to profit tax. The Tax Inspector must decide on the request within two months after the receipt of the request.

The advantages of fiscal unity treatment for profit tax purposes include the following:

- Losses of one subsidiary may be offset against profits of other members of the fiscal unity.
- Reorganizations, including movements of assets with hidden reserves from one company to another, have no direct tax consequences for profit tax purposes.
- Intercompany profits may be fully deferred.

The fiscal unity does not apply for turnover tax purposes.

Relief for losses. Losses in a financial year may be carried forward for 10 years. No carryback is available.

Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of

engaging in business in the shipping or aviation industry may be carried forward indefinitely.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Turnover tax in Curaçao; a general consumption tax on goods delivered, imports, and services rendered by entrepreneurs (legal entities or individuals) in Curaçao and services rendered in Curaçao by foreign entrepreneurs; primary life goods and certain imports are exempt	
Nature of tax	**Rate (%)**
Standard rate	6
Insurance	7
Hotel accommodation	7
Specific goods and services listed as luxurious or unhealthy	9
Real estate transfer tax	4
Import duties	0 to 62

E. Miscellaneous matters

Foreign-exchange controls. The currency in Curaçao is the Antillean guilder (ANG).

For foreign investors that obtain a foreign-exchange license from the Central Bank of Curaçao and Sint Maarten, no restrictions are imposed on the movement of funds into and out of Curaçao and Sint Maarten. In general, the Central Bank automatically grants foreign-exchange licenses for remittances abroad. Residents are subject to several foreign-exchange regulations imposed by the Central Bank. However, residents may be granted nonresident status for foreign-exchange control purposes. Some reporting requirements exist for statistical purposes.

Transfer pricing. In general, intercompany charges should be determined on an arm's-length basis. Entities must keep transfer-pricing documentation on file that shows how the intercompany conditions were agreed upon and whether these conditions are at arm's length.

Companies with a consolidated group turnover exceeding ANG1.5 billion (approximately USD842 million) are subject to Country-by-Country Reporting legislation and are required to have Master File and Local File documentation in their administration.

F. Foreign tax relief and tax treaties

Unilateral relief for foreign tax is provided under the profit tax legislation. The relief for foreign tax, whether or not levied at source, is limited to the part of the foreign tax that is levied with respect to income derived from a domestic enterprise operated in Curaçao. Relief for foreign tax is granted by means of a tax credit that is limited to the lower of the following amounts:

- The amount of foreign tax that is levied during the respective financial year, increased by such amounts levied in the preceding 10 years if these amounts have not been used to reduce the Curaçao profit tax

- The profit tax liability based on the Profit Tax Ordinance 1940 if and to the extent that the income derived from the domestic enterprise in Curaçao and taxed abroad, reduced by the deductible expenses attributable to this income, is the only income of the taxpayer

In addition to the above unilateral provisions which are incorporated in the profit tax legislation, Curaçao published its first unilateral decree for the avoidance of double taxation on 11 October 2022. For years, the avoidance of double taxation in wage, income and inheritance tax was based on unpublished policy, resulting in an inconsistent approach by the tax authorities and inconsistent case law. To introduce a consistent means for the avoidance of double taxation, the decree now provides rules that allow for either an exemption or credit for various types of income. At the same time, the decree expands the rules for the avoidance of double taxation for profit tax purposes.

Bilateral provisions for double tax relief are contained in the tax treaty with Norway and in the Tax Regulation for the Kingdom of the Netherlands (consisting of Aruba, Curaçao, the Netherlands and Sint Maarten). The Tax Regulation for the Kingdom of the Netherlands applied between Curaçao and the Netherlands up to 31 December 2015. From 1 January 2016, the Tax Regulation for the Kingdom of the Netherlands applies only between Curaçao and Aruba and Sint Maarten until these jurisdictions negotiate and sign another agreement with Curaçao.

In June 2014, Curaçao and the Netherlands entered into a new bilateral regulation for the avoidance of double taxation. This tax arrangement, which essentially functions as a tax treaty, was approved by the Dutch parliament and was formally published on 9 October 2015. It took effect as of January 2016. The tax arrangement includes, among other measures, a 0% Dutch dividend withholding tax rate that applies under certain conditions. Curaçao does not impose withholding tax on payments from Curaçao to residents of other countries.

The former Netherlands Antilles has entered into tax information exchange agreements with Antigua and Barbuda, Australia, Bermuda, British Virgin Islands, Canada, Cayman Islands, Denmark, Faroe Islands, Finland, France, Germany, Greenland, Iceland, Italy, Mexico, New Zealand, St. Lucia, St. Vincent and the Grenadines, Spain, Sweden, the United Kingdom and the United States. As a result of the constitutional reform of the Kingdom of the Netherlands, the tax treaties entered into by the Netherlands Antilles became automatically applicable to the surviving countries, which are the legal successors of the Netherlands Antilles.

Curaçao has negotiated tax treaties with Jamaica and Malta, which have not yet been ratified by the Curaçao government. Curaçao is also negotiating several double tax treaties and additional tax information exchange agreements.

An intergovernmental agreement between Curaçao and the United States implementing the US Foreign Account Tax Compliance Act (FATCA) entered into force as of 3 August 2016. Financial institutions in Curaçao must file the required FATCA reporting through a portal set up by the Curaçao government.

Under the latest published OECD list, Curaçao qualifies as an approved-listed jurisdiction.

Curaçao signed the multilateral agreement on automatic exchange of information and will begin the exchange of information based on the Common Reporting Standard in 2017.

The Kingdom of the Netherlands has entered into many bilateral investment treaties that also apply to Curaçao.

Curaçao also signed the OECD Convention on Mutual Administrative Assistance in Tax Matters.

A. At a glance

Corporate Income Tax Rate (%)	12.5
Capital Gains Tax Rate (%)	20
Branch Tax Rate (%)	12.5
Withholding Tax (%)	
Dividends	0/17 (a)(b)
Interest	0/17 (b)(c)
Royalties from Patents, Know-how, etc.	0/5/10 (b)(d)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) A Special Contribution to the Defence Fund (Defence Tax) at a rate of 17% is withheld from dividends paid (or deemed to be paid) to resident and domiciled individuals.

(b) Cyprus introduced withholding tax on dividends, and interest payments made to companies that are resident in jurisdictions included on the European Union (EU) list of non-cooperative jurisdictions on tax matters (Annex I) or are registered in a jurisdiction listed by the EU as non-cooperative for tax matters and not considered to be tax resident in another jurisdiction that is not included on the EU list. Such withholding taxes are applicable as of 31 December 2022. Also, see *Dividends* and *Interest* in Section B.

(c) A Special Contribution to the Defence Fund (Defence Tax) at a rate of 17% is withheld from interest paid to resident companies and resident and domiciled individuals, if the interest is either not considered to arise in the ordinary course of the business of the recipient or is not closely connected to the ordinary course of business of the recipient.

(d) See Section B for more detailed comments.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in Cyprus are subject to income tax on their worldwide income. A company is resident in Cyprus if its control and management are exercised in Cyprus.

As of 31 December 2022, a company incorporated or registered in Cyprus whose management and control is exercised outside Cyprus is considered resident for tax purposes of Cyprus unless such company is a tax resident in another country.

Nonresident companies are taxed only on income derived from a permanent establishment in Cyprus and on rental income from property located in Cyprus.

Rate of corporate tax. The standard rate of corporate income tax is 12.5%.

Capital gains. A capital gains tax of 20% is levied on gains derived from the disposal of the following:
- Immovable property located in Cyprus
- Shares in companies whose assets include, among others, immovable property located in Cyprus
- Shares in companies that participate (either directly or indirectly) in a company or companies that own immovable property located in Cyprus and at least 50% of the market value of such shares is derived from the relevant property
- A sale agreement of immovable property located in Cyprus.

The disposal of shares of companies listed on a recognized stock exchange is exempt from capital gains tax. In addition, no capital gains tax is imposed if the transfer is made in the course of a qualifying company reorganization.

The gain subject to tax in Cyprus equals the disposal proceeds less the greater of the cost or market value on 1 January 1980, adjusted for inflation. Inflation is calculated using the official Retail Price Index. In the case of disposal of shares of companies that directly or indirectly hold property in Cyprus, the disposal proceeds subject to capital gains are restricted to the market value of the immovable property held directly or indirectly by the company whose shares are sold.

Gains from the disposal of immovable property that consists of land or land and buildings is exempt from capital gains tax if the property is acquired between 16 July 2015 and 31 December 2016 from an independent third party and not through an exchange of property or through a donation or gift.

Contribution to the Central Agency for Equal Distribution of Burdens. The Contribution to the Central Agency for Equal Distribution of Burdens applies to disposals of immovable property situated in Cyprus and disposals of shares (not listed on a recognized stock exchange) of a company that directly and/or indirectly holds immovable property for which a general valuation has been undertaken by the Department of Lands and Surveys. For disposals of immovable property, a 0.4% rate applies on sale proceeds. For disposals of a company that directly and/or indirectly holds immovable property, the 0.4% rate applies on the valuation undertaken by the Department of Lands and Surveys. Transactions entered into as part of a loan restructuring, company reorganizations or donation may be exempted from such contribution.

Administration. The tax year in Cyprus is the same as the calendar year. Income tax is payable by 31 August following the end of the relevant tax year. However, an estimate of tax due is made by 31 July during the tax year and provisional tax is payable in two equal installments by 31 July and 31 December. The two provisional payments can be made by 31 August and 31 January without the imposition of interest or penalties.

As of 1 January 2024, overdue tax is subject to interest at a rate of 5% per year on the basis of complete months. In addition, a flat 5% penalty is imposed on the tax due in the event of a failure to pay the tax by the due date. An additional penalty of 5% is

imposed if the outstanding tax is not paid within two months after the due date.

Dividends. Dividends paid to nonresident persons are generally not subject to withholding tax. However, Cyprus introduced withholding tax on dividends paid to companies that are resident or are registered in a jurisdiction listed by the EU as non-cooperative for tax matters (Annex I of the EU list). Such withholding tax is applicable as of 31 December 2022. More specifically, dividends paid by a Cypriot tax resident company to a company that is a resident in a jurisdiction that is included on the EU list, or to a company incorporated or registered in a jurisdiction included on the EU List and not considered to be tax resident in another jurisdiction that is not included on the EU List, is subject to 17% withholding tax on the amount of the dividend paid.

The withholding tax applies if the company receiving the dividend is included on the EU list and if such company participates directly in the Cypriot company paying the dividend by more than 50% in voting rights, owns more than 50% of the share capital or is entitled to 50% or more of the profits of the Cypriot company. In addition, withholding tax shall apply if two or more associated enterprises that are included on the EU list participate directly in the Cypriot company paying the dividend and collectively have more than 50% in voting rights, or own more than 50% of the share capital or are entitled to 50% or more of the profits of the Cypriot company. However, no withholding tax will be imposed on dividends paid with respect to securities listed on a recognized stock exchange.

A 17% Special Contribution to the Defence Fund (Defence Tax) is withheld from dividends paid to resident and domiciled individuals. This is a final tax.

A Cypriot tax resident company is deemed to have distributed as dividends 70% of its after-tax accounting profits (subject to certain adjustments) two years after the end of the relevant tax year (for example, the deemed distribution date for the 2022 tax year is 31 December 2024). The amount of the deemed dividend is reduced by any actual dividend distributions made up to the deemed distribution date relating to the year whose profits are subject to deemed distribution. The Special Contribution to the Defence Fund (Defence Tax) is withheld only on the proportion of profits that is attributable to shareholders considered to be residents of Cyprus (individuals and bodies of persons).

The deemed distribution rules do not apply to profits that are directly or indirectly attributable to shareholders that are nonresidents of Cyprus and/or to individual shareholders that are Cypriot tax residents but do not have a domicile in Cyprus.

Interest. Interest paid to nonresident persons is generally not subject to withholding tax. However, as of 31 December 2022, withholding tax is imposed on interest received by or credited to a company that is resident in a jurisdiction included on the EU list, or to a company that is incorporated or registered in a jurisdiction included on the EU list and is not resident in another jurisdiction that is not included on the EU list, if the interest is derived from sources within Cyprus. As of 1 January 2024, the

withholding tax rate on interest is 17%. However, no withholding tax shall apply on any interest payments made by an individual. In addition, no withholding tax will be imposed on interest received by or credited to a non-Cypriot tax resident company with respect to securities listed on a recognized stock exchange.

Royalties and technical assistance. Cyprus levies withholding tax on payments made to nonresident persons who do not carry on any business in Cyprus at a rate of 10% on technical assistance payments and on the gross amount of royalty payments that are connected with the economic utilization of intellectual property rights in Cyprus. Even if royalty payments are not connected with economic utilization in Cyprus, as of 31 December 2022, there is withholding tax on such payments if they are made to companies that are resident in jurisdictions included on the EU list of non-cooperative jurisdictions on tax matters (Annex I) or are registered in a jurisdiction listed by the EU as non-cooperative for tax matters and not considered to be tax resident in another jurisdiction that is not included on the EU list.

A 5% rate applies to royalties paid with respect to films and television.

A 5% withholding tax is also imposed on payments made to nonresident persons in consideration for services performed in Cyprus with respect to activities connected with the exploration or exploitation of the seabed or subsoil or their natural resources or with respect to activities relating to the installation and exploitation of pipelines and other installations on the subsoil, seabed or sea surface, if such payments are not connected with a permanent establishment in Cyprus.

Withholding tax may be reduced or eliminated on the basis of a double tax treaty. In addition, no withholding tax applies to royalties paid to associated companies that are resident in an EU Member State if relevant ownership requirements are met (at least 25%).

Foreign tax relief. Foreign tax on profits and gains of Cypriot resident persons is credited against the tax payable in Cyprus on the same profits or gains (pooling of credits is generally not allowed). Such foreign tax relief cannot exceed the Cyprus tax payable on the same profits or gains. Any unused foreign tax relief cannot be carried forward.

C. Determination of taxable income

General. The determination of taxable income is based on accounts prepared in accordance with generally accepted accounting principles, subject to certain adjustments and provisions of the tax law. Expenses must be incurred wholly and exclusively for the generation of income and must be supported by relevant evidence.

Dividend income received

Dividends received from a Cypriot tax resident company. Dividends received from a Cypriot tax resident company are unconditionally exempt from income tax in Cyprus. In addition, such dividends are also exempt from Defence Tax, except for dividends that are paid indirectly after the lapse of four years

from the end of the year in which the profits were generated (from which the dividend is derived).

Dividends received from a non-Cypriot tax resident company. Dividends received from a non-Cypriot tax resident company are exempt from income tax provided such dividends are not deductible at the level of the dividend-paying company for the purposes of determining the foreign tax on the income of the dividend paying-company. In addition, such dividends are exempt from Defence Tax if either of the following apply:

- The dividend-paying company derives at least 50% of its income directly or indirectly from activities that do not lead to investment income ("active versus passive income" test).
- The foreign tax burden on the profit to be distributed as a dividend is not substantially lower than the Cyprus rate (in practice interpreted not to be lower than 6.25%) at the level of the dividend-paying company ("effective minimum foreign tax" test).

If neither of the above tests above are met, Defence Tax is levied at a rate of 17% on the gross amount of dividends received.

If a dividend is subject to Defence Tax, it should be possible to claim foreign tax relief both on a unilateral basis (under Cypriot tax law) and a bilateral basis (under the relevant double tax treaty) for any withholding tax suffered abroad.

Notional interest deduction on equity. Cyprus tax resident companies (as well as foreign companies having a permanent establishment in Cyprus) that carry on a business are entitled to claim a notional interest deduction (NID) on their equity capital. The NID is deducted from the taxable income of the entity for the relevant tax year (subject to any restrictions) for the period within the tax year during which the equity belongs to the entity and is used by that entity for the carrying on of its activities. The NID equals the "reference interest rate" multiplied by the "new capital" (the NID cannot be claimed on "old capital"). The "reference interest rate" equals the 10-year government bond yield rate of the jurisdiction in which the "new capital" is invested plus a risk premium of 5%.

The NID granted on new capital cannot exceed 80% of the taxable profit resulting from the use of capital before allowing for NID. In the event of losses, the NID will not be available. Effectively, this means that NID cannot create or increase tax losses.

Taxpayers can elect not to claim NID or claim part of it for each tax year.

Inventories. Inventory is generally valued at the lower of cost or net realizable value. The cost must be determined under the first-in, first-out method and/or the weighted average cost formula. The last-in, first-out method is not acceptable.

Depreciation and amortization allowances

Plant and machinery. A straight-line allowance of 10% a year is given on capital expenditures for plant and machinery. For machinery and plant acquired during the period of 2012 through 2018, a deduction for wear and tear at 20% per year is allowed.

Industrial and hotel buildings. A straight-line allowance of 4% a year is available for industrial and hotel buildings. For industrial and hotel buildings acquired during the period of 2012 through 2018, a deduction for wear and tear at 7% is allowed.

Commercial buildings. A straight-line allowance of 3% a year is allowed for commercial buildings.

Office equipment. A straight-line allowance of 20% a year is allowed for computers. Other office equipment is depreciated under the straight-line method at an annual rate of 10%. For other office equipment acquired during the period of 2012 through 2018, a deduction for wear and tear at a rate of 20% per year is allowed.

Motor vehicles. In general, a straight-line allowance of 20% a year is allowed for motor vehicles (except for private saloon cars for which no tax depreciation is available).

Sales of depreciable assets. On the disposal of an asset, a so-called balancing statement must be prepared. If the sale proceeds are less than the remaining depreciable base, a further allowance (balancing deduction) equal to the amount of the difference is granted. If the sale proceeds exceed the depreciable base, the excess (up to the amount of allowances claimed) is included in taxable income (balancing addition). As of 1 January 2020, the obligation to prepare a balancing statement does not apply to intangible assets.

Taxation of intangible assets. The provisions of the Intellectual Property (IP) Box regime have been aligned with the recommendations of the Organisation for Economic Co-operation and Development (OECD) Action 5 of the Base Erosion and Profit Shifting (BEPS) Plan on Countering Harmful Tax Practices More Effectively, Taking into Account Transparency and Substance.

The IP Box regime is based on the OECD-recommended nexus approach. This approach limits application of the IP Box regime if research and development (R&D) is being outsourced to related parties. The approach links the benefits of the regime with the R&D expenses incurred by the taxpayer. Under the new IP Box regime, qualifying taxpayers can claim a tax deduction equal to 80% of qualifying profits resulting from the business use of the qualifying assets. A taxpayer may elect not to claim the deduction or only claim a part of it. The following is the calculation for qualifying profits:

$$\frac{\text{Qualifying expenditure} + \text{Uplift expenditure}}{\text{Overall expenditure}} \times \text{Overall IP income}$$

The cost of the acquisition or development of intangible assets of a capital nature is amortized in a reasonable manner over its useful economic life, which is determined based on accounting standards, with a maximum period of 20 years. Taxpayers may claim all or part of the amortization for tax purposes. Any unused amortization can be carried forward and used in future tax years.

New 120% research and development expenses deduction. All expenses for scientific research and development (R&D) recognized under internationally acceptable accounting standards are

deductible. The deduction is available to people carrying on a business who are the economic owners of the relevant intellectual property. For 2022 to 2024, an additional increased deduction, equal to 20% of the actual amount of the relevant R&D expenses, is allowed. This additional 20% deduction also applies to R&D expenses that are capitalized for accounting purposes. This additional deduction should not be available to taxpayers that claim a deemed deduction under the provisions of the IP Box regime.

Relief for losses. Effective from 1 January 2012, losses can be carried forward to the following five years. Loss carrybacks are not allowed.

Group loss relief. Group loss relief for losses incurred in the corresponding year of assessment is allowed between resident group companies that meet certain conditions.

Group loss relief also applies to cases in which the surrendering company is registered in and is a tax resident of another EU Member State, provided that it has exhausted all possibilities available for using the losses in its respective country of tax residency or in an EU country where its intermediary holding company has its legal and tax seat. In such circumstances, the tax losses are calculated based on the provisions of the Cypriot tax laws.

Cyprus does not have any tax consolidation rules, and companies are required to submit a stand-alone income tax return.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on any supply of goods or services, other than an exempt supply, made in Cyprus by a taxable person (taxable if annual supplies exceed EUR15,600) in the course of business	0/3/5/9/19
Payroll taxes	
Social insurance contribution, levied on each employee's gross salary, up to EUR5,239 a month; payable by both employer and employee	8.8
Employer's contribution to the General Healthcare System; contributions are capped to yearly emoluments of EUR180,000	2.9
Employee's contribution to the General Healthcare System; contributions are capped to yearly emoluments of EUR180,000	2.65
Special Cohesion Fund, levied on gross salary; payable by employer (no cap applies)	2
Human Resource Development Authority and Redundancy Fund, levied on gross salary, up to EUR5,239 a month; paid by employer	1.7

E. Miscellaneous matters

Foreign-exchange controls. Cyprus does not impose foreign-exchange controls.

Transfer pricing. The arm's-length principle is codified in the Cyprus tax law with language similar to that of Article 9 of the OECD Model Tax Convention. Consequently, all transactions entered into with related and/or connected parties must be concluded on an arm's-length basis; otherwise, the tax authorities have the statutory right to make adjustments to taxable income. Therefore, the arm's-length price must be applied on transactions between related parties in their commercial or financial relations.

Effective 1 January 2022, Cyprus introduced transfer pricing rules in accordance with the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations. The transfer-pricing rules provide for the content of the Transfer Pricing Documentation Files (Local and Master Files) and the Summary Information Table as well as introduce the concept of Advance Pricing Agreements.

EU Anti-Tax Avoidance Directive. The Cypriot tax laws have been amended to incorporate the relevant provisions of the EU Anti-Tax Avoidance Directive (ATAD). The amendments made in 2019 and 2020 are summarized below. The Cypriot tax authorities have issued guidance with respect to the interest limitation rules. In addition, it is expected that guidance will be issued during 2024 with respect to the controlled foreign company (CFC) rules.

General anti-abuse rule. The amendments include a broadly worded general anti-abuse rule in line with the wording used in the ATAD.

Interest limitation rules. The interest limitation rules restrict the tax deductibility of exceeding borrowing costs (as defined) to 30% of the tax-adjusted earnings before interest, taxes, depreciation and amortization (EBITDA). The most important aspects of the interest limitation rules are the following:

- The interest limitation rules apply at a Cypriot group level (75% criterion).
- A de minimis exception applies for exceeding borrowing costs up to EUR3 million.
- An exemption applies to stand-alone entities and to financial institutions.
- Grandfathering rules apply to loans concluded before 17 June 2016.
- Long-term public infrastructure loans are excluded.
- Equity-escape clause measures are provided.
- Carryforward measures for unused interest capacity and for exceeding borrowing costs whose deductibility is restricted are provided.

Controlled foreign corporations. Controlled foreign corporation (CFC) rules are applicable in Cyprus as of 1 January 2019. If certain conditions are met, a Cypriot controlling taxpayer must include in its tax base the non-distributed income of a CFC company to the extent such profits arise from non-genuine arrangements that have been put in place for the essential purpose of obtaining a tax advantage under the Cypriot Income Tax Law. An arrangement or series thereof is regarded as non-genuine to the extent that the significant people functions that have contributed

to the generation of the income of the CFC are substantially performed by the Cypriot controlling company and/or other Cypriot persons associated with the Cypriot controlling company.

Exit taxation rules. As of 1 January 2020, a company that is tax resident in Cyprus or a non-Cypriot tax resident company that has a permanent establishment in Cyprus is subject to tax at an amount equal to the market value of the transferred assets at the time of exit, less their value for tax purposes, in any of the following cases:

- A Cypriot tax resident company transfers asset(s) from its head office in Cyprus to its permanent establishment in another EU Member State or in a third country in so far as Cyprus no longer has the right to tax the transferred assets due to the transfer.
- A non-Cypriot tax resident company with a permanent establishment in Cyprus transfers assets from its permanent establishment in Cyprus to its head office or another permanent establishment in another EU Member State or in a third country in so far as Cyprus no longer has the right to tax the transferred assets due to the transfer.
- A Cypriot tax resident company transfers its tax residence from Cyprus to another EU Member State or to a third country, except for those assets that remain effectively connected with a permanent establishment in Cyprus and for which Cyprus maintains its right to tax.
- A non-Cypriot tax resident company with a permanent establishment in Cyprus transfers the business carried on by its permanent establishment from Cyprus to another EU Member State or to a third country in so far as Cyprus no longer has the right to tax the transferred assets due to the transfer.

Anti-hybrid rules. Rules against hybrid mismatches are applicable as of 1 January 2020 (with the exception of rules against reverse hybrids, which are effective as of 1 January 2022). The aim of the rules is to ensure that deductions or credits are only taken in one jurisdiction and that there are no situations involving deductions of payments in one country without taxation of the corresponding income in the other country concerned. The rules are typically limited to mismatches as a result of hybridity and do not affect the allocation of taxing rights under a tax treaty. The following are the rules:

- Hybrid financial instrument mismatches: Situations in which the qualification of a financial instrument or the payment made under it differs between two jurisdictions (for example, the instrument is considered to be debt in the payer jurisdiction and as equity in the payee jurisdiction).
- Hybrid entity mismatches: Situations in which an entity is qualified as opaque under the laws of one jurisdiction (that is, a taxable entity under the laws of that jurisdiction) and qualified as transparent by another jurisdiction (for example, the partners of the entity are taxable on their profit shares under the laws of that other jurisdiction).
- Hybrid transfers: Situations in which the laws of two jurisdictions differ on whether the transferor or the transferee of a financial instrument has the ownership of the payments on the underlying asset.

- Hybrid permanent establishment mismatches: Situations in which the business activities in a jurisdiction are treated as being carried on through a permanent establishment by one jurisdiction while those activities are not treated as being carried on through a permanent establishment in the other jurisdiction.
- Imported mismatches: Situations in which the effect of a hybrid mismatch between parties in third countries is shifted into the jurisdiction of an EU Member State through the use of a non-hybrid instrument thereby undermining the effectiveness of the rules that neutralize hybrid mismatches. This includes a deductible payment in an EU Member State under a non-hybrid instrument that is used to fund expenditure involving a hybrid mismatch.
- Tax residency mismatches: Situations in which a taxpayer is resident for tax purposes in two or more jurisdictions.

Company reorganization rules. Exemptions are available for profits or gains arising as part of a qualifying company reorganization, such as a merger, partial division or transfer of assets. However, the law includes general anti-abuse provisions that aim to make sure that the exemptions are available to bona fide company reorganizations. The exemptions also extend to stamp duty, contributions to the Central Agency for Equal Distribution of Burdens and land transfer fees.

Global Minimum Tax (Pillar Two). The Pillar Two rules introduce a minimum effective tax rate (ETR) of 15% to multinational enterprise (MNEs) or large-scale domestic groups with consolidated annual revenues of EUR750 million in at least two of the four fiscal years immediately preceding the tested fiscal year. The following two interlocked rules exist:

- The Income Inclusion Rule (IRR)
- The Undertaxed Profit Rule (UTPR) through which an additional amount of tax called a "top-up tax" should be collected each time that the ETR due on the income of an MNE or domestic large-scale group in a given jurisdiction is below 15%.

Cyprus is expected to introduce the IRR for financial years beginning on or after 31 December 2023 and the UTPR for financial years beginning on or after 31 December 2024. A Domestic Top-up tax Rule is likely to be introduced for financial years beginning on or after 31 December 2024. For the latest information, please refer to the *BEPS 2.0 – Pillar Two Developments Tracker* (ey-beps-2-0-pillar-two-developments-tracker.pdf).

F. Treaty withholding tax rates

As noted in Section A, Cyprus does not impose outbound withholding taxes on dividend and interest payments made to non-Cypriot tax resident persons with the exception of certain payments made to companies that are registered in a jurisdiction included on the EU list of non-cooperative jurisdictions on tax matters (Annex I) and not considered to be tax resident in another

jurisdiction that is not included on the EU list. Also, see *Dividends* and *Interest* in Section B.

(a) The rate is 10% for dividends paid to a company holding directly at least 25% of the capital of the payer. The rate is 5% if the recipient of the dividends has invested at least EUR200,000 in the share capital of the payer.

(b) The rate is 0% for interest paid to the government of the other contracting state and other state-owned and governmental authorities. Specific treaty analysis should be made in each case.

(c) The rate is 0% for royalties paid for literary, artistic or scientific works, as well as for film and television royalties.

(d) The lower rate applies to dividends paid to a company holding directly or indirectly at least 25% of the capital of the payer (indirectly applies only to the Belgium treaty).

(e) The rate is 0% for interest paid to the government of the other contracting state and for interest paid on bank loans or with respect to credit sales of industrial, commercial or scientific equipment or merchandise.

(f) The rate is 10% for dividends paid to a company holding directly at least 10% of the share capital of the payer.

(g) In general, the rate is 5% for film and cinematographic rights.

(h) The rate is 5% for dividends paid to a company holding directly at least 25% of the share capital of the payer.

(i) The rate is 0% for interest paid to a government, bank or financial institution.

(j) The 0% rate applies if the beneficial owner is a company (other than a partnership) holding at least 10% of the capital of the company paying the dividends. The 5% rate applies in all other cases.

(k) The rate is reduced to 5% if the beneficial owner of the dividends is any of the following:
- An insurance company
- A pension fund
- A company whose shares are listed on a recognized stock exchange if it holds at least 15% of the payer's share capital for at least 365 days and if it has at least 85% of its voting shares publicly traded
- One of the contracting states
- One of the contracting states' central banks

(l) The 5% rate applies if the beneficial owner is a company (other than a partnership) holding at least 10% of the voting power of the capital of the company paying the dividends. The 15% rate applies in all other cases.

(m) The 5% rate applies if the recipient of the dividends is a direct beneficial owner of at least 10% of the capital of the company paying the dividends. The 15% rate applies to other dividends.

(n) The rate is 10% for royalties paid for literary, artistic or scientific works, or for films or television. The rate is 15% for payments for the use of industrial, commercial or scientific equipment.

(o) The 0% rate applies to interest paid to the government. The rate is 7% for interest paid to banks and financial institutions.

(p) The 0% rate applies to interest paid to the government. The 10% rate applies to interest paid to banks. The 15% rate applies in other cases.
(q) The rate is 5% for royalties paid for literary, artistic or scientific works, or for film or television. The rate is 10% for payments for the use of industrial, commercial or scientific equipment.
(r) The rate is 0% for royalties paid for literary, dramatic, musical or artistic works.
(s) The 15% rate is the general withholding tax rate. However, the 0% rate applies, among other conditions, if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends and if such holding has been maintained for an uninterrupted period of at least 12 months.
(t) A 5% rate applies to royalties paid with respect to films and television. A 10% rate applies to other royalties if the asset for which the royalties are paid is used in Cyprus. Please refer to Section B for dividends and interest.
(u) A 5% rate applies if the beneficial owner of the dividends has invested in the capital of the payer company less than the equivalent of EUR150,000 at the time of the investment.
(v) The 0% rate applies if the interest is paid to the government, a local authority, central bank or similar state-owned enterprises (as provided under the respective tax treaty).
(w) The 5% rate applies if the dividend recipient holds at least 20% of the capital of the dividend paying company or has invested at least EUR100,000 in such company. The 10% rate applies in all other cases.
(x) The 5% rate applies to royalties paid with respect to copyrights of scientific works, patents, trademarks, secret formulas or processes, or information concerning industrial or commercial experience. The 10% rate applies to other royalties, particularly for literary works, music works, films and software.
(y) The 0% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends and if such holding is maintained for an uninterrupted period of at least one year. The 5% rate applies in all other cases.
(z) The treaty between Cyprus and the USSR is still honored by Cyprus.
(aa) The treaty between Cyprus and the Socialist Republic of Yugoslavia still applies.
(bb) The treaty between Cyprus and Czechoslovakia still applies.
(cc) The 0% rate applies if the beneficial owner of the dividends is a company that holds at least 10% of the capital of the company paying the dividends for a continuous period of at least 24 months.
(dd) The withholding tax rate on dividends is 5% if the beneficial owner of the dividend is a company (other than a partnership) that holds at least 10% of the dividend paying company. In all other cases, the rate is 10%.
(ee) The 0% rate applies if the recipient of the income is a qualifying pension fund, the government of the other state or a company that holds directly at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least one year. In all other cases, the rate is 15%.
(ff) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 10% applies in all other cases.
(gg) The 0% rate applies if the interest is paid to ministries, other governmental institutions, municipalities, the central bank and other banks wholly owned by the other contracting state.
(hh) The 0% rate applies to the following:
- Interest paid to the other contracting state, a political subdivision or a local authority of that state, the national bank of that state, or any institution the capital of which is wholly owned by that state or the political subdivisions or local authorities of that state
- Interest on deposits (not represented by bearer instruments) with a banking enterprise

(ii) The 0% rate applies to interest arising in a contracting state and paid to or guaranteed by the government of the other contracting state or a statutory body thereof, or to the national bank of that other state.
(jj) The 5% rate applies to the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to the gross amount of dividends in all other cases.
(kk) The 0% rate applies to the gross amount of the dividends if the beneficial owner is a company (other than a partnership). The 10% rate applies to the gross amount of the dividends in all other cases.

(ll) The rate is 0% for the gross amount of interest paid by a company that is a resident of a contracting state to a company (other than a partnership) that is a resident of the other contracting state and is the beneficial owner of the interest. The 10% rate applies to the gross amount of the interest in all other cases.

(mm) The rate is 0% for the gross amount of the royalties paid by a company that is a resident of a contracting state to a company (other than a partnership) that is a resident of the other contracting state and is the beneficial owner of the royalties. The 5% rate applies to the gross amount of the royalties in all other cases.

(nn) If dividends are paid by a company that is a resident of Cyprus to a resident of Malta that is the beneficial owner of the dividends, the Cyprus tax may not exceed 15% of the gross amount of the dividends. If the dividends are paid by a company resident of Malta to a resident of Cyprus that is the beneficial owner of the dividends, the Maltese tax shall not exceed the tax chargeable on the profits out of which the dividends are paid.

(oo) The 0% rate applies to the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies to the gross amount of the dividends in all other cases.

(pp) The 15% rate applies to the gross amount of the dividends. The 5% rate applies if certain conditions are met.

(qq) The 0% rate on dividends applies if the beneficial owner is a company (other than a partnership) that holds, directly or indirectly, at least 25% of the capital of the company paying the dividends. The 5% rate applies in all other cases.

(rr) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 8% rate applies in all other cases.

(ss) The rate is 5% for dividends paid to a company holding directly at least 20% of the share capital of the payer for at least 365 days. The 10% rate applies in all other cases.

(tt) The rate is 5% for dividends paid to a company holding directly at least 10% of the share capital of the payer. The 15% rate applies in all other cases.

(uu) The standard withholding tax rate is 15%. A 5% withholding tax rate applies if the beneficial owner of the interest is a company whose shares are listed on a registered stock exchange, provided that no less than 15% of the voting shares of that company are in free float and that these voting shares hold directly at least 15% of the capital of the company paying the interest throughout a 365-day period. A 0% withholding tax rate applies to, among others, the following categories (provided that the beneficial ownership test is met):
- Interest paid to insurance undertakings or pension funds
- Interest paid to banks
- Interest on government bonds, corporate bonds and Eurobonds listed on a registered stock exchange

(vv) Cyprus and the United Kingdom entered into a new treaty during 2018. Under the new treaty, the 0% rate applies to dividends paid by a company that is a resident of a contracting state to the beneficial owner who is a resident of the other contracting state. The 15% rate applies to dividends paid out of income (including gains) derived directly or indirectly from immovable property by an investment vehicle that distributes most of this income annually and whose income from such immovable property is exempt from tax.

(ww) The rate is 0% if interest is paid in any of the following circumstances:
- In connection with the sale on credit of any industrial, commercial or scientific equipment
- In connection with the sale on credit of any merchandise by one enterprise to another enterprise
- On any loan granted by a bank

(xx) The 15% rate applies to the gross amount of the dividends. The 0% rate applies if certain conditions are met.

A. At a glance

Corporate Income Tax Rate (%)	21 (a)
Capital Gains Tax Rate (%)	0/21 (b)
Branch Tax Rate (%)	21
Withholding Tax (%)	
Dividends	0/15/35 (c)(d)(e)

Interest	0/15/35 (c)(e)(f)(g)
Royalties	0/15/35 (c)(e)(g)(h)
Rental Income from Leases	5/15/35 (c)(e)(g)(i)
Net Operating Losses (Years)	
Carryback	2 (j)
Carryforward	5

(a) Basic investment funds (see Section B) are subject to tax at a rate of 5%. A 0% rate applies to pension funds.

(b) Capital gains derived by Czech or European Union (EU)/European Economic Area (EEA) parent companies (as defined in the Czech tax law) on transfers of shares in their subsidiaries are exempt from tax if certain conditions are satisfied (see Section B).

(c) The rates may be reduced by applicable tax treaties.

(d) Dividends are subject to a final withholding tax at a rate of 15%. Under the principles of the EU Parent-Subsidiary Directive (No. 2011/96/EU), dividends paid by Czech companies to parent companies (as defined in the directive and Czech law) located in EU/European Free Trade Association (EFTA) countries are exempt from withholding tax if the parent company maintains a holding of at least 10% of the distributing company for an uninterrupted period of at least one year (further conditions apply). Dividend distributions between two Czech companies or between foreign subsidiaries and their Czech parents are exempt from tax under similar conditions. The tax exemption does not apply if any of the following circumstances exist (further conditions may apply):
- The parent company or the subsidiary is exempt from corporate income tax or similar tax applicable in its jurisdiction.
- The parent or subsidiary may opt for an exemption (or a similar relief) from corporate income tax or similar tax applicable in its jurisdiction.
- The parent or subsidiary is subject to zero corporate income tax or similar tax applicable in its jurisdiction.
- The subsidiary treats the dividend payments as tax deductible.

(e) The 35% withholding tax generally applies to Czech-source income arising to Czech tax nonresidents from countries outside the EU/EEA that have not entered into a double tax treaty with the Czech Republic or a bilateral or multilateral tax information exchange agreement that is binding on both the Czech Republic and the respective foreign country. The 35% withholding tax rate also applies if the Czech income payer is unable to prove the tax residency status of the respective beneficial income owner. If applicable, the 35% rate affects all types of income subject to withholding tax (for example, dividends, interest, royalties or rental income). It does not affect rental income from financial leases if the 5% withholding tax rate applies (see footnote [i]).

(f) Interest payments to nonresidents are generally subject to withholding tax at a rate of 15% (special rules apply to some bonds). Under the principles of the EU Directive 2003/49/EC, interest paid by Czech companies to related companies (as defined in the directive) located in EU/EFTA countries is exempt from withholding tax if certain additional conditions are met.

(g) For certain types of income, EU/EEA tax residents may choose to include the income in their tax return and have it taxed at the standard corporate income tax rate after deduction of associated expenses (while claiming a credit for the withholding tax paid against tax liability stated in the tax return) or they may choose to treat the withholding tax as a final tax on the income.

(h) This withholding tax applies to nonresidents. Under the principles of EU Directive 2003/49/EC, royalties paid by Czech companies to companies located in EU/EFTA countries are exempt from tax if certain additional conditions are met.

(i) A 5% withholding tax is imposed on gross rent if the lease contract stipulates that the lessee takes over the ownership of the leased asset (tangible asset only) for a purchase price or for free at the end of the lease term or if the lease contract stipulates such a right or option for the lessee (further conditions may apply). Other rental payments are subject to a 15% withholding tax. Some rental payments may be considered royalties for Czech tax purposes.

(j) The maximum amount of the carryback is CZK30 million.

B. Taxes on corporate income and gains

Corporate income tax. Resident enterprises are subject to tax on their worldwide income. An enterprise is considered to be a resident enterprise if it is incorporated in the Czech Republic or if its management is located there. Nonresident enterprises are subject to income tax on their Czech-source income only.

Rates of corporate tax. The standard corporate income tax rate for Czech enterprises and branches of foreign enterprises is 21%. Basic investment funds are subject to a preferential tax rate of 5%. Under the Czech Income Taxes Act, the following are considered basic investment funds:

- An investment fund whose shares are accepted for trading on a European regulated market if it satisfies both of the following conditions:
  - — No corporate income taxpayer (other than the state, the central bank or specified international institutions) owns shares representing 10% or more of the share capital of the investment fund. Shares owned by related parties are considered shares owned by a single taxpayer for purposes of this condition.
  - — The investment fund does not have a trade license based on the Czech Act on Trades.
- Mutual fund
- Investment funds and subfunds of a joint stock company with variable registered capital if it invests (in line with its prospectus) more than 90% of its assets in prescribed instruments (for example, selected securities, money market instruments, financial derivatives, receivables and loans)
- A foreign investment fund comparable to funds as described in the above three bullets if it satisfies all of the following conditions:
  - — Its home country is an EU/EEA Member State.
  - — It can prove that it is administered or managed based on an authorization comparable to the authorization issued by the Czech National Bank and its administrator or manager is subject to supervision comparable to the Czech National Bank's supervision.
  - — It has statutes or a document comparable to a prospectus based on which it can be determined whether the fund is comparable to a fund described in the above three bullets.
  - — It can prove that according to the laws of its home country none of its income is attributable to other persons (meaning it is not tax transparent).

A preferential corporate income tax rate of 0% applies to pension funds.

No differences exist between the taxation of 100% Czech-owned enterprises and those with foreign investment.

Investment incentives. Investment incentives are available to investors launching or expanding the following:

- Manufacturing
- Technology centers
- Business support services centers, including shared-services, software-development, high-technology repair and data centers

Several amendments were made to the Investment Incentives Act and related regulation. A recent amendment to the Investment Incentives Act eliminates the requirement to submit a majority of applications for an investment incentive to the government for consideration. As a result, the Ministry of Industry and Trade will decide on granting the incentives for most of the applications based on the opinions of the ministries concerned. The investment project must pass a cost-benefit test (the benefit of the investment

must exceed the value of the support provided by the state). The governmental approval is required in case of cash grants on capital expenditures for strategic investment. The European Commission must be notified of projects with qualifying expenses exceeding EUR110 million.

Manufacturing industry. The following are general qualification conditions for the incentives for the manufacturing industry:

- In less underdeveloped regions, only investments in new economic activity (that is, not expansion projects) will be eligible for new support for large enterprises. Investment in tangible and intangible assets to set up a new establishment or to extend the range of activities of an establishment will be considered a new economic activity, provided the new activity is not the same as or similar to that previously carried out in the establishment. The same or similar activity will be assessed according to the four-digit classification of economic activities code (CZ-NACE codes; "CZ-NACE" is an abbreviation used for classification of economic activities [for the French term "nomenclature statistique des activités économiques dans la Communauté européenne"]).
- An investment at least CZK80 million must be in long-term tangible and intangible assets. The CZK80 million requirement may be reduced to CZK40 million in selected regions.
- The investment must be in a manufacturing sector, and at least 50% of the total investment must be invested in qualifying production machinery. Machinery must be acquired at an arm's-length price. It must have been produced no more than two years before the acquisition and must not have been previously subject to tax depreciation.
- Qualifying intangible assets must be acquired from unrelated third parties for arm's-length prices.
- The investment must be realized in the Czech Republic outside Prague.
- The investment must meet higher value-added criteria. To satisfy this requirement for investment in manufacturing, the average wage of employees working in the site of the investment must reach at least the average wage in the given region, and one of the following conditions must also be met:
  - — At least 10% of employees must be university-educated, and a contract for research and development (R&D) cooperation must have been executed with a research organization or university with a value of at least 2% of the total eligible costs.
  - — At least 3% of employees must be working in R&D.
  - — The acquisition of machinery and equipment used in R&D on top of eligible costs should represent at least 10% of the total eligible costs (machinery and equipment used in R&D cannot be included in eligible costs).

The higher value-added criteria do not apply in regions with high unemployment and for manufacturing projects related to products with strategic importance for protection of the life and health of citizens or products designed to produce or store energy from renewable sources, to increase energy efficiency or to reduce the energy consumption of buildings.

Technology centers. The following are general qualification conditions for the incentives for technology centers:
- The investor must invest at least CZK10 million in long-term tangible and intangible assets.
- At least 50% of the total investment must be invested in qualifying machinery. Machinery must be acquired at an arm's-length price, must be produced no more than two years before the acquisition and must not have been previously subject to tax depreciation.
- At least 20 new jobs must be created.

Business support services centers. The following are general qualification conditions for the incentives for business support services centers:
- Services provided by centers should cover the territory of at least three countries (including the Czech Republic).
- For data centers and software-development centers, at least 20 new jobs must be created.
- For high-tech repair centers, at least 50 new jobs must be created.
- For shared services centers, at least 70 new jobs must be created.

Eligibility criteria for granting incentives to small and medium-sized enterprises are reduced.

The following are selected general conditions:
- The above qualification conditions must be met within three years of the issuance of the decision to grant the investment incentives.
- The project cannot be started prior to the submission of the investment incentives application with CzechInvest (a Czech governmental agency that processes the investment incentives applications).
- The investment must be environmentally friendly.
- The investment must be maintained for the duration of the incentive's utilization period (10 years) and for at least five years from completing the investment project or creation of the first job (if the eligible expenses are wages, see *Eligible expenses* below).
- The investor cannot relocate the same or similar activity in the EEA in the two years preceding the application, or cannot, at the time of the application, have concrete plans to relocate such an activity within a period of up to two years after the completion of the investment project.
- The recipient of the investment incentives (that is, a new Czech subsidiary) should not be established sooner than six months prior to submitting the application to CzechInvest. The company should be the sole shareholder of a new Czech subsidiary (applicable for some investments).

Investment incentives can be obtained in the following forms:
- Corporate income tax relief for 10 years
- Job-creation grants
- Grants for training and retraining employees
- Cash grants on capital expenditures for strategic investments
- Real estate tax exemption

The total value of the incentives can range from 20% (15% from 2025) to 40% of total eligible costs (see *Eligible expenses*) for large enterprises (depending on the region; no incentives are provided in Prague). The cap is increased by 10% for midsized enterprises and 20% for small enterprises. The cap applies to the total of tax relief, job-creation grants, cash grants on capital expenditures and real estate tax exemption. Training and retraining grants are provided on top of this cap.

Corporate income tax relief and cash grants on capital expenditures are offered throughout the entire Czech Republic (with the exception of Prague). Job-creation grants and training and retraining grants are offered to investors in R&D centers. For investment in the manufacturing industry, job-creation grants and training and retraining grants are available only in regions with high unemployment. Real estate tax exemption is offered in special industrial zones.

Eligible expenses. The eligible expenses include either of the following:

- Value of tangible assets (machinery, building and land) and value of intangible assets, provided that machinery represents at least 50% of the total tangible and intangible assets' value. The assets should be acquired within five years of the issuance of the decision to grant the investment incentives.
- Value of wages incurred over a 24-month period following the month when a job was created and filled. The new job qualifies if it is created in the period from the day of the filing of the investment incentives application to the end of the third year after the issuance of the decision to grant the investment incentives. The value of the monthly wage per one employee for the purposes of cap calculation is limited to three times the average wage in the Czech Republic. Additional conditions with respect to the employees hired for the job apply.

Cash grants for strategic investment. Investors in the manufacturing industry can be provided with a cash grant for acquisition of tangible and intangible assets of up to 20% of the qualifying costs. Except for projects in the high-tech manufacturing industry and for manufacturing projects related to products with strategic importance for protection of life and health of citizens or products designed to produce or store energy from renewable sources, to increase energy efficiency or reduce the energy consumption of buildings, the following conditions need to be met (in addition to the above general conditions):

- A minimum required investment of CZK2 billion, of which at least CZK1 billion represents new machinery, must be made.
- At least 250 new jobs must be created.

R&D centers and high-tech repair centers can be provided with a cash grant of up to 20% of the qualifying costs (no more than CZK500 million), provided that the following conditions are met (in addition to the above general conditions):

- For R&D centers, a minimum required investment of CZK200 million, of which at least CZK100 million represents new machinery, must be made. In addition, at least 70 new jobs must be created.
- For high-tech repair centers, a minimum required investment of CZK200 million, of which at least CZK100 million represents

new machinery, must be made. In addition, at least 100 new jobs must be created.

Special conditions. In addition to the general conditions listed above, investors claiming the income tax relief must satisfy certain special conditions, including, among others, the following:

- They must reduce their tax base by claiming maximum tax depreciation, deducting all available tax-effective bad debt provisions and using all available tax losses carried forward, in accordance with the tax law.
- They must be the first user of tangible assets (excluding real estate) that are acquired for the purposes of the investment in the Czech Republic.
- They may not cease to exist, terminate their activities or declare bankruptcy.
- They may not increase their tax base through related-party transactions that are not at arm's length.

Mergers are allowed to some extent; tax relief claimed before the merger is not lost, but investors are not able to claim tax relief in subsequent tax periods.

Specific conditions apply to job-creation, retraining and training grants and to grants on capital expenditures for strategic investments.

The incentives are provided based on the Investment Incentives Act and related EU directive.

Capital gains. In the Czech Republic, realized and unrealized capital gains are recognized.

Capital gains realized by a Czech or another EU/EEA parent company (also, see below) on the transfer of shares in a subsidiary established in the Czech Republic or another EU/EEA country are exempt from tax if the parent company maintains a holding of at least 10% of the subsidiary for an uninterrupted period of at least one year (further conditions apply).

Capital gains realized by a Czech or EU/EEA parent company on the transfer of shares in a subsidiary in a contracting country (that is, a third country that has entered into a tax treaty with the Czech Republic) are also exempt from tax if the following conditions are satisfied:

- The subsidiary has a legal form comparable to Czech legal forms listed in the Czech tax law.
- The parent company has held an ownership interest of at least 10% in the subsidiary for at least one year (this condition may be fulfilled subsequent to the date of the transfer).
- The subsidiary is liable to a tax similar to corporate income tax at a rate of at least 12% in the tax period in which the parent company accounts for the respective capital gain and in the preceding tax period.

The exemption for capital gains does not apply if any of the following circumstances exists:

- The subsidiary entered liquidation proceedings.
- The shares in the subsidiary were acquired through the acquisition of a going concern.
- The parent company or the subsidiary is exempt from corporate income tax or similar tax applicable in its jurisdiction.

- The parent company or the subsidiary may opt for an exemption (or a similar relief) from corporate income tax or similar tax applicable in its jurisdiction.
- The parent company or the subsidiary is subject to zero corporate income tax or similar tax applicable in its jurisdiction.

Other realized capital gains are included with other taxable income and taxed at the regular corporate income tax rate. Capital losses on certain assets may be deducted from ordinary income, while capital losses on other assets (including capital losses on assets that qualify for exemption) are not deductible, even from other capital gains.

Unrealized capital gains and losses, which result from revaluation to fair value, are taxable or deductible only with respect to certain assets. Unrealized gains on shares that qualify for exemption are not taxable and unrealized losses on such assets are nondeductible for tax purposes.

Capital gains realized by nonresidents on the following are considered Czech-source income and are consequently generally taxable:

- Sales of rights registered in the Czech Republic or investment instruments to Czech taxpayers or Czech permanent establishments
- Sales of shares (securities or share interests) in Czech companies, regardless of the tax residence of the purchaser

However, capital gains realized by EU/EEA parent companies on sales of shares may be exempt from tax (see above).

Administration. Companies may select a calendar year or a fiscal year as its tax year. If a company uses a tax year other than the calendar year, it must file a notification with the tax authorities.

Tax returns must be filed within three months after the end of the tax year. If a company does not file the tax return by the standard three-month deadline, the deadline is automatically extended to the following:

- To four months after the end of the tax year if the tax return is filed electronically
- To six months after the end of the tax year if the tax return is filed by an appointed advisor (tax advisor or attorney-at-law)

Companies that are subject to a statutory audit are automatically granted a three-month (to six months after the end of the tax year) extension. In addition, on application of the company, an extension of three months to file a tax return may be granted at the discretion of the tax authorities.

A company with tax liability of more than CZK150,000 for the preceding year must make quarterly advance payments of tax, each equal to 25% of the preceding year's tax liability. The payments must be made by the 15th day of the third, sixth, ninth and twelfth month of their tax year. Any balance of tax due must be paid by the due date for filing the tax return.

If a company's liability for the preceding year exceeded CZK30,000, but did not exceed CZK150,000, installments that are each equal to 40% of the tax liability for the preceding year must be paid by the 15th day of the sixth and twelfth months of their tax year. If the

preceding year's tax liability was CZK30,000 or less, only a single payment is required on filing the annual return.

Late payments and late filings incur penalty charges at a rate established by law. Overpayments are generally refunded within 30 days of the taxpayer's application.

Dividends. Dividends are subject to a final withholding tax at a rate of 15%. The tax rate is increased to 35%, effective from 2013, for dividends paid to Czech tax nonresidents from countries outside the EU/EEA that have not entered into a double tax treaty with the Czech Republic or a bilateral or multilateral tax information exchange agreement that is binding on both the Czech Republic and the respective foreign country.

Under the principles of the EU Parent-Subsidiary Directive (No. 90/435/EEC), dividends paid by Czech companies to parent companies (as defined in the Czech tax law) that are located in EU/EFTA countries (also, see below) are exempt from withholding tax if the parent company maintains a holding of at least 10% of the distributing company for an uninterrupted period of at least one year (further conditions apply). The condition described in the preceding sentence may be fulfilled after the date of distribution of the dividend. Dividend distributions between two Czech companies and between foreign subsidiaries and their Czech parents are exempt from tax under similar conditions.

In addition, dividends distributed by subsidiaries in a contracting country are also exempt from taxation under rules similar to those applicable to capital gains (see *Capital gains*).

The tax exemption for dividends does not apply if any of the following circumstances exists (further conditions may apply):
- The parent company or the subsidiary is exempt from corporate income tax or similar tax applicable in its jurisdiction.
- The parent or subsidiary may opt for an exemption (or a similar relief) from corporate income tax or similar tax applicable in its jurisdiction.
- The parent or subsidiary is subject to zero corporate income tax or similar tax applicable in its jurisdiction.
- The subsidiary has an option to treat the dividend payments as tax deductible in its jurisdiction.

In addition, the beneficial ownership, substance and principal purpose test should be observed.

Foreign tax relief. Foreign tax relief (through credit or exemption) is available only under tax treaties. If foreign tax relief is not available under a treaty, the income tax paid abroad may be deducted as an expense in the following year if it is imposed on income included in taxable income in the Czech Republic.

C. Determination of trading income

General. Taxable income is calculated according to Czech accounting regulations, with adjustments for tax purposes.

All expenses incurred to generate, assure and maintain taxable income that relate to the given period are generally deductible, subject to the limits specified in the corporate income tax and

related laws, if documented by the taxpayer. The following are some of the expenses that may be deducted:

- Depreciation of tangible and intangible assets (see *Depreciation*).
- Interest and other financing costs if numerous tests, including thin capitalization, and earnings before interest, tax, depreciation and amortization (EBITDA), are met (see *Financing expenses* in Section E).
- Cost of insurance if related to taxable income (except for insurance paid on behalf of an executive or member of the board of directors for damage caused by the performance of his or her functions).
- Membership contributions paid to selected chambers and associations under certain conditions.
- Damages resulting from natural disasters. The amount of the damage must be documented by evidence submitted by an expert from an insurance company. Damages caused by unknown perpetrators can be tax deductible if confirmed by the police.
- Real estate tax paid in accordance with the Czech law, road tax and selected other taxes and fees (subject to exceptions), if related to activities that generate taxable income.
- Specified expenses related to the provision of proper working, social and health care conditions of the employees.
- Payments on leases, including financial leases, under certain conditions.
- Travel expenses related to work in the Czech Republic and abroad.
- Donations valued at CZK2,000 or more for various social and charitable purposes. In general, the maximum amount of this deduction is 10% of the tax base (increased limit of 30% may apply to certain purposes and tax periods). Further, under certain additional conditions, donations and expenses for non-monetary donations made in connection with the armed conflict in Ukraine may be deducted.

The following are some of the expenses that are not deductible for tax purposes:

- Refreshment and entertainment expenses
- Damages (unless the specific conditions mentioned above are met)
- Expenses paid by the taxpayer on behalf of another payer (for example, instead of related parties)
- Penalties and late payment interest levied by tax authorities and other government institutions
- Non-monetary benefits provided to employees (for example, cultural events, sports, education and medical aids)
- Creation of provisions and reserves (unless specific conditions are met)

In general, taxpayers must increase their tax base by the amount of any overdue liability accounted for in their books that represented a tax-deductible expense and that remains unsettled for 30 months (for liabilities due in 2015 or later) or 36 months (for liabilities due prior to 2015).

Inventory. Inventory is valued at acquisition or production cost. Costs include all costs necessary to convert the inventory to its current condition and to transport it to its current location. No deduction is allowed for inventory provisions or for other

decreases in inventory value. Under certain circumstances, the liquidation of inventory may be deductible for tax purposes.

Provisions. Provisions are not deductible unless a special tax law permits their creation for tax purposes.

Tax relief is provided with respect to overdue trading debts (as defined in the law).

Taxpayers may generally create the following tax-deductible provisions for debts that are overdue and not lapsed (with certain limitations):

- 50% of the unpaid book value of the debt if more than 18 months have elapsed since the agreed due date
- 100% of the unpaid book value of the debt if more than 30 months have elapsed since the agreed due date

For overdue debts exceeding CZK200,000 that were acquired from the previous creditor, deduction of the above provisions is allowed only if a court or arbitration proceeding was initiated and the taxpayer (creditor) participates in the proceeding.

The above deductions must generally be recorded in the accounting books. The deductions may not be claimed for debts from related parties and other specified debts.

A 100% provision can be created for receivables up to CZK30,000, subject to certain conditions. A 100% provision for overdue receivables may also be created if insolvency proceedings have been initiated with respect to the debtor's property and if the creditor makes a timely claim for such receivables against the debtor in the respective court. This deduction may not be claimed for debts from related parties.

Reserves. Taxpayers may create tax-deductible reserves for the repair of tangible assets included in Categories 2 through 6 for tax depreciation purposes (see *Depreciation*). The reserves must be created for a minimum of two tax periods and for the maximum number of tax periods specified for each asset category.

Reserves for repairs of tangible assets may be created tax-effectively only if cash equal to the amount of the reserve created is deposited in a specific bank account.

Depreciation. The corporate income tax law includes specific provisions concerning the depreciation of tangible and intangible assets. Depreciable tangible assets are divided into six categories, each of which specifies a period (a specified number of years) over which all assets in the category are depreciated.

The following are the six categories of depreciation, the time periods for depreciation of assets in each category and representative assets included in each category.

Category	Asset	Years
1	Office machines and some light machinery	3
2	Passenger cars, buses, airplanes, tractors, lorries, furniture and specified production machinery	5
3	Heavy machinery	10

Category	Asset	Years
4	Wooden buildings, pipelines, buildings for the production of energy, and buildings and halls built near mines	20
5	Buildings	30
6	Specified buildings	50*

* This category includes hotels, stores and office buildings.

Assets other than buildings that cannot be classified in any of the above categories are considered to be in Category 2. Category 5 covers buildings that are not covered by Categories 4 or 6.

Taxpayers may elect to depreciate assets using the straight-line or the accelerated method. The method chosen, however, does not affect the period of depreciation. Under the accelerated method, depreciation for the first year is calculated by dividing the cost of the asset by the applicable coefficient (see table below). For subsequent years, accelerated depreciation is calculated by multiplying the residual tax value of the asset by two and then dividing by the applicable coefficient, which is reduced by the number of years for which the asset has already been depreciated.

The following are the depreciation rates and coefficients for the six categories under the straight-line and accelerated methods.

Category	Straight-line rate	Accelerated-depreciation coefficient
1	20% for first year and 40% for subsequent years	3 for first year and 4 for subsequent years
2	11% for first year and 22.25% for subsequent years	5 for first year and 6 for subsequent years
3	5.5% for first year and 10.5% for subsequent years	10 for first year and 11 for subsequent years
4	2.15% for first year and 5.15% for subsequent years	20 for first year and 21 for subsequent years
5	1.4% for first year and 3.4% for subsequent years	30 for first year and 31 for subsequent years
6	1.02% for first year and 2.02% for subsequent years	50 for first year and 51 for subsequent years

Taxpayers may elect to use lower than the maximum straight-line depreciation rates. Additional rules apply to assets that were technically improved.

An initial accelerated depreciation charge (additional 10% to 20% of input price; in general, the input price is the acquisition cost, including related costs) is granted in the year of acquisition for certain tangible assets if other conditions are met.

The component depreciation of assets method may be used for accounting purposes. For tax purposes, the accounting result is adjusted as if this method was not used.

Specified tangible assets used in solar energy production are depreciated proportionally for a period of 240 months.

The threshold for classification in the category of separate tangible assets and their technical improvement is CZK80,000.

Extraordinary depreciation of a fixed assets, such as emission-free vehicles, put into use between 1 January 2024 and 31 December 2028 may be used.

The proportional part of depreciation of a vehicle of category M1 (with certain exceptions), put into use from 1 January 2024 and corresponding to acquisition value of CZK2 million is deductible (similarly applicable to a finance lease). The non-deductible part of depreciation cannot be claimed on disposal.

The expenses related to the acquisition of intangible assets can generally be amortized in the same way for tax purposes as for accounting purposes.

Option to exclude unrealized exchange rate differences. As of 2024, a new option is given to exclude unrealized exchange rate differences from the tax base in the period of their creation (recognition) and to include them in the tax base (with certain exceptions) only in the period when the exchange rate difference is realized. Notification to the tax administrator of entry into the regime is required.

Functional currency. Accounting records may also (in addition to CZK) be kept in EURO, USD or GBP if this currency is also the so-called functional currency of the accounting entity. This should be the currency of the primary economic environment in which the entity operates. The accounting currency may be changed only on the first day of the accounting period. It may be changed back to CZK only if the other currency ceases to be the functional currency of the entity.

R&D costs. In principle, qualifying costs for certain eligible R&D projects are deductible twice (first as tax-deductible expenses, then as a specific tax base decreasing item). The R&D deduction generally amounts to 110% of incremental eligible costs incurred in the tax period. Purchased services do not qualify for the second deduction (except for the services provided by a public university or other research institutions specified by relevant legislation). Further detailed conditions are provided for the deduction.

Relief for losses. Losses may be carried forward for five taxable periods. The carryforward may be lost if a "substantial change" in the composition of persons directly participating in the capital or control of the taxpayer occurs. A change in the composition of persons is understood to be an acquisition or increase of a share in share capital or voting rights or acquisition of a decisive influence. "Substantial change" is an acquisition or an increase of a share which in aggregate concerns more than 25% in the share capital or in the voting rights or a change resulting in a shareholder receiving a decisive influence. If the "substantial change" test is met, the "same activities" test may be passed to preserve

the loss carryforward. Special rules apply to joint-stock companies that issue bearer shares. Tax losses are transferable on mergers if specific conditions are met.

A tax loss may be deducted from the tax base in the two tax periods immediately preceding the tax period (or the period for which a tax return is filed) for which the tax loss is assessed. In the tax periods preceding the period for which the tax loss is assessed, a tax loss may only be deducted from the tax base up to a total amount not exceeding CZK30 million.

Groups of companies. Czech income tax law does not provide for consolidated tax returns or other types of group relief.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT), levied on all taxable supplies (goods and services), acquisitions of goods from other EU Member States and imports of goods; certain supplies (books, financial and insurance services, medical care, supply or lease of immovable property if certain conditions are met) are exempt	
Standard rate; applicable to most goods and services	21%
Reduced rate applicable to specified goods and services (for example, tap water, food products except for drinks, pharmaceuticals, accommodation, catering, public transport, newspapers and certain medical devices)	12%
Social security and health insurance contributions; the social security contributions are paid only up to the maximum assessment base; subject to strict and specific conditions and for a narrow group of employees, employer contributions for social security may be lowered by 5%	
Health insurance	
Employer	9%
Employee	4.5%
(No maximum assessment base applies.)	
Old-age pension	
Employer	21.5%
Employee	6.5%
(The maximum assessment base is CZK2,110,416 as of 1 January 2024.)	
Sickness	
Employer	2.1%
Employee	0.6%
(The maximum assessment base is CZK2,110,416 as of 1 January 2024.)	
Unemployment	
Employer	1.2%
Employee	0%

Nature of tax	Rate
(The maximum assessment base is CZK2,110,416 as of 1 January 2024.)	
Excise tax, imposed on entities that produce or import certain goods, including hydrocarbon fuels and lubricants, alcohol and spirits, beer, wine and tobacco products; tax based on the quantity of goods expressed in specific units; tax may be levied only once on a particular good	Various
Road tax, imposed on certain categories of vehicles registered in the Czech Republic; special reductions of tax rates, allowances and exemptions may apply	Various
Environmental tax; imposed on electricity, natural gas and solid fuel when delivered to final consumers; tax is based on the quantity of goods expressed in specific units; tax is administered and paid by the distributor which charges it to the final customer as a price increase	Various
Electronic tax stamps for the use of highways	
Small vehicles (up to 3.5 tons; annual stamp)	CZK2,300
Large vehicles	Electronic road tolls

E. Miscellaneous matters

Foreign-exchange controls. The only legal tender valid in the Czech Republic is the Czech crown (CZK). Other currencies may be used for domestic transactions, but the use of the Czech crown is prevalent.

The Czech crown is fully convertible. Several financial transactions, such as direct investments or acceptance of credit from abroad, are subject to a reporting requirement.

Anti-avoidance legislation. In applying the tax law, the tax authorities may consider the substance of a transaction if the form of the transaction conceals the actual facts. In addition, the Czech courts have developed the abuse-of-law concept. The concept is similar to the one developed by the European Court of Justice (for example, *Halifax* [No. C-255/02]).

A minimalistic version of the general anti-avoidance rule (inspired by the Anti-Tax Avoidance Directive [ATAD]) is included in the Tax Administration Law. The provision applies to all taxes, and its wording (together with the explanatory report) indicates continuity of the current approach to the abuse of law concept.

Transfer pricing. If prices in a transaction involving related parties vary from the current market prices and if the difference cannot be justified, the market prices are used for tax purposes. Related parties include companies related through capital (that is, the same legal or natural persons directly or indirectly manage, control or own more than 25%) and companies related in a different manner. In addition, related parties are persons who establish a

business relationship for the principal purpose of decreasing taxable income or increasing a tax loss.

Binding rulings. Taxpayers may apply to the tax authorities for advance pricing agreements and for binding opinions on, for example, transfer prices, the determination of the tax base of a tax nonresident from activities carried on by a permanent establishment, technical improvements of long-term assets, the allocation of expenses to taxable and nontaxable income, expenses incurred on R&D projects, expenses incurred on buildings that are also used for private purposes, and the application of VAT rates.

Financing expenses. The tax deductibility of financing expenses (interest and associated expenses) with respect to related-party loans (including back-to-back loans) is limited by a debt-equity ratio of 4:1 (6:1 for banks and insurance companies). Financing expenses with respect to profit-participating loans are nondeductible for tax purposes. Also, limitations are imposed on the deductibility of financing expenses related to shareholdings.

Based on the transposition of the ATAD, the deductibility limit for exceeding borrowing costs is the higher of 30% tax earnings before interest, tax, depreciation and amortization (EBITDA) or CZK80 million. The rule does not apply to "standalone" taxpayers and to listed financial enterprises. Borrowing costs subject to this rule are defined broadly in line with ATAD. Disallowed exceeding borrowing costs may be carried forward and claimed in future tax periods (however, transfer to previous tax periods and transfer of unused capacity to future tax periods will not be allowed). The interest deductibility limitation rule will apply together with the thin-capitalization rule and other limitations on financing expenses.

Controlled foreign company rules. Controlled foreign company (CFC) rules were implemented through the ATAD transposition. The CFC rules provide for taxation of certain types of passive income of a CFC (or permanent establishment if exempt pursuant to a double tax treaty) in the hands of a Czech controlling company in proportion to the share capital held in the CFC if the following conditions are met:

- The CFC entity does not carry out substantive economic activity.
- The foreign tax of the CFC entity is lower than 50% of the tax that would be paid as a Czech resident under Czech rules.
- The Czech controlling company directly or indirectly (itself or with associated companies) has a greater than 50% share of the voting rights, capital or profits.

Stricter CFC rules apply to entities from jurisdictions on the EU list of noncooperative jurisdictions.

Exit taxation. Exit taxation rules (that is, taxation of the transfer of assets with no change in ownership from the Czech Republic to another jurisdiction if the Czech Republic loses the right to tax the transferred asset) were implemented through the ATAD transposition. The main parameters of the rules are broadly in line with those in the ATAD.

Anti-hybrid rules. Anti-hybrid rules were also implemented through the ATAD transposition. Situations of double deduction,

deduction without inclusion of income and imported hybrid mismatch are addressed by the anti-hybrid rules.

Foreign investment. Similar rules apply to both Czech investors and foreign investors.

Exchange of information. Various recent changes have occurred in the area of exchange of information, such as amendments made to the EU directive on administrative cooperation in the field of taxation, including Country-by-Country Reporting (CbCR), the Mandatory Disclosure Regime (legislation implementing the EU Directive on Administrative Cooperation 6 [DAC6] is generally in line with EU DAC6) and the automatic exchange of information framework concerning information to be reported by digital platform operators (DAC7), the conclusion of the Multilateral Competent Authority Agreement and the conclusion of similar agreements with "tax haven" countries (and soon also DAC8 primarily addressing crypto asset transactions).

Windfall tax. A new special temporary tax aimed at "windfall" profits, the so-called windfall tax, was enacted at the end of 2022. The main simplified parameters of the windfall tax are summarized below:

Period of application/prepayment. The new tax applies in the years 2023 through 2025, with advances payable as early as 2023 based on 2022 figures.

Companies in scope. The new tax applies to companies with significant activities in the areas of electricity and gas production and trade, banking, fossil fuel extraction and production and distribution of petroleum and coke products.

The following are the entry criteria for the tax:
- For banks: an individual criterion of (domestic) net interest income (for 2021) of at least CZK6 billion and an individual criterion of (domestic) net interest income in the current year of at least CZK50 million
- For others: a group criterion of (domestic) net turnover from the respective activities (for 2021 and excluding banks) of at least CZK2 billion and an individual criterion of (domestic) net turnover from the respective activities in the current year of at least CZK 50 million
- Additional criterion for mining/treatment of hard coal, extraction of oil and gas and production of coke and refined petroleum products: meeting the individual criterion of (domestic) net turnover from these activities in the current year of at least CZK 50 million is sufficient if these revenues represent at least 25% of the annual turnover of the taxpayer

Rate. The windfall tax rate is 60% and is applied to the companies concerned as a type of surcharge on top of the 19% corporate income tax on their "windfall profits."

Tax base. This windfall profit is calculated by comparing the current year's tax base with the arithmetic average of the 2018-2021 historical bases increased by 20%.

Base Erosion and Profit Shifting (BEPS) 2.0 – Pillar 2 and global minimum level of taxation. In December 2022, the EU adopted a directive on ensuring a global minimum level of taxation for

multinational enterprise groups and large-scale domestic groups in the EU. Broadly, its goal is to ensure a minimum effective tax rate (15%) for the global activities of large groups. Many EU Member States transposed this directive into their local law by 31 December 2023, including the Czech Republic.

Selected simplified parameters of these upcoming rules are summarized below.

Top-up tax. Under the Income Inclusion Rule (IIR), tax is typically calculated and paid by the ultimate parent entity (UPE), but not necessarily by that company.

Under the Qualified Domestic Minimum Top-up Tax (QDMTT) rules, individual jurisdictions have the option to levy their top-up tax on the low-taxed excess profits of constituent entities located in that jurisdiction.

Under the Undertaxed Profit Rule (UTPR), a top-up tax that has not been levied under the IIR/QDMTT is imposed.

Effective date. The effective date for the IIR is from periods starting from 31 December 2023; the UTPR will be generally effective with a one-year delay.

Who is affected by these new rules. The new rules generally apply to EU entities belonging to a multinational group (or large domestic group) with annual consolidated revenues of at least EUR750 million (in at least two of the last four periods).

Various complex rules, requirements, exceptions and elections apply. For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (https://assets.ey.com/content/dam/ey-sites/ey-com/en_gl/topics/tax/tax-pdfs/ey-beps-2-0-pillar-two-developments-tracker.pdf).

F. Treaty withholding tax rates

The Czech Republic honors bilateral tax treaties of Czechoslovakia. It has also entered into tax treaties with many other jurisdictions. The Czech Republic is a signatory of the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (Multilateral Instrument, or MLI). The Czech Republic has so far implemented only "the minimum standard"; that is, the preamble, the rule to prevent treaty abuse (the principal purpose test) and modifications concerning the effective resolution of disputes by mutual agreement. The MLI entered into force for the Czech Republic on 1 September 2020, and the entry into effect in relation to a particular covered treaty is generally derived (with some delay) from its ratification by both MLI signatories.

The following table lists the withholding tax rates under the bilateral treaties currently honored by the Czech Republic.

	Dividends %	Interest %	Royalties %
Albania	5/15 (b)	0/5 (g)	10
Andorra	5/10 (c)	0	5/10 (a)

Non-treaty jurisdictions	15/35 (x)	0/15/35 (d)(x)	15/35 (x)

(a) The lower rate applies to royalties paid for copyrights. The higher rate applies to royalties paid for patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment or information.

(b) The lower rate applies if the receiving company (other than a partnership) owns at least 25% of the capital of the payer. Under the Belgium treaty, dividends paid to partnerships may also qualify for the lower rate. Under the United Kingdom treaty, the lower rate applies if the receiving company controls at least 25% of shares with voting rights of the payer. Under the Japan treaty, the lower rate applies if the receiving company holds at least 25% of shares with voting rights of the payer for at least six months preceding the payment of dividend. Under the Colombia treaty, the 25% rate applies to dividends paid by a Colombian resident that are derived from profits that

were not under the law subject to Colombian tax, and the 15% rate applies to dividends not subject to the 5% or 25% rates.

(c) The lower rate applies if the receiving company (other than a partnership) owns at least 10% of the capital of the payer. Under the Canada and Nigeria treaties, the lower rate applies if the receiving company controls at least 10% of the voting rights of the payer (except for dividends paid by a Canadian investment corporation). Under the United States treaty, the lower rate applies if the receiving company owns at least 10% of the shares with voting rights of the payer (exceptions applies to dividends paid by investments companies and real estate investment trusts located in the United States). Under the Norway treaty, the 0% rate also applies to dividends paid to the government or specified institutions. Under the Cyprus, Liechtenstein, Luxembourg and Switzerland treaties, the 0% rate applies if at least 10% of share capital of the payer is held by an entity (other than a partnership) for at least one year. Under the Denmark treaty, the 0% rate applies if the recipient of the dividends is a pension fund. Under the Switzerland treaty, the 0% rate also applies if the recipient of the dividends is a central bank or a pension fund.

(d) Interest on mutual deposits with banks in the interbank market is exempt from tax for recipients from non-treaty countries (subject to reciprocal treatment). For all Czech tax nonresidents (that is, recipients from treaty and non-treaty countries), interest on bonds issued by Czech taxpayers or the Czech Republic outside the Czech Republic is exempt from tax. The 15% rate applies to other interest but see also footnote (x).

(e) The lower rate applies if the receiving company (other than a partnership) owns at least 20% of the capital of the payer. Under the Australia treaty, the lower rate applies to dividends paid from the Czech Republic to Australia if the receiving company owns at least 20% of the capital of the payer and to dividends paid from Australia to the Czech Republic if special requirements are met.

(f) The 5% rate applies if the receiving company (other than a partnership) owns more than 15% of the capital of the payer.

(g) The 0% rate applies to interest paid to (or by) the government (or specified institutions), subject to further conditions. Under the Albania treaty, the 0% rate also applies to interest paid to an agency, including banks and financial institutions, wholly owned by the contracting state. Under the Georgia treaty, the 0% rate also applies to interest on loans and credits guaranteed by governments or related to sales of industrial equipment that are financed by loans. Under the Armenia and Azerbaijan treaties, the 5% rate applies to interest on bank loans. Under the Ethiopia treaty, the 0% rate also applies to, among other items, interest paid to institutions owned or controlled by the government whose sole purpose is the promotion of export or foreign investment. Under the Thailand treaty, the 10% rate applies to interest paid to financial institutions or insurance companies; otherwise, the rate of the source country applies. Under the Pakistan and Syria treaties, the 0% rate also applies to interest paid to the central bank or any financial institution wholly owned by the government and to interest on loans and credits guaranteed by the government or specified institutions. Under the China Mainland treaty, the 0% rate also applies if the interest paid to selected government agencies or the central bank or if the receivable is financed, guaranteed or pledged by the government, the central bank or a selected government agency. Under the Barbados, Colombia, Iran, Tajikistan and Uzbekistan treaties, the 0% rate also applies to interest from the sale on credit of merchandise or equipment or from a loan or credit granted by a bank or guaranteed by the government (or specified institutions). Under the Belarus treaty, the 0% rate also applies to interest on bank loans. Under the Poland treaty, the 0% rate also applies to interest from a loan or credit granted by a bank or guaranteed by the government (or specified institutions). Under the Belgium treaty, the 0% rate applies to interest from suspended payments for goods and services, loans guaranteed by public institutions aimed to support the export and bank loans and deposits (except in the form of securities). Under the Brazil treaty, interest from securities, bonds and promissory notes issued by the government (or specified institutions) is subject to tax in the state of residence of the issuer. Under the Bulgaria and Panama treaties, the 0% rate also applies to interest from suspended payments for equipment or goods or from certain loans guaranteed by public institutions. Under the Canada treaty, the 0% rate also applies to, among other items, interest paid to institutions established to manage and pay out benefits from pension, retirement or employee schemes (other limitations apply). Under the Botswana, Ghana, Korea (South) and Kyrgyzstan treaties and the Taiwan bill, the 0% rate also applies to interest paid in connection with the sale on credit of any merchandise or equipment or in connection with a loan or credit provided, guaranteed or insured by the government (or specified institutions). Under the Bangladesh, Kazakhstan, San Marino, Senegal and

Turkmenistan treaties, the 0% rate also applies to interest from loans guaranteed by the government (or specified institutions). Under the Malaysia treaty, the 0% rate also applies to interest from approved loans if the beneficial owner of the interest is a Czech tax resident.

(h) The 5% rate applies to royalties for copyrights. The 10% rate applies to royalties for patents, trademarks, designs or models, plans, secret formulas and processes. The 15% rate applies to other royalties.

(i) The 10% rate applies to loans and credits granted by a bank for a period of at least 10 years in connection with the following:
- Sales of industrial equipment or studies
- Installation or furnishing of industrial or scientific units
- Public works

(j) The 10% rate applies if the receiving company owns at least 25% of the payer for at least two years preceding the payment of the dividend.

(k) The 0% rate applies to a dividend paid to the government of a contracting state (or a government institution) or to a company that is at least 25% owned by the government of the contracting state.

(l) The 0% rate applies to a dividend paid by a tax resident of Malaysia to a Czech tax resident who is the beneficial owner of the dividends.

(m) The 0% rate applies to royalties paid for copyrights. The 1% rate applies to royalties paid for finance leases of equipment. The 5% rate applies to royalties paid for operating leases of equipment and for the use of, or right to use, software. The 10% rate applies to other royalties.

(n) The lower rate applies to royalties for copyrights, with the exception of royalties for cinematographic films and films or tapes for television broadcasting. The higher rate applies to other royalties.

(o) The lower rate applies to dividends paid by a tax resident of Sri Lanka to a Czech tax resident (except with respect to investments made after the effective date of the treaty).

(p) The treaty provides for a rate of 10%, but a protocol to the treaty provides for a rate of 5% until Swiss domestic law imposes a withholding tax on royalties.

(q) In addition to treaty protection, royalties paid by Czech companies or permanent establishments of companies from EU Member States to related-party companies located in other EU/EEA Member States or Switzerland is exempt from tax if the conditions stated in provisions implementing EU Directive 2003/49/EC, as amended, are satisfied and if an advance ruling is issued by the Czech tax authority. If a Czech withholding tax applies to outbound royalties, EU/EEA tax residents may choose to include the income in their tax return and have it taxed at the standard corporate income tax rate after deduction of associated expenses (while claiming a credit for the withholding tax paid against tax liability stated in the tax return), or to treat the withholding tax as a final tax on the income.

(r) The 10% rate applies to royalties paid for patents, trademarks and industrial, commercial, or scientific equipment or information. The 15% rate applies to royalties paid for films.

(s) In addition to treaty protection, dividends paid by Czech companies to parent companies (as defined in the EU Parent-Subsidiary Directive 2011/96/EU) that are located in other EU Member States, or in Iceland, Liechtenstein, Norway or Switzerland, are exempt from withholding tax if the parent company maintains a holding of at least 10% of the distributing company for an uninterrupted period of at least one year (this condition may be met subsequently). Further conditions apply.

(t) In addition to treaty protection, interest from qualified instruments paid by Czech companies or permanent establishments of companies from EU Member States to related-party companies (as defined in EU Directive 2003/49/EC) located in other EU/EEA Member States or Switzerland is exempt from withholding tax if the conditions stated in the provisions implementing EU Directive 2003/49/EC, as amended, in the Czech tax law are satisfied and if an advance ruling is issued by the Czech tax authority. In addition, if Czech withholding tax applies to outbound interest, EU/EEA tax residents may choose to include the income in their tax return and have it taxed at the standard corporate income tax rate after deduction of associated expenses (while claiming a credit for the withholding tax paid against tax liability stated in the tax return), or to treat the withholding tax as a final tax on the income.

(u) The 0% rate applies to royalties paid for copyrights. The 5% rate applies to payments for industrial, commercial or scientific equipment. The 10% rate applies to royalties paid for patents, trademarks, designs or models, plans, secret patterns or production procedures and software, as well as for information relating to experience acquired in the areas of industry, commerce or science.

(v) The 25% rate applies to royalties paid for trademarks. The 15% rate applies to other royalties.
(w) The 5% rate applies to royalties paid for industrial, commercial or scientific equipment.
(x) A 35% tax rate applies to payments to tax residents in countries with which the Czech Republic has not entered into a double tax treaty or a treaty on exchange of information in tax matters. For further details, see footnote (e) in Section A.
(y) The 5% rate applies to business profits after taxation transferred by a permanent establishment in one contracting state to its head office in the other contracting state.
(z) The 4% rate applies to interest paid to banks, insurance companies and other specified lending and financial institutions. If Chile agrees to a lower rate or an exemption with an Organisation for Economic Co-operation and Development Member State, this lower rate or exemption would also apply to the treaty between Chile and the Czech Republic.
(aa) The 0% rate applies to copyright royalties paid from the Czech Republic to Belgium. The 5% rate applies to royalties paid for use of industrial, commercial or scientific equipment.
(bb) A special bill aimed at preventing double taxation with respect to Taiwan entered into effect on 1 January 2021.
(cc) The 0% rate applies to certain state or state-owned recipient entities. The 5% rate applies if a company holds directly at least 10% of the capital of the paying company.
(dd) On 11 August 2023, the Russian Federation announced that it was unilaterally suspending the implementation of the double tax treaty with the Czech Republic, specifically Articles 5 to 22 and 24 of the treaty. The Ministry of Finance of the Czech Republic subsequently published a communication confirming the suspension of the implementation of the provisions of the treaty, effective from 29 September 2023. It implies that in the absence of implementation of the aforementioned articles of the treaty, it is no longer possible to implement Articles 23 and 25 (that is, the application of the elimination of double taxation).

A. At a glance

Corporate Income Tax Rate (%)	22
Capital Gains Tax Rate (%)	22
Branch Tax Rate (%)	22
Withholding Tax (%)	
Dividends	0/27 (a)
Interest	0/22 (b)
Royalties from Patents, Know-how, etc.	0/22 (c)
Branch Remittance Tax	0 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

(a) The general withholding tax rate is 27%, and the recipient can apply for a refund depending on the final tax rate. A withholding tax of 0% normally applies to dividends paid to group companies. See Section B.

(b) The 22% rate applies to payments between related parties. The rate may be eliminated if certain conditions are met under the European Union (EU) Interest-Royalty Directive or a double tax treaty entered into by Denmark. See Section B.

(c) The rate is 0% for royalties paid for copyrights of literary, artistic or scientific works, including cinematographic films, and for the use of, or the right to use, industrial, commercial or scientific equipment. In addition, the rate may be reduced or eliminated if certain conditions are met under the EU Interest-Royalty Directive or a double tax treaty entered into by Denmark.

(d) A Danish branch office or a tax-transparent entity may be re-characterized as a Danish tax-resident company if the entity is controlled by owners resident in one or more foreign countries, the Faroe Islands, or Greenland and if either of the following circumstances exists:
- The entity is treated as a separate legal entity for tax purposes in the country or countries of the controlling owner(s).
- The country or countries of the controlling owner(s) are located outside the EU and have not entered into a double tax treaty with Denmark under which withholding tax on dividends paid to companies is reduced or renounced.

B. Taxes on corporate income and gains

Corporate income tax. A resident company is a company incorporated in Denmark. In addition, a company incorporated in a foreign country is considered a resident of Denmark if its day-to-day management is in Denmark.

All tax-resident companies that are part of the same group must be included in a Danish mandatory joint taxation arrangement, regardless of whether these companies are subject to full or limited tax liability in Denmark. This mandatory joint taxation comprises all Danish affiliated companies as well as permanent

establishments and real estate located in Denmark (for details, see Section C).

The income of resident companies that is generated in a foreign permanent establishment or real estate located outside Denmark is not included in the statement of the taxable income in Denmark, unless Denmark is granted the right to tax such income under an applicable double tax treaty or other international agreement, or the income is subject to controlled foreign company (CFC) taxation (see Section E).

Branches of foreign companies located in Denmark are taxed only on trading income and on chargeable capital gains derived from the disposal of trading assets that are located in Denmark and related to a Danish permanent establishment.

Financial companies' taxable income is multiplied by a factor of 25.2/22 in 2023 and 26/22 in 2024 and forward. The financial companies covered are companies that are subject to supervision by the Danish Financial Supervisory Authority in accordance with the Financial Business Act or otherwise are covered by the special laws applied to specific types of financial companies.

Rate of corporate tax. For the 2024 income year, resident and nonresident companies are taxed at a rate of 22% (see *Corporate income tax* regarding financial companies). Special rules apply for cooperatives.

Capital gains. Capital gains are taxed as other income at a rate of 22%.

Capital gains derived from a disposal of shares in a group company (group shares), shares in a subsidiary (subsidiary shares) and own shares (shares issued by the company) are exempt from tax regardless of the ownership period, while losses incurred on such shares are not deductible.

The following are considered group shares:
- Shares in a company that is subject to mandatory joint taxation under Danish rules together with the shareholder of the company
- Shares in a company that is eligible for inclusion in an international joint taxation arrangement under Danish rules (see Section C)

Shares are considered subsidiary shares if all of the following conditions are met:
- The shares are in a company in which the shareholder directly owns at least 10% of the share capital.
- The company is in a legal form that is similar to a Danish limited liability company.
- The company is subject to corporate tax in its home country (without exemption).
- The company is located in a country that has an agreement with Denmark on exchange of information.

Certain anti-avoidance rules apply if shareholders that do not each meet the requirements of holding group shares or subsidiary shares set up an intermediate holding company that by itself is able to meet the requirements.

In certain cases, capital gains may be reclassified as dividends. The reclassification of capital gains to dividends applies under specific circumstances only.

In general, capital gains derived from a disposal of shares that are not own shares, group shares or subsidiary shares (known as portfolio shares) are taxable at the statutory corporate income tax rate of 22%, while losses are deductible, regardless of the ownership period. However, capital gains derived from the disposal of portfolio shares do not trigger taxation if all of the following conditions are satisfied:

- The shares relate to a Danish limited liability company or a similar foreign company.
- The shares are not publicly listed.
- A maximum of 85% of the book value of the portfolio company is placed in publicly listed shares.
- The company disposing of the portfolio shares does not buy new portfolio shares in the same company within six months after the disposal.

The current rules regarding taxation of portfolio shares are based on the mark-to-market method, under which gains and losses are computed on the basis of the market value of the shares at the beginning and end of the income year. It is possible to opt for taxation based on the realization method with respect to unlisted portfolio shares only. Listed portfolio shares must be taxed according to the mark-to-market method. Special rules apply to the carryforward of unused losses on portfolio shares.

Gains on the sale of goodwill and intellectual property rights are subject to tax.

Recaptured depreciation (see Section C) is taxed as ordinary income at a rate of 22%.

Administration. In general, the income year for companies is the calendar year. Companies may select a staggered income year, which is an income year other than the calendar year. They may change their income year if justified by special circumstances.

In general, tax returns for companies must be filed within six months after the end of the companies' income year. For companies with income years ending from 1 February to 31 March, tax returns must be filed by 1 August. Companies pay corporate tax on a current-year basis on 20 March and the remainder on 20 November. It is also possible to make a third current payment before 1 February of the following year. The final tax (calculated tax less paid current taxes) must be paid in November of the following year.

Dividends paid. In general, dividends paid are subject to withholding tax at a rate of 27%, of which 5% can be reclaimed resulting in a final tax rate of 22%. However, withholding tax is normally not imposed on dividends paid to group companies if the Danish shares qualify as either group shares or subsidiary shares (see *Capital gains*) and if the withholding tax must be reduced or eliminated under the EU Parent-Subsidiary Directive or a double tax treaty. For a company owning Danish shares that are group shares rather than subsidiary shares, it is required that the withholding tax would have been reduced or eliminated under the EU

Parent-Subsidiary Directive or a double tax treaty if the shares had been subsidiary shares. In both cases, the recipient of the dividends must be the beneficial owner of the dividends and, accordingly, is entitled to benefits under the EU Parent-Subsidiary Directive or a double tax treaty.

The final tax rate for nonresident companies is generally 22%, with a rate of 15% for certain portfolio shares. The applicability of the 15% tax rate is described under *Capital gains* (conditions for deriving tax-exempt capital gains on portfolio shares). The 15% rate applies for corporations resident in jurisdictions with which Denmark has entered into a treaty on double taxation or exchange of information (if the shareholding meets the requirements described under *Capital gains*). A claim for a refund for the difference between the withholding tax of 27% and the final tax rate may be filed with the Danish tax authorities.

Withholding tax on dividends from a Danish subsidiary to a foreign company applies in the case of a redistribution of dividends if the Danish company itself has received dividends from a more-than-10%-owned company in another foreign country and if the Danish company cannot be regarded as the beneficial owner of the dividends received. Correspondingly, it applies if the Danish company has received dividends from abroad through one or more other Danish companies. Such dividends are generally subject to withholding tax at a rate of 27%, of which 5% can be reclaimed unless all of the following conditions are met:

- The rate is reduced under a double tax treaty with Denmark or the recipient is covered by the EU Parent-Subsidiary Directive.
- The recipient is considered the beneficial owner of the dividends.
- The general anti-avoidance rule does not apply.

Interest paid. In general, interest paid to foreign group companies is subject to withholding tax at a rate of 22%. The withholding tax is eliminated if any of the following requirements are satisfied:

- The interest is not subject to tax or it is subject to tax at a reduced rate under the provisions of a double tax treaty. For example, if withholding tax on interest is reduced to 10% under a double tax treaty, the withholding tax is eliminated completely.
- The interest is not subject to tax in accordance with the EU Interest/Royalty Directive. Under the directive, interest is not subject to tax if all of the following conditions are satisfied:
  - The debtor company and the creditor company fall within the definition of a company under Article 3 in the EU Interest/Royalty Directive (2003/49/EC).
  - The companies have been associated (as stated in the directive) for at least a 12-month period.
  - The recipient is beneficial owner of the interest received.
- The interest accrues to a foreign company's permanent establishment in Denmark.
- The interest accrues to a foreign company, and a Danish parent company, indirectly or directly, is able to exercise control over such foreign company (for example, by holding more than 50% of the voting rights). Control must be fulfilled for a period of 12 months during which the interest is paid.

- The interest is paid to a recipient that is controlled by a foreign parent company resident in a country that has entered into a double tax treaty with Denmark and has CFC rules and if, under these foreign CFC rules, the recipient could be subject to CFC taxation.
- The recipient company can prove that the foreign taxation of the interest income amounts to at least ¾ of the Danish corporate income tax and that it will not in turn pay the interest to another foreign company that is subject to corporate income tax amounting to less than ¾ of the Danish corporate income tax.

The withholding tax and exceptions also apply to non-interest-bearing loans that must be repaid with a premium by the Danish debtor company.

C. Determination of trading income

General. Taxable income is based on profits reported in the annual accounts, which are prepared in accordance with generally accepted accounting principles. For tax purposes, several adjustments are made, primarily concerning depreciation and write-offs of inventory.

Expenses incurred to acquire, ensure and maintain income are deductible on an accrual basis. Certain expenses, such as certain gifts, income taxes and formation expenses, are not deductible. Only 25% of business entertainment expenses is deductible for tax purposes. Expenses incurred on advisor fees are not deductible if they are incurred with respect to investments in shares that have the purposes of a full or partial acquisition of one or more companies and of the exercise of control over or participation in the management of these companies. From 1 January 2023, salary and salary substitutes that exceed DKK7,994,500 per person (2024 amount) are not deductible in calculating taxable income.

Inventories. Inventory may be valued at historical cost or at the cost on the balance sheet at the end of the income year. Inventory may also be valued at the production price if the goods are produced in-house. Indirect costs, such as freight, duties and certain other items, may be included.

Dividends received. Dividends received with respect to shares that qualify as group shares or subsidiary shares (see *Capital gains*) are exempt from tax to the extent that no tax deduction is claimed for the distribution by the entity making the distribution.

Dividends received by a Danish permanent establishment may be exempt from tax if the permanent establishment is owned by a foreign company that is tax resident in the EU, European Economic Area (EEA) or in a country that has entered into a double tax treaty with Denmark.

Dividends received on a company's own shares are exempt from tax.

Seventy percent of the dividends that are not covered by the above tax exemption, such as dividends from unlisted portfolio shares, must be included in the taxable income of the dividend receiving company and taxed at the normal corporate income tax rate of 22%.

Dividends received from other portfolio shares, such as listed portfolio shares, must be included in the taxable income of the dividend receiving company and taxed at the normal corporate income tax rate of 22%.

A tax credit is normally available to the dividend receiving company for foreign withholding taxes withheld by the dividend distributing company.

Depreciation

Immediate deductions. For the 2024 income year, new acquisitions not exceeding DKK33,100 (2024 amount) or with a lifetime not exceeding three years are 100% deductible in the year of purchase. Computer software, operating equipment and ships for research and development (R&D), except operating equipment and ships used for exploration of raw materials, are also 100% deductible in the year of purchase.

Asset classes. Certain depreciable assets must be allocated among four asset classes:

- Operating equipment (including production facilities, machinery, office equipment, hardware and certain software that may not be written off immediately) may be depreciated at an annual rate of up to 25%, using the declining-balance method.
- Certain ships (weighing more than 20 tons and leased out without a crew) may be depreciated at an annual rate up to 12%, using the declining-balance method.
- Certain operating equipment with a long economic life (certain ships transporting goods or passengers, aircraft, rolling railway material, drilling rigs and facilities for producing heat and electricity) may be depreciated at an annual rate of up to 15%, using the declining-balance method. Facilities for producing heat and electricity with a capacity of less than 1 MW and wind-turbine generators (regardless of the capacity) may be depreciated at an annual rate of up to 15%, using the declining-balance method.
- Infrastructural facilities (facilities used for purposes, such as transporting, storing and distributing electricity, water, heat, oil, gas and wastewater and facilities with respect to radio, telecommunications and data transmissions) may be depreciated at an annual rate of up to 7%, using the declining-balance method.

It is important to distinguish between building installations and infrastructural facilities.

Buildings. Buildings used for commercial and industrial purposes may be depreciated at an annual rate of up to 3% using the straight-line method based on the purchase price, excluding the value of the land. For buildings with an expected lifetime of 33 years or below, depreciation can be claimed over the expected lifetime of the building according to the straight-line method. Investments in buildings before 1 January 2023 may be depreciated at an annual rate of up to 4%. Office buildings, financial institutions, hotels, hospitals and certain other buildings may not be depreciated. However, office blocks or office premises adjacent to buildings used for commercial purposes may be depreciated if the office blocks are used together with the depreciable buildings.

Others. Acquired goodwill, patent rights and trademarks may be amortized over seven years.

Costs incurred in connection with the improvement of rented premises and properties (not used for habitation or other commercial or non-industrial purposes) on leased land may be depreciated at an annual rate of up to 20%. If the tenancy is entered into for a fixed number of years, the annual depreciation rate cannot exceed a rate that results in equal amounts of depreciation over the fixed number of years.

Recapture. The amount of depreciation claimed on an asset may be recaptured on the disposal of the asset. Recaptured depreciation is subject to tax at a rate of 22%. For assets depreciated under the declining-balance method, however, the consideration received is deducted from the collective declining-balance account, and, consequently, the recapture is indirect.

Advance depreciation. Advance depreciation is available on ships. A total of 30% (with a maximum of 15% in any single year) of the expenditure exceeding DKK1,774,000 (2024 amount) may be written off in the years preceding the year of delivery or completion. The relief is given if a binding contract has been concluded for construction or purchase of a ship. If a partnership enters into the contract, each partner must meet the DKK1,774,000 (2024 amount) requirement. If a ship is intended for lease, advance depreciation is not allowed in the year of acquisition, unless permission is obtained from the local tax authorities. This rule does not apply to the ships included in the new asset classes (see *Depreciation*).

"Super deduction" for R&D costs. A "super deduction" is also available on costs concerning R&D. As a result of the COVID-19 pandemic, the deduction rate is increased in 2020, 2021 and 2022, meaning that costs connected to R&D can be deducted at a rate of 130% in 2020 through 2022, 108% in 2023 through 2025 and 110% from 2026 onward. The "super deduction" is conditioned on the costs being connected to the taxpayer's business. The deduction can be made either at once in the income year in which the costs are incurred, or over the course of five years, including the income year in which the costs are incurred.

Relief for trading losses. Trading losses and interest expenses may be set off against other income and chargeable gains. Losses incurred may be set off in full against the portion of the year's taxable income not exceeding an amount of DKK9,457,500 (2024 amount). Losses exceeding DKK9,457,500 (2024 amount) may be set off against 60% of the taxable income for the year. As a result, a company or a joint taxation may not reduce its taxable income to less than 40% of the taxable income exceeding DKK9,457,500 (2024 amount).

Losses, including prior-year losses, that cannot be set off against the taxable income for the year may be carried forward infinitely.

Losses may not be offset against interest and other capital income, net of interest paid, if more than 50% of the shares in the company changed ownership since the beginning of the year in which the loss was incurred. In addition, tax losses are forfeited by companies that are not engaged in an activity at the date of change of ownership.

Groups of companies. Joint taxation of Danish affiliated companies, Danish permanent establishments of foreign affiliated companies and real properties of foreign affiliated companies that are located in Denmark is compulsory. The jointly taxed income equals the sum of the net income of the jointly taxed companies, permanent establishments and real properties. An affiliation generally exists if a common shareholder (Danish or foreign) is able to control the company (for example, by holding more than 50% of the voting rights).

Joint taxation with foreign companies is voluntary. If a Danish company elects to be jointly taxed with a foreign company, all foreign affiliated companies must be included in the Danish joint taxation arrangement. These include all subsidiaries, permanent establishments and real estate owned by the Danish company. If the Danish company is owned by a foreign group, the ultimate foreign parent company and all foreign companies affiliated with the ultimate foreign parent company are also included.

A company is considered to be an affiliated company if a controlling interest exists.

A 10-year period of commitment applies if a Danish company elects to be jointly taxed with its foreign affiliated companies.

Deduction of final losses in foreign subsidiaries. Regardless of having chosen not to apply an international joint taxation scheme, a Danish parent company can deduct losses in foreign subsidiaries, permanent establishments or real estate if all of the following conditions are fulfilled:

- The parent company has not chosen international joint taxation.
- The subsidiary or the permanent establishment is resident in the EU/EEA, in the Faroe Islands or in Greenland (this condition does not apply to real estate).
- The subsidiary is directly owned by the parent company, or indirectly owned by intermediary companies, that are all resident in the same country as the subsidiary.
- The losses are final.
- A loss in a subsidiary would have been deductible if international joint taxation had been chosen.
- A loss in a permanent establishment or real estate is deductible according to the general rules of the tax code.
- The determination of the loss is conducted in accordance with Danish rules.

The possibility has been introduced with effect from the 2019 income year, and tax guidance has been issued by the tax authorities concerning the possibility of reopening of the tax returns for the 2009-2018 income years and correcting them in accordance with the new rules.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT)	25%
Labor market supplementary pension scheme (ATP); approximate annual employer contribution for each full-time employee	DKK2,272

Nature of tax	Rate
Payroll tax (Loensumsafgift)	
Banks, insurance companies and other financial businesses; levied on total payroll	15.3%
Other VAT-exempt businesses, including some public bodies; levied on total payroll plus taxable profits, adjusted to exclude financial income and expenses	4.12%
Lotteries and information activities performed by tourist offices, other organizations and some public bodies; levied on total payroll	6.37%
Publishers or importers of newspapers; levied on the value of newspapers sold	3.54%

E. Miscellaneous matters

Foreign-exchange controls. Denmark does not impose foreign-exchange controls.

Debt-to-equity rules. Under thin-capitalization rules, interest paid by a Danish company or branch to a foreign group company is not deductible to the extent that the Danish company's debt-to-equity ratio exceeds 4:1 at the end of the debtor's income year and that the amount of controlled debt exceeds DKK10 million. Limited deductibility applies only to interest expenses relating to the part of the controlled debt that needs to be converted to equity to satisfy the debt-to-equity ratio of 4:1 (that is, a minimum of 20% equity). The thin-capitalization rules also apply to third-party debt if the third party has received guarantees and similar assistance from a group company of the borrower.

The Danish thin-capitalization rules are supplemented through an "interest ceiling rule" and an Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) rule. These rules apply to controlled and non-controlled debt. Only companies with net financial expenses exceeding DKK21,300,000 and DKK22,313,400, respectively (2024 amounts), are subject to these supplementary rules. For jointly taxed companies, the thresholds apply to all of these companies together.

Under the "interest ceiling rule," a company may only deduct net financial expenses corresponding to 6% (2024 rate) of the taxable value of certain qualified assets. Deductions for any excess net financial expenses are lost, except for capital losses, which may be carried forward for three years.

Under the EBITDA rule, a company may reduce its taxable income through the deduction of financial expenses by no more than 30%. Net financial expenses exceeding this limit are non-deductible but, in contrast to the interest ceiling rule, the excess expenses can be carried forward without any time limitation (if not restricted again by the EBITDA rule). The calculation must be made after taking into account a possible restriction under the interest ceiling rule.

Under the interest ceiling rule, a safe harbor of net financial expenses up to DKK21,300,000 (2024 amount) exists. Under the EBITDA rule, a safe harbor of net financial expenses up to DKK22,313,400 (2024 amount) exists. These expenses are always

deductible, subject to restriction under the thin-capitalization rules.

If a company establishes that it could obtain third-party financing on similar terms, it may be allowed to deduct the interest that would normally be disallowed under the ordinary thin-capitalization rules described above. No arm's-length principle can be applied to help the company escape the interest ceiling rule or the EBITDA rule.

Danish tax law does not recharacterize disallowed interest or impose withholding tax on it.

Anti-avoidance legislation. A general anti-avoidance rule has been implemented in the Danish domestic tax law. It is contained in Section 3 of the Danish Tax Assessment Act.

The anti-avoidance rule seeks to restrict the benefits of applicable tax law, including EU directives or a double tax treaty, claimed by a taxpayer who participates in an arrangement, or a series of arrangements, that has the primary purpose (or has as one of its primary purposes) to achieve a tax benefit that is contrary to the contents or purpose of the applicable tax law, EU directive or double tax treaty in question.

The global anti-avoidance rule is introduced in accordance with Article 6 of the EU Anti-Tax Avoidance Directive (ATAD) and applies to resident and nonresident companies.

In addition, certain recharacterization rules exist, such as a rule that recharacterizes debt as equity if the debt is treated as an equity instrument according to the tax rules in the country of the creditor.

Although a Danish company or taxable legal entity may change its domicile to another country, this would normally be considered a liquidation with the same tax effect as a taxable sale. The company can transfer its activities abroad, but, to prevent tax avoidance, such a transfer is considered a taxable disposal of the activities.

Controlled foreign companies. Danish CFC-taxation involves a Danish parent company being taxed on income generated in a foreign subsidiary or branch. If the CFC-rules apply, the Danish parent is taxed in Denmark on a proportional part (equal to the ownership interest) of the subsidiary's income.

The following are generally the two main criteria for Danish CFC-taxation to apply:

- More than one third of the income in the subsidiary is CFC-income.
- The parent company alone or jointly with other group companies directly or indirectly owns more than 50% of the share capital, controls more than 50% of the votes or is entitled to more than 50% of the subsidiary's profits.

The rules apply to financial companies only if more than one third of the CFC-income in the subsidiary derives from transactions with the parent or associated persons.

A parent company can elect to include only the CFC-income as opposed to the total income of the subsidiary. Such election is binding for five years and applies to all subsidiaries.

CFC-income is generally financial income, royalties, gains on intellectual property and "other income from intellectual property" (including embedded royalties). Goodwill is not considered intellectual property for CFC-purposes.

According to a substance test, CFC-taxation does not apply to "other income from intellectual property" if the subsidiary conducts "significant economic activity related the intellectual property, and this activity is supported by personnel, assets and premises." CFC-taxation also does not apply to other income from intellectual property that is a product of R&D-activities carried out by the subsidiary or group-related companies located in the same jurisdiction as the subsidiary.

Anti-hybrid mismatch rules. Denmark has several anti-hybrid mismatch rules.

The rules are found in Section 2C and Sections 8C-8E of the Danish Corporate Tax Act.

Under Section 2C of the Danish Corporate Tax Act, branches of entities that are required to register in Denmark may be treated as separate entities for Danish tax purposes if certain conditions are met. This treatment may apply if the parent of the branch is located in a non-EU/non-treaty country or if the Danish branch is considered a separate entity for tax purposes in the parent's country. Certain exceptions exist, and case-by-case evaluation is suggested.

Under Section 8C of the Danish Corporate Tax Act, the definitions used in Sections 8D and 8E are listed. A total of 17 new definitions are set forth following a rule change entering into force on 1 January 2020. For example, definitions are provided for "mismatch result," "double tax deduction" and "hybrid mismatch."

Under Section 8D of the Danish Corporate Tax Act, if a hybrid mismatch leads to a double tax deduction for the same expense, the expense is, as a main rule, not deductible in Denmark. Additionally, an expense is not deductible if a hybrid mismatch leads to the payment being deductible in Denmark while not being taxable in the receiving party's jurisdiction. A company is not allowed to deduct payments to the extent that such payments directly or indirectly finance deductible expenses and if the payments result in a hybrid mismatch through a transaction or a series of transactions between associated entities or if the payments are part of a structured arrangement. Section 8D also provides that a company must include income that would otherwise be attributed to a disregarded permanent establishment, to the extent that a hybrid mismatch concerns income from a disregarded permanent establishment.

Under Section 8E of the Danish Corporate Tax Act, a company that from a tax perspective is also residing in another jurisdiction is not allowed to deduct payments, expenses and losses, which are deductible in both jurisdictions, to the extent that the other jurisdiction allows for such items to be set off against income that is not double included income. However, such payments, expenses and losses can be deducted from income that is not double included income if the other jurisdiction is an EU country and if

the company is regarded as residing in Denmark under a double tax treaty, to the extent that the other jurisdiction denies the deduction of the payments, expenses and losses. Also, a jointly taxed company that is participating in a joint taxation or another form of tax-loss carryforward in another jurisdiction is not allowed to deduct payments, expenses or losses, to the extent that the other jurisdiction allows for such items to be set off against income that is not double included income. Payments, expenses and loses that are deductible in both jurisdictions and for which deduction is not denied under the provision described in the preceding sentence can only be deducted from double included income.

Transfer pricing. Transactions between affiliated entities must be determined on an arm's-length basis. In addition, Danish companies and Danish permanent establishments must report summary information about transactions with affiliated companies as part of the company's annual tax return.

Danish tax law requires entities to prepare and maintain written transfer-pricing documentation for transactions that are not considered insignificant. Enterprises can be fined if they have not prepared any transfer-pricing documentation or if the documentation prepared is considered to be insufficient as a result of gross negligence or deliberate omission. The documentation can be prepared in Danish, English, Norwegian or Swedish and must be prepared no later than the deadline to file the summary information about transactions with affiliated companies, which is an integrated part of the company's annual tax return. The transfer-pricing documentation must be submitted to the tax authorities within 60 days on request.

From 2021 and onward, it is mandatory for companies to which the documentation obligation applies to submit its transfer-pricing documentation within 60 days after the deadline for submitting its tax returns. If a company does not comply with this requirement, it is risking considerable fines and discretionary changes to its taxable income.

The fine for failure to prepare satisfactory transfer-pricing documentation consists of a basic amount of DKK250,000 per year per entity for up to five years plus 10% of the income increase required by the tax authorities. The basic amount may be reduced to DKK125,000 if adequate transfer-pricing documentation is filed subsequently.

Fines may be imposed for every single income year for which satisfactory transfer-pricing documentation is not filed.

In addition, companies may be fined if they disclose incorrect or misleading information for purposes of the tax authorities' assessment of whether the company is subject to the documentation duty.

The documentation requirements for small and medium-sized enterprises apply only to transactions with affiliated entities in non-treaty countries that are not members of the EU/EEA. To qualify as small and medium-sized enterprises, enterprises must satisfy the following conditions:

- They must have less than 250 employees.

- They must have an annual balance sheet total of less than DKK125 million or annual revenues of less than DKK250 million.

The above amounts are calculated on a consolidated basis (that is, all group companies must be taken into account).

Transactions between Danish affiliated entities are exempt from the documentation requirement unless one involved entity is subject to a special tax regime in Denmark.

Country-by-Country reporting. Entities belonging to a multinational group with a consolidated revenue above DKK5.6 billion (EUR750 million) are subject to Country-by-Country (CbC) Reporting and notification obligations. Denmark generally follows the Organisation for Economic Co-operation and Development (OECD) guidelines on CbC reporting.

The notification must be submitted by the Danish company or permanent establishment no later than 12 months after the last day of the reporting period (the entity's income year) to which the report relates. If there is more than one Danish entity in the group and these entities are subject to joint taxation in Denmark, the notification can be made by the appointed administrative entity of the Danish joint taxation group on behalf of all entities.

A surrogate or local filing of the CbC Report is required if there is no active agreement on automatic exchange of the report between Denmark and the country where the ultimate parent entity or another surrogate parent entity filing the report is tax resident.

Minimum taxation. Effective for income years starting on or after 1 January 2024, Denmark has introduced minimum taxation rules in line with the OECD Pillar Two guidelines and the EU-directive on minimum tax.

F. Treaty withholding tax rates

Under Danish domestic law, no withholding tax is imposed on dividends paid to companies if both of the following requirements are satisfied:

- The shares are group shares or subsidiary shares (see Section B).
- A tax treaty between Denmark and the jurisdiction of residence of the recipient of the dividend provides that Denmark must eliminate or reduce the withholding tax on dividends, or the recipient is resident in an EU Member State and falls within the definition of a company under Article 2 of the EU Parent-Subsidiary Directive (90/435/EEC) and the directive provides that Denmark must eliminate or reduce the withholding tax on dividends.

As a result, the reduced treaty rates on dividends in the table below might be eliminated under Danish domestic law.

	Dividends %	Interest (a) %	Royalties (b) %
Algeria	5/15	8	10
Argentina	10 (c)	0	3/5/10/15

Non-treaty jurisdictions	22	22	22

(a) In general, all interest payments to foreign group companies are subject to a final withholding tax of 22%. Several exceptions exist (see Section B). As a result of these exceptions, in general, withholding tax is imposed only on interest payments made to group companies that would qualify as CFCs for Danish tax purposes or if the recipient is not considered to be the beneficial owner, according to the domestic interpretation. Effective from the 2006 income year, withholding tax on interest paid to individuals was abolished.

(b) Under Danish domestic law, the rate is 0% for royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and for the use of, or the right to use, industrial, commercial or scientific equipment. Under a tax treaty, the general withholding tax rate for royalties of 22% can be reduced to 0%. Royalties paid to a company resident in another EU country are not subject to withholding tax if the provisions of the EU Interest/Royalty Directive are met and if the recipient is considered to be the beneficial owner according to the domestic interpretation.

(c) The rate is 15% if the recipient is not a company owning at least 25% of the capital.

(d) The rate is 15% if the recipient is not a company owning at least 10% of the capital.

(e) The withholding tax rate is 0% if all of the following conditions are satisfied:
- The recipient directly owns at least 25% of the share capital of the payer for a period of 12 consecutive months that includes the date of the distribution of the dividend.
- The dividend is not taxed in Greenland.
- The recipient does not deduct the portion of a dividend distributed by it that is attributable to the Danish subsidiary.

If the above conditions are not met, the withholding tax rate is generally 22%. However, the rate is 15% for dividends on unlisted portfolio shares (shares held by a person owning less than 10% of the company's shares).

(f) The withholding tax rate is 0% if the recipient owns at least 50% of the share capital in the dividend distributing company and has invested more than EUR2 million in the dividend paying company. The withholding tax rate is 5% if the recipient owns at least 10% of the share capital in the dividend paying company and has invested more than EUR100,000 in the dividend paying company. The withholding tax rate is 10% in all other cases.

(g) The rate is 22% for payments for the use of, or the right to use, trademarks.

(h) Denmark honors the USSR treaty with respect to the former USSR republics. Armenia, Azerbaijan, Kazakhstan, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan and Uzbekistan have declared that they do not consider themselves obligated by the USSR treaty. Denmark has entered into tax treaties with Estonia, Georgia, Latvia, Lithuania, the Russian Federation and Ukraine.

(i) Denmark honors the Czechoslovakia treaty with respect to the Slovak Republic.

(j) The rate is 15% if the recipient is not a company owning at least 20% of the capital of the payer and has invested at least EUR1 million in the capital of the payer.
(k) The rate is 5% if the recipient is a company that owns at least 70% of the capital of the payer or has invested at least USD12 million in the capital of the payer. The rate is 10% if the recipient is a company owning at least 25%, but less than 70%, of the capital of the payer. For other dividends, the rate is 15%.
(l) The rate is 10% if the recipient is not a company owning at least 25% of the capital of the payer.
(m) The treaty does not cover Hong Kong.
(n) The withholding tax rate for dividends is 0% if the recipient owns at least 10% of the share capital in the payer of the dividends for a continuous period of at least 12 months. If this condition is not met, the dividend withholding tax rate is 15%.
(o) The rate is 20% if the recipient is not a company owning at least 25% of the capital of the payer.
(p) The rate is 25% if the recipient is not a company owning at least 25% of the capital of the payer.
(q) The rate is 30% if the recipient is not a company owning at least 25% of the voting power during the period of six months immediately preceding the date of payment.
(r) The withholding tax rate for dividends is 0% if the recipient owns at least 10% of the share capital in the payer of the dividends for a continuous period of at least 12 months. If this condition is not met, the dividend withholding tax rate is 10%.
(s) The rate is 5% if the recipient of the dividends is a company owning at least 25% of the capital of the payer.
(t) The withholding tax rate for dividends is 0% if the recipient owns at least 10% of the share capital in the payer of the dividends for a continuous period of at least six months. If this condition is not met, the dividend withholding tax rate is 15%.
(u) The rate applies if the recipient owns at least 25% of the share capital in the payer of the dividends for a continuous period of at least 12 months. If this condition is not met, the rate is 15%.
(v) The rate applies if the recipient owns at least 25% of the share capital in the payer of the dividends for a continuous period of at least 12 months. If this condition is not met, the rate is 10%.
(w) The rate is 15% if the recipient is not a company owning at least 25% of the voting power of the payer.
(x) The rate is 20% if the recipient is not a company owning at least 25% of the voting power of the payer.
(y) The rate is 15% if the recipient is not a company owning at least 10% of the shares of the payer. The 0% and 5% rates depend on applicable limitation-of-benefit tests.
(z) The rate is 10% if the interest arising in a contracting state is determined by reference to receipts, sales, income, profits or other cash flow of the debtor or a related person; to any change in the value of any property of the debtor or a related person; to any dividend, partnership distribution or similar payment made by the debtor or a related person; or to any other interest similar to such interest arising in a contracting state, and if the beneficial owner of the interest is a resident of the other contracting state.

In addition to the double tax treaties listed in the table above, Denmark has entered into double tax treaties on savings, double tax treaties on international air and sea traffic, agreements on exchange of information in tax cases and agreements on promoting the economic relationship. The following are the jurisdictions with which Denmark has entered into such agreements:

- Double tax treaties on savings: Anguilla; Aruba; British Virgin Islands; Cayman Islands; Curaçao; Sint Maarten; Bonaire, Sint Eustatius and Saba (formerly part of the Netherlands Antilles); Guernsey; Isle of Man; Jersey; Montserrat; and Turks and Caicos Islands
- Double tax treaties on international air and sea traffic: Bermuda, British Virgin Islands, Cayman Islands, Guernsey, Hong Kong, Isle of Man, Jersey, Jordan, Kuwait and Lebanon
- Agreements on exchange of information: Andorra; Anguilla; Antigua and Barbuda; Aruba; Bahamas; Barbados; Belize;

Bermuda; Botswana; Brunei Darussalam; Cayman Islands; Cook Islands; Costa Rica; Curaçao; Sint Maarten; Bonaire, Sint Eustatius and Saba (formerly part of the Netherlands Antilles); Czech Republic; Dominica; Gibraltar; Grenada; Guernsey; Isle of Man; Jamaica; Jersey; Liberia; Liechtenstein; Macau; Marshall Islands; Mauritius; Monaco; Montserrat; Netherlands; Niue; Panama; Qatar; St. Kitts and Nevis; St. Lucia; St. Vincent and the Grenadines; Samoa; San Marino; Seychelles; Turks and Caicos Islands; United Arab Emirates; Uruguay and Vanuatu

- Agreements on promoting the economic relationship: Aruba; Curaçao; Sint Maarten; and Bonaire, Sint Eustatius and Saba (formerly part of the Netherlands Antilles)

Agreements on exchange of information with respect to taxes have been proposed with Belgium, Greenland, Guatemala and Kuwait.

A. At a glance

Corporate Income Tax Rate (%)	27
Capital Gains Tax Rate (%)	27
Branch Tax Rate (%)	27 (a)
Withholding Tax (%)	
Dividends	10 (b)
Interest	10 (c)
Royalties	27 (d)
Other Dominican-source Income	27 (e)
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) The Dominican Tax Regulations do not contemplate an exclusive or additional income tax for branches. Therefore, the standard corporate income tax rate applies.

(b) This is a final withholding tax applicable to payments to both residents and nonresidents.

(c) This is a final withholding tax applicable to payments to resident individuals and to nonresident individuals, companies and unincorporated business entities.

(d) This withholding tax applies to royalty payments made to nonresident persons.

(e) This withholding tax applies to payments to nonresident or non-domiciled entities or individuals. According to the local legislation, the following types of income, among others, are considered Dominican source income:
- Income from capital, assets or rights situated, placed or used economically in the Dominican Republic
- Income derived from commercial, industrial, farming, mining and similar activities carried out in the Dominican Republic

- Income from personal labor, the exercise of a profession or a job
- Income from the exploitation of all types of industrial property or know-how
- Income from technical assistance services, provided from abroad or within the Dominican Republic
- Income from rental or leasing activities

B. Taxes on corporate income and gains

Corporate income tax. Resident corporations are subject to tax on their Dominican-source income and on their foreign-source income derived from investments and financial gains, such as dividends and interest from bonds acquired abroad.

A company is resident in the Dominican Republic if it is incorporated in the Dominican Republic.

A foreign company is considered domiciled in the Dominican Republic if it has its principal business or its effective management located in the Dominican Republic. Nonresidents operating through a permanent establishment are subject to income tax as companies incorporated in the Dominican Republic.

Corporate income tax rates. The corporate income tax rate is 27%.

Full exemptions or certain income tax credits usually apply to companies established in designated Free-Trade Zones (FTZs) or to companies to companies benefiting from other special incentive laws, including, among others, the Frontier Development Law (Law 12-21), the Tourism Development Law (Law 158-01, as amended by Law 195-13) and the Film Law (Law 108-10).

Asset tax. The annual asset tax is assessed at a rate of 1% on the assets registered in the taxpayer's accounting books.

The tax base is the net carrying value of the taxpayer's assets at the end of the fiscal year as indicated in the balance sheet, not adjusted by inflation and after applying depreciation, amortization and reserves for bad debt expenses. Investments in shares of another company, real estate used for agricultural exploitation and advance tax payments are excluded from the tax base. Corporate income tax is creditable against the asset tax. The asset tax is calculated in the annual income tax return.

For financial institutions, electricity companies, stockbrokers, pension fund administrators, investment fund administrators and securitization companies, the tax base for the asset tax is the total value of fixed assets (net of depreciation) according to the balance sheet at the end of the tax period.

Entities that benefit from corporate income tax exemptions based on special laws or public contracts approved by Congress are exempt from the asset tax.

Capital gains. Gains derived from direct and indirect transfers of assets or rights located or economically exploited in the Dominican Republic are subject to the income tax on capital gains at a rate of 27%. Under the Dominican Republic Tax Code, capital gains may arise from the transfer of shares, land or other capital assets possessed by taxpayers, regardless of whether the gains are connected to the taxpayers' businesses. The following assets are not considered capital assets:

- Commercial inventories or assets possessed principally for sale to clients in the ordinary course of business

- Depreciable assets
- Accounts or promissory notes acquired in the ordinary course of business for services rendered or derived from the sale of inventory assets or assets sold in the ordinary course of business

The capital gain tax base equals the difference between the transfer price of the assets and the cost of acquisition or production (adjusted for inflation).

Administration. In general, the tax year is the calendar year. However, companies may adopt a fiscal year ending on 31 March, 30 June or 30 September. The income tax return must be filed within 120 days after the end of the fiscal year.

All companies must make monthly income tax prepayments. For taxpayers that had an effective tax rate (ETR) in the preceding tax year that was lower or equal to 1.5%, each prepayment equals the amount resulting from applying the 1.5% rate to the gross income reported in the preceding fiscal year. Taxpayers with an ETR higher than 1.5% must make monthly prepayments corresponding to 1/12 of the income tax paid in the preceding fiscal year. The ETR is determined by dividing the income tax paid in the preceding fiscal year by the gross income of the same period.

Taxpayers can request up to a two-month income tax return filing extension.

Indemnity interest at a rate of 1.10% is charged monthly on outstanding balances of taxes due. In addition, a penalty of a 10% surcharge applies for the first month, and a 4% surcharge applies for each month or fraction of a month thereafter.

Noncompliance by the taxpayer with tax obligations may be subject to a penalty of 5 to 30 minimum wages.

In addition, a penalty equal to 0.25% of the income declared in the preceding fiscal year may be applied.

Dividends. Dividends (and all other types of distributions of earnings) are subject to a final withholding tax of 10%. Under the Dominican Tax Code and its regulations, a dividend is defined as any distributions of profits or reserves made by any type of corporation or entity to a shareholder, partner or participant. The following are also included in the concept of dividends:

- Accounts receivable or similar arrangements that a corporation or entity has with its shareholders, members or participants, if they were not generated by a commercial transaction and if no principal or interest payments have been made in a period of more than 90 calendar days.
- Share capital reductions, if capitalized reserves and/or retained earnings exist, until these reserves and earnings accounts are exhausted. This does not apply to capital returns derived from the liquidation of the entity, whereby the first amounts distributed are deemed to be capital returns rather than the distribution of retained earnings.

In the case of an in-kind dividend distribution paid in stock, tax is not incurred at the time of distribution. The value of the shares received is determined by taking the acquisition value of all the new and old titles that the taxpayer owns after the distribution

and allocating the amount actually paid among the number of titles that correspond.

Foreign tax relief. Foreign income tax paid on income derived from investments and financial gains abroad may be claimed as a credit against the income tax payable in the Dominican Republic. However, such credit is limited to the portion of Dominican Republic tax allocable to the foreign-source income subject to tax abroad.

C. Determination of trading income

General. Tax is imposed on taxable profits, which correspond to the accounting profits adjusted in accordance with the income tax law.

Expenses incurred to generate taxable income and preserve the source of such income are deductible on an accrual basis if properly documented. However, certain expenses are not deductible, including the following:
- Expenses not properly documented
- Unauthorized bad debt provisions
- Prior period tax adjustments
- Personal expenses
- Profits to be capitalized

In addition, the Dominican Tax Code contains interest deduction rules, which are described below.

Under Dominican Republic law, the deduction of interest depends on certain general and specific conditions.

The following are the general conditions for the deduction of interest:
- The interest should be related to the acquisition, maintenance and/or operation of taxable income-producing assets.
- Corporate entities should recognize interest expenses according to the accrual method of accounting.
- Expenses and costs, such as interest payments, must be supported by corresponding documentation (loan agreement and invoices).
- The loan and interest rates agreed between the parties must comply with the arm's-length principle.
- The 10% withholding tax applicable to the gross amount of such payments has been applied and paid to the Dominican Republic tax authorities.

In addition, if the payment exceeds DOP50,000 (approximately USD900), the payment must have been made through any of the means available in the financial industry (for example, wire transfers and checks).

Dominican Republic law provides the following specific limitations for the deduction of interest:
- A special anti-avoidance rule, which limits the interest deductible based on the effective tax rate of the interest recipient
- A thin-capitalization limitation, which limits the amount deductible to three times the ratio of the average of equity to the average of debt that generated such interest in a given year

Special industries. Rules applicable to special industries are outlined below.

Nonresident insurance companies. Nonresident insurance companies are taxed on a deemed income equal to 10% of their gross income (premiums) derived from insurance services rendered to resident or domiciled companies or individuals.

Transportation. Income derived from transportation services rendered by nonresident transportation companies from the Dominican Republic to other countries is deemed to equal 10% of the gross income derived from such services.

Others. Film distribution companies are taxed in the Dominican Republic based on a deemed income equal to 15% of their gross income derived from the distribution of foreign films. In addition, foreign communications companies are taxed on a deemed income equal to 15% of their gross income.

Inventories. In general, last-in, first-out (LIFO) is the approved method for valuing inventory. However, taxpayers may use other methods if previously approved by the tax authorities.

Provisions. In general, provisions are not deductible for income tax purposes. However, the Tax Code and income tax regulations provide for limited exceptions to this rule, including a provision for uncollectible accounts receivable. This provision is allowable as a deductible expense if it is calculated based on 4% of the accounts receivable balance at the close of the fiscal year and if the amount is authorized by the Tax Administration.

Provisions for gratifications, bonuses and other similar compensation items are deductible for income tax purposes if the amounts in the provisions are paid by the filing date of the income tax return.

Tax depreciation and amortization allowances. Depreciation is calculated using a variation of the declining-balance method. Intangibles, such as patents, models, drawings and copyrights, may be amortized using the straight-line method if they have a definite useful life.

Salvage value is not taken into account in calculating depreciation. The following are the generally applicable depreciation rates provided by law.

Asset	Rate (%)
Buildings	5
Light vehicles and office equipment, including computers	25
Other assets	15

Relief for losses. Losses generated by companies in the ordinary course of a trade or business may be carried forward for a five-year period. In each fiscal year, 20% of the total loss can be used to offset taxable income. However, in the fourth and fifth years, only 80% and 70%, respectively, of the total taxable income may be offset by the 20% loss carry forward. Losses derived from reorganizations are not deductible for income tax purposes. Net operating losses may not be carried back.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); standard rate	18
Social security contributions	
Mandatory health contributions; imposed on salary up to a maximum amount of 10 legal minimum wages	
Employer	7.09
Employee	3.04
Mandatory pension contributions; imposed on salary up to a maximum amount of 20 legal minimum wages	
Employer	7.10
Employee	2.87
Government Training Institution (INFOTEP) contribution on the payroll amount; payable monthly by the employer	1
Labor risk contributions; payable by employer on salary up to a maximum amount of 4 legal minimum wages; rate varies according to the risk level of the company's activity	1.10 to 1.30
Workers' compensation insurance	Various
Telecom Tax; imposed on the consumption of telecom services by legal entities and individuals in the Dominican Republic; tax rate applied to gross payment	10
Tax on financial transactions; imposed on the value of checks and wire transfer transactions and on payments made to third parties (the tax applies even if the wire transfer is made to an account in the same bank)	0.0015

E. Miscellaneous matters

Foreign-exchange controls. The Central Bank of the Dominican Republic (Banco Central de la República Dominicana) has liberalized foreign-exchange controls. Only individuals and companies generating foreign currency from exports, services rendered and other specified activities are required to exchange foreign currency with the Central Bank through commercial banks. The Central Bank is not required to furnish foreign currency to satisfy demands for foreign payments. Individuals and companies may buy foreign currency from, or sell it to, commercial banks.

As of 1 March 2024, the exchange rate was USD1 = DOP58.6365.

Transfer pricing. Transfer-pricing regulations apply to entities that perform transactions with the following:

- Nonresident "related parties"
- Resident "related parties"
- Individuals or entities domiciled or located in states with preferential tax regimes or low or no taxation (tax havens)

Under the transfer-pricing regulations, "related parties" include, among others, the following situations:

- One of the parties participates in the direct or indirect management, control or equity of the other.
- The same individuals or entities participate directly or indirectly in the management, control or equity of the parties.
- One of the parties transfers more than 50% of its production to the other, and at least one of them is resident or domiciled in the Dominican Republic.

Under the transfer-pricing regulations, the prices established in controlled transactions must comply with the arm's-length principle, which means that the prices established among related parties should be agreed as if they were carried among independent parties, in comparable transactions and under the same or similar circumstances.

Taxpayers subject to the transfer-pricing regulations must comply with the following requirements:

- They must file a Transfer Pricing Tax Return (Declaración Jurada Informativa de Operaciones entre Relacionados, or DIOR). This return must be filed with the tax authorities within 120 days after the end of the fiscal year.
- They must conduct a transfer-pricing study in order to justify the prices used in intercompany transactions.

However, if taxpayers only carry on controlled transactions locally or if their controlled transactions do not exceed DOP14,774,559 (approximately USD250,416) and do not carry out operations with residents in states or territories with preferential tax regimes of low or no taxation, non-cooperating jurisdictions or tax havens, they are not required to conduct a transfer-pricing study.

The Dominican tax authorities have the power to challenge the prices agreed between the related parties and adjust them, if the prices agreed result in lower taxation in the Dominican Republic or in a deferral of the tax payment.

Local File. Taxpayers must file annually a Local File. The Local File and must be filed in electronic format within 180 days after the deadline for submission of the DIOR.

Master File. Those taxpayers who are part of a multinational group must file the Master File electronically within 180 days after the deadline for submission of the DIOR.

Country-by-Country Report. Taxpayers that are residents for tax purposes in the Dominican Republic, that are part of a multinational group and that have obtained in the immediately preceding year consolidated income for accounting purposes equal to or greater than EUR750,000,000 must file the Country-by-Country Report (CbCR).

A member entity of a multinational group that resides for tax purposes in the Dominican Republic must inform whether it is the Ultimate Parent Company or the Representative Company to the Dominican tax authorities no later than the last day of the fiscal year of the multinational group.

A member entity of a multinational group that resides for tax purposes in the Dominican Republic and is not the Ultimate Parent Company or the Representative Company must notify the Dominican tax authority no later than three months before the closing of the fiscal year of the multinational group.

Tax-free corporate reorganizations. There are "tax-free reorganization" rules in the Dominican Republic that can be used to transfer shares or assets of companies without triggering capital gains taxes, income tax, VAT or real estate transfer taxes.

A "tax-free corporate reorganization" is defined as a "corporate transaction involving significant changes in the legal and economic structure of one or more companies." The following transactions are considered tax-free reorganizations:

- The merger of existing companies, through a newly formed third-party or by absorption
- The spin-off or division of one entity to other entities that jointly continue the operations of the pre-existing entity
- Sales and transfers from one entity to another that, despite being legally independent, constitute an economic group

Depending on the type of reorganization, several conditions should be met in order for tax-free rules to apply to reorganization, in accordance with local regulations. However, the tax-free reorganization rules should not apply to reorganizations processes exclusively carried out by foreign companies that do not have a permanent establishment in Dominican Republic.

Reorganizations not carried out under current tax-free reorganization rules have to be reported to the Tax Administration and all applicable taxes should be levied (for example, capital gains, VAT, property and vehicle transfer taxes).

Electronic invoicing. At the time of publication, a taxpayer has the option to adopt electronic invoicing (EI) in order to carry out its commercial transactions. However, on 13 September 2022, the Legal Subconsultant of the Executive Power delivered a preliminary bill for EI to the President of the Senate of the Dominican Republic. This preliminary bill aims to regulate the mandatory use of the EI in the Dominican Republic, as well as to establish the following aspects of the EI tax system:

- Characteristics
- Optimization results (improvement of the efficiency, productivity and transparency of the Tax Administration and markets in general)
- Contingencies
- Entry deadlines
- Fiscal facilities that will be granted to taxpayers that take advantage of this system

On 10 January 2023, the Senate approved the EI project and sent it to the Chamber of Deputies for consideration.

The scope of this preliminary bill will cover natural and legal persons, public or private, and entities without legal personality, domiciled in the Dominican Republic, that carry out operations involving the transfer of goods and provision of services. Transactions that are not subject to the issuance of ordinary tax

receipts will not be subject to the provisions of this preliminary bill.

Under the preliminary bill, an EI will be a document that records the existence, magnitude and quantification of facts or legal acts of economic, financial or patrimonial content that is issued, validated and stored electronically and that complies in all situations and before all actors with the same purposes as a paper invoice; both for issuers and receivers as well as for interested third parties. The EI will be valid, effective and will have probative force in all the situations for which it applies and before all the actors in the process, whether in the areas of commercial, civil, financial, logistics and tax or any other, provided that it complies with the authenticity, integrity and legibility requirements.

The preliminary bill establishes the following timeline for mandatory EI implementation depending on the taxpayer's size.

Size	Mandatory date
Large	12 months after the law becomes effective
Medium	24 months after the law becomes effective
Small	36 months after the law becomes effective

F. Treaty withholding tax rates

The following are the maximum withholding tax rates under the Dominican Republic's double tax treaties.

	Dividends %	Interest %	Royalties %
Canada	18 (a)	18	18
Spain	10 (b)	10	10
Non-treaty jurisdictions	10	10	27

(a) Under the tax treaty with Canada, if the Dominican Republic enters into a treaty with another country in which the applicable income tax withholding rate for dividends is lower than the rate provided in the treaty with Canada that same tax treatment automatically applies to the treaty with Canada.
(b) Dividends paid to Spanish entities that hold 75% or more of the distributing entity's capital are subject to a 0% tax.

Treaty benefits. On 3 October 2022, the Tax Administration issued General Standard No. 11-2022, to establish the guidelines for the application of the provisions of the double tax treaties entered into by the Dominican Republic, including the granting of the benefits. Taxpayers that want to apply the provisions and benefits contained in current double tax treaties signed by the Dominican Republic will be required to file a formal request with the Tax Administration.

In general, taxpayers will be required to comply with the corresponding tax obligation (that is, withholdings on dividends, interests, services and other payments) and then request the application of the benefit established in the treaty. Once the tax obligation is complied with and the application is approved, the Tax Administration will grant in favor of the taxpayer a corporate income tax credit to be used on its annual corporate income tax filing.

Initially, the provisions of this General Standard were scheduled to become effective six months after its publication date (that is,

April 2023). However, on 26 January 2023, the Tax Administration published General Standard No. 02-2023, granting an additional period of six months for the implementation and application of the provisions of General Standard No. 11-2022 (that is, October 2023).

Mutual Agreement Procedure. On 30 August 2022, the Tax Administration issued General Standard No. 10-2022, establishing the guidelines for the application of the Mutual Agreement Procedures (MAPs) in double tax treaties. Any person who is a resident of the Dominican Republic, as defined by the double tax treaty, and believes the measures adopted by the competent authority one of the two jurisdictions that is a party to the double tax treaty may result in a taxation that is not in accordance with the provisions of the double tax treaty can submit its case to their country's corresponding competent authority or the other country's competent authority.

Because of the frequent changes to the tax law in Ecuador in recent years, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	10
Branch Tax Rate (%)	25
Withholding Tax (%)	
Dividends	10/14.8
Interest	25
Royalties	25
Technical Assistance	25
Services	25
Remittance Tax	5
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax is levied on companies domiciled in Ecuador and on foreign companies. Companies domiciled in Ecuador include those incorporated in Ecuador and companies incorporated in foreign countries that have been approved as branches by the Superintendence of Companies after a legal proceeding. Companies incorporated in Ecuador are subject to tax on their worldwide income. Foreign companies are subject to tax on income derived from activities within Ecuador and from goods and assets located within Ecuador.

Rate of corporate tax. The standard rate of corporate income tax is 25%.

The corporate income tax rate is increased to 28% if either of the following conditions is met:
- The local entity has not reported the corporate structure (until the last individual ultimate beneficial owner) or partially reported it.
- An entity domiciled in a tax haven, low-tax jurisdiction or in a preferential-regime jurisdiction is in the corporate structure of the local taxpayer and its beneficial owner is an individual resident in Ecuador.

The 28% rate is applied to the tax base in proportion to the ownership affected by one of the events listed above. If this ownership is equal to or exceeds 50% of the local entity corporate capital, the 28% rate applies to the entire tax base.

Income tax rate reduction. Companies that reinvest their profits in disabilities, sports, scientific research or technological development projects benefit from an income tax reduction according to the following conditions:
- The corporate income tax rate is decreased to 15% if there is an investment in programs or projects qualified as a priority by government.
- The corporate income tax rate is decreased to 17% if there is an investment in other programs or projects that are not qualified as a priority by government.

Capital gains. Capital gains tax on sales of tangible assets is not imposed in Ecuador.

Gains derived from direct or indirect transfers of shares (and other capital representative rights) of Ecuadorian entities are subject to tax at a flat single income tax rate of 10%.

Indirect transfers are taxable if both of the following conditions are met:
- At any time during the tax year in which the transfer is performed, the real value of the shares of the Ecuadorian entity or permanent establishment represents directly or indirectly 20% or more of the real value of the nonresident company's shares.
- In the same fiscal year or 12 months before the transaction, the transfer of shares of the nonresident company by the same seller directly or indirectly corresponds to an aggregate amount exceeding 300 basic fractions of income tax for individuals (USD3,570,600 for the 2024 fiscal year). This amount is

increased to 1,000 basic fractions of income tax for individuals (USD11,902,000 for the 2024 fiscal year) if the transaction does not exceed the 10% of the total share capital.

Under the above rule, the Ecuadorian entity whose shares were negotiated or transferred is considered the substitute for the taxpayer and, consequently, is responsible for the income tax payment.

This tax does not apply in the case of corporate restructures, mergers or spin-offs, provided that the beneficial owners of the shares do not change before and after the procedure and they keep the same percentages of participation.

In the case of indirect alienations, the Ecuadorian entity whose shares have been transferred acts as a substitute for the taxpayer and must comply with the capital gains tax payment and updating the correspondent corporate composition. Losses on transfers of shares between related parties are not deductible.

Administration. The fiscal year runs from 1 January to 31 December. No other closing dates are permitted, regardless of the date a business begins operations. Returns must be filed between 10 April and 28 April.

Companies have the option to make an advance payment equal to 50% of income tax from the preceding year, subtracting the withholdings made with respect to the taxpayer in that preceding year.

As a result, if no tax is payable for a fiscal year or the tax payable is lower than the advance payment, it is possible to file a refund petition for the income tax overpaid.

The penalty for late filing is 3% of the income tax due for each month or fraction of a month of the delay, up to a maximum of 100% of the tax due. Interest at the maximum legal rate, which floats, is levied on all increases in tax assessments from the date the tax was originally due to the date of payment.

Withholding taxes. A 25% withholding tax is generally imposed on the following payments abroad:

- Interest, royalties and payments for technical assistance to non-domiciled companies and nonresident individuals
- Payments to nonresident individuals for services rendered
- Payments to non-domiciled companies for professional services rendered abroad or occasional services rendered in Ecuador

Income tax withholding at a rate of 25% applies to all reimbursements of expenses abroad.

Income tax withholding at a rate of 37% applies to cross-border payments made to recipients in tax havens, low-taxation jurisdictions or preferential tax regimes.

Penalties are imposed for failures to comply with the withholding requirements. Withholding agents who deliberately fail to provide taxpayers, totally or partially, with tax withholding receipts are subject to imprisonment and fines.

Income tax self-withholding. A self-withholding is imposed on major taxpayers. Every year, the Internal Revenue Service (IRS) publishes a list with the companies that are considered major

taxpayers; 710 companies are considered major taxpayers for the 2024 fiscal year. Together with this list, IRS issues a specific income tax self-withholding rate for every company. The specific rate can vary from 1.25% to 10% depending on the economic activity and the income of the company. Major taxpayers must file their income tax self-withholding every month.

Dividends. Dividends distributed to nonresidents after the payment of income tax are subject to an effective income tax or withholding tax of 10% (tax base of 40% taxed at a 25% rate). The effective rate is increased to 14.8% (tax base of 40% taxed at a 37% rate) if the local entity does not fulfill its obligation to report the corporate structure up to the final beneficiary. The rate may be reduced in accordance with an applicable treaty. If the effective beneficiary is an individual resident in Ecuador, a withholding tax is imposed at rates up to 25% according to a progressive table issued by the tax authorities.

For anticipated dividend distributions (before the annual income tax return), withholding tax at a rate equal to the corporate income tax rate is applied. This is a self-assessment methodology and the income tax paid is considered to be a tax credit for the local entity in its annual income tax return.

Foreign tax relief. Foreign income received by companies domiciled in Ecuador is taxable, and the amount of the withholding tax may be used as a tax credit up to the rate applicable in Ecuador depending on the type of income.

C. Determination of trading income

General. Taxable income is based on accounting profits after the corresponding tax reconciliation adjustments.

In computing taxable income, a company can deduct expenses incurred in producing income, including production and distribution costs, interest charges, royalty payments and depreciation. Also, employee profit-sharing distributions (15% of gross profit) can be deducted before computing taxes. Special provisions govern the computation of taxable income from the export of petroleum, air and maritime transportation, the banana sector and other agro-livestock activities that are subject to the single tax regime.

Expenses incurred abroad are generally deductible if corresponding taxes are withheld and if the payment constitutes taxable income for the recipient. The following cross-border payments are deductible subject to specified limitations:

- Payments for imports, including interest and financing fees, as provided in import licenses
- Export fees of up to 2% of the export value
- Interest paid to related parties that are subject to the thin-capitalization rules (see Section E)
- Payments under financial leases
- Indirect costs allocation (up to 5% of the total of the tax base and these costs)

Nondeductible expenses include the following:

- Interest paid on foreign loans, to the extent the interest rate exceeds the limit established by the Central Bank Board, and

interest on foreign loans not registered at the Ecuadorian Central Bank
- Interest payments to related parties that exceed 20% of the earnings before interest, taxes, depreciation and amortization (EBITDA) of the local entity
- Losses on sales of assets between related parties
- Accounting provisions for the payment of eviction and employer retirement pensions
- Leasing payments with respect to leasebacks or trade with related parties

Inventories. Inventory is generally stated at cost (calculated using the average, first-in, first-out [FIFO] or actual methods). Inventory write-offs must be documented through a sworn statement that the inventory was destroyed or donated.

Tax depreciation and amortization. Depreciation and amortization expenses are deductible for income tax purposes. The tax law provides the following maximum straight-line depreciation rates applicable for tax purposes.

Asset	Rate (%)
Commercial and industrial buildings, aircraft and ships	5
Office equipment	10
Motor vehicles and trucks	20
Plant and machinery	10
Computers	33

For tax purposes, in general, expenditures to acquire property and other assets that produce revenue must be amortized over at least five years, using a straight-line depreciation rate of 20%. Intangibles must be amortized over either the term of the relevant contract or a 20-year period.

The tax authorities may approve other methods and annual rates for depreciation and amortization.

Research and development expenses are generally written off over five years.

Relief for losses. Net operating losses may be carried forward and offset against profits in the following five years, provided that the amount offset does not exceed 25% of the year's profits. Loss carrybacks are not permitted.

Groups of companies. For tax purposes, no measures exist for filing consolidated returns and relieving losses within a group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); imposed on sales and commercial transactions, imports, rendering of services (including imported "digital services") and intellectual property rights; principal products that are exempt are food products in their natural state, drugs and veterinary products, as well as additional products as a result of	

Nature of tax	Rate (%)
the COVID-19 pandemic; for VAT purposes, digital services are those provided and/or contracted through the internet or any adaptation or application of protocols, platforms or technology used by the internet or other networks, through which similar services are provided that, by their nature, are automated and require minimal human intervention, regardless of the device used for downloading, viewing or use; for digital services relating to the delivery and shipping of tangible movable goods, the tax is calculated on the commission paid in addition to the value of the goods; the payment of VAT generated on digital services supply is assumed by the Ecuadorian resident importer of the services	
General rate	13
(The 13% rate can be increased to 15% by Presidential Decree.)	
Local transactions of construction materials	5
Remittance Tax (RT); imposed on all cross-border payments or money transactions abroad, with or without the intervention of financial institutions, and money deposited abroad through bank transfers, RT also applies to any form of termination of obligations and checks or wire transfers; tax is withheld at source; foreign banks operating in Ecuador must pay the tax monthly; the tax law provides that RT applies to payments made from foreign bank accounts of Ecuadorian entities if RT was not levied on the cash when it was initially transferred to the foreign bank account and to exports of goods and services if the cash does not enter Ecuador within six months after the goods arrive at their destination or the services begin to be rendered; RT paid on imports of raw materials, supplies and capital goods may be used as a tax credit for income tax purposes for the following five years if such goods are used in production processes and listed in a resolution issued by the IRS of Ecuador;	
for the 2023 fiscal year, there will be a progressive reduction of the RT rate	5
(For the 2024 fiscal year, the 5% rate could be decreased for certain sectors or by the disposition of the President.)	
Temporal Contribution for Security (TCS) or Contribución Temporal de Seguridad (CTS) in Spanish; imposed to address the non-international armed conflict in Ecuador; the collected revenue of TCS will be used to strengthen police and armed forces capabilities; TCS is levied on companies domiciled in Ecuador that were subject to corporate income	

Nature of tax	Rate (%)
tax in the 2022 fiscal year; the tax base is the taxed income of the 2022 fiscal year filing and payment for TCS must be paid in the 2024 fiscal year (March) and the 2025 fiscal year (March); TCS cannot be considered a tax credit or a deductible expense; small and medium companies, banks and saving and funding cooperatives are excluded from this contribution	3.25
Banks and Saving and Funding Cooperatives Temporal Contribution (BTC) is imposed to address the non-international armed conflict in Ecuador; the collected revenue of this BTC will be used to strengthen police and armed forces capabilities; BTC is levied on banks and saving and funding cooperatives domiciled in Ecuador or Ecuadorian branches of foreign banks and saving and funding cooperatives that were subject to corporate income tax in the 2023 fiscal year; filing and payment for the BTC must be fulfilled by 31 May 2024; BTC cannot be considered a tax credit or a deductible expense; the BTC tax rate depends on the banks' and cooperatives' 2023 taxed income	5 to 25
Temporary contribution	0.8

E. Miscellaneous matters

Foreign-exchange controls. All transactions in Ecuador must be conducted in US dollars.

Debt-to-equity rules. A thin-capitalization rule applies in Ecuador. Any interest paid on loans from related parties in excess of 20% of income before mandatory employee profit sharing, interest, depreciation and amortization is not deductible. For banks, insurance companies and other financial institutions of the popular- and solidarity-based economy (small financial entities that are not controlled by the Superintendence of Banks, but the Superintendence of the Popular and Solidarity Economy), the thin-capitalization rule applicable on loans from related parties is a 3:1 debt-to-equity ratio.

Free-trade zone. The signatories of the Andean Community or the former Andean Pact (Bolivia, Colombia, Ecuador and Peru) have entered into a free-trade agreement. However, Peru signed the agreement with some restrictions. Under the agreement, merchandise and goods manufactured in one of the signatory countries may enter the other signatory countries free of customs duties. All items imported from other countries are subject to a common external customs duty.

Transfer pricing. In general, transfer-pricing rules in Ecuador follow Organisation for Economic Co-operation and Development (OECD) rules, because they require fulfillment of the arm's-length standard. Nevertheless, the technical preferences of the IRS are

quite specific and may imply significant differences when measuring compliance with the rules. Special rules apply to oil, bananas and metallic commodities.

In addition to traditional ownership-control criteria to determine relationships between parties, since October 2022, only the 80 jurisdictions that are on the official list of the Internal Revenue Service are considered tax havens.

Transfer-pricing information must be documented by all companies having transactions with related parties, including domestic ones. Companies must file their documentation with the IRS if certain conditions are met, as described below.

Income taxpayers that have carried out transactions with related parties during a fiscal year in an amount that exceeds USD15 million must submit the Transfer Pricing Annex and the Transfer Pricing Comprehensive Report to the IRS.

Income taxpayers that do not meet the minimum amounts mentioned above must submit the Transfer Pricing Annex or the Transfer Pricing Comprehensive Report at the request of the IRS.

Transactions that are added up for purposes of the threshold include most balance-sheet movements.

Certain transactions (most of them are domestic if certain conditions are met) are not added up for purposes of the threshold and are not part of the compulsory Annex or Report, but their documentation may be requested at any time by the IRS.

The deadline to file the Transfer Pricing Annex and the Transfer Pricing Comprehensive Report is two months after the deadline for the filing of the corporate income tax return, which includes certain declarations on the total amounts of relevant related parties' transactions.

Taxpayers involved in transactions with related parties are exempt from the application of the transfer-pricing regime if they satisfy all of the following conditions:
- Their corporate income tax is higher than 3% of taxable income.
- They do not conduct business with residents in tax havens or lower-tax jurisdictions.
- They do not have contracts with government institutions for the exploration or exploitation of nonrenewable resources.

Transactions covered by an Advanced Pricing Ruling (APR) of the IRS do not need to be reported. APRs may be requested at any time and for any transaction, but they are commonly used to eliminate deductibility restrictions that the Ecuadorian tax law imposes on related-party transactions regarding administrative and technical services, royalties, consultancy, technical assistance and similar items.

F. Treaty withholding tax rates

In 2004, an agreement to eliminate double income taxation was signed by the member jurisdictions of the Andean Pact. Income earned in these jurisdictions is generally not taxed in Ecuador to avoid double taxation. Only legally established citizens, residents

or companies in any of the member jurisdictions can access those benefits.

	Dividends (a) %	Interest %	Royalties %
Belarus	5/10	10	10
Belgium	15	10	10
Brazil	15	15	15/25 (c)
Canada	5/15	15	10/15
Chile	5/15	15	10/15
China Mainland	5	10	10
France	15	10/15 (d)	15
Germany	15	10/15 (d)	15
Italy	15	10	5
Japan	5	10	10
Korea (South)	5/10	12	5/12
Mexico	5	10/15	10
Qatar	5/10	10	10
Romania	15	10	10
Russian Federation	5/10	10	10/15 (d)
Singapore	5	10	10
Spain	15	5/10 (e)	10
Switzerland	15	10	10
Uruguay	10/15	15	10/15 (d)
Non-treaty jurisdictions	10/14 (a)	25 (b)	25

(a) Only 40% of distributed dividends (if paid from profits taxed at the corporate level) is taxable under Ecuadorian domestic law.

(b) A 25% withholding tax is imposed on the payment of interest abroad unless the interest is paid on loans granted by financial institutions, specialized non-financial entities qualified by the control authorities in Ecuador or multilateral institutions.

(c) Trademark royalties are taxed at a rate of 25%. Other royalties are taxed at a rate of 15%.

(d) Tax on income derived from the sale of industrial, commercial or scientific equipment may not exceed 10%.

(e) The rate of tax on the total amount of the interest with respect to the sale of industrial equipment, the sale of goods from one company to another and the financing of construction works may not exceed 5%.

A. At a glance

Corporate Income Tax Rate (%)	22.5 (a)
Capital Gains Tax Rate (%)	
Sales of Securities	10/22.5 (a)(b)
Sales of Other Assets	22.5 (a)
Branch Tax Rate (%)	22.5 (a)
Withholding Tax (%)	
Dividends	10 (c)
Interest	20 (c)
Royalties from Patents, Know-how, etc.	20 (c)
Services	20 (c)
Branch Remittance Tax	10 (d)
Net Operating Losses (Years)	
Carryback	0 (e)
Carryforward	5

(a) The standard corporate income tax rate is 22.5%. Exceptions to the 22.5% rate exist (see Section B).
(b) For details regarding the 10% rate, see Section B.
(c) This is the standard rate. The rate may be reduced to 5% under domestic law for dividends. It also may be reduced under a tax treaty. Exemptions may apply in certain circumstances. The tax is a final tax imposed on gross payments. Also, see Section B.
(d) A branch remittance tax of 10% is payable within 60 days after the financial year-end.
(e) Only losses incurred in long-term projects may be carried back to offset profits from the same project for an unlimited number of years.

B. Taxes on corporate income

Corporate income tax. Egyptian corporations are subject to corporate profits tax on their profits derived from Egypt, as well as on profits derived from abroad, unless the foreign activities are performed through a permanent establishment located abroad. Foreign companies performing activities through a permanent establishment in Egypt are subject to tax only on their profits derived from Egypt.

Rates of corporate income tax. The standard rate of corporate income tax is 22.5%.

Exceptions to the 22.5% rate exist. Oil prospecting and production companies are subject to tax on their profits at a rate of 40.55%. The Suez Canal Company, the Egyptian General Petroleum Company and the Central Bank of Egypt are subject to tax on their profits at a rate of 40%.

Capital gains

From the sale of securities by residents. The following rates apply to capital gains derived from the sale of securities by residents:

- A 10% rate applies to capital gains on securities listed on the Egyptian Stock Exchange that are sourced in Egypt and realized by individuals and corporations.
- The standard corporate tax of 22.5% applies to capital gains sourced in Egypt from unlisted securities and realized by corporations.
- Capital gains realized from the disposal of unlisted shares by resident individuals are subject to the tax brackets in Article 8

of Tax Law No. 91 of 2005, ranging from 0% to 27.5%. These gains should be declared in the individual's income tax return (for non-commercial professions and real estate wealth), which is filed within three months from the financial year-end.
- The capital gains realized by corporations will be part of their normal annual corporate income tax return, which is filed within four months from the financial year-end.

Capital losses resulting from the sale of securities can be offset against the amount of capital gains realized from the sale of securities during the same tax year. If the realized capital losses exceed the realized capital gains during the tax year, it is permissible to carry forward the excess losses from the sale of securities in subsequent years, up to the third year.

From the sale of securities by nonresidents. The following rates apply to capital gains derived from the sale of securities by nonresidents:
- Capital gains realized from the disposal of unlisted shares by nonresident corporations are subject to a 22.5% tax.
- Capital gains realized from the disposal of unlisted shares by nonresident individuals are subject to the tax brackets in Article 8 of Tax Law No. 91 of 2005, ranging from 0% to 27.5%.
- Capital gains realized from the disposal of listed shares or from the disposal of Treasury bills by nonresident individuals and corporations are exempt from tax.

The capital gains tax should be paid and filed using the designated form and submitted to the Egyptian Tax Authority (ETA) within 60 days from the transaction date.

From the sale of other assets by residents. Tax on capital gains on other assets is calculated at the ordinary corporate profits tax rates in the same manner as ordinary business profits and is not calculated separately.

Administration. Companies must file their annual tax returns, together with all supporting schedules by 30 April of each year, or four months after the end of the financial year. The tax return must be signed (electronically) by the taxpayer. Taxpayers can file a request for an extension of the due date for filing the tax return if the estimated amount of tax is paid at the time of the request. A request for an extension must be filed at least 15 days before the due date. An extension of up to 60 days may be granted. An amended tax return can be filed during the year following the due date set for submitting the annual return, unless the taxpayer has evaded tax or received an inspection notification. If the amended return reflects lower tax due than the original return, the ETA should review the amended return and approve the refund within six months from the date of application.

Any tax due must be paid when the tax return is filed.

A late penalty is imposed at a rate of 2% plus the credit and discount rate set by the Central Bank of Egypt in January of each year.

A penalty of EGP3,000 up to EGP50,000 is imposed for noncompliance with the deadline for submitting the annual corporate income tax return for a period not exceeding 60 days from the due date for the tax return.

A penalty from EGP50,000 up to EGP2 million is imposed if an annual corporate income tax return is filed more than 60 days after the filing due date. If the noncompliance occurs for three annual corporate income tax returns, the taxpayer may also be subject to imprisonment for a period between six months and three years.

Income Tax Law No. 91 of 2005 has set up appeals committees at two levels — the Internal Committee and the Appeal Committee. The Appeal Committee's decision is final and binding on the taxpayer and the tax department, unless a case is appealed to the court within 30 days of receiving the decision, which is usually in the form of an assessment. There is another level that enables taxpayers to settle their tax disputes by filing a settlement request to the ETA concerned for the disputed items, provided that the file is still under discussion and not yet held for the issuance of a decision by the Appeal Committee.

Withholding tax on services. In general, payments for all services performed by nonresident companies for Egyptian companies in or outside Egypt are subject to a withholding tax at a rate of 20%. However, this withholding tax does not apply to payments related to the following activities:

- Transportation
- Shipping
- Insurance
- Training
- Participation in conferences and exhibitions
- Registration in foreign stock markets
- Direct advertising campaigns
- Hotel accommodations
- Religious activities

Dividends. Dividends paid by corporations or partnerships, including companies established under the special economic zone system, to resident juridical persons, nonresident persons, or nonresident juridical persons that have a permanent establishment in Egypt are subject to tax on dividends.

Withholding tax on dividends is imposed at a standard rate of 10% without any deductions or exemptions. However, this rate can be reduced to 5% if the shares are listed.

Under the law, foreign branches' profits in Egypt are considered distributed profits within 60 days after the financial year-end. As a result, a branch must pay the dividend tax on its annual profits within 60 days after the financial year-end.

The tax law grants exemptions for investment funds.

Dividends in the form of free stocks are not subject to tax on dividends.

Interest and royalties. In general, interest and royalty payments made by Egyptian entities to nonresidents are subject to withholding tax at a rate of 20%.

Interest payments on long-term loans (over three years) taken by Egyptian public and private sector companies were exempt from withholding tax. However, with the introduction of Law No. 30 of 2023 on 15 June 2023, this exemption is no longer applicable unless an interest payment was made before the law came into effect.

Foreign tax relief. Foreign tax paid by resident entities outside Egypt can be deducted if supporting documents are available.

Treaties entered into between Egypt and other countries provide a credit for taxes paid abroad on income subject to corporate income tax in Egypt.

C. Determination of taxable income

General. Corporate income tax is based on taxable profits computed in accordance with generally accepted accounting principles, modified for tax purposes by certain statutory provisions primarily concerning depreciation, provisions, inventory valuation, intercompany transactions and expenses. Interest on bonds listed on the Egyptian stock exchange is exempt from tax if certain conditions are satisfied.

Taxable profits are based on actual revenues and costs. Consequently, unrealized revenues and costs are not included in the tax base.

Startup and formation expenses may be deducted in the first year.

The deductibility of a branch's share of head office overhead expenses is limited to 10% of the taxable net profit. The expenses charged within the limits of this percentage may not include any royalties, interest, commissions or direct remuneration, and a certificate from the head office's auditor, duly endorsed and authenticated, must be submitted. Head-office expenses are fully deductible if they are directly incurred by the branch and are necessary for the performance of the branch's activity in Egypt. Such expenses must be supported by original documents and approved by the head office auditors.

Interest paid on loans and overdrafts with respect to a company's activities is deductible after offsetting interest income. Interest paid to individuals who are not subject to tax or exempt from tax is not deductible. Deductible interest is limited to the interest computed at a rate equal to twice the discount rate determined by the Central Bank of Egypt.

Inventories. Inventory is normally valued for tax purposes at the lower of cost or market value. Cost is defined as purchase price plus direct and indirect production costs. Inventory reserves are not permissible deductions for tax purposes. For accounting purposes, companies may elect to use any acceptable method of inventory valuation, such as first-in, first-out (FIFO) or average cost. The method should be applied consistently, and if the method is changed, the reasons for such change should be stated.

Provisions. Provisions are not deductible except for the following:
- Provision for up to 80% of loans made by banks, which is required by the Central Bank of Egypt
- Insurance companies' provision determined under Law No. 10 of 1981

Bad debts are deductible if the company provides a report from an external auditor certifying the following:
- The company is maintaining regular accounting records.
- The debt is related to the company's activity.
- The debt appears in the company's records.
- The company has taken the necessary action to collect the debt.

Depreciation and amortization allowances. Depreciation is deductible for tax purposes and may be calculated using either the straight-line or declining-balance method. The following are the depreciation rates.

Type of asset	Method of depreciation	Rate (%)
Buildings, ships and aircraft	Straight-line	5
Intangible assets	Straight-line	10
Computers	Declining-balance	50
Heavy machinery and equipment	Declining-balance	25
Small machinery and equipment	Declining-balance	25
Vehicles	Declining-balance	25
Furniture	Declining-balance	25
Other tangible assets	Declining-balance	25

The law allows a taxpayer to claim a deduction of 30% of the costs of new or used equipment and machines as accelerated depreciation if the assets are used for production purposes. This deduction applies only in the first tax period in which the equipment and machines are used.

Relief for losses. Tax losses may be carried forward for five years. Losses incurred in long-term projects may be carried back for an unlimited number of years to offset profits from the same project.

Losses incurred outside Egypt cannot be offset against taxable profits in Egypt.

If capital losses exceed capital gains realized from disposals of securities and shares in a tax year, the excess can be carried forward for three years.

Groups of companies. Associated or related companies in a group are taxed separately for corporate income tax purposes. Egyptian law does not contain a concept of group assessment under which group losses may be offset against profits within a group of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	Various
Customs duties	
General, ad valorem	Various
On value of machinery needed for investments by companies	5
Stamp duties on bills, promissory notes and letters of guarantee as well as most types of documents, contracts, checks and receipts (Treasury bonds and bills are exempt)	Various
Social insurance	
On monthly gross salary with a maximum of EGP12,600 and a minimum of EGP2,000; paid by	
Employer	18.75

Nature of tax	Rate (%)
Employee	11
On contract labor force	18.25

E. Miscellaneous matters

Foreign-exchange controls. Egypt has a free-market exchange system. Exchange rates are determined by supply and demand, without interference from the central bank or the Ministry of the Economy.

Debt-to-equity rules. The maximum debt-to-equity ratio is 4:1. Under Law No. 30 of 2023, the maximum debt-to-equity ratio will decrease gradually to the following:
- 2024 to 2027 fiscal years: The debt-to-equity ratio will be 3:1.
- 2028 fiscal year and onward: The debt-to-equity ratio will be 2:1.

Transfer pricing. Egyptian tax law contains specific tax provisions relating to transfer pricing, which are based on the arm's-length principle. Under these measures, the tax authorities may adjust the income of an enterprise if its taxable income in Egypt is reduced as a result of contractual provisions that differ from those that would be agreed upon by unrelated parties.

However, according to Egyptian tax law, it is possible to enter into arrangements in advance with the Tax Department regarding a transfer-pricing policy through an advance pricing agreement (APA). An APA ensures that transfer prices will not be challenged after the tax return is submitted and, accordingly, eliminates exposure to penalties and interest on the late payment of taxes resulting from adjustments of transfer prices.

The ETA in association with the Organisation for Economic Co-operation and Development (OECD), issued transfer-pricing guidelines in 2010. These guidelines advise taxpayers on the application of the arm's-length principle in pricing their intragroup transactions and outline the documentation that taxpayers should maintain as evidence to demonstrate their compliance with the arm's-length principle.

On 22 May 2018, the Egyptian government issued Ministerial Decree No. 221 of 2018, which amended the Income Tax Law Executive Regulations to align Egypt's rules more closely with the international consensus on transfer pricing reflected in the OECD transfer-pricing guidelines.

On 23 October 2018, the ETA issued a revised version of the 2010 transfer-pricing guidelines on its website. The new guidelines consist of the following two parts:
- Principles and Implementation
- Advance Pricing Agreements

The guidelines introduce a three-tiered transfer-pricing documentation approach and introduce the following significant new compliance obligations in Egypt:
- Local File: A taxpayer engaged in transactions with related parties is expected to prepare local transfer-pricing documentation and submit it to the ETA within two months following the filing of the 2018 corporate tax return.

- Master File: The Master File must be prepared at the ultimate parent level of the group and must be made available to the ETA based on the parent entity's tax return filing date in its home jurisdiction.
- Country-by-Country Report (CbCR): An Egyptian parent company of a multinational group with consolidated group revenue of at least EGP3 billion (EUR90 million) must file a CbCR in Egypt. The submission deadline is 12 months from the end of the reporting fiscal year. A constituent entity of a multinational enterprise group that is a tax resident in Egypt and has annual consolidated group revenue of EUR750 million or more must notify the ETA. This notification should clarify whether it is the ultimate parent entity. All notifications must be submitted no later than the last day of the fiscal year to which the CbCR relates.

The APA program is designed to enable taxpayers and the ETA to agree on the proper treatment of the transfer pricing of potential controlled transaction(s) in which the taxpayer will engage for a specific period (typically more than one year) under certain terms and conditions. The APA program is intended to provide a cooperative process to resolve potential transfer-pricing disputes in advance.

The new guidelines provide the APA framework and other details regarding the APA program in Egypt.

On 19 October 2020, Law No. 206 of 2020 was published in the *Official Gazette*. The law stipulates specific transfer-pricing penalties for noncompliance, thereby completing the transfer-pricing legislative framework. The penalty imposed by the Unified Tax Procedures Law is 1% of the total value of the related-party transactions that are not declared in the taxpayer's corporate income tax return. In addition, the law introduced a filing threshold for master and local files. Under the law, a taxpayer must prepare and submit the Master File and the Local File if its aggregate related-party transactions exceed EGP8 million for the year. However, as per the Ministerial Decree No. 52 that was issued on 21 February 2024, the minimum threshold has been amended. The new requirement for filing the Master File and the Local File is now an aggregate of EGP15 million in related-party transactions, instead of the previous EGP8 million.

Law No. 211 of 2020, which was published on 3 December 2020, amended some provisions of Law No. 206, introducing stricter penalties for noncompliance relating to transfer-pricing documentation. The following are the penalties:

- Failure to declare the accurate value of related-party transactions (Table 508) for corporate income tax returns due to be filed on or after 20 October 2020: 1% of the total value of the taxpayer's undeclared related-party transactions (local and cross-border transactions) during the fiscal year
- Failure to submit a Master File or Local File on time: 3% of the total value of the taxpayer's related-party transactions (local and cross-border transactions) during the fiscal year
- Failure to submit a CbCR (if the taxpayer is the ultimate parent entity of a multinational group) or notification (if the taxpayer is the constituent entity) on time: 2% of the total value of the

taxpayer's related-party transactions (local and cross-border transactions) during the fiscal year

On 19 September 2023, the ETA issued Transfer Pricing Explanatory Instructions No. 78 of 2023 (Instructions). The Instructions clarify the transfer pricing provisions in the Unified Tax Procedures Law No. 206 of 2020 (UTPL) and aim to address common transfer pricing queries.

The Instructions stipulate that if the taxpayer files a revised/amended corporate income tax return within 30 days of filing the original corporate income tax return, the Local File submission timeline will be calculated from the submission date of the revised/amended corporate income tax return.

The Instructions clarify that if the ultimate parent entity of the group is registered in a free zone, the other group entities that are not registered in the free zone are obliged to prepare the Master File. The Master File must be submitted with the Local File.

The Instructions provide for the percentage of the related-party transaction value to be disclosed in Table 508 and the Local File if a party related to the owners of the joint venture engages in a transaction with the joint venture.

Transactions in the nature of "payments on behalf" and mark-up, if any, related to these payments will be considered related-party transactions and must be disclosed in Table 508 of the corporate income tax return and the Local File.

F. Treaty withholding tax rates

The table below sets forth maximum withholding rates provided in Egypt's double tax treaties for dividends, interest and royalties.

To benefit from the tax rates provided by double tax treaties with respect to interest and royalties, within six months after the date of receipt of the payment, a nonresident entity or its legal representative must submit to the tax authorities an application to apply the tax rate stated in the treaty and request a refund of the difference between the domestic rate and the treaty rate. The application must be submitted on the form designed for this purpose together with the required documents.

Egypt signed up to be a member of the Base Erosion and Profit Shifting (BEPS) Inclusive Framework from 2016.

In addition, in 2017, Egypt signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS (MLI). The MLI needs to be ratified by both treaty jurisdictions. The effective date of implementing the changes in relation to withholding tax rates under the updated conventions is 1 January 2021.

The following is the treaty withholding tax rate table.

	Dividends (a) (%)	Interest (%)	Royalties (%)
Albania	5/10	10	10
Algeria	5/10	5	10
Austria	5/10	15	0
Bahrain	5/10	10	10
Belarus	5/10	10	15

	Dividends (a) (%)	Interest (%)	Royalties (%)
Belgium			
From Egypt	5/10	15	Trademarks 25 Other 15
From Belgium	15/20 (c)	15	Trademarks 25 Other 15
Bulgaria	5/10	12.5	12.5
Canada	5/10	15	15
China Mainland	5/8	10	8
Cyprus	5/10 (d)	10	10
Czech Republic	5/10	15	15
Denmark	5/10	15	20
Ethiopia	5/10	10	10
Finland			
From Finland	10	0	20
From Egypt	5/10	20	20
France	0	15	15
Georgia	5/10	10	10
Germany	5/10	15	Trademarks 20 Other 15
Greece	5/10	15	15
Hungary	5/10	15	15
India	5/10	20	According to domestic law in each country
Indonesia	5/10	15	15
Iraq			
From Iraq	According to domestic law	10	One-half of tax rate in the country
From Egypt	5/10	20	10
Ireland	5/10 (e)	10	10
Italy	5/10	20	15
Japan	5/10	20	15
Jordan	5/10	15	20
Korea (South)	5/10	10/15	15
Kuwait	5/10	10	10

Libya	5/10	20	20
Malaysia	0	15	15
Malta	5/10	10	12
Mauritius	5/10	10	12
Morocco	5/10	20	10
Netherlands	0 (f)	12	12
Norway			
From Norway	15	0	15 (or the domestic rate applied by Norway, whichever is lower)
From Egypt	5/10	20	15
Pakistan	5/10	15	15
Palestinian Authority	5/10	15	15
Poland	5/10	12	12

	Dividends (a) (%)	Interest (%)	Royalties (%)
Romania	5/10	15	15
Russian Federation	5/10	15	15
Saudi Arabia	5/10	10	10
Serbia and Montenegro	5/15 (g)	15	15
Singapore	5/10	15	15
South Africa	5/10	12	15
Spain	5/9	10	12
Sudan	5/10	10	10
Sweden	5	15	14
Switzerland	0	15	12.5
Syria	5/10	15	20
Tunisia	5/10	10	15
Türkiye	5/10	10	10
Ukraine	5/10	12	12
United Arab Emirates	5/10 (h)	10	10
United Kingdom	5/10	15	15
United States	5/10	15	15
Yemen	According to agreed tax treatment between the two parties	10	10
Yugoslavia (b)	5/10	15	15
Non-treaty jurisdictions	5/10	20	20

(a) The rates depend on various conditions.
(b) The treaty with Yugoslavia applies to the republics that formerly comprised Yugoslavia.
(c) The 15% rate applies if the beneficial owner holds at least 25% of shares throughout a 365-day period that includes the day of the dividend payment. This is in accordance with the MLI because both Belgium and Egypt have approved the amendment. The 20% rate applies in in all other cases.
(d) The 5% rate applies if the beneficial owner holds at least 20% of shares throughout a 365-day period that includes the day of the dividend payment. The 10% rate applies in all other cases.
(e) The 5% rate applies if the beneficial owner holds at least 25% of shares throughout a 365-day period that includes the day of the dividend payment. The 10% rate applies in all other cases.
(f) The 0% rate applies if the beneficial owner holds at least 25% of shares throughout a 365-day period that includes the day of the dividend payment. For other dividends, the domestic withholding tax rates should apply.
(g) The 5% rate applies if the beneficial owner holds at least 25% of shares throughout a 365-day period that includes the day of the dividend payment. The 15% rate applies in all other cases.
(h) The 5% rate applies if the beneficial owner holds at least 10% of shares throughout a 365-day period that includes the day of the dividend payment. The 10% rate applies in all other cases.

Egypt has signed a double tax treaty with Qatar, but it is not yet effective.

A. At a glance

Corporate Income Tax Rate (%)	25/30 (a)
Capital Gains Tax Rate (%)	10/30 (a)
Branch Tax Rate (%)	25/30 (a)
Withholding Tax (%)	
Dividends	0/5/25 (b)
Interest	
Paid to Domiciled Companies	0/10 (c)
Paid to Non-domiciled Companies and Individuals	10/20/25 (c)(d)
Royalties from Know-how and Technical Services	20/25 (e)
Video, Films and Similar Items	5 (f)
International Transportation Services	5 (g)
Insurance Services	5 (h)
Income from Salvadoran Security Market Investments	3 (i)
Lottery Prizes and Other Prize Winnings	
Paid to Domiciled Companies and Individuals	15
Paid to Non-domiciled Companies and Individuals	25
Loans	5 (b)
Equity or capital decreases	5 (j)
Other Payments Made to Nonresidents	20/25 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	0 (k)

(a) For further details regarding the corporate income tax, see Section B.
(b) For details, see Section B and Section F.
(c) The withholding tax applies to interest received by domiciled individuals (if the principal amount is equal or higher than USD25,000 and paid by financial institutions duly supervised by the Financial System Superintendence, among other regulated financial institutions) and companies on bank deposits. Interest paid between domiciled companies is not subject to withholding tax.
(d) Withholding tax at a reduced 10% rate applies if the recipient of the interest is a financial institution supervised in its country of origin and registered with the Central Reserve Bank of El Salvador. If an interest payment is made to a non-domiciled entity that is not registered with the Central Reserve Bank of El Salvador and not domiciled in a tax-haven jurisdiction, a 20% withholding tax applies. If an interest payment is made to a non-domiciled entity that

is not registered with the Central Reserve Bank of El Salvador and domiciled in a tax-haven jurisdiction, a 25% withholding tax applies. Amounts paid or credited to non-domiciled legal entities or individuals who are resident, domiciled or incorporated in tax-haven jurisdictions (or paid through legal entities resident, domiciled or incorporated in such jurisdictions) are subject to a 25% withholding tax. Exceptions apply to the following types of payments:

- Payments for acquisitions or transfers of tangible assets
- Payments to taxpayers in tax-haven jurisdictions located in Central America that have signed cooperation agreements with Salvadoran tax and customs authorities
- Payments to taxpayers in tax-haven jurisdictions that have signed with El Salvador information exchange agreements or double tax treaties
- Payments under circumstances in which reduced withholding tax rates apply

If the recipient does not file an annual income tax return, the withholding tax is presumed to be a payment in full of the income tax on the interest income.

(e) The withholding tax is imposed on payments to foreign companies and individuals for services rendered or used in El Salvador, as well as on payments for the transfer of intangible assets. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax. Amounts paid or credited to non-domiciled legal entities or individuals who are resident, domiciled or incorporated in tax-haven jurisdictions (or paid through legal entities resident, domiciled or incorporated in such jurisdictions) are subject to a 25% withholding tax. Exceptions apply to the following types of payments:

- Payments for acquisitions or transfers of tangible assets
- Payments to taxpayers in tax-haven jurisdictions located in Central America that have signed cooperation agreements with Salvadoran tax and customs authorities
- Payments to taxpayers in tax-haven jurisdictions that have signed with El Salvador information exchange agreements or double tax treaties
- Payments under circumstances in which reduced withholding tax rates apply

The 20% rate applies to royalties from know-how and technical services paid to non-domiciled entities that are not domiciled in tax-haven jurisdictions.

(f) The withholding tax is imposed on payments to non-domiciled persons or entities for transfers of intangible assets or for the use, or grant of use, of rights over tangible and intangible assets related to cinematographic movies, video tapes, phonographic discs, radio serials, television serials, serials and strips reproduced by any means, video and track records, and television programs transmitted by cable, satellite or other similar media. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax.

(g) The withholding tax is imposed on payments to foreign companies and individuals for international transportation services. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax.

(h) The withholding tax is imposed on payments to non-domiciled insurance and reinsurance companies and reinsurance brokers, authorized by the Superintendent of the Financial System. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax.

(i) A withholding tax rate of 3% applies to income derived from capital invested in securities, or transactions in securities, shares and other investments in the Salvadoran securities market (primary or secondary).

(j) A withholding tax rate of 5% applies to amounts paid or credited in capital or equity reductions, in the portion corresponding to capitalization or reinvestment of profits. For this purpose, the amounts paid or credited by the decrease of equity or capital corresponds to previously capitalized amounts.

(k) Capital losses can be carried forward to offset capital gains for a period of five years, provided that the losses have been reported in previously filed tax returns.

B. Taxes on corporate income and gains

Corporate income tax. Resident corporations are subject to tax on Salvadoran-source income. Nonresident corporations are also subject to tax on Salvadoran-source income only. This is based on amendments introduced to the Income Tax Law by Legislative Decree No. 969, which was effectively published in the *Official Gazette* on 22 March 2024. As a result, resident and nonresident

taxpayers are subject to income tax on income derived from the following:
- Movable and immovable property in El Salvador
- Activities carried out in El Salvador
- Services rendered by domiciled and non-domiciled entities that are rendered or used in El Salvador

Taxable investment income of Salvadoran source includes income, capital gains, profits or interest derived from securities, financial instruments and derivative contracts if any of the following conditions are met:
- The issuing entity is a national entity or domiciled in El Salvador.
- The capital is invested or employed in El Salvador.

Under amendments introduced by the abovementioned Legislative Decree No. 969, values that are received in any form, obtained abroad, or any capital movement, remuneration or emolument, in cash or kind, generated or not by the investment of national or foreign capital, and nominally obtained or received by individuals, legal entities or entities without legal personality, domiciled or not in the country, coming from any kind of source abroad, are excluded from the concept of income.

Corporate income tax rate. The standard rate of income tax is 30% for Salvadoran companies, foreign companies with a permanent establishment in El Salvador and non-domiciled companies. However, companies that have sales equal to or less than USD150,000 are subject to a 25% income tax rate.

Capital gains. Capital gains derived from the sale of movable and immovable property are subject to income tax at a rate of 10%. However, if the asset is sold within 12 months after acquisition, the capital gain is subject to tax at a rate of 25% or 30% of net income.

Companies may carry forward capital losses for a five-year period to offset future capital gains only.

The capital gain or loss on a transaction is computed by deducting from the sales price the following:
- Cost of the asset, which equals the purchase price less allowable depreciation claimed under the income tax law
- Improvements made to the asset
- All selling expenses necessary to complete the transaction

Digital assets. Par value, proceeds or income derived from digital assets issued or traded in El Salvador are exempt from all kinds of taxes, duties, charges, tariffs and contributions, of any kind and nature, present or future, ordinary or extraordinary, or even special. In addition, capital gains and ordinary income derived from the local trading of digital assets, including debt forgiveness, are also exempt from all types of taxes.

Administration. The statutory tax year runs from 1 January through 31 December. Companies must file annual income tax returns and pay any tax due within four months after the end of the tax year.

Companies with total assets of SVC10 million (approximately USD1,142,857) or more, or with gross income of more than 4,817 minimum wages (USD1,734,120), must file an annual tax

certification of their tax obligations. This certificate is issued by an external certified public accountant (CPA) who is authorized by the CPA Surveillance Council.

Dividends. Domiciled entities in El Salvador that pay to, or register profits for, domiciled or non-domiciled entities or individuals must withhold income tax at a 5% rate. This serves as a definite income tax payment. Payment or registration of profits can be made in various forms, including, among others, payments in cash or securities and in-kind payments, regardless of whether they are considered dividends, quotas, excess payments, legal reserves, profits or earnings.

The above obligation also applies to representatives of parent companies, affiliates, branches, agencies and other permanent establishments that pay or credit profits to domiciled entities or individuals abroad.

Notwithstanding the above, if payments are made to an entity or individual domiciled or resident in a tax-haven jurisdiction, a 25% withholding tax rate applies.

No withholding should apply on dividends paid out of income or profits that were previously subject to withholding income tax on dividends.

Withholding tax on loans. Legal entities or entities without legal capacity domiciled in El Salvador that remit cash or in-kind assets as loans or advance remittances or engage in other types of loan operations must withhold tax at a rate of 5% of such amounts if the amounts are remitted to any of the following:

- Partners, shareholders, associates, beneficiaries, and other related parties according to Section 25 of the Income Tax Law (for example, spouses and relatives in the fourth degree of consanguinity or second degree of kinship)
- Entities or individuals domiciled or resident in a tax-haven jurisdiction
- Parent companies or branches domiciled abroad

Certain exceptions apply, such as to loans with a market value interest rate or a one-year term and to supervised financial institutions.

Foreign tax relief. No general tax relief rules apply in El Salvador. Also, see Section F.

C. Determination of trading income

General. Taxable income is computed in accordance with adopted Financial Information Standards in El Salvador (International Financial Reporting Standards), subject to adjustments required by the Salvadoran income tax law. The Salvadoran income tax law requires the use of the accrual method of accounting.

Taxable income includes all income derived from the following:

- Assets located in El Salvador
- Activities or transactions carried out in El Salvador
- Capital invested in El Salvador
- Services rendered in El Salvador and services rendered outside El Salvador that are used in El Salvador
- Certain types of investment income (see Section B)

In general, all costs and expenses necessary to produce and preserve taxable income are deductible for income tax purposes, provided all legal deductibility requirements are met.

Imputed income. The Salvadoran income tax law does not contain rates and formulas for calculating imputed income. However, the tax authorities may determine taxable income based on certain information, including the following:

- Investments made during the tax year
- Equity fluctuations
- Transactions and profits recorded in previous tax years
- Purchases and sales
- Value of imported goods
- Value of inventories
- Purchases not recorded
- Performance of similar businesses
- General expenses

Inventories. Salvadoran income tax regulations provide that inventories may be valued at acquisition cost. The cost may be calculated using certain methods, such as first-in, first-out (FIFO), last purchase cost and average cost, as well as special methods established for agricultural products and cattle. The income tax law provides that inventories can be valued by other methods if authorization from the tax authorities is obtained before the method is implemented.

Provisions. Provisions for contingent liabilities, such as severance payments and labor costs, are not deductible expenses. However, payments of such liabilities are deductible expenses. Amounts for doubtful accounts may be deducted if certain legal requirements are satisfied.

Tax depreciation and amortization

Depreciation. The acquisition cost of products with a useful life of 12 months or less may be fully deducted from taxable income in the year of acquisition. Property with a useful life of more than 12 months may be depreciated using the following straight-line rates.

Asset	Rate (%)
Buildings	5
Machinery	20
Vehicles	25
Other movable property	50

Only a portion of the acquisition cost of used machinery and movable property may be deducted for tax purposes. The deductible percentages, which are based on the asset's life, are shown in the following table.

Asset's useful life Years	Deductible percentage (%)
1 but less than 2	80
2 but less than 3	60
3 but less than 4	40
4 or more	20

The useful life of a used asset is determined when the asset is purchased. The depreciable portion of the acquisition cost is calculated according to the normal depreciation rules.

Tax amortization. The acquisition cost or development cost of software programs used to produce and preserve taxable income may be amortized at an annual rate of up to 25% of the cost of development or acquisition. The deductible percentages applicable to used machinery (see above) also apply to used software programs.

Relief for losses. Net operating losses may not be carried forward or back to offset taxable income.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; transfers of incorporeal assets or of fixed assets that have been used for four years or more are not subject to transfer taxes	13
Real property transfer tax; tax imposed on value of real property with respect to the amount that exceeds SVC250,000 (approximately USD28,571)	3
Customs duties	Various
Social contributions;	
Prevention system (this system provides pensions and certain other benefits); there is no salary threshold	
Employer	8.75
Employee	7.25
Social security; on salaries up to SVC8,750 (USD1,000)	
Employer	
Maternity, sickness and professional risks	7.5
Professional training	1
Employee	
Maternity, sickness and professional risks	3

E. Foreign-exchange controls

The currencies in El Salvador are the colon (SVC) and the US dollar. Since 2001, all transactions and operations in El Salvador can be carried out and denominated in colons or US dollars. The permanent exchange rate in El Salvador is SVC8.75 = USD1. Since 2021, bitcoin is also considered a legal tender in El Salvador.

No restrictions are imposed on foreign-trade operations or foreign-currency transactions.

F. Tax treaties

El Salvador's only tax treaty in force is with Spain. The treaty is based on the Organisation for Economic Co-operation and Development model, with some minor differences.

In Spain, the treaty applies to income tax on individuals, income tax on corporations, income tax for nonresidents, net worth tax, and local income tax and net worth tax. In El Salvador, the treaty applies to income tax.

For dividends, interest and royalties paid by companies domiciled in one signatory country to residents of the other signatory country, the treaty provides for maximum tax rates in the source country of 12% for dividends and 10% for interest and royalties. If certain conditions are met, the tax rate for dividends may be reduced to 0%. The treaty also provides for a maximum rate of 10% in the source country for services, unless the individual or company that accounts for the income has a permanent establishment in the country in which the services are rendered.

A. At a glance

Corporate Income Tax Rate (%)	35 (a)
Capital Gains Tax Rate (%)	35 (b)
Branch Tax Rate (%)	35
Withholding Tax (%)	
Dividends	25 (c)
Interest	25 (c)
Royalties from Patents, Know-how, etc.	20
Payments for Oil and Gas Services	5/6.25/15 (d)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	3/5 (e)

(a) The minimum corporate tax is 1.5% of turnover. See Section B for details.
(b) In certain circumstances, the tax is deferred or reduced (see Section B).
(c) This tax is imposed on payments to nonresidents. For the withholding tax rates applicable to residents, see Section B.
(d) This tax applies to payments for services performed by subcontractors of oil and gas companies. The 6.25% rate applies to residents. The 15% rate applies to nonresident companies and nonresident individuals. The 5% rate applies to transportation, mobilization services (bringing a rig or vessel into Equatorial Guinea [EG]) and demobilization services (sending a rig or vessel out of EG) performed by nonresidents in EG.
(e) In general, companies may carry forward net operating losses for three years. However, companies operating in the hydrocarbon sector may carry forward net operating losses for five years.

B. Taxes on corporate income and gains

Corporate income tax. Equatorial Guinea (EG) companies are taxed on the territorial principle. As a result, EG companies carrying on business outside EG are not subject to corporate income tax in EG on the related profits. EG companies are those registered in EG, regardless of the nationality of the shareholders or where the companies are managed and controlled. Foreign

companies engaged in business in EG are subject to corporate income tax on EG-source profits.

Tax rate. The corporate income tax rate is 35%.

The minimum corporate tax is 1.5% of annual turnover for the preceding year. The amount of this tax cannot be less than XAF800,000 (for further details regarding this tax, see *Administration*).

The 2019 Finance Law deleted Article 461.3 of the Income Tax Law. This article was related to the crediting of withholding tax against the final corporate income tax liability. Withholding taxes should be considered current expenses for the year and deducted as such.

Capital gains. Capital gains are taxed at the regular corporate income tax rate. However, the tax can be deferred if all of the proceeds are used to acquire new fixed assets in EG within three years or in the event of a merger. If the business is totally or partially transferred or discontinued, only one-half of the net capital gains is taxed if the event occurs less than five years after the startup or purchase of the business, and only one-third of the gains is taxed if the event occurs five years or more after the business is begun or purchased.

Administration. The tax year is the calendar year. Tax returns must be filed by 30 April. The minimum corporate tax must be declared and paid by 31 March of each year. The minimum corporate tax may be set off against the regular income tax payable for the same tax year.

Late payments and late filings of tax returns are subject to penalties. For the minimum corporate tax, the penalty equals 50% of the amount of the tax. For corporate income tax, the following are the penalties:

- XAF200,000 per month of delay for the filing of the return. However, the total amount of the penalty cannot exceed 75% of the tax owed.
- 50% of the amount not declared if the return has a shortfall that exceeds 1/10 of the declared profit. The penalty is increased to 100% in case of bad faith.

Dividends. Dividends paid to nonresidents are subject to a 25% withholding tax.

The following withholding tax rates apply to dividends received by residents:

- Physical persons: application of the progressive scale in accordance with the provision of Article 252 that may be reduced by issuing a global income return provided under Articles 240 and 241 of the General Tax Code
- Resident legal entities: 10%

However, a parent company may exclude up to 90% of the dividends received from a 25%-owned subsidiary.

Foreign tax relief. EG does not provide relief for foreign taxes paid.

C. Determination of trading income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the general accounting chart of the Organization for Harmonization of Business Law in Africa (Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA).

Business expenses are generally deductible unless specifically excluded by law. The following expenses are deductible only if they are normal and substantiated:

- Head office overhead and remuneration for certain services (studies and technical, financial or administrative assistance) paid to nonresidents
- Royalties from patents, brands, models or designs paid to a non-Economic and Monetary Community of Central Africa (Communauté Économique et Monétaire de l'Afrique Centrale, or CEMAC) corporation participating in the management of, or owning shares in, the EG corporation

The following expenses are not deductible:

- Rent expense for movable equipment paid to a shareholder holding, directly or indirectly, more than 10% of the capital
- A portion of interest paid to a shareholder in excess of the central bank annual rate and, if the shareholder is in charge of management, on the portion of the loan exceeding one-half of the capital stock
- Commissions and brokerage fees exceeding 5% of purchased imports
- Certain specific charges, penalties, corporate income tax and individual income tax
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director), gifts and subsidies

Inventories. Inventories are normally valued at cost. Cost must be determined under a weighted average cost price method.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Capital allowances. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by the tax law. The following are the straight-line depreciation rates for major categories of assets.

Asset	Rate (%)
Buildings	5 to 20
Plant and machinery, and transportation equipment	5 to 100
Office equipment	10 to 15

Relief for losses. In general, companies may carry forward net operating losses for three years. However, companies operating in the hydrocarbon sector may carry forward net operating losses for five years. Losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. EG law does not allow the filing of consolidated tax returns or provide any other form of tax relief for groups of companies. However, the OHADA Uniform Act on Accounting Law contains the principle of consolidated financial statements.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on transactions performed in EG that are not subject to the oil and gas sector withholding tax (see Section A)	
General rate	15
Reduced rate	6
Specified products	0
Social security contributions; imposed on salaries; paid by	
Employer	21.5
Employee	4.5
Worker Protection Fund and Professional Training Fund; imposed on salaries; paid by	
Employer (on gross salary)	1
Employee (on net salary)	0.5

E. Foreign-exchange controls

The EG currency is the CFA franc BEAC (XAF).

Exchange-control regulations exist in EG for financial transfers in the franc zone which is the monetary zone including France and its former overseas colonies. The Council of Ministers of the Economic Union of Central Africa (Union Économique de l'Afrique Centrale, or UEAC) continued its process of revising Community texts with the adoption on 21 December 2018 of Regulation No. 02/18/ECMAC/UMAC/CM on the regulation of exchange controls in the CEMAC. This regulation, which entered into force on 1 March 2019, repeals the regulations adopted in 2000.

On 23 December 2021, there was also the adoption of Regulation No. 01/CEMAC/UMAC/CM on the terms and conditions for the implementation of certain provisions of the exchange regulations by resident extractive companies.

In the franc zone, transactions above XAF1 million per month and per entity remain free subject to the providing of evidence of the origin of the funds and the issuance of documentation required by authorized intermediaries (that is, credit institutions such as banks). In addition, the opening of a bank account in foreign currencies inside and outside the CEMAC zone is now subject to an

authorization from the Bank of Central African States (Banque des Etats d'Afrique Centrale, or BEAC).

Any transaction related to exports of goods and services must be declared to the competent authorities and transactions exceeding XAF5 million must be done in a CEMAC credit institution.

F. Tax treaties

EG has entered into the tax treaty of the former Central African Economic and Customs Union (Union Douanière et Économique de l'Afrique Centrale, or UDEAC).

The tax law in Estonia has been frequently amended, and further changes are likely to be introduced. Because of these frequent changes, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Tax Rate (%)	0/14/20 (a)
Capital Gains Tax Rate (%)	0/14/20 (b)
Branch Tax Rate (%)	14/20 (a)
Withholding Tax (%) (d)	
Dividends	0/7 (c)
Interest	0/20 (d)

Royalties	0/10/20 (e)
Rental Payments	20 (f)
Services	0/10/20 (g)
Salaries and Wages	20

(a) Resident companies and permanent establishments of nonresident companies are not subject to tax on their income. They are subject only to tax at a rate of 20% on the gross amount of distributed profits and certain payments made. The tax rate is applied to the net taxable amount divided by a specified percentage. A lower income tax rate of 14% is applied to regular dividends until the end of 2024. For further details, see Section B.

(b) Resident companies and permanent establishments of nonresident companies are not subject to tax on their capital gains received. They are subject only to tax at a rate of 14% (until the end of 2024) or 20% on the gross amount of distributed profits. Nonresident companies without a permanent establishment in Estonia are subject to tax at a rate of 20% on their capital gains derived from Estonian sources. For further details, see Section B.

(c) Withholding tax is not imposed on dividends paid to companies. Dividends are subject to 20% (or 14% in certain cases until the end of 2024) corporate income tax at the level of the resident distributing companies only. Withholding tax at a rate of 7% is imposed on certain profit distributions to individuals. For further details, see Section B.

(d) Interest payments are generally exempt from withholding tax. Withholding tax at a rate of 20% is imposed on interest paid to resident individuals (including payments made by contractual investment funds on the account of the funds). Interest paid to nonresidents as a result of ownership of contractual investment funds is subject to a 20% withholding tax if more than 50% of the assets owned (directly or indirectly) by the fund during a two-year period preceding the date of the interest payment is real estate located in Estonia and if the interest recipient has at least 10% ownership in the contractual investment fund at the moment of receiving the interest. Withholding tax is not imposed on interest paid from the profits of contractual investment funds if the profits have already been taxed.

(e) Withholding tax at a rate of 10% is imposed on payments to nonresident individuals and companies. Royalties paid to companies resident in other EU countries or Switzerland are not subject to withholding tax if the provisions of the EU Interest-Royalty Directive are satisfied. A 20% withholding tax is imposed on payments to resident individuals.

(f) Withholding tax at a rate of 20% is imposed on payments to resident individuals and nonresidents.

(g) The 20% rate applies to payments to nonresidents from low-tax jurisdictions (a low-tax jurisdiction is a jurisdiction that does not impose a tax on profits or distributions or a jurisdiction in which such tax would be less than ⅕ of the Estonian tax payable by resident individuals on a similar amount of business income). The 10% rate applies to payments to other nonresidents for services rendered in Estonia. A 0% rate may apply under double tax treaties.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies (except for limited partnership funds) and permanent establishments of nonresidents are not generally subject to tax on their income (see below an exception in the case of exceeding borrowing costs and controlled foreign company [CFC] income). They are subject to tax on the following payments made to resident legal entities, nonresident companies, resident individuals and nonresident individuals:

- Dividends
- Fringe benefits
- Gifts
- Donations
- Business entertainment expenses
- Distributions of profits
- Payments not related to the business of the payer

Credit institutions pay advance corporate income tax at rate of 14% on accrued profits on a quarterly basis.

Income tax is charged annually on exceeding cash-based borrowing costs of resident companies and permanent establishments of nonresidents (except for financial institutions) to the extent they exceed losses if such costs amount to at least EUR3 million and if they exceed 30% of the company's earnings before interest, tax, depreciation and amortization (EBITDA). Alternatively, a group level equity/total assets ratio or a group EBITDA test may be applied.

Income tax is charged annually on resident companies and permanent establishments of nonresidents' income from controlled foreign companies (CFCs) if the income was derived from ostensible transactions of which the main purpose was to obtain a tax advantage using assets and taking risks related to controlling company key employees. The rule does not apply to resident companies if the CFC financial year profit does not exceed EUR750,000 and other business income does not exceed EUR75,000.

The exceeding borrowing cost and taxable CFC income must be reported by the 10th day of the 9th month following the financial year. The tax is payable by the same deadline.

Resident companies are companies registered (effectively the same as incorporated) in Estonia. European public limited liability companies and European Cooperative Societies that have their registered office in Estonia are deemed to be Estonian tax residents. Nonresident companies without a permanent establishment in Estonia are subject to tax on their business income derived from Estonia.

Tax rates. Resident companies are subject to tax on the payments described in *Corporate income tax* at a rate of 20% of the gross amount of the payments. To calculate the corporate income tax for 2019, the tax rate is applied to the net taxable amount divided by 0.8.

Until the end of 2024, a lower income tax rate of 14% is applied to regular profit distributions. A regular profit distribution is the amount of the company's last three years' average dividend that is subject to tax in Estonia. The 20% tax rate is applied to the dividend amount exceeding the regular profit distribution.

To calculate the corporate income tax on a regular dividend, the tax rate of 14% is applied to the net taxable amount divided by 0.86.

A 20% rate applies to income derived by nonresident companies without a permanent establishment in Estonia.

Tax incentive for shipping. The Tonnage Tax scheme is effective from 1 July 2020 and is available for resident shipping companies engaged in the international carriage of goods or passengers, and listed ancillary activities carried out with the eligible vessels.

Activities by tugboats and dredgers outside ports and Estonian territorial waters are eligible for the Tonnage Tax regime under certain conditions. Ship managers may also benefit from the Tonnage Tax scheme with respect to income derived from ship management activities.

Capital gains. Capital gains derived by resident companies and permanent establishments of nonresident companies are exempt from tax until they are distributed.

Nonresident companies without a permanent establishment in Estonia are taxed at a rate of 20% on their capital gains derived from Estonian sources.

Capital gains derived from sales of shares and securities by nonresidents are exempt from tax. However, if the shares of a company, contractual investment fund or other pool of assets are sold by a nonresident with at least a 10% holding and if at the time of the sale or at any other time during the two preceding years, real estate and buildings directly or indirectly accounted for 50% or more of the assets of the company, capital gains derived from the sale of the shares are taxable.

If a resident company is deleted from the Estonian commercial register without liquidation and its economic activities are ended, the holding of a nonresident in the company is taxed as a capital gain, which is equal to the market value of the holding less the acquisition cost. The taxation is postponed if economic activities are continued through another resident company or a permanent establishment remains in Estonia.

Administration. The tax period is a calendar month. Tax returns must be filed and income tax must be paid by the 10th day of the following month.

Advance rulings. Taxable persons may apply for advance rulings from the tax authorities. Advance rulings may relate only to actual planned transactions, as opposed to theoretical questions. The advance ruling is binding on the tax authorities and recommended for the taxable person. The taxable person must inform the tax authorities of the execution of the transaction described in the advance ruling. A time limit for the binding nature of the ruling is set based on the taxpayer's evaluation of the time needed for the execution of the transaction.

The processing of the advance ruling may be suspended if a similar transaction is simultaneously being reviewed in challenge proceedings (administrative proceedings involving a dispute between the taxpayer and the tax authorities) or court proceedings and if the expected decision in such proceedings is crucial for the determination of the tax consequences. Advance rulings may not be issued with respect to the determination of transfer prices (determination of value of transactions between related parties).

For the advance ruling to be binding, the taxpayer must present detailed and accurate information before the beginning of the relevant transactions. If the tax laws are amended after the advance ruling has been issued but before the transaction is carried out, the advance ruling is no longer binding. The deadline for issuing an advance ruling is 60 calendar days beginning with the date of acceptance of the application. By a motivated decision (a decision that includes arguments supporting the decision) in writing, the deadline may be extended for an additional 30 calendar days. A state fee is payable for the processing of the advance-ruling application.

A summary of the ruling, except for information protected by the tax secrecy clause (the tax authorities are bound to maintain the confidentiality of information concerning a taxpayer that was acquired in the course of their activities; certain exceptions apply), is published on the tax authorities' web page. The taxable person may prohibit the disclosure of specific information.

Reporting of intragroup loans. Resident companies and the permanent establishments of nonresidents (except public limited funds and credit institutions) are required to report the following information on loans granted to other group companies:
- Amount of the loan
- Increase in principal balance
- Extension of term or change of other material terms

The reporting must be done on a quarterly basis.

Dividends. Withholding tax is not generally imposed on dividends paid. A 7% withholding tax is imposed on dividends paid to individuals if the corporate income tax of 14% has been paid by an Estonian company on the share of profits out of which the dividends are paid. Payers of dividends must pay corporate income tax at a rate of 20% or 14% on the gross amount of dividends paid. This income tax is treated as a payment of income tax by the distributing company and not as tax withheld from the recipient of the dividends.

Dividends received are not included in taxable income (see *Foreign tax relief*).

The following payments are also taxable as dividends at the level of the company:
- Decrease of share capital (if the decrease exceeds paid-in equity capital)
- Redemption of shares and the payment of liquidation proceeds in an amount that exceeds the monetary and non-monetary payments made into the equity capital

Interest. Interest payments are generally exempt from withholding tax. Withholding tax at a rate of 20% is imposed on interest paid to resident individuals (including payments made by contractual investment funds on the account of the funds). Interest paid to nonresidents as a result of ownership of contractual investment funds is subject to a 20% withholding tax if more than 50% of the assets owned (directly or indirectly) by the fund during a two-year period preceding the date of the interest payment is real estate located in Estonia and if the interest recipient has at least 10% ownership in the contractual investment fund at the moment of receiving the interest. Withholding tax is not imposed on interest paid from the profits of contractual investment funds if the profits have already been taxed.

Foreign tax relief. Dividends distributed by an Estonian company and a permanent establishment of a foreign company that had received dividends from a foreign company (except from a company located in a low-tax jurisdiction) are exempt from income tax if the following conditions are satisfied:
- The dividends are received from a taxable company resident in the European Economic Area (EEA) or Switzerland, or foreign

tax has been paid on or withheld from the profits out of which the dividends were paid.
- The Estonian company receiving the dividends owns at least 10% of the shares or votes of the foreign company when the dividends were received.
- The transaction or a chain of transactions is actual (a transaction or a chain of transactions is not actual if its primary purpose or one of its primary purposes is to obtain a tax advantage), and the distributing subsidiary cannot deduct the distributed profits. The tax exemption applies to the extent that a transaction or a chain of transactions is carried out for business purposes, the economic content of which is necessary and appropriate for the business activities in question.

The following profits are also exempt from tax:
- Profits allocated to a permanent establishment of an Estonian company in an EEA country or Switzerland
- Profits allocated to a permanent establishment of an Estonian company in another foreign country if foreign tax has been paid on the profits

Profits received from a permanent establishment by an Estonian resident company remain exempt if a transaction or a chain of transactions is actual (a transaction or a chain of transactions is not actual if its primary purpose or one of its primary purposes is to obtain a tax advantage).

Any foreign tax paid or withheld can be credited by an Estonian company against income tax payable on dividend distribution.

C. Determination of trading income

Because resident companies and permanent establishments of nonresident companies registered with the Estonian authorities are not subject to tax on their income, they do not need to determine their trading income for tax purposes.

Profits of Estonian contractual investment funds from immovable property are taxed immediately when profits are earned.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on goods and services, excluding exports	0/5/9/22
Social security tax	33
Mandatory funded pension contributions	2
Land tax	0.1 to 1
Unemployment insurance contributions (2022 rates); paid by	
Employer	0.8
Employee	1.6

Other significant taxes include excise duty, stamp duties, heavy vehicles tax, charges on the use of Estonian natural resources and pollution charges.

E. Miscellaneous matters

Foreign-exchange controls. The official currency in Estonia is the euro (EUR).

Enterprises registered in Estonia may maintain bank accounts abroad without any restrictions.

Debt-to-equity rules. In certain cases, exceeding borrowing costs of resident companies and permanent establishments of nonresidents are subject to corporate income tax. See *Corporate income tax* in Section B.

Anti-avoidance legislation. Under the Taxation Act, if it is evident from the content of a transaction or act that the transaction or act is performed for the purposes of tax evasion, the actual economic substance of the transaction applies for tax purposes. If a fictitious transaction is entered into in order to conceal another transaction, the provisions of the concealed transaction apply for tax purposes. Also, see *Foreign tax relief* in Section B.

Under the general anti-avoidance rule contained in the Income Tax Act, a transaction (or chain of transactions) is not considered for income tax purposes if the main purpose or one of the main purposes of the transaction is obtaining a tax advantage that is contrary to the purpose of the tax law or an international agreement and that is fictitious. A transaction (or chain of transactions) is considered to be fictitious if it is not done for actual vital or business purposes that reflect the economic substance of the transaction.

Exit tax. An exit charge at the rate of 20% is imposed on the unrealized capital gains created in Estonia arising from transferring assets to a foreign permanent establishment or moving the tax residency of the company out of Estonia. The exit tax base is calculated as the difference between the fair-market value and the book value of the respective assets. The following assets are excluded from exit tax:

- Assets in regard to the financing of securities
- Collateral assets
- Assets moved to meet prudential requirements or manage liquidity
- Assets that are reverted to Estonia within 12 months

Hybrid mismatches. The rules against hybrid mismatches cover double non-taxation caused by differences in the characterization of financial instruments, payments and entities for tax purposes in different jurisdictions, or the allocation of payments between the head office and permanent establishments. To eliminate double non-taxation or deduction without inclusion into taxable income, income tax is imposed on the relevant payment or cost, or exemption is denied for income that has been deducted or exempted in another jurisdiction. From 1 January 2024, amendments to the tax law have been implemented allowing certain hybrid mismatch situations in the case of dual inclusion income.

An Estonian tax transparent trust fund (or its manager) pays income tax on the income that would have been attributed to a

shareholder of the trust in proportion to its share in the trust if at least one of the following conditions is met:

- At least one shareholder is a nonresident affiliated undertaking that directly or indirectly owns at least 50% of the shares in a trust.
- The shareholder is located in a jurisdiction that treats the trust as a taxable person and the income of the shareholder is not taxable according to tax legislation of Estonia or other jurisdictions.

Retroactively from 1 January 2023, the exemption from the reverse hybrid mismatch rule was introduced for a collective-investment vehicle.

Transfer pricing. Under a transfer-pricing measure in the income tax law, pricing between resident and nonresident associated companies should be at arm's length. The tax authorities may adjust to an arm's-length amount the profit of a company engaging in transactions with nonresident associated persons. Persons are considered associated if they have a common economic interest or if one person has a prevalent influence over another person. The transfer-pricing measure also covers transactions between nonresident legal entities and their permanent establishments in Estonia. Transfer-pricing documentation is required for the following entities:

- Entities with more than 250 employees (together with related parties)
- Entities operating in certain industries
- Entities that had turnover, including the turnover of related parties, of at least EUR50 million in the preceding financial year
- Entities that had consolidated net assets of at least EUR43 million in the preceding financial year
- Parties to a transaction if one of the parties is a resident of a low-tax jurisdiction

Country-by-Country Reporting. Estonia has implemented legislation requiring the parent undertakings of multinational enterprises (MNEs) with a consolidated turnover of at least EUR750 million to submit to the tax authorities' annual groupwide reports for each entity and jurisdiction in which the MNE group operates (Country-by-Country Reporting). The report is due on 31 December of the year following the end of the financial year. Notification about the MNE group and the reporting entity is required to be submitted within six months after the end of a financial year.

Interest on tax arrears. The tax authorities suspended the calculation of default interest on tax arrears for the COVID-19-related emergency period with retroactive effect from 1 March 2020 until the end of the emergency period on 17 May 2020. After the emergency period, the default interest rate was lowered from the usual 0.06% per day to 0.03% per day until 31 December 2021. From 1 January 2022, the interest is calculated again at a rate of 0.06% per day.

Mandatory Disclosure Regime. Automatic exchange of information on cross-border schemes imposes an obligation on tax advisors and taxpayers to inform the tax authorities of cross-border

tax planning schemes. The Mandatory Disclosure Regime (MDR) applies to all types of direct taxes.

The disclosure must include details of relevant taxpayers, their associated parties (as defined) and the cross-border arrangement in question.

Reportable schemes with the main benefit, or one of the main benefits, of obtaining a tax advantage are the same as provided by the European Union (EU) Directive on Administrative Cooperation 6 (DAC6) and include the following:

- Confidentiality clause
- Success fee
- Standardized documentation or structure
- Acquired loss-making company and losses used outside the business of the acquired company
- Income converted into capital and categories of revenue with a more beneficial tax treatment
- Round tripping of funds using conduits and entities without substance
- Deductible cross-border payments to associated enterprises subject (when received) to a zero or almost zero tax rate, a full tax exemption or a preferential tax regime

Reportable schemes with the main benefit, or one of the main benefits, of not obtaining a tax advantage include the following:

- Payment to an associated stateless enterprise or associated enterprise in a prohibited list jurisdiction
- Same asset subject to depreciation in more than one jurisdiction
- Multiple claims of relief for double taxation
- Transfer of assets with a material difference in the price used for tax purposes
- EU legislation or any equivalent agreements on the automatic exchange of financial account information circumvented
- Nontransparent legal or beneficial ownership chains used
- Unilateral transfer pricing safe harbor rules used
- Transfer of rights to hard-to-value intangibles
- Restructuring resulting in significant profit shifts (50%) following the transfer of functions, risks or assets between associated enterprises

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under Estonian domestic law.

(a) Dividends paid to corporations are not subject to withholding tax under Estonian domestic law.

(b) Interest is not subject to withholding tax under Estonian domestic law except for interest paid in certain circumstances to nonresidents as a result of ownership in foreign contractual investment funds (see Section B).
(c) Royalties paid to a company resident in another EU country or Switzerland are not subject to withholding tax if the provisions of the EU Interest-Royalty Directive are satisfied.
(d) The lower rate applies to royalties paid for the use of industrial, commercial or scientific equipment.
(e) The lower rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, but excluding software payments.
(f) The 20% rate applies to rental payments to nonresidents. The 10% rate applies to royalties, including royalties paid for the use of industrial, commercial or scientific equipment.
(g) Withholding tax at a rate of 7% is imposed on certain profit distribution to individuals (for further details, see Section B). This withholding tax rate is reduced to 5% (Bulgaria, Israel and North Macedonia) and to 0% (Bahrain, Isle of Man, Jersey, Mexico and the United Arab Emirates).
(h) The lower rate applies to royalties paid for technical services; that is, for managerial, technical or consultancy services, including the provision of services by technical or other personnel.

A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	10
Branch Tax Rate (%)	25
Withholding Tax (%)	
Dividends	0 (a)
Interest	10
Royalties from Patents, Know-how, etc.	15
Net Operating Losses (Years)	
Carryback	0
Carryforward	8 (b)

(a) Effective from 1 August 2017, all dividends distributed are exempt from income tax.
(b) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to income tax on worldwide assessable income. Nonresident companies carrying on business through a branch pay tax only on Fiji-source income. A resident company is a company incorporated in Fiji. A company not incorporated in Fiji is considered a resident company if it carries on business in Fiji and has either its central management or control in Fiji or its voting power controlled by shareholders who are residents of Fiji.

Tax rates. In general, resident companies and branches of nonresident companies are subject to tax at a rate of 25%. Companies that are listed on the South Pacific Stock Exchange and have a resident shareholding of at least 40% are subject to tax at a rate of 15%. Effective 1 August 2022, companies that have been listed for seven years and more pay a 25% corporate tax on income earned from the 2023 tax year. Foreign companies that establish their headquarters in Fiji or relocate their headquarters to Fiji are subject to tax at a rate of 17%.

Tax holidays are available to various enterprises and for various activities, including qualifying hotel projects, companies granted a tax-free regions license, qualifying information communications technology operators, approved activities in commercial agricultural farming and agro-processing, approved activities with respect to processing agricultural commodities into biofuels, approved activities in renewable energy projects and power cogeneration, medical services, residential housing development and audiovisual activities.

Capital gains. The rate of the capital gains tax (CGT) is 10%. Effective from 1 January 2016, the CGT is administered through the Income Tax Act 2015. Before that date, CGT was administered through the Capital Gains Tax Decree 2011. Before 1 August 2020, CGT applied only to non-depreciable capital assets, while gains on depreciable capital assets were subject to income tax at a rate of 20%.

Administration. The Fiji tax year is the calendar year. However, for most companies, an alternative fiscal year is normally allowed. Tax for any fiscal year is payable in three installments according to the following schedule:

- 33.3% of the preceding year's tax liability by the end of the sixth month
- Another 33.3% of the preceding year's liability by the end of the ninth month
- Another 33.4% of the preceding year's liability on or before the balance date

Companies are required to file tax returns within three months after the fiscal year-end, but extensions of an additional two, four or six months are granted to tax agents, depending on the level of taxable income.

Dividends. Effective from 1 August 2017, all dividends distributed are exempt from income tax.

Foreign tax relief. Income derived by Fiji residents from treaty countries is subject to Fiji income tax, but credit is given for taxes paid, up to the amount of Fiji tax applicable on the same income.

Income derived from non-treaty countries is exempt to the extent that it was subject to income tax in such countries.

C. Determination of trading income

General. Income is defined as the aggregate of all sources of income, including annual net profit from a trade, commercial, financial or other business.

Expenses are deductible to the extent incurred in producing taxable income. Expenditures of a personal or capital nature are generally not deductible. Deductions are allowable for certain expenditures incurred in the agricultural and mining industries. Experimentation and research and development expenses incurred in projects connected with the taxpayer's business are deductible.

Inventories. Fiji does not have any specific measures for stock valuation for the purposes of year-end income determination. Valuations are generally made at cost or market value on a

first-in, first-out (FIFO) or actual basis. The tax authorities have discretion to make adjustments if inventories are sold or otherwise disposed of at below market value.

Provisions. Provisions are not deductible until payments are made or, in the case of doubtful trading debts, until the debts are considered totally irrecoverable and have been written off.

Tax depreciation. The following are some of the annual depreciation rates prescribed by law for 2016 and future years.

	Rate	
Asset	Straight line (%)	Diminishing value (%)
Commercial and industrial buildings	1.25 to 7	–
Office equipment	12.5	20
Heavy commercial motor vehicles	25	40
Passenger motor vehicles	20	30
Plant and machinery	12.5	20

Tax depreciation is subject to recapture on the sale of an asset, to the extent the sales proceeds exceed the tax value after depreciation. The amount recaptured may be set off against the cost of a replacement asset; otherwise, it is taxed as ordinary income in the year of sale. In addition, a capital gain on the sale of a capital asset is subject to CGT.

Relief for losses. Tax losses incurred in 2019 and future years may be carried forward for eight years.

Prior to 2019, tax losses may be carried forward for four years. Losses incurred as a result of claiming the standard allowance are available for carryforward for a period of eight years. The standard allowance is one of the hotel incentives. It allows a hotel owner a 25% deduction with respect to capital expenditure on construction, renovation or refurbishment of a hotel.

Losses are not available for carryforward if the taxpayer's business in the year in which relief is claimed is substantially different from its business in the year in which the loss was incurred.

Groups of companies. No group relief measures exist.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on virtually all goods and services and residential rent, if annual gross turnover exceeds FJD100,000; financial services (except insurance services) and gambling are exempt	15
Environmental levy; imposed on prescribed services subject to the service turnover tax (the 0% rate is effective from 1 April 2022; the prior rate was 6%)	0
Fringe benefit tax	20

Nature of tax	Rate (%)
Social security contributions to the national provident fund, paid by	
Employer	10
Employee (maximum rate)	8

E. Miscellaneous matters

Foreign-exchange controls. Most remittances abroad require approval from the Reserve Bank of Fiji. Depending on the level of the country's foreign-exchange reserve, further restrictions may be imposed on the nature, timing and amount of remittances that can be made.

Debt-to-equity ratios. An entity may have offshore borrowings up to FJD5 million per year without the prior approval of the Reserve Bank of Fiji. Foreign-owned companies may borrow locally any amount if a total debt-to-equity ratio of 3:1 is maintained. The total debt consists of local and offshore borrowings. Equity includes paid-up capital, shareholders' non-interest-bearing loans, retained earnings and subordinated interest-bearing loans.

Anti-avoidance legislation. Contracts, agreements or arrangements entered into that have the effect of altering the incidence of any tax may be rendered void by the tax authorities. Effective from 1 August 2020, the Income Tax Act allows for a restructuring provided that the parties are associates directly or through an interposed person.

A. At a glance

Corporate Income Tax Rate (%)	20
Capital Gains Tax Rate (%)	20 (a)
Branch Tax Rate (%)	20
Withholding Tax (%) (b)	
Dividends	0/15/20/30/35 (c)(d)
Interest	0/20/30 (c)(e)
Royalties	0/20/30 (c)(f)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10 (g)

(a) See Section B.

(b) The withholding taxes generally apply only to payments to nonresidents. The rates may be reduced by tax treaties.

(c) The 20% withholding tax rate applies if the nonresident recipient qualifies as a corporation for Finnish tax purposes. The 30% withholding tax rate applies if the nonresident recipient does not qualify as a corporation for Finnish tax purposes. The 35% withholding tax rate applies to a dividend distributed on nominee-registered shares of a Finnish publicly listed company if the recipient is not identified prior to the payment or if the dividend beneficiary has not agreed to disclose its information to the Finnish tax authorities.

(d) No withholding tax is imposed on dividends paid to a parent company resident in another European Union (EU) country if the recipient of the dividends satisfies the following conditions:
- It holds directly at least 10% of the capital of the payer.
- The recipient of the dividend is a company qualifying under Article 2 of the EU Parent-Subsidiary Directive.
- The recipient qualifies as the beneficial owner of the income item.

Companies resident in EU or European Economic Area (EEA) Member States are generally eligible for the tax exemption for dividends under the same conditions as comparable Finnish companies if the Finnish withholding taxes cannot be credited in the company's state of residence and if sufficient exchange of information may take place between Finland and the state of residence of the recipient. Dividends paid to a company resident in an EU/EEA Member State are subject to withholding tax at a rate of 15% if the shares constitute investment assets of the recipient company and the recipient owns less than 10% of the Finnish company.

(e) Interest paid to nonresidents is generally exempt from tax unless the loan may be deemed comparable to an equity investment. In general, interest paid to resident individuals is subject to a final withholding tax of 30% if it is paid on bonds, debentures and bank deposits.

(f) No withholding tax is imposed on royalties paid to nonresidents if all of the following conditions are satisfied:
- The beneficial owner of the royalties is a company resident in another EU country or a permanent establishment located in another EU country of a company resident in an EU country.
- The recipient is subject to income tax in its home country.
- The company paying the royalties, or the company whose permanent establishment is deemed to be the payer, is an associated company of the company receiving the royalties, or of the company whose permanent establishment is deemed to be the recipient.

A company is an associated company of another company if any of the following apply:
- The first company has a direct minimum holding of 25% in the capital of the second company.
- The second company has a direct minimum holding of 25% in the capital of the first company.
- A third company has a direct minimum holding of 25% in both the capital of the first company and the capital of the second company.

Royalties paid to resident individuals are normally subject to salary withholding.

(g) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in Finland are taxed on their worldwide income. Nonresident companies are taxed only on their Finnish-source income or income attributable to a Finnish permanent establishment. Resident companies are generally those incorporated in Finland or those having an effective place of management in Finland.

Tax residency based on effective place of management. Effective for tax assessments for the 2021 fiscal year and onward, a corporation established or registered abroad is subject to unlimited tax liability in Finland if the company's place of effective management is in Finland. The place of effective management is the place where the corporation's board of directors or other decision-making body makes the highest-level decisions concerning daily management of the corporation. Also, other circumstances related to the organization and business of the corporation are taken into account when determining the location of the place of effective management.

Rate of corporate income tax. The corporate income tax rate is 20%.

Capital gains. Gains derived by companies from the disposal of business assets are treated as ordinary business income. Gains derived from the disposal of machinery and equipment are deducted from the remaining book value of similar assets, which are pooled for tax purposes, reducing the depreciable basis of the remaining asset pool. Gains derived from the disposal of buildings are calculated separately for each building by deducting the remaining acquisition cost from the sales price.

Gains derived by corporate entities, other than companies engaged in private equity investment activities, from the sale of shares are exempt from tax if all of the following conditions are satisfied:

- The shares are part of the seller's fixed assets.
- The seller has owned at least 10% of the shares in the company, including the shares sold, for an uninterrupted period of at least one year.
- The shares sold are shares in either a Finnish company, a company as defined in Article 2 of the EU Parent-Subsidiary Directive or a company resident in a country with which Finland has entered into a tax treaty that applies to dividends distributed by the company whose shares are sold.
- The shares are not shares in a real estate company or a company de facto engaged in the holding or administering of real estate.

Even if the above conditions are satisfied, a sale of shares under certain circumstances may result in the generation of taxable income. If the acquisition cost of the shares has at any time been depreciated on the grounds that the fair market value of the shares has declined or if a reserve has been deducted, this part of the consideration received (that is, the deducted depreciation or reserve) is taxable income. The same principle applies if the shares have at any time been the subject of a transaction between related companies and if this transaction resulted in a tax-deductible loss. Under these circumstances, the consideration received for the

shares is taxable up to the amount of the earlier tax-deductible loss.

A loss incurred on the sale of shares is not tax-deductible if a gain on the sale of such shares would have been exempt from tax. If the abovementioned requirements of tax exemption are not fulfilled, a loss from sale of shares that are part of seller's fixed assets is deductible from profit resulting from the sale of such shares during the five years following the loss-making year.

The participation exemption rules concerning capital gains, which are described above, do not apply to shares owned by private equity investors. For private equity investors, capital gains derived from the sale of shares are taxable income and capital losses incurred on shares are tax-deductible.

The rules concerning determination of Finnish-source income with respect to indirect disposals of Finnish immovable property were changed from 1 March 2023 onward. Under the amended rules, capital gains derived on the disposal of shares, partnership interests or rights in a corporation, partnership or a pool of assets administered on behalf of another person are considered to be Finnish-source income if, as of the disposal date or at any time during the 365 days preceding the disposal, more than 50% of the total assets of the corporation, partnership or pool of assets consist either directly or indirectly of immovable property (as defined) situated in Finland and if the disposal does not cover disposal of shares in a publicly traded company or similar entity. Under the prior rules, only gains on disposals of immovable property located in Finland or shares in Finnish companies that directly held real estate assets in Finland were considered to be Finnish-source income.

Administration. Companies must file the corporate income tax return within four months after the end of their accounting period. Tax return filing must be completed electronically. Nonresident companies carrying out business activities in Finland without triggering a permanent establishment should also file a tax return with a report on its activities carried out in Finland.

Corporate income tax is prepaid in installments during the accounting period, and additional advance taxes may be applied for and paid without accruing interest during the first month following the end of the financial year. After the tax return is filed and processed by the tax authorities, a final settlement or refund is made. The tax assessment is completed within 10 months after the end of the accounting period.

The tax authorities may generally adjust the tax assessment within three years from the beginning of the calendar year following the end of the fiscal year. Under extraordinary circumstances, these time limits may be extended. The statute is six years in certain specific situations (for example, transfer-pricing matters or intragroup financing or restructuring). The 2021 fiscal year is open for adjustment until the end of December 2024 unless a specific statute of limitations applies.

A tax penalty of up to 10% of the adjusted amount of taxable income may be imposed on a corporation and, in certain special cases, the penalty may be up to 50% of the amount of adjusted

tax. A penalty charge can be added even though the adjustment does not result in additional income taxes (a change in the taxable income amount is sufficient). Also, interest is charged on the additional tax (but not on the penalties) at a specified rate (7% for 2023 and 11% for 2024). Neither the penalty nor the interest is deductible when calculating taxable income.

Dividends. A dividend received by a Finnish corporate entity from a company resident in Finland or from a "company," as defined in Article 2 of the EU Parent-Subsidiary Directive, is usually exempt from tax. The exemption also applies to dividends received from any other company resident in another EU/EEA country if the company paying the dividends is liable to pay income tax of at least 10%. If a Finnish corporate entity receives a dividend from a company resident in a non-EU/EEA country, the dividend is usually fully (100%) taxable.

The dividend is also fully taxable if the company paying the dividend can deduct the dividend in its tax calculation.

By exception, a dividend received by an unlisted Finnish corporate entity from a listed company is fully (100%) taxable, unless the listed company is resident in Finland or in an EU/EEA country and the recipient owns at least 10% of the shares in the distributing company.

Distribution of funds from invested unrestricted equity capital. The return of invested unrestricted equity to shareholders in listed companies is taxed as dividend income. The return of the invested unrestricted equity from an unlisted company may be treated as a repayment of capital if the recipient can show that the recipient has made an investment to the company and that the invested capital is returned within 10 years from the time the investment was made.

Foreign tax relief. If no tax treaty is in force, domestic law provides relief for foreign tax paid. The credit is granted if the recipient Finnish corporation pays corporate income tax on qualifying foreign-source income in the same year. If the Finnish company does not have any corporate income tax liability that year, no credit is granted. Foreign tax credits may be carried forward five years under certain conditions. Foreign tax credits may not be carried back.

Under tax treaties, foreign tax is most frequently relieved by a tax credit.

C. Determination of trading income

General. Taxable income is closely tied to the income in the statutory accounts. Most of the deductions must be booked in the statutory accounts to be deductible for tax purposes. As stated in the tax law, the definitions of both income and expenses are general and broad.

In general, expenses are deductible if they are incurred for the purpose of generating or maintaining taxable income. Fifty percent of entertainment expenses is deductible for tax purposes. Expenses incurred to obtain tax-exempt income, as well as income taxes and penalties, are not deductible.

Inventories. Inventories are valued at the lowest of cost, replacement cost or market value on a first-in, first-out (FIFO) basis. Companies may allocate fixed manufacturing overhead to the cost of inventory for accounting and tax purposes if certain conditions are met. Obsolete inventories should be provided for or discarded.

Provisions. In general, the possibility of establishing provisions or reserves for tax purposes is relatively limited. Deductions of warranty reserves and provisions for doubtful debts are limited to the amount of actual expected costs. These provisions are only available for certain types of taxpayers under certain conditions.

Tax depreciation. The Business Tax Act provides detailed rules for the depreciation of different types of assets. The depreciable base is the acquisition cost, which includes related levies, taxes and installation costs. The depreciation expense for tax purposes is not permitted to exceed the cumulative depreciation expense reported in the annual financial statements in the current year or in previous years. Plant machinery, equipment and buildings are generally depreciated by using the declining-balance method.

Machinery and equipment are combined into a pool for depreciation purposes. Companies may vary the annual depreciation in this pool from 0% to 25%. All machinery and equipment with a life of more than three years are classified as depreciable assets. The depreciable basis is decreased by proceeds from sales of assets in the pool. If the sales price exceeds the depreciable basis, the excess is added to taxable income. If it can be proven that the remaining balance of all machinery and equipment is higher than the fair market value as a result of injury, damage or a similar circumstance, additional depreciation may be claimed for the balance of the machinery under specific conditions.

Equipment with a short life (up to three years), such as tools, is usually expensed. Equipment with an acquisition price of less than EUR1,200 may also be expensed, with a maximum deduction of EUR3,600.

The maximum depreciation rates for buildings vary from 4% to 20%. The depreciation percentage depends on the use of the building. The depreciation rate for factories, warehouses, shops and similar buildings is 7%.

Intangible assets, such as patents and goodwill, are depreciated using the straight-line method over 10 years, unless the taxpayer demonstrates that the asset's useful life is less than 10 years.

The rules concerning the depreciation of machinery and equipment and similar movable fixed assets for the 2020 to 2023 tax years were temporarily amended. Under the new rules, during the 2020 to 2023 tax years, a taxpayer carrying out business activities may annually book for tax purposes depreciation up to 50% on machinery and equipment instead of the general 25%. The assets should be used in the taxpayer's business and should be included in the taxpayer's pool of movable fixed assets for tax purposes. In addition, it is required that the machinery or equipment be taken into use on 1 January 2020 at the earliest and that the acquired machinery or equipment must be new; that is, it cannot be used. At the end of 2022, the rules were extended to

apply also to the 2024 and 2025 fiscal years (that is, new assets taken into use during these fiscal years).

Additional research and development deduction. New rules concerning an additional tax deduction for expenses related to research and development (R&D) entered into force on 1 January 2021 and apply for the 2021 through 2025 fiscal years. The applicability of the rules was extended at the end of 2021 so that the rules now apply for the 2021 through 2027 fiscal years. A taxpayer may apply the additional deduction for R&D activities related to its business. The deduction is based on subcontracting invoices from a research organization operating in the EEA that meets certain requirements. The amount of the additional deduction is 50% of approved R&D expenses invoiced by the research organization. Effective for the tax assessment for the 2022 fiscal year and onward, the amount of the additional deduction is 150% of approved R&D expenses invoiced by the research organization. The maximum amount of the additional deduction is EUR500,000 per fiscal year, and the deduction is not granted if the deductible amount is less than EUR5,000 per fiscal year. The deduction is available also for a Finnish permanent establishment of a nonresident taxpayer.

Parallel to the above, rules concerning an additional R&D expenses related deduction entered into force on 1 January 2023. This deduction is a combination incentive with the following two elements:

- The basic element is an additional deduction (general additional deduction) based on the expenses related to the R&D activities of the taxpayer (salaries of the taxpayer's R&D personnel and expenses related to purchased R&D services).
- An additional element (supplementary additional deduction) is an additional deduction based on an increase in the amount of the R&D expenses in comparison with the previous fiscal year.

The general additional deduction is 50% of the expenditure calculated as a basis for the additional deduction. However, the amount to be deducted in a tax year should be at least EUR5,000, and the upper limit for the general additional deduction is EUR500,000 per fiscal year. The supplementary additional deduction amounts to 45%, and it is based on the increased total expenditure on salaries and purchased services in R&D activities. The basis is the difference between the items of expenditure on which the general additional deduction is based and the corresponding items of expenditure in the previous fiscal year. As with the general additional deduction, the maximum amount of the supplementary additional deduction is EUR500,000 per fiscal year. There is no lower limit for the supplementary additional deduction. The rules on the general additional deduction apply from the tax assessment for the 2023 fiscal year while the rules on the supplementary additional deduction apply from the 2024 fiscal year. The additional deductions cannot be obtained for exactly the same expenditure for which an additional deduction or other public aid has already been granted under other provisions.

Relief for losses. Losses may be carried forward for 10 years. However, a direct or indirect change in the ownership of the company involving more than 50% of the shares results in the

forfeiture of the right to set off losses against profits in future years. An indirect change occurs if more than 50% of the shares in the parent company owning at least 20% of the shares of the loss-making company are transferred and accordingly all of the shares owned by the parent company in the loss-making company are deemed to have changed ownership. An application may be made to the tax office for a special permit for reinstating the right to use the tax losses. The tax office has extensive discretion as to whether to grant the permit.

Losses may not be carried back.

Groups of companies. No consolidated treatment whereby all companies in a group may be treated as a single taxable entity exists. However, rules permit taxable income earned by companies in a qualifying corporate group to be distributed within the group through the use of group contributions, which are deductible for the paying company and taxable income for the receiving company. To qualify, both companies must be resident in Finland, and at least 90% ownership, direct or indirect, must exist for the entire tax year. Both companies must carry out business activities and be taxed under the Business Tax Act. Also, they must have the same accounting period. The taxpayer cannot create a tax loss by making group contributions.

If the local tax authorities allow tax losses to be deducted regardless of a change in ownership, these losses may generally not be covered by group contributions. However, on application, the local tax authorities may allow such tax losses to be covered by group contributions only in special circumstances.

If a corporate entity or a group of corporate entities owns at least 10% of the share capital of another company, the losses on any receivables (reduction in value) from the other company (other than sales receivables) are not tax-deductible.

With the exception of the group contributions described above, the same rule applies to all other financial assistance granted to the other company without compensation that is intended to improve the other company's financial situation.

EEA group deduction. New rules concerning group deductions in certain cross-border situations entered into force on 1 January 2021 and are applicable from the 2021 fiscal year. Under the rules, a limited liability company or a cooperative that is subject to unlimited tax liability in Finland can deduct as a group deduction a final loss of a subsidiary located in the EEA if certain preconditions are met. These preconditions include, among others, at least 90% ownership between the parent and the subsidiary. Deducting the losses of the subsidiary requires that the losses of the subsidiary be final, as defined more specifically in the relevant provisions, with the term deriving from the case law of the European Court of Justice.

The group deduction can be deducted by the parent from its taxable business income in the fiscal year in which the subsidiary's liquidation or other similar procedure has been completed. The deductible group deduction may not exceed the parent company's taxable business income; that is, deducting the group deduction

may not lead to a loss for the parent. The amount of the deduction may be subject to adjustment in certain situations.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on the sale, rental, importation or repair of goods, and on services unless specifically exempt; exempt services include financial services and insurance services	24
Transfer tax on the purchase of real estate located in Finland; calculated as a percentage of the purchase price	3
Transfer tax on the purchase of shares relating to real estate; calculated as a percentage of the purchase price or other consideration	1.5
Transfer tax on the purchase of shares in Finnish companies; calculated as percentage of the purchase price or other consideration	1.5
Social security taxes, paid by the employer as a percentage of salaries	
Health insurance premium (2024 rate)	1.16
Employment pension premium; average rate (2024)	17.34
Unemployment insurance premium, on total salaries paid by the employer (for 2024)	
Up to EUR2,337,000	0.27
Amount in excess of EUR2,337,000	1.09
Accident insurance (average rate for 2024)	0.7
Group life insurance (average rate for 2024)	0.06

E. Miscellaneous matters

Transfer pricing. The Finnish transfer-pricing regulation is based on the arm's-length principle. As a result, in general, the transfer pricing guidelines of the Organisation for Economic Co-operation and Development (OECD) apply. The tax authorities may adjust the income of a company if its taxable income is reduced as a result of related-party contractual provisions that differ from those that would be agreed to by unrelated parties.

Under Finnish transfer-pricing rules, group companies must prepare transfer-pricing documentation if specific thresholds are exceeded. The aim of the documentation is to prove the arm's-length nature of the prices used in cross-border intercompany transactions. On request of the tax authorities, the transfer-pricing documentation for a specified fiscal year must be submitted within 60 days, but not earlier than 6 months after the end of the financial year. Additional clarifications concerning the documentation must be submitted within 90 days of a request by the tax authorities.

A tax penalty of up to EUR25,000 can be imposed for a failure to comply with the transfer-pricing documentation requirements, even if the pricing of the transactions was at arm's length. The adjustment of taxable income may also result in a separate

tax penalty of up to 30% of the adjusted amount of income for tax assessment of the 2017 fiscal year and earlier years. From the tax assessment of the 2018 fiscal year and future years, a tax penalty of up to 10% of the adjusted amount of taxable income may be imposed on a corporation and, in certain special cases, the penalty may be up to 50% of the amount of adjusted tax. The adjusted amount of tax also incurs penalty interest.

Country-by-Country Reporting obligations are also implemented under Finnish domestic law, with an annual obligation to file a notification regarding the reporting group entity with the Finnish tax authorities.

The Finnish transfer-pricing adjustment provision has been amended, and the new formulation of the provision applies to tax assessments for the 2022 fiscal year and onward. The amended provision contains new separate rules that allow the delineating and disregarding of related-party transactions, which expands the scope of the earlier transfer-pricing adjustment provision.

Debt-to-equity rules. Finland does not have any specific thin-capitalization legislation. The law does not provide a specific debt-to-equity ratio, and a very limited amount of case law exists. Interest determined on an arm's-length basis on a loan obtained for business purposes is normally fully deductible. In the case of insufficient business reasons for the loan, the deductibility of the interest might be challenged through application of the general anti-avoidance provision.

Interest deduction limitation rules. The restrictions on the tax deductibility of interest do not apply if the taxpayer establishes that the ratio of its book equity to total assets in the financial statements is equal to or higher than the corresponding ratio in the consolidated financial statements of its ultimate parent company. Starting from the tax assessment for the 2022 fiscal year, when making the above equity to total assets comparison, debt on the consolidated group financial statements that has been granted by related parties, as defined under the Finnish provisions, is considered to be equity in the consolidated group financial statements for the purposes of the comparison of the ratios. Furthermore, for the tax assessment for the 2023 fiscal year and onward, the balance-sheet exemption does not apply if the amount of interest paid to certain associated parties in the consolidated group financial statements is at least 20% of all interest paid outside the group.

Under the above provisions, interest expenses are fully deductible against interest income. Any interest expenses exceeding interest income (that is, net interest expenses) may be fully deducted if the total amount of net interest expenses does not exceed EUR500,000 during the fiscal year.

If the EUR500,000 threshold is exceeded, net interest expenses may be deducted only to the extent that they do not exceed 25% of the taxable business profit (calculated under Section 3 of the Finnish Business Income Tax Act) after adding back the following:

- Interest expenses
- Tax depreciation
- Group contributions received (group contributions paid are subtracted)

Non-related-party net interest expenses are deductible up to EUR3 million, and they are deducted primarily as a part of the 25% tax earnings before interest, tax, depreciation and amortization (EBITDA) quota.

The rules described in the preceding paragraph do not apply to non-related-party interest expenses from loans (for example, bank loans) obtained before 17 June 2016. The exception does not apply to later changes of the loans that would affect the amount of the loan or the loan period.

In general, the rules do not apply to financial institutions and to insurance and pension companies. Based on the so-called infrastructure exception, the new rules also do not apply to social housing projects that have received interest subsidies.

The nondeductible amount of interest expenses may be deducted during subsequent years within the respective limitations for each tax year.

Controlled foreign companies. A foreign permanent establishment (PE) of a foreign corporation is categorized as a controlled foreign company (CFC) under the same conditions as subsidiaries if the foreign PE is located in a different state than the foreign corporation and if the income of the foreign PE is not taxed in the residence state of the foreign corporation. To determine whether a company is a CFC, the steps described below must be followed:

It first must be determined whether the company is controlled by a Finnish resident either alone or with related parties (resident or nonresident). If not, the CFC rules do not apply. Under the rules applicable from the 2019 tax assessment, a company is controlled by Finnish residents if residents of Finland for tax purposes own directly or indirectly more than 25% of the share capital or the voting shares of the company or if one or more Finnish tax residents are entitled to at least 25% of the profits or the return on capital of the company.

In addition, the foreign company's effective tax rate in its country of residence should be less than three-fifths of the Finnish corporate income tax rate (that is, less than 12%).

If both of the above conditions are fulfilled, the foreign company is considered as a CFC for Finnish tax purposes unless an exemption, as described below, applies.

Under the rules applicable from the 2019 tax assessment, a foreign company is not considered a CFC if it is genuinely established in the jurisdiction of its tax residence and if it carries out genuine economic activities in that jurisdiction. The description of genuine economic activities remains largely in line with the description earlier applicable to EEA resident entities. However, in addition to the conditions related to the genuine establishment in terms of personnel, premises and assets, companies tax resident in a jurisdiction outside the EEA fall within the scope of the exemption only if the following conditions are fulfilled:

- The company's income mostly arises from industrial production activities, other comparable production or service activities, shipping activities, or sales or marketing activities directly serving these activities, and the activities are carried out in the jurisdiction of the company's tax residence, or the company's

income mostly arises from payments made by an entity that is part of the same group, that is tax resident in the same jurisdiction and that carries out the abovementioned activities in that jurisdiction.
- There is sufficient basis for exchange of information between Finland and the jurisdiction of residence and the exchange of information with the jurisdiction is fulfilled.
- At the end of the tax year in question and at the end of the previous tax year, the jurisdiction of residence is not included in the list of noncooperative jurisdictions issued by the Council of the European Union.

Anti-avoidance legislation. Under a general anti-avoidance provision in the law, the tax authorities may look through certain transactions and apply substance over form in assessing taxes. The general anti-avoidance provision may also be applied if insufficient business reasons for a transaction are presented.

Anti-hybrid mismatch rules. Finland enacted anti-hybrid mismatch rules in connection with the implementation of the EU ATAD. The new rules restrict deductibility of payments or require inclusion of income in taxable income in certain situations in which payments have been made between associated enterprises if the payments lead to a hybrid mismatch outcome (deduction/non-inclusion or double deduction). The Finnish anti-hybrid mismatch rules are largely aligned with the rules proposed in the ATAD. The rules came into force on 1 January 2020 and are applicable for the first time in the tax assessment for the 2020 tax year.

New ATAD-based rules concerning reverse hybrid situations apply from the tax assessment for the 2022 tax year.

Mandatory disclosure regime. Finland has enacted mandatory disclosure rules in connection with the implementation of the EU Mandatory Disclosure Regime (MDR). The rules entered into force on 1 January 2020. The Finnish MDR rules are closely aligned with the EU MDR rules. Noncompliance with the reporting obligations may lead to the imposition of a tax penalty.

OECD Pillar Two. Finland has implemented the Council Directive (EU) 2022/2523 into domestic legislation in 2023 to implement the OECD Pillar Two rules. The rules entered into force on 1 January 2024 and will be applied for the first time to fiscal years commencing on or after 31 December 2023. The Finnish provisions implementing the Directive are substantially aligned with the provisions of the Directive.

F. Treaty withholding tax rates

The rates in the table below reflect the current double tax treaty rates. As a result of domestic legislation, lower rates may apply. Certain other exceptions may also apply. Please consult your local tax specialist for more information.

Interest paid to nonresidents is generally exempt from withholding tax under Finnish domestic law unless the loan may be deemed comparable to an equity investment; therefore, the table below table covers the treaty withholding tax rates for dividends and royalties only.

Non-treaty jurisdictions	20	20

(a) The lower rate applies if the recipient is a corporation owning at least 20% of the payer.
(b) The lower rate applies if the recipient is a corporation owning at least 25% of the payer.
(c) The rate is 0% for royalties received for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting.
(d) The most-favored-nation clause has led to the application of 0% withholding tax on royalties under the tax treaty.
(e) Copyright royalties for the production or reproduction of any literary, dramatic, musical or artistic work (other than motion picture films) are exempt from tax.
(f) The lower rate applies if the recipient is a company owning at least 10% of the voting power of the payer.
(g) The rate is 10% for royalties for copyrights of literary, artistic or scientific works, including films and tapes; otherwise, the rate is 15%.
(h) The 5% rate applies if the recipient is a corporation owning at least 25% and more than EUR200,000 of the capital of the payer.
(i) The rate is 0% for royalties received for the use of or the right to use any copyright of literary, artistic or scientific work, excluding cinematographic films or films and tapes for television or radio broadcasting.
(j) The 10% rate applies if the recipient has owned at least 25% of the voting rights of the payer for at least six months before the end of the payer's fiscal year. The 15% rate applies to other dividends.
(k) The lower rate applies to royalties paid for the use of computer software and for equipment leasing.
(l) The rate is 15% for royalties paid by an enterprise registered with and engaged in preferred areas of activities, for royalties for cinematographic films or tapes for television or broadcasting, and for royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work.
(m) The 0% rate applies if the recipient is a corporation owning at least 5% of the payer.
(n) The 20% rate applies if the recipient of the dividends is a corporation that owns at least 25% of the payer. The 15% rate applies to dividends paid by industrial enterprises to recipients described in the preceding sentence. Otherwise, the domestic rates of 20% or 30% apply.

(o) The 0% rate applies if the receiving company owns at least 80% of the voting power of the paying company for at least 12 months and qualifies under certain provisions of the limitation-on-benefits article of the treaty.

(p) The 5% rate applies if, at the time the dividend is payable, the recipient of the dividends owns at least 30% of the share capital of the payer and has invested in the payer foreign capital in excess of USD100,000. The 12% rate applies to other dividends.

(q) The 0% rate applies to royalties paid for copyrights of literary, artistic or scientific works. The 5% rate applies to royalties paid for the use of cinematographic films and tapes and films for television or radio broadcasting. The 15% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

(r) The 0% rate applies if the recipient of the dividends owns at least 10% of the voting rights of the payer. The 15% rate applies to other dividends.

(s) Finland is honoring the Yugoslavia treaty with respect to Bosnia and Herzegovina, Croatia, Kosovo, Montenegro and Serbia.

(t) The most-favored-nation clause has led to the application of 0% withholding tax on royalties under the tax treaty.

(u) The 0% rate applies if, at the time the dividend is payable, the recipient of the dividends owns at least 50% of the share capital of the payer and has invested in the payer foreign capital of EUR2 million or more. The 5% rate applies if the recipient of the dividends owns at least 10% of the share capital of the payer and has invested in the payer foreign capital in excess of EUR100,000. The 10% rate applies to other dividends.

(v) The rate is 10% for royalties received for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting. For other royalties, the rate is 5%.

(w) No withholding tax is imposed on dividends paid to a parent company resident in another EU country if the recipient of the dividends satisfies the following conditions:
- It holds directly at least 10% of the capital of the payer.
- The recipient of the dividend is a company in a form mentioned in the EU Parent-Subsidiary Directive.

Companies resident in EU or EEA states are generally eligible for the tax exemption for dividends under the same conditions as comparable Finnish companies if the Finnish withholding taxes cannot be credited in the company's state of residence.

(x) The 5% rate applies if the recipient is a corporation owning at least 70% of the share capital of the payer. The 10% rate applies if the recipient is a corporation owning at least 25%, but less than 70%, of the share capital of the payer. The 15% rate applies to other dividends.

(y) No withholding tax is imposed on royalties paid to nonresidents if all of the following conditions are satisfied:
- The beneficial owner of the royalties is a company resident in another EU country or a permanent establishment located in another EU country of a company resident in an EU country.
- The recipient is subject to income tax in its home country.
- The company paying the royalties, or the company whose permanent establishment is deemed to be the payer, is an associated company of the company receiving the royalties, or of the company whose permanent establishment is deemed to be the recipient.

A company is an associated company of another company if any of the following apply:
- The first company has a direct minimum holding of 25% in the capital of the second company.
- The second company has a direct minimum holding of 25% in the capital of the first company.
- A third company has a direct minimum holding of 25% in both the capital of the first company and the capital of the second company.

(z) The 0% rate applies to royalties for software programs, patents, models or drawings. The 5% rate applies to other industrial royalties. The 10% rate applies to royalties for literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting.

(aa) The lower rate applies if the recipient is a corporation owning at least 10% of the payer.

(bb) The 3% rate applies to royalties paid to a news agency. The 5% rate applies to artistic royalties. The 10% rate applies to industrial royalties. The 15% rate applies to other royalties.

(cc) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting. The 1% rate applies to amounts paid under financial leases of equipment. The 5% rate applies to amounts paid under operating leases of equipment and computer software. The 10% rate applies to other royalties.

(dd) The 12% rate applies if the recipient of the dividends is a corporation owning at least 25% of the payer. The 15% rate applies if the recipient of the dividends is a corporation owning less than 25% of the payer. The 20% rate applies to other dividends.

(ee) The 0% rate applies to royalties paid for the use of, or right to use, computer software, patents, designs, models or plans. The 5% rate applies to royalties paid for the use of, or the right to use, secret formulas or processes, or for information concerning industrial, commercial or scientific experience (know-how). The 10% rate applies to royalties for the use of, or right to use, trademarks and copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting.

(ff) The 5% rate applies if the recipient is a corporation owning at least 10% of the payer's voting rights. The 0% rate applies if the Australian company has held at least 80% of the Finnish company's voting power for at least 12 months and meets certain other conditions.

(gg) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment, or software. The 10% rate applies to royalties paid for the following:

- The use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting
- The use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes
- Information concerning industrial, commercial or scientific experience

(hh) Copyright royalties are exempt from withholding tax. The 1% rate applies to royalties paid for finance leases of equipment. The 5% rate applies to royalties paid for operating leases of equipment, or for the use of, or the right to use, cinematographic films, films and tapes for television or radio broadcasting, or computer software. The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs, plans, formulas or processes, or for information concerning industrial, commercial or scientific experience.

(ii) A tax treaty is in force between Finland and Brazil. However, the tax-sparing articles of the treaty applied only for the first 10 years since the signing of the treaty. This period ended on 25 December 2007.

(jj) The lower rate applies if the Italian company holds directly more than 50% of the capital in the Finnish company.

(kk) The beneficial owner of royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment may elect to be taxed, in the contracting state in which such royalties arise, as if the equipment were effectively connected with a permanent establishment in that state. In such case, the provisions of Article 7 (Business income) of the treaty apply to the income and deductions attributable to such equipment.

(ll) The 15% rate applies if the recipient is a company owning at least 10% of the voting power of the payer. Otherwise, the domestic rates of 20% or 30% apply.

(mm) The tax treaty between Finland and Sri Lanka has been revised, and the revised tax treaty is applicable from 1 January 2019.

(nn) The new tax treaty with Finland and Spain entered into force on 30 July 2018 and is applicable from 1 January 2019.

(oo) The lower rate applies if a company (other than a partnership or a German real estate investment trust company) holds directly at least 10% of the capital of the company paying the dividends.

(pp) The new tax treaty between Finland and the Hong Kong Special Administrative Region (SAR) is applicable from 1 January 2019.

A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	0/10/15/19/25 (a)(b)
Branch Tax Rate (%)	25
Withholding Tax (%)	
Dividends	25/75 (c)(d)(e)
Interest	0/75 (c)(f)(g)
Royalties from Patents, Know-how, etc.	25/75 (c)(f)(g)
Branch Remittance Tax	25 (h)
Net Operating Losses (Years)	
Carryback	1 (i)
Carryforward	Unlimited (j)

(a) For resident companies, surtaxes are imposed on the corporate income tax and capital gains tax. For details, see Section B.
(b) For details concerning these rates, see Section B.
(c) These are the withholding tax rates under French domestic law. Tax treaties may reduce or eliminate the withholding taxes.
(d) Under the European Union (EU) Parent-Subsidiary Directive and Article 119 ter of the French Tax Code, dividends distributed by a French subsidiary to an EU parent company are exempt from withholding tax, if, among other conditions, the recipient holds or commits to hold at least 5% of the subsidiary's shares for at least two years. For details, see Section B.
(e) The withholding tax rate is 75% for distributed profits paid into uncooperative states.
(f) No withholding tax is imposed on interest and royalties paid between associated companies of different EU Member States if certain conditions are met. For details, see Section B.
(g) The withholding tax rate is 75% for interest on qualifying borrowings and royalties paid into uncooperative states.
(h) Branch remittance tax may be reduced or eliminated by double tax treaties. It is not imposed on French branches of companies that are resident in EU Member States and are subject to tax in their home countries.
(i) Losses carried back may not exceed EUR1 million.
(j) The amount of losses used in a given year may not exceed EUR1 million plus 50% of the taxable profit exceeding this limit for such year.

B. Taxes on corporate income and gains

Corporate tax. The taxation of French companies is based on a territorial principle. As a result, French companies carrying on a trade or business outside France are generally not taxed in France on the related profits and cannot take into account the related losses. However, under the French controlled foreign company (CFC) rules contained in Article 209 B of the French Tax Code, income earned by a French enterprise through a foreign enterprise may be taxed in France if such income is subject to an effective tax rate that is 40% lower than the French effective tax rate on similar income (for further details, see Section E). French companies are companies registered in France, regardless of the nationality of the shareholders and companies that have their place of effective management in France. Foreign companies carrying on an activity in France are subject to French corporate tax on their French-source profits.

Profits derived in France by branches of nonresident companies are deemed to be distributed, normally resulting in the imposition of a branch withholding tax of 25% on after-tax income. This tax is not imposed on the profits of French branches of companies that are resident in EU Member States and that are subject to corporate income tax in their home countries. It may be reduced or eliminated by tax treaties. Although branch withholding tax normally applies to undistributed profits, such profits may be exempted from the tax if an application is filed with the tax authorities and if certain requirements are met.

Rates of corporate tax. Companies are subject to a 25% corporate tax rate.

A social security surtax of 3.3% is assessed on the corporate income tax amount. This surtax is imposed on the portion of corporate tax due exceeding EUR763,000 before offsetting tax credits, including the tax credits granted under tax treaties (see *Foreign tax relief*). The 3.3% surtax does not apply to companies whose annual turnover is lower than EUR7,630,000 if at least 75% of the company is owned by individuals or by companies that themselves satisfy these conditions.

Members of consolidated groups must take into account the global turnover of the group to determine whether they reach the EUR7,630,000 threshold mentioned above.

A reduced corporate tax rate of 15% applies to the first EUR42,500 of the profits of small and medium-sized enterprises if certain conditions are met, including the following:
- The turnover of the company is less than EUR10 million.
- At least 75% of the company is owned by individuals or by companies that themselves satisfy this condition and the above condition.

Capital gains. Capital gains derived from the sale of fixed assets by French companies are subject to corporate income tax at the standard rate.

Capital gains derived from the sale of qualifying participations that have been held for at least two years before their sale are exempt from tax. The following are qualifying participations:
- *Titres de participation* (specific class of shares for accounting purposes that enables the shareholder to have a controlling interest)
- Participations eligible for the dividend participation exemption regime if the shareholder holds at least 5% voting rights, provided that the participations are recorded in a special subdivision of the balance sheet

However, the corporate income tax applies to 12% of the gross capital gains realized on qualifying participations. As a result, the effective tax rate on such gains is 3% (based on a 25% standard corporate tax rate). Capital losses incurred with respect to such qualifying participations may no longer be offset against capital gains.

This participation exemption regime does not apply to capital gains derived from the sale of qualifying participations in a company established in an uncooperative country (as defined in

Article 238-0 A of the French Tax Code; see Section E), unless it is demonstrated that the foreign company's activities are real and do not aim to localize revenues in an uncooperative country.

Under certain conditions, the sale of units in venture mutual funds (FCPRs, FPCIs and SLPs) and venture capital investment companies (SCRs) may benefit from the long-term regime if the units have been held for at least a five-year period. Under this regime, the capital gains are fully exempt up to the part of the funds or investment companies' assets represented by participation shares and subject to a 15% tax rate for the exceeding portion.

Long-term capital losses can be offset against any kind of long-term capital gains.

The exemption or reduced rate also applies to various distributions made by the FCPRs and SCRs after a two-year-holding period.

Capital gains derived from sales of participating interests in companies that are predominantly real estate companies are subject to tax at the standard rate. For sales of participating interests in listed real estate companies that have been held for at least two years before their sale, the rate is reduced to 19%.

Long-term capital gains derived from the first sale of participating interests in companies whose assets' value is mainly composed of television broadcasting rights are subject to tax at a rate of 25%.

Capital gains and income derived from patents and patentable rights. A reduced tax rate of 10% applies on an election performed on an asset-by-asset basis (or, under certain conditions, on a group-of-assets basis), to the net income derived from the licensing of qualifying patents or software, and after deduction of the research and development (R&D) expenses incurred during the financial year (a recapture of R&D expenses incurred since the financial year for which the election was made applies the first time the net income is calculated). If negative, the result is carried forward and deducted from income derived in subsequent years from the licensing of the qualifying patent or software. If positive, a ratio, which cannot be greater than 100%, is applied to determine the net income subject to the 10% rate. This ratio compares the following:

- 130% of the R&D expenses incurred for the creation, or the development of the qualifying patent, either by the claiming taxpayer or by unrelated parties
- The total R&D expenses incurred for the creation, the development, or the acquisition of the qualifying patent

For the calculation of the ratio, the R&D expenses include expenses incurred prior to the election, eventually limited to those incurred during financial years beginning on or after 1 January 2019. A safe harbor provision allows election of a replacement ratio, subject to an agreement with the tax authorities.

The same tax treatment could apply, also on the basis of an election, to the net income derived from the sublicensing of qualifying patents, and to the net gains derived from the transfer to

unrelated parties of qualifying patents, provided that the latter was not acquired less than two years before. Qualifying patents include copyright-protected software but do not include patentable rights (except for small and medium-sized companies under certain circumstances).

For French tax consolidated groups, this election is available at the group level. The net income and ratio are determined at the group level.

Administration. In general, companies must file a tax return before the second business day after 1 May for financial years closing on 31 December or within three months following the end of their financial year in other cases.

Corporate income tax is prepaid in four installments. Companies that have their financial year ending on 31 December must pay the installments on 15 March, 15 June, 15 September and 15 December. The balance of corporate tax is due by 15 May for financial years closing on 31 December or by the 15th day of the fourth month following the end of the financial year in other cases. The rules governing the payment of corporate income tax also apply to the payment of the 3.3% surtax.

Companies must file their corporate income tax and VAT returns electronically. If a company does not comply with this requirement, a 0.2% penalty is imposed.

In general, late payment is subject to a 5% penalty, and late filing is subject to a 10% penalty. If additional tax is payable as a result of a reassessment of tax, interest is charged at 0.2% per month (2.4% per year). Many exceptions and specific rules apply to interest and penalties.

Dividends. Dividends paid by French companies no longer carry a tax credit (*avoir fiscal*). However, under the parent-subsidiary regime, dividends received by French companies or French branches of nonresident companies are exempt from corporate income tax, except for a 5% service charge computed on the gross dividend income (net dividend income and foreign tax credits) and added back to the recipient's taxable income. The rate of this service charge is reduced to 1% in the following cases:

- The distribution is performed within a French tax consolidated group by a company that has been consolidated for more than one fiscal year.
- The dividend is distributed to a French company by a company that is a resident for tax purposes in the EU or European Economic Area (EEA) (provided that the EEA country has entered into a treaty with France that includes a mutual assistance provision) and both companies could be part of the same French tax consolidated group for more than one fiscal year if they were subject to corporate income tax in France.

The parent-subsidiary regime does not apply to the following:

- Profit distributions that are deductible from the distributing company's taxable income
- Dividends distributed within an arrangement or a series of arrangements, which have been put into place for the main purpose, or one of the main purposes, of obtaining a tax advantage contrary to the object or purpose of the participation exemption

regime, are not genuine having regard to all relevant facts and circumstances (that is, not put into place for valid commercial reasons that reflect economic reality)
- Dividends received from a subsidiary established in an uncooperative country (as defined in Article 238-0 A of the French Tax Code; see Section E), unless the parent company demonstrates that the subsidiary's activities are real and do not aim to localize revenues in an uncooperative country

The parent-subsidiary regime applies if the recipient holds at least 5% of the share capital of the distributing company for at least two years.

Dividends that cannot benefit from the parent-subsidiary regime are exempt from corporation income tax up to 99% of the amount of the dividend in the following cases:
- The distribution is performed within a French tax consolidated group by a company that has been consolidated for more than one fiscal year.
- The dividend is distributed to a French company by a company that is a resident for tax purposes in the EU or EEA (provided that the EEA country has entered into a treaty with France that includes a mutual assistance provision) and both companies could be part of the same French tax consolidated group for more than one fiscal year if they were subject to corporate income tax in France.

In general, a 25% withholding tax is imposed on dividends paid to nonresident entities (12.8% for nonresident individuals). The withholding tax rate is increased to 75% for distributed profits paid into uncooperative states (see Section E), unless it is demonstrated that these distributions do not aim to localize revenues in an uncooperative state.

This tax may be reduced or eliminated by tax treaties. In addition, under the EU Parent-Subsidiary Directive, dividends distributed by French subsidiaries to EU parent companies are exempt from withholding tax, if, among other conditions, the recipient holds 10% or more of the shares of the subsidiary for at least two years (the 10% threshold is lowered to 5% if the effective beneficiary cannot credit the French withholding tax in its country of residence).

Furthermore, a nonresident entity receiving dividends subject to withholding tax may benefit from a deferral of this withholding tax if, among other conditions, the entity is in a tax-loss position or its taxable income is nil.

In addition, under specific conditions, beneficiaries that are not able to offset the French withholding tax against their local corporate income tax liability may claim a refund of the portion exceeding the taxation that would have been due in France on the income, taking into account the corresponding expenses directly incurred to generate or retain the revenue that would have been tax deductible if the beneficiary had been located in France.

The withholding tax no longer applies to profits derived from stock, interests or assimilated shares distributed to collective investment vehicles (CIVs) created under foreign law and located in an EU Member State or in a state that has signed a treaty with France that includes an administrative assistance provision aimed

at combating tax fraud. However, to benefit from the withholding tax exemption, foreign CIVs must meet the same definition as French CIVs, and the content and actual implementation of the administrative assistance provisions must effectively allow the French tax authorities to obtain from the foreign tax authorities the information needed to verify this condition. A 15% withholding tax applies to distributions of income exempt from corporate income tax that are made by French real estate investment trusts (so-called SIICs and SPPICAVs) to French or foreign CIVs.

Withholding taxes on interest and royalties. Under French domestic law, withholding tax is no longer imposed on interest paid to nonresidents. However, a 75% domestic withholding tax is imposed on interest on qualifying borrowings paid into uncooperative states (see Section E), unless it is demonstrated that the corresponding operations do not aim to localize revenues in the uncooperative states.

A 25% withholding tax is imposed on royalties and certain fees paid to nonresidents.

However, as a result of the implementation of EU Directive 2003/49/EC, withholding tax on interest and qualifying royalties paid between "associated companies" subject to corporate income tax of different EU Member States was abolished. A company is an "associated company" of a second company if any of the following conditions is satisfied:

- The first company has maintained a direct minimum holding of 25% in the capital of the second company for at least two years at the time of the payment or commits itself to maintain such holding for a two-year period.
- The second company has maintained a direct minimum holding of 25% in the capital of the first company for at least two years or commits itself to maintain the holding for the two-year period.
- A third company has maintained a direct minimum holding of 25% in the capital of both the first and second companies for at least two years or commits itself to maintain such holding for a two-year period.

In these three situations, if the company chooses to undertake to keep the shares for at least two years, it must appoint a tax representative in France who would retrospectively pay the withholding tax if the shares are sold before the end of the two-year period.

Domestic withholding tax on royalties may be reduced or eliminated by tax treaties.

Furthermore, a nonresident entity receiving royalties and certain fees subject to withholding tax may benefit from a deferral of this withholding tax if the entity is in a tax-loss position and the entity is located in an EU Member State, or in another state that is part of the EEA agreement and is not uncooperative (see Section E) and that has concluded with France an agreement with an administrative assistance clause for the prevention of fraud and tax evasion, as well as an agreement with a mutual assistance clause for tax collection that has a similar scope as the EU directive.

The withholding tax on royalties and fees for the provision of certain services is computed based on the gross amount of the sums paid, minus, under specific conditions, a 10% allowance. Moreover, under some conditions, beneficiaries that are not able to offset the French withholding tax against their local corporate income tax liability may claim a refund of the portion exceeding the taxation that would have been due in France on the income, taking into account the corresponding expenses directly incurred to generate or retain the revenue that would have been tax deductible if the beneficiary had been located in France.

Foreign tax relief. In general, income subject to foreign tax and not exempt from French tax under the territoriality principle is taxable. However, most tax treaties provide for a tax credit that generally corresponds to withholding taxes on passive income. Loss-making companies cannot use the tax credit, and they are not allowed to deduct the underlying foreign tax (the withholding tax levied on foreign-source income, which gives right to a tax credit under the double tax treaty).

C. Determination of trading income

General. The assessment is based on financial statements prepared according to French generally accepted accounting principles, subject to certain adjustments.

Deductibility of interest. In general, interest payments are fully deductible. However, certain restrictions are imposed.

Interest accrued by a French entity with respect to loans from its direct shareholders may be deducted from the borrower's taxable income only if the following two conditions are satisfied:
- The share capital of the borrower is fully paid-up.
- The interest rate does not exceed the average interest rate on loans with an initial duration of more than two years granted by banks to French companies.

The deduction of interest and financial expenses may be limited by two main rules.

First, related-party interest is tax-deductible only if it meets an arm's-length test. Under this test, the interest rate is capped at the higher of the following two rates:
- The average annual interest rate on loans granted by financial institutions that carry a floating rate and have a minimum term of two years
- The interest rate at which the company could have borrowed from any unrelated financial institution, such as a bank, in similar circumstances (that is, the market rate)

The portion of interest that exceeds the higher of the above two thresholds is not tax-deductible and must be added back to the company's taxable income for the relevant financial year (this portion is also considered to be distributed income).

Second, the net financial expenses incurred during a financial year (that is, the financial expenses reduced by financial income) are deductible from the taxable income of a company only to the extent that they do not exceed the higher of the two following thresholds:
- EUR3 million

- 30% of the adjusted taxable income of the company

For purposes of the above rule, financial expenses (or income), as defined, include, but are not limited to, any amounts that are accrued in remuneration for monies put at the disposal of the company (or by the company to another party). They include, but are not limited to, the following:

- Payments under profit participating loans
- Imputed interest on instruments such as convertible bonds
- Amounts under alternative financing arrangements
- Notional interest amounts under derivative instruments or hedging arrangements related to an entity's borrowings
- Certain foreign-exchange gains and losses on borrowings and instruments connected with the raising of finance
- Guarantee fees for financing arrangements, arrangement fees and similar costs related to the borrowing of funds

The adjusted taxable income corresponds to the taxable income before the offset of tax losses and without taking into consideration net financial expenses and, to some extent, depreciation, provisions, and capital gains and losses. Seventy-five percent of the net financial expenses exceeding the threshold is tax deductible, provided that either of the following circumstances exist:

- The equity-to-asset ratio of the company at least equals, or is not lower by more than two percentage points, the equity-to-asset ratio of the consolidated group to which it belongs.
- The company is a stand-alone company (it does not belong to a consolidated group, has no permanent establishment outside of France and is not related to any other company such as set out by Articles 2-4 of the EU Anti-Tax Avoidance Directive).

Financial expenses that are excluded from the deductible expenses of a given fiscal year can be carried forward indefinitely (subject to the abovementioned limitations). If, for a given financial year, a company does not fully utilize its deduction capacity (that is, the amount of net financial expenses is lower than the thresholds mentioned above), the unused portion of deduction capacity, which equals the positive difference between the applicable thresholds and the net financial expenses, can be carried forward to the five following financial years. However, this deduction capacity carryforward cannot be used to deduct nondeductible interest expenses that have been carried forward. The carryforward of nondeductible expenses and the carryforward of unused deduction capacity are ruled out if the company benefited from the additional 75% deduction for stand-alone companies.

If the company exceeds a specific 1.5:1 debt-to-equity ratio (for this ratio, the debt is the amount of debt with related entities) and cannot demonstrate that its debt-to-equity ratio is not higher by more than two percentage points than the debt-to-equity ratio of the consolidated group to which it belongs, restrictive rules apply. A portion of the net financial expenses, determined by application of the following ratio to the net financial expenses, is subject to the regular threshold (EUR3 million or 30% of the adjusted taxable income of the company):

$$\frac{\text{Average amount of indebtedness to unrelated parties} + (1.5 \times \text{equity})}{\text{Average amount of indebtedness}}$$

The remaining portion of the net financial expenses is tax deductible only within the limit of the higher of the two following strengthened thresholds:
• EUR1 million
• 10% of the abovementioned adjusted taxable income

In case of thin-capitalization, the safe-harbor rule that allows for the additional deduction of 75% of the net financial expenses exceeding the threshold does not apply. The portion of net financial expenses that could not be deducted by application of the strengthened threshold can only benefit from the carryforward up to one-third of its amount, and the exceeding portion of the deduction capacity cannot be carried forward.

For a tax-consolidated group, the limitation rule based on a portion of the adjusted taxable income applies at the level of the group.

Inventories. Inventory is normally valued at the lower of cost or market value. Cost must be determined under a weighted average cost price method. A first-in, first-out (FIFO) basis is also generally acceptable, but a last-in, first-out (LIFO) basis is not permitted.

Reserves. In determining accounting profit, companies must book certain reserves, such as reserves for a decrease in the value of assets, risk of loss or expenses. These reserves are normally deductible for tax purposes. In addition, the law provides for the deduction of special reserves.

Capital allowances. In general, assets are depreciated using the straight-line method. However, new qualifying industrial assets are generally depreciated using the declining-balance method.

Depreciable assets composed of various parts with different characteristics must be depreciated on a separate basis (these assets must be split into a principal component or structure on the one hand and into additional components on the other hand). The depreciable amount of each asset must be spread out over its likely useful life for the company, which corresponds to the time period during which the company may expect to derive a profit from it. The depreciation method applied to each asset (straight-line method or accelerated method) must also be consistent with the pace at which the company expects to derive a profit from the asset.

Periodic assessment of the residual value of each component must be conducted to establish a (non-tax deductible) provision for impairment if needed.

For tax purposes, the depreciation of assets that have not been split into components and the depreciation of the asset's principal structure that has been split into components can be spread out over the useful life commonly accepted in business practices. This rule does not apply to buildings acquired by real estate investment companies. The following are some of the acceptable straight-line rates.

Asset	Rate (%)
Commercial buildings	2 to 5
Industrial buildings	5

Asset	Rate (%)
Office equipment	10 to 20
Motor vehicles	20 to 25
Plant and machinery	5 to 10*

* These are the general rates. Alternatively, new plant and machinery may be depreciated using the declining-balance method at rates generally ranging from 12.5% to 50%.

Certain specified assets may be depreciated using accelerated depreciation methods. Land and works of art are not depreciable. Intangible assets are depreciable if the company can anticipate that the profits derived from the assets will end at a fixed date. In general, goodwill is not depreciable.

The amortization of goodwill is nondeductible for tax purposes. However, as a temporary measure, companies may deduct for tax purposes the amortization made in accordance with French generally accepted accounting principles (GAAP) for goodwill acquired between 1 January 2022 and 31 December 2025. For acquisitions realized between 18 July 2022 and 31 December 2025, the deduction for tax purposes only applies to goodwill acquired from an unrelated entity.

Relief for tax losses. Losses may be carried forward indefinitely. However, the amount of losses used in a given year may not exceed EUR1 million plus 50% of the taxable profit above that amount for such financial year.

In addition, enterprises subject to corporate tax may carry back losses against undistributed profits from the prior financial year. The carryback results in a credit equal to the loss multiplied by the current corporate tax rate, but losses carried back may not exceed EUR1 million. The credit may be used to reduce corporate income tax payable during the following five years with the balance being refunded at the end of the fifth year.

A significant change in the company's activity, particularly an addition or a termination of a business that infers an increase or decrease of 50% or more of either the revenue or the average headcount and fixed assets, may jeopardize the loss carryover and carryback.

Groups of companies. Related companies subject to corporate tax may elect to form a tax-consolidated group. Under the tax-consolidation regime, the parent company files a consolidated return, thereby allowing the offset of losses of one group entity against the profits of related companies. The parent company then pays tax based on the net taxable income of companies included in the consolidated group, after certain adjustments for intragroup provisions are made; in particular, intragroup provisions for bad and doubtful debts are neutralized.

If a company is acquired from a shareholder controlling the group and becomes a member of the tax-consolidated group, the amendment Charasse provides that an amount of the financing expenses of the group must be added back to the consolidated income within a nine-year period starting with the purchasing year. This amount is calculated as follows:

$$\text{Group financing expenses} \times \frac{\text{Acquisition price of the shares}}{\text{Average amount of the group's debt}}$$

The group may include the French subsidiaries in which the parent has a direct or indirect shareholding of at least 95% and for which the parent company has elected tax consolidation.

A French company or permanent establishment is allowed to form a French tax consolidated group with other French companies or permanent establishments if all are owned at 95% or more by a foreign parent company or permanent establishment is allowed that is subject to a tax equivalent to French corporate income tax in another EU country or EEA country ("horizontal tax consolidation"). The 95% ownership test can be met directly, or indirectly, through intermediate companies or permanent establishments that are all subject to tax in an EU/EEA country or through other French consolidated companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	2.1/5.5/10/20
Territorial Economic Contribution; capped to a certain amount of the value added by the company; maximum rate	1.531
Social security contributions, on gross salary (approximate percentages); paid by	
Employer	40 to 45
Employee	20 to 23
General social security tax (*contribution sociale généralisée*, or CSG) on active income	9.2
General social security tax on patrimonial and financial income (for example, income from real estate and securities)	9.2
Social debt repayment tax (*contribution remboursement de la dette sociale*, or CRDS), on all income	0.5
Special social security tax *(prélèvement de solidarité)*	7.5
Registration duty	
On sales of shares in stock companies (including *sociétés anonymes, sociétés par actions simplifiées* and *sociétés en commandites par actions*); intragroup transfers are exempt	0.1
On sales of shares of private limited liability companies (*sociétés à responsabilité limitée,* or SARLs) and interests in general partnerships (*sociétés en nom collectif*, or SNCs); intragroup transfers are exempt	3
On sales of goodwill	3 to 5
On sales of professional premises, housing, businesses and shares of companies whose assets primarily consist of real estate	5 to 6.5

E. Miscellaneous matters

Foreign-exchange controls. As a general rule, standard foreign investments are free for the most part. However, some foreign

investments must be declared for statistics purposes. In addition, foreign investments are subject to a prior authorization procedure of the French Minister of the Economy when they concern strategic sectors or sectors deemed sensitive for the defense of national interests. French rules in this area have been strengthened several times in recent years; the scope of application of the control mechanism was extended and sanctions applicable in the event of a breach were reinforced.

Payments to residents of tax havens or to uncooperative states or territories. Under Article 238 A of the French Tax Code, interest, royalties and other remuneration paid to a recipient established in a tax haven or on a bank account located in a tax haven are deemed to be fictitious and not at arm's length. As a result, to deduct the amount paid, the French entity must prove that the operation is effective (that it effectively compensates executed services) and is at arm's length. For purposes of the above rules, a privileged tax regime is a regime under which the effective tax paid is 40% lower than the tax that would be paid in France in similar situations.

If these payments are made to a recipient established in an uncooperative country or on a bank account located in an uncooperative country, the French entity must also prove that the operation's principal aim is not to locate the payment in that country. The list of the uncooperative countries is regularly published by the French tax authorities.

Anti-hybrid rules. The anti-hybrid rules transposed from the EU Anti-Tax Avoidance Directive apply. The rules target deduction/non-inclusion or double deduction mismatches resulting from hybrid entities or instruments, dual-resident companies or companies with permanent establishments. The rules also cover imported mismatches (the French corporate taxpayer is not directly a party to a targeted mismatch, but a deductible payment is compensated within a wider arrangement with a payment that is part of a mismatch) and structured arrangements (the benefit of a mismatch is embedded within an arrangement concluded by the French corporate taxpayer, even with a non-associated party).

In deduction/non-inclusion cases, the deduction is disallowed to the payer that is tax resident in France or, for a payee resident in France, the income is taxed if the deduction is not neutralized in the payer jurisdiction. In double deduction cases, the deduction is disallowed if the investor (anyone other than the payer who benefits from the deduction) is tax resident in France or, for a payer tax resident in France, the deduction is disallowed if the deduction is not disallowed in the investor jurisdiction. Specific rules apply for other types of mismatches.

Transfer pricing. French entities controlled by, or controlling, entities established outside France are taxable in France on any profits transferred directly or indirectly to the entity located abroad through an increase or decrease in purchase or sale prices or by any other means.

In the context of a tax audit, certain companies (companies with total net sales before taxes or total gross assets equal to or greater than EUR150 million, subsidiaries owned at more than 50% by such a company, parent companies that hold more than 50% of such a company and members of a French tax consolidated group that includes at least one company that meets these criteria) must provide their transfer-pricing documentation on the tax inspector's request or within 30 days (Article L 13AA of the French Tax Procedure Code). The transfer-pricing documentation includes the list of information recommended by the Organisation for Economic Co-operation and Development (OECD) for the Master File (Annex I to the new Chapter V of the OECD's Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations) and the Local File (Annex II to the aforementioned Chapter V). If the company fails to provide the documentation in due time, a penalty of up to either 5% of the transfer-pricing reassessment or 0.5% of the volume of the transactions carried out with related enterprises is applied, with a minimum of EUR50,000 per financial year under audit.

In addition, certain companies (a company with total net sales before taxes or total gross assets equal to or greater than EUR50 million, a subsidiary owned at more than 50% by such a company, a parent company that holds more than 50% of such a company and members of a French tax consolidated group that includes at least one company that meets these criteria) are required to file a "light" transfer-pricing statement within six months after the filing deadline of the tax return (Article 223 quinquies B of the French Tax Code). The transfer-pricing statement includes the following:

- General information about the group (main activities, companies related to the reporting entity, intangible assets held by the group and used by the reporting entity, and general description of the transfer-pricing policy applied by the group)
- Specific information for intragroup transactions
- Disclosure of change in the activity of the entity or in the transfer-pricing method being applied

Although the penalty for a not filing this transfer-pricing statement is minimal (that is, EUR150), taxpayers failing to file the report are likely to be scrutinized by the French tax authorities.

Country-by-Country Reporting. In accordance with the OECD final report on Transfer Pricing Documentation and Country-by-Country Reporting (CbCR) Action 13 and EU Directive 2011/16/EU regarding mandatory automatic exchange of information in the field of taxation, certain companies that are members of a multinational group with a consolidated turnover of at least EUR750 million are subject to a CbCR obligation (Article 223 quinquies C of the French Tax Code). The report must be filed within 12 months after the closing date of the financial year. Noncompliant companies may be subject to a penalty of up to EUR100,000.

Controlled foreign companies. Under Section 209 B of the French Tax Code, if French companies subject to corporate income tax in France have a foreign branch or if they hold, directly or indirectly, an interest (shareholding, voting rights or share in the

profits) of at least 50% in any type of structure benefiting from a privileged tax regime in its home country (the shareholding threshold is reduced to 5% in certain situations), the profits of this foreign entity or enterprise are subject to corporate income tax in France. If the foreign profits have been realized by a legal entity, they are taxed as a deemed distribution in the hands of the French company. If the profits have been realized by an enterprise (an establishment or a branch), these profits are taxed as profits of the French company if the tax treaty between France and the relevant foreign state allows the application of Section 209 B of the French Tax Code.

For the purpose of the above rules, a privileged tax regime is a regime under which the effective tax paid is 40% lower than the tax that would be paid in France in similar situations (such a foreign company is known as a controlled foreign company [CFC]). Tax paid by a CFC in its home country may be credited against French corporate income tax.

CFC rules do not apply to profits derived from entities established in an EU Member State unless the French tax authorities establish that the use of the foreign entity is an artificial scheme that is driven solely by French tax avoidance purposes.

Similarly, the CFC rules do not apply if the profits of the foreign entity are derived from an activity effectively performed in the country of establishment. The concerned company must demonstrate that the establishment of the subsidiary in a tax-favorable jurisdiction has mainly a non-tax purpose and effect by proving that the subsidiary mainly carries out an actual industrial or commercial activity.

Debt-to-equity rules. For a discussion on the restrictions imposed on the deductibility of interest payments, see Section C.

Headquarters and logistics centers. The French tax authorities issue rulings that grant special tax treatment to headquarters companies and logistics centers companies. These companies are subject to corporate income tax at the normal rate on a tax base corresponding generally to 6% to 10% of annual operating expenses, depending on the company's size, functions assumed and risks borne. In addition, certain employee allowances are exempt from income tax.

Reorganizations. On election by the companies involved, mergers, spin-offs, split-offs and dissolutions without liquidation may qualify for a special rollover regime.

Tax credits for research and development. To encourage investments in R&D, the tax credit for R&D expenditure equals 30% of qualifying expenses related to R&D operations up to EUR100 million, and 5% for such expenses above EUR100 million.

A tax credit has been designed to promote cooperation between private corporations and public research bodies and is based on R&D expenses incurred as part of research cooperation agreements concluded between 1 January 2022 and 31 December 2025. The tax credit for cooperative research amounts to 40% (or

50% for small and medium-sized enterprises) of the eligible expenses up to EUR6 million per year (the expenses cannot simultaneously be used for the computation of the classic R&D tax credit).

Tax credit for investments in green industry. The tax credit for investments in green industry equals 20% of the expenses incurred for the acquisition of qualifying tangible assets (lands buildings, plant, equipment and machinery) or qualifying intangible assets (patent rights, licenses, know-how and other intellectual property rights) enabling the production of batteries, photovoltaic panels, wind turbines and heat pumps in France, provided that all of the following conditions are satisfied:

- The investment project carried out in France does not result from a relocation from another EU Member State or from an EEA State.
- The company commits to operate the investments in France for at least five years.
- A ruling agreeing to the company's investment plan must have been granted by the French tax authorities.

As a general rule, the total amount of the tax credit is capped at EUR150 million for all companies within the same group and is deductible from the corporate income tax for the year during which the expenses are incurred. The unused portion of the tax credit is directly refundable.

This tax credit applies to investment plans approved until 31 December 2025.

Tax audits. All companies must maintain their accounting records in an electronic form when French tax authorities carry out a tax audit.

Pillar Two. EU Directive 2022/2523, which aimed at implementing the OECD Pillar Two Global Anti-Base Erosion (GloBE) rules within the EU, has been transposed in French domestic law, introducing a minimum tax of 15% on the profits of multinational (MNE) groups that operate in France and have a consolidated revenue of at least EUR750 million generated during at least two of the last four fiscal years.

The new measures apply to fiscal years starting on or after 31 December 2023, except that the Undertaxed Profit Rule (UTPR) applies, in principle, to fiscal years starting on or after 31 December 2024.

In brief, France has elected for the application of the Qualified Domestic Minimum Top-up Tax (QDMTT), the rules of which align with those provided by the GloBE rules. The QDMTT must be paid by the various French constituent entities in proportion to the share allocated to them in accordance with the rules provided for the IIR.

The top-up tax, whether levied according to the rules of the IIR, the UTPR, or QDMTT, will not be deductible from the French corporate income tax.

For more details and the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (ey-beps-2-0-pillar-two-developments-tracker.pdf).

F. Treaty withholding tax rates

The following table is for illustrative purposes only.

	Dividends %	Interest (e)(g) %	Royalties (e) %
Albania	5/15	10	5

(a) Dividends paid by French companies to parent companies located in other EU Member States are exempt from withholding tax if the parent company makes a commitment to hold at least 10% of the distributing company for an uninterrupted period of at least two years (the 10% threshold is lowered to 5% if the effective beneficiary cannot credit the French withholding tax in its country of residence).

(b) Withholding tax rates of 5%/15% (dividends), 0%/10% (interest) and 0%/10% (royalties) apply with respect to Quebec.

(c) France has agreed with Turkmenistan to apply the France-USSR tax treaty. France applies the France-USSR tax treaty to Belarus, Kyrgyzstan and Moldova. A tax treaty between France and Moldova was signed on 15 June 2022 but had not entered into force as of 1 January 2023.

(d) The tax treaty between France and China Mainland does not apply to Hong Kong.

(e) As a result of the implementation of EU Directive 2003/49/EC, withholding tax on interest and royalties paid between associated companies of different EU states is abolished if certain conditions are met (see Section B).

(f) France is honoring the France-Yugoslavia treaty with respect to Bosnia and Herzegovina, Montenegro and Serbia.

(g) The French domestic law applies. As a result, the rate is 0% under normal circumstances. The rates listed for interest in the table are the treaty rates.

(h) The general rates under the treaty are reduced in practice according to a "most-favored-nation" clause. The rates indicated are those resulting from the application of the "most-favored-nation" clause.

(i) The 75% rate applies only to payments made into uncooperative countries (see Section E).

(j) The domestic rate applies.

(k) The dash signifies the domestic rate.

(l) A tax treaty signed on 4 February 2022 between France and Denmark entered into force on 1 January 2024. The tax treaty applies to withholding taxes on revenues paid on or after 1 January 2024.

(m) A tax treaty signed on 11 May 2022 between France and Greece entered into force on 1 January 2024. The tax treaty applies to withholding taxes on revenues paid on or after 1 January 2024.

(n) The government of Burkina Faso denounced on 7 August 2023 the tax treaty signed in 1965, and the governments of Mali and Niger denounced on 5 December 2023 the tax treaties respectively concluded in 1972 and in 1965. The effectiveness of those denunciations remains uncertain considering the treaties' provisions.

A. At a glance

Corporate Income Tax Rate (%)	30/35 (a)
Capital Gains Tax Rate (%)	20/30/35 (b)
Withholding Tax (%)	
Dividends	10/20 (c)
Interest	20 (d)
Royalties from Patents, Know-how, etc.	25 (e)
Payments for Services	25 (f)
Branch Remittance Tax	10/20 (g)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) The minimum tax is 1% of turnover (unless exempt). See Section B for details.
(b) In certain circumstances, the tax is deferred (see Section B).
(c) The rate is 10% if the parent-subsidiary regime applies. The 20% rate applies to payments made to resident and nonresident individuals and legal entities.
(d) This 20% rate applies to interest paid to resident and nonresident individuals and nonresident legal entities, excluding interest on bonds.
(e) This withholding tax applies to payments to nonresidents.
(f) This withholding tax applies to payments made by resident companies to nonresidents for services, including professional services, rendered or used in Gabon.
(g) This tax applies if the profits are remitted to the head office. The 10% rate applies to payments to head offices located in tax treaty countries. The rate of 20% applies to payments to head offices located in non-treaty countries.

B. Taxes on corporate income and gains

Corporate income tax. Gabonese companies are taxed on the territoriality principle. As a result, Gabonese companies carrying on a trade or business outside Gabon are not taxed in Gabon on the related profits. Gabonese companies are those registered in Gabon, regardless of the nationality of the shareholders or where the companies are managed and controlled. Foreign companies with activities in Gabon are subject to Gabonese corporate tax on Gabonese-source profits.

Tax rates. The standard corporate income tax rate is 30%. However, oil and mining companies are subject to tax at a rate of 35%. The minimum corporate tax payable is 1% of annual turnover,

but not less than XAF1 million. The base for the calculation of the minimum corporate tax is the global turnover realized during the tax year. An exemption from the minimum corporate tax applies to the following companies:

- Companies exempt from corporate income tax, as provided in the general tax code
- Companies approved for the tax regime for new businesses
- Newly incorporated companies or legal entities that incur losses in their first two years, regardless of their activities

Capital gains. Capital gains are taxed at the regular corporate rate. The tax, however, can be deferred if all of the proceeds are used to acquire new fixed assets in Gabon within three years.

Administration. The tax year is the calendar year. Annual tax returns for companies must be filed by 30 April.

Companies must pay the corporate tax (or the minimum tax) in two installments, which are due on 30 November and 30 January. The first installment equals 25% of the preceding year's corporate tax. The second installment equals 33.33% of such tax. Companies must pay any balance of tax due by the due date for the tax return, which is 30 April.

Late payments are subject to a penalty of 10% for the first month and 3% for subsequent months.

Late filing of the corporate tax return is subject to a penalty of XAF50,000 per month (before summons to pay), increased to XAF200,000 per month (after summons to pay), with a maximum penalty of XAF5 million.

Dividends. Dividends paid to resident and nonresident individuals and legal entities are subject to a 20% withholding tax.

If the parent-subsidiary regime applies, dividends received by parent companies are subject to a 10% tax. The parent-subsidiary regime applies if the following conditions are satisfied:

- The shares owned by the parent company represent at least 25% of the capital of the subsidiary.
- Both the parent and subsidiary have their seat in a Central African Economic and Monetary Community (CEMAC) member country (Cameroon, Central African Republic, Chad, Congo [Republic of], Equatorial Guinea and Gabon).
- The holding company retains the shares registered in its own name for at least two years from the date of issuance of the shares.

Foreign tax relief. In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from Gabonese tax under the territoriality principle is taxable net of the foreign tax. However, Gabon's tax treaties with CEMAC countries, Belgium, Canada, France. Italy, Morocco, Saudi Arabia and the United Arab Emirates provide a tax credit that corresponds to the amount of the withholding tax.

C. Determination of trading income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the general accounting chart of the Organization for the Harmonization of Business Law in Africa.

Business expenses are generally deductible unless specifically excluded by law. To be deductible, an expense must satisfy the following general conditions:

- It must be made in the direct interest of the company or linked to the normal management of the company.
- It must be real and justified.
- It must result in the diminution of the net assets of the company.
- It must be registered in the company books as an expense of the related fiscal year.
- It must not be expressly excluded from deductible expenses by law.
- It must not be considered as an abnormal transaction.

The following expenses are deductible, subject to the conditions mentioned above:

- Head office overhead and remuneration for certain services (studies and technical, financial or administrative assistance) paid to nonresidents. The deduction is limited to 5% of overhead.
- Royalties from patents, brands, models or designs paid to a non-CEMAC corporation participating in the management of, or owning shares in, the Gabonese corporation. The deduction is limited to 5% of chargeable income before taking into account such expenses.

The following expenses are not deductible:

- Rent expense for movable equipment paid to a shareholder holding, directly or indirectly, more than 10% of the capital
- A portion of interest paid to a shareholder in excess of the central bank annual rate plus two points and, if the shareholder is in charge of management, on the portion of the loan exceeding one and one-half of the capital stock
- Commissions and brokerage fees exceeding 5% of purchased imports
- Certain specific charges, penalties and corporate tax
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director), gifts and subsidies

Inventories. Inventories are normally valued at cost or market value. Cost must be determined on a weighted-average cost price method. A first-in, first-out (FIFO) basis is also generally acceptable.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Capital allowances. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by the tax law. The following are some of the applicable straight-line rates.

Asset	Rate (%)
Constructions	5 to 20
Plant and machinery and transport equipment	5 to 33.3
Office equipment	To 33.3

An accelerated depreciation method may be used for certain fixed assets, subject to the approval of the tax authorities.

Relief for tax losses. Losses may be carried forward five years; losses attributable to depreciation may be also carried forward for five years. Losses may not be carried back.

Groups of companies. Gabonese law does not allow the filing of consolidated tax returns. Tax rules applicable to groups of companies are discussed below.

Corporate income tax. Costs incurred within a group are deductible for tax purposes. These costs include assistance fees, interest on partner current accounts and rentals of goods within the group.

Capital gains derived from intragroup operations are taxable at a reduced rate of 20% instead of a rate of 30%, unless they are subject to other favorable exemption regimes.

Tax on investment income. Tax on Gabonese-source investment income (for example, dividends) paid to companies of the same group are subject to the Tax on Income from Movable Capital (Impôt sur le Revenu des Capitaux Mobiliers, or IRCM) at a rate of 5%. This income is normally taxable at a rate of 20% (or 10% if the company is located in the CEMAC area).

A 10% rate applies if the income is paid by the head company to a partner who is an individual or legal entity.

Subject to conditions, a tax credit in Gabon may be granted even for tax paid to countries that have not entered into a tax treaty with Gabon.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Business activity tax (*license*); calculated based on the nature of the business, the value of equipment and the number of employees	Various
Registration duties, on transfers of real property or businesses	6 to 8
Social security contributions, on an employee's gross salary limited to XAF1,500,000 per month	
Employer	16
Employee	2.5
Medical health contributions, on an employee's gross salary limited to XAF2,500,000 a month	
Employer	4.1
Employee	2
Value-added tax (VAT); imposed on corporations realizing annual turnover in excess of XAF60 million from general business activities and on corporations realizing annual turnover in excess of XAF500 million from forestry development activities	

Nature of tax	Rate (%)
Standard rate	18
Reduced rate on certain items, such as sugar and cement	10
Reduced rate on certain items, such as water and electricity supply and mineral water produced in Gabon	5
Exports and international transport	0
Withholding tax on local service providers that are not subject to VAT; tax based on the total amount of the invoice	9.5

E. Miscellaneous matters

Foreign exchange controls. The CEMAC Act, dated 21 December 2018, provides exchange-control regulations, which apply to financial transfers outside the franc zone, which is a monetary zone including France and its former overseas colonies.

Specific tax incentive regime on mergers and similar operations. A specific tax incentive regime for mergers and similar operations is available. To benefit from this regime, all of the following conditions must be satisfied:

- The transferee (beneficiary company in the transfer) must have its registered office in Gabon.
- An agreement must be obtained from the Minister of Finance, after approval of the Director General of Taxes if foreign companies are involved in the operation.
- The operation must be justified by economic reasons instead of fiscal reasons.
- The new shares must be held for a period of five years after the transfer.

F. Treaty withholding tax rates

Gabon has signed a multilateral tax treaty with the CEMAC members, which were formerly members of the Central African Economic and Customs Union (UDEAC). Gabon has also entered into tax treaties with Belgium, Canada, France, Italy, Morocco, Saudi Arabia and the United Arab Emirates. The withholding rates under the CEMAC multilateral treaty and the treaties with Belgium, Canada, France, Italy, Morocco, Saudi Arabia and the United Arab Emirates are listed in the following table.

	Dividends %	Interest %	Royalties %
Belgium	15	15	10
Benin	15	15	– (a)
Cameroon	15	15	– (a)
Canada	15	10	10 (a)
Central African Republic	15	15	– (a)
Chad	15	15	– (a)
Congo (Republic of)	15	15	– (a)
Equatorial Guinea	15	15	– (a)
France	15	10	10
Italy	15	10	10
Morocco	15	10	10
Saudi Arabia	5	7.5	10 (b)
United Arab Emirates	10	7	10 (c)
Non-treaty jurisdictions	20	25	25

(a) Withholding tax is not imposed, but the income is subject to tax in the state of the recipient.

(b) The rate is also 10% for remuneration for technical services.
(c) The rate is 7.5% for remuneration for technical services.

Because of the rapidly changing economic and political situation in Georgia, frequent changes are introduced to the Tax Code of Georgia. As a result, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	15/20 (a)
Capital Gains Tax Rate (%)	15 (b)
Withholding Tax (%)	
Dividends	5
Interest	5
Royalties	5 (c)
Management Fees	10 (c)
Income from International Transport or International Communications	10 (c)
Income from Oil and Gas Operations	4 (c)
Interest, Royalties and Payments of Other Georgian-Source Income to Companies Registered in Low-Tax Jurisdictions	15
Payments of Other Georgian-Source Income	10 (c)
Branch Remittance Tax	0

(a) Resident companies and permanent establishments of nonresident companies are not subject to tax on their income. They are subject to tax at a rate of 15% only on distributed profits and certain payments made. The tax rate is applied to the taxable object divided by a specified percentage. The tax rate for banking institutions, credit unions, microfinance organizations and loan provider entities is set at 20%. Such entities pay corporate income tax on the difference between the gross taxable income and the amount of deductions stipulated under the Tax Code of Georgia (TCG). For further details, see Section B.

(b) Resident companies and permanent establishments of nonresident companies are not subject to tax on their capital gains received. They are subject only to tax at a rate of 15% on distributed profits. Nonresident companies without a permanent establishment in Georgia are subject to tax at a rate of 15% on their capital gains derived from Georgian sources. For further details, see Section B.

(c) These withholding taxes apply to payments to foreign companies.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies and permanent establishments of nonresident companies are not subject to tax on their generated but not yet distributed profits. They are subject only to tax on the following taxable objects:
- Distributed profits
- Expenses incurred and other payments not related to economic activity
- Free-of-charge supplies of goods or services and transfers of funds
- Representative expenses exceeding statutory limits prescribed by the TCG

Distributed profits. Distributed profit consists of cash or non-cash dividends distributed by a legal entity to its partners or shareholders.

Activities that are not considered distributions of profits include, among others, the following:
- Distributions of dividends among Georgian legal entities
- Distributions of dividends received from foreign enterprises (other than companies registered in low-tax jurisdictions)
- Further distribution of dividends received by corporations, companies, firms and similar entities established under the legislation of a foreign country, regardless of whether they have legal entity status (other than permanent establishments of foreign enterprises), that have transferred their place of management to Georgia

Repatriations of profits attributable to permanent establishments of nonresident entities are treated as distributions of profits. Profit attributable to a permanent establishment is a profit that the permanent establishment would have made if it were a distinct and separate enterprise engaged in the same or similar activities under the same or similar conditions.

Distributions of profits include the following:
- Transactions conducted with related resident entities that are not subject to tax on distributions of profit if the contractual price of such transactions differs from the market price
- International controlled transactions that are not at arm's length
- Transactions conducted with persons that are exempt from corporate income tax or personal income tax under the TCG if the contractual price of such transactions differs from the market price

Incurred expenses and other payments not related to economic activity. The TCG contains a list of expenses or payments that are subject to corporate income tax. Such expenses include, among others, expenses that are not documentarily proven or that were not incurred for the purpose of deriving profit, income or compensation. In addition, certain payments to persons registered in low-tax jurisdictions are taxable.

Free-of-charge supplies of goods and services and transfers of funds. Supplies that are not aimed at gaining profit, income or compensation are considered to be free of charge. In addition, a shortage of inventory or fixed assets is considered a free-of-charge supply and is subject to corporate income tax.

Free-of-charge supplies of goods or services are exempt from tax under the following circumstances:
- The supply was taxed at the source of payment.
- The supply represents a donation to a charitable organization and does not exceed 10% of the net profit for the preceding calendar year.
- The recipient of the goods, services or funds is a state authority, municipal body or legal entity of public law.
- The recipient of the goods, services or funds is a resident enterprise or a nonresident enterprise conducting business in Georgia through a permanent establishment that is subject to tax on distributed profits as mentioned above.

Representative expenses. Representative expenses exceeding 1% of revenues or expenses (whichever is greater) for the preceding calendar year are taxable.

Other. The tax base of banking institutions, credit unions, microfinance organizations and loan provider entities is determined as the difference between the gross taxable income and the amount of deductions stipulated under the TCG.

Foreign legal entities without a permanent establishment in Georgia are subject to withholding tax on their Georgian-source income at a rate of 4%, 5%, 10% or 15% (see Section A).

The object of corporate income taxation of a nonresident enterprise earning income from the sale of property in Georgia that is not related to the activity of its permanent establishment in Georgia is the difference between the gross income earned from a Georgian source during a calendar year and the amount of the deductions with respect to the earning of the income.

The object of corporate income taxation of a nonresident enterprise earning remuneration for the lease or rental of property from a person who is not a tax withholding agent is the difference between the gross income earned from a Georgian source during the calendar year and the amount of the deductions with respect to the earning of the income.

Tax rates. The regular corporate income tax rate is 15%. To calculate corporate income tax, the tax rate is applied to the taxable objects described above divided by 0.85.

The tax rate for banking institutions, credit unions, microfinance organizations and loan provider entities is set at 20%.

Special types of enterprises. The Georgian tax law provides for beneficial tax treatment for enterprises operating in Georgia with the following statuses:
- International Company
- Special Trade Company
- Free Industrial Zone Company
- Virtual Zone Person
- Tourist Enterprise
- Agricultural Cooperative
- Investment Fund

The Georgian Tax Authorities (GTA) grant the above statuses according to the rules defined by the Minister of Finance of

Georgia or the Government of Georgia. The statuses are described below.

International Company. An International Company is a Georgian enterprise engaged in information technologies or maritime operations that performs certain activities defined by the decree of the Government of Georgia and earns income only from those activities. An International Company pays corporate income tax at a 5% rate.

Special Trade Company. An entity conducting its activities in an authorized warehouse may be granted Special Trade Company status for corporate income tax exemption purposes. A Special Trade Company may supply and re-export foreign goods from a customs warehouse, as well as purchase foreign goods from an entity without such status for further supply or re-export. A Special Trade Company may also derive income (including Georgian-source income) from other allowable activities if such income does not exceed the sum of GEL1 million and 5% of the customs value of foreign goods brought into Georgia. In addition, a Special Trade Company may derive income exempted from corporate income tax and from the sale of fixed assets used in economic activities for more than two years. A Special Trade Company is prohibited from importing or purchasing Georgian goods for further supply, rendering of services in Georgia to a Georgian entity, individual entrepreneur and/or to a permanent establishment of a foreign enterprise and operating a customs warehouse. The status of Special Trade Company is canceled for a calendar year if an authorized representative of such company submits an application to the GTA at least five business days before the beginning of the relevant calendar year. A Special Trade Company is exempt from corporate income tax on distributed profits received from allowable activities except for income received from the sale of fixed assets.

Free Industrial Zone Company. Free Industrial Zone Company status for tax purposes may be granted to a company operating in a Free Industrial Zone. Free Industrial Zone Companies primarily engage in the manufacturing and export of goods outside Georgia from a Free Industrial Zone. The status of Free Industrial Zone Company is subject to cancellation if the company engages in activities prohibited by the law. Free Industrial Zone Companies are exempt from corporate income tax on distributed proceeds from activities allowed within a Free Industrial Zone.

Virtual Zone Person. Virtual Zone Person status for tax purposes may be granted to a company engaged in information technology activities. Virtual Zone Persons are exempt from corporate income tax on distributions of profits derived from the supply of self-produced information technology outside Georgia.

Tourist Enterprise. Tourist Enterprise status for tax purposes may be granted to a company that builds a hotel for the purpose of the sale and leaseback of the assets, or part of the assets, of the hotel and uses the building in hotel operations. Distribution of profit derived from the rendering of hotel services and the incurrence of expenses in the course of such activity by tourist enterprises are exempt from corporate income tax until 1 January 2026.

Agricultural Cooperative. Agricultural Cooperative status for tax purposes may be granted to a company in accordance with the Law of Georgia on "Agricultural Cooperative." Agricultural Cooperatives are exempt from corporate income tax on distributed profits derived from the initial supply of agricultural products produced in Georgia before industrial processing of the products (that is, a change of commodity code occurs) until 1 January 2026.

Investment Fund. An Investment Fund is an enterprise established in the form of a joint investment fund or investment company in accordance with the Law of Georgia on Investment Funds.

Profits distributed, expenses incurred and other payments not related to economic activity, free-of-charge supplies of goods or services or transfers of funds and representative expenses exceeding set statutory limits by the joint investment fund within the framework of the activities defined by the Law of Georgia on Investment Funds are not subject to corporate income tax.

Expenses incurred and other payments not related to economic activity, free-of-charge supplies of goods or services or transfers of funds and representative expenses exceeding set statutory limits by an investment company within the framework of the activities defined by the Law of Georgia on Investment Funds are not subject to corporate income tax.

If the recipient of a dividend is a nonresident or a natural person and if the investment company invests only in bank deposits and/or financial instruments, except in the case of distributions of profits received from resident enterprises, distributions of profits by an investment company are taxed at 5%; otherwise, the rate is 15%; that is, the 15% rate applies when the investment company distributes the profit to a nonresident or a natural person, unless the investment company invests only in bank deposits and/or financial instruments.

Distributions of profits by an investment company to a nonresident or a natural person are exempt from corporate income tax if the profits meet any of the following conditions:

- They are not paid out of Georgian-source income.
- They are paid out of income of a resident legal person from the supply of equity securities issued through a public offering in Georgia and admitted for trading on an organized market recognized by the National Bank of Georgia (NBG).
- They are paid out of income derived by a resident legal person from the sale of loan securities issued through a public offering in Georgia and admitted for trading on an organized market recognized by the NBG.
- They are paid out of surplus derived from the sale of loan securities issued by the government of Georgia or international financial institutions or are paid out of income received as interest from these securities or deposits placed in commercial banks.

Capital gains. No separate capital gains tax is imposed in Georgia. Capital gains derived by resident companies and permanent establishments of nonresident companies are not subject to corporate income tax until they are distributed.

Capital gains from the supply of treasury bonds are exempt from taxation.

In addition, the following types of capital gains derived by nonresidents without a permanent establishment in Georgia are exempt from taxation:
- Gains from the supply of bonds issued through a public offering by a resident entity in Georgia and admitted for trading on the organized market recognized by the NBG
- Gains from the supply of equity securities issued through a public offering by a resident entity in Georgia and admitted for trading on the organized market recognized by the NBG

Administration. The reporting period for the entities subject to corporate income tax on distribution of profit is a calendar month. Such entities must submit a corporate income tax return and pay the respective tax by the 15th of the month following the reporting month.

The reporting period for banking institutions, credit unions, microfinance organizations and loan provider entities is a calendar year. Such entities must file an annual corporate income tax return and make a balancing payment of corporate income tax by 1 April of the year following the reporting year.

Interest is charged on late tax payments at a rate of 0.05% of the tax due for each day of delay. If the submission of a tax return is delayed for up to two months, the penalty is 5% of the tax payable based on this tax return. If submission of a tax return is delayed for more than two months, the penalty is 10% of the tax payable based on this tax return. A penalty is also imposed for the understatement of tax liability. If understated tax does not exceed 5% of the reported tax, a penalty equaling 10% of the understated amount is imposed. The same penalty applies if the understatement results from a change of a tax point by the tax authorities. If the understated tax amounts to 5% to 20% of the reported tax, a penalty equaling 25% of the understated amount applies. In any other case, a penalty equaling 50% of the understated amount is imposed. No penalty is imposed if a taxpayer voluntarily files an adjusted tax return before an order on the tax offense or on the conducting of a tax inspection is issued.

Dividends. A dividend withholding tax is imposed on dividends paid by Georgian enterprises to individuals, not-for-profit companies and foreign legal entities. However, dividends paid to Georgian legal entities are not subject to withholding tax. The current dividend withholding tax rate is 5%.

The following types of dividends are not subject to withholding tax:
- Dividends paid by International Companies
- Dividends paid by Free Industrial Zone Companies
- Dividends paid by Agricultural Cooperatives to their members until 1 January 2026
- Dividends paid by an Investment Fund to a natural person or nonresident enterprise
- Dividends paid out of profits attributable to 2023 and subsequent periods by banking institutions, credit unions, microfinance organizations and loan provider entities

Interest. An interest withholding tax is imposed on interest payments made by permanent establishments of nonresidents or residents or on their behalf to individuals, organizations or nonresidents without a permanent establishment in Georgia.

The current interest withholding tax rate is 5%.

The following types of interest payments are not subject to withholding tax:
- Interest paid by financial institutions licensed according to the Georgian law
- Interest paid by Free Industrial Zone Companies
- Interest paid on bonds issued by Georgian entities and listed on recognized foreign stock exchanges

Foreign tax relief. Foreign income tax paid on income generated from foreign sources may be credited against Georgian tax imposed on the same income, limited to the amount of such Georgian tax (that is, up to the amount of corporate income tax that would have been payable on such income in Georgia). To credit foreign tax paid abroad, payment evidence should be provided to the GTA.

C. Determination of taxable income

General. The tax base of banking institutions, credit unions, microfinance organizations and loan provider entities equals the difference between the gross taxable income and the amount of deductions stipulated under the TCG. Consequently, the rules provided below in this section apply only to these entities.

Taxable income of entities mentioned above is computed on the basis of International Financial Reporting Standards, modified by certain tax adjustments. It includes the following:
- Trading income
- Capital gains
- Income from financial activities
- Assets received free of charge
- Works and services
- Other items of income

Income received in foreign currency is converted into Georgian lari (GEL) at the daily exchange rate determined by the NBG for the date of receipt of the income.

Banking institutions, credit unions, microfinance organizations and loan provider entities may deduct from gross income all documented expenses contributing to the generation of such income. However, certain expenses are nondeductible or partially deductible for tax purposes.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); imposed on goods and services supplied in Georgia and on imported goods; reverse-charge VAT is imposed on works and services carried out in Georgia by nonresident entities	18

Nature of tax	Rate (%)
Property tax; on the average annual net book value of fixed assets	1
Property tax for leasing companies on leased assets	0.6

Georgia also imposes import and excise taxes.

E. Miscellaneous matters

Foreign-exchange controls. The Georgian currency is the lari (GEL). The lari is a non-convertible currency outside Georgia. Enterprises may buy or sell foreign currencies through authorized banks or foreign-exchange offices in Georgia.

Georgia does not impose restrictive currency-control regulations. Enterprises may open bank accounts abroad without any restriction if they declare such accounts (other than deposit accounts) with the GTA within five working days after opening such accounts. In general, all transactions performed in Georgia must be conducted in lari. Transactions with nonresident entities can be conducted in other currencies.

Transfer pricing. Under the transfer-pricing (TP) rules set by the TCG, the arm's-length principle applies to transactions carried out by taxpayers with related parties. The TP rules generally apply to cross-border transactions between related parties. These rules may also apply to transactions between a Georgian resident entity and an unrelated foreign entity that is a resident of a low-tax jurisdiction and transactions between a Georgian company and its permanent establishment.

The generally accepted transfer-pricing methods include the following:
- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Net profit margin method
- Profit split method

The Minister of Finance of Georgia is authorized to provide detailed descriptions of TP methods, their application rules and other procedural rules.

In 2013, the Minister of Finance of Georgia enforced the Instruction "On Pricing International Controlled Transactions," which is in accordance with the TCG provisions. The Instruction covers the following items:
- Scope of transactions subject to Georgian transfer-pricing rules
- Acceptable transfer-pricing methods
- Comparability criteria
- Information sources
- Arm's-length range
- Procedure for advance pricing agreements
- Transfer-pricing documentation requirements
- Other procedural issues

It also outlines required actions for companies doing business in Georgia.

Thin capitalization. The thin-capitalization rules were abolished, effective from 1 January 2017.

F. Treaty withholding tax rates

Georgia has entered into tax treaties with 58 jurisdictions. The table below lists the withholding tax rates under these treaties. In general, if the withholding tax rate provided in a treaty exceeds the rate provided by the TCG, the latter rate applies.

	Dividends %	Interest %	Royalties %
Armenia	5/10 (a)	10	5

(a) The 5% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least a 25% share in the capital of the payer of the dividends. The 10% rate applies in all other cases.

(b) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends. The 10% rate applies in all other cases.

(c) The 5% rate applies if the beneficial owner of the dividends is a company that holds at least 25% of the capital of the payer of the dividends. The 15% rate applies in all other cases.

(d) The 0% rate applies if the recipient is the beneficial owner of interest on a commercial debt-claim, including a debt-claim represented by commercial paper, resulting from deferred payments for goods, merchandise or services supplied by an enterprise or if the recipient is the beneficial owner of interest on a loan of any nature that is not represented by a bearer instrument and that is granted by a banking enterprise. The 10% rate applies in all other cases.

(e) The 5% rate applies if the beneficial owner of the royalties is a company. The 10% rate applies in all other cases.

(f) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies in all other cases.

(g) The 0% rate applies if the recipient is the beneficial owner of interest on credit sales of industrial, commercial or scientific equipment. The 8% rate applies in all other cases.

(h) The 0% rate applies if the recipient is the beneficial owner of royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, except for computer software and including cinematographic films, and films or tapes for television or radio broadcasting. The 5% rate applies if the recipient is the beneficial owner of royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies if the recipient is the beneficial owner of royalties paid for the use of, or the right to use, patents, trademarks, designs or models, planes, secret formulas or processes, computer software or information concerning industrial, commercial or scientific experience.

(i) The 0% rate applies if either of the following circumstances exists:
- The actual recipient of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR2 million (or the equivalent amount in Danish krone or Georgian lari).
- The beneficial owner of the dividends is the other contracting state or the central bank of that other state, any national agency or any other agency (including a financial institution) owned or controlled by the government of the other contracting state.

The 5% rate applies if the actual recipient is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Danish krone or Georgian lari). The 10% rate applies in all other cases.

(j) The 0% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR2 million (or the equivalent amount in Georgian lari). The 5% rate applies if the

actual recipient is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.

(k) The 0% rate applies if the actual recipient of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR3 million (or the equivalent amount in Georgian lari). The 5% rate applies if the actual recipient is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.

(l) The 0% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR3 million (or the equivalent amount in any currency). The 5% rate applies if the actual recipient is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in any currency). The 10% rate applies in all other cases.

(m) The 5% rate applies if the beneficial owner of the royalties is a resident of the other contracting state and receives royalties for the use of, or the right to use, industrial, commercial or scientific equipment. The 8% rate applies in all other cases.

(n) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

(o) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends and that has invested in the payer at least EUR75,000. The 15% rate applies in all other cases.

(p) The 0% rate applies if the actual recipient of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR2 million (or the equivalent amount in Georgian lari). The 5% rate applies if the actual recipient is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.

(q) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than USD2 million (or the equivalent amount in euros or Georgian lari). The 5% rate applies if the recipient is a company that holds at least 10% of the capital of the payer of the dividends. The 15% rate applies in all other cases.

(r) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

(s) In general, the 0% rate applies if the beneficial owner of the dividends is a resident of the other contracting state. However, if the beneficial owner of the dividends is a pension scheme and if dividends are paid out of income derived directly or indirectly from immovable property within the meaning of Article 6 of the treaty by an investment vehicle that distributes most of this income annually and whose income from such immovable property is exempt from tax, the 15% rate applies.

(t) The 5% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends. The 15% rate applies in all other cases.

(u) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership that is not liable to tax) that has held directly at least 25% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months before the decision to distribute the dividends. The 5% rate applies in all other cases.

(v) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

(w) The 0% rate applies if the beneficial owner of the dividends is any of the following:
- A company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends
- The other contracting state or the central bank of the other contracting state

- A pension fund or other similar institution providing pension schemes in which individuals may participate to secure retirement benefits if such pension fund or other similar institution is established and recognized for tax purposes in accordance with the laws of the other state

The 5% rate applies in all other cases.

(x) The 0% rate applies if the beneficial owner of the dividends is a company that has invested in the payer more than USD3 million (or the equivalent amount in Georgian lari). The 5% rate applies in all other cases.

(y) The 0% rate applies to pension funds and recipients of interest on corporate bonds traded on a stock exchange in the other state and issued by a company that is a resident of that state. The 5% rate applies in all other cases.

(z) The 5% rate applies if the beneficial owner of the dividends is a resident of the other contracting state. The 10% rate applies if dividends are deductible in computing the taxable income of the company paying the dividends.

(aa) The 0% rate applies if the beneficial owner of the dividends is a company (or partnership) that holds at least 10% of the capital or the voting power of the company paying the dividends. The 10% rate applies in all other cases.

A. At a glance

Corporate Income Tax Rate (%)	15 (a)
Trade Tax Rate (Average Rate) (%)	14
Capital Gains Tax Rate (%)	15 (a)(b)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%)	
Dividends	25 (a)(c)(d)(e)

Interest	0/25 (f)(g)
Royalties from Patents, Know-how, etc.	15 (a)(b)(g)(h)(i)
Remuneration to Members of a Supervisory Board	30 (i)
Payments for Construction Work	15 (a)(c)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	2 (j)
Carryforward	Unlimited (k)

(a) A 5.5% solidarity surcharge is imposed (see Section B).
(b) See *Capital gains and losses* in Section B for the taxation of capital gains derived from sales of shares.
(c) On application, these rates may be reduced by tax treaties.
(d) This withholding tax applies to dividends paid to residents and nonresidents. For dividends paid to nonresident corporate entities, this rate may be reduced to 15% if the nonresident dividend recipient qualifies as an eligible recipient under the German anti-treaty shopping rules.
(e) These rates may be reduced under the European Union (EU) Parent-Subsidiary Directive. Under the EU Parent-Subsidiary Directive, on application, a withholding tax rate of 0% applies to dividends distributed by a German subsidiary to an EU parent company if the recipient has owned 10% or more of the share capital of the subsidiary for a continuous period of 12 months at the time the dividend distribution takes place and if the German anti-treaty shopping rules do not apply.
(f) A 25% interest withholding tax is imposed on, among others, the following types of interest:
- Interest paid by financial institutions
- Interest from over-the-counter business
- Interest from certain types of profit-participating and convertible debt instruments

Interest secured by domestic real estate is subject to tax for nonresidents, but not subject to withholding tax (self-declaration). The interest withholding tax is not imposed on classic ("plain vanilla") loans. Nonresidents may apply for a refund of the withholding tax if a treaty exemption applies. If a nonresident is required to file an income tax return in Germany, the withholding tax is credited against the assessed corporate income tax or refunded.
(g) These rates may be reduced by tax treaties or under the EU Interest-Royalty Directive. Under the EU Interest-Royalty Directive, on application, German withholding tax is not imposed on interest and royalties paid by a German resident company to an associated company located in another EU Member State. To qualify as associated companies, a minimum 25% shareholding or a common parent is required, among other requirements.
(h) The withholding tax rate on royalties from patents, know-how and similar items is 15% for payments to nonresident corporations if such items are registered in Germany or used in a German business. Certain royalty income and capital gains related to registered rights are only taxed in intragroup cases without treaty protection and in certain cases that involve jurisdictions from the EU prohibited list of non-cooperative jurisdictions.
(i) This withholding tax applies to payments to nonresidents only.
(j) The loss carryback, which is optional, is available for corporate income tax purposes, but not for trade income tax purposes. The maximum carryback had been increased temporarily from EUR1 million to EUR10 million for the 2020 to 2023 tax years. From 2024 onward, the maximum carryback of EUR1 million will apply. A two-year loss carryback is available as from 2022.
(k) The carryforward applies for both corporate income tax and trade tax purposes. The maximum loss carryforward that may be used for corporate and trade tax purposes is restricted to EUR1 million for each tax year plus 60% (from 2024 to 2027: 70%, applicable for corporate income tax purposes, but not for German trade tax purposes) of annual taxable income exceeding EUR1 million (so-called minimum taxation). The carryforward is subject to the change-of-ownership rule (see Section C).

B. Taxes on corporate income and gains

Corporate income tax. Corporations, such as stock corporations (Aktiengesellschaft, or AG) and limited liability companies (Gesellschaft mit beschraenkter Haftung, or GmbH), that have

their corporate seat or place of management in Germany (resident corporations) are subject to corporate income tax (Koerperschaftsteuer) on worldwide income, unless otherwise provided in tax treaties.

A nonresident corporation, whose corporate seat and place of management are located outside Germany, is subject to corporate income tax only on income derived from German sources. Income from German sources includes, among other items, business income from operations in the country through a branch, office or other permanent establishment, including a permanent representative, and income derived from the leasing and disposal of real estate located in Germany (including capital gains from the sale of real estate holding companies) as well as rights registered in a German public register. Certain royalty income and capital gains related to registered rights are only taxed in intragroup cases without treaty protection and in certain cases that involve jurisdictions from the EU prohibited list of non-cooperative jurisdictions.

Rates of corporate income tax. Corporate income tax is imposed at a rate of 15% on taxable income, regardless of whether the income is distributed or retained.

A 5.5% solidarity surcharge is imposed on corporate income tax, resulting in an effective tax rate of 15.825%. Prepayments of corporate income tax and withholding tax payments are also subject to this surcharge.

Trade tax. Municipalities impose a trade tax on income. However, for purposes of this tax, taxable income is subject to certain adjustments. The major adjustments include a 25% add-back of interest expenses with respect to debt, a 6.25% add-back of license payments, a 5% add-back of lease payments for movable assets and a 12.5% add-back of lease payments for immovable assets. The trade tax add-backs apply to the extent that the total amount of add-backs exceeds EUR200,000 for the 2020 and future tax years (EUR100,000 for tax years prior to 2020). The effective average trade tax rate amounts to approximately 14%. Taking into account the various municipality multipliers, the combined average tax rate for corporations (including corporate income tax, solidarity surcharge and trade tax) ranges from approximately 23% to 33%.

If a company operates in several municipalities, the tax base is allocated according to the payroll paid at each site. Certain enterprises, such as specified banks and real estate companies, receive privileged treatment under the trade tax law.

Withholding tax on construction work. Enterprises and entities that are corporate bodies under public law (for example, cities and municipalities) must withhold a tax of 15% from payments made for construction work provided in Germany. The tax must be withheld even if the work provider does not have a tax presence in the form of a permanent establishment or permanent representative in Germany unless the work provider obtains a "certificate of non-taxation" from the competent tax office. Construction work providers may obtain a refund of the withholding tax if they can prove that no German tax liability against which the withholding tax could be applied exists.

Temporary solidarity contribution of fossil fuel sector. For 2022 and 2023, Germany introduced the temporary solidarity contribution to implement the EU regulation on emergency measures to mitigate high energy prices and the risk of supply shortages. The solidarity contribution rate is 33%. It is levied on the surplus profits of companies that generate at least 75% of their proceeds through extraction, mining or refining of petroleum or manufacturing of coke oven products. Surplus profits are profits in excess of a 20% increase on the average taxable profits of the previous four fiscal years starting on or after 1 January 2018. The solidarity contribution is levied in addition to the corporate income tax and is not tax deductible. It is collected by the Federal Tax Office.

Capital gains and losses. Capital gains of corporations, except those derived from sales of shares, are treated as ordinary income. However, rollover relief is granted if gains derived from disposals of real estate are reinvested in real estate within the following four years and if certain other conditions are met. The period for possible reinvestments has been extended temporarily for reinvestment periods that regularly expired after 29 February 2020 and prior to 1 January 2023. In these cases, the reinvestment period ends at the end of the business year ending after 31 December 2022 and before 1 January 2024.

Capital gains derived by corporations from sales of shares in corporations are generally exempt from corporate income tax and trade tax. Five percent of the capital gain is deemed to be a nondeductible expense. As a result, the exemption is effectively limited to 95% of the capital gain. Based on case law, the 5% deemed expense add-back should not apply to nonresident corporate sellers, even if the nonresident seller cannot claim treaty protection. The 95% tax exemption for capital gains received by a corporate shareholder is not granted to banks, financial services institutions and financial enterprises that purchase shares with the intention of realizing short-term profits for their own account or to certain insurance companies.

However, to the extent that write-downs of the shares have previously been deducted for tax purposes, capital gains from sales of shares are not exempt.

Capital gains derived from the disposal of tainted shares are, in principle, effectively 95% exempt from tax. Tainted shares may result from corporate reorganizations (for example, contributions of qualifying businesses or partnership interests into corporations in return for shares or share swaps) that are carried out at tax book values or below fair market values. The subsequent disposal of the tainted shares results in a (full or partial) retroactive taxation of the original reorganization that gave rise to the share taint. In general, after a seven-year holding period, the shares lose their taint.

In general, capital losses are deductible. However, capital losses are not deductible if a gain resulting from the underlying transaction would have been exempt from tax. Consequently, capital losses from sales of shares or write-downs on shares are generally not deductible. In addition, capital losses and write-downs on loans to related parties may not be deductible. However, losses from exchange-rate fluctuations in connection with shareholder loans are deductible in 2022 and future tax years.

Administration. The tax year is the calendar year. If a company adopts an accounting period that deviates from the calendar year, tax is assessed for the taxable income in the accounting period ending within the calendar year. The adoption of a tax year other than the calendar year requires the consent of the tax office.

Annual tax returns must, in general, be filed by 31 July of the year following the tax year. However, an extended deadline until the last day of February of the second year following the tax year applies if a tax professional prepares the return. The deadline for filing the tax returns for the 2019 to 2024 tax years has been extended due to the COVID-19 pandemic crisis.

Payments made with respect to the estimated corporate income tax liability, usually determined at one-quarter of the liability for the previous year, are due on 10 March, 10 June, 10 September and 10 December. Prepayments of trade tax are due on 15 February, 15 May, 15 August and 15 November. Final payments are due one month after the tax assessment notice issued by the tax authorities is received by the taxpayer.

Additional tax payments and tax refunds are generally subject to interest of 0.15% per month (for interest periods before 2019: 0.5% per month). Interest begins to accrue 15 months after the end of the calendar year for which the tax was incurred. The interest is not deductible for corporate income and trade tax purposes if the tax itself is not deductible. Late payment penalties are charged at 1% a month if the unpaid balance is not settled within one month from the date of the assessment notice issued by the tax office. A penalty of 0.25% and up to EUR25,000 can be assessed if the tax return is not filed by the due date, including extensions granted.

Dividends. Dividends received by German corporations and branches of nonresident corporations from their German and foreign corporate subsidiaries are exempt from tax. However, a minimum shareholding requirement of 10% applies for this participation exemption for corporate income tax purposes. In addition to this domestic rule, an applicable tax treaty may provide for an exemption for foreign dividends. The tax exemption for dividends is granted only if the dividend payment is not tax-deductible as a business expense at the level of the distributing entity (linking rule).

Five percent of the tax-exempt dividend income is treated as a nondeductible expense, while the expenses actually incurred are deductible. Consequently, only 95% of the dividends received by a corporation is effectively exempt from tax. The 95% tax exemption for dividends received by a corporate shareholder is not granted for portfolio dividends (less than 10% shareholding) or to banks, financial services institutions and financial enterprises that purchase shares with the intention of realizing short-term profits for their own account or to certain insurance companies.

The participation exemption applies for trade tax purposes if the dividends are received from corporations in which the parent holds at least 15% as of 1 January of the calendar year in which the taxpayer's fiscal year ends.

Foreign tax relief. Under German domestic tax law, income from foreign sources is usually taxable, with a credit for the foreign income taxes paid, up to the amount of German tax payable on the foreign-source income, subject to per-country limitations. The foreign tax relief does not apply for foreign tax-exempt income. Excess foreign tax credit cannot be carried back or carried forward. Instead of a foreign tax credit, a deduction may be claimed for foreign income tax. This may be beneficial in loss years and in certain other instances. In general, German tax treaties provide for an exemption from German taxation of income from foreign real estate and foreign permanent establishments (activity requirements generally apply).

C. Determination of trading income

General. Taxable income of corporations is based on the annual financial statements prepared under German generally accepted accounting principles (GAAP), subject to numerous adjustments for tax purposes. After the annual financial statements have been filed with the tax authorities, they may be changed only to the extent necessary to comply with GAAP and the tax laws.

Acquired goodwill must be capitalized for tax purposes and may be amortized over 15 years. Intangibles acquired individually must also be capitalized for tax purposes and may be amortized over their useful lives. A company's own research and development and startup and formation expenses may not be capitalized for tax purposes. They must be currently expensed.

Inventories. Inventory is generally valued at acquisition cost or production cost, unless a lower value (that is, the lower of reproduction or repurchase cost and market value) is indicated. Under certain conditions, the last-in, first-out (LIFO) method can be used to value inventory assets if the assets are of a similar type.

Provisions. In general, provisions established under German GAAP are accepted for tax purposes. However, in past years, the scope of tax-deductible provisions has been limited by certain rules, including, among others, the following:

- Liabilities or accruals of obligations whose fulfillment is contingent on future revenue or profit may be recorded only when the condition occurs.
- Provisions for foreseeable losses from open contracts may not be recorded.
- Future benefits arising in connection with the fulfillment of an obligation must be offset against costs resulting from the obligation.
- Non-monetary obligations may be accrued using the direct cost and the necessary indirect cost.
- Provisions for obligations resulting from the operation of a business must be built up in equal increments over the period of operation.
- Provisions for pension obligations must be calculated on an actuarial basis using an interest rate of 6% and built up over the period of employment.
- Provisions for non-interest-bearing debt must be discounted at an annual rate of 5.5% if the remaining term exceeds 12 months.

If built-in losses contained in the above provisions or liabilities materialize on their transfer at fair market value, the resulting losses may generally only be deducted for tax purposes over a period of 15 years.

Depreciation. For movable fixed assets, tax depreciation must generally be calculated using the straight-line method. However, for movable assets purchased or manufactured after 31 December 2019 and before 1 January 2023, the declining-balance method can be applied by depreciating a fixed percentage of the residual tax book value (not exceeding 25%) per year and capped at 2.5 times of the depreciation percentage that would apply using the straight-line method. For movable assets purchased or manufactured from April 2024 to December 2024, the declining-balance method can be applied by depreciating a fixed percentage of the residual tax book value (not exceeding 20%) per year and capped at two times of the depreciation percentage that would apply using the straight-line method. For newly constructed residential buildings purchased or produced after 30 September 2023 and before 1 October 2029, the declining-balance method can be applied at a rate of 5%. Furthermore, according to a circular of the Federal Ministry of Finance, the useful life of certain digital assets (hardware, software and peripherals) is set at one year, leading to immediate write-offs. The measure is applicable for tax years ending after 31 December 2020. It may be applied to digital assets acquired before that date if not fully depreciated. Movable assets with acquisition costs that do not exceed EUR800 can be fully depreciated in the year of acquisition, regardless of their useful lives. Useful lives of fixed assets are published by the Federal Ministry of Finance, based primarily on tax audit experience; deviation from published useful life is possible, but requires justification by the taxpayer. Tax depreciation rates for buildings are provided by law. Schedules for assets specific to certain industries are also available. The following are some of the straight-line rates under the general list.

Asset	Rate (%)
Office equipment	7.7 to 20
Motor vehicles	8 to 16.6
Plant and machinery	4 to 20
Airplanes	5 to 8
Personal computers or notebooks and related equipment	33.3 to 100
Nonresidential buildings (offices, retail and factories) and building applications after 31 March 1985	3
All other cases, depending on completion of building	
After 31 December 2022	3
Prior to 1 January 2023 and after 31 December 1924	2
Prior to 1 January 1925	2.5

Preferential and enhanced depreciation availability. Under certain conditions, small companies (companies with business assets of less than EUR200,000 in the year of the deduction) can claim "investment deductions" (Investitionsabzugsbetrag) of up to 50% of the estimated future investment of movable tangible assets,

provided they are made within a three-year period. These types of businesses are also allowed to write off up to 20% of the total effective investment costs in the year of the investment up to the following four years. For movable tangible assets purchased or produced after 30 December 2023, the depreciation rate of 20% is increased to 40%.

Special depreciation rule for new rental apartments and buildings. In addition to the regular straight-line depreciation for buildings, a special depreciation of 5% of acquisition or production costs in the year of acquisition or production and the following three years can be claimed by a taxpayer under certain conditions provided by law (for example, the new apartment or building will be rented out for residential purposes against payment for the following 10 years).

Extraordinary depreciation. A tax deduction for the extraordinary write-down of an asset because of an extraordinary impairment in value is allowed only if the value is permanently impaired. This rule is particularly relevant for assets that are not subject to ordinary depreciation, such as land or shares (however, write-downs of shares are not tax effective; see Section B). For assets that have extraordinarily been written down, the write-down must be reversed as soon as and to the extent that the asset has increased in value.

Disallowed items. After income for tax purposes has been determined, certain adjustments need to be made to calculate taxable income. Major adjustments include the following nondeductible expenses:

- Income taxes (corporate income tax, solidarity surcharge and trade tax) and any interest expense paid with respect to these taxes
- Interest expenses (see *General interest expense limitation*)
- Penalties
- Fifty percent of supervisory board fees
- Thirty percent of business meal expenses
- Gifts to non-employees exceeding EUR50 per person per year and input value-added tax (VAT) regarding such expenses
- Expenses incurred in direct connection with tax-exempt income items (see the discussion of dividends in Section B)

In addition, as a result of the exemption for capital gains derived from sales of shares (see Section B), losses from sales of shares, write-downs of shares or, under certain circumstances, write-downs on loans to related parties are not deductible for tax purposes and must be added back to the tax base.

Anti-hybrid rules. The German anti-hybrid rules primarily focus on the counteraction of hybrid mismatches that lead to either of the following:

- Deductible expenses in Germany with no-tax or low-taxed income at the level of the recipient
- Income from a participation in a reverse hybrid entity resident in Germany that is neither taxable in Germany nor in the country of the partner

The rules that target expenses in Germany are applicable to expenses incurred after 31 December 2019. The rules that target

income that is not taxable in Germany are applicable to income received after 31 December 2021.

Under the anti-hybrid rules, the deductibility of expenses recognized in the Germany income tax base that are either subject to a harmful deduction/non-inclusion mismatch or a double deduction can be partially or fully denied.

Deduction/non-inclusion mismatches are scenarios in which any of the following occurs:

- Income corresponding to German expenses incurred for the use of or in connection with the transfer of capital assets (mostly interest payments) is not taxed or low taxed at the level of the recipient due to a tax qualification or attribution of the capital assets.
- Income corresponding to German expenses is not taxed at the level of the recipient due to the tax treatment of the taxpayer that deviates from German law (hybrid entity) or a deviating assessment of assumed dealings, and no sufficient dual-included income can be documented.
- Income corresponding to German expenses is not taxed at the level of the recipient due to a deviating tax allocation or attribution of income.

Double-deduction scenarios are scenarios in which German expenses are also recognized in any other state for income tax purposes and no sufficient dual-included income can be documented.

The anti-hybrid rules also apply to German expenses for which there is no direct hybrid mismatch but where the income corresponding to the German expenses is offset with expenses subject to a hybrid mismatch abroad (imported mismatches at the level of the direct or indirect recipient). For imported mismatches, it is not required that there be an economic link between the income corresponding to the German expenses and the imported hybrid expenses.

General interest expense limitation. The interest expense limitation rule applies to all loans (that is, group and third-party loans) and to businesses resident in Germany, companies residing abroad but maintaining a permanent establishment in Germany, and partnerships with a German branch.

Under the interest expense limitation rule, the deduction of interest expense exceeding interest income (net interest expense) is limited to 30% of taxable earnings before (net) interest, tax, depreciation and amortization (EBITDA). Tax-exempt income should not be considered in the calculation of the taxable EBITDA. Five percent of the tax-exempt dividend income is considered in the calculation of the taxable EBITDA.

The limitation rule does not apply if one of the following exemption rules applies:

- Exemption threshold: The annual net interest expense is less than EUR3 million.
- Stand-alone escape: There is no related party within the meaning of Section1, Paragraph 2 of the Foreign Tax Act (FTA) and the business does not maintain a permanent establishment in a foreign country.

- Equity-ratio escape: Under the equity-ratio escape, the interest barrier rules do not apply if in a given year the respective entity is part of a consolidated group but its equity ratio is not more than two percentage points below the equity ratio of the consolidated group based on balance sheets of the preceding financial year. The term "group" is defined as the combined group of entities that are consolidated under the applicable accounting standard (International Financial Reporting Standards [IFRS] or local GAAP of an EU Member State). The term "equity ratio" is defined as the ratio of equity to total assets, as reflected in the consolidated accounts of the group on the one hand, and the (stand-alone) accounts of the German business on the other hand. The consolidated accounts of the group generally need to be prepared according to IFRS. Alternatively, the national GAAP of an EU Member State or US GAAP can be used under certain conditions. The accounts of the German business must be prepared in accordance with the same standards used for the group or need to be transformed to the accounting principles of the group. The relevant equity and the relevant total of assets and liabilities of the German business are subject to several adjustments for tax purposes (for example, deduction of the book value of shares in subsidiaries). Those adjustments of the equity and the total assets and liabilities are made in a side calculation. To apply the escape clause, corporations need to prove that no more than 10% of their net interest expenses are owed to shareholders with a direct or indirect participation at a minimum of 25%, or to related parties of such shareholder, or to third parties with recourse to such "harmful" creditors ("harmful shareholder financing"). In other words, the remuneration for debt capital of the individual qualified shareholder must be cumulated when examining the 10% threshold for harmful shareholder financing. For purposes of harmful shareholder financing in the context of the escape clause, related party debt interest is defined as interest paid or accrued on all debt that is granted by a shareholder directly or indirectly holding 25% or more in the debtor, or any party related to such a shareholder, or granted by a third party that has recourse to such "harmful" creditors, if the related party liability is reflected in the consolidated accounts (mainly debt that is granted to a joint venture subsidiary; that is, group internal debt is not harmful for the escape clause since it should not be accounted for in the consolidated accounts).

If the interest barrier rule applies and if 30% of the taxable EBITDA exceeds the net interest expenses (that is, 30% of the taxable EBITDA has not been fully utilized), the unused portion of 30% of the taxable EBITDA can be carried forward over a period of five years. The EBITDA carryforward can be utilized to increase the respective 30% of the taxable EBITDA of the following years for calculating the deductible net interest expenses. The EBITDA carryforward of the earliest year is utilized first. After five years an unused EBITDA carryforward is forfeited.

Nondeductible interest expense can be carried forward indefinitely but is subject to the loss-trafficking rules (see *Tax losses*). A deduction is possible in the following years in accordance with the interest expense limitation rules. The nondeductibility is final in the case of a transfer, merger, termination or liquidation of the

business or in the case of a permanent excess of limitation amounts (that is, net interest expense is permanently higher than 30% of the taxable EBITDA and the exemption clauses are not fulfilled; as a result, the deduction of all of the interest expense is permanently not achievable).

The interest expense limitation rules may be incompatible with German constitutional law according to the German Federal Tax Court, which has referred the case to the German Constitutional Court. At the time of writing, this case was still pending.

Constructive distributions of income. Adjustments to taxable income as a result of a violation of arm's-length principles can be deemed to be constructive distributions of income (see the discussion of transfer pricing in Section E).

Royalty deduction limitation rule. Royalty payments are generally deductible. However, royalties paid to a related person or its affiliates are not fully deductible if the income of the recipient is either not taxed or is subject to a low tax rate due to the application of a preferential regime. The royalty income is considered to be taxed at a low rate if the elective tax rate is below 15% (for royalties paid before 1 January 2024: 25%). Furthermore, the low taxation must be caused by a preferential regime that does not comply with the nexus approach of the Organisation for Economic Co-operation and Development (OECD), according to the Action 5 Final Report of the OECD's Base Erosion and Profit Shifting Project. If the limitation on the deductibility of royalty payments applies, the nondeductible part of the royalty payment is determined by the following ratio:

$$\frac{(15\% - \text{income tax burden as a \%})}{15\%}$$

Tax losses. Tax losses may be carried forward without time limitation. Under the restrictions of the so-called minimum taxation, only 60% (from 2024 to 2027: 70%) of annual taxable profits in excess of EUR1 million can be offset by loss carryforwards. As a result, 40% (from 2024 to 2027: 30%) of the portion of profit exceeding EUR1 million is subject to tax.

This tax loss carryforward rule applies for both corporate income tax purposes and trade tax purposes (the increase within the minimum taxation to 70% applies for corporate income tax purposes but not for trade tax purposes).

For corporate income tax (not trade tax) purposes, an optional loss carryback is permitted for two years (as of 2022) up to a maximum amount of EUR10 million for the 2020 to 2023 tax years. From 2024 onward, the maximum amount of loss carryback of EUR1 million will apply.

Under the German loss-trafficking rule, tax loss carryforwards are forfeited if, within a five-year period, more than 50% of the shares (votes or value) of a loss-making entity is directly or indirectly transferred to a single new shareholder or a group of shareholders. To prevent abuse of the rule, the rule includes a measure under which investors with common interests and acting together are deemed to be one acquirer for the purposes of the rule.

The following exceptions apply to the loss-trafficking rule:
- Group restructuring exception. A transfer of shares is not considered to be harmful if it occurs within a "100% controlled group." A group is considered to be a "100% controlled group" if, after a direct or indirect transfer, the same person owns directly or indirectly 100% of the transferor and transferee, or if the acquirer is holding all of the shares in the seller of the shares or the seller is holding all of the shares in the acquirer of the shares.
- Built-in gain exception. For harmful share transfers, a loss carryforward is not forfeited up to the amount of the loss company's built-in gains to the extent that these built-in gains are taxable in Germany. Consequently, built-in gains allocable to subsidiaries are not taken into account; see the discussion of capital gains and losses in Section B.
- Certain cases of business revitalization.

The carryforward of losses is also allowed in certain limited shareholder change situations if strict business continuation requirements are met.

Loss carryforwards are also forfeited in the course of a merger, change of legal form or liquidation of the loss-making company.

The Federal Constitutional Court has not yet decided if the loss-trafficking tax rule would be incompatible with German constitutional law in case of a change of shareholding of more than 50%; at the time of writing, this question was still pending.

Groups of companies. German tax law provides for a tax consolidation of a German group of companies (Organschaft), which allows losses of group companies to be offset against profits of other group companies. Only German resident companies in which the parent company has held directly or indirectly the majority of the voting rights since the beginning of the fiscal year of the subsidiary may be included (this requirement is known as financial integration). A tax consolidation may cover corporate income tax, trade tax and (with different requirements) VAT. To make the tax group effective for corporate income tax and trade tax purposes, the parent company and the German subsidiaries must enter into a profit-and-loss absorption agreement (Gewinnabfuehrungsvertrag) for a minimum period of five years. A tax group between sister companies is not possible (only vertical; a horizontal tax group is not allowed). Partnerships do not qualify as subsidiaries in a corporate income tax or trade tax group, but they may under certain circumstances be a VAT group subsidiary.

A tax group subsidiary must have its place of management in Germany and its legal seat in Germany or an EU/European Economic Area Member State.

A domestic or foreign corporation, individual or partnership may become the head of a tax group if, in addition to the above requirements, the following requirements are met:
- The company or the individual has an active trade or business (generally assumed for corporations).
- The investments in the subsidiaries are assets of a German branch.

- The branch profits (including the income of the subsidiaries) are subject to German taxation for both domestic direct tax and tax treaty purposes.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
(Annual) Real Estate/Property tax; on assessed standard value of real property; rate varies by municipality	0.00 to 3.68
Real estate transfer tax (RETT), on sales and transfers of real property, including buildings, and on certain transactions that are deemed to be equivalent to transfers of real property, such as the assignment of at least 90% of the shares of a German or foreign company that holds the title to domestic real property (however, a group exception may apply); levied on the purchase price of the real property or, in certain situations (such as when at least 90% of the shares of a real estate-owning company are transferred), on the assessed property value	
Rate for real estate located in Bavaria	3.5
Rate for real estate located in Baden-Württemberg, Bremen, Lower Saxony, Rhineland-Palatinate, Saxony-Anhalt and Thuringia	5
Rate for real estate located in Hamburg and Saxony	5.5
Rate for real estate located in Berlin, Hesse and Mecklenburg-West Pomerania	6
Rate for real estate located in Brandenburg, North Rhine-Westphalia, Saarland and Schleswig-Holstein	6.5
Value-added tax (VAT or Umsatzsteuer); on application, foreign enterprises may receive refunds of German VAT paid if they are neither established nor registered for VAT purposes in Germany; this application must be filed by non-EU enterprises by 30 June and by EU enterprises by 30 September, in the year following the year in which the invoice was received by the claimant	
Standard rate	19
Reduced rate	7
Gas deliveries via the natural gas grid and district heating deliveries in the period from 1 October 2022 to 31 March 2024 are subject to the reduced VAT rate of 7%)	
Delivery of certain solar modules and other essential components; 0% rate applies from 2023 onward	0

E. Miscellaneous matters

Foreign losses. In principle, losses incurred by foreign permanent establishments are not deductible if a German tax treaty provides that a permanent establishment's income is taxable only in the country where it is located. However, these losses may be taken

into account if they are incurred in non-treaty countries or if a tax treaty provides for the credit method, subject to the condition that the foreign branch is engaged in a specified active trade.

Foreign-exchange controls. No controls are imposed on the transfer of money in and out of Germany. However, specific reporting requirements for certain transactions must be met.

Debt-to-equity rules. The interest expense limitation rule (see Section C) replaced the former thin-capitalization rules. Consequently, no statutory debt-to-equity ratio currently applies.

Anti-avoidance legislation. Several tax laws contain anti-avoidance legislation. The Corporate Income Tax Act deals with constructive dividends by corporations, both in Germany and abroad. The Foreign Investment Tax Act deals mainly with transactions between all kinds of related or affiliated taxpayers, such as individuals, partnerships and corporations, and is restricted to cross-border transactions. It contains extensive provisions on controlled foreign company (CFC) and passive foreign investment company income and was extensively adjusted as of 1 January 2022 in the course of the implementation of the EU Anti-Tax Avoidance Directive rules into German law. The General Tax Code contains a general anti-abuse rule stating that a tax liability cannot be effectively avoided by an abuse of legal forms and methods if obtaining a tax advantage is the only reason for such an arrangement.

The Income Tax Act provides anti-abuse rules that are aimed at preventing the unjustified reduction of German withholding taxes under a tax treaty, under the EU Parent-Subsidiary Directive or under the EU Interest-Royalty Directive (treaty or directive shopping).

Germany's newer tax treaties include "switch-over" clauses as well as "subject-to-tax" clauses. Domestic treaty-overriding rules, which are aimed at preventing double non-taxation or double deductions, also exist. Furthermore, Germany applies a comprehensive set of defensive measures against businesses with relationships to entities in non-cooperative jurisdictions, which are listed on the so-called prohibited list, published by the Economic and Financial Affairs Council of the EU (German Anti-Tax Haven Act). The measures are generally applicable from 1 January 2022 onward, apply in stages and include aggravated CFC rules, an extension of nonresident tax liability, denial of treaty benefits as well as increased obligations to cooperate. Moreover, an increased taxation of dividends and capital gains and a denial of the deduction for operating costs may apply.

Transfer pricing. German tax law contains a set of rules that allow the adjustment of transfer prices. These rules include general measures on constructive dividend payments and constructive contributions and a specific adjustment provision in the Foreign Tax Act. All of the measures mentioned in the preceding sentence are based on the arm's-length principle. The Foreign Tax Act also contains the OECD Approach. As a result, permanent establishments and partnerships are treated as separate entities, similar to corporations.

The selection of the transfer-pricing method now follows the OECD Transfer Pricing Guidelines 2022 and determines that the most appropriate method for the underlying case should be applied if comparable transactions can be determined (there is no hierarchy as to which method has to be used with priority). In addition, the code contains express language with respect to the determination of the arm's-length character of a transfer price if no comparable can be found (hypothetical arm's-length method). The code also has a set of rules directed at securing the German tax revenue. These rules deal with the determination of transfer prices in the event of a transfer of business functions abroad. Furthermore, the Foreign Tax Act now provides the so-called Development, Enhancement, Maintenance, Protection and Exploitation (DEMPE) concept in line with the OECD Transfer Pricing Guidelines 2022 and includes a definition of what constitutes an intangible. With the DEMPE concept, the entity performing the DEMPE functions, assuming risks and providing these assets has to be entitled to the intangible-related return.

Specific documentation rules apply for transfer-pricing purposes. From 2023 onward, the transfer-pricing documentation must invariably be submitted in the event of a tax audit, without a separate request by the tax authorities being required. In addition, the deadline for submitting the documentation will generally be shortened to only 30 days from the date of the request or disclosure of the audit order. Noncompliance with these rules may result in a penalty (if imposed) of at least EUR100 per day of delay up to a maximum of EUR1 million. If no documentation is provided or if the documentation is unusable or insufficient, a surcharge of 5% to 10% of the income adjustment is applied with a minimum surcharge of EUR5,000.

A Country-by-Country Reporting (CbCR) requirement applies to German taxpayers if they belong to a group with consolidated revenues of at least EUR750 million in the preceding fiscal year. The providing of a master file in addition to a local file on request is required if the German taxpayer's revenue was at least EUR100 million in the preceding fiscal year.

German-based multinational enterprises (MNEs) or standalone corporations operating abroad are required to publish a report on income tax information, if their revenues exceed for each of the last two consecutive financial years a total of EUR750 million (public Country-by-Country Reporting). The reporting obligation is also triggered for non-EU based MNE groups that have a medium- or large-sized subsidiary in Germany. Furthermore, non-EU-based MNE groups or standalone corporations with a branch in Germany with revenues exceeding EUR12 million for each of the last two consecutive financial years are also covered by the reporting obligation.

German taxpayers can apply for an advance pricing agreement (APA) not only in the context of transfer pricing, but also for all cross-border transactions, if the other state agrees to such a procedure and if the fee assessment has become final and the fee has been paid. The fee for transfer-pricing cases amounts to EUR30,000 for processing a new APA request and EUR15,000 for an APA renewal. The fee for non-transfer-pricing cases is

reduced to 25% of the fee for transfer-pricing cases, and special fees apply under certain conditions.

Real estate investment trusts. Effective from 1 January 2007, Germany introduced the real estate investment trust (REIT), which is a tax-exempt entity. In general, a REIT is a listed German stock corporation (AG) that satisfies certain conditions, including, but not limited to, the following:

- It has a free float (volume of shares traded on the stock exchange) at the time of listing of at least 25%.
- Its real estate assets account for at least 75% of its gross assets.
- Rental income from real estate accounts for at least 75% of its total income.
- Ninety percent of its income is distributed to its shareholders.

German investment tax law. The German investment tax law provides for the following tax regimes:

- Regular "investment funds" are partially subject to taxation at the fund level.
- "Special-investment funds" must meet additional criteria and are taxed semi-transparent with certain options and exemptions.
- Fund vehicles in the legal form of a partnership and other investment vehicles that do not meet the criteria of "investment funds" within the meaning of the German Investment Tax Act are subject to the general rules of (corporate or individual) income taxation depending on the legal form and status.

According to the German investment tax system, for German and foreign investment funds, as well as for special-investment funds, a partial taxation of the following types of domestic income applies at the fund level:

- Dividend payments from German-based corporations are subject to a flat tax regime of 15% on the gross dividends received by the fund. The tax exemption under Section 8b of the Corporate Income Tax Act does not apply.
- Net income from letting and the sale of German real estate is subject to tax at a rate of 15% plus the solidarity surcharge (15.825% in total).
- Other German-source income, which would be subject to German taxation if received by a foreign investor (for example, income from renewable energy investments or commercial partnership investments in Germany), is subject to tax at a rate of 15% plus the solidarity surcharge (15.825% in total).

All other income is not subject to German corporate income tax (for example, interest income, profits deriving from forward contracts or foreign dividends, as well as foreign real estate proceeds). In general, investment funds are subject to German trade tax. However, an exemption from German trade tax applies if the business purpose is limited to the investment and management of funds for the joint account of the unitholders and no active entrepreneurial management of the assets is performed. Special-investment funds are generally exempt from trade tax.

Special-investment funds can opt for a transparent taxation for certain German domestic income. If the option is exercised, the income is subject to tax at the investor level and not subject to tax at the level of the special-investment fund. Certain rules and limitations apply.

In general, a German investor is subject to tax on its investment fund income (that is, distributions, profits from the sale of units in the investment fund, as well as to the so-called flat tax on a deemed profit, if no distributions are made). The applicable tax rate depends on the individual situation of the investor (for example, corporate vehicle or individual vehicle). Special tax regimes (partial tax exemptions) might apply depending on the respective asset allocation of the fund as well as on the individual situation of the investor (that is, a tax exemption of 15% to 80% is applicable). Half of the respective partial exemption for corporate income tax and individual income tax purposes is granted for trade tax purposes. In general, foreign investors are not subject to tax in Germany on any of their investment fund income.

Income derived from special-investment funds (distributed income, deemed distributed income and profits from the sale or redemption of shares) is subject to regular corporate income tax, individual income tax (if fund units are allocated to business assets) and trade tax at the investor level, depending on the individual tax situation. In general, the participation exemption for German individual income tax and German corporate income tax purposes applies if the respective conditions are met.

Mutual assistance. Germany exchanges tax-relevant information with various countries based on tax treaties, other bilateral agreements (for example, the Intergovernmental Agreement between Germany and the United States with respect to the US Foreign Account Tax Compliance Act [FATCA]), EU directives (such as the EU Directive on Administrative Cooperation) and multilateral agreements (such as the OECD's Multilateral Competent Authority Agreement for the Common Reporting Standard [CRS]).

Automatic exchange of financial account information. Under the FATCA Intergovernmental Agreement of 31 May 2013, German financial institutions must report certain financial account information regarding US reportable accounts on an annual basis to the German Federal Tax Office (Bundeszentralamt für Steuern), which automatically exchanges this information with the US Internal Revenue Service. In addition, Germany implemented the CRS. German financial institutions are required to identify reportable accounts, which are the accounts held by the following:

- An individual or certain entities resident in a CRS zone country
- "Passive nonfinancial entities" (as defined) with one or more controlling persons resident in a CRS zone country

These accounts must then be reported annually by 31 July for the preceding reporting period to the German Federal Central Tax Office, which passes this information on to the competent tax authorities where the reportable person is tax resident.

Under both exchange-of-information regimes, the term "financial institution" is defined rather broadly and does not only include banks, financial services companies, investment funds and insurance companies, but also certain holding companies, treasury centers, captive finance companies, other investment entities, pension entities and certain other entities.

Automatic exchange of advance cross-border rulings and advance pricing agreements. Germany takes part in the automatic exchange of advance cross-border rulings and advance pricing arrangements between EU Member States as provided under the EU Directive on Administrative Cooperation. The information exchange occurs within three months after the end of the calendar half-year in which the advance cross-border rulings were granted.

Mandatory disclosure rule. Following EU Directive 2018/822, Germany has implemented Mandatory Disclosure Rules (DAC6). The legislation largely follows the EU directive. In particular, the 15 hallmarks provided by the directive have been implemented in German law. However, Germany uses a unique and complex two-level system if an intermediary is (partly) exempted by legal professional privilege. A circular provides detailed guidance regarding the interpretation of the legislation. Reports can be made via an online portal, by uploading XML files or through an electronic interface, and need to be in the German language. An advance registration at the Federal Tax Office is required.

New obligations for platform operators. Following EU Directive 2021/514, Germany has implemented the EU Directive on Administrative Cooperation (DAC7). From 2023 onward, platform operators must collect data on certain types of sales (so-called relevant activities). Generally, platform operators are in scope if the operator is not deemed to be an excluded platform operator and the operator meets one of the following conditions:
- It is resident for tax purposes in Germany.
- It is incorporated according to German Law.
- It has a permanent establishment in Germany.

In the event of noncompliance, the law includes provisions on fines, which classify various violations as administrative offenses.

BEPS 2.0 – Pillar 2/Global Minimum Tax. In 2023, Germany implemented the Global Minimum Tax in accordance with the respective EU Minimum Tax Directive and the OECD Model Rules. With regard to Pillar Two, the Income Inclusion Rule (IIR) and Domestic Minimum Top-up Tax apply to financial years beginning after 30 December 2023, while the Undertaxed Profits Rule (UTPR) generally applies to financial years beginning after 30 December 2024.

For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (https://www.ey.com/content/dam/ey-unified-site/ey-com/en-gl/services/tax/documents/beps-2-0-pillar-two-developments-tracker.pdf).

F. Treaty withholding tax rates

The table below is for illustrative purposes only. In general, full German withholding tax must be withheld by the payer unless a certificate of (partial) treaty exemption has been obtained by the foreign income recipient, which requires a specific application procedure. In the absence of such certificate, the income recipient can claim a (partial) tax refund from the German Federal Tax Office based on the applicable tax treaty.

Non-treaty jurisdictions	25	0/15/25	15

(1) For treaty purposes, income from interest on participating loans, profit-sharing bonds and income from (typical) silent partnerships is considered in a majority of tax treaties to be dividends. Otherwise, this income falls within the interest article. Furthermore, most tax treaties provide an unrestricted taxation right for the source state if the payment is treated as tax-deductible. According to domestic law, interest on participating loans, profit-sharing bonds and income from (typical) silent partnerships is taxed at 25% plus solidarity surcharge (reduced on application to 15% if the recipient is a corporation and if the German anti-treaty shopping rules do not apply). Under German tax law, income from a silent partnership is regarded as a dividend if the silent partnership is characterized as a typical silent partnership. Profits from an atypical silent partnership are considered as business profits. Income from participation rights (Genussrechte) is treated as a dividend if the holder

participates in profits and liquidation results. Otherwise, the income from participation rights is considered to be interest.

(2) According to the EU Parent-Subsidiary Directive, dividends distributed by a German subsidiary to a qualifying EU parent company are exempt from withholding tax if the recipient owns 10% or more of the subsidiary.

(3) German interest withholding tax is imposed only on interest paid by financial institutions, on interest from over-the-counter transactions and on interest payments on convertible and profit-sharing bonds and participating loans. In addition, interest on loans secured by fixed property located in Germany is subject to a limited German tax liability; tax on such interest is not imposed by withholding tax (self-declaration). If not otherwise noted, the treaty withholding tax rate also reduces the German statutory tax rate for interest on loans secured by fixed property located in Germany.

(4) As a result of the implementation of EU Directive 2003/49/EC, withholding tax on interest and royalties paid between associated companies of different EU states is abolished if certain conditions are met.

(5) These rates should only apply to royalties paid by German licensees. Foreign-to-foreign royalties should generally be fully exempt from German tax under the "other income" article in the respective tax treaty. However, the withholding tax rate on foreign-to-foreign royalties from patents, know-how and similar items is 15% if such items are registered in Germany. Certain royalty income and capital gains related to registered rights are only taxed in intragroup cases without treaty protection and in certain cases that involve jurisdictions from the EU prohibited list of non-cooperative jurisdictions.

(a) The treaty with China Mainland does not apply to the Hong Kong and Macau Special Administrative Regions (SARs).

(b) The rate applies if the income is subject to tax in the other state.

(c) The agreement between Germany and former Czechoslovakia applies.

(d) Under certain treaties, interest is exempt from withholding tax if it is paid to a contracting state's government, the central bank or certain public banks or finance institutions or if it relates to a loan that is guaranteed by public credit insurance.

(e) The United States treaty provides for a 0% rate if the participation is at least 80% for a period of 12 months and if the conditions of the Limitation-of-Benefit test under Article 28 are fulfilled.

(f) Interest payments to banks or on loans granted by banks may be subject to a 10% withholding tax rate (5% in the Mexico treaty; 2.5% in the Tunisia treaty).

(g) A 15% rate applies to dividends that are paid out of income or gains derived from immovable property by an investment vehicle.

(h) This is an agreement between the German Institute in Taipei and the Taipei Representative Office in Germany.

(i) If Syria enters into an agreement with any other EU country that provides for a lower rate than 12%, Syria will apply this lower rate on royalties paid to residents of Germany.

(j) The agreement between Germany and former Yugoslavia applies.

(k) On 8 August 2023, the Russian Federation issued a presidential decree temporarily suspending parts of the double tax treaties with 38 "unfriendly" states. This also affects Germany. As a result, the Russian Federation generally levies a withholding tax of 15% on dividend payments to Germany and of 20% on interest and royalties from 8 August 2023.

Germany has initialed and/or signed new tax treaties with Argentina, Belgium, Croatia, Ecuador, Egypt, Iran, Israel, Korea (South), Latvia, Norway, Oman, Poland, Portugal, the Russian Federation (implementation not expected for the foreseeable future), South Africa, Sri Lanka, Switzerland, and Trinidad and Tobago. At the time of writing, the domestic legal procedures for the entry into force of those treaties had not yet been concluded.

Germany is negotiating or renegotiating tax treaties with Albania, Angola, Bangladesh, Benin, Botswana, Brazil, Burkina Faso, Canada, Chile, China Mainland, Colombia, Costa Rica, the Czech Republic, Ethiopia, Greece, the Hong Kong SAR, Iceland, India, Jersey, Jordan, Kosovo, Kuwait, Kyrgyzstan, Lebanon, Liberia, Malaysia, Moldova, Montenegro, Namibia, the Netherlands, New Zealand, Nigeria, Pakistan, Qatar, Romania, Rwanda, San Marino, Senegal, Serbia, the Slovak Republic, Slovenia, Tunisia, Ukraine and Vietnam.

A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	– (a)
Branch Tax Rate (%)	25
Withholding Tax (%) (b)	
Dividends	8 (c)
Interest	8 (c)
Royalties	15 (d)
Management and Technology Transfer Fees	20 (d)
Directors' Fees	20
Technical Service Fees	20 (d)
Lottery Winnings	10 (e)
Consideration from Realization of an Asset or Liability	3/10 (f)
Branch Remittance Tax	8
Net Operating Losses (Years)	
Carryback	Unlimited (g)
Carryforward	5 (h)

(a) Capital gains are added to business or investment income and taxed at the rate applicable to the person.
(b) Applicable to payments to residents and nonresidents.
(c) This is a final tax for both residents and nonresidents without a permanent establishment in Ghana.
(d) This is a final tax for nonresidents without a permanent establishment in Ghana only.
(e) This tax is applicable on gross winnings at the end of each game.
(f) The 3% rate applies to the consideration received in the case of the realization of an asset or liability by a resident person and the 10% rate applies in the case of a nonresident person.
(g) Losses incurred on completion of long-term contracts may be carried back to prior tax years.
(h) Prior to May 2023, enterprises that operated in priority sectors (petroleum operations, minerals and mining operations, energy and power, manufacturing, farming, agro-processing, tourism, and information and communication technology businesses) were allowed to carry forward their losses for a period of five years while all other enterprises were allowed to carry forward their losses for a period of three years. Currently, all companies are allowed to carry forward their losses for a period of five years. In addition, losses incurred by venture capital financing companies on the disposal of shares invested in venture capital subsidiary companies under the Venture Capital Trust Fund Act, 2004 (Act 680) and losses incurred by qualifying venture capital financing companies on shares in any venture may be carried forward for five years after the disposal of the shares.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their business or investment income for the year, regardless of whether the source of the income still exists. A company is resident in Ghana if it is incorporated under the laws of Ghana or if its management and control are exercised in Ghana at any time during the year. Permanent establishments of nonresident companies in Ghana are also subject to tax on their worldwide income.

Rates of corporate income tax. The standard corporate income tax rate is 25%. However, various other tax rates apply to income derived from specified business activities.

Income derived from non-traditional exports is taxed at a rate of 8%. Income derived by banks from loans granted to farming enterprises is subject to tax at a rate of 20%. The rate of tax applicable to income derived by financial institutions from loans to leasing companies is 20%.

Income derived from lottery operations is taxed at a rate of 20% on the gross gaming revenue.

Rural or community banks are subject to tax at a rate of 5% for a period of 10 years beginning with their first year of operations.

The corporate income tax rate applicable to companies principally engaged in the hotel industry is 22%.

For petroleum extracting companies, the tax rate is 35%. The rate is consistent with the rate provided in the publicly disclosed petroleum agreements that have been signed with the government of Ghana. After a company has recovered all outlays from an oil field plus a specified rate of return after deduction of tax, royalties and an inflation adjustment, the government is entitled to an additional share of the crude oil profits based on a predetermined formula.

Mining companies are subject to corporate income tax at a rate of 35%. A holder of a mining lease, restricted mining lease or small-scale mining license must pay a royalty with respect to minerals obtained from its mining operations in Ghana. The royalty must be paid at the prescribed rate and in the prescribed manner.

Tax incentives. Ghana offers tax exemptions and tax reductions to companies engaged in specified industrial activities. It also offers tax rebates to entities located in certain places.

Income derived by companies from the business of constructing affordable low-cost residential premises for lease or sale is subject to tax at a rate of 5% for a period of five tax years (years of assessment). The tax-incentive period begins with the tax year in which the company begins its operations. If the company's accounting year differs from the calendar year, the beginning of the tax-incentive period is the tax year in which the accounting period of the first year of operations begins.

Rural banks are subject to tax at a rate of 5% for their first 10 years of operation.

The income of a venture capital financing company is subject to tax at a rate of 5% for five years if the company satisfies the eligibility requirements for funding under the Venture Capital Trust Fund Act. The tax-incentive period begins with the tax year in which the company satisfies the eligibility requirements.

Cocoa farmers are exempt from tax on income derived from cocoa. Cattle ranchers are subject to tax at a rate of 5% for the first 10 tax years. Income derived from tree crops, such as coffee, oil palm, shea nut, rubber and coconut, is subject to tax at a rate of 5% for 10 years following the first harvest. For a company's first five years of operations, income derived from livestock (other than cattle), fishing and cash crops, such as maize, rice, pineapple, cassava and yam, is subject to tax at a rate of 5%.

Income of a company from an agro-processing business conducted wholly in Ghana is subject to tax at a rate of 5% for a period of five tax years. The period begins with the tax year in which the company begins commercial production. If the company's accounting year differs from the calendar year, the beginning of the period is the tax year in which the accounting period of the first year of production begins.

Income of a company that commercially produces cocoa byproducts wholly in Ghana from substandard cocoa beans, cocoa husks and other cocoa waste as the principal raw materials is subject to tax at a rate of 5% for a period of five tax years. The tax-incentive period begins with the tax year in which the company begins commercial production. If the company's accounting year differs from the calendar year, the beginning of the period is the tax year in which the accounting period of the first year of production begins.

The income of a company whose principal activity is the processing of waste, including recycling of plastic and polythene material for agricultural or commercial purposes, is subject to tax at a rate of 5% for a period of seven tax years. This period begins with the tax year in which the company begins its operations. If the company's accounting year differs from the calendar year, the beginning of the tax-exemption period is the tax year in which the accounting period of the first year of operations begins.

Nonresident companies engaged in air and sea transportation are exempt from tax if the Commissioner-General of the Ghana Revenue Authority (GRA) is satisfied that the same types of companies resident in Ghana are granted an equivalent exemption by the nonresident company's country of residence.

Manufacturing enterprises, other than those operating in free zones or engaged in the export of non-traditional goods, located in regional capitals other than Accra are entitled to a 25% income tax rebate, while manufacturing enterprises located outside regional capitals other than Tema are entitled to a 50% income tax rebate.

The Exemptions Act, 2022, Act 1083, which took effect on 12 September 2022 aims to provide for an exemptions regime, including the scope, criteria and the administration as well as monitoring, evaluation, reporting and enforcement.

Capital gains. A company that derives a gain from the realization of a capital asset is required to include the gain in its business income unless the asset is held or used for investment purposes. In such case, the gain is included in determining the company's investment income.

To calculate a gain from the realization of a capital asset, the cost basis of the asset is deducted from the proceeds received on the disposal of the asset. The cost basis of a chargeable asset is the sum of the following:
- Cost of the asset including incidental costs
- Expenditure incurred to alter or improve the asset
- Expenditure relating or incidental to the disposal of the asset

Administration. The GRA is responsible for the administration and collection of all taxes.

The tax year is the calendar year. If a company's accounting year differs from the calendar year, its basis period for a tax year is the accounting year ending within the tax year.

Companies must file their tax returns within four months after the end of their accounting year.

Assessed tax must be paid on the date specified in the notice of assessment from the Commissioner-General of the GRA. In general, companies are required to make quarterly payments at the end of the third, sixth, ninth and twelfth months of their accounting year.

Companies that fail to pay income tax by the due date are liable to pay interest at 125% of the statutory rate on the amount of tax that remains unpaid, in addition to the tax payable. The interest is compounded monthly.

To make tax collection more efficient, taxpayers are segmented into various Tax Service Centers, which are deployed across the country to deliver seamless tax services, with a focus on small and medium taxpayers.

There are also two Large Taxpayer Offices (LTOs). The LTOs operate as specialized offices that focus exclusively on the tax administration of large taxpayers identified by the GRA. Large taxpayers are classified as companies and/or individuals involved in economic activities which yield or, per their sizes, are estimated to yield annual turnovers of GHS5 million and above. The category also comprises specialist industries regardless of their turnover. These include upstream and midstream petroleum companies, banking institutions, insurance companies, mining companies except quarries, and members of groups of companies of which at least one member qualifies as a large taxpayer.

Dividends. An 8% withholding tax is imposed on dividends paid to resident shareholders and nonresident shareholders unless exempt. This is a final tax.

Foreign tax relief. Foreign tax paid on foreign income is allowed as a credit against tax payable with respect to the foreign income received in Ghana. The amount of tax chargeable with respect to the income is reduced by the amount of the credit.

C. Determination of trading income

General. Chargeable income is based on the income reported in entities' financial statements, subject to certain adjustments.

To be deductible, expenses must be wholly, exclusively and necessarily incurred in the production of income by the company during the financial year. Expenses that may be deducted include the following:

- Interest (subject to thin-capitalization rules; see Section E)
- Rent
- Repair of plant, premises, machinery and fixtures (see *Repairs*)
- Bad debts (see *Provisions*)
- Research and development expenditure
- Financial costs (see *Financial costs*)

Repairs. Expenditure on repairs and improvements to a depreciable asset are deductible expenses, regardless of whether they are of a capital nature. However, the amount deductible is limited to 5% of the written-down value of the pool to which the depreciable asset belongs. The excess expenditure is added to the written-down value of such pool.

Financial costs. Financial costs other than interest incurred by an entity are deducted in calculating the income of the entity from an investment or business. However, the deduction is limited to the sum of the following:
- Financial gains to be included in calculating the income of the entity from the business or investment
- Fifty percent of the chargeable income of the entity for the year from the business or investment, calculated without including financial gains (derived by the entity) and deducting financial costs (incurred by the entity)

Any outstanding financial costs can be carried forward for up to five tax years.

The timing of the inclusions and exclusions of financial gains and costs is determined in accordance with generally accepted accounting principles (GAAP).

Inventories. In determining the chargeable income of a person from a business, the cost of inventory used in generating the income is deducted. The deductible amount is determined by adding to the value of the opening stock the expenses incurred by the person that is included in the cost of trading stock and deducting the value of the closing stock from the amount.

Provisions. Bad debts incurred in businesses other than banks are deductible if the company proves to the satisfaction of the Commissioner-General of the GRA that the debts have become bad, and that it has taken all reasonable steps to ensure payment, but to no avail.

Bad debts incurred in banking business are deductible if both of the following conditions are satisfied:
- The bank proves to the satisfaction of the Commissioner-General of the GRA that the debt is bad and the debt claim constitutes the advance of a principal sum in a case in which the cost of the debt claim is reduced by an equal amount.
- The bad debt write-off has been sanctioned by the Board of Directors of the bank and the prior written approval of the Bank of Ghana has been obtained.

The effective date of deduction of an approved bad debt write-off is the date of approval by the Bank of Ghana on or before the due date for submission of the annual return for the relevant tax year.

Under the Tax Act, provisions for bad and doubtful debts are not allowed for tax purposes.

All amounts recovered with respect to bad debts that were deducted must be included in income for the accounting year of the recovery.

Research and development expenditure. Expenses with respect to research and development are deductible if the expenses are wholly, exclusively and necessarily incurred in generating the income of the business, regardless of whether the expense is of a capital nature.

Capital allowances (tax depreciation). Capital allowances are granted on depreciable assets. Depreciable assets are classified into five main classes. Assets in Classes 1, 2, and 3 are placed in

separate pools, and capital allowances granted with respect to the pool. Capital allowances for Classes 4 and 5 assets are granted on individual assets of the same class. To claim capital allowances, a company must satisfy the following conditions:
• It used the asset in the production of the income.
• It incurred cost in purchasing the asset.

Capital allowances granted for a particular tax year are deemed to be deductions in arriving at the chargeable income or loss of the company.

The following table presents the various classes of assets and details for calculating their capital allowances (capital allowances granted with respect to assets used in mining and petroleum operations are not included in the table).

Class	Assets	Rate %	Formula for calculating capital allowances
1	Computers and data handling equipment, together with peripheral devices	40	(A x B x C) ÷ 365 (a)
2	Automobiles; buses and minibuses; goods vehicles; construction and earth-moving equipment, heavy general purpose or specialized trucks; trailers and trailer-mounted containers; plant and machinery used in manufacturing; and costs of a capital nature with respect to long-term crop planting costs	30	(A x B x C) ÷ 365 (a)
3	Railroad cars, locomotives and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft; specialized public utility plant, equipment, and machinery; office furniture, fixtures and equipment; and any depreciable asset not included in another class	20	(A x B x C) ÷ 365 (a)
4	Buildings, structures and similar works of a permanent nature	10	(A x B x C) ÷ 365 (b)(c)
5	Intangible assets	– (d)	[(A÷D) x C] ÷ 365 (c)(e)

(a) A is the written-down value of the pool at the end of a basis period, B is the depreciation rate applicable to the pool, and C is the number of days in the period.
(b) A is the cost base of the asset, B is the depreciation rate, and C is the number of days in the basis period.
(c) The total amount of capital allowances granted for a Class 4 or 5 asset may not exceed the cost basis of the asset.
(d) The rate is determined by formula.
(e) A is the cost base of the asset, C is the number of days in the basis period, and D is the useful life of the asset in whole years calculated at the time the asset is acquired.

Mining and petroleum. A different method applies for granting capital allowances for mining and petroleum companies or contractors. For mining and petroleum operations, assets are pooled on a year-by-year basis, and assets acquired each year represent a separate pool. Capital allowances are calculated on straight-line basis at a rate of 20% on each separate pool.

Relief for losses. Prior to May 2023, enterprises that operated in government priority sectors (petroleum operations, minerals and mining operations, energy and power, manufacturing, farming, agro-processing, tourism, and information and communication technology businesses) were allowed to carry forward their losses for a period of five years while all other enterprises were allowed to carry forward their losses for a period of three years. Currently, all companies are allowed to carry forward their losses for a period of five years.

Losses incurred on completion of long-term contracts may be carried back to prior tax years.

Groups of companies. Each company within a group must file a separate tax return. Offsetting of losses against profits among members of the group is not allowed.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); imposed on all supplies of goods and services made in, or goods imported into, Ghana, except for exempt items; services imported for the person's own consumption are subject to a reverse VAT charge	15
National Health Insurance Levy (NHIL); imposed on all supplies of goods and services made in or imported into Ghana, except for supplies that are specifically exempt; services imported for the person's own consumption are subject to a reverse NHIL charge	2.5
VAT Flat Rate Scheme; retailers of goods who make taxable supplies of not less than GHS200,000 and not more than GHS500,000 at the end of any period of 12 months must charge VAT on their supplies at a flat rate; input VAT incurred by persons under the scheme cannot be claimed	3

Nature of tax	Rate (%)
Ghana Education Trust Fund levy (GETFund levy); imposed on all supplies of goods and services made in or imported into Ghana, except for supplies that are specifically exempt; services imported for the person's own consumption are subject to a reverse GETFund levy charge	2.5
COVID-19 Health Recovery Levy; imposed on all supplies of goods and services made in or imported into Ghana, except for supplies that are specifically exempt; services imported for the person's own consumption are subject to a reverse COVID-19 levy charge	1
Growth and Sustainability Levy; imposed on all entities in Ghana in three categories	
Category 1, which includes financial and telecommunication entities, breweries, inspection and valuation companies, mining support entitles, bulk oil distributors, oil marketing companies, communication tower operators, upstream petroleum service providers and shipping lines, pays 5% on their profit before tax	5
Category 2, which includes entities in the extractive sector, pays 1% of their gross production	1
Category 3, which includes all other entities not included in Categories 1 or 2, pays 2.5% on their profit before tax	2.5

E. Miscellaneous matters

Foreign-exchange controls. The currency in Ghana is the Ghana cedi (GHS).

The Foreign Exchange Act, 2006 (Act 723) governs foreign-exchange controls in Ghana. However, the Bank of Ghana exercises much discretion in administering the act.

Anti-avoidance legislation. A company must obtain a tax-clearance certificate to engage in certain transactions, including the purchase of goods in commercial quantities from producers, distributors, manufacturers or importers. The Commissioner-General of the GRA has the power to disregard or re-characterize fictitious arrangements and schemes entered into or carried out for the purposes of avoiding tax. The income tax law contains the following three specific anti-avoidance measures:

- Income splitting (see Section C)
- Transfer pricing (see *Transfer pricing*)
- Thin capitalization (exempt-debt to exempt-equity ratio; see *Debt-to-equity ratio*)

Transfer pricing. Ghana passed new Transfer Pricing Regulations, 2020 (L.I. 2412), which replaced the old regulations (L.I. 2188) in November 2020. The regulations follow the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines. The regulations allow the use of the transfer-pricing methods outlined in the OECD guidelines and the use of

an alternative method if the methods stated are not appropriate for determining the arm's-length price for the transaction. On the filing of a return, the Commissioner-General can use an alternative transfer-pricing method if the Commissioner-General takes the view that the method used does not result in the arm's-length price for a transaction.

The regulations also require entities that enter into related-party transactions to prepare contemporaneous documentation to support their returns. Entities must also submit transfer-pricing returns as part of their annual income tax returns within four months after the end of the accounting year. A copy of the documentation (Local File and Master File) must be filed with the tax authorities within four months after the end of the accounting year.

The regulations further require the filing of a Country-by-Country (CbC) report not later than 12 months after the last day of the reporting tax year of the group. This requirement applies to multinational enterprises with annual consolidated group revenues of GHS2.9 billion (approximately USD234 million as of 27 February 2024) or above in the tax year immediately preceding the reporting tax year. Safe harbor rules have also been introduced for some routine transactions not exceeding USD200,000.

Debt-to-equity ratio. If an "exempt-controlled resident entity," other than a financial institution, has an "exempt debt" to "exempt equity" ratio in excess of 3:1, no deduction is allowed for interest paid or a foreign-exchange loss incurred on the portion of the debt that exceeds the 3:1 ratio. Broadly, an "exempt-controlled resident entity" is a resident entity of which at least 50% of its underlying ownership or control is held by an "exempt person," which is a nonresident person or a resident person meeting certain criteria. The law also provides detailed definitions of "exempt debt" and "exempt equity."

F. Treaty withholding tax rates

The following are the maximum withholding rates under Ghana's double tax treaties for dividends, interest, royalties, and management and technology transfer fees.

	Dividends %	Interest %	Royalties and management and technology transfer fees %
Belgium	5/15 (a)	10	10
Czech Republic	6	10	8
Denmark	5/15 (b)	8	8
France	5/7.5/15 (c)	10/12.5 (d)	10/12.5 (e)
Germany	5/15 (f)	10	8
Italy	5/15 (g)	10	10
Mauritius	7	7	8/10 (h)
Morocco	5/10 (i)	10	10
Netherlands	5/10 (i)	8	8
Qatar	5/7 (j)	7	10
Singapore	7	7	7/10 (k)
South Africa	8	5/10 (l)	10

	Dividends %	Interest %	Royalties and management and technology transfer fees %
Switzerland	5/10 (i)	10	8
United Kingdom	7.5	12.5	10/12/5 (m)
Non-treaty jurisdictions	8	8	15/20 (n)

(a) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
(b) The 5% rate applies if the beneficial owner is a company, the other contracting state, the central bank of the other state, or a pension fund or similar institution. The 15% rate applies in all other cases.
(c) The 5% rate applies if the company paying the dividends is resident in France, and the 7.5% rate applies if the company paying the dividends is resident in Ghana. In both cases the beneficial owner should be a company that holds directly or indirectly at least 10% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
(d) The 12.5% rate applies if the beneficial owner is resident in France, and the 10% rate applies if the beneficial owner is resident in Ghana.
(e) For royalties, the 12.5% rate applies if the beneficial owner is resident in France, and the 10% rate applies if the beneficial owner is resident in Ghana. For management fees, the 10% rate applies.
(f) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies if the beneficial owner is a partnership and in all other cases.
(g) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
(h) The 8% rate applies to royalties. The 10% rate applies to technical services.
(i) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies if the beneficial owner is a partnership and in all other cases.
(j) The 5% rate applies if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends. The 7% rate applies if the beneficial owner is a partnership and in all other cases.
(k) The 7% rate applies to royalties. The 10% rate applies to technical services.
(l) The 5% rate applies if the interest is derived by a bank that is a resident in the other contracting state. The 10% rate applies in all other cases.
(m) The 12.5% rate applies to royalties. The 10% rate applies to management fees and technical fees.
(n) The 15% rate applies to royalties. The 20% rate applies to management and technical service fees.

A. At a glance

Corporate Income Tax Rate (%)	12.5 (a)(b)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	12.5 (a)(b)
Withholding Tax (%)	
Dividends	0
Interest	0
Royalties	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (c)

(a) A 12.5% tax rate applies to taxable profits from 1 August 2021 onward. A rate of 10% applies to profits prior to that date.
(b) A tax rate of 20% applies to utility, energy and fuel supply companies and companies abusing a dominant market position.
(c) In general, the carryforward is unlimited. However, if both a change in ownership and a major change in the nature or conduct of a trade carried on by the company occurs within a three-year period, losses incurred in any financial period beginning before the change in ownership cannot be offset against losses incurred subsequent to the change in ownership.

B. Taxes on corporate income and gains

Corporate income tax. Companies are taxed on profits "accrued in or derived from" Gibraltar. "Accrued in or derived from" is defined by reference to the location of the activities that generate the profits. If a company's income results from an underlying activity that requires a license and regulation under any law of Gibraltar, the income is deemed to accrue in and derive from Gibraltar, except for income from activities carried on outside Gibraltar by a branch or permanent establishment.

The above rule applies regardless of whether a company is registered in Gibraltar or whether it is ordinarily resident in Gibraltar. A company is ordinarily resident in Gibraltar if central management and control is exercised in Gibraltar or is exercised outside Gibraltar by persons who are ordinarily resident in Gibraltar.

Rates of corporate tax. All companies are chargeable on taxable profits at a rate of 12.5% (this rate applies to profits from 1 August 2021 onward; profits prior to that date were taxed at a rate of 10%). An exception applies to utility, energy and fuel supply companies and companies deemed to be abusing a

dominant market position, which are subject to tax at a rate of 20%.

Tax incentives for companies. The following tax incentives apply, in addition to any deduction that may otherwise be given for such expenditure:

- An additional allowance is given for 50% of the fixed salary cost of any employee registered with the Department of Employment for the first time after 1 July 2021. This applies to accounting periods ending between 1 July 2021 and 30 June 2023.
- An additional allowance is given for 50% of marketing costs. Current legislation states that this applies to accounting periods ending between 1 July 2021 and 30 June 2023. A bill has been published that would restrict this to accounting periods ending by 30 June 2022, and to only certain types of marketing. This bill has not yet been passed by parliament and was not in force at the time of writing.
- An additional 60% deduction is given for qualifying training costs. For accounting periods ending prior to 1 July 2021, the additional deduction is 50%.
- A deduction of up to GIP6,000 over two years is given for the cost of any solar or wind energy installations. From 1 July 2021 onward, a deduction is given for 10% to 100% (previously 5% to 55%) of the cost of improvements to the energy performance certificate (EPC) rating of a property. The percentage applied depends on the EPC rating achieved.
- Businesses may claim a deduction for expenditure on works carried out to improve access for people with disabilities to their premises, up to a maximum of GIP15,000, subject to conditions. This applies to such expenditures between 1 July 2019 and 30 June 2024.

Capital gains. Capital gains are not taxed in Gibraltar. Capital losses are not deductible. An exception to this is exit tax, which only applies in limited circumstances (see *Exit taxes* in Section E).

Administration. All companies that are registered in Gibraltar or that have income assessable to tax in Gibraltar are required to file a return. Returns, accounts and computations must be filed within nine months after the end of the month in which the financial period ends.

All companies incorporated in Gibraltar that declare a dividend in a financial period are required to file a dividend return within nine months after the end of the month in which that financial period ends. Companies that are listed on a recognized stock exchange are exempt from this requirement.

Companies must make payments on account of their corporation tax by 28 February and 30 September each year. Each payment is made toward the tax liability for the financial period in which the payment on account is due. The amount of payment on account due is based on the tax payable for the last relevant financial period. An application can be made for a reduced or zero payment if basing the payment on a prior year would result in an excessive payment. The final payment with respect to a financial period is due within nine months after the end of the month in which that financial period ends.

Companies not complying with filing and payment deadlines are subject to penalties and surcharges.

A self-assessment system requires companies to assess correctly their tax liabilities, with any underpayment of tax being subject to surcharges.

Companies may request advance tax rulings.

Dividends. Dividends paid by Gibraltar companies are not subject to withholding tax. Tax credits are attached to dividends paid by companies incorporated in Gibraltar. This tax credit equals the tax paid by the company on the profits out of which the dividend is paid. Restrictions may apply to how such tax credits may be utilized.

Dividend income is not taxable in the following circumstances:
- The dividend is received by a company from another company.
- The dividend is received by a person who is not ordinarily resident in Gibraltar.
- The dividend is received from a company that has its shares listed on a recognized stock exchange.
- The dividend represents the distribution of profits or gains on which no tax has been charged in accordance with the provisions of the Income Tax Act 2010 (the act contains rules governing the allocation of dividends to specific profits or gains).

The above exceptions may be subject to the anti-avoidance provisions that are part of the European Union (EU) Parent-Subsidiary Directive. Although Gibraltar has now left the EU, together with the United Kingdom, this Directive as it applied on 31 December 2020 remains reflected in Gibraltar's legislation.

Interest. Withholding tax is not imposed on the payment of interest. Interest income is not taxable, except for the following:
- Interest on loans or advances by one company to another company if the interest from an individual company is GIP100,000 or more per year. Under an anti-avoidance measure, interest received or receivable from different companies is considered to be from the same company for the purposes of the GIP100,000 threshold if those companies are "connected persons." For this purpose, interest is deemed to be accrued and derived in Gibraltar if the company in receipt of the interest is a Gibraltar-registered company.
- Interest income of a company that lends to, or takes deposits from, the general public or engages in similar activities.
- Interest income of an insurance company. This applies with effect for accounting periods beginning on or after 1 February 2024.

Royalties. Royalty income received or receivable by a company is taxable. Such income is deemed to be accrued and derived in Gibraltar if the company receiving the royalties is a Gibraltar-registered company.

Non-trading rental income from movable property. Non-trading rental income from movable property is taxable, effective from 22 November 2018. Such income is deemed to accrue in and derive from Gibraltar if the recipient is a Gibraltar-registered company.

Foreign tax relief. Unilateral tax relief is granted with respect to tax paid or payable in another jurisdiction on income from that jurisdiction, subject to conditions. This is restricted to the tax that would otherwise have been payable in Gibraltar on that income.

C. Determination of trading income

General. Taxable profits are determined based on financial statements prepared in accordance with Gibraltar generally accepted accounting practice (GAAP), or UK GAAP or International Financial Reporting Standards, subject to certain adjustments and provisions.

In general, expenses must be incurred wholly and exclusively for the purposes of the trade, business, profession or vocation. However, specific reliefs and prohibitions exist for certain expenses.

Certain expenses are either not deductible or are subject to restrictions, including the following:

- Interest paid or payable to a person not resident in Gibraltar is not deductible to the extent that the interest is charged at a rate greater than a reasonable commercial rate.
- Depreciation and amortization of assets are not deductible (instead capital allowances are given; see *Tax depreciation [capital allowances]*).
- Contributions to a provident, pension or other fund for the benefit of employees are not deductible if the fund has not been approved by the Commissioner of Income Tax.
- The cost of entertaining existing and potential clients and persons introducing business, are deductible, but detailed rules restrict deductibility.
- For a branch or a company with a branch, the deduction for certain head office expenses or certain expenses incurred by a branch for the common purpose of the company is restricted to 5% of gross income of the branch.
- "General" expenses are apportioned between chargeable and non-chargeable income on a pro rata basis. The part of such expenses attributable to non-chargeable income is not deductible.

Tax depreciation (capital allowances). For periods ending between 1 July 2021 and 30 June 2023, the following applies:

- Up to GIP60,000 of purchases, or if higher, 50% of expenditure, in the period on plant and machinery is fully deductible in that period. Plant and machinery include, among other items, fixtures, fittings, equipment and commercial motor vehicles. In addition, up to GIP100,000 of purchases, or if higher, 50% of expenditure, in the period on information technology is fully deductible in that period.
- All such assets are pooled for tax purposes. The pool is increased with respect to any additions in excess of initial allowances given and reduced by the proceeds of any disposals in the period. The allowance for the year is then calculated at 25% of the value of the pool. The pool value is then reduced by that allowance, and the remaining balance is carried forward to the next period. For companies taxed at 20% (see *Rates of corporate tax* in Section B), the annual allowance is given at 30% instead of 20%.

- A deduction is given with respect to wear and tear on property of 1% of the acquisition cost (excluding the underlying cost of the land). There is also a deduction available amounting to 4% of the cost of industrial buildings.

For periods ending prior to 1 July 2021 and periods ending after 30 June 2023, the following applies:

- The first GIP30,000 of plant and machinery acquired in a financial period is fully deductible in that period. In addition, the first GIP50,000 of qualifying capital expenditure on information technology investment in a financial period is also fully deductible.
- All such assets are pooled for tax purposes. The pool is increased with respect to any additions in excess of initial allowances given and reduced by the proceeds of any disposals in the period. The allowance for the year is then calculated at 15% of the value of the pool. The pool value is then reduced by that allowance, and the remaining balance is carried forward to the next period. For companies taxed at 20% (see *Rates of corporate tax* in Section B), the annual allowance is given at 20% instead of 15%.
- A deduction is available amounting to 4% of the cost of industrial buildings.

Groups of companies. Gibraltar law does not provide for tax consolidation. It does not have any provision for group relief (that is, the use of tax losses of one group company by another group company).

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Stamp duty	
On the issuance or increase of authorized share capital, or on the issuance of loan capital; fixed amount per transaction	GIP10
On the purchase of real estate in Gibraltar by a company	
Purchase price not exceeding GIP200,000	0%
Purchase price between GIP200,001 and GIP350,000	2% on first GIP250,000, and 5.5% on balance
Purchase price of over GIP350,000	3% on first GIP350,000, and 3.5% on balance
(The government of Gibraltar announced in July 2023 that for all purchases with a price of over GBP800,000, a rate of 4.5% is to apply to the amount that exceeds GBP800,000. As of 1 March 2024, this has not yet been implemented and is pending enactment of the legislation.)	
Social insurance contributions, on employees' wages and salaries;	

Nature of tax	Rate
payable on weekly wages by	
Employer	18% (subject to minimum of GIP29 per employee per week and maximum of GIP51 per employee per week)
Employee (under 60)	10% (subject to minimum of GIP13 per week and maximum of GIP37)

E. Miscellaneous matters

Foreign-exchange controls. Restrictions are not imposed on foreign exchange or on inward or outward investments. The transfer of profits and dividends, loan principal and interest, royalties and fees is unlimited, subject to company law.

Anti-avoidance legislation. Gibraltar tax law contains several anti-avoidance provisions.

General. The Commissioner of Income Tax may disregard part or all of arrangements that are deemed to be artificial and/or fictitious and whose purpose is to reduce or eliminate tax payable. "Artificial or fictitious" includes not being consistent with the international standard of the arm's-length principle as defined by the Organisation for Economic Co-operation and Development (OECD) in its Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations.

Any "notifiable arrangement" or "notifiable proposal" must be disclosed to the Commissioner of Income Tax. Detailed procedures exist for seeking clearance in advance of proposals. A timetable is provided for the Commissioner to request further information, to notify the applicant that anti-avoidance provisions will or will not apply, or to notify the applicant that the Commissioner requires a further 21 days to make a decision.

Expenses in favor of connected parties. In certain circumstances, the deduction for expenses incurred in favor of a connected party or parties may be restricted to the lower of 5% of turnover or 75% of profit before taking into account the expenses in question.

Debt-to-equity ratios. Thin-capitalization rules apply to interest paid by a company in the following circumstances:

- The interest is paid to a connected party that is not a company.
- The loan is secured by assets belonging to a connected party that is not a company.

In the above circumstances, if the loan is not considered to be on arm's-length terms and if the loan capital to equity ratio is greater than 5:1, interest paid by the company may be treated as a dividend instead of a deductible expense.

Interest paid to a connected party in excess of the amount that would have been charged on an arm's-length basis may be deemed to be a dividend instead of a deductible expense.

Interest may be disallowed as a deductible expense if both of the following circumstances exist:

- The loan is secured by a cash deposit made with the lender (or party connected to the lender) or secured by certain investments.
- The income from the cash deposit or investment is not assessable to tax.

EU Anti-Tax Avoidance Directive. Gibraltar has implemented the EU Anti-Tax Avoidance Directive (ATAD). Although Gibraltar has now left the EU, this Directive as it applied on 31 December 2020 remains in Gibraltar's legislation. Measures include those described below.

Interest deduction limitation. The deduction for interest expense available to companies within a group is limited to the greater of the following:
- 30% of the taxpayer's earnings before interest, tax, depreciation or amortization (EBITDA)
- EUR3 million for the entire group

Interest costs not deductible in a tax year may be carried forward indefinitely to future tax years. Unused interest capacity may be carried forward for up to five years.

The above does not apply to single entities and financial undertakings.

Controlled foreign company rule. For the purposes of the ATAD rules, a controlled foreign company (CFC) is an entity or permanent establishment not resident in Gibraltar that meets the following requirements:
- It is controlled by the taxpayer.
- Its profits are not taxable in Gibraltar.
- It pays tax of less than 50% of the tax that would be payable in Gibraltar were the entity taxable in Gibraltar.

The undistributed profits of the CFC arising from non-genuine arrangements put in place for a tax advantage are included as income of the taxpayer. The above does not apply to a CFC if it has accounting profits of no more than EUR750,000 and non-trading income of no more than EUR75,000 or if its accounting profits amount to no more than 10% of its operating costs for the financial period.

Hybrid mismatch rule. This rule applies if, as a result of differences in the legal characterization of a financial instrument or entity between two jurisdictions, either of the following circumstances exists:
- A deduction in both jurisdictions for the same expense, payment or loss
- A deduction in one jurisdiction without the inclusion of the corresponding income in the other jurisdiction

In the former case, the deduction is allowed only if Gibraltar is the source of the payment. In the latter case, a deduction is not available.

Gibraltar also applies the rules based on the Council Directive (EU) 2017/952 (ATAD 2) provisions with respect to hybrid permanent establishment mismatches, hybrid transfers, imported mismatches and dual-resident mismatches. The legislation does not include the ATAD 2 provisions on reverse hybrid entities,

because ATAD 2 did not require these provisions to be implemented until 1 January 2021, by which time the Brexit transition had ended. The legislation does not go beyond the ATAD 2's mandatory "minimum standards" to neutralize hybrid mismatches. Gibraltar opted in for all possible exceptions provided for by the ATAD 2.

Exit taxes. The provisions in ATAD relating to exit taxes were implemented in Gibraltar in January 2020. The exit tax applies to any of the following circumstances:

- An entity transfers assets from its head office to its permanent establishment outside Gibraltar, and Gibraltar, as the EU Member State of the head office, no longer has the right to tax the transferred assets as a result of the transfer.
- An entity transfers assets from its permanent establishment in Gibraltar to its head office or another permanent establishment outside Gibraltar, and Gibraltar, as the EU Member State of the permanent establishment, no longer has the right to tax the transferred assets as a result of the transfer.
- A taxpayer transfers its tax residence from Gibraltar to another jurisdiction, except for those assets which remain effectively connected with a permanent establishment in Gibraltar.
- A taxpayer transfers the business carried on by its permanent establishment from Gibraltar to outside Gibraltar, and Gibraltar, as the EU Member State of the permanent establishment, no longer has the right to tax the transferred assets as a result of the transfer. A transfer of business is defined as being where the entity ceases to have a taxable presence in Gibraltar and acquires a taxable presence in another jurisdiction, without becoming tax resident in that other jurisdiction.

A transfer of assets is defined as a situation in which Gibraltar loses the right to tax the transferred assets, while the assets remain under the ownership of the same taxpayer.

Tax is imposed at the applicable corporate rate on the difference between the market value of the transferred assets less their value for tax purposes.

The legislation applies to accounting periods commencing on or after 1 January 2020.

Mandatory Disclosure Regime. Gibraltar implemented EU Directive 2018/822 (DAC6), which requires the reporting by intermediaries and, in some cases, taxpayers of cross-border arrangements that meet certain defined hallmarks. However, subsequent to the ending of the Brexit transition period, Gibraltar followed the lead of the United Kingdom and, effective from 1 January 2021, applies the legislation reflecting DAC6 to only the two hallmarks in DAC6 that correspond to the OECD Mandatory Disclosure Model. Those hallmarks, D1 and D2, refer to arrangements that have the effect of undermining the automatic exchange of financial information or that involve a non-transparent legal or beneficial ownership chain.

However, Gibraltar has applied DAC6 with respect to any cross-border arrangements involving Spain (this arises from the international agreement signed between the United Kingdom and Spain described in Section F).

BEPS 2.0 Pillar Two provisions. The government of Gibraltar has announced the following:

- A BEPS 2.0 Pillar Two-compliant Qualified Domestic Minimum Top-up Tax applies for accounting periods commencing on or after 31 December 2023, but only to members of groups whose parent jurisdiction has adopted the Pillar Two rules.
- Pillar Two is to be implemented for financial periods beginning after 31 December 2024.

For the latest information on Pillar Two, see the *BEPS 2.0 – Pillar Two Developments Tracker* (https://assets.ey.com/content/dam/ey-sites/ey-com/en_gl/topics/tax/tax-pdfs/ey-beps-2-0-pillar-two-developments-tracker.pdf).

F. Tax treaties

In October 2019, a tax treaty was signed between Gibraltar and the United Kingdom. It entered into force on 24 March 2020. The treaty took effect in the United Kingdom from 1 May 2020 for taxes withheld at source and from 1 April 2020 for corporation tax. It took effect in Gibraltar from 1 May 2020 for taxes withheld at source and from 1 July 2020 for corporation tax.

The United Kingdom and Spain signed an international agreement with respect to Gibraltar tax matters in 2019. The agreement was ratified by both countries in March 2021. The provisions relating to companies generally apply to the first tax year commencing after the date of ratification. The agreement contains rules that determine residency of companies, including provisions that would make a Gibraltar legal entity Spanish resident if any of the following applies:

- The majority of the assets, whether directly or indirectly owned, is located in Spain.
- The majority of income derives from sources in Spain.
- The majority of natural persons in charge of effective management is tax resident in Spain.
- The majority of ownership or control is held directly or indirectly by persons resident in Spain.

Despite Brexit, Gibraltar's legislation still contains provisions that implement the EU Parent Subsidiary Directive and the EU Directive on Interest and Royalties. Notwithstanding those provisions, Gibraltar does not impose withholding tax on dividends, interest or royalties.

At the time of writing, changes to the tax law were expected. Because of these expected changes, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	22 (a)
Capital Gains Tax Rate (%)	22 (b)

Branch Tax Rate (%)	22
Withholding Tax (%)	
Dividends	5 (c)
Interest	
Bank Interest	15 (d)(e)
Interest on Treasury Bills and Corporate Bonds	15 (d)(e)
Repos and Reverse Repos	15 (d)(e)
Other Interest	
Paid to Greek Legal Entities	15
Paid to Foreign Legal Entities	15 (e)(f)
Royalties from Patents, Know-how and similar payments	20 (e)(f)
Technical Service Fees, Management Service Fees, Consulting Service Fees and Fees for Similar Services	0/20 (g)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) Law 4799/18.5.2021 provides the following:
- The income tax rate for legal persons and legal entities is reduced to 22% (from 24%) for the 2021 tax year and onward.
- The corporate income tax rate remains at 29% for credit institutions (banks) for the tax years that the provisions of deferred taxation apply (Article 27A of the Greek Income Tax Code [GITC]).

(b) For details regarding the taxation of capital gains derived by legal persons or legal entities, see Section B.

(c) The 5% withholding tax rate applies to dividends and interim dividends distributed by a Greek corporation (*anonymos eteria*, or AE; in certain countries, a corporation is referred to as a *société anonyme*, or SA) and profits distributed by a Greek limited liability company (*eteria periorismenis efthinis*, or EPE). This 5% withholding tax is subject to rates applicable under double tax treaties or under the European Union (EU) Parent-Subsidiary Directive (amended by Directive 2011/96/EC).

(d) This 15% withholding tax is subject to rates applicable under double tax treaties or under the EU Interest-Royalties Directive.

(e) This is a final tax if the beneficiary is a legal person (for example, a company) or legal entity that satisfies both of the following conditions:
- It does not have its tax residency in Greece.
- It does not maintain a permanent establishment for corporate income tax purposes in Greece.

In addition, non-Greek tax resident companies with no permanent establishment in Greece are exempt from tax on interest arising from listed corporate bonds (applicable for interest payments made on or after 1 January 2020).

(f) This 20% withholding tax is subject to rates applicable under double tax treaties or under the EU Interest-Royalties Directive. No tax is withheld on payments of royalties made to legal persons or legal entities that have their tax residence in Greece or that have a Greek permanent establishment in Greece.

(g) No tax is withheld if the recipient has its tax residency in Greece or another EU/European Economic Area (EEA) country; otherwise, a 20% withholding tax applies.

B. Taxes on corporate income and gains

Corporate income tax. Greek companies are taxed on their worldwide income. Foreign business enterprises are taxed only on income derived from a permanent establishment in Greece or on profits generated in Greece. An AE, SA or EPE is Greek if its corporate seat or place of effective management is located in Greece.

A legal person or entity is considered to be a Greek tax resident in the following cases:
- It is incorporated or established under Greek law.

- It has its registered office in Greece.
- Its place of effective management is in Greece at any time during the tax year.

The "place of effective management" concept should be reviewed on an ad hoc basis in the context of the factual background of each case. For this purpose, indicative criteria are listed, such as the following:

- The place where the day-to-day management of the company takes place
- The place where strategic business decisions are made
- The place where the annual general meeting of shareholders or partners or the board of directors takes place
- The place where the accounting books of the company are held
- The residence of the members of the board of directors

In addition, the Greek tax administration may examine additional factors, such as the residence of the majority of the shareholders or partners.

Rate of corporate income tax. The standard corporate income tax rate is currently 22% (see footnote [a] in Section A for further details).

Law 4799/18.5.2021 provides the following:

- The income tax rate for legal persons and legal entities is reduced to 22% (from 24%) for the 2021 tax year and onward.
- The corporate income tax rate remains at 29% for credit institutions (banks) for the tax years that the provisions of deferred taxation apply (Article 27A of the GITC).

Capital gains. Capital gains earned by legal entities are treated as business income and are subject to corporate income tax at the standard rate if they derive from the following:

- Disposals of fixed assets
- Transfers of businesses as going concerns
- Disposals of real estate property that do not constitute a business activity per se
- Transfers of securities (such as listed shares, unlisted shares, interests in partnerships, treasury bills, Greek state bonds and derivatives)

As of 1 July 2020, companies are exempt from capital gains tax arising from the disposal of a participation held in a legal entity, provided that they hold at least a 10% participation for a period of 24 months and that the conditions of Directive 2011/96/EU (Parent-Subsidiary Directive) are met. This income is not subject to tax on distribution or capitalization, while any related expenses are not deductible; by way of exception, corresponding losses may be tax deductible as of 1 January 2020, on the condition that they have been booked up to 31 December 2019 (tax deductibility of such losses is permitted only to the extent that such losses are realized up to 31 December 2024, as per Law 4941/16.06.2022).

Administration. The fiscal year coincides with the calendar year. Legal persons or entities keeping double-entry books may set their tax year to end on 30 June. Greek legal entities that are directly or indirectly owned at a more than a 50% percentage by foreign legal entities may set this date or any other date coinciding with the tax year-end of their foreign shareholder. An option for a tax year exceeding 12 months is not available. Greek SAs

or AEs, Greek EPEs and branches of foreign companies must file an annual corporate income tax return by the end of the sixth month following the end of their fiscal year.

In general, on filing their annual corporate income tax return, legal entities must make an advance payment against the next year's income tax liability. Law 4799/18.5.2021 provides the following:

- The rate of income tax prepayment for legal persons and legal entities is reduced to 80% (from 100%), and this reduced rate applies on the prepayment assessed with the income tax return for the 2021 tax year and onward.
- Exceptionally, income tax prepayment for Greek banking institutions and branches of foreign banks operating in Greece remains at 100% for the 2020 tax year and onward.

The final payment of tax is calculated by subtracting the advance payment made in the preceding year and other prepayments of tax (including taxes withheld at source) and foreign taxes paid on foreign-source income from the amount of tax due. The foreign tax credit cannot exceed the amount of Greek tax otherwise payable on the foreign-source income.

A description of the penalties is provided below; if more than one penalty applies to the same tax offense, only the provision providing for the largest penalty applies.

Further administrative guidelines on the application of the below are to be expected, especially after the introduction of the most recent Tax Procedure Code (Law 5104/19.04.2024). In principle, a failure to file a corporate income tax return or a failure to file on time a corporate income tax return results in the imposition of an administrative penalty up to EUR500 on certain conditions.

A failure to pay corporate income tax as a result of filing an inaccurate corporate income tax return results in the imposition of the following penalties:

- If the filing of an inaccurate corporate income tax return results in a difference of corporate income tax of 5% to 20%, the penalty equals 10% of the amount of the difference between the tax assessed on the basis of the tax return and the corrective tax assessment.
- If the filing of inaccurate corporate income tax return results in a difference of corporate income tax exceeding 20% but not exceeding 50%, the penalty equals 25% of the amount of the difference.
- If the filing of inaccurate corporate income tax return results in a difference of corporate income tax exceeding 50%, the penalty equals 50% of the amount of the difference.

In addition to the above, interest in arrears for the late payment of corporate tax is assessed; the current rate is 0.73% per month.

The filing of an inaccurate withholding tax return or the failure to pay withholding taxes on time results in the imposition of a penalty equal to 50% of the amount of the unpaid tax.

Dividends. A 5% withholding tax is imposed on dividends and interim dividends distributed to Greek or foreign beneficiaries by Greek SAs and profits distributed by Greek EPEs, unless an applicable double tax treaty provides otherwise (see Section F) or

unless tax relief is available under the EU Parent-Subsidiary Directive (90/435/EEC), as amended by Directive 2011/96/EC). For details regarding the rules in this directive, please see below. This tax represents the final tax liability of the recipient with respect to the dividends received if the recipient is a legal entity that does not have tax residency in Greece and does not maintain a permanent establishment in Greece.

A Greek subsidiary is not required to withhold the 5% withholding tax from dividends and interim dividends distributed to their EU parent companies if all of the following conditions are satisfied:

- The EU parent company holds a minimum 10% participation in the Greek subsidiary.
- The EU parent company holds the above participation in the Greek subsidiary for at least two consecutive years.
- The recipient EU parent company satisfies all of the following additional conditions:
  - It has one of the legal types listed in Annex I of EU Directive 2011/96/EC.
  - It is tax resident in one of the EU Member States (and is not considered tax resident in any non-EU country).
  - It is subject to one of the taxes listed in Annex I of Section B of EU Directive 2011/96/EC, with no option for a tax exemption.

If a Greek tax resident legal person distributes dividends to its parent company and if the parent company has not completed the two-year holding period for a 10% participation but meets the rest of the exemption requirements (see above), the distribution can be exempt from withholding tax, provided that the local Greek tax resident legal person deposits a bank guarantee in an amount based on a specific calculation. This amount is almost equal to the amount of the dividend withholding tax due.

Foreign tax credit. Foreign-source income is usually taxable with a credit for foreign income taxes paid, up to the amount of Greek tax corresponding to the foreign-source income. The credit cannot exceed the amount of Greek tax payable on the same amount.

C. Determination of trading income

General. Taxable income for all legal entities consists of annual gross income, less allowable deductions. In principle, expenses may be deducted only from gross income for the fiscal year in which they are incurred.

In general, all ordinary business expenses and specific items mentioned in the tax law may be deducted for tax purposes (with the exception of certain expenses that the law explicitly indicates are not deductible for tax purposes) only if the following conditions are satisfied:

- They are made in the interest of the business or in the ordinary course of its business transactions.
- They reflect an actual transaction that has a value not considered lower or higher than the actual value, based on indirect audit methods (cross-checks).
- They are recorded in the accounting books for the period in which they are incurred and are supported by proper documentation.

The Income Tax Code also includes a list of nondeductible expenses.

Special rules were introduced in 2020 with respect to a super deduction of research and development (R&D) expenses and advertising expenses, as well as of expenses related to the introduction and use of zero-emission or low-emission vehicles.

R&D expenses. Under Law 4714/29.7.2020, R&D expenses increased by 100% are deducted at the time of their realization from legal entities' gross income. The new provisions introduce an alternative procedure for the review and certification of such expenses by the General Secretariat for Research and Technology through an audit report by a certified auditor or audit firm. The increased deduction of R&D expenses applies as of 1 September 2020, while the alternative review and certification process of such expenses may apply also to R&D expenses that have already been submitted to the General Secretariat for Research and Technology by 29 July 2020. Effective from September 2022 for the 2022 fiscal year onward for R&D projects higher than EUR60,000, certification of scientific and technological research expenses by a certified auditor or audit firm is mandatory (Law 4965/02.09.2022). In addition, the profits of a company derived from the use of an internationally recognized patent in its name and developed by the company itself are exempt from income tax for up to three consecutive years, starting from the year during which these profits were realized for the first time. The exemption is granted provided that there is a connection with the R&D expenses incurred by the company for the development of the patent.

Advertising expenses of 2020, 2021, 2022 and 2023. Under Laws 4728/29.9.2020, 4876/23.12.2021 and 5005/21.12.2022, advertisement expenses realized in the 2020, 2021, 2022 and 2023 fiscal years enjoy a super deduction equal to the following, provided that certain conditions are met:
- 100% for the 2020 fiscal year
- 60% for the 2021 fiscal year
- 30% for the 2022 and 2023 fiscal years

Expenses related to zero-emission or low-emission vehicles. Amendments introduced by Laws 4646/12.12.2019 and 4710/23.7.2020 provide for the possibility of increased deduction of several expenses related to zero-emission or low-emission vehicles. These increased deductions include, among others, the following:
- For the leasing of a zero-emission company car, with a maximum retail price before taxes up to EUR40,000, the company is entitled to deduct the relevant cost from its gross revenue at the time of its realization, increased by 50% and by 25% for any additional amount. For low-emission cars (that is, up to 50 g CO_2/km). the increased discount percentages amount to 30%, and to 15% for any additional amount.
- For the cost of purchase, installation and operation of publicly accessible charging points for vehicles of zero or low emissions (that is, up to 50 g CO_2/km), undertakings may deduct the respective costs from their gross revenue at the time of realization, increased by 50% etc.

Inventories. Inventory and semi-finished products must be evaluated according to current accounting principles. The tax law does not determine any official method for stock valuation. However, beginning with the tax year in which a valuation method is first used by a company for valuation of its inventory and semifinished products, the company must use the method for a minimum of four years.

Provisions. Bad debt provisions and write-offs are deductible for corporate income tax purposes at a rate defined on a case-by-case basis, based the amount of the uncollected debt and the time period during which the debt remains uncollected.

For uncollected debts that do not exceed EUR1,000 and that are overdue for a period of more than 12 months, the taxpayer may establish a provision equal to 100% of the debt.

For uncollected debts that exceed EUR1,000 and that are overdue, the taxpayer may establish a provision equal to the following:
- 50% of the debt if it is overdue from 12 to 18 months
- 75% of the debt if it is overdue from 18 to 24 months
- 100% of the debt if this is overdue for more than 24 months

Effective from 1 January 2020, regardless of the time that the debt was created, the following rules apply:
- Bad debts up to EUR300 per debtor (VAT included) can be written off, without the creditor being obliged to conduct all the proper legal actions to safeguard their collection, under the conditions set out by law. Bad debts written off cannot exceed 5% of the total amount of the receivables of the business per tax year.
- Bad debts written off in the context of a mutual agreement or judicial settlement can also be written off under conditions for tax purposes, without the creditor being obliged to conduct all the proper legal actions to safeguard their collection.

Restrictions are imposed on the formation of bad debt provisions for a shareholder or partner holding at least a 10% participation in a business and for business' subsidiaries with a minimum 10% participation. Special rules are also provided for the deduction of bad debt provisions by banks, leasing and factoring companies.

Depreciation. Depreciation is performed by applying a specific depreciation rate to the acquisition or construction cost for a business asset. The depreciation of each fixed asset begins the month following the month in which the asset is first used or put into service by the taxpayer. The following table provides the annual depreciation rates.

Categories of assets	Depreciation rate (%)
Buildings, installations, facilities industrial installations, non-building facilities, warehouses and special loading and unloading vehicles	4
Construction and installation of charging points for zero-emission or low-emission vehicles	100
Plots of land used for mining purposes and quarries, except those used for ancillary mining activities	5

Categories of assets	Depreciation rate (%)
Public means of transportation, including airplanes, trains and ships, (other than those with zero or low emissions)	5
Machinery and equipment (except for personal computers [PCs] and software)	10
Means of private transportation of individuals (other than those with zero emissions or low emissions)	16
Means of private transportation of individuals with zero emissions	50
Means of private transportation of individuals with low emissions	25
Means of transportation of goods (other than those with zero or low emissions)	12
Means of transportation of goods with zero emissions	50
Means of transportation of goods with low emissions	25
Means of public transportation of individuals with zero emissions	50
Means of public transportation of individuals with low emissions	25
Intangible assets and royalties and expenses of multiannual depreciation	10
PCs and software	20
Equipment used for scientific and technological research	40
Other fixed assets	10

An option exists for one-off depreciation of fixed assets valued up to EUR1,500 in the year in which the assets are acquired and placed in service. Newly established companies are eligible to claim depreciation for all of their fixed assets at a 0% rate for their first three years.

Under Law 4710/23.7.2020 enterprises may deduct from their gross revenue the depreciation cost of a zero-emission company car with a maximum retail price before taxes up to EUR40,000 increased by 50% (and by 25% for any excess amount). The corresponding percentages for low-emission cars (that is, up to 50g CO2/km) are 30% and 15%, respectively.

Relief for losses. Tax losses may be carried forward to offset business profits in the following five consecutive tax years from the tax year in which they are incurred. The right to carry forward tax losses ceases to apply if both of the following events occur:

- More than 33% of the direct or indirect shareholding participation or voting rights in a legal person or entity changes in a tax year.
- In the same and/or in the subsequent tax year. the business activity of the legal person or entity changes in excess of 50% in terms of its turnover, in relation to the tax year immediately preceding the tax year of the change described in the bullet above.

Offsetting of losses incurred abroad against business profits derived domestically is not allowed, with the exception of income arising in other EU or EEA Member States that is not exempted based on an applicable double tax treaty. Losses may not be carried back.

Groups of companies. Each company forming part of a group must file a separate return. The law does not provide for consolidated tax returns or other group relief.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate	24
Reduced rate	13 (special reduced rate of 6%)
Stamp duty on private loan agreements (Stamp duty will be replaced by the digital transaction fee [in principle as of 1 December 2024; clarifications on the effective date were expected at the time of writing].)	2.4/3.6
Capital duty	0/0.3
Annual real estate tax; imposed on the value of real estate owned by legal entities; the rate depends on the zone of the real estate, its surface, year built, whether the property faces a national road and other factors	Various
Special property tax; imposed on the "objective" value of real estate property; the tax does not apply if the company has listed shares or if it discloses its corporate structure and the ultimate individual shareholders or partners are revealed	15
Real estate transfer tax; imposed on taxable value	3

E. Miscellaneous matters

Transfer pricing. Greek tax law includes a transfer-pricing clause (Articles 25 and 26 of the Code of Fiscal Procedure) that is aligned with international standards. In addition, the transfer-pricing legislation requires that an enterprise maintain documentation files.

Effective from of 1 January 2014, a new definition of "associated/affiliate enterprises" is introduced. The new law defines the term "associated person," which extends to legal entities, individuals and any other body of persons. The term encompasses two persons if any of the following circumstances exists:

- One of them holds directly or indirectly shares, parts or quotas in the other of at least 33%, estimated on the basis of total value or number, or equivalent profit participation rights or voting rights.
- Another third person participates directly or indirectly in the other two in any of the aforementioned ways.

- Between them, direct or indirect management dependence or control exists or the possibility exists for one person to exercise decisive influence over the other or for a third person to do so in both of them.

Effective from 1 January 2014, the concept of advance pricing arrangements (APAs) is introduced in Greek transfer-pricing legislation. Law 4714/29.7.2020 introduced for the first time in Greece the possibility of retroactive effect of bilateral or multilateral APAs on certain conditions.

Debt-to-equity rules. No deduction is allowed for interest expenses (with the exception of interest on banking loans and corporate bond loans) incurred on loans granted by third parties to the extent that the interest rate exceeds the interest that would be payable if the applicable interest rate were equal to the interest rate for loans connected with revolving accounts to noncredit or nonfinancial enterprises, as published by the Bank of Greece.

Interest expenses are not recognized as tax-deductible expenses, to the extent that the excess interest expenses (interest expense less any interest income) exceed 30% of the taxable profits before interest, taxes, depreciation and amortization (tax EBITDA). The tax EBITDA is determined based on the financial statements prepared in accordance with Greek accounting rules following the addition of the tax adjustments provided by the GITC.

By exception, Law 4916/2022 (FEK A' 65/28.03.2022) has introduced a possibility for full tax deduction or tax deduction exceeding the percentage introduced by the law (30%) with regard to the excessive borrowing cost for taxable persons that belong to a consolidated group. According to this law, such taxable persons are allowed to deduct the excessive borrowing cost in either of the following amounts:

- In full, provided that the taxable persons can prove that the percentage of the share capital in relation to their total assets is equal or higher (or lower by no more than 2%) when compared to the respective percentage of the consolidated group and provided that all assets and liabilities are valued based on the same method as in the consolidated financial statements
- In an amount higher than the amount they would be eligible to deduct based on the general interest limitation rule. This higher amount of tax is calculated in the following two stages:
  - — At the first stage, the group percentage should be determined by dividing the excessive borrowing cost of the consolidated group toward third parties with the EBITDA of the group.
  - — At the second stage, the group percentage is multiplied with the EBITDA of the taxpayer.

  Further clarifications from the side of the tax administration are expected.

For the purposes of applying the above, "exceeding borrowing costs" is defined as the difference between the taxpayer's taxable interest revenues and other economically equivalent taxable revenues and the deductible borrowing costs of such taxpayer, while the term "borrowing costs" includes interest expenses on all forms of debt as well as expenses incurred in connection with the raising of finance. EBITDA is the sum of taxable income,

tax-adjusted amounts for exceeding borrowing costs, as well as tax-adjusted amounts for depreciation and amortization. Tax-exempt income is not taken into account for such calculation.

However, such interest expenses, are recognized as fully tax deductible, provided that the amount of excess interest expenses recorded in the accounting books does not exceed EUR3 million per year. Further, the law recognizes the ability to carry forward without any time limitation exceeding borrowing costs that cannot be deducted in the current tax year.

Nonetheless, the above thin-capitalization rules [maximum threshold up to which exceeding borrowing costs are deducted] do not apply to the following:

- Exceeding borrowing costs incurred on loans used to fund a long-term public infrastructure project, in cases in which the project operator, borrowing costs, assets and income are all in the EU
- Special Purpose Vehicles to the extent that the interest expenditure is connected to the carrying out of public project(s) or public service(s) by means of a concession agreement ratified by the Greek parliament with a law, or by means of a Public-Private Partnership signed on or before 31 December 2014
- Credit or financial institutions

Controlled foreign corporations. Controlled foreign corporation (CFC) rules have been effective in Greece from 1 January 2014 and have been updated after the local implementation of the EU Anti-Tax Avoidance Directive (ATAD) through the enactment of Law 4607/2019. These rules are designed to deal with tax avoidance of Greek companies through the shifting of revenues to subsidiaries in low-tax jurisdictions. Basically, these rules provide for the inclusion in the taxable income of the Greek companies' undistributed passive income (for example, interest, dividends and royalties) of foreign subsidiaries under the conditions stipulated in the law. The CFC provisions do not apply to CFCs established in the EEA, as long as such entities perform substantial economic activity, supported by employees, equipment, assets and premises, as evidenced by relevant facts and circumstances.

Mergers and acquisitions. Company law regulates mergers and acquisitions in Greece. However, significant tax exemptions and relief for company restructurings may be available.

Transfers of operations. The tax law regulates the tax treatment of a group business restructuring that results in a transfer of operations (exit taxation). In the case of a local or cross-border intra-group restructuring qualifying as a transfer of functions, assets, risks and business opportunities (profit potential), the transfer of these items is considered a "transfer package" for the purposes of the law. If, within the context of such restructuring, a transfer of an intangible asset takes place (among other transfers), such transfer must be made for consideration according to the arm's-length principle, taking into account the total value of the underlying assets and the transfer package (relevant functions and risks transferred). If the taxpayer can prove that no significant intangible assets have been transferred and that arm's-length consideration has been paid with respect to the specific

transfer that took place, the transfer-package provisions do not apply.

General anti-avoidance rule. The Tax Procedure Code introduces a general anti-avoidance rule that was updated after the local implementation of the EU ATAD through the enactment of Law 4607/2019. The new provisions introduced the term "principal purpose" of an arrangement (principal purpose test) as a determining factor for whether such an arrangement is considered genuine and, consequently, considered by the tax authorities. If an arrangement is considered to be non-genuine, the relevant tax liability is calculated based on the provisions that would have been applicable if such arrangement were not in place. For the purposes of tax determination, the tax administration ignores an arrangement or a series of arrangements put into place if the main purpose, or one of the main purposes, is the obtaining of a tax advantage that defeats the objective or purpose of the applicable tax law. For the purposes of determining whether such arrangements are genuine, not all relevant data and circumstances of each case are considered, while the extent as to which the arrangement in question is being implemented for valid commercial reasons that reflect the economic reality is used as a criterion for this determination. In this context, the tax administration examines whether each arrangement falls within certain circumstances (for example, the arrangement is applied in a manner that is not consistent with usual business conduct or it leads to a significant tax advantage that does not reflect the business risk assumed by the taxpayer). The abovementioned provisions of Law 4607/2019 are applicable to income received and expenses incurred during tax years commencing beginning on or after 1 January 2019.

Exit taxation and hybrid mismatches. Law 4714/29.7.2020 implemented into Greek tax legislation the provisions of Directive 2016/1164/EU, as amended by Directive 2017/952/EU, regarding exit taxation and hybrid mismatches.

Exit taxation. Under the newly introduced rules, once a taxpayer (Greek tax resident legal person/entity or a Greek permanent establishment) transfers assets, the business carried on by its permanent establishment or its tax residence out of Greece, Greece taxes the capital gain created in Greece (even if that gain has not yet been realized at the time of the exit). At the time of the exit, the taxpayer is subject to Greek corporate income tax.

Hybrid mismatches Under the newly introduced rules, hybrid mismatches arise from differences in the legal characterization of payments or entities among two different jurisdictions. A hybrid mismatch arises between associated persons (for example, associated entities, taxpayer and associated entity, and head office and permanent establishment) or under a structured arrangement. Mismatches are dealt with by primary and secondary correction rules, as the case may be (for example, correction rules for double deduction, for deduction without inclusion, for imported mismatches, for mismatches involving permanent establishments, for hybrid transfers and for tax residence mismatches). The new provisions apply as of 1 January 2020.

Law 89/1967 regime. Enterprises licensed to operate under the Law 89/1967 regime may enter into a favorable APA with the tax authorities. A license may be granted to enterprises under this regime if certain conditions are met. The principal condition is that the company must be exclusively engaged in the provision of specific services to foreign associated companies, the foreign head office or foreign branches. The Ministry of Economy and Finance grants the license after reviewing and approving the applicant's transfer-pricing study (based on the cost-plus method).

F. Treaty withholding tax rates

Under most double tax treaties, the rates in the table below apply to the extent that the amount of interest or royalties is at arm's length. The domestic withholding tax rates apply to any excess amounts. In addition, certain recent double tax treaties include an anti-abuse clause.

Greece has implemented EU Directive 2003/49/EC. Under this directive, withholding tax on interest and royalties paid between associated companies of different EU Member States was abolished, effective from 1 July 2013.

The following table provides treaty withholding tax rates for dividends, interest and royalties.

	Dividends %	Interest %	Royalties %
Albania	5	5	5
Armenia	5	10	5
Austria	0/5 (m)(n)	0/8 (o)	0/7 (o)
Azerbaijan	5	8	8
Belgium	0/5 (m)(n)	0/10 (l)(o)	0/5 (o)
Bosnia and Herzegovina	5 (m)	10	10
Bulgaria	0 (n)	0/10 (o)	0/10 (o)
Canada	5 (m)	10	10
China Mainland	5 (m)	0/10 (l)	10
Croatia	0/5 (m)(n)	10	0/10 (o)
Cyprus	0 (n)	0/10 (o)	0 (e)
Czechoslovakia (i)	0 (n)	0/10 (o)	0/10 (o)
Denmark	0 (n)	0/8 (o)	0/5 (o)
Egypt	5	15	15
Estonia	0/5 (m)(n)	0/10 (o)	0/10 (a)(o)
Finland	0 (n)	0/10 (o)	0/10 (k)(o)
France (s)	0/5 (n)(w)	0/5 (x)	0/5
Georgia	5	8	5
Germany	0 (n)	0/10 (o)	0
Hungary	0 (n)	0/10 (o)	0/10 (o)
Iceland	5 (m)	8	10
India	5	15	20
Ireland	0/5 (m)(n)	5	0/5 (o)
Israel	5	10	10
Italy	0/5 (n)	0/10 (j)(o)	5 (a)(g)(o)
Korea (South)	5 (m)	8	10
Kuwait	0/5 (p)	0/5 (p)	15
Latvia	0/5 (m)(n)	0/10 (o)	0/10 (a)(o)
Lithuania	0/5 (m)(n)	0/10 (o)	0/10 (a)(o)
Luxembourg	0/5 (n)	0/8 (o)	0/7 (h)(o)

	Dividends %	Interest %	Royalties %
Malta	0/5 (m)(n)	0/8 (o)	0/8 (o)
Mexico	5	0/10 (l)	10
Moldova	5 (m)	10	8
Morocco	5 (m)	10	10
Netherlands	0/5 (n)	0/8/10 (f)(o)	0/7 (h)(o)
Norway	5	10	10
Poland	0/5 (n)	0/10 (o)	0/10 (o)
Portugal	0/5 (n)	0/15 (o)	0/10 (o)
Qatar	5	0/5 (q)	5
Romania	0/5 (n)	0/10 (o)	0/5/7 (a)(h)(o)
Russian Federation	5 (m)	7	7
San Marino	5 (m)	10	5
Saudi Arabia	5	5	10
Serbia	5 (m)	10	10
Singapore (t)	5 (m)	0/7.5 (u)	7.5
Slovenia	0/5 (n)	0/10 (o)	0/10 (o)
South Africa	5 (m)	8 (j)	5/7 (a)(h)
Spain	0/5 (m)(n)	0/8 (o)	0/6 (o)
Sweden (v)	0/5	0/10 (o)	0/5 (o)
Switzerland	0/5 (n)	0/10 (o)	0/5 (o)
Tunisia	5	15	12
Türkiye	5	0/12 (l)	10
Ukraine	5 (m)	10	10
United Arab Emirates	0/5 (r)	0/5 (r)	5
United Kingdom	0/5 (n)	0	0
United States	5	0 (b)	0 (d)
Uzbekistan	5	10	8
Non-treaty jurisdictions (c)	5	15	20

(a) The rate is 5% for royalties paid for the use of industrial, commercial or scientific equipment (7% under the Romania and South Africa treaties).
(b) The 0% rate applies if the recipient does not control directly or indirectly more than 50% of the voting power in the payer. However, the 0% rate does not apply to interest paid to US recipients to the extent that the interest is paid at an annual rate exceeding 9%.
(c) For details, see Section A.
(d) The 0% rate does not apply to cinematographic film royalties paid to US residents.
(e) The rate is 5% for film royalties.
(f) The rate is 8% if the recipient is a bank or similar entity.
(g) The rate is 0% for copyright royalties for literary, artistic or scientific works, including films.
(h) The rate is 5% for royalties for literary, artistic or scientific works, including films.
(i) Greece honors the Czechoslovakia treaty with respect to the Czech and Slovak Republics.
(j) Under the South Africa treaty, the rate is 0% for interest paid to the South Africa Reserve Bank. Under the Italy treaty, the rate is 0% for interest payments made by the Greek government, interest payments made to the Italian government and interest payments relating to government loans.
(k) The 10% rate applies to copyright royalties for literary, artistic or scientific works.
(l) The rate is 5% if the recipient is a bank. Under the China Mainland, Mexico and Türkiye treaties, the rate is 0% if the recipient is a government bank.
(m) According to the provisions of the relevant tax treaty, the 5% rate applies if the recipient of the dividends is a company that owns more than 25% of the payer corporation. In any case, effective from 1 January 2020, dividend distributions made by Greek companies are subject to a 5% dividend withholding tax rate even for non-treaty jurisdictions.

(n) The 0% rate applies if the conditions of the EU Parent-Subsidiary Directive are met (for Switzerland, the 0% rate applies if the conditions of the European Community (EC)-Switzerland agreement providing for measures equivalent to those in Directive 2003/48/EC are met).
(o) The 0% rate applies if the terms of the EU Interest-Royalties Directive are met; for Switzerland, the 0% rate applies if the conditions of the EU-Switzerland agreement providing for measures equivalent to those in Directive 2003/48/EC are met.
(p) The 0% rate for dividends and interest payments applies if the recipient is the government of Kuwait or a state division or subdivision, the Central Bank of Kuwait or other government organizations or government funds.
(q) The 0% rate on interest payments applies if the recipient is the government of Qatar.
(r) The 0% withholding tax rate for dividends and interest payments applies if the recipient is the government of the United Arab Emirates (UAE) or its political subdivisions, the Central Bank of the UAE or certain UAE investment authorities.
(s) On 11 May 2022, a new tax treaty was signed between Greece and France (which replaced the treaty concluded in 1963). Greece transposed this treaty into domestic law in October 2022. The table reflects the rates under the new treaty.
(t) On 14 March 2022, the Singapore-Greece income tax treaty and the protocol entered into force. The provisions of the treaty and protocol became effective mostly on 1 January 2023.
(u) The withholding tax rate for interest is 0% if the beneficial owner is a bank or if it is paid to the government of Greece or Singapore.
(v) Sweden has unilaterally terminated its tax treaty with Greece; for income tax purposes, such termination is effective for income derived as of 1 January 2022.
(w) The 0% dividend withholding tax rate applies if the recipient (beneficial owner) maintains directly at least 5% participation in the share capital of the company for a 24-month continuous period.
(x) The 0% withholding tax rate for interest payments applies, among other cases, if the recipient is the government of France or its political subdivisions, the central bank or certain public authorities, if interest payments are made in connection with the purchase of commercial or industrial equipment against credit or the sale of goods or merchandise by one enterprise to another against credit or if interest payments are made in connection with a bank loan.

At the time of writing, the Greek parliament was about to implement into domestic legislation the Greece-Japan tax treaty (signed on 1 November 2023).

A. At a glance

Corporate Income Tax Rate (%)	21
Capital Gains Tax Rate (%)	21
Branch Tax Rate (%)	21
Withholding Tax (%) (a)	
Dividends	30 (b)
Interest	30 (b)(c)
Royalties from Patents, Know-how, etc.	30 (b)
Branch Profits Tax	30 (d)
Net Operating Losses (Years) (e)	
Carryback	0
Carryforward	Unlimited

(a) The withholding tax rates may be reduced under tax treaties (see Section E).
(b) Imposed on payments to nonresidents.
(c) Interest on certain portfolio debt obligations issued after 18 July 1984 and bank deposit interest not effectively connected to a trade or business in Guam are exempt from withholding.
(d) The branch profits tax is imposed on the earnings of a foreign corporation attributable to its branch, reduced by earnings reinvested in the branch and increased by withdrawals of previously reinvested earnings.
(e) This is applicable to losses generated after 2017. A net operating loss is generally limited to 80% of taxable income. Special rules apply to certain types of losses and entities.

B. Taxes on corporate income and gains

The system of corporate income taxation in force in Guam, a territory of the United States, is a mirror image of the US income tax system. The applicable law is the US Internal Revenue Code, with "Guam" substituted for all references to the "United States." Therefore, for a description of the income taxation of corporations resident or doing business in Guam, refer to the sections on the United States and substitute "Guam" for each reference to the "United States."

Income taxes are paid to the government of Guam, which administers its tax system.

Under an agreement between the United States and Guam, Guam had the authority to separate its system of taxation from the US Internal Revenue Code, effective 1 January 1991. Because a comprehensive Guam Tax Code has not yet been developed, this date has been extended, and the mirror system of taxation continues to apply to Guam until a new code goes into effect.

The government of Guam, through the Guam Economic Development Authority, is authorized by law to allow tax rebates to qualified investors. Qualifying Certificates (QCs) for tax incentives are granted based on the investment commitment as well as on the potential for creating new employment and expanding the base of the island's industry. These incentives are aimed primarily at manufacturers, insurance companies, trusts, commercial fishing companies, corporate headquarters, specialized medical facilities, high-technology companies, agricultural enterprises and tourism-development companies.

C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Gross receipts tax, on sales of tangible personal property and services, excluding wholesale activities	5%
Use tax, on goods imported into and consumed in Guam (businesses are subject to either gross receipts tax or use tax, not both)	4%
Hotel occupancy tax	11%
Real property tax; imposed on appraised value	
Land	0.0972%
Improvements	0.3888%

Social security contributions (including 1.45% Medicare tax); imposed on Wages up to USD168,600 (for 2024); paid by	
Employer	6.2%
Employee	6.2%

Nature of tax	Rate
All covered wages (for 2024; Medicare tax); paid by	
Employer	1.45%
Employee	1.45%
(Effective from 1 January 2013, an additional Medicare tax of 0.9% applies to wages, tips, other compensation and self-employment income in excess of USD200,000 for taxpayers who file as single or head of household. For married taxpayers filing jointly and surviving spouses, the additional 0.9% Medicare tax applies to the couple's combined wages in excess of USD250,000. The additional tax applies only to the amount owed by the employee; the employer does not pay the additional tax. Employers withhold tax only on wages in excess of USD200,000.)	
Miscellaneous license fees	Various

D. Miscellaneous matters

Foreign-exchange controls. Guam does not impose foreign-exchange controls.

Debt-to-equity rules. The US debt-to-equity rules apply in Guam.

Transfer pricing. The US transfer-pricing rules apply in Guam.

E. Tax treaties

The Guam Foreign Investment Equity Act was signed into law on 24 August 2002 and amends the Organic Act of Guam with respect to the application of the Guam territorial income tax laws. The Guam Foreign Investment Equity Act provides that the tax rate under Sections 871, 881, 884, 1441, 1442, 1443, 1445 and 1446 of the US Internal Revenue Code of 1986, on any item of income from sources in Guam is the same as the rate that would apply with respect to such item were Guam treated as part of the United States for purposes of the treaty obligations of the United States. However, this provision does not apply to determine the tax rate on any item of income received from a Guam payer, if for any tax year, the tax on the Guam payer was rebated under Guam law (see Section B for a discussion of the QC rebates).

(a) For details regarding the Regime on Profits from Business Activities and the Optional Simplified Regime on Revenue from Business Activities, see Section B.
(b) Subsidiaries and branches are subject to the same tax treatment (that is, as independent taxpayers separate from their parents and headquarters).
(c) See Section B for further information.
(d) The withholding taxes, other than the dividend withholding tax, apply to nonresidents without a permanent establishment in Guatemala. For information regarding dividends, see *Dividends* in Section B.
(e) For details regarding the withholding tax on interest, see Section B.

B. Taxes on corporate income and gains

Corporate income tax. The Income Tax Law (ITL) provides that income derived from activities rendered or services used in Guatemala is considered Guatemalan-source income and must be classified and taxed under one of the following categories:
- Income from business activities
- Income from employment
- Income from capital

Corporate income tax rates. Income from business activities is income derived from ordinary or occasional trade or business. Companies that generate income from business activities may choose to be taxed under one of the following tax regimes:
- Regime on Profits from Business Activities, which applies on a net income basis (authorized expenses are deductible)
- Optional Simplified Regime on Revenue from Business Activities, which applies on a gross receipts basis (no deductions are allowed)

Under the Regime on Profits from Business Activities, companies may deduct expenses incurred to generate taxable income or to preserve the source of such income, except in specific circumstances in which the law imposes limits on deductibility. The taxable income is subject to tax at a rate of 25%. In addition, a 1% Solidarity Tax applies (see Section D).

Alternatively, companies may elect to be taxed under the Optional Simplified Regime on Revenue from Business Activities. Under this regime, companies are subject to income tax on their "taxable income," which is understood to be the difference between gross income and exempt income. The first GTQ30,000 (approximately USD3,897) of taxable income is subject to tax at a rate of 5%, and the exceeding amount is subject to tax at a rate of 7%. No deductions are allowed. Taxpayers that choose to operate through this scheme are subject to final withholding tax.

Companies operating under the Drawback Regime, the Free Trade Zone Regime or the Santo Tomas de Castilla Free-Trade and Industrial Zone (La Zona Libre de Industria y Comercio de Santo Tomás de Castilla, or ZOLIC) Regime benefit from a 100% income tax exemption for income earned from export activities for 10 years. However, on 31 March 2016, the Emerging Law for the Preservation of Employment (Decree No. 19-2016) entered into force. The purpose of the law is to limit access to benefits for taxpayers under the Drawback Regime and the Free Trade Zone Regime.

The Law of Incentives for Electric Mobility aims to facilitate and promote the import, purchase, sale and use of electric vehicles, hybrid vehicles, hydrogen vehicles and electric transportation systems in Guatemala by means of tax exemptions that must be

previously authorized by the Ministry of Energy and Mines. The following commercial activities should be exempt from income tax:

- Income generated by the assembly and/or production of electric vehicles, hybrid vehicles, electric motorcycles, hydrogen-powered vehicles and electric transportation system
- Rendering public and collective transportation services through electric vehicles, hybrid vehicles, hydrogen powered vehicles and electric transportation systems
- Income from electric, hybrid or hydrogen vehicle charging services

Income from capital and capital gains. Income from capital (other from dividends; see *Dividends*) and capital gains generated in Guatemala are taxed at a rate of 10%, regardless of the regime elected by the taxpayer. The following types of income are classified as income from capital and are subject to tax in Guatemala:

- Royalties (if not part of the taxpayer's ordinary trade and business)
- Income from leasing and subleasing (if not part of the taxpayer's ordinary trade or business)
- Interest and other types of returns derived from investments that are received by residents or nonresidents with permanent establishment in Guatemala (if not part of the taxpayer's ordinary trade or business)

Under the ITL, the following gains are subject to capital gains tax in Guatemala:

- Gains derived from the transfer of shares issued by resident entities
- Gains derived from the transfer of shares issued by foreign entities that own immovable or movable property located in Guatemala
- Gains derived from the transfer of movable or immovable assets, lottery tickets, raffle tickets or similar items or from the incorporation of assets located in Guatemala into the taxpayer's property

Administration. The statutory tax year runs from 1 January through 31 December.

Companies operating under the Regime on Profits from Business Activities must file an annual income tax return and make any payment due within three months after the end of the tax year. Companies operating under the Optional Simplified Regime on Revenue from Business Activities must file an annual information tax return within three months after the end of the tax year. Interest and penalty charges are imposed for late payments of taxes.

Under the Regime on Profits from Business Activities, companies must make quarterly advance income tax payments, which are credited against the final income tax liability. In addition, taxpayers that are qualified as Special Taxpayers must file the annual income tax return together with financial statements audited by a certified public accountant or an independent audit firm.

Companies operating under the Optional Simplified Regime on Revenue from Business Activities settle their tax through final withholding payments made by the payer. They must file a monthly tax return in which they separately determine the total

amounts of gross income, exempt income, income subject to withholding tax and income subject to direct payment (companies may be required to make direct payments of tax if they are transacting with persons not required by law to make withholdings or if they have been previously authorized by the tax authorities). The tax return must be filed within the first 10 business days of the month following the month in which the tax was generated.

Dividends. Dividends are taxed under the category of "Income from Capital." A 5% withholding tax is imposed on all dividend distributions made, regardless of the beneficiary's country of residence.

Interest. In general, a 10% final withholding tax is imposed on interest paid to nonresidents. However, withholding tax is not imposed on the following types of interest payments:
- Interest payments made by local banks to banks and financial institutions domiciled abroad (that is, entities licensed and regulated in their country of origin)
- Interest payments made by local taxpayers to multilateral institutions abroad
- Interest payments made by local taxpayers to banks and financial institutions domiciled abroad that are authorized to operate in the country by the Guatemalan Law on Banks and Financial Groups

Foreign tax relief. Guatemala does not grant relief for foreign taxes paid.

C. Determination of trading income

General. Under the Regime on Profits from Business Activities, expenses incurred to generate taxable income, including local taxes, other than income tax and value-added tax (VAT) when such taxes are not considered to be a cost, are deductible. The tax authorities are empowered to deny deductions if they determine that any of the following circumstances exist:
- The expenses are not considered necessary to produce taxable income.
- The expenses correspond to a different fiscal year.
- The expenses are not supported by the appropriate documentation.
- The taxpayer did not withhold the corresponding tax, when applicable.

The expenses must be registered in the taxpayer's accounting records.

Documents issued abroad that support the deduction of expenses may be subject to a 3% stamp tax.

The deductibility of expenses is also conditioned on the reporting and payment of withholding taxes and on the satisfaction of specific documentation requirements, which apply in certain circumstances. This documentation includes, among others, the following items:
- Valid invoices authorized for local operations
- Invoices or receipts issued abroad
- Notary Public deeds
- Payrolls reported to the social security authorities

- Customs returns for the importation of goods including the tax receipts

In general, payments on transactions valued over GTQ30,000 (approximately USD3,897) must be made through a banking or financial institution, and the corresponding balance statement is required as part of the supporting documentation needed to consider the payment deductible. Operations not made through the banking system must be documented through a Notary Public deed.

For these purposes, the law provides that a single transaction may be considered to include the following:

- All payments made to a single source or provider during a calendar month
- An operation of GTQ30,000 (approximately USD3,897) or above that involves partial or split payments to the same provider or person

In both of the above cases, taxpayers should use the payment or documentation methods listed above. Otherwise, the expense may not be deductible for income tax purposes and may not be considered a tax credit for VAT purposes. This requirement is known in Spanish as "Bancarización."

The deduction for royalties, payments for financial or technical advice and professional service fees for services rendered from abroad to local taxpayers is limited to 5% of the taxpayer's gross income.

Interest is deductible for income tax purposes if all of the following conditions are satisfied:

- The loan proceeds that give rise to such interest must be used to generate taxable income.
- Payments must be documented and correspond to the same fiscal year.
- The taxpayer must comply with the obligation to withhold the corresponding tax, if applicable.
- The deductible amount may not exceed the value calculated by multiplying the interest rate set by the Guatemalan Monetary Board by a total of three times the "average net asset" amount reported by the taxpayer in the annual tax return. "Average net asset" is defined as the sum of the total net worth of the previous year and the total net worth of the current year (values declared in the annual income tax returns), divided by two.
- Loans issued abroad must be obtained from banks or financial institutions that are registered and monitored by the state entity in charge of bank supervision in the country of origin. They must also be authorized for financial intermediation in the country in which the loan is granted.
- The interest rate on foreign-currency loans may not exceed the maximum simple annual rate set by the Monetary Board, minus the value of the quetzal exchange rate variation in relation to the currency in which the loan is expressed, during the period corresponding to the annual income tax return.

Deductibility of expenses on airline operations. In January 2020, Decree 2-2020 of the Guatemalan Congress took effect. It allows airlines engaged in international transport services to deduct the

costs and expenses generated outside of Guatemala that are necessary to provide these services in the country.

Taxpayers established abroad that carry out international air transportation activities both ways between Guatemala and other countries, and whose operations are performed by branches, agencies or other permanent establishments in the country must apply the general deductibility rules of the income tax law and also deduct a proportion of the overall costs and expenses reported by the parent company in accordance with a specific formula that should be automatically calculated by the electronic system provided by the tax authorities when preparing the electronic tax return for corporate income tax purposes.

The Decree mentioned above indicates that the airline should support the information for the calculation of the proportional deductible expense with the audited financial statements of the parent entity, which must be prepared in accordance with international accounting rules, duly *apostilled* and translated into Spanish. The Decree also provides that taxpayers (branches, agencies or permanent establishments) that are unable to provide this documentation may apply the presumption that the taxable base is 15% of their gross income and, accordingly, such taxable base should be subject to the 25% income tax rate.

Inventories. Inventories are valued at cost. The acquisition cost may be computed using various valuation methods provided in the income tax law. No deviation from these methods is allowed unless previously authorized by the tax authorities.

Cattle may be priced at cost or sales price.

No provisions for deterioration or obsolescence are allowed. The destruction of inventory is considered a deductible expense if it is certified by an inspector from the tax authorities or by a Notary Public.

Provisions. Provisions for bad debts of up to 3% of credit-sales balances are deductible (excluding bad debts guaranteed by pledge or mortgage). Reserves for severance compensation of up to 8.33% of payroll costs are also deductible.

Tax depreciation. Straight-line depreciation is allowed, subject to the following annual maximum rates.

Asset	Rate (%)
Buildings and leasehold improvements	5
Plantations	15
Furniture, fixtures, ships and railroads	20
Machinery and equipment, vehicles and containers	20
Computer equipment	33.33
Tools, porcelain, glassware and certain animals	25
Other items that are not specified	10

Goodwill can be amortized over a minimum period of 10 years. Other intangible assets related to intellectual property rights may be amortized over a minimum period of five years.

Oil and other natural resources are subject to depletion in accordance with the level of production and the remaining reserves.

Relief for losses. Under the Regime on Profits from Business Activities and the Optional Simplified Regime on Revenue from Business Activities, net operating losses cannot offset taxable income in prior or future years.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax	12%
Levies on petroleum distribution; rate varies by type of fuel	USD0.17 to USD0.60 per gallon
Land tax; imposed annually on value of land; maximum rate, applicable to value in excess of GTQ70,000 (approximately USD9,093)	0.9%
Revaluation tax; imposed on the increase in value resulting from a revaluation of immovable property and other fixed assets by an authorized third-party adjuster	10%
Import duties	0% to 20%
Social security tax; imposed on wages; paid by	
Employer	12.67%
Employee	4.83%
Solidarity Tax (ISO); imposed on legal entities subject to the Regime on Profits from Business Activities; tax rate applied to the higher of 1/4 of net assets or 1/4 of gross income; newly organized entities are not subject to ISO during their first four quarters of operations; entities that have a gross margin of lower than 4% of its gross income or incur losses for two consecutive years are not subject to the tax	1%

E. Miscellaneous matters

Foreign-exchange controls. The currency in Guatemala is the quetzal (GTQ). As of 1 March 2024, the average exchange rate was approximately GTQ7.81835 = USD1.

Guatemala does not impose foreign-exchange controls. The exchange system is regulated through the banks.

Debt-to-equity rules. Guatemala does not impose any debt-to-equity requirements.

Anti-avoidance legislation. The tax law contains general measures to prevent tax fraud and similar conduct.

Transfer pricing. Effective from 1 January 2013, official transfer-pricing rules apply to transactions with related parties resident abroad. However, Decree 19-2013 of the Guatemalan Congress suspended the application of the transfer-pricing rules as of 23 December 2013. These rules re-entered into force as of 1 January 2015. The Income Tax Law provides the following two formal obligations:

- Annex to the Annual Income Tax Return on related parties must be filed no later than 31 March of each fiscal year.

- Annual preparation of the Transfer Pricing Study is needed when formally required by the tax authorities.

Online Electronic Invoice regime. On 20 March 2018, the Board of Directors of the tax authorities issued Agreement 13-2018, which entered into force on 23 May 2018. This agreement contains the new Online Electronic Invoice regime, which provides rules regarding the issuance, transmission, certification and storage by electronic means of invoices, credit and debit notes, receipts, and other documents authorized by the tax authorities.

On 3 April 2019, the Guatemalan Congress approved Decree 4-2019, which entered into force on 30 October 2018. The Decree introduced amendments to the Value Added Tax Law related to the Online Electronic Invoice regime. Under the amendments, taxpayers operating under such regime are required to keep an electronic accounting system for recording operations and supporting documentation with respect to the taxpayer's ordinary trade or business.

Monthly bank reconciliation. In the last quarter of 2021, the tax authorities gave notice to taxpayers of a new tax requirement model. Under this model, as of 2022, the information requests for tax audits will include the submission of monthly bank reconciliation as determined in such model. Such reconciliation will allow the tax authorities to obtain the following information at the income and expense level:

- Accounts receivable and payable with domestic and foreign clients and suppliers
- Accounts receivable and payable with shareholders
- Accounts receivable with employees
- Advance payments made by and to customers and suppliers
- Interest earned and paid
- Transfer of funds (incoming and outgoing) between bank accounts

F. Tax treaties

Guatemala signed a double tax treaty with Mexico in March 2015, which is not yet in effect. The treaty will enter into effect after both countries complete their respective legislative approval processes.

Withholding Tax (%)	
Dividends	0 (b)
Interest	0
Royalties	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0 (c)
Carryforward	Unlimited

(a) This is the standard corporate income tax rate. For details regarding other rates, see Section B.
(b) Dividend withholding tax is not imposed on dividends paid to foreign shareholders. See Section B. Dividends paid to Guernsey resident individual shareholders may be subject to withholding tax.
(c) A carryback for up to two years is available for terminal losses if trade is permanently discontinued.

B. Taxes on corporate income and gains

Corporate income tax. A Guernsey resident company is subject to income tax on its worldwide income. A company not resident in Guernsey is subject to Guernsey income tax on its Guernsey-source income (other than disregarded company income, such as bank interest), unless a double tax treaty applies. A company is resident in Guernsey if it is centrally managed and controlled in Guernsey, its ultimate shareholder control is in Guernsey (tracing through any intermediary structures) or if it is incorporated in Guernsey. A company can apply to be treated as not resident in Guernsey if it is tax resident in another jurisdiction, if it is managed and controlled in that other jurisdiction, and if that other jurisdiction has a higher rate of company tax of at least 10%

or has a tiebreaker clause in a double tax agreement or other international agreement. Anti-avoidance provisions apply.

Rates of corporate income tax. The standard rate of corporate income tax is 0%.

A 10% rate applies to profits derived from the following:
- Banking business
- Insurance management
- Insurance intermediaries
- Domestic insurance business
- Regulated fiduciary business
- Fund administration business
- Custody services provided by banks
- Regulated investment management services provided to individual clients
- Operation of an investment exchange
- Regulatory compliance business
- Operation of an aircraft registry

A 20% rate applies to profits from the following:
- Guernsey property
- Regulated utility business
- Retail business carried on in Guernsey that has a taxable profit of more than GBP500,000 in a year
- Importation or supply of hydrocarbon oil or gas
- Cultivation or use of the cannabis plant
- Business of the prescribed production or prescribed use of controlled drugs

Exempt companies. An exempt company regime is available for certain collective-investment schemes. An exempt company is treated as nonresident in Guernsey for tax purposes. It is taxable in Guernsey only on Guernsey-source income, excluding bank interest. Collective-investment schemes (typically unit trusts, investment trusts or bodies involving other forms of public participation) form a substantial sector of the finance industry in Guernsey. Other companies associated with such schemes may also qualify for exemption. Companies pay a fixed annual fee of GBP1,600 to register for exempt status, regardless of their income.

Capital gains. Capital gains are not taxable in Guernsey.

Economic substance. Economic substance requirements have been introduced and are effective for accounting periods beginning on or after 1 January 2019. The requirements apply to Guernsey tax resident companies, regardless of their country of incorporation. Companies with gross income from carrying on any of the following types of business are required to meet the economic substance test:
- Banking
- Insurance
- Fund management
- Finance and leasing
- Headquarters
- Shipping
- Holding company
- Intellectual property holding
- Distribution and service center

The economic substance test looks at whether a company is directed and managed in Guernsey (note that this is a specific test that is different from management and control) and whether the company is undertaking its core income-generating activities in Guernsey, supported by adequate expenditure, employees and premises in Guernsey.

Penalties for failing to meet the economic substance test range from financial penalties of up to GBP150,000 to strike off (dissolution of company) and exchange of information.

The economic substance rules have been extended to partnerships; the rules are effective for new partnerships established from 1 July 2021, and for accounting periods beginning on or after 1 January 2022 for partnerships already in existence as at 30 June 2021. The rules apply to "resident partnerships" with gross income from the types of business noted above. The substance test for partnerships is essentially the same as the test for companies, but some exemptions apply.

Administration. The Guernsey tax year corresponds to the calendar year. Tax payments on account are normally due in four equal installments on 15 April, 15 July, 15 October of the current tax year and the following 15 January, with a balancing payment or repayment due after filing and assessment.

An annual tax return is generally required for all Guernsey resident companies and some foreign companies with Guernsey-source income. The annual tax return must be filed electronically by 31 January after the following year; however, for 2024 returns onward, the filing deadline for will be 30 November of the following year. Automatic late filing penalties may be imposed.

If taxable distributions or loans to Guernsey resident individuals are made during the year, a final Distribution Reporter tax return is required to be filed by 15 January following the tax year. Taxes on such events must be withheld at source and paid quarterly by the 15th of the month following the relevant quarter.

Companies must file annual validation forms with the Guernsey Registry, and pay the relevant filing fee. Fees are based on the type and activity of the company and range from GBP100 to GBP1,000.

Resident partnerships are required to register with the Guernsey Revenue Service and file an annual tax return, even where the substance rules are not applicable. Despite the tax return filing requirement, a partnership remains transparent for Guernsey tax purposes.

Dividends. No tax is withheld from dividends paid to foreign shareholders of Guernsey companies.

If dividends are paid to Guernsey resident individual shareholders, the company may be required to withhold tax of up to 20% of the distribution. The amount of tax withheld may be reduced if the company has already suffered tax on the profits distributed. Companies maintain tax pools to track undistributed income (income that has not suffered tax at 20% or more) and tax already suffered. Distributions are required to be matched against undistributed income first. If the company has an ultimate beneficial member who is Guernsey resident, withholding may also apply

in some situations, even if the dividend is not received by the Guernsey resident.

Companies may also be required to withhold tax at a rate of 20% if a loan is advanced to a Guernsey resident beneficial member, but some exemptions apply.

Foreign tax relief. Guernsey grants specific double taxation relief for income from its treaty countries and grants unilateral relief for income from non-treaty countries up to an effective maximum rate of 15%.

C. Determination of trading income

General. The assessment is based on accounting profits, subject to certain adjustments. To be deductible against revenue, expenses must be incurred wholly and exclusively for the purposes of the trade and must not be capital in nature.

Nonresident companies are exempt from tax on disregarded company income, including Guernsey-source bank interest.

Tax depreciation. Depreciation is not an allowable deduction, but annual allowances are available on the cost of certain plant and machinery. Annual allowances are generally calculated at a rate of 20% on a reducing-balance or straight-line basis (subject to specific variations).

Groups of companies. Under Guernsey law, a trading loss incurred by a member of a 90%-owned group of companies may be offset against profits earned in the same tax year by another member of the group. All members of the group must be incorporated and resident in Guernsey or have a fixed place of business in Guernsey. Restrictions apply if members of the group are taxed at different rates.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Social security contributions; payable on the salaries and wages of employees resident in Guernsey; paid by (2024 rates)	
Employer (maximum contribution of GBP1,034.24 per month)	6.9
Employee (maximum contribution of GBP1,079.21 per month)	7.2
Tax on real property; based on the unit value of the property located in Guernsey; rates vary according to the type of property	Various
Document duty on sales of Guernsey property; based on the value of the transaction	2.25 to 5.50
(Legislation extending the duty to include the sale of shares in corporate vehicles holding Guernsey real property has been introduced.)	

E. Miscellaneous matters

Anti-avoidance legislation. Guernsey's tax law includes a general anti-avoidance rule. The Director of the Revenue Service has broad powers to adjust a taxpayer's tax liability and assess

income tax that, in the Director's opinion, has been deliberately avoided by a transaction entered into by the taxpayer.

Exchange controls. Guernsey does not impose any foreign-exchange controls.

Debt-to-equity ratios. Guernsey does not prescribe any debt-to-equity ratios, but the general anti-avoidance rule can be applied in some situations.

Types of companies. The Guernsey company law allows the incorporation of companies limited by shares, guarantee or shares and guarantee. A company limited by shares and guarantee may have both shareholders and guarantee members.

Protected cell companies. Protected cell companies (PCCs) consist of several cells and core capital. Each cell is liable only to its own creditors. A creditor of a particular cell has recourse to the assets of that cell and the core capital only. PCCs may be used for captive insurance companies, collective-investment schemes or other approved enterprises.

Incorporated cell companies. Incorporated cell companies are similar to PCCs in terms of their cellular nature. However, each cell is regarded as an incorporated entity in its own right and, consequently, is subject to tax as a separate entity.

Migration of companies. Guernsey law allows an overseas company to migrate into Guernsey and be registered as a Guernsey company. In addition, a Guernsey company may be removed from the Companies Register with the intention of becoming incorporated in another jurisdiction. In both cases, the law of the other jurisdiction must provide for the migration, the company must be solvent and certain other conditions must be met.

Country-by-Country Reporting. Guernsey has committed to adopt the minimum standards required under the Base Erosion and Profit Shifting (BEPS) program of the Organisation for Economic Co-operation and Development (OECD). Under Action 13, certain reporting obligations are required with respect to Country-by-Country Reporting (CbCR). Ultimate Parent Entities and Surrogate Parent Entities have notification and filing requirements in Guernsey. Constituent Entities also have notification requirements, which form part of a company's annual income tax return filing.

Pillar Two. On 19 May 2023, in conjunction with Jersey and the Isle of Man, Guernsey announced its intentions with respect to the global Pillar Two initiative to set a minimum effective tax rate for the world's largest multinational enterprises. Guernsey intends to implement an "Income Inclusion Rule" and a domestic minimum tax to provide for a 15% effective tax rate for large in-scope multinational enterprises, from 2025. On 21 May 2024, Guernsey reconfirmed its intention to implement an "Income Inclusion Rule" and confirmed its intention for the domestic tax to be a Qualified Domestic Minimum Top-up Tax. For the latest information, please see the *BEPS 2.0 – Pillar Two Developments Tracker* (ey-beps-2-0-pillar-two-developments-tracker.pdf).

Mandatory Disclosure Rules. Guernsey has committed to introduce Mandatory Disclosure Rules for Common Reporting

Standard Avoidance Arrangements and Opaque Offshore Structures (MDR). The MDR legislation is in place (it is based on the OECD version of the MDR) but is not yet in force. The regime is not expected to enter into force until 2025 at the earliest.

F. Tax treaties

Guernsey has entered into comprehensive tax treaties with the following jurisdictions.

Cyprus	Liechtenstein	Qatar
Estonia	Luxembourg	Seychelles
Hong Kong SAR	Malta	Singapore
Isle of Man	Mauritius	United Kingdom
Jersey	Monaco	

Guernsey has completed negotiations for comprehensive double tax treaties with Bahrain, Gibraltar and the United Arab Emirates, and arrangements to sign the agreements are being discussed. The tax treaty negotiations with Lebanon were deferred due to the COVID-19 pandemic and discussions are ongoing. Discussions on a possible double tax treaty with Argentina have been deferred indefinitely.

Guernsey also has partial (limited) treaties with the following jurisdictions.

Australia	Greenland	New Zealand
Denmark	Iceland	Norway
Faroe Islands	Ireland	Poland
Finland	Japan	Sweden

In addition, Guernsey has signed tax information exchange agreements with 61 jurisdictions.

Corporation Tax	Unlimited (e)
Capital Gains Tax	24

(a) The 25% rate applies to noncommercial companies. Commercial companies are taxed at a rate of 40% of income, or 2% of turnover, whichever is lower, subject to the approval of the Commissioner-General of the Guyana Revenue Authority (GRA). Telephone companies are taxed at a rate of 45%. See Section B.
(b) See Section B.
(c) These withholding taxes apply to payments to companies and individuals not engaged in trade or business in Guyana.
(d) This tax applies to deemed remittances of profits to the overseas head office.
(e) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in Guyana are subject to tax on their worldwide income from all sources. Relief with respect to taxation suffered on foreign-source income in an

overseas jurisdiction may be available under a double tax treaty. Nonresident companies engaged in business in Guyana are subject to tax on income directly or indirectly accruing in or derived from Guyana.

Rates of tax. Noncommercial companies or companies engaged in noncommercial activities are taxed at a rate of 25%. Any company that does not fall within the definition of a commercial company is regarded as a noncommercial company, including manufacturers and service companies.

Commercial companies or companies engaged in commercial activities are taxed at a rate of 40% of chargeable income. A commercial company is a company with at least 75% of its gross income derived from trading in goods not manufactured by it. Commercial companies include commission agencies, banks and insurance companies carrying on insurance business other than long-term insurance business.

If 40% of chargeable income is less than 2% of turnover, the commercial company is required to pay up-front corporation tax at a rate of 2% of turnover (minimum tax). If the GRA is satisfied with the company's calculation of chargeable income, the GRA allows the company's tax liability to be limited to 40% of chargeable income, and any excess minimum tax paid may be carried forward and offset against future corporation tax liabilities with certain restrictions.

Telephone companies are subject to corporation tax in Guyana at a rate of 45%.

An advance corporation tax at a rate of 10% must be deducted by the payer from gross payments made to a nonresident company with respect to goods and services if the nonresident company is engaged in a trade or business in Guyana. The advance corporation tax is creditable against the nonresident company's ultimate corporation tax liability.

Capital gains. Capital gains tax is payable at a rate of 20% on the net chargeable gain of a person accruing or arising in Guyana or elsewhere, regardless of whether it is received in Guyana, on the change of ownership of property, subject to certain exceptions. In general, if capital allowances were taken with respect to an asset being disposed, the capital gain is the amount by which the value of the consideration received exceeds the cost of or acquisition value of the asset, less any capital allowances taken with respect to the property. In certain sectors, a disposal may give rise to a balancing adjustment, which may be subject to corporation tax and may affect the amount of applicable capital gains tax.

Capital losses may be carried forward for 24 years.

If an exemption from property tax is granted, a concomitant exemption is granted for capital gains tax with limited exceptions.

Short-term capital gains from the disposal of assets within 12 months of their acquisition and from the disposal of assets 25 or more years after their acquisition are exempt from capital gains tax. However, short-term capital gains are subject to corporation tax.

Administration. The tax year is the calendar year. Tax is calculated on the profits for the accounting period that ends during the tax year. For each quarter, a company is required to pay a corporation tax or minimum tax installment, whichever is lesser. The quarterly payments must be made by 15 March, 15 June, 15 September and 15 December in each tax year. Quarterly payments of corporation tax are determined based on the taxable income for the preceding accounting period. Minimum tax installments are based on the actual gross sales or receipts of the company for the relevant quarter. The minimum tax calculation excludes income or receipts that are exempt for corporation tax purposes, such as dividends received from Guyana resident companies.

Annual tax returns must be filed by 30 April in the year following the tax year, and any balance of tax due is payable at that time. In general, audited financial statements must be filed with the annual tax returns. The Commissioner-General may allow a company to file its tax returns with draft financial statements. However, the audited accounts must be filed on or before 31 December of the year in which the returns are due to be recognized as being filed on a timely basis.

Failure to file a tax return attracts a penalty of 10% of the amount of tax assessed, while failure to file a nil tax return or a tax return that discloses a loss attracts a penalty of GYD50,000. If the balance of tax due is not paid by the 30 April deadline, a penalty is payable equal to 2% of the unpaid tax for each month, or part thereof, that tax remains outstanding. Interest is also payable at a rate of 18% per year.

Dividends. Dividends received from nonresident companies are subject to tax. Dividends received by resident companies from other resident companies are exempt from tax.

Dividends paid to nonresident companies and nonresident individuals are generally subject to a withholding tax of 20%.

Double tax relief. Bilateral agreements have been entered into between the Government of Guyana and the governments of certain other countries to provide relief from double taxation (see Section F). Relief from double taxation is achieved by one of the following two methods:

- Exemption or a reduced rate on certain classes of income in one of the two countries concerned.
- Credit if the income is fully or partially taxed in the two countries. The tax in the country in which the income arises is allowed as a credit against the tax on the same income in the country where the recipient is resident. The credit is the lower of the Guyana tax or the foreign tax on the same income.

C. Determination of taxable income

General. The assessment is based on financial statements prepared according to international accounting standards, subject to certain adjustments.

To be deductible, expenses must be incurred wholly and exclusively in the production of income. Deductions for head-office expenses paid by a Guyana branch to a nonresident head office or to a nonresident associate or subsidiary company, or by a Guyana

resident company to a nonresident parent or associate company, may not exceed 1% of the sales or gross income of the payer.

Inventories. Inventory may be valued at cost or market value, whichever is lower. A method of stock valuation, once properly adopted, is binding until permission to change is obtained from the GRA.

Bad debts. Trading debts that have become bad and that are proven to be so to the satisfaction of the GRA may be deducted in determining taxable income. In addition, doubtful debts are deductible to the extent that they have become bad during the year. If these debts are subsequently collected, they are considered to be income subject to tax in the year of recovery.

Tax depreciation (capital allowances). Depreciation is calculated on the depreciated value of fixed assets at the beginning of each accounting year.

Capital expenditure incurred on plant, machinery or equipment or any building housing machinery owned by the taxpayer or incurred with respect to machinery and equipment that the taxpayer has the full burden of wear and tear qualify for capital allowances under the declining-balance method or straight-line method. However, if the latter method is used, a maximum of 90% of the cost of the asset may be depreciated.

The following are the applicable rates for assets acquired on or after 1 January 1992.

Asset	Rate (%)
Aircraft	33.3
Boats	10
Buildings (housing machinery)	5 (on cost)
Buildings used for providing services and warehousing	2 (on cost)
Furniture and fittings	10
Electric motor vehicles	50
Motor vehicles	20
Office equipment	
Electronic	50
Other	15
Plant and machinery	20

For new equipment for industries harnessing alternate energy through wind, solar, water and biomass technologies, capital expenses are written off within two years.

Separate capital allowances are available with respect to the petroleum and mining sectors. Capital allowances may be claimed on petroleum capital expenditure in the petroleum sector at a rate of 20% per year on a straight-line basis. In addition, in the diamond and gold mining sector, capital allowances may be claimed on exploration and development expenditure at a rate of 20% per year on a straight-line basis. Other sectors are also granted specific initial and annual allowances.

Relief for tax losses. Losses carried forward can be written off to the extent of half the taxable income for the tax year. The

unrelieved balance can be carried forward indefinitely. No loss carryback is allowed.

In the petroleum sector, corporation tax losses may be written off to the full extent of the taxable income for the tax year. Similarly, the restriction on the ability to set off the full extent of losses against taxable income does not apply to commercial companies liable to pay minimum tax.

Groups of companies. No provisions for group relief exist.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); applies to most products supplied and services rendered in Guyana; imports of goods are also subject to VAT; certain imports of services are also subject to VAT under the VAT reverse-charge mechanism; companies and other businesses are required to register for VAT if their turnover exceeds a stipulated threshold as specified in the Value-Added Tax Act (currently GYD15,000,000 [approximately USD75,000] a year)	
Standard rate	14
Certain items, including specified exports	0
Property tax; payable on the net property of a company in excess of GYD40 million; the tax is payable on the amount by which the aggregate value of all movable and immovable property of a person exceeds the aggregate value of all debts owed	
On the first GYD40 million of net property	Nil
For every dollar of the next GYD20 million of net property	0.50
For every dollar of the remainder of net property	0.75
Premium tax; payable on insurance premiums (other than for long-term insurance) paid to a foreign company	
A foreign company that has not established a place of business in Guyana	10
A foreign company that has established a place of business in Guyana	6

E. Miscellaneous matters

Foreign-exchange controls. The Guyana currency is the Guyana dollar (GYD).

Guyana has a floating exchange-rate regime. Profits may be repatriated without the approval of the Central Bank of Guyana. However, certain restrictions are imposed with respect to the settlement of local transactions in foreign currency and the borrowing of funds in a foreign currency. Permission is also required to establish a foreign-currency account.

Debt-to-equity rules. In general, no thin-capitalization rules are imposed in Guyana. However, if a local company pays or accrues

interest on securities issued to a nonresident company and if the local company is a subsidiary of the nonresident company or a fellow subsidiary with respect to the nonresident company, the interest is treated as a distribution and may not be claimed as a deduction against the income of the local company.

F. Treaty withholding tax rates

The following table lists the withholding tax rates under Guyana's tax treaties. If the treaty rates are higher than the rates prescribed in the domestic law, the lower domestic rates apply.

	Dividends %	Interest %	Royalties %
Canada	15	25	10
Caribbean Community and Common Market (a)			
Antigua and Barbuda	0	15	15
Barbados	0	15	15
Belize	0	15	15
Dominica	0	15	15
Grenada	0	15	15
Jamaica	0	15	15
St. Kitts and Nevis	0	15	15
St. Lucia	0	15	15
St. Vincent and the Grenadines	0	15	15
Trinidad and Tobago	0	15	15
United Kingdom	10/15 (b)	15	10
Non-treaty jurisdictions	20	20	20

(a) The listed countries have ratified the Caribbean Community and Common Market (CARICOM) double tax treaty.

(b) The lower rate applies if the recipient and beneficial owner of the dividends is a company that owns 10% or more of the voting power of the distributing company.

Guyana has signed or initialed double tax treaties with Kuwait, Mauritius and the United Arab Emirates, but these treaties are not yet in force.

Carryforward	3 (d)

(a) An alternate minimum income tax and asset tax are also imposed (see Section B). A Social Contribution Tax is imposed at a rate of 5% on companies with net income exceeding HNL1 million. Domiciled entities that have reported operating losses in two consecutive or alternate tax periods that are

still open for examination are also subject to advance income tax (AIT) payments that are computed at a rate of 1% of gross income equal to or greater than HNL100 million. The AIT may be credited against the annual corporate income tax, asset tax or the Social Contribution Tax. Branches of foreign companies dedicated to air, land and maritime transport pay the corporate income tax rate of 25% on an amount of net taxable income equal to 10% of their Honduran-source gross income.

(b) Withholding taxes are imposed on payments to nonresident companies and individuals.

(c) This withholding tax applies to payments for films and video tapes for movies, television, video clubs and cable television.

(d) Only companies engaged in agriculture, manufacturing, mining and tourism may carry forward net operating losses.

B. Taxes on corporate income and gains

Corporate income tax. Honduran-resident companies (that is, those incorporated in Honduras) are no longer taxed on their worldwide income. Effective from 1 January 2017, only their Honduran-source income is subject to Honduran tax. Nonresident companies are subject to income tax only on income derived from Honduran sources.

Corporate income tax rates. Companies are subject to corporate income tax at a rate of 25% on their net income.

A Social Contribution Tax of 5% applies to companies with net income exceeding HNL1 million.

A 1% income tax installment applies to taxpayers that meet the following conditions:

- During open tax periods, they have reported operating losses in two consecutive or alternate tax periods.
- In the prior tax period, they derived gross income equal to or greater than HNL100 million.

The installment equals 1% of the gross income reported.

The income tax installment is a tax credit that may be applied against income tax, asset tax or the Social Contribution Tax on the filing of the year-end tax return.

The following taxpayers are not subject to the income tax installment:

- Individuals or entities in the preoperative phase, up to a maximum of five years.
- Companies and individuals that incur losses resulting from an act of God or force majeure. This loss needs to be certified by an audit firm registered with the respective accounting association, notwithstanding a subsequent examination by the tax authorities.
- Companies engaged in agriculture, manufacturing, mining and tourism and individuals authorized by the tax authorities to carry forward losses in accordance with Section 20 of the Honduran Income Tax Law (HN ITL).
- Companies and individuals that calculated and paid tax in the prior tax period and are subject to income tax installments in accordance with Section 34 of the HN ITL.
- Companies and individuals that prove through a tax audit report, carried out by an audit firm registered with the respective accounting association, that the tax loss is real, subject to verification from the tax authorities.

- Companies and individuals established under Section 7 of the HN ITL and tax-exempt by law or Special Legislative Decrees.

Companies operating under the following special regimes are exempt from income tax, sales tax, customs duties and certain municipal taxes:
- Free Trade Zone (Zonas Libres, or ZOLI)
- Temporary Import Regime (Régimen de Importación Temporal, or RIT)
- Free Tourist Zone (Zona Libre Turística, or ZOLITUR)
- Call Centers and Business Services Outsourcing Centers

Alternative minimum income tax. An alternative minimum income tax (AMT) applies to resident individuals and corporations.

For 2020 and future years, the AMT applies to annual gross income greater than HNL1 billion at a rate of 1% (0.5% for taxpayers in special sectors).

The minimum income tax rate is reduced to 0.75% of gross income for individuals or legal entities producing or selling the following products or services:
- Cement production and distribution
- Public utility services provided by state-owned companies
- Products and medicines for human use (at the importation and production levels)
- Bakery-related products
- Production, distribution or marketing of steel products for construction purposes, excluding the sale of scrap metal or the activity of the mining industry
- Production, marketing or export of coffee

Asset tax. An asset tax is assessed based on net assets (as defined in the law) reported in the company's balance sheet.

The following entities are not required to pay the tax:
- Legal entities whose total net assets do not exceed HNL3 million. If the amount of the total net assets exceeds this value, the tax is applied to the excess value.
- Legal entities exempt from the payment of income tax.
- Entities operating in a ZOLI, Industrial Processing Zone (Zona Industrial de Procesamiento, or ZIP) or ZOLITUR, Temporary Importation Regime (Régimen de Importación Temporal, or RIT) entities and others under special tax exemption regimes.
- Legal persons in the preoperative stage of their activities.
- Taxpayers who suffer operating losses in the fiscal year, originated by fortuitous events or force majeure. The loss must be certified by an auditing firm, duly registered with the respective College (Bar), without prejudice to subsequent control.

Specific rules apply to compute the tax for financial institutions, insurance companies and holding companies. The amounts paid as income tax during the previous fiscal year constitutes a credit with respect to the net asset tax payable. If the amount paid for income tax is equal to or greater than the net asset tax payable, the obligation is deemed to have been fulfilled. If the amount paid as income tax is less than the amount payable as net asset

tax, the resulting difference is the net asset tax payable. The asset tax rate is 1%.

Financial transaction tax. A financial transaction tax applies to local and foreign currency operations carried on in either national or foreign currency within the institutions of the national banking system, including the following:

- National Bank for Agricultural Development (Banco Nacional de Desarrollo Agrícola, or BANADESA)
- Financial companies, representative offices and private financial development organizations, supervised by the National Banking and Insurance Commission (Comisión Nacional de Bancos y Seguros, or CNBS)

The financial transaction tax applies to the following transactions:

- Debits (withdrawals) on demand deposits and savings deposits made at financial institutions
- Payments or transfers of funds through financial institutions not made through the channels indicated above
- Acquisition of cashier's checks, certified checks, traveler's checks, wire transfers or other similar financial instruments at financial institutions without using the accounts indicated in the first bullet above
- Payments or transfers in favor of third parties on behalf of principals with charge to the money collected on their behalf, made by financial entities without using the accounts indicated in the first bullet above
- Transfers or money remittances, to or from abroad or within the country, made through financial institutions without using the accounts indicated in the first bullet above
- Redemptions of fixed-term certificates of deposit
- Annual fees for each active cardholder credit card

The following are the amounts of the contributions required under the financial transaction tax for the transactions listed above:

- For the first, second, fourth, fifth and sixth bullets listed above: HNL2 per thousand or fraction of a thousand
- For the third bullet listed above: HNL1.50 per thousand or fraction of a thousand

The contributions for the transactions in the seventh (last) category above are provided in the following table.

Credit line		
Exceeding HNL	Not exceeding HNL	Contribution HNL
40,000	50,000	500
50,000	100,000	600
100,000	200,000	700
200,000	500,000	800
500,000	1,000,000	900
1,000,000	–	1,000

Capital gains. Capital gains are subject to tax at a rate of 10%.

A gain generated from any type of transfer of assets or rights by a person whose ordinary trade does not involve commercializing such assets or rights is considered a capital gain.

However, if the asset being transferred is part of the ordinary course of business of the transferor (for example, the transferor ordinarily or habitually engages in the trade or business of selling shares), the gains are categorized as ordinary income subject to corporate income tax at a rate of 25%.

Capital losses are deductible only if derived from the sale of depreciable assets or from the sale of non-depreciable assets sold in the ordinary course of a trade or business.

The capital gain must be reported and the corresponding tax paid for each transaction within 10 working days following the date on which the payment is received by the seller. An annual return must also be filed by 30 April of each year.

For the transfer of immovable property or rights and securities carried out with a nonresident, the buyer must withhold 4% of the transfer value. The capital gains tax is deemed to constitute a credit to such tax for the seller. The tax withheld must be reported in a filing and paid by the buyer within 10 calendar days following the date of the transaction.

Administration. The regular statutory tax year runs from 1 January through 31 December. However, taxpayers may elect a different tax year by requesting an authorization from the tax authorities. Companies with a regular statutory tax year must file an annual income tax return and pay any corresponding tax by 30 April of the of the next calendar year. For companies with a different tax year, the filing and payment deadline is 90 days after the end of their tax year. Mandatory advance tax payments are payable each quarter based on the income tax liability for the preceding tax year.

Dividends. A 10% withholding tax is imposed on dividends.

Foreign tax relief. Honduras does not grant any relief for foreign taxes paid.

C. Determination of taxable income

General. Net taxable income is computed in accordance with generally accepted accounting and commercial principles, subject to certain adjustments required by the Honduran income tax law.

Inventories. Inventories are valued using the first-in, first-out (FIFO), last-in, first-out (LIFO) or weighted average cost methods.

Provisions. Provisions for contingent liabilities, such as severance pay, are not deductible for tax purposes. However, payments of such liabilities are deductible expenses. In contrast, provisions for bad debts are deductible, as long as the amount of the provision does not exceed 10% of the amount of accounts receivable from customers at the end of the fiscal year.

Tax depreciation. Depreciation may be computed using the straight-line method. Companies may obtain authorization from the tax authorities to use other depreciation methods. However, after a company selects a depreciation method, the method must be

applied consistently thereafter. The following are the applicable straight-line method rates for some common assets.

Asset	Rate (%)
Buildings	2.5 to 10
Plant and machinery	10
Vehicles	10 to 33.33
Furniture and office equipment	10
Tools	10 to 100

Relief for losses. Companies engaged in agriculture, manufacturing, mining and tourism may carry forward net operating losses for three years. However, certain restrictions apply. Net operating losses may not be carried back.

Groups of companies. Honduran law does not allow the filing of consolidated income tax returns or provide any other tax relief to consolidated groups of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Sales tax	
General rate	15
Special Tax Rate for alcoholic beverages, cigarettes and business class tickets for air travel	18
Customs duties	1 to 20
Payroll taxes; paid by employers; average rate	8.5
Municipal taxes	
Property tax; imposed on companies owning real estate	Various
Industry trade and service municipal tax; imposed monthly on income derived from the operations of companies; rates vary according to the annual production volume, income or sales	
From HNL 0.01 to HNL500,000	0.30
From HNL500,000 to HNL10,000,000	0.40
From HNL10,000,000 to HNL20,000,000	0.30
From HNL20,000,000 to HNL30,000,000	0.20
Over HNL30,000,000	0.15

E. Foreign-exchange controls

The Honduran currency is the lempira (HNL).

No restrictions are imposed on foreign-trade operations or foreign-currency transactions. As of 1 March 2024, the exchange rate for the lempira is HNL24.79 = USD1.

F. Tax treaties

Honduras has not entered into any income tax treaties with other countries.

This chapter relates to the tax jurisdiction of the Hong Kong Special Administrative Region (SAR) of China.

A. At a glance

Corporate Income Tax Rate (%)	16.5 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	16.5 (a)
Withholding Tax (%)	
Dividends	0
Interest	0
Royalties from Patents, Know-how, etc.	
Paid to Corporations	4.95/16.5 (b)
Paid to Individuals	4.5/15 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforwards	Unlimited

(a) See Section B for the two-tier profits tax rates regime.

(b) If the nonresident corporation is eligible for the two-tier profits tax rates regime referred to in Section B, the withholding tax rate is 2.475% (for the first HKD2 million of its royalty income) and 4.95% (for the remainder of its royalty income). However, if a recipient of payments is an associate of the payer and if the intellectual property rights were previously owned by a Hong Kong taxpayer, a withholding tax rate of 16.5% applies (subject to the application of the two-tier profits tax rates regime referred to in Section B). If the nonresident is an individual eligible for the two-tier profits tax rates regime referred to in Section B, the withholding tax rate is 2.25% (for the first HKD2 million of his or her royalty income) and 4.5% (for the remainder of his or her royalty income). However, if a recipient of payments is an associate of the payer and if the intellectual property rights were previously owned by a Hong Kong taxpayer, a withholding tax rate of 15% applies (subject to the application of the two-tier profits tax rates regime referred to in Section B).

B. Taxes on corporate income and gains

Profits tax. Companies carrying on a trade, profession or business in Hong Kong are subject to profits tax on profits arising in or derived from Hong Kong. However, certain royalties received from a Hong Kong payer by a foreign entity that does not otherwise carry on a trade, profession or business in Hong Kong are liable to a withholding tax in Hong Kong (see Section A).

The basis of taxation in Hong Kong is territorial. Under the newly enacted foreign-sourced income exemption (FSIE) regime that became effective on 1 January 2023, specified foreign-sourced income that accrues to and is received in Hong Kong on or after 1 January 2023 by a multinational entity (MNE) that carries on a business in Hong Kong will be taxable in Hong Kong, unless the exception conditions referred below are satisfied. Specified income refers to interest income, dividends, gains from sale of equity interest in an entity and intellectual property (IP) income.

Effective from 1 January 2024, the scope of disposal gain of equity interest under the FSIE regime is extended to cover all other types of assets, other than gains made by a trader in the normal course of its business. Intragroup relief for disposal gains is available if the specified conditions are met.

The exception conditions for non-IP income and non-IP disposal gains consider whether economic substance requirement (ESR) in Hong Kong is met. For IP-related income and IP disposal gains, the nexus requirements must be met.

Foreign-sourced income is regarded as "received in Hong Kong" under the FSIE regime if any of the following conditions are met:
- The income is remitted to, or is transmitted or brought into, Hong Kong.
- The income is used to satisfy any debt incurred in respect of a trade, profession or business carried on in Hong Kong.
- The income is used to buy movable property, and the property is brought into Hong Kong. The income is regarded as being received in Hong Kong at the time when the movable property is brought into Hong Kong.

The term "MNE" is defined under the FSIE regime to be essentially the same as a constituent entity of an MNE group as defined under the Country-by-Country (CbC) reporting requirement, except that the consolidated income of the group to which an MNE belongs, or the income of the MNE itself, does not need to exceed any threshold.

The economic substance requirement depends on whether the recipient of the specified foreign-sourced income is a pure or non-pure holding entity. For a pure holding entity, the ESR refers to an entity satisfying every applicable registration and filing requirements under the relevant laws of Hong Kong and having adequate human resources and premises for carrying out the specified economic activities in Hong Kong in relation to holding and managing its equity participations in other entities.

For a non-pure holding entity, the ESR refers to an entity employing an adequate number of employees with necessary qualifications to carry out the specified economic activities in Hong Kong in relation to the FSIE income concerned and incurring an adequate amount of operating expenditure for carrying out the specified economic activities in Hong Kong. "Adequate" in this context is determined on a case-by-case basis.

As an alternative to satisfying ESR in Hong Kong for foreign-sourced dividend income and disposal gains on equity interests, such income or gains are exempt from tax under the FSIE regime

if both conditions for participation exemption are satisfied. The following are the conditions:

- The MNE is a Hong Kong resident person, or if it is a non-Hong Kong resident person, it has a permanent establishment in Hong Kong to which the foreign-sourced dividend or disposal gain on equity interests is attributable.
- The MNE has continuously held not less than 5% of equity interests in the investee entity concerned for a period of not less than 12 months immediately before the foreign-sourced dividend or disposal gain on equity interests accrues.

Certain anti-abuse rules are in place to disallow the participation exemption, namely the switchover rule (subject to tax condition), anti-hybrid mismatch rule and the main purpose rule.

Under the switchover rule, if the specified foreign-sourced income is a disposal gain on equity interests, the participation exemption only applies if the disposal gain on equity interests is subject to a qualifying similar tax in a jurisdiction outside Hong Kong of substantially the same nature as profits tax in Hong Kong at an applicable rate of at least 15%. If the specified foreign-sourced income is dividends, the participation exemption only applies if the dividends, or the underlying profits out of which the dividend is paid, is subject to a qualifying similar tax in a foreign jurisdiction of substantially the same nature as profits tax in Hong Kong at an applicable rate of at least 15%. In this context, the applicable rate refers to the headline corporate tax rate of the jurisdiction concerned, even if the income is taxed in the jurisdiction at a lower rate under certain conditions.

Under the anti-hybrid mismatch rule, if the specified foreign-sourced income is a dividend and if tax is charged on the underlying profits of the dividend in a jurisdiction outside Hong Kong, the participation exemption does not apply to the extent that the dividend is allowable for deduction when computing the amount of tax of the investee entity.

Under the main purpose rule, if the Commissioner of Inland Revenue is of the opinion that the main purpose, or one of the main purposes, of entering into an arrangement is to obtain a tax benefit in relation to a liability to pay profits tax, the participation exemption does not apply.

While onshore-sourced disposal gains that are capital in nature are not chargeable to tax in Hong Kong, foreign-sourced disposal gains, regardless of whether they are capital or revenue in nature, are subject to tax under the FSIE regime if the taxpayer cannot satisfy either the ESR in Hong Kong or the conditions for the participation exemption.

The exemption of foreign-sourced IP income and disposal gain on IP assets under the FSIE regime applies if the nexus requirements are met. The nexus requirements are defined to be essentially the same as that defined under the Action 5 – 2015 Final Report of the OECD/G20 Base Erosion and Profit Shifting (BEPS) Project.

If the specified foreign-sourced income is subject to tax in Hong Kong under the FSIE regime, overseas taxes paid are creditable against the tax payable in Hong Kong with respect to the same

income either under a bilateral tax treaty or a unilateral tax credit. For foreign-sourced dividends, the overseas taxes paid include the withholding taxes on the dividends and the underlying corporate income taxes paid with respect to the underlying profits, traceable up to five tiers of investee companies in a vertical chain of ownership, out of which the dividends are paid.

The determination of the source of profits or income can be extremely complicated and often involves uncertainty. It requires case-by-case consideration. To obtain certainty concerning this and other tax issues, taxpayers may apply to the Inland Revenue for advance rulings on the tax implications of a transaction, subject to payment of certain fees and compliance with other procedures.

Rates of profits tax. The normal profits tax rates applicable to corporations and non-corporate entities are 16.5% and 15%, respectively. If a taxpayer is eligible for the two-tier profits tax rates regime, profits tax rates for the first HKD2 million of profits are reduced by 50% to 8.25% or 7.5%. The remainder of the profits continue to be taxed at the normal profits tax rates of 16.5% or 15%.

However, each group of "connected entities" can only elect one entity in the group to benefit from the two-tier regime for a given fiscal year. In general, two entities are regarded as "connected entities" if one entity has control over the other or both are under the control of a third entity. "Control" generally refers to one entity holding directly or indirectly more than 50% of the issued share capital, voting rights, capital or profits of another entity.

Hong Kong intends to implement the Global Anti-base Erosion rules (GloBE rules) and the Hong Kong minimum top-up tax (HKMTT), effective from 1 January 2025. The HKMTT to be charged at an effective tax rate of 15% is intended to qualify as a Qualified Domestic Minimum Top-up Tax Safe Harbor such that the top-up tax under the GloBE rules would then be deemed to be zero.

Tax incentives. The following tax incentives and enhanced deductions are available in Hong Kong:

- Interest income and trading profits derived by corporations from qualifying debt instruments (QDIs) issued prior to 1 April 2018 with a maturity period of less than seven years are taxed at a rate of 8.25% (50% of the normal profits tax rate), while interest income and trading profits derived from those QDIs with a maturity period of seven years or longer are exempt from tax. Interest income and trading profits derived from QDIs issued on or after 1 April 2018 of any duration are exempt from tax.
- Income derived from the business of reinsurance by professional reinsurers that have made an irrevocable election is taxed at a rate of 8.25%.
- Income derived from the business of insurance by authorized captive insurers that have made an irrevocable election is taxed at a rate of 8.25%.
- Profits derived by authorized and certain bona fide widely held mutual funds, collective-investment schemes and unit trusts are exempt from tax.

- Profits derived from qualifying corporate treasury activities by qualifying corporate treasury centers that have made an irrevocable election are taxed at a rate of 8.25%.
- Profits of qualifying aircraft lessors and qualifying aircraft leasing managers that have made an irrevocable election are taxed at the concessionary tax rate of 8.25%. For previously acquired aircraft, effective from the 2023-24 year of assessment, taxpayers are able to choose to either being taxed on a notional tax base (in lieu of depreciation allowances on the aircraft) or being granted a one-off tax deduction based on the residual value of the aircraft at the time. For aircraft acquired thereafter, taxpayers will be able to claim a one-off tax deduction of the expenditure incurred for the acquisition of the aircraft.
- Profits derived from a qualifying ship leasing activity, regarding both an operating lease and a finance lease, including a sale and leaseback arrangement, derived by a qualifying ship lessor that has made an irrevocable election, are taxed at 0%. The tax base of such a ship owner-cum-lessor (a taxpayer that is both an owner and lessor of the ship) is 20% of its gross rentals, less deductible expenses, excluding book depreciation charges or tax depreciation allowances pertaining to a ship.
- Profits derived from a qualifying ship leasing management activity by a qualifying ship leasing manager that has made an irrevocable election and received from a non-associated qualifying ship lessor are taxed at the concessionary tax rate of 8.25%. The tax rate is reduced to 0% if the qualifying ship lessor is an associated corporation.
- Profits derived by a qualifying shipping commercial principal (that is, a qualifying ship agent, qualifying ship manager or qualifying ship broker) from carrying out a qualifying activity (that is, a qualifying ship agency activity, qualifying ship management activity or qualifying ship broking activity) in Hong Kong is generally taxed at a concessionary tax rate at 8.25%. If qualifying profits are derived by a qualifying shipping commercial principal from carrying out a qualifying activity for an associated ship lessor, ship leasing manager, ship operator or ship owner (that is, a shipping enterprise) who is entitled to tax concession or exemption under the tax code of Hong Kong, the qualifying profits so derived are subject to the same tax concession or exemption as that applicable to the associated shipping enterprise concerned.
- Profits derived from general insurance, other than profits from certain local demand-driven insurance business, and general reinsurance business, by a specified insurer that has made an irrevocable election are taxed at a rate of 8.25%. In addition, profits of a licensed insurance broker that has made an irrevocable election and relate to a contract of insurance effected by a professional reinsurer or a specified insurer in the course of the insurer carrying on a business that is eligible for the concessionary tax rate are taxed at a rate of 8.25%.
- Eligible carried interest received by, or accrued to, a qualifying person from the provision of investment management services in Hong Kong to a qualifying payer is, subject to certain conditions, taxed at 0%. Such conditions include the eligible carried interest arising from profits earned from in-scope transactions of the qualifying payer and the qualifying payer meeting the substantial activities requirements in Hong Kong.

Qualifying research and development (R&D) expenditure incurred on or after 1 April 2018 is eligible for enhanced tax deductions; the first HKD2 million is eligible for a 300% deduction and the remainder, not subject to any cap, is deductible at 200%. R&D expenditure that does not qualify for the enhanced deductions is eligible for the normal 100% tax deduction subject to fulfillment of the specified conditions.

Spectrum utilization fees incurred by mobile network operators for radio spectrum used to transmit their telecommunication signals in their operations in Hong Kong are generally capital in nature and nondeductible. However, such fees incurred for acquiring radio spectrum by way of auctions conducted on or after 19 January 2024 will qualify for tax deduction over a period of time.

Expenses incurred on reinstating the condition of leased premises to their original condition are generally considered part of the cost for acquiring a capital asset in the form of the lease and therefore nondeductible. However, as announced in the 2024-25 budget, with effect the 2024-25 year of assessment, the law will be amended such that a tax deduction will be granted for such expenses.

Tax exemptions for all funds operating in Hong Kong. Subject to certain specified conditions, an entity that meets the definition of a "fund" as being a collective-investment scheme, regardless of its size, type and place of residence, is eligible for a tax exemption for its profits generated from transactions in qualifying assets and transactions incidental to such transactions.

Effective from the 2022-23 year of assessment, securities-type income derived by family-owned investment holding vehicles that are generally at least 95% owned by a family and managed by a single-family office in Hong Kong will, subject to the satisfaction of certain specified conditions, be taxed at a 0% concessionary tax rate in Hong Kong.

Related anti-avoidance measures provide that, under certain circumstances, a resident investor in an exempt fund is deemed to derive a portion of the exempt income of the fund and is subject to tax in Hong Kong on such income, regardless of whether the fund makes an actual distribution.

Tax exemption for nonresident funds. Nonresident persons, not qualifying as a "fund," as defined, and not eligible for the above tax exemption, are nonetheless exempt from tax in Hong Kong if their activities in Hong Kong are restricted to certain specified transactions and to transactions incidental to such transactions.

An entity is regarded as a nonresident if its place of central management and control is located outside Hong Kong. Specified transactions are broadly defined to cover most types of transactions typically carried out by investment funds, such as transactions involving securities (for unlisted securities, the exemption is subject to certain specified conditions), future and currency contracts, commodities and the making of deposits other than by money-lending businesses.

Anti-avoidance measures provide that under certain circumstances, a resident investor in an exempt nonresident fund is deemed to derive a portion of the exempt income of the fund and is subject to tax in Hong Kong on such income, regardless of whether the fund makes an actual distribution.

Capital gains. Onshore-sourced disposal gains that are capital in nature are not chargeable to tax in Hong Kong. On 1 January 2024, the tax certainty enhancement scheme for onshore gains on disposal of equity interests was introduced. Subject to certain exclusions, onshore-sourced disposal gains on equity interests are regarded as capital in nature if the investor entity holds at least 15% of the equity interests in the investee entity for a period of not less than 24 months.

Subject to the FSIE regime described in *Profits tax*, capital gains are not taxed, and capital losses are not deductible for profits tax purposes. A foreign-sourced loss sustained by an MNE from a sale of assets, regardless of whether the loss is capital or revenue in nature, can be set off against its taxable FSIE income for the year of assessment in which the proceeds of the sale are received in Hong Kong. However, this rule is subject to the condition that had a gain been derived from the sale and received in Hong Kong, the gain would have been chargeable to profits tax in Hong Kong under the FSIE regime. Any amount of the loss not set off can be carried forward to set off against the MNE's taxable FSIE income in subsequent years of assessment.

Administration. A fiscal year runs from 1 April to 31 March. If an accounting period does not coincide with a fiscal year, the profit for the accounting period is deemed to be the profit for the fiscal year in which the period ends. Special rules govern commencements and cessations of businesses and deal with accounting periods of shorter or longer duration than 12 months.

Companies generally make two payments of profits tax during a fiscal year. The first payment consists of 75% of the provisional tax for the current year plus 100% of the final payment for the preceding year. The second payment equals 25% of the provisional tax for the current year. The timing of payments is determined by assessment notices rather than by set dates, generally during November to April of the fiscal year.

Dividends. Hong Kong does not impose withholding tax on dividends paid to domestic or foreign shareholders. Although foreign-sourced dividend income that accrued to a Hong Kong taxpayer before 1 January 2023 is not chargeable to tax in Hong Kong, such income that accrues to and is received in Hong Kong by an MNE on or after that date is subject to the FSIE regime described above.

Foreign tax relief. In certain circumstances, a deduction is allowed for foreign taxes paid. A foreign tax credit is available under the full comprehensive double tax treaties entered into between Hong Kong and other jurisdictions. However, the amount of the credit may not exceed the amount of tax payable under the Hong Kong tax laws with respect to the relevant item of income. For details concerning Hong Kong's double tax treaties, see Section E.

For FSIE income chargeable to tax in Hong Kong, in addition to a bilateral tax credit under a tax treaty, a unilateral tax credit is also available for the set-off of foreign taxes paid against the tax payable in Hong Kong with respect to the same income.

C. Determination of assessable profits

General. The assessment is based on accounts prepared on generally accepted accounting principles, subject to certain statutory tax adjustments.

In general, interest income earned on deposits with financial institutions is exempt from profits tax. However, this exemption does not apply if the recipient of the interest is a financial institution or if the deposits are used as security for borrowings and the interest expense with respect to the borrowings is claimed as a tax deduction.

Expenses must be incurred in the production of chargeable profits. Certain specified expenses are not allowed, including domestic and private expenses, capital expenditures, the cost of improvements, sums recoverable under insurance and tax payments. The deductibility of interest is subject to restrictions (see Section D).

Inventories. Stock is normally valued at the lower of cost and net realizable value. Cost must be determined using the first-in, first-out (FIFO) method or an average cost, standard cost or adjusted selling price basis. The last-in, first-out (LIFO) method is not acceptable. However, this may not apply to shares and securities held for trading purposes.

Capital allowances

Industrial buildings or structures. An initial allowance of 20% is granted on new industrial buildings in the year in which the expenditure is incurred, and annual depreciation allowances are 4% of qualifying capital expenditure for 25 years beginning in the year the building is first put into use. No initial allowance is granted on the purchase of used buildings, but annual depreciation allowances may be available. Subject to certain exceptions, buildings used for the purposes of a qualifying trade are industrial buildings.

Commercial buildings or structures. An annual allowance (4% of qualifying capital expenditure each year for 25 years beginning in the year the building is first put into use) is available on commercial buildings. Buildings that do not qualify as industrial buildings are commercial buildings. Refurbishment costs for premises, other than those used as domestic dwellings, may be deducted in equal amounts over a five-year period.

As announced in the 2024-25 budget, with effect from the 2024-25 year of assessment, the current time limit for secondhand owners to claim capital allowances with respect to industrial or commercial buildings or structures (25 years beginning in the year the building is first put into use) will be removed, subject to factors such as the construction costs of the buildings or structures and the balancing charge of the previous owner.

Prescribed plant and machinery. Subject to satisfying certain conditions, companies may immediately write off 100% of expenditure on manufacturing plant and machinery and on computer software and hardware.

Environmental protection facilities. Subject to satisfying certain conditions, capital expenditure incurred on eligible environmental protection installation forming part of a building or structure, environmental protection machinery and environmentally friendly vehicles qualifies for a 100% write-off in the year in which the expenditure is incurred.

Other plant and machinery, and office equipment. An initial allowance of 60% is granted for non-manufacturing plant and machinery, and office equipment in the year of purchase. An annual allowance of 10%, 20% or 30% under the declining-balance method is available on the balance of the expenditure beginning in the year the asset is first used in the business. Consequently, the total allowances (initial and annual) in the first year can be 64%, 68% or 72%.

Motor vehicles. An initial allowance of 60% is granted for motor vehicles in the year of purchase. An annual allowance of 30% under the pooling system (declining-balance method) is allowed on the balance of the expenditure beginning in the year the asset is first used in the business.

Intellectual property rights. Subject to certain anti-avoidance provisions, capital expenditure incurred on the purchase of patents, industrial know-how, registered trademarks, copyrights, registered designs, rights in layout design (topography) of integrated circuits, plant varieties and performances qualifies for tax amortization over a time period ranging from one to five years.

Recapture. Depreciation allowances are generally subject to recapture if the proceeds from the sale of a depreciable asset exceed its tax-depreciated value. The recapture rule also applies to prescribed plant and machinery (manufacturing plant and machinery and computer hardware and software) and environmental protection installation and machinery, and environmentally friendly vehicles that were previously written off in full. Consequently, in the year of disposal, the sales proceeds from the abovementioned assets generally are included in chargeable profits, up to the original costs of the assets. Allowances for commercial and industrial buildings may be recaptured, up to their original costs. Assets depreciable under the pooling system (declining-balance method) are allocated to one of three pools according to their depreciation rates, which are 10%, 20% or 30%. Proceeds from the sale of an asset in a pool (up to the cost of the asset) are deducted from the pool balance. If a negative balance results within the pool, a balancing charge is added to taxable profits.

Relief for business losses. Losses incurred in a year can be carried forward indefinitely and set off against the profits of the company in subsequent years. No carryback is possible. Certain rules prevent trafficking in loss companies. In addition, specific rules

govern the offset of normal business losses against concessionary trading receipts (that is, those taxed at concessionary rates instead of the full normal rates) and vice versa. See *Capital gains* in Section B for the possible set-off of a foreign-sourced loss sustained from the sale of an equity interest against other taxable FSIE income under the FSIE regime.

Groups of companies. Consolidated filing is not permitted. Hong Kong does not provide group relief for tax losses.

D. Miscellaneous matters

Mergers and reorganizations. When considering an acquisition in Hong Kong, a company must first decide whether to acquire the shares or the assets of the target company. Unlike some other jurisdictions, the Hong Kong tax code does not allow a step-up in tax basis of the underlying assets if shares are acquired. The target company retains the same tax basis for its assets, regardless of the price paid for the shares.

Effective from 3 March 2014, the new Companies Ordinance (Cap 622) introduced measures to facilitate an amalgamation of two or more wholly owned companies within a group without the need to seek approval from the court. A new law was enacted in June 2021 to set out the specific tax treatment applicable to a qualifying amalgamation (that is, an amalgamation undertaken pursuant to the Companies Ordinance). Under the new law, on election by the taxpayer, the transfer of assets from an amalgamating company to the amalgamated company (that is, the surviving entity) is generally treated as being made at book value and, therefore, tax neutral. The amalgamated company is entitled to continue to claim tax deductions or allowances with respect to the unrelieved tax costs of the assets transferred or succeeded from the amalgamating company. In addition, the new law also specifies the restrictive conditions under which pre-amalgamation tax losses sustained by the amalgamating and amalgamated companies can be utilized post-amalgamation.

Anti-avoidance legislation. Transactions that are artificial, fictitious or predominantly tax-driven may be disregarded under general anti-avoidance tax measures. In addition, specific measures deny the carryforward of tax losses if the dominant reason for a change in shareholding of a corporation is the intention to use the tax losses. Other specific anti-avoidance measures include those designed to counteract certain leverage and cross-border leasing, non-arm's-length transactions between a Hong Kong resident company and its foreign affiliates and the use of personal service companies to disguise employer-employee relationships.

Transfer pricing. Under the specific transfer-pricing legislation (TP law), transactions between connected persons (including those between different parts of the same enterprise located in different jurisdictions) are required to be priced and conducted on an arm's-length basis. Certain specified domestic transactions that do not result in any actual tax difference or meet the non-business loan condition are specifically exempt from the TP law, provided that certain prescribed conditions are met.

The transfer-pricing guidelines of the Organisation for Economic Co-operation and Development (OECD) provide guidance on how the TP law should be interpreted.

TP documentation requirements. The TP law also adopts the three-tier documentation approach as recommended by the OECD for related-party transactions, which is comprised of the following:
- Local File
- Master File
- CbC Reporting

A Hong Kong entity of a group is required to prepare and retain the entity's Local File and a Master File of its group with respect to an accounting period unless either of the following circumstances exists:
- Any two of the following conditions are satisfied:
  - The total amount of the entity's revenue for the accounting period does not exceed HKD400 million.
  - The total value of the entity's assets at the end of the accounting period does not exceed HKD300 million.
  - The average number of the entity's employees during the accounting period does not exceed 100.
- All the following conditions are satisfied with respect to the following categories of transactions between connected persons (excluding specified domestic transactions) undertaken by the entity in an accounting period:
  - The total amount of transfers of properties (excluding financial assets and intangibles) does not exceed HKD220 million.
  - The total amount of transactions with respect to financial assets does not exceed HKD110 million.
  - The total amount of transfers of intangibles does not exceed HKD110 million.
  - The total amount of other transactions does not exceed HKD44 million.

If all of the conditions stated in the second bullet above are not satisfied, the entity is required to prepare a Local File with respect to the particular category or categories of transactions that exceeded the threshold(s) specified above. In addition, the entity is not exempt from preparing the Master File.

Unless exempted, effective from the accounting period beginning on or after 1 April 2018, the Master File and Local File must be prepared within nine months after the end of the relevant accounting period. Although the Master File and Local File are not required to be submitted together with the annual tax return, they must be produced for examination on request and retained for a period of not less than seven years after the end of the accounting period.

Country-by-Country Reporting. The CbC Report filing threshold is set in accordance with the OECD recommendation; that is, consolidated turnover exceeding EUR750 million (HKD6.8 billion) in the preceding year.

The primary obligation for CbC Report filing falls on the Ultimate Parent Entities (UPEs) of multinational groups that are resident in

Hong Kong. A CbC Report must be prepared for each accounting period beginning on or after 1 January 2018. The information to be included in the CbC Report is in line with the OECD's requirements. A Hong Kong enterprise that is a constituent entity of a CbC Reporting group must file a notification with the IRD within three months after the end of the accounting period to which its UPE's CbC Report relates. This notification must contain sufficient information for Hong Kong to obtain the CbC Report directly from the jurisdiction in which the Hong Kong taxpayer's UPE or Surrogate Parent Entity has filed the CbC Report under the automatic exchange of information mechanisms for the exchange of CbC Reports. The deadline for filing a CbC Report is 12 months after the end of the relevant accounting period or the date specified in the assessor's notice, whichever is earlier.

Foreign-exchange controls. Hong Kong does not impose foreign-exchange controls.

Islamic bonds. A special legislative framework provides comparable tax treatment in terms of stamp duty, profits tax and property tax for some common types of Islamic bonds (sukuk), vis-à-vis conventional bonds. However, no special tax incentives are conferred on Islamic bonds.

Interest expense. In an attempt to combat avoidance, restrictions are placed on the deductibility of interest expense. In general, subject to certain specific anti-avoidance rules, interest on monies borrowed is deductible for tax purposes if it is incurred in the production of chargeable profits in Hong Kong and if one of the following additional conditions is satisfied:

- The recipient is taxable in Hong Kong on the interest.
- The interest is paid to a recognized financial institution in Hong Kong or overseas.
- The interest is paid with respect to debt instruments that are listed or marketed in Hong Kong or in a recognized overseas market.
- The interest is paid with respect to money that is borrowed from an unrelated person and that is wholly used to finance capital expenditures on plant and machinery qualifying for capital allowances or the purchase of trading stock.
- The interest is paid by a corporation in the ordinary course of its intragroup financing business to its overseas associated corporations, and such overseas corporations are subject to tax overseas with respect to the interest received at a rate of not less than the applicable reference rate (that is, 16.5% or 8.25% as the case may be).

Subject to certain provisions, distributions made with respect to the following are treated as interest expenses and are tax-deductible:

- Regulatory capital securities (covering Additional Tier 1 instruments and Tier 2 instruments) issued by financial institutions in compliance with the relevant banking capital adequacy requirements
- Loss-absorbing capacity (LAC) instruments, other than common equity, issued by financial institutions and their relevant group companies to meet the relevant minimum LAC requirements

E. Tax treaties

Hong Kong, using the name "Hong Kong, China," may maintain and develop relations, conclude and implement agreements with foreign states and regions and relevant international organizations in such fields as economics, trade, finance, shipping, communications, tourism, culture and sports.

Both the Hong Kong and Mainland China tax authorities take the view that Mainland China's tax treaties with other jurisdictions do not cover Hong Kong.

For the avoidance of double taxation on shipping income, Hong Kong has entered into agreements with Denmark, Germany, Norway, Singapore, Sri Lanka and the United States. These agreements generally provide for tax exemption in one territory for profits and capital gains derived by an enterprise of the other territory in the first-mentioned territory with respect to the operation of ships in international traffic. However, under the agreement between Hong Kong and Sri Lanka, 50% of the profits derived from the operation of ships in international traffic may be taxed in the source jurisdiction. Furthermore, in October 2020, the United States announced the termination of the shipping income agreement with Hong Kong with effect from 1 January 2021. Apart from the above agreements, reciprocal exemption provisions with the tax authorities of Chile, Korea (South) and New Zealand have also been confirmed.

Hong Kong has signed double tax agreements relating to airline profits with several jurisdictions, including Bangladesh, Croatia, Denmark, Ethiopia, Fiji, Germany, Iceland, Israel, Jordan, Kenya, Laos, Madagascar, Maldives, Norway, Seychelles, Singapore, Sri Lanka and Sweden. Under these agreements, international transport income of Hong Kong airlines is exempt from tax in these signatory jurisdictions. However, international transport income of Hong Kong airlines that is exempt from tax overseas under these agreements or under relevant full comprehensive double tax treaties is taxed in Hong Kong.

Hong Kong has also entered into full comprehensive double tax treaties modeled on the conventional tax treaty adopted by the OECD, with the jurisdictions listed in the table below. The table shows the withholding tax rates for dividends, interest and royalties paid from Hong Kong to residents of the treaty jurisdictions. The rates shown in the table are the lower of the treaty rates and the applicable rates under Hong Kong domestic law.

(a) The withholding rates in Hong Kong applicable to individuals and corporations are 4.5% and 4.95%, respectively (subject to the application of the two-tier profits tax rates regime referred to in Section B above). These rates are lower than those specified in the relevant tax treaties, and consequently, the Hong Kong domestic rates apply.

(b) The 0% rate applies if the beneficial owner of the royalties is a company (other than a partnership). In all other cases, the 3% rate applies.

(c) The 3% rate applies to payments for the use of, or the right to use, aircraft. The 4.95% rate applies in all other cases.

(d) This treaty is pending ratification.

Paid to Individuals	15
Interest	
Paid to Companies	0
Paid to Individuals	15 (c)
Royalties	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (d)

(a) The 9% rate applies to tax years beginning on or after 1 January 2017. All taxpayers must pay tax on the alternative minimum tax base if this base exceeds taxable income calculated under the general rules (for further details, see Section B).
(b) Permanent establishments of foreign companies are subject to special rules for the computation of the tax base (see Section B).
(c) See Section B.
(d) Losses incurred before the 2015 tax year can be carried forward indefinitely. Losses incurred in the 2015 tax year or subsequent years can be carried forward for five years.

B. Taxes on corporate income and gains

Corporate income tax. Companies incorporated in Hungary are subject to corporate tax on their worldwide profits. A company not incorporated in Hungary that has its place of effective management in Hungary is regarded as a Hungarian resident for corporate tax purposes and, accordingly, is subject to corporate tax on its worldwide profits. If a double tax treaty applies, the provisions of the treaty may affect residence. Foreign companies carrying out taxable activities in Hungary through a permanent establishment are subject to corporate tax on their net profits derived from Hungarian sources.

Rates of corporate income tax. The tax rate for tax years beginning on or after 1 January 2017 is 9%.

The same rate applies to the taxable income of permanent establishments of nonresident companies. In general, the various permanent establishments of a nonresident company are taxed as a single entity. However, the taxable income of permanent establishments that are registered as distinct branches with the Court of Registration must be calculated separately, and losses incurred by one branch may not offset the profits of another. Such registrations are an option for foreign taxpayers in some cases and mandatory in other cases, depending on the country of incorporation of the foreign entity, its planned activities and other circumstances.

Alternative minimum tax. The alternative minimum tax (AMT) is calculated by applying the general rate of 9% to the AMT tax base. In general, the AMT tax base is 2% of total revenues, excluding any revenue attributable to foreign permanent establishments. The AMT tax base must be increased by an amount equal to 50% of additional loans contracted by the company from its shareholders or members during the tax year.

If a company's AMT is higher than the corporate income tax otherwise calculated or the pretax profit, the taxpayer may choose to pay either of the following:

- AMT.
- Corporate income tax otherwise payable. In this case, the company must fill out a one-page form that provides information regarding certain types of expenses and, in principle, is more likely to be selected for a tax audit.

Global minimum tax. Hungary has promulgated the law on the introduction of a Global Minimum Tax, which transposes EU Directive 2022/2523 into Hungarian law. The Hungarian legislation reflects to the Organisation for Economic Co-operation and Development (OECD) Model Rules, its Commentary, the Safe Harbor and Penalty Relief, the Administrative Guidance on Pillar Two and additional guidance accepted by the OECD.

The Global Minimum Tax legislation applies to all multinational enterprise groups and large-scale domestic groups with consolidated revenues of EUR750 million in at least two of the last four fiscal years. The legislation incorporates a Qualifying Domestic Minimum Top-up Tax (QDMTT) in Hungary at a rate of 15% in line with the OECD Model Rules and Administrative Guidance. However, local business tax, innovation contribution (also known as research and development [R&D] tax) and energy suppliers' income tax also qualify as covered taxes for Pillar Two purposes when calculating the jurisdictional effective tax rate.

Hungary also applies a Substance-Based Income Exclusion, which is effectively a carve-out for expenditures on tangible fixed assets and payroll costs. The amount of the exclusion feeds directly into the top-up tax calculation as it reduces excess profits, which are then used to calculate the initial top-up tax. The amount of the exclusion in 2024 is 8% of the carrying value of tangible assets of Hungarian constituent entities and 10% of eligible payroll expenses. Both will be reduced to 5% during a 10-year transition period.

Deferred tax. The Hungarian legislation has not defined deferred tax asset and liability until 2023. Together with the legislation on Pillar Two, the concept of deferred tax is included in the local accounting rules from 2023. Regarding the inclusion of deferred tax accounting during the top-up tax calculation, the Hungarian legislation refers to the Administrative Guidance and follows the rules set out by the OECD.

Tax incentives

Reduced rate on certain types of income. Companies may reduce their corporate tax base by 50% of royalty income, which includes, in certain cases, income from the disposal of intangible property. In effect, only half of the royalty income is taxable. In light of the recent developments regarding the Base Erosion and Profit Shifting (BEPS) Project of the OECD, the definition of royalties eligible for these incentives was narrowed, and the conditions for applying these allowances were tightened as of 1 July 2016.

The total reduction mentioned above may not exceed 50% of the pretax profit of the company. The deduction may be claimed on the tax return. Unlike the development tax allowance (see *Development tax allowance*), no special reporting or preapproval obligations are imposed.

Research and development double deduction. In addition to being recognized expenses for corporate income tax purposes, the direct costs of basic research, applied research and R&D incurred within the scope of a company's activities reduces the corporate income tax base. As a result, a double deduction is allowed for these expenses for corporate income tax purposes. It is not required that the research itself take place in Hungary, and the double deduction may include R&D purchased from related or unrelated foreign enterprises and, in some cases, from Hungarian enterprises.

R&D triple deduction. Certain R&D activities conducted in cooperation with the Hungarian Academy of Arts and Sciences and its research institutions, public research centers or private research centers directly or indirectly owned by the state can result in a deduction of three times the R&D cost. However, this deduction is capped at HUF50 million.

R&D tax credit. In addition to the currently available R&D tax incentives (for example, double deduction of eligible R&D costs), the legislation on Pillar Two introduces a new R&D tax credit (available from 2024), which is structured as a qualifying refundable tax credit for Pillar Two purposes. The new tax credit is calculated as 10% of the direct R&D costs of projects capped at EUR55 million, EUR35 million or EUR25 million per project, depending on the nature of the R&D activities. The new regime can be elected for a minimum of five years, and the newly introduced tax allowance cannot be combined with the current tax benefits with respect to R&D activities.

Development tax allowance. Companies may benefit from a development tax allowance (tax credit), conforming with European

Community (EC) law, for up to 13 tax years if they satisfy all of the following conditions:

- They make an investment of at least HUF3 billion or an investment of HUF1 billion in an underdeveloped region.
- During the four tax years following the tax year in which the tax credit is first applied, the average statistical headcount of the taxpayer does not fall below the average headcount equivalent to the arithmetical mean of the three tax years preceding the start of the investment.
- The investment comprises one of the following:
  - — The acquisition of a new asset
  - — The enlargement of existing assets
  - — The fundamental modification of the final product or the previous production method as a result of the investment

The application of the tax allowance is subject to a government resolution based on the authorization of the European Commission.

Taxpayers may claim a development tax allowance with respect to investments of at least HUF100 million in free entrepreneurial zones.

Small and medium-sized enterprises may become eligible for development tax allowances with respect to investments implemented in any region in the amount of at least HUF50 million (small-sized enterprises) and HUF100 million (medium-sized enterprises).

A development tax allowance can also be claimed for investments of at least HUF100 million in the fields of food product hygiene, environmental protection, basic or applied research or film production, if certain other requirements are met. Investments of any amount in any field that result in a certain level of job creation may also qualify for a tax allowance.

In general, companies must submit a notification regarding the allowance to the Ministry of Finance before the start date of the investment and self-assess the tax allowance. However, companies must obtain permission from the Ministry of Finance if their investment-related costs and expenses exceed EUR110 million.

The tax allowance may reduce the company's corporate income tax liability by up to 80%, resulting in an effective tax rate of 1.8% (instead of 9%). Depending on the location of the project, the allowance may cover between 30% and 60% of the eligible investment costs. In general, the allowance may be used within a 13-year period after the investment is put into operation, but it must be used by the 16th year after the declaration for the allowance was filed. In general, the 13-year period begins in the year following the year in which the investment is put into operation. However, the investor may request that the 13-year period begin in the year in which the investment is put into operation.

Profit-based cash grant. The aid is available to members of a multinational group or a large domestic group of companies whose annual turnover, as reported in the consolidated accounts of the ultimate parent company, is equal to or exceeds HUF750 million in at least two of the four financial years immediately preceding the financial year under review. This cash

grant is the quasi-replacement of the development tax credit for companies that are subject to the Global Minimum Tax.

Tax allowance for investments and renovations made for energy efficiency purposes. If taxpayers make investments or renovations to reduce their final energy consumption, they can utilize a tax allowance up to 45% of the eligible extra costs, depending on the region in which the investment is made (up to a maximum of the present HUF value of EUR30 million), directly relating to or attributable to the assets serving exclusively the purposes of the investment contributing to the achievement of a higher level of energy efficiency. The tax allowance may be increased by 20% if the investment is made by a small enterprise and by 10% if the investment is made by a medium-sized enterprise. The tax allowance can be applied in the tax year following the year in which the investment was put into operation, and in the following five tax years. To be able to apply the tax allowance, the taxpayer must hold a certificate issued by the relevant authority proving that the investment qualifies as an investment for energy-efficiency purposes. Qualifying assets must be operated for at least five years. The tax allowance for investments serving energy-efficiency purposes and the development tax credit cannot both be applied to the same investment. In the case of energy efficiency investments, there is a distinction between investments related to buildings and those related to other equipment. In the case of building energy developments, it is compulsory to achieve a minimum energy efficiency level. The investments related to other equipment are eligible on a capital expenditure difference basis (30% to 45%), or the maximum aid intensity is decreased (from 30% to 45% to 15% to 22.5%). In the case of building-related investments, the maximum aid intensity is 15% for large companies.

Tax allowance for investment in electricity storage. A new tax allowance has been introduced on investments made in electricity storage from 2024 onward. Taxpayers have the opportunity to apply the tax allowance as an incentive for the construction of an electricity storage unit. Taxpayers can utilize the tax allowance in either the tax year following the installation of the facility, or within the same year the investment is put into operation, extending up to the next five tax years. The tax allowance may be claimed on condition that the taxpayer receives at least 75% of the energy stored in the electricity storage facility in the year from a power plant generating electricity from renewable energy sources that is connected to the public utility system at the same point as the electricity storage facility. The amount of the tax allowance cannot exceed 30% of the eligible investment cost in present value, with a maximum of EUR30 million.

Tax allowance for investments in registered startup companies. Taxpayers that invest in startup companies may decrease their pretax profit by three times the acquisition value of the participation (including the increase in the acquisition value as a result of a capital increase after acquisition) in the tax year the participation is obtained and in the following three years, in equal amounts. The pretax profit can be decreased by a maximum of HUF20 million in each tax year, per startup company. If, as a result of a capital increase in the startup, the acquisition value increases in the period in which the allowance can be applied, the tax base can be decreased with respect to the increase, provided that the

participation acquired in the startup company previously entitled the taxpayer to apply a tax-base allowance. However, this does not extend the length of the initial application period.

Tax-base allowances to promote labor mobility. Under the tax-base allowances to promote labor mobility, the pretax profit can be decreased by the following:

- The amount recorded as the acquisition value or the increment of the acquisition value of workers' hostels in the tax year in which the investment or renovation is finished
- The amount recorded as the rental fees for properties used as workers' hostels, or incurred with respect to the maintenance and operation of workers' hostels in the current tax year
- The amount of the net asset value or the increase in the net asset value of the property with a long-lasting structure built to provide housing for the taxpayer's employees in the tax year in which the investment or the development is completed

Film tax credit. Tax relief is provided to Hungarian companies sponsoring film production carried out in Hungary. The contributions are effectively refunded by the state because the sponsors can deduct the contributions from the corporate income tax payable, but the amount deducted may not exceed 30% of eligible expenses of the film production. In addition, these contributions, up to the above limit, are also deductible for corporate income tax purposes. The tax relief may be carried forward for a period of eight years. It is available only if the sponsor does not receive any rights with respect to the sponsored film.

To qualify for tax incentives, films are subject to a comprehensive cultural test, which grants points for various aspects of the production, including the members of the crew, the actors and the theme of the film being European. In general, only films receiving more than a certain number of points qualify.

To use the film tax credit, the taxpayer must pay 6.75% supplementary support to the beneficiary in the tax year in which the basic support is provided. The supplementary support is not deductible for corporate income tax purposes.

Sports tax credit. Tax relief is provided to Hungarian companies supporting sports organizations in the following popular team sports:

- Football (that is, soccer)
- Handball
- Basketball
- Water polo
- Ice hockey
- Volleyball

Under the sports tax credit incentive national sports associations, professional sports organizations, amateur sports organizations, nonprofit foundations and civil sports organizations may be supported. Donations granted to these sports organizations are fully creditable against the corporate tax liability of the donor, capped at 70% of the donor's total corporate tax liability, if the taxpayer does not have government liabilities in arrears. Unused tax credits may be carried forward for a period of eight years. In addition, amounts donated are also deductible for corporate income tax

purposes. Supplementary sport development aid must be paid by the donors within the framework of sponsorship or aid contracts equal to at least 6.75% of the amount indicated in the support certificate. This expense is not deductible for corporate income tax purposes. The supplementary development aid must be transferred to the respective national sport associations or the respective sports organizations or foundations.

New film and sports tax credit. Film productions and sports organizations may be supported by Hungarian corporate taxpayers in a new manner, as an alternative to the "old" model that will also remain in existence. Under the new rules, the taxpayer may designate a portion of its tax liability as support for a selected, qualifying organization. On receiving the tax payment from the taxpayer, the tax authority remits the designated amount to the beneficiary. Taxpayers can designate up to 80% of their monthly or quarterly tax advance payments and year-end tax payments. The total amount of the support is capped at the same amounts as under the "old" rules. As a benefit, the tax authority credits 7.5% of the amounts designated from advance tax payments and 2.5% of the amounts designated from the year-end tax payment to the taxpayer's tax account.

Capital gains. With the exception of capital gains on "reported shares," "reported intangibles" and certain other intellectual property (see below), capital gains derived by Hungarian companies are included in taxable income and taxed at the standard corporate income tax rate.

Capital gains derived by nonresident companies from disposals of Hungarian shares (except for shares in Hungarian real estate companies, see below) are not subject to tax, unless the shares are held through a permanent establishment of the seller in Hungary.

Reported shares. If a taxpayer has held registered shares of an entity for at least one year and reported the acquisition of the shares or an increase in the shareholding within 75 days after the date of the acquisition to the Hungarian tax authorities, the shares are "reported shares." If a shareholding has already been reported to the tax authorities, further reporting is necessary only if the proportion of the shareholding increases.

In line with the introduction of the Global Minimum Tax, there is a one-time opportunity for taxpayers holding shares that currently do not qualify for the participation exemption to make the election in their corporate income tax return for 2023. As a result, the shares they hold would become eligible for the regime. The deemed election date is 31 December 2023. The election can be made until the filing deadline of the corporate income tax return of 2023 (that is, 31 May 2024 for calendar-year taxpayers).

Capital gains (including foreign-exchange gains) derived from the sale of the reported shares or from the contribution of the reported shares in kind to the capital of another company are exempt from corporate income tax. Capital losses (including foreign-exchange losses) incurred on such investments are not deductible for tax purposes.

Reported intangibles. Similar to the rules of reported shares, the acquisition and creation of royalty-generating intangible assets

(intellectual property and pecuniary rights) by Hungarian taxpayers can be reported to the Hungarian tax authorities within 60 days after the date of acquisition or creation. If the reported intangible asset is sold or disposed of after a holding period of at least one year, the gain on the sale is non-taxable. However, any losses related to such reported intangible asset (that is, impairment) are not deductible for corporate income tax purposes.

If an unreported intangible asset is sold, the gain on the sale is exempt from tax if this gain is used to purchase further royalty-generating intangibles within five years. A taxpayer may not enjoy the benefits arising from the reporting of a repurchased intangible if this asset was previously sold as an unreported intangible that benefited from this capital gains tax exemption.

Hungarian real estate holding companies. Gains derived by a nonresident from the alienation of shares in a Hungarian real estate holding company are taxed at a rate of 9%, unless a tax treaty exempts such gains from taxation. A Hungarian company is deemed to be a Hungarian real estate holding company if either of the following circumstances exists:

- More than 75% of its book value is derived from real property located in Hungary.
- More than 75% of the total book value of the group, comprised of the company and its related companies that are engaged in business in Hungary (whether as resident entities or through permanent establishments), is derived from real property located in Hungary.

The capital gains are not taxable if the Hungarian company is listed on a recognized stock exchange.

Administration. In general, the calendar year is the tax year. However, companies may choose a different tax year if such year best fits their business cycle or is required to meet the management information needs of the parent company. Companies selecting a tax year other than the calendar year must notify the tax authorities within 15 days after making the decision on the selection.

Companies must file their corporate income tax returns by the last day of the fifth month following the end of the tax year. If their annual tax liability is greater than the total advance tax payments paid during the year, they are required to pay the balance on filing the return.

Deadline extensions to file tax returns may not be obtained in advance of the due date. However, a company may obtain an extension after the due date if it files, with the completed late return, a letter requesting an extension to the date the return is filed. At their discretion, the tax authorities may accept the late return as being filed on time if the letter explains the reasons for the delay and establishes that the tax return is being filed within 15 days after the reason for the delay expires, and if the company pays any balance of tax due shown on the return.

If an extension for filing is granted, no late filing or payment penalties are imposed, and no interest is charged on the late payment. If an extension for filing is not granted, a penalty of up to HUF500,000 can be imposed. In addition, interest is charged on

the late payment of tax at a rate equal to the National Bank of Hungary prime interest rate plus 5 percentage points (on 31 December 2022, the prime interest rate was 13%; accordingly, the daily interest on the late payment would be 18/365%). Interest is charged beginning on the date the payment is due, and it may be charged for up to three years.

In their corporate income tax returns, taxpayers also declare the tax advances that they will pay for the 12-month period beginning in the second month after the filing deadline. The total of these advances equals the amount of tax payable for the year covered in the corporate income tax return. For calendar-year taxpayers, which have a filing deadline of 31 May, advances are payable over a 12-month period beginning in July of the year following the year covered in the corporate income tax return and ending in June of the subsequent year. For companies with a corporate income tax liability exceeding HUF5 million in the preceding year, advance payments are divided into 12 equal monthly installments. Other companies make quarterly advance payments.

Administration for Global Minimum Tax. The constituent entity is obliged to register if it qualifies as the subject of the Global Minimum Tax. This should be done within 12 months from the start of the relevant tax year. In addition, the constituent entity must submit a global information return and provide data on the QDMTT and the top-up taxes paid under the income inclusion rule or the undertaxed payments rule regime.

The global information return must be submitted to the tax authorities, and the tax must be paid no later than 15 months after the last day of the relevant tax year. The tax should be paid in HUF, USD or EUR.

As a temporary benefit, the data provision and declaration obligation must be fulfilled within 18 months after the last day of the first transitional tax year. No fine may be imposed for tax years beginning before 31 December 2026 if the group member(s) acted in good faith, as expected in the given situation (that is, acted reasonably).

Dividends

Dividends paid by Hungarian companies. Withholding tax is not imposed on dividends paid to foreign companies.

Withholding tax at a rate of 15% is imposed on dividends paid directly to resident and nonresident individuals. Tax treaties may override Hungarian domestic law with respect to the withholding tax on dividends.

Dividends received by Hungarian companies. In general, dividends received by Hungarian companies are exempt from corporate income tax. The only exception applies to dividends paid by controlled foreign corporations (CFCs; see Section E).

Interest, royalties and service fees

Interest, royalties and service fees paid by Hungarian companies. Withholding tax is not imposed on interest, royalties and service fees or any other payments made to local or foreign companies.

Hungary imposes a withholding tax at a rate of 15% on interest paid directly to individuals.

Interest and royalties received by Hungarian companies. A tax incentive may apply to royalties received by Hungarian companies (see *Tax incentives*). Interest received by a Hungarian company is taxable according to the general rules.

Exit taxation. Effective from 1 January 2020, capital withdrawals can be taxed based on market value if a taxpayer takes any of the following actions:
- Relocates its tax residency by moving its place of management from Hungary to another country
- Relocates assets from its registered office in Hungary to a permanent establishment outside Hungary
- Relocates assets from its permanent establishment in Hungary to its registered office or permanent establishment outside Hungary
- Transfers the business activity performed in Hungary to a foreign country

If capital is withdrawn, the tax base increases by the market value of the relocated assets or activities prevailing at the time of the withdrawal less their tax book value at the time of withdrawal.

Taxpayers subject to the exit tax can choose to pay the tax in five equal installments, as indicated in their tax return for the last tax year, provided that their place of management has moved to another European Union (EU) Member State or certain European Economic Area (EEA) countries.

Foreign tax credit. Foreign taxes paid on foreign-source income may be credited against Hungarian tax. Foreign dividend withholding tax may be credited for Hungarian tax purposes if the dividend or the undistributed profit is subject to tax in Hungary.

C. Determination of trading income

General. Taxable income is based on financial statements prepared in accordance with Hungarian accounting standards. These standards are set forth in the law on accounting, which is largely modeled on EU directives.

Effective from 1 January 2017, the following companies can elect to use International Financial Reporting Standards (IFRS) for purposes of preparing their stand-alone Hungarian financial statements:
- Entities subject to compulsory statutory audit
- Companies whose direct or indirect parent prepares a consolidated report under IFRS
- Insurance companies
- Banks and other entities subject to similar prudential rules
- Entities providing financial services under the supervision of the Hungarian National Bank
- Hungarian branches of non-Hungarian entities

Effective from 1 January 2017, the use of IFRS is mandatory in the following circumstances:

- The entity's stock is listed on any of the stock exchanges in the EEA, excluding banks and other entities subject to similar prudential rules and insurance companies).
- It is mandatory under Regulation 1606/2002 of the European Parliament and of the EU Council.

The application of IFRS is mandatory for banks and other entities subject to similar prudential rules (regardless of whether their stock is listed on any of the stock exchanges in the EEA) and insurance companies with securities listed on any of the stock exchanges in the EEA from the tax year beginning in 2018.

Taxable income is determined by adjusting the pretax profit shown in the annual financial statements by items described in the Act on Corporate Income Tax. If IFRS are applied, the starting point for the determination of the corporate income tax base is the IFRS result, but different adjustments apply. The purpose of making adjustments to the IFRS result is to arrive at a tax base that is largely similar to the tax base of companies reporting under Hungarian accounting standards.

Some items are not subject to tax as income, such as dividends received (but see the controlled foreign corporation rules in Section E).

Some items, such as transfers without consideration, are not deductible for tax purposes.

Tax depreciation. In general, depreciation is deductible in accordance with the Annexes to the Act on Corporate Income Tax. Lower rates may be used if they are at least equal to the amount of the depreciation used for accounting purposes. The annexes specify, among others, the following straight-line tax depreciation rates.

Asset	Rate (%)
Buildings used in hotel or catering businesses	3
Commercial and industrial buildings	2 to 6
Leased buildings	5
Motor vehicles	20
Plant and machinery	
General rate	14.5
Automation equipment, equipment for environmental protection, medical equipment and other specified items	33
Computers	50
Intellectual property and film production equipment	50

Relief for losses. Losses incurred in 2015 and subsequent years may be carried forward for five years only. Losses from previous tax years may be carried forward indefinitely. Tax losses may be deducted from the pre-tax profit up to 50% of the tax base for the tax year.

Change-of-control restrictions have been introduced with respect to the availability of previously incurred tax losses after corporate transformations, mergers and acquisitions.

Groups of companies. Effective from 1 January 2019, taxpayers can opt for group taxation for corporate income tax purposes. Corporate income tax groups can be formed by at least two

taxpayers that are resident in Hungary (a Hungarian branch of a non-Hungarian resident entity can also participate in a corporate income tax group). As a precondition, groups must consist of related companies based on voting rights equivalent to at least 75%. In addition, the companies in the group must satisfy the following conditions:

- They must have the same tax year.
- They must prepare their financial statements under the same accounting standards.

A taxpayer can be a member of only one group at the same time.

The formation of a corporate income tax group is subject to the filing of an application. The start date for the group or for becoming a member of an existing group is the first day of the tax year following the year of the application. In the case of taxpayers that start their activity during a given tax year, membership may be considered to exist from the day on which their corporate income tax liability would otherwise begin.

Corporate income tax groups must settle their tax liabilities and exercise their rights as taxpayers through their appointed representatives under the group's tax identification number. The group representative must keep appropriate records that allow the group to support its tax audits and keep all of the data needed by the group for the payment of its corporate income tax liability and the exercise of its rights.

In general, transfer-pricing rules and adjustments should not be applied to transactions between corporate income tax group members after the formation of the group.

Unless another regulation specifically states otherwise, the potential exemption or relief from the rules on related-party transactions does not apply to taxes other than corporate income tax. For example, the local business tax or value-added tax (VAT) treatment of related-party transactions remains unchanged even if a corporate income tax group is formed.

Group members' negative tax bases can offset up to 50% of the positive tax bases of other corporate income tax group members in calculating the corporate income tax base of the group. Pre-grouping tax losses of a group member can only offset the same group member's corporate income tax base (up to 50%). Tax losses generated after the creation of the group can offset up to 50% of the corporate income tax base of the group.

The general corporate income tax rate of 9% also applies to corporate income tax groups.

D. Other significant taxes

The following table summarizes other significant taxes and provides the 2022 rates for these taxes.

Nature of tax	Rate (%)
Value-added (sales) tax, on goods, services and imports	
Standard rate	27
Preferential rates	0/5/18
Sector-specific taxes; the sector tax base varies by tax type.	

Nature of tax	Rate (%)
Bank tax; imposed on various entities in the financial market; the tax rate varies by financial activity	Various
Levy on energy suppliers ("Robin Hood tax") (The 31% Robin Hood tax rises to 41%, for the 2023 and 2024 tax years only.)	41
Surtax payable by pharmaceutical distributors (The tax rate increase of 20% for pharmaceutical tax to 28% is extended to 2024, and the tax rate is increased to 40% effective from April 2023.)	20/28/40
Windfall tax payable by pharmaceutical manufacturers	0.5/1.5/4
Surtax on credit institutions and financial enterprises	10
Financial transaction tax (The tax is capped at HUF10,000 per transaction.)	0.3
Telecommunication surtax (The government imposed surtaxes on extra profit on 1 July 2022; the extra profit surtax affects seven sectors, which are the banking, insurance, energy, retail, telecommunication, airlines, and pharmaceutical distributors; the list above does not cover all tax types; extra profit surtaxes apply to 2022 and 2023, and the total annual amount must be paid for 2022 as well based on the respective company's 2021 tax year figures.)	0/1/3/7
Advertisement tax; this tax is not being imposed currently	0
Employment-related taxes	
Social security contributions, on gross salaries; in general, expatriates do not participate; paid by	
Employer	13
Employee	18.5
Other taxes	
Excise duty, on various goods, including gasoline, alcohol, tobacco, beer, wine and champagne	Various
Local business tax; imposed on turnover or gross margin (A decision of the European Court of Justice held that this tax was compatible with EU law.)	2

E. Miscellaneous matters

Foreign-exchange controls. The Hungarian currency is the forint (HUF). Hungary does not impose any foreign-exchange controls; the forint is freely convertible.

Companies doing business in Hungary must open a bank account at a Hungarian bank to make payments to and from the Hungarian authorities. They may also open accounts elsewhere to engage in other transactions.

Payments in Hungarian or foreign currency may be freely made to parties outside Hungary.

Transfer pricing. For contracts between related companies, the tax base of the companies must be adjusted by the difference between the market price and the contract price if the application of the market price would have resulted in higher income for the companies. From the 2022 tax year, the adjustment must be to the median of the market price range.

Taxpayers may also reduce the tax base in certain circumstances if, as a result of not applying market prices, their income is higher than it would have been if market prices had been applied. Effective from 2018, the tax base reduction can be only applied on the declaration of the related party stating that it will take (or has taken) into account the same amount when calculating its corporate income tax (or other equivalent tax) base. The tax base reduction does not apply if the transaction involves companies deemed to be CFCs (see *Controlled foreign corporations*).

The market price must be determined by one of the following methods:
- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Transactional net margin method
- Profit split method
- Any other appropriate method

These methods reflect the July 2010 update of the OECD guidelines. A decree issued by the Ministry of Finance describes the requirements for the documentation of related-party transactions. Transfer-pricing documentation must be prepared for all related-party agreements that are in effect, if the fair market consideration exceeds HUF100 million, regardless of the date on which the agreement was concluded.

Companies subject to transfer pricing documentation requirements have a new reporting obligation that must be first fulfilled in the corporate income tax return submitted after 31 December 2022. In the annual corporate income tax returns, transaction-level details on the intercompany dealings should be provided.

The transfer-pricing rules also apply to in-kind capital contributions (including on foundation) and the withdrawal of assets in kind (in the case of capital reduction and possibly in the case of winding-up) by the majority shareholder. The transfer-pricing rules also apply to in-kind dividend payments. Advance pricing agreements (APAs) are available.

Hungary has ratified and is applying the Arbitration Convention.

Controlled foreign corporations. As of 1 January 2019, the definition of CFCs in the Act on Corporate Income Tax and Dividend Tax is changed in accordance with the EU Council Directive that sets out the rules against tax-avoidance practices closely relating to the operation of the internal market. A CFC is defined as a nonresident company (branch) that meets one of the following conditions:
- At least 50% of the registered capital or the voting rights in the nonresident company is directly or indirectly owned by a Hungarian resident private individual or company, provided

that the foreign company has to pay less than half of the amount of corporate income tax that would be payable if the tax and the tax base were calculated on the basis of the Hungarian tax rules. The 50% threshold must be evaluated on a consolidated basis. Consequently, the ratio of participation and voting rights held by all Hungarian and non-Hungarian related parties must be considered on an aggregate basis.

- A Hungarian resident individual or company has the right to receive at least 50% of the after-tax profit of the foreign company, provided that the foreign company has to pay less than half of the amount of corporate income tax that would be payable if the tax and the tax base were calculated on the basis of the Hungarian tax rules. The 50% threshold must be evaluated on a consolidated basis. Consequently, the rights to receive part of the after-tax profit held by all Hungarian and non-Hungarian related parties should be considered on an aggregate basis.
- A foreign branch of a Hungarian resident company is a CFC if the foreign branch has to pay less than half of the amount of corporate income tax that would be payable if the tax and tax base of the branch were calculated on the basis of the Hungarian tax rules.

On establishing a nonresident company's CFC status, it must be considered, among other criteria, whether the nonresident company (branch) carried out any legal transactions that were not genuine. A legal transaction, or a series of such transactions, qualifies as non-genuine if it is performed with the primary purpose of gaining a tax advantage and if the significant personnel functions relating to the assets of and the risks assumed by the nonresident company (branch) are carried out by a Hungarian resident company.

The following are exceptions to the above definition:

- If the pretax profit of a nonresident company (branch) does not exceed HUF243,952,500, if its profit from non-commercial activities does not exceed HUF24,395,250 or if its pretax profit does not exceed 10% of the operating costs accounted for the relevant tax year, the nonresident company (branch) does not qualify as a CFC.
- A foreign permanent establishment that operates in a country outside the EU or the EEA with which Hungary has a treaty with a provision to exempt the income of foreign permanent establishments from corporate income tax liability in Hungary does not qualify as a CFC if it qualifies as a permanent establishment under the treaty.

As of 1 January 2021, these exceptions may not be applied, and the foreign entity should qualify as a CFC if it is established in a fiscally non-cooperative state defined in the relevant decree of the Ministry of Finance.

Taxpayers must increase their corporate income tax base in relation to CFCs in accordance with the following rules:

- In the tax year in which the CFC's tax year has its last day, the taxpayer's corporate income tax base is increased by the amount of the positive after-tax profit, less the approved (distributed) dividend realized from non-genuine legal transactions as stated on the last day of the CFC's tax year, to the extent that

the taxpayer performs significant personnel functions relating to the income generated from the non-genuine legal transaction.
- The amount recognized as an increase to the pretax profit, relating to the undistributed income of the CFC, must be calculated in line with the arm's-length principle.

Dividends received from CFCs do not qualify for the participation exemption regime and, accordingly, are treated as taxable income to the Hungarian shareholders (except for dividends that were already taxed as undistributed after-tax profits in previous years). Nevertheless, the corporate income tax paid abroad can be credited against the Hungarian corporate income tax liability. As a result, the overall non-Hungarian and Hungarian tax burden is capped at the 9% Hungarian corporate income tax rate. Capital losses on investments in CFCs are not deductible for tax purposes.

Hybrid instruments and special provisions related to tax avoidance. In a hybrid mismatch arrangement, the provisions based on which costs and expenditures can be taken into account and the pre-tax profit can be decreased cannot be applied if a different legal characterization of the same facts give rise to tax avoidance and if such facts occur with respect to a related party or it can be proved that the difference affects or affected the consideration in the underlying agreement.

Reverse hybrid rules. As of 1 January 2022, a hybrid entity is considered a resident taxpayer in Hungary if a nonresident organization (an individual or an individual together with affiliated companies) meets one of the following conditions:
- It controls more than 50% of the voting rights in it directly or indirectly.
- It controls more than 50% of the subscribed capital directly or indirectly.
- It is entitled to more than 50% of after-tax profit.

An additional condition is that a person referred to in the above bullets fall under the regulations of a fiscal jurisdiction that considers the hybrid entity as taxable in that jurisdiction. These entities assess their Hungarian corporate tax liability, excluding the amount that is subject to liability under the tax laws of the other fiscal jurisdiction for corporate tax or any other form of tax that is considered equivalent to corporate tax to the extent it can be proven by a tax return filed in that other country.

Debt-to-equity rules. To comply with the Council Directive (EU) 2016/1164, named the EU Anti-Tax Avoidance Directive (ATAD), as of 1 January 2019, a new rule to restrict interest deductions replaces the thin-capitalization rules.

Under this new rule, the amount of the net financing costs exceeding either 30% of the earnings before interest, tax, depreciation and amortization (EBITDA) or the nominal threshold of HUF939,810,000 (EUR2,400,000), whichever is higher, increases the pretax profit.

The unused part of previous tax years' interest deduction capacity reduces the amount of the increase described in the preceding paragraph, but this reduction cannot exceed the amount of the increase.

If in previous tax years, the tax base was increased based on this provision, in the year in question, the tax base can be decreased by up to the same amount, to the extent of the current year's interest deduction capacity. The law does not specifically restrict the length of time that the previous years' tax base increasing item can be applied to reduce the tax base.

The deduction restriction is broader than in the previous thin-capitalization rule, to the extent that any costs and expenditures equivalent to interest in economic terms, as well as costs and expenditures accounted for in connection with raising funds, are also subject to restrictions, in addition to interest expenditures. The deduction of foreign-exchange losses, borrowing fees and related legal costs as well as the deduction of the costs of any potential hedging transactions can also be restricted. The law provides that the above financing costs can be reduced by interest income and other taxable income that is equivalent to interest income when determining the net financing costs. This amount should be compared to the limit provided by law when calculating the increasing item.

Like the previous rules, the measure for the increase in the tax base does not have to be applied by financial institutions, investment enterprises, alternative investment funds, the management companies of undertakings for collective investment in transferable securities or by taxpayers qualifying as insurance and reinsurance companies. However, there is no similar exception from applying the increasing item with respect to borrowings from the above list.

For financing agreements concluded before 17 June 2016, the new rule will be applied for the first time with respect to amended contract amounts or amended terms, from the day following the date on which the amendment for the increased contract amount or the extension of maturity enters into force. Otherwise, the previous thin-capitalization rule continues to apply to these contracts. However, taxpayers may also opt to apply the new interest deduction restriction rule.

In the case of corporate income tax groups, the members first must aggregate the net financing costs and EBITDA for the tax year. Taking this amount and the HUF939,810,000 limit into account, which collectively applies to the members with the net financing costs, they determine the amount of the nondeductible interest at the group level. This determined amount must be taken into account in the individual tax base of each member in proportion to the EBITDA in the tax year, and each member must take into account the amount assigned and thereby increase its individual tax base.

Foreign investment. No restrictions are imposed on the percentage of ownership that foreigners may acquire in Hungarian companies. Some restrictions exist with respect to the ownership of farmland.

Mandatory reporting of tax planning arrangements. The purpose of Council Directive 2011/16/EU (DAC6) is to identify and prescribe the reporting of cross-border tax planning arrangements that meet certain hallmarks. Data must be reported to the tax

authority on the developers of these arrangements as well as on the persons that take part in these arrangements. There is a separate definition for potentially relevant cross-border arrangements, which are composed of two major groups; one includes marketable arrangements in general, and the other comprises tailored arrangements.

Data reporting may be required in connection with taxes falling within the scope of the Act on Tax Procedures, except for VAT, excise duty and contributions.

The provisions for data reporting entered into force on 1 July 2020 in Hungary. However, the reporting obligation will apply to the cross-border arrangements that fall within the scope of the data reporting obligation, and the first steps of their implementation took place between 25 June 2018 and 1 July 2020. The data in relation to these arrangements can be reported by 28 February 2021. For arrangements implemented after 1 July 2020, there will be a 30-day time frame to complete the data reporting obligation; however, the first reporting deadline is 31 January 2021, regardless of such time frame.

For a failure to meet the deadline, the tax authority may impose a default penalty, up to HUF500,000 for the first time, which then may go up to as much as HUF5 million.

From 2023 onward, companies whose consolidated income exceeds HUF275 million in two consecutive years must prepare a report containing corporate tax information of the related entities. The parent company is required to prepare the report, and in addition to general information, it must present revenues, pretax profit and payable corporate tax, as well as any withholding tax, per jurisdiction.

F. Treaty withholding tax rates

Hungary does not impose withholding taxes on payments to foreign entities. However, it does impose withholding tax on the payment of dividends and interest to foreign individuals (for details, see Section B).

Hungary has tax treaties in effect with the following jurisdictions.

Albania
Andorra
Armenia
Australia
Austria
Azerbaijan
Bahrain
Belarus
Belgium
Bosnia and Herzegovina (a)
Brazil
Bulgaria
Canada
China Mainland
Croatia
Cyprus
Indonesia
Iran
Iraq
Ireland
Israel
Italy
Japan
Kazakhstan
Korea (South)
Kosovo
Kuwait
Kyrgyzstan
Latvia
Liechtenstein
Lithuania

Montenegro (b)
Morocco
Netherlands
North Macedonia
Norway
Oman
Pakistan
Philippines
Thailand
Tunisia
Türkiye
Turkmenistan
Ukraine
United Arab Emirates
United Kingdom
Uruguay
Uzbekistan
Vietnam

(a) The 1985 treaty between Hungary and the former Socialist Federal Republic of Yugoslavia is applied with respect to Bosnia and Herzegovina.
(b) The 2001 treaty between Hungary and the former Federal Republic of Yugoslavia is applied with respect to Serbia. In practice, Hungary and Montenegro also apply this treaty, but no formal announcement has been made to confirm this practice.

Hungary is negotiating double tax treaties with Algeria, Argentina, Chile, Colombia, Ethiopia, Panama and Sri Lanka.

The Hungary-United States tax treaty terminated on 1 January 2024.

On 7 June 2017, Hungary signed with more than 65 other countries the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS (MLI). The MLI ensures that rules designed to prevent cross-border tax evasion will be incorporated into bilateral tax treaties. It will also enable hundreds of tax treaties to be updated with OECD BEPS measures without the need for drawn-out bilateral negotiations. The Hungarian government has opted out from all provisions of the MLI that allow an opt-out.

A. At a glance

Domestic Company Income Tax Rate (%)	15/22/25/30 (a)(b)(c)
Capital Gains Tax Rate (%)	20/30 (a)(c)(d)
Branch Tax Rate (%)	40 (a)(c)(e)
Withholding Tax (%)	
Dividends	

Paid to Domestic Companies	10 (c)(f)
Paid to Foreign Companies	20 (a)(c)(f)(g)(h)
Interest	
Paid to Domestic Companies	10 (c)(f)
Paid to Foreign Companies	4/5/9/20 (a)(c)(f)(g)(i)
Royalties from Patents, Know-how, etc.	20 (a)(c)(f)(g)(h)
Technical Services Fees	20 (a)(c)(f)(g)(h)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	8(j)

(a) The rates are subject to an additional levy consisting of a surcharge and a cess. They are increased by the following surcharges on such taxes:
- Domestic companies with net income exceeding INR100 million: 12%
- Foreign companies with net income exceeding INR100 million: 5%
- Domestic companies with net income exceeding INR10 million: 7%
- Foreign companies with net income exceeding INR10 million: 2%
- Domestic companies opting for a reduced income tax rate of 15% or 22% (see footnote [b] below): 10%

No surcharge is payable if the net income does not exceed INR10 million except in the case of domestic companies opting for a reduced tax rate of 15% or 22%. The tax payable (inclusive of the surcharge, as applicable) is further increased by a cess levied at 4% of the tax payable. The withholding tax rates are increased by a surcharge for payments exceeding INR10 million made to foreign companies and a cess (see above).

(b) In the following scenarios, reduced income tax rates are applicable for the 2024-25 fiscal year:
- A 25% rate applies to companies that had total turnover or gross receipts not exceeding INR4 billion in the 2022-23 fiscal year.
- Domestic companies set up and registered after 1 March 2016 and engaged in the manufacturing or production of articles or things and research with respect to such articles or things can opt for a concessional tax rate of 25%, subject to the fulfillment of specified conditions.
- A domestic company can opt for a concessional tax rate of 22% subject to the fulfillment of specified conditions.
- A domestic company set up and registered on or after 1 October 2019 that commences the manufacturing or production of an article or thing or the generation of electricity on or before 31 March 2024 can opt for a concessional tax rate of 15% subject to the fulfillment of specified conditions. Also, see *Relief for losses* in Section C.

(c) The 2024 Finance Act received presidential assent and was enacted in March 2024. However, because it is an election year, a Finance (No. 2) Act, 2024, is expected to be enacted in June or July 2024 and the above rates may be changed.

(d) There are exceptions to this basic rate, see *Capital gains* in Section B for a detailed discussion on the different type of rates applicable on capital gains. Capital gains arising from the sale of virtual digital assets are taxable at 30% (plus applicable surcharge and cess). See *Income from digital assets* in Section B for more information.

(e) For exceptions to this basic rate, see Section B.

(f) A Permanent Account Number (PAN) is a unique identity number assigned to a taxpayer in India on registration with the India tax authorities. If an income recipient fails to furnish its PAN, tax must be withheld at the higher of the rate specified in the relevant provision of the Income Tax Act and 20%.

(g) If a recipient of income is located in a Notified Jurisdictional Area (NJA), tax must be withheld at the higher of the rate specified in the relevant provision of the Income Tax Act and 30% (for further details, see Section E).

(h) The 20% rate (plus the 2% or 5% surcharge, as applicable, and the 4% cess) applies to royalties and technical services fees paid to foreign companies by Indian enterprises. If the royalties or technical services fees paid under the agreement are effectively connected to a permanent establishment or fixed place of the nonresident recipient in India, the payments are taxed on a net income basis at a rate of 40% (plus the 2% or 5% surcharge, as applicable, and the 4% cess).

(i) This rate applies to interest on monies borrowed, or debts incurred, in foreign currency. Withholding tax rate of 4% (plus a surcharge of 2% or 5%, as applicable, and a 4% cess) applies in cases in which interest is payable to nonresidents with respect to long-term bonds or rupee-denominated bonds

(RDBs) listed on recognized stock exchange located in any International Financial Services Centre (IFSC). Withholding tax at a rate of 5% (plus a surcharge of 2% or 5%, as applicable, and a 4% cess) is imposed on interest payments to nonresidents (including foreign companies) with respect to the following:

- Infrastructure debt funds.
- Borrowings made by Indian companies in foreign currency by way of loans between 1 July 2012 and 1 July 2023, infrastructure bonds issued between 1 July 2012 and 1 October 2014 or long-term bonds issued between 1 October 2014 and 1 July 2023, subject to prescribed conditions (for long-term bonds, the lower withholding rate would not be affected if the recipient does not furnish a PAN; see footnote [f] above).
- RDBs of Indian companies or government securities issued to foreign institutional investors or qualified foreign investors, with respect to interest payable between 1 June 2013 and 1 July 2023.
- Monies borrowed by Indian companies from a source outside India through the issuance of RDBs other than those listed on a stock exchange located in any IFSC, under a loan agreement at any time on or after 1 July 2012 but before 1 July 2023. However, interest payable by Indian companies or business trusts with respect to monies borrowed from a source outside India by way of RDBs from 17 September 2018 to 31 March 2019 is exempt from tax in the hands of the nonresident recipients of such interest. Monies borrowed by Indian companies from a source outside India through the issuance of RDBs or long-term bonds listed on a stock exchange located in any IFSC at any time after 1 July 2023 is subject to a withholding tax rate at 9%.

Further, a rate of 20% (plus the surcharge of 2% or 5%, as applicable, and the 4% cess) applies with respect to interest payable by Indian concerns or the government to foreign companies on monies borrowed or debts incurred in foreign currency. Interest that is effectively connected to a permanent establishment or fixed place of a nonresident recipient in India is taxed at a rate of 40% (plus the surcharge of 2% or 5%, as applicable, and the 4% cess).

(j) Unabsorbed depreciation may be carried forward indefinitely to offset taxable profits in subsequent years.

B. Taxes on corporate income and gains

Corporate income tax. A domestic company is defined for tax purposes as a company incorporated in India. The definition also includes a company incorporated outside India (foreign company) if the company has made certain arrangements for declaration and payment of a dividend in India. The tax rates in India are specified with reference to a domestic company. As a result, it is possible for a foreign company to be taxed at rates applicable to a domestic company if it has made the necessary arrangements for the declaration and payment of a dividend in India.

A company resident in India is subject to tax on its worldwide income, unless the income is specifically exempt. A company not resident in India is subject to Indian tax on Indian-source income and on income received in India. Depending on the circumstances, certain income may be deemed to be Indian-source income. Companies incorporated in India are resident in India for tax purposes, as are companies incorporated outside India, if their place of effective management in that year is in India. As a result, if the place of effective management of a foreign company is in India, it is subject to tax in India on its worldwide income. If such a foreign company also qualifies as a domestic company (see above), the tax rates applicable to a domestic company apply. The government has issued guidelines for the determination of the place of effective management of a foreign company.

Rates of corporate tax. Domestic companies are subject to tax at a basic rate of 30% (25% for domestic companies that had gross turnover not exceeding INR4 billion in the 2022-23 fiscal year).

New companies set up and registered on or after 1 March 2016 that are engaged in the manufacturing or production of articles or things and research with respect to such articles or things can opt for a concessional tax rate of 25%, subject to the fulfillment of specified conditions. From the 2019-20 fiscal year, all domestic companies can opt for a concessional tax rate of 22% subject to the fulfillment of specified conditions. A domestic company set up and registered on or after 1 October 2019 that commences the manufacturing or production of an article or thing or the generation of electricity on or before 31 March 2024 can opt for a concessional tax rate of 15%, subject to the fulfillment of specified conditions. In addition, a 7%, 10% or 12% surcharge (for details regarding the surcharge, see footnote [a] in Section A) and a 4% cess are imposed on the income tax of such companies. Long-term capital gains are taxed at special rates (see *Capital gains*).

For foreign companies, the net income is taxed at 40% plus the 2% or 5% surcharge, as applicable, and the 4% cess. A rate of 20% plus the 2% or 5% surcharge and the 4% cess or the treaty rate, whichever is more beneficial (see Section F for treaty withholding tax rates), applies to royalties and technical services fees paid to foreign companies if the royalty or technical services fees agreement is approved by the central government or if it is in accordance with the Industrial Policy. A rate of 20% or the treaty rate, whichever is more beneficial (see Section F for treaty withholding tax rates), plus the 2% or 5% surcharge and the 4% cess applies to dividends paid to foreign companies. A rate of 20% (plus the 2% or 5% surcharge and the 4% cess) applies to gross interest from foreign-currency loans or from units of a mutual fund. A lower rate of 5% (plus the 2% or 5% surcharge and the 4% cess) applies to gross interest from foreign-currency borrowings raised by Indian companies or business trusts by way of loans between 1 July 2012 and 30 June 2023, long-term infrastructure bonds issued between 1 July 2012 and 1 October 2014 or long-term bonds issued between 1 October 2014 and 30 June 2023, subject to prescribed conditions. A lower rate of 5% (plus the 2% or 5% surcharge and the 4% cess) also applies to interest payable between 1 June 2013 and 1 July 2023 on RDBs issued by Indian companies and government securities, subject to prescribed conditions. Effective from the 2020-21 fiscal year, a lower rate of 4% (plus the 2% or 5% surcharge and the 4% cess) applies to gross interest from foreign-currency borrowings raised by Indian companies or business trusts by way of long-term bonds or RDBs that are listed on a recognized stock exchange located in any IFSC and that are issued between 1 April 2020 and 1 July 2023. A lower rate of 5% (plus the 2% or 5% surcharge and the 4% cess) applies to interest received from units of business trusts in India (see Section E).

Interest on monies borrowed by Indian companies from a source outside India through the issuance of RDBs or long-term bonds listed on a stock exchange located in any IFSC at any time after 1 July 2023 is subject to a withholding tax rate of 9%.

If a nonresident with a permanent establishment or fixed place of business in India enters into a royalty or technical services fees agreement or earns dividend income and if the royalties or fees paid under the agreement or dividend income are effectively connected to such permanent establishment or fixed place, depending

on the applicable tax treaty, the payments are taxed on a net income basis at a rate of 40% plus the 2% or 5% surcharge and the 4% cess.

Income from carbon credits. Effective from the 1 April 2018, income from transfer of carbon credits is taxed at a rate of 10% (plus applicable surcharge and cess) on a gross basis without allowing any expenditure or allowance against such income.

Income from crude oil. The income tax law provides for a tax exemption to foreign companies earning income from the storage of oil in a facility in India and from the sale of crude oil to any person resident in India, under an agreement entered into or approved by the central government. This exemption extends to income accruing or arising to a foreign company from the sale of leftover stock of crude oil from a facility in India after the expiration of agreement or the arrangement with the central government.

Income from digital assets. Effective from the 2022-23 fiscal year, income from the transfer of a virtual digital asset is taxed at a rate of 30% (plus applicable surcharge and cess). A virtual digital asset is defined broadly in the tax laws of India, to include, among others, any information, code, number or token generated through cryptographic means, or otherwise, a non-fungible token. Such income is computed in a specified manner and any losses incurred on the transfer would not be eligible for carry forward to future years. Payments made for the transfer of virtual digital asset, which is above specific de minimum limits, attract a tax withholding of 1% (plus applicable surcharge and cess) for payments to residents and at rates in force for nonresidents. Further, any receipt of a virtual digital asset for no or inadequate consideration is taxable in the hands of recipient (resident or nonresident) in India.

Tax incentives. Subject to prescribed conditions, the following tax exemptions and deductions are available to companies with respect to business carried on in India:

- A 10-year tax holiday equal to 100% of the taxable profits is available to undertakings or enterprises engaged in the following:
  - — Developing or operating and maintaining or developing, operating and maintaining infrastructure facilities (roads, toll roads, bridges, rail systems, highway projects, including housing or other activities that are integral parts of the highway projects, water supply projects, water treatment systems, irrigation projects, sanitation and sewerage systems, solid waste management systems, ports, airports, inland waterways, inland ports or navigational channels in the sea), if development or operation and maintenance of the infrastructure facility begins before 1 April 2017
  - — Generation or generation and distribution of power if the company begins to generate power at any time during the period of 1 April 1993 through 31 March 2017
  - — Starting transmission or distribution by laying a network of new transmission or distribution lines at any time during the period of 1 April 1999 through 31 March 2017
  - — Undertaking substantial renovation and modernization (at least 50% increase in book value of plant and machinery)

of an existing network of transmission or distribution lines during the period of 1 April 2004 through 31 March 2017
— Development, operation and maintenance of an industrial park or of a Special Economic Zone (SEZ) notified (through an official publication by the government of India) for the period beginning on 1 April 1997 and ending on 31 March 2006

The company may choose any 10 consecutive years within the first 15 years (10 out of 20 years in certain circumstances) for the period of the tax holiday. Such tax holiday is not available to an undertaking or enterprise that is transferred in an amalgamation or demerger.

- A 10-year tax holiday equal to 100% of taxable profits for the first five years and 30% of taxable profits for the next five years from the business of processing, preserving and packaging of fruits or vegetables or from the integrated business of handling, storing and transporting food grains. A similar tax holiday is available with respect to profits from the business of processing, preserving and packaging of meat and meat products, poultry or marine or dairy products.
- Deduction allowed equal to 100% of the profits derived from the business of developing and building a housing project if approval from the competent authority is obtained during the period of 1 June 2016 through 31 March 2022, subject to fulfillment of other conditions. The size of the plot and residential unit must be within specified limits to qualify for the tax holiday. Similar benefit to be notified by the government will be extended to a rental housing project.
- A three-year tax holiday out of 10 years with respect to profits derived from an eligible startup business that involves innovation, development or improvement of products or processes or services or a scalable business model with a high potential of employment generation or wealth creation, for domestic companies or limited liability partnerships incorporated between 1 April 2016 and 1 April 2025 with a turnover limit of INR1 billion in the fiscal year of claiming the deduction, subject to other conditions.
- A 15-year tax holiday with respect to profits derived from export activities by units that begin to manufacture or produce articles or things or provide services in SEZs. For the first five years of the tax holiday, a tax deduction equal to 100% of the profits derived from the export of articles, things or services provided is available. For the following five years, a tax deduction equal to 50% of the profits is available. For the next five years, the availability of the deduction is contingent on the allocation of the profits to a specified reserve and the use of such amounts in the prescribed manner. The deduction is capped at 50% of the profits allocated to the reserve.
- A 10-year tax deduction equal to 100% of profits derived from an undertaking that begins the manufacturing or production of specified goods or carries on specified business in northeastern states before 1 April 2017. This deduction is also available if an undertaking manufacturing the specified goods undertakes a substantial expansion that involves an increase in investment in plant and machinery by at least 25% of the book value of plant and machinery (computed before depreciation).

- A five-year tax holiday equal to 100% of the profits from the business of collecting and processing or treating of biodegradable waste for either of the following purposes:
  - — Generating power or producing biofertilizers, biopesticides or other biological agents
  - — Producing biogas or making pellets or briquettes for fuel or organic manure
- A tax holiday equal to 100% of the profits has been introduced, effective from the 2018-19 fiscal year for agricultural produce companies with turnover up to INR1 billion. If they are engaged in the purchase, supply, marketing and processing of agricultural produce from their members, the benefit can be obtained for a period of six years beginning with the 2018-19 fiscal year.
- To encourage employment generation, a 30% deduction is provided for three years for the emoluments paid to new employees (employed for 240 days). This period is reduced to 150 days for apparel manufacturers. Effective from the 2018-19 fiscal year, the benefit extends to companies engaged in the manufacturing of leather and footwear. In addition, if the minimum period of employment is not met in the first year, the deduction is still allowed if the criteria is met in the succeeding year.
- Accelerated deduction of capital expenditure (other than expenditure on the acquisition of land, goodwill or financial instruments) incurred, wholly and exclusively for certain specified businesses in the year of the incurrence of such expense. Expense incurred before the commencement of business is allowed as a deduction on the commencement of the specified business. The following are the specified businesses:
  - — Setting up and operating a cold chain facility
  - — Setting up and operating a warehousing facility for storage of agricultural produce
  - — Laying and operating a cross-country natural gas or crude or petroleum oil pipeline network for distribution, including storage facilities that are an integral part of such network
  - — Building and operating in India a new hotel with a two-star or above category, as classified by the central government
  - — Building and operating in India a new hospital with at least 100 beds for patients
  - — Developing and building a housing project under a scheme for slum redevelopment or rehabilitation framed by the government
  - — Developing and building a housing project under a scheme for affordable housing framed by the central or state government in accordance with the prescribed guidelines
  - — Producing fertilizers in a new plant or newly installed capacity in an existing plant
  - — Setting up and operating an inland container depot or a container freight station notified or approved under the Customs Act
  - — Setting up and operating a warehousing facility for storage of sugar
  - — Beekeeping and production of honey and beeswax
  - — Laying and operating a slurry pipeline for the transportation of iron ore

  - — Setting up and operating a semiconductor wafer fabrication manufacturing unit notified by the Central Board of Direct Taxes (CBDT; the administrative authority for direct taxes) in accordance with prescribed guidelines
  - — Developing or maintaining and operating or developing, maintaining and operating a new infrastructure facility
- Tax holiday for 10 consecutive years out of 15 years for a unit of an IFSC in India for the following income:
  - — Income from an offshore banking unit in an SEZ or from specified business with an undertaking located in an SEZ
  - — Income from banking business as specified
  - — Income from any unit of an IFSC
  - — Income from transfer of an aircraft or a ship that was leased by a unit of an IFSC
- 100% exemption for the following income of nonresident arising from an IFSC in India, subject to certain conditions
  - — Income from transfer of non-deliverable forward contracts or offshore derivative instruments or over-the-counter derivatives with an offshore banking unit in an IFSC in India
  - — Income from portfolio of securities or financial products or funds, managed by a portfolio manager on behalf of the nonresident, in an account maintained with an offshore banking unit in any IFSC in India
  - — Royalty or interest from lease of an aircraft or ship paid by a unit of IFSC if such unit commences operations on or before 31 March 2025

Minimum alternative tax. The minimum alternative tax (MAT) applies to a company if the tax payable by the company on its total income, as computed under the Income Tax Act, is less than 15% of its book profit, effective from the 2019-20 fiscal year. It is levied at a rate of 15% of book profit, plus applicable surcharge and cess (the surcharge, as applicable, is imposed at a rate of 7% or 12% for domestic companies and 2% or 5% for foreign companies, and the cess is imposed at a rate of 4%), effective from the 2019-20 fiscal year. The concessional rate of 9% (plus surcharge and cess) applies in the case of a unit located in an IFSC that derives its income solely in convertible foreign exchange. MAT is levied on companies only and does not apply to firms or other persons, which are separately subject to an alternative minimum tax of 18.5% (plus applicable surcharge and cess). MAT does not apply to a foreign company in the following cases:

- In the case of a foreign company that is resident of a jurisdiction with which India has entered into a treaty, if such foreign company does not have a permanent establishment in India under the terms of the relevant treaty
- In the case of a foreign company that is resident of a country with which India has not entered into a treaty, if such foreign company does not have a place of business in India under the corporate tax laws of India

For domestic companies opting for the concessional tax rate of 15% or 22% (see footnote [b] in Section A), the MAT provisions do not apply.

In computing book profit for MAT purposes, certain positive and negative adjustments must be made to the net profit shown in the books of account per the applicable accounting standards.

The net profit as per the profit-and-loss account is increased by the following key items:

- Amount of income tax (including dividend distribution tax, any interest charged under the Income Tax Act, surcharge and cess) paid or payable and the provision for such tax
- Amount carried to any reserves
- Amount allocated to provisions for liabilities other than ascertained liabilities
- Amount allocated to provision for losses of subsidiary companies
- Amount of dividend paid or proposed
- Amount of expenditure related to exempt income
- Amount of depreciation
- Amount of deferred tax and the provision for such tax, if debited to the profit-and-loss account
- Amounts set aside as a provision for diminution in the value of any asset
- Amount in revaluation reserve relating to a revalued asset on retirement of the asset
- Expenditure related to a share of the income of an association of persons that is not taxable
- Expenditure of a foreign company related to capital gains on specified securities, interest, dividends, royalties or fees for technical services, in certain specified circumstances
- Notional loss on the transfer of shares of a special-purpose vehicle to a business trust in exchange for units allotted by the trust, notional loss resulting from any change in the carrying amounts of such units or loss on the transfer of such units
- Expenditure related to royalty income with respect to patents covered by the Patent Box Regime (see Section E)
- Gain on the transfer of shares of a special-purpose vehicle to a business trust in exchange for units

The net profit is decreased by the following key items:

- Amount withdrawn from any reserves or provisions if such amount is credited in the profit-and-loss account
- Amount of losses carried forward (excluding depreciation) or unabsorbed depreciation, whichever is less, according to the books of account in the case of all companies (except as referred to below)
- The aggregate amount of unabsorbed depreciation and losses brought forward in the case of a company against which an application is admitted under the Insolvency and Bankruptcy Code, 2016
- The aggregate amount of unabsorbed depreciation and losses brought forward in case of a specified distressed company, and its direct or indirect subsidiary
- Profits of "sick" industrial companies, which are companies that have accumulated losses equal to or exceeding their net worth at the end of a financial year and are declared to be sick by the Board for Industrial and Financial Reconstruction
- Income that is exempt from tax
- Amount of depreciation debited to the profit-and-loss account excluding depreciation on account of revaluation of assets
- Amount of deferred tax, if any such amount is credited to the profit-and-loss account

- Amount withdrawn from revaluation reserve and credited to the profit-and-loss account, to the extent that it does not exceed depreciation of the revalued assets
- Share in the income of an association of persons that is not taxable
- Capital gains on certain specified securities, interest, royalties, fees for technical services or dividend income of a foreign company in specified circumstances
- Notional gain on the transfer of shares of a special-purpose vehicle to a business trust in exchange for units allotted by the trust, notional gain resulting from any change in the carrying amount of such units or gain on the transfer of such units
- Royalty income with respect to patents covered by Patent Box Regime (see Section E)
- Loss on the transfer of shares of a special-purpose vehicle to a business trust in exchange for units

MAT paid by companies can be carried forward and set off against income tax payable in subsequent years under the normal provisions of the Income Tax Act for a period of 15 years. The maximum amount that can be set off against regular income tax is equal to the difference between the tax payable on the total income as computed under the Income Tax Act and the tax that would have been payable under the MAT provisions for that year.

MAT does not apply to income from life insurance businesses.

In addition, it has been clarified with retrospective effect from the 2000-2001 fiscal year that MAT also does not apply to foreign companies whose total income is comprised solely of profits and gains from the operation of ships and aircrafts, exploration and extraction of mineral oils, and civil construction in certain turnkey power projects, which are subject to presumptive basis of taxation under the Income Tax Act.

A report in a prescribed form that certifies the amount of book profits must be obtained from a chartered accountant.

Capital gains

General. The Income Tax Act prescribes special tax rates for the taxation of capital gains. Gains derived from "transfers" of "capital assets" are subject to tax as capital gains and are deemed to be income in the year of the transfer.

"Transfer" and "capital asset" are broadly defined in the Income Tax Act. In addition, shares or interests in foreign entities are deemed to be capital assets located in India if they derive, directly or indirectly, their value substantially from assets located in India. Gains derived from the transfer of such deemed capital assets are deemed to be income in the year of transfer. This provision does not apply to investments held by nonresidents in Foreign Institutional Investors (FIIs) in certain circumstances.

The tax rate at which capital gains are taxable in India depends on whether the capital asset transferred is a short-term capital asset or a long-term capital asset. A short-term capital asset is defined as a capital asset that is held for less than 36 months immediately before the date of its transfer. However, if the capital asset is an equity

or preference share in a company or a security (for example, a debenture, bond, government security or derivative) listed on a recognized stock exchange in India, a unit of an equity-oriented mutual fund or a specified zero-coupon bond, a 12-month period replaces the 36-month period. In addition, in the case of shares of a company (other than shares listed on recognized stock exchange in India) and immovable property (land or building or both), a 24-month period replaces the 36-month period. A capital asset that is not a short-term capital asset is a long-term capital asset.

Capital gains on specified transactions on which Securities Transaction Tax has been paid on acquisition as well as on sale. Effective from the 2018-19 fiscal year, long-term capital gains in excess of INR100,000 derived from the transfer of equity shares on which Securities Transaction Tax (STT) has been paid on acquisition as well as on sale of equity shares are chargeable to tax at a rate of 10%. These gains were previously exempt from tax.

Effective from the 2018-19 fiscal year, long-term capital gains in excess of INR100,000 derived from the transfer of units of an equity-oriented fund or units of a business trust on a recognized stock exchange in India on which STT has been paid at the time of such transfer is chargeable to tax at a rate of 10%. The exemption from tax on long-term capital gains on such transfer of listed securities is withdrawn, effective from the 2018-19 fiscal year.

Short-term capital gains derived from the transfer of equity shares in a company, units of an equity-oriented fund or units of a business trust on a recognized stock exchange in India are taxable at a reduced rate of 15% plus the surcharge, as applicable, and the cess, if STT has been paid on the transaction.

The tax regime described above applies to all types of taxpayers, including FIIs.

Sales of unlisted equity shares that are included in an initial public offer are also subject to STT and are eligible for the aforementioned reduced rates with respect to long-term or short-term capital gains.

Capital gains on transactions on which STT has not been paid. For sales of shares and units of mutual funds that have not been subject to STT and for capital gains derived from the transfer of a capital asset that is not a specified security, the following are the capital gains tax rates (excluding the applicable surcharge and cess).

Type of taxpayer	Short-term capital gains rate (%) (a)	Long-term capital gains rate (%) (a)
Domestic companies	25/30 (b)	20 (c)
FIIs	30	10
Nonresidents other than FIIs	40	20 (c)(d)

(a) The above rates are subject to a surcharge and cess. The surcharge is levied at a rate of 7% for domestic companies and at a rate of 2% for foreign companies if the net income of the company exceeds INR10 million. The surcharge rate is increased to 12% for domestic companies and 5% for foreign companies if net income exceeds INR100 million. The rate of the cess is 4%.

(b) See footnote (b) of Section A.

(c) A concessional rate of 10% (plus surcharge and cess) applies in certain cases, such as the transfer of listed securities, listed units of mutual funds or zero-coupon bonds, subject to certain conditions.
(d) Gains derived from the transfer of unlisted securities are taxable at a rate of 10%, without the benefit of protection from foreign currency fluctuation and indexation for inflation on the computation of such gains (see discussion below).

Computational provisions. For assets that were acquired on or before 1 April 2001, the market value on that date may be substituted for actual cost in calculating gains. However, for land and buildings, such market value shall not exceed the stamp duty value as of such date. The acquisition cost is indexed for inflation. However, no inflation adjustment is allowed for bonds and debentures. For the purpose of calculating capital gains, the acquisition cost of bonus shares is deemed to be zero. Nonresident companies compute capital gains on shares and debentures in the currency used to purchase such assets, and consequently they are protected from taxation on fluctuations in the value of the Indian rupee. As a result, the benefit of indexation is not available to nonresident companies with respect to the computation of capital gains on shares. If the consideration is not ascertainable or determinable for a transfer, the fair market value of the asset transferred is deemed to be the full value of consideration.

Specific rules apply for the computation of long-term capital gains on the transfer of specified listed securities (equity shares of a company, units of an equity-oriented fund or units of a business trust) on which STT has been paid, as discussed above in *Capital gains on specified transactions on which Securities Transaction Tax has been paid on acquisition as well as on sale.*

If unlisted shares are transferred at a value that is less than fair market value, as prescribed, such fair market value is treated as notional consideration for the transfer of unlisted shares.

Slump sales, demergers and amalgamations. Special rules apply to "slump sales," "demergers" and "amalgamations" (for a description of amalgamations, see Section C).

A "slump sale" is the transfer of an undertaking for a lump-sum consideration without assigning values to the individual assets and liabilities. Effective from the 2020-21 fiscal year, the definition of the term "slump sale" has been widened to include slump "exchange," which is the transfer of an undertaking in exchange for non-monetary consideration. The profits derived from such sale or exchange are taxed as long-term capital gains if the transferred undertaking has been held for more than 36 months.

Capital gains on a slump sale equal the difference between fair market value of the undertaking and the net worth of the undertaking. For purposes of computing capital gains, the net worth of the undertaking equals the difference between the value of the total assets (the sum of the tax-depreciated value of assets that are depreciable for income tax purposes and the book value of other assets other than self-generated goodwill) of the undertaking or division and the book value of liabilities of such undertaking or division. The fair market value of the undertaking is calculated as per the prescribed method.

With respect to companies, a "demerger" is the transfer of an undertaking by one company (demerged company) to another company (resulting company) pursuant to a scheme of arrangement under Sections 230 to 232 of the Companies Act, 2013, provided that certain conditions are satisfied. Subject to certain conditions, the transfer of capital assets in a demerger is not considered to be a transfer subject to capital gains tax if the resulting company is an Indian company.

In a demerger, the shareholders of the demerged company are issued shares in the resulting company in proportion to their existing shareholdings in the demerged company based on a predetermined share-issue ratio. This issuance of shares by the resulting company to the shareholders of the demerged company is exempt from capital gains tax.

In the case of a demerger of a foreign company, the provisions of Sections 230 to 232 of the Companies Act, 2013, do not apply. In such case, a transfer of shares in an Indian company, or shares in a foreign company that derives its value substantially from assets located in India, by the demerged foreign company to the resulting foreign company is exempt from capital gains tax if the following conditions are satisfied:

- Shareholders holding at least 75% in value of the shares in the demerged foreign company continue to remain shareholders of the resulting foreign company.
- Such transfer does not attract capital gains tax in the country of incorporation of the demerged foreign company.

Like demergers, if certain conditions are satisfied, transfers of capital assets in amalgamations are not considered to be transfers subject to capital gains tax, provided the amalgamated company is an Indian company.

In an amalgamation, shareholders of the amalgamating company are usually issued shares in the amalgamated company in exchange for their existing shareholding in the amalgamating company based on a predetermined share-exchange ratio. Such exchange of shares is exempt from capital gains tax if the following conditions are satisfied:

- The transfer is made in consideration of the allotment of shares in the amalgamated company (unless the shareholder itself is the amalgamated company).
- The amalgamated company is an Indian company.

A transfer of shares in an Indian company or shares in a foreign company that derives its value substantially from assets located in India, in an amalgamation of two foreign companies, is exempt from capital gains tax if the following conditions are satisfied:

- At least 25% of the shareholders of the amalgamating foreign company continue to remain shareholders of the amalgamated foreign company.
- Such transfer does not attract capital gains tax in the country of incorporation of the amalgamating foreign companies.

No capital gains tax applies for the conversion of preference shares to equity. Furthermore, the transfer of rupee-denominated bonds of an Indian company issued outside India from one nonresident to another nonresident does not result in capital gains tax in India.

Gains from conversion of stock-in-trade into a capital asset is taxable as business income in the year of conversion. Business income is computed with reference to the fair market value of the stock-in-trade as of the date of conversion. Consequently, the fair market value is regarded as the cost of acquisition of the converted capital asset. The holding period of such capital asset is calculated from the date of conversion. Effective from the 2022-23 fiscal year, income from the transfer of a virtual digital asset is taxed at a rate of 30%, after set-off of acquisition cost. See *Income from digital assets* in Section B for further details.

*Depreciable assets.*To compute capital gains on sales of assets on which depreciation has been allowed, the declining-balance value of the classes of assets as of the beginning of the previous year (including additions during the year) of which the assets form a part is reduced by the sales proceeds of the assets. If the sales proceeds exceed the declining-balance value, the excess is treated as short-term capital gain. Otherwise, no capital gain results from sales of such assets even if the sales proceeds for a particular asset are greater than the cost of the asset.
