EY Board Update Program

AI is redefining risk.
Boards are now its architects.

1 al 4 de setiembre 2026 - London

International Centre For Sustainability

Learning outcomes

Scan

- ▶ Understand why traditional risk maps fail in disruptive, AI-driven environments.
- ▶ Anticipate the AI futures boards are already pursuing and the strategic impact.
- ▶ See how governance and (control frameworks are evolving) in the UK to address uncertainty.

Focus

- ▶ Distinguish the critical strategic and risk choices boards cannot delegate.
- ▶ Assess how AI reshapes strategy, ambition and value creation – not just operations.
- ▶ Strengthen board judgement in conditions of uncertainty, complexity and external dependency.

Act

- ▶ Shift from compliance-driven oversight to entity-level risk and control thinking.
- ▶ Set board-level AI ambition, risk appetite, and governance.
- ▶ Define which AI and technology risks the organisation will accept.

Methodology

Boards are no longer just overseeing risk. AI, cyber exposure, geopolitics and regulation are reshaping how value is created – and where it is destroyed. This program supports boards in governing AI driven risk and complexity, strengthening judgement, accountability and governance at board level, using the UK as a reference point for advanced practice.

Insights

Exploration of best practices and board updates, focusing on how they evolve to address emerging challenges.

Case studies

Analysis of real and hypothetical cases on how companies and boards have successfully (or unsuccessfully) managed recent emerging challenges.

Board simulation exercises

Active simulations designed to prepare participants for presenting and managing discussions with boards in challenging scenarios.

Session and reception at the **House of Parliament.**
